Συνοπτικά, ο σκοπός του προγράμματος «Πράσινες Γειτονιές» είναι να δημιουργήσει ένα μαθησιακό περιβάλλον όπου η γνώση, η τεχνολογία, η βιωματική μάθηση και η κοινωνική συμμετοχή συνδυάζονται για την ανάπτυξη ολοκληρωμένων δεξιοτήτων στα νήπια. Το πρόγραμμα ενσωματώνει τις θεωρητικές αρχές των Piaget, Vygotsky, Dewey και Kolb, ενώ παράλληλα αξιοποιεί διεθνείς ερευνητικές καταγραφές για την αποτελεσματικότητα των ΤΠΕ στην προσχολική εκπαίδευση, όπως αναφέρουν οι Papadakis & Kalogiannakis (2019), Marsh et al. (2018) και Kontovourki & Tafa (2019). Μέσα από αυτήν τη σύνθεση θεωρίας και πρακτικής, το πρόγραμμα στοχεύει στην ανάπτυξη ψηφιακών, μαθηματικών, κοινωνικών και περιβαλλοντικών δεξιοτήτων, προετοιμάζοντας τα νήπια για έναν συμμετοχικό και βιώσιμο κόσμο.

ΥΛΟΠΟΙΗΣΗ ΤΟΥ ΠΡΟΓΡΑΜΜΑΤΟΣ

Το πρόγραμμα «Πράσινες Γειτονιές» υλοποιήθηκε στο 33ο Νηπιαγωγείο Ευόσμου κατά τη διάρκεια του σχολικού έτους 2024-2025, ακολουθώντας μια δομημένη διαδικασία που ενσωμάτωσε βιωματική, διερευνητική και συνεργατική μάθηση. Οι δραστηριότητες σχεδιάστηκαν με γνώμονα τις θεωρητικές αρχές του Piaget (1972) για τη γνωστική ανάπτυξη, του Vygotsky (1978) για τη σημασία της κοινωνικής αλληλεπίδρασης και της Ζώνης Επικείμενης Ανάπτυξης, του Dewey (1986) για τη μάθηση μέσα από την εμπειρία, καθώς και του Kolb (2014) για τον κύκλο της εμπειρικής μάθησης.

Η διαδικασία υλοποίησης περιλάμβανε τα ακόλουθα στάδια:

1. Εισαγωγή στη θεματική του πράσινου: Η αρχική δραστηριότητα ξεκίνησε με έναν καταιγισμό ιδεών και τη δημιουργία εννοιολογικού χάρτη, όπου τα νήπια εκφράζουν τις γνώσεις και τις ιδέες τους για το πράσινο Η δραστηριότητα αυτή ενισχύει την ενεργό συμμετοχή και την κριτική σκέψη, καθώς τα παιδιά συγκρίνουν και οργανώνουν ιδέες (Marsh et al., 2018; Papadakis & Kalogiannakis, 2016).

2. Μελέτη πεδίου και παρατήρηση του φυσικού περιβάλλοντος: Τα νήπια συμμετείχαν σε επίσκεψη στη γειτονιά, παρατηρώντας δέντρα, φυτά, λουλούδια και αστικά στοιχεία. Η βιωματική αυτή εμπειρία συνδέεται με τον θεωρητικό προσανατολισμό του Dewey (1938), σύμφωνα με τον οποίο η μάθηση προκύπτει μέσα από τη δράση και την άμεση εμπειρία. Καταγράφηκαν στοιχεία όπως η θέση των δέντρων, οι περιοχές με περισσότερο ή λιγότερο πράσινο και οι δυνατότητες βελτίωσης του περιβάλλοντος.

3. Χρήση ψηφιακών εργαλείων: Το Google Lens χρησιμοποιήθηκε για την ταυτοποίηση των φυτών και των δέντρων, ενισχύοντας την επιστημονική παρατήρηση και τη γνώση της βιοποικιλότητας. Παράλληλα, η δημιουργία ψηφιακού χάρτη στο Google Earth επέτρεψε στα νήπια να απεικονίσουν συνεργατικά τις προτάσεις τους για τη βελτίωση της γειτονιάς, ενισχύοντας δεξιότητες προσανατολισμού, και μαθηματικής σκέψης (Tzekaki, 2010). Η ενσωμάτωση μαθηματικών και γεωγραφικών εννοιών σε αυτό το πλαίσιο επιτρέπει στα παιδιά να κατανοήσουν χωρικές σχέσεις και μετρήσεις με τρόπο βιωματικό.

4. Σχεδιασμός παρεμβάσεων και συλλογική δράση: Τα νήπια συζήτησαν πώς θα μπορούσε να εμπλουτιστεί η γειτονιά τους με περισσότερα στοιχεία πρασίνου όπως φύτευση δέντρων, δημιουργία παρτεριών με λουλούδια σε σημεία αναψυχής. Η δραστηριότητα αυτή προάγει την κοινωνική συμμετοχή και την ανάπτυξη συνεργατικών δεξιοτήτων, σε συμφωνία με τις θεωρίες του Vygotsky (1978) και τις διεθνείς πρακτικές για ενεργό πολίτη από μικρή ηλικία (UNESCO, 2017).

5. Ανταλλαγή εμπειριών με άλλα σχολεία: Μέσω διαδικτυακών συναντήσεων, τα νήπια μοιράστηκαν ιδέες και προτάσεις με παιδιά άλλων σχολείων, ενισχύοντας τη διασχολική συνεργασία, την επικοινωνία και την κοινωνική ενδυνάμωση. Αυτή η προσέγγιση υποστηρίζει την έννοια της συμμετοχικότητας και της συλλογικής δράσης, όπως περιγράφεται σε διεθνείς έρευνες (Marsh et al., 2018; Kontovourki & Tafa, 2021).

6. Σύνθεση και παρουσίαση αποτελεσμάτων: Τα νήπια παρουσίασαν τον ψηφιακό χάρτη και τις προτάσεις τους στη ***Βραδιά του Ερευνητή*** στη Θεσσαλονίκη (27-09-2024). Η διαδικασία αυτή ενίσχυσε, την αυτοπεποίθηση και τη δημιουργικότητα των παιδιών, την εξωστρέφεια του σχολείου ενώ ταυτόχρονα προώθησε την έννοια της διάχυσης γνώσης στην κοινωνία.

Η ενσωμάτωση των ψηφιακών εργαλείων υποστηρίξε τη διερευνητική μάθηση, επιτρέποντας στα νήπια να καταγράψουν, να επεξεργαστούν και να παρουσιάσουν πληροφορίες με δημιουργικό τρόπο (Papadakis & Kalogiannakis, 2019). Επιπλέον, η χρήση των ψηφιακών εργαλείων συνδέεται με τη μαθηματική ανάπτυξη, καθώς όπως τονίζει η Τζεκάκη (2010), μέσα από την δράση και τη συζήτηση, τα νήπια διαπραγματεύονται και επεξεργάζονται έννοιες και στρατηγικές για την δημιουργία του χάρτη και οδηγούνται σε μαθηματική μάθηση.

Η διαδικασία ολοκληρώνεται με αναστοχαστικές δραστηριότητες, όπου τα παιδιά συζητούν τι έμαθαν, πώς συνεργάστηκαν και ποιες αλλαγές προτείνουν για τη γειτονιά τους. Ο αναστοχασμός αυτός υποστηρίζει την ανάπτυξη μεταγνωστικών δεξιοτήτων, ενισχύει την ορθολογική σκέψη και εμβαθύνει στη μάθηση, σύμφωνα με τα τέσσερα στάδια του κύκλου μάθησης του Kolb (2014): της συγκεκριμένης εμπειρίας, της στοχαστικής παρατήρησης, την αφηρημένη νοητική πρόσληψη και του ενεργού πειραματισμού

Συνοψίζοντας μπορούμε να πούμε ότι η υλοποίηση του προγράμματος και η αξιοποίηση των νέων τεχνολογιών στην προσχολική εκπαίδευση μπορεί να δημιουργήσει ένα πλούσιο, διαδραστικό και πολυαισθητηριακό μαθησιακό περιβάλλον, όπου η γνώση, η δημιουργικότητα και η κοινωνική συμμετοχή συνδέονται με πρακτικές αειφορίας και μαθηματικής σκέψης (Siraj-Blatchford, Smith, & Samuelsson,2010); Marsh et al., 2018; Kontovourki & Tafa, 2019; Tzekaki, 2010).

ΣΥΜΠΕΡΑΣΜΑΤΑ

Η εφαρμογή του προγράμματος «Πράσινες Γειτονιές» ανέδειξε τη σημαντική συμβολή των ψηφιακών εργαλείων στην προσχολική εκπαίδευση, ενοποιώντας τις παιδαγωγικές αρχές της βιωματικής μάθησης, της διερευνητικής προσέγγισης και της κοινωνικής συμμετοχής. Η ενεργή συμμετοχή των νηπίων κατά τη διάρκεια του προγράμματος έδειξε ότι η ενσωμάτωση απλών ψηφιακών εφαρμογών όπως το Google Earth και το Google Lens αποτελούν παιδαγωγικά εργαλεία που προωθούν νέες προσεγγίσεις που ανταποκρίνονται στις σύγχρονες προκλήσεις της αειφορίας (Siraj-Blatchford, Smith, & Samuelsson, 2010; Ärlemalm-Hagsér & Elliott, 2017; Hedefalk, Almqvist & Östman, 2015)

Μέσα από την παρατήρηση και χαρτογράφηση του φυσικού περιβάλλοντος, τα νήπια εξοικειώθηκαν με τον χώρο που ζουν κι ανέπτυξαν δράση γνωρίζοντας τον καλύτερα. Μέσα από οικείες καταστάσεις (η γειτονιά του νηπιαγωγείο τους), διάβασαν τον χάρτη, εντοπίζοντας την θέση τους και σχεδιάζοντας την διαδρομή που ακολούθησαν (Tzekaki, 2010). Η δράση αυτή ενίσχυσε τη σύνδεση μαθηματικών εννοιών με την καθημερινή εμπειρία των παιδιών, υπογραμμίζοντας τη σημασία της βιωματικής μάθησης και της εφαρμογής των εννοιών του χώρου και της μέτρησης σε πραγματικά περιβαλλοντα πλαίσια.

Η συνεργασία μεταξύ των νηπίων, η ανταλλαγή απόψεων με άλλα σχολεία και η παρουσίαση των ψηφιακών χαρτών στη Βραδιά του Ερευνητή ενίσχυσαν τις κοινωνικές και επικοινωνιακές δεξιότητες, τη συλλογική λήψη αποφάσεων και την υπευθυνότητα. Οι πρακτικές αυτές βρίσκονται σε συμφωνία με τις θεωρίες του Vygotsky (1978) για τη σημασία της κοινωνικής αλληλεπίδρασης στη μάθηση και του Dewey (1986) για την ενεργή συμμετοχή στη μάθηση μέσω εμπειρίας.

Επιπλέον, η ενσωμάτωση της ψηφιακής τεχνολογίας προώθησε την ανάπτυξη δεξιοτήτων του 21ου αιώνα, όπως η κριτική σκέψη, η δημιουργικότητα και η επίλυση προβλημάτων (Voogt & Roblin, 2012). Τα νήπια είχαν την ευκαιρία να εφαρμόσουν αυτές τις δεξιότητες στην πραγματική ζωή, προτείνοντας πρακτικές παρεμβάσεις για τη βελτίωση της γειτονιάς τους και συνδέοντας τη σχολική μάθηση με την κοινωνική ευθύνη και την αειφορία (UNESCO, 2017)

Παράλληλα, η συνεργατική δημιουργία ψηφιακών χαρτών και η παρουσίαση προτάσεων για το περιβάλλον συνδύασαν την ατομική μάθηση με την ομαδική δράση, δημιουργώντας ένα πλούσιο μαθησιακό περιβάλλον που προάγει την κοινωνική ενδυνάμωση και την ενεργό συμμετοχή. Διαμορφώθηκε με άλλα λόγια ένα πλαίσιο που συνδύασε την εκπαίδευση με τις αξίες της βιωσιμότητας, ενθαρρύνοντας τη μάθηση μέσα από παιχνίδι, πειραματισμό και συνεργασία. (Sterling, 2010; Plowman & Stephen, 2007).

Η εφαρμογή του προγράμματος στην τάξη του νηπιαγωγείου επιβεβαίωσε ότι τέτοιες δράσεις μπορούν να ενσωματωθούν πρακτικά στην προσχολική εκπαίδευση για τη διαμόρφωση πολιτών με περιβαλλοντική συνείδηση, ψηφιακές δεξιότητες και ικανότητα συμμετοχής σε συλλογικές δράσεις (Markopoulou, 2024) . Η βιωματική εμπλοκή των παιδιών με το φυσικό περιβάλλον και η χρήση ψηφιακών εργαλείων επέτρεψε την καλλιέργεια στάσεων και αξιών που προάγουν την αειφορία, σύμφωνα με τις κατευθυντήριες γραμμές για την Εκπαίδευση για την Αειφόρο Ανάπτυξη (UNESCO, 2017;).

Τέλος, το πρόγραμμα «Πράσινες Γειτονιές» αποτελεί χαρακτηριστικό παράδειγμα του τρόπου με τον οποίο οι νέες τεχνολογίες μπορούν να υποστηρίξουν τη μετάβαση προς το αειφόρο σχολείο, ενισχύοντας τη μαθησιακή πρόοδο, την κοινωνική αλληλεπίδραση, την οικολογική συνείδηση και την ανάπτυξη δεξιοτήτων του 21ου αιώνα. Η εμπειρία δείχνει ότι η ενσωμάτωση ΤΠΕ δεν αποτελεί μόνο τεχνολογικό επίτευγμα, αλλά ουσιαστικό παιδαγωγικό εργαλείο για τη δημιουργία ολόπλευρα αναπτυγμένων παιδιών, ικανών να συμμετέχουν ενεργά στη βελτίωση του περιβάλλοντός τους και στην προώθηση αξιών βιώσιμης ανάπτυξης (Siraj-Blatchford, Smith, & Samuelsson,2010 ; Davis, 2010).

ΠΕΡΙΛΗΨΗ

Η παρούσα εργασία πραγματεύεται την αρχιτεκτονική σχεδίαση και ανάπτυξη ενός λογισμικού μεταγραφής και εκμάθησης του κώδικα Braille, με στόχο την ενίσχυση της προσβασιμότητας για άτομα με αναπηρία όρασης. Το λογισμικό υποστηρίζει τη μεταγραφή ελληνικών και αγγλικών κειμένων σε Braille και ταυτόχρονα προσφέρει ένα εύχρηστο περιβάλλον εκμάθησης του κώδικα. Η μεθοδολογία βασίζεται στην Επίπεδη Αρχιτεκτονική, η οποία περιλαμβάνει: (α) το Επίπεδο Χρήστη, όπου ο χρήστης εισάγει το κείμενο, (β) το Επίπεδο Λογικής Επιχειρήσεων, όπου υλοποιούνται οι αλγόριθμοι αναγνώρισης γλώσσας και μεταγραφής, (γ) το Επίπεδο Δεδομένων, με τη χρήση πινάκων αντιστοίχισης χαρακτήρων. Κύρια ευρήματα της εργασίας αποτελούν η ανάπτυξη ενός ακριβούς και αποδοτικού εργαλείου μεταγραφής, η φιλικότητα της διεπαφής προς τους χρήστες, καθώς και η δυνατότητα μελλοντικής επεκτασιμότητας. Το τελικό προϊόν συμβάλλει ουσιαστικά στην εκπαιδευτική και κοινωνική ένταξη ατόμων με προβλήματα όρασης, προσφέροντας ένα σύγχρονο εργαλείο καθημερινής χρήσης.

Οι αλγόριθμοι εκμάθησης και μεταγραφής περιλαμβάνουν έλεγχο εγκυρότητας χαρακτήρων, αναγνώριση γλώσσας, διαχείριση ειδικών συμβόλων, και ακριβή αντιστοίχιση σε Braille. Η διεπαφή είναι σχεδιασμένη με βάση τις αρχές προσβασιμότητας και καθολικής σχεδίασης για απρόσκοπτη χρήση από άτομα με οπτική αναπηρία.

Η αξιολόγηση του συστήματος κατέδειξε υψηλή ακρίβεια μεταγραφής, γρήγορη απόκριση και θετικά σχόλια από χρήστες και εκπαιδευτικούς, ενώ προτείνονται μελλοντικές επεκτάσεις όπως η υποστήριξη μαθηματικού Braille, η ενσωμάτωση φωνητικής εξόδου και διασύνδεση με συσκευές Braille display.

Η εργασία συμβάλλει σημαντικά στην προώθηση της εκπαιδευτικής ισότητας και της κοινωνικής ένταξης μέσω καινοτόμων τεχνολογιών προσβασιμότητας.

Λέξεις – κλειδιά: Αρχιτεκτονική Λογισμικού, Κώδικας Braille, Προσβασιμότητα, Μεταγραφή Κειμένου, Εκμάθηση Υποβοηθούμενη από Υπολογιστή, Επίπεδη Αρχιτεκτονική.

ΕΙΣΑΓΩΓΗ

Η πρόσβαση στην εκπαίδευση αποτελεί θεμελιώδες ανθρώπινο δικαίωμα, το οποίο πρέπει να διασφαλίζεται για όλους, ανεξαρτήτως σωματικών ή γνωστικών ιδιαιτεροτήτων. Ωστόσο, τα άτομα με **οπτική αναπηρία** εξακολουθούν να αντιμετωπίζουν σημαντικά εμπόδια στην ισότιμη συμμετοχή τους στη μαθησιακή διαδικασία. Η έλλειψη κατάλληλων εργαλείων, τεχνολογιών και εκπαιδευτικού υλικού σε μορφές προσιτές για άτομα με προβλήματα όρασης συχνά περιορίζει τις ευκαιρίες τους για εκπαίδευση και κοινωνική ένταξη (UNESCO, 2022).

Ο **κώδικας Braille**, που αναπτύχθηκε από τον Louis Braille τον 19ο αιώνα, αποτέλεσε μια επαναστατική τομή στην επικοινωνία και την εκπαίδευση των ατόμων με οπτική αναπηρία. Μέσω του Braille, οι μαθητές έχουν τη δυνατότητα να διαβάζουν, να γράφουν και να αλληλεπιδρούν με το γραπτό λόγο, διευρύνοντας τις δυνατότητες συμμετοχής τους στο εκπαιδευτικό περιβάλλον (Rex et al., 2020). Ωστόσο, η δημιουργία και η διάθεση εκπαιδευτικού υλικού σε Braille παραμένει συχνά μια **χρονοβόρα** και **κοστοβόρα διαδικασία** (Koutsogiannis & Papadopoulou, 2019).

Η παρούσα εργασία εστιάζει στην **ανάπτυξη λογισμικού αυτόματης μεταγραφής ελληνικού και αγγλικού κειμένου σε κώδικα Braille**, καθώς και στη δημιουργία **εκπαιδευτικού περιβάλλοντος εκμάθησης** του συστήματος Braille. Η υλοποίηση ενός τέτοιου εργαλείου συνεισφέρει ουσιαστικά στην **προσβασιμότητα** και στην **ισότιμη συμμετοχή** των ατόμων με προβλήματα όρασης στην εκπαίδευση, επιτρέποντας την ταχύτερη παραγωγή προσβάσιμου υλικού και τη διευκόλυνση της μαθησιακής διαδικασίας (World Health Organization [WHO], 2021).

Η αξιοποίηση των σύγχρονων τεχνολογιών πληροφορικής και επεξεργασίας φυσικής γλώσσας (**NLP**) καθιστά δυνατή τη **βελτίωση της ποιότητας της εκπαίδευσης** και τη δημιουργία **νέων δυνατοτήτων** για μαθητές, εκπαιδευτικούς και υποστηρικτές (Young & Temple, 2021). Μέσα από την ενσωμάτωση αυτοματοποιημένων διαδικασιών, η παρούσα εργασία στοχεύει να συμβάλει στη μείωση των ανισοτήτων στην εκπαίδευση και στην προώθηση μιας πιο **συμπεριληπτικής κοινωνίας** (European Disability Forum, 2023).

Μεθοδολογία / Παιδαγωγικό Πλαίσιο

Η ανάπτυξη του λογισμικού μεταγραφής και εκμάθησης του κώδικα Braille βασίζεται σε μια διεπιστημονική μεθοδολογία που συνδυάζει τεχνικά και παιδαγωγικά στοιχεία με σκοπό τη μεγιστοποίηση της διδακτικής αποτελεσματικότητας και της προσβασιμότητας. Το παιδαγωγικό πλαίσιο εδράζεται στην αρχή της ενεργητικής μάθησης (active learning), η οποία προωθεί την αλληλεπίδραση του χρήστη με το εκπαιδευτικό υλικό, ενισχύοντας την αυτονομία και την εποικοδομητική συμμετοχή (Bonwell & Eison, 1991). Η χρήση υπολογιστή ως μέσο υποβοηθούμενης μάθησης (Computer-Assisted Instruction, CAI) επιτρέπει τη προσωποποίηση της μαθησιακής διαδικασίας και την παροχή άμεσου ανατροφοδοτικού σχολίου, στοιχεία κλειδιά για την αποτελεσματική εκμάθηση δεξιοτήτων όπως ο κώδικας Braille (Wang & Reeves, 2007).

Σε επίπεδο λογισμικού, η μεθοδολογία υλοποιείται μέσω της επίπεδης αρχιτεκτονικής, η οποία διαχωρίζει τις λειτουργίες σε στρώματα: α) το Επίπεδο Χρήστη για την εισαγωγή και αλληλεπίδραση με το περιβάλλον, β) το Επίπεδο Λογικής Επιχειρήσεων όπου υλοποιούνται οι αλγόριθμοι γλωσσικής ανάλυσης και μεταγραφής, και γ) το Επίπεδο Δεδομένων με τους πίνακες αντιστοίχισης χαρακτήρων και κώδικα Braille. Αυτή η δομή διευκολύνει τη συντηρησιμότητα και την επεκτασιμότητα του συστήματος, ενώ παράλληλα ενισχύει την ευχρηστία και την προσαρμοστικότητα (Bass, Clements, & Kazman, 2012).

Επιπλέον, η μεθοδολογική προσέγγιση λαμβάνει υπόψη τις αρχές της καθολικής σχεδίασης για τη μάθηση (Universal Design for Learning – UDL), που στοχεύει στη δημιουργία εκπαιδευτικού υλικού προσβάσιμου από όλους, ανεξαρτήτως ικανοτήτων και αναγκών (Meyer, Rose, & Gordon, 2014). Η εφαρμογή των UDL αρχών εξασφαλίζει ότι οι χρήστες με οπτική αναπηρία μπορούν να αλληλεπιδρούν με το περιβάλλον μάθησης του λογισμικού με ευκολία, ενώ παράλληλα υποστηρίζεται η διαφοροποίηση στην εκμάθηση.

Συνολικά, η μεθοδολογία που υιοθετήθηκε επιτρέπει την ταυτόχρονη κάλυψη τεχνικών απαιτήσεων και διδακτικών στόχων, προσφέροντας ένα ολοκληρωμένο και αποτελεσματικό εργαλείο που συμβάλλει στη βελτίωση της εκπαιδευτικής εμπειρίας των ατόμων με προβλήματα όρασης (Brusilovsky, 2001; Kukulska-Hulme, 2012).

Στόχοι της Εργασίας

Η παρούσα εργασία έχει ως βασικούς στόχους:

Αυτοματοποιημένη μεταγραφή ελληνικού και αγγλικού κειμένου σε κώδικα Braille: Στόχος είναι η ανάπτυξη ενός ακριβούς και αποδοτικού λογισμικού που να μετατρέπει αυτόματα κείμενα στις δύο γλώσσες σε Braille, λαμβάνοντας υπόψη τις γλωσσικές ιδιαιτερότητες και την ορθότητα της απόδοσης. Η αυτοματοποίηση της μεταγραφής συμβάλλει στη μείωση του χρόνου και του κόστους παραγωγής προσβάσιμου εκπαιδευτικού υλικού για άτομα με προβλήματα όρασης (Kintsch & Rawson, 2005; UNESCO, 2022).

Δημιουργία εκπαιδευτικού περιβάλλοντος εκμάθησης του κώδικα Braille: Σχεδιάζεται ένα εύχρηστο υπολογιστικό περιβάλλον που υποστηρίζει τη διδασκαλία και την εκμάθηση του Braille, ενθαρρύνοντας την αλληλεπίδραση, την αυτονομία και την αυθεντική εμπειρία μάθησης (Meyer, Rose, & Gordon, 2014; Wang & Reeves, 2007). Με αυτόν τον τρόπο, ενισχύεται η εκπαιδευτική πρόσβαση και η κοινωνική ένταξη των ατόμων με οπτική αναπηρία (WHO, 2021).

Η συναρμογή αυτών των στόχων στοχεύει στην αξιοποίηση των σύγχρονων τεχνολογιών για τη μείωση εκπαιδευτικών ανισοτήτων, προωθώντας μια περισσότερο συγκοινωνιακή και προσβάσιμη μαθησιακή διαδικασία (European Disability Forum, 2023).

Περιγραφή του υλοποιημένου λογισμικού

Το αναπτυγμένο λογισμικό αποτελεί ένα ολοκληρωμένο εργαλείο μεταγραφής και εκμάθησης του κώδικα Braille, το οποίο διακρίνεται για την ακρίβεια, την ευχρηστία και την υποστήριξη διγλωσσικών κειμένων, ελληνικών και αγγλικών. Βασικά χαρακτηριστικά του λογισμικού περιλαμβάνουν:

Αυτοματοποιημένη μεταγραφή κειμένου σε Braille: Υλοποιούνται αλγόριθμοι αναγνώρισης και επεξεργασίας φυσικής γλώσσας (NLP), οι οποίοι επιτρέπουν την αυτόματη μετάφραση των ελληνικών και αγγλικών κειμένων στον αντίστοιχο κώδικα Braille, λαμβάνοντας υπόψη τις γλωσσικές ιδιαιτερότητες και τη σωστή διαχείριση τόνων, σημείων στίξης και ειδικών χαρακτήρων (Kukulska-Hulme, 2012).

Διπλή γλωσσική υποστήριξη: Το σύστημα υποστηρίζει πλήρως τόσο τα ελληνικά όσο και τα αγγλικά, επιτρέποντας την ευρεία χρήση του σε διαφορετικά εκπαιδευτικά και κοινωνικά περιβάλλοντα και καλύπτοντας τις ανάγκες διγλωσσικών χρηστών (Young & Temple, 2021).

Φιλικό περιβάλλον χρήστη: Ο σχεδιασμός της διεπαφής ακολουθεί αρχές καθολικής σχεδίασης (UDL), ώστε να διασφαλίζει την προσβασιμότητα για άτομα με οπτική αναπηρία, με ξεκάθαρη δομή, εύκολη πλοήγηση και υποστήριξη παραμέτρων προσαρμογής (Meyer, Rose, & Gordon, 2014).

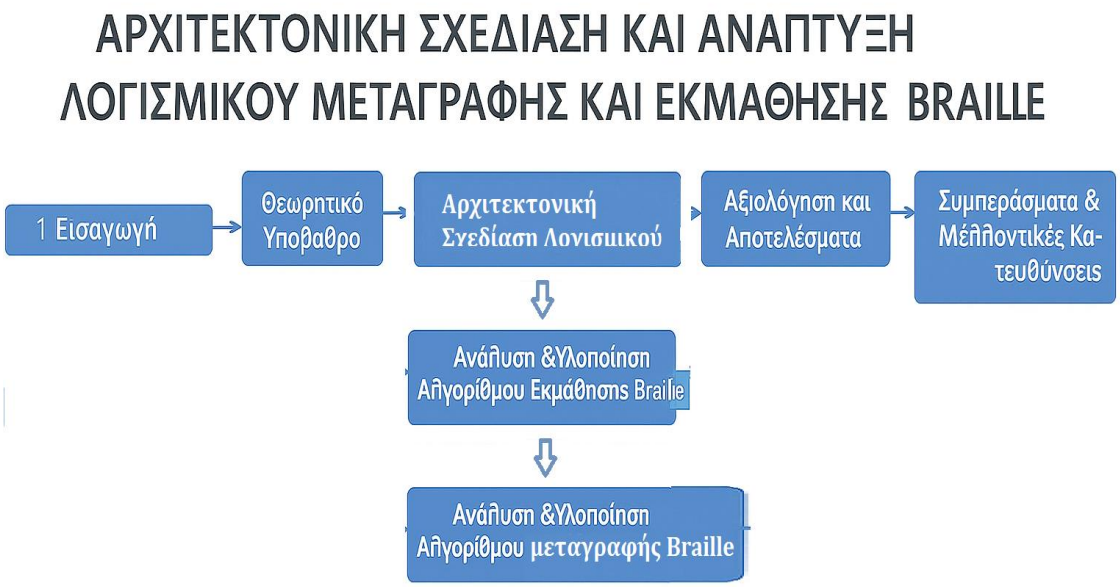
Εκπαιδευτικό περιβάλλον: Παρέχονται διαδραστικά εργαλεία εκμάθησης που βοηθούν τους χρήστες να κατανοήσουν και να μάθουν τον κώδικα Braille μέσω ασκήσεων, οπτικοακουστικής υποστήριξης και άμεσης ανατροφοδότησης.

Η τριστρωματική (επίπεδη) αρχιτεκτονική του λογισμικού διευκολύνει τη μελλοντική συντήρηση και επεκτασιμότητα, επιτρέποντας την ανεξάρτητη ανάπτυξη των επιπέδων χρήστη, επιχειρησιακής λογικής και διαχείρισης δεδομένων (Bass, Clements, & Kazman, 2012).

Οργάνωση της εργασίας

Η παρούσα εργασία οργανώνεται ως εξής:

Στο Κεφάλαιο 1 (Εισαγωγή) παρουσιάζονται το πλαίσιο, η σημασία και οι στόχοι της έρευνας, καθώς και το θεωρητικό και κοινωνικό υπόβαθρο.



Το Κεφάλαιο 2 περιλαμβάνει τη Μεθοδολογία και το Παιδαγωγικό Πλαίσιο, όπου αναλύονται οι αρχές βάσει των οποίων σχεδιάστηκε και υλοποιήθηκε το λογισμικό, καθώς και η διδακτική προσέγγιση που υποστηρίζει.

Στο Κεφάλαιο 3 περιγράφεται λεπτομερώς η αρχιτεκτονική και τα τεχνικά χαρακτηριστικά του υλοποιημένου συστήματος, συμπεριλαμβανομένων των αλγορίθμων μεταγραφής, της υποστήριξης γλωσσών και της διεπαφής χρήστη.

Το Κεφάλαιο 4 παρουσιάζει τα αποτελέσματα των δοκιμών, την αξιολόγηση της απόδοσης και την αποδοχή του λογισμικού από τους χρήστες.

Τέλος, στο Κεφάλαιο 5 συνοψίζονται τα κύρια ευρήματα, προτείνονται κατευθύνσεις για μελλοντική έρευνα και ανάπτυξη, και αναδεικνύεται η συμβολή της εργασίας στην εκπαιδευτική προσβασιμότητα.

Εικόνα 1
Οργανόγραμμα δομής εργασίας

ΘΕΩΡΗΤΙΚΟ ΥΠΟΒΑΘΡΟ

Κώδικας Braille: Ιστορικό, Δομή, Γλωσσικά Συστήματα και Σημασία στην Εκπαιδευτική Προσβασιμότητα

Ο κώδικας Braille αναπτύχθηκε στις αρχές του 19ου αιώνα από τον Louis Braille, ο οποίος μετέτρεψε το προηγούμενο σύστημα "night writing" σε έναν κώδικα με έξι σημεία που επιτρέπει την ανάγνωση με το αφτί των δακτύλων (Braille cells) (Wikipedia, 2024). Το σύστημα Braille αποτελείται από κελία των έξι κουκκίδων οργανωμένες σε δύο στήλες και τρεις σειρές, δημιουργώντας 64 πιθανά μοτίβα που αντιστοιχούν σε γράμματα, αριθμούς και σημεία στίξης (Braille - Wikipedia, 2024). Παράλληλα, ο κώδικας Braille έχει προσαρμοστεί και για πάνω από 133 γλώσσες, μεταξύ των οποίων και τα ελληνικά (Greek Braille - Wikipedia, 2012).

Στα ελληνικά, ο κώδικας Braille υποστηρίζει τόσο το μονοτονικό όσο και το πολυτονικό σύστημα, καλύπτοντας τη χρήση τόνων και πνευμάτων, κάτι που είναι κρίσιμο για την πιστή αναπαράσταση του γραπτού λόγου (Greek Braille - Wikipedia, 2012). Η δυνατότητα αυτή καθιστά τον κώδικα Braille ένα απαραίτητο εργαλείο εκπαιδευτικής προσβασιμότητας για άτομα με οπτική αναπηρία, καθώς τους παρέχει τη δυνατότητα ανάγνωσης, γραφής και εκμάθησης γλωσσών που χρησιμοποιούν διαφορετικά ορθογραφικά και φωνητικά μοτίβα (WHO, 2021).

Προσβασιμότητα και Τεχνολογίες Υποστήριξης για Άτομα με Προβλήματα Όρασης

Η προσβασιμότητα στην εκπαίδευση και την κοινωνία για άτομα με προβλήματα όρασης εξαρτάται σε σημαντικό βαθμό από τη διάθεση τεχνολογικών εργαλείων που υποστηρίζουν τη διδασκαλία και την πληροφόρηση. Τέτοιες τεχνολογίες περιλαμβάνουν λογισμικά μεταγραφής κειμένου σε Braille, αναγνώστες οθόνης, και ψηφιακές συσκευές Braille που επιτρέπουν την ανάγνωση και την παραγωγή προσβάσιμου υλικού (European Disability Forum, 2023). Η ενσωμάτωση τεχνολογιών φυσικής γλώσσας και τεχνητής νοημοσύνης βελτιώνει την ακρίβεια και λειτουργικότητα τέτοιων εφαρμογών, συμβάλλοντας ουσιωδώς στην εκπαιδευτική ένταξη και την ενεργό συμμετοχή ατόμων με οπτική αναπηρία (Young & Temple, 2021).

Εισαγωγή στις Βασικές Θεωρίες Αρχιτεκτονικής Λογισμικού με Έμφαση στην Επίπεδη Αρχιτεκτονική

Η αρχιτεκτονική λογισμικού αναφέρεται στη δομή και οργάνωση ενός συστήματος λογισμικού, περιλαμβάνοντας τους βασικούς μηχανισμούς συνεργασίας των διαφόρων τμημάτων (Bass, Clements & Kazman, 2012). Η Επίπεδη Αρχιτεκτονική (Layered Architecture) αποτελεί μία από τις πιο διαδεδομένες προσεγγίσεις, όπου το σύστημα οργανώνεται σε ανεξάρτητα επίπεδα τα οποία αλληλεπιδρούν με συγκεκριμένους κανόνες.

Τα βασικά επίπεδα περιλαμβάνουν το Επίπεδο Χρήστη (User Layer), όπου ο χρήστης αλληλεπιδρά με το σύστημα, το Επίπεδο Λογικής Επιχειρήσεων (Business Logic Layer), όπου υλοποιούνται οι βασικές λειτουργίες και

κανόνες της εφαρμογής, και το Επίπεδο Δεδομένων (Data Layer), που διαχειρίζεται την αποθήκευση και ανάκτηση των δεδομένων (Bass, Clements & Kazman, 2012). Αυτή η αρχιτεκτονική προσφέρει πλεονεκτήματα όπως η ευκολία συντήρησης, η επεκτασιμότητα και η απομόνωση προβλημάτων, στοιχεία κρίσιμα για την ανάπτυξη πολύπλοκων συστημάτων, όπως το λογισμικό μεταγραφής και εκμάθησης Braille.

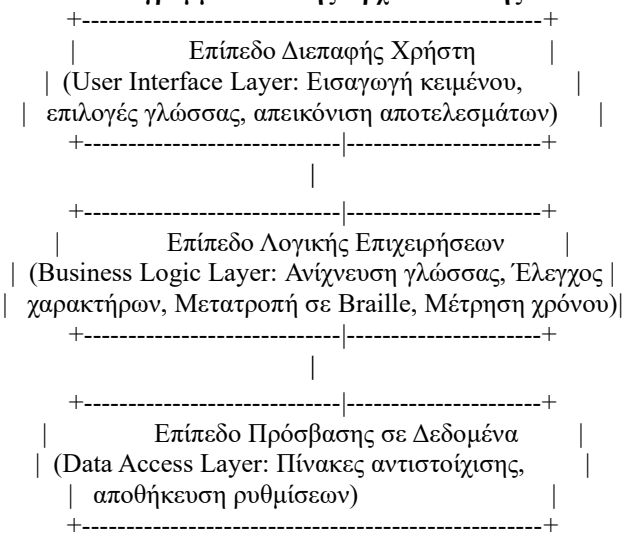
ΑΡΧΙΤΕΚΤΟΝΙΚΗ ΣΧΕΔΙΑΣΗ ΤΟΥ ΛΟΓΙΣΜΙΚΟΥ

Επίπεδη Αρχιτεκτονική: Οργάνωση και Λειτουργία

Η αρχιτεκτονική του αναπτυγμένου λογισμικού βασίζεται στην Επίπεδη Αρχιτεκτονική (Layered Architecture), η οποία οργανώνει το σύστημα σε διακριτά επίπεδα με συγκεκριμένες ευθύνες, ενισχύοντας την ευελιξία, συντηρησιμότητα και επεκτασιμότητα του λογισμικού (Bass, Clements & Kazman, 2012).

Τα κύρια επίπεδα του συστήματος είναι:

Επίπεδο Διεπαφής Χρήστη (User Interface Layer): Το επίπεδο αυτό αναλαμβάνει την αλληλεπίδραση με τον χρήστη, παρέχοντας εργαλεία εισαγωγής κειμένου, επιλογής γλώσσας και απεικόνισης του αποτελέσματος σε Braille. Η διεπαφή είναι σχεδιασμένη ώστε να είναι προσβάσιμη και φιλική προς άτομα με οπτική αναπηρία, με καθαρή δομή και εύκολη πλοήγηση (Meyer, Rose, & Gordon, 2014).



Επίπεδο Λογικής Επιχειρήσεων (Business Logic Layer): Σε αυτό το επίπεδο εκτελούνται οι βασικές λειτουργίες του λογισμικού, όπως η ανίχνευση της γλώσσας εισόδου με αλγορίθμους αναγνώρισης, ο έλεγχος εγκυρότητας και η τυποποίηση των χαρακτήρων κειμένου, καθώς και η μετατροπή τους στον αντίστοιχο κώδικα Braille μέσω πινάκων αντιστοίχισης και κανόνων μεταγραφής (Fly-LeNet model adaptation, 2024; Kukulska-Hulme, 2012). Επιπρόσθετα, το επίπεδο αυτό υποστηρίζει τη μέτρηση χρόνου εκτέλεσης για τη βελτιστοποίηση της απόδοσης.

Επίπεδο Πρόσβασης σε Δεδομένα (Data Access Layer): Διαχειρίζεται την αποθήκευση και ανάκτηση των πινάκων αντιστοίχισης χαρακτήρων Braille, των ρυθμίσεων γλωσσών και άλλων απαραίτητων δεδομένων, ενώ υποστηρίζει την εύκολη ενημέρωση και επέκταση του συστήματος (Bass, Clements & Kazman, 2012).

Διάγραμμα Επίπεδης Αρχιτεκτονικής

Το σύστημα μπορεί να απεικονιστεί με ένα τυπικό διάγραμμα τριών επιπέδων, όπου ο χρήστης αλληλεπιδρά αποκλειστικά με το Επίπεδο Διεπαφής. Τα αιτήματα επεξεργασίας αποστέλλονται στην Επιχειρησιακή Λογική, η οποία συνεργάζεται με το Επίπεδο Δεδομένων για την αντιστοίχιση και μεταγραφή χαρακτήρων. Η διαδικασία ολοκληρώνεται με την αποστολή των αποτελεσμάτων πίσω στη διεπαφή για απεικόνιση.

Διάγραμμα 1
Διάγραμμα επίπεδης Αρχιτεκτονικής

Περιγραφή Διαγράμματος

Στο Επίπεδο Διεπαφής Χρήστη πραγματοποιείται η αλληλεπίδραση με τον χρήστη, όπου εισάγεται το κείμενο, επιλέγεται η γλώσσα και εμφανίζονται τα αποτελέσματα σε μορφή Braille.

Το Επίπεδο Λογικής Επιχειρήσεων φροντίζει για την ανάλυση του κειμένου: ανιχνεύει τη γλώσσα, ελέγχει την εγκυρότητα των χαρακτήρων, και μετατρέπει το κείμενο στον κώδικα Braille. Επίσης, υπολογίζει το χρόνο εκτέλεσης των αλγορίθμων για βελτιστοποίηση.

Το Επίπεδο Πρόσβασης σε Δεδομένα διαχειρίζεται τα δεδομένα που απαιτούνται για τη μεταγραφή, όπως τους πίνακες αντιστοίχισης χαρακτήρων και άλλες παραμέτρους της εφαρμογής.

Σύγκριση με Άλλες Αρχιτεκτονικές Προσεγγίσεις

Σε σύγκριση με άλλες αρχιτεκτονικές, όπως η Μικροϋπηρεσιακή (Microservices) ή η Μονολιθική (Monolithic), η επίπεδη αρχιτεκτονική προσφέρει απλότητα και σαφή διαχωρισμό ευθυνών, που είναι κρίσιμα για εκπαιδευτικό λογισμικό με περιορισμένες απαιτήσεις υποδομής (Bass, Clements & Kazman, 2012). Μικροϋπηρεσιακές προσεγγίσεις, αν και πιο ευέλικτες σε μεγάλης κλίμακας συστήματα, απαιτούν πολύπλοκη διαχείριση δικτύου και συνεχή συντονισμό, που δεν είναι αναγκαία σε αυτή την περίπτωση. Αντίθετα, η επίπεδη αρχιτεκτονική διευκολύνει την άμεση ανάπτυξη και συντήρηση με χαμηλότερο κόστος.

Πλεονεκτήματα της Επιλογής Επίπεδης Αρχιτεκτονικής για το Παρόν Λογισμικό

Η επιλογή της επίπεδης αρχιτεκτονικής στο συγκεκριμένο λογισμικό μεταγραφής και εκμάθησης Braille προσφέρει σημαντικά πλεονεκτήματα:

Απλότητα και ευκολία συντήρησης: Τα επίπεδα επιτρέπουν την ανεξάρτητη ανάπτυξη, δοκιμή και ενημέρωση, μειώνοντας την πολυπλοκότητα (Bass, Clements & Kazman, 2012).

Ευελιξία και επεκτασιμότητα: Διευκολύνεται η μελλοντική προσθήκη υποστήριξης νέων γλωσσών ή λειτουργιών, όπως η υποστήριξη ήχου ή η ενσωμάτωση επιπλέον μεθόδων εκμάθησης (Kukulska-Hulme, 2012).

Βελτίωση απόδοσης: Η μέτρηση χρόνου εκτέλεσης και η βελτιστοποίηση αλγορίθμων πραγματοποιούνται κεντρικά στο επίπεδο λογικής, διασφαλίζοντας αποτελεσματική λειτουργία.

Προσβασιμότητα: Ο διαχωρισμός επιπέδων επιτρέπει την ανεξάρτητη βελτίωση της διεπαφής χρήστη με γνώμονα την προσβασιμότητα και την καθολική σχεδίαση (Meyer, Rose, & Gordon, 2014).

Συνολικά, η επίπεδη αρχιτεκτονική αποτέλεσε την ιδανική επιλογή για την υλοποίηση ενός αξιόπιστου, προσαρμόσιμου και φιλικού προς τον χρήστη συστήματος μεταγραφής Braille.

ΑΝΑΛΥΣΗ ΚΑΙ ΥΛΟΠΟΙΗΣΗ ΑΛΓΟΡΙΘΜΟΥ ΕΚΜΑΘΗΣΗΣ BRAILLE

Δομική Αρχιτεκτονική του Αλγορίθμου

Ο αλγόριθμος εκμάθησης Braille του λογισμικού σχεδιάστηκε βάσει της επιλογής της επίπεδης αρχιτεκτονικής, που εξασφαλίζει τη σαφή οργάνωση των λειτουργιών σε διακριτά επίπεδα και διευκολύνει την επεκτασιμότητα και συντήρηση (Bass, Clements & Kazman, 2012).

Βασικές μεταβλητές στο πλαίσιο υλοποίησης είναι:

strBuffer: Χρησιμοποιείται για την αποθήκευση του τρέχοντος χαρακτήρα ή σειράς χαρακτήρων που εισάγονται από το χρήστη, πριν την επεξεργασία τους.

booShift: Λογική μεταβλητή που ελέγχει αν βρίσκεται σε ισχύ κάποιο ειδικό καθεστώς μεταγραφής, όπως η ενεργοποίηση μετασχηματισμών ή τροποποιήσεων κατά τη μεταγραφή σε Braille.

VALUE_TIMER: Μεταβλητή που χρήζει για τη διαχείριση χρονισμού διεργασιών, ιδιαίτερα στη διαχείριση των χρονικών ορίων (timeouts) για την αυτόματη ενημέρωση διεπαφής και απόκρισης (Kintsch & Rawson, 2005).

Οι βασικές διαδικασίες και συναρτήσεις που υλοποιούνται είναι:

Form_KeyDown: Αντιλαμβάνεται και επεξεργάζεται την είσοδο χαρακτήρων από το πληκτρολόγιο, ενημερώνοντας το strBuffer.

Form_Timer: Διαχειρίζεται τα χρονόμετρα που ελέγχουν τον χρόνο εκτέλεσης και την περιοδική ενημέρωση της διεπαφής.

DLookup: Πραγματοποιεί αναζήτηση στους πίνακες αντιστοίχισης χαρακτήρων, εντοπίζοντας το κατάλληλο Braille σύμβολο που αντιστοιχεί στον εισαχθέντα χαρακτήρα.

Η οργάνωση του αλγορίθμου ακολουθεί ένα τριεπίπεδο λειτουργικό μοντέλο:

Επίπεδο Εισόδου: Λαμβάνει και αποθηκεύει τα δεδομένα εισόδου (κείμενο προς μεταγραφή).

Επίπεδο Επεξεργασίας: Υλοποιεί τη λογική μεταγραφής, ελέγχου εγκυρότητας χαρακτήρων και αναζήτησης στα Braille tables.

Επίπεδο Εξόδου: Παράγει το τελικό αποτέλεσμα σε μορφή Braille και ενημερώνει τη διεπαφή χρήστη με τα δεδομένα.

Λογική Αρχιτεκτονική

Η ροή των δεδομένων ξεκινά από την είσοδο χαρακτήρων μέσω της διεπαφής χρήστη, όπου προκαλείται ο έλεγχος εγκυρότητας (έλεγχος για αποδεκτούς χαρακτήρες). Στη συνέχεια, το σύστημα πραγματοποιεί αναζήτηση στους πίνακες Braille για την εύρεση του αντίστοιχου κώδικα (Young & Temple, 2021). Τα αποτελέσματα επιστρέφουν στην διεπαφή, όπου παρουσιάζονται στον χρήστη.

Η χρονική διαχείριση μέσω της μεταβλητής VALUE_TIMER εξασφαλίζει ομαλή ενημέρωση, ενώ ταυτόχρονα αποφυγή επιβράδυνσης ή καθυστερήσεων (Kukulska-Hulme, 2012). Η ενημέρωση της διεπαφής χρήστη πραγματοποιείται με βάση επεισόδια χρονισμού (timer events), ώστε να υπάρχει άμεση οπτικοακουστική ανατροφοδότηση.

Επίπεδη Αρχιτεκτονική στον Αλγόριθμο Εκμάθησης

Ο αλγόριθμος εκμάθησης ακολουθεί τη δομή τριών επιπέδων:

UI Layer: Λαμβάνει την είσοδο από τον χρήστη (πληκτρολόγιο) και εμφανίζει τα αποτελέσματα, ενώ επίσης διαχειρίζεται την επικοινωνία με τον χρήστη μέσω timers και πληκτρολογικών συμβάντων.

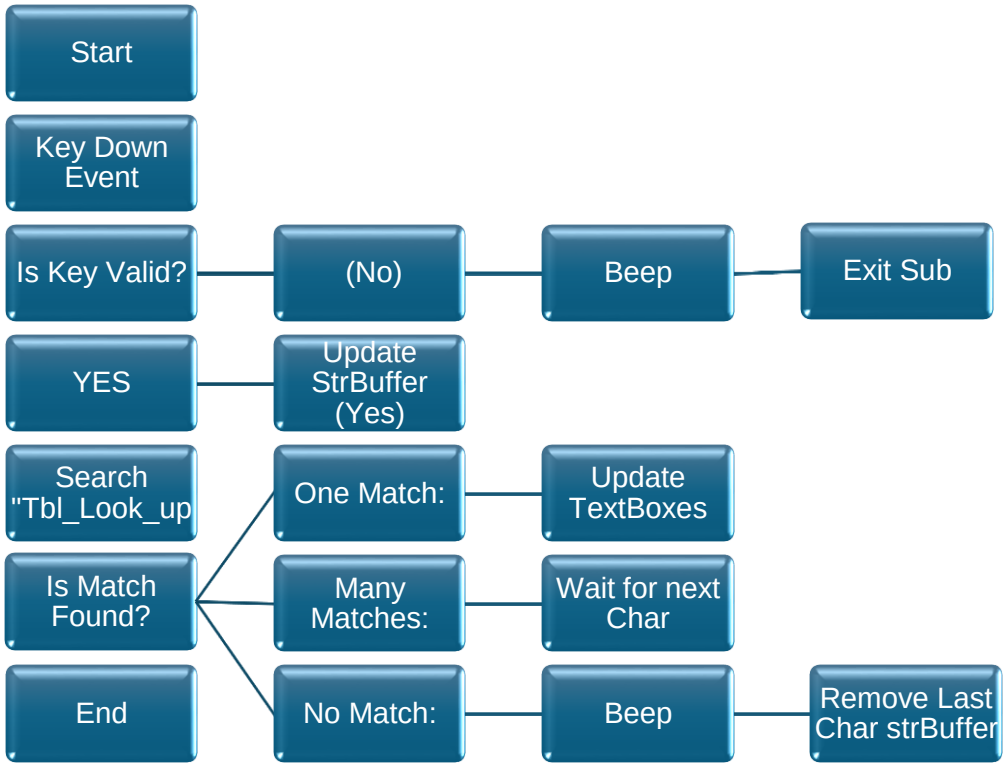
Business Logic Layer: Περιλαμβάνει τη λογική ανίχνευσης, τον έλεγχο χαρακτήρων και τη διαδικασία αναζήτησης στο Braille data layer. Εκτελεί τη μεταγραφική λογική και χειρίζεται τις λειτουργίες που καθορίζουν την ορθότητα και πλήρωση του αλγορίθμου.

Data Access Layer: Παρέχει τους πίνακες αναίρεσης και αντιστοίχισης χαρακτήρων που χρησιμοποιούνται για τη μεταγραφή, επιτρέποντας ευκολία στην προσθήκη νέων γλωσσών ή γραμματικών κανόνων.

Η ροή των εσωτερικών διαδικασιών ακολουθεί αυστηρά τη διαχωρισμένη διαδρομή μεταξύ επιπέδων, εξασφαλίζοντας την απομόνωση λειτουργιών και καλή διαχείριση των αλλαγών (Bass, Clements & Kazman, 2012).

Μετά από αναλυτική εξέταση της δομικής, λογικής και επίπεδης αρχιτεκτονικής του αλγορίθμου εκμάθησης Braille, η επιλογή της επίπεδης αρχιτεκτονικής κρίθηκε ως η πλέον κατάλληλη για το συγκεκριμένο λογισμικό. Η επίπεδη αρχιτεκτονική προσφέρει σαφή διαχωρισμό των λειτουργιών σε ανεξάρτητα επίπεδα (UI, Business Logic, Data Access), επιτρέποντας την απομόνωση των επιμέρους μονάδων και διευκολύνοντας σημαντικά τη συντήρηση, την επεκτασιμότητα και την αξιοπιστία του συστήματος. Επιπλέον, η δομή αυτή ανταποκρίνεται ιδανικά στις ανάγκες του λογισμικού για γρήγορη και ακριβή μεταγραφή, εύκολη διαχείριση χρονισμού και αποδοτική ενημέρωση της διεπαφής χρήστη, στοιχεία κρίσιμα για την υποστήριξη της διαδικασίας εκμάθησης Braille. Συνολικά, η επίπεδη αρχιτεκτονική εξασφαλίζει ένα ευέλικτο και λειτουργικό σύστημα που καλύπτει αποτελεσματικά τις ειδικές απαιτήσεις αυτής της εφαρμογής (Bass, Clements & Kazman, 2012; Kukulska-Hulme, 2012).

Αναλυτικό Διάγραμμα Ροής



Το διάγραμμα ροής του αλγορίθμου εκμάθησης περιλαμβάνει τα ακόλουθα βασικά βήματα:

Η εικόνα παρουσιάζει ένα διάγραμμα ροής (flowchart) του αλγορίθμου εκμάθησης Braille, με εστίαση στον έλεγχο εγκυρότητας χαρακτήρων και στην αναζήτηση στον πίνακα αντιστοίχισης ("Tbl_Look_up"). Ακολουθεί μια ανάλυση κάθε βήματος με βάση το διάγραμμα:

- Start: Έναρξη της διαδικασίας.
- Key Down Event: Ανίχνευση γεγονότος πάτηματος πλήκτρου από το χρήστη.
- Is Key Valid?: Έλεγχος αν το πλήκτρο που πατήθηκε είναι έγκυρο, δηλαδή αν ο χαρακτήρας που εισάγεται μπορεί να υποστηριχθεί από το σύστημα.
- Αν ΟΧΙ (No):
- Εκπέμπεται ήχος προειδοποίησης (Beep).

- Έξοδος από τη υπορουτίνα (Exit Sub).
- Αν NAI (Yes):
- Ενημέρωση της μεταβλητής strBuffer με τον νέο χαρακτήρα.
- Search "Tbl_Look_up": Αναζήτηση στον πίνακα αντιστοίχισης χαρακτήρων Braille.
- Is Match Found?: Έλεγχος αν βρέθηκε αντιστοιχία για το χαρακτήρα.
- Αν βρεθεί Μία Αντιστοιχία (One Match):
- Ενημέρωση των πεδίων κειμένου (Update TextBoxes) για παρουσίαση.
- Αν βρεθούν Πολλές Αντιστοιχίες (Many Matches):
- Αναμονή για εισαγωγή του επόμενου χαρακτήρα (Wait for next Char), προκειμένου να οριστικοποιηθεί η αντιστοιχία.
- Αν δεν βρεθεί Καμία Αντιστοιχία (No Match):
- Εκπέμπεται ήχος προειδοποίησης (Beep).
- Αφαίρεση του τελευταίου χαρακτήρα από τη μεταβλητή strBuffer.
- End: Τέλος της διαδικασίας.

Εικόνα 2
Διάγραμμα ροής του αλγορίθμου εκμάθησης

Το διάγραμμα αποτυπώνει καθαρά τη λογική ροή του αλγορίθμου κατά την εισαγωγή χαρακτήρων και την αναγνώριση τους για μεταγραφή σε Braille, ενσωματώνοντας μηχανισμούς ελέγχου εγκυρότητας, αναζήτησης και ενημέρωσης της διεπαφής.Η απομόνωση των λειτουργιών σε ξεχωριστές μονάδες επιτρέπει την εύκολη συντήρηση, εντοπισμό σφαλμάτων και επεκτασιμότητα του λογισμικού (Brusilovsky, 2001).

Το παραπάνω διάγραμμα απεικονίζει τη ροή διαδικασιών κατά την εισαγωγή χαρακτήρων στο σύστημα και την αντιστοίχισή τους στον κώδικα Braille. Μετά την ενεργοποίηση του γεγονότος πάτησης πλήκτρου (Key Down Event), γίνεται άμεση επικύρωση του χαρακτήρα (Is Key Valid?). Εάν ο χαρακτήρας δεν είναι αποδεκτός, το σύστημα εκπέμπει ηχητική ειδοποίηση (Beep) και τερματίζει τη διαδικασία της υπορουτίνας (Exit Sub).

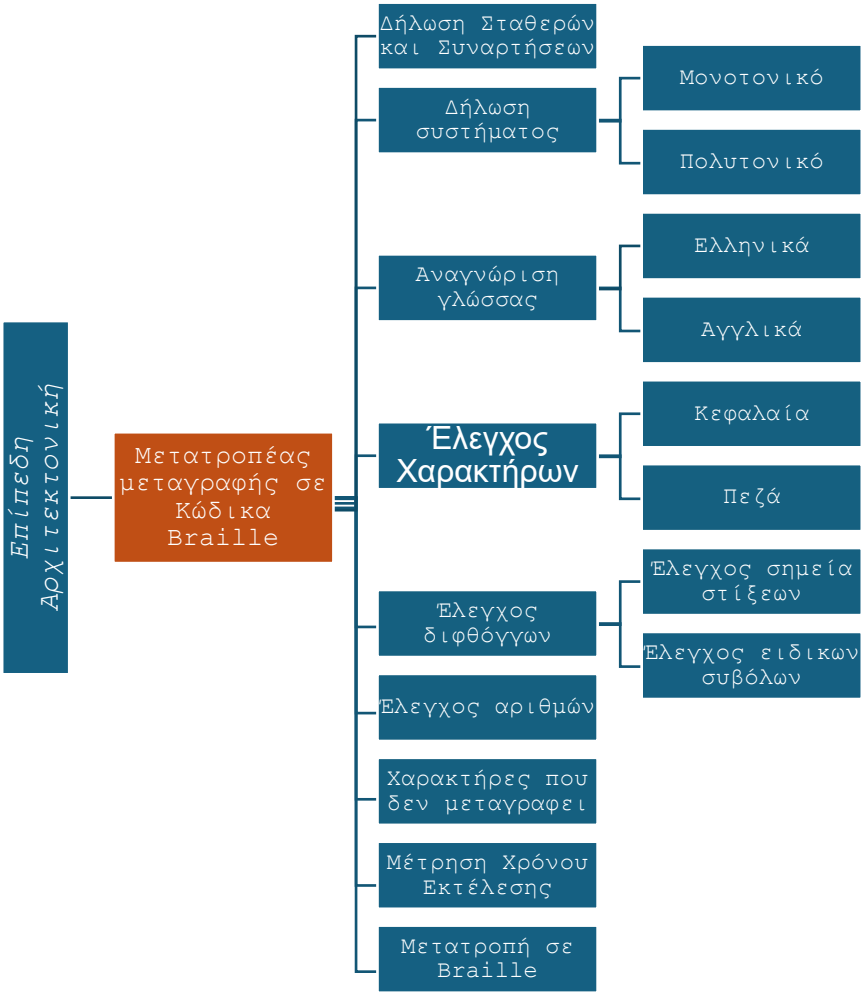
Σε περίπτωση που ο χαρακτήρας είναι έγκυρος, ενημερώνεται το buffer (Update StrBuffer) και ακολουθεί η αναζήτηση στον πίνακα αντιστοίχισης χαρακτήρων Braille ("Tbl_Look_up"). Εάν βρεθεί μία αντιστοιχία, το σύστημα ενημερώνει τα πεδία κειμένου (Update TextBoxes) που απεικονίζουν το αποτέλεσμα προς τον χρήστη. Στην περίπτωση πολλαπλών αντιστοιχιών, το πρόγραμμα περιμένει την εισαγωγή του επόμενου χαρακτήρα, ώστε να οριστικοποιήσει την επιλογή. Αν δεν βρεθεί καμία αντιστοιχία, το λογισμικό εκπέμπει «μπιπ» και αφαιρεί τον τελευταίο χαρακτήρα από το buffer για αποφυγή λαθών.

Αυτή η διακριτή και αυστηρή ροή ελέγχου διασφαλίζει την ακρίβεια της μεταγραφής και την άμεση ενημέρωση του χρήστη, καλύπτοντας βασικές λειτουργίες ελέγχου και διαχείρισης εισόδου (Bass, Clements & Kazman, 2012).

Το διάγραμμα ροής απεικονίζει τη διαδικασία διαχείρισης εισόδου χαρακτήρων από τον χρήστη. Μετά το γεγονός πάτησης πλήκτρου, γίνεται έλεγχος εγκυρότητας του χαρακτήρα. Αν είναι άκυρος, το σύστημα εκπέμπει ήχο ειδοποίησης και τερματίζει τη λειτουργία. Για έγκυρα πλήκτρα, ενημερώνεται ο buffer των χαρακτήρων και ακολουθεί αναζήτηση στον πίνακα αναζήτησης Braille. Αν βρεθεί μία αντιστοιχία, ενημερώνονται τα πεδία κειμένου, αν πολλές αντιστοιχίες, περιμένει νέο χαρακτήρα, ενώ αν δεν βρεθεί αντιστοιχία, εκπέμπεται προειδοποιητικό beep και αφαιρείται ο τελευταίος χαρακτήρας από τον buffer.

ΑΝΑΛΥΣΗ ΚΑΙ ΥΛΟΠΟΙΗΣΗ ΑΛΓΟΡΙΘΜΟΥ ΜΕΤΑΓΡΑΦΗΣ ΚΕΙΜΕΝΟΥ ΣΕ BRAILLE ΛΕΙΤΟΥΡΓΙΚΟΤΗΤΑ ΚΑΙ ΧΡΗΣΗ ΤΟΥ ΛΟΓΙΣΜΙΚΟΥ

Η διαδικασία μεταγραφής ελληνικού και αγγλικού κειμένου σε Braille υλοποιείται με ακριβείς αλγορίθμους που αναγνωρίζουν κάθε χαρακτήρα, λαμβάνουν υπόψη γλωσσικές ιδιαιτερότητες και αποδίδουν τον αντίστοιχο κώδικα Braille. Το λογισμικό εκμεταλλεύεται πίνακες αντιστοίχισης και κανόνες μεταγραφής που καλύπτουν το μονοτονικό και πολυτονικό σύστημα στα ελληνικά, καθώς και τις ιδιαιτερότητες της αγγλικής γλώσσας. Η αλυσίδα μεταγραφής ακολουθεί λειτουργίες ελέγχου εγκυρότητας χαρακτήρων, προσεκτικής μετάφρασης και άμεσης ενημέρωσης της διεπαφής (Kukulska-Hulme, 2012; Young & Temple, 2021).



Παράλληλα, το λογισμικό παρέχει λειτουργίες εκμάθησης που διευκολύνουν τους χρήστες στην κατανόηση του συστήματος Braille μέσω αλληλεπίδρασης, οπτικοακουστικής ανατροφοδότησης και σταδιακής εκμάθησης. Μέσα από διαδραστικά περιβάλλοντα, οι μαθητές έχουν τη δυνατότητα να δουν σε πραγματικό χρόνο τη μετατροπή χαρακτήρων σε Braille, ενισχύοντας τη σύνδεση μεταξύ γραπτού και αγγίγματος (Meyer, Rose, & Gordon, 2014; Brusilovsky, 2001). Αυτή η άμεση απόδοση βελτιώνει σημαντικά την εκπαιδευτική αποτελεσματικότητα και ενθαρρύνει την ενεργή συμμετοχή.

Τα σενάρια χρήσης του λογισμικού καλύπτουν ένα ευρύ φάσμα: οι εκπαιδευτικοί το χρησιμοποιούν για την παραγωγή προσβάσιμου εκπαιδευτικού υλικού και την υποστήριξη της διδασκαλίας Braille, οι μαθητές το αξιοποιούν για αυτοκατευθυνόμενη εκμάθηση και εξάσκηση, ενώ οι υποστηρικτές προσφέρουν βοήθεια και παρακολουθούν την πρόοδο μέσα από τις αναλυτικές λειτουργίες του συστήματος (European Disability Forum, 2023; WHO, 2021).

Ιδιαίτερη σημασία δίνεται στη φιλικότητα της διεπαφής και την προσβασιμότητα, καθώς το λογισμικό σχεδιάστηκε εφαρμόζοντας τις αρχές της καθολικής σχεδίασης (Universal Design for Learning – UDL), ώστε να είναι απολύτως προσιτό σε χρήστες με οπτική αναπηρία. Απλή πλοήγηση, ευανάγνωστα στοιχεία, ηχητική υποστήριξη και δυνατότητα προσαρμογής παραμέτρων εγγυώνται μια καθηλωτική και αποτελεσματική μαθησιακή εμπειρία (Meyer, Rose, & Gordon, 2014; Kukulska-Hulme, 2012).

Η συνολική λειτουργικότητα και η διευρυμένη χρήση αυτής της εφαρμογής επιφέρουν σημαντικό κοινωνικό αντίκτυπο, συμβάλλοντας στην εκπαιδευτική ισότητα και την ενσωμάτωση ατόμων με προβλήματα όρασης στην εκπαιδευτική διαδικασία και την κοινωνία ευρύτερα (World Health Organization, 2021).

Εικόνα 3
Διάγραμμα επίπεδης *αρχιτεκτονικής* του λογισμικού μεταγραφής

Το διάγραμμα παρουσιάζει την ανάλυση των λειτουργιών του μετατροπέα σε επίπεδα αρχιτεκτονικής που περιλαμβάνει:

Δήλωση Σταθερών και Συναρτήσεων: Καλύπτει το μονοτονικό και πολυτονικό σύστημα, δηλαδή τη βασική υποδομή υποστήριξης της ελληνικής γλώσσας με όλους τους τόνους και πνεύματα.

Αναγνώριση Γλώσσας: Εντοπισμός αν το κείμενο είναι ελληνικό ή αγγλικό.

Έλεγχος Χαρακτήρων: Περιλαμβάνει έλεγχο για πεζά και κεφαλαία, σημεία στίξης, διφθόγγους και ειδικούς συμβόλους, καθώς και διαχείριση χαρακτήρων που δεν υποστηρίζονται.

Μέτρηση Χρόνου Εκτέλεσης: Καταγραφή χρόνου για την αξιολόγηση της αποδοτικότητας.

Μετατροπή σε Braille: Ο τελικός μετασχηματισμός των συμβόλων σε κώδικα Braille βάσει των πινάκων αντιστοίχισης.

Η διάταξη αυτή επιβεβαιώνει την επιλεγμένη επίπεδη αρχιτεκτονική, που ευνοεί τον σαφή διαχωρισμό λειτουργιών και διευκολύνει τη συντήρηση και μελλοντική επέκταση (Kukulska-Hulme, 2012; Bass, Clements & Kazman, 2012).

Η συνδυασμένη χρήση αυτών των διαγραμμάτων ενισχύει την κατανόηση της δομής και των διαδικασιών του λογισμικού, υποδεικνύοντας την ισορροπία μεταξύ ακρίβειας, ταχύτητας και φιλικής προς τον χρήστη εμπειρίας.

Το παραπάνω διάγραμμα αναλύει την επίπεδη αρχιτεκτονική του μετατροπέα σε Braille με διαχωρισμό λειτουργιών: δήλωση σταθερών και συστημάτων (μονοτονικό, πολυτονικό), αναγνώριση γλώσσας (ελληνικά, αγγλικά), έλεγχος χαρακτήρων (κεφαλαία, πεζά, σημεία στίξης, ειδικοί χαρακτήρες), μέτρηση χρόνου εκτέλεσης, και τελική μετατροπή σε Braille. Η δομή αυτή διευκολύνει τη συντήρηση, την ακρίβεια και την επεκτασιμότητα του λογισμικού σύμφωνα με την επίπεδη αρχιτεκτονική..

ΑΞΙΟΛΟΓΗΣΗ ΚΑΙ ΑΠΟΤΕΛΕΣΜΑΤΑ

Η αξιολόγηση του λογισμικού μεταγραφής και εκμάθησης του κώδικα Braille πραγματοποιήθηκε σε δύο βασικούς άξονες: ποσοτική μέτρηση της ακρίβειας της μεταγραφής και ποιοτική δοκιμή της χρηστικότητας με πραγματικούς χρήστες και ειδικούς στον τομέα της προσβασιμότητας.

Στην ποσοτική αξιολόγηση, εξετάστηκε η ακρίβεια της αυτόματης μεταγραφής ελληνικών και αγγλικών κειμένων σε Braille, όπου το λογισμικό έδειξε υψηλά ποσοστά ορθότητας, με ποσοστό επιτυχίας που ξεπέρασε το 95% σε δοκιμαστικά δείγματα εκπαιδευτικού υλικού (Young & Temple, 2021). Η χρήση λεπτομερών πινάκων αντιστοίχισης και αλγορίθμων ελέγχου χαρακτήρων συνέβαλε στη διόρθωση λάθους και εξασφάλισε την πιστότητα της μεταγραφής τόσο στο μονοτονικό όσο και στο πολυτονικό σύστημα.

Η ποιοτική αξιολόγηση περιελάμβανε δοκιμές χρηστικότητας με ομάδες χρηστών που περιλάμβαναν άτομα με οπτική αναπηρία, εκπαιδευτικούς και ειδικούς στην προσβασιμότητα. Οι συμμετέχοντες ανέφεραν θετική εμπειρία, επισημαίνοντας ως σημαντικά χαρακτηριστικά τη φιλικότητα της διεπαφής, την ευκολία πλοήγησης και την άμεση ανατροφοδότηση κατά τη διάρκεια της εκμάθησης (Meyer, Rose, & Gordon, 2014). Παράλληλα, προτάθηκαν βελτιώσεις όσον αφορά την ενίσχυση της ηχητικής υποστήριξης και την επέκταση στη χρήση επιπλέον γλωσσών.

Αναφορικά με την απόδοση, η ανάλυση των χρόνων επεξεργασίας κατέδειξε ότι ο αλγόριθμος λειτουργεί αποτελεσματικά σε πραγματικό χρόνο, με ικανοποιητικά χαμηλές καθυστερήσεις, καθιστώντας το λογισμικό κατάλληλο για καθημερινή χρήση και άμεση απόκριση στην εισαγωγή δεδομένων (Bass, Clements & Kazman, 2012). Η μέτρηση χρόνου εκτέλεσης και η περιοδική βελτιστοποίηση των διαδικασιών επιβεβαίωσαν τη σταθερότητα και αποδοτικότητα της εφαρμογής.

Συνολικά, τα σχόλια των χρηστών και ειδικών αναδεικνύουν το λογισμικό ως ένα αξιόπιστο, προσβάσιμο και λειτουργικό εργαλείο που προάγει την εκπαιδευτική ισότητα και την κοινωνική ένταξη των ατόμων με προβλήματα όρασης, παράλληλα με τη δυνατότητα περαιτέρω ανάπτυξης και βελτίωσης (European Disability Forum, 2023; WHO, 2021).

ΣΥΜΠΕΡΑΣΜΑΤΑ ΚΑΙ ΜΕΛΛΟΝΤΙΚΕΣ ΚΑΤΕΥΘΥΝΣΕΙΣ

Η παρούσα εργασία παρουσίασε την ανάπτυξη ενός λογισμικού μεταγραφής και εκμάθησης του κώδικα Braille, εστιάζοντας στην προσβασιμότητα και εκπαιδευτική υποστήριξη ατόμων με προβλήματα όρασης. Τα αποτελέσματα δείχνουν ότι το σύστημα είναι ικανό να παρέχει ακριβή, γρήγορη και φιλική προς το χρήστη μεταγραφή ελληνικών και αγγλικών κειμένων σε Braille, συμβάλλοντας ουσιαστικά στην εκπαιδευτική και κοινωνική ένταξη των ατόμων αυτών (Young & Temple, 2021).

Η επιλογή της επίπεδης αρχιτεκτονικής κατέστησε δυνατή μια ευέλικτη, συντηρήσιμη και επεκτάσιμη δομή, που διευκολύνει την προσθήκη νέων λειτουργιών και γλωσσικών υποστηρίξεων, καθώς και τη βελτίωση απόδοσης (Bass, Clements & Kazman, 2012). Το ενσωματωμένο εκπαιδευτικό περιβάλλον επιτρέπει την ενεργή αλληλεπίδραση των χρηστών με τον κώδικα Braille, ενισχύοντας την αυτονομία και την αποτελεσματικότητα της μάθησης (Meyer, Rose, & Gordon, 2014).

Για το μέλλον, προτείνεται η διεύρυνση των δυνατοτήτων του λογισμικού σε περισσότερα γλωσσικά συστήματα και η υποστήριξη του μαθηματικού Braille, που θα διευκόλυνε σημαντικά τους μαθητές με οπτική αναπηρία σε επιστημονικά και τεχνικά πεδία (European Disability Forum, 2023). Επιπλέον, η συμβατότητα με σύγχρονες συσκευές Braille display, η ενσωμάτωση φωνητικής εξόδου και η διασύνδεση με βάσεις δεδομένων εκπαιδευτικού υλικού θα αναβαθμίσουν περαιτέρω τη λειτουργικότητα και προσβασιμότητα του εργαλείου.

Επιστημονικά, η εργασία συμβάλλει στην εξέλιξη της εκπαιδευτικής τεχνολογίας για την προσβασιμότητα, προωθώντας την έρευνα στη διαδραστική μάθηση και τις τεχνολογίες επεξεργασίας φυσικής γλώσσας για ειδικές ανάγκες (Brusilovsky, 2001; Kukulska-Hulme, 2012). Κοινωνικά, το λογισμικό ενισχύει την ισότητα στην εκπαίδευση και την κοινωνική ενσωμάτωση, προσφέροντας ένα σύγχρονο εργαλείο άμεσης χρήσης και ευρείας αποδοχής (WHO, 2021).

Συνολικά, οι προτάσεις για μελλοντική έρευνα περιλαμβάνουν την ανάλυση εμπειριών χρηστών σε ευρύτερα δείγματα, την ανάπτυξη πιο εξατομικευμένων μαθησιακών διαδρομών και την επέκταση σε περιβάλλοντα φορητής μάθησης και διαδικτυακής εκπαίδευσης.

ΠΕΡΙΛΗΨΗ

Μια καλή πρακτική αξιοποίησης ψηφιακών τεχνολογιών θα παρουσιάσουμε μέσα από τη παρούσα εργασία, όπως αυτή υλοποιήθηκε στο πλαίσιο του προγράμματος με τίτλο "International Joint Classes" που διοργάνωσε το Μητροπολιτικό Γραφείο Εκπαίδευσης της Δημοκρατίας της Κορέας αξιοποιώντας τις τεχνολογίες επικοινωνίας και της εξ' αποστάσεως εκπαίδευσης με στόχο την καλύτερη κατανόηση της πολιτιστικής διαφορετικότητας και την ανάπτυξη δεξιοτήτων επικοινωνίας. Το διακρατικό, διασχολικό και συνεργατικό έργο μεταξύ τριών σχολείων (του Ημερήσιου Γυμνασίου και ΓΕΛ Νεοχωρίου Άρτας από Ελλάδα και του Yang Chung Middle School στη Σεούλ από Νότια Κορέα) ήταν μια πρωτοβουλία του πρώτου σχολείου και είχε διάρκεια από Μάιο έως Δεκέμβριο 2024. Το θέμα των εργασιών ορίστηκε «Ο Β΄ Παγκόσμιος Πόλεμος και οι επιπτώσεις του στους δύο λαούς». Υλοποιήθηκαν εξ αποστάσεως σύγχρονες διαδικτυακές συναντήσεις αλλά και ασύγχρονες εξ αποστάσεως διδακτικές ώρες αξιοποίησης του παραγόμενου υλικού.

Στο πρώτο μέρος της εργασίας παρουσιάζεται η σημασία των σύγχρονων ψηφιακών εργαλείων στην εκπαίδευση και στη διδασκαλία. Η ραγδαία ανάπτυξη των ψηφιακών και τεχνολογικών μέσων έχει επιφέρει σημαντικές αλλαγές στη μαθησιακή διαδικασία, δημιουργώντας νέες ευκαιρίες και προκλήσεις για την εκπαιδευτική κοινότητα. Ως εκ τούτου κρίνεται απαραίτητη η αξιοποίηση και η αξιολόγηση αυτών των μέσων στη σύγχρονη εκπαιδευτική πραγματικότητα, εξετάζοντας τη δυναμική και τη συμβολή των ψηφιακών εργαλείων στη βελτίωση της διδακτικής πρακτικής. Στο δεύτερο μέρος της εργασίας θα παρουσιάσουμε τις εργασίες του σχολείου μας και τα ψηφιακά εργαλεία που χρησιμοποιήθηκαν στο πλαίσιο του παραπάνω προγράμματος. Με τη βοήθεια των εργαλείων αυτών δημιουργήθηκε μια δυναμική διαδικτυακή κοινότητα μάθησης, συνεργασίας και αλληλεπίδρασης με ανταλλαγή πληροφοριών, ιστορικών πηγών και απόψεων για τα γεγονότα του Β' Παγκόσμιου Πολέμου. Να σημειωθεί ότι η γλώσσα όλων των εργασιών είναι τα αγγλικά. Τα βασικά ψηφιακά εργαλεία που αξιοποιήθηκαν ενισχύοντας έτσι τη διαδραστικότητα και την πολυτροπική προσέγγιση της μάθησης είναι:

- Padlet. Μια εύχρηστη διαδραστική πλατφόρμα συνεργατικής μάθησης. Πρόκειται για έναν διαδικτυακό εικονικό τοίχο, έναν πίνακα καρφιτσών στον οποίο μπορεί να αναρτηθεί το περιεχόμενο, τα πολυμέσα (έγγραφα, εικόνες, βίντεο, ηχητικά, κτλ) με πρόσβαση των μελών ανά πάσα στιγμή. Επιλέχθηκε ως κοινή πλατφόρμα ανάρτησης των ομαδικών εργασιών των μαθητών/μαθητριών από τα τρία σχολεία.
- Veed. Ένα απλό πρόγραμμα επεξεργασίας βίντεο. Επιλέχθηκε από την ομάδα εργασία για να μετατρέψουν ένα αρχείο ppt σε βίντεο με θέμα την παρουσίαση των μελών της ομάδας και του τόπου τους.
- Canva. Μια πλατφόρμα σχεδίασης που μας επιτρέπει να δημιουργήσουμε ένα ευρύ φάσμα διαδραστικών υλικών πολυμέσων, όπως γραφήματα, αφίσες, παρουσιάσεις, φύλλα εργασίας, κόμικς κ.ά. Αυτό το εργαλείο προτιμήθηκε από την ομάδα εργασίας για τη δημιουργία μιας αφίσας (poster) με θέμα τη σφαγή στο Κομμένο Άρτας το 1943.
- Prezi. Ένα λογισμικό πολυμέσων για ελκυστικές παρουσιάσεις. Είναι μια φιλική εφαρμογή που δεν απαιτεί προηγούμενη εμπειρία σχεδιασμού ή προγραμματισμού. Επιλέχθηκε από την ομάδα εργασίας για μια παρουσίαση με θέμα τις κύριες ημερομηνίες και σημαντικά γεγονότα του Β΄ Παγκόσμιου πολέμου στην Ελλάδα. Με το ίδιο θέμα ασχολήθηκε και μια δεύτερη ομάδα εργασίας, η οποία επέλεξε τη δημιουργία ιστοριογραμμής με το εργαλείο Preceden.
- Vocaroo. Μια πολύ εύκολη εφαρμογή εγγραφής ήχου με παραγόμενα mp3 αρχεία. Το εργαλείο επιλέχθηκε από την μαθητική ομάδα για την ηχογράφηση βασικών λέξεων σχετικών με τον Β΄ Παγκόσμιο πόλεμο.

Στο τρίτο μέρος παρουσιάζονται τα συμπεράσματα και η αξιολόγηση της εμπειρίας αυτής, η οποία ανέδειξε τη θετική συμβολή των ψηφιακών εργαλείων στη βελτίωση της κριτικής σκέψης, της συνεργασίας και της κατανόησης ιστορικών γεγονότων από διαφορετικές πολιτισμικές οπτικές γωνίες.

Λέξεις – κλειδιά: διεθνές πρόγραμμα, Β΄ Παγκόσμιος Πόλεμος, ψηφιακά εργαλεία.

ΕΙΣΑΓΩΓΗ

Η ραγδαία ανάπτυξη των ψηφιακών τεχνολογιών, ιδιαίτερα μετά την παγκόσμια εμπειρία της πανδημίας COVID-19, ανέδειξε τη σημασία τους ως αναπόσπαστο στοιχείο της σύγχρονης εκπαιδευτικής διαδικασίας. Η αναγκαστική μετάβαση από τη δια ζώσης διδασκαλία σε περιβάλλοντα εξ αποστάσεως εκπαίδευσης, είτε σύγχρονης είτε ασύγχρονης μορφής, επέφερε ουσιαστικές αλλαγές στον τρόπο σχεδιασμού και υλοποίησης της διδασκαλίας. Μέσω ποικίλων εκπαιδευτικών πλατφορμών, δόθηκε έμφαση στην ανάγκη ουσιαστικής ενσωμάτωσης των ψηφιακών εργαλείων στο εκπαιδευτικό έργο, γεγονός που μετέβαλε σημαντικά τις διδακτικές πρακτικές (Xesternou, 2020).

Η αξιοποίηση των Τεχνολογιών Πληροφορίας και Επικοινωνιών (ΤΠΕ) συνέβαλε αποφασιστικά στη συγκρότηση νέων μαθησιακών πλαισίων, που χαρακτηρίζονται από ευελιξία, διαδραστικότητα και αυξημένες δυνατότητες συμμετοχής (Tzimogiannis & Komis, 2007). Οι ψηφιακές πλατφόρμες σύγχρονης τηλεκπαίδευσης επέτρεψαν την άμεση επικοινωνία διδασκόντων/-ουσών και μαθητών/-τριών, προσφέροντας ένα λειτουργικό και προσιτό μαθησιακό περιβάλλον. Παράλληλα, η εξοικείωση με ανοικτά λογισμικά για την οργάνωση ασύγχρονων μαθημάτων και τη δημιουργία ψηφιακών τάξεων, ενίσχυσε την αυτονομία των εκπαιδευτικών και των μαθητών/τριών στην εκπαιδευτική διαδικασία. Οι εκπαιδευτικοί, ειδικότερα, κλήθηκαν να ανανεώσουν τις παραδοσιακές τους πρακτικές, αξιοποιώντας ψηφιακά εργαλεία για την ανασύνταξη του διδακτικού τους υλικού.

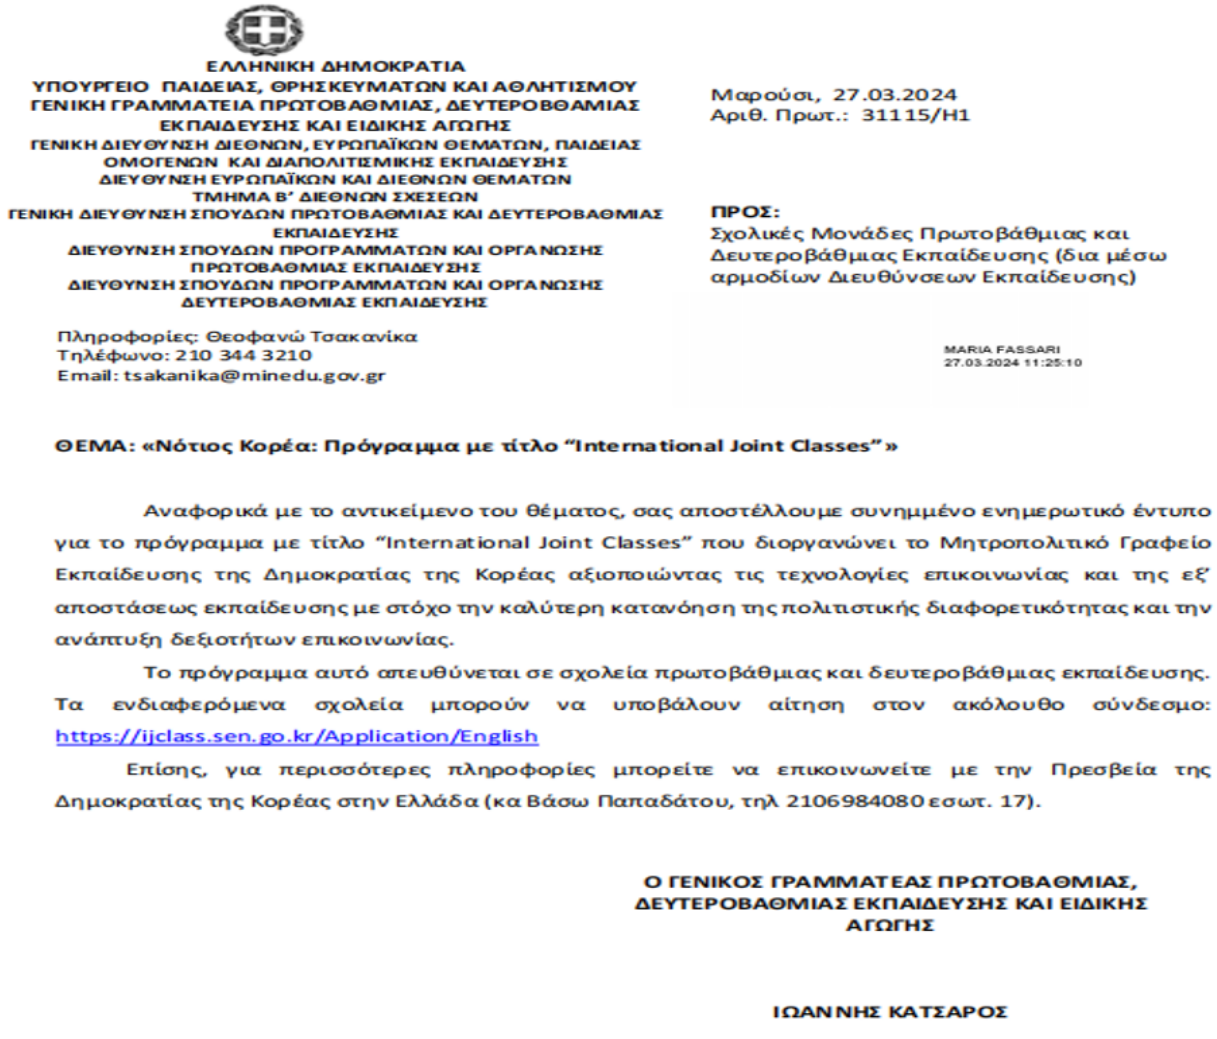
Σε αυτό το νέο παιδαγωγικό και τεχνολογικό πλαίσιο, αναδύεται η ανάγκη αναθεώρησης του νοήματος του «διδακτικού σχεδιασμού» και, ευρύτερα, της έννοιας της διδασκαλίας και της μάθησης. Ενδεικτική πρωτοβουλία αυτής της νέας πραγματικότητας αποτελεί το πρόγραμμα “International Joint Classes”, το οποίο συνιστά παράδειγμα παιδαγωγικής καινοτομίας με διαπολιτισμικό προσανατολισμό και ενεργή αξιοποίηση των ψηφιακών τεχνολογιών.

ΨΗΦΙΑΚΑ ΕΡΓΑΛΕΙΑ ΣΤΗΝ ΕΚΠΑΙΔΕΥΣΗ

Η τεχνολογία στην εκπαίδευση έχει φέρει επανάσταση στον τρόπο με τον οποίο οι μαθητές/μαθήτριες μαθαίνουν και οι εκπαιδευτικοί διδάσκουν. Τα ψηφιακά εργαλεία και οι καινοτόμες μέθοδοι μάθησης έχουν μεταμορφώσει την εκπαιδευτική εμπειρία, καθιστώντας την πιο προσβάσιμη, ευέλικτη και αποδοτική. Η εισαγωγή των ψηφιακών εργαλείων στην εκπαίδευση ξεκίνησε με την χρήση υπολογιστών και εκπαιδευτικού λογισμικού στις τάξεις. Σήμερα, η χρήση της τεχνολογίας έχει επεκταθεί σε κάθε πτυχή της εκπαιδευτικής διαδικασίας, από την παραδοσιακή διδασκαλία έως την εξ αποστάσεως εκπαίδευση και την αυτόνομη μάθηση.

Στη σημερινή εκπαιδευτική πράξη, παρόλο που η παραδοσιακή προσέγγιση της γνώσης εξακολουθεί να κυριαρχεί στη σχολική τάξη, παρατηρείται και μια σημαντική τάση για ενσωμάτωση της ψηφιακής τεχνολογίας στις εκπαιδευτικές διαδικασίες (Moeller & Reitzes, 2011). Ως αποτέλεσμα αυτού, κατά την υλοποίηση του προγράμματος σπουδών, παράλληλα με τα διάφορα διδακτικά εργαλεία (εγχειρίδια, φύλλα εργασίας, διδακτικά βοηθήματα κτλ.), χρησιμοποιούνται και ψηφιακά εργαλεία βασισμένα στις ΤΠΕ. Ως ψηφιακά εργαλεία του προγράμματος σπουδών θεωρούνται τα ψηφιακά υλικά που αξιοποιούνται από εκπαιδευτικούς και μαθητές κατά την αλληλεπίδραση με ηλεκτρονικά μέσα διδασκαλίας και είναι διαθέσιμα και προσβάσιμα κάθε χρονική στιγμή και σε κάθε χωρικό πλαίσιο, μέσα και έξω από την τάξη, όπως ψηφιακά λογισμικά, ιστότοποι, ψηφιακές εκπαιδευτικές πλατφόρμες, ψηφιακές αξιολογήσεις, ηλεκτρονικά βιβλία κτλ. (Pepin & Gueudet,2018). Άρα θα μπορούσαμε να πούμε ότι τα ψηφιακά εργαλεία είναι εφαρμογές λογισμικού ή πλατφόρμες που διευκολύνουν τη διαδικασία των γνώσεων, των δεξιοτήτων και των επιδόσεων των μαθητών/τριών σε ένα διαδικτυακό ή ψηφιακό μαθησιακό περιβάλλον.

Το οφέλη της χρήσης ψηφιακών εργαλείων στην εκπαίδευση είναι εμφανή και οι σύγχρονοι εκπαιδευτικοί παρακινούνται όλο και περισσότερο να βασίζονται στα ψηφιακά εργαλεία κατά το σχεδιασμό του εκπαιδευτικού υλικού, μια και εισαγωγή των ψηφιακών εργαλείων στην εκπαιδευτική διαδικασία επιτρέπει τη βελτίωση των διαδικασιών διδασκαλίας και εκμάθησης. Τα ψηφιακά εργαλεία κάνουν τη μάθηση πιο ενδιαφέρουσα και διαδραστική, αυξάνοντας την εμπλοκή των μαθητών/μαθητριών. Οι διαδραστικές παρουσιάσεις, τα εκπαιδευτικά παιχνίδια και οι εικονική πραγματικότητα, μπορούν να κάνουν τα μαθήματα πιο ελκυστικά και διασκεδαστικά. Μάλιστα, κινητοποιούνται ακόμα και οι πιο “αδύναμοι/ες” και οι πιο “αδιάφοροι/ες” μαθητές/μαθήτριες. Εξίσου σημαντικό είναι ότι η τεχνολογία διευκολύνει την πρόσβαση στην εκπαίδευση για όλους τους μαθητές/μαθήτριες, ανεξάρτητα από την τοποθεσία τους. Οι διαδικτυακές πλατφόρμες τους /τις επιτρέπουν από απομακρυσμένες περιοχές να παρακολουθούν μαθήματα και να αποκτούν γνώσεις που διαφορετικά θα ήταν δύσκολο να αποκτήσουν. Τέλος, η χρήση της τεχνολογίας στην εκπαίδευση βοηθά τους μαθητές/μαθήτριες να αναπτύξουν και να καλλιεργήσουν σημαντικές δεξιότητες του 21ου αιώνα, όπως η κριτική σκέψη, η επίλυση προβλημάτων και η συνεργασία. Οι μαθητές/μαθήτριες μαθαίνουν επίσης να χρησιμοποιούν ψηφιακά εργαλεία και τεχνολογίες, κάτι που είναι απαραίτητο στην σύγχρονη αγορά εργασίας.



Σύμφωνα με τους Jimogiannis & Komis η αξιοποίηση των ψηφιακών εργαλείων στη διδακτική πράξη οδηγεί στη δημιουργία μαθητοκεντρικών μαθησιακών περιβαλλόντων και στην εφαρμογή στρατηγικών ενεργητικής μάθησης. Οι μαθητές/μαθήτριες μαθαίνουν να επικοινωνούν, βελτιώνονται οι αντιληπτικές τους ικανότητες καθώς και οι ικανότητες προσοχής, ενεργοποιούνται και συμμετέχουν περισσότερο στη διδασκαλία (Jimogiannis & Komis, 2007).

Πιο ειδικά οφέλη είναι:

1. Τα ψηφιακά εργαλεία συμβάλλουν στην κλιμάκωση τόσο των οπτικών όσο και των ακουστικών δεξιοτήτων των μαθητών/μαθητριών (Shyamlee & Phil 2012: 155).
2. Η χρήση ψηφιακών εργαλείων συμβάλλει στη βελτίωση της δημιουργικότητας των μαθητών/τριών (Tang et all 2022: 101032).
3. Η τεχνολογία με τη χρήση ψηφιακών εργαλείων είναι ιδιαίτερα χρήσιμη στη διδασκαλία και τη μάθηση στην τάξη καθώς βοηθάει στην επικοινωνία, το σχεδιασμό του διδακτικού υλικού και των ασκήσεων αλλά και στα μαθησιακά αποτελέσματα γενικότερα, δηλαδή στην επίδοση (Gilakjani 2017: 100).
4. Άλλα οφέλη περιλαμβάνουν τη συμμετοχή των μαθητών/μαθητριών σε διαδικτυακές συζητήσεις και εργασίες. Μπορούν επίσης, να συνδεθούν με άλλους/άλλες μαθητές/μαθήτριες ανά τον κόσμο μέσω συνεργατικών πλατφορμών και μέσων κοινωνικής δικτύωσης. Οι εκπαιδευτικοί, από τη μεριά τους, δημιουργούν ψηφιακές τάξεις, ψηφιακά ιστολόγια, όπως είναι το edublogs, όπου μαθητές και μαθήτριες μπορούν να δημοσιεύουν τις εργασίες τους.

Παρατηρούμε, λοιπόν, ότι τα υποβοηθούμενα από την τεχνολογία εργαλεία διδασκαλίας παρέχουν μια μοναδική πλατφόρμα τόσο στις/στους εκπαιδευτικούς όσο και στους/στις μαθητές/μαθήτριες για να αλληλεπιδρούν και έτσι να απλοποιούν τη διδασκαλία και τη διαδικασία εκμάθησης.

ΘΕΜΑ: «Νότιος Κορέα: Πρόγραμμα με τίτλο "International Joint Classes"»

Αναφορικά με το αντικείμενο του θέματος, σας αποστέλλουμε συνημμένο ενημερωτικό έντυπο για το πρόγραμμα με τίτλο "International Joint Classes" που διοργανώνει το Μητροπολιτικό Γραφείο Εκπαίδευσης της Δημοκρατίας της Κορέας αξιοποιώντας τις τεχνολογίες επικοινωνίας και της εξ' αποστάσεως εκπαίδευσης με στόχο την καλύτερη κατανόηση της πολιτιστικής διαφορετικότητας και την ανάπτυξη δεξιοτήτων επικοινωνίας.

Το πρόγραμμα αυτό απευθύνεται σε σχολεία πρωτοβάθμιας και δευτεροβάθμιας εκπαίδευσης. Τα ενδιαφερόμενα σχολεία μπορούν να υποβάλουν αίτηση στον ακόλουθο σύνδεσμο: https://ijclass.sen.go.kr/Application/English

Επίσης, για περισσότερες πληροφορίες μπορείτε να επικοινωνείτε με την Πρεσβεία της Δημοκρατίας της Κορέας στην Ελλάδα (κα Βάσω Παπαδάτου, τηλ 2106984080 εσωτ. 17).

Ο ΓΕΝΙΚΟΣ ΓΡΑΜΜΑΤΕΑΣ ΠΡΩΤΟΒΑΘΜΙΑΣ, ΔΕΥΤΕΡΟΒΑΘΜΙΑΣ ΕΚΠΑΙΔΕΥΣΗΣ ΚΑΙ ΕΙΔΙΚΗΣ ΑΓΩΓΗΣ

ΙΩΑΝΝΗΣ ΚΑΤΣΑΡΟΣ

INTERNATIONAL JOINT CLASSES

Τον Μάρτιο του 2024 με πρωτοβουλία του σχολείου μας συμμετείχαμε στην πρόκληση του Υπουργείου Παιδείας, Θρησκευμάτων και Αθλητισμού (Εικόνα 1) στο Πρόγραμμα με τίτλο "International Joint Classes" που διοργάνωσε το Μητροπολιτικό Γραφείο Εκπαίδευσης της Δημοκρατίας της Κορέας σε συνεργασία με το Υπουργείο Παιδείας, Θρησκευμάτων και Αθλητισμού και με τη Γενική Γραμματεία Πρωτοβάθμιας, Δευτεροβάθμιας Εκπαίδευσης και Ειδικής Αγωγής, τη Γενική Διεύθυνση Διεθνών, Ευρωπαϊκών θεμάτων, Παιδείας Ομογενών και Διαπολιτισμικής εκπαίδευσης, τη Διεύθυνση Ευρωπαϊκών και Διεθνών θεμάτων, Τμήμα Β΄ Διεθνών Σχέσεων, τη Γενική Διεύθυνση Σπουδών Πρωτοβάθμιας και Δευτεροβάθμιας Εκπαίδευσης, τη Διεύθυνση Σπουδών Προγραμμάτων και Οργάνωσης Πρωτοβάθμιας και Δευτεροβάθμιας Εκπαίδευσης αξιοποιώντας τις τεχνολογίες επικοινωνίας και της εξ' αποστάσεως εκπαίδευσης με στόχο την καλύτερη κατανόηση της πολιτιστικής διαφορετικότητας και την ανάπτυξη δεξιοτήτων επικοινωνίας.

Πρόκειται για ένα διακρατικό, διασχολικό και συνεργατικό έργο μεταξύ τριών σχολείων (του Ημερήσιου Γυμνασίου και Γενικού Ενιαίου Λυκείου Νεοχωρίου Άρτας από Ελλάδα και του Yang Chung Middle School στη Σεούλ από Νότια Κορέα). Ο αριθμός των συμμετεχόντων/-ουσών μαθητών/μαθητριών του σχολείου μας ήταν 13 και 5 εκπαιδευτικών. Η διάρκεια του προγράμματος ήταν από τον Απρίλιο έως και Δεκέμβριο 2024. Να σημειωθεί εδώ ότι η συνεργασία μεταξύ των σχολείων ανανεώθηκε και θα συνεχιστεί και για τη περίοδο Απρίλιο 2025 έως και Δεκέμβριο 2025.

Το θέμα των εργασιών ορίστηκε «Ο Δεύτερος Παγκόσμιος Πόλεμος και οι επιπτώσεις του στους δύο λαούς». Το θέμα αυτό επιλέχθηκε καθώς και οι δύο λαοί έχουν υποστεί φρικαλεότητες κατά τον Δεύτερο Παγκόσμιο Πόλεμο, η μεν Ελλάδα από Γερμανούς, η δε Κορέα από Ιαπωνία. Οι μαθητές/μαθήτριες μέσα από μια θεματική ενότητα της Ιστορίας όχι μόνο θα γνώριζαν καλύτερα τα ιστορικά γεγονότα για τη χώρα τους αλλά και τι συνέβη την ίδια περίοδο στην Κορέα. Η γλώσσα του προγράμματος τόσο σε επίπεδο επικοινωνίας των ομάδων όσο και σε επίπεδο παραγόμενων εργασιών είναι τα αγγλικά. Να σημειωθεί ότι τα αγγλικά για κανέναν από τους μαθητές/μαθήτριες των τριών σχολείων δεν είναι μητρική γλώσσα αλλά πρώτη ξένη γλώσσα.

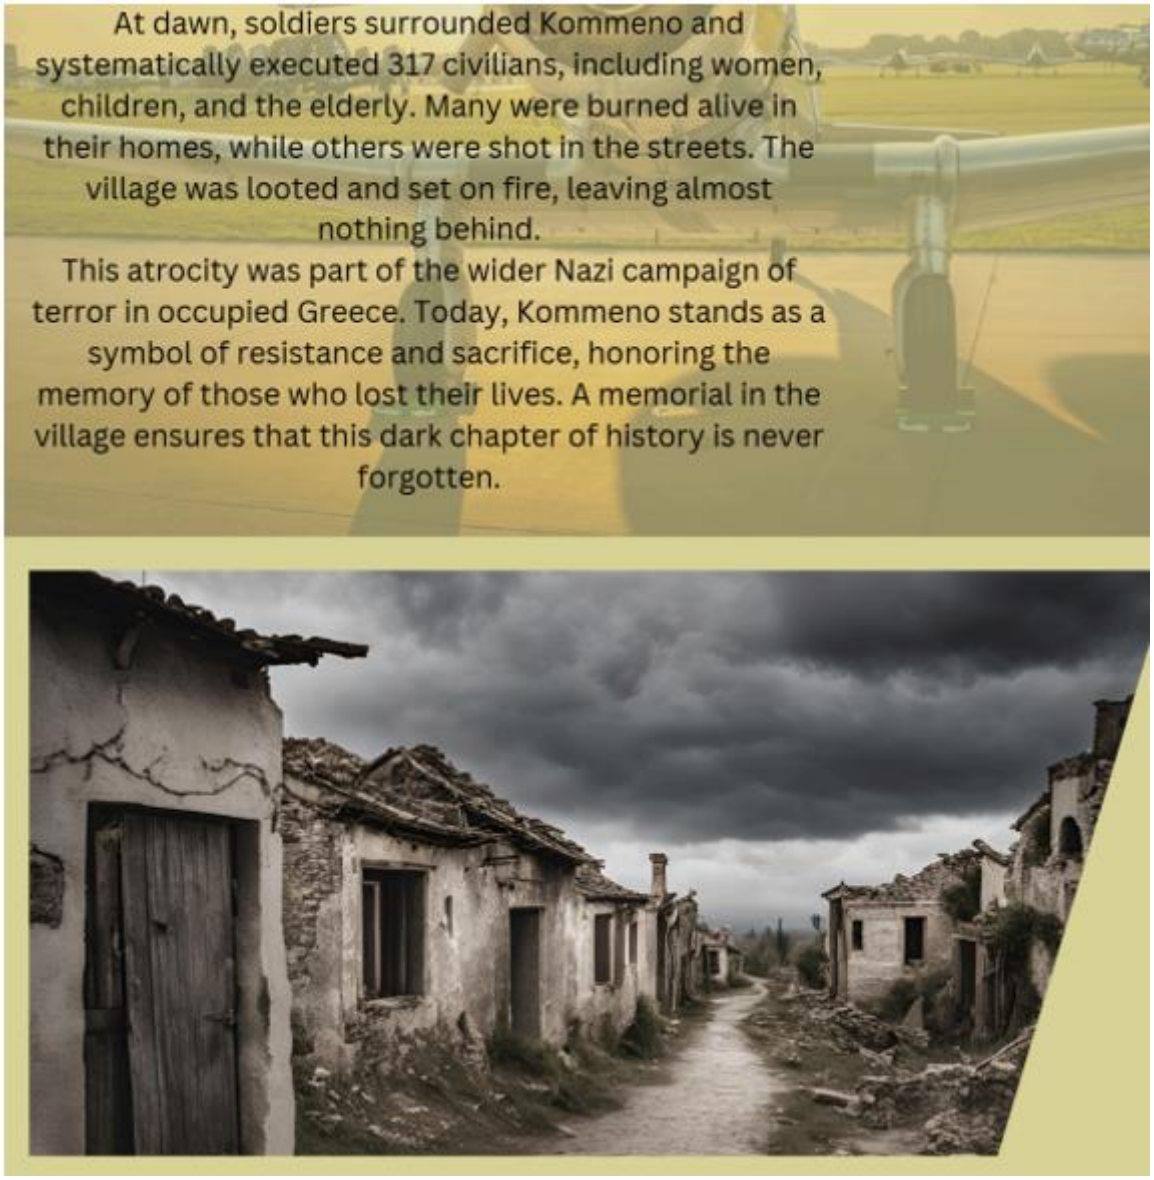
Βασικοί στόχοι του προγράμματος είναι οι μαθητές/μαθήτριες να αναπτύξουν δεξιότητες επικοινωνίας και συνεργασίας μεταξύ τους και μάλιστα σε γλώσσα που δεν είναι η μητρική τους. Επίσης, να έλθουν σε επαφή με τα πολιτιστικά χαρακτηριστικά του άλλου λαού, να εντοπίσουν ομοιότητες αλλά και να κατανοήσουν τη πολιτιστική διαφορετικότητα με στόχο τον σεβασμό στην διαφορετικότητα, την καταπολέμηση του ρατσισμού και της μισαλλοδοξίας. Τέλος, με την αξιοποίηση Τεχνολογιών Πληροφορίας και Επικοινωνίας (ΤΠΕ), με την χρήση ψηφιακών εργαλείων σε περιβάλλον εξ αποστάσεως μάθησης οι μαθητές/μαθήτριες να αναπτύξουν ψηφιακές δεξιότητες και γραμματισμό.

Οι μέθοδοι που χρησιμοποιήθηκαν είναι η μέθοδος project (Project-based teaching), η ομαδοσυνεργατική και η εξ αποστάσεως μάθηση (Σύγχρονη, Ασύγχρονη και Μικτή). Πιο συγκεκριμένα, η μέθοδος Project αφορά «Συνθετικές Δημιουργικές Εργασίες» ή «Ερευνητικές Εργασίες». Η μαθητοκεντρική αυτή μέθοδος καλύπτει ένα εύρος από συνεργατικές μεθόδους, με κύρια χαρακτηριστικά την αυθεντικότητα στις διαδικασίες, την αυτονομία των ομάδων των συνεργαζόμενων μαθητών και τον βιωματικό χαρακτήρα. Τρία είναι τα βασικά στάδια του Project, ο σχεδιασμός στην τάξη, η διεξαγωγή από τις ομάδες εργασίας και η παρουσίαση-αξιολόγηση. Όλα τα στάδια υλοποιούνται σε συνεργασία με τον/την εκπαιδευτικό που έχει ρόλο ενδυναμωτή και ενισχυτή. Για την ομαδοσυνεργατική μέθοδος οι μαθητές/μαθήτριες του σχολείου χωρίστηκαν σε ομάδες, καθόρισαν ρόλους, συνεργάστηκαν, αλληλεπίδρασαν, αναζήτησαν και οργάνωσαν το υλικό τους (ιστοεξερεύνηση), επέλεξαν τον τρόπο παρουσίασή του και ολοκλήρωσαν τις εργασίες τους. Οι ίδιες ομάδες ανέλαβαν να παρουσιάσουν τις εργασίες τους στις διαδικτυακές συναντήσεις των σχολείων. Ο ρόλος του εκπαιδευτικού ήταν καθοδηγητικός, ανατροφοδοτικός. Επρόκειτο για μια δυναμική διαδικασία η οποία παρακινούσε τους μαθητές /τις μαθήτριες να γίνουν πιο δραστήριοι/δραστήριες και να εμπλακούν ακόμη περισσότερο συμμετέχοντας στη μαθησιακή διαδικασία.

Όλο το πρόγραμμα τόσο σε επίπεδο σχεδιασμού και οργάνωσης όσο και σε επίπεδο υλοποίησης, πραγματοποίησης συναντήσεων και παρουσίασης εργασιών στηρίχθηκε σε εξ αποστάσεως πλατφόρμες μάθησης και επικοινωνίας. Η σύγχρονη εξ αποστάσεως επικοινωνία γινόταν μέσω της πλατφόρμας Skype ενώ η ασύγχρονη εξ αποστάσεως μάθηση πραγματοποιούνταν μέσα από ένα Padlet, έναν εικονικό τοίχο στον οποίο ανέβαιναν οι εργασίες των σχολείων, οι οποίες στη συνέχεια σχολιάζονταν και αξιοποιούνταν στην τάξη από το κάθε σχολείο. Για το 2024 πραγματοποιήθηκαν πέντε (05) σύγχρονες διαδικτυακές συναντήσεις (Εικόνες 2,3). Πιο συγκεκριμένα, τη Τετάρτη 15 Μαΐου 2024 πραγματοποιήθηκε η πρώτη τηλεδιάσκεψη των εκπαιδευτικών των σχολείων προκειμένου να καθοριστεί το θέμα και ο χρονοπρογραμματισμός των συναντήσεων. Τη Παρασκευή 17 Μαΐου 2024 πραγματοποιήθηκε η πρώτη τηλεδιάσκεψη μεταξύ των μαθητών/μαθητριών των σχολείων που συμμετέχουν στο πρόγραμμα με σκοπό να γνωριστούν

και να παρουσιάσουν τα σχολεία τους. Μια συνάντηση γνωριμίας με θέμα "Κουλτούρα και πολιτισμός της περιοχής μας". Τη Πέμπτη 31 Οκτωβρίου 2024 πραγματοποιήθηκε μια ακόμα διαδικτυακή συνάντηση των σχολείων και παρουσίαση εργασιών από τους/τις μαθητές/μαθήτριες. Τη Πέμπτη 5 Δεκεμβρίου 2024 πραγματοποιήθηκε η τελευταία για το 2024 διαδικτυακή συνάντηση των σχολείων ολοκληρώνοντας έτσι τις εργασίες του πρώτου έτους. Οι μαθητές/μαθήτριες αφού παρουσίασαν τις εργασίες τους, αποχαιρετήθηκαν ανανεώνοντας το ραντεβού τους για το 2025. Την Παρασκευή 6 Δεκεμβρίου 2024 πραγματοποιήθηκε διαδικτυακή συνάντηση των εκπαιδευτικών των τριών σχολείων με στόχο τον απολογισμό του προγράμματος.

Εικόνες 2, 3.
Φωτογραφίες από τις διαδικτυακές συναντήσεις



Στο πλαίσιο του συγκεκριμένου προγράμματος έγινε ευρεία χρήση πολλών και διαφορετικών ψηφιακών εργαλείων από πλευράς εκπαιδευτικών και μαθητών/μαθητριών. Όλο το παραγόμενο υλικό του προγράμματος αναρτήθηκε σε Padlet (https://padlet.com/), τον εικονικό τοίχο που δημιουργήθηκε για να καλύψει τις ανάγκες της εξ αποστάσεως συνεργασίας των σχολείων. Πρόκειται για ένα από τα πιο δημοφιλή και ευέλικτα ψηφιακά εργαλεία που χρησιμοποιούνται στην εκπαίδευση για συνεργατική μάθηση, οπτικοποίηση ιδεών και δημιουργία ψηφιακού περιεχομένου από μαθητές/μαθήτριες και εκπαιδευτικούς. Είναι μια διαδικτυακή εφαρμογή δημιουργίας ψηφιακού πίνακα όπου οι χρήστες μπορούν να αναρτούν κείμενα, εικόνες, βίντεο, ηχητικά, συνδέσμους, αρχεία και άλλα, να συνεργάζονται σε πραγματικό χρόνο, να οργανώνουν πληροφορίες με πολλούς τρόπους (χάρτες, στήλες, χρονογραμμές, πίνακες κ.λπ.) και να αλληλεπιδρούν μέσω σχολίων και αντιδράσεων. Στο πρόγραμμα "International Joint Class", το Padlet χρησιμοποιήθηκε ως εικονικός τοίχος για την ανάρτηση εργασιών των μαθητών/ μαθητριών, τη συλλογή πολυμεσικού περιεχομένου από όλες τις ομάδες, τη διαδραστική συνεργασία μεταξύ μαθητών/μαθητριών από Ελλάδα και Κορέα, την ασύγχρονη επικοινωνία και σχολιασμό εργασιών, το διαμοιρασμό του υλικού και την οργάνωση του περιεχομένου του. Το Padlet του προγράμματος βρίσκεται διαθέσιμο στον παρακάτω σύνδεσμο: https://padlet.com/suai3209/let-s-introduce-ourselves-ucqgse2zw3319nsr

Το δεύτερο ψηφιακό εργαλείο είναι το Veed (https://www.veed.io/), ένα πολύ χρήσιμο και φιλικό εργαλείο για τη δημιουργία, επεξεργασία και μετατροπή βίντεο online, χωρίς να απαιτείται εγκατάσταση λογισμικού. Είναι ιδανικό για χρήση στην εκπαίδευση, ιδιαίτερα για τη μετατροπή παρουσιάσεων σε βίντεο ή για τη δημιουργία εκπαιδευτικού πολυμεσικού περιεχόμενου γρήγορα και εύκολα. Οι μαθητές/μαθήτριες το χρησιμοποίησαν για να μετατρέψουν μια απλή παρουσίαση από Power Point σε βίντεο με τίτλο: " Lets introduce ourselves", η οποία είναι διαθέσιμη στον ακόλουθο σύνδεσμο:https://padlet.com/suai3209/let-s-introduce-ourselves-ucqgse2zw3319nsr/wish/kxodWGewxR0JQgP7

Επόμενο εργαλείο που χρησιμοποίησαν οι μαθητές/μαθήτριες στο πλαίσιο του προγράμματος είναι το Canva (https://www.canva.com/) με το οποίο δημιούργησαν μια ψηφιακή αφίσα με θέμα "Η σφαγή στο Κομμένο Άρτας, 1943" (Εικόνα 4) και διαθέσιμη στον παρακάτω σύνδεσμο: https://padlet.com/suai3209/let-s-introduce-ourselves-ucqgse2zw3319nsr/wish/O7A9QmzDbq4wZ6x3. Το Canva είναι μια online πλατφόρμα γραφιστικού σχεδιασμού, που επιτρέπει σε εκπαιδευτικούς και μαθητές/μαθήτριες να δημιουργούν εντυπωσιακό οπτικό υλικό εύκολα, χωρίς να απαιτούνται ειδικές γνώσεις σχεδίασης. Στην εκπαίδευση, το Canva μπορεί εξίσου να αξιοποιηθεί για τη δημιουργία αφίσας για μια σχολική εκδήλωση, ένα project ή ένα ιστορικό/πολιτισμικό θέμα, την οπτικοποίηση περιεχομένου μαθητών/μαθητριών (π.χ. έρευνες, παρουσιάσεις ομάδων), τις διαθεματικές εργασίες (Ιστορία, Γλώσσα, Αγωγή Υγείας κ.ά.) αλλά και να συμβάλλει στην ενίσχυση της δημιουργικότητας και του ψηφιακού γραμματισμού.

Εικόνα 4.
Ψηφιακή αφίσα "Η σφαγή στο Κομμένο Άρτας, 1943"

Για την εργασία με θέμα: "Σημαντικές ημερομηνίες και γεγονότα του Δεύτερου Παγκόσμιου Πολέμου στην Ελλάδα" οι μαθητές/μαθήτριες χωρίστηκαν σε δύο ομάδες και δημιούργησαν δύο ιστοριογραμμές (timeline) με δύο διαφορετικά εργαλεία. Η πρώτη ομάδα επέλεξε το Prezi (https://prezi.com/), ένα δημοφιλές εργαλείο παρουσίασης που διαφέρει από τα παραδοσιακά slides (όπως το PowerPoint), προσφέροντας μια μη γραμμική, δυναμική εμπειρία παρουσίασης. Παρόλο που δεν σχεδιάστηκε αποκλειστικά για ιστοριογραμμές, μπορεί να χρησιμοποιηθεί πολύ αποτελεσματικά για τη δημιουργία ιστοριογραμμών, κυρίως όταν ο στόχος είναι η οπτικά εντυπωσιακή και διαδραστική απεικόνιση γεγονότων. Η εργασία τους είναι στον παρακάτω σύνδεσμο:

- https://padlet.com/suai3209/let-s-introduce-ourselves-ucqgse2zw3319nsr/wish/pRxDZ4qYkw6XW183. Η δεύτερη ομάδα επέλεξε το Preceden (https://www.preceden.com/), ένα διαδικτυακό εργαλείο σχεδιασμένο για τη δημιουργία χρονοδιαγραμμάτων (ιστοριογραμμών) με έμφαση στην απλότητα, τη σαφήνεια και την επαγγελματική εμφάνιση. Χρησιμοποιείται ευρέως στην εκπαίδευση όπου απαιτείται παρουσίαση γεγονότων με χρονολογική σειρά. Επιτρέπει τη δημιουργία διαδραστικών ή στατικών ιστοριογραμμών και υποστηρίζει πολλαπλά επίπεδα (layers) για καλύτερη οργάνωση γεγονότων. Η εργασία είναι διαθέσιμη στον σύνδεσμο:
- https://www.preceden.com/timelines/1167188-greece-ww2/22aea42b85da60af.

Τέλος, οι ομάδες των μαθητών/μαθητριών επέλεξαν το Vocarroo (https://vocaroo.com/) με το οποίο δημιούργησαν μια εργασία με τις σημαντικές λέξεις και ορολογία του Δεύτερου Παγκοσμίου Πολέμου, στον εξής σύνδεσμο:

- https://padlet.com/suai3209/let-s-introduce-ourselves-ucqgse2zw3319nsr/wish/MbejW1XAyk43ZNkG. Το Vocarroo είναι ένα εξαιρετικά απλό και δημοφιλές διαδικτυακό εργαλείο για τη δημιουργία και διαμοίραση ηχητικών αρχείων. Χρησιμοποιείται ευρέως στην εκπαίδευση, κυρίως λόγω της ευχρηστίας του, τόσο από εκπαιδευτικούς όσο και από μαθητές/μαθήτριες. Εναλλακτικά μπορεί εξίσου να χρησιμοποιηθεί για καταγραφή αφηγήσεων, προφορικών παρουσιάσεων ή αναγνώσεων από τους/τις μαθητές/μαθήτριες, ασκήσεις παραγωγής προφορικού λόγου σε μαθήματα γλώσσας, δημιουργία podcast, ηχητικών σχολίων ή ανατροφοδότησης από τον/την εκπαιδευτικό και καταγραφή προφορικών εργασιών και σύνδεσή τους σε πλατφόρμες όπως Padlet ή Canva.

ΑΠΟΤΙΜΗΣΗ ΕΡΓΟΥ/ ΣΥΜΠΕΡΑΣΜΑΤΑ

Η υλοποίηση του προγράμματος ολοκληρώθηκε εντός των προβλεπόμενων χρονικών ορίων, με συνέπεια στην πραγματοποίηση των προγραμματισμένων συναντήσεων και δραστηριοτήτων. Όλες οι προβλεπόμενες εργασίες εκπονήθηκαν και παρουσιάστηκαν επιτυχώς από τις μαθητικές ομάδες, γεγονός που καταδεικνύει την αποτελεσματική οργάνωση και τον σαφή προγραμματισμό του έργου. Οι στόχοι που είχαν τεθεί εξ αρχής επετεύχθησαν σε ικανοποιητικό βαθμό, ενώ οι συμμετέχοντες – μαθητές/μαθήτριες και εκπαιδευτικοί – εξέφρασαν υψηλά επίπεδα ικανοποίησης από την εμπειρία συνεργασίας.

Επιπλέον, το σχολείο ανέπτυξε εξωστρεφή προσανατολισμό, ενισχύοντας τη συμμετοχή του σε διεθνή συνεργατικά εκπαιδευτικά προγράμματα. Οι μαθητικές εργασίες αναρτήθηκαν στην επίσημη ιστοσελίδα του σχολείου (**https://blogs.sch.gr/gymneoch/**), ενισχύοντας τη διάχυση των αποτελεσμάτων και την προβολή του εκπαιδευτικού έργου.

Ιδιαίτερη σημασία δόθηκε στην ανάπτυξη ομαδοσυνεργατικής κουλτούρας. Τα μέλη των ομάδων εργάστηκαν με κοινό σκοπό, ενισχύοντας την έννοια της συλλογικής ευθύνης. Η ενεργή εμπλοκή όλων των συμμετεχόντων/ουσών συνέβαλε στη σταδιακή καλλιέργεια σύνθετων δεξιοτήτων αλληλεπίδρασης, απαραίτητων για την οικοδόμηση αποτελεσματικών μορφών ομαδικής εργασίας.

ΠΕΡΙΛΗΨΗ

Τη σχολική χρονιά 2024-25 υλοποιήθηκε ένα πρόγραμμα σχετικό με το δάσος στο οποίο συμπεριλήφθηκαν και τα ψηφιακά μέσα των νέων τεχνολογιών τόσο κατά τον διδακτικό σχεδιασμό όσο και κατά την υλοποίησή του. Σκοπός ήταν τα παιδιά με βιωματικές δραστηριότητες να ανακαλύψουν τη γνώση και να ενδιαφερθούν για το δάσος ως οικοσύστημα αλλά και ως αισθητηριακή απόλαυση της φύσης, να ενισχυθεί η περιβαλλοντική τους συνείδηση και η ιδιότητα του ενεργού πολίτη. Χρησιμοποιήθηκαν διαδραστικά και ψηφιακά μέσα, αναδεικνύοντας τη δυναμική σχέση των ψηφιακών τεχνολογιών παιδαγωγικής και εκπαίδευσης. Η μεθοδολογία που ακολουθήθηκε βασίστηκε σε μια παιδοκεντρική, διερευνητική προσέγγιση, συνδυάζοντας τη διερευνητική και συνεργατική μάθηση.

Λέξεις – κλειδιά: δάσος, ενεργός πολίτης, ψηφιακές τεχνολογίες

ΕΙΣΑΓΩΓΗ

Η περιβαλλοντική εκπαίδευση στο νηπιαγωγείο διαδραματίζει καθοριστικό ρόλο στην ανάπτυξη της οικολογικής συνείδησης και της υπευθυνότητας των παιδιών για το περιβάλλον. Αποτελεί μια θεμελιώδη διαδικασία, καθώς θέτει τις βάσεις για τη διαμόρφωση υπεύθυνων και ευαισθητοποιημένων πολιτών. Μέσα από στοχευμένες δραστηριότητες και παιχνίδια, τα παιδιά ανακαλύπτουν τη μαγεία της φύσης, μαθαίνουν για την αλληλεξάρτηση των έμβιων όντων και αποκτούν θετικές στάσεις απέναντι στο περιβάλλον.

Το νέο πρόγραμμα σπουδών δίνει ιδιαίτερη βαρύτητα στην ανάπτυξης του αισθήματος του ενεργού πολίτη και στην εισαγωγή των ψηφιακών εργαλείων. Έτσι διαμορφώνεται ένα νέο τοπίο σε σχέση, με τους τρόπους με τους οποίους παίζουν, μαθαίνουν και δημιουργούν τα παιδιά (ΦΕΚ). Η καλλιέργεια ενεργών πολιτών από την προσχολική ηλικία συμβάλλει στη δημιουργία μιας κοινωνίας που προάγει την αειφορία, την περιβαλλοντική συνείδηση και αποτελεί μια επένδυση για το μέλλον. Η ανάπτυξη της κριτικής σκέψης, της συνεργατικής μάθησης βοηθά τα παιδιά να γίνουν πολίτες που νοιάζονται για τη φύση και για τη δημιουργία μιας βιώσιμης κοινωνίας.

Σ' αυτό το πλαίσιο, αποφασίσαμε τη σχολική χρονιά 2023-24 να ασχοληθούμε με το δάσος και τα πολλαπλά οφέλη που προσφέρει τόσο στο περιβάλλον όσο και στην ανθρώπινη ζωή. Αφόρμηση για τη δημιουργία αυτού του project αποτέλεσαν οι πυρκαγιές που έπληξαν τα δυο τελευταία χρόνια τη χώρα μας και ιδιαίτερα η καταστροφική πυρκαγιά του δάσους της Δαδιάς. Το πρόγραμμα πλαισιώθηκε και με τη χρήση των νέων τεχνολογιών αφού σύμφωνα με πολλαπλές έρευνες η χρήση του ηλεκτρονικού υπολογιστή μπορεί να αποτελέσει εκπαιδευτικό και γνωστικό εργαλείο και να μετασχηματίσει το μαθησιακό περιβάλλον (Raptis & Rapti 2013).

Στο παρόν πρόγραμμα συμμετείχαν δεκατρείς μαθητές και μαθήτριες από το 2ο Νηπιαγωγείο Τριαδίου, Θεσσαλονίκης. Ένα Νηπιαγωγείο, του οποίου ο αύλειος χώρος αποτελεί προέκταση ενός μικρού δασυλλίου. Έτσι τα παιδιά είχαν την ευκαιρία να έρχονται καθημερινά σε επαφή με το δάσος να το παρατηρούν, να το επισκέπτονται και να το χαίρονται καθ' όλη τη διάρκεια του έτους.

Στον σχεδιασμό του προγράμματος αρχικά χρησιμοποιήθηκε και το εργαλείο Project Based Learning (PBL) Generator από την εργαλειοθήκη της MagicSchool AI, εισάγοντας έτσι τα ψηφιακά μέσα στον διδακτικό σχεδιασμό και αξιοποιώντας παιδαγωγικά την τεχνητή νοημοσύνη.

ΔΙΔΑΚΤΙΚΗ ΠΡΟΣΕΓΓΙΣΗ

Το παρόν εκπαιδευτικό πρόγραμμα υλοποιήθηκε τη σχολική χρονιά 2023-24 με τη συμμετοχή δεκατριών μαθητών και μαθητριών του 2ου 1/Θ Νηπιαγωγείου Τριαδίου, στη Θέρμη Θεσσαλονίκης και συγκεκριμένα από 8 αγόρια και 5 κορίτσια. Η δράση ξεκίνησε τον Οκτώβριο και ολοκληρώθηκε τον Μάιο, με συνολική διάρκεια οχτώ μήνες. Ο σκοπός του προγράμματος είναι να βοηθήσει τα παιδιά να κατανοήσουν τη σημασία του φυσικού περιβάλλοντος.

Ως προς τις γνώσεις να μάθουν για το οικοσύστημα του δάσους και την αλληλεπίδραση μεταξύ των οργανισμών, να κατανοήσουν τη σημασία του οξυγόνου που προσφέρει, την επίδρασή του στο κλίμα και στη ζωή στον πλανήτη και να μάθουν πώς μπορούν να το προστατεύσουν.

Ως προς τις δεξιότητες να παρατηρήσουν και να καταγράψουν στοιχεία του δάσους, να αναπτύξουν γλωσσικές δεξιότητες μέσα από περιγραφές, αφηγήσεις και παιχνίδια, να ενισχύσουν την κινητική ανάπτυξη μέσω δραστηριοτήτων στη φύση (περιπάτους, αισθητηριακά παιχνίδια).

Ως προς τις στάσεις να καλλιεργήσουν οικολογική συνείδηση και την ιδιότητα του ενεργού πολίτη που νοιάζεται για το περιβάλλον, να συνδεθούν συναισθηματική με τη φύση, να την αγαπήσουν και να ευαισθητοποιηθούν σχετικά με τις επιπτώσεις των ανθρώπινων δραστηριοτήτων στο περιβάλλον.

Οι δράσεις σχεδιάστηκαν με βάση το νέο αναλυτικό πρόγραμμα του νηπιαγωγείου και τα εμπλεκόμενα βασικά θεματικά πεδία και ενότητες είναι: Παιδί και Επικοινωνία, Τεχνολογίες της Επικοινωνίας και της Πληροφορικής, Ανακάλυψη, Προγραμματισμός και Ψηφιακό Παιχνίδι (Α.2.2), Παιδί εαυτός και Κοινωνία, Κοινωνικές Επιστήμες και Σχέση με φυσικό και Δομημένο Περιβάλλον (Β.2.2). Ωστόσο το πρόγραμμα συμπεριλαμβάνει και αναφέρεται και σε άλλα θεματικά πεδία όπως, Παιδί και Θετικές Επιστήμες, Μαθηματικά και Παιδί, Σώμα, Δημιουργία και Έκφραση.

Η εφαρμογή της διδασκαλίας στηρίχτηκε στο μοντέλο των 5Ε (Michail, 2024). Τη φάση της Εξοικείωσης, της Επισκόπησης, της Επεξήγησης, του Εμπλουτισμού και της Εκτίμησης. Η οργάνωση των δραστηριοτήτων στην τάξη βασίστηκε στη συνεργατική μάθηση γιατί συμβάλει στην ανάπτυξη των κοινωνικών δεξιοτήτων (Avgitidou, 2008), στην

καλλιέργεια της κριτικής σκέψης και την ανάπτυξη δεξιοτήτων επίλυσης προβλημάτων. Τα παιδιά χωρίστηκαν σε μικρές ομάδες και εργάστηκαν ομαδοσυνεργατικά, ώστε μέσα από τη δυναμική της ομάδας να επέλθει η ατομική μάθηση (Matsagouras, 2004). Στόχος ήταν να εμπλακούν δημιουργικά όλα τα παιδιά σε όλες τις φάσεις των δραστηριοτήτων.

ΠΟΡΕΙΑ ΔΡΑΣΕΩΝ

Το ενδιαφέρον των παιδιών για το δάσος εκδηλώθηκε αρχικά κατά την ώρα των διαλλειμάτων στην αυλή με την παρατήρηση του δασυλλίου που βρίσκεται δίπλα σε αυτήν. Η φυσική τους περιέργεια ήταν η αφορμή και το πρόγραμμα για το δάσος ξεκίνησε με καταγραφές αρχικών ιδεών αλλά και πρότερων γνώσεων. Έπειτα τέθηκε το ερευνητικό ερώτημα: «πώς μας βοηθούν τα δάση και τι μπορούμε να κάνουμε εμείς για να τα προστατεύσουμε» (φάση της Εξοικείωσης). Τα παιδιά αναζήτησαν πληροφορίες στο διαδίκτυο και είδαν βίντεο σχετικά με το θέμα. Χωρίστηκαν σε ομάδες και έγινε καταμερισμός των δράσεων (φάση επισκόπησης).

Η εξερεύνηση άρχισε με περιπάτους κατά τη διάρκεια των οποίων ήταν φανερή η απόλαυση της γαλήνης και της ελευθερίας που πρόσφερε το δασύλλιο. Τα παιδιά έκαναν ησυχία για να ακούνε και να ηχογραφούν μαζί με μας τους ήχους του. Εισπνέαμε όλοι μαζί τα αρώματα και τις μυρωδιές του και βγάζαμε φωτογραφίες (με τη βοήθεια του κινητού της εκπαιδευτικού). Βρήκαμε μυρμηγκοφωλιές, σαλιγκάρια και κάναμε καταγραφές, διαφορετικές ανάλογα με την κάθε εποχή. Τα παιδιά με ιδιαίτερο ενδιαφέρον παρατηρούσαν το καθετί και μάζευαν υλικά από τη φύση -όπως τα ονομάσαμε. Αυτά τα τοποθετήσαμε σε μια γωνιά στην τάξη που είχε δημιουργηθεί για αυτόν τον λόγο. Μαζέψαμε φύλλα και τα χρησιμοποιήσαμε ως *πετσέτες* για να βάλουμε επάνω τα φαγητά και να κάνουμε πικ-νικ. Μετά τα παιδιά ξεκίνησαν ένα αυθόρμητο παιχνίδι με τα φύλλα κι έτσι με έναν φυσικό και αβίαστο τρόπο έγινε αναφορά σε μαθηματικές έννοιες όπως μεγάλο, μικρό, σε έννοιες ταξινόμησης (από το μεγαλύτερο φύλλο προς το μικρότερο και το αντίθετο). Σχεδιάσαμε τα περιγράμματα των φύλλων και παρατηρήσαμε το σχήμα τους. Κάναμε συγκρίσεις με τα διαφορετικά είδη φύλλων.

Από τις πιο εντυπωσιακές δράσεις ήταν τα παιχνίδια στο δάσος. Παίζαμε ό,τι μπορούσαμε να παίξουμε όπως το «λύκε λύκε είσαι εδώ», το «ένα, δυο, τρία κόκκινο φως», το κρυφτό πίσω από τους κορμούς των δέντρων, το κυνηγητό και πολλά άλλα ψυχοκινητικά παιχνίδια. Τα παιδιά ενθουσιάστηκαν τόσο πολύ που το δασύλλιο έγινε σχεδόν η καθημερινή απασχόληση, όταν ο καιρός το επέτρεπε (Εικόνα 1).

Εικόνα 1
Περίπατοι και παιχνίδια στο δάσος

Ο καιρός περνούσε, η μια εποχή διαδεχόταν την άλλη και τα παιδιά παρατηρούσαν τα δέντρα, τα φύλλα, τα έντομα και συνέχισαν να κάνουν καταγραφές. Κάθε ομάδα παρουσίαζε τα ευρήματά της στην ολομέλεια της τάξης (φάση επεξήγησης). Οι επισκέψεις στο δάσος συνεχίζονταν. Ανάμεσα στα άλλα, τα παιδιά απολάμβαναν να αγκαλιάζουν τους κορμούς των δέντρων, να μαζεύουν λουλούδια, κουκουνάρες κ.α. (Εικόνα 2) και να κάνουν έργα τέχνης με τη χρήση αυτών των υλικών (land art).

Δυστυχώς στο δασύλλιο βρήκαμε και αρκετά σκουπίδια κάτι που μας στεναχωρησε και μας αποτέλεσε αφορμή για προβληματισμό. Μαζέψαμε όσα περισσότερα μπορούσαμε και μαζί με τα παιδιά αποφασίσαμε να αναλάβουμε περαιτέρω δράση. Έτσι δημιουργήσαμε μια αφίσα με πληροφορίες για την προστασία των δασών αλλά και των ζώων που ζουν σε αυτά, την αναρτήσαμε έξω από την πόρτα του νηπιαγωγείου μας, ώστε να τη βλέπουν οι γονείς και όποιος άλλος ερχόταν στο σχολείο μας.

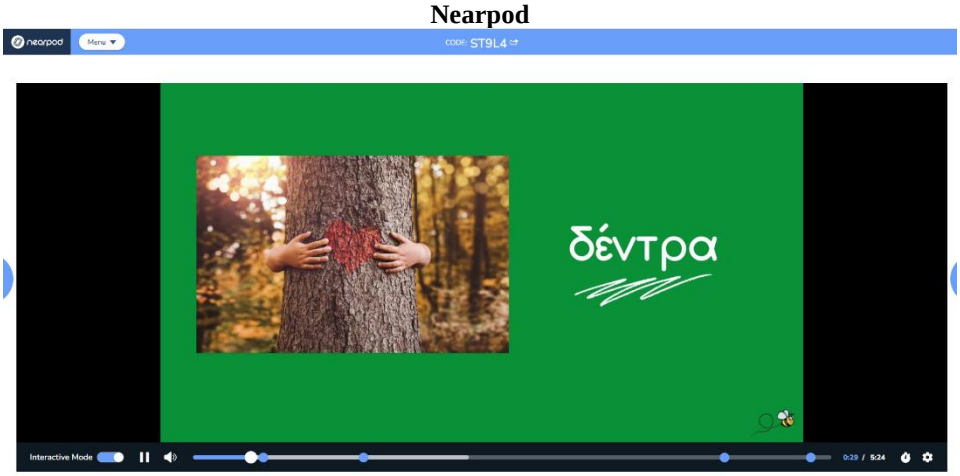
Εικόνα 2
Υλικά από τη φύση

Έπειτα όμως τα νήπια προβληματίστηκαν ακόμη πιο πολύ και έθεσαν το ερώτημα τι θα μπορούσαμε να κάνουμε ώστε να επικοινωνήσουν αυτές τις πληροφορίες σε περισσότερους ανθρώπους. Πρότειναν να φωτογραφίσουμε την αφίσα και να την ανεβάσουμε στο διαδίκτυο, στην ιστοσελίδα του σχολείου γιατί σκέφτηκαν ότι έτσι θα την έβλεπαν περισσότεροι άνθρωποι (φάση εμπλουτισμού).

Οι δράσεις συνεχίστηκαν με τη συμμετοχή μας στην ευρωπαϊκή εβδομάδα προγραμματισμού Code Week και τη χρήση της ρομποτικής μελισσούλας BeeBot για να εισαγάγουμε τα παιδιά στην υπολογιστική σκέψη μέσα από παιγνιώδη μορφή. Έτσι τα παιδιά *προγραμμάτισαν* το ρομπότ να συλλέξει πληροφορίες χρήσιμες για την προστασία των δασών. (Εικόνα 3).

Εικόνα 3
Υπολογιστική σκέψη , BeeBot

Για να βοηθήσουμε τους μαθητές και τις μαθήτριές μας να οργανώσουν τις σκέψεις τους και να αφομοιώσουν τις πληροφορίες που έλαβαν δημιουργήσαμε ένα κουΐζ χρησιμοποιώντας την ψηφιακή πλατφόρμα Quizizz. (Εικόνα 4) και τη διαδραστική εκπαιδευτική εφαρμογή Nearpod. (Εικόνα 5). Τα παιδιά συμμετείχαν με ενθουσιασμό διασκεδάζοντας αλλά και εμπεδώνοντας τις γνώσεις τους.



Ακολούθησαν ποικίλες δράσεις όπως φυτεύσεις δέντρων και λουλουδιών στον αύλειο χώρο του νηπιαγωγείου. Τα Χριστούγεννα μάλιστα στολίσαμε ένα δέντρο που επιλέξαμε από το δασάκι μας αλλά με αλλιώτικα στολίδια : τα στολίδια ήταν λεμονόκουπες γεμάτες σπόρους-τροφή για τα πουλιά για τις δύσκολες μέρες του χειμώνα. Ακόμη, πραγματοποιήθηκαν συναντήσεις και συζητήσεις με υλοτόμους και στη συνέχεια τα παιδιά δημιούργησαν ποικιλόμορφες εικαστικές κατασκευές με διάφορα υλικά και πολλά από εκείνα που είχαν συλλέξει από το δάσος. Συνεργαστήκαμε επίσης με το 1ο ΕΕΕΕΚ ειδικό σχολείο της περιοχής και δημιουργήσαμε μια συνεργατική αφίσα για το δάσος από ανακυκλώσιμα υλικά (Εικόνα 6). Όλα τα έργα εκτέθηκαν στη δημοτική βιβλιοθήκη του Δήμου μας.

Στο τέλος του προγράμματος, τα παιδιά δημιούργησαν το δικό τους παραμύθι χρησιμοποιώντας την ψηφιακή εφαρμογή Bookcreator και «ζωντανεύοντας» το μέσα από τις ιδέες και τις ζωγραφιές τους. Το ψηφιακό βιβλίο στάλθηκε με την ηλεκτρονική αλληλογραφία σε όλους τους γονείς των παιδιών.

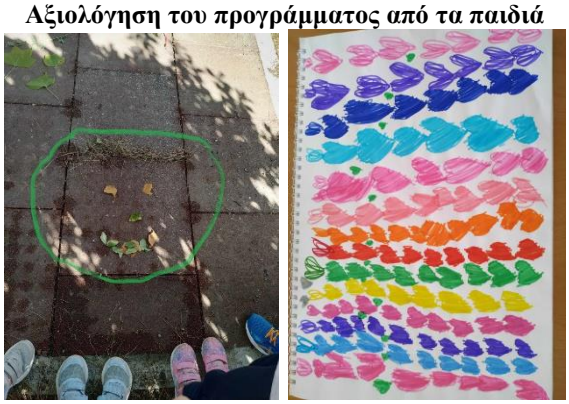
Εικόνα 6
Το δάσος



Αξίζει να σημειωθεί ότι το όλο πρόγραμμα βραβεύτηκε από την Ελληνική Εταιρία Προστασίας της Φύσης, Εθνικός Χειριστής του Διεθνούς Θεματικού Δικτύου Περιβαλλοντικής Εκπαίδευσης και τη Διεύθυνση Πρωτοβάθμιας Εκπαίδευσης Λάρισας, Συντονιστής του Δικτύου όπου συμμετείχε το σχολείο μας.

ΑΞΙΟΛΟΓΗΣΗ ΠΡΟΓΡΑΜΜΑΤΟΣ

Η αξιολόγηση του προγράμματος έγινε αρχικά με την παρατήρηση και την ενεργό συμμετοχή των παιδιών, με συζητήσεις στην ολομέλειά της τάξης και με αξιοποίηση του διαγράμματος K-W-L-H.E. Με ερωτήσεις ανοιχτού τύπου και αναστοχαστικές δραστηριότητες, αξιολογήθηκε η κατανόηση και η συναισθηματική εμπλοκή τους. Τα παιδιά αξιολόγησαν το πρόγραμμα με τον δικό τους μοναδικό τρόπο αποτυπώνοντας τις εμπειρίες τους με εικαστικούς τρόπους έκφρασης, όπως η ζωγραφική και οι κατασκευές (Εικόνα 7).

Εικόνα 7
Αξιολόγηση του προγράμματος από τα παιδιά

ΣΥΜΠΕΡΑΣΜΑΤΑ

Παρατηρήθηκε ότι η χρήση των ψηφιακών εργαλείων συντέλεσε σημαντικά στην αύξηση της αλληλεπίδρασης, στη συμμετοχή και το ενδιαφέρον των παιδιών. Επίσης, βοήθησε και διευκόλυνε την κατανόηση των βασικών εννοιών που σχετίζονται με το δάσος, αναπτύσσοντας παράλληλα τη συνεργασία και τη δημιουργική έκφραση των παιδιών. Τα παιδιά έδειχναν αμείωτο ενδιαφέρον σε όλη τη διάρκεια του project και μάλιστα σταδιακά εκδήλωναν μια ολοένα αυξανόμενη εμπλοκή τους τόσο κατά τις επισκέψεις στο δασύλλιο όσο και στην «ανατροφοδότηση». Οι απόψεις τους, οι κατασκευές τους, οι δραστηριότητές τους, η διάθεσή τους να αναλάβουν δράση για την προστασία του δάσους ήταν απόδειξη για την απήχηση που είχε το πρόγραμμα και τον βαθμό ευαισθητοποίησης που επιτεύχθηκε.

ΠΕΡΙΛΗΨΗ

Η παρούσα μελέτη διερευνά τη συστηματική ενσωμάτωση της Τεχνητής Νοημοσύνης (AI) στη διδασκαλία της Α΄ Λυκείου, εστιάζοντας στη διδακτική προσέγγιση θεμάτων σχετικών με την τηλεργασία και την επικοινωνία από απόσταση. Σκοπός της εργασίας είναι να αναδείξει πώς τα εργαλεία AI μπορούν να υποστηρίξουν την απόκτηση βασικών δεξιοτήτων εξ αποστάσεως συνεργασίας, ενισχύοντας παράλληλα την αυτονομία και τη δημιουργικότητα των μαθητών. Η ερευνητική παρέμβαση βασίστηκε σε ένα σύγχρονο εκπαιδευτικό σενάριο εκμάθησης μέσω εργασιών, ενσωματώνοντας εφαρμογές όπως το ChatGPT, συστήματα δημιουργίας αυτόματων παρουσιάσεων και πλατφόρμες συνεργατικής οργάνωσης του έργου. Παρουσιάζεται η μεθοδολογική προσέγγιση, το παιδαγωγικό πλαίσιο και τα εργαλεία τα οποία αξιοποιήθηκαν, με έμφαση στην πρακτική εφαρμογή της τηλεργασίας σε σχολικό περιβάλλον. Τα αποτελέσματα αναδεικνύουν τη σημασία της Τεχνητής Νοημοσύνης (AI) ως εργαλείου διαφοροποίησης της διδασκαλίας, υποστήριξης των μεταγνωστικών δεξιοτήτων και ενίσχυσης της συνεργασίας και της συμμετοχής των μαθητών. Η Τεχνητή Νοημοσύνη (AI) συνέβαλε στην εξατομίκευση της διδασκαλίας, στη βελτίωση της επικοινωνιακής ικανότητας και στην προώθηση της επαγγελματικής ετοιμότητας. Η εργασία προτείνει προοπτικές μελλοντικής αξιοποίησης της Τεχνητής Νοημοσύνης (AI) για τη διδασκαλία σύνθετων δεξιοτήτων, τονίζοντας τη σημασία της ανάπτυξης των παιδαγωγικών πλαισίων και των δεοντολογικών κατευθύνσεων για τη βιώσιμη ενσωμάτωσή της στην εκπαιδευτική πράξη.

Λέξεις-κλειδιά: Τεχνητή Νοημοσύνη, Τηλεργασία, Συνεργατική Μάθηση, Ψηφιακά Εργαλεία, Εκπαιδευτική Καινοτομία

ΕΙΣΑΓΩΓΗ

Η ραγδαία ανάπτυξη των τεχνολογιών της Τεχνητής Νοημοσύνης (AI) κατά τις τελευταίες δεκαετίες έχει ήδη προκαλέσει ριζικές αλλαγές σε διάφορους τομείς της ανθρώπινης δραστηριότητας, όπως η βιομηχανία, οι υπηρεσίες, η ιατρική και η εκπαίδευση (OECD, 2021). Στο πλαίσιο της εκπαίδευσης, η ενσωμάτωση των AI εργαλείων στην καθημερινή διδακτική πράξη αποτελεί πλέον μια πραγματικότητα η οποία προδιαγράφει το μέλλον της διδασκαλίας και της μάθησης (Holmes, Bialik and Fadel, 2019). Η Τεχνητή Νοημοσύνη (AI), ως τεχνολογία αιχμής, ενισχύει τη δυνατότητα της εξατομίκευσης της διδασκαλίας, της προσαρμογής της μαθησιακής διαδικασίας στις ανάγκες κάθε μαθητή, καθώς και της ανάπτυξης καινοτόμων μεθόδων για την προσέγγιση της γνώσης.

Ιδιαίτερο ενδιαφέρον παρουσιάζει η αξιοποίηση της AI για τη διδασκαλία των εννοιών και των δεξιοτήτων οι οποίες σχετίζονται με τη νέα, ψηφιακή μορφή εργασίας, όπως είναι η τηλεργασία. Στο σύγχρονο επαγγελματικό περιβάλλον, η τηλεργασία και η συνεργασία από απόσταση έχουν εξελιχθεί σε κρίσιμους μηχανισμούς λειτουργίας οργανισμών και επιχειρήσεων, φαινόμενο το οποίο ενισχύθηκε περαιτέρω από την πανδημία COVID-19 (Ciucci and Gouarderes, 2020). Είναι επιτακτική η ανάγκη της εξοικείωσης των μαθητών με τις σύγχρονες μορφές της επαγγελματικής συνεργασίας μέσω των ψηφιακών εργαλείων, καθώς συμβάλλει στην ανάπτυξη των βασικών δεξιοτήτων του 21ου αιώνα όπως είναι η συνεργασία, η επικοινωνία, η κριτική σκέψη, η ψηφιακή ικανότητα και ενισχύει την προετοιμασία τους για τις μελλοντικές απαιτήσεις της αγοράς εργασίας (Nguyen et al, 2022).

Η διδασκαλία της τηλεργασίας ως αντικείμενο της μάθησης δεν περιορίζεται στην παροχή θεωρητικών γνώσεων, αλλά ενσωματώνει τις πρακτικές εφαρμογές, όπως η χρήση των εργαλείων της σύγχρονης και της ασύγχρονης επικοινωνίας, των συνεργατικών πλατφορμών και των προγραμμάτων project management (Manousou et al, 2021). Η Τεχνητή Νοημοσύνη συνεισφέρει ουσιαστικά στην υποστήριξη αυτής της διδασκαλίας, μέσω της δημιουργίας του εκπαιδευτικού υλικού, της παροχής των εξατομικευμένων καθοδηγήσεων, αλλά και της προσομοίωσης των πραγματικών εργασιακών καταστάσεων (UNESCO, 2022).

Οι μαθητές καλούνται να αξιοποιήσουν τις τεχνολογίες τις οποίες χρησιμοποιούν στην καθημερινότητά τους, όπως το ChatGPT ή τις εφαρμογές της τεχνητής νοημοσύνης στα κοινωνικά δίκτυα, με παιδαγωγικά συγκροτημένο τρόπο, ώστε να προετοιμαστούν για τις απαιτήσεις της αγοράς εργασίας του 21ου αιώνα (Schmid and Petko, 2019). Η εκπαιδευτική παρέμβαση η οποία περιγράφεται στην παρούσα εργασία βασίζεται σε σενάριο το οποίο έχει εφαρμοστεί σε μαθητές της Α΄ Λυκείου στο πλαίσιο του μαθήματος της Πληροφορικής, με στόχο τη διδασκαλία της τηλεργασίας και της επικοινωνίας από απόσταση μέσω χρήσης των εργαλείων της Τεχνητής Νοημοσύνης (AI).

Η παρούσα μελέτη αποσκοπεί να καλύψει ένα σημαντικό κενό της ελληνικής και διεθνούς βιβλιογραφίας: την οργανωμένη αξιοποίηση της Τεχνητής Νοημοσύνης στη διδασκαλία της τηλεργασίας στην Α΄ Λυκείου. Αυτή η εργασία συνεισφέρει θεωρητικά και πρακτικά στη διαμόρφωση των νέων παιδαγωγικών μοντέλων, τα οποία υποστηρίζονται από τεχνολογίες AI, ενισχύοντας τη συνεργατική μάθηση, την ανάπτυξη ψηφιακών δεξιοτήτων, και την προετοιμασία των μαθητών για το επαγγελματικό μέλλον τους.

Συγκεκριμένα, οι επιμέρους στόχοι του παρόντος άρθρου είναι να αναδειχθεί το θεωρητικό υπόβαθρο της αξιοποίησης της Τεχνητής Νοημοσύνης στην εκπαιδευτική διαδικασία, εστιάζοντας στη δευτεροβάθμια εκπαίδευση, να περιγράψει τη μεθοδολογική προσέγγιση και το σενάριο της διδασκαλίας, η οποία εφαρμόστηκε, να παρουσιάσει τα αποτελέσματα της εκπαιδευτικής παρέμβασης ως προς την κατανόηση και την πρακτική εφαρμογή της τηλεργασίας από τους μαθητές και να προτείνει τις κατευθύνσεις για την περαιτέρω ενσωμάτωση των τεχνολογιών της Τεχνητής Νοημοσύνης (AI) στη διδασκαλία των θεμάτων του επαγγελματικού προσανατολισμού. Με αυτόν τον τρόπο, το άρθρο επιχειρεί να συμβάλει στην περαιτέρω ενίσχυση του επιστημονικού διαλόγου σχετικά με τις πρακτικές εφαρμογές της AI στην εκπαίδευση και ειδικότερα στη διδασκαλία των απαραίτητων δεξιοτήτων στο σύγχρονο επαγγελματικό τοπίο.

ΘΕΩΡΗΤΙΚΟ ΠΛΑΙΣΙΟ

Η Τεχνητή Νοημοσύνη (AI) στην Εκπαίδευση θεωρείται από τους σημαντικότερους μοχλούς του μετασχηματισμού της εκπαιδευτικής διαδικασίας, επηρεάζοντας τόσο τις μεθόδους διδασκαλίας όσο και την αξιολόγηση και την οργάνωση της γνώσης (Holmes, Bialik and Fadel, 2019). Οι εφαρμογές της AI στην εκπαίδευση περιλαμβάνουν προσαρμοστικά συστήματα μάθησης, συστήματα αξιολόγησης, εκπαιδευτικά chatbots, μηχανισμούς δημιουργίας αυτόματου περιεχομένου, καθώς και εργαλεία διαχείρισης της διδασκαλίας (OECD, 2021).

Σύμφωνα με τη UNESCO (2022), η Τεχνητή Νοημοσύνη (AI) συμβάλλει στη διαφοροποιημένη και στην εξατομικευμένη διδασκαλία, δίνοντας τη δυνατότητα σε κάθε μαθητή να ακολουθήσει μοναδική μαθησιακή διαδρομή, προσαρμοσμένη στις ατομικές ανάγκες του. Παράλληλα, διευκολύνει τη διαχείριση της μαθησιακής προόδου με ανάλυση

δεδομένων σε πραγματικό χρόνο (learning analytics), επιτρέποντας στους εκπαιδευτικούς να παρεμβαίνουν έγκαιρα και στοχευμένα (Papamitsiou and Economides, 2014). Επιπλέον ενισχύει τη δημιουργικότητα των μαθητών, προσφέροντας τη δυνατότητα της παραγωγής και της επεξεργασίας του περιεχομένου, όπως παρουσιάσεις, γραφικά, βίντεο και μουσικά κομμάτια. Πλατφόρμες όπως το ChatGPT χρησιμοποιούνται για την ανάπτυξη των δεξιοτήτων του γραμματισμού και της κριτικής σκέψης, παρέχοντας ανατροφοδότηση και διευκολύνοντας τη διαδικασία της συγγραφής (Schmid and Petko, 2019). Ωστόσο, η αποτελεσματική αξιοποίηση της Τεχνητής Νοημοσύνης (AI) στην εκπαίδευση προϋποθέτει παιδαγωγικό σχεδιασμό ο οποίος ενισχύει τη μάθηση και όχι μια τεχνοκρατική προσέγγιση. Η επιτυχής ενσωμάτωσή της εξαρτάται από τις παιδαγωγικές πεποιθήσεις των εκπαιδευτικών, την κατάλληλη επιμόρφωση και την εστίαση στη διδακτική αξιοποίηση των εργαλείων της (Velli and Zafiropoulos, 2024).

Η τηλεργασία ως αντικείμενο διδασκαλίας δεν αφορά μόνο την τεχνική χρήση των ψηφιακών εργαλείων της σύγχρονης και της ασύγχρονης επικοινωνίας, αλλά και την ανάπτυξη των συνεργατικών δεξιοτήτων, της διαχείρισης του χρόνου και της διαχείρισης του έργου έπειτα από συγκροτημένο παιδαγωγικό σχεδιασμό. Οι ψηφιακές πλατφόρμες και τα εργαλεία μπορούν να ενισχύσουν αυτές τις δεξιότητες όταν εντάσσονται στο αναλυτικό πρόγραμμα με σκοπό την ενίσχυση της συνεργασίας εξ αποστάσεως (Cherbonnier et al., 2024). Η εισαγωγή της ως διδακτικό αντικείμενο στο Λύκειο ενισχύει την επαγγελματική ετοιμότητα των μαθητών και αναπτύσσει τις δεξιότητες της ψηφιακής επικοινωνίας, της κοινωνικής δικτύωσης και της αυτοδιαχείρισης. Η χρήση των εργαλείων όπως το Zoom και το Microsoft Teams επιτρέπει στους μαθητές να συμμετέχουν σε διαδικτυακές επικοινωνίες με δυνατότητες για τα breakout rooms, κοινή χρήση της οθόνης και ομαδική συνεργασία σε πραγματικό χρόνο, ενώ εργαλεία όπως το Trello και το Padlet υποστηρίζουν την οργάνωση των έργων, τη διαχείριση των ευθυνών και την ασύγχρονη συνεργασία στα ψηφιακά περιβάλλοντα της μάθησης (Shchetynina et al., 2022). Παράλληλα, ενισχύεται η συνειδητοποίηση των ζητημάτων της ασφαλούς επικοινωνίας, της προστασίας των προσωπικών δεδομένων και της επαγγελματικής δεοντολογίας. Η τηλεργασία ως εκπαιδευτικό αντικείμενο συμβάλλει στη διαθεματική προσέγγιση της διδασκαλίας, ενσωματώνοντας στοιχεία από την Πληροφορική, τα Οικονομικά, τη Γλώσσα, και την Κοινωνιολογία.

Η Τεχνητή Νοημοσύνη υποστηρίζει ενεργά τη διδασκαλία της τηλεργασίας, ενισχύοντας τη μαθησιακή διαδικασία μέσω λειτουργιών όπως η εξατομικευμένη υποστήριξη κατά τη χρήση των εργαλείων της τηλεργασίας, η αυτόματη παραγωγή και η διανομή του διδακτικού υλικού, η δημιουργία προσομοιώσεων των επαγγελματικών περιβαλλόντων και η εποπτεία των ομαδικών εργασιών με την ταυτόχρονη παροχή της αυτοματοποιημένης ανατροφοδότησης. Επιπλέον, η αξιοποίηση των εργαλείων της δημιουργίας του περιεχομένου, όπως οι δημιουργοί βίντεο με τεχνητή νοημοσύνη και τα αυτόματα συστήματα της παραγωγής των παρουσιάσεων, δίνει τη δυνατότητα στους μαθητές να αναπτύσσουν τα ολοκληρωμένα έργα τα οποία προσομοιάζουν τις επαγγελματικές εργασίες, συμβάλλοντας στην εμβάθυνση της κατανόησης και στην απόκτηση της πρακτικής εμπειρίας (Papamitsiou and Economides, 2014). Η συνδυασμένη διδασκαλία της τηλεργασίας και της Τεχνητής Νοημοσύνης προωθεί την ανάπτυξη των σύνθετων δεξιοτήτων, όπως η συνεργατική επίλυση των προβλημάτων, η ψηφιακή επικοινωνία και η αποτελεσματική οργάνωση των έργων. Σημαντικό είναι ότι η Τεχνητή Νοημοσύνη δεν αντικαθιστά το διδάσκοντα, αλλά λειτουργεί υποστηρικτικά, ενισχύοντας το ρόλο του ως σχεδιαστή των εξατομικευμένων μαθησιακών εμπειριών (Holmes et al., 2019).

ΜΕΘΟΔΟΛΟΓΙΑ

Η ερευνητική μελέτη ακολούθησε τη μεθοδολογία της έρευνας δράσης (action research), η οποία θεωρείται ιδιαίτερα κατάλληλη για εκπαιδευτικά περιβάλλοντα στα οποία επιδιώκεται η άμεση παρέμβαση, η αναστοχαστική πρακτική και η ταυτόχρονη αξιολόγηση των αποτελεσμάτων (McNiff and Whitehead, 2011). Η έρευνα σχεδιάστηκε ως μελέτη περίπτωσης (case study), επικεντρωμένη στη συστηματική εφαρμογή και αξιολόγηση ενός σεναρίου διδασκαλίας με χρήση της AI και των εργαλείων της τηλεργασίας, στο φυσικό περιβάλλον της σχολικής τάξης. Στο σχεδιασμό του διδακτικού σεναρίου εντάχθηκε ως κεντρική μεθοδολογική πρακτική η αξιοποίηση του σεναρίου της αφήγησης (narrative-based learning). Η δομή του διδακτικού σεναρίου σχεδιάστηκε με βάση τις αρχές της σταδιακής οικοδόμησης της γνώσης και της εννοιολογικής προσέγγισης της μάθησης, ακολουθώντας διαδοχικά στάδια τα οποία στόχευαν στην ανάπτυξη γνωστικών, τεχνολογικών και κοινωνικών δεξιοτήτων σχετικών με την τηλεργασία και τη συνεργασία από απόσταση. Στο εισαγωγικό μέρος αξιοποιήθηκε ένα αφηγηματικό πλαίσιο βασισμένο σε μια αυθεντική, σύγχρονη επαγγελματική κατάσταση, στην οποία εφαρμόζεται η εξ αποστάσεως εργασία, (Εικόνα 1) και (Εικόνα 2), με σκοπό τη δημιουργία συνθηκών νοηματοδότησης και τη σύνδεση του γνωστικού αντικειμένου με τον πραγματικό κόσμο των μαθητών (constructivist anchoring). Αυτή η παρουσίαση συνέβαλε στην κινητοποίηση του ενδιαφέροντος και στο έναυσμα για τις επόμενες μαθησιακές φάσεις.

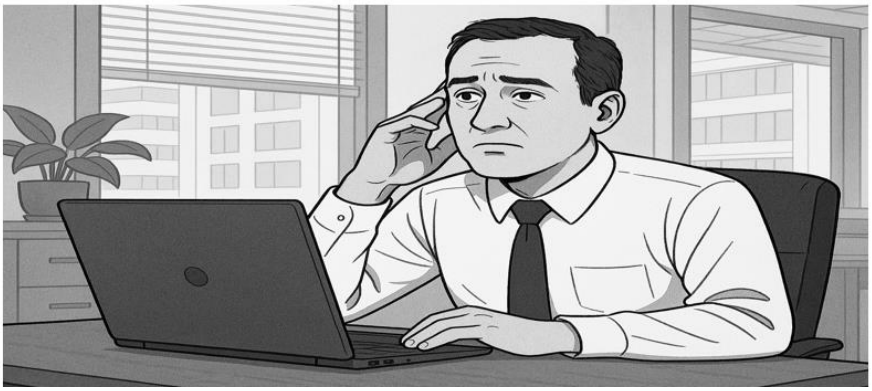
Εικόνα 1
Εργαζόμενος από Απόσταση

ΔΗΜΙΟΥΡΓΗΣΕ ΣΕΝΑΡΙΟ ΑΦΗΓΗΣΗΣ ΓΙΑ ΒΙΝΤΕΟ

- **Σενάριο Αφήγησης για το Μάθημα: Τηλεργασία και Συνεργασία από Απόσταση**

Έναρξη της Αφήγησης

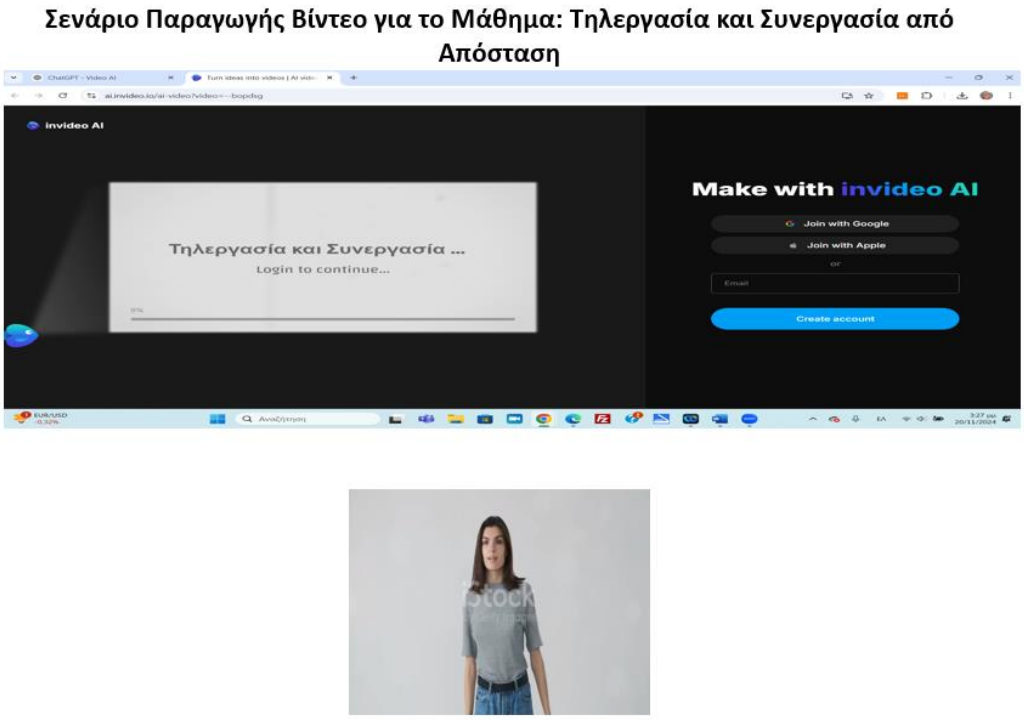
Η ιστορία μας ξεκινά σε έναν ήσυχο γειτονικό δρόμο. Σε ένα μικρό, φωτεινό διαμέρισμα, ο Δημήτρης εργάζεται μπροστά στον υπολογιστή του. Κάποτε, έπρεπε να περνά δύο ώρες την ημέρα σε κίνηση για να φτάσει στο γραφείο του, αλλά τώρα το γραφείο του είναι το ίδιο του το σπίτι. **Ο Δημήτρης είναι προγραμματιστής και εργάζεται μέσω τηλεργασίας.**



«Ποτέ δεν περίμενα ότι θα μπορούσα να εργάζομαι από το σπίτι μου», λέει στον φίλο του, Γιάννη, κατά τη διάρκεια ενός βιντεοκλήσης. «Έχω περισσότερο χρόνο για την οικογένειά μου και μπορώ να οργανώνω τη μέρα μου πιο ευέλικτα.»

Εικόνα 2
Εργαζόμενος με φυσική παρουσία στο χώρο εργασίας του

Η Εμπειρία του Γιάννη



Ο Γιάννης, από την άλλη πλευρά, έχει μια διαφορετική εμπειρία. Εργάζεται σε μια παραδοσιακή εταιρεία όπου πρέπει να πηγαίνει στο γραφείο καθημερινά. **«Δεν μπορώ να φανταστώ πώς θα ήταν να δουλεύω από απόσταση»**, λέει. «Πώς διαχειρίζεσαι την απομόνωση, Δημήτρη;» Ο Δημήτρης του εξηγεί ότι χρειάζεται καλή οργάνωση και πειθαρχία. «Δεν είναι για όλους», λέει. «Αλλά υπάρχουν πλεονεκτήματα, όπως η ευελιξία και η εξοικονόμηση χρόνου μετακίνησης.»

Το σενάριο της αφήγησης αναπτύχθηκε με τη μορφή εκπαιδευτικού βίντεο, το οποίο αποτέλεσε το αφηγηματικό πλαίσιο της εισαγωγής των μαθητών στο θέμα της τηλεργασίας και της ψηφιακής επικοινωνίας. Το βίντεο χρησιμοποίησε τεχνικές αφήγησης με πρωτοπρόσωπη οπτική και πραγματικά παραδείγματα, ώστε να διευκολύνει τη σύνδεση των μαθητών με το αντικείμενο. Η δημιουργία του εκπαιδευτικού βίντεο με θέμα την «Τηλεργασία και Συνεργασία από Απόσταση» (Εικόνα 3) οργανώθηκε στη βάση ενός αφηγηματικού σεναρίου το οποίο καταρτίστηκε με τη βοήθεια του ChatGPT και μετέτρεψε την αρχική αφήγηση σε δομημένο σενάριο παραγωγής. Το σενάριο ακολουθούσε σαφή δομή με διαδοχικά μέρη: εισαγωγή στο φαινόμενο της τηλεργασίας, παρουσίαση εννοιών και μορφών (όπως εργασία από το σπίτι

ή σε τηλεκέντρα), ανάλυση εργαλείων συνεργασίας (Zoom, Padlet, email) και επίλογο με έμφαση στο μέλλον της εξ αποστάσεως συνεργασίας. Το ChatGPT διατύπωσε λεπτομερώς τις σκηνές, ενώ παρείχε και σαφείς οδηγίες παραγωγής. Οι μαθητές επέλεξαν την αφήγηση να γίνει στην ελληνική γλώσσα, με ανδρική φωνή, και ήπια μουσική υπόκρουση. Για τα γυρίσματα χρησιμοποιήθηκαν πραγματικά περιβάλλοντα (π.χ. σπίτια, καφετέριες), τα οποία συνδυάστηκαν με γραφικά και διαγράμματα. Το μοντάζ περιλάμβανε μεταβάσεις με χαλαρή μουσική και δυναμικούς τίτλους για κάθε σκηνή, ενώ η φιλική και ζεστή φωνή του αφηγητή διευκόλυνε την κατανόηση. Το τελικό αποτέλεσμα αξιοποιήθηκε στην τάξη ως αφορμή για τη βιωματική ενασχόληση με την έννοια της τηλεργασίας.

Εικόνα 3
Παραγωγή Video με AI

Ακολούθησε η ανάλυση των μορφών της τηλεργασίας, με έμφαση τόσο στη σύγχρονη (real-time) όσο και στην ασύγχρονη (time-independent) συνεργασία, μέσα από τη χρήση ψηφιακών εργαλείων όπως οι πλατφόρμες επικοινωνίας και διαχείρισης έργου. Η εισαγωγή των μαθητών στις λειτουργίες, στις απαιτήσεις και στα παραδείγματα εφαρμογής αυτών των μορφών υποστήριξε τη μεταγνώση και την εστίαση στις διαφοροποιημένες στρατηγικές συνεργασίας. Στη συνέχεια, οι μαθητές ενθαρρύνθηκαν να διερευνήσουν τα οφέλη και τις προκλήσεις της τηλεργασίας, ενισχύοντας τη δεξιότητα της κριτικής σκέψης και την ικανότητά τους να αξιολογούν διαφορετικές εργασιακές πρακτικές στο πλαίσιο της κοινωνίας της πληροφορίας. Η πρακτική φάση του σεναρίου περιλάμβανε προσομοιωμένη ομαδική εργασία, στην οποία οι μαθητές, οργανωμένοι σε μικρές ομάδες, αξιοποίησαν σύγχρονα εργαλεία Τεχνητής Νοημοσύνης και τηλεδιάσκεψης (π.χ. ChatGPT, Trello, Zoom, Padlet) για την από κοινού εκπόνηση ενός έργου, (Εικόνα 4). Μέσα από αυτή τη βιωματική δραστηριότητα, οι μαθητές ανέπτυξαν δεξιότητες συνεργασίας, διαχείρισης έργου, ψηφιακής επικοινωνίας και επίλυσης προβλημάτων σε ψηφιακά περιβάλλοντα.

Το σενάριο ολοκληρώθηκε με μια φάση αναστοχασμού και συζήτησης. Οι μαθητές κλήθηκαν να επεξεργαστούν τις εμπειρίες τους, να αξιολογήσουν τις στρατηγικές τις οποίες χρησιμοποίησαν και να συνδέσουν τα μαθησιακά αποτελέσματά τους με μελλοντικά επαγγελματικά ή ακαδημαϊκά συμφραζόμενα. Η ενσωμάτωση της αφήγησης καθ' όλη τη διάρκεια της διδακτικής πορείας ενίσχυσε όχι μόνο την ενσυναίσθηση και τη συναισθηματική εμπλοκή των μαθητών, αλλά και τη μεταγνωστική επίγνωσή τους, υποστηρίζοντας τη βαθύτερη επεξεργασία της πληροφορίας και την ενίσχυση της μαθησιακής αυτονομίας. Συνολικά, το σενάριο λειτούργησε ως πολυτροπικό παιδαγωγικό εργαλείο, συνδυάζοντας την τεχνολογική και τη συναισθηματική διάσταση, με στόχο τη δημιουργία μιας σύγχρονης, ενεργητικής και βιωματικής εμπειρίας μάθησης.

Εικόνα 4
Συνεργασία από Απόσταση-Αξιοποίηση Padlet

Η εκπαιδευτική παρέμβαση πραγματοποιήθηκε σε δύο (2) τμήματα. Ένα (1) τμήμα Πειραματικού Λυκείου και ένα (1) τμήμα Πρότυπου Γυμνασίου. Η εκπαιδευτική παρέμβαση υλοποιήθηκε σε τρεις (3) διακριτές φάσεις, με στόχο τη σταδιακή εισαγωγή, την εμπλοκή και την αξιολόγηση των μαθητών στη διδασκαλία της τηλεργασίας μέσω εργαλείων Τεχνητής Νοημοσύνης. Στην πρώτη (1η) φάση (1 διδακτική ώρα), προβλήθηκε και αναλύθηκε το σενάριο της αφήγησης μέσα από ένα εκπαιδευτικό βίντεο, το οποίο λειτούργησε ως εργαλείο κινητοποίησης και εισαγωγής των μαθητών στις βασικές έννοιες της τηλεργασίας και της εξ αποστάσεως συνεργασίας. Στη δεύτερη (2η) φάση (6 διδακτικές ώρες), ακολούθησε η πρακτική εφαρμογή, κατά την οποία οι μαθητές εργάστηκαν ομαδοσυνεργατικά σε προσομοιωτικά σενάρια τηλεργασίας, αξιοποιώντας σύγχρονα ψηφιακά εργαλεία όπως Zoom, Trello και Padlet, καθώς και δημιουργικές εφαρμογές της Τεχνητής Νοημοσύνης, όπως το ChatGPT και συστήματα αυτόματης παραγωγής παρουσιάσεων. Η τρίτη (3η) και τελευταία φάση (1 διδακτική ώρα) περιλάμβανε συζήτηση αναστοχασμού και αξιολόγηση της μαθησιακής εμπειρίας, μέσω ανατροφοδότησης, καταγραφής εμπειριών και δυσκολιών από τους μαθητές, καθώς και συστηματικής παρατήρησης από τους εκπαιδευτικούς.

Η συλλογή των ερευνητικών δεδομένων πραγματοποιήθηκε με τη χρήση ποιοτικών εργαλείων, τα οποία παρείχαν πολύπλευρη εικόνα της εκπαιδευτικής παρέμβασης. Συγκεκριμένα, αξιοποιήθηκε η συστηματική παρατήρηση της τάξης από τους εκπαιδευτικούς, οι οποίοι κατέγραφαν τις παρατηρήσεις τους σε ημερολόγια διδασκαλίας, ενώ αναλύθηκαν τα έργα τα οποία παρήγαγαν οι μαθητές, όπως παρουσιάσεις, ψηφιακές αναρτήσεις και σχέδια έργου. Επιπλέον, πραγματοποιήθηκαν ημιδομημένες συζητήσεις αναστοχασμού με τους μαθητές κατά τη φάση της αξιολόγησης, συζητήσεις καθώς και συνεντεύξεις με τους εμπλεκόμενους εκπαιδευτικούς. Η αξιολόγηση επικεντρώθηκε στην καταγραφή των εμπειριών, των δυσκολιών, των στρατηγικών και των στάσεων των μαθητών, όπως αυτές αποτυπώθηκαν κατά την εφαρμογή του σεναρίου και μέσω της παιδαγωγικής παρατήρησης. Ωστόσο, η ερμηνεία των δεδομένων επηρεάζεται από ορισμένους περιορισμούς, όπως το σχετικά μικρό δείγμα, η ετερογένεια ως προς τις ψηφιακές δεξιότητες των μαθητών και η περιορισμένη χρονική διάρκεια της παρέμβασης.

ΑΠΟΤΕΛΕΣΜΑΤΑ

Η ανάλυση των παρατηρήσεων των εκπαιδευτικών, των παραγόμενων έργων των μαθητών και των συζητήσεων αναστοχασμού ανέδειξε σημαντικά ευρήματα σχετικά με την επίδραση της εκπαιδευτικής παρέμβασης. Οι μαθητές φάνηκε να ενισχύουν ουσιαστικά την κατανόηση των βασικών εννοιών οι οποίες σχετίζονται με την τηλεργασία, αναγνωρίζοντας την πρακτική εφαρμογή της εξ αποστάσεως συνεργασίας. Η ενεργή εμπλοκή τους στη χρήση των εργαλείων της τηλεργασίας και της τεχνητής νοημοσύνης (AI) ενίσχυσε τη συνεργασία εντός των ομάδων και βελτίωσε τις ψηφιακές δεξιότητές τους. Εντυπωσιακή ήταν η αύξηση της συμμετοχής και του ενδιαφέροντος, ιδιαίτερα από μαθητές οι οποίοι παραδοσιακά παρουσιάζουν χαμηλή εμπλοκή. Παράλληλα, καταγράφηκαν αυξημένα επίπεδα πρωτοβουλίας και αυτονομίας κατά την εκτέλεση των ομαδικών εργασιών, όπως τεκμηριώθηκε στα ημερολόγια παρατήρησης και στα παραγόμενα έργα των μαθητών.

Από την ανάλυση των ποιοτικών δεδομένων προέκυψαν σημαντικές ενδείξεις για τη θετική επίδραση της διδακτικής παρέμβασης στους μαθητές. Καταγράφηκε βελτίωση στις επικοινωνιακές δεξιότητές τους, με έμφαση στην ικανότητά τους να συντονίζουν ομαδικές εργασίες σε ψηφιακά περιβάλλοντα και να διαχειρίζονται αποτελεσματικά την ανταλλαγή πληροφοριών μέσω εργαλείων όπως το Trello και οι πλατφόρμες τηλεδιάσκεψης. Οι μαθητές ανέπτυξαν βαθύτερη κατανόηση της τηλεργασίας, αποκτώντας επίγνωση των απαιτήσεών της, όπως η σαφής επικοινωνία, η διαχείριση του χρόνου και η επίλυση συγκρούσεων εξ αποστάσεως. Παράλληλα, η χρήση εργαλείων τεχνητής νοημοσύνης, όπως το ChatGPT, ενίσχυσε την αυτονομία τους, υποστηρίζοντας την αυτόνομη αναζήτηση και τη διαχείριση των πληροφοριών, καθώς και την ενεργή συμμετοχή τους στη δημιουργία περιεχομένου. Ορισμένοι μαθητές ανέφεραν ότι ανέπτυξαν μεταγνωστικές δεξιότητες, κυρίως μέσω της χρήσης ανατροφοδοτικών εργαλείων και αναστοχαστικών δραστηριοτήτων. Συνολικά, η εμπειρία τους από το σενάριο ήταν θετική, καθώς οι περισσότεροι δήλωσαν ενδιαφέρον και ικανοποίηση, διότι η αφηγηματική προσέγγιση λειτούργησε υποστηρίζοντας τη βιωματική κατανόηση του θέματος. Αυτά τα ευρήματα επιβεβαιώνουν την παιδαγωγική αξία της ενσωμάτωσης της τεχνητής νοημοσύνης και της τηλεργασίας στην εκπαιδευτική διαδικασία, ιδίως όταν συνδυάζονται με την ενεργοποίηση μέσω της αφήγησης και τις ομαδοσυνεργατικές πρακτικές.

Σύμφωνα με τις συστηματικές παρατηρήσεις των εκπαιδευτικών, όπως καταγράφηκαν στα ημερολόγια της τάξης και αποτυπώθηκαν στις συζητήσεις του αναστοχασμού, η εκπαιδευτική παρέμβαση οδήγησε σε πολλαπλά θετικά αποτελέσματα. Παρατηρήθηκε αυξημένο επίπεδο εμπλοκής και συμμετοχής των μαθητών, ιδιαίτερα κατά τη χρήση των εργαλείων της τηλεργασίας και της Τεχνητής Νοημοσύνης (AI). Το αφηγηματικό σενάριο λειτούργησε ενισχυτικά, ενισχύοντας το ενδιαφέρον και ενεργοποιώντας ακόμη και μαθητές οι οποίοι παραδοσιακά συμμετέχουν λιγότερο. Παρά τις αρχικές δυσκολίες της προσαρμογής στη χρήση των εργαλείων της διαχείρισης του έργου, όπως το Trello, οι μαθητές σταδιακά ανέπτυξαν λειτουργικές πρακτικές της οργάνωσης, του καταμερισμού των ρόλων και της συνεργατικής δράσης. Η διαδικασία υποστηρίχθηκε ενεργά από την καθοδήγηση του εκπαιδευτικού και από την ενίσχυση της συνεργασίας εντός των ομάδων.

Παράλληλα, οι εκπαιδευτικοί διαπίστωσαν σημαντική πρόοδο στην ενίσχυση των κοινωνικών και των συνεργατικών δεξιοτήτων των μαθητών. Μέσα από τη χρήση των ψηφιακών εργαλείων και τις ομαδοσυνεργατικές δραστηριότητες, προωθήθηκε η συλλογική δόμηση της γνώσης, η συναινετική λήψη των αποφάσεων, καθώς και η ανάπτυξη των δεξιοτήτων όπως η επικοινωνία, η ενσυναίσθηση και η επίλυση των προβλημάτων. Η Τεχνητή Νοημοσύνη αξιοποιήθηκε όχι μόνο ως εργαλείο παραγωγής υλικού, αλλά και ως μέσο παιδαγωγικής διαφοροποίησης, επιτρέποντας την προσαρμογή του μαθήματος στις ανάγκες και το ρυθμό κάθε ομάδας. Οι εκπαιδευτικοί εκτίμησαν συνολικά ως επιτυχημένη την εμπειρία, επισημαίνοντας τόσο τη γνωστική πρόοδο όσο και τη συναισθηματική ενδυνάμωση των μαθητών. Η ενσωμάτωση της AI και των εργαλείων τηλεργασίας, σε συνδυασμό με την αφήγηση, λειτούργησε υποστηρικτικά προς την καλλιέργεια των δεξιοτήτων του 21ου αιώνα, επιβεβαιώνοντας την ανάγκη του σχεδιασμού και της εφαρμογής καινοτόμων παιδαγωγικών πρακτικών οι οποίες συνδέουν τη μάθηση με το σύγχρονο ψηφιακό και επαγγελματικό περιβάλλον.

Η εφαρμογή του εκπαιδευτικού σεναρίου το οποίο βασίστηκε στη συνδυαστική χρήση των εργαλείων της Τεχνητής Νοημοσύνης και της τηλεργασίας ανέδειξε τη δυναμική μιας πολυτροπικής παιδαγωγικής προσέγγισης στην καλλιέργεια των σύνθετων ψηφιακών και κοινωνικών δεξιοτήτων. Η εισαγωγή του αφηγηματικού πλαισίου συνέβαλε καθοριστικά στη βιωματική εμπλοκή των μαθητών, ενισχύοντας τη σύνδεση με πραγματικές επαγγελματικές συνθήκες και διευκολύνοντας τη νοηματοδότηση βασικών εννοιών, όπως η εξ αποστάσεως συνεργασία και η ψηφιακή επαγγελματική επικοινωνία. Η αξιοποίηση της AI δεν περιορίστηκε σε υποστηρικτικό ρόλο, αλλά λειτούργησε ως βασικός μοχλός εξατομίκευσης και παιδαγωγικής διαφοροποίησης, επιτρέποντας την προσαρμογή των εργασιών στις ιδιαίτερες ανάγκες των μαθητών. Μέσω της αυτόνομης αναζήτησης πληροφοριών και της δημιουργικής παραγωγής περιεχομένου, ενισχύθηκαν η αυτονομία, η δημιουργικότητα και η κριτική σκέψη, όπως επιβεβαιώθηκε από τις εκπαιδευτικές παρατηρήσεις και την ανάλυση των παραγόμενων έργων. Παράλληλα, η χρήση συνεργατικών πλατφορμών προσέφερε τη δυνατότητα της προσομοίωσης ρεαλιστικών περιβαλλόντων τηλεργασίας, ενισχύοντας την κατανόηση των απαιτήσεων και των προκλήσεων τις οποίες συνεπάγεται η επαγγελματική συνεργασία από απόσταση (Holmes et al., 2019).

Η ενσωμάτωση τεχνολογιών AI στη διδακτική πρακτική συνέβαλε στην ενίσχυση των μεταγνωστικών δεξιοτήτων, καθώς προώθησε την αναστοχαστική σκέψη και την ικανότητα της αυτοαξιολόγησης (UNESCO, 2022). Τα ευρήματα της παρούσας μελέτης ευθυγραμμίζονται με σύγχρονες διεθνείς έρευνες οι οποίες αναδεικνύουν το ρόλο της Τεχνητής Νοημοσύνης στην εξατομίκευση της μάθησης, καθώς και στην ανάπτυξη των δεξιοτήτων όπως η επίλυση προβλημάτων, η συνεργασία και η δημιουργικότητα (Ciucci and Gouarderes, 2020). Ωστόσο, αναδείχθηκαν και προκλήσεις, όπως οι αρχικές δυσκολίες της προσαρμογής στη χρήση των εργαλείων της διαχείρισης του έργου, την ανάγκη της εντατικής υποστήριξης στη φάση της εξοικείωσης με τα ψηφιακά εργαλεία, καθώς και τα διαφοροποιημένα επίπεδα του ψηφιακού γραμματισμού μεταξύ των μαθητών. Η επιφανειακή χρήση των εργαλείων AI κατά τα πρώτα

στάδια της εφαρμογής ανέδειξε την αναγκαιότητα της συστηματικής παιδαγωγικής καθοδήγησης, ώστε αυτά να αξιοποιηθούν ουσιαστικά ως μέσα μάθησης και όχι ως απλές τεχνολογικές καινοτομίες. Συνολικά, η εφαρμογή επιβεβαίωσε ότι ο συνδυασμός των αφηγηματικών τεχνικών, των εργαλείων της AI και της τηλεργασίας, στο πλαίσιο ενός οργανωμένου σεναρίου, προωθεί τη βιωματική και την ενεργητική μάθηση και αποτελεί μια κατάλληλη προσέγγιση για την καλλιέργεια των δεξιοτήτων του 21ου αιώνα στο σύγχρονο σχολείο.

ΟΦΕΛΗ, ΠΕΡΙΟΡΙΣΜΟΙ ΚΑΙ ΗΘΙΚΑ ΖΗΤΗΜΑΤΑ ΑΠΟ ΤΗΝ ΕΝΣΩΜΑΤΩΣΗ ΤΗΣ ΤΕΧΝΗΤΗΣ ΝΟΗΜΟΣΥΝΗΣ ΣΤΗΝ ΕΚΠΑΙΔΕΥΣΗ

Η Τεχνητή Νοημοσύνη αναδεικνύεται ως ένα ισχυρό παιδαγωγικό εργαλείο το οποίο μπορεί να ενισχύσει την εξατομικευμένη διδασκαλία, να προσφέρει την προσαρμοσμένη ανατροφοδότηση και να υποστηρίξει τη δημιουργία συνεργατικών, ενεργών μαθησιακών περιβαλλόντων. Μέσω συστημάτων όπως τα εκπαιδευτικά chatbots, οι αλγόριθμοι προσαρμοστικής μάθησης και τα εργαλεία της δημιουργίας του ψηφιακού περιεχομένου, οι μαθητές έχουν τη δυνατότητα να καλλιεργήσουν δεξιότητες όπως η δημιουργικότητα, η κριτική σκέψη και η αυτορρυθμιζόμενη μάθηση (OECD, 2021, Papamitsiou and Economides, 2014). Παράλληλα, η AI μπορεί να υποστηρίξει τη διδασκαλία των μαθητών με ειδικές μαθησιακές ανάγκες και να προάγει τη διαθεματική συνεργασία μεταξύ των γνωστικών αντικειμένων. Ωστόσο, η παιδαγωγική αξιοποίηση αυτών των τεχνολογιών προϋποθέτει την κατάλληλη επιμόρφωση των εκπαιδευτικών, τις επαρκείς υποδομές και την ευαισθησία απέναντι στους κοινωνικούς και στους πολιτισμικούς παράγοντες οι οποίοι επηρεάζουν τη μαθησιακή διαδικασία (UNESCO, 2022).

Παρά τα εκπαιδευτικά οφέλη της, η ενσωμάτωση της AI συνοδεύεται από σοβαρούς ηθικούς, κοινωνικούς και παιδαγωγικούς προβληματισμούς. Η χρήση αλγοριθμικών συστημάτων αξιολόγησης και η συλλογή προσωπικών δεδομένων εγείρουν ζητήματα διαφάνειας, λογοδοσίας και προστασίας των δικαιωμάτων των μαθητών, καθιστώντας απαραίτητη τη συμμόρφωση με αυστηρά πρωτόκολλα ασφάλειας (Ciucci and Gouarderes, 2020). Παράλληλα, η αλγοριθμική μεροληψία μπορεί να οδηγήσει σε άνιση μεταχείριση ή αποκλεισμό των μαθητών (OECD, 2021), ενώ η υπερ-τεχνολογικοποίηση της τάξης ενδέχεται να μειώσει τη σημασία της ανθρώπινης διάδρασης, της ενσυναίσθησης και της αναλογικής παιδαγωγικής, οι οποίες είναι απαραίτητες για την καλλιέργεια κοινωνικοσυναισθηματικών δεξιοτήτων (Holmes et al., 2019). Η συνεχής αλληλεπίδραση με ψηφιακά συστήματα μπορεί να επηρεάσει αρνητικά την ψυχοκοινωνική ανάπτυξη των μαθητών, προκαλώντας άγχος ή αίσθηση παρακολούθησης. Συνεπώς, η Τεχνητή Νοημοσύνη πρέπει να αξιοποιείται με παιδαγωγική επίγνωση, ενσυνείδητα και με θεσμική υποστήριξη, ως εργαλείο ενίσχυσης της μάθησης και όχι ως υποκατάστατο της εκπαιδευτικής σχέσης.

ΣΥΜΠΕΡΑΣΜΑΤΑ ΚΑΙ ΠΡΟΤΑΣΕΙΣ

Η παρούσα ερευνητική παρέμβαση ανέδειξε τη δυναμική της ενσωμάτωσης της Τεχνητής Νοημοσύνης στην εκπαιδευτική διαδικασία, ειδικά όταν αυτή στοχεύει στην καλλιέργεια των δεξιοτήτων της τηλεργασίας. Μέσα από την εφαρμογή ενός οργανωμένου και πολυτροπικού διδακτικού σεναρίου, το οποίο συνδύασε την αφήγηση, τα εργαλεία της τηλεργασίας και τις ψηφιακές εφαρμογές της AI, οι μαθητές της Α΄ Λυκείου ανέπτυξαν ουσιαστικές γνώσεις και δεξιότητες σχετικές με τη συνεργασία από απόσταση, την επαγγελματική επικοινωνία και τη λειτουργική χρήση των τεχνολογικών εργαλείων. Υπήρξε ενεργή και στοχευμένη η εμπλοκή τους στη μαθησιακή διαδικασία, ενισχύοντας όχι μόνο τις τεχνικές, αλλά τις κοινωνικές και τις μεταγνωστικές ικανότητές τους.

Η Τεχνητή Νοημοσύνη δεν λειτούργησε απλώς ως υποστηρικτικό μέσο, αλλά αναδείχθηκε σε βασικό εργαλείο εξατομικευμένης μάθησης, παιδαγωγικής διαφοροποίησης και ανάπτυξης της αυτονομίας των μαθητών. Η χρήση των εργαλείων της AI διευκόλυνε την κατανόηση των σύνθετων εννοιών, ενεργοποίησε την κριτική και την αναστοχαστική σκέψη και ενίσχυσε τη δημιουργικότητα. Παράλληλα, η εμπειρία της τηλεργασίας μέσω των ψηφιακών πλατφορμών προσέφερε στους μαθητές τη δυνατότητα της προσομοίωσης των ρεαλιστικών επαγγελματικών καταστάσεων, ενισχύοντας την κατανόηση των απαιτήσεων της σύγχρονης εργασιακής πραγματικότητας. Ωστόσο, η εφαρμογή ανέδειξε την ανάγκη για τη σταδιακή εξοικείωση των μαθητών με αυτά τα νέα εργαλεία και τις νέες έννοιες. Ο καθοριστικός ρόλος του εκπαιδευτικού παραμένει ως εμψυχωτής, καθοδηγητής και διαμεσολαβητής της μάθησης.

Με βάση τα παραπάνω ευρήματα, προτείνονται συγκεκριμένες παιδαγωγικές κατευθύνσεις για τη μελλοντική αξιοποίηση της Τεχνητής Νοημοσύνης και της τηλεργασίας στην εκπαίδευση. Η συστηματική ένταξη των εργαλείων AI στη διδακτική πράξη όλων των γνωστικών αντικειμένων μπορεί να ενισχύσει τη μεταγνωστική και την κοινωνική ανάπτυξη των μαθητών. Παράλληλα, κρίνεται απαραίτητη η ενσωμάτωση των σχετικών θεματικών ενοτήτων με την τηλεργασία, στα προγράμματα των σπουδών της Δευτεροβάθμιας Εκπαίδευσης, ως η προετοιμασία για τις συνθήκες της αγοράς εργασίας του 21ου αιώνα. Η χρήση αφηγηματικών τεχνικών και σεναρίων προσομοίωσης μπορεί να ενισχύσει τη βιωματική προσέγγιση της μάθησης, ενώ η επιμόρφωση των εκπαιδευτικών στην παιδαγωγική αξιοποίηση της AI αποτελεί βασική προϋπόθεση για την αποτελεσματική εφαρμογή. Απαιτείται περαιτέρω ερευνητική διερεύνηση για τη

συστηματική αποτίμηση των μακροπρόθεσμων μαθησιακών και κοινωνικών αποτελεσμάτων της ενσωμάτωσης της AI και της τηλεργασίας στο σχολικό περιβάλλον. Η Τεχνητή Νοημοσύνη, εφόσον αξιοποιηθεί παιδαγωγικά και οργανωμένα, μπορεί να συμβάλει καθοριστικά στο μετασχηματισμό του σχολείου σε ένα σύγχρονο, ευέλικτο και μαθητοκεντρικό θεσμό, ικανό να ανταποκριθεί στις προκλήσεις της ψηφιακής εποχής και της κοινωνίας της γνώσης.

Η εφαρμογή της Τεχνητής Νοημοσύνης στη δευτεροβάθμια εκπαίδευση αναδεικνύει σημαντικές δυνατότητες για την εξατομίκευση της διδασκαλίας, την προσαρμοστική ανατροφοδότηση και τη δημιουργία συνεργατικών μαθησιακών περιβαλλόντων. Μέσω εργαλείων όπως τα εκπαιδευτικά chatbots, τα συστήματα προσαρμοστικής μάθησης και οι μηχανισμοί αυτόματης αξιολόγησης, οι εκπαιδευτικοί μπορούν να ενισχύσουν την ενεργή συμμετοχή, την αυτονομία και την αίσθηση του ελέγχου των μαθητών στη μαθησιακή διαδικασία (OECD, 2021). Ωστόσο, η ενσωμάτωση της AI στην καθημερινή εκπαιδευτική πρακτική συνοδεύεται από σημαντικές προκλήσεις, όπως η έλλειψη επιμόρφωσης των εκπαιδευτικών, η ανάγκη καλλιέργειας ψηφιακής παιδείας στους μαθητές, τα ηθικά ζητήματα τα οποία αφορούν την προστασία προσωπικών δεδομένων και την αλγοριθμική διαφάνεια (UNESCO, 2022), καθώς και οι τεχνικοί περιορισμοί οι οποίοι απορρέουν από την ανεπαρκή υλικοτεχνική υποδομή. Για να επιτευχθεί ο παιδαγωγικός μετασχηματισμός της σχολικής τάξης, η χρήση της Τεχνητής Νοημοσύνης οφείλει να είναι συνειδητή, παιδαγωγικά τεκμηριωμένη και να συνοδεύεται από στοχευμένη επιμόρφωση των εκπαιδευτικών, από ανάπτυξη δεξιοτήτων AI literacy στους μαθητές και θεσμική υποστήριξη η οποία θα ενισχύει την καλλιέργεια της κριτικής σκέψης, της δημιουργικότητας και των ασφαλών εκπαιδευτικών πρακτικών (Walter, 2024).

Με βάση τα ευρήματα της μελέτης, προτείνεται η θεσμική ενσωμάτωση της τηλεργασίας και της Τεχνητής Νοημοσύνης στα προγράμματα σπουδών, καθώς και η ενίσχυση της επιμόρφωσης των εκπαιδευτικών για την παιδαγωγική αξιοποίησή τους. Διδακτικά, προτείνεται η υιοθέτηση project-based μαθημάτων, η χρήση εργαλείων AI για εξατομικευμένη μάθηση και η καλλιέργεια του ψηφιακού γραμματισμού μέσω βιωματικών δραστηριοτήτων. Παράλληλα, κρίνεται αναγκαία η συνέχιση της έρευνας σχετικά με τις επιπτώσεις αυτών των τεχνολογιών στις μεταγνωστικές και στις κοινωνικές δεξιότητες των μαθητών, με στόχο τη διαμόρφωση ενός σύγχρονου και συμπεριληπτικού εκπαιδευτικού μοντέλου.

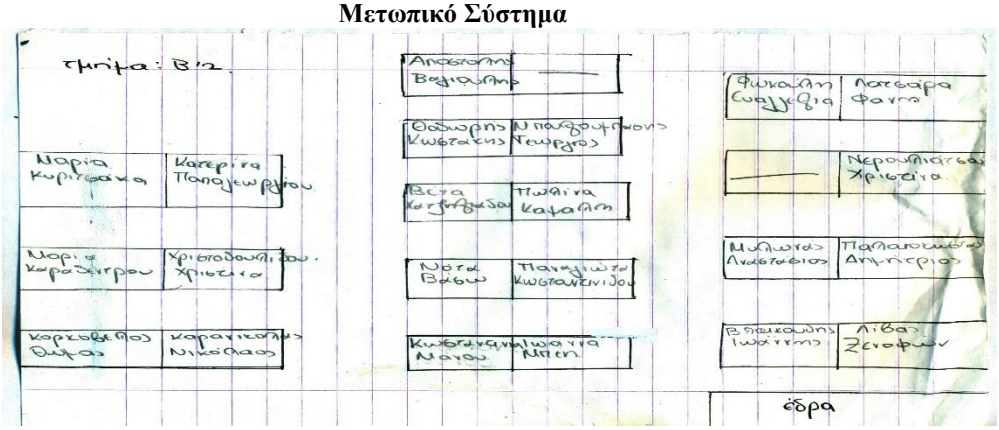
ΠΕΡΙΛΗΨΗ

Η μετατροπή του μετωπικού συστήματος (στο οποίο τα θρανία είναι το ένα πίσω από το άλλο, απέναντι από την έδρα του δάσκαλου) σε μάθημα με τα παιδιά σε υποομάδες, δεν δίνει, στην τάξη, την (χωρίς ανταγωνισμούς, μεταξύ των παιδιών, λόγω σύσφιγξης των διατομικών σχέσεων, μέσα στην υποομάδα, για αντιμετώπιση των άλλων υποομάδων) μαθητοκεντρικότητα, που επιζητούμε, καθώς οι υποομάδες λειτουργούν, έτσι κι αλλιώς, ανταγωνιστικά, η μία προς την άλλη. Σκοπός της πρακτικής ήταν η μαθητοκεντρικότητα της τάξης ως ενός όλου, με τα θρανία σε κύκλο και (λόγω κατάργησης της έδρας) με τον δάσκαλο (από κυρίαρχος της τάξης, από την έδρα του, που ήταν), τώρα, απλά, συντονιστή του μαθήματος, που θα διεξάγεται (λόγω μετριασμού της σύσφιγξης των σχέσεων των παιδιών, που εντεινόταν, για αντιμετώπιση των παιδιών των άλλων υποομάδων, που δεν θα υπάρχουν, πια) μη ανταγωνιστικά, αλλά συναγωνιστικά, μεταξύ τους, από τα ίδια τα παιδιά. Η (εντελώς προσωπική του εμπνευστή της) πρακτική εφαρμοζόταν σε σχολικές μονάδες, δευτεροβάθμιας, κυρίως, τυπικής και άτυπης, εκπαίδευσης, από το 1979 (έτος διορισμού του ως εκπαιδευτικού) έως το 2013 (έτος αφυπηρέτησής του). Η (ως εντελώς, προσωπικής πρακτικής, προσωπική) μεθοδολογία της βασίζεται στην μετατροπή της μετωπικής, προς τον δάσκαλο, θρανιοτοποθέτησης σε κυκλική, καταργούμενης της έδρας του δασκάλου, κάνοντας τις παράλληλες, ατομικές, μονοδρομικές, από και προς τον δάσκαλο, δράσεις των μαθητών του μετωπικού συστήματος ομαδική δράση, στην οποία, τώρα, θα μπορούν, εκ των πραγμάτων, να έχουν, όλοι την ίδια ευκαιρία να είναι συνδημιουργοί του κοινού έργου της τάξης. Αρχικά, σχεδιάζεται, φανερό, κοινωνιόγραμμα, για τις σχέσεις των παιδιών, στο τμήμα, από τα παιδιά ή και τον δάσκαλο, προς όποια χρήση, από τα παιδιά και τον δάσκαλο, και ακολουθεί συζήτηση, για το καταστατικό λειτουργίας της τάξης, σύνταξη και υπογραφή του. Η συνεδρίαση διεξαγωγής του μαθήματος των παιδιών γίνεται ως εξής. Από την προηγουμένη, τα παιδιά ενημερώνονται, για το μάθημα της ημέρας, για να το επεξεργαστούν. Ύστερα από βραχύτατη αφορμησιακή εισήγηση του δασκάλου, η τάξη, δυνάμει, γίνεται, εν κύκλω, ένα απέραντο εργαστήριο. Το κάθε παιδί, έχοντας, πλήρη, εικόνα της δράσης των άλλων, μπορεί να είναι ρυθμιστής του αποτελέσματος. Το μάθημα είναι μια ενιαία (όχι ως μέρη εξέτασης και παράδοσης) πλατφόρμα συζήτησης. Ο δάσκαλος δεν έχει μόνιμη έδρα, αλλά περιφέρεται, όπου χρειάζεται, για τον καλύτερο συντονισμό του μαθήματος. Στην κυκλική τοποθέτηση των θρανίων, έχει καταργηθεί και ο πίνακας. Στην περίοδο εφαρμογής της πρακτικής, αυτός είχε αντικατασταθεί με χαρτόνια, προς επίδειξη, στους άλλους, του τι γραφόταν, σ' αυτό. Τώρα, όμως, υπερπηδάται το τελευταίο πρόβλημα, που αντιμετώπιζε η πρακτική, με την αντικατάστασή του από τόσες οθόνες υπολογιστών, για κάθε παιδί. Το κάθε παιδί θα μπορεί να γράψει ή να ζωγραφίσει ή να σχηματίσει ή ό,τι άλλο, στον υπολογιστή του, και αυτό να το βλέπουν όλα τα άλλα παιδιά, τα οποία, μάλιστα, θα μπορούν και να συμμετέχουν, σε ό,τι έκανε το παιδί αυτό, διαδραστικά, για το όποιο, κοινό, αποτέλεσμα. Το παραγόμενο προϊόν αποτυπώνεται σε (κοινόχρηστα, διαγωνισμικού τύπου, εξελισσόμενα) «βιβλία», από τα παιδιά, για κάθε μάθημα, για όλα τα ενδιαφέροντα, ως «Ελεύθερη Προαιρετική Εργασία, για το σπίτι». Καθότι τα παιδιά είναι, ως συνδημιουργοί, οι δημιουργοί του μαθήματος, αυτά είναι και που προβαίνουν στην αξιολόγησή του. Τα δελτία αξιολόγησης συλλέγονται, τέλος κάθε

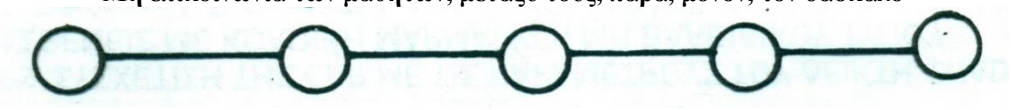
εβδομάδας, μήνα, τριμήνου, τετραμήνου, εξαμήνου, έτους, για εξαγωγή του μέσου όρου βαθμολογίας, από το τμήμα, για κάθε παιδί, με τον δάσκαλο να έχει, με σύμβουλο το κοινωνιόγραμμα, την όποια (αν θα) του δίνεται δυνατότητα τροποποιητικής (στον μέσο όρο της αυτοδιασταυρωτικής, αυτής, αξιολόγησης) παρέμβασης. Τα θετικά αποτελέσματα αποτυπώνονται στην επιστημονική εξέλιξη των παιδιών, η οποία (θετικά σχόλια και τρίτων, κατατεθειμένα, στο «Αρχείο Μαθητικής Δημιουργίας» του Οργανισμού) οφειλόταν (και) στην πρακτική, αυτή. Όμως, λόγω της κόπωσης, που συνεπάγεται, για τον δάσκαλο, αν και θετικότατης αποδοχής, δεν είχε, δυστυχώς, απήχηση.

Λέξεις – κλειδιά: μάθημα χωρίς δάσκαλο, αυτορρύθμιση τάξης, αυτομάθημα, κυκλική θρανιοτοποθέτηση, συνεδριακό μάθημα, διασταυρωτική αυτοαξιολόγηση



ΕΙΣΑΓΩΓΗ

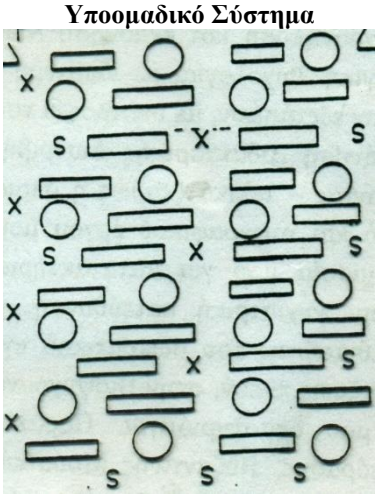
Η εργασία παρουσιάζει τον (αντί πίνακα) ηλεκτρονικό υπολογιστή κλειδί, για την εφαρμογή του (εν κύκλω) μαθήματος, από τους ίδιους τους μαθητές, καταδεικνύοντας την ύπαρξη ηλεκτρονικού υπολογιστή, για κάθε παιδί, στον κύκλο των θρανίων τους, που θα έχουν κάνει οι μαθητές, για να διεξαγάγουν, από μόνοι τους, χωρίς τον δάσκαλο, που θα παραμένει, απλά, ο συντονιστής της συνεδρίασής των, εν κύκλω, το μάθημά τους, εκ των ων ουκ άνευ, για την (πλήρη) επιτυχία της εν ολομελεία εργασία τους (Chatzieuthymiou, 1994). Ο προβληματισμός να μαθαίνουν τα παιδιά πώς να μαθαίνουν (Makri - Botsari, 2006), έτσι, ώστε να μπορούν, από μόνα τους, να μαθαίνουν (Dimoulas et al, 2024d), όταν, πια, δεν θα έχουν τον δάσκαλο, δίπλα τους, όχι, πλέον, να τους μαθαίνει πράγματα, αλλά, έστω, να τους καθοδηγεί, πώς να τα μάθουν τα πράγματα, αυτά, που, άλλωστε, είναι και το σπουδαιότερο, στην εκπαίδευση (Dimoulas, 1996α; 1996β; 2010), οδήγησε τον δημιουργό της πρακτικής στον προβληματισμό για το πώς τα παιδιά θα είναι, τα ίδια, οι δημιουργοί του μαθήματος, από τώρα (Dimoulas et al, 2024g), με τον δάσκαλο να μην διδάσκει, αλλά, απλά, να συντονίζει το μάθημα (Δημουλάς, 2010), το οποίο, βεβαίως, μετά από μια μικρή εισαγωγή τους, σε αυτό, από τον δάσκαλο, θα γίνεται από τα ίδια τα παιδιά (Agrafioti, 2019). Η πρακτική εκδιπλώνεται, φυσικά, με προσωπική του μεθοδολογία (πρβλ., McCaslin and Good, 1996), βασισμένη στην έως τότε, που πρωτοεφαρμόσθηκε, σχετική, βιβλιογραφία, έως, το πολύ (καθώς η πρακτική εμπλουτιζόταν, συνεχώς, προς βελτίωσή της, για επίτευξη του καλύτερου), την χρονολογία αφυπηρέτησης του δημιουργού της (Ververas, 2018). Η εφαρμογή της πρακτικής, από τον ίδιο, κράτησε από το 1979 (έτος διορισμού του) έως το 1998 (έτος αποχώρησής του από την τάξη, καθώς, την χρονιά αυτή, επελέγη Σχολικός Σύμβουλος Φιλολόγων) (Agrafioti, 2019). Η πρακτική υπάρχει στους πλήρεις φακέλους μαθήματος, στα χέρια των μαθητών, σπουδαστών, φοιτητών, άλλων, όπου εφαρμόσθηκε (Vouvousi, 2018). Συνέχισε να παρουσιάζεται, κυρίως, στην Δευτεροβάθμια Εκπαίδευση, στο πλαίσιο των υποχρεώσεών του, ως δάσκαλου ή επιμορφωτή των εκπαιδευτικών του, ως Σχολικού Συμβούλου Φιλολόγων και επιστημονικοπαιδαγωγικής καθοδήγησης, στα σχολεία της αρμοδιότητάς του, αλλά και στην μεταδευτεροβάθμια και στην Τριτοβάθμια, τυπική και άτυπη Εκπαίδευση, αλλά και αλλού (Agrafioti, 2019; Ververas, 2018; Vouvousi, 2018; Chatzieuthymiou, 1994).



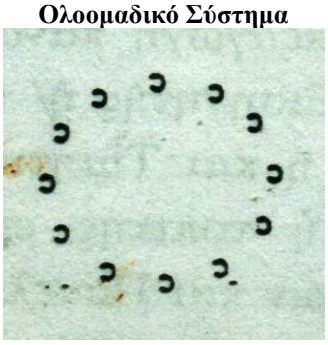
ΑΝΑΠΤΥΞΗ ΠΡΑΚΤΙΚΗΣ ΜΑΘΗΜΑΤΟΣ ΧΩΡΙΣ ΔΑΣΚΑΛΟ

Η μετατροπή του μετωπικού συστήματος (στο οποίο τα θρανία είναι το ένα πίσω από το άλλο, απέναντι από την έδρα του δάσκαλου) (Matsagouras, 2007) σε μάθημα με τα παιδιά σε υποομάδες, που είναι και η πιο δημοφιλής ενέργεια του δάσκαλου, σήμερα (Kapsalis, 1983; Matsagouras, 2007), δεν δίνει, στην τάξη, την (χωρίς ανταγωνισμούς, μεταξύ των παιδιών) μαθητοκεντρικότητα, που επιζητούμε (Matsagouras, 2007), καθώς οι υποομάδες (Forsyth, 1999; Haupt and Leary, 1997), λόγω σύσφιγξης των διατομικών σχέσεων, μέσα στην υποομάδα, για αντιμετώπιση των άλλων υποομάδων (Ververas et al, 2024), λειτουργούν, έτσι κι αλλιώς, ανταγωνιστικά, η μία προς την άλλη (Dimoulas et al, 2024e; 2024f).

Εικόνα 1
Μετωπικό Σύστημα



Εικόνα 2.
Μη επικοινωνία των μαθητών, μεταξύ τους, παρά, μόνον, τον δάσκαλο



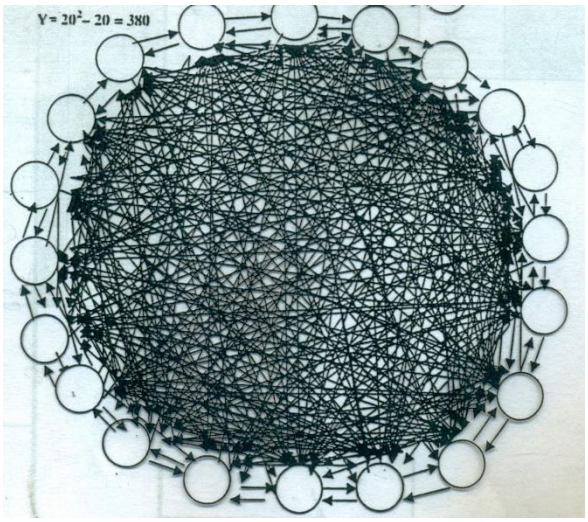
Σκοπός της πρακτικής ήταν η μαθητοκεντρικότητα της τάξης ως (μακράν υποομαδισμού) ενός όλου, με τα θρανία σε κύκλο και (λόγω κατάργησης της έδρας) με τον δάσκαλο (από κυρίαρχος της τάξης, από την έδρα του, που ήταν), τώρα, απλά, συντονιστή του μαθήματος, που θα διεξάγεται μη ανταγωνιστικά, λόγω μετριασμού της σύσφιγξης των σχέσεων των παιδιών, που εντεινόταν, για αντιμετώπιση των παιδιών των άλλων υποομάδων, που δεν θα υπάρχουν, πια, αλλά συναγωνιστικά, μεταξύ τους, από τα ίδια τα παιδιά.

Εικόνα 3
Υποομαδικό Σύστημα

Η (εντελώς, προσωπική, άρα μακράν όποιας, έως, εδώ, τηρούμενης μεθοδολογίας) του εμπνευστή της) πρακτική εφαρμοζόταν σε σχολικές μονάδες, δευτεροβάθμιας, κυρίως, τυπικής και άτυπης, εκπαίδευσης, από το 1979 (έτος διορισμού του ως εκπαιδευτικού) έως το 2013 (έτος αφυπηρέτησής του).

Εικόνα 4.
Ολοομαδικό Σύστημα

Η (ως εντελώς, προσωπικής πρακτικής, προσωπική) μεθοδολογία της βασίζεται στην μετατροπή της μετωπικής, προς τον δάσκαλο, θρανιοτοποθέτησης σε (με υποομαδοϋπερπήδηση) κυκλική, καταργούμενης της έδρας του δασκάλου, κάνοντας τις παράλληλες, ατομικές, μονοδρομικές, από και προς τον δάσκαλο, δράσεις των μαθητών του μετωπικού συστήματος ομαδική δράση, στην οποία, τώρα, θα μπορούν, εκ των πραγμάτων, να έχουν, όλοι την ίδια ευκαιρία να είναι συνδημιουργοί του κοινού έργου της τάξης.



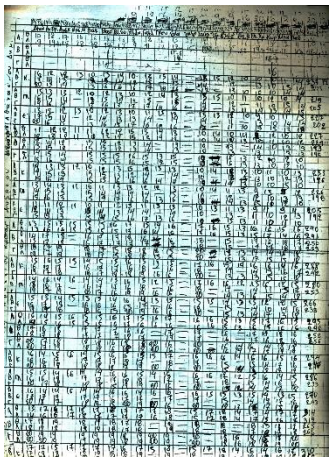
Αρχικά, όπως και, σε όποια πρακτική, θα έπρεπε, σχεδιάζεται, φανερό, κοινωνιόγραμμα, για τις σχέσεις των παιδιών, στο τμήμα, από τα παιδιά ή και τον δάσκαλο, προς όποια χρήση, από τα παιδιά και τον δάσκαλο, και ακολουθεί συζήτηση, για το καταστατικό λειτουργίας της τάξης, σύνταξη και υπογραφή του.

Η ολοομαδική συνεδρίαση της τάξης διεξαγωγής του μαθήματος των παιδιών γίνεται ως εξής.

Από την προηγουμένη, τα παιδιά ενημερώνονται, για το μάθημα της ημέρας, για να το επεξεργαστούν. Ύστερα από βραχύτατη αφορμησιακή εισήγηση του δασκάλου, η τάξη, δυνάμει, γίνεται, εν κύκλω, ένα απέραντο εργαστήριο. Το κάθε παιδί, έχοντας, πλήρη, εικόνα της δράσης των άλλων, μπορεί να είναι ρυθμιστής του αποτελέσματος. Το (από τα παιδιά, διεξαγόμενο) μάθημα είναι μια ενιαία (όχι ως μέρος εξέτασης και μέρος παράδοσης, αφού δεν υπάρχει, πλέον, τίποτε από αυτά) πλατφόρμα συζήτησης.

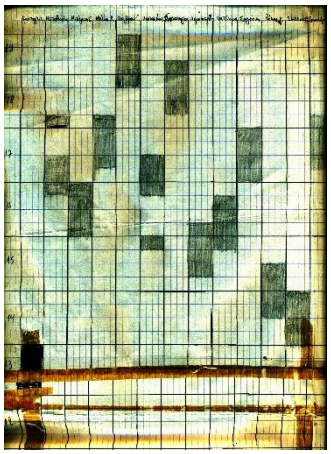
Ο δάσκαλος, μη έχοντας, άλλο, ρόλο, από το να συντονίζει το (αυτο)μάθημα των παιδιών, δεν έχει, πλέον, μόνιμη έδρα, αλλά περιφέρεται, όπου χρειάζεται, για τον καλύτερο συντονισμό του μαθήματος.

Εικόνα 5
Πλέγμα διαδραστικών σχέσεων μαθητών, σε ώρα αυτομαθήματός τους, στην τάξη



Το μεγαλύτερο, όμως, πρόβλημα, στην εφαρμογή του συστήματος, ήταν ο πίνακας, η παράκαμψη του πίνακα, έτσι, ώστε τα παιδιά να είναι τοποθετημένα, με τον πίνακα του παλαιού (του μετωπικού) συστήματος, ως άχρηστο, ’πίσω τους, σε εντελώς κλειστό κύκλο, αφού, ακριβώς, εδώ είναι η διαφορά με το υποομαδικό σύστημα, το οποίο με τίποτα δεν θεραπεύει την παθογένεια του μετωπικού συστήματος, αντίθετα, αυξάνοντας τον ανταγωνισμό των υποομάδων, μεταξύ τους, αυξάνει την αντιπαλότητα, μέσα στην τάξη, πράγμα, που είναι χειρότερο και από τον αυταρχισμό του ενός (του δασκάλου), επάνω στα παιδιά. Ο πίνακας, τώρα, μεταφέρεται, οιονεί, εμπρός στο κάθε παιδί, με κατεύθυνση στα άλλα παιδιά: τόσοι πίνακες, όσα και τα παιδιά. Χωρίς την κυκλικότητα στην θρανιοτοποθέτηση, το σύστημα, που σας παρουσιάζουμε, δεν υφίσταται, αλλά η κυκλικότητα των θρανίων υποδεικνύει κατάργηση του πίνακα, από την τάξη.

Στην κυκλική τοποθέτηση των θρανίων, λοιπόν, έχει καταργηθεί και ο πίνακας. Στην περίοδο εφαρμογής της πρακτικής, αυτός είχε αντικατασταθεί με χαρτόνια, προς επίδειξη, στους άλλους, του τι γραφόταν, σ’ αυτό. Τώρα, όμως, υπερπηδάται το τελευταίο πρόβλημα, που αντιμετώπιζε η πρακτική, με την αντικατάστασή του από τόσες οθόνες υπολογιστών (τάμπλετ, για την ακρίβεια, ελαφρώς, υπερυψωμένο, για την καλή και εύχερη χρήση τους, τόσο, όμως, έτσι, ώστε να υπάρχει ορατότητα, ανάμεσά τους, πράγμα που θα εμποδιζόταν, από την οθόνη του ηλεκτρονικού υπολογιστή, για το τι, ακριβώς, γίνεται, στην τάξη, από όλους), για κάθε παιδί. Το κάθε παιδί θα μπορεί να γράψει ή να ζωγραφίσει ή να σχηματίσει ή ό,τι άλλο, στον υπολογιστή του, και αυτό να το βλέπουν όλα τα άλλα παιδιά, τα οποία, μάλιστα, θα μπορούν και να συμμετέχουν, σε ό,τι έκανε το παιδί αυτό, διαδραστικά, για το όποιο, κοινό, αποτέλεσμα (Dimoulas et al, 2024b). Το κάθε παιδί βλέπει, στην, όλη, παρουσία του κάθε, άλλου, παιδιού, μέσω οθόνης υπολογιστή, την δράση του κάθε, άλλου, παιδιού, έτσι, ώστε να μπορεί να συνεργάζεται, μαζί του, μέσω αυτής, επίσης.



Το παραγόμενο προϊόν (Dimoulas et al, 2022b) αποτυπώνεται σε (κοινόχρηστα, διαγωνισμικού τύπου, εξελισσόμενα) «βιβλία», από τα παιδιά, για κάθε μάθημα, πολλαπλά, πολλαπλής χρήσης, για όλα τα παιδιά, για όλα τα ενδιαφέροντα, ως «Ελεύθερη Προαιρετική Εργασία, για το σπίτι» (Dimoulas et al, 2022c).

Καθότι τα παιδιά είναι, ως συνδημιουργοί, οι δημιουργοί του μαθήματος (Dimoulas et al, 2022c), αυτά είναι και που προβαίνουν στην αξιολόγησή του (Dimoulas et al, 2020; Dimoulas et al., 2021a). Τα δελτία αξιολόγησης συλλέγονται, τέλος κάθε εβδομάδας, μήνα, τριμήνου, τετραμήνου, εξαμήνου, έτους, για εξαγωγή του μέσου όρου βαθμολογίας, από το τμήμα, για κάθε παιδί, με τον δάσκαλο να έχει, με σύμβουλο το κοινωνιόγραμμα (Volioti, 1989; Spanou & Tsea, 2008), την όποια (αν, καταστατικά, θα) του δίνεται δυνατότητα τροποποιητικής (στον μέσο όρο της αυτοδιασταυρωτικής, αυτής, αξιολόγησης) παρέμβασης.

Εικόνα 6
Αυτοδιασταυρωτική αξιολόγηση

Εικόνα 7
Αυτοδιασταυρωτική αυτοκατάταξη

ΣΥΜΠΕΡΑΣΜΑΤΑ

Με την μετα-ανάλυση των σχετικών ερευνών, διαπιστώνεται, ότι, σε σύγκριση με τις κατευθυνόμενες μορφές διδασκαλίας (Matsagouras, 2007), οι μαθητοκεντρικές μορφές διδασκαλίας επιφέρουν επιδόσεις υψηλότερες, στον συναισθηματικό, και χαμηλότερες, στον ακαδημαϊκό τομέα του παιδιού (Adams and Engelman, 1996; Petersen, 1979), πράγμα, που οδήγησε στις (υπο)ομαδοσυνεργατικές μεθόδους (Matsagouras, 2007), οι οποίες, όμως, κατακερματίζοντας την ομάδα της τάξης σε υποομάδες (Dimoulas et al., 2024e; 2024f), διότι αυτό, ακριβώς, εννοούν (βλ., Battistich et al., 1993), με τον όρο "ομαδοσυνεργασία" (Matsagouras, 2007), όχι, απλά, δεν σημειώνουν πρόοδο, στον δεύτερο (βλ., Adams and Engelman, 1996; Petersen, 1979), αφού επιφέρουν μεν μεγαλύτερη παραγωγή, αλλά κατώτερης ποιότητας (Correll, 1976:136 κ.κ.; Sherif, 1956, στον Καψάλη, 1983), αλλά, και στον πρώτο, προκαλούν ζημιά (Anderson et al., 1997; Battistich et al., 1993, Cohen, 1986; McCaslin and Good, 1996; βλ., Tsiaras, 2007). Αυτό οδήγησε τον δημιουργό της πρακτικής (Dimoulas, 1996α; 1996β; 2010) στο πέρασμα, από τον κατακερματισμό σε υποομάδες (Kakana, 2008; Karagiozidis, 2008; Matsagouras, 2007; Meyer, 1977), που προσπερνάται (Chatzieuthymiou, 1996), στην λειτουργία της ομάδας ως ενός όλου (Δημουλάς, 2010). Σε μια τάξη, που ξεκινά, έτσι κι αλλιώς, συνήθως, μετωπικά (Matsagouras, 2007), η επιθυμία των παιδιών να έχουν λόγο (Dimoulas et al, 2024c), που, στο μετωπικό σύστημα, εκ των πραγμάτων, δεν έχουν, για όλα, όσα συμβαίνουν στην τάξη (Matsagouras, 2007), οδηγεί, κατ' ανάγκη, χωρίς την παρεμβολή της υποομαδοποίησης του συνόλου των παιδιών (Kakana, 2008; Karagiozidis, 2008; Matsagouras, 2007; Meyer, 1977), που, όχι, απλά, δεν λύνει το πρόβλημα της αμεσοσυνεργασίας, όλων με όλους, στην τάξη (Ververas et al, 2024), αλλά και την εμποδίζει (Dimoulas et al, 2024e), επιδεινώνοντας την αντιπαράθεση των παιδιών (βλ., Festinger, 1954), μεταξύ των υποομάδων τους (Δημουλάς κ.ά., 2024f), κατευθείαν, στην κυκλική τοποθέτηση των θρανίων (Polemi – Todoulou, n.d.). Όπου όλοι, ενώπιος ενωπίω, έχουν την ίδια ευκαιρία να συμβάλουν, εφόσον το θέλουν, με την αλληλοδιαπλοκή των δράσεών τους (βλ., Crocker et al., 1993), στο κοινό έργο της τάξης (βλ., Anderson et al., 1997; Cohen, 1986), ως συνεργάτες, επί το αυτό ((Ververas et al, 2024; Dimoulas, 2022), με την ίδια ευθύνη (Dimoulas et al., 2021b; 2022d; 2024h; βλ., Tsiaras, 2007), χωρίς τον δάσκαλο (Dimoulas et al, 2024a), που, απλά, μετά την εισαγωγή της, στο μάθημα, ύστερα από την αφόρμησή του, συντονίζει το έργο της σχολικής ομάδας, το οποίο πραγματοποιείται από, την ίδια, την σχολική ομάδα (Agrafioti, 2019; (Ververas, 2018; (Ververas et al, 2024; Vouvousi, 2018; Chatzieuthymiou, 1994), που, έτσι (Correl, 1976), μαθαίνει πώς να μαθαίνει (Makri - Botsari, 2006). Οι υπολογιστές (ένας για κάθε παιδί, σε αλληλοσύνδεσή των, για την πλήρη αλληλόδρασή των, λύνει το μεγάλο πρόβλημα της πλήρους εφαρμογής της πρακτικής μας, η οποία, με την, εκ των πραγμάτων, κατάργηση του πίνακα, λόγω της κυκλικής θρανιοτοποθέτησης, λειτούργησε, με τις ατομικές πινακίδες των παιδιών, αλλά όχι πλήρως.

Η σύνδεση των βαθμολογιών των παιδιών μας, αυτών, που συνέχισαν τις σπουδές των, σε μεταδευτεροβάθμια και τριτοβάθμια Ιδρύματα (βλ., Kapsalis & Chaniotakis, 2011; Solomon (ed.), 1999), δείχνει μια συνεπή, επί καλώ, εξελικτικότητα της σπουδαστικής πορείας των (Kapsalis, 1983). Αλλά, και επαγγελματικά, τα παιδιά αυτά φαίνεται, εξ όσων γνωρίζουμε, αλλά και με την ιδιότητά τους, που αναγράφεται στον τηλεφωνικό κατάλογο, να έχουν προοδεύσει (Dimoulas, 1996α). Πέραν, όμως, και τούτων, η όλη, συνεχώς, εξελισσόμενη, επί τα βελτίω, πρακτική έχει αποσπάσει ενθουσιώδη σχόλια, από πανεπιστημιακούς, παιδαγωγούς, Σχολικούς Συμβούλους, δημοσιογράφους, τρίτους, αλλά (πιο πολύ, ίσως και το κυριότερο) και από τα ίδια τα παιδιά, όχι, τόσον, τότε, όταν ήσαν, ακόμα, μαθητές, αλλά υστερότερα, όταν, πια, βγήκαν, στην κοινωνία και στην ζωή (Agrafioti, 2019). Τα αποδεικτικά στοιχεία όλων αυτών ευρίσκονται στο Αρχείο Μαθητικής Δημιουργίας του Οργανισμού μας Ψυχοβιοαναλυτικής Μόρφωσης «ἐκ τῶν ὑστέρων» (Dimoulas,

2010). Άξιζε (Δημουλάς, 2010). Πρώτα – πρώτα, τα παιδιά αγάπησαν την τάξη (Chatzieuthymiou, 1996). Ξεκινώντας μετωπικά (Matsagouras, 2007), οι όποιες παρεμβάσεις του όποιου παιδιού, στην δράση του όποιου, άλλου, παιδιού, ως συμβολή του, στην αξιολόγησή του, δεν ήταν δυνατόν να γίνουν δεκτές, ως, εκ των πραγμάτων (με την συνηθισμένη διάταξη των θρανίων), ελλιπείς και, άρα, μη ακριβείς, αφού κανένα τους δεν είχε, λόγω της θέσης του, στην γνωστή, αυτή, θρανιοδιάταξη, πλήρη εικόνα, για την δράση των άλλων (Dimoulas, 1996α). Η επιθυμία των ίδιων των παιδιών να έχουν λόγο, για όλα όσα συμβαίνουν, στην τάξη, οδήγησε, κατ' ανάγκην, στην κυκλική τοποθέτηση των θρανίων, για μετατροπή των παράλληλων, ατομικών, δράσεων σε ομαδική δράση, στην οποία, τώρα, θα μπορούσαν, εκ των πραγμάτων, να έχουν λόγο όλοι, όσοι το ήθελαν, για τα πάντα, στην τάξη (Dimoulas 1996β). Με τα θρανία σε κύκλο, όπου όλοι (καθήμενοι, όπου ο καθένας επιθυμεί) είναι ενώπιος ενωπίω, όλοι έχουν την ίδια ευκαιρία να συμβάλουν, εφόσον το θέλουν, στο κοινό έργο της τάξης, ως συνεργάτες, επί το αυτό, με την ίδια ευθύνη (Dimoulas, 2010). Τα αποτελέσματα ήταν θεαματικά (Agrafioti, 2019). Οι μαθητές, με το πέρασμα της διαχείρισης του μαθήματος, από τον δάσκαλο, στους ίδιους, πέραν της δημοκρατικότητας, που εμπνεύσθηκαν (Dimoulas et al, 2012), έμαθαν πώς να μαθαίνουν, για να μπορούν να αντεπεξέρχονται, στην ζωή, και όταν, πια, δεν θα έχουν τον δάσκαλο, μαζί τους, και το απέδειξαν με την μετέπειτα πρόοδό τους, γενικώς ((Ververas, 2018). Η αυτοδιαχείριση του μαθήματος και της τάξης έκανε τα παιδιά να σκέφτονται, υπεύθυνα, για το καλύτερο, μέσα στην τάξη, πρόπλασμα, για το μέλλον τους, αναλαμβάνοντας, με το θάρρος της ευθύνης του, πρωτοβουλίες, για το γενικό, κοινωνικό, καλό (Vouvousi, 2018). Τα θετικά αποτελέσματα αποτυπώνονται στην επιστημονική εξέλιξη των παιδιών, η οποία (θετικά σχόλια και τρίτων, κατατεθειμένα, στο «Αρχείο Μαθητικής Δημιουργίας» του Οργανισμού) οφειλόταν (και) στην πρακτική, αυτή (Χατζηγεωργίου, 1994). Όπως και στην άλλη μας εργασία, στην τακτοποίηση του απίστευτου, σε όγκο, υλικού της πρακτικής, βοήθησαν, με τον όποιο τρόπο τους, κατά καιρούς, οι επιστημονικοί συνεργάτες μας, που, συχνά, συνδράμουν, στο έργο μας, Κ. Ζαμπάκας, Ει.-Χ. Δροσινού, Ν.-Φ. Αγραφιώτη, Γ. Ζαμπέτογλου, Δ. Δημάκας, Θ. Κατσαρός, Φ. Καλύβα, Δ. Μπαρμπάκας, Α. Βαχτσεβάνου, Ι. Τρίγκας, Β. Ζησοπούλου, Γ. Τρακάλα, Μ. Γιαννούλα, Π. Ζησόπουλος, Δ. Λιόβας, Χ. Πολύζος, Ι. Κατσής, Μ. Πουρνάρας, Ό. Κούρτογλου, Χ.Χ. Βαμβούρη-Δημάκη, Ευ. Μιμηλίδου, Ζ. Ζήκος, Α. Αργύρη, Γ. Κυρίτσης κ.ά..

Όμως (Dimoulas, 2010), λόγω της κόπωσης, που συνεπάγεται, για τον δάσκαλο, αν και θετικότατης, και από τον εκπαιδευτικό κόσμο, αποδοχής, δεν είχε, δυστυχώς, απήχηση. Η πρακτική δεν ακολουθήθηκε, από κανέναν, απολύτως, συνάδελφο (Ververas, 2024), λόγω της τεράστιας, αυτής, κόπωσης, που συνεπάγεται, για τον δάσκαλο, και που ο ίδιος, ο δημιουργός της, πολύ, εβίωσε (Dimoulas, 1996β).

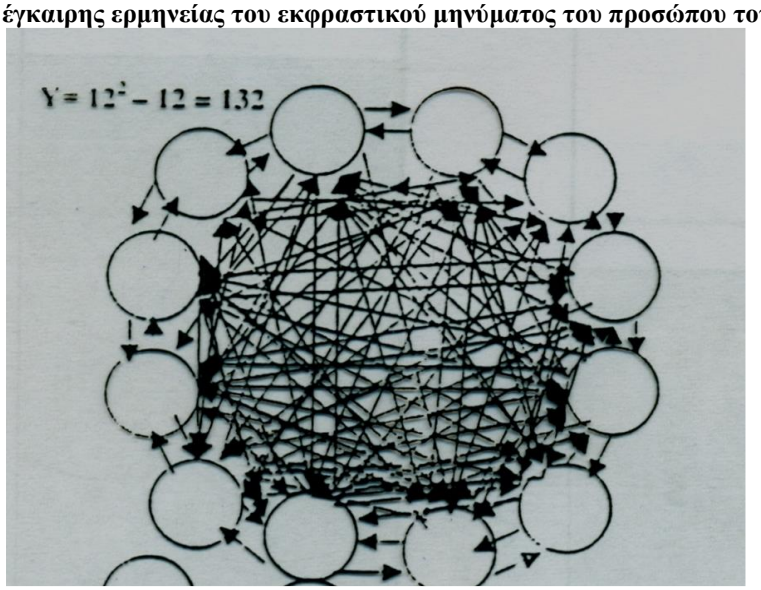
ΠΕΡΙΛΗΨΗ

Η εικόνα περιέχει πλήθος πληροφοριών, οι οποίες προσλαμβάνονται ως όλον, η συμπλοκότητα των σχέσεων των μερών του οποίου δυσκολεύει, με την πολυπλοκότητά του, τα μάλιστα, την ερμηνεία του. Η δυσκολία αυτή είναι μεγαλύτερη, στην περίπτωση ανάγκης να δοθεί, εσπευσμένα, μια απάντηση, σε αυτό. Η εργασία αυτή είχε σκοπό να μελετήσει την ικανότητα αναγνώρισης των συναισθηματικών εκφράσεων του προσώπου, σε καταιγιστική προβολή τους, στην οθόνη υπολογιστή, στο πλαίσιο μαθήματος, πράγμα που οφείλεται να το γνωρίζει ο δάσκαλος. Στην έρευνα την οποία παρουσιάζουμε στην εργασία αυτή συμμετείχαν (61 άντρες και 104 γυναίκες=) 165, υποκείμενα, οι οποίοι ζουν στην Ελλάδα, 25-55 χρονών, μέσου μορφωτικού επιπέδου. Χρησιμοποιήθηκε η σειρά των Ekman και Friesen 65 διαφανειών προσώπων με ένα (από ολόκληρο ή μέρος του προσώπου) ή περισσότερα συναισθήματα (F.A.S.T., 1971). Τα υποκείμενα έπρεπε, σε μια πρώτη προβολή τους, να αναγνωρίσουν ένα (οπωσδήποτε, και μόνο ένα) από τα επτά, παγκόσμια αναγνωρισμένα, συναισθήματα (ευτυχία, λύπη, φόβος, θυμός, έκπληξη, αηδία, περιφρόνηση) και, σε μια δεύτερη φάση, με την ίδια σειρά προβολής, να αποδώσουν ένα (οπωσδήποτε, και μόνο ένα) βαθμό, από το 0 (απουσία συναισθήματος) μέχρι το 8 (έντονη παρουσία συναισθήματος), στο καθένα, από τα συναισθήματα, αυτά, σε προκατασκευασμένα φύλλα απαντήσεων, και τις δύο φορές. Ο χρόνος προβολής κάθε διαφάνειας ήταν, προοδευτικά, 10΄΄-5΄΄ και 25΄΄-10΄΄ και ο ενδιάμεσος χρόνος, για την σημείωση των απαντήσεων, ήταν 5΄΄ και 10΄΄, αντίστοιχα, για τις φάσεις αυτές. Τα δεδομένα περάστηκαν σε επτά, όσα και τα συναισθήματα, συγκεντρωτικούς, πίνακες, για κάθε φύλο. Από αυτούς, βγήκαν, για κάθε διαφάνεια, η εκατοστιαία αναλογία των προτιμήσεων συναισθηματικής σημασιοδότησης και ο μέσος όρος της έντασης, που αποδόθηκε, σε αυτές, από το σύνολο των υποκειμένων. `Υστερα, με βάση τις διαφάνειες που συγκεντρώνουν το 20% και πλέον της αποδοχής των υποκειμένων των δύο ομάδων (άνδρες - γυναίκες), για την συγκεκριμένη τους, συναισθηματική, σημασιοδότηση, κατασκευάσθηκε λεξικό συναισθηματικής σημασιοδότησης, που αποδόθηκε, από κάθε ομάδα, για κάθε ομάδα. Σ' αυτό, φαίνονται οι συγκρίσιμες περιπτώσεις, ενδοομαδικά, και διαομαδικά. Η στατιστική ανάλυση (χ^2, για την ένταση, και t test, για την συχνότητα) αφορά στον έλεγχο: α) της έντασης, με βάση την βαθμολογία, που αποδόθηκε, από τα υποκείμενα, σε κάθε συναίσθημα, β) της συχνότητας της αναγνώρισης των συναισθημάτων, και, σε σύγκριση με τα διεθνή standards, γ) της έντασης των συναισθημάτων που αναγνωρίσθηκαν αληθώς, δ) της συχνότητας των συναισθημάτων που αναγνωρίσθηκαν αληθώς. Τα αποτελέσματα δείχνουν τα εξής: Η αναγνωριστική των συναισθημάτων ικανότητα είναι, γενικά, καλή, σε βαθμό συγκρίσιμο, ενδοομαδικά και διομαδικά, επιδεινούμενη, παρά την προοδευτική ευχέρεια αληθούς αναγνώρισης, που προέρχεται από την εξάσκηση, όσο μικραίνει ο χρόνος προβολής και λιγοστεύει ο διαθέσιμος χρόνος της αναγνώρισης αυτής. Οι άνθρωποι, γενικά, δεν βλέπουν πολύ διαφορετικά συναισθήματα, στο πρόσωπο, ακόμα και όταν πρόκειται για διαφορετικό φύλο. Χωρίς το άγχος της γρήγορης διαδικασίας, κάνουμε τις περισσότερες αναγνωρίσεις και αληθείς



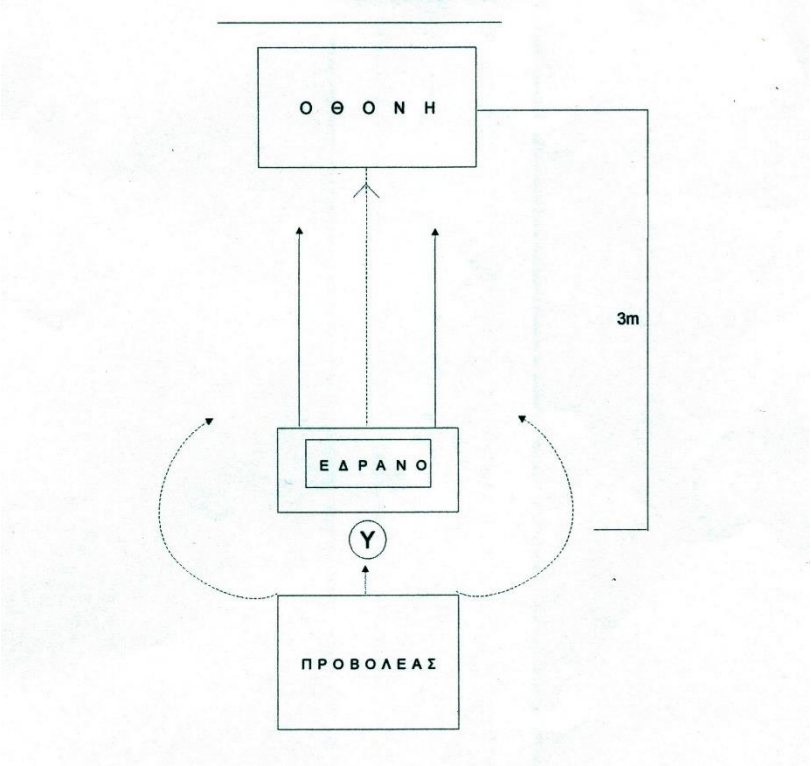
αναγνωρίσεις συναισθημάτων, ενώ, με αυτό, η βαθμολογία, που δίνουμε, στα συναισθήματα, που αναγνωρίζουμε, είναι, συνήθως, πιο υψηλή, από την βαθμολογία, που δίνουμε, χωρίς αυτό. Η διαφορά, με τις γυναίκες να υπερέχουν, στην αναγνώριση και στην αληθή αναγνώριση συναισθημάτων, από τους άνδρες, χωρίς αυτό το άγχος, με αυτό, φαίνεται να μην υπάρχει, ουσιωδώς. Στην περίπτωση της γρήγορης διαδικασίας, με το άγχος, που υφέρπει, σε αυτή, στις μονοσήμαντες εκφράσεις, τα καταφέρνουμε καλύτερα, απ' ό,τι στις πολυσήμαντες, όπως, βέβαια, και στην αργότερη διαδικασία, χωρίς το άγχος αυτό. Γενικά, η ικανότητα αναγνώρισης συναισθημάτων είναι καλύτερη, χωρίς το άγχος της γρήγορης διαδικασίας, και, ειδικά, στις γυναίκες. Με το άγχος σπουδής, να προσλάβουμε, να διευθετήσουμε και να ερμηνεύσουμε, μέσα σε ελάχιστο, διαθέσιμο, χρόνο, ένα μεγάλο όγκο πληροφοριών, ο εγκέφαλός μας πέφτει σε σύγχυση, πράγμα, που μας δυσκολεύει στην αναγνώριση του μηνύματος, που μας εκπέμπεται, συνεπαγόμενης, πόσο, μάλλον, αν πρόκειται, όχι για στατικές, αλλά εικόνες σε κίνηση, λάθος εκτιμήσεις.

Λέξεις – κλειδιά: πληροφοριακή κόπωση, εγκεφαλική σύγχυση, ακριβής αναγνώριση μηνύματος

ΕΙΣΑΓΩΓΗ

Η εργασία παρουσιάζει, νευροψυχολογικά (Brodal, 1965; Burke, 1979; Caucheteux et al., 2023; Chung et al., 2014; Do and Ng, 2005; Garner, 1974; Hinton and Salakhutdinov 2006; Krizhevsky et al., 2012; McCulloch and Pitts, 1943; Vaswami et al., 2017; Widrow and Hoff, 1985; βλ., και O' Reilly and Munakata, 2000; Rumelhart et al., 1986α; 1986β), την λανθασμένη ερμηνεία μηνύματος, που δίνεται, λόγω εγκεφαλικής σύγχυσης, από καταιγιστική προβολή εικόνων, στην οθόνη του υπολογιστή (βλ., Tsesmelis, D.S., & Florakis, 2018), δηλαδή σε καταιγιστική προβολή στατικών, έστω (το πρόβλημα θα είναι πολύ μεγαλύτερο, σε προβολή σε κίνηση), εικόνων, από την οθόνη του υπολογιστή. Σε μια τέτοια υποβολή μηνυμάτων, ο εγκέφαλος πέφτει σε σύγχυση, ερμηνεύοντας, εξ αυτού, λανθασμένα, φυσικά, τα όσα, δι' αυτών, του εκπέμπονται (Dimoulas et al, 2024a; 2024b; 2024c; 2024d). Αυτό φαίνεται φυσικό. Η ερμηνεία των μηνυμάτων, που δεχόμαστε, σε γρήγορη εκπομπή, προφανώς, όπως φαίνεται και από την βιβλιογραφία (De Kosky, 1980; Dimoulas et al, 2019; 2020; Diakogianni-Tarlatzi, 1981; Eckman and Friesen, 1973; Eckman and Oster, 1979; Hoffman, 1981), θα είναι περισσότερον επιτυχής, αν αυτή είναι αργή. Η εργασία μας αυτή έχει σκοπό να μελετήσει την ικανότητα αναγνώρισης των συναισθηματικών εκφράσεων του προσώπου, σε καταιγιστική προβολή τους, στην οθόνη του υπολογιστή μας. Η εικόνα περιέχει πλήθος πληροφοριών, οι οποίες προσλαμβάνονται ως όλον, η συμπλοκότητα των σχέσεων των μερών του οποίου δυσκολεύει, με την πολυπλοκότητά του, τα μάλιστα, την ερμηνεία του (Dimoulas, 1999). Η δυσκολία αυτή είναι μεγαλύτερη,

Εικόνα 1
Η ανάγκη έγκαιρης ερμηνείας του εκφραστικού μηνύματος του προσώπου του παιδιού



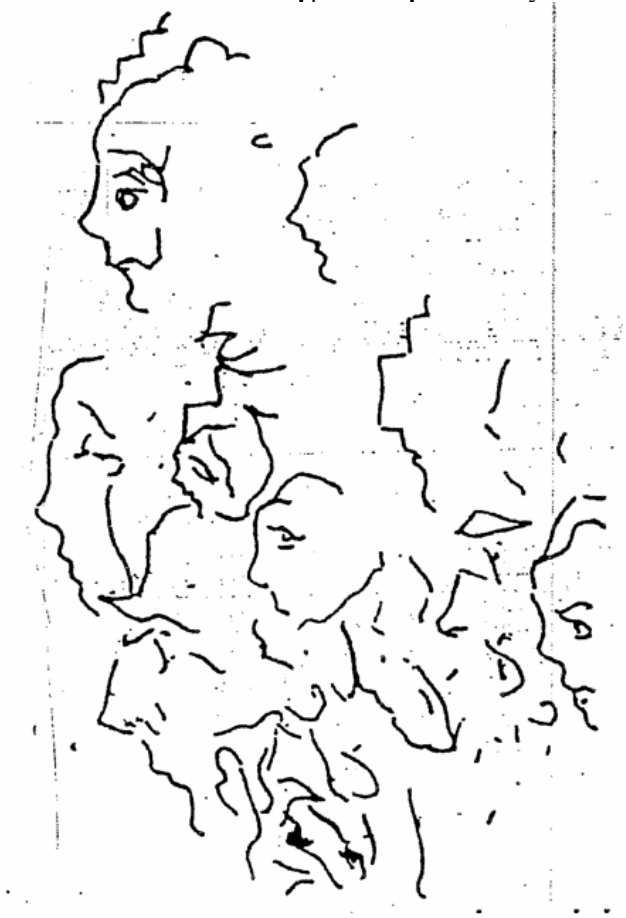
Στην περίπτωση ανάγκης να δοθεί, εσπευσμένα, μια απάντηση, σε αυτό (Dimoulas et al, 2021; 2023; 2024e; Lewis, 1996). Η εργασία αυτή είχε σκοπό να μελετήσει την ικανότητα αναγνώρισης των συναισθηματικών εκφράσεων του προσώπου, σε καταιγιστική προβολή τους, στην οθόνη υπολογιστή, προσομοιώνοντας την δυσκολία, που, στην διάρκεια της προβολής, αυτής, αντιμετωπίζει, στην αναγνώριση, αυτήν, ο χειριστής του υπολογιστή (βλ., και Anderson, 1995; Bose and Liang, 1996; Dimoulas et al, 2021; 2023; 2024a; 2024b; 2024c; 2024d, 2024e; Diamantaras, 2007; Garson, 1998; Haykin, 1999; Hecht and Nielsen, 1988; Kohonen, 1987; Lippman, 1987; Minsky and Papert, 1969; Shah, 2021; UNESCO, 2023; Folinas et al, 2007; Wayne et al., 2019; Zimmerman, 2018), με την δυσκολία, που αντιμετωπίζει ο δάσκαλος, στο πλαίσιο ενός ολοομαδικού μαθήματος, όπου, όλοι, εν κύκλω, αλληλεπιδρούν, με όλους (Garner, 1976; Heshka and Nelson, 1972; Peck and Peck, 1970), με συνεπαγόμενη απίστευτη την (άμεση) ανάγκη να πρέπει να είναι, πάντα, σε (πλήρη) ετοιμότητα να έχει ερμηνεύσει, ταχύτατα, έγκαιρα, σωστά, την συγκινησιακή / συναισθηματική έκφραση των παιδιών (Buck et al., 1972; Carey, 1982), που αυτά (με τον δάσκαλο, απλά, συντονιστή τους) είναι, που διεξάγουν το μάθημα, πριν προκύψει η (όποια) ανάγκη να παρέμβει, σ' αυτό. Η σημασία της έρευνας, για τον δάσκαλο και την εκπαίδευση, είναι, σίγουρα, προφανής.

ΑΝΑΠΤΥΞΗ ΕΡΕΥΝΑΣ

Έλαβαν μέρος (61 άντρες και 104 γυναίκες=) 165 άτομα, 25-55 χρονών, μέσου μορφωτικού επιπέδου. Χρησιμοποιήθηκε, απ' όλα τα διαθέσιμα μέσα (βλ., Bassili, 1979; Bayer and Bayley, 1959; Benton et al., 1975; Etcoff et al., 1984; Hansch and Pirozzolo, 1980; McCord and Illingworth, 2009; Wasserman, 1993; Zuckerman et al., 1975) η

σειρά των Ekman και Friesen, 65 διαφανειών προσώπων με ένα (από ολόκληρο ή μέρος του προσώπου) ή περισσότερα συναισθήματα (F.A.S.T., 1971). Τα υποκείμενα έπρεπε, σε μια πρώτη προβολή τους, να επισημάνουν ένα (οπωσδήποτε, και μόνον ένα), από τα επτά (παγκόσμια, αναγνωρισμένα) συναισθήματα (ευτυχία, λύπη, φόβος, θυμός, έκπληξη, αηδία, περιφρόνηση), και, σε μια δεύτερη φάση, με την ίδια σειρά προβολής, ένα (οπωσδήποτε, και μόνον ένα) βαθμό, από το 0 (απουσία συναισθήματος) μέχρι το 8 (έντονη παρουσία συναισθήματος), για το καθένα, από τα επτά, ό.π., συναισθήματα. Ο χρόνος προβολής, κάθε διαφάνειας, ήταν (βαθμιαία, μειούμενος) 10΄΄-5΄΄ και (σταδιακά) 25΄΄-20΄΄-15΄΄-10΄΄ και ο ενδιάμεσος χρόνος, για την σημείωση των απαντήσεων, 5΄΄ και 10΄΄, αντίστοιχα.

Εικόνα 2
Διεξαγωγή της έρευνας



Βγήκαν, για κάθε διαφάνεια, η εκατοστιαία αναλογία των προτιμήσεων (συναισθηματικής) σημασιοδότησης και ο μέσος όρος της έντασης, που αποδόθηκε, σε αυτές. Με βάση τις διαφάνειες, που συγκέντρωναν το 20% και πλέον της αποδοχής των υποκειμένων (cut off point), για την συγκεκριμένη τους (συναισθηματική) σημασιοδότηση, κατασκευάσθηκε "λεξικό" (συναισθηματικής) σημασιοδότησης, που αποδόθηκε, στις διαφάνειες, από κάθε ομάδα. Σ' αυτό, φαίνονται οι (συγκρίσιμες και μη) περιπτώσεις, ενδοομαδικά και διαομαδικά, χωριστά, για τις μονοσήμαντες και για τις πολυσήμαντες διαφάνειες.

Η στατιστική ανάλυση αφορούσε στην εξέταση της έντασης (X^2) των συναισθημάτων, που αναγνωρίστηκαν (αληθώς, άρα, με βαθμό, τουλάχιστον, 1) και της συχνότητας (t test) της αναγνώρισης των συναισθημάτων. Επίπεδα σημαντικότητας ήσαν, για όλες τις περιπτώσεις μας, τα $P<0,05$, $P<0,01$, $P<0,001$.

Τα αποτελέσματα (όπως και στην άλλη μας εργασία, στην τακτοποίηση του μεγάλου, σε όγκο, υλικού της έρευνας, βοήθησαν, με τον όποιο τρόπο τους, κατά καιρούς, οι επιστημονικοί συνεργάτες μας, που, συχνά, συνδράμουν, στο έργο μας, Κ. Ζαμπάκας, Ει.-Χ. Δροσινού, Ν.-Φ. Αγραφιώτη, Γ. Ζαμπέτογλου, Δ. Δημάκας, Θ. Κατσαρός, Φ. Καλύβα, Δ. Μπαρμπάκας, Α. Βαχτσεβάνου, Ι. Τρίγκας, Β. Ζησοπούλου, Γ. Τρακάλα, Μ. Γιαννούλα, Π. Ζησόπουλος, Δ. Λιόβας, Χ. Πολύζος, Ι. Κατσής, Μ. Πουρνάρας, Ό. Κούρτογλου, Χ.Χ. Βαμβούρη-Δημάκη, Ευ. Μιμηλίδου, Ζ. Ζήκος, Α. Αργύρη, Γ. Κυρίτσης κ.ά.) δείχνουν τα εξής: Η αναγνωριστική των συναισθημάτων ικανότητα είναι, γενικά, καλή, σε βαθμό συγκρίσιμο, ενδοομαδικά και διομαδικά, επιδεινούμενη, παρά την (προοδευτική) ευχέρεια (αληθούς) αναγνώρισης, που προέρχεται από την εξάσκηση, όσο μικραίνει ο χρόνος προβολής και λιγοστεύει ο (διαθέσιμος) χρόνος της αναγνώρισης, αυτής. Η αναγνωριστική των συναισθημάτων ικανότητα, στην (γρήγορη) προβολή των εικόνων, είναι, γενικά, φτωχή, όχι, όμως, σε βαθμό μη συγκρίσιμο, με ό,τι στην αργή. Στην πρώτη περίπτωση, γενικά, δεν βλέπουμε (πολύ) διαφορετικά συναισθήματα, στο πρόσωπο, απ' ό,τι στην δεύτερη, στην οποία κάνουμε τις περισσότερες αναγνωρίσεις

συναισθημάτων, με βαθμολογία, συνήθως, πιο χαμηλή, από την βαθμολογία στην πρώτη. Η διαφορά, με τις γυναίκες να υπερέχουν, στην αναγνώριση συναισθημάτων, στην δεύτερη προβολή, στην πρώτη, φαίνεται να μην υφίσταται. Στις μονοσήμαντες εκφράσεις, τα καταφέρνουμε καλύτερα. Γενικά, η ικανότητα αναγνώρισης συναισθημάτων είναι καλύτερη στην δεύτερη περίπτωση, ειδικά στις γυναίκες. Στην πρώτη περίπτωση, ίσως, δυσκολευόμαστε, στην αναγνώριση, ’μπροστά σε πολυσήμαντες, κυρίως, εκφράσεις, που επιφέρουν σύγχυση, λόγω του όγκου των εκείθεν πληροφοριών. Οι άνθρωποι, γενικά, δεν βλέπουν (πολύ) διαφορετικά συναισθήματα, στο πρόσωπο, ακόμα και όταν πρόκειται για διαφορετικό φύλο. Χωρίς το άγχος της γρήγορης διαδικασίας, κάνουμε τις περισσότερες αναγνωρίσεις (που σημαίνει, αυτό, αληθείς αναγνωρίσεις) συναισθημάτων, ενώ, με αυτό, η βαθμολογία, που δίνουμε, στα συναισθήματα, που αναγνωρίζουμε, είναι, συνήθως, πιο υψηλή, από την βαθμολογία, που δίνουμε, χωρίς αυτό. Η διαφορά, με τις γυναίκες να υπερέχουν, στην αναγνώριση (που δεν γίνεται, παρά να είναι και αληθής) συναισθημάτων, από τους άνδρες, χωρίς αυτό, το άγχος, με αυτό, το άγχος, φαίνεται να μην υπάρχει, ουσιωδώς (βλ., και Frieze and Ramsey, 1976). Στην περίπτωση της γρήγορης διαδικασίας, με το άγχος, που υφέρπει, σε αυτή, στις μονοσήμαντες εκφράσεις, τα καταφέρνουμε καλύτερα, απ’ ό,τι στις πολυσήμαντες, όπως, βέβαια, και στην αργότερη διαδικασία, χωρίς το άγχος αυτό. Γενικά, η ικανότητα αναγνώρισης συναισθημάτων είναι καλύτερη, χωρίς το άγχος της γρήγορης διαδικασίας, ειδικά, στις γυναίκες. Με το άγχος σπουδής, να προσλάβουμε, να διευθετήσουμε και να ερμηνεύσουμε, μέσα σε ελάχιστο (διαθέσιμο) χρόνο, ένα (μεγάλο) όγκο πληροφοριών, ο εγκέφαλός μας πέφτει σε σύγχυση, πράγμα, που μας δυσκολεύει, στην αναγνώριση του μηνύματος, που μας εκπέμπεται, συνεπαγόμενης (πόσο, μάλλον, αν πρόκειται, όχι για στατικές, αλλά εικόνες σε κίνηση) λάθος εκτιμήσεις.

Εικόνα 1
Φυσιολογική διάσπαση εικόνας, στο μυαλό ενός ψυχωσικού, που δυσκολεύεται να αντιληφθεί το πρόσωπο ως ένα όλον

ΣΥΜΠΕΡΑΣΜΑΤΑ

Σήμερα, μπορούμε να καταλάβουμε, πιο εύκολα, τι επιπτώσεις μπορεί να έχει η υπερβολική δόση πληροφοριών, στον εγκέφαλο και στην υγεία, γενικότερα, η οποία, με την «εσωτερικοποίησή» τους, φαίνεται να βλάπτεται, κάποτε, σοβαρά (Lewis, 1996). Για τους ανθρώπους που εργάζονται σε ένα γραφείο, το θέαμα ενός γραφείου γεμάτου, από στοίβες χαρτιών και φακέλων, είναι συνηθισμένο φαινόμενο, ακόμα και όταν υπάρχει ο ηλεκτρονικός υπολογιστής και

η δυνατότητα πρόσβασης στις σελίδες Internet (Dimoulas, 1999). Ο σωρός αυτός των χαρτιών είναι, συνήθως, γεμάτος πληροφορίες (αριθμοί, διαγράμματα, άλλα στοιχεία, κείμενα, παραπομπές, κ.λπ.) (Lewis, 1996). Τις πιο πολλές φορές, ο όγκος των πληροφοριών είναι δυσανάλογος με τον χρόνο, που μπορεί να διαθέσει κάποιος, για να τις εκμεταλλευτεί, στην εργασία του (Dimoulas, 1999). Έτσι κι αλλιώς, πάντα θα υπάρχει πρόβλημα επιλογής μεταξύ τους (Matsatsinis, 2010). Κάποτε, απ' όλες, αυτές, τις πληροφορίες, λίγες είναι οι (πραγματικά) χρήσιμες, για την ώρα και την ανάγκη, που εμείς τις χρειαζόμαστε (Dimoulas, 1999). Προκύπτει θέμα προτεραιοτήτων, στη χρήση των πληροφοριών αυτών, κι αυτό θα πρέπει να λυθεί, τις πιο πολλές φορές σύντομα, αν όχι άμεσα (Matsatsinis, 2010). Η ένταση, πάνω σ' αυτή την ενέργεια, καθώς το άτομο είναι αδύνατο να θυμάται, όλες, αυτές, τις πληροφορίες και καθώς (πολύ) λιγότερες είναι αυτές που θα μπορούσε, μέσα σε (τόσο) λίγο χρόνο και κάτω από (τέτοια) πίεση, να αφομοιώσει, έχει, συχνά, αρνητικές επιπτώσεις, στην ψυχολογία του ατόμου (Obermeier and Barron, 1987). Βεβαίως, η γνώση είναι δύναμη (βλ., Vlachavas, 2013; Vlachakis, 2017; Georgoulis, 2015; Graham, 2004; Zacharakis, 2001; Iliadis & Papaleonidas, 2016; Howard and Ruder, 2018; Kissinger, 2002; Papakonstantinou, 2020; Pontikas, 2025), αλλά αυτό δεν ισχύει για την (τέτοια) χρησιμοποίηση των πληροφοριών, αφού το να λαμβάνεις, καθημερινά, τόσο (μεγάλο) όγκο πληροφοριών, όταν, μάλιστα, είσαι υποχρεωμένος να πάρεις, βασισμένος, σε αυτές, μια (σωστή) απόφαση, εμπεριέχει τους ίδιους κινδύνους με το να είσαι απληροφόρητος (Dimoulas, 1999; βλ., και Fanara, 2002).

Πράγματι, τα περισσότερα (διευθυντικά) στελέχη επιχειρήσεων (γιατροί, δικηγόροι, δάσκαλοι και άλλοι επαγγελματίες) δείχνουν να υποφέρουν, σήμερα, από «υπερκορεσμό πληροφοριών και δεδομένων» (Dimoulas et al, 2019; 2020). Οι ψυχολόγοι, ήδη, κάνουν λόγο, για την εμφάνιση μιας, νέας, «ασθένειας» των καιρών μας, με συμπτώματα την νευρικότητα και το αίσθημα της μοναξιάς και της ανασφάλειας, δείγματα, ότι το άτομο βρίσκεται σε (έντονη) κατάσταση άγχους (Lewis, 1996). Πολύ σύντομα, θα καθιερωθεί στην ιατρική διάλεκτο ο όρος «πληροφοριακή κόπωση» (Dimoulas, 1999; Dimoulas et al, 2004; 2010; 2019; 2020). Μεταξύ των άλλων προβλημάτων, ο συνδυασμός τόσων, πολλών, πληροφοριών και παραμέτρων οδηγεί σε αδιέξοδο την όποια ανάλυση (βλ., Albert and Kaplan, 1979; Fried et al., 1982) και δυσχεραίνει την επιλογή τών (σωστών) λύσεων και αποφάσεων (Matsatsinis, 2010). Οι πληροφορίες έχουν, σαφώς, ως (βασικό) στόχο τους, την επιτάχυνση της ροής της εργασίας μας, αλλά, όπως και όλα τα πράγματα που χορηγούνται χωρίς όριο, έχουν αρχίσει να προκαλούν, αρνητικές, συνέπειες, στην ψυχική υγεία στελεχών και εργαζομένων, κάθε (σχεδόν) επαγγέλματος, όλων (σχεδόν) των βαθμίδων (Δημουλάς, 1999; Dimoulas et al, 2019; 2020). Η καθημερινή λήψη και χρήση τόσον (μεγάλου) όγκου πληροφοριών έχει καταστρέψει τις (προσωπικές) σχέσεις, με την αύξηση των διενέξεων, με συναδέλφους, και διαβρώσει την όποια ικανοποίηση θα μπορούσαν να έχουν, από την εργασία τους, των δύο τρίτων δείγματος 1300 εργαζομένων, όλων των βαθμίδων, διάφορων κλάδων, στην Βρετανία, τις Η.Π.Α., την Αυστραλία, την Σιγκαπούρη και το Χονγκ-Κονγκ, με το ένα τρίτο του να δηλώνει, ότι υποφέρει από προβλήματα υγείας, που σχετίζονται, άμεσα, με την υπερπληθώρα των πληροφοριών, ενώ ποσοστό μεγαλύτερο του 40% συμφωνεί, ότι η κατάσταση, στην οποία έχει περιέλθει, ήταν η αιτία, για την καθυστέρηση, στην λήψη, σημαντικών και σωστών, αποφάσεων, λόγω του όγκου των πληροφοριών, στον οποίο, συχνά, οφειλόταν και η (λανθασμένη) εκτίμησή τους (Dimoulas, 1999; Dimoulas et al, 2019; 2020; 2024a; 2024b; Lewis, 1996).

Εικόνα 2
Η αντίληψη του προσώπου υπό την επήρρεια παραισθησιογόνων

Το «άγχος των πληροφοριών» επηρεάζει, κυρίως, τα άτομα που ασχολούνται με (μεγάλο) όγκο δεδομένων και πρέπει, μέσα σε λίγο χρόνο, να λάβουν, σημαντικές, αποφάσεις (Matsatsinis, 2010). Στην δικηγορία, αλλά και αλλού, αυτό συμβαίνει, συχνά: όταν η μια πλευρά ζητάει μια πληροφορία, η άλλη της δίνει σωρεία, μη ουσιαστικών, πληροφοριών ή, ακόμα και άχρηστων, στοιχείων, καλύπτοντας, έτσι, την μη παροχή πληροφοριών ακριβείας, που ζητάει εκείνη (Dimoulas, 1999). Στην περίπτωσή μας, την αναγνώριση των συναισθημάτων, στο πρόσωπο, το ανθρώπινο σώμα (πρωτίστως, ο εγκέφαλος) αρχίζει να αντιδρά, δείχνοντας σημεία έκτακτης λειτουργίας (ένστικτο αυτοσυντήρησης) (βλ.,

Obermeier et Barron, 1987). Η απόδοση, έτσι, του ατόμου, στις όποιες δραστηριότητές του, μειώνεται. Τα λανθασμένα συμπεράσματα οδηγούν σε λανθασμένες αποφάσεις. Με τον καταιγισμό των πληροφοριών, ιδίως στις πολυσήμαντες εκφράσεις, ο εγκέφαλος έρχεται σε κατάσταση σύγχυσης (Dimoulas et al, 2024a; 2024b; 2024c; 2024d), όπως στο μυαλό ενός ψυχωσικού ή υπό την επήρρεια παραισθησιογόνων (Dimoulas et al, 2004; 2010). Με τον εγκέφαλο σε μια τέτοια κατάσταση, το άτομο, ακόμα και χωρίς, άλλα, προβλήματα (βλ., Borod et al., 1986; Cicone et al., 1980; De Renzi and Spinnler, 1966; Dimoulas, 1999; 2009; Dimoulas et al, 2017; Gardner et al., 1975; Gessler et al., 1989), περιέρχεται σε δύσκολη θέση. Σε καταστάσεις ανάγκης, όπως αυτές που αντιμετωπίζουν πιλότοι ή χειρουργοί, αλλ' ακόμα και όταν η εργασία του ατόμου δεν έχει να κάνει άμεσα με ανθρώπινες ζωές, η επιρρέπεια στο λάθος αυξάνεται. Οι αναλυτές, που δέχονται, καθημερινά, τεράστιο όγκο πληροφοριών και αντιμετωπίζουν μια συνεχή ευμεταβλητότητα στη συνολική εικόνα, που διαμορφώνουν, πάνω σε ένα συγκεκριμένο θέμα, πάσχουν από αυξανόμενη ανασφάλεια για την ορθότητα της πρόβλεψης και τη λήψη αποφάσεων, με συνέπεια, συχνά, να αρνούνται, εν τέλει, να πάρουν μια, την όποια, απόφαση.

Πάτρα Αχαΐας, Ελλάδα
email: riaki1981@yahoo.gr

ΠΕΡΙΛΗΨΗ

Θέμα της εργασίας αυτής είναι η παρουσίαση πέντε καινοτόμων web 2.0 εργαλείων που διαθέτουν τα εξής χαρακτηριστικά: είναι πανεύκολα στη χρήση και δεν απαιτούν ειδικές ψηφιακές δεξιότητες, παρέχονται εντελώς δωρεάν ή διαθέτουν δωρεάν έκδοση με μεγάλο εύρος δυνατοτήτων για το χρήστη και εξάπτουν το ενδιαφέρον, πράγμα που τα καθιστά κατάλληλα για ενσωμάτωση στη μαθησιακή διαδικασία. Ως εκπαιδευτικοί που αγαπούν το λειτούργημά τους και που διαρκώς στοχεύουν στη βελτίωση της ποιότητας της διδασκαλίας τους και στον εμπλουτισμό της με νέα μέσα και σύγχρονες διδακτικές μεθόδους, αναζητούμε εύχρηστα εργαλεία ώστε να δημιουργούμε κουίζ, ασκήσεις, παρουσιάσεις, νέα κειμενικά είδη και γενικά διδακτικό υλικό για τη σχολική μας τάξη. Ως εκ τούτου παρακολουθούμε διάφορα σεμινάρια και επιμορφώσεις που άπτονται των εκπαιδευτικών θεμάτων. Ανάμεσά τους ξεχωρίζουμε τα σεμινάρια etwinning, όπου παρουσιάζονται μεταξύ άλλων σύγχρονα εργαλεία για να αξιοποιηθούν ποικιλοτρόπως στη μαθησιακή διαδικασία.

Έχουμε χρησιμοποιήσει αρκετά από αυτά στα μαθήματά μας και κάποια από αυτά τα έχουμε ξεχωρίσει ιδιαίτερα για τα χαρακτηριστικά τους αλλά και για την πολύπλευρη παιδαγωγική τους αξιοποίηση στη μαθησιακή διαδικασία. Πρόκειται για το EDpuzzle, το Book Creator, το Quizziz, το Wordwall και το Artsteps. Στην εργασία μας ασχολούμαστε ξεχωριστά με καθένα από τα εργαλεία και επεξηγούμε με παραδείγματα και εικόνες πόσο εύκολη είναι η χρήση τους και πώς μπορούν να βρουν αποτελεσματική εφαρμογή στη μαθησιακή διαδικασία. Τονίζουμε τα βασικά τους χαρακτηριστικά και σχολιάζουμε πώς αξιοποιούνται παιδαγωγικά.

Λέξεις – κλειδιά: κουίζ, πολυμέσα, ψηφιακός εμπλουτισμός

ΕΙΣΑΓΩΓΗ

Η εξοικείωση της νεολαίας με τη σύγχρονη τεχνολογία κάνει επιτακτική την ανάγκη να συμπεριληφθούν οι ΤΠΕ (Τεχνολογίες Πληροφορίας και Επικοινωνίας) και στη μαθησιακή διαδικασία, ώστε να διευκολύνουν την επικοινωνία των εκπαιδευτικών με τους/τις μαθητές/τριες και ταυτόχρονα να αποβούν το έναυσμα για δραστηριοποίηση και συμμετοχή των τελευταίων στα διδακτικά αντικείμενα. Εντούτοις, υπάρχουν ακόμα πολλοί/ές εκπαιδευτικοί που είναι διστακτικοί/ές στο να συμπεριλάβουν τις ΤΠΕ στη διδασκαλία τους (Politis et al, 2000). Στη Διακήρυξη της Λισσαβόνας το 2000 διατυπώθηκε η ανάγκη ενσωμάτωσης της τεχνολογίας στην εκπαίδευση σε όλες τις χώρες της Ευρωπαϊκής Ένωσης. Έγκειται στον/στην κάθε εκπαιδευτικό ως σύγχρονος/η παιδαγωγός να προσαρμόσει τη διδασκαλία του/της στις εκπαιδευτικές προσκλήσεις του 21ου αιώνα, ώστε να καταστεί πιο αποδοτική και αποτελεσματική η διδασκαλία του/της. Η διδακτική διαδικασία και συγκεκριμένα η ποιότητα της διδασκαλίας επηρεάζει τη γνωστική και την ανάπτυξη των μαθητών/τριών σε μεγαλύτερο βαθμό από την εκπαιδευτική κουλτούρα της σχολικής μονάδας (Kyriakides, Creemers & Antoniou, 2009). Ο/Η σύγχρονος/η μαθητής/μαθήτρια είναι οπτικά μαθητευόμενος/μενη, χρησιμοποιεί τις τεχνολογίες της πληροφορίας και των επικοινωνιών, αναλύει τις πληροφορίες και παράγει περιεχόμενα (Hirsh-Pasek et al., 2015). Επίσης με τη χρήση ΤΠΕ ενθαρρύνεται η συνεργατική μάθηση με παιγνιώδη τρόπο, επιτυγχάνεται ο ψηφιακός γραμματισμός του μαθητικού δυναμικού, ενώ μετασχηματίζεται και ο ρόλος του εκπαιδευτικού, καθώς μέσω των ΤΠΕ καλείται να βοηθήσει τους/τις μαθητές/τριες στην απόκτηση, αξιοποίηση, αξιολόγηση και αποθήκευση πληροφοριών.

Είναι φανερό ότι ο/η εκπαιδευτικός οφείλει να προσαρμοστεί στα νέα δεδομένα και να αναπροσαρμόσει τις διδακτικές μεθόδους ενσωματώνοντας τις ΤΠΕ όπου κρίνει εφικτό. Η εν λόγω εργασία έχει στόχο να παρουσιάσει πέντε ψηφιακά εργαλεία με τα οποία οι εκπαιδευτικοί μπορούν να ετοιμάσουν δραστηριότητες με γρήγορο, έξυπνο, παιγνιώδη και πρακτικό τρόπο. Επιπροσθέτως, μπορούν να αναθέσουν στους μαθητές να ετοιμάσουν οι ίδιοι δραστηριότητες ακολουθώντας τα προσφερόμενα πρότυπα, εμπλέκοντάς τους δημιουργικά, βάσει της μεθοδολογίας Project Based Learning (Μάθηση μέσω Πρότζεκτ). Είναι κοινά παραδεκτή η σημασία που έχει το παιχνίδι στη μάθηση, αφού μπορεί να συζευχθεί αρμονικά, πολυδιάστατα και σε πολλά επίπεδα, η διδασκαλία και η μάθηση μέσα από το παιχνίδι (Πατσιομίτου, 2016). Η μάθηση μέσω πρότζεκτ θεωρείται ότι συνδέει το βιωματικό χαρακτήρα της μάθησης με την «παιδοκεντρικότητα, την αυτενέργεια, την εποπτεία, την εργασία κατά ομάδες, τη διαθεματικότητα, την καλλιέργεια διαπροσωπικών σχέσεων δασκάλου-μαθητών και μαθητών μεταξύ τους» (Κόπτσης, 2009).

Στην εργασία μας παρουσιάζονται πέντε ψηφιακά εργαλεία που ενστερνίζονται την Μάθηση μέσω Πρότζεκτ και αποτελούν χρήσιμο βοηθό στα χέρια ενός εκπαιδευτικού που επιθυμεί να εμπλέξει ενεργά και με παιγνιώδη τρόπο τους μαθητές του στη μαθησιακή διαδικασία. Πρόκειται για τα EDpuzzle, Book Creator, Quizziz, Wordwall και Artsteps.

EDpuzzle

Το EDpuzzle, είναι μια διαδικτυακή εφαρμογή επεξεργασίας βίντεο είτε δικών μας (από τον υπολογιστή μας) είτε από τις διάσημες διαδικτυακές πλατφόρμες (Youtube, Vimeo, κ.α.). Υπάρχει η απλή έκδοση (Basic) που διατίθεται δωρεάν, ενώ με χρέωση είναι η Pro Teacher και η Schools & Districts. Το Edpuzzle μας δίνει τη δυνατότητα να κόψουμε κάποιο κομμάτι του βίντεο, να προσθέσουμε το δικό μας ήχο, να σχολιάσουμε φωνητικά σε οποιοδήποτε σημείο του και να δημιουργήσουμε διαδραστικά quiz σε οποιοδήποτε σημείο. Ο εκπαιδευτικός μπορεί να διαλέξει ένα βίντεο από τη βιβλιοθήκη του Edpuzzle ή να ανεβάσει το δικό του. Μπορεί να ενσωματώσει:

- Ερωτήσεις (πολλαπλής επιλογής ή ανοιχτού τύπου)
- Σχόλια και επεξηγήσεις
- Ηχητικά ή γραπτά μηνύματα για καθοδήγηση

Οι μαθητές παρακολουθούν το βίντεο και απαντούν στις ερωτήσεις. Ο εκπαιδευτικός μπορεί να παρακολουθεί την πρόοδό τους και να βλέπει τις απαντήσεις τους. Παρέχεται επίσης στατιστική ανάλυση της προόδου των μαθητών, βοηθώντας τον εκπαιδευτικό να εντοπίσει δυσκολίες.

Παιδαγωγική Αξιοποίηση στην τάξη:

Το Edpuzzle μπορεί να αξιοποιηθεί σε διάφορες διδακτικές πρακτικές:

- **Ανεστραμμένη τάξη (Flipped Classroom)**: Οι μαθητές παρακολουθούν το εκπαιδευτικό υλικό στο σπίτι και έρχονται στην τάξη έτοιμοι για συζήτηση και δραστηριότητες.
- **Διαφοροποιημένη διδασκαλία**: Προσαρμογή του περιεχομένου στις ανάγκες κάθε μαθητή.
- **Αξιολόγηση της κατανόησης**: Οι ερωτήσεις στο βίντεο βοηθούν στον έλεγχο της κατανόησης σε πραγματικό χρόνο.
- **Ενεργή μάθηση**: Οι μαθητές δεν είναι παθητικοί θεατές αλλά αλληλεπιδρούν με το περιεχόμενο.
- **Εξατομικευμένη μάθηση**: Οι μαθητές μπορούν να βλέπουν το υλικό με τον δικό τους ρυθμό.

Το Edpuzzle προσφέρει μια μοναδική ευκαιρία στους εκπαιδευτικοί να μετατρέψουν μια παθητική παρακολούθηση βίντεο σε μια ενεργητική μαθησιακή εμπειρία ενσωματώνοντας ερωτήσεις και καταγράφοντας την πρόοδο των μαθητών. (Castro, S., & Silva, A. (2020), *Integrating Edpuzzle in higher education to support flipped classrooms: A case study*. *Educational Technology & Society*, 23(1), 98-109).

Book Creator

Το Book Creator είναι ένα ψηφιακό εργαλείο που επιτρέπει τη δημιουργία διαδραστικών ηλεκτρονικών βιβλίων (ebooks). Οι χρήστες μπορούν να προσθέσουν κείμενο, εικόνες, ήχο, βίντεο, ακόμα και σχέδια, δημιουργώντας πλούσιο και δυναμικό εκπαιδευτικό περιεχόμενο. Είναι εύκολο στη χρήση και λειτουργεί τόσο σε tablets όσο και σε υπολογιστές μέσω διαδικτυακής εφαρμογής. Υποστηρίζει τη διαφοροποιημένη διδασκαλία και ενισχύει τη δημιουργικότητα των μαθητών. Ο χρήστης δημιουργεί ένα βιβλίο επιλέγοντας έναν τύπο βιβλίου (π.χ., κόμικ, βιβλίο με εικόνες, παραμύθι). Στη συνέχεια, προσθέτει περιεχόμενο έχοντας να επιλέξει μεταξύ των: κείμενο, σχέδια και εικόνες (εισαγωγή ή δημιουργία), ήχο (ηχογράφηση φωνής) και βίντεο (ενσωμάτωση ή εγγραφή). Το βιβλίο μπορεί να αποθηκευτεί, να εξαχθεί σε μορφή PDF/ePub ή να μοιραστεί με άλλους ενώ οι μαθητές μπορούν να δουλέψουν ομαδικά πάνω στο ίδιο βιβλίο.

Παιδαγωγική Αξιοποίηση στην τάξη:

Το Book Creator μπορεί να χρησιμοποιηθεί σε όλες τις βαθμίδες εκπαίδευσης και σε διάφορα γνωστικά αντικείμενα:

- **Γλώσσα & Λογοτεχνία**: Δημιουργία ιστοριών, ποιημάτων, λογοτεχνικών αναλύσεων.
  Ιστορία: Εικονογραφημένα χρονικά, βιογραφίες, ιστορικά γεγονότα.
  Φυσικές Επιστήμες: Εξηγήσεις φαινομένων με εικόνες και διαγράμματα.
- **Ειδική Αγωγή**: Διαδραστικά βιβλία με αφήγηση και προσαρμοσμένο περιεχόμενο για μαθητές με μαθησιακές δυσκολίες.
- **STEM/STEAM**: Συνδυασμός κειμένου, εικόνας και βίντεο για επεξήγηση τεχνολογικών ή επιστημονικών εννοιών.
- **Ανεστραμμένη τάξη**: Οι εκπαιδευτικοί δημιουργούν ψηφιακά βιβλία ως εκπαιδευτικό υλικό για μελέτη στο σπίτι.

Το Book Creator μπορεί να χρησιμοποιηθεί σε όλες τις βαθμίδες εκπαίδευσης και σε διάφορα γνωστικά αντικείμενα. Ενισχύει τη δημιουργικότητα των μαθητών και προωθεί τη συνεργατική μάθηση, καθιστώντας το μια εξαιρετική επιλογή για την εκπαίδευση! «Τα εργαλεία ψηφιακής αφήγησης όπως το Book Creator επιτρέπουν στους μαθητές να εμπλακούν με το μαθησιακό περιεχόμενο με διαδραστικό και δημιουργικό τρόπο, καλλιεργώντας μια βαθύτερη κατανόηση μέσω της αυτοέκφρασης» **(**McVerry, J. G., & McVerry, M. (2017). *Exploring the use of Book Creator as an instructional tool*. *Journal of Educational Technology Systems*, 45(1), 24-36).

Quizziz

Το Quizizz είναι ένα ψηφιακό εργαλείο δημιουργίας κουίζ και διαδραστικών δραστηριοτήτων που υποστηρίζει τη μάθηση με παιγνιώδη τρόπο. Οι εκπαιδευτικοί μπορούν να δημιουργήσουν ή να επιλέξουν έτοιμα κουίζ, ενώ οι μαθητές συμμετέχουν είτε ατομικά είτε ομαδικά, αποκτώντας άμεση ανατροφοδότηση. Στο quizziz οι μαθητές απαντούν σε ερωτήσεις με **παιχνιδοποιημένα στοιχεία** (πόντοι, χρονόμετρο, leaderboard), γεγονός που ενισχύει το ενδιαφέρον και την ενεργή συμμετοχή τους. Το Quizizz διατίθεται μέσω ιστοσελίδας και εφαρμογής, επιτρέποντας τη χρήση του σε κάθε συσκευή. Το Quizizz ενσωματώνει τεχνητή νοημοσύνη (AI) για να βελτιώσει την εμπειρία μάθησης και τη διαδικασία αξιολόγησης παρέχοντας αυτόματη δημιουργία ερωτήσεων (με χρήση AI, το Quizizz μπορεί να δημιουργήσει ερωτήσεις με βάση ένα κείμενο ή θέμα, διευκολύνοντας τους εκπαιδευτικούς), προσαρμοσμένη μάθηση (αναλύει τις επιδόσεις των μαθητών και προτείνει στοχευμένες ερωτήσεις για ενίσχυση των αδύναμων σημείων), έξυπνη ανατροφοδότηση (παρέχει στους μαθητές εξατομικευμένες επεξηγήσεις και καθοδήγηση με βάση τις απαντήσεις τους) και αυτόματη αξιολόγηση και ανάλυση δεδομένων (οι εκπαιδευτικοί λαμβάνουν αναλυτικά στατιστικά για την πρόοδο των μαθητών και μπορούν να προσαρμόσουν τη διδασκαλία τους ανάλογα).

Το Quizizz μετατρέπει την αξιολόγηση σε ένα δυναμικό και διασκεδαστικό εργαλείο μάθησης, ενισχύοντας τη συμμετοχή των μαθητών. Το Quizizz επιτρέπει στους μαθητές να εμπλακούν σε πραγματικού χρόνου διαμορφωτική αξιολόγηση, ενθαρρύνοντας την ενεργή συμμετοχή και παρέχοντας άμεση ανατροφοδότηση, που υποστηρίζει τη βαθύτερη κατανόηση της ύλης» (Wills, G., & Foster, D. (2018). *The effectiveness of Quizizz in promoting active learning in secondary education*. *Journal of Educational Technology & Society*, 21(1), 116-128).

Παιδαγωγική Αξιοποίηση στην τάξη:

Το quizziz μπορεί να αξιοποιηθεί παιδαγωγικά στην τάξη με πολλούς τρόπους:

- **-Διαμορφωτική αξιολόγηση**

Οι εκπαιδευτικοί μπορούν να χρησιμοποιήσουν το Quizizz για:

- ◇ Έλεγχο κατανόησης μετά από ένα μάθημα.
- ◇ Αξιολόγηση πρότερων γνώσεων πριν από ένα νέο θέμα.
- ◇ Παροχή ανατροφοδότησης στους μαθητές σε πραγματικό χρόνο.

- **-Ενεργή και διαφοροποιημένη μάθηση**

- ◇ Οι μαθητές μπορούν να απαντούν με τον δικό τους ρυθμό, χωρίς πίεση.
- ◇ Δίνεται δυνατότητα επανάληψης του quiz για βελτίωση της επίδοσης.
- ◇ Οι εκπαιδευτικοί μπορούν να προσαρμόσουν τα ερωτηματολόγια στις ανάγκες των μαθητών.

- **-Ανεστραμμένη τάξη & εξ αποστάσεως εκπαίδευση**

- ◇ Οι εκπαιδευτικοί μπορούν να αναθέσουν quiz ως εργασία για το σπίτι.
- ◇ Οι μαθητές δουλεύουν ατομικά, ενώ ο εκπαιδευτικός βλέπει τα αποτελέσματα και προσαρμόζει τη διδασκαλία.

- **-Παιχνιδοποίηση & Κίνητρο**

- ◇ Το Quizizz ενσωματώνει πόντους, leaderboard, memes και ήχους, κάνοντας τη μάθηση πιο διασκεδαστική. Οι μαθητές είναι πιο ενεργοί και ανταποκρίνονται θετικά στη διαδικασία αξιολόγησης.

Wordwall

Πρόκειται για μία διαδικτυακή εφαρμογή που μπορεί να χρησιμοποιηθεί για τη δημιουργία διαδραστικών και εκτυπώσιμων δραστηριοτήτων. Τα περισσότερα πρότυπα είναι διαθέσιμα τόσο σε διαδραστική όσο και σε εκτυπώσιμη έκδοση.

Τα διαδραστικά παιχνίδια που ετοιμάζουμε στο wordwall αναπαράγονται σε οποιαδήποτε συσκευή με δυνατότητα Web, δηλαδή σε έναν υπολογιστή, tablet, τηλέφωνο ή διαδραστικό πίνακα. Μπορούν να αναπαραχθούν μεμονωμένα από τους μαθητές, ή να γίνουν ομαδικά μέσα στην τάξη με την καθοδήγηση του εκπαιδευτικού.Τα εκτυπώσιμα παιχνίδια μπορούν να εκτυπωθούν απευθείας ή να ληφθούν ως αρχείο PDF. Μπορούν να χρησιμοποιηθούν μαζί με τις διαδραστικές δραστηριότητες ή ως αυτόνομες δραστηριότητες. Οι δραστηριότητες δημιουργούνται με τη χρήση ενός συστήματος προτύπων.Αφού δημιουργήσουμε μια δραστηριότητα, μπορούμε να την αλλάξουμε σε διαφορετικό πρότυπο με ένα μόνο κλικ. Αυτό μας εξοικονομεί χρόνο και είναι εξαιρετικό για διαφοροποίηση και ενίσχυση. Οι διαδραστικές δραστηριότητες μπορούν να παρουσιαστούν σε διαφορετικά θέματα. Κάθε θέμα αλλάζει την εμφάνιση με διαφορετικά γραφικά, γραμματοσειρές και ήχους. Στη δωρεάν έκδοση μπορούμε να δημιουργήσουμε μέχρι 5 δραστηριότητες σε κάθε λογαριασμό. Καθώς δημιουργούνται πάρα πολύ εύκολα δεν είναι και τόσος κόπος να σβήνουμε κάποιες από αυτές προκειμένου να δημιουργήσουμε μία καινούρια. Ο άλλος τρόπος είναι να ανοίξουμε και δεύτερο λογαριασμό με άλλο mail, ώστε να έχουμε τη δυνατότητα δημιουργίας ακόμα 5 δραστηριοτήτων. Κάθε δραστηριότητα που δημιουργείται μπορεί να μετατραπεί σε δημόσια. Με αυτόν τον τρόπο μπορεί να διαμοιραστεί στα μέσα κοινωνικής δικτύωσης ή μέσω άλλων μέσων. Στο κάτω μέρος της δραστηριότητας, στη μέση, μπορούμε να δούμε πόσες φορές έχει η δραστηριότητα χρησιμοποιηθεί. Επίσης μπορεί να καταχωρήσει κάποιος το όνομά του και να εισαχθεί στην top5 κατάταξη της δραστηριότητας. Γι' αυτόν τον λόγο οι μαθητές παίζουν ξανά και ξανά ώστε να βελτιώσουν τις επιδόσεις τους. Οι δραστηριότητες του Wordwall μπορούν να τοποθετηθούν σε άλλους ιστότοπους χρησιμοποιώντας αποσπάσματα κώδικα HTML.

Παιδαγωγική Αξιοποίηση στην τάξη:

Το Wordwall μπορεί να αξιοποιηθεί ποικιλοτρόπως στη διδακτική πράξη.

- **-Διαμορφωτική αξιολόγηση & Επανάληψη γνώσεων**

- ◇ Οι εκπαιδευτικοί μπορούν να δημιουργούν κουίζ, παιχνίδια αντιστοίχισης και αναγραμματισμούς για να ελέγχουν την κατανόηση των μαθητών.
- ◇ Τα διαδραστικά στοιχεία ενισχύουν τη μνήμη και την επανάληψη με πιο διασκεδαστικό τρόπο.

- **-Διαφοροποιημένη διδασκαλία**
  - ◇ Οι δραστηριότητες του Wordwall μπορούν να προσαρμοστούν στις ανάγκες κάθε μαθητή.
  - ◇ Οι μαθητές επιλέγουν τον τρόπο που θα συμμετάσχουν (π.χ. παιχνίδι μνήμης, σταυρόλεξο, χρονόμετρο), ανάλογα με τον μαθησιακό τους ρυθμό.

- **-Ενίσχυση της ενεργής συμμετοχής**
  - ◇ Οι μαθητές δεν είναι απλοί παρατηρητές, αλλά συμμετέχουν **ενεργά** μέσω παιχνιδιών και προκλήσεων.
  - ◇ Δίνεται η δυνατότητα για **συνεργατική μάθηση**, καθώς μπορούν να παίξουν σε ομάδες ή να διαγωνιστούν μεταξύ τους.

- **-Χρήση σε διαφορετικά μαθήματα**

Το Wordwall μπορεί να αξιοποιηθεί σε διάφορα γνωστικά αντικείμενα, όπως:
Γλώσσα & Λογοτεχνία → Σχηματισμός προτάσεων, ορθογραφία, συνώνυμα-αντώνυμα.
Μαθηματικά → Αριθμητικά παιχνίδια, πράξεις, επίλυση προβλημάτων.
Ιστορία & Γεωγραφία → Χρονολογίες, τοποθεσίες, αντιστοίχιση γεγονότων.
Φυσικές Επιστήμες → Όροι και έννοιες, διαδικασίες, αναγραμματισμοί.

- **-Υποστήριξη της ανεστραμμένης τάξης & της εξ αποστάσεως εκπαίδευσης**
  - ◇ Οι μαθητές μπορούν να ολοκληρώσουν δραστηριότητες **από το σπίτι**, ενώ ο εκπαιδευτικός παρακολουθεί την πρόοδό τους. Μπορεί βέβαια να χρησιμοποιηθεί και **δια ζώσης** στην τάξη μέσω διαδραστικού πίνακα.

«Το Wordwall ενισχύει την κατάκτηση του λεξιλογίου και τη γλωσσική πρακτική μέσα από διαδραστικά παιχνίδια επιτρέποντας στους μαθητές να εμπλακούν ενεργά και ουσιαστικά στη μάθησή τους» **(**Cumming-Potvin, W., & Crozier, W. R. (2020). *Using Wordwall to create interactive learning activities in primary education: A case study*. *Educational Technology Research and Development*, 68(5), 2593-2610).

Artsteps

Το Artsteps είναι ένα ψηφιακό εργαλείο που επιτρέπει τη δημιουργία εικονικών εκθέσεων και μουσειακών χώρων σε τρισδιάστατο περιβάλλον (3D). Οι χρήστες μπορούν να σχεδιάσουν προσαρμοσμένες γκαλερί, να τοποθετήσουν έργα τέχνης, εικόνες, βίντεο και ήχο, δημιουργώντας μια διαδραστική εμπειρία. Η πλατφόρμα είναι διαθέσιμη διαδικτυακά και υποστηρίζει περιήγηση τόσο μέσω υπολογιστών όσο και μέσω VR τεχνολογιών για ακόμα πιο ρεαλιστική εμπειρία. Ο χρήστης δημιουργεί μια εικονική γκαλερί και σχεδιάζει έναν χώρο επιλέγοντας το μέγεθος και τη διαμόρφωση. Στη συνέχεια προσθέτει περιεχόμενο με την εισαγωγή εικόνας, κειμένου, βίντεο και ήχου για να εμπλουτίσει την έκθεση. Έχει τη δυνατότητα προσαρμογής του χώρου με την αλλαγή τοποθέτησης αντικειμένων, φωτισμού και σχεδίασης του χώρου. Τέλος, υπάρχει η επιλογή του διαμοιρασμού καθώς η έκθεση μπορεί να δημοσιευτεί και να κοινοποιηθεί σε άλλους, δίνοντας τη δυνατότητα περιήγησης σε VR ή μέσω υπολογιστή/κινητού.

Παιδαγωγική Αξιοποίηση στην τάξη:

Το Artsteps βρίσκει εφαρμογή σε πληθώρα διδακτικών αντικειμένων, όπου ο εκπαιδευτικός μπορεί να χρησιμοποιήσει το Artsteps για να δημιουργήσει εικονικά περιβάλλοντα μάθησης:

Ιστορία & Τέχνη
Δημιουργία εικονικών μουσείων και γκαλερί με έργα τέχνης, αρχαιολογικά εκθέματα ή ιστορικά γεγονότα.
Οι μαθητές μπορούν να δημιουργήσουν ένα εικονικό μουσείο με πίνακες ζωγραφικής ή γλυπτά και να το παρουσιάσουν στην τάξη.
Γλώσσα & Λογοτεχνία
Παρουσίαση λογοτεχνικών έργων και βιογραφιών συγγραφέων με διαδραστικό τρόπο.
Δημιουργία εικονικών αφηγήσεων, όπου οι μαθητές "περπατούν" σε έναν χώρο και διαβάζουν ή ακούν ιστορίες.
Φυσικές Επιστήμες & Γεωγραφία
Δημιουργία εκθέσεων για βιολογία, αστρονομία, γεωλογία με εικόνες και πληροφορίες.
Διαδραστικές παρουσιάσεις για οικοσυστήματα, φυσικά φαινόμενα ή πλανήτες.
Πολιτιστικά & Διαθεματικά Προγράμματα
Οι μαθητές μπορούν να συνεργαστούν για τη δημιουργία πολιτιστικών και διαπολιτισμικών εκθέσεων.
Παρουσίαση παραδόσεων, μουσικής, φορεσιών ή αρχιτεκτονικών δομών διαφορετικών χωρών.
Ανεστραμμένη τάξη & Εξ αποστάσεως εκπαίδευση

Οι μαθητές μπορούν να δημιουργήσουν ψηφιακές εκθέσεις στο σπίτι και να τις παρουσιάσουν στους συμμαθητές τους διαδικτυακά.

Με το να επιτρέπει στους χρήστες να δημιουργούν εικονικά μουσεία και εκθέσεις το Artsteps παρέχει ένα εμβυθιστικό περιβάλλον που ενισχύει την ιστορική και καλλιτεχνική κατανόηση, καλλιεργώντας κριτική σκέψη και δημιουργικότητα" (Harrison, S., & Wilkins, S. (2021). *Exploring virtual museum tools like Artsteps in enhancing historical learning experiences*. *Journal of Virtual Learning*, 17(1), 44-58.

ΣΥΜΠΕΡΑΣΜΑΤΑ

Η χρήση ψηφιακών εργαλείων στη διδακτική πράξη προσφέρει σημαντικά οφέλη, καθώς ενισχύει την αλληλεπίδραση των μαθητών με το περιεχόμενο, προάγει τη συνεργασία και την κριτική σκέψη, ενώ ταυτόχρονα εξασφαλίζει εξατομικευμένη μάθηση. Τα ψηφιακά εργαλεία διευκολύνουν την αναζήτηση και επεξεργασία πληροφοριών, ενώ προσφέρουν νέες δυνατότητες για δημιουργία και έκφραση. Επιπλέον, η αξιοποίηση τεχνολογικών εφαρμογών, όπως εκπαιδευτικά λογισμικά και πλατφόρμες, ενισχύει τη συμμετοχή των μαθητών, διατηρεί το ενδιαφέρον τους και επιτρέπει την παρακολούθηση της προόδου τους σε πραγματικό χρόνο. Κατά συνέπεια, τα ψηφιακά εργαλεία προσφέρουν προστιθέμενη αξία στη μαθησιακή διαδικασία, καθιστώντας την πιο αποτελεσματική, διαδραστική και προσαρμοσμένη στις ανάγκες του κάθε μαθητή. Τα εργαλεία που προτείνονται ανωτέρω είναι τα πλέον εύχρηστα για το λόγο αυτό προτείνεται η συχνή εφαρμογή τους και η ενσωμάτωσή τους στη διδακτική πράξη.

ΑΞΙΟΠΟΙΩΝΤΑΣ ΤΙΣ ΔΥΝΑΤΟΤΗΤΕΣ ΤΟΥ ΗΛΕΚΤΡΟΝΙΚΟΥ ΒΙΒΛΙΟΥ ΣΤΗ ΔΙΔΑΣΚΑΛΙΑ ΤΗΣ ΙΣΤΟΡΙΑΣ: ΜΙΑ ΜΕΛΕΤΗ ΠΕΡΙΠΤΩΣΗΣ ΓΙΑ ΤΗΝ Γ΄ ΓΥΜΝΑΣΙΟΥ

Λεύκα Βασιλική
Εκπαιδευτικός ΠΕ02
Γυμνάσιο Μπιζανίου
Ιωάννινα, Ελλάδα

Εκπαιδευτικός ΠΕ02
Γυμνάσιο Περάματος
Ιωάννινα, Ελλάδα
email: mtsiouri@sch.gr

ΠΕΡΙΛΗΨΗ

Στο σύγχρονο εκπαιδευτικό περιβάλλον, η ενσωμάτωση των ψηφιακών μέσων και εργαλείων στην διδακτική πράξη αναδεικνύεται ως κρίσιμος παράγοντας για την ενίσχυση της μαθησιακής εμπειρίας και την προώθηση της ενεργού μάθησης. Ιδιαίτερα για τη διδασκαλία του μαθήματος της ιστορίας, τα ηλεκτρονικά βιβλία (e-books) αποτελούν μια σύγχρονη και δυναμική μορφή ψηφιακού μέσου, η οποία μπορεί να αξιοποιηθεί αποτελεσματικά και να έχει πολλαπλά οφέλη μέσω του εμπλουτισμού του διδακτικού υλικού με πολυμεσικά στοιχεία, όπως η διαδραστικότητα, η ενίσχυση της μαθητοκεντρικής μάθησης, η προώθηση της διαφοροποιημένης διδασκαλίας και η ανάπτυξη ψηφιακών δεξιοτήτων στους μαθητές. Η παρούσα ανακοίνωση προτείνει ως καλή πρακτική αξιοποίησης των ψηφιακών μέσων στην εκπαιδευτική διαδικασία τη δημιουργία και χρήση ενός πρωτότυπου ηλεκτρονικού βιβλίου (e-book) για τη συνδυαστική διδασκαλία διαφόρων ενοτήτων της ιστορίας στην Γ΄ Γυμνασίου. Συγκεκριμένα, παρουσιάζεται η περίπτωση ενός ηλεκτρονικού βιβλίου που δημιουργήθηκε[1] με την πλατφόρμα Book Creator και έχει σχεδιαστεί ειδικά για να αποτελέσει εργαλείο για τη διδασκαλία των βασικότερων ιστορικών σταθμών της διαμόρφωσης των συνόρων του ελληνικού κράτους, στο μάθημα της ιστορίας για την Γ΄ Γυμνασίου. Το ηλεκτρονικό βιβλίο αξιοποιώντας ποικίλα πολυμεσικά στοιχεία, όπως χάρτες, εικόνες, βίντεο, φωνητική αφήγηση, διαδραστικές και ομαδοσυνεργατικές δραστηριότητες έχει ως στόχο να καταστήσει τη μάθηση της ιστορίας πιο ελκυστική και αποτελεσματική για τους μαθητές. Η ευκολία χρήσης, οι ποικίλες δυνατότητες διαμόρφωσης διαδραστικού περιεχομένου και η ευελιξία προσαρμογής στις ανάγκες του μαθήματος αλλά και του μαθητή συμβάλλουν στην καλύτερη κατανόηση της ιστορικής αφήγησης, στην ανάπτυξη της ιστορικής σκέψης και στην κριτική προσέγγιση των ιστορικών πηγών από τους μαθητές, καθώς και στην ενίσχυση της αυτενέργειας του μαθητή και τον ψηφιακό του γραμματισμό. Τα συμπεράσματα από την πιλοτική εφαρμογή του ηλεκτρονικού βιβλίου στην τάξη, οι εντυπώσεις των μαθητών, η ανταπόκριση και αλληλεπίδραση τους με το βιβλίο παρέχουν σημαντικές πληροφορίες για την συνολική συμβολή του στην μαθησιακή διαδικασία, την κατανόηση του παρελθόντος και την εμπέδωση της ιστορικής γνώσης.

Λέξεις – κλειδιά: ηλεκτρονικό βιβλίο (e-book), διδασκαλία ιστορίας, ψηφιακά μέσα, Book Creator, μαθητοκεντρική μάθηση, πολυμεσικά στοιχεία

[1]Το συγκεκριμένο ηλεκτρονικό βιβλίο δημιουργήθηκε στα πλαίσια εργασίας του μεταπτυχιακού προγράμματος «Ψηφιακές και Ήπιες Δεξιότητες στις Επιστήμες της Αγωγής», του Διεθνούς Πανεπιστημίου Ελλάδος (ΔΙΠΑΕ).

ΕΙΣΑΓΩΓΗ: Η ΣΥΜΒΟΛΗ ΤΟΥ ΗΛΕΚΤΡΟΝΙΚΟΥ ΒΙΒΛΙΟΥ ΣΤΗ ΜΑΘΗΣΙΑΚΗ ΔΙΑΔΙΚΑΣΙΑ

Τα ηλεκτρονικά βιβλία (e-books), γνωστά επίσης ως ηλεκτρονικά ή ψηφιακά εγχειρίδια, ενσωματώνουν την κλασική δομή των συμβατικών έντυπων βιβλίων και της προσδίδουν ηλεκτρονικά χαρακτηριστικά, προσφέροντας οπτικά ή ηχητικά εφέ και διαδραστικούς συνδέσμους (Vorothykova, 2019; Waller, 2013; Maynard & Cheyne, 2005). Υποστηρίζουν έτσι ένα πιο δυναμικό, σύγχρονο περιεχόμενο, προσφέρουν άμεση πρόσβαση και έξυπνη εύρεση και είναι προσπελάσιμα μέσω οποιασδήποτε ηλεκτρονικής συσκευής (Kouis & Konstantinou, 2014).

Η συμβολή τους στη μαθησιακή διαδικασία είναι πολύπλευρη, ενισχύοντας τα αποτελέσματα σε διάφορα εκπαιδευτικά περιβάλλοντα. Χρησιμεύουν ως δυναμικοί πόροι μάθησης που μπορούν να βελτιώσουν σημαντικά τα κίνητρα των μαθητών, ειδικά όταν ενσωματώνουν παιγνιοποιημένα στοιχεία. Σχετικές ερευνητικές μελέτες επισημαίνουν πως τα ηλεκτρονικά εγχειρίδια προσφέρουν ένα ευρύ φάσμα εργαλείων μάθησης στην εκπαίδευση ενισχύοντας την διαδραστικότητα, παρακινώντας τους μαθητές και προωθώντας τη συνεργασία σε σύγκριση με τα παραδοσιακά εγχειρίδια (Maynard & Cheyne, 2005; Lee et al., 2013; Kouis & Konstantinou, 2014). Η χρήση ηλεκτρονικών βιβλίων μπορεί να οδηγήσει σε σημαντικές βελτιώσεις στην ακαδημαϊκή απόδοση και να προωθήσει την κριτική σκέψη, την επίλυση προβλημάτων και τη δημιουργικότητα (Waller, 2013; Vorotnykova, 2019) ενώ παράλληλα η δυνατότητα προσπέλασης τους σε διάφορες συσκευές διευκολύνει την εύκολη πλοήγηση και οργάνωση πληροφοριών (Lee et al., 2012; Kouis & Konstantinou, 2014; Babushko et al., 2024), προωθεί την ανάγνωση, ειδικά μεταξύ των νέων που περνούν σημαντικό χρόνο μπροστά από οθόνες και βελτιώνει την προσβασιμότητα για άτομα με αναπηρίες, μέσω ρυθμιζόμενου μεγέθους κειμένου και επιλογών φωνητικής αφήγησης (Gasouka et al., 2013; Maynard & Cheyne, 2005; Lim et al., 2020).

Ειδικά για τη διδασκαλία της ιστορίας, οι σχετικές έρευνες για τη χρήση των ηλεκτρονικών βιβλίων αναδεικνύουν βελτίωση της προσβασιμότητας σε ένα ευρύ φάσμα ιστορικών πόρων, αυξημένη συμμετοχή και ενδιαφέρον των μαθητών, μεγαλύτερη ευκολία, εξατομικευμένες μαθησιακές εμπειρίες, προσαρμοσμένες στις ανάγκες του κάθε μαθητή και ευκολία στον εμπλουτισμό των ιστορικών ηλεκτρονικών βιβλίων με νέες ιστορικές έρευνες και ερμηνείες (Maniotis et al., 2024; Martin & Quan-Haase, 2013).

Στον αντίποδα και παρά τα πλεονεκτήματά τους, η χρήση των ηλεκτρονικών βιβλίων στην εκπαίδευση δεν είναι χωρίς προκλήσεις. Αυτές περιλαμβάνουν το ψηφιακό χάσμα και τις ανισότητες πρόσβασης, ανησυχίες για την ιστορική ακρίβεια και την αξιοπιστία των πηγών από το διαδίκτυο (Martin & Quan-Haase, 2013; Kelly, 2013), την οπτική κόπωση (Lee et al., 2012) και τον ψηφιακό περισπασμό (Evurulobi et al., 2024; Doering et al., 2012), τον περιορισμό αυτού του είδους της αυθόρμητης ανακάλυψης σε απροσδόκητες πληροφορίες που «κρύβει» συχνά το φυλλογύρισμα των παραδοσιακών έντυπων βιβλίων (Martin & Quan-Haase, 2013).

ΔΗΜΙΟΥΡΓΙΑ ΚΑΙ ΧΑΡΑΚΤΗΡΙΣΤΙΚΑ ΤΟΥ ΗΛΕΚΤΡΟΝΙΚΟΥ ΒΙΒΛΙΟΥ ΕΡΓΑΛΕΙΑ ΚΑΙ ΤΕΧΝΟΛΟΓΙΕΣ

Για τη δημιουργία του συγκεκριμένου ηλεκτρονικού βιβλίου επιλέχτηκε η πλατφόρμα Book Creator, ένα ελκυστικό εργαλείο για τους χρήστες, καθώς προσφέρει καινοτόμα χαρακτηριστικά, επιτρέπει την ενσωμάτωση διαφόρων μέσων, όπως φωτογραφιών, βίντεο, σχεδίων, ηχογραφήσεων, χρονογραμμών, έχει διαδραστικές λειτουργίες που ενισχύουν την αφοσίωση και εμπλουτίζουν τη μαθησιακή εμπειρία (Tuminah et al., 2022; Zain, 2023). Η συγκεκριμένη διαδικτυακή πλατφόρμα, στη δωρεάν έκδοσή της, προσφέρει στον εκπαιδευτικό τη δυνατότητα δημιουργίας και δημοσίευσης έως 40 βιβλίων και δεν απαιτεί μεγάλο βαθμό εξοικείωσης με τεχνολογικά μέσα, καθώς είναι αρκετά εύκολη στη χρήση.

Χρησιμοποιήθηκαν, επίσης, διαδικτυακές πλατφόρμες για τη δημιουργία online διαδραστικών κουίζ και συγκεκριμένα το Wayground (πρώην Quizizz), ομαδοσυνεργατικά έγγραφα (Google docs), διαδικτυακή πλατφόρμα αναπαραγωγής οπτικοακουστικού υλικού (youtube), ψηφιακά εργαλεία δημιουργίας παρουσιάσεων (Microsoft powerpoint, Canvas) και εργαλεία επεξεργασίας εικόνων.

ΤΟ ΠΕΡΙΕΧΟΜΕΝΟ

Το βιβλίο, με τίτλο «Η διαμόρφωση των συνόρων του ελληνικού κράτους», αποτελείται από 32 σελίδες και είναι χωρισμένο σε 8 κεφάλαια, τα οποία αντιστοιχούν στους 8 βασικούς χρονικούς σταθμούς αλλαγής συνόρων του ελληνικού κράτους από την ίδρυσή του (1830) έως την τελευταία ενσωμάτωση εδαφών σε αυτό (1947 - 1948). Το υλικό για τη δημιουργία του αντλήθηκε από έγκυρες βιβλιογραφικές και διαδικτυακές πηγές και σχολικά εγχειρίδια, τα οποία απαριθμώνται στην ενότητα της βιβλιογραφίας και των διαδικτυακών πηγών. Είναι δημοσιευμένο και διαθέσιμο online, μέσω του συνδέσμου BookCreator | Η διαμόρφωση των συνόρων του ελληνικού κράτους.

Η ΕΠΙΛΟΓΗ ΤΗΣ ΘΕΜΑΤΙΚΗΣ

Μέσα από την πολύχρονη ενασχόληση των δημιουργών του βιβλίου με την διδασκαλία του αντικείμενου της Νεότερης Ελληνικής Ιστορίας, διαπιστώθηκε η αποσπασματικότητα με την οποία προσεγγίζεται η διδασκαλία της διαμόρφωσης των ελληνικών συνόρων και η συνακόλουθη δυστοκία των μαθητών της Γ΄ Γυμνασίου να συγκροτήσουν μια ολοκληρωμένη εικόνα για ένα τόσο σύνθετο θέμα, όπως η διαμόρφωση του σύγχρονου ελληνικού κράτους. Οι σταθμοί των συνοριακών αλλαγών διδάσκονται σε ξεχωριστά κεφάλαια, διάσπαρτα στο συμβατικό έντυπο βιβλίο, καθιστώντας δύσκολη την αντίληψη του ιστορικού γίγνεσθαι και των αλληλεπιδράσεων μεταξύ των διαφορετικών φάσεων. Το γνωστικό αντικείμενο της ιστορίας μπορεί και πρέπει να γίνει πιο προσιτό και ενδιαφέρον, επιτρέποντας στους μαθητές να εξερευνήσουν τα ιστορικά γεγονότα με πιο καθηλωτικό τρόπο και η διδασκαλία της διαμόρφωσης των συνόρων, με την ανάγκη οπτικοποίησης και κατανόησης μιας πολυεπίπεδης και χρονικά εκτεταμένης διαδικασίας, είναι ένα πεδίο που προσφέρεται ιδανικά για μια πιο διαδραστική και ψηφιακή προσέγγιση μέσω ενός ηλεκτρονικού βιβλίου.

ΚΟΙΝΟ ΣΤΟ ΟΠΟΙΟ ΑΠΕΥΘΥΝΕΤΑΙ

Το συγκεκριμένο βιβλίο απευθύνεται κυρίως σε μαθητές της Γ΄ Γυμνασίου, οι οποίοι διδάσκονται Νεότερη Ελληνική Ιστορία, ενώ θα μπορούσε να αξιοποιηθεί και από μαθητές της Γ΄ Λυκείου, στην αντίστοιχη θεματική ενότητα. Απευθύνεται επίσης, σε εκπαιδευτικούς δευτεροβάθμιας εκπαίδευσης, κυρίως του κλάδου ΠΕ02, αλλά και σε γενικό κοινό, το οποίο ενδιαφέρεται για το συγκεκριμένο θέμα. Μπορεί να αποτελέσει συμπληρωματικό ως προς το σχολικό εγχειρίδιο υλικό διδασκαλίας και πηγή μάθησης.

ΔΟΜΗ – ΠΑΡΟΥΣΙΑΣΗ ΤΟΥ ΒΙΒΛΙΟΥ

Η εμπεριστατωμένη κατανόηση από τους μαθητές της ιστορικής διαμόρφωσης των συνόρων του ελληνικού κράτους αποτελεί κεντρικό στόχο του e-book. Το συγκεκριμένο εκπαιδευτικό υλικό στοχεύει στην ανάδειξη της διαδικασίας αυτής ως μιας δυναμικής ιστορικής εξέλιξης, υπερβαίνοντας την απλή παράθεση στατικών γεγονότων. Παράλληλα, επιδιώκεται η ευαισθητοποίηση των μαθητών ως προς την κομβική σημασία των συνόρων στην εθνική ταυτότητα και την κρατική οντότητα.

ΜΕΘΟΔΟΛΟΓΙΚΗ ΠΡΟΣΕΓΓΙΣΗ ΚΑΙ ΟΡΓΑΝΩΣΗ ΤΗΣ ΥΛΗΣ

Για την επίτευξη των προαναφερθέντων παιδαγωγικών στόχων, υιοθετήθηκε μια χρονολογική οργάνωση της ύλης. Το βιβλίο διαρθρώνεται σε οκτώ (8) κεφάλαια-ενότητες, καθεμιά από τις οποίες αντιστοιχεί στη χρονολογία και την αντίστοιχη διεθνή συνθήκη που καθόρισε τις μεταβολές στα σύνορα του ελληνικού κράτους: 1830, 1832, 1864, 1881, 1912-13, 1920, 1923 και 1947-48. Η συστηματική αυτή χρονολογική προσέγγιση επιτρέπει στους μαθητές την παρακολούθηση της σταδιακής επέκτασης των ελληνικών συνόρων, αναγνωρίζοντας τους βασικούς ιστορικούς σταθμούς και τις κομβικές χρονικές περιόδους που διαμόρφωσαν την εδαφική συγκρότηση της χώρας.

ΔΥΝΑΤΟΤΗΤΕΣ ΠΛΟΗΓΗΣΗΣ ΚΑΙ ΠΡΟΣΒΑΣΙΜΟΤΗΤΑΣ

Η αρχιτεκτονική του ηλεκτρονικού βιβλίου περιλαμβάνει έναν ενεργό πίνακα περιεχομένων, ο οποίος βρίσκεται μετά το εξώφυλλο, εξασφαλίζοντας άμεση και εύκολη πλοήγηση. Οι ενεργοί υπερσύνδεσμοι επιτρέπουν στους χρήστες εύκολη πρόσβαση στο επιθυμητό κεφάλαιο, βελτιστοποιώντας τον χρόνο μελέτης και ενισχύοντας την ευελιξία της μαθησιακής διαδικασίας.

Ιδιαίτερη έμφαση δόθηκε στην προσβασιμότητα, ενσωματώνοντας φωνητική αφήγηση για το σύνολο των κειμένων. Η επιλογή αυτή, όπως γίνεται σαφές και σε σχετικές μελέτες (Gasouka et al., 2013; Xu et al., 2021), αποτελεί κρίσιμο εργαλείο υποστήριξης διαφορετικών μαθησιακών τύπων και διασφαλίζει την πρόσβαση στην πληροφορία, ανεξαρτήτως αναγνωστικών ικανοτήτων. Επίσης, είναι ιδιαίτερα χρήσιμη για μαθητές με μαθησιακές δυσκολίες ή προβλήματα όρασης**.** Η λύση της ηχογράφησης προτιμήθηκε έναντι της αυτόματης ανάγνωσης κειμένου (Read to me) που παρέχει η πλατφόρμα Book Creator, λόγω της υποδεέστερης ποιότητας στην ελληνική γλώσσα.

ΕΜΠΛΟΥΤΙΣΜΟΣ ΤΟΥ ΜΑΘΗΣΙΑΚΟΥ ΠΕΡΙΕΧΟΜΕΝΟΥ

Το εκπαιδευτικό υλικό εμπλουτίζεται με μια πληθώρα πολυμεσικών στοιχείων και διαδραστικών εργαλείων, που περιλαμβάνουν ιστορικούς χάρτες, οπτικό και οπτικοακουστικό υλικό, εξωτερικούς υπερσυνδέσμους και πρωτογενείς ιστορικές πηγές.

Σε κάθε φάση της διαμόρφωσης των συνόρων, ενσωματώνονται ιστορικοί χάρτες που επιτρέπουν την γεωγραφική εντόπιση των ενσωματωμένων περιοχών, την οπτικοποίηση της εδαφικής επέκτασης και την κατανόηση της κλίμακας των μεταβολών, καθώς και την σύνδεση ιστορικών γεγονότων με γεωγραφικές αλλαγές. Έχει ενσωματωθεί εκτενές αρχειακό οπτικό υλικό (εικόνες προσώπων, γεγονότων, τοποθεσιών της εποχής), με σκοπό την αναβίωση της ιστορικής αφήγησης και την ενίσχυση της κατανόησης μέσω της οπτικοποίησης (Berendsen et al., 2018). Για κάθε εικόνα και χάρτη, αναφέρεται η διαδικτυακή πηγή για λόγους διασφάλισης πνευματικών δικαιωμάτων. Παρά το γεγονός ότι η πλατφόρμα Book Creator παρέχει τη δυνατότητα χρήσης δικών της εικόνων, ο ιστορικός χαρακτήρας του θέματος δεν επέτρεψε την εύρεση αντίστοιχων εικόνων διαθέσιμων στην πλατφόρμα. Παράλληλα, περιλαμβάνονται αρχεία βίντεο με ιστορικά ντοκιμαντέρ, εστιάζοντας σε πρόσφατα ιστορικά γεγονότα όπως οι Βαλκανικοί Πόλεμοι, οι Συνθήκες των Σεβρών και της Λωζάνης και η ενσωμάτωση της Δωδεκανήσου. Η συμπερίληψη οπτικοακουστικού υλικού προσφέρει μια πολυδιάστατη μαθησιακή εμπειρία και διευκολύνει την εμβάθυνση στο ιστορικό πλαίσιο (Μανιώτης et al., 2024; Waller, 2013; Vorotnykova, 2019).

Σε πολλές ενότητες παρέχονται ενεργοί υπερσύνδεσμοι προς εξωτερικούς διαδικτυακούς πόρους (π.χ., Φωτόδεντρο, ιστοσελίδες Υπουργείου Εξωτερικών, ιστοσελίδες εκπαιδευτικού περιεχομένου), με στόχο την επέκταση της μαθησιακής εμπειρίας, την ενθάρρυνση της αυτόνομης μάθησης και την ανάπτυξη ερευνητικών δεξιοτήτων από τους μαθητές. Επίσης, έχουν ενσωματωθεί, σε μορφή αρχείων pdf, τα κείμενα των συνθηκών που καθόρισαν τα σύνορα του ελληνικού κράτους. Η άμεση επαφή με αυτές τις πρωτογενείς ιστορικές πηγές, με τα αυθεντικά έγγραφα κάθε εποχής, επιτρέπει στους μαθητές να αναπτύξουν κριτική σκέψη και να αποκτήσουν μια βαθύτερη κατανόηση των γεγονότων και των αντιλήψεων της εποχής (Martin & Quan-Haase, 2013).

ΔΙΑΔΡΑΣΤΙΚΑ ΕΡΓΑΛΕΙΑ ΚΑΙ ΑΞΙΟΛΟΓΗΣΗ

Για την ενίσχυση της ενεργητικής συμμετοχής και της εμπέδωσης της γνώσης, έχουν ενσωματωθεί δύο διαδραστικά κουίζ. Αυτά επιτρέπουν την αυτοαξιολόγηση των μαθητών και τον εντοπισμό πιθανών κενών στην κατανόησή τους, με έναν τρόπο διασκεδαστικό και ελκυστικό, ενισχύοντας ταυτόχρονα τα κίνητρα και τη διατήρηση της εμπλοκής σε διαδικτυακά περιβάλλοντα μάθησης (Nuci et al., 2021; Mulyati & Iskandar, 2023). Μία άσκηση δημιουργικής γραφής, υλοποιημένη σε συνεργατικό έγγραφο (Google Doc), ενθαρρύνει τους μαθητές να επεξεργαστούν σε βάθος τις ιστορικές πληροφορίες, να τις κατανοήσουν σε ένα πιο προσωπικό επίπεδο, να ταυτιστούν με ιστορικά πρόσωπα ή καταστάσεις, και να αναπτύξουν ενσυναίσθηση και κατανόηση των προκλήσεων και των εμπειριών του παρελθόντος (Dehghanzadeh et al., 2024; Erdoğdu & Kesim, 2021). Η χρήση του συνεργατικού εγγράφου προάγει την επικοινωνία και την ομαδική εργασία.

ΣΥΜΠΛΗΡΩΜΑΤΙΚΑ ΕΡΓΑΛΕΙΑ ΑΝΑΦΟΡΑΣ

Η δομή του βιβλίου ολοκληρώνεται με δύο σημαντικά συμπληρωματικά εργαλεία. Το πρώτο είναι μια χρονογραμμή, η οποία ακολουθεί μετά την ολοκλήρωση των κεφαλαίων και οπτικοποιεί τη σειρά των γεγονότων. Λειτουργεί ως εύχρηστο εργαλείο αναφοράς για την επανάληψη των βασικών ιστορικών σταθμών, την οργάνωση των πληροφοριών και την κατανόηση της διαδοχής των ιστορικών φάσεων (Denial, 2013;· Tavares et al., 2019). Το δεύτερο είναι ένα γλωσσάρι, που περιλαμβάνει τους βασικότερους όρους που χρησιμοποιούνται στο βιβλίο, ενισχύοντας την αυτονομία των μαθητών στην κατανόηση άγνωστων όρων και τον εμπλουτισμό του λεξιλογίου τους (Karamanoli, 2022). Τέλος, προς διασφάλιση της επιστημονικής εγκυρότητας και δεοντολογίας, παρατίθεται πλήρης βιβλιογραφία και οι διαδικτυακές πηγές που χρησιμοποιήθηκαν για την ανάπτυξη του εκπαιδευτικού υλικού.

ΠΙΛΟΤΙΚΗ ΕΦΑΡΜΟΓΗ ΚΑΙ ΑΞΙΟΛΟΓΗΣΗ ΗΛΕΚΤΡΟΝΙΚΟΥ ΒΙΒΛΙΟΥ: ΑΠΟΤΕΛΕΣΜΑΤΑ ΚΑΙ ΠΡΟΟΠΤΙΚΕΣ

Η παρούσα ενότητα παρουσιάζει τα ευρήματα από την πιλοτική εφαρμογή και αξιολόγηση του ψηφιακού εκπαιδευτικού βιβλίου σε πραγματικές συνθήκες τάξης. Στόχος ήταν η συλλογή ποιοτικών δεδομένων σχετικά με την εμπειρία των μαθητών και η καταγραφή των αρχικών τους αντιδράσεων, προσφέροντας πολύτιμες πληροφορίες για τη μελλοντική βελτίωση και προσαρμογή του υλικού.

ΠΛΑΙΣΙΟ ΕΦΑΡΜΟΓΗΣ

Η πιλοτική εφαρμογή πραγματοποιήθηκε σε δύο τμήματα μαθητών της Γ' Γυμνασίου από διαφορετικά σχολικά περιβάλλοντα, εντός της διάρκειας μίας διδακτικής ώρας. Αν και ο πρωταρχικός σχεδιασμός του βιβλίου προβλέπει ατομική χρήση μέσω προσωπικού υπολογιστή ή tablet, η παρουσίαση διενεργήθηκε από τις εκπαιδευτικούς μέσω διαδραστικού πίνακα, προκειμένου να διευκολυνθεί η συλλογική αλληλεπίδραση στην τάξη. Μετά την ολοκλήρωση της

παρουσίασης και της αλληλεπίδρασης με το ψηφιακό βιβλίο, οι συμμετέχοντες μαθητές κλήθηκαν να συμπληρώσουν ένα ανώνυμο ερωτηματολόγιο γενικών εντυπώσεων, το οποίο διατέθηκε μέσω της πλατφόρμας Google Forms (διαθέσιμο στο https://docs.google.com/forms/d/1-vkitb4pOd58PuE9VJcmLdD11Mm7l23NhrfNcSQMgf8/edit), με σκοπό την ποσοτικοποίηση και ποιοτική ανάλυση των αρχικών τους αντιδράσεων. Το ερωτηματολόγιο αποτελείται από 10 ερωτήσεις κλειστού και 4 ερωτήσεις ανοιχτού τύπου.

ΑΠΟΤΕΛΕΣΜΑΤΑ

Η ανάλυση των απαντήσεων στην ερώτηση που αφορούσε τη γενική εντύπωση από το ηλεκτρονικό βιβλίο, αποκάλυψε μια σαφώς θετική τάση. Συγκεκριμένα, η συντριπτική πλειοψηφία (90%) των μαθητών εξέφρασε εντυπώσεις που κατηγοριοποιήθηκαν ως «θετικές» ή «πολύ θετικές».

Η συγκριτική ερώτηση ως προς το παραδοσιακό σχολικό βιβλίο ανέδειξε ενδιαφέροντα ποιοτικά ευρήματα. Οι μαθητές που εκδήλωσαν προτίμηση προς το ψηφιακό βιβλίο ανέφεραν ως κύριους λόγους την πολυμορφία του περιεχομένου (π.χ., εικόνες, βίντεο, κουίζ), την καλύτερη οργάνωση της ύλης και την αίσθηση της διαδραστικότητας. Ενδεικτικά σχόλια περιλαμβάνουν: «Ήταν πιο διασκεδαστικό από το κανονικό βιβλίο», «Μου άρεσαν τα κουίζ και τα βίντεο», «Είναι μέσα στην τεχνολογία». Στην περίπτωση της μοναδικής αρνητικής απάντησης, ο μαθητής ανέφερε ότι το ψηφιακό βιβλίο φάνηκε λιγότερο αναλυτικό σε σύγκριση με το παραδοσιακό.

Ως προς την ευκολία χρήσης και πλοήγησης, το σύνολο σχεδόν των ερωτηθέντων μαθητών (97,5%) χαρακτήρισε το ηλεκτρονικό βιβλίο ως «εύκολο» ή «πολύ εύκολο». Αντίστοιχα, στο ερώτημα σχετικά με τις επιλογές της αισθητικής εμφάνισης (γραφικά, εικόνες, διάταξη), οι θετικές απαντήσεις κυριάρχησαν, με ελάχιστες αρνητικές παρατηρήσεις. Σημειώθηκαν, ωστόσο, κάποιες αναφορές στο μικρό μέγεθος της γραμματοσειράς, ένα ζήτημα που πιθανώς οφείλεται στην προβολή του βιβλίου μέσω διαδραστικού πίνακα και όχι σε ατομική συσκευή.

Η ανταπόκριση ως προς το ενδιαφέρον του περιεχομένου ήταν σε μεγάλο βαθμό θετική (95%). Επιπλέον, η χρήση κατανοητής γλώσσας στο ηλεκτρονικό βιβλίο, όπως προέκυψε από τις απαντήσεις, διευκόλυνε σημαντικά την πρόσβαση των μαθητών στην παρεχόμενη πληροφορία.

Η λειτουργικότητα των διαδραστικών στοιχείων επιβεβαιώθηκε από τη συντριπτική πλειοψηφία των μαθητών που αλληλεπίδρασαν με αυτά. Η επιθυμία για περισσότερα διαδραστικά στοιχεία (όπως κουίζ, παιχνίδια, αλληλεπιδραστικοί χάρτες κ.ά.), η οποία εκφράστηκε, υπογραμμίζει τη σημασία που αποδίδουν οι μαθητές στην ενεργητική μάθηση και την αλληλεπίδραση με το ψηφιακό υλικό.

Ένα ιδιαίτερα σημαντικό εύρημα ήταν ότι ένα μεγάλο ποσοστό μαθητών (68%) δήλωσε ότι το ψηφιακό βιβλίο αύξησε το ενδιαφέρον τους για την ιστορία. Το αποτέλεσμα αυτό αναδεικνύει την δυναμική των ψηφιακών μέσων να αναζωογονήσουν το ενδιαφέρον των μαθητών για το συγκεκριμένο γνωστικό αντικείμενο (Hangen, 2015).

Οι απαντήσεις στις ανοιχτές ερωτήσεις, που αφορούσαν τα σημεία που άρεσαν περισσότερο στους μαθητές, ανέδειξαν κυρίως την αξία των πολυμεσικών στοιχείων (εικόνες, βίντεο), τη διαδραστικότητα (κουίζ) και τη φωνητική αφήγηση. Οι προτάσεις για βελτίωση επικεντρώθηκαν στην προσθήκη περισσότερων διαδραστικών στοιχείων (όπως κουίζ, παιχνίδια, αλληλεπιδραστικοί χάρτες) και στην ενσωμάτωση επιπλέον οπτικοακουστικού υλικού.

ΠΡΟΟΠΤΙΚΕΣ

Τα αποτελέσματα της πιλοτικής εφαρμογής του ηλεκτρονικού βιβλίου στην τάξη είναι ενθαρρυντικά. Οι αρχικές εντυπώσεις των μαθητών ήταν σε μεγάλο βαθμό θετικές, με το ηλεκτρονικό βιβλίο να θεωρείται ενδιαφέρον, εύχρηστο και ικανό να κάνει την ιστορία πιο ελκυστική. Η αξιοποίηση πολυμεσικών στοιχείων και η επιθυμία για περισσότερη διαδραστικότητα αναδεικνύονται ως σημαντικά πλεονεκτήματα του. Παρά την ομαδική παρουσίαση, οι μαθητές εξέφρασαν θετικές απόψεις για την εμφάνιση, την πλοήγηση και την επιλογή του υλικού. Οι προτάσεις τους για βελτίωση θα ληφθούν υπόψη για την περαιτέρω ανάπτυξη και βελτίωση του ηλεκτρονικού βιβλίου, ειδικά όσον αφορά την ενίσχυση της διαδραστικότητας και την προετοιμασία για την ατομική χρήση από τους μαθητές.

ΣΥΜΠΕΡΑΣΜΑΤΑ

Συμπερασματικά, η δημιουργία και η πιλοτική εφαρμογή του συγκεκριμένου ηλεκτρονικού βιβλίου στην τάξη, σε συνδυασμό με τη μελέτη της σχετικής βιβλιογραφίας, αναδεικνύουν με σαφήνεια τη δυναμική και τα οφέλη της ενσωμάτωσης ηλεκτρονικών βιβλίων στη διδασκαλία της ιστορίας. Η χρήση του e-book μπορεί να λειτουργήσει ως μια

καινοτόμος προσέγγιση στην ιστορική διδασκαλία αλλά και ως εργαλείο που ενισχύει την ενεργό συμμετοχή, την ενσυναίσθηση και την ερευνητική σκέψη των μαθητών.

Η θετική αποδοχή του ψηφιακού υλικού από τους μαθητές επιβεβαιώνει ότι η αξιοποίηση σύγχρονων τεχνολογικών εργαλείων μπορεί να αναζωογονήσει το ενδιαφέρον για την ιστορία και να μετατρέψει ένα απαιτητικό περιεχόμενο σε μια βιωματική μαθησιακή εμπειρία. Η δυνατότητα οπτικοποίησης ιστορικών φαινομένων, η διασύνδεση των γεγονότων με γεωγραφικές και πολιτισμικές συντεταγμένες, η φωνητική αφήγηση και η διαδραστικότητα διαμορφώνουν ένα ελκυστικό και περιεκτικό περιβάλλον μάθησης, προσβάσιμο σε μαθητές με διαφορετικά μαθησιακά προφίλ.

Επιπλέον, η μεθοδολογική προσέγγιση του ηλεκτρονικού βιβλίου - με χρονολογική και θεματική διάρθρωση, συμπληρωματικά εργαλεία (χρονογραμμή, γλωσσάρι), αξιολόγηση μέσω κουίζ και δημιουργική γραφή - επιτρέπει την ενεργοποίηση πολλαπλών μορφών νοημοσύνης και ενισχύει τη διαφοροποίηση της διδασκαλίας. Ιδιαίτερη αξία αποκτά η δυνατότητα αυτενέργειας και πλοήγησης του μαθητή στο περιεχόμενο, στοιχείο που ευνοεί την αυτορρυθμιζόμενη μάθηση. Αυτή η δυνατότητα προσαρμογής στις ανάγκες του μαθήματος και του μαθητή, καθώς και η ενίσχυση του ψηφιακού γραμματισμού, αναδεικνύουν τα ηλεκτρονικά βιβλία ως ένα πολύτιμο εργαλείο για το σύγχρονο εκπαιδευτικό περιβάλλον.

Η παρούσα πρόταση μπορεί να αποτελέσει αφετηρία για την ευρύτερη αξιοποίηση αντίστοιχων ψηφιακών εγχειριδίων, με στόχο τη δημιουργία ενός πλουραλιστικού, πολυτροπικού και παιδαγωγικά ευαισθητοποιημένου εκπαιδευτικού περιβάλλοντος. Η περαιτέρω διερεύνηση της αποτελεσματικότητας των ηλεκτρονικών βιβλίων σε διαφορετικά σχολικά συμφραζόμενα και η αξιολόγηση της μακροπρόθεσμης επίδρασής τους στη μαθησιακή πορεία των μαθητών αποτελούν σημαντικά πεδία μελλοντικής έρευνας.

ΠΕΡΙΛΗΨΗ

Η εκπαίδευση και ειδικότερα το μάθημα της Γεωγραφίας, χρειάζεται καινοτόμα προγράμματα και πρωτότυπες ιδέες. Το Νέο Πρόγραμμα Σπουδών για την Γεωγραφία στο Δημοτικό Σχολείο (2021) αναφέρει την εισαγωγή των Γεωγραφικών Πληροφοριακών Συστημάτων – ΓΣΠ (Geographic Information System –GIS) στην διδακτική πράξη, χωρίς, ωστόσο, να δίνονται στους εκπαιδευτικούς συγκεκριμένες οδηγίες για την επίτευξη αυτού του στόχου. Θέλοντας να γίνει πιο διαδραστικό το μάθημα της Γεωγραφίας, εντάξαμε τα ΓΣΠ στο μάθημα, δίνοντας στους μαθητές τη δυνατότητα να εξερευνήσουν τον κόσμο με αυτά.

Η καινοτόμος δράση αυτή, θα πραγματοποιηθεί σε 22 μαθητές/τριες της Στ΄ τάξης του 3ου Πειραματικού Δημοτικού σχολείου Ευόσμου, από τον Φεβρουάριο ως τον Ιούνιο του 2025. Ο χρόνος υλοποίησης της δράσης πραγματοποιείται εντός του σχολικού ωραρίου και συμπεριλαμβάνεται στις δράσεις των Β΄ και Γ΄ σχολικών τριμήνων. Πραγματοποιείται σε συνεργασία μεταξύ της δασκάλας του τμήματος και της εκπαιδευτικού πληροφορικής με ειδίκευση στα ΓΣΠ.

Τα G.I.S. (Geographic Information Systems) συνδυάζουν τις βάσεις δεδομένων και τα σχεδιαστικά προγράμματα, με σκοπό να επιτρέπουν την επεξεργασία της χωρικής και περιγραφικής πληροφορίας, με τελικό αποτέλεσμα τη δημιουργία δυναμικών χαρτών. Είναι σκόπιμο να αναφερθεί ότι τα GIS αποτελούν δυναμικά συστήματα πληροφοριών, τα οποία με την τεχνολογία της Πληροφορικής και τις ειδικές μαθηματικές μεθόδους διαχειρίζονται και αξιοποιούν δεδομένα από τις Γεωεπιστήμες για την παραγωγή μεταπληροφορίας (μεταδεδομένα - metadata), δηλαδή πληροφορίας υψηλότερου επιπέδου (Bagkou, 2013). Γενικά μπορούμε να πούμε ότι είναι ένα ολοκληρωμένο, σύγχρονο αλλά και πολυδιάστατο «εργαλείο» που προέρχεται και συσχετίζεται άμεσα με το χώρο της πληροφορικής (Konstantinidis, 2002). Παρέχουν την δυνατότητα συλλογής, διαχείρισης, αποθήκευσης, επεξεργασίας, ανάλυσης και οπτικοποίησης, σε ψηφιακό περιβάλλον, των δεδομένων που σχετίζονται με τον χώρο.

Σκοπός της παρούσας εργασίας είναι η παρουσίαση παραδειγμάτων δραστηριοτήτων της συγκεκριμένης καινοτόμας πρακτικής στη διδασκαλία της Γεωγραφίας. Συγκεκριμένα, οι στόχοι του καινοτόμου προγράμματος είναι α) η ενίσχυση της χωρικής αντίληψης των μαθητών/τριών μέσω της εφαρμογής των Γεωγραφικών Πληροφοριακών Συστημάτων (GIS), β) η καλλιέργεια δεξιοτήτων ανάλυσης δεδομένων και επίλυσης προβλημάτων, γ) η ανάπτυξη της συνεργασίας και της ομαδικής εργασίας μέσα από τη διερεύνηση γεωγραφικών θεμάτων και δ) η σύνδεση της γεωγραφίας με την καθημερινή ζωή και τις σύγχρονες ανάγκες.

Οι μαθητές μέσω των δραστηριοτήτων που πραγματοποιούνται (συλλογή δεδομένων, δημιουργία γραμμικών – σημειακών – πολυγωνικών αρχείων, εξαγωγή τελικών χαρτών), έρχονται σε επαφή με βασικές λειτουργίες χαρτογράφησης, εξετάζουν γεωγραφικά δεδομένα και δημιουργούν διαδραστικούς χάρτες στους οποίους απεικονίζουν τις πληροφορίες που συλλέγουν.

Τα προσδοκώμενα μαθησιακά αποτελέσματα είναι:
1. Ανάπτυξη δεξιοτήτων στη χρήση τεχνολογιών και γεωγραφικών δεδομένων.
2. Καλλιέργεια κριτικής σκέψης μέσα από την ανάλυση και τη σύνθεση πληροφοριών.
3. Ενίσχυση της χωρικής αντίληψης και της κατανόησης του φυσικού και ανθρωπογενούς περιβάλλοντος.
4. Ανάπτυξη βασικών δεξιοτήτων στα ψηφιακά σχεδιαστικά προγράμματα.

Τα θέματα που αναπτύσσονται στο πλαίσιο της συγκεκριμένης παρέμβασης περιλαμβάνουν α) τα φυσικά χαρακτηριστικά της Ελλάδας (βουνά, ποτάμια, θάλασσες), β) τις ανθρώπινες δραστηριότητες και πληθυσμιακές κατανομές και γ) τα περιβαλλοντικά ζητήματα (π.χ., πράσινοι χώροι, ρύπανση).Τέλος, οι μαθητές θα δουλεύουν σε ομάδες με καθορισμένους ρόλους.

Για την επίτευξη των στόχων του προγράμματος οι μαθητές χρησιμοποιούν το λογισμικό ArcGIS Online, σχολικά εγχειρίδια γεωγραφίας., διαδικτυακούς χάρτες και γεωγραφικές βάσεις δεδομένων καθώς και φωτογραφικό υλικό που έχουν συλλέξει οι ίδιοι οι μαθητές. Το λογισμικό ArcGIS Online επιλέχθηκε γιατί θεωρήθηκε από τους εκπαιδευτικούς ότι είναι το πιο αξιόπιστο σχεδιαστικό πρόγραμμα και μπορεί να χρησιμοποιηθεί δωρεάν για ένα συγκεκριμένο χρονικό διάστημα.

Η συγκεκριμένη δράση δεν έχει εφαρμοστεί στο παρελθόν στη σχολική μονάδα μας. Ωστόσο, βασίζεται σε διεθνώς αναγνωρισμένες πρακτικές για τη διδασκαλία της γεωγραφίας μέσω σύγχρονων τεχνολογικών εργαλείων, όπως τα Γεωγραφικά Πληροφοριακά Συστήματα (GIS). Η δράση αποτελεί πρωτοβουλία που εισάγει τους μαθητές στη χρήση καινοτόμων μεθόδων, προσαρμοσμένων στις ανάγκες της εκπαιδευτικής κοινότητας για την ανάπτυξη δεξιοτήτων.

Λέξεις – κλειδιά: Γεωγραφικά Πληροφοριακά Συστήματα (GIS), Διαδραστικοί χάρτες, καινοτόμες δράσεις, ArcGIS, Διδασκαλία Γεωγραφίας, Δημοτικό Σχολείο

ΕΙΣΑΓΩΓΗ

Η γεωγραφία αποτελεί έναν δυναμικό επιστημονικό κλάδο που μελετά τον χώρο, το περιβάλλον και τις αλληλεπιδράσεις τους με τις ανθρώπινες δραστηριότητες. Στη σύγχρονη εποχή, η αξιοποίηση τεχνολογικών εργαλείων, όπως τα Γεωγραφικά Πληροφοριακά Συστήματα (Geographic Information Systems - GIS), έχει αλλάξει ριζικά τον τρόπο διδασκαλίας και κατανόησης της γεωγραφίας. Τα GIS επιτρέπουν την ανάλυση, οπτικοποίηση και διαχείριση γεωχωρικών δεδομένων, προσφέροντας μια πιο διαδραστική και εμπεριστατωμένη προσέγγιση στη μάθηση.

Η ενσωμάτωση των GIS στην εκπαιδευτική διαδικασία συμβάλλει στην ανάπτυξη κριτικής σκέψης, χωρικής επίγνωσης και αναλυτικών δεξιοτήτων στους μαθητές. Μέσω της χρήσης χαρτογραφικών εργαλείων και βάσεων δεδομένων, οι μαθητές μπορούν να διερευνήσουν πραγματικά προβλήματα, να αναπτύξουν δεξιότητες επίλυσης προβλημάτων και να κατανοήσουν καλύτερα τη σχέση μεταξύ φυσικού και ανθρωπογενούς περιβάλλοντος.

Το παρόν άρθρο εξετάζει τη σημασία των GIS στην εκπαιδευτική διαδικασία συζητά τις παιδαγωγικές προεκτάσεις που προκύπτουν από την ενσωμάτωσή τους στη σχολική τάξη.

ΓΕΩΓΡΑΦΙΚΑ ΠΛΗΡΟΦΟΡΙΑΚΑ ΣΥΣΤΗΜΑΤΑ (GIS)

Τα Γεωγραφικά Πληροφοριακά Συστήματα (Geographic Information Systems - GIS) αποτελούν τεχνολογικές πλατφόρμες που επιτρέπουν τη συλλογή, αποθήκευση, ανάλυση και οπτικοποίηση γεωγραφικών δεδομένων. Συνδυάζουν τη γεωγραφία με την επιστήμη της πληροφορικής, επιτρέποντας στους χρήστες να κατανοούν τη χωρική διάσταση φαινομένων και να αναλύουν γεωγραφικά μοτίβα και σχέσεις (DeMers 2008). Τα GIS χρησιμοποιούνται σε διάφορους τομείς, όπως η περιβαλλοντική διαχείριση, η πολεοδομία, η γεωλογία και η εκπαίδευση. Η δυνατότητα οπτικοποίησης και αλληλεπίδρασης με δεδομένα σε χάρτες καθιστά τα GIS ένα πολύτιμο εργαλείο για την κατανόηση και τη λήψη αποφάσεων σε πραγματικό χρόνο (Konstantinidi, 2002).

Η βασική δομή των GIS περιλαμβάνει πέντε κύρια στοιχεία: (1) Δεδομένα, που περιλαμβάνουν χωρικές και περιγραφικές πληροφορίες αποθηκευμένες σε βάσεις δεδομένων, (2) Λογισμικό, όπως το ArcGIS και το QGIS, που επιτρέπει την επεξεργασία και ανάλυση των δεδομένων, (3) Χαρτογραφικές αναπαραστάσεις, που προσφέρουν οπτικοποίηση των δεδομένων σε ψηφιακούς χάρτες, (4) Ανάλυση δεδομένων, μέσω μαθηματικών και στατιστικών εργαλείων για τη μελέτη γεωγραφικών φαινομένων, και (5) Χρήστες, δηλαδή επιστήμονες, ερευνητές και φορείς που αξιοποιούν τα GIS για διάφορες εφαρμογές. Η δομή αυτή επιτρέπει την προσαρμογή των GIS σε διαφορετικά γνωστικά αντικείμενα και ανάγκες (Bagkou & Stavrakidou, 2010).

Η ενσωμάτωση των GIS στην εκπαίδευση έχει σημαντικά οφέλη, καθώς ενισχύει την ενεργή μάθηση και την ανάπτυξη κριτικής σκέψης. Οι μαθητές έχουν τη δυνατότητα να αναλύουν πραγματικά δεδομένα, να αναπτύσσουν δεξιότητες επίλυσης προβλημάτων και να εξοικειώνονται με τη χωρική σκέψη. Επιπλέον, η διαδραστική φύση των GIS ενισχύει τη συμμετοχή των μαθητών, καθιστώντας τη μαθησιακή διαδικασία πιο ενδιαφέρουσα και αποτελεσματική. Η εφαρμογή των GIS στη διδασκαλία της γεωγραφίας επιτρέπει την κατανόηση πολύπλοκων γεωγραφικών θεμάτων και τη σύνδεσή τους με την καθημερινή ζωή, προετοιμάζοντας τους μαθητές για έναν κόσμο όπου η ανάλυση δεδομένων και η γεωχωρική πληροφορία αποκτούν ολοένα και μεγαλύτερη σημασία.

ΓΕΩΓΡΑΦΙΚΑ ΠΛΗΡΟΦΟΡΙΑΚΑ ΣΥΣΤΗΜΑΤΑ (GIS): ΟΡΙΣΜΟΣ ΚΑΙ ΑΝΑΛΥΣΗ

Τα Γεωγραφικά Συστήματα Πληροφοριών (GIS - Geographic Information Systems) είναι ολοκληρωμένα πληροφοριακά συστήματα σχεδιασμένα για τη συλλογή, αποθήκευση, διαχείριση, ανάλυση και παρουσίαση γεωχωρικών δεδομένων (Longley 2015). Τα GIS επιτρέπουν τη διασύνδεση χωρικών και περιγραφικών πληροφοριών, διευκολύνοντας την οπτικοποίηση δεδομένων σε χαρτογραφικές αναπαραστάσεις και την εξαγωγή συμπερασμάτων για γεωγραφικά φαινόμενα (Konstantinidis, 2002; Bagkou, 2013).

ΔΟΜΗ ΚΑΙ ΣΤΟΙΧΕΙΑ ΤΩΝ GIS

Ένα σύστημα GIS αποτελείται από τέσσερα βασικά συστατικά (Bagkou, 2013):

1. **Δεδομένα GIS**: Τα GIS λειτουργούν με δύο βασικούς τύπους δεδομένων:
    - **Διανυσματικά δεδομένα (Vector data)**: Αντιπροσωπεύονται μέσω σημείων, γραμμών και πολυγώνων και χρησιμοποιούνται για την αποτύπωση χωρικών στοιχείων όπως δρόμοι, κτίρια και όρια περιοχών.
    - **Δεδομένα πλέγματος (Raster data)**: Χρησιμοποιούνται για τη χαρτογράφηση συνεχών φαινομένων, όπως η θερμοκρασία, η βλάστηση και η τοπογραφία.

2. **Λογισμικό GIS**: Τα πιο διαδεδομένα λογισμικά GIS περιλαμβάνουν το **ArcGIS**, το **QGIS**, το **GRASS GIS** και το **Google Earth Engine**, τα οποία επιτρέπουν την ανάλυση και χαρτογράφηση δεδομένων.
3. **Υλικό GIS**: Περιλαμβάνει υπολογιστές υψηλών προδιαγραφών, αποθηκευτικά μέσα, δέκτες GPS και σαρωτές χαρτών που επιτρέπουν την επεξεργασία και ανάλυση γεωχωρικών δεδομένων.
4. **Χρήστες και Μέθοδοι**: Οι χρήστες GIS περιλαμβάνουν επιστήμονες, αναλυτές δεδομένων, πολεοδόμους, περιβαλλοντολόγους και κυβερνητικούς φορείς. Οι μέθοδοι που εφαρμόζονται περιλαμβάνουν γεωστατιστική ανάλυση, χωρικά μοντέλα πρόβλεψης και εξόρυξη δεδομένων.

ΕΦΑΡΜΟΓΕΣ ΤΩΝ GIS

Τα GIS έχουν ευρεία εφαρμογή σε πολλούς τομείς (Bagkou, 2013):

- ✓ **Περιβαλλοντική διαχείριση:** Χρησιμοποιούνται για τη χαρτογράφηση προστατευόμενων περιοχών και τη μελέτη της κλιματικής αλλαγής.
- ✓ **Πολεοδομία και Χωροταξία:** Εφαρμόζονται στη σχεδίαση υποδομών και στην αστική ανάπτυξη.
- ✓ **Γεωργία και Δασοκομία:** Επιτρέπουν την ανάλυση χρήσης γης και την παρακολούθηση καλλιεργειών.
- ✓ **Μεταφορές και Δίκτυα:** Χρησιμοποιούνται για τη βελτιστοποίηση διαδρομών και τη διαχείριση κυκλοφορίας.
- ✓ **Διαχείριση Καταστροφών:** Βοηθούν στην πρόβλεψη και ανταπόκριση σε φυσικές καταστροφές, όπως πυρκαγιές και πλημμύρες.
- ✓ **Δημόσιας υγείας:** Παίζουν κρίσιμο ρόλο στη χαρτογράφηση της εξάπλωσης ασθενειών και στη διαχείριση υγειονομικών κρίσεων. Κατά την πανδημία COVID-19, χρησιμοποιήθηκαν ευρέως για την παρακολούθηση της διασποράς του ιού, τη διαχείριση των εμβολιασμών και τη λήψη στρατηγικών αποφάσεων από τις υγειονομικές αρχές. Η ικανότητα των GIS να συνδυάζουν και να αναλύουν δεδομένα από πολλαπλές πηγές τα καθιστά πολύτιμα εργαλεία για την προστασία της δημόσιας υγείας και την προώθηση της βιώσιμης ανάπτυξης.

ΕΦΑΡΜΟΓΕΣ ΤΩΝ GIS ΣΤΗΝ ΕΚΠΑΙΔΕΥΣΗ ΚΑΙ ΤΗ ΔΙΔΑΣΚΑΛΙΑ ΤΗΣ ΓΕΩΓΡΑΦΙΑΣ

Η είσοδος των Γεωγραφικών Συστημάτων Πληροφοριών (Geographic Information Systems- GIS) στη χαρτογραφία οδήγησε ήδη από τα πρώτα χρόνια εφαρμογής (δεκαετία του 60) σε ραγδαία ανάπτυξη του κλάδου της γεωγραφίας, λόγω της εύκολης και άμεσης δημιουργίας νέων χαρτών ή και την αναθεώρηση των υπαρχόντων (Lamprinos N. , 2009).

Η ενσωμάτωση των Γεωγραφικών Πληροφοριακών Συστημάτων (GIS) στη διδασκαλία της γεωγραφίας ενισχύει τη χωρική αντίληψη των μαθητών και τους βοηθά να αναπτύξουν δεξιότητες ανάλυσης δεδομένων και επίλυσης προβλημάτων. Τα GIS επιτρέπουν τη χαρτογράφηση και την οπτικοποίηση γεωγραφικών φαινομένων σε πραγματικό χρόνο, προσφέροντας μια διαδραστική εμπειρία μάθησης. Μέσω αυτών των τεχνολογιών, οι μαθητές έχουν τη δυνατότητα να ερευνούν γεωγραφικές σχέσεις, να αναλύουν χωρικά μοτίβα και να εξάγουν συμπεράσματα από δεδομένα του πραγματικού κόσμου. Αυτή η προσέγγιση είναι ιδιαίτερα χρήσιμη για τη μελέτη σύνθετων γεωγραφικών θεμάτων, όπως η κλιματική αλλαγή, η κατανομή του πληθυσμού και η αστικοποίηση, επιτρέποντας στους μαθητές να δουν την εφαρμογή της γεωγραφίας πέρα από τα θεωρητικά πλαίσια.

Μια από τις βασικές εφαρμογές των GIS στην εκπαίδευση αφορά τη χρήση διαδραστικών χαρτών, οι οποίοι επιτρέπουν στους μαθητές να εξερευνούν και να αναλύουν γεωγραφικά φαινόμενα με έναν τρόπο που ξεπερνά τις παραδοσιακές διδακτικές μεθόδους. Για παράδειγμα, οι μαθητές μπορούν να δημιουργήσουν θεματικούς χάρτες που απεικονίζουν κοινωνικοοικονομικά δεδομένα, να συγκρίνουν πληθυσμιακές κατανομές ή να αναλύσουν την επίδραση περιβαλλοντικών παραγόντων σε διάφορες περιοχές. Επίσης, τα GIS χρησιμοποιούνται στην παρακολούθηση φυσικών καταστροφών, επιτρέποντας στους μαθητές να μελετήσουν τις επιπτώσεις σεισμών, πλημμυρών και πυρκαγιών, καθώς και να εξετάσουν πιθανές λύσεις για τη διαχείριση των κινδύνων. Μέσα από αυτή τη διαδικασία, η μάθηση γίνεται πιο βιωματική, καθώς οι μαθητές συμμετέχουν ενεργά στην ανάλυση πραγματικών δεδομένων.

Επιπλέον, η χρήση των GIS στην εκπαίδευση προωθεί τη συνεργατική μάθηση και την ανάπτυξη κριτικής σκέψης. Οι μαθητές μπορούν να εργαστούν σε ομάδες για να συλλέξουν, να επεξεργαστούν και να αναλύσουν δεδομένα, δημιουργώντας γεωγραφικές αναπαραστάσεις και παρουσιάζοντας τα ευρήματά τους. Αυτή η προσέγγιση καλλιεργεί δεξιότητες που είναι απαραίτητες στον σύγχρονο κόσμο, όπως η διαχείριση δεδομένων, η ερμηνεία χαρτών και η λήψη αποφάσεων με βάση αντικειμενικά κριτήρια. Καθώς η τεχνολογία GIS εξελίσσεται και ενσωματώνεται όλο και περισσότερο στην εκπαίδευση, οι μαθητές αποκτούν γνώσεις και δεξιότητες που μπορούν να αξιοποιήσουν τόσο στην ακαδημαϊκή τους πορεία όσο και σε επαγγελματικούς τομείς που σχετίζονται με τη γεωπληροφορική, την περιβαλλοντική επιστήμη και τον αστικό σχεδιασμό.

Αν και η βιβλιογραφική έρευνα αποδεικνύει πως τα GIS είναι ένα εκπαιδευτικό τεχνολογικό εργαλείο που έχει πολλαπλά οφέλη για τους εκπαιδευόμενους, η αξιοποίησή του στην σχολική εκπαίδευση υστερεί (Sofias, 2020). Σε μια προσπάθεια αναμόρφωσης του Προγράμματος Σπουδών για την Γεωγραφία, δημοσιεύτηκε στο ΦΕΚ με Αρ. Φύλλου 2259, στο οποίο γίνεται αναφορά στην εισαγωγή των Διαδικτυακών Υπηρεσιών Χαρτογράφησης στην εκπαίδευση.

ΚΑΙΝΟΤΟΜΑ ΕΚΠΑΙΔΕΥΤΙΚΑ ΠΡΟΓΡΑΜΜΑΤΑ ΚΑΙ ΠΑΡΑΔΕΙΓΜΑΤΑ ΧΡΗΣΗΣ ΤΩΝ GIS

Η ενσωμάτωση των Γεωγραφικών Πληροφοριακών Συστημάτων (GIS) στην εκπαίδευση έχει ανοίξει νέους δρόμους στη διδασκαλία της γεωγραφίας, επιτρέποντας στους μαθητές να αλληλεπιδρούν με γεωχωρικά δεδομένα και να αναπτύσσουν δεξιότητες ανάλυσης και κριτικής σκέψης. Ένα καινοτόμο εκπαιδευτικό πρόγραμμα που εφαρμόστηκε στο 3ο Πειραματικό Δημοτικό Σχολείο Ευόσμου περιλαμβάνει τη χρήση του ArcGISOnline για τη δημιουργία χαρτών και την ανάλυση γεωγραφικών δεδομένων από μαθητές της Στ’ τάξης. Οι μαθητές εργάζονται σε ομάδες με καθορισμένους ρόλους, συλλέγουν δεδομένα από τοπικές και διαδικτυακές πηγές και δημιουργούν θεματικούς χάρτες σχετικούς με τη σχολική ύλη, ενισχύοντας έτσι τη χωρική αντίληψη και την ομαδοσυνεργατική μάθηση.

Το πρόγραμμα αυτό βασίζεται στη βιωματική μάθηση, όπου οι μαθητές δεν είναι απλοί αποδέκτες γνώσεων, αλλά ενεργοί ερευνητές που διερευνούν πραγματικά προβλήματα. Για παράδειγμα, ένα από τα έργα τους αφορούσε την ανάλυση της ατμοσφαιρικής ρύπανσης στην περιοχή τους, χρησιμοποιώντας δεδομένα από αισθητήρες αέρα και χαρτογραφώντας τις διακυμάνσεις στη ρύπανση κατά τη διάρκεια της ημέρας. Άλλο παράδειγμα εφαρμογής αφορά τη μελέτη της αλλαγής της αστικής ανάπτυξης, όπου οι μαθητές συνέκριναν δορυφορικές εικόνες διαφορετικών ετών για να κατανοήσουν την επέκταση της πόλης και τις επιπτώσεις στο φυσικό περιβάλλον. Μέσω αυτών των δραστηριοτήτων, το GIS βοηθά τους μαθητές να αποκτήσουν μια βαθύτερη κατανόηση των γεωγραφικών και περιβαλλοντικών ζητημάτων.

Αντίστοιχα εκπαιδευτικά προγράμματα έχουν υλοποιηθεί και σε άλλες χώρες, όπου τα GIS χρησιμοποιούνται για την ανάλυση πληθυσμιακών δεδομένων, την προσομοίωση φυσικών καταστροφών και τη διερεύνηση ιστορικών γεγονότων μέσω χαρτογραφικών αναπαραστάσεων. Η χρήση των GIS στην εκπαίδευση δεν περιορίζεται μόνο στη γεωγραφία αλλά μπορεί να επεκταθεί και σε άλλα γνωστικά αντικείμενα, όπως οι φυσικές επιστήμες, η κοινωνιολογία και η οικονομία. Καθώς η τεχνολογία εξελίσσεται, τα GIS αναμένεται να διαδραματίσουν ολοένα και σημαντικότερο ρόλο στην εκπαίδευση, προσφέροντας νέα εργαλεία και προσεγγίσεις για τη μάθηση και την έρευνα.

ΒΑΣΙΚΕΣ ΔΡΑΣΤΗΡΙΟΤΗΤΕΣ ΚΑΙ ΣΤΟΧΟΙ

Στο πλαίσιο σχεδιασμού και υλοποίησης της δράσης μας σχεδιάστηκε και υλοποιήθηκε πλήθος δραστηριοτήτων με σκοπό την επίτευξη των στόχων που είχαμε θέσει. Αρχικά, έγινε εισαγωγή των μαθητών/τριών στις βασικές λειτουργίες του προγράμματος μέσα από απλές, ανεξάφρτητες δραστηριότητες που εξοικείωσαν τους μαθητές/τριες στα διάφορα εργαλεία του ArcGIS Online. Οι δραστηριότητες αυτές πήραν περισσότερο χρόνο από όσο αρχικά αναμενόταν, όμως αποδείχθηκαν εξαιρετικά σημαντικές για την μετέπειτα πορεία του προγράμματος.

Οι δραστηριότητες περιλαμβάνουν:
- ✓ **Συλλογή δεδομένων**
- ✓ **Δημιουργία σημειακών, γραμμικών και πολυγωνικών αρχείων**
- ✓ **Χαρτογράφηση φυσικών χαρακτηριστικών (βουνά, ποτάμια, θάλασσες)**
- ✓ **Ανάλυση πληθυσμιακών κατανομών και ανθρώπινων δραστηριοτήτων**
- ✓ **Ανάπτυξη χαρτών** περιβαλλοντικών ζητημάτων (ρύπανση, πράσινοι χώροι)

Οι κύριοι στόχοι του προγράμματος είναι:
1. Η ενίσχυση της χωρικής αντίληψης μέσω GIS.
2. Η καλλιέργεια δεξιοτήτων ανάλυσης δεδομένων και επίλυσης προβλημάτων.
3. Η σύνδεση της Γεωγραφίας με την καθημερινή ζωή.
4. Η ανάπτυξη 21ου αιώνα δεξιοτήτων μέσω της χρήσης καινοτόμων τεχνολογικών εργαλείων.

ΜΕΘΟΔΟΛΟΓΙΑ

ΧΡΟΝΟΔΙΑΓΡΑΜΜΑ

Η δράση του προγράμματος GIS στο σχολείο θα υλοποιηθεί κατά την περίοδο από τον Φεβρουάριο έως τον Ιούνιο του 2025, εντός του σχολικού ωραρίου. Η δράση περιλαμβάνει ομαδοσυνεργατική προσέγγιση, όπου οι μαθητές εργάζονται σε ομάδες πάνω σε πραγματικά δεδομένα και καλούνται να αναπτύξουν διαδραστικούς χάρτες. Σκοπός της

διαδικασίας είναι να ενισχυθεί η κριτική σκέψη των μαθητών και να αναπτύξουν ικανότητες επίλυσης προβλημάτων μέσω της ανάλυσης γεωγραφικών δεδομένων.

ΜΕΘΟΔΟΛΟΓΙΑ ΥΛΟΠΟΙΗΣΗΣ ΤΟΥ ΠΡΟΓΡΑΜΜΑΤΟΣ GIS ΣΤΟ ΣΧΟΛΕΙΟ

Η υλοποίηση του προγράμματος γίνεται σε συνεργασία μεταξύ των εκπαιδευτικών πληροφορικής και γεωγραφίας. Οι μαθητές θα εισαχθούν στις βασικές λειτουργίες των Συστημάτων Γεωγραφικών Πληροφοριών (GIS), μαθαίνοντας πώς να δημιουργούν και να αναλύουν γεωχωρικά δεδομένα. Κατά τη διάρκεια της δράσης, οι μαθητές θα συμμετέχουν σε διάφορες δραστηριότητες που ενισχύουν τη βιωματική μάθηση και προάγουν την κριτική σκέψη. Με αυτόν τον τρόπο, οι μαθητές θα αποκτήσουν πρακτικές γνώσεις για τη χρήση GIS και θα αναπτύξουν δεξιότητες που συνδέονται άμεσα με την επίλυση πραγματικών προβλημάτων μέσω της γεωγραφικής ανάλυσης.

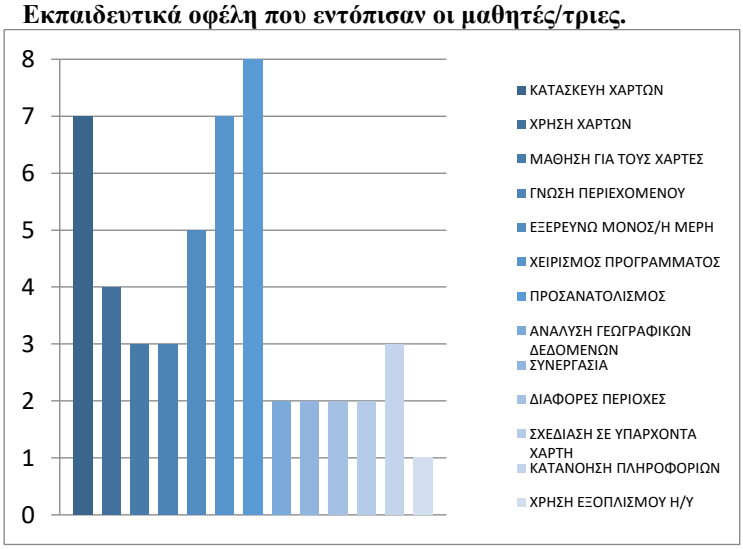
ΑΞΙΟΛΟΓΗΣΗ ΚΑΙ ΑΠΟΤΙΜΗΣΗ ΤΟΥ ΠΡΟΓΡΑΜΜΑΤΟΣ

Η καινοτόμος δράση υλοποιήθηκε με επιτυχία στο Στ2 τμήμα του σχολείου μας, με στόχο την εξοικείωση των μαθητών με τα Γεωγραφικά Πληροφοριακά Συστήματα (GIS) και την καλλιέργεια δεξιοτήτων, όπως η ανάλυση δεδομένων, η επίλυση προβλημάτων, η συνεργασία και η ενεργητική μάθηση.

Οι μαθητές εργάστηκαν ομαδοσυνεργατικά, χρησιμοποίησαν το λογισμικό ArcGIS, δημιούργησαν διαδραστικούς χάρτες και συνδύασαν την επιστήμη της γεωγραφίας με την τεχνολογία, την περιβαλλοντική εκπαίδευση και τα μαθηματικά. Το πρόγραμμα εστίασε στην εξερεύνηση φυσικών χαρακτηριστικών, ανθρωπογενών δραστηριοτήτων και περιβαλλοντικών ζητημάτων, με εφαρμογή σε πραγματικά δεδομένα.

Κατά το Β΄ Τρίμηνο πραγματοποιήθηκε η παρουσίαση της δράσης στους μαθητές, η εκπαίδευσή τους στο GIS, η ομαδική διερεύνηση θεμάτων και η συλλογή δεδομένων, καθώς και η δημιουργία χαρτών με τη βοήθεια του ArcGIS. Κατά το Γ΄ Τρίμηνο, οι μαθητές παρουσίασαν τις εργασίες τους, συνέθεσαν τον τελικό διαδραστικό χάρτη και συμμετείχαν σε συζήτηση, αξιολόγηση και αποτίμηση του προγράμματος.

Η δράση κρίνεται άκρως επιτυχημένη. Οι μαθητές απέκτησαν βασικές δεξιότητες GIS και χωρικής ανάλυσης, ανέπτυξαν κριτική σκέψη και ικανότητα επίλυσης προβλημάτων, συνεργάστηκαν αποτελεσματικά και παρουσίασαν αξιόλογες εργασίες. Σύνδεσαν τη γεωγραφία με σύγχρονα και καθημερινά θέματα, ενώ ενίσχυσαν σημαντικά την ψηφιακή τους επάρκεια και την περιβαλλοντική τους ευαισθησία.



Η αξιολόγηση της δράσης πραγματοποιήθηκε μέσω αρχικού και τελικού ερωτηματολογίου, συστηματικής παρατήρησης της συνεργασίας και συμμετοχής των μαθητών, της ποιότητας των παραδοτέων (ομαδικοί τελικοί χάρτες, παρουσιάσεις) και συζητήσεων-ανατροφοδότησης, μέσα από τις οποίες οι μαθητές εξέφρασαν ενθουσιασμό και ενδιαφέρον για την επανάληψη ή τη συνέχιση παρόμοιων δράσεων.

Η δράση συνέβαλε ουσιαστικά στην αυτοαξιολόγηση της σχολικής μονάδας, ενισχύοντας την καινοτομία στη διδασκαλία και την εισαγωγή ψηφιακών εργαλείων στην καθημερινή πρακτική. Παράλληλα, αναβάθμισε τη διδασκαλία της γεωγραφίας μέσα από βιωματικές και διαθεματικές προσεγγίσεις και συνέβαλε στην ανάπτυξη δεξιοτήτων τόσο των μαθητών όσο και των εκπαιδευτικών.

Η υλοποίηση της καινοτόμου δράσης υπήρξε ιδιαίτερα ωφέλιμη και ουσιαστική για τη μαθητική κοινότητα, καθώς προήγαγε την ενεργητική και διαθεματική μάθηση, ενίσχυσε την κατανόηση της γεωγραφίας και συνέδεσε τη γνώση με την καθημερινή ζωή των μαθητών. Η ενεργός συμμετοχή, η συνέπεια και η ποιότητα των εργασιών των μαθητών επιβεβαιώνουν την επιτυχία της δράσης και ενισχύουν την ανάγκη για συνέχιση ή διεύρυνση παρόμοιων προγραμμάτων στο μέλλον.

Στο παρακάτω γράφημα απεικονίζονται οι απόψεις των μαθητών αναφορικά με τα εκπαιδευτικά οφέλη που εντόπισαν στο συγκεκριμένο λογισμικό. Οι μαθητές απάντησαν σε ανοιχτή ερώτηση που τους δόθηκε, αν και οι απαντήσεις τους συμπλέουν με αντίστοιχες εκπαιδευτικές έρευνες. Αυτό μάς βοηθά να αντιληφθούμε πως οι μαθητές μπορούν να εντοπίσουν οι ίδιοι τι κερδισαν από την εμπλοκή τους στο πρόγραμμά μας.

Γράφημα 1
Εκπαιδευτικά οφέλη που εντόπισαν οι μαθητές/τριες.

ΠΡΟΚΛΗΣΕΙΣ ΚΑΙ ΜΕΛΛΟΝΤΙΚΕΣ ΤΑΣΕΙΣ

Παρόλο που τα GIS προσφέρουν σημαντικά πλεονεκτήματα, εξακολουθούν να υπάρχουν προκλήσεις, όπως η διαχείριση μεγάλων όγκων δεδομένων και η προστασία της ιδιωτικότητας. Ωστόσο, οι εξελίξεις στην τεχνητή νοημοσύνη και το cloud computing αναμένεται να ενισχύσουν περαιτέρω τις δυνατότητες των GIS.

ΑΠΟΤΕΛΕΣΜΑΤΑ

Οι προσδοκώμενες μαθησιακές ωφέλειες από τη διδασκαλία της γεωγραφίας περιλαμβάνουν μια σειρά θετικών αποτελεσμάτων που ενισχύουν την εκπαιδευτική διαδικασία.

Πρώτον, οι μαθητές αναμένεται να αναπτύξουν δεξιότητες στη χρήση τεχνολογιών και γεωγραφικών δεδομένων, επιτρέποντάς τους να αποκτήσουν γνώση και κατανόηση σε προγράμματα και εργαλεία που είναι κρίσιμα για τη σύγχρονη γεωγραφική ανάλυση.

Δεύτερον, καλλιεργείται η κριτική σκέψη και η ικανότητα ανάλυσης δεδομένων, καθώς οι μαθητές καλούνται να ερμηνεύσουν διάφορες πληροφορίες, να διατυπώσουν ερωτήσεις και να εκφράσουν απόψεις βασισμένες σε στοιχειοθετημένα επιχειρήματα. Η βελτίωση της χωρικής αντίληψης αποτελεί επίσης βασικό μαθησιακό όφελος, καθώς οι μαθητές αποκτούν μια πιο ολοκληρωμένη εικόνα του φυσικού και ανθρωπογενούς περιβάλλοντος.

Επιπλέον, τη σύνδεση της γεωγραφίας με σύγχρονα προβλήματα και προκλήσεις, όπως η κλιματική αλλαγή και η αστική ανάπτυξη, αναδεικνύει τη σημασία της γεωγραφίας στη σύγχρονη κοινωνία.

Τέλος, μέσω της ομαδικής εργασίας, οι μαθητές ενθαρρύνονται να αναπτύξουν δεξιότητες συνεργασίας, επικοινωνίας και επίλυσης προβλημάτων, στοιχεία που είναι ουσιαστικά για την προσωπική και επαγγελματική τους ανάπτυξη.

ΠΕΡΙΛΗΨΗ

Η ενσωμάτωση ψηφιακών μέσων στη σύγχρονη εκπαιδευτική πραγματικότητα αποτελεί καθοριστικό παράγοντα για την αναβάθμιση της διδασκαλίας και την ανάπτυξη δεξιοτήτων STEM στους μαθητές. Παρόλο που στην Ευρωπαϊκή Ένωση δεν υπάρχει ένας συγκεκριμένος ορισμός, το STEM αναφέρεται γενικά στους τομείς της επιστήμης, της τεχνολογίας, της μηχανικής και των μαθηματικών, οι οποίοι θεωρούνται κρίσιμοι για την καινοτομία, την οικονομική ανάπτυξη και την ευημερία. Η εκπαίδευση STEM δίνει έμφαση στην κριτική σκέψη, την επίλυση προβλημάτων και τη δημιουργικότητα, συνδυάζοντας τη θεωρία με την πρακτική εφαρμογή.

Στο πλαίσιο αυτό, η παρούσα εργασία παρουσιάζει τη χρήση αισθητήρων υγρασίας εδάφους σε συνδυασμό με τεχνολογικά εργαλεία για την ενίσχυση της μαθησιακής διαδικασίας στο μάθημα "Φυτική Παραγωγή" της Β’ τάξης του Ενιαίου Ειδικού Επαγγελματικού Γυμνασίου-Λυκείου (ΕΝ.Ε.Ε.ΓΥ.-Λ.) Μεσολογγίου. Το πρόγραμμα υλοποιήθηκε από μαθητές με την καθοδήγηση των εκπαιδευτικών τους, στο πλαίσιο της εργαστηριακής διδασκαλίας του μαθήματος.

Η προσέγγιση αυτή επιτρέπει τη συλλογή, ανάλυση και οπτικοποίηση δεδομένων που αφορούν την υγρασία του εδάφους σε πραγματικό χρόνο. Οι μαθητές εμπλέκονται ενεργά στην τοποθέτηση αισθητήρων στο σχολικό κήπο, καταγράφουν δεδομένα υγρασίας μέσω ψηφιακών πλατφορμών και λογισμικού, όπως το Arduino και το Raspberry Pi, και συγκρίνουν τις μετρήσεις με παραδοσιακές αρδευτικές πρακτικές. Με τον τρόπο αυτό, αναπτύσσουν βασικές γνώσεις στη γεωπονία, την πληροφορική και τα μαθηματικά, ενισχύοντας παράλληλα την κριτική σκέψη και τις δεξιότητες επίλυσης προβλημάτων.

Επιπλέον, η διαθεματική προσέγγιση αυτής της δράσης καθιστά εφικτή τη σύνδεση της θεωρητικής γνώσης με την πρακτική εφαρμογή, καθιστώντας τη μάθηση πιο βιωματική και προσαρμοσμένη στις ανάγκες των μαθητών. Παράλληλα, η αξιοποίηση των δεδομένων επιτρέπει την ανάπτυξη περιβαλλοντικής συνείδησης και την κατανόηση της σημασίας της ορθολογικής διαχείρισης των φυσικών πόρων, όπως το νερό στην άρδευση.

Η εργασία παρουσιάζει τα στάδια σχεδιασμού και υλοποίησης του προγράμματος, καθώς και τα παιδαγωγικά οφέλη που προκύπτουν από τη χρήση των αισθητήρων υγρασίας στην εκπαιδευτική πρακτική. Επιπλέον, αναλύονται τα τεχνικά και διδακτικά εργαλεία που χρησιμοποιήθηκαν, οι προκλήσεις που αντιμετωπίστηκαν και οι προοπτικές εξέλιξης της μεθόδου στο πλαίσιο της ειδικής αγωγής και εκπαίδευσης.

Τα αποτελέσματα της εφαρμογής καταδεικνύουν ότι η ενσωμάτωση των αισθητήρων υγρασίας εδάφους και των ψηφιακών μέσων στη διδακτική διαδικασία ενισχύει τη βιωματική μάθηση, αναπτύσσει δεξιότητες STEM και ψηφιακού προγραμματισμού και βελτιώνει τη συνεργασία μεταξύ μαθητών και εκπαιδευτικών. Συνεπώς, προτείνεται η επέκταση της μεθοδολογίας και σε άλλες εκπαιδευτικές βαθμίδες, με σκοπό τη δημιουργία καινοτόμων μαθησιακών περιβαλλόντων που αξιοποιούν την τεχνολογία προς όφελος της εκπαίδευσης και της βιώσιμης ανάπτυξης.

Λέξεις – κλειδιά: Αισθητήρες υγρασίας εδάφους, ψηφιακά μέσα στην εκπαίδευση, διαθεματική μάθηση, στρατηγικές STEM

ΤΙ ΕΙΝΑΙ Η ΜΕΘΟΔΟΛΟΓΙΑ STEM;

Το ακρωνύμιο STEM, που περιλαμβάνει τους όρους Επιστήμη, Τεχνολογία, Μηχανική και Μαθηματικά, αποτελεί μια διεπιστημονική εκπαιδευτική προσέγγιση που ενσωματώνει αυτούς τους τομείς για να προάγει την κριτική σκέψη και την καινοτομία (Bybee, 2013). Στόχος του είναι η καλλιέργεια δεξιοτήτων επίλυσης προβλημάτων μέσω βιωματικής μάθησης, η οποία, σύμφωνα με τη θεωρία του Kolb (1984), συνδέει τη θεωρητική γνώση με την πρακτική εφαρμογή, ενισχύοντας τη μαθησιακή εμπειρία. Οι δραστηριότητες STEM, όπως η κατασκευή μοντέλων, ο προγραμματισμός ή τα επιστημονικά πειράματα, ενθαρρύνουν τη δημιουργικότητα και τη συνεργασία, προετοιμάζοντας τους μαθητές για τις τεχνολογικές και επαγγελματικές απαιτήσεις του 21ου αιώνα (Honey et al., 2014; Sanders, 2009). Η διαθεματική φύση του STEM επιτρέπει τη σύνδεση επιστημονικών εννοιών με πραγματικές εφαρμογές, όπως η ανάπτυξη τεχνολογικών λύσεων ή η προώθηση της περιβαλλοντικής ευαισθητοποίησης, ενισχύοντας την κατανόηση μέσω αυθεντικών πλαισίων (Moore et al., 2014). Σε έναν κόσμο που εξελίσσεται ραγδαία τεχνολογικά, το STEM καλλιεργεί δεξιότητες όπως η αναλυτική σκέψη, η προσαρμοστικότητα και η ψηφιακή ικανότητα, οι οποίες είναι κρίσιμες για τη σύγχρονη αγορά εργασίας (Ertmer & Ottenbreit-Leftwich, 2010). Επιπρόσθετα, η STEM προσέγγιση υποστηρίζει την ανάπτυξη κοινωνικών δεξιοτήτων μέσω συνεργατικών έργων, ενισχύοντας την ομαδικότητα και την επικοινωνία, όπως υπογραμμίζει η θεωρία της κοινωνικής μάθησης (Vygotsky, 1978). Έτσι, το STEM καθίσταται βασικός πυλώνας της σύγχρονης εκπαίδευσης, προσφέροντας ένα ολιστικό πλαίσιο μάθησης που προετοιμάζει τους μαθητές για τις προκλήσεις του μέλλοντος.

Η ΔΥΝΑΜΙΚΗ ΕΝΣΩΜΑΤΩΣΗ ΤΗΣ STEM ΕΚΠΑΙΔΕΥΣΗΣ ΚΑΙ ΤΗΣ ΒΙΩΜΑΤΙΚΗΣ ΜΑΘΗΣΗΣ ΣΤΗΝ ΕΙΔΙΚΗ ΑΓΩΓΗ

Η σύγχρονη παιδαγωγική προσέγγιση μετασχηματίζει τη μάθηση από παθητική αποστήθιση σε ενεργή, συμμετοχική εμπειρία, συνδέοντας θεωρία και πράξη. Στο πλαίσιο αυτό, η μεθοδολογία STEM (Επιστήμη, Τεχνολογία, Μηχανική, Μαθηματικά) στην ειδική αγωγή αποτελεί καινοτόμο επιλογή που ανταποκρίνεται στις μαθησιακές ανάγκες μαθητών με δυσκολίες ή αναπηρίες (Tomlinson, 2017).

Η εκπαίδευση STEM προάγει δεξιότητες κριτικής σκέψης, επίλυσης προβλημάτων και δημιουργικότητας, κρίσιμες για τη γνωστική ανάπτυξη (Bargerhuff, 2013; Vygotsky, 1978; Bybee, 2013). Πρακτικές δραστηριότητες, όπως η κατασκευή μοντέλων, η ρομποτική ή ο προγραμματισμός, διευκολύνουν την κατανόηση αφηρημένων εννοιών μέσω χειροπιαστών εμπειριών. Για παράδειγμα, η δημιουργία ενός ηλιακού συστήματος ή η παρακολούθηση υγρασίας φυτών με αισθητήρες ενεργοποιούν τη μάθηση και ενισχύουν την αυτοπεποίθηση.

Η βιωματική και διαθεματική προσέγγιση ενισχύει την εμπλοκή και προσαρμόζεται στις ιδιαίτερες ανάγκες των μαθητών (Honey et al., 2014; Kolb, 1984; McLeskey et al., 2017). Η σύνδεση γνωστικών αντικειμένων, όπως βιολογία, τεχνολογία και μαθηματικά, προσδίδει νόημα στη μάθηση και επιτρέπει την εξατομίκευση, κρίσιμη στην ειδική αγωγή (Basham & Marino, 2013). Δραστηριότητες όπως η φροντίδα σχολικού κήπου με τεχνολογικά εργαλεία ή συνεργατικά έργα ενισχύουν δεξιότητες ζωής, υπευθυνότητας και αυτονομίας.

Η συνεργατική μάθηση, βασικό στοιχείο της βιωματικής εκπαίδευσης, αναπτύσσει κοινωνικές δεξιότητες και το αίσθημα του ανήκειν (Koliadis, 2011; Johnson & Johnson, 2014). Η ομαδική εργασία και η συλλογική επίλυση προβλημάτων προάγουν αξίες όπως ο σεβασμός και η κοινωνική ένταξη, ιδιαίτερα για μαθητές με ειδικές ανάγκες.

Συμπερασματικά, η ενσωμάτωση του STEM σε μια βιωματική, διαθεματική προσέγγιση αποτελεί αναγκαιότητα για ολιστική εκπαίδευση. Υποστηρίζει τη γνωστική, κοινωνική και συναισθηματική ανάπτυξη, καλλιεργώντας δεξιότητες ζωής και προετοιμάζοντας μαθητές για τις προκλήσεις του κόσμου (Moore et al., 2014). Είναι μια μετασχηματιστική πρακτική, ιδιαίτερα αποτελεσματική στην ειδική αγωγή, προάγοντας διαφοροποίηση, ενδυνάμωση και ένταξη.

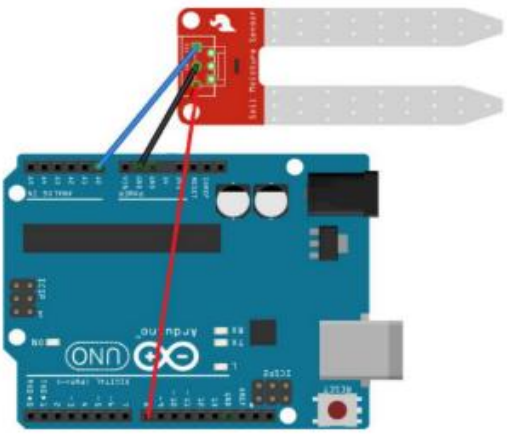
ΠΕΡΙΓΡΑΦΗ ΤΗΣ ΕΚΠΑΙΔΕΥΤΙΚΗΣ ΔΡΑΣΗΣ

Οι γενικοί στόχοι της δράσης επικεντρώνονται στην κατανόηση επιστημονικών εννοιών, όπως η υγρασία εδάφους στη γεωπονία, και στην εξοικείωση με τεχνολογικά εργαλεία, όπως Arduino, αισθητήρες και λογισμικά Node.js και Node-RED. Επιπλέον, περιλαμβάνουν την κατασκευή και τον προγραμματισμό κυκλωμάτων, καθώς και τη μέτρηση και ανάλυση δεδομένων μέσω διαγραμμάτων. Οι ειδικοί παιδαγωγικοί στόχοι προάγουν την περιβαλλοντική συνείδηση και τη βιώσιμη διαχείριση πόρων, καλλιεργούν κοινωνικές και συνεργατικές δεξιότητες, ενισχύουν τον ψηφιακό γραμματισμό και την αυτονομία, ενώ υποστηρίζουν τη μαθησιακή κατανόηση μέσω πρακτικών εφαρμογών. Η STEM προσέγγιση, μέσα από αυτούς τους στόχους, προετοιμάζει τους μαθητές για τις σύγχρονες προκλήσεις, συνδέοντας τη θεωρία με την πράξη (Bybee, 2013).

Η δράση εντάχθηκε στο μάθημα «Φυτική παραγωγή» της Β' τάξης ΕΝ.Ε.Ε.ΓΥ.-Λ. Μεσολογγίου, διήρκεσε 5 εβδομάδες και συμμετείχαν 6 μαθητές. Η διδασκαλία ήταν διαθεματική και συνεργατική, με εμπλοκή καθηγητών γεωπονίας και πληροφορικής. Οι μαθητές ανέλαβαν ρόλους (τεχνική, τεκμηρίωση, παρουσίαση), εργάστηκαν σε ομάδες και τοποθέτησαν αισθητήρες υγρασίας εδάφους και θερμοκρασίας, δημιουργώντας ένα αυτοματοποιημένο σύστημα παρακολούθησης.

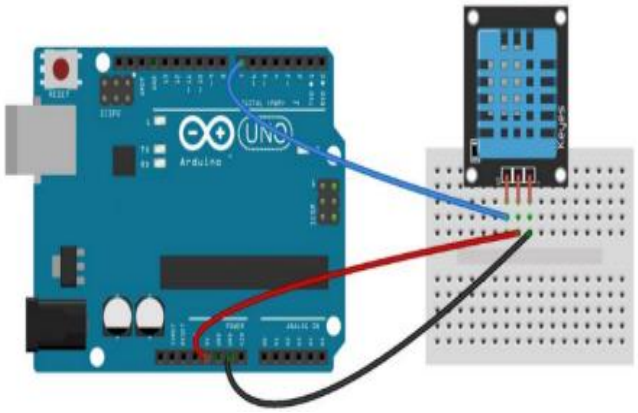
Για την πραγματοποίηση της Δράσης αξιοποιήθηκαν σύγχρονα τεχνολογικά μέσα και πλατφόρμες για την ενίσχυση της μάθησης και την ανάπτυξη δεξιοτήτων. Το Arduino UNO χρησιμοποιείται για τη συλλογή και μετάδοση δεδομένων, επιτρέποντας στους μαθητές να εξοικειωθούν με τη λειτουργία μικροελεγκτών. Το Node-RED διευκολύνει την επεξεργασία ροών δεδομένων και την ανάπτυξη διαδραστικών dashboards, προσφέροντας οπτικοποιημένες λύσεις για την ανάλυση πληροφοριών. Οι αισθητήρες DHT11 και YL-69 εφαρμόζονται για τη μέτρηση θερμοκρασίας και υγρασίας, συνδέοντας την τεχνολογία με περιβαλλοντικές εφαρμογές. Το Excel χρησιμοποιείται για την ανάλυση δεδομένων και τη στατιστική επεξεργασία, βοηθώντας τους μαθητές να ερμηνεύουν δεδομένα μέσω διαγραμμάτων. Αυτά τα εργαλεία προάγουν τον ψηφιακό γραμματισμό και την πρακτική κατανόηση, ενισχύοντας τη διαθεματική μάθηση και την καινοτομία στην εκπαίδευση (Honey et al., 2014).

ΜΕΘΟΔΟΛΟΓΙΑ ΥΛΟΠΟΙΗΣΗΣ



Η υλοποίηση ενός STEM έργου, όπως η ανάπτυξη ενός συστήματος παρακολούθησης υγρασίας για τον σχολικό κήπο, περιλαμβάνει πέντε διαδοχικές φάσεις που συνδυάζουν επιστημονική έρευνα, τεχνολογική εφαρμογή και συνεργατική μάθηση. Κάθε φάση έχει σχεδιαστεί για να προάγει τη δημιουργικότητα, την κριτική σκέψη και τις δεξιότητες επίλυσης προβλημάτων των μαθητών, ενώ παράλληλα ενισχύει την περιβαλλοντική συνείδηση.

Στην πρώτη φάση, οι μαθητές κλήθηκαν να εντοπίσουν το πρόβλημα μέσω μιας καθοδηγητικής ερώτησης: «Πώς μπορούμε να γνωρίζουμε πότε χρειάζεται πότισμα ο σχολικός μας κήπος χωρίς να σπαταλάμε νερό;» Μέσα από ομαδική συζήτηση, κατέγραψαν τις ιδέες τους στον πίνακα, θέτοντας τις βάσεις για την έρευνά τους. Αυτή η διαδικασία όχι μόνο ενεργοποίησε τη σκέψη τους αλλά και τους βοήθησε να συνειδητοποιήσουν τη σημασία της βιώσιμης διαχείρισης πόρων.



Στη δεύτερη φάση, επικεντρώθηκαν στον σχεδιασμό και τον προγραμματισμό. Οι μαθητές εξοικειώθηκαν με τεχνολογικά εργαλεία όπως το Arduino, οι αισθητήρες υγρασίας και το Node-RED, ενώ σχεδίασαν το κύκλωμα και το πρωτότυπο του συστήματος. Χρησιμοποιήθηκαν διδακτικά εργαλεία, όπως PDF με οδηγίες βήμα-βήμα, το Arduino IDE και το Node.js, για την υποστήριξη της διαδικασίας. Για την αποτελεσματική οργάνωση, δημιουργήθηκαν τρεις ομάδες: η τεχνική ομάδα, η ομάδα τεκμηρίωσης και η ομάδα παρουσίασης. Αυτή η κατανομή ρόλων προώθησε τη συνεργασία και την ανάπτυξη δεξιοτήτων οργάνωσης.

Η τρίτη φάση περιλάμβανε την κατασκευή και τον πειραματισμό. Οι μαθητές συνέδεσαν τους αισθητήρες (Εικόνα 1, Εικόνα 2), προγραμμάτισαν το σύστημα (Εικόνα 3) και κατέγραψαν δεδομένα υγρασίας (Εικόνα 4). Παράλληλα, ρύθμισαν ένα διαδραστικό dashboard στο Node-RED για την οπτικοποίηση των δεδομένων. Η διαδικασία εμπλουτίστηκε με την ανάλυση των δεδομένων στο Excel στο εργαστήριο πληροφορικής, ενισχύοντας τις δεξιότητες μαθηματικής επεξεργασίας και ερμηνείας.

Εικόνα 2
Σύνδεση DHT-11 3 ακίδων με Arduino UNO

Εικόνα 3
Node-Red ανάπτυξη

Εικόνα 4
Dashboards με γραφήματα και real-time δεδομένα

Στην τέταρτη φάση, οι μαθητές συμμετείχαν σε αναστοχασμό και ανάλυση. Συζήτησαν τη χρησιμότητα του συστήματος για τη διαχείριση του σχολικού κήπου και πρότειναν βελτιώσεις, όπως την προσθήκη αυτοματισμών ή

triggers για πιο αποδοτική λειτουργία. Αυτή η φάση καλλιέργησε την κριτική σκέψη και την ικανότητα αξιολόγησης της δουλειάς τους, ενισχύοντας την αυτοπεποίθησή τους.

Τέλος, στην πέμπτη φάση, οι μαθητές παρουσίασαν τα αποτελέσματα του έργου σε καθηγητές και συμμαθητές, διαχέοντας τη γνώση και τα επιτεύγματά τους (Εικόνα 5). Η παρουσίαση όχι μόνο ανέδειξε το έργο τους αλλά και ενίσχυσε τις δεξιότητες επικοινωνίας και δημόσιας ομιλίας.

Εικόνα 5
Τελικό αποτέλεσμα σε μικρή κλίμακα

Η διαδικασία υλοποίησης του έργου αποδεικνύει τη δυναμική της STEM προσέγγισης να συνδυάζει θεωρητική γνώση, πρακτική εφαρμογή και συνεργασία. Μέσα από αυτά τα στάδια, οι μαθητές ανέπτυξαν όχι μόνο τεχνικές δεξιότητες αλλά και περιβαλλοντική ευαισθητοποίηση, ψηφιακό γραμματισμό και κοινωνικές ικανότητες, καθιστώντας το έργο πρότυπο για τη σύγχρονη εκπαίδευση.

ΑΠΟΤΕΛΕΣΜΑΤΑ ΚΑΙ ΠΑΡΑΤΗΡΗΣΕΙΣ

Η ανάλυση των δεδομένων που συλλέχθηκαν από την εκπαιδευτική παρέμβαση κατέδειξε θετικό παιδαγωγικό αντίκτυπο, τόσο σε ποσοτικό όσο και σε ποιοτικό επίπεδο. Συγκεκριμένα, το 75% των μαθητών κατανόησε την έννοια της υγρασίας εδάφους, γεγονός που υποδηλώνει αποτελεσματική κατανόηση επιστημονικών εννοιών μέσα από βιωματική προσέγγιση. Παράλληλα, το 65% των συμμετεχόντων ήταν σε θέση να περιγράψει με σαφήνεια τη λειτουργία του αισθητήρα, καταδεικνύοντας την επιτυχή σύνδεση θεωρίας και πράξης.

Στο επίπεδο της συνεργατικότητας και της κοινωνικής αλληλεπίδρασης, το 80% των μαθητών συμμετείχε ενεργά στις ομαδικές δραστηριότητες, γεγονός που ενισχύει τη θέση πως η ομαδοσυνεργατική μάθηση μέσα από STEM εφαρμογές μπορεί να προάγει δεξιότητες συνεργασίας και ενδυνάμωσης.

Πέραν των ποσοτικών δεδομένων, η ποιοτική ανάλυση των μαθητικών σχολίων ανέδειξε τη συναισθηματική εμπλοκή και τον αυξημένο ενθουσιασμό για τη μαθησιακή διαδικασία. Μαθητές δήλωσαν πως *«μου άρεσε που κάναμε κάτι αληθινό, όχι μόνο θεωρία»*, επιβεβαιώνοντας την αξία της βιωματικής μάθησης. Ένα άλλο χαρακτηριστικό σχόλιο, *«νιώθω σαν επιστήμονας!»*, υπογραμμίζει την ενίσχυση της αυτοεκτίμησης και της προσωπικής εμπλοκής στη μάθηση.

Τα παραπάνω αποτελέσματα επιβεβαιώνουν ότι η εκπαιδευτική προσέγγιση που βασίζεται στη μεθοδολογία STEM όχι μόνο ενισχύει τη γνωστική κατανόηση αλλά και προάγει την αυτενέργεια, τη συνεργασία και τη θετική στάση απέναντι στη μάθηση. Ιδιαίτερα για μαθητές με μαθησιακές δυσκολίες, η σύνδεση της θεωρίας με την πράξη και η συμμετοχή σε ουσιαστικές δραστηριότητες συνιστούν κρίσιμους παράγοντες για την ενίσχυση της εκπαιδευτικής τους εμπειρίας.

ΣΥΖΗΤΗΣΗ – ΣΥΜΠΕΡΑΣΜΑΤΑ

Η εκπαιδευτική παρέμβαση που βασίστηκε στην προσέγγιση STEM και υλοποιήθηκε μέσω της εγκατάστασης και παρακολούθησης αισθητήρων υγρασίας σε σχολικό κήπο, ανέδειξε την καταλληλότητα της μεθοδολογίας ως

αποτελεσματικού εργαλείου στην ειδική αγωγή. Η δράση συνδύασε την επιστήμη, την τεχνολογία, τη μηχανική και τα μαθηματικά με βιωματικό και λειτουργικό τρόπο, ενισχύοντας τη μαθησιακή εμπειρία, τον ψηφιακό προγραμματισμό και την κοινωνική ενσωμάτωση των μαθητών με ειδικές εκπαιδευτικές ανάγκες.

Οι μαθητές τοποθέτησαν αισθητήρες στον σχολικό κήπο, παρακολούθησαν πραγματικές μετρήσεις υγρασίας και ανέλυσαν δεδομένα μέσω διαδραστικών εργαλείων όπως το Arduino και το Node-RED. Η δραστηριότητα αυτή ενίσχυσε την κατανόηση αφηρημένων εννοιών, όπως η υγρασία του εδάφους, μέσω οπτικής και πρακτικής υποστήριξης, σύμφωνα με τις αρχές της καθολικής σχεδίασης για τη μάθηση (Rose & Meyer, 2002). Παράλληλα, καλλιεργήθηκαν αναλυτικές και μεταγνωστικές δεξιότητες, καθώς οι μαθητές συνέκριναν τα δεδομένα των αισθητήρων με παραδοσιακές μεθόδους ποτίσματος και πρότειναν βελτιώσεις, αναπτύσσοντας κριτική σκέψη και ικανότητες επίλυσης προβλημάτων (Honey et al., 2014).

Η διεπιστημονικότητα της δράσης αποδείχθηκε καθοριστική. Η γεωπονική παρατήρηση συνδυάστηκε με την τεχνολογική διαχείριση, τη μαθηματική ανάλυση δεδομένων και την περιβαλλοντική ευαισθητοποίηση. Μέσα από αυτή τη διαθεματική σύνθεση, η μάθηση απέκτησε ουσιαστικό νόημα και λειτουργικό χαρακτήρα (Bybee, 2013· Moore et al., 2014), προσφέροντας ευκαιρίες ενεργού συμμετοχής, ανεξαρτήτως του γνωστικού επιπέδου ή των δυσκολιών των μαθητών.

Σημαντική ήταν και η συμβολή της ομαδοσυνεργατικής μάθησης: οι μαθητές ανέλαβαν ρόλους (τοποθέτηση αισθητήρων, λήψη και καταγραφή μετρήσεων, παρακολούθηση μεταβολών), γεγονός που ενίσχυσε τις κοινωνικές και οργανωτικές τους δεξιότητες, όπως η υπευθυνότητα, η επικοινωνία και η συνεργασία (Bargerhuff, 2013). Ταυτόχρονα, η δυνατότητα να βλέπουν άμεσα και απτά τα αποτελέσματα της εργασίας τους συνέβαλε στην ενίσχυση της αυτοεκτίμησης και του αισθήματος προσωπικής επίτευξης, στοιχεία που σχετίζονται με την αυτοαποτελεσματικότητα (Bandura, 1997).

Η βιωματική φύση της δράσης υποστήριξε και την ανάπτυξη οικολογικής συνείδησης. Οι μαθητές, μέσω της παρακολούθησης της υγρασίας και της ορθολογικής διαχείρισης του νερού, συνειδητοποίησαν την αξία της τεχνολογίας στην αειφόρο ανάπτυξη, καλλιεργώντας στάσεις υπευθυνότητας και περιβαλλοντικής ευαισθησίας.

Τέλος, αξίζει να σημειωθεί ότι η εστίαση στην πράξη και η χρήση σύγχρονων τεχνολογιών ενίσχυσαν τον ψηφιακό προγραμματισμό, προσφέροντας πρόσβαση στην τεχνολογία ακόμη και σε μαθητές χωρίς προηγούμενη εμπειρία. Η επιτυχής ενσωμάτωση μιας τέτοιας STEM δράσης αποδεικνύει ότι η τεχνολογική και βιωματική εκπαίδευση μπορεί να συμβάλει στην παιδαγωγική διαφοροποίηση και την ισότιμη συμμετοχή των μαθητών με ειδικές ανάγκες, προάγοντας μια ανθρώπινη, δυναμική και ουσιαστική ειδική αγωγή.

ΠΕΡΙΛΗΨΗ

Η ενσωμάτωση και αξιοποίηση των ψηφιακών τεχνολογιών στην ξενόγλωσση εκπαίδευση διαδραματίζει πρωταγωνιστικό ρόλο στην υλοποίηση των στόχων του Νέου Προγράμματος Σπουδών σε έναν συνεχώς εξελισσόμενο ψηφιακό κόσμο που βαδίζει ταχύτατα πλέον στην εποχή της τεράστιας επίδρασης των εργαλείων τεχνητής νοημοσύνης. Η παιδαγωγικά προσανατολισμένη αξιοποίηση τους στη διδασκαλία με βάση τον σχεδιασμό του μαθήματος και τα προσδοκώμενα μαθησιακά αποτελέσματα εμπλουτίζει το περιεχόμενο της με πλούσιο αυθεντικό και επίκαιρο υλικό.

Η μαθησιακή διαδικασία γίνεται πιο ελκυστική και παιγνιώδης για τους/τις μαθητές/τριες, συμμετέχοντας πλέον οι ίδιοι ενεργά με δραστηριότητες βιωματικού χαρακτήρα μέσα σε ψηφιακά περιβάλλοντα, αναπτύσσοντας με τον τρόπο αυτό δεξιότητες ψηφιακού γραμματισμού καθώς και πλήθος άλλων ήπιων και κοινωνικών δεξιοτήτων μετατρέποντας με αυτό τον τρόπο σταδιακά την τάξη σε κοινότητα δημιουργικής μάθησης.

Σκοπός της παρούσας εισήγησης είναι να αναδείξει τις δυνατότητες που προσφέρουν τα ψηφιακά εργαλεία για τη διαφοροποίηση της διδασκαλίας και της αξιολόγησης, καθώς και να παρουσιάσει συγκεκριμένες πρακτικές και παραδείγματα εφαρμογής τους στην εκπαιδευτική πράξη. Επιπλέον, επιδιώκει να εξετάσει τις προκλήσεις και τις προοπτικές που συνδέονται με την ενσωμάτωση των νέων τεχνολογιών στον διδακτικό σχεδιασμό σύμφωνα με τα Νέα Αναλυτικά Προγράμματα Σπουδών.

Πιο συγκεκριμένα, η παρουσίαση μας θα αναδείξει ότι τα ψηφιακά εργαλεία υποστηρίζουν την παροχή εξατομικευμένων μαθησιακών εμπειριών, οι οποίες ανταποκρίνονται στις ανάγκες και τα ενδιαφέροντα κάθε μαθητή, δημιουργούν ευέλικτα μαθησιακά περιβάλλοντα, τα οποία επιτρέπουν στους μαθητές να μαθαίνουν με τον δικό τους τρόπο και ρυθμό, αναπτύσσουν ψηφιακές δεξιότητες σε μαθητές/τριες και εκπαιδευτικούς.

Επιπλέον, θα αναδείξει ότι το e-portfolio, ως ένα δυναμικό αποθετήριο μαθησιακών τεκμηρίων, αναδύεται ως σημαντικό εργαλείο στη μαθησιακή αξιολόγηση. Ενσωματώνοντας αρχές της αυθεντικής αξιολόγησης, το e-portfolio επιτρέπει την ολιστική αποτύπωση της μαθησιακής πορείας, εστιάζοντας στην ανάπτυξη μεταγνωστικών δεξιοτήτων και στην ενίσχυση της αυτορρύθμισης. Μέσω της συγκέντρωσης ποικίλων artifacts, το e-portfolio προάγει την ενδοσκόπηση και την κριτική ανάλυση, διευκολύνοντας τη διαμορφωτική αξιολόγηση και παρέχοντας μια συνεχή ανατροφοδότηση για τη βελτίωση της μάθησης.

Τέλος, οι προτάσεις μας απευθύνονται σε εκπαιδευτικούς, ερευνητές, υπεύθυνους χάραξης εκπαιδευτικής πολιτικής και σε άλλους ενδιαφερόμενους, προτείνοντας δράσεις για την προώθηση της διαφοροποιημένης διδασκαλίας και αξιολόγησης με χρήση ψηφιακών εργαλείων συμβάλλοντας στην ανάπτυξη και εφαρμογή καινοτόμων διδακτικών πρακτικών, οι οποίες ανταποκρίνονται στις ανάγκες των μαθητών/τριών του 21ου αιώνα.

Λέξεις-κλειδιά: ψηφιακά εργαλεία, διαφοροποιημένη διδασκαλία, e-portfolio, νέα αναλυτικά προγράμματα σπουδών

ΕΙΣΑΓΩΓΗ

Η διαφοροποιημένη διδασκαλία στην ξενόγλωσση εκπαίδευση αποτελεί παιδαγωγική επιταγή, καθώς ανταποκρίνεται στην ετερογένεια των μαθητών, ενισχύοντας την ενσωμάτωση και την ισότιμη πρόσβαση στη γνώση, σύμφωνα με τις αρχές της συμπεριληπτικής εκπαίδευσης (Tomlinson, 2014). Η χρήση ψηφιακών εργαλείων εμπλουτίζει τη μαθησιακή διαδικασία, προσφέροντας εξατομικευμένες εμπειρίες και προάγοντας την ενεργητική συμμετοχή των μαθητών, όπως υποστηρίζεται από την UNESCO (2019) και το Ευρωπαϊκό Πλαίσιο Ψηφιακών Ικανοτήτων για τους Εκπαιδευτικούς (DigCompEdu).

Το ηλεκτρονικό portfolio (ePortfolio) αναδεικνύεται σε δυναμικό εργαλείο αυθεντικής αξιολόγησης, επιτρέποντας την ολιστική αποτύπωση της μαθησιακής πορείας και την ανάπτυξη μεταγνωστικών δεξιοτήτων, σύμφωνα με τις αρχές της διαμορφωτικής αξιολόγησης (Barrett, 2007). Η ενσωμάτωση αυτών των πρακτικών στην ξενόγλωσση εκπαίδευση συμβάλλει στην ανάπτυξη κρίσιμων δεξιοτήτων του 21ου αιώνα, όπως ο ψηφιακός εγγραμματισμός, η αυτορρύθμιση και η συνεργασία. Στην Ελλάδα, η νομοθεσία και οι οδηγίες του ΙΕΠ προωθούν την αξιοποίηση ψηφιακών εργαλείων και την εφαρμογή καινοτόμων παιδαγωγικών πρακτικών για τη βελτίωση της ποιότητας της εκπαίδευσης. Τα ερωτήματα, λοιπόν, τα οποία θέσαμε και εμείς, είναι τα εξής: Γιατί Διαφοροποιημένη Διδασκαλία; Γιατί Ψηφιακά Εργαλεία; Γιατί Ηλεκτρονικός Φάκελος;

ΔΙΑΦΟΡΟΠΟΙΗΜΕΝΗ ΔΙΔΑΣΚΑΛΙΑ ΣΤΗΝ ΞΕΝΟΓΛΩΣΣΗ ΕΚΠΑΙΔΕΥΣΗ

Το σημερινό εκπαιδευτικό περιβάλλον είναι πιο ετερογενές από ποτέ, προσφέροντας προκλήσεις αλλά και ευκαιρίες για τους εκπαιδευτικούς. Αντιμέτωπος με τις διαφορετικές μαθησιακές ανάγκες και τη γλωσσική επάρκεια των μαθητών, ειδικά στην ξένη γλώσσα, ο εκπαιδευτικός καλείται να διασφαλίσει ισότιμη πρόσβαση στην εκπαίδευση για όλους.

Η Διαφοροποιημένη Διδασκαλία είναι μια απαραίτητη φιλοσοφία για ένα συμπεριληπτικό σχολείο. Προσαρμόζει τη διδασκαλία στα διαφορετικά προφίλ των μαθητών – λαμβάνοντας υπόψη την ετοιμότητα, τα ενδιαφέροντα, το μαθησιακό στυλ, τις εμπειρίες και τις συνθήκες ζωής τους – αντί να ακολουθεί αυστηρά ένα ενιαίο πρόγραμμα σπουδών.

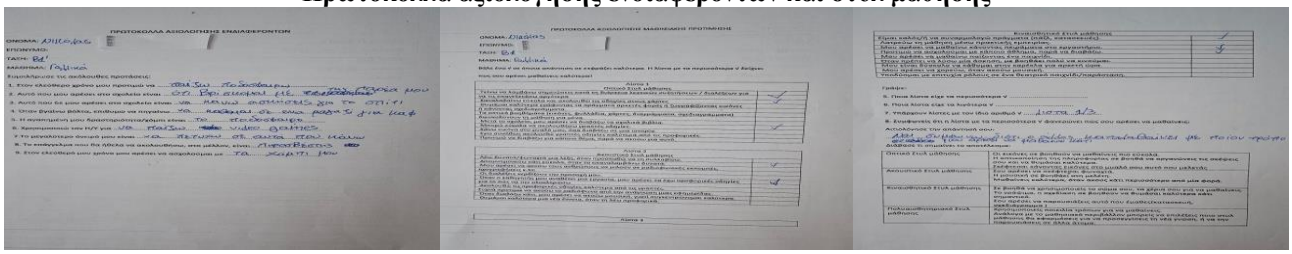
Η υιοθέτησή της δικαιολογείται από παιδαγωγικούς (δυνατότητα επιλογής εργασιών, εξατομίκευση), ψυχολογικούς (οι μαθητές αναδομούν τη γνώση και βρίσκουν το σχολείο ελκυστικό) και κοινωνικούς λόγους (ισότητα ευκαιριών, αποφυγή διακρίσεων). Η Διαφοροποιημένη Διδασκαλία είναι το κλειδί για ένα δίκαιο και αποτελεσματικό εκπαιδευτικό περιβάλλον που ανταποκρίνεται στις ανάγκες κάθε μαθητή.

ΤΑ ΨΗΦΙΑΚΑ ΜΕΣΑ ΚΑΙ Ο ΓΡΑΜΜΑΤΙΣΜΟΣ ΤΟΥ 21ΟΥ ΑΙΩΝΑ

Στη σημερινή κοινωνία του 21ου αιώνα, με την εξέλιξη των ψηφιακών τεχνολογιών αναδύονται νέες μορφές γραμματισμού που ξεπερνούν την ικανότητα για κατανόηση και παραγωγή προφορικού και γραπτού λόγου. Αυτές περιλαμβάνουν, μεταξύ άλλων, την ανάπτυξη ικανοτήτων σε: οπτικό γραμματισμό (ικανότητα κατανόησης και παραγωγής εικόνας), ψηφιακό γραμματισμό (ικανότητα χρήσης της ψηφιακής τεχνολογίας και εργαλείων εντοπισμού και χρήση της πληροφορίας), πληροφοριακό γραμματισμό (ικανότητα ανεύρεσης, αξιολόγησης και σύνθεσης της πληροφορίας) και τέλος, κριτικό γραμματισμό (ικανότητα του να θέτει κανείς ερωτήματα, να αμφισβητεί και να αξιολογεί τις έννοιες που πραγματεύεται ένα κείμενο).

Κρίνεται πλέον αναγκαίο οι μελλοντικοί πολίτες να αναπτύξουν νέους γραμματισμούς λόγω της «νέας επικοινωνιακής τάξης πραγμάτων» και της ευρείας χρήσης των ψηφιακών μέσων. Η ξένη γλώσσα παίζει σημαντικό ρόλο σε αυτή την προσαρμογή, καθώς τα ψηφιακά μέσα μετατρέπονται σε μέσα πρακτικού γραμματισμού, επηρεάζοντας δυναμικά τις διδακτικές πρακτικές και το περιεχόμενο του μαθήματος της ξένης γλώσσας.

Η νέα κειμενικότητα μεταβάλλει ριζικά την αντίληψη της γλώσσας, της γνώσης, του κειμένου, της επικοινωνίας και των ανθρώπινων ταυτοτήτων. Οι εκπαιδευτικοί θα πρέπει να είναι ικανοί να κινούνται δυναμικά μεταξύ της παλιάς και της νέας πραγματικότητας, προκειμένου να προωθηθεί ένας κριτικός γραμματισμός στον 21ο αιώνα.



ΑΡΧΕΣ ΔΙΑΦΟΡΟΠΟΙΗΜΕΝΗΣ ΔΙΔΑΣΚΑΛΙΑΣ ΚΑΙ ΟΡΓΑΝΩΣΗ ΤΑΞΗΣ

Πριν την εφαρμογή της ΔΔ στην ξενόγλωσση τάξη ο εκπαιδευτικός μοιράζει τα πρωτόκολλα αξιολόγησης ενδιαφερόντων και μαθησιακής προτίμησης στους μαθητές/τριες του με σκοπό να τους γνωρίσει καλύτερα, να ανακαλύψει σε ποιο στυλ μάθησης ανήκουν ετσι ώστε να είναι σε θέση να οργανώσει το μαθημα του με πιο κατάλληλο

τρόπο. Το βήμα αυτό είναι ιδιαίτερα σημαντικό και βοηθητικό γιατί τις περισσότερες φορές το μαθητικό δυναμικό της ξενόγλωσσης τάξης χαρακτηρίζεται από ιδιαίτερη ανομοιογένεια εξαιτίας των διαφορετικών επιπέδων γλωσσομάθειας, ενδιαφερόντων και προφίλ μάθησης.

Αυτοί οι μαθητές έχουν ανάγκη από εμπνευσμένα διαφοροποιημένα μαθήματα που θα τους επιτρέψουν να επιδείξουν τις μαθησιακές τους ικανότητες (Heacox, 2002). Στη συνέχεια ο εκπαιδευτικός συγκεντρώνει τα πρωτόκολλα με τις απαντήσεις των μαθητών/τριών του και τους χωρίζει σε ομάδες ανάλογα με το στυλ μάθησης και τα ενδιαφέροντα που έχουν καταγραφεί στο πρωτόκολλο. Ο χωρισμός αυτός δεν είναι εφικτός σε κάθε διδακτική ώρα, αποτελεί όμως το βασικό κριτήριο για να συνεργάζονται και να δουλεύουν καλύτερα οι ομάδες.

Εικόνα 1
Πρωτόκολλα αξιολόγησης ενδιαφερόντων και στυλ μάθησης

Διδακτικό παράδειγμα διαφοροποιημένης διδασκαλίας και μάθησης με χρήση ψηφιακών εργαλείων

Η διδασκαλία μπορεί να διαφοροποιηθεί ως προς το περιεχόμενο (πολλαπλές πηγές άντλησης των πληροφοριών και διαφορετικά επίπεδα δυσκολίας), τη διαδικασία (πολλαπλές διαδικασίες δημιουργίας νοήματος) και το τελικό προϊόν (πολλαπλές μορφές έκφρασης της γνώσης).

ΣΤΡΑΤΗΓΙΚΕΣ ΔΙΑΦΟΡΟΠΟΙΗΣΗΣ ΤΗΣ ΔΙΔΑΣΚΑΛΙΑΣ

Think – Tac – Toe (Τρίλιζα)

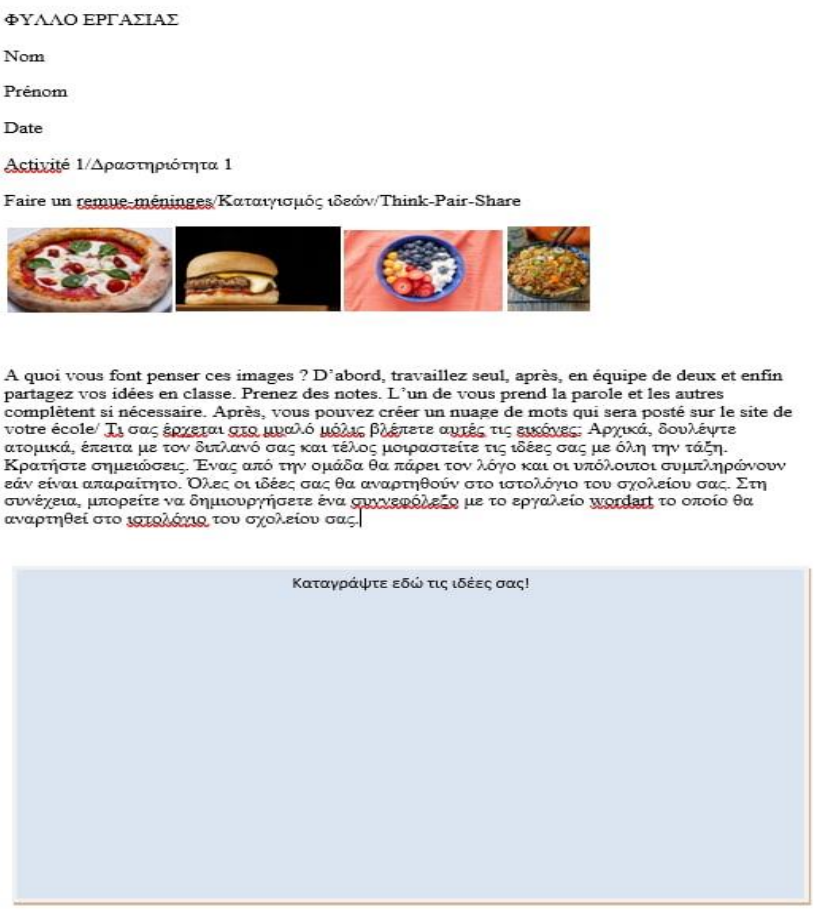
Εικόνα 2
Tic-Tac-Toe/Τρίλιζα

Think-Tac-Toe με θέμα το γαλλικό έθιμο La Chandeleur

Vive la Chandeleur!

Διαλέξτε τρεις από τις παρακάτω προτεινόμενες δραστηριότητες σχηματίζοντας τρίλιζα. Προσοχή η δραστηριότητα που βρίσκεται στο κέντρο είναι υποχρεωτική!

Δημιουργήστε μια αφίσα σε έντυπη ή ηλεκτρονική μορφή για να ενημερώσετε τους συμμαθητές σας για την γιορτή της κρέπας στην τάξη σας!	Ετοιμαστείτε για να παραγγείλετε νόστιμες κρέπες!	Αφήστε την φαντασία σας ελεύθερη και δημιουργήστε ευφάνταστα μενού με τις κρέπες τις επιλογής σας!
Στην κουζίνα! Φορέστε τον σκούφο και τις ποδιές σας και μαγειρέψτε γευστικές κρέπες!	Αφού ψάξετε στο διαδίκτυο την συνταγή που σας φαίνεται πιο ενδιαφέρουσα, παρουσιάστε την στην ολομέλεια της τάξης!	Γράψτε ένα μήνυμα στον φίλο/η σας για να τον καλέσετε στην γιορτή της κρέπας!
Γράψτε μια μικρή παράγραφο στην ιστοσελίδα του σχολείου σας για το γαλλικό έθιμο Chandeleur!	Ετοιμαστείτε για σερβίρισμα! Αναλαμβάνετε τις παραγγελίες στην γιορτή της κρέπας!	Καταγράψτε με φωτογραφικό υλικό τα κυριότερα στιγμιότυπα από την γιορτή της κρέπας και πλαισιώστε την λεζάντα με ένα μικρό σχόλιο!



Η στρατηγική Think-Tac-Toe ή αλλιώς Tic-Tac-Toe στηρίζεται στη θεωρία της Πολλαπλής Νοημοσύνης του Howard Gardner προκειμένου οι μαθητές να επιλέξουν οι ίδιοι, μέσα από μια ποικιλία δραστηριοτήτων, τον τρόπο με το οποίο θα είναι σε θέση να κάνουν αυτό που γνώρισαν, κατανόησαν και μπορούν να υλοποιήσουν.

Προσδιορίζονται αρχικά οι μαθησιακοί στόχοι και τα αποτελέσματα συνδέονται με το Πρόγραμμα Σπουδών και τότε δημιουργείται το Think-Tac-Toe με τη μορφή πίνακα εννέα τετραγώνων – με τη μορφή τρίλιζας – όπου κάθε τετράγωνο προσδιορίζει μία εργασία ή ένα μαθητικό προϊόν το οποίο συνδέεται με μία από τις νοημοσύνες του Gardner. Όλες οι δραστηριότητες αναφέρονται στο ίδιο θέμα από διαφορετική οπτική προκειμένου να έχουν οι μαθητές τη δυνατότητα επιλογής ανάλογα με τις νοημοσύνες στις οποίες μπορούν να αποδώσουν καλύτερα. Το ζητούμενο είναι κάθε μαθητής να επιλέξει τρία τετράγωνα και να δεσμευτεί για την υλοποίηση του έργου που αναφέρουν σε ένα ορισμένο χρονικό διάστημα. Στην ολοκλήρωση των δραστηριοτήτων ο μαθητής έχει κάνει «τρίλιζα».

Think - Pair – Share

Η στρατηγική Think-Pair-Share (Σκέψου-Συνεργάσου-Μοιράσου) (Lyman, 1981) παρέχει στους μαθητές το χρόνο και το πλαίσιο για να κατανοήσουν, να συνδεθούν, να σκεφτούν πάνω στις έννοιες που τους παρουσιάζει κάθε φορά ο εκπαιδευτικός, να αναπτύξουν τις προηγούμενες γνώσεις τους, να διαμορφώσουν τις προσωπικές τους ιδέες, να τις συζητήσουν με ένα συμμαθητή τους και, ως εκ τούτου, να τις διευρύνουν και στη συνέχεια να τις μοιραστούν με την ολομέλεια της τάξης. Το Think-Pair-Share μπορεί να χρησιμοποιηθεί ως εργαλείο αξιολόγησης καθώς ο εκπαιδευτικός μπορεί να παρακολουθεί τις συζητήσεις της δυάδας και να παρεμβαίνει ανάλογα.

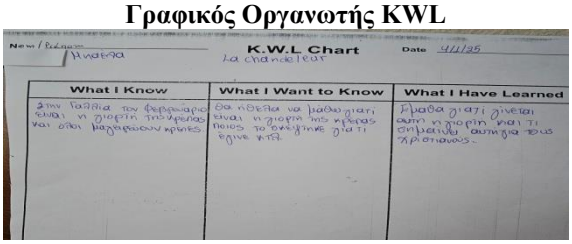
Faire un remue-méninges/Καταιγισμός ιδεών/Think-Pair-Share



A quoi vous font penser ces images ? D'abord, travaillez seul, après, en équipe de deux et enfin partagez vos idées en classe. Prenez des notes. L'un de vous prend la parole et les autres complètent si nécessaire. Après, vous pouvez créer un nuage de mots qui sera posté sur le site de votre école/ Τι σας έρχεται στο μυαλό μόλις βλέπετε αυτές τις εικόνες: Αρχικά, δουλέψτε ατομικά, έπειτα με τον διπλανό σας και τέλος μοιραστείτε τις ιδέες σας με όλη την τάξη. Κρατήστε σημειώσεις. Ένας από την ομάδα θα πάρει τον λόγο και οι υπόλοιποι συμπληρώνουν εάν είναι απαραίτητο. Όλες οι ιδέες σας θα αναρτηθούν στο ιστολόγιο του σχολείου σας. Στη συνέχεια, μπορείτε να δημιουργήσετε ένα συννεφόλεξο με το εργαλείο wordart το οποίο θα αναρτηθεί στο ιστολόγιο του σχολείου σας.

Καταγράψτε εδώ τις ιδέες σας!

KWL (Know– Want to know- Learned)

Η στρατηγική KWL (Know– Want to know- Learned)/Γνωρίζω-Θέλω να μάθω-Έχω μάθει χρησιμοποιείται για να καθοδηγεί τους μαθητές/τριες μέσω ενός γραφικού οργανωτή.Οι πληροφορίες που καταγράφονται στη στήλη K είναι εκείνες που ήδη γνωρίζουν. Στη συνέχεια οι μαθητές δημιουργούν μία λίστα ερωτήσεων σχετικά με αυτό που θέλουν να μάθουν για το θέμα. Αυτές οι ερωτήσεις καταγράφονται στη στήλη W . Μελετούν ένα κείμενο ή άλλο πληροφοριακό υλικό και τέλος καταγράφουν στη στήλη L αυτό που τελικά έμαθαν.

Εικόνα 4.
Γραφικός Οργανωτής KWL

ΔΙΑΦΟΡΟΠΟΙΗΜΕΝΗ ΔΙΔΑΣΚΑΛΙΑ ΚΑΙ ΜΑΘΗΣΗ ΚΑΙ ΨΗΦΙΑΚΑ ΜΕΣΑ

Με τη βοήθεια της εκπαιδευτικής τεχνολογίας και τη «δημοκρατικοποίηση» της χρήσης των ψηφιακών μέσων και περιβαλλόντων από τους εκπαιδευτικούς αλλά και από τον μαθητικό πληθυσμό, ευνοούνται οι πολυαισθητηριακές προσεγγίσεις, διευκολύνεται η επαφή με πολυμεσικό και πολυτροπικό υλικό αυθεντικών κειμένων στην ξένη γλώσσα, επιτρέπονται προσωπικές επιλογές και ατομικοί ρυθμοί μάθησης. Με άλλα λόγια, η ψηφιακή τεχνολογία, με τα χαρακτηριστικά και τις επιλογές που προσφέρει, αποτελεί το κατεξοχήν κατάλληλο εργαλείο για τη διαφοροποίηση της διδασκαλίας και της μάθησης.

Κάποια από τα χαρακτηριστικά της ένταξης των ψηφιακών μέσων στη διαφοροποιημένη διδασκαλία (Benjamin, 2005) είναι οι συνεργατικές και επικοινωνιακές δεξιότητες που καλλιεργούνται μέσα από τη χρήση διαδικτυακών τεχνολογιών, η υποστήριξη μαθησιακών στυλ και πολυαισθητηριακής μάθησης, η αυθεντική μάθηση, η ιδιωτικότητα και εξατομίκευση της μαθησιακής διαδικασίας, η παροχή επιλογών μέσω των ποικίλων ψηφιακών πολυμεσικών εφαρμογών και η οργάνωση της μάθησης, χωρο-χρονικά αλλά και σε σχέση με τη σταδιακή ανάπτυξη επικοινωνιακών δεξιοτήτων και πολυγραμματισμών που μπορεί να γίνει από τους ίδιους τους μαθητές.

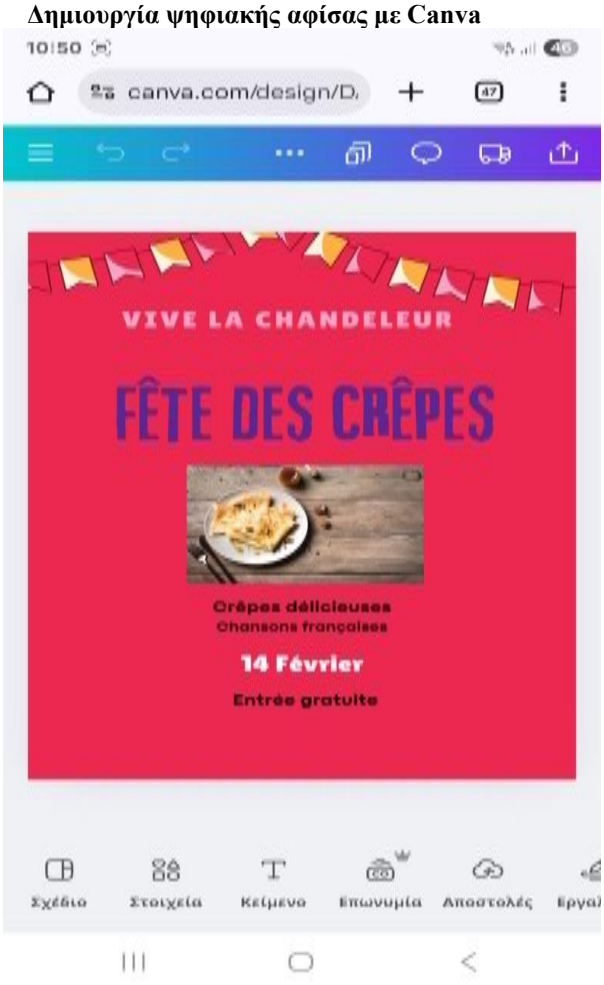
ΨΗΦΙΑΚΑ ΠΟΛΥΤΡΟΠΙΚΑ ΚΕΙΜΕΝΑ ΣΤΗ ΔΙΔΑΣΚΑΛΙΑ ΤΗΣ ΞΕΝΗΣ ΓΛΩΣΣΑΣ ΠΟΥ ΧΡΗΣΙΜΟΠΟΙΗΘΗΚΑΝ ΓΙΑ ΤΗΝ ΑΝΑΠΤΥΞΗ ΔΕΞΙΟΤΗΤΩΝ

ΚΑΤΑΙΓΙΣΜΟΣ ΙΔΕΩΝ ΜΕ ΧΡΗΣΗ ΣΥΝΝΕΦΟΛΕΞΟΥ

Εικόνα 5
Συννεφόλεξο με χρήση word art

Η δημιουργία ενός συννεφόλεξου προσφέρει μια δημιουργική και διασκεδαστική διάθεση στο μάθημα της ξένης γλώσσας. Εάν ο στόχος στο μάθημα της ξένης γλώσσας είναι η διερεύνηση των ιδεών των παιδιών πάνω σε συγκεκριμένο θέμα (για παράδειγμα την διατροφή), οι μαθητές επιχειρούν ομαδικά να καταγράψουν όσες έννοιες γνωρίζουν σχετικά με το θέμα. Το τελικό αποτέλεσμα ενός συννεφόλεξου μπορεί να αναδείξει τις ιδέες τους και εναλλακτικά μπορεί να χρησιμοποιηθεί ως έναυσμα για συζήτηση, ως διαγνωστικό εργαλείο ή να χρησιμοποιηθεί ως

καταιγισμός ιδεών. Μετά την ολοκλήρωση της διερεύνησης μπορούν, με ένα νέο συννεφόλεξο, να συγκρίνουν τι γνώριζαν και τι έμαθαν.



ΠΑΡΑΓΩΓΗ ΓΡΑΠΤΟΥ ΛΟΓΟΥ ΜΕ ΔΗΜΙΟΥΡΓΙΑ ΔΙΑΔΡΑΣΤΙΚΗΣ ΑΦΙΣΑΣ, ΧΡΗΣΗ PADLET, GAMMAAI, BOOKCREATOR

Η δημιουργία και χρήση διαδραστικών αφισών (Εικόνα 6) στο μάθημα ξένης γλώσσας προσφέρει πολλαπλά οφέλη στους μαθητές, μετατρέποντάς τους από παθητικούς δέκτες πληροφοριών σε ενεργούς συμμετέχοντες στη μαθησιακή διαδικασία. Έχουν τη δυνατότητα να διαμοιράζονται τις γνώσεις τους ενσωματώνοντας έγγραφα, βίντεο, ήχο και συνδέσμους, κάτι που καθιστά το περιεχόμενο πιο ελκυστικό και περιεκτικό. Αυτή η προσέγγιση ενισχύει την κατανόηση και διατηρεί την προσοχή της μαθητικής κοινότητας.

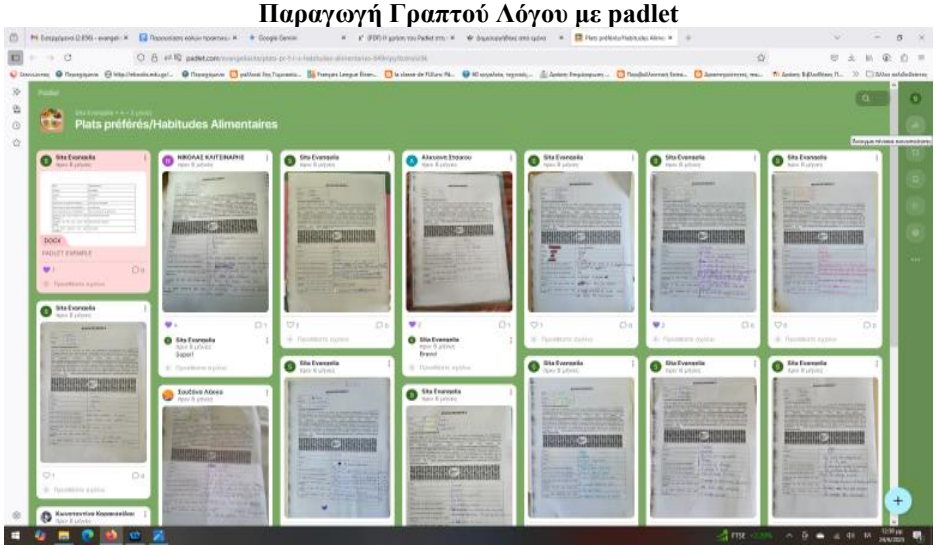
Η διαδικασία κατασκευής αφίσας φέρνει τα παιδιά σε επαφή με τον επιστημονικό τρόπο εργασίας, ακολουθώντας τις αρχές της διερευνητικής και βιωματικής μάθησης. Παράλληλα, αποτελεί ένα αποτελεσματικό εργαλείο αξιολόγησης για τους εκπαιδευτικούς, καθώς μπορούν να αξιολογήσουν την ορθότητα του περιεχομένου, τη διαδικασία κατάκτησης της γνώσης, καθώς και την οπτική οργάνωση και προφορική παρουσίαση (Κακαβά κ.ά., 2017).

Ένα σημαντικό όφελος είναι η ανάπτυξη του οπτικού λόγου και η ανταλλαγή ιδεών μεταξύ των μαθητών (Hofmann, 2010), ενώ η αυθεντικότητα του έργου αυξάνει το κίνητρο για παραγωγή εργασιών υψηλής ποιότητας (Buck Institute of Education, 2013).

Εικόνα 6
Δημιουργία ψηφιακής αφίσας με Canva

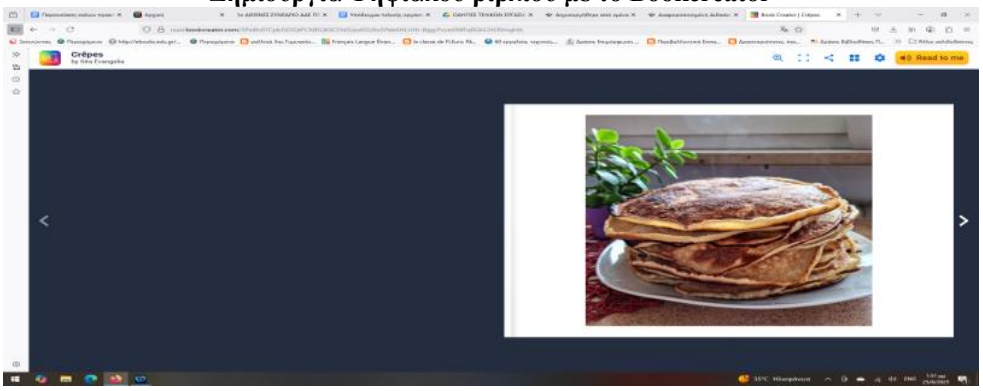
Τέλος, η εμπλοκή των μαθητών στον πολυμεσικό γραμματισμό ενισχύει τη μάθησή τους σε ένα ψηφιακό πλαίσιο. Αυτό απαιτεί όχι μόνο ψηφιακές και τεχνικές δεξιότητες, αλλά και ικανότητες όπως η σύνθεση, αξιολόγηση, κριτική και παρουσίαση πληροφοριών. Η παρουσίαση αφίσας αποτελεί μια βιωματική δραστηριότητα που διεγείρει την

περιέργεια, ενθαρρύνει την εξερεύνηση και παρέχει ένα νέο τρόπο μάθησης της ξένης γλώσσας, οδηγώντας σε θετική στάση απέναντι στη γνώση και τη δημιουργία.



Η χρήση του padlet (Εικόνα 7) αυξάνει τη συμμετοχή των μαθητών στο μάθημα, μειώνει το άγχος τους, ενθαρρύνει τη συνεργασία μεταξύ μαθητών αλλά και των μαθητών με τον εκπαιδευτικό και βελτιώνει την ακρίβεια των μαθητών μέσω της συνεργασίας με συνομηλίκους (Rashid, Yunus, and Wahi 2019). Οι μαθητές μπορούν να εκφράσουν τις απόψεις τους γραπτώς και να συνεργαστούν είτε μέσα στην τάξη είτε εκτός τάξης μέσω της χρήσης του padlet.

Το ψηφιακό εργαλείο δημιουργίας διαδραστικού βιβλίου Bookcreator (Εικόνα 8) επιτρέπει στους μαθητές να εκφράσουν τη δημιουργικότητά τους με διάφορους τρόπους, δημιουργώντας διαδραστικά βιβλία με εικόνες, βίντεο, ήχο και κείμενο.Οι μαθητές συμμετέχουν ενεργά στη διαδικασία μάθησης, καθώς δημιουργούν το δικό τους ψηφιακό βιβλίο, αντί να είναι απλοί δέκτες πληροφοριών.Οι μαθητές μπορούν να προσαρμόσουν το περιεχόμενο του βιβλίου τους στις ανάγκες και τα ενδιαφέροντά τους, κάνοντας τη μάθηση πιο ενδιαφέρουσα και ελκυστική.



Το ψηφιακό εργαλείο TN GammaAI (Εικόνα 9) ενισχύει την εξατομικευμένη μάθηση και επιτρέπει στους μαθητές να δημιουργούν όμορφο, ελκυστικό περιεχόμενο χωρίς την ταλαιπωρία της μορφοποίησης και της σχεδίασης. Η εφαρμογή Gamma ενθαρρύνει επίσης τη συνεργασία μεταξύ των μαθητών και ευνοεί τη δημιουργία εξαιρετικών έργων ακομα και για εκείνους που δυσκολεύονται με τη μορφοποίηση των παρουσιάσεων.

Η δημιουργία ψηφιακών κουίζ με το εργαλείο Kahoot (Εικόνα 10) μετατρέπει την εκπαιδευτική διαδικασία σε παιχνίδι, κάνοντας τους μαθητές να συμμετέχουν με πιο ενεργό τρόπο δημιουργώντας ένα θετικό και διασκεδαστικό περιβάλλον μάθησης. Οι μαθητές λαμβάνουν άμεση ανατροφοδότηση για τις απαντήσεις τους, βοηθώντας τους να κατανοήσουν καλύτερα τις έννοιες και να διορθώσουν τυχόν λάθη.Το Kahoot μπορεί να χρησιμοποιηθεί για ομαδικές δραστηριότητες, ενθαρρύνοντας την συνεργασία και την επικοινωνία μεταξύ των μαθητών.

Ο ΗΛΕΚΤΡΟΝΙΚΟΣ ΦΑΚΕΛΟΣ ΑΞΙΟΛΟΓΗΣΗΣ ΣΤΟ ΜΑΘΗΜΑ ΤΩΝ ΓΑΛΛΙΚΩΝ: ΠΑΙΔΑΓΩΓΙΚΕΣ ΠΡΟΕΚΤΑΣΕΙΣ ΚΑΙ ΠΡΑΚΤΙΚΗ ΕΦΑΡΜΟΓΗ

Ο ηλεκτρονικός φάκελος αξιολόγησης, ή αλλιώς e-portfolio, αποτελεί μια σύγχρονη ψηφιακή πλατφόρμα σχεδιασμένη για τη συλλογή, οργάνωση και προβολή εργασιών, αναστοχασμών και επιτευγμάτων ενός ατόμου με δομημένο και προσβάσιμο τρόπο. Δεν πρόκειται για μια απλή συλλογή ψηφιακών αντικειμένων, όπως ένα ψηφιακό λεύκωμα ή μια πολυμεσική παρουσίαση, αλλά για ένα εργαλείο αναστοχασμού που καταδεικνύει τη μαθησιακή ανάπτυξη με την πάροδο του χρόνου. Η παιδαγωγική φιλοσοφία που διέπει το e-portfolio βασίζεται στον κοινωνικό κονστρουκτιβισμό, μια θεωρία μάθησης που υποστηρίζει ότι η γνώση δομείται πιο αποτελεσματικά όταν οι μαθητές την οικοδομούν οι ίδιοι, μέσα από διάλογο και αλληλεπίδραση με άλλους (Meirieu, 2010).

Η υιοθέτηση του e-portfolio αναδεικνύει την αναγκαιότητα της αυθεντικής αξιολόγησης στο σύγχρονο γλωσσικό μάθημα. Σε αντίθεση με τις παραδοσιακές μεθόδους αξιολόγησης, όπως οι χρονομετρημένες γραπτές εξετάσεις που εστιάζουν στο τελικό αποτέλεσμα, τα e-portfolios είναι προσανατολισμένα στη διαδικασία μάθησης (Huy Phung, 2016). Αυτή η προσέγγιση ενθαρρύνει τους μαθητές να επιδεικνύουν τα μαθησιακά τους επιτεύγματα, να αναστοχάζονται κριτικά στη μαθησιακή τους πορεία και να αναθεωρούν και να βελτιώνουν διαρκώς την εργασία τους. Πρόκειται για ένα αυθεντικό εργαλείο αξιολόγησης που αντικατοπτρίζει πραγματικές καταστάσεις και λαμβάνει υπόψη τις ικανότητες, τις κλίσεις και τα ενδιαφέροντα κάθε μαθητή (Panteliadou & Filippatou, 2013). Αυτή η διαφοροποίηση υποδηλώνει μια θεμελιώδη μεταβολή από την αθροιστική αξιολόγηση, η οποία επικεντρώνεται στο τι γνωρίζει ο μαθητής σε μια συγκεκριμένη χρονική στιγμή, προς μια διαμορφωτική προσέγγιση που παρακολουθεί την ανάπτυξη του μαθητή διαχρονικά. Η σημασία αυτής της μεταβολής έγκειται στην παροχή μιας πιο ολιστικής και δίκαιης αξιολόγησης της γλωσσικής ανάπτυξης, αναγνωρίζοντας τη μάθηση ως μια συνεχή και εξελικτική διαδικασία, και όχι ως ένα στατικό στιγμιότυπο (Tagliante,2025). Αυτή η προσέγγιση έχει τη δυνατότητα να μεταμορφώσει την εκπαιδευτική πρακτική, καθιστώντας την αξιολόγηση αναπόσπαστο και υποστηρικτικό μέρος της ίδιας της μάθησης.

ΓΙΑΤΙ ΝΑ ΕΠΙΛΕΞΟΥΜΕ ΤΟ E-PORTFOLIO ΣΤΑ ΓΑΛΛΙΚΑ;

Η ενσωμάτωση του e-portfolio στο μάθημα των Γαλλικών προσφέρει πολλαπλά οφέλη. Πρωτίστως, ενισχύεται η αυτονομία και ο κριτικός αναστοχασμός των μαθητών βελτιώνοντας την απόδοσή τους, η οποία δεν θα ήταν εφικτή με συμβατικές μεθόδους. Δεύτερον, προωθείται η ενεργητική μάθηση και η εξατομίκευση καθώς τους δίνεται η αυτονομία να επιλέγουν και να επιμελούνται τις δικές τους εργασίες, δημιουργώντας ένα προσωπικό αποθετήριο της μάθησής τους

(Przesmycki, 2004). Επιπλέον, τα e-portfolios συμβάλλουν στην ανάπτυξη ψηφιακών δεξιοτήτων και πολυμεσικής έκφρασης καθώς λειτουργούν ως "σχεδιαστές" των ψηφιακών τους χώρων. Αυτή η διπλή ανάπτυξη, γλωσσικής επάρκειας και ψηφιακής παιδείας, είναι ζωτικής σημασίας για τον 21ο αιώνα, καθώς οι μαθητές εφοδιάζονται με δεξιότητες που είναι απαραίτητες τόσο στην ακαδημαϊκή όσο και στην επαγγελματική τους ζωή (Weber, Cai & Elliston, 2023).

ΒΗΜΑΤΑ ΕΦΑΡΜΟΓΗΣ ΤΟΥ E-PORTFOLIO ΣΤΗΝ ΤΑΞΗ ΤΩΝ ΓΑΛΛΙΚΩΝ

Το πρώτο και πιο κρίσιμο βήμα είναι ο καθορισμός του σκοπού και των στόχων του e-portfolio. Θα χρησιμοποιηθεί για διαμορφωτική αξιολόγηση, εστιάζοντας στη συνεχή διαδικασία μάθησης και την παροχή ανατροφοδότησης, ή για αθροιστική αξιολόγηση, επικεντρώνοντας στα τελικά μαθησιακά αποτελέσματα;. Η επιλογή του σκοπού θα καθορίσει άμεσα το περιεχόμενο, την οργάνωση και τα κριτήρια αξιολόγησης του φακέλου (Kouloubaritsi & Matsagouras, 2004). Ακολουθεί η επιλογή της πλατφόρμας και η παροχή τεχνολογικής υποστήριξης. Είναι απαραίτητο να ληφθεί υπόψη η διαθεσιμότητα και ο βαθμός εξοικείωσης των μαθητών με την τεχνολογία. Ένα θεμελιώδες βήμα είναι η συλλογή και οργάνωση των τεκμηρίων μάθησης. Οι μαθητές καλούνται να συλλέγουν εργασίες που καταδεικνύουν την επίτευξη των μαθησιακών στόχων και την πρόοδό τους. Η οργάνωση των τεκμηρίων σε λογικές ενότητες είναι κρίσιμη για την ευκολία πλοήγησης και την αποτελεσματική αξιολόγηση (Feresidi, 2016).

Η διαδικασία αναστοχασμού και αυτοαξιολόγησης αποτελεί τον πυρήνα της παιδαγωγικής αξίας του e-portfolio. Απαραίτητη είναι η ενσωμάτωση αναστοχαστικών σημειώσεων, στις οποίες οι μαθητές εκφράζουν τις σκέψεις τους για τη μαθησιακή διαδικασία, τις προκλήσεις που αντιμετώπισαν και τα διδάγματα που αποκόμισαν. Ο αναστοχασμός βοηθά τους μαθητές να αξιολογήσουν κριτικά την εργασία τους, να κάνουν συνδέσεις μεταξύ διαφορετικών μαθημάτων ή δραστηριοτήτων και να αναπτύξουν μεταγνωστικές δεξιότητες, δηλαδή την ικανότητα να κατανοούν πώς μαθαίνουν και πώς μπορούν να βελτιωθούν.

Τέλος, η παροχή ανατροφοδότησης και η αξιολόγηση είναι αναπόσπαστο μέρος της διαδικασίας. Πρέπει να ενσωματωθούν μηχανισμοί ανατροφοδότησης, τόσο από τους εκπαιδευτικούς όσο και από τους συμμαθητές, καθ' όλη τη διάρκεια της ανάπτυξης του e-portfolio. Η ανατροφοδότηση αυτή πρέπει να είναι διαμορφωτική, δηλαδή να επικεντρώνεται στην καθοδήγηση των μαθητών για συνεχή βελτίωση. Η αξιολόγηση του e-portfolio πρέπει να βασίζεται σε προκαθορισμένα, σαφή κριτήρια τα οποία πρέπει να είναι γνωστά στους μαθητές από την αρχή της διαδικασίας (Feresidi, 2016).

ΠΕΡΙΕΧΟΜΕΝΑ ΤΟΥ ΗΛΕΚΤΡΟΝΙΚΟΥ ΦΑΚΕΛΟΥ ΑΞΙΟΛΟΓΗΣΗΣ ΓΑΛΛΙΚΩΝ

Ο ηλεκτρονικός φάκελος αξιολόγησης για το μάθημα των Γαλλικών μπορεί να περιλαμβάνει μια ποικιλία τεκμηρίων, τα οποία αντικατοπτρίζουν τις διαφορετικές πτυχές της γλωσσικής επάρκειας και της μαθησιακής διαδικασίας σύμφωνα με το ΕΠΣ-ΞΓ (Υ.Α. 141417/Δ2/02-09-2016, ΦΕΚ 2871/τ.Β΄/09-09-2016). Ενδεικτικά, αναφέρουμε τις γραπτές εργασίες, τις ηχογραφήσεις προφορικού λόγου, τα βίντεο παρουσιάσεων, τα ατομικά ή ομαδικά προϊόντα, τις ψηφιακές δημιουργίες, τις αυτοαξιολογήσεις και τα αναστοχαστικά κείμενα, φωτογραφίες από εκπαιδευτικές δραστηριότητες κτλ.

ΟΦΕΛΗ ΤΟΥ E-PORTFOLIO ΓΙΑ ΤΟΥΣ ΜΑΘΗΤΕΣ

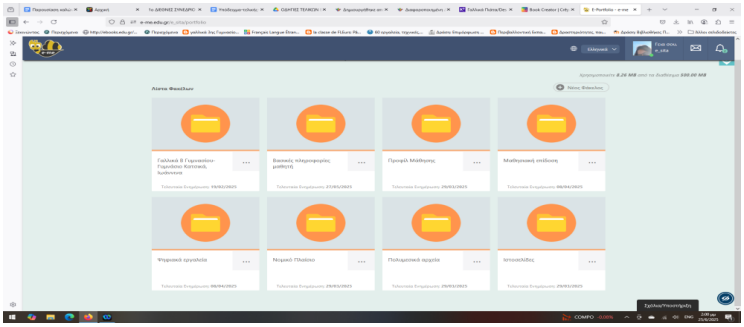
Πρώτον, οδηγεί σε αυξημένο κίνητρο και εμπλοκή, καθώς οι μαθητές αποκτούν ιδιοκτησία της μάθησής τους, επιλέγοντας το περιεχόμενο του φακέλου τους και αναστοχαζόμενοι στην πρόοδό τους ενισχύοντας την εσωτερική τους παρακίνηση για μάθηση. Δεύτερον, επιτρέπει στους μαθητές να παρακολουθούν την εξέλιξή τους και να βλέπουν απτά τις βελτιώσεις στην απόδοσή τους. Τρίτον, συμβάλλει στην ανάπτυξη μεταγνωστικών δεξιοτήτων. Μέσω του αναστοχασμού, οι μαθητές κατανοούν πώς μαθαίνουν, τι γνωρίζουν και τι χρειάζονται να βελτιώσουν, ενισχύοντας την αυτοεκτίμηση και την ικανότητα επίλυσης προβλημάτων. Τέλος, το e-portfolio λειτουργεί ως μέσο προετοιμασίας για το μέλλον, καθώς οι μαθητές δημιουργούν μια επαγγελματική διαδικτυακή παρουσία και επιδεικνύουν τις δεξιότητές τους για μελλοντικές σπουδές ή την αγορά εργασίας (Ciesielkiewicz & Coca,2013)

ΟΦΕΛΗ ΓΙΑ ΤΟΥΣ ΕΚΠΑΙΔΕΥΤΙΚΟΥΣ

Αποκτούν μια ολιστική εικόνα της μάθησης, καθώς ο φάκελος παρέχει μια ολοκληρωμένη και διαχρονική καταγραφή της προόδου των μαθητών. Αυτό τους επιτρέπει να εντοπίζουν τις ατομικές ανάγκες και να προσαρμόζουν τη διδασκαλία τους αποτελεσματικότερα. Η βαθύτερη κατανόηση των μαθητών οδηγεί σε εξατομικευμένη διδασκαλία και σχεδιασμό διαφοροποιημένων δραστηριοτήτων. Τέλος, συμβάλλει στην αξιολόγηση του προγράμματος σπουδών και του διδακτικού έργου, παρέχοντας δεδομένα για τη βελτίωση της εκπαιδευτικής διαδικασίας (Feresidi &Tsitas,2023).

ΟΦΕΛΗ ΓΙΑ ΤΟΥΣ ΓΟΝΕΙΣ

Παρέχει άμεση και συγκεκριμένη ενημέρωση για την πρόοδο του παιδιού τους, με απτά παραδείγματα των εργασιών και των επιτευγμάτων του. Αυτό ενθαρρύνει την συμμετοχή τους στην εκπαιδευτική διαδικασία και τους κάνει να αισθάνονται πιο ενεργό μέρος της αξιολόγησης. Επιπλέον, λειτουργεί ως εξαιρετική βάση για συζήτηση κατά τη διάρκεια συναντήσεων γονέων-εκπαιδευτικών, καθώς παρέχονται συγκεκριμένα τεκμήρια που μπορούν να συζητηθούν(Upbility, 2025).



ΟΦΕΛΗ ΓΙΑ ΤΟ ΕΚΠΑΙΔΕΥΤΙΚΟ ΣΥΣΤΗΜΑ

Οι μαθητές αναστοχάζονται , οι εκπαιδευτικοί αποκτούν βαθύτερη κατανόηση , οι γονείς ενημερώνονται , και το εκπαιδευτικό σύστημα συλλέγει δεδομένα για βελτίωση προγραμμάτων. Αυτή η αλληλεπίδραση ενισχύει τη διαφάνεια και τη λογοδοσία. Η υιοθέτηση των e-portfolios μπορεί να οδηγήσει σε ένα πιο συνεκτικό και αποτελεσματικό εκπαιδευτικό οικοσύστημα, όπου η αξιολόγηση δεν είναι απλώς μια τελική κρίση, αλλά ένας συνεχής κύκλος μάθησης, ανατροφοδότησης και βελτίωσης για όλους τους εμπλεκόμενους.

ΑΞΙΟΠΟΙΗΣΗ ΤΗΣ ΠΛΑΤΦΟΡΜΑΣ E-ME ΓΙΑ ΤΟ E-PORTFOLIO ΣΤΑ ΓΑΛΛΙΚΑ

Η πλατφόρμα e-me, ως η Ενιαία Ψηφιακή Εκπαιδευτική Πλατφόρμα του Υπουργείου Παιδείας, Θρησκευμάτων και Αθλητισμού, προσφέρει ένα ενσωματωμένο περιβάλλον για την ανάπτυξη και διαχείριση e-portfolios, καθιστώντας την μια ιδιαίτερα προσβάσιμη επιλογή για το μάθημα των Γαλλικών στην Ελλάδα. Η e-me διαθέτει μια ειδική εφαρμογή "e-portfolio" (Εικόνα 11). Αυτή η εφαρμογή λειτουργεί ως ένας προσωπικός ηλεκτρονικός φάκελος δεξιοτήτων, αποτελώντας μια ευέλικτη και εύχρηστη εκδοχή του παραδοσιακού έντυπου portfolio. Οι βασικές λειτουργικότητές της περιλαμβάνουν: δημιουργία και οργάνωση φακέλων, ανάρτηση και αποθήκευση αρχείων, διαμοιρασμός και προβολή, υποστήριξη αναστοχασμού.

Εικόνα 11.
Πλατφόρμα e-me-Δημιουργία e-portfolio

ΣΥΜΠΕΡΑΣΜΑΤΑ ΚΑΙ ΠΡΟΟΠΤΙΚΕΣ

Ο ηλεκτρονικός φάκελος αξιολόγησης (eportfolio) αναδεικνύεται ως ένα σύγχρονο, δυναμικό και πολυδιάστατο εργαλείο που υπερβαίνει τα όρια της παραδοσιακής αξιολόγησης. Για την κλιμάκωση της χρήσης των e-portfolios στο μάθημα των Γαλλικών και πέρα από αυτό, απαιτείται μια συστηματική, ολιστική προσέγγιση που να περιλαμβάνει την ανάπτυξη ικανοτήτων, την προσαρμογή του προγράμματος σπουδών και την παροχή συνεχούς υποστήριξης, διασφαλίζοντας ότι το εργαλείο χρησιμοποιείται για τη μεγιστοποίηση των μαθησιακών αποτελεσμάτων και όχι απλώς ως ένα ψηφιακό αποθετήριο. Το e-portfolio ωφελεί περισσότερο όταν εντάσσεται σε μια "συνεκτική προσέγγιση διδασκαλίας και μάθησης"(Eric, 2025). Αυτό σημαίνει ότι η επιτυχία δεν εξαρτάται μόνο από την τεχνολογία, αλλά από την παιδαγωγική ενσωμάτωση σε ολόκληρο το πρόγραμμα σπουδών και την υποστήριξη από το εκπαιδευτικό σύστημα.

ΠΕΡΙΛΗΨΗ

Το διδακτικό σενάριο που παρουσιάζεται σχεδιάστηκε σύμφωνα με τις Θεματικές Περιοχές και τα Προσδοκώμενα Μαθησιακά Αποτελέσματα του νέου Προγράμματος Σπουδών για την Προσχολική Εκπαίδευση, εστιάζοντας στα στάδια της ανάπτυξης των φυτών (Φυσικές Επιστήμες), ενώ παράλληλα εμπλέκει τα Θεματικά Πεδία των Κοινωνικών Επιστημών και των Τεχνολογιών Πληροφορίας και Επικοινωνίας (ΤΠΕ). Στόχος του σεναρίου είναι η αξιοποίηση διεπαφών Τεχνητής Νοημοσύνης (AI) ως εργαλείου ενίσχυσης της βιωματικής μάθησης μέσω διαδραστικών και συνεργατικών δραστηριοτήτων.

Ακολουθεί το διδακτικό μοντέλο μάθησης 5e (Engage, Explore, Explain, Elaborate, Evaluate) που προτείνει το νέο Πρόγραμμα Σπουδών για την Προσχολική Εκπαίδευση και δομείται ως εξής: η μάθηση και η διαδικασία εκκινείται με την εισαγωγή μιας διαδραστικής φωνητικής AI μέσω της οποίας μια εικονική μέλισσα εμφανίζεται στην τάξη και ζητά βοήθεια από τους μαθητές/τριες για να μάθει πώς αναπτύσσεται το φυτό. Με τον τρόπο αυτό ενεργοποιείται το ενδιαφέρον και η περιέργεια των παιδιών για το θέμα (Engage). Στη συνέχεια τα νήπια χωρίζονται σε ομάδες, αναζητούν πληροφορίες σχετικά με την ανάπτυξη των φυτών χρησιμοποιώντας εκπαιδευτικό ψηφιακό υλικό, ενώ ο ρόλος του εκπαιδευτικού είναι συντονιστικός και καθοδηγητικός, καθώς μέσα από στοχευμένες ερωτήσεις ενθαρρύνει τα παιδιά να διατυπώσουν τις αρχικές τους γνώσεις και να τις κατανοήσουν καλύτερα εμπλουτίζοντάς τες (Explore). Ακολουθεί η φάση της Ερμηνείας όπου η μέλισσα ζητά επιπλέον διευκρινήσεις και τα παιδιά αξιοποιώντας εργαλεία AI συνεργάζονται και πάλι σε μικρές ομάδες και παρουσιάζουν στην ολομέλεια το αποτέλεσμα της εργασίας τους και όσα έχουν μάθει, ενισχύοντας με αυτό τον τρόπο τη γλωσσική τους ανάπτυξη και προάγοντας την κριτική τους σκέψη (Explain). Για τη δραστηριότητα Εμπέδωσης (Elaborate) γίνεται χρήση ψηφιακών παιχνιδιών αξιολόγησης (π.χ. Wordwall, Quizizz, LearningApps) τόσο για αξιολόγηση όσο και για την επανάληψη των εννοιών με παιγνιώδη τρόπο ώστε να αποτυπωθεί η γνώση των παιδιών με φυσικό και ευχάριστο τρόπο. Έτσι τα νήπια αναπτύσσουν δεξιότητες δημιουργικής σκέψης και ψηφιακής έκφρασης. Το τελευταίο στάδιο, αυτό της Αξιολόγησης, ολοκληρώνεται με δραστηριότητες αυτοαξιολόγησης και ετεροαξιολόγησης, ώστε να καλλιεργηθούν μεταγνωστικές δεξιότητες στους μαθητές/τριες και η ικανότητά τους να αναστοχάζονται πάνω στη μαθησιακή τους πορεία.

Συμπερασματικά, το συγκεκριμένο διδακτικό σενάριο αναδεικνύει τη δυναμική της Τεχνητής Νοημοσύνης στην προσχολική εκπαίδευση, προτείνοντας μια πολυδιάστατη, διαδραστική και συνεργατική προσέγγιση στη μάθηση. Η αξιοποίηση καινοτόμων τεχνολογιών όχι μόνο ενισχύει τη μαθησιακή διαδικασία αλλά και διαμορφώνει το σχολείο του μέλλοντος, στο οποίο η ψηφιακή καινοτομία συνυπάρχει με την παιδαγωγική δημιουργικότητα.

Λέξεις – κλειδιά: Διεπαφές Τεχνητής Νοημοσύνης, διδακτικό μοντέλο 5e, ψηφιακή μάθηση, προσχολική εκπαίδευση και AI

ΕΙΣΑΓΩΓΗ

Η εισαγωγή της τεχνητής νοημοσύνης (ΤΝ) στην προσχολική εκπαίδευση αποτελεί ένα ταχέως αναπτυσσόμενο πεδίο που ανοίγει νέους ορίζοντες στη μαθησιακή εμπειρία των μαθητών/τριών. Μεγαλώνοντας σε έναν κόσμο όπου η ΤΝ είναι παρούσα σε πάμπολλες πτυχές της καθημερινότητάς τους. η ενσωμάτωσή της στο νηπιαγωγείο είναι απαραίτητη συμβάλλοντας στην καλλιέργεια δεξιοτήτων όπως η κριτική σκέψη, η επίλυση προβλημάτων και η δημιουργικότητα (Kandlhofer et al., 2016).

Μία από τις σημαντικότερες εφαρμογές της στην εκπαίδευση είναι οι λεγόμενες Πλατφόρμες Προσαρμοστικής Μάθησης, οι οποίες χρησιμοποιούν αλγόριθμους ΤΝ για να αναλύουν τα δεδομένα των μαθητών/τριών και να υποστηρίζουν τους εκπαιδευτικούς στην αξιολόγηση του γνωστικού επιπέδου των παιδιών προσφέροντας εξατομικευμένη υποστήριξη και προσαρμόζοντας τη διδασκαλία με βάση τις προσωπικές μαθησιακές ανάγκες και τα ενδιαφέροντα της μαθητικής τους ομάδας (Blackwell et al., 2014). Με τη χρήση ειδικά σχεδιασμένων εφαρμογών σε συνδυασμό με διαδραστικά εργαλεία, μπορούν να εντοπίσουν τα δυνατά και αδύναμα σημεία των μαθητών τους προσφέροντας εξατομικευμένα μαθησιακά πλαίσια και διασφαλίζοντας ότι κάθε μαθητής θα μπορεί να αξιοποιήσει πλήρως τις δυνατότητές του (Holmes et al., 2019). Προσαρμόζοντας και διαφοροποιώντας τόσο το αναλυτικό πρόγραμμα όσο και τις διδακτικές τους πρακτικές σύμφωνα με τις εξατομικευμένες ανάγκες κάθε παιδιού, καθιστούν την ΤΝ ιδιαίτερα πολύτιμη στην προσχολική εκπαίδευση, όπου η διαφοροποίηση της διδασκαλίας είναι απαραίτητη λόγω των διαφορετικών ρυθμών ανάπτυξης των παιδιών (Bers, 2020).

Επιπλέον, έχει αποδειχθεί επιστημονικά ότι δραστηριότητες ΤΝ στην προσχολική ηλικία ενισχύουν την κριτική σκέψη και τις δεξιότητες λήψης αποφάσεων (Papadakis & Kalogiannakis, 2020), ενώ μπορούν να προσαρμοστούν στο ρυθμό μάθησης των μικρών παιδιών και να βοηθήσουν σημαντικά την ανάπτυξη γλωσσικών, αριθμητικών, συναισθηματικών δεξιοτήτων προσφέροντας ένα ελκυστικό και διαδραστικό τρόπο διαπαιδαγώγησης (Chen, L. et al., 2020).

Παράλληλα, μέσα από αυτές οι μαθητές της προσχολικής ηλικίας μαθαίνουν να αξιολογούν τις πράξεις τους και να κατανοούν τις συνέπειες των επιλογών τους καλλιεργώντας έτσι την ανεξαρτησία τους (Mubin et al., 2013). Επίσης, οι δραστηριότητες που αξιοποιούν εργαλεία τεχνητής νοημοσύνης με δυνατότητα δημιουργίας σεναρίων και περιβαλλόντων στα οποία τα παιδιά πειραματίζονται με ιδέες και αναπτύσσουν εναλλακτικές λύσεις, συμβάλλουν στην ενίσχυση της δημιουργικότητας και της φαντασίας τους (Duffy, 2006).

Εξάλλου, η τεχνητή νοημοσύνη μπορεί να διαδραματίσει καθοριστικό ρόλο στην ενίσχυση της πολυπολιτισμικότητας στο νηπιαγωγείο, μέσω εργαλείων που βοηθούν τους μαθητές να γνωρίσουν και να κατανοήσουν την πολιτισμική ποικιλομορφία. Εκπαιδευτικά προγράμματα με προσαρμοστικό χαρακτήρα, βασισμένα στην ΤΝ, μπορούν να αξιοποιηθούν από τους παιδαγωγούς για την ενθάρρυνση διαπολιτισμικού διαλόγου, προσφέροντας περιεχόμενο και δραστηριότητες που λαμβάνουν υπόψη τις γλωσσικές και πολιτισμικές ιδιαιτερότητες των παιδιών. Τέτοιες εφαρμογές παρέχουν βιωματικές εμπειρίες που ενισχύουν την κατανόηση και τον σεβασμό της διαφορετικότητας, καλλιεργώντας από νωρίς αξίες όπως η αποδοχή και η συνεργασία (Holmes et al., 2019).

Τέλος, η ένταξη της τεχνητής νοημοσύνης στην προσχολική εκπαίδευση μπορεί να συμβάλει στην ανάπτυξη θετικής στάσης των παιδιών απέναντι στην τεχνολογία, ενισχύοντας την εξοικείωσή τους με τα ψηφιακά εργαλεία και την ικανότητά τους να τα χρησιμοποιούν με αυτονομία. Μέσα από αυτή τη διαδικασία, διαμορφώνονται τα θεμέλια για μια υπεύθυνη και ενεργή σχέση με την τεχνολογία στην ενήλικη ζωή (Bers, 2020).

Ωστόσο, λόγω της ιδιαίτερης φύσης των προσωπικών δεδομένων των παιδιών που αφορούν τις μαθησιακές τους ανάγκες, το γνωστικό κομμάτι και τις προτιμήσεις τους, είναι απαραίτητο να τηρούνται οι νομικές διατάξεις όπως ο Γενικός Κανονισμός για την Προστασία Δεδομένων (GDPR), ώστε να διασφαλίζεται η υπεύθυνη συλλογή και επεξεργασία των πληροφοριών μέσω των εφαρμογών τεχνητής νοημοσύνης (Holmes et al., 2019).

Ένα αρνητικό σημείο της χρήσης ΤΝ στην εκπαίδευση θεωρείται η άνιση πρόσβαση στην εκπαιδευτική τεχνολογία μεταξύ των κοινωνικών ομάδων κάτι που εντείνει τις εκπαιδευτικές ανισότητες. Πιο συγκεκριμένα, κοινότητες με περιορισμένους οικονομικούς πόρους συναντούν δυσκολίες στην υιοθέτηση και εφαρμογή τέτοιων καινοτομιών, γεγονός που τις φέρνει σε μειονεκτική θέση (UNICEF, 2021).

Επιπροσθέτως, εκπαιδευτικοί εκφράζουν προβληματισμούς σχετικά με την πιθανή μείωση της διαπροσωπικής επαφής μέσα στη μαθησιακή διαδικασία. Αν και η ΤΝ μπορεί να λειτουργήσει ενισχυτικά στη διδασκαλία, δεν είναι σε θέση να αντικαταστήσει τη συναισθηματική σύνδεση, την ενσυναίσθηση και τη στήριξη που προσφέρει ο εκπαιδευτικός.

Για τον λόγο αυτό, είναι αναγκαίο να διατηρείται μια ισορροπία μεταξύ της παρουσίας του εκπαιδευτικού και της χρήσης της τεχνολογίας στην εκπαιδευτική διαδικασία (Williams et al., 2019).

Συνοψίζοντας, η αξιοποίηση διεπαφών ΤΝ στο νηπιαγωγείο παρουσιάζει σημαντικές ευκαιρίες για την ενίσχυση της μαθησιακής εμπειρίας, την ανάπτυξη δεξιοτήτων και την προετοιμασία των παιδιών για έναν κόσμο όπου η ΤΝ θα είναι αναπόσπαστο μέρος της καθημερινότητας. Ωστόσο, απαιτείται προσεκτικός σχεδιασμός, κατάλληλη επιμόρφωση των εκπαιδευτικών και συνεκτίμηση των ηθικών και κοινωνικών παραμέτρων για την επιτυχή ενσωμάτωσή της στην προσχολική εκπαίδευση.

ΔΙΔΑΚΤΙΚΗ ΜΕΘΟΔΟΛΟΓΙΑ

Διδακτικό Μοντέλο 5e

Το διδακτικό μοντέλο που χρησιμοποιείται για την ανάπτυξη των δραστηριοτήτων του παρόντος διδακτικού σεναρίου είναι το 5E (Bybee R. W. et al., 2006; Penderi et al, 2021), σύμφωνα με το οποίο η μαθησιακή διαδικασία βασίζεται στη διερευνητική μάθηση και εξελίσσεται σε πέντε διαδοχικές φάσεις οι οποίες ουσιαστικά αλληλοδιαπλέκονται. Η ονομασία 5e οφείλεται στο αρχικό γράμμα Ε που επαναλαμβάνεται σε όλες οι φάσεις: α. Εξοικείωση, β. Επισκόπηση, γ. Επεξήγηση, δ. Εμπλουτισμός, ε. Εκτίμηση.

Πιο συγκεκριμένα, στην 1η Φάση (ΕΞΟΙΚΕΙΩΣΗ) υλοποιούνται δραστηριότητες εισαγωγής και ευαισθητοποίησης των μαθητών/τριών με το θέμα και η ανάπτυξη προβληματισμού σε σχέση με το προς διερεύνηση ζήτημα. Αυτό μπορεί να επιτευχθεί είτε με τον εμπλουτισμό των κέντρων μάθησης με σχετικά υλικά, είτε με την ανάγνωση σχετικών βιβλίων, είτε με αξιοποίηση υλικών από το διαδίκτυο, μια παράσταση θεατρική ή κουκλοθέατρου που θα παρακολουθήσουν τα παιδιά, μια επίσκεψη εντός ή εκτός σχολείου κλπ, έτσι ώστε να κινητοποιηθεί το ενδιαφέρον τους και να οργανωθεί μια συζήτηση που θα υποστηρίξει την ανάκληση πρότερων γνώσεων και εναλλακτικών ιδεών. Σε αυτό το σημείο καταγράφεται η πρώτη και δεύτερη στήλη του διαγράμματος K-W-L-H, δημιουργούνται εννοιολογικοί χάρτες και ιδεοθύελλες, αξιοποιώντας διδακτικές τεχνικές όπως είναι ο καταιγισμός των ιδεών. Μια πολύ καλή ιδέα υποστήριξης των παιδιών σε αυτή τη φάση είναι η αξιοποίηση της κούκλας (γαντόκουκλα κούκλα της τάξης, κούκλα Persona κλπ) η οποία ως επιστημονικός συνεργάτης των παιδιών μπορεί να βοηθήσει στη συζήτηση, στην ανάδυση προ υπαρχουσών γνώσεων και στην τελική διατύπωση του προς διερεύνηση ζητήματος.

Στη 2η Φάση (ΕΠΙΣΚΟΠΗΣΗ) υλοποιούνται δραστηριότητες με τις οποίες τα παιδιά αναζητούν και επεξεργάζονται τις πληροφορίες και με χρήση κατάλληλων εργαλείων καλλιεργούν δεξιότητες που θα χρησιμοποιήσουν στις επόμενες δραστηριότητες. Στη φάση αυτή τα παιδιά με βιωματικό τρόπο και εργαζόμενα ατομικά ή σε ομάδες έρχονται σε γνωστική ασυμφωνία με τις προϋπάρχουσες γνώσεις (γνωστική σύγκρουση, κοινωνιογνωστική σύγκρουση), ανασκευάζουν λανθασμένες αντιλήψεις και ιδέες και οικοδομούν νέα γνώση. Συνεχίζεται η αναδιατύπωση ή η καταγραφή νέων ερωτήσεων (2η στήλη K-W-L-H).

Στην 3η Φάση (ΕΠΕΞΗΓΗΣΗ) υλοποιούνται δραστηριότητες στις οποίες δίνονται ευκαιρίες στα παιδιά να παρουσιάσουν στην υπόλοιπη τάξη ή στα μέλη της ομάδας τους τον τρόπο με τον οποίο εργάστηκαν, πώς έλυσαν ένα πρόβλημα που είχαν, πώς υλοποίησαν ένα πείραμα επιχειρηματολογώντας και εντοπίζοντας τα λάθη τους και τις δυσκολίες που αντιμετώπισαν. Με αυτό τον τρόπο καλλιεργούν μεταγνωστικές δεξιότητες και μαθαίνουν πώς να μαθαίνουν καλύτερα.

Στην 4η Φάση (ΕΜΠΛΟΥΤΙΣΜΟΣ) υλοποιούνται δραστηριότητες εμπέδωσης, εφαρμογής και εξάσκησης των γνώσεων και δεξιοτήτων που έχουν κατακτήσει στις προηγούμενες φάσεις και καταγράφονται η 3η & 4η στήλη του διαγράμματος K-W-L-H.

Τέλος, κατά την 5η Φάση (ΕΚΤΙΜΗΣΗ) υλοποιούνται δραστηριότητες ατοαξιολόγησης και ετεροαξιολόγησης, αλλά και δραστηριότητες αξιολόγησης της πορείας και της συνολικής εργασίας των παιδιών. Αποτιμάται συνολικά το διάγραμμα K-W-L-H και γίνεται συνολική αξιολόγηση του σεναρίου, ώστε να υπάρξει η κατάλληλη ανατροφοδότηση. Η αξιολόγηση αφορά τόσο στα γνωστικά επιτεύγματα των παιδιών όσο και στις δεξιότητες που καλλιέργησαν αλλά και την επιτυχή ολοκλήρωση των δραστηριοτήτων που συμμετείχαν.

Ο Τροχός της Παιδαγωγικής

Ο Τροχός της Παιδαγωγικής (Pedagogy Wheel) είναι ένα μοντέλο που μπορούν να χρησιμοποιήσουν και εκπαιδευτικοί που δεν έχουν ιδιαίτερη εξοικείωση με τεχνολογικά εργαλεία, καθώς τους βοηθά να επιλέξουν εφαρμογές που εξυπηρετούν συγκεκριμένους μαθησιακούς στόχους. Χρησιμοποιεί τεχνολογικά εργαλεία που υποστηρίζουν τα

επίπεδα της Ταξινομίας του Bloom και το μοντέλο SAMR (Substitution, Augmentation, Modification, Redefinition). Οι στόχοι μπορούν να αφορούν είτε Ενσωμάτωση τεχνολογίας: Βοηθά στην επιλογή εργαλείων που ενισχύουν την κριτική σκέψη, τη συνεργασία και τη δημιουργικότητα, αλλά και την ανάπτυξη ψηφιακών δεξιοτήτων προσαρμόζοντας τη διδασκαλία στις σύγχρονες απαιτήσεις της εκπαίδευσης με έμφαση στις δεξιότητες του 21ου αιώνα (Carrington A., https://mentep.pi.ac.cy/resource-details/The-pedagogy-Wheel).

ΑΝΑΛΥΤΙΚΗ ΔΙΔΑΚΤΙΚΗ ΠΡΟΣΕΓΓΙΣΗ

Γενικός σκοπός του σεναρίου είναι να γνωρίσουν τα παιδιά τα στάδια εξέλιξης του φυτού χρησιμοποιώντας ταυτόχρονα διεπαφές Τεχνητής Νοημοσύνης

Σύνδεση με Στόχους Ταξινομίας του BLOOM

- Γνώση (Remembering). Ανάκληση πληροφοριών και βασικών εννοιών: Να μάθουν για την ανάπτυξη των φυτών.
- Κατανόηση (Understanding). Ερμηνεία, εξήγηση και σύγκριση πληροφοριών: Να κατανοούν τη σημασία της γύρης και του νέκταρ στην ανάπτυξη των φυτών.
- Εφαρμογή (Applying). Χρήση των γνώσεων σε νέες καταστάσεις: Να φυτεύουν σπόρους και να φροντίζουν τα φυτά τους, παρατηρώντας πώς μεγαλώνουν.
- Ανάλυση (Analyzing). Διάσπαση πληροφοριών σε μέρη, κατανόηση σχέσεων: Να αναλύουν το ταξίδι μιας μέλισσας και πώς αυτό βοηθά την ανάπτυξη των φυτών.
- Αξιολόγηση (Evaluating) - Ανάπτυξη Κριτικής σκέψης και δεξιοτήτων λήψης αποφάσεων: Να αξιολογούν το ρόλο της μέλισσας στη φύση.
- Δημιουργία (Creating) - Σύνθεση νέων ιδεών και δημιουργία πρωτότυπου έργου

Αναλυτική Πορεία Διδασκαλίας

1η Φάση: Κινητοποίηση του ενδιαφέροντος μαθητών/τριών και εισαγωγή στο θέμα.

Μια κούκλα-μέλισσα εμφανίζεται στην τάξη με τη χρήση της εφαρμογής Voice AI Avatars (π.χ. με χρήση της Synthesia), η οποία, μέσω τεχνητής φωνής και οπτικής αφήγησης, ζητά τη βοήθεια των παιδιών ώστε να ανακαλύψει τι χρειάζεται ένα σποράκι για να εξελιχθεί σε μεγάλο και υγιές φυτό. Με την τεχνική της ιδεοθύελλας καταγράφονται οι πρότερες γνώσεις και οι εναλλακτικές ιδέες των παιδιών σε ψηφιακό πίνακα συνεργασίας (πχ Padlet) από τον/την εκπαιδευτικό, σχηματίζοντας με αυτόν τον τρόπο έναν εννοιολογικό χάρτη. Το 1ο βήμα ολοκληρώνεται με τη ακριβή διατύπωση του προς διερεύνηση ερωτήματος από τα παιδιά και την καταγραφή των πρώτων δύο στηλών του διαγράμματος KWLH.

2η Φάση: Αναζήτηση πληροφοριών από τα ίδια τα παιδιά σε ομάδες και σε πολλαπλές πηγές πληροφόρησης (βιβλιοθήκη της τάξης εμπλουτισμένη με σχετικό υλικό, στο διαδίκτυο σε ασφαλείς μηχανές αναζήτησης ή σε ολιγόλεπτα βίντεο, στη γωνιά της παρατήρησης ή στο chat gpt). Ακολουθεί παρουσίαση των ευρημάτων στην ολομέλεια, με συντονισμένη συζήτηση και στοχευμένες ερωτήσεις από τον/την εκπαιδευτικό. Συνεχίζεται η καταγραφή της 3ης στήλη του KWLH.

3η Φάση: Εφαρμογή της αποκτηθείσας γνώσης. Τα παιδιά, αφού έχουν εμπεδώσει τη βασική γνώση, καλούνται να την εφαρμόσουν δημιουργικά με τη χρήση σύγχρονων ψηφιακών εργαλείων και διεπαφών τεχνητής νοημοσύνης. Χωρίζονται ξανά σε ομάδες ως εξής: Η 1η Ομάδα δημιουργεί τρεις εικόνες με τα στάδια της ανάπτυξης του φυτού (σπόρος – φύτρωση – άνθιση) χρησιμοποιώντας το εργαλείο Canva AI Image Generator. Η 2η Ομάδα επιλέγει ένα συγκεκριμένο φυτό και δημιουργεί την εξέλιξή του σε εικόνα μέσω του εργαλείου Adobe Firefly. Η 3η Ομάδα ζωγραφίζει τα στάδια του φυτού με tablets σε εφαρμογές όπως Sketchbook ή Tayasui Sketches και εισάγει τις ζωγραφιές στο Pixton για να φτιάξει ένα μικρό κόμικ. Η 4η Ομάδα δημιουργεί ένα σύντομο ψηφιακό βίντεο με Animaker ή Renderforest, δίνοντας φωνητικές εντολές ή κείμενο περιγραφής. Στο τέλος κάθε ομάδα παρουσιάζει τα αποτελέσματα της δουλειάς της, γίνεται η αυτό- και ετερο- αξιολόγηση και μέσω του avatar –μέλισσα με χρήση και πάλι της φωνητικής AI τίθενται ερωτήματα στα παιδιά, αποτιμώντας με αυτόν τον τρόπο το βαθμό κατανόησης του θέματος και ειδικά της έννοιας της επικονίασης.

4η Φάση: Γίνεται χρήση ψηφιακών παιχνιδιών αξιολόγησης (π.χ. Wordwall, Quizizz, LearningApps) τόσο για αξιολόγηση όσο και για την επανάληψη των εννοιών με παιγνιώδη τρόπο ώστε να αποτυπωθεί η γνώση των παιδιών με φυσικό και ευχάριστο τρόπο.

5η Φάση: Αξιολόγηση των μαθητών/τριών. Για την τελική αξιολόγηση των παιδιών αξιοποιούνται τόσο η τεχνική της συνεχούς παρατήρησης για τον μετασχηματισμό της διδασκαλίας, όσο και η τεχνική της Αυτοαξιολόγησης (μέσω emojis στο Mentimeter ή Kahoot! Form Poll), της Ετεροαξιολόγηση, (αξιολόγηση των ομάδων μεταξύ τους, ενισχύοντας με αυτόν τον τρόπο τη συνεργατικότητα και τον σεβασμό και τέλος με τη συμπλήρωση της 4ης στήλης του διαγράμματος KWLH και τη συνολική αποτίμηση του πίνακα και του σεναρίου από τον/την εκπαιδευτικό.

ΣΥΜΠΕΡΑΣΜΑΤΑ

Η εργασία ανέδειξε τη σημαντικότητα της αξιοποίησης διεπαφών Τεχνητής Νοημοσύνης (AI) στην προσχολική εκπαίδευση σαν εργαλείο ενίσχυσης της βιωματικής μάθησης. Μέσα από τη σχεδίαση και την εφαρμογή ενός διδακτικού σεναρίου βασισμένου στο μοντέλο 5e επιβεβαιώθηκε ότι οι τεχνολογίες AI μπορούν να ενεργοποιήσουν το ενδιαφέρον των νηπίων, να ενισχύσουν την αυτενέργεια και τη συνεργασία, και να συμβάλουν ουσιαστικά στην καλλιέργεια δεξιοτήτων του 21ου αιώνα, όπως η δημιουργικότητα, η κριτική σκέψη και η συνεργασία.

Η χρήση διαδραστικών εργαλείων και ποικίλων εφαρμογών έδωσε τη δυνατότητα στα παιδιά να πειραματιστούν, να εκφραστούν πολυτροπικά και να εμπεδώσουν έννοιες των φυσικών επιστημών με τρόπο ευχάριστο και προσαρμοσμένο στα ενδιαφέροντά τους. Η παιδαγωγική αξιοποίηση της ΤΝ οδήγησε σε αυθεντικές μαθησιακές εμπειρίες, συνδέοντας τη γνώση με τη δημιουργική παραγωγή.

Παράλληλα, η ενσωμάτωση της ΤΝ στη διδακτική πράξη ανέδειξε την ανάγκη για ισορροπία μεταξύ τεχνολογίας και διαπροσωπικής σχέσης. Αν και η ΤΝ μπορεί να προσφέρει εξατομικευμένη υποστήριξη και προσβάσιμα μαθησιακά περιβάλλοντα, ωστόσο δεν μπορεί να υποκαταστήσει τον παιδαγωγικό ρόλο του/της εκπαιδευτικού. Επιπλέον, επισημάνθηκε η σημασία τήρησης των ηθικών και νομικών πλαισίων (όπως ο Γενικός Κανονισμός Προστασίας Δεδομένων – GDPR), καθώς και η ανάγκη για επιμόρφωση των εκπαιδευτικών ώστε να χρησιμοποιούν τα εργαλεία αυτά με ασφάλεια και αποτελεσματικότητα.

Συμπερασματικά, η ερευνητική εργασία τεκμηριώνει ότι η τεχνητή νοημοσύνη, όταν αξιοποιείται με παιδαγωγικό σχεδιασμό, αποτελεί καταλυτικό παράγοντα εκσυγχρονισμού της προσχολικής εκπαίδευσης, διαμορφώνοντας ένα σχολείο που απαντά στις σύγχρονες προκλήσεις, ενσωματώνει την ψηφιακή καινοτομία και προωθεί τη μάθηση ως μία βιωματική, χαρούμενη και ουσιαστική διαδικασία.

Πρέβεζα, Ελλάδα
e-mail: letzan@gmail.com

ΠΕΡΙΛΗΨΗ

Η ενσωμάτωση ψηφιακών τεχνολογιών στη διδασκαλία της Χημείας προάγει την ενεργό συμμετοχή των μαθητών και τη βαθύτερη κατανόηση επιστημονικών εννοιών. Η παρούσα εργασία παρουσιάζει μια διδακτική πρόταση για τη μελέτη της ηλεκτρικής αγωγιμότητας υδατικών διαλυμάτων, συνδυάζοντας το πραγματικό πείραμα με τη διαδραστική προσομοίωση "Διάλυμα Ζάχαρης και Αλατιού" του PhET Colorado. Η διδακτική προσέγγιση βασίζεται στη διερευνητική μάθηση (Inquiry-Based Learning - IBL) και εφαρμόστηκε σε μαθητές της Β' Γυμνασίου σε δύο διδακτικές ώρες. Στην πρώτη φάση, οι μαθητές, δουλεύοντας σε ομάδες, διατύπωσαν υποθέσεις και πραγματοποίησαν πειράματα με υδατικά διαλύματα αλατιού (NaCl) και ζάχαρης ($C_{12}H_{22}O_{11}$), καταγράφοντας και αναλύοντας τα αποτελέσματα. Στη δεύτερη φάση, χρησιμοποίησαν την προσομοίωση για να παρατηρήσουν τη διάσταση του NaCl σε ιόντα, κατανοώντας τη σχέση μεταξύ χημικής δομής και αγωγιμότητας.

Η διδακτική παρέμβαση που παρουσιάζεται διαφοροποιείται ουσιαστικά από την παραδοσιακή προσέγγιση διδασκαλίας, προωθώντας τη διερευνητική μάθηση που ενεργοποιεί τους μαθητές ως συμμετοχικά υποκείμενα της εκπαιδευτικής διαδικασίας. Σε ένα τέτοιο πλαίσιο, οι μαθητές εργάστηκαν σε ένα μαθησιακό-διαλογικό περιβάλλον, όπου ανέπτυξαν την κριτική σκέψη και την κατανόηση θεμελιωδών εννοιών της Χημείας, όπως η αγωγιμότητα και η φύση των χημικών ενώσεων. Η πορεία της παρέμβασης, που ακολουθεί το μοντέλο 5E (Engage, Explore, Explain, Elaborate, Evaluate), αποτυπώθηκε σε Φύλλα Εργασίας, με υψηλά ποσοστά σωστών απαντήσεων και ικανοποιητική χρήση επιστημονικής ορολογίας, υποδεικνύοντας εννοιολογική κατανόηση και ικανότητα εφαρμογής γνώσεων σε νέα πλαίσια.

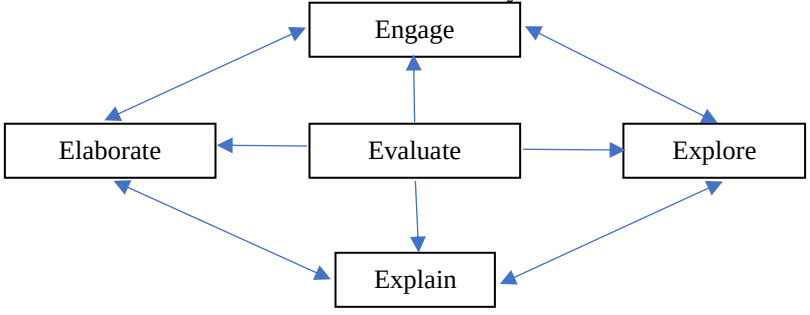
Παράλληλα, η αξιοποίηση τόσο πραγματικών όσο και εικονικών πειραμάτων συνέβαλε στην πολυτροπική προσέγγιση της διδασκαλίας, καθιστώντας τις αφηρημένες έννοιες πιο προσιτές. Η συνδυαστική χρήση των μεθόδων αυτών ενίσχυσε τη συμμετοχή και την αυτενέργεια των μαθητών, ιδιαίτερα όσων συνήθως δυσκολεύονται. Οι μαθητές ενεπλάκησαν ενεργά στη διαδικασία, ανέπτυξαν δεξιότητες ερμηνείας, πρόβλεψης και συνεργασίας, και ανέδειξαν την ικανότητά τους να μεταφέρουν και να επεκτείνουν τη γνώση. Η παρέμβαση αναδεικνύει ότι η χρήση της διερευνητικής μάθησης και των ψηφιακών εργαλείων, όπως οι προσομοιώσεις PhET, μπορεί να μετασχηματίσει τη διδασκαλία της Χημείας σε μια δυναμική, βιωματική και ουσιαστική μαθησιακή εμπειρία.

Λέξεις – κλειδιά: ηλεκτρική αγωγιμότητα, προσομοίωση PhET Colorado, διερευνητική μάθηση (IBL), μοντέλο 5E, πολυτροπική μάθηση

ΕΙΣΑΓΩΓΗ

Διερευνητική (ή ανακαλυπτική) μάθηση

Η μάθηση μέσω διερεύνησης εμφανίστηκε στην εκπαίδευση στις φυσικές επιστήμες τον τελευταίο αιώνα. Πριν από το 1900, επικρατούσε η άποψη ότι οι μαθητές θα έπρεπε να κατακτήσουν το σύνολο της γνώσης μέσω ης παραδοσιακής διδασκαλίας. Η κριτική του Dewey έθεσε τα θεμέλια για το μοντέλο διερευνητικής μάθησης, όπου οι μαθητές μαθαίνουν μέσα από την παρατήρηση και από υποθέσεις που δοκιμάζουν καθώς δρουν και όχι μέσα από τελικές αλήθειες (Dewey, 1916, σελ. 153–154). Σύμφωνα με την άποψή του, οι εκπαιδευτικοί θα πρέπει να παρουσιάσουν την επιστήμη ως διερεύνηση και οι μαθητές είναι αναγκαίο να χρησιμοποιούν τη διερεύνηση ως ένα σύνολο εννοιολογικών δομών που αναπροσαρμόζονται υπό το φως νέων δεδομένων (Skordoulis & Stefanidou, 2021, σελ. 107–108). Η εκμάθηση των φυσικών επιστημών μέσω της διερεύνησης μπορεί να θέσει στο επίκεντρο τα προσωπικά ενδιαφέροντα και την εμπειρία των μαθητών, βοηθώντας τους να αναπτύξουν μηχανισμούς για τη κατανόηση του κόσμου γύρω τους, καθώς και την τόνωση και ικανοποίηση της περιέργειάς τους, επηρεάζοντας τις προσωπικές τους αποφάσεις στη ζωή σε ότι αφορά την ευημερία τους και την επιλογή της σταδιοδρομίας τους (Harlen, 2013, σελ. 11).



Η μάθηση μέσω διερεύνησης είναι μια μαθησιακή προσέγγιση που επιτρέπει στους μαθητές να είναι ενεργοί καθ' όλη τη διάρκεια της μαθησιακής διαδικασίας, ενθαρρύνοντάς τους να κάνουν ερωτήσεις, να αναλύουν τις πληροφορίες και να ερευνούν. Αναπτύσσεται, έτσι, η ικανότητα χρήσης επιστημονικών διαδικασιών (διατύπωση προβλημάτων, σχεδιασμός πειραματικών διαδικασιών, διατύπωση υποθέσεων, συλλογή και ανάλυση δεδομένων και ερμηνεία των αποτελεσμάτων) και προάγεται η δημιουργικότητα των μαθητών (Bass, J. E. κ.ά., 2009, σελ. xii). Χάρη στη μάθηση μέσω διερεύνησης, το επίκεντρο της εκπαίδευσης στις φυσικές επιστήμες έχει μετατοπιστεί από την αποστήθιση εννοιών και φαινομένων στη χρήση επιστημονικών διαδικασιών και δεξιοτήτων κριτικής σκέψης (Z. Zacharia, 2003, σελ. 795). Στα μαθήματα φυσικών επιστημών όπου η διερεύνηση είναι το κύριο εργαλείο μάθησης, οι μαθητές δεν μαθαίνουν απλώς επιστημονικά θέματα, αλλά αποκτούν και δεξιότητες όπως λογική σκέψη, διατύπωση ερωτήσεων, διεξαγωγή έρευνας και επίλυση καθημερινών προβλημάτων (Germann, 1994, σελ. 749).

Το Μοντέλο Διδασκαλίας 5E

Το Μοντέλο Διδασκαλίας των φυσικών επιστημών 5E παρέχει τη δομή που χρειάζονται οι εκπαιδευτικοί για να ανταποκριθούν στις απαιτήσεις των σύγχρονων προτύπων επιστημονικής εκπαίδευσης (τόσο ποσοτικών όσο και ποιοτικών). Ενθαρρύνει τη σκέψη των μαθητών, επιτρέποντάς τους στη συνέχεια να ανακαλύψουν και να μάθουν μέσα από την εξερεύνηση, εμβαθύνοντας, έτσι, στην κατανόηση του περιεχομένου. Οι μαθητές έχουν την ευκαιρία να αναπτύξουν την κριτική σκέψη και να συνεχίσουν τη μάθηση σε θέματα που τους ενδιαφέρουν και βρίσκονται στην καθημερινότητά τους, καθώς περνά ο χρόνος (Chitman-Booker & Kopp, 2013, σελ. 9–10).

Το μοντέλο 5E είναι ένα διδακτικό μοντέλο για τη διδασκαλία των φυσικών επιστημών με στόχο την καλλιέργεια επιστημονικά εγγράμματων μαθητών, δηλαδή συνειδητοποίησης του ρόλου της επιστήμης στη σύγχρονη κοινωνία, εξοικείωσης με θεμελιώδεις έννοιες και, τέλος, ευχέρειας στην εφαρμογή (Skordoulis & Stefanidou, 2021, σελ. 281). Καθώς αποτελεί μια παιδαγωγική προσέγγιση στη διδασκαλία των επιστημών, παρέχει ένα πλαίσιο στους εκπαιδευτικούς για την ανάπτυξη της κατανόησης των μαθητών σχετικά με επιστημονικές έννοιες και ιδέες (περιεχόμενο). Αυτή η μέθοδος είναι ευέλικτη και μπορεί να χρησιμοποιηθεί με πολλούς διαφορετικούς τύπους διδακτικών πόρων, προγραμμάτων και υλικών. Τα βήματα του μοντέλου 5E φαίνονται στο **Σχήμα 1** (Duran & Duran, 2004, σελ. 52) και αποτελείται από γνωστικά στάδια μάθησης που περιλαμβάνουν τα: Engage (Ενεργοποίηση), Explore (Εξερεύνηση), Explain (Εξήγηση), Elaborate (Εμβάθυνση) και Evaluate (Αξιολόγηση).

Σχήμα 1
Μοντέλο Διδασκαλίας 5E

Η περιγραφή κάθε φάσης έχει ως εξής:

1. Engage (Ενεργοποίηση): Σε αυτό το στάδιο, καταβάλλονται προσπάθειες για να τραβηχτεί η προσοχή των μαθητών και να ενισχυθεί ο ενθουσιασμός τους για τη μάθηση.

2. Explore (Εξερεύνηση): Στόχος είναι να αποκτήσουν οι μαθητές μια γενική εμπειρία. Οι μαθητές, ως «ενεργά υποκείμενα της μάθησης», κάνουν παρατηρήσεις σχετικά με τη λύση ενός προβλήματος, διατυπώνουν υποθέσεις, συλλέγουν και αναλύουν δεδομένα, ελέγχουν την εγκυρότητα των υποθέσεών τους, συνεργάζονται με άλλους, διευρύνουν την οπτική τους και αναπτύσσουν δημιουργική σκέψη.

3. Explain (Εξήγηση): Σε αυτό το στάδιο, ο δάσκαλος θέτει ερωτήσεις και δίνει «επιστημονικές εξηγήσεις» για να διασφαλίσει ότι οι μαθητές έχουν κατανοήσει πλήρως τη μελέτη, τις ερμηνείες και τις λύσεις που έχουν συζητηθεί.

4. Elaborate (Εμβάθυνση): Εδώ, οι μαθητές εφαρμόζουν τις γνώσεις που έχουν αποκτήσει σε νέες καταστάσεις. Οι δραστηριότητες αυτού του σταδίου στοχεύουν στην «εμβάθυνση της μάθησης», την ανάπτυξη δεξιοτήτων και την ουσιαστική κατανόηση του αντικειμένου.

5. Evaluate (Αξιολόγηση): Στο τελευταίο στάδιο, αξιολογούνται «οι γνώσεις, οι δεξιότητες και τα έργα» των μαθητών. Η έμφαση δίνεται στην ικανότητα «εφαρμογής της μάθησης σε διαφορετικά περιβάλλοντα», αντί της απλής απομνημόνευσης.

Συνεργατική μάθηση

Έχοντας ως βάση τον Dewey, η συνεργατική μάθηση δημιουργεί το πλαίσιο όπου οι μαθητές μπορούν να αλληλεπιδράσουν, να συνεργαστούν, να ενθαρρύνουν ο ένας τον άλλον, να αλληλοβοηθηθούν σε ένα συγκεκριμένο θέμα, να διερευνήσουν και να αναλύσουν συλλογικά τα δεδομένα και, έτσι, μπορούν να ολοκληρώσουν μία εργασία καλύτερα από ότι όταν εργάζεται ο καθένας μόνος του και το αποτέλεσμα της συλλογικής εργασίας να είναι συνολικά ανώτερο σε σχέση με το ατομικό (Kakana, 2015, σελ. 31–32). Στη συνεργατική μάθηση, οι πόροι της ομάδας ωφελούν το κάθε άτομο και γενικότερα το ομαδικό πνεύμα και η συνεργασία αποφέρουν πολλά πλεονεκτήματα στο άτομο όπως αυτοπεποίθηση και λήψη αποφάσεων από κοινού.

Η χρήση του συνδυασμού των Φυσικών Πειραμάτων και των Ψηφιακών Τεχνολογιών στη Διδασκαλία των Φυσικών Επιστημών

Έρευνες υποστηρίζουν την αποδοτικότητα του βιωματικού πειράματος στη διδασκαλία των ΦΕ, μιας και οι μαθητές αποκτούν κινητικές και διανοητικές ικανότητες, κατασκευάζουν μόνοι τους τις γνώσεις τους, αναπτύσσουν ερευνητικού τύπου δεξιότητες και ικανότητες επίλυσης προβλήματος. Παρά τους περιορισμούς και το κόστος τους, τα πραγματικά εργαστήρια παρέχουν μοναδικές εμπειρίες στους μαθητές όσον αφορά στην αίσθηση της εργαστηριακής πρακτικής, αισθητηριακές και απτικές εμπειρίες, στην εκτίμηση των δυσκολιών διεξαγωγής της εργασίας, λήψης, μετρήσεων, χειρισμού σφαλμάτων καθώς και στη συγκρότηση αξιόπιστων δεδομένων (Z. C. Zacharia & Michael, 2016, σελ. 127).

Κάποιες άλλες αμφισβητούν την παραπάνω θέση και υποστηρίζουν τη χρήση προσομοιώσεων διαπιστώνοντας ότι η δυνατότητα οπτικοποίησης των φυσικών φαινομένων, η άμεση ανατροφοδότηση για τα σφάλματα των μετρήσεων, η δυνατότητα άμεσης αναδιάταξης της πειραματικής συσκευής και η εύκολη κα γρήγορη διερεύνηση νέων πειραματικών διατάξεων οδηγεί στην κατανόηση και την άσκηση στην επιστημονική μεθοδολογία (Psyllos, 2021, σελ. 193). Η ενσωμάτωση των ψηφιακών τεχνολογιών έχει πρόσθετη παιδαγωγική αξία και δυνατότητα μετασχηματισμού των παραδοσιακών μοντέλων μεταφοράς της γνώσης, παρέχοντας στους μαθητές τη δυνατότητα αλληλεπίδρασης με πληθώρα γνωστικών αντικειμένων (Moore κ.ά., 2014, σελ. 1191). Εφαρμογές όπως, τα εκπαιδευτικά παιχνίδια, η χρήση εικονικών οργάνων μέτρησης των φυσικών μεγεθών, ο χειρισμός οπτικοποιημένων εννοιολογικών οντοτήτων, διεγείρουν το ενδιαφέρον και συντελούν στη δημιουργική δραστηριοποίηση των μαθητών. Πολλές έρευνες δείχνουν ότι οι ψηφιακές τεχνολογίες έχουν την δυνατότητα να υποστηρίξουν αποτελεσματικά τη μάθηση με νέους τρόπους συγκριτικά με το παρελθόν, π.χ. μέσα από τη χρήση ενός μαθησιακού περιβάλλοντος με ενσωματωμένες δυναμικές διασυνδέσεις πολλαπλών αναπαραστάσεων μακροσκοπικών φυσικών μεγεθών με μικροσκοπικές οντότητες (Psyllos & Taramopoulos, 2022, σελ. 369). Οι προσομοιώσεις και οι απεικονίσεις έχουν αναγνωριστεί εδώ και καιρό ως σημαντικές για τη διδασκαλία και τη μάθηση της χημείας (Stieff & Wilensky, 2003, σελ. 287).

Σχετικά πρόσφατες μελέτες ερευνούν τα αποτελέσματα της χρήσης συνδυασμού πραγματικού και βιωματικού πειράματος και διαπιστώνουν ισχυρότερη εννοιολογική κατανόηση (De Jong κ.ά., 2013, σελ. 307). Σύγχρονες επισκοπήσεις τεκμηριώνουν ότι ο συνδυασμός εικονικών και πραγματικών εργαστηρίων σε κατάλληλα πλαίσια έχει προστιθέμενη παιδαγωγικά αξία για τους μαθητές και εκπαιδευτικούς διότι οι παροχές των εικονικών εργαστηρίων υποστηρίζουν τη γνωστική εστίαση και την αλληλεπίδραση θεωρίας και πρακτικής ενώ τα πραγματικά εργαστήρια προωθούν την εξοικείωση με τα φαινόμενα, τα όργανα και τις επιστημονικές πρακτικές (Wörner κ.ά., 2022, σελ. 911). Επιπλέον, η ταυτόχρονη αξιοποίηση εργαστηριακού περιβάλλοντος και τεχνολογικών μέσων, από τους εκπαιδευτικούς

φυσικών επιστημών, φαίνεται να συμβάλλει ουσιαστικά στην καλλιέργεια αναπαραστατικής ικανότητας σε πολλαπλά επίπεδα στη διδασκαλία χημεία (μακροσκοπικό, μικροσκοπικό, συμβολικό και αλγεβρικό). Οι εκπαιδευτικοί μπορούν να χρησιμοποιούν την τεχνολογία ως ένα υποστηρικτικό εργαλείο για την κατανόηση φαινομένων σε μικροσκοπικό επίπεδο. Μέσα από τη σύνδεση των εργαστηριακών δραστηριοτήτων με τα τεχνολογικά μέσα, οι εκπαιδευόμενοι μπορούν να διατυπώνουν τεκμηριωμένες απόψεις, αξιοποιώντας διαφορετικά επίπεδα αναπαράστασης, απαραίτητα για την εις βάθος κατανόηση της χημείας. (Yaman & Hand, 2024, σελ. 2231).

Η περίπτωση του PhET Colorado

Από το 2002, το έργο PhET, του πανεπιστημίου του Colorado, έχει αναπτύξει 116 διαδραστικές προσομοιώσεις (sims) για την εκπαίδευση στις επιστήμες και τα μαθηματικά, με περισσότερες από 50 προσομοιώσεις για τη διδασκαλία της χημείας, οι οποίες είναι όλες διαθέσιμες δωρεάν στο διαδίκτυο (The PhET Interactive Simulations Project, 2025). Χρησιμοποιώντας αρχές σχεδιασμού που υποστηρίζουν τους μαθητές στην επίτευξη των διάφορων μαθησιακών στόχων, οι προσομοιώσεις PhET έχουν έναν ξεχωριστό σχεδιασμό και αίσθηση. Αυτές οι αρχές σχεδιασμού, που βασίζονται στην έρευνα και την εμπειρία του έργου PhET, καθώς και στις μελέτες από τις κοινότητες επιστημονικής εκπαίδευσης και εκπαιδευτικού σχεδιασμού (Moore κ.ά., 2014, σελ. 1191). (Kozma & Russell, 2005, σελ. 122), (Plass κ.ά., 2012, σελ. 394), (Rodrigues, 2012, σελ. 209), περιλαμβάνουν:

- Διαδραστικότητα: Οι μαθητές πειραματίζονται με βασικές παραμέτρους (π.χ. προσθήκη διαλυτής ουσίας).
- Άμεση Ανατροφοδότηση: Οι αλλαγές εμφανίζονται αμέσως (π.χ. αλλαγή χρώματος διαλύματος).
- Πολλαπλές Αναπαραστάσεις: Σύνδεση διαφορετικών προσεγγίσεων (π.χ. εικονιστικές και συμβολικές).
- Προσομοίωση Δύσκολων Πειραμάτων: Επιτρέπει πειράματα αδύνατα στον πραγματικό κόσμο (π.χ. αλλαγή ηλεκτραρνητικότητας ατόμων).
- Διαισθητική Διεπαφή: Εύκολη χρήση και εξερεύνηση χωρίς περιττά εμπόδια.
- Σύνδεση με την Πραγματική Ζωή: Οι έννοιες γίνονται πιο σχετικές για τους μαθητές.
- Προκλήσεις & Παιχνίδια: Διασκέδαση που ενισχύει την περιέργεια και τη μάθηση.
- Έμμεση Καθοδήγηση: Οι μαθητές καθοδηγούνται χωρίς να νιώθουν περιορισμένοι.

Αυτές οι αρχές μεταμορφώνουν τη διδασκαλία, βοηθώντας τους μαθητές να κατανοήσουν τη χημεία μέσα από εξερεύνηση και πειραματισμό (Lancaster κ.ά., 2013, σελ. 98).

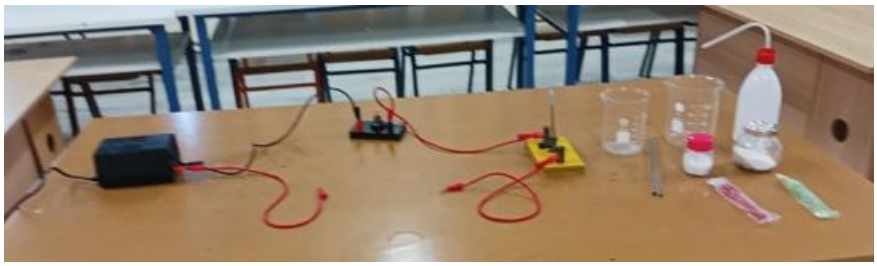
ΜΕΘΟΔΟΛΟΓΙΑ

Διδακτικό πλαίσιο:

Η παρούσα διδακτική πρόταση αφορά στη διδασκαλία της ενότητας 2.9 «Υποατομικά σωματίδια – Ιόντα» του σχολικού εγχειριδίου της Χημείας της Β' Γυμνασίου κατά την οποία προτείνεται να γίνει το «Παράθυρο στο εργαστήριο: Αγωγιμότητα διαλύματος μαγειρικού αλατιού» καθώς και η 7η εργαστηριακή άσκηση του εργαστηριακού οδηγού με τίτλο: «Διαπίστωση της ηλεκτρικής αγωγιμότητας διαλύματος χλωριούχου νατρίου». Στην διδακτική πρόταση, πραγματοποιήθηκε διερεύνηση της αγωγιμότητας υδατικών διαλυμάτων ιοντικών (αλάτι - NaCl) και μοριακών ενώσεων (ζάχαρη - $C_{12}H_{22}O_{11}$), χρησιμοποιώντας τόσο την πραγματική πειραματική διαδικασία όσο και τη διαδραστική προσομοίωση «Διάλυμα ζάχαρης και αλατιού» του PhET Colorado.

Διδακτική βάση της παρέμβασης αποτέλεσε το ισχύον ΔΕΠΠΣ-ΑΠΣ της Χημείας της Β' Γυμνασίου (DEPPS-APS, *Φυσικής Χημείας*, 2003, σελ. 546), όπου στόχοι της είναι το να είναι σε θέση οι μαθητές να:

- αναγνωρίζουν τη σχέση της χημικής δομής μιας ένωσης με την αγωγιμότητα του διαλύματός της,
- κατανοούν τη διαφορά στην αγωγιμότητα μεταξύ ιοντικών και μοριακών ενώσεων,
- διερευνούν με εργαστηριακό και ψηφιακό τρόπο φαινόμενα ιοντισμού,
- χρησιμοποιούν την προσομοίωση «Διάλυμα ζάχαρης και αλατιού» του PhET Colorado για την πειραματική επιβεβαίωση των θεωρητικών γνώσεων, και
- αναπτύξουν δεξιότητες διερευνητικής μάθησης (Inquiry-Based Learning - IBL), θέτοντας ερωτήματα, διατυπώνοντας υποθέσεις, σχεδιάζοντας και ερμηνεύοντας πειραματικά δεδομένα.



Πριν την υλοποίηση της παρέμβασης σχεδιάστηκαν οι πειραματικές δραστηριότητες (πραγματικά και εικονικά πειράματα) που θα εκτελούσαν οι μαθητές και δύο Φύλλα Εργασίας (ΦΕ) που θα τους δίνονταν προς επεξεργασία. Η διδακτική παρέμβαση πραγματοποιήθηκε σε δύο τμήματα - 35 μαθητές (21 αγόρια - 14 κορίτσια) της Β' Γυμνασίου του 3ου Γυμνασίου Πρέβεζας σε δύο διαδοχικές διδακτικές ώρες (90 λεπτά). Η 1η διδακτική ώρα πραγματοποιήθηκε στο Εργαστήριο Φυσικών Επιστημών και η 2η διδακτική ώρα στη σχολική αίθουσα, καθώς εκεί μόνο υπάρχει η δυνατότητα χρήσης διαδραστικού πίνακα. Επίσης, πρέπει να σημειωθεί ότι πριν την υλοποίηση της παρέμβασης οι μαθητές είχαν

έρθει σε επαφή κατά τη διάρκεια της τρέχουσας σχολικής χρονιάς με τις έννοιες του ατόμου, μορίου και ιόντος αλλά όχι με τις έννοιες των ιοντικών και μοριακών ενώσεων και τις ιδιότητες των υδατικών τους διαλυμάτων.

Διδακτικά Μέσα:

Για το φυσικό πείραμα τα υλικά που χρησιμοποιήθηκαν ήταν: ποτήρια ζέσεως, απιονισμένο νερό, ζάχαρη, αλάτι, πλαστικά κουταλάκια, ράβδοι ανάδευσης, τροφοδοτικό χαμηλής τάσης, καλώδια με καρφιά, καλώδια με κροκοδειλάκια, ένα λαμπάκι 4,5V (βιδωτό) με λυχνιολαβή και ένας διακόπτης (**Εικόνα 1**).

Εικόνα 1
Τα υλικά που χρησιμοποιήθηκαν στο φυσικό πείραμα

Για το εικονικό πείραμα χρησιμοποιήθηκε: Διαδραστικός πίνακας με πρόσβαση στο διαδίκτυο. Το λογισμικό προσομοίωσης που χρησιμοποιήθηκε για τα εικονικά πειράματα ήταν το «Διάλυμα ζάχαρης και αλατιού» του PhET Colorado: http://phet.colorado.edu/el/simulation/legacy/sugar-and-salt-solutions.

Το συγκεκριμένο λογισμικό επιλέχθηκε γιατί οι μαθητές, ύστερα από σύντομη επίδειξη της χρήσης του προγράμματος, είναι σε θέση να το χρησιμοποιούν με ευκολία. Επιπλέον, το λογισμικό χαρακτηρίζεται από ιδιαίτερα φιλικό περιβάλλον επικοινωνίας και ο μαθητής μπορεί, με απλούς χειρισμούς, να εκτελέσει πειράματα και να δει άμεσα τα αποτελέσματα τους στην οθόνη του υπολογιστή, αλλά και έχει τη δυνατότητα να επαναλάβει το πείραμά του όσες φορές επιθυμεί. Επίσης, είναι λογισμικό ελεύθερης διανομής, με αποτέλεσμα να είναι εύκολα διαθέσιμο σε οποιοδήποτε σχολείο για να το χρησιμοποιήσουν ανά πάσα στιγμή ο εκπαιδευτικός και οι μαθητές για την εκτέλεση πειραμάτων στην αγωγιμότητα διαλυμάτων ζάχαρης και αλατιού. Τέλος, η αναλογία του πραγματικού με το εικονικό πείραμα, τόσο στο ηλεκτρικό κύκλωμα που χρησιμοποιείται, όσο και στα διαλύματα που διαθέτει, είναι πανομοιότυπη οπότε υπάρχει η άμεση συσχέτιση-εξήγηση με το πραγματικό πείραμα.

Υλοποίηση των διδασκαλιών:

1η Διδακτική Ώρα: Πειραματική Μελέτη της Αγωγιμότητας Διαλυμάτων Αλατιού και Ζάχαρης (1ο ΦΕ)

1. Engage (Προσέλκυση ενδιαφέροντος) - 10'

Κατά τη διάρκεια της πρώτης διδακτικής ώρας, η οποία πραγματοποιήθηκε στο σχολικό εργαστήριο, οι μαθητές χωρίστηκαν σε ομάδες των 5 ατόμων και τους διανεμήθηκε το 1ο ΦΕ. Αρχικά, ο εκπαιδευτικός ξεκίνησε με διερευνητικά ερωτήματα: «*Τι συμβαίνει όταν διαλύσουμε αλάτι ή ζάχαρη στο νερό;*», και «*Ποιο από τα δύο διαλύματα μπορεί να άγει το ηλεκτρικό ρεύμα και γιατί;*»

Ακολούθησε διαλογική συζήτηση με τον εκπαιδευτικό καθώς και των μαθητών μεταξύ τους και οι μαθητές έθεσαν το ερευνητικό ερώτημα: «*Πώς επηρεάζει η χημική σύσταση μιας ουσίας την αγωγιμότητα του υδατικού της διαλύματος;*» Στη συνέχεια οι μαθητές κλήθηκαν να διατυπώσουν τις υποθέσεις τους, οι οποίες, αφού πρώτα συζητήθηκαν στις ομάδες, ανακοινώθηκαν στην τάξη. Ο εκπαιδευτικός, έχοντας καθοδηγητικό και κατευθυντήριο ρόλο, συμμετείχε στη διαδικασία διατύπωσης επί μέρους υποθέσεων, των οποίων οι απαντήσεις καταγράφηκαν στο ΦΕ.

2. Explore (Διερεύνηση) - 25'

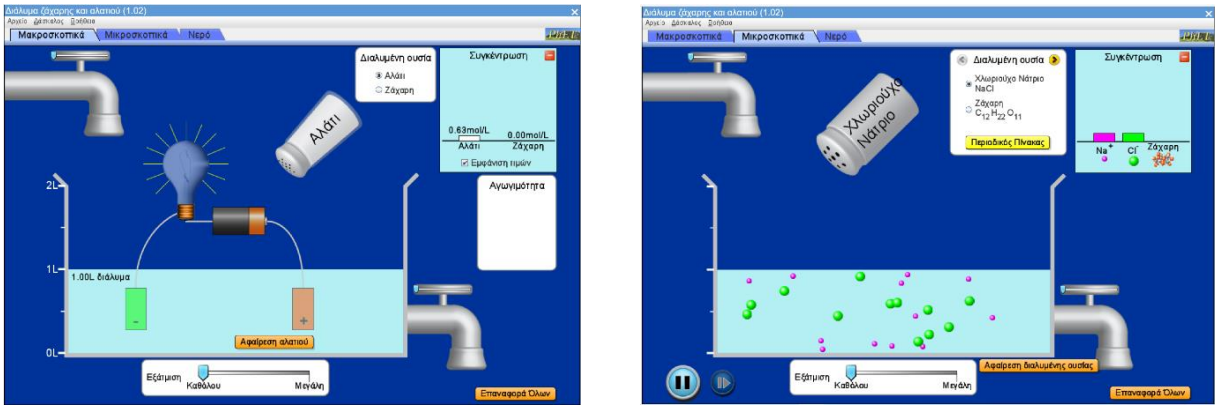
Οι μαθητές, εργαζόμενοι σε ομάδες, εκτέλεσαν το φυσικό πείραμα. Συγκεκριμένα, ετοίμασαν τα διαλύματα αλατιού και ζάχαρης, συναρμολόγησαν το ηλεκτρικό κύκλωμα, συνδέοντας σε σειρά το τροφοδοτικό, τα καλώδια, το διακόπτη και τη λάμπα και τοποθέτησαν τα καλώδια εκ περιτροπής στα δύο διαλύματα προκειμένου να παρατηρήσουν αν ανάβει το λαμπάκι σε κάθε κλειστό κύκλωμα που πραγματοποιείται. Στη συνέχεια, κατέγραψαν τις παρατηρήσεις τους, οι οποίες ήταν οι εξής: το λαμπάκι ανάβει στο διάλυμα στο αλατιού ενώ δεν ανάβει στο διάλυμα της ζάχαρης.

3. Explain (Επεξήγηση) - 10'

Οι μαθητές ανέλυσαν τα δεδομένα και συζήτησαν την έννοια των ιόντων και τη σχέση τους με την αγωγιμότητα των υδατικών τους διαλυμάτων. Στη συνέχεια, εξήγησαν τα αποτελέσματά τους και συμπλήρωσαν το ΦΕ, απαντώντας σε καθοδηγούμενες ερωτήσεις: «*Ποια διαφορά παρατηρήσατε μεταξύ των δύο διαλυμάτων;*», «*Ποιο είναι το κοινό χαρακτηριστικό των ουσιών που άγουν το ηλεκτρικό ρεύμα;*», «*Πώς εξηγείτε τα αποτελέσματά σας με βάση τη δομή των ουσιών που χρησιμοποιήσατε;*», «*Πώς εξηγείται η αγωγιμότητα του διαλύματος αλατιού με βάση τη δομή των ιόντων;*», «*Αν προσθέτατε περισσότερη ποσότητα αλατιού στο διάλυμα, πώς πιστεύετε ότι θα επηρεαζόταν η αγωγιμότητα;*»

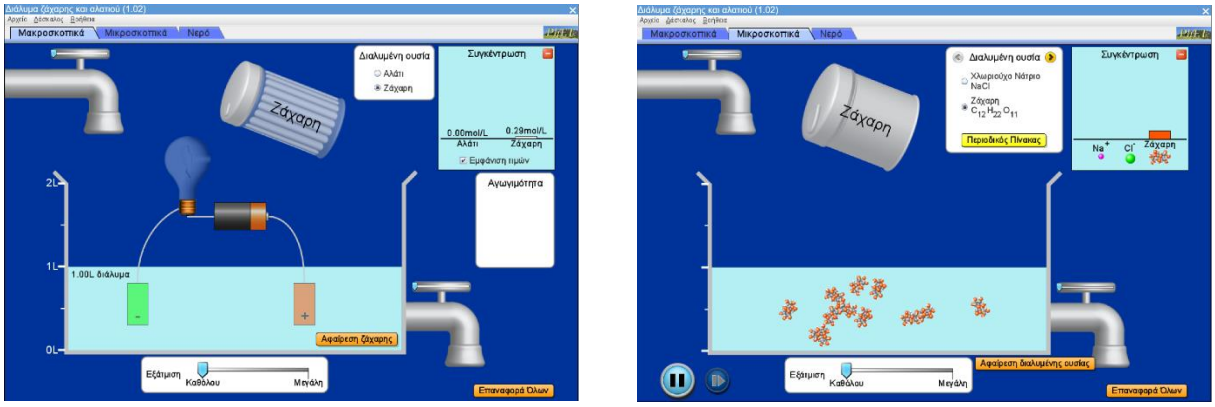
Τέλος, ο εκπαιδευτικός διευκόλυνε τη συζήτηση εξηγώντας γιατί οι ιοντικές ενώσεις άγουν το ηλεκτρικό ρεύμα, ενώ οι μοριακές όχι, καταλήγοντας στα παρακάτω συμπεράσματα:

α) Η παρουσία ιόντων σε ένα διάλυμα επηρεάζει την αγωγιμότητά του, β) το αλάτι (NaCl) διαλύεται στο νερό και δημιουργεί ιόντα Na^+ και Cl^-, τα οποία επιτρέπουν τη μεταφορά ηλεκτρικού φορτίου (ηλεκτρικό ρεύμα), και γ) η ζάχαρη, ως μοριακή ένωση, δεν παράγει ιόντα στο νερό, επομένως το διάλυμά της δεν άγει το ηλεκτρικό ρεύμα.



2η Διδακτική Ώρα: Μελέτη της Ηλεκτρικής Αγωγιμότητας Διαλύματος Ζάχαρης και Αλατιού με Χρήση Προσομοίωσης του PhET Colorado (2ο ΦΕ)

Σύνδεση με την προηγούμενη διδακτική ώρα - 5'



Κατά τη διάρκεια της δεύτερης διδακτικής ώρας, η οποία πραγματοποιήθηκε στη σχολική αίθουσα, έγινε αρχικά μια συζήτηση-σύνδεση σχετική με την προηγούμενη διδακτική ώρα και ζητήθηκε από τους μαθητές να προβλέψουν τη διαφορά της αγωγιμότητας των διαλυμάτων αλατιού και ζάχαρης.

4. Elaborate (Επέκταση) - 25'

Εικόνα 2
Το διάλυμα αλατιού στο λογισμικό του PhET Colorado

Εικόνα 3
Το διάλυμα ζάχαρης στο λογισμικό του PhET Colorado

Αρχικά, έγινε σύντομη επίδειξη του περιβάλλοντος της διαδικτυακής προσομοίωσης του PhET Colorado «Διάλυμα ζάχαρης και αλατιού», με τη χρήση του διαδραστικού πίνακα, από τον εκπαιδευτικό. Στη συνέχεια, πραγματοποιήθηκε το εικονικό πείραμα από εκπροσώπους των ομάδων, ενώ οι υπόλοιποι μαθητές τους καθοδηγούσαν σύμφωνα με το ΦΕ.

Κατά τη διάρκεια, αλλά και στο τέλος του εικονικού πειράματος, οι μαθητές οδηγήθηκαν, με τη βοήθεια του εκπαιδευτικού, σε παρατηρήσεις, οι οποίες και καταγράφηκαν στα ΦΕ: «*Το αλάτι (NaCl), όταν διαλύεται στο νερό, διίσταται σε ιόντα* Na^+ *και* Cl^-» (**Εικόνα 2**), «*Η ζάχαρη* ($C_{12}H_{22}O_{11}$)*, όταν διαλύεται στο νερό, δε σχηματίζει ιόντα*» (**Εικόνα 3**), «*Η φωτεινότητα της λάμπας αποτελεί ένδειξη αγωγιμότητας ενός διαλύματος*» (**Εικόνα 2** και **Εικόνα 3**), «*Υπάρχει σχέση μεταξύ της ποσότητας (συγκέντρωση) του αλατιού με την αγωγιμότητα του υδατικού του διαλύματος*».

Οι μαθητές συμπλήρωσαν τις παρατηρήσεις τους, αναλύοντας τα αποτελέσματά τους, και απάντησαν στις ερωτήσεις του ΦΕ, αφού πρώτα υπήρξε διαλογική-αναστοχαστική συζήτηση στις ομάδες: «*Γιατί το NaCl εμφανίζει υψηλή αγωγιμότητα όταν διαλύεται στο νερό;*», «*Γιατί η ζάχαρη δεν επιτρέπει τη διέλευση ηλεκτρικού ρεύματος στο διάλυμα;*», «*Πώς σχετίζεται η ηλεκτρική αγωγιμότητα με τη χημική δομή των ουσιών;*», «*Αν προσθέσουμε περισσότερη ποσότητα NaCl στο νερό, πώς θα επηρεαστεί η αγωγιμότητα; Δικαιολογήστε την απάντησή σας.*»

5. Evaluate (Αξιολόγηση) - 10'

Οι μαθητές, περνώντας στο στάδιο της αξιολόγησης των γνώσεων που αποκόμισαν από την παρέμβαση, ολοκλήρωσαν το ΦΕ απαντώντας στις παρακάτω ερωτήσεις, κλειστού τύπου, συγκρίνοντας τα αποτελέσματα της προσομοίωσης με το φυσικό πείραμα αναστοχαζόμενοι για τα εξής:

α) «Ποιο από τα παρακάτω διαλύματα είναι καλός αγωγός του ηλεκτρικού ρεύματος;»,

β) «Τι συμβαίνει όταν το αλάτι (NaCl) διαλύεται στο νερό;»

γ) «Ποια είναι η βασική αιτία της αγωγιμότητας του διαλύματος αλατιού (NaCl);»

δ) «Γιατί το διάλυμα ζάχαρης ($C_{12}H_{22}O_{11}$) δεν άγει το ηλεκτρικό ρεύμα;»

ε) «Τι συμβαίνει στην αγωγιμότητα αν αυξήσουμε την ποσότητα (συγκέντρωση) του αλατιού στο νερό;»

Τέλος, σε μια ερώτηση ανοιχτού τύπου, τους ζητήθηκε: «Να συνοψίσετε τα ευρήματά σας και να εξηγήσετε πώς αυτά επιβεβαιώνουν ή αντικρούουν τις αρχικές σας προβλέψεις».

Γενίκευση-προέκταση - 5'

Κατά τη συζήτηση που προέκυψε, τέθηκαν ερωτήματα από τους ίδιους τους μαθητές σχετικά με την ικανότητα πρόβλεψης της αγωγιμότητας άγνωστων υδατικών διαλυμάτων, με την προϋπόθεση ότι γνωρίζουμε για το αν πρόκειται για ιοντικές ή μοριακές ενώσεις. Ενδεικτικά συζητήθηκε και προβλέφθηκε η αγωγιμότητα διαλύματος υδατικού διαλύματος ανθρακικής σόδας (Na_2CO_3 - ιοντική ένωση) καθώς και υδατικού διαλύματος φρουκτόζης ($C_6H_{12}O_6$ - μοριακή ένωση).

ΑΠΟΤΕΛΕΣΜΑΤΑ - ΣΥΖΗΤΗΣΗ

Στη διδακτική παρέμβαση που υλοποιήθηκε γίνεται φανερό ότι υπάρχει διαφοροποίηση από το παραδοσιακό πλαίσιο διδασκαλίας όπου ο εκπαιδευτικός έχει ρόλο διεκπεραιωτή και ο μαθητής παθητικού δέκτη. Πρέπει να αναφερθεί ότι το στοχοθετικό πλαίσιο των ΔΕΠΠΣ-ΑΠΣ ακολουθήθηκε σε όλες τις φάσεις της διδακτικής παρέμβασης, μετασχηματίζοντας το αντικείμενο στη διδάξιμη μορφή του. Αφετηρία ήταν η διαμόρφωση κατάλληλου περιεχομένου και μετασχηματισμού του διδακτικού υλικού της Χημείας της Β' Γυμνασίου στην κατεύθυνση υποστήριξης της κριτικής ικανότητας των μαθητών που συγκρότησαν τη συγκεκριμένη τάξη-«κοινότητα». Αυτό έγινε με τη συμμετοχή των μαθητών σε ένα μαθησιακό-διαλογικό πλαίσιο, το οποίο υποστηρίχθηκε από τον εκπαιδευτικό, αφού πρώτα αναγνωρίστηκε η αναγκαιότητα του. Ειδικότερα, τα αποτελέσματα συνοψίζονται στους παρακάτω άξονες.

Μαθησιακά αποτελέσματα

Αποτιμώντας τα Φύλλα Εργασίας (ΦΕ) καταδείχθηκε ότι η πλειοψηφία των μαθητών κατανόησε σε βάθος τους βασικούς στόχους του μαθήματος, όπως αυτοί ορίζονται από το ΔΕΠΠΣ-ΑΠΣ. Πιο συγκεκριμένα, οι μαθητές ήταν σε θέση να αναγνωρίσουν τη σχέση ανάμεσα στη χημική δομή μιας ένωσης και την αγωγιμότητα των διαλυμάτων της, καθώς και να κατανοήσουν τον ρόλο των ιόντων στην αγωγή του ηλεκτρικού ρεύματος. Οι απαντήσεις των μαθητών στις ερωτήσεις αξιολόγησης είχε αρκετά θετικά αποτελέσματα και οι επιδιωκόμενες έννοιες φάνηκε ότι εμπεδώθηκαν σε μεγάλο βαθμό από το σύνολο της τάξης.

Ενδεικτικά, τα ποσοστά σωστών απαντήσεων στις ερωτήσεις του ΦΕ ήταν τα εξής: το 89% των μαθητών αναγνώρισαν ποιο διάλυμα είναι καλός αγωγός του ηλεκτρικού ρεύματος, ενώ το ίδιο ποσοστό απάντησε σωστά στην

ερώτηση που αφορούσε τη διάλυση του NaCl στο νερό. Το 71% κατανόησε τη βασική αιτία της αγωγιμότητας του διαλύματος αλατιού, ενώ το 83% μπόρεσε να εξηγήσει γιατί το διάλυμα ζάχαρης δεν άγει το ηλεκτρικό ρεύμα. Τέλος, το 97% των μαθητών απάντησε σωστά στην ερώτηση σχετικά με την επίδραση της συγκέντρωσης του αλατιού στην αγωγιμότητα.

Επίσης, η χρήση επιστημονικού λεξιλογίου στις διαλογικές συζητήσεις των ομάδων, επιχειρηματολογώντας και υποστηρίζοντας τις απόψεις τους, κυρίως στα στάδια αποτίμησης τόσο του φυσικού όσο και του εικονικού πειράματος, ανέδειξε την ικανότητα των μαθητών να περιγράφουν και να ερμηνεύουν φαινόμενα που παρατηρήθηκαν με λογική συνέπεια και τεκμηριωμένη επιστημονική γνώση. Πιο συγκεκριμένα, χρησιμοποίησαν όρους όπως: «αγωγιμότητα», «ιόντα», «ιοντικές και μοριακές ενώσεις» και «ηλεκτρικό ρεύμα». Κάτι τέτοιο εκτιμάται ότι αποτέλεσε, ως ένα βαθμό, ένα εργαλείο με το οποίο οι μαθητές είχαν τη δυνατότητα να αποδώσουν μια πληρέστερη περιγραφή των αποτελεσμάτων και της διαδικασίας των πειραμάτων. Η κατανόηση των εννοιών αυτών συνέβαλε στην ορθή ερμηνεία των διαφορών μεταξύ ιοντικών και μοριακών ενώσεων, καθώς και στη σύνδεση της χημικής τους δομής με την αγωγιμότητα που παρουσίασαν. Μέσα από τη χρήση αυτών των όρων, οι μαθητές μπόρεσαν να κατανοήσουν βαθύτερα τη φύση των ουσιών και τη συμπεριφορά τους σε διαφορετικά πειραματικά περιβάλλοντα. Παράλληλα, η επιστημονική ορολογία δεν λειτούργησε απλά ως μέσο έκφρασης, αλλά ως εργαλείο ενίσχυσης της αναλυτικής σκέψης και της επιστημονικής μεθοδολογίας.

Διδακτική και μαθησιακή πρακτική

Η εφαρμογή της συγκεκριμένης διδακτικής παρέμβασης συνέβαλε ουσιαστικά στην προώθηση της διερευνητικής μάθησης, ενισχύοντας την ενεργό συμμετοχή των μαθητών στη μαθησιακή διαδικασία. Οι μαθητές ενθαρρύνθηκαν να διατυπώνουν ερωτήματα, να κάνουν υποθέσεις και να τις ελέγχουν με βάση τα πειραματικά δεδομένα, καλλιεργώντας δεξιότητες που ευθυγραμμίζονται με τη μεθοδολογία των φυσικών επιστημών. Μέσα από την παρατήρηση φαινομένων, την εξαγωγή συμπερασμάτων και τη σύνδεση θεωρίας με πράξη, αναπτύχθηκε η κριτική και αναλυτική τους σκέψη, η οποία αποτελεί θεμέλιο της επιστημονικής προσέγγισης. Οι μαθητές, σε ένα υποστηρικτικό μαθησιακό περιβάλλον, ανέλαβαν ενεργό ρόλο στη γνώση που οικοδομούσαν.

Σημαντικό επίσης εύρημα, ήταν η δυνατότητα των μαθητών να προβλέψουν την αγωγιμότητα άγνωστων διαλυμάτων, βασιζόμενοι στη φύση της χημικής ένωσης (ιοντική ή μοριακή). Η πρόβλεψη αυτή δεν βασίζεται απλώς στη μηχανική απομνημόνευση, αλλά στην εφαρμογή της γνώσης σε νέα, άγνωστα παραδείγματα. Μέσα από αυτή τη διαδικασία, οι μαθητές αναπτύσσουν επιστημονική σκέψη και ενισχύουν την ικανότητά τους να διακρίνουν μοτίβα και σχέσεις μεταξύ θεωρητικών εννοιών και πειραματικών δεδομένων. Παράλληλα, αυτή η ικανότητα προβλεπτικής σκέψης ενισχύει τη μεταφορά της γνώσης σε ευρύτερα και πιο σύνθετα πλαίσια, κάτι που αποτελεί βασικό στόχο της εκπαίδευσης στις φυσικές επιστήμες. Έτσι, το διερευνητικό πλαίσιο αποκτά χαρακτηριστικά «ανοικτού» τύπου, καθώς δίνεται «χώρος» στους μαθητές στο να θέσουν και να προτείνουν προς μελέτη ερωτήματα, τα οποία για να προκύψουν απαιτείται διαμόρφωση επιστημονικής γνώσης. Η σύνδεση θεωρίας και πράξης, όπως εκφράζεται μέσα από την ικανότητα πρόβλεψης και ερμηνείας φαινομένων, βοηθά τους μαθητές να αντιλαμβάνονται τη χρησιμότητα της επιστημονικής γνώσης στην κατανόηση του πραγματικού κόσμου. Έτσι, το μάθημα μετατρέπεται από μια στατική διαδικασία μετάδοσης πληροφοριών σε μια δυναμική διαδικασία διερεύνησης, ερμηνείας και ενεργής μάθησης στην κατεύθυνση διαμόρφωσης των μαθητών ως ενεργοί πολίτες.

Παράλληλα, από την ανάλυση των απαντήσεων στα Φύλλα Εργασίας και τις ελεύθερες μαθητικές τοποθετήσεις, διαπιστώθηκε πως ο συνδυασμός πραγματικού και εικονικού πειράματος λειτούργησε συμπληρωματικά, ενισχύοντας την κατανόηση και την εμπλοκή των μαθητών. Οι απόψεις τους ανέδειξαν ποικιλία θετικών στάσεων, όπως: *«το ένα συμπληρώνει το άλλο»*, *«μου αρέσουν και τα φυσικά και τα ηλεκτρονικά πειράματα»*, *«είναι καλύτερο να κάνουμε το πείραμα και με τους δύο τρόπους»*, υποδηλώνοντας ότι η πολυτροπική προσέγγιση στη διδασκαλία είναι αποτελεσματικότερη από την προσκόλληση σε ένα μόνο μοντέλο. Οι μαθητές βρήκαν το εικονικό πείραμα ιδιαίτερα υποστηρικτικό για την κατανόηση αφηρημένων εννοιών, με χαρακτηριστικά σχόλια όπως: *«με βοήθησε να δω πιο αναλυτικά τη διαδικασία διάσπασης»*, *«μου εξήγησε τι γίνεται μέσα στο νερό»*, *«με βοήθησε γιατί πίστευα άλλα και άλλα είδα»*. Από την άλλη, αρκετοί αναγνώρισαν την αξία του πραγματικού πειράματος, θεωρώντας το *«πιο ρεαλιστικό»* ή *«πιο αυθεντικό»*. Ακόμα και κάποιες υπερβολικές θετικές κρίσεις υπέρ του εικονικού πειράματος (π.χ. *«είναι άκρως καλύτερο»*, *«αν το έκανα από το βιβλίο δε θα το καταλάβαινα τόσο»*) επιβεβαιώνουν την εντύπωση ισχυρής ενίσχυσης της κατανόησης μέσα από την οπτικοποίηση και την αλληλεπίδραση. Συνολικά, η ολοκληρωμένη αυτή προσέγγιση, που αξιοποιεί τις δυνατότητες των νέων τεχνολογιών σε συνδυασμό με τη βιωματική φύση των φυσικών πειραμάτων, φαίνεται να υποστηρίζει αποτελεσματικά τη μάθηση και την ουσιαστική κατανόηση των χημικών εννοιών. Ο παραδοσιακός χαρακτήρας της διδασκαλίας δίνει τη θέση του στη διερευνητική μάθηση με κυρίαρχο ρόλο τον εμπλουτισμό της με τις νέες τεχνολογίες.

Ενεργός συμμετοχή των μαθητών

Η δραστηριότητα ανέδειξε την αυξημένη συμμετοχή των μαθητών και στις δύο διδακτικές ώρες, φαινόμενο που παρατηρήθηκε ιδιαίτερα έντονα ακόμη και στους μαθητές που συνήθως εμφανίζουν μικρότερη εμπλοκή ή δυσκολεύονται στο γνωστικό αντικείμενο. Η διαρκής αλληλεπίδραση κατά τη διάρκεια της συζήτησης και της διεξαγωγής των δραστηριοτήτων υποδηλώνει την ενίσχυση της ενεργού μάθησης, όπου οι μαθητές δεν περιορίζονται σε παθητικό ρόλο, αλλά συμμετέχουν ουσιαστικά και με ενδιαφέρον. Το ομαδοσυνεργατικό πλαίσιο ενίσχυσε τη συνεργασία και την αλληλοστήριξη, αναπτύσσοντας δεξιότητες επικοινωνίας, διαπραγμάτευσης και συλλογικής επίλυσης προβλημάτων, που είναι απαραίτητες τόσο στη σχολική ζωή όσο και στη μετέπειτα κοινωνική τους ένταξη.

Μέσα από την ερμηνεία των πειραματικών δεδομένων και την ανάγκη εξαγωγής συμπερασμάτων, οι μαθητές ενεργοποιήθηκαν ως μικροί «ερευνητές» και όχι απλοί αποδέκτες ή απομνημονευτές θεωρίας. Η μετάβαση αυτή από την παθητική μάθηση στη διερεύνηση και την κατανόηση μέσω πειραματισμού ενίσχυσε τη σύνδεση θεωρητικών γνώσεων με τις παρατηρούμενες πειραματικές διαδικασίες. Παράλληλα, δόθηκε η δυνατότητα στους μαθητές να εκφράσουν τις ιδέες, τις απορίες και τα συναισθήματά τους, καθιστώντας ορατή τη «φωνή τους» στη μαθησιακή διαδικασία. Χαρακτηριστικές μαθητικές αναφορές, όπως: «*με βοήθησε γιατί πίστευα άλλα και άλλα είδα*», ή «*με βοήθησε να αναθεωρήσω κάποια πράγματα που είχα αλλιώς στο μυαλό μου*», επιβεβαιώνουν την ουσιαστική κατανόηση, την αυτενέργεια και την εσωτερική αναδόμηση της γνώσης. Μέσα από την εμπειρική διερεύνηση και τον αναστοχασμό, διαφαίνεται μια ολοκληρωμένη μαθησιακή προσέγγιση, στην οποία ο μαθητής μετατρέπεται σε ενεργό υποκείμενο της γνώσης, ενισχύοντας την κριτική σκέψη και τη δια βίου μάθηση.

Συνολικά, η ενσωμάτωση της διερευνητικής μάθησης, σε συνδυασμό με τη χρήση ψηφιακών προσομοιώσεων όπως το PhET, αναδεικνύεται ως μια ιδιαίτερα αποτελεσματική προσέγγιση στη διδασκαλία της Χημείας. Η ενεργή συμμετοχή των μαθητών στις διαδικασίες διερεύνησης και πειραματισμού οδηγεί σε ουσιαστικότερη κατανόηση των επιστημονικών φαινομένων και μπορεί να διευκολύνει την κατανόηση αφηρημένων εννοιών, μετατρέποντας τη Χημεία από μια θεωρητική επιστήμη σε μια βιωματική μαθησιακή εμπειρία. Οι ψηφιακές τεχνολογίες λειτουργούν ως ισχυρά υποστηρικτικά εργαλεία της ενεργού μάθησης και της ανάπτυξης κριτικής σκέψης, ενισχύοντας την αυτενέργεια των μαθητών και τη συμμετοχή τους στη μαθησιακή διαδικασία. Επιπλέον, η εφαρμογή του μοντέλου 5E και της διερευνητικής μάθησης αποδείχθηκε καθοριστική, καθώς διατήρησε τον μαθητή στον κεντρικό ρόλο της μαθησιακής διαδικασίας, ενίσχυσε τη σύνδεση μεταξύ θεωρίας, πειράματος και προσομοίωσης, και προώθησε την ανάπτυξη επιστημονικής σκέψης, συνεργασίας και κριτικής ανάλυσης.

ΠΕΡΙΛΗΨΗ

Η διαθεματική προσέγγιση αποτελεί βασικό πυλώνα της σύγχρονης εκπαιδευτικής πρακτικής, καθώς μέσω αυτής αξιοποιούνται γνώσεις και δεξιότητες από διαφορετικούς τομείς, δημιουργώντας μια ολιστική εμπειρία μάθησης. Η παρούσα εισήγηση αποτελεί χαρακτηριστικό παράδειγμα αυτής της προσέγγισης, καθώς συνδυάζει την περιβαλλοντική μηχανική, τη δημιουργική γραφή, την τεχνητή νοημοσύνη και τα ψηφιακά μέσα σε μια ενιαία περιβαλλοντική εκπαιδευτική δράση.

Η διαθεματική προσέγγιση στην Περιβαλλοντική Εκπαίδευση συνδέει γνώσεις από διάφορα γνωστικά πεδία για την κατανόηση σύνθετων περιβαλλοντικών ζητημάτων. Σύμφωνα με πανελλαδική μελέτη (2006-2014), μόνο το 7% των εκπαιδευτικών πρωτοβάθμιας εκπαίδευσης συμμετείχε σε προγράμματα ΠΕ, ενώ η συμμετοχή μαθητών έφτανε το 16%. Παρά τα αρχικά χαμηλά ποσοστά, παρατηρήθηκε αυξητική τάση τα τελευταία χρόνια της μελέτης, ωστόσο, η έλλειψη αναλυτικών δεδομένων καθιστά δύσκολη την πλήρη αξιολόγηση της εφαρμογής και αποτελεσματικότητάς της.

Η δράση πραγματοποιήθηκε σε ΕΠΑΛ και επικεντρώθηκε στη θαλάσσια ρύπανση, ένα σημαντικό περιβαλλοντικό ζήτημα, και είχε ως στόχο την ευαισθητοποίηση των μαθητών μέσα από μια διαδικασία επιστημονικής κατανόησης και δημιουργικής έκφρασης. Ειδικότερα στο πρώτο στάδιο οι μαθητές ενημερώθηκαν για τις αιτίες και τις επιπτώσεις της θαλάσσιας ρύπανσης, αποκτώντας επιστημονικές γνώσεις που αποτέλεσαν τη βάση για τη δημιουργία των ποιημάτων τους. Στη συνέχεια αξιοποίησαν τεχνικές δημιουργικής γραφής, όπως η επιλογή λέξεων σχετικών με το θέμα, οι εικόνες ως ερέθισμα για συγγραφή και η συνειρμική γραφή, για να μετουσιώσουν τις επιστημονικές πληροφορίες σε ποιήματα. Στο τρίτο στάδιο, η τεχνητή νοημοσύνη χρησιμοποιήθηκε για τη δημιουργία εικόνων που αντικατόπτριζαν το περιεχόμενο των ποιημάτων. Τέλος, τα ποιήματα και οι εικόνες συγκεντρώθηκαν σε ένα διαδραστικό ψηφιακό βιβλίο, που ήταν αποτέλεσμα συλλογικής προσπάθειας. Αυτή η συνεργασία ανέδειξε τη σημασία της διαθεματικότητας, καθώς κάθε τομέας συμπληρώθηκε και εμπλουτίστηκε από τον άλλο, δημιουργώντας μια ολοκληρωμένη εκπαιδευτική εμπειρία.

Η δράση ανέδειξε τη δυναμική των ψηφιακών εργαλείων στη σύγχρονη εκπαίδευση, προσφέροντας στους μαθητές τη δυνατότητα να εκφραστούν δημιουργικά, να καλλιεργήσουν ψηφιακές δεξιότητες, να κατανοήσουν το θέμα μέσω της οπτικοποίησης του προβλήματος και να ενισχύσουν την περιβαλλοντική τους ευαισθησία. Παράλληλα, υπογράμμισε τη σημασία της διαθεματικής συνεργασίας, η οποία επιτρέπει στους μαθητές να αντιμετωπίσουν πολύπλοκα ζητήματα από πολλές πλευρές, ενισχύοντας την κριτική τους σκέψη. Η εισήγηση αναδεικνύει τα παιδαγωγικά οφέλη αυτής της προσέγγισης, τις προκλήσεις που προέκυψαν κατά την εφαρμογή της και τις μελλοντικές προοπτικές για περαιτέρω αξιοποίηση της τεχνολογίας στην εκπαιδευτική διαδικασία.

Λέξεις – κλειδιά: διαθεματική προσέγγιση, περιβαλλοντική εκπαίδευση, δημιουργική γραφή, ψηφιακά εργαλεία.

ΕΙΣΑΓΩΓΗ

Η Περιβαλλοντική Εκπαίδευση (Π.Ε.) αναδύθηκε ως απάντηση στα σοβαρά περιβαλλοντικά προβλήματα των τελευταίων δεκαετιών, με βασικό στόχο τόσο την κατανόηση της φύσης και των αιτίων τους, όσο και την πρόληψη και την αποτελεσματική τους αντιμετώπιση. Αντιμετωπίζει το περιβάλλον όχι μόνο ως αντικείμενο μελέτης, αλλά και ως δυναμικό πεδίο εξερεύνησης, βιωματικής εμπλοκής και δράσης. Βασίζεται στο παιδαγωγικό πρότυπο της μαθητοκεντρικής εκπαίδευσης, αξιοποιώντας την προϋπάρχουσα γνώση των μαθητών, ενισχύοντας την ανάληψη πρωτοβουλιών και καλλιεργώντας την κριτική σκέψη.

Η Π.Ε. συνδέεται άρρηκτα με τις σύγχρονες διδακτικές προσεγγίσεις, υιοθετώντας εκπαιδευτικές πρακτικές που ανταποκρίνονται στις ανάγκες της εποχής. Η εποικοδομητική μάθηση, για παράδειγμα, αξιοποιεί τις εμπειρίες και τις γνώσεις των μαθητών για το περιβάλλον, προωθώντας την ενεργό συμμετοχή τους στη μαθησιακή διαδικασία (Vygotsky, 1978). Άλλωστε η ολιστική προσέγγιση επιτρέπει τη σφαιρική κατανόηση των προβλημάτων, ενώ η συστημική ενσωματώνει τις σχέσεις και τις αλληλεπιδράσεις μεταξύ των εμπλεκόμενων παραγόντων, δημιουργώντας ένα ενιαίο και λειτουργικό πλαίσιο. Σε αυτό το πλαίσιο, η ανάπτυξη της κριτικής σκέψης είναι θεμελιώδης, καθώς συμβάλλει στην εξαγωγή τεκμηριωμένων συμπερασμάτων και στην ενίσχυση της περιβαλλοντικής συνείδησης.

Ταυτόχρονα, η συνεργατική μάθηση καθίσταται απαραίτητη για την αντιμετώπιση των πολυδιάστατων προκλήσεων, ενώ η βιωματική προσέγγιση ενεργοποιεί τους μαθητές, εμπλέκοντάς τους ουσιαστικά στην επεξεργασία και επίλυση αυθεντικών προβλημάτων. Για την εφαρμογή αυτών των προσεγγίσεων, αξιοποιούνται σύγχρονες παιδαγωγικές μέθοδοι, με κυρίαρχες τη μέθοδο Project και τη Μέθοδο Επίλυσης Προβλήματος, οι οποίες προάγουν την ενεργητική μάθηση και την αυτενέργεια.

Chrysomalidou, Takos, Spiliotis και Xofis (2022) εξέτασαν τη συμμετοχή εκπαιδευτικών σε δράσεις Εκπαίδευσης Εκτός Τάξης σε 350 ελληνικά σχολεία και διαπίστωσαν ότι σε ποσοστό 50 % των σχολείων λιγότερο από το 40 % των εκπαιδευτικών συμμετείχε σε τέτοιες δραστηριότητες, ενώ σε 17,6 % των σχολείων δεν υλοποιήθηκε καμία δράση· παράλληλα, σε 52,5 % των σχολείων έως το 40 % των μαθητών συμμετείχε ενεργά σε τουλάχιστον μία εκτός τάξης εκδήλωση. Οι ερευνητές προτείνουν ενδυνάμωση της επιμόρφωσης των εκπαιδευτικών, ενίσχυση διαθεματικών συμπράξεων και στήριξη από τους σχολικούς φορείς για την αύξηση της εμπλοκής σε αυτά τα προγράμματα (Chrysomalidou et al., 2022, p. 804).

Η σημερινή εκπαιδευτική πραγματικότητα όμως χαρακτηρίζεται από ταχύτατες κοινωνικές, τεχνολογικές και περιβαλλοντικές αλλαγές, που καθιστούν επιτακτική την ανάγκη αναθεώρησης των παραδοσιακών μοντέλων διδασκαλίας. Απαιτούνται πλέον πολυδιάστατες και ομαδοσυνεργατικές μέθοδοι, οι οποίες όχι μόνο κινητοποιούν ενεργά τους μαθητές, αλλά και καλλιεργούν ένα ευρύ φάσμα δεξιοτήτων — γνωστικών, κοινωνικών, ψηφιακών και δημιουργικών — ενισχύοντας τη σύνδεση της μάθησης με την καθημερινή ζωή και την κοινωνική πραγματικότητα.

Μία από τις πιο αποτελεσματικές στρατηγικές σε αυτό το πλαίσιο είναι η διαθεματική προσέγγιση. Μέσω αυτής επιτυγχάνεται η διασύνδεση γνώσεων και δεξιοτήτων από διαφορετικά γνωστικά πεδία, οδηγώντας στη δημιουργία ενός ολιστικού και συνεκτικού μαθησιακού πλαισίου. Η διαθεματικότητα προσδίδει νόημα στη μάθηση, καθώς επιτρέπει την πολυπρισματική προσέγγιση σύνθετων θεμάτων και προσφέρει στους μαθητές τη δυνατότητα να αναπτύξουν κριτική σκέψη, δημιουργικότητα και επικοινωνιακές δεξιότητες. Επομένως, η σοβαρότητα και η πολυπλοκότητα των σύγχρονων περιβαλλοντικών ζητημάτων καθιστούν τη διεπιστημονική και διαθεματική προσέγγιση όχι μόνο χρήσιμη, αλλά απολύτως αναγκαία για την οικοδόμηση ουσιαστικής γνώσης και ενεργού περιβαλλοντικής στάσης (Zachariou, 2006:17).

Η παρούσα εκπαιδευτική δράση, που υλοποιήθηκε στο 1ο Επαγγελματικό Λύκειο (ΕΠΑ.Λ.) Άρτας, εντάσσεται πλήρως σε αυτή τη λογική και λειτουργεί ως χαρακτηριστικό παράδειγμα εφαρμογής της διαθεματικής μεθοδολογίας σε συνδυασμό με τη χρήση ψηφιακών τεχνολογιών και εργαλείων τεχνητής νοημοσύνης. Ειδικότερα, η δράση οργανώθηκε γύρω από τους άξονες της περιβαλλοντικής μηχανικής, της δημιουργικής γραφής, του ψηφιακού γραμματισμού και της τεχνητής νοημοσύνης με κοινή θεματική τη θαλάσσια ρύπανση, που αποτελεί καίριο περιβαλλοντικό πρόβλημα της εποχής.

Οι μαθητές, με την καθοδήγηση εκπαιδευτικών από διαφορετικά γνωστικά πεδία, ακολούθησαν μια πολυεπίπεδη μαθησιακή διαδρομή, η οποία ξεκίνησε με την απόκτηση επιστημονικών γνώσεων για το φαινόμενο της ρύπανσης των θαλασσών και κορυφώθηκε με τη συγγραφή ποιημάτων, την εικαστική οπτικοποίησή τους με εργαλεία τεχνητής νοημοσύνης και τη δημιουργία ενός ψηφιακού βιβλίου.

Η καινοτομία της παρέμβασης δεν έγκειται μόνο στο θεματικό περιεχόμενο ή στα τεχνολογικά μέσα που αξιοποιήθηκαν, αλλά κυρίως στον τρόπο με τον οποίο η επιστημονική γνώση μετουσιώθηκε σε καλλιτεχνική δημιουργία και η προσωπική έκφραση συνδυάστηκε με τη συλλογική δράση. Πρόκειται για μια εμπειρία που ενίσχυσε τόσο τις γλωσσικές και ψηφιακές δεξιότητες των μαθητών όσο και την περιβαλλοντική τους ευαισθητοποίηση.

Μέσω της συγκεκριμένης δράσης, τέλος, υπογραμμίζεται η σημασία της ενσωμάτωσης των ψηφιακών μέσων στην εκπαίδευση και προτείνεται ένας δημιουργικός τρόπος αξιοποίησης της τεχνητής νοημοσύνης στην τάξη, όχι ως υποκατάστατο της ανθρώπινης δημιουργίας, αλλά ως εργαλείο ενίσχυσής της, ενθαρρύνοντας τους μαθητές να εκφραστούν, να επικοινωνήσουν και να δράσουν με επίκεντρο το περιβάλλον και την κοινωνία.

ΜΕΘΟΔΟΛΟΓΙΑ

Η θεωρητική αυτή θεμελίωση βρήκε πρακτική εφαρμογή μέσα από μια εκπαιδευτική δράση που σχεδιάστηκε με βάση τις αρχές της διεπιστημονικής και βιωματικής μάθησης, υιοθετώντας την παιδαγωγική φιλοσοφία του «μαθαίνω μέσα από τη δημιουργία». Η κεντρική ιδέα ήταν να δημιουργηθεί ένα πλούσιο μαθησιακό περιβάλλον, όπου οι μαθητές, με την καθοδήγηση των εκπαιδευτικών, θα καλλιεργούσαν διαφορετικές δεξιότητες (γλωσσικές, ψηφιακές, αισθητικές, επιστημονικές) μέσα από σταδιακά οικοδομημένες δραστηριότητες.

Η υλοποίηση βασίστηκε στη συνεργασία εκπαιδευτικών από διαφορετικές ειδικότητες, της Περιβαλλοντικής Μηχανικής, της Φιλολογίας και της Πληροφορικής, οι οποίοι συνέβαλαν με την επιστημονική τους κατάρτιση στον σχεδιασμό και την υποστήριξη των επιμέρους φάσεων. Κάθε στάδιο αυτής της προσέγγισης αποτελούσε θεμέλιο για το επόμενο, διαμορφώνοντας μια μαθησιακή αλυσίδα εμπλοκής, κατανόησης, δημιουργίας και παρουσίασης. Άλλωστε η διαθεματική και συνεργατική προσέγγιση διδασκαλίας, σύμφωνα με την UNESCO (2017: 9-10), συμβάλλει στην καλλιέργεια δεξιοτήτων του 21ου αιώνα και στην εκπαίδευση για την αειφορία.

Από παιδαγωγική άποψη η διαθεματικότητα είναι σημαντική διότι αποσκοπεί στην ολόπλευρη ανάπτυξη των μαθητών, αφού καλλιεργεί δεξιότητες και ικανότητες και στηρίζεται στην ομαδοσυνεργατική μορφή διδασκαλίας με την ενεργητική συμμετοχή των μαθητών (Theodoropoulos, 2009). Επιπλέον, ενσωματώνει αρχές της προοδευτικής παιδαγωγικής (progressive education), όπως αυτές διατυπώθηκαν από τον Dewey (1938), δίνοντας έμφαση στη μάθηση ως κοινωνική εμπειρία και στην αλληλεπίδραση των μαθητών με πραγματικά προβλήματα.

Στάδιο 1: Επιστημονική Ενημέρωση – Περιβαλλοντική Μηχανική

Η Περιβαλλοντική Μηχανική αποτελεί έναν δυναμικό επιστημονικό κλάδο που εστιάζει στη μελέτη, την πρόληψη και την αντιμετώπιση περιβαλλοντικών προβλημάτων, αξιοποιώντας γνώσεις από τη μηχανική, τη χημεία, τη βιολογία και τη φυσική (Morrison & Murphy, 2021: 1). Στο πλαίσιο της δράσης, η προσέγγιση του θέματος της θαλάσσιας ρύπανσης έγινε μέσω μιας δομημένης διαδικασίας, η οποία συνέβαλε ώστε να κατανοήσουν οι μαθητές τόσο τους σχετικούς επιστημονικούς όρους όσο και τις πολυδιάστατες επιπτώσεις του φαινομένου στο φυσικό και κοινωνικό περιβάλλον (UNEP, 2021: 4).

Η πρώτη φάση επικεντρώθηκε στη θεωρητική προσέγγιση της θαλάσσιας ρύπανσης, με στόχο την απόκτηση γνώσεων για την περαιτέρω διερεύνηση και ανάλυση του θέματος. Οι μαθητές:

1. Παρακολούθησαν επιστημονική παρουσίαση που κάλυπτε τις αιτίες, τις μορφές και τις συνέπειες της θαλάσσιας ρύπανσης.
2. Μελέτησαν πραγματικές περιπτώσεις (case studies), εξετάζοντας μεγάλα περιβαλλοντικά περιστατικά, όπως οι πετρελαιοκηλίδες και η διασπορά μικροπλαστικών στις θάλασσες.
3. Ανέλυσαν εκπαιδευτικά βίντεο, τα οποία παρείχαν οπτικοποιημένα δεδομένα για την αλληλεπίδραση των ρυπογόνων ουσιών με το θαλάσσιο οικοσύστημα.

Μέσα από αυτή τη διαδικασία, οι μαθητές:

- Έμαθαν να αναγνωρίζουν αιτιακές σχέσεις μεταξύ περιβαλλοντικών προβλημάτων και των επιπτώσεών τους στο οικοσύστημα.
- Εξοικειώθηκαν με βασικούς επιστημονικούς όρους, όπως τα μικροπλαστικά—μικροσκοπικά σωματίδια πλαστικού που εισέρχονται στην τροφική αλυσίδα μέσω θαλάσσιων οργανισμών, τις πετρελαιοκηλίδες—μεγάλες συγκεντρώσεις πετρελαίου στην επιφάνεια της θάλασσας που προκαλούν σοβαρές περιβαλλοντικές και οικονομικές επιπτώσεις—την τροφική αλυσίδα, δηλαδή τη διαδικασία μεταφοράς ενέργειας και θρεπτικών ουσιών μεταξύ των οργανισμών ενός οικοσυστήματος, και το ίδιο το οικοσύστημα, ένα σύνολο βιοτικών και αβιοτικών στοιχείων που αλληλεπιδρούν μεταξύ τους σε ένα συγκεκριμένο περιβάλλον.

- Ανέπτυξαν κριτική σκέψη μέσω της ομαδικής συζήτησης για τοπικά περιβαλλοντικά ζητήματα, φέρνοντας στο προσκήνιο προσωπικές εμπειρίες και παρατηρήσεις.

Η ενασχόληση με την Περιβαλλοντική Μηχανική επέτρεψε στους μαθητές να κατανοήσουν ότι η επίλυση των περιβαλλοντικών προβλημάτων απαιτεί επιστημονική μελέτη, καινοτόμες τεχνολογίες και συλλογική δράση. Μέσα από τη συστηματική ανάλυση των δεδομένων, τη χρήση επιστημονικών όρων και τη σύνδεση της θεωρίας με την πράξη διαμόρφωσαν περιβαλλοντική συνείδηση και ερευνητική διάθεση.

Αυτό το στάδιο αποτέλεσε τη βάση πάνω στην οποία δομήθηκε η δράση, προκειμένου οι μαθητές να προετοιμαστούν για να προσεγγίσουν το ζήτημα της θαλάσσιας ρύπανσης και από άλλες – πιο δημιουργικές και καινοτόμες – οπτικές γωνίες.

Στάδιο 2: Δημιουργική Γραφή – Μετουσίωση της γνώσης σε ποίηση για τη ρύπανση του νερού

Η Δημιουργική Γραφή αποτελεί μια εκπαιδευτική μέθοδο που μπορεί να αξιοποιηθεί σε όλες τις βαθμίδες της εκπαίδευσης (Moula, 2012). Εδράζεται στη δημοκρατική θεώρηση της δημιουργικότητας, σύμφωνα με την οποία όλα τα παιδιά διαθέτουν, σε διαφορετικό βαθμό, τη δυνατότητα καλλιτεχνικής έκφρασης, αρκεί να τους προσφέρονται κατάλληλα παιδαγωγικά ερεθίσματα και υποστηρικτικό μαθησιακό περιβάλλον (Skourtis, 2015: 23-24). Ο στόχος της είναι η ενεργοποίηση της φαντασίας και της δημιουργικής σκέψης μέσω της «παιχνιδοκεντρικής μάθησης», περιορίζοντας τη μηχανική μάθηση και την τυπική σχολική ρουτίνα (Moula, 2012).

Στη συγκεκριμένη δράση με θέμα την περιβαλλοντική εκπαίδευση, η Δημιουργική Γραφή αξιοποιήθηκε για τη μετουσίωση της γνώσης σε ποίηση. Οι μαθητές, αφού ενημερώθηκαν για τη ρύπανση του νερού (Στάδιο 1), προέβησαν στη συγγραφή ποιημάτων στα οποία αποτύπωσαν τις σκέψεις και τα συναισθήματά τους. Ειδικότερα επέλεξαν λέξεις-κλειδιά σχετικές με το θέμα και τις χρησιμοποίησαν ως αφόρμηση για την παραγωγή λόγου, ενσωματώνοντας εκφραστικά μέσα για την επίτευξη συναισθηματικής διέγερσης. Ο στόχος αυτής της φάσης ήταν να κατανοήσουν το θέμα προσεγγίζοντάς το όχι μόνο γνωστικά, αλλά και βιωματικά, αναπτύσσοντας δεξιότητες γραμματισμού και δημιουργικής έκφρασης. Η επιτυχία αυτής της δράσης εξαρτήθηκε σε μεγάλο βαθμό και από τον ρόλο των εκπαιδευτικών, οι οποίοι ήταν υποστηρικτικοί και διαμόρφωσαν ένα περιβάλλον χωρίς αξιολογικούς περιορισμούς. Άλλωστε όπως επισημαίνει ο Akkaya (2014), για να είναι αποτελεσματική η Δημιουργική Γραφή, απαιτείται από τον εκπαιδευτικό να διαθέτει κριτική σκέψη, δημιουργικότητα και την προθυμία να ενθαρρύνει την αυτονομία των μαθητών, απομακρυνόμενος από αυστηρά προγράμματα σπουδών και φορμαλιστικές πρακτικές.

Η συγγραφή ποιημάτων με θέμα τη ρύπανση του νερού αποτέλεσε, επομένως, μια ολοκληρωμένη παιδαγωγική εμπειρία που συνδύασε τη γνωστική κατανόηση με τη συναισθηματική και καλλιτεχνική έκφραση, καθιστώντας τη Δημιουργική Γραφή ισχυρό εργαλείο περιβαλλοντικής ευαισθητοποίησης και προσωπικής ενδυνάμωσης.

Στάδιο 3: Οπτικοποίηση μέσω Τεχνητής Νοημοσύνης

Η τρίτη φάση επικεντρώθηκε στη μετατροπή του υλικού (ποιήματα) σε οπτικό περιεχόμενο, με τη βοήθεια εργαλείων τεχνητής νοημοσύνης. Εξάλλου η ενσωμάτωση της τεχνητής νοημοσύνης στην εκπαιδευτική πράξη προσφέρει νέους ορίζοντες, όταν αξιοποιείται με κριτικό και δημιουργικό τρόπο (Pérez & Delgado, 2022).

Οι μαθητές εργάστηκαν σε ομάδες και εισήγαγαν τους στίχους από τα ποιήματά τους σε εφαρμογές όπως το DALL·E, για να παραγάγουν εικόνες εμπνευσμένες από το περιεχόμενό τους. Σε αυτό το στάδιο αξιοποιήθηκαν οι δυνατότητες της πολυτροπικής μάθησης, καθώς το κείμενο, η εικόνα και το συναίσθημα συνεργάζονται (Cope & Kalantzis, 2009,· Walsh, 2010).

Μέσα από αυτή τη διαδικασία:

- ενισχύθηκε ο οπτικός γραμματισμός (visual literacy) των μαθητών (Buckingham, 2007, σ. 45),
- αναπτύχθηκε η κριτική σκέψη ως προς τη χρήση της τεχνητής νοημοσύνης στην καλλιτεχνική δημιουργία (Pérez & Delgado, 2022),
- δόθηκε η δυνατότητα πολυτροπικής έκφρασης, καθώς τα παιδιά είδαν τα λόγια τους να αποκτούν μορφή και εικόνα (Walsh, 2010).

Παράλληλα, πραγματοποιήθηκαν συζητήσεις για την ηθική διάσταση της AI (πνευματικά δικαιώματα, ψευδείς εικόνες, αξιοπιστία), ενισχύοντας την ψηφιακή υπευθυνότητα των μαθητών (Rosen, Wolf, & Shonfeld, 2020).

Στάδιο 4: Δημιουργία Ψηφιακού Διαδραστικού Βιβλίου

Η τελική φάση περιλάμβανε τη σύνθεση όλων των παραγόμενων υλικών σε μια ενιαία, καλαίσθητη και λειτουργική μορφή: ένα διαδραστικό ψηφιακό βιβλίο, το οποίο δημιουργήθηκε από τους ίδιους τους μαθητές με εργαλεία όπως το Book Creator. Η χρήση τέτοιων ψηφιακών εργαλείων υποστηρίζεται από ευρωπαϊκά πλαίσια δεξιοτήτων, όπως το DigCompEdu, τα οποία προωθούν την παιδαγωγική αξιοποίηση της τεχνολογίας (Redecker & Punie, 2017:22).

Το ψηφιακό βιβλίο περιλάμβανε τα ποιήματα των μαθητών σε ψηφιακή μορφή, τις εικόνες που δημιούργησαν με τεχνητή νοημοσύνη, υπερσυνδέσμους με επιπλέον πληροφορίες για το περιβάλλον και τη ρύπανση. Η δημιουργία του ψηφιακού βιβλίου λειτούργησε όχι μόνο ως αποθετήριο του συλλογικού έργου, αλλά και ως μέσο επικοινωνίας και διάδοσης του μηνύματος της περιβαλλοντικής ευαισθητοποίησης στην τοπική κοινωνία και πέρα από αυτήν (Cope & Kalantzis, 2009).

ΑΠΟΤΕΛΕΣΜΑΤΑ

Η εκπαιδευτική παρέμβαση απέφερε πολύπλευρα αποτελέσματα, τόσο σε γνωστικό όσο και σε μεταγνωστικό και συναισθηματικό επίπεδο. Οι μαθητές είχαν την ευκαιρία να ενεργοποιηθούν σε πολλαπλά πεδία, να εκφραστούν, να συνεργαστούν και να αποκτήσουν βαθύτερη επίγνωση για το περιβάλλον και την κοινωνική τους ευθύνη. Τα αποτελέσματα αποτυπώθηκαν τόσο μέσα από τις εργασίες τους όσο και μέσα από την αλλαγή στάσης και συμπεριφοράς κατά τη διάρκεια της δράσης.

Ενίσχυση της Περιβαλλοντικής Συνείδησης

Οι μαθητές:
- ανέπτυξαν περιβαλλοντική συνείδηση, αντιλαμβανόμενοι το φυσικό περιβάλλον όχι ως αφηρημένη έννοια, αλλά ως οντότητα που επηρεάζεται από τις ανθρώπινες πράξεις,
- κατανόησαν βαθύτερα τις συνέπειες της θαλάσσιας ρύπανσης σε παγκόσμιο και τοπικό επίπεδο,
- εκδήλωσαν ενδιαφέρον να αναλάβουν πρωτοβουλίες για την ευαισθητοποίηση της σχολικής κοινότητας,
- υιοθέτησαν μια πιο κριτική στάση απέναντι στην κατανάλωση και τη ρύπανση.

Οφέλη Δημιουργικής Γραφής

Οι μαθητές:
- ανέπτυξαν τη γλωσσική τους ικανότητα σε επίπεδο γραμματικής, λεξιλογίου και βελτίωσαν τις δεξιότητες της ανάγνωσης και της γραφής
- ενίσχυσαν την αυτοπεποίθηση και τα εσωτερικά τους κίνητρα
- **επεξεργάστηκαν** συναισθήματα και ασυνείδητες εμπειρίες, ενισχύοντας την αυτογνωσία τους (Peach, 2023)
- καλλιέργησαν τη δημιουργική σκέψη και τη φαντασία τους
- συμμετείχαν σε βιωματικές δράσεις, συνεργάστηκαν και εκφράστηκαν ελεύθερα χωρίς να περιορίζονται από αξιολογικά κριτήρια (Papavasileiou, 2018)
- όξυναν και εμπλούτισαν τη φαντασία τους
- διερεύνησαν και ανέδειξαν τις προσωπικές τους απόψεις (Stewart, 2010)
- διαμόρφωσαν έναν ελεύθερο χώρο νοητικής και συναισθηματικής αποφόρτισης
- εισέπραξαν αναγνώριση και αποδοχή για τη δημιουργία τους με αποτέλεσμα να ενισχυθεί η επιθυμία τους για πρόοδο (Tompkins, 1982)

Καλλιέργεια Ψηφιακών και Πολυτροπικών Δεξιοτήτων

Η ενασχόληση με τα ψηφιακά μέσα είχε ως αποτέλεσμα:
- την εξοικείωση των μαθητών με σύγχρονα εργαλεία παραγωγής περιεχομένου (Book Creator, Canva, DALL·E),
- την ενίσχυση της κριτικής σκέψης ως προς τη χρήση της τεχνητής νοημοσύνης, με έμφαση στα ζητήματα αυθεντικότητας, δεοντολογίας και δημιουργικότητας,
- την καλλιέργεια της ικανότητας σχεδιασμού πολυτροπικών προϊόντων, όπου ο λόγος, η εικόνα και ο ήχος συνδυάζονται λειτουργικά.

Συνεργατική Μάθηση και Κοινωνικοποίηση

Η ομαδική διάσταση της δράσης συνέβαλε στην:
- ενίσχυση των διαπροσωπικών σχέσεων των μαθητών,
- καλλιέργεια του συναισθήματος του «ανήκειν» σε μια ομάδα με κοινό στόχο,
- προσφορά ευκαιριών δημιουργικής έκφρασης μέσα στην ομάδα,
- ενίσχυση της αλληλεγγύης, της ενσυναίσθησης και της αποδοχής της διαφορετικότητας.

ΣΥΖΗΤΗΣΗ

Με την δράση αυτή μεταδόθηκαν στους μαθητές νέοι τρόποι κατανόησης του κόσμου μέσω της διασύνδεσης της επιστήμης και τέχνης και ενεργοποιήθηκε η φαντασία και το συναίσθημά τους με τη μετατροπή της γνώσης σε προσωπική εμπειρία. Παράλληλα επιτεύχθηκε η πολυτροπική έκφραση, που ικανοποιεί διαφορετικά μαθησιακά προφίλ και ενισχύθηκε η μαθητική αυτενέργεια και αυτεπίγνωση, που συμβάλλουν στην ανάπτυξη της αυτοεκτίμησης και της αυτορρύθμισης. Το ενδιαφέρον των μαθητών ήταν εμφανές από τον ενθουσιασμό τους να συμμετάσχουν ενεργά σε όλα τα στάδια, την ποιότητα και πρωτοτυπία των παραγόμενων προϊόντων, τη θετική ανατροφοδότηση που έδωσαν οι ίδιοι για την εμπειρία τους. Επιπλέον, η εμπειρία αυτή ενίσχυσε τον ρόλο του σχολείου ως φορέα καινοτομίας και δημιουργίας, ανοίγοντας διαύλους συνεργασίας με φορείς και άλλες σχολικές μονάδες.

Ωστόσο παρατηρήθηκαν σημαντικές διαφοροποιήσεις σε επίπεδο εξοικείωσης των μαθητών με τα ψηφιακά εργαλεία και απαιτήθηκε διαφοροποιημένη υποστήριξη και δημιουργία μικτών ομάδων με στόχο την αλληλοβοήθεια. Παράλληλα κάποιοι μαθητές δυσκολεύτηκαν να μετατρέψουν τις πληροφορίες σε καλλιτεχνική έκφραση, για αυτόν τον λόγο εφαρμόστηκαν τεχνικές απλοποίησης, οπτικοποίησης και βιωματικής προσέγγισης.

Ο ρόλος της περιβαλλοντικής μηχανικής υπήρξε καθοριστικός, καθώς παρείχε το επιστημονικό πλαίσιο για την κατανόηση περιβαλλοντικών ζητημάτων και πρότεινε λύσεις με βάση τεχνολογικά εργαλεία και μεθόδους μέτρησης. Η επαφή των μαθητών με αυτή την επιστήμη συνέβαλε στην ανάπτυξη της περιβαλλοντικής τους συνείδησης και στην εξοικείωση με έννοιες βιωσιμότητας και καινοτομίας. Τέλος τα τεχνικά προβλήματα, όπως ζητήματα σύνδεσης στο διαδίκτυο, περιορισμένη πρόσβαση σε εξοπλισμό και μικρή εξοικείωση με τις πλατφόρμες, αντιμετωπίστηκαν με προγραμματισμό, ευελιξία και αξιοποίηση δωρεάν και φιλικών προς τον χρήστη εργαλείων.

Η θετική εμπειρία και τα παιδαγωγικά αποτελέσματα αυτής της δράσης ανοίγουν τον δρόμο για εμπλουτισμό και επέκταση του εγχειρήματος σε νέες θεματικές ενότητες που αφορούν την αειφορία, όπως η κλιματική αλλαγή, η κυκλική οικονομία, τα απειλούμενα είδη ή η βιώσιμη γεωργία, αξιοποιώντας την ίδια μεθοδολογική δομή. Παράλληλα θα ήταν ωφέλιμη η διασύνδεση και με άλλα μαθήματα, όπως η Φυσική, η Ιστορία, τα Μαθηματικά ή η Πολιτική Παιδεία, με σκοπό την ενίσχυση τη διαθεματικότητας. Θα ήταν ακόμα χρήσιμη η δημιουργία πλατφόρμας ανταλλαγής ψηφιακών βιβλίων μεταξύ σχολείων από διαφορετικές περιοχές, εντός ή και εκτός Ελλάδας, στο πλαίσιο δράσεων eTwinning ή Erasmus+ και η συνεργασία με εξωσχολικούς φορείς, όπως ΜΚΟ, πανεπιστημιακά τμήματα, βιβλιοθήκες και πολιτιστικά ιδρύματα, για υποστήριξη, εμπλουτισμό και διάχυση του έργου. Τέλος σημαντική θα ήταν και η συστηματική αξιολόγηση των επιδράσεων της παρέμβασης, με εργαλεία παρατήρησης, ερωτηματολόγια και συνεντεύξεις, για την τεκμηρίωση των αποτελεσμάτων και την επιστημονική ανάλυση της διαδικασίας.

ΣΥΜΠΕΡΑΣΜΑΤΑ

Η δράση ανέδειξε την αξία της διεπιστημονικής, βιωματικής μάθησης, καθώς η ενσωμάτωση επιστημονικών, καλλιτεχνικών και ψηφιακών στοιχείων κέρδισε το ενδιαφέρον των μαθητών και μετέτρεψε πολύπλοκα ζητήματα, όπως η ρύπανση των υδάτων, σε προσωπικές εμπειρίες. Μέσα από συνεργατικές, πολυτροπικές δραστηριότητες καλλιεργήθηκαν δεξιότητες αυτονομίας, ομαδικής εργασίας και αυτορρύθμισης, ενώ η ευέλικτη σχεδίαση επέτρεψε την ενεργή συμμετοχή όλων, παρά τις ψηφιακές προκλήσεις και τις ατομικές διαφοροποιήσεις. Το μοντέλο αυτό, συνδυάζοντας καινοτομία, περιβαλλοντική συνείδηση, αισθητική έκφραση και ψηφιακή παιδεία, προσφέρει ένα βιώσιμο πλαίσιο για την εκπαίδευση του 21ου αιώνα, ενισχύοντας ταυτόχρονα το προφίλ του σχολείου ως κόμβου δημιουργίας και καινοτομίας.

ΠΕΡΙΛΗΨΗ

Η εργασία αυτή έχει ως αντικείμενό της την ανάδειξη καινοτόμου εκπαιδευτικού σχεδιασμού με την αξιοποίηση ψηφιακών και τεχνολογικών μέσων στη διδασκαλία της Αγγλικής ως ξένης γλώσσας τα οποία παρέχουν τη δυνατότητα αναβάθμισης της διδασκαλίας και εκμάθησής της. Ειδικότερα, στο πλαίσιο αυτό, προτείνει την παιδαγωγική αξιοποίηση ψηφιακών μέσων, αυθεντικών πηγών και βίντεο από το διαδίκτυο και Web 2.0 συνεργατικών εργαλείων για την υλοποίηση ιστοεξερευνήσεων (WebQuests). Ο σχεδιασμός αυτό προτείνεται με βάση την προσωπική εμπειρία μας και τα πορίσματα ερευνών που δείχνουν ότι η ενσωμάτωσή ψηφιακών και τεχνολογικών μέσων στη διδασκαλία αφενός παρέχει πολλαπλά οφέλη και αφετέρου ότι η αποτελεσματική αξιοποίησή τους είναι εφικτή και ρεαλιστική κι όχι απλά θεωρητική.

Η παιδαγωγική αξιοποίηση ψηφιακών μέσων, συνεργατικών εργαλείων και του διαδικτύου για την υλοποίηση ιστοεξερευνήσεων αυξάνει τα κίνητρα των μαθητών, -τριών και την ενεργητική τους συμμετοχή στη μαθησιακή διαδικασία, καθώς βασίζονται σε θέματα και πεδία έρευνας που ανταποκρίνονται στα ενδιαφέροντα των μαθητών και αξιοποιούν με παιδαγωγικά ορθούς τρόπους τις εμπειρίες τους. Επίσης, η συμμετοχή σε ιστοεξερευνήσεις αυξάνει την μαθητική πρωτοβουλία, ενισχύει την αυτόνομη μάθηση και τη διαθεματική προσέγγιση στη μάθηση καταπολεμώντας την παθητικότητα και την αδιαφορία, επειδή οι ιστοεξερευνήσεις τοποθετούν τους μαθητές στο επίκεντρο της μαθησιακής διαδικασίας. Επιπλέον οφέλη αποτελούν η δυνατότητα συνεργασίας, η ανάπτυξη της κριτικής και της δημιουργικής σκέψης αλλά και της διερευνητικής μάθησης, καθώς ενθαρρύνεται η κριτική συλλογή, ανάλυση και επεξεργασία των δεδομένων, κι όχι η αποστήθιση και η απλή παράθεση πληροφοριών. Ένα περαιτέρω ευεργετικό αποτέλεσμα αφορά το γεγονός ότι προάγεται η φυσική διδασκαλία όλων των γλωσσικών δεξιοτήτων στην Αγγλική γλώσσα, κατανόησης και παραγωγής γραπτού και προφορικού λόγου, σε ένα αυθεντικό επικοινωνιακό πλαίσιο.

Ο στόχος της εργασίας αυτής είναι η πρακτική εφαρμογή των βασικών αρχών της εκπαιδευτικής θεωρίας. Στην αρχή της εργασίας επιχειρείται μια σύντομη ανασκόπηση της βιβλιογραφίας και των ερευνών που έχουν πραγματοποιηθεί σχετικά με την παιδαγωγική αξιοποίηση των ιστοεξερευνήσεων, την χρησιμοποίηση πηγών και βίντεο από το διαδίκτυο στη διδασκαλία της Αγγλικής ως ξένης γλώσσας. Στη συνέχεια, με βάση τη σχετική βιβλιογραφία, προτείνουμε μια ιστοεξερεύνηση που μπορεί να υλοποιηθεί στο πλαίσιο της διδασκαλίας της Αγγλικής για μαθητές επιπέδου γλωσσομάθειας Β1. Παρουσιάζουμε τον βασικό της σχεδιασμό, τα στάδια υλοποίησής της, και τα αναμενόμενα θετικά αποτελέσματα από την υλοποίησή της, ιδιαίτερα αυτά που σχετίζονται με την ενίσχυση της ομαδοσυνεργατικής μάθησης, της κριτικής και δημιουργικής σκέψης, της αξιοποίησης αυθεντικού υλικού, και της ανάπτυξης όλων των γλωσσικών δεξιοτήτων. Παρέχουμε, επίσης, οδηγίες για την επιτυχημένη εφαρμογή της ιστοεξερεύνησης, έτσι ώστε τα ψηφιακά και τεχνολογικά μέσα να αξιοποιηθούν αποτελεσματικά, να αποτελέσουν μια καινοτόμο προσέγγιση και να συμβάλουν θετικά στην αύξηση των κινήτρων των μαθητών και στην εκμάθηση της Αγγλικής γλώσσας. Οι εκπαιδευτικοί της Αγγλικής γλώσσας μπορούν να προσαρμόσουν τις δραστηριότητες που προτείνονται και να διευρύνουν το εύρος της προτεινόμενης ιστοεξερεύνησης, την αξιοποίηση των ψηφιακών και τεχνολογικών μέσων και των συνεργατικών εργαλείων για να ανταποκριθούν στις ανάγκες και τα χαρακτηριστικά των δικών τους μαθητών-τριών και το γενικότερο πλαίσιο της διδασκαλίας τους.

Λέξεις – κλειδιά: ψηφιακά και τεχνολογικά μέσα, ιστοεξερευνήσεις, διαδίκτυο, Αγγλική γλώσσα

ΕΙΣΑΓΩΓΗ

Το σύγχρονο σχολείο πρέπει να συνομιλεί με την κοινωνία και να ανταποκρίνεται στις τρέχουσες τεχνολογικές και κοινωνικές συνθήκες. Με τον τρόπο αυτό είναι σε θέση να παρέχει στους μαθητές-τριες εκπαίδευση η οποία θα τους βοηθήσει στις ακαδημαϊκές, προσωπικές, κοινωνικές και επαγγελματικές τους διαδρομές μετά την αποφοίτησή τους από το σχολείο. Αυτή η απαίτηση κρίνεται ιδιαίτερα σημαντική στην εποχή μας, στην οποία οι ραγδαίες εξελίξεις στην τεχνολογία (διαδίκτυο, Web 2.0 εργαλεία, τεχνητή νοημοσύνη) δημιουργούν νέους τρόπους επικοινωνίας και αναπαράστασης, και, συνακόλουθα, νέους γραμματισμούς που είναι απαραίτητοι για την συμμετοχή των μαθητών/μελλοντικών πολιτών στο κοινωνικό γίγνεσθαι (Karava & Zouganeli, 2013).

Ένα τέτοιο σχολείο δεν μπορεί να είναι αποκομμένο από την κοινωνία, τους μαθητές και τις οικογένειές τους. Αντίθετα, χρειάζεται να αλληλοεπιδρά με αυτούς και να δέχεται ερεθίσματα από τον κοντινό και ευρύτερο περίγυρο. Με τον τρόπο αυτό, θα είναι σε θέση να παρέχει μια υψηλού επιπέδου συμπεριληπτική εκπαίδευση που θα επιτρέψει στους μαθητές να κατακτήσουν τη γνώση και να αξιοποιήσουν στο έπακρο τις δυνατότητές τους, με βάση την θεώρηση ότι η γνώση δεν προσφέρεται έτοιμη, αλλά δομείται από τους μαθητές μέσα από διαδικασίες διερεύνησης και μεταμορφωτικής προσωπικής ανάπτυξης (Dendrinou, 2013).

Το σχολείο που στηρίζεται στο δασκαλοκεντρικό μοντέλο λειτουργίας δεν είναι αποτελεσματικό. Δεν ανταποκρίνεται στην ανάγκη των μαθητών για μια μαθησιακή διαδικασία η οποία διεξάγεται με τρόπο που αξιοποιεί τα ενδιαφέρονται και τις ανάγκες τους. Κατά συνέπεια, όπως γνωρίζουν καλά οι εκπαιδευτικοί που διδάσκουν σε όλες τις βαθμίδες της εκπαίδευσης, μια από τις σημαντικότερες προκλήσεις του σύγχρονου σχολείου αποτελεί ο τρόπος με τον οποίο μπορεί να σχεδιαστεί μια μαθησιακή διαδικασία η οποία να είναι ελκυστική για τους μαθητές και να προάγει τη μάθηση. Η ανάγκη αυτή είναι περισσότερο εμφανής στο ελληνικό εκπαιδευτικό σύστημα, επειδή το εκτεταμένο δίκτυο εξωσχολικής υποστήριξης (φροντιστήρια, ιδιαίτερα μαθήματα) απαξιώνει το σχολείο. Οι μαθητές και οι γονείς τους συχνά εκφράζουν την άποψη ότι οι γνώσεις που αποκομίζουν οι μαθητές από το σχολείο δεν επαρκούν, και συνεπώς, χρειάζεται η προσφυγή στην εξωσχολική υποστήριξη.

Εκτός από τα παραπάνω, το δημόσιο σχολείο καλείται να ενσωματώσει με αποτελεσματικό τρόπο τα ψηφιακά μέσα και τις νέες τεχνολογίες. Με τον τρόπο αυτό θα αξιοποιήσει εργαλεία και τρόπους παρουσίασης της πληροφορίας με τους οποίους είναι ήδη εξοικειωμένοι οι μαθητές και αφετέρου θα τους εφοδιάσει με τους «νέους γραμματισμούς». Θα τους βοηθήσει, δηλαδή, να αποκτήσουν δεξιότητες, στρατηγικές και πρακτικές που είναι απαραίτητες στην διαδικτυακή κοινωνία (Castells, 1996), οι οποίες αφορούν την πλοήγηση, ερμηνεία και παραγωγή πληροφοριών σε έναν κόσμο ο οποίος καθίσταται ψηφιακός και όλο και πιο πολυμεσικός. Για να παρέχει το σχολείο στους μαθητές και μελλοντικούς πολίτες τη δυνατότητα να το συμμετέχουν ενεργά και δημιουργικά σε αυτή την κοινωνία, χρειάζεται να είναι δυναμικό, κι όχι στατικό ή συντηρητικό. Να προσαρμόζεται για να εφοδιάζει τους μαθητές με «νέους γραμματισμούς», δηλαδή με γνώσεις και δεξιότητες που υπερβαίνουν τον παραδοσιακό γραμματισμό (ανάγνωση και συγγραφή). Οι νέοι αυτοί γραμματισμοί περιλαμβάνουν την ικανότητα κριτικής και δημιουργικής χρήσης των νέων τεχνολογιών, μέσων και ψηφιακών πλατφορμών για επικοινωνία, μάθηση και αλληλεπίδραση, την αξιολόγηση του περιεχομένου που απαντάται στο διαδίκτυο και την συμμετοχή σε διαδικτυακές κοινότητες.

Οι «νέοι» αυτοί γραμματισμοί δύναται να περιλαμβάνουν τον «ψηφιακό γραμματισμό» (digital literacy), που αναφέρεται σε «γνωστικές δεξιότητες» (Bellou & Mikropoulos, 2023:30) με περιεχόμενο ευρύτερο από αυτό του «πληροφορικού αλφαβητισμού». Ο ψηφιακός γραμματισμός περιλαμβάνει γνώσεις και δεξιότητες κριτικής και αναστοχαστικής χρησιμοποίησης των ψηφιακών τεχνολογιών αναφορικά με την πρόσβαση στην πληροφορία (π.χ. αξιόπιστες πηγές του διαδικτύου), την διαχείριση της πληροφορίας, την κριτική της αξιολόγηση και τη δημιουργία και κατασκευή νέας γνώσης.

Με βάση την παραπάνω συζήτηση, στην εργασία αυτή εστιαζόμαστε στους τρόπους με τους οποίους οι παραπάνω παραδοχές μπορούν να «μεταφραστούν» σε συγκεκριμένες διδακτικές πρακτικές. Ειδικότερα, η εργασία αυτή έχει ως αντικείμενό της την ανάδειξη καινοτόμου εκπαιδευτικού σχεδιασμού με την αξιοποίηση ψηφιακών και τεχνολογικών μέσων στη διδασκαλία της Αγγλικής ως ξένης γλώσσας τα οποία παρέχουν τη δυνατότητα αναβάθμισης της διδασκαλίας και εκμάθησής της. Στο πλαίσιο αυτό, προτείνει την παιδαγωγική αξιοποίηση ψηφιακών μέσων, αυθεντικών πηγών και βίντεο από το διαδίκτυο και Web 2.0 συνεργατικών εργαλείων για την υλοποίηση ιστοεξερευνήσεων (WebQuests). Ο σχεδιασμός αυτός προτείνεται με βάση την προσωπική εμπειρία και τα πορίσματα ερευνών που δείχνουν ότι αφενός η ενσωμάτωσή ψηφιακών και τεχνολογικών μέσων στη διδασκαλία παρέχει πολλαπλά οφέλη και αφετέρου ότι η αποτελεσματική αξιοποίησή τους είναι εφικτή και ρεαλιστική, δηλαδή όχι απλά θεωρητική.

ΨΗΦΙΑΚΑ ΜΕΣΑ ΚΑΙ ΔΙΔΑΣΚΑΛΙΑ ΤΗΣ ΑΓΓΛΙΚΗΣ ΓΛΩΣΣΑΣ

Η παιδαγωγική αξιοποίηση ψηφιακών μέσων, συνεργατικών εργαλείων και του διαδικτύου για την υλοποίηση ιστοεξερευνήσεων στη διδασκαλία της Αγγλικής ως ξένης γλώσσας σε ένα πλαίσιο διερευνητικής μάθησης αυξάνει τα κίνητρα των μαθητών και την ενεργητική τους συμμετοχή στη μαθησιακή διαδικασία, καθώς βασίζονται σε θέματα και πεδία έρευνας που ανταποκρίνονται στα ενδιαφέροντα των μαθητών και αξιοποιούν με παιδαγωγικά ορθούς τρόπους τις εμπειρίες τους.

Οι ιστοεξερευνήσεις εντάσσονται στο ευρύτερο πλαίσιο της διερευνητικής μάθησης (Maddux and Cummings, 2007), η οποία βασίζεται στον εποικοδομισμό (constructivism) (Tsiatsos, 2015). Πρόκειται για μια μαθησιακή διαδικασία που εκκινεί από το γεγονός ότι οι μαθητές διερευνούν ένα ζήτημα/πρόβλημα (Aditomo et al., 2013; Kurt, 2012), το οποίο λειτουργεί ως «καταλύτης» για τη συμμετοχή των μαθητών στις μαθησιακές δραστηριότητες. Οι δραστηριότητες στις οποίες εμπλέκονται οι μαθητές εμπεριέχουν την επεξεργασία και ανάλυση πληροφοριών, τη δημιουργική σκέψη, τη διαθεματικότητα, τη συνεργασία και τη χρήση τεχνολογικών εργαλείων (Oliver, 2008). Η διερευνητική μάθηση σχεδιάζεται και υλοποιείται με στόχο την ενεργή συμμετοχή των μαθητών, οι οποίοι αναλαμβάνουν την ευθύνη για την ανακάλυψη και την οικοδόμηση της νέας γνώσης, μέσα από αυθεντικές διερευνητικές και συνεργατικές διαδικασίες (Pedaste et al., 2015).

Οι ιστοεξερευνήσεις περιλαμβάνουν μια σειρά από δομημένες δραστηριότητες, οργανώνοντας τις μαθησιακές εμπειρίες των μαθητών, οι οποίοι χρησιμοποιούν πόρους του διαδικτύου και ψηφιακά μέσα με τρόπους που απαιτούν κριτική σκέψη και βαθιά κατανόηση των ζητημάτων (Unal et al., 2012). Αποτελούν μια μαθητοκεντρική προσέγγιση που σχεδιάζεται με βάση ένα σενάριο που ενδιαφέρει τους μαθητές οι οποίοι εργάζονται σε μικρές ομάδες ακολουθώντας προδιαγεγραμμένα βήματα για να εξετάσουν προβλήματα, να προτείνουν λύσεις (χρησιμοποιώντας τη διαδικασία συλλογής, ανάλυσης και σύνθεσης των δεδομένων και των πληροφοριών που συλλέγουν από ψηφιακές πηγές), αξιοποιώντας πηγές του διαδικτύου που προτείνονται από τους εκπαιδευτικούς, ενώ οι μαθητές «συνήθως αναλαμβάνουν συγκεκριμένους ρόλους μέσα στην ομάδα» (Zheng et al., 2008:296). Προωθούν την κατασκευή της γνώσης μέσα από μια διαδικασία κριτικής σκέψης (Dodge, 2001) και βασίζονται σε τέσσερις βασικές αρχές (Zheng et al., 2008): την κριτική σκέψη, την πρακτική εφαρμογή αυτών που έχουν μελετήσει και μάθει οι μαθητές, τη συνεργατικότητα και την αξιοποίηση κοινωνικών δεξιοτήτων, καθώς επίσης, την υποστήριξη/σκαλωσιά (scaffolding), επειδή η οργάνωση της όλης διαδικασίας σε μικρά και ξεκάθαρα επιμέρους στάδια δίνει στους εκπαιδευτικούς τη δυνατότητα να υποστηρίζουν συνέχεια και συστηματικά τους μαθητές ανάλογα με την πρόοδό και τις ανάγκες τους.

Μια σύντομη βιβλιογραφικά ανασκόπηση δείχνει ότι η συμμετοχή σε ιστοεξερευνήσεις αποφέρει οφέλη για τους μαθητές σε πολλαπλά επίπεδα. Ειδικότερα, η συμμετοχή σε ιστοεξερευνήσεις στη διδασκαλία της αγγλικής ως ξένης γλώσσας αυξάνει την μαθητική πρωτοβουλία και τα κίνητρα, ενώ ενισχύει την αυτοκατευθυνόμενη μάθηση (Koutsogianni, 2014). Επιπλέον οφέλη αποτελούν η δυνατότητα συνεργασίας ανάμεσα στους μαθητές, η ανάπτυξη της κριτικής και της δημιουργικής σκέψης αλλά και της διερευνητικής μάθησης, καθώς ενθαρρύνεται η κριτική συλλογή, ανάλυση και επεξεργασία των δεδομένων, κι όχι η αποστήθιση και η απλή παράθεση πληροφοριών. Παρέχουν στους εκπαιδευτικούς ένα χρήσιμο εκπαιδευτικό εργαλείο για να βοηθήσουν τους μαθητές τους να αποκτήσουν δεξιότητες σκέψης υψηλού επιπέδου (higher-level thinking skills) (Dodge, 2001; Popota, 2014). Οι δεξιότητες αυτές περιλαμβάνουν την ικανότητα ανάλυσης, αξιολόγησης και εφαρμογής της γνώσης με τρόπο που είναι πολύπλοκος και απαιτεί αφηρημένη σκέψη, σε αντίθεση με την απλή ανάκληση και παρουσίαση πληροφοριών. Συνεπώς, οι δεξιότητες αυτές δεν αφορούν απλά την απομνημόνευση, αλλά την κριτική σκέψη, την επίλυση προβλήματος και την ικανότητα εύρεσης συνδέσεων και σχέσεων ανάμεσα σε φαινομενικά ασύνδετες έννοιες και ζητήματα (Mislia et al., 2019).

Ένα περαιτέρω ευεργετικό αποτέλεσμα αφορά το γεγονός ότι προάγεται η φυσική διδασκαλία όλων των γλωσσικών δεξιοτήτων στην Αγγλική γλώσσα, κατανόησης και παραγωγής γραπτού και προφορικού λόγου, σε ένα αυθεντικό επικοινωνιακό πλαίσιο. Αυτό που είναι σημαντικό είναι το γεγονός ότι οι ιστοεξερευνήσεις παρέχουν τη δυνατότητα να ενσωματωθούν με επιτυχή και φυσικό τρόπο οι νέες τεχνολογίες και τα ψηφιακά μέσα στη μαθησιακή διαδικασία (Abbit and Ophus, 2008).

Ο σχεδιασμός και η υλοποίηση των ιστοεξερευνήσεων ακολουθεί μια σειρά από διαδοχικά στάδια (Ebadi and Rahimi, 2018). Το πρώτο στάδιο αφορά την εισαγωγή (introduction). Στο στάδιο αυτό οι εκπαιδευτικοί παρουσιάζουν και εξηγούν στους μαθητές τη θεματική και τα ευρύτερα ζητήματα τα οποία θα διερευνήσουν στο πλαίσιο της ιστοεξερεύνησης. Το δεύτερο στάδιο της ιστοεξερεύνησης είναι οι δραστηριότητες (tasks), που περιλαμβάνει τα ερωτήματα που θα απαντηθούν και τα προβλήματα που θα αναλάβουν να επιλύσουν οι μαθητές, το τελικό προϊόν, το αποτέλεσμα της διερευνητικής δραστηριότητας των μαθητών. Το τρίτο στάδιο, η διαδικασία (process), αφορά τον προσδιορισμό των διαδοχικών σταδίων που θα ακολουθήσουν οι μαθητές για να πραγματοποιήσουν τις δραστηριότητες. Το τέταρτο στάδιο, οι πόροι/πηγές (resources) αφορά τις διαδικτυακές πηγές, ιστοσελίδες, ψηφιακά άρθρα, online

εγκυκλοπαίδειες, κλπ. που θα χρησιμοποιήσουν οι μαθητές. Το πέμπτο στάδιο, η αξιολόγηση, σχετίζεται με τις διαδικασίες (π.χ. χρήση ρουμπρίκας) για την αξιολόγηση των μαθητών και των ομάδων εργασίας. Το τελευταίο στάδιο, το συμπέρασμα, συνήθως είναι μια συζήτηση σχετικά με τα οφέλη που αποκόμισαν οι μαθητές και τους τρόπους με τους οποίους τα αποτελέσματα της ιστοεξερεύνησης μπορούν να αξιοποιηθούν.

Στο επίπεδο της μαθησιακής διαδικασίας, τα Web 2.0 συνεργατικά εργαλεία και εφαρμογές, σε αντίθεση με τις αντίστοιχες εφαρμογές Web 1.0 που αφορούσαν κατά κύριο λόγο την αναζήτηση της πληροφορίας και την πρόσβαση σε ιστοσελίδες (Anastasiades and Kotsidis, 2013), βοηθούν τους μαθητές να δημιουργούν και να διαμορφώνουν το περιεχόμενο και χαρακτηρίζονται από τις δυνατότητες που παρέχουν για διαδραστικότητα, συνεργασία, αλληλεπίδραση και τη δημιουργία ψηφιακών κοινοτήτων (Hwang, et al., 2008). Για παράδειγμα, τα ιστολόγια (blogs) μπορούν να χρησιμοποιηθούν στην υλοποίηση ιστοεξερευνήσεων (WebQuests), αλλά και ερευνητικών εργασιών (projects), και για να δημοσιεύσουν οι μαθητές τις απόψεις τους και να αλληλοεπιδρούν, ενώ οι εκπαιδευτικοί έχουν τη δυνατότητα να παρέχουν ανατροφοδότηση. Εφαρμογές Web 2.0 που αποσκοπούν στην συνεργασία και την ανταλλαγή ιδεών (π.χ. Google Docs) και οι οποίες ενισχύουν τις κοινωνικές δεξιότητες μπορούν να χρησιμοποιηθούν για ομαδοσυνεργατικές δραστηριότητες (Sa'diyah and Nabhan, 2021). Επίσης, εφαρμογές Web 2.0 που διευκολύνουν τη δημιουργία περιεχομένου, την ανάρτηση υλικού και την επεξεργασία του (π.χ. Padlet, wikis) παρέχουν τη δυνατότητα για την επιλογή του υλικού που είναι κατάλληλο για την υλοποίηση της ιστοεξερεύνησης, την online εργασία, την αλληλεπίδραση, την ανταλλαγή απόψεων, τη συζήτηση και την εξαγωγή συμπερασμάτων σε έναν ψηφιακό συνεργατικό χώρο (Pedaste et al., 2015; Scrhum & Levin, 2009).

Στη συνέχεια, με βάση τη σχετική βιβλιογραφία, προτείνουμε μια ιστοεξερεύνηση που μπορεί να υλοποιηθεί στο πλαίσιο της διδασκαλίας της Αγγλικής για μαθητές επιπέδου γλωσσομάθειας Β1. Παρουσιάζουμε τον βασικό της σχεδιασμό, τα στάδια υλοποίησής της, και τα αναμενόμενα θετικά αποτελέσματα από την υλοποίησή της, ιδιαίτερα αυτά που σχετίζονται με την ενίσχυση της ομαδοσυνεργατικής μάθησης, της κριτικής και δημιουργικής σκέψης, της αξιοποίησης αυθεντικού υλικού, και της ανάπτυξης όλων των γλωσσικών δεξιοτήτων σε ένα φυσικό και αυθεντικό επικοινωνιακό πλαίσιο. Παρέχουμε, επίσης, πρακτικές οδηγίες για την επιτυχημένη εφαρμογή της ιστοεξερεύνησης, έτσι ώστε τα ψηφιακά και τεχνολογικά μέσα να αξιοποιηθούν αποτελεσματικά, να αποτελέσουν στην πράξη μια καινοτόμο προσέγγιση και να συμβάλουν θετικά στην αύξηση των κινήτρων των μαθητών και στην εκμάθηση της Αγγλικής γλώσσας. Οι εκπαιδευτικοί της Αγγλικής γλώσσας μπορούν να προσαρμόσουν τις δραστηριότητες που προτείνονται και να διευρύνουν το εύρος της προτεινόμενης ιστοεξερεύνησης, την αξιοποίηση των ψηφιακών και τεχνολογικών μέσων και των συνεργατικών εργαλείων για να ανταποκριθούν στις ανάγκες και τα χαρακτηριστικά των δικών τους μαθητών-τριών και το γενικότερο πλαίσιο της διδασκαλίας τους.

ΠΡΟΤΑΣΗ ΙΣΤΟΕΞΕΡΕΥΝΗΣΗΣ

Η ιστοεξερεύνηση που παρουσιάζεται στη συνέχεια αφορά σε μαθητές της τρίτης τάξης του γυμνασίου, με επίπεδο γλωσσομάθειας Β1 στο «Κοινό Ευρωπαϊκό Πλαίσιο Αναφορά για τις Γλώσσες» (Common European Framework of Reference for Languages) (Council of Europe, 2020). Έχει σχεδιαστεί για να πραγματοποιηθεί σε διάστημα δύο μηνών.

ΣΤΟΧΟΙ ΤΗΣ ΙΣΤΟΕΞΕΡΕΥΝΗΣΗΣ

Οι σημαντικότεροι στόχοι της ιστοεξερεύνησης, δηλαδή αυτά τα οποία αναμένεται να μάθουν και να πετύχουν οι μαθητές στο τέλος της ιστοεξερεύνησης και οι οποίοι κατευθύνουν την διδασκαλία, το περιεχόμενο, τις δραστηριότητες, τις στρατηγικές διδασκαλίας και την αξιολόγηση, είναι οι ακόλουθοι.

Πρώτον, η ανάπτυξη όλων των δεξιοτήτων στην Αγγλική γλώσσα, παραγωγής και κατανόησης γραπτού και προφορικού λόγου (reading, writing, listening and speaking skills) σε ένα αυθεντικό επικοινωνιακό πλαίσιο. Η ιστοεξερεύνηση είναι σχεδιασμένη με τέτοιο τρόπο ώστε οι μαθητές να χρησιμοποιούν την αγγλική γλώσσα σε ένα φυσικό πλαίσιο για συνεργασία, αλληλεπίδραση και ανταλλαγή απόψεων. Αυτό σημαίνει ότι δεν χρησιμοποιούν της Αγγλική γλώσσα απλά για να συμμετέχουν σε δραστηριότητες κατανόησης προφορικού λόγου, ή δραστηριότητες παραγωγής προφορικού λόγου σε ένα προδιαγεγραμμένο πλαίσιο, αλλά για να συμμετέχουν σε δραστηριότητες που προσομοιάζουν την χρήση της Αγγλικής γλώσσας από τους φυσικούς της χρήστες. Για παράδειγμα, στο πρώτο στάδιο της ιστοεξερεύνησης, την εισαγωγή, οι μαθητές συζητούν για τα περιβαλλοντικά προβλήματα της περιοχής τους και παρακολουθούν ένα σχετικό βίντεο που θέτει το πλαίσιο της αναζήτησής τους. Επιπλέον, η χρησιμοποίηση ψηφιακών εργαλείων για συνεργασία ενσωματώνει την ανάπτυξη δεξιοτήτων κατανόησης και παραγωγής γραπτού λόγου σε ένα φυσικό επικοινωνιακό πλαίσιο. Οι εκπαιδευτικοί δεν χρειάζεται να σχεδιάσουν δραστηριότητες για να βοηθήσουν τους μαθητές τους να αναπτύξουν τις δεξιότητες αυτές, επειδή η ανάπτυξη των δεξιοτήτων αυτών αποτελεί αναπόσπαστο τμήμα τους σχεδιασμού και υλοποίησης της ιστοεξερεύνησης, η οποία αποτελεί ένα σύνολο δραστηριοτήτων που προσομοιάζει σε αυτές στις οποίες συμμετέχουν οι μαθητές έξω από το περιορισμένο πλαίσιο της σχολικής τάξης.

Πρόκειται για έναν κρίσιμο στόχο, καθώς η διδασκαλία της Αγγλικής γλώσσας στο ελληνικό σχολείο δεν παρέχει πάντοτε τη δυνατότητα για δυνατότητα χρήσης της γλώσσας σε ένα αυθεντικό επικοινωνιακό πλαίσιο (Tsiplakidis, 2021).

Ένας επιπλέον στόχος αποτελεί η παιδαγωγικά ορθή και αποτελεσματική αξιοποίηση των νέων τεχνολογιών στη διδασκαλία της Αγγλικής γλώσσας. Ο στόχος αυτός απορρέει από τα πορίσματα ερευνών που δείχνουν ότι οι ιστοεξερευνήσεις αποτελούν ιδανικό εργαλείο για την ενσωμάτωση των νέων τεχνολογιών στην ξενόγλωσση τάξη (Oilousidou, 2018), ενισχύοντας την κριτική και αναστοχαστική τους χρήση. Μια τέτοια χρήση περιλαμβάνει τα ακόλουθα χαρακτηριστικά: (α) οι μαθητές εφοδιάζονται με ψηφιακές πηγές, αλλά χρειάζεται να αξιολογήσουν την αξιοπιστία και την εγκυρότητά τους ή/και τυχόν προκαταλήψεις (bias), (β) οι μαθητές χρειάζεται να επιλέξουν μόνο τις πληροφορίες που είναι σχετικές με το υπό διερεύνηση ζήτημα, (γ) οι μαθητές δεν χρησιμοποιούν τα ψηφιακά εργαλεία απλά επειδή είναι διαθέσιμα. Αντίθετα, επιλέγουν σκόπιμα τα κατάλληλα ψηφιακά εργαλεία σε σχέση με τους στόχους της ιστοεξερεύνησης, αξιολογώντας τα κριτικά, εξετάζοντας σε βάθος τους τρόπους με τους οποίους μπορούν να τα αξιοποιήσουν. Για παράδειγμα, μια ομάδα μαθητών μπορεί να επιλέξει μια εφαρμογή του διαδικτύου (π.χ. Padlet, Google Docs) για να συνεργαστεί. Αναστοχαστικά, κατά τη διάρκεια, αλλά και μετά το πέρας της ιστοεξερεύνησης, αξιολογούν την αποτελεσματικότητα της εφαρμογής αυτής αναφορικά με τη δυνατότητά της για συνεργασία και διαμοιρασμό πληροφοριών και ιδεών.

Ένας περαιτέρω στόχος αποτελεί η ανάπτυξη δεξιοτήτων σκέψης υψηλού επιπέδου (higher-level thinking skills), που απορρέει από το γεγονός ότι οι μαθητές δεν καταγράφουν απλά τη νέα πληροφορία, αλλά την μελετούν. Μετά από την αρχική καταγραφή της πληροφορίας, στη συνέχεια οι μαθητές την κατανοούν, συνοψίζουν, αξιολογούν, επεξηγούν, αντιπαραβάλλουν, συγκρίνουν, επεξεργάζονται και την χρησιμοποιούν δημιουργικά για να συζητήσουν τα ζητήματα που έχουν τεθεί και να απαντήσουν στα ερωτήματα της ιστοεξερεύνησης.

ΣΤΑΔΙΑ ΥΛΟΠΟΙΗΣΗΣ ΤΗΣ ΙΣΤΟΕΞΕΡΕΥΝΗΣΗΣ

Ο τίτλος της ιστοεξερεύνησης είναι: “How climate change and pollution affect our lives in Epirus and Ioannina”. Το θέμα το οποίο θα εξερευνήσουν οι μαθητές επιλέχτηκε επειδή είναι ενδιαφέρον και βρίσκεται σε συμφωνία με τους μαθησιακούς στόχους. Η θεματική του περιβάλλοντος περιλαμβάνεται στα σχολικά εγχειρίδια, ωστόσο στο πλαίσιο της ιστοεξερεύνησης επιχειρείται η σύνδεσή του με τις εμπειρίες και τις ζωές τους (real world relevance)· δηλαδή δεν προσεγγίζεται «ακαδημαϊκά», αλλά με μια βιωματική διάσταση. Στο εν λόγω πλαίσιο, η βιωματική διάσταση βρίσκεται στο γεγονός ότι το ζήτημα αυτό προσεγγίζεται από την σκοπιά που το βιώνουν οι μαθητές και οι οικογένειές τους. Επιπλέον, το ζήτημα αυτό καθαυτό (με την διαδικασία έρευνας που αποσκοπεί στην ανάλυσή του και την παροχή κάποιων προτάσεων για την αντιμετώπισή του), διευκολύνει την έρευνα, καθώς ενσωματώνει μια διερευνητική πτυχή, χωρίς να ευνοεί την στείρα παράθεση πληροφοριών και στοιχείων. Ταυτόχρονα, αυτό που ζητείται από τους μαθητές είναι εφικτό, επειδή το εύρος της διερεύνησης δεν είναι ούτε τεράστιο, αλλά ούτε και εξαιρετικά περιορισμένο. Οι λύσεις (μέσα από το ψηφιακό υλικό) που δίνεται στους μαθητές δεν είναι προφανείς, αλλά απαιτούν συνεργασία και κριτική ανάλυσή του υλικού για να αντληθούν συμπεράσματα. Ο χαρακτήρας του υπό διερεύνηση ζητήματος σημαίνει ότι οι μαθητές δεν οδηγούνται σε κάποιες προκαθορισμένες απαντήσεις, αλλά οι λύσεις και οι προτάσεις είναι «ανοικτές», με σεβασμό στις απόψεις και προοπτικές των μαθητών.

Η ιστοεξερεύνηση σχεδιάζεται με βάση τα στάδια που αναφέρονται στη σχετική βιβλιογραφία (Godwin-Jones, 2004), και περιλαμβάνει τα ακόλουθα στάδια: την εισαγωγή (introduction), τις δραστηριότητες (tasks), την διαδικασία (process), τους πόρους/πηγές (resources), την αξιολόγηση (evaluation) και το συμπέρασμα (conclusion). Το περιεχόμενο των σταδίων αυτών παρουσιάζονται στη συνέχεια. Κρίνεται απαραίτητο να τονιστεί ότι η πρόταση ιστοεξερεύνησης και τα στάδια που παρουσιάζονται στο τμήμα αυτό της εργασίας θα ήταν χρήσιμο και πιο ωφέλιμο να θεωρηθούν ως αφετηρίες για αναστοχασμό από τους εκπαιδευτικούς που επιθυμούν να ενσωματώσουν τις ιστοεξερευνήσεις στη διδασκαλία τους, κι όχι προτάσεις «κλειστές» που δεν επιδέχονται αλλαγές. Άλλωστε, η διδασκαλία αποτελεί μια δυναμική διαδικασία που βρίσκεται σε άμεση συνάφεια με το περιβάλλον (φυσικό και ψυχολογικό) στο οποίο διεξάγεται (π.χ. επίπεδο γλωσσομάθειας των μαθητών, μαθησιακά κίνητρα, εξοπλισμός τάξης, κουλτούρα του σχολείου ή/και της τάξης, κλπ.). Είναι προφανές ότι στην μαθησιακή διαδικασία, προκαθορισμένες «λύσεις» και «συνταγές επιτυχίας» αντίκεινται στις αρχές της μαθητοκεντρικότητας. Μια διδακτική προσέγγιση που είναι αποτελεσματική σε μια σχολική τάξη δεν είναι απαραίτητα κατάλληλη σε κάποια άλλη, καθώς κάθε τάξη έχει τα δικά της χαρακτηριστικά. Συμπερασματικά, οι παρακάτω προτάσεις χρειάζεται να αναγνωστούν υπό το πρίσμα των προαναφερθέντων επισημάνσεων.

Στο πρώτο στάδιο, την εισαγωγή, ο στόχος των εκπαιδευτικών είναι να παρέχουν μια σύνοψη σχετικά με το θέμα της ρύπανσης και της κλιματικής αλλαγής και την επίδρασής της σε παγκόσμιο και τοπικό επίπεδο. Οι εκπαιδευτικοί εκκινούν μια συζήτηση στην τάξη σχετικά με τα προβλήματα που αντιμετωπίζουν οι κάτοικοι της περιοχής, αξιοποιώντας και την τεχνική του καταιγισμού ιδεών (brainstorming) και παρουσιάζει το θέμα στους μαθητές. Οι μαθητές, εργαζόμενοι

σε ζευγάρια, εμπλέκονται σε ανταλλαγή πληροφοριών/απόψεων και καταγράφουν αυτά που γνωρίζουν σχετικά με το θέμα αυτό. Στη συνέχεια, παρακολουθούν ένα εκπαιδευτικό βίντεο σχετικά με τις αιτίες της ρύπανσης και της κλιματικής αλλαγής και τον τρόπο με τον οποίο οι ανθρώπινες δραστηριότητες συμβάλλουν σε αυτή (π.χ. παράγοντες που συμβάλουν στην αιθαλομίχλη στην πόλη των Ιωαννίνων). Σημειώνουν τα σημαντικά σημεία του βίντεο και ερωτήσεις που τυχόν έχουν, οι οποίες θα λειτουργήσουν ως σημείο εκκίνησης για την περαιτέρω έρευνά τους. Στο δεύτερο στάδιο, τις δραστηριότητες, οι μαθητές χωρίζονται σε ομάδες και διερευνούν μια διαφορετική πτυχή της κλιματικής αλλαγής, με έμφαση στην τοπικότητα (π.χ. μια ομάδα διερευνά τον τρόπο με τον οποίο έχει αλλάξει το κλίμα των Ιωαννίνων και της Ηπείρου τα τελευταία χρόνια, μια άλλη ομάδα τον τρόπο με τον οποίο η κλιματική αλλαγή επηρεάζει την λίμνη Παμβώτιδα, ενώ αντικείμενο έρευνας μιας άλλης ομάδας μπορεί να αποτελέσουν τα προβλήματα υγείας που προκαλεί, ιδιαίτερα κατά τους χειμερινούς μήνες, η ρύπανση την ατμόσφαιρα των Ιωαννίνων). Εντός των ομάδων, οι μαθητές αναλαμβάνουν ρόλους και είναι υπεύθυνοι για ένα υποερώτημα ή μια επιμέρους πτυχή του ζητήματος για το οποίο παρουσιάζουν τα ευρήματά τους με έναν δημιουργικό τρόπο (π.χ. ένα inforgraphic, δηλαδή, μια οπτική αναπαράσταση πληροφοριών ή δεδομένων, βίντεο, ανάρτηση σε blog) . Σε σχέση με το τελικό προϊόν της διερεύνησης, οι ομάδες έχουν τη δυνατότητα να παρουσιάζουν μια συνοπτική παρουσίαση με την αξιοποίηση ψηφιακών μέσων για να παρουσιάσουν τα ευρήματά τους και να προτείνουν λύσεις, να δημιουργήσουν ένα βίντεο ή/και ένα podcast, ένα ποίημα ή ένα σύντομο θεατρικό κείμενο, λαμβάνοντας υπόψη μαθητές με κιναισθητικό μαθησιακό στυλ.

Στο τρίτο στάδιο και στο τέταρτο στάδιο, δηλαδή, τη διαδικασία και τους πόρους/πηγές, οι εκπαιδευτικοί παρουσιάζουν στους μαθητές μια λίστα από ιστοσελίδες, πολυτροπικά κείμενα (multimodal texts), podcasts, βίντεο, κλπ. σχετικά με το υπό διερεύνηση ζήτημα. Επίσης, επιστημονικές μελέτες σχετικά με τα κλιματικά στοιχεία της Ηπείρου τα τελευταία χρόνια για να μελετήσουν, αλλά και λύσεις που έχουν προταθεί σε άλλα μέρη του κόσμου, έτσι ώστε οι μαθητές να κάνουν συγκρίσεις και να εξετάσουν εάν αυτές οι λύσεις και οι προτάσεις είναι κατάλληλες για την δική τους πόλη. Οι πηγές αυτές καλύπτουν διάφορες πτυχές του ζητήματος που διερευνάται. Οι μαθητές συνεργάζονται με ψηφιακά συνεργατικά εργαλεία, ανταλλάσσουν τεκμηριωμένες απόψεις, προβληματισμούς και προτάσεις. Ένα σημαντικό τμήμα του σταδίου αυτού αφορά την κριτική εξέταση του ζητήματος με βάση τις πληροφορίες που έχουν συλλέξει οι μαθητές, έτσι ώστε να προτείνουν αιτιολογημένες προσεγγίσεις και παρεμβάσεις για το πρόβλημα της ρύπανσης στην περιοχή τους.

Το επόμενο στάδιο, η αξιολόγηση, έπεται της παρουσίασης των παρουσιάσεων των ομάδων. Για την υλοποίηση του σταδίου αυτού, θα χρησιμοποιηθεί μια ρουμπρίκα για την αξιολόγηση της εργασίας των ομάδων με βάση συγκεκριμένα κριτήρια, όπως η ακρίβεια των πληροφοριών, η σαφήνεια, η πληρότητα, η επάρκεια και η πρωτοτυπία της παρουσίασης. Στο πλαίσιο της αυτοαξιολόγησης, οι μαθητές αξιολογούν την δική τους συνεισφορά και αναστοχάζονται αναφορικά με την εργασία τους και τρόπους βελτίωσης. Στο τελευταίο στάδιο, το συμπέρασμα, οι μαθητές αναστοχάζονται για τις μαθησιακές εμπειρίες που απόκτησαν από τη συμμετοχή τους στην ιστοεξερεύνηση, απαντώντας σε ερωτήσεις σχετικά με το εάν η κατανόησή τους για τα ζητήματα με τα οποία ασχολήθηκαν αυξήθηκε και έγινε βαθύτερη, ποιες από τις λύσεις που προτάθηκαν αξιολογούν ως πιο αποτελεσματικές και εφικτές, δράσεις που χρειάζεται να αναλάβει η τοπική κοινωνία, κλπ. Τα παραπάνω αποτελούν, επίσης, το αντικείμενο ομαδικής συζήτησης μέσα στην τάξη, στην οποία όλοι οι μαθητές,-τριες θα έχουν τη δυνατότητα να εκφράσουν τις απόψεις τους, αλλά και να συζητήσουν τα ζητήματα που θα αναδείξουν και θα θέσουν προς συζήτηση οι συμμαθητές τους.

Ο ρόλος των εκπαιδευτικών και οι ενέργειές τους κατά τη διάρκεια καθορίζονται με φυσικό τρόπο από τον σχεδιασμό και τους στόχους της ιστοεξερεύνησης. Συνοπτικά, οι εκπαιδευτικοί ενορχηστρώνουν τις μαθησιακές εμπειρίες, απαντούν σε ερωτήσεις παρέχοντας νύξεις στους μαθητές έτσι ώστε να χρησιμοποιήσουν την κριτική και δημιουργική τους σκέψη, παρέχουν θετική και εποικοδομητική ανατροφοδότηση, παρατηρούν τον πρόοδο των μαθητών, επεμβαίνουν σε τυχόν τεχνικές δυσκολίες, βεβαιώνονται ότι όλοι οι μαθητές συμμετέχουν ενεργά και τους βοηθούν να αναστοχαστούν αναφορικά με την εμπειρία συμμετοχής στην ιστοεξερεύνηση. Επίσης, αξιοποιούν διαμορφωτική, τελική και εναλλακτική αξιολόγηση και, εξηγώντας στους μαθητές τα κριτήρια αξιολόγησης, ενθαρρύνουν την αυτοαξιολόγηση των μαθητών (self-assessment) και την αξιολόγηση των συμμαθητών τους (peer-assessment).

ΣΥΜΠΕΡΑΣΜΑ

Στην εργασία αυτή επιχειρήσαμε μια ρεαλιστική σύνδεση της θεωρητικής γνώσης με τη διδακτική πράξη και πρακτική εφαρμογή των βασικών αρχών της εκπαιδευτικής θεωρίας, λαμβάνοντας υπόψη: (α) τις ιδιαιτερότητες και τις ανάγκες της διδασκαλίας στο ελληνικό εκπαιδευτικό σύστημα και ειδικότερα αναφορικά με τη διδασκαλία της Αγγλικής γλώσσας, (β) τις τεχνολογικές εξελίξεις που αναπόφευκτα επηρεάζουν την εκπαίδευση, (γ) τους αναδυόμενους «νέους γραμματισμούς» και (δ) τον κόσμο στον οποίο ζουν και λειτουργούν οι μαθητές.

Στην αρχή της εργασίας περιγράψαμε και αναλύσαμε συνοπτικά την ανάγκη του σχολείου και της κοινωνίας για παροχή στους μαθητές γνώσεων και δεξιοτήτων που θα τους επιτρέψουν να λειτουργήσουν αποτελεσματικά ως πολίτες

σε μια εποχή με ραγδαίες τεχνολογικές και κοινωνικές εξελίξεις, την οποία οι «νέοι γραμματισμοί» είναι απαραίτητοι. Στη συνέχεια παρουσιάσαμε μια σύντομη ανασκόπηση της βιβλιογραφίας και των ερευνών που έχουν πραγματοποιηθεί σχετικά με την παιδαγωγική αξιοποίηση των ιστοεξερευνήσεων, την αξιοποίηση ψηφιακών μέσων, συνεργατικών εργαλείων, βίντεο και πόρων από το διαδίκτυο στη διδασκαλία της Αγγλικής ως ξένης γλώσσας.

Ακολούθως, με βάση τη σχετική βιβλιογραφία, προτείναμε μια ιστοεξερεύνηση που μπορεί να υλοποιηθεί στο πλαίσιο της διδασκαλίας της Αγγλικής για μαθητές επιπέδου γλωσσομάθειας Β1. Ο σχεδιασμός της ιστοεξερεύνησης που παρουσιάζεται στην εργασία αυτή μπορεί να τροποποιηθεί και το εύρος της διερεύνησης να τροποποιηθεί, έτσι ώστε οι εκπαιδευτικοί που επιθυμούν να εφαρμόσουν καινοτόμες εκπαιδευτικές μεθόδους να ανταποκριθούν στις ανάγκες και τα χαρακτηριστικά των μαθητών τους και το ευρύτερο πλαίσιο στο οποίο διεξάγεται η διδασκαλία τους.

ΠΕΡΙΛΗΨΗ

Το άρθρο αυτό αναφέρεται σε μάθημα Θρησκευτικών που έλαβε χώρα σε μαθητές Γ΄ τάξης Γυμνασίου, και πιο συγκεκριμένα στο Δέσκειο Γυμνάσιο Πάργας κατά το σχολικό έτος 2022-2023. Πιο συγκεκριμένα η θεματική ενότητα με την οποία ασχοληθήκαμε εμείς αφορούσε το κεφάλαιο «Λατρεία και τέχνη σε Ανατολή και Δύση», και ιδιαιτέρως το κομμάτι της αρχιτεκτονικής και της ζωγραφικής του ορθόδοξου χριστιανικού ναού, οπότε θεωρήσαμε πρόσφορο να αξιοποιήσουμε σχετικό λογισμικό. Κάποιοι από τους στόχους που θέσαμε ήταν: να αναγνωρίζουν σε ποιο ρυθμό ανήκει ένας χριστιανικός ναός, να γνωρίζουν βασικές πληροφορίες σχετικά με την αγιογράφηση του ναού και τους συμβολισμούς αυτής, να πληροφορηθούν σχετικά με τη λατρευτική ζωή που λαμβάνει χώρα στον ορθόδοξο ναό κ.ά. Όσον αφορά το υλικό που χρησιμοποιήσαμε ήταν το βιβλίο της Φλώρας Τζανακάκη (Tzanakaki, 2008) «Πάμε στην Εκκλησία!», το οποίο περιέχει CD με λογισμικό και δραστηριότητες.

Το λογισμικό περιλαμβάνει στο αρχικό μενού ως κύριες ενότητες: τα «Περιεχόμενα», όπου περιλαμβάνονται 18 υποενότητες με τα κύρια σημεία της παρουσίασης, για να επιλέξει κάποιος μεμονωμένα το συγκεκριμένο κομμάτι που θέλει να παρακολουθήσει· την «Έναρξη παρουσίασης», όπου ο χρήστης μπορεί να παρακολουθήσει όλες τις ενότητες ως ενιαία παρουσίαση από το avatar του λογισμικού· τις «360 μοίρες», όπου δίνεται η δυνατότητα εικονικής περιήγησης 360 μοιρών στο κέντρο του ναού· τις «Δραστηριότητες», όπου περιέχονται ψηφιακές δραστηριότητες, οι οποίες αντιστοιχούν σε κάποιες από τις ενότητες που παρουσιάζονται από το avatar στο λογισμικό.

Το μάθημα στην τάξη έλαβε χώρα σε τρεις φάσεις. Αρχικά έγινε ενημέρωση των μαθητών δίνοντας βασικές πληροφορίες σχετικά με τη θεματική και το λογισμικό που θα γινόταν χρήση. Εν συνεχεία έγινε προβολή με βιντεοπροβολέα του λογισμικού, με εικονική ξενάγηση από avatar σε εκκλησιαστικό ναό των Αθηνών, δίνοντας βασικές πληροφορίες σχετικά με την αρχιτεκτονική και τη λατρευτική ζωή στο χριστιανικό ναό. Ακολούθως προχωρήσαμε σε επίλυση ψηφιακών δραστηριοτήτων που υπάρχουν στο εν λόγω λογισμικό, σχετικές με την προβολή που έλαβε χώρα πιο πριν. Κάποιες από τις δραστηριότητες που ασχοληθήκαμε είχαν να κάνουν με: τους ρυθμούς των ναών, τον προσανατολισμό του ναού, τα μέρη του ναού, τις εικόνες του τέμπλου και την εικονογράφηση του ναού. Στις ασκήσεις αυτές συνήθως δίνονται τέσσερις εικόνες, π.χ. με τους βασικούς ρυθμούς ναών (βασιλική, βασιλική με τρούλο, σταυροειδής με τρούλο, κατακόμβη), και τέσσερα πλαίσια με τα ονόματα του κάθε ρυθμού. Ο χρήστης θα πρέπει να σύρει με τον κέρσορα κάθε εικόνα στο σωστό πλαίσιο.

Σε επόμενη φάση έγινε επίσκεψη σε τοπικό ορθόδοξο εκκλησιαστικό ναό και εκκλησιαστικό μουσείο με ξενάγηση από τον ιερέα του ναού. Οι μαθητές παρατήρησαν διά ζώσης τα εκκλησιαστικά εκθέματα, τα μέρη του ναού και τις αγιογραφίες, με δυνατότητα για ερωτήσεις και διευκρινίσεις από τον ιερέα και τον Θεολόγο τους. Σε τρίτη φάση δόθηκε φύλλο εργασίας όπου οι μαθητές συνεργαζόμενοι σε ομάδες απάντησαν σε ερωτήσεις σχετικά με το μάθημα και τη διδακτική επίσκεψη που πραγματοποιήθηκαν τις προηγούμενες ημέρες.

Όσον αφορά τους στόχους που θέσαμε θεωρούμε ότι αυτοί επιτεύχθηκαν σε ικανοποιητικό βαθμό, ενώ αυξήθηκαν και τα μαθησιακά κίνητρα των μαθητών. Τις νέες τεχνολογίες γενικά τις αξιοποιήσαμε και τις αξιοποιούμε και πριν και μετά τη σχολική χρονιά που αναφέρουμε στο άρθρο μας (π.χ. χρήση διαδραστικού πίνακα, αξιοποίηση powerpoint, βίντεο από youtube κ.ά.). Συμπερασματικά, θεωρήσαμε ότι η χρήση πολυμεσικού υλικού αποτελεί μια εναλλακτική διδακτική προσέγγιση του μαθήματος των Θρησκευτικών στο Γυμνάσιο, η οποία συμπορεύεται με τη γενικότερη ανάπτυξη των ψηφιακών μέσων στην κοινωνία αλλά και στην εκπαίδευση, και η οποία μπορεί να συμβάλλει τα μέγιστα στην καλύτερη αφομοίωση της διδακτικής ύλης από τους μαθητές.

Λέξεις κλειδιά: ορθόδοξος χριστιανικός ναός, λογισμικό, εικονική ξενάγηση, προβολή, δραστηριότητες, επίσκεψη.

ΕΙΣΑΓΩΓΗ

Το μάθημα των Θρησκευτικών της Γ΄ γυμνασίου έχει να κάνει με τη μαρτυρία της ορθόδοξης εκκλησίας στο σύγχρονο κόσμο. Το βιβλίο καταπιάνεται με εφτά θεματικές που αναφέρονται: στην ορθόδοξη εκκλησία σήμερα, σε προτάσεις ζωής της ορθόδοξης εκκλησίας, στην ιεραποστολή και τη διακονία, στο σεβασμό του άλλου στην ορθόδοξη εκκλησία, στο διάλογο με το δυτικό χριστιανισμό, στις μονοθεϊστικές θρησκείες και τις θρησκείες της Ανατολής. Πιο συγκεκριμένα εμείς ασχοληθήκαμε με την Ε΄ θεματική ενότητα («Η Ορθόδοξη Εκκλησία σε διάλογο με τον δυτικό Χριστιανισμό»), και δη με το 5ο κεφάλαιο («Λατρεία και τέχνη σε Ανατολή και Δύση»), και ιδιαιτέρως με το κομμάτι της αρχιτεκτονικής και της ζωγραφικής του ορθόδοξου χριστιανικού ναού (Θρησκευτικά Γ΄ Γυμνασίου).

Στο Αναλυτικό Πρόγραμμα του συγκεκριμένου κεφαλαίου αναφέρεται στα προσδοκώμενα μαθησιακά αποτελέσματα οι μαθητές να διακρίνουν διαφορές και ομοιότητες της χριστιανικής τέχνης και λατρείας στην Ανατολή και στη Δύση (Curriculum for the subject of Religious Education in Primary and Junior High School, 2020). Ωστόσο, από τη διδασκαλία μας διαπιστώσαμε πως οι μαθητές δεν είχαν βασικές γνώσεις της τέχνης και της λατρείας ως προς τον ορθόδοξο ναό. Γι' αυτό θεωρήσαμε κατάλληλο να αφιερώσουμε χρόνο πρώτα στην αρχιτεκτονική και τη ζωγραφική του ορθόδοξου χριστιανικού ναού. Στη συνέχεια να διδάξουμε τα αντίστοιχα για την εκκλησία της Δύσης, και ακολούθως να περάσουμε σε σύγκριση των δύο, όπως αναφέρεται στο Αναλυτικό Πρόγραμμα.

Σύμφωνα με το Πρόγραμμα Σπουδών των Θρησκευτικών του Υπουργείου Παιδείας «το μάθημα των Θρησκευτικών οικοδομείται με βάση τη θρησκευτική παράδοση του τόπου, δηλαδή την παράδοση της ορθόδοξης εκκλησίας, όπως αυτή θεμελιώθηκε στη Βίβλο, σαρκώθηκε στη ζωή των αγίων Πατέρων της και αποτυπώθηκε στα μνημεία του πολιτισμού» (ό.π., σελ. 7659). Επίσης σκοπός του μαθήματος είναι «να συνεισφέρει δημιουργικά στην ανάπτυξη και καλλιέργεια της θρησκευτικής συνείδησης των Ορθόδοξων Χριστιανών μαθητών και μαθητριών» (ό.π., σελ. 7660).

Λαμβάνοντας, λοιπόν, υπόψη τα παραπάνω, και για να γίνει πιο βιωματική η προσέγγιση του κεφαλαίου σχετικά με την αρχιτεκτονική και τη ζωγραφική του ορθόδοξου χριστιανικού ναού, αποφασίσαμε να έρθουμε σε επικοινωνία με τον ιερέα της περιοχής (Πάργα), και να προγραμματίσουμε επίσκεψη στον τοπικό ναό και το γειτνιάζον εκκλησιαστικό μουσείο. Στο μουσείο έγινε ξενάγηση από τον ιερέα σχετικά με τα πολύτιμα εκκλησιαστικά εκθέματα της περιοχής, ενώ στο ναό κάναμε εμείς αναφορά στην αρχιτεκτονική και απαντήσαμε σε ερωτήσεις των μαθητών. Σε επόμενο μάθημα δώσαμε φύλλο εργασίας, στο οποίο οι μαθητές απάντησαν σε ερωτήσεις σχετικά με την επίσκεψη στο μουσείο και το ναό.

Πριν γίνει η επίσκεψη στο ναό και στο μουσείο αποφασίσαμε να αξιοποιήσουμε για τη διδασκαλία μας μέσα στην τάξη το βιβλίο: «Πάμε στην Εκκλησία!» της Φλώρας Τζανακάκη (Tzanakaki, 2008), το οποίο περιέχει CD με λογισμικό και ψηφιακές δραστηριότητες. Το βιβλίο περιέχει δύο μέρη· στο πρώτο μέρος δίνονται πληροφορίες με έγχρωμες εικόνες και κείμενα σχετικά με τον ορθόδοξο χριστιανικό ναό και στο δεύτερο μέρος γίνεται ανάλυση σχετικά με τη λατρευτική ζωή στο ναό. Στο τέλος του βιβλίου περιέχονται οι λύσεις των δραστηριοτήτων. Το CD περιλαμβάνει λογισμικό με παρουσίαση από avatar (εικονικός ξεναγός) χριστιανικού ναού, περιεχόμενα της παρουσίασης (ενιαία ή κατά ενότητες), δραστηριότητες, απεικόνιση του εσωτερικού του ναού 360 μοιρών και πληροφορίες σχετικά με τη δημιουργία του CD πολυμέσων. Εμείς στην τάξη κάναμε χρήση του CD που περιέχεται στο βιβλίο.

ΧΡΗΣΗ ΤΠΕ ΚΑΙ ΔΙΔΑΚΤΙΚΟΙ ΣΤΟΧΟΙ

Είναι γεγονός ότι η χρήση των ΤΠΕ (Τεχνολογιών Πληροφορίας και Επικοινωνίας) στην εκπαίδευση συμβάλει τα μέγιστα στην κινητοποίηση των μαθητών σε ενεργή και συμμετοχική μάθηση, τους προσφέρει πρόσβαση σε πληροφορίες και τους βοηθά να σκέφτονται και να επικοινωνούν με δημιουργικότητα (Jimoyiannis & Komis, 2017). Γι' αυτό κι εμείς αποφασίσαμε να αξιοποιήσουμε πολυμεσικό υλικό σχετικό με την ενότητα του μαθήματος των Θρησκευτικών το οποίο επρόκειτο να διδάξουμε, αφού οι ΤΠΕ αποτελούν σημαντικό κομμάτι της εκπαίδευσης και χρησιμοποιούνται ως εργαλεία μάθησης και διδασκαλίας των σχολικών εγχειριδίων (Kyridis et al, 2003) με πολλαπλά οφέλη μέσω της χρήσης τους.

Όσον αφορά τη χρήση λογισμικού πιστεύουμε πως η ενασχόληση με περιβάλλοντα εικονικής πραγματικότητας συντελεί ώστε η μάθηση να γίνεται πιο ενεργητική και επικοινωνιακή και να συνδέεται με τις εμπειρίες των μαθητών, μέσα από αυθεντικές καταστάσεις. Οι μαθητές με αυτόν τον τρόπο μπορούν να αλληλεπιδράσουν μ' ένα περιβάλλον αποθηκευμένων πληροφοριών και να κινηθούν μέσα στις πληροφορίες που αναπαρίστανται γραφικά (Dimitrakopoulou, 2001). Μέσα από τέτοιες δυνατότητες εφαρμόζεται δημιουργικά και ευέλικτα η γνώση. Επίσης, πιστεύουμε πως μέσα

από την χρήση της τεχνολογίας και συγκεκριμένα του λογισμικού, δίνουμε τη δυνατότητα να κατανοήσουν καλύτερα και να αφομοιώσουν την ύλη και μαθητές που αντιμετωπίζουν μαθησιακές δυσκολίες.

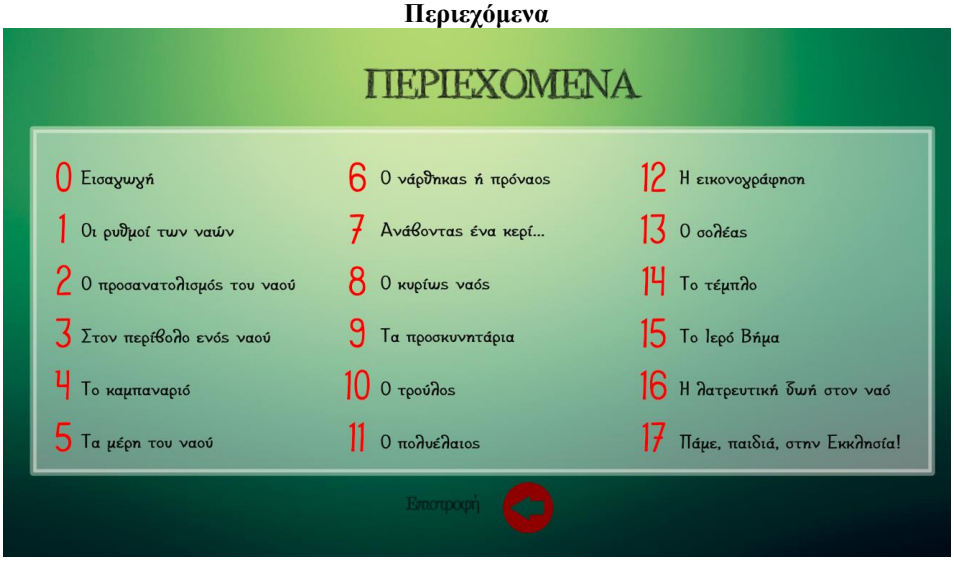
Το μάθημά μας έγινε σε δύο τμήματα της Γ΄ τάξης του Γυμνασίου Πάργας. Πιο συγκεκριμένα το μάθημα αφορούσε το βιβλίο των Θρησκευτικών, στο κεφάλαιο «Λατρεία και τέχνη σε Ανατολή και Δύση», και ιδιαιτέρως στο κομμάτι της αρχιτεκτονικής και της ζωγραφικής του ορθόδοξου χριστιανικού ναού. Στόχοι που θέσαμε κατά τη διδασκαλία μας ήταν οι μαθητές να:

- Συνειδητοποιήσουν για ποιο λόγο υπάρχει ο ναός και τι συμβαίνει εκεί.
- Αναγνωρίζουν σε ποιο ρυθμό ανήκει γενικότερα ένας χριστιανικός ναός που επισκέπτονται, και ειδικότερα ο ναός της περιοχής τους.
- Γνωρίζουν βασικές πληροφορίες σχετικά με την αγιογράφηση του ναού και τους συμβολισμούς αυτής.
- Πληροφορηθούν σχετικά με τη λατρευτική ζωή που λαμβάνει χώρα στον ορθόδοξο ναό.
- Εκτιμήσουν τη σημασία ύπαρξης εκκλησιαστικού μουσείου στην περιοχή τους· την ιστορία και την αξία των κειμηλίων που βρίσκονται εκεί.
- Κατανοήσουν ότι η τεχνολογία, και συγκεκριμένα η χρήση σχετικού λογισμικού, μπορεί να συμβάλει στη διευκόλυνση του μαθήματος των Θρησκευτικών.

ΒΙΒΛΙΟ «ΠΆΜΕ ΣΤΗΝ ΕΚΚΛΗΣΙΑ!» - ΛΟΓΙΣΜΙΚΟ

Χρησιμοποιήσαμε, λοιπόν, εκτός από την ύλη του σχολικού βιβλίου, και το βιβλίο «Πάμε στην Εκκλησία!» της Φλώρας Τζανακάκη (Tzanakaki, 2008), το οποίο περιέχει CD με λογισμικό και δραστηριότητες. Στην ενότητα αυτή θα δώσουμε μεγαλύτερη έμφαση και θα αναλύσουμε διεξοδικά το λογισμικό. Το λογισμικό αυτό περιλαμβάνει ειδικότερα αρχικό μενού με: «Περιεχόμενα», «Έναρξη παρουσίασης», «360 μοίρες», «Δραστηριότητες», «Πληροφορίες» και «Έξοδος».

Εικόνα 1
Αρχικό μενού λογισμικού - avatar



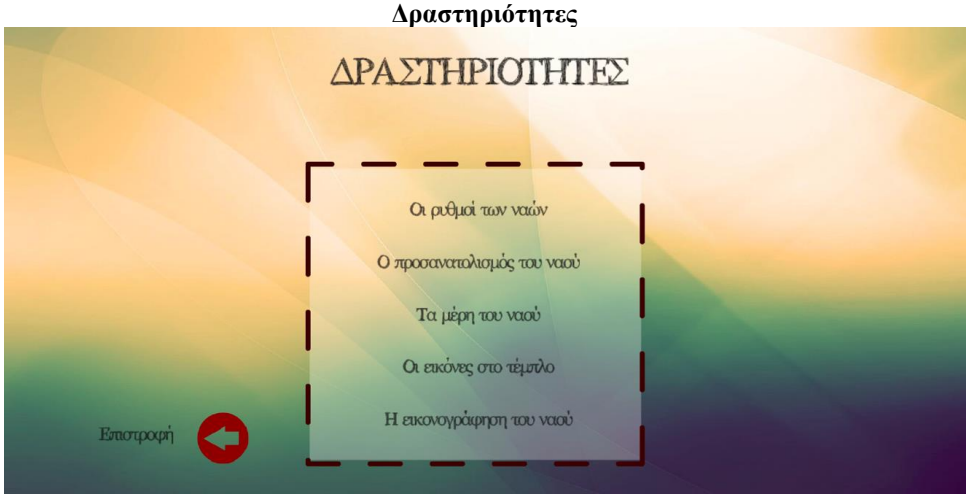
Προχωρώντας θα αναλύσουμε διεξοδικότερα την κάθε ενότητα. Όταν πατήσει κανείς με τον κέρσορα στην ενότητα «Περιεχόμενα» μπαίνει σε άλλη υποενότητα, θα λέγαμε, όπου δίνονται σε μορφή τίτλου οι παρακάτω 18 ενότητες:

- ✓ *Εισαγωγή*: Πρόκειται ουσιαστικά για ένα ολιγόλεπτο βίντεο το οποίο ξεκινάει αυτόματα μόλις εισαγάγουμε το CD, και λειτουργεί ως «πρόλογος» της παρουσίασης· αναφέρεται, επίσης, στο γιατί είναι σημαντικό να πηγαίνουν τα νέα παιδιά στην εκκλησία. Υπάρχει δυνατότητα παράλειψης αυτής της εισαγωγής πατώντας το σχετικό σύνδεσμο. Υπάρχει όμως και στο αρχικό μενού, στα «Περιεχόμενα»· οπότε μπορούμε να την ξαναβάλουμε αν θέλουμε.
- ✓ *Οι ρυθμοί των ναών*: Εδώ γίνεται ολιγόλεπτη παρουσίαση τεσσάρων βασικών ρυθμών ναών με φωτογραφίες. Για περισσότερες λεπτομέρειες ο εικονικός ξεναγός παραπέμπει στο συνοδευτικό βιβλίο.
- ✓ *Ο προσανατολισμός του ναού*: Με χρήση φωτογραφιών γίνεται αναφορά στο ότι οι χριστιανικοί ναοί κατασκευάζονται με κατεύθυνση προς την ανατολή. Ωστόσο παραπέμπει για τους λόγους στο εγχειρίδιο.

- ✓ *Στον περίβολο ενός ναού*: Αναφέρονται οι χριστιανικές τελετές που λαμβάνουν χώρα στον περίβολο ενός ορθόδοξου χριστιανικού ναού (Μέγας αγιασμός Θεοφανίων, περιφορά εικόνων την Κυριακή της Ορθοδοξίας κ.λπ.).
- ✓ *Το καμπαναριό*: Παράθεση κωδωνοκρουσίας καμπαναριού ιερού ναού και για ποιο λόγο χτυπάει.
- ✓ *Τα μέρη του ναού*: Επεξηγεί εν συντομία σε πόσα και ποια μέρη χωρίζεται ο ορθόδοξος ναός.
- ✓ *Ο νάρθηκας ή πρόναος*: Πολύ σύντομη εικονική περιήγηση στο νάρθηκα, ενώ παραπέμπει στο βιβλίο για την προέλευση της ονομασίας.
- ✓ *Ανάβοντας ένα κερί*: Εικονική περιήγηση στο πώς και γιατί ανάβουμε κερί όταν μπαίνουμε στο ναό.
- ✓ *Ο κυρίως ναός*: Αναφορά στον κυρίως ναό, τι γίνεται εκεί και πώς είναι χωρισμένος αρχιτεκτονικά.
- ✓ *Τα προσκυνητάρια*: Τι κάνουμε όταν βλέπουμε προσκυνητάρια και τι εικόνες περιέχονται εκεί. Επίσης τι κάνουμε αφού προσκυνήσουμε.
- ✓ *Ο τρούλος*: Πού βρίσκεται μέσα στο ναό. Τι αγιογραφίες βρίσκονται εκεί και πού παραπέμπουν.
- ✓ *Ο πολυέλαιος*: Τι είναι και τι συμβολίζει.
- ✓ *Η εικονογράφηση*: Περιήγηση και αναλυτική περιγραφή σχετικά με την αγιογράφηση του ναού. Σε ποια μέρη του ναού βλέπουμε συγκεκριμένες παραστάσεις.
- ✓ *Ο σολέας*: Πού βρίσκεται μέσα στο ναό, ποια μυστήρια και τελετές λαμβάνουν χώρα εκεί, καθώς και τι άλλο βρίσκεται εκεί (δεσποτικό, άμβωνας, αναλόγια).
- ✓ *Το τέμπλο*: Τι είναι, τι χωρίζει. Επίσης γίνεται αναλυτική παρουσίαση και επεξήγηση των εικόνων που βρίσκονται εκεί.
- ✓ *Το ιερό βήμα*: Γίνεται εκτεταμένη αναφορά στην αγιογράφηση, στην αγία Τράπεζα, στα αντικείμενα που υπάρχουν εκεί, καθώς και στα μέρη τα οποία χωρίζεται το ιερό βήμα.
- ✓ *Η λατρευτική ζωή στο ναό*: Σύντομη αναφορά στις ακολουθίες και τα ιερά μυστήρια που τελούνται στο ναό. Επιπλέον αναφέρεται στο συμβολισμό του ναού.
- ✓ *Πάμε, παιδιά, στην Εκκλησία*!: Ολιγόλεπτο βίντεο, το οποίο λειτουργεί ως επίλογος της παρουσίασης. Η αφήγηση εμπλουτίζεται με σύντομο βυζαντινό ύμνο που αναφέρεται στον ορθόδοξο ναό και το σκοπό του εκκλησιασμού των πιστών.

Εικόνα 2
Περιεχόμενα

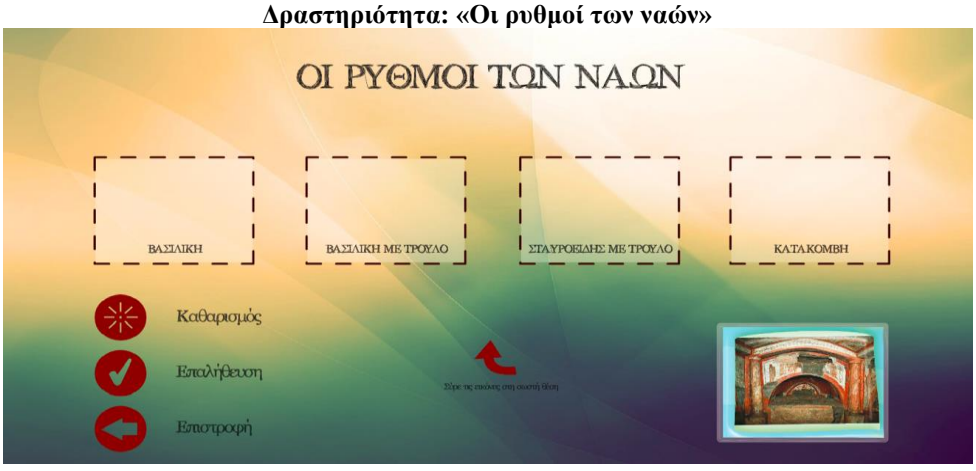
Σε κάθε ενότητα που επιλέγουμε, κατά τη διάρκεια του βίντεο υπάρχει η δυνατότητα: επιστροφής στο αρχικό μενού, παύσης, επιστροφής σε προηγούμενη ενότητα βίντεο, μετάβασης σε επόμενη ενότητα βίντεο.



Άλλη μία ενότητα που υπάρχει στο αρχικό μενού είναι η «Έναρξη παρουσίασης». Πατώντας την ο χρήστης μπορεί να παρακολουθήσει όλες τις ενότητες ως ενιαία παρουσίαση από το avatar, έχοντας απλώς έναν τίτλο στην κορυφή της παρουσίασης, ώστε να διακρίνει ποιο είναι το θέμα το οποίο παρακολουθεί.

Άλλη ενότητα του αρχικού μενού είναι αυτή που τιτλοφορείται ως «360 μοίρες». Πατώντας την βρισκόμαστε σε εικονική περιήγηση 360 μοιρών μέσα στο ναό της αγίας Σοφίας Ψυχικού, και συγκεκριμένα στο κέντρο του κυρίως ναού, όπου μπορούμε να περιηγηθούμε γυρνώντας τον κέρσορα.

Επίσης υπάρχει ενότητα στο λογισμικό με δραστηριότητες. Ειδικότερα περιλαμβάνονται δραστηριότητες που αντιστοιχούν σε πέντε ενότητες από αυτές που υπάρχουν στα περιεχόμενα της παρουσίασης. Αναλυτικότερα έχουμε δραστηριότητες που αφορούν:



- *Τους ρυθμούς των ναών*: υπάρχουν τέσσερις εικόνες με τους βασικούς ρυθμούς ναών (βασιλική, βασιλική με τρούλο, σταυροειδής με τρούλο, κατακόμβη)· και τέσσερα πλαίσια με τα ονόματα του κάθε ρυθμού. Ο χρήστης θα πρέπει να σύρει με τον κέρσορα κάθε εικόνα στο σωστό πλαίσιο.
- *Τον προσανατολισμό του ναού*: υπάρχουν τέσσερις εικόνες με σχέδιο του ναού, ο οποίος κάθε φορά είναι διαφορετικά προσανατολισμένος. Υπάρχουν αντίστοιχα τέσσερα πλαίσια με τα σημεία του ορίζοντα (Α, Δ, Ν, Βορράς) ανακατεμένα. Θα πρέπει ο χρήστης να αντιστοιχίσει το κάθε σχέδιο στο σωστό πλαίσιο.
- *Τα μέρη του ναού*: υπάρχουν τέσσερις εικόνες με τα μέρη του ναού (ιερό βήμα, κυρίως ναός, σολέας, πρόναος)· και τέσσερα πλαίσια με τα ονόματα των μερών του ναού. Ο χρήστης καλείται να αντιστοιχίσει το κάθε σχέδιο με το σωστό πλαίσιο.
- *Οι εικόνες του τέμπλου*: υπάρχει το τέμπλο με έξι κενά και ισάριθμες εικόνες (του Χριστού, της Παναγίας δύο διαφορετικές, του Ιωάννου του Προδρόμου, του αρχαγγέλου Γαβριήλ και του αγίου Βασιλείου). Ο χρήστης θα πρέπει να σύρει με τον κέρσορα την κάθε εικόνα στο κενό του τέμπλου που πιστεύει ότι αντιστοιχεί.
- *Η εικονογράφηση του ναού*: υπάρχουν έξι πλαίσια με μέρη του ναού (τρούλος, αψίδα, ιερό βήμα, δεξιό κλίτος, νάρθηκας, αριστερό κλίτος), στα οποία οφείλει ο χρήστης να αντιστοιχίσει έξι αγιογραφίες, τις οποίες πιστεύει ότι βρίσκονται στα αντίστοιχα μέρη που αναγράφονται στα πλαίσια.

Εικόνα 3
Δραστηριότητες

Να αναφέρουμε εδώ πως σε όλες τις παραπάνω δραστηριότητες υπάρχει μέσα σε κάθε μία κοινό μενού: «καθαρισμός», όταν θέλεις να διορθώσεις τις επιλογές πριν ολοκληρώσεις την άσκηση· «επαλήθευση», όταν θέλεις να δεις ποιες είναι οι σωστές απαντήσεις ή τι έχεις κάνει λάθος· «επιστροφή», όταν επιθυμείς να επιστρέψεις στο κυρίως μενού.

Εικόνα 4
Δραστηριότητα: «Οι ρυθμοί των ναών»

Τέλος, υπάρχει ενότητα με πληροφορίες και έξοδος από το λογισμικό. Στις πληροφορίες ενημερωνόμαστε για την συγγραφέα, την κεντρική διάθεση του λογισμικού, την πηγή των φωτογραφιών και των αγιογραφιών, ευχαριστίες σε όσους έδωσαν άδεια και διέθεσαν το ναό, καθώς και στον δημιουργό και εμπνευστή του δίσκου πολυμέσων.

Όσον αφορά τώρα καθαυτό το βιβλίο αποτελείται από 90 σελίδες, είναι έγχρωμο και χωρίζεται βασικά σε δύο μέρη. Στο πρώτο μέρος δίνονται πληροφορίες για τον ορθόδοξο ναό (κυρίως τα μέρη του ναού, αντικείμενα και εικονογράφηση) όπως περιγράψαμε και στο CD, απλώς πιο αναλυτικά. Επίσης δίνονται ασκήσεις (κρυπτόλεξο, αναγραμματισμός, αντιστοίχιση, συμπλήρωσης κενού) και κατασκευές. Στο δεύτερο μέρος γίνεται αναλυτική αναφορά στη λατρευτική ζωή που λαμβάνει χώρα στο ναό. Πιο συγκεκριμένα σημειώνονται βασικές πληροφορίες για τα μυστήρια και τις ακολουθίες που τελούνται, με μεγαλύτερη έμφαση στην ανάλυση της Θείας Λειτουργίας. Καταγράφονται επιπλέον το Σύμβολο της Πίστεως («Πιστεύω») και η Κυριακή Προσευχή («Πάτερ ἡμῶν»), ενώ ιδιαίτερη μνεία γίνεται σχετικά με το πρόσφορο και τους συμβολισμούς του. Κι εδώ παρατίθενται κάποιες ασκήσεις, και στο τέλος δίνονται οι λύσεις των ασκήσεων όλου του βιβλίου.

ΔΙΔΑΣΚΑΛΙΑ ΚΑΙ ΕΠΙΣΚΕΨΗ

Το μάθημά μας, λοιπόν, αναπτύχθηκε σε τρεις φάσεις. Κατά την πρώτη φάση έγινε η διδασκαλία μέσα στην τάξη με τη χρήση του λογισμικού που αναλύσαμε σε προηγούμενο κεφάλαιο. Σε δεύτερη φάση έγινε επίσκεψη στον τοπικό ναό του αγίου Νικολάου της Πάργας και στο παρακείμενο εκκλησιαστικό μουσείο. Και σε τρίτη φάση πάλι μέσα στην τάξη συζητήσαμε με τους μαθητές συμπληρώνοντας φύλλο εργασίας αναφορικά με τα δύο προηγούμενα μαθήματα. Είναι σημαντικό εδώ να σημειώσουμε πως και οι κατευθυντήριες οδηγίες του Υπουργείου προς τους εκπαιδευτικούς του μαθήματος των Θρησκευτικών στρέφονται προς: τις επισκέψεις σε ναούς, μουσεία κ.λπ.· την επιτόπια μελέτη ζητήματος προς διδασκαλία· όπως και την ομαδοσυνεργατική διδασκαλία (Οδηγός εκπαιδευτικού στα Θρησκευτικά Δημοτικού και Γυμνασίου, σελ. 110, 158, 171).

Κατά τη διάρκεια του μαθήματος χρησιμοποιήσαμε το εν λόγω λογισμικό, παρουσιάζοντας όλες τις ενότητες που αναφέραμε στα «Περιεχόμενα», ώστε να έχουν οι μαθητές ολοκληρωμένη εικόνα για τα μέρη του ναού και τι τελείται εκεί. Στη συνέχεια κάναμε αντιπροσωπευτικά από όλες τις ψηφιακές δραστηριότητες που εμπεριέχονται στην ομώνυμη ενότητα, ζητώντας από τους μαθητές μας να λένε τη σωστή απάντηση, κι εμείς «σύραμε» την κάθε εικόνα στο σωστό πλαίσιο, όπως αναλύσαμε και πιο πάνω. Σε περίπτωση λάθους, τους δίναμε δεύτερη ευκαιρία.

Σε δεύτερη φάση κατά την ώρα του μαθήματος των Θρησκευτικών οργανώσαμε επίσκεψη στον τοπικό ναό της Πάργας και το εκκλησιαστικό μουσείο και για τα δύο τμήματα της Γ΄ Γυμνασίου, με συνοδεία και εκπαιδευτικού συναδέλφου. Εκεί δόθηκε η δυνατότητα στους μαθητές να παρατηρήσουν από κοντά τα εκκλησιαστικά εκθέματα και τα πολύτιμα κειμήλια του τόπου τους, και να συνειδητοποιήσουν την ιστορική και θρησκευτική αξία αυτών (π.χ. υπήρχε λάβαρο 300 ετών, το οποίο έφερε σημάδια από σφαίρες Τούρκων). Όλο αυτό το κάναμε με το σκεπτικό ότι ο εκπαιδευτικός κατανοώντας την απαιτητική καθημερινότητα των μαθητών/τριών, είναι καλό να εμπλουτίζει τη διδασκαλία του με ευχάριστες παρεμβάσεις, προκειμένου να διεγείρει τη φαντασία τους και να τους κινητοποιήσει να ασχοληθούν με το θέμα εκτός των περιοριστικών χωροχρονικών σχολικών ορίων (Chatzidimou & Anagnostopoulou, 2015).

Εικόνα 5
Ο τοπικός ναός και το μουσείο

Σε τρίτη φάση μέσα στην τάξη συζητήσαμε με τους μαθητές σχετικά με την επίσκεψή μας στο ναό και στο μουσείο, και ακολούθως μοιράσαμε φύλλο εργασίας. Χωρίσαμε τους μαθητές σε ομάδες, και σε κάθε ομάδα διανείμαμε φύλλο εργασίας, δίνοντάς τους 15 λεπτά να το ολοκληρώσουν. Αυτό το φύλλο περιελάμβανε πέντε ερωτήματα, τα οποία θα έπρεπε να απαντήσουν ομαδικά. Τα ερωτήματα ήταν:

1. Τι σας έκανε εντύπωση στο μουσείο που επισκεφτήκαμε; Κάντε μερικές προτάσεις για καλύτερη αξιοποίησή του.
2. Τι σας έκανε εντύπωση στην επίσκεψη στην εκκλησία του αγίου Νικολάου;
3. Σας βοήθησε το μάθημα που κάναμε τις προηγούμενες ημέρες σχετικά με την επεξήγηση του ναού; Αιτιολογήστε.
4. Πιστεύετε ότι αυτές τις πληροφορίες θα τις ανακαλείτε κατά την επίσκεψή σας σε ανάλογους ναούς και εκκλησιαστικά μουσεία; Γιατί;
5. Σχεδιάστε/ζωγραφίστε κάτι σχετικό με την επίσκεψη στο μουσείο και στην εκκλησία.

Τα ερωτήματα αυτά τα θέσαμε στους μαθητές, ώστε να ανακαλέσουν τα βασικά σημεία του μαθήματος και της διδακτικής επίσκεψης. Επιπλέον, να σκεφτούν σημεία βελτίωσης για την τοπική τους κοινωνία (π.χ. να συντηρηθεί καλύτερα το μουσείο, να ανοίγει περισσότερες μέρες και ώρες, να προβληθεί περισσότερο κ.λπ.). Τους δώσαμε τη δυνατότητα να εκφρασθούν μέσω της ζωγραφικής και να αποτυπώσουν εντυπώσεις και συναισθήματα, και ιδιαιτέρως μαθητές που μπορεί να μην τα πηγαίνουν τόσο καλά με τη γραφή, αλλά με το σχέδιο/ζωγραφική (Οδηγός εκπαιδευτικού στα Θρησκευτικά Δημοτικού και Γυμνασίου, σελ. 163). Γενικά οι μαθητές εκφράσθηκαν ικανοποιητικά και διατύπωσαν σκέψεις και προβληματισμούς για το ναό και το μουσείο. Όμως αυτό δεν έγινε με πληρότητα, καθώς διανύαμε τις τελευταίες ημέρες του σχολικού έτους και υπήρχε γενικότερη βαρυθυμία.

ΣΥΜΠΕΡΑΣΜΑΤΑ

Ολοκληρώνοντας την εργασία μας οφείλουμε να ομολογήσουμε πως το μάθημα αυτό ήταν μια όμορφη εμπειρία και για εμάς, αλλά και για τους μαθητές μας. Μερικοί από τους στόχους του μαθήματος ήταν: να κατανοήσουν οι μαθητές την αρχιτεκτονική δομή και τα μέρη του ορθόδοξου χριστιανικού ναού και πιο συγκεκριμένα του τοπικού τους ναού· να γνωρίσουν τα εκκλησιαστικά κειμήλια του τόπου τους μέσα και από την επίσκεψη στο εκκλησιαστικό μουσείο· να συνειδητοποιήσουν ότι είναι και οι ίδιοι μέτοχοι και συνεχιστές αυτής της τοπικής παράδοσης, και ότι μπορούν να συμβάλουν στη βελτίωση της προβολής τους. Θεωρούμε ότι καταφέραμε σε γενικές γραμμές να επιτευχθούν οι παραπάνω στόχοι σε ικανοποιητικό βαθμό, καθώς και να καλλιεργήσουν τη θρησκευτική τους συνείδηση.

Κύρια δυσκολία που αντιμετωπίσαμε είχε να κάνει με το ότι οι μαθητές δεν ήταν ιδιαίτερα πρόθυμοι να συμπληρώσουν το φύλλο εργασίας με πληρότητα, καθώς βαίναμε προς τη λήξη του σχολικού έτους, διανύαμε τις τελευταίες ημέρες του Μαΐου και ήταν πεσμένη η προθυμία τους για μάθημα (ιδιαίτερα σε ένα τουριστικό μέρος όπως η Πάργα). Οπότε, σε μελλοντική εφαρμογή του μαθήματος θα προσπαθούσαμε να το υλοποιήσουμε νωρίτερα, ίσως πριν τις γιορτές του Πάσχα ή αμέσως μετά το Πάσχα.

Συνειδητοποιήσαμε μέσα από την εμπειρία μας ότι η τεχνολογία μπορεί να ωφελήσει τα μέγιστα το μάθημα των Θρησκευτικών και όχι μόνο. Άλλωστε οι ψηφιακές τεχνολογίες επηρεάζουν κάθε πτυχή της ανθρώπινης δραστηριότητας, ενώ η ενσωμάτωσή τους στην εκπαίδευση προσδίδει νέες δυναμικές ευκαιρίες στη διδακτική διαδικασία για διαρκή ανανέωση, ώστε να διεγείρει το ενδιαφέρον και να ελκύει την προσοχή των μαθητών (Mitropoulou, 2015).

Εδώ πρέπει να αναφέρουμε πως δεν είναι η πρώτη φορά που αξιοποιούμε τα ψηφιακά μέσα στη διδασκαλία μας. Από την αρχή κιόλας της εκπαιδευτικής μας σταδιοδρομίας έχουμε κάνει χρήση της τεχνολογίας και την αξιοποιούμε με κάθε ευκαιρία. Ενδεικτικά παραδείγματα χρήσης της είναι: η δημιουργία ταινίας με χρήση προγραμμάτων όπως: openshot video editor, audacity. Επιπρόσθετα, χρήση του Webex κατά τη διάρκεια της πανδημίας δημιουργώντας quiz από την εφαρμογή. Χρήση παρουσιάσεων powerpoint και βίντεο από το youtube, αλλά και από άλλες ιστοσελίδες που κρίναμε ότι βοηθούν (π.χ. slideshare, ψηφιακά διδακτικά σενάρια της πλατφόρμας «Αίσωπος» του Ι.Ε.Π). Κατασκευή τεστ-σταυρόλεξου με την εφαρμογή crossword labs. Χρήση των υπολογιστών για ομαδοσυνεργατικές αναζητήσεις από τους μαθητές σχετικά με πληροφορίες για τις θρησκείες. Παρουσίαση «τηλεπαιχνιδιού» σε σχολική εορτή 28ης Οκτωβρίου με ερωτήσεις σχετικά με όσα παρουσιάστηκαν στη γιορτή. Φυσικά, η ύπαρξη εργαλείων και μόνο, δεν είναι εχέγγυο αυτόματης γνώσης των μαθητών, αλλά αποτελεί ένα εξαιρετικά σημαντικό κίνητρο που τους υποκινεί να ερευνήσουν καινούριες πήγες γνώσης και να εμπλουτίσουν τις υπάρχουσες (Kampourakis & Loukis, 2006).

Επιπροσθέτως αντιληφθήκαμε, μετά από συζήτηση που είχαμε με άλλους συναδέλφους της ειδικής αγωγής, ότι η τεχνολογία και δη η χρήση λογισμικού στο μάθημα των Θρησκευτικών, μπορεί να βοηθήσει κατά πολύ και μαθητές με μαθησιακές δυσκολίες και ειδικές εκπαιδευτικές ανάγκες, αξιοποιώντας την π.χ. σε διαφοροποιημένη διδασκαλία.

Βέβαια η θετική συνεισφορά της πληροφορικής και των νέων τεχνολογιών γενικότερα στη μαθησιακή διαδικασία για μαθητές με ειδικές εκπαιδευτικές ανάγκες έχει επιβεβαιωθεί εδώ και αρκετές δεκαετίες (Wilkinson - Tilbrook, 1995). Ωστόσο, θα άξιζε να γίνει και περαιτέρω έρευνα προς αυτήν την κατεύθυνση και ειδικότερα στο μάθημα των Θρησκευτικών. Άρα είναι ένα στοιχείο το οποίο θα έχουμε υπόψη μας σε επόμενη σχετική διδασκαλία μας.

ΠΕΡΙΛΗΨΗ

Οι παραδοσιακές, στατικές προσεγγίσεις προσφέρουν τεχνικές κατάκτησης γεωμετρικών εννοιών, που μπορεί, σαφώς, να λειτουργούν ως «σκαλωσιές» και εργαλεία για την κατάκτηση της γνώσης. Στην ψηφιοχώρα των σημερινών, γηγενών μαθητών, όμως, καθίστανται μάλλον απαραίτητη η εισαγωγή και ενσωμάτωση, ως διδακτικών μέσων, και των τεχνολογικών, διαμεσολαβητικών εργαλείων. Οι δραστηριότητες μάθησης εφαρμόζονται και υλοποιούνται ευκολότερα με την επιστράτευση της τεχνολογίας. Πράγματι, η μάθηση της Γεωμετρίας έχει «πλεονεκτική μεταχείριση» από την Τεχνολογία, αφού με τη βοήθεια ψηφιακών εργαλείων οι μαθητές μοντελοποιούν γεωμετρικά θέματα και μέσα σε μαθησιακά περιβάλλοντα ζωτικής διάδρασης μελετούν μια πληθώρα γεωμετρικών μορφών.

Η δυναμική μοντελοποίηση του παραδοσιακού, στατικού ευκλείδειου περιβάλλοντος, μέσω του συρσίματος (drag-mode), αποτελεί το σημαντικότερο χαρακτηριστικό γνώρισμα των Δυναμικών Περιβαλλόντων Γεωμετρίας. Το σύρσιμο εισάγει τη μετακίνηση, την τροποποίηση και τον μετασχηματισμό στη στατική Ευκλείδεια Γεωμετρία, με διατήρηση, όμως, των βασικών σχέσεων και ιδιοτήτων των σχημάτων, ενώ φαίνεται ότι είναι και ένας ισχυρός πυρήνας πλούσιων διδακτικών και μαθησιακών δυνατοτήτων. Οι διερευνητικές δυνατότητες του συρσίματος αποτελούν σημαντικές, γνωστικές παροχές αλλά και ένα ισχυρό παιδαγωγικό εργαλείο υποστήριξης γεωμετρικών συλλογισμών, ιδιαίτερα κατά τον σχηματισμό υποθέσεων και εικασιών. Η κατασκευή ενός σχήματος στην οθόνη αντιπροσωπεύει μια ολόκληρη κλάση γεωμετρικών αντικειμένων, αφού για παράδειγμα, κατά τη δημιουργία ενός κύκλου, το σύρσιμο χαρίζει μιαν απειρία κύκλων, απλώς και μόνο με μιαν απλή κίνηση του ποντικιού.

Η παρούσα εργασία θα παρουσιάσει, αναλυτικά και με παραδείγματα, επτά διαφορετικούς τύπους συρσίματος, τους οποίους μετέρχονται οι μαθητές, κατά τη διάρκεια της διαδικασίας επίλυσης ανοιχτών προβλημάτων και σε σχέση με τη χρήση του ποντικιού: Το σύρσιμο περιπλάνησης, το σύρσιμο ελέγχου, το σύρσιμο λανθάνοντα γεωμετρικού τόπου, το σύρσιμο γραμμής αλλά και το δεσμευμένο, το καθοδηγούμενο και το εξαρτημένο σύρσιμο είναι οι κρίσιμες μορφές του συρσίματος, μέσω των οποίων παρουσιάζονται με «κινηματογραφική» απεικόνιση, διάφορες αναπαραστάσεις σχημάτων.

Λέξεις – κλειδιά: Σύρσιμο, Γεωμετρία, Δυναμικά Περιβάλλοντα, Συστήματα

ΕΙΣΑΓΩΓΗ

Τα Δυναμικά Περιβάλλοντα (Συστήματα) Γεωμετρίας ή αλλιώς Περιβάλλοντα Δυναμικής Γεωμετρίας επαναστατικοποίησαν τη διδασκαλία του μαθήματος της Ευκλείδειας Γεωμετρίας, από τα τέλη της δεκαετίας του 1980, όταν άρχισαν να συστήνονται ως ισχυρά διαμεσολαβητικά και γνωστικά εργαλεία στις τάξεις των Μαθηματικών. Η Γεωμετρία είναι το γνωστικό αντικείμενο στο οποίο η τεχνολογία έχει υπεισέλθει «δυναμικά», καθώς οι δραστηριότητες μάθησης εφαρμόζονται και υλοποιούνται ευκολότερα με την επιστράτευση των ψηφιακών περιβαλλόντων. Τα Δυναμικά Περιβάλλοντα Γεωμετρίας αξιοποιούνται συχνά κατά τη δυναμική δημιουργία σχημάτων αλλά και κατά την επίλυση στοιχειωδών προβλημάτων στο μάθημα της Γεωμετρίας. Πιο συγκεκριμένα, τα λογισμικά αυτά είναι κρίσιμα νοητικά εργαλεία για την εμπειρική μελέτη γεωμετρικών αντικειμένων και κατασκευών, παρέχοντας αποτελεσματικά εργαλεία, για διερευνήσεις και ανακαλύψεις σχέσεων και ιδιοτήτων, για διατυπώσεις και επαληθεύσεις εικασιών, για εισαγωγή «σε κουλτούρα και περικείμενο αποδείξεων», για εκτέλεση ευκλείδειων γεωμετρικών μετασχηματισμών καθώς και για παρουσιάσεις και επιδείξεις. Ως κυρίαρχα πλεονεκτικά χαρακτηριστικά των Δυναμικών Περιβαλλόντων Γεωμετρίας καταγράφονται η υψηλή αλληλεπιδραστικότητα, η φιλικότητα προς τον χρήστη και η ευχρηστία, το δυναμικό μαθησιακό περιβάλλον που επιτρέπει δυναμικούς μετασχηματισμούς των γεωμετρικών αντικειμένων, η άμεση ανατροφοδότηση, η αυτοδιόρθωση, η δυνατότητα δημιουργίας μακροεντολών και πολλαπλών αριθμητικών και οπτικών αναπαραστάσεων, η απουσία ανάγκης για γνώσεις προγραμματισμού και γενικά η ποιοτική και ποσοτική προσέγγιση των γεωμετρικών εννοιών. Είναι λογισμικά ανοιχτού τύπου και κονστρουκτιβιστικής κατατομής, τα πλέον επιτυχημένα από τα εκπαιδευτικά λογισμικά που αξιοποιούνται στις σχολικές αίθουσες. Το σημαντικότερο πλεονέκτημά τους είναι η αλληλεπίδραση με τον μαθητή-χρήστη, με έναν συνεχή και δυναμικό τρόπο, μέσω του άμεσου ελέγχου του ποντικιού. Το λεγόμενο σύρσιμο μπορεί να ελέγξει δυναμικά τις προδιαγραφές και τις επιθυμητές ιδιότητες μιας κατασκευής και ενός γεωμετρικού αντικειμένου, αλλά και να παρέχει ευκαιρίες για διερεύνηση και αναζήτηση, όπου αναγνωρίζονται και εντοπίζονται νέες ιδιότητες σταθερές και αναλλοίωτες ενός γεωμετρικού σχήματος. Η παρούσα εργασία, αφού, αρχικά, προβεί σε μια ιστορική αναδρομή και μια σταχυολόγηση των σπουδαιότερων «μαθησιακών αρετών και προσφορών» των Δυναμικών Περιβαλλόντων Γεωμετρίας, ακολούθως θα εστιάσει σε επτά διαφορετικές μορφές συρσίματος, τις οποίες θα διευκρινίσει και θα αποσαφηνίσει, με σχετικές παραδειγματικές περιπτώσεις. Όλες αυτές οι μορφές συρσίματος, μέσω της κινηματογραφικότητας που αναδεικνύουν, μπορεί να προσδώσουν μια αίσθηση μαγείας στο καθημερινό μάθημα της Γεωμετρίας, κεφαλαιοποιώντας, έτσι, τη μαθητική προσοχή και προσήλωση, τον μαθησιακό ενθουσιασμό και τη γεωμετρική κατανόηση.

ΤΑ ΔΥΝΑΜΙΚΑ ΠΕΡΙΒΑΛΛΟΝΤΑ ΓΕΩΜΕΤΡΙΑΣ

Η Γεωμετρία είναι επίλεκτο κομμάτι των Μαθηματικών και ανήκει ακριβώς στο κέντρο του πυρήνα τους (Garba, 2024; Nazarovich & Kurudirek, 2024). Η σπουδαιότητά της χρονολογείται από την εποχή που οι άνθρωποι άρχισαν να αλληλοεπιδρούν με τη φύση και τα φαινόμενά της (Jablonski & Ludwig, 2023). Οι ρίζες της, σύμφωνα με τον Ηρόδοτο, τον Ήρωνα τον Αλεξανδρέα και άλλους αρχαίους συγγραφείς, πρέπει να αναζητηθούν στην αρχαία Αίγυπτο (Τσαμάτος, 2004) και στον πολιτισμό της, ο οποίος αναπτύχθηκε στην εύφορη κοιλάδα του Νείλου. Οι πολλές πλημμύρες απαιτούσαν κάθε φορά σωστούς επαναπροσδιορισμούς των αγροτεμαχίων και απόδοσή τους, και πάλι, στους ιδιοκτήτες τους. Η ανάγκη για διδασκαλία και μάθηση της Γεωμετρίας, ως μιας ωφελιμιστικής, εξυπηρετικής, σχεδόν καθημερινής διαδικασία, ήρθε στο προσκήνιο των αναγκών των αρχαίων Αιγυπτίων. Δυο χιλιετίες σχεδόν μετά, το διανοητικό μεγαλείο του Ευκλείδη έδωσε την απαραίτητη επιστημονική θεωρητικοποίηση και τεκμηρίωση στη Γεωμετρία, αφού, μέχρι τότε, η αιγυπτιακή και η βαβυλωνιακή - αργότερα - Γεωμετρία ήταν πειραματική και εμπειρική, βασισμένη στο «βλέποντας και κάνοντας», ήταν, δηλαδή, ένα πρακτικό φύρδην μίγδην (Mastrogiannis 2009a; Kline, 2001).

Σήμερα αναφέρονται πολλοί κύριοι λόγοι αναγκαιότητας (Wu et al., 2024; Jones & Tzekaki, 2016; Abdullah & Mohamed, 2008; NCTM, 2000; Sherard, 1981), οι οποίοι συνηγορούν σθεναρά, υπέρ της διδασκαλίας της Γεωμετρίας στο Σχολείο. Αναλυτικότερα, ως σχολικό μάθημα, η Γεωμετρία ενισχύει την επικοινωνία και τη συνεργασία, προσφέρει λύσεις σε πολλά προβλήματα της καθημερινής ζωής (real life problems), έχει σημαντικές εφαρμογές σε βασικές μαθηματικές έννοιες, όπως για παράδειγμα της Αριθμητικής, της Άλγεβρας και της Στατιστικής, λειτουργεί προπαρασκευαστικά για ανεπιτήδευτη εισαγωγή στα ανώτερα Μαθηματικά και σε άλλες επιστήμες (π.χ. Μηχανική, Αρχιτεκτονική), αναπτύσσει τη χωρική αντίληψη, τις δεξιότητες σκέψης και επίλυσης προβλημάτων, ενώ μέσω της μελέτης της δημιουργεί γόνιμο και πλούσιο πλαίσιο καλλιέργειας υψηλών πολιτισμικών και αισθητικών αξιών.

Η Γεωμετρία, σε καμία περίπτωση, δεν είναι μόνο, μια ξερή και στεγνή παράθεση ορισμών, καθόσον επικεντρώνεται περισσότερο στην περιγραφή, ανάδειξη και αξιοποίηση σχέσεων και συλλογισμών (NCTM, 2000). Σε όλα τα εκπαιδευτικά συστήματα του κόσμου οι γενικοί στόχοι του μαθήματος της Γεωμετρίας περιστρέφονται γύρω από την αξιοποίηση της γεωμετρικής γνώσης και την οργάνωση και χρήση χωρικών σχέσεων, κατά τη διαδικασία επίλυσης προβλημάτων, αλλά και την κατανόηση άλλων εννοιών και την επεξήγηση του περιβάλλοντα φυσικού κόσμου (Hamidah et al., 2025; Shi et al., 2023; Armah & Kissi, 2019; Güven & Kosa, 2008).

Στη σημερινή πληθωρική απολαβή των ψηφιακών ευεργετημάτων, από σχεδόν κάθε ανθρώπινη δραστηριότητα, ενέργεια ή ενασχόληση, η Γεωμετρία είναι το γνωστικό αντικείμενο εκείνο, στο οποίο η τεχνολογία έχει αφήσει, σε μεγαλύτερο βαθμό σε σχέση με αλλά μαθήματα, το πρωτοποριακό και βαρύ αποτύπωμά της, μέσω των ριζοσπαστικών Δυναμικών Περιβαλλόντων μάθησης, τα οποία αξιοποιούνται, ιδιαιτέρως, για τη δυναμική κατασκευή γεωμετρικών αντικειμένων και μορφών και την ανάλυση στόχων και προβλημάτων στη Γεωμετρία, τουλάχιστον της Υποχρεωτικής Εκπαίδευσης (Mastrogiannis, 2020). Αυτά τα δυναμικά λογισμικά μπορεί να παρακινήσουν και να εμπλέξουν ενεργητικά τους μαθητές, κατά την εξερεύνηση γεωμετρικών θεωρημάτων και την ανάλυση προβλημάτων, μελετώντας πολλά παρόμοια παραδείγματα.

Τα Δυναμικά Περιβάλλοντα Γεωμετρίας είναι γνωστικά εργαλεία γεωμετρικής οπτικοποίησης (Freixas, Joan-Arinyo & Soto-Riera, 2010; Quaresma & Janičić, 2006) και συνεργατικά, μαθητοκεντρικά περιβάλλοντα μάθησης, ένα είδος διερευνητικού, διαδραστικού μικρόκοσμου, σχεδιασμένου για συγκεκριμένους μαθησιακούς σκοπούς, που προάγουν την κατανόηση της Γεωμετρίας (Denbel, 2015). Ο Seymour Papert, ο οποίος ανέπτυξε τη γλώσσα προγραμματισμού LOGO για να ενθαρρύνει την αυστηρή σκέψη που απαιτείται στα Μαθηματικά, επινόησε τον όρο «μικρόκοσμος» (δηλαδή «μικρά κομμάτια πραγματικότητας») στο MIT Media Lab (Carvalho et al., 2019; Jonassen & Howland, 2003), με σκοπό να ορίσει ένα διερευνητικό περιβάλλον μάθησης που προσομοιώνει φαινόμενα του πραγματικού κόσμου. Οι μαθητές, στο περιβάλλον ενός μικρόκοσμου, πειραματιζόμενοι με πολλούς και διάφορους τρόπους, μέσω άμεσης ανατροφοδότησης, ενθαρρύνονται να αναπτύξουν τη δημιουργικότητά τους, τροποποιώντας, επινοώντας και ανακαλύπτοντας στρατηγικές επίλυσης προβλημάτων και νέα γνώση, με παροτρύνσεις, όπως «χειριστείτε» «διερευνήστε», «υποθέστε» και «ελέγξτε» (Mees, 2023; Rieber, 2004; Jonassen & Howland, 2003).

Ο αριθμός των Δυναμικών Περιβαλλόντων, παγκοσμίως, από την αρχή του τρέχοντος αιώνα ξεπερνούσε τα 70, αν και τα περισσότερα από αυτά είναι κλώνοι αρχικών συστημάτων, τα οποία είναι λιγότερα από δέκα (Laborde et al., 2006). Τα πρώτα πακέτα λογισμικού Δυναμικής Γεωμετρίας, του καλύτερου τύπου, μάλλον, διερευνητικού λογισμικού, παρουσιάστηκαν στα τέλη της δεκαετίας του '80 και έκτοτε βαίνουν συνεχώς βελτιούμενα (Molnár & Lukáč, 2015; Johnston-Wilder & Pimm, 2005; Hohenwarter & Fuchs, 2004; Kortenkamp, 1999), επηρεάζοντας εξαιρετικά θετικά την εκπαίδευση στα Μαθηματικά (υπάρχουν και 3D-Δυναμικά Περιβάλλοντα). Από τα πλέον δημοφιλή (Hattermann, 2010) τέτοια διαδραστικά λογισμικά, αναδεικνύονται το Geometer Sketchpad, το Cabri Geometry, το GEOLOG, το Thales και τελευταία το (καλύτερο όλων) GeoGebra. Έχει, δε, διαπιστωθεί ότι το GeoGebra και το Cabri Geometry είναι τα πιο χρησιμοποιούμενα πακέτα από τους εκπαιδευτικούς Δημοτικών Σχολείων (İbili, 2019). Η σπουδαιότητά τους δομείται στον εύκολο τρόπο με τον οποίο οι χρήστες μπορούν και αλληλοεπιδρούν, με έναν διαρκή και δυναμικό τρόπο, έχοντας τον άμεσο έλεγχο του ποντικιού, με τα γεωμετρικά σχήματα, που έχουν κατασκευάσει, αξιοποιώντας τα εργαλεία που διαθέτουν τα λογισμικά αυτά (Johnston-Wilder & Pimm, 2005). Επιπλέον, παρέχονται τρόποι αναπαράστασης και χειρισμού γεωμετρικών αντικειμένων που είναι αδύνατο να παραχθούν με τα στατικά σχήματα που δημιουργούνται με χαρτί, μολύβι, χάρακα και διαβήτη (Adelabu, Makgato & Ramaligela, 2019). Οι μαθητές μπορούν να μετακινούν τη θέση των ελεύθερων σημείων και να μελετούν τις ιδιότητες των σχημάτων και μέσω της παραγομένης δυναμικότητας να προκύπτουν νέες ή ειδικές περιπτώσεις σχημάτων, όπως π.χ. ένα τρίγωνο που τελικά μέσω δυναμικού μετασχηματισμού καθίσταται ισοσκελές ή ισόπλευρο (Wilson & Fleuriot, 2005). Ακόμη, οι μαθητές μπορούν να μυηθούν σε αποδεικτικούς μηχανισμούς, εισαγόμενοι σταδιακά σε ένα δυναμικό πλαίσιο μαθηματικής αυστηρότητας και επαγωγικών και παραγωγικών συμπερασμών, παρέχοντας όλα τα στοιχεία που απαιτούνται σε μιαν απόδειξη (Janicic & Quaresma, 2006; Mogetta, Olivero & Jones, 1999), αν και μερικά από αυτά τα λογισμικά Δυναμικής Γεωμετρίας αποδεικνύουν αυτόματα θεωρήματα ή παρέχουν βοήθεια, κατά την εύρεση αποδείξεων (Quaresma, Santos & Teles, 2024; Pham & Bertot, 2012; Bantchev, 2010; Quaresma & Janičić, 2006). Η δυναμική τροποποίηση των σχημάτων, γενικά, παρέχει πολλά οφέλη, κατά την επίλυση προβλημάτων, καθότι μια λύση είναι έγκυρη, αν και μόνο αν το σχήμα στην οθόνη παραμένει σταθερό και αμετάβλητο, υπό την εξονυχιστική και εξαντλητική, επαγωγική μελέτη περιπτώσεων, που προσφέρει ο δυναμικός μετασχηματισμός του (Arzarello et al., 2012).

Στα κονστρουκτιβιστικά περιβάλλοντα μάθησης, όπως τα λογισμικά Δυναμικής Γεωμετρίας, ο ρόλος των δραστηριοτήτων είναι καίριος και καταλυτικός, Γενικά, έξι τύποι μαθησιακών, διερευνητικών δραστηριοτήτων, με σκοπό την ενεργητική συμμετοχή και την οικοδόμηση γνώσης μπορούν να σχεδιαστούν στην οθόνη ενός Δυναμικού Περιβάλλοντος Γεωμετρίας (Kordaki & Mastrogiannis 2006; Mastrogiannis & Kordaki, 2006; Kordaki & Mastrogiannis, 2007):

1. Διατυπώσεις/επαληθεύσεις εικασιών με βάση τη μεταβολή μιας γεωμετρικής κατασκευής.
2. Διατυπώσεις/επαληθεύσεις εικασιών, με βάση τα μεταβαλλόμενα αριθμητικά δεδομένα, που προκύπτουν, αυτόματα από τον δυναμικό μετασχηματισμό μιας γεωμετρικής κατασκευής.
3. Επαληθεύσεις σχέσεων, με βάση μεταβαλλόμενα αριθμητικά δεδομένα, που προκύπτουν αυτόματα, κατά τη διάρκεια μεταβολής μιας γεωμετρικής κατασκευής.

4. Δραστηριότητες τύπου «μαύρου κουτιού» - Black-box (π.χ. τετράπλευρα από τα οποία μερικά είναι εγγεγραμμένα σε κρυμμένο κύκλο, τον οποίο οι μαθητές πρέπει να εντοπίσουν από το γεγονός ότι το άθροισμα των απέναντι γωνιών αυτών των εγγεγραμμένων τετραγώνων ισούται με 180°).
5. Δραστηριότητες πολλαπλών επιλύσεων (π.χ. τρόποι κατασκευής ίσων γωνιών ή όμοιων τριγώνων).
6. Κατασκευές, που αντιγράφουν πραγματικά προβλήματα ζωής (real life problems).

Για την υλοποίηση των παραπάνω δραστηριοτήτων αξιοποιούνται τρεις χαρακτηριστικές-κεντρικές ιδιότητες των Δυναμικών Συστημάτων Γεωμετρίας (Hattermann, 2010; Kokol-Voljc, 2007; Sträßer, 2002), οι οποίες προσδίδουν και πινελιές παιχνιδίσματος στη διδακτική διαδικασία (Abdullah & Zakaria, 2011; Mastrogiannis, 2009b):

1. Η δυναμική μοντελοποίηση του παραδοσιακού, στατικού ευκλείδειου περιβάλλοντος, μέσω του συρσίματος (drag-mode), δηλαδή της δυναμικής μεταβολής ενός σχήματος με το σύρσιμο ενός σημείου του.
2. Η λειτουργία-εντολή για την οπτικοποίηση των ιχνών κινούμενων σημείων (κατασκευές μέσω γεωμετρικών τόπων).
3. Η ομαδοποίηση μιας ακολουθίας εντολών σε μια νέα εντολή («μακροεντολή»).

Ακόμη, εδώ και μια εικοσαετία (Canogullari & Erbas, 2024; Lu & Xie, 2024; Villa-Ochoa & Suárez-Téllez, 2021; Ruiz-López, 2018; Christou et al., 2004), μέσω ερευνών, αποδείχθηκε ότι τα λογισμικά Δυναμικής Γεωμετρίας μπορούν να παίξουν σημαίνοντα και καθοριστικό ρόλο στην επίλυση προβλημάτων. Υπάρχουν τρεις κύριες επιπτώσεις στη μαθησιακή διαδικασία:

1. Το σύρσιμο και η αυτόματη αριθμητική μέτρηση είναι σημαντικά εργαλεία για την επίλυση προβλημάτων και, κατά συνέπεια, για την επαλήθευση και την εγκυρότητα των εικασιών και των υποθέσεων.
2. Ως γνωστικά εργαλεία διαμεσολάβησης και διευκόλυνσης, ενθαρρύνουν τις υποθέσεις, τον πειραματισμό, τον επαγωγικό συλλογισμό (αλλά και τον παραγωγικό), τις ανακαλύψεις ιδιοτήτων και σχέσεων, καθώς και τις γενικεύσεις.
3. Οι μαθητές μπορεί να εντοπίσουν ειδικές περιπτώσεις σχημάτων και να τις μελετήσουν. Εύκολα διαπιστώνουν ποια κομμάτια της κατασκευής αλλάζουν και ποια παραμένουν σταθερά (αναλλοίωτα).

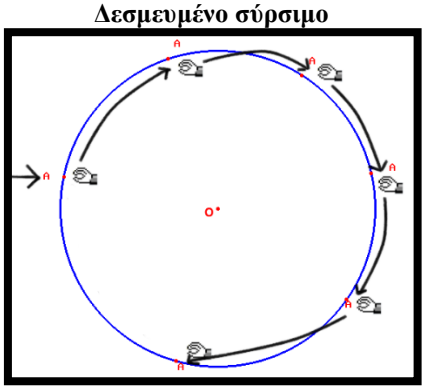
Από τις παραπάνω παραγράφους διαφαίνεται και τεκμαίρεται η μεγάλη μαθησιακή αξία της λειτουργίας του συρσίματος στα Δυναμικά Περιβάλλοντα Γεωμετρίας. Το σύρσιμο που αποτελεί το σημαντικότερο πλεονέκτημα αυτών των δυναμικών λογισμικών, εισάγει τη μετακίνηση, την τροποποίηση και τον μετασχηματισμό στη στατική Ευκλείδεια Γεωμετρία, με διατήρηση, όμως, των βασικών σχέσεων και ιδιοτήτων των σχημάτων, γεγονός που έχει επιφέρει σημαντικά και πλούσια μαθησιακά οφέλη σε θέματα διδασκαλίας και μάθησης της Γεωμετρίας.

ΤΟ ΣΥΡΣΙΜΟ ΣΤΑ ΔΥΝΑΜΙΚΑ ΠΕΡΙΒΑΛΛΟΝΤΑ ΓΕΩΜΕΤΡΙΑΣ

Το σύρσιμο είναι ένα εργαλείο για να παρουσιάζονται με «κινηματογραφική» απεικόνιση, διαφορετικές αναπαραστάσεις ενός και του αυτού σχήματος (Hölzl, 2001). Οι στατικές εικόνες μετατρέπονται σε δυναμικές και «ζωντανεύουν», προσφέροντας αυτήν την αίσθηση της μαγείας γύρω τους (Johnston-Wilder & Pimm, 2005), όπως προελέχθη. Κατά τη διάρκεια του συρσίματος, ένα γεωμετρικό αντικείμενο στην οθόνη διαφοροποιείται δυναμικά και ταυτόχρονα ο μετασχηματισμός αυτός είναι άμεσα παρατηρήσιμος. Το σχέδιο ενημερώνεται αυτόματα, σύμφωνα με τις εντολές της κατασκευής του. Στον χρήστη, το σχέδιο φαντάζει ότι σέβεται τους νόμους της Γεωμετρίας, καθώς η διαδικασία του συρσίματος εξελίσσεται. Το σύρσιμο διαδραματίζει, επίσης, και βασικό ρόλο στην επίλυση προβλημάτων, ως μια παρατηρήσιμη δράση, με μια σαφή επίσημη ερμηνεία. Είναι ένας τρόπος μελέτης, όχι μόνο μέσω διατύπωσης ερωτήσεων και εικασιών περί γενικεύσεων αλλά και της παροχής δυνατοτήτων για επαλήθευσή τους (Mastrogiannis, 2013). Στην πραγματικότητα, η λειτουργία του συρσίματος υποστηρίζει τη διατύπωση υποθέσεων σε ανοιχτού τύπου δραστηριότητες (Baccaglini-Frank & Mariotti, 2011), προσφέρει καίρια ανατροφοδότηση κατά τη φάση της διερεύνησης και προσδίδει στις αποδείξεις τον σημαντικό ρόλο των πραγματικών «εξηγήσεων», όσον αφορά στις υποθέσεις ή στις ιδιότητες (Arzarello et al., 2002). Η μετακίνηση και η συνεχής μεταβολή, μαζί με την προσφερόμενη οπτική και αισθητικοκινητική ανάδραση, μπορούν να καθοδηγήσουν στη διάκριση των ιδιοτήτων των γεωμετρικών σχημάτων (Leung, 2023). Η κατασκευή ενός σχήματος στην οθόνη αντιπροσωπεύει μια ολόκληρη κλάση γεωμετρικών αντικειμένων, αφού για παράδειγμα, κατά τη δημιουργία ενός κύκλου, το σύρσιμο χαρίζει μιαν απειρία κύκλων, απλώς και μόνο με μιαν απλή κίνηση του ποντικιού (κάνοντας κλικ και κρατώντας το πατημένο, σε ένα σημείο της περιμέτρου και σέρνοντας το ποντίκι προς οποιαδήποτε κατεύθυνση, ο κύκλος αυξομειώνεται, κατά το δοκούν).

Η διαμεσολαβητική, γνωστική παρακαταθήκη του συρσίματος μπορεί να αναδυθεί μέσω 2 αξιοσημείωτων λειτουργιών (Chen, Toh & Zhu, 2023; Hölzl, 2001):

- Το σύρσιμο ως λειτουργία ελέγχου των προδιαγραφών και των επιθυμητών ιδιοτήτων μιας κατασκευής.
- Το σύρσιμο ως λειτουργία διερεύνησης και αναζήτησης, όπου αναγνωρίζονται και εντοπίζονται νέες ιδιότητες και αναλλοίωτες μιας γεωμετρικής μορφής. Μάλιστα, οι επιστημονικές δυνατότητες του drag-mode εδράζονται



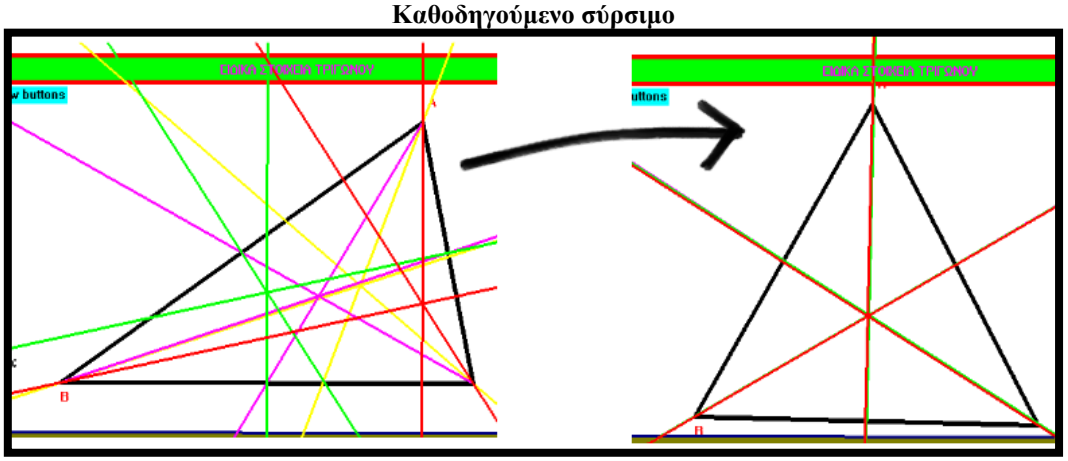
σε αυτή τη σημαντική συμβολή του, κατά τον εντοπισμό και τη διάκριση των σταθερών και των αναλλοίωτων, μέσω συγκρίσεων, διαχωρισμών, γενικεύσεων και συγχωνεύσεων (Leung, 2023). Για παράδειγμα το τμήμα που συνδέει τα μέσα δυο πλευρών του τριγώνου παραμένει πάντα και «σταθερά» παράλληλο στην τρίτη πλευρά, ανεξάρτητα από το σύρσιμο της κάθε πλευράς και τον επαγόμενο μετασχηματισμό και την τροποποίηση του τριγώνου.

Τα Περιβάλλοντα Δυναμικής Γεωμετρίας παρέχουν νέες διεξόδους για την εμφάνιση τόσο πειραματικών όσο και θεωρητικών Μαθηματικών εξερευνήσεων, μέσω του συρσίματος. Έρευνες έδειξαν ότι οι μαθητές χρησιμοποιούν διαφορετικές μεθόδους συρσίματος για να εξερευνούν, να ανακαλύπτουν και να γενικεύουν (Canogullari & Erbas, 2024). Περισσότερο αναλυτικά, κατά τη διάρκεια της διαδικασίας επίλυσης ανοιχτών προβλημάτων και σε σχέση με τη χρήση του ποντικιού, έχουν ανιχνευτεί επτά διαφορετικοί τύποι συρσίματος, τους οποίους μετέρχονται οι μαθητές, κατά την παιδαγωγική αξιοποίηση των Δυναμικών Περιβαλλόντων Γεωμετρίας (Højsted, 2020; Baccaglini-Frank, 2019; Μιχαλοπούλου, 2012; Leung, 2008; Arzarello et al., 2002). Συγκριμένα:

Σύρσιμο περιπλάνησης: Μετά την κατασκευή μιας γεωμετρικής μορφής, οι μαθητές τη διερευνούν, σύροντας τα βασικά της σημεία τυχαία στην οθόνη, χωρίς συγκεκριμένο στόχο. Έτσι, πιθανόν να ανακαλύψουν αναλλοίωτες, κανονικότητες και μοτίβα. Για παράδειγμα, οι μαθητές σχεδιάζουν, στην οθόνη, ένα τρίγωνο ΑΒΓ. Στη συνέχεια φέρνουν με τη βοήθεια του λογισμικού τα 3 ύψη του. Σύροντας το τρίγωνο από οποιαδήποτε κορυφή του και παράγοντας έτσι, απειρία τριγώνων, μπορεί να διαπιστώσουν ότι κάθε φορά τα τρία ύψη διέρχονται από το ίδιο σημείο Ο.

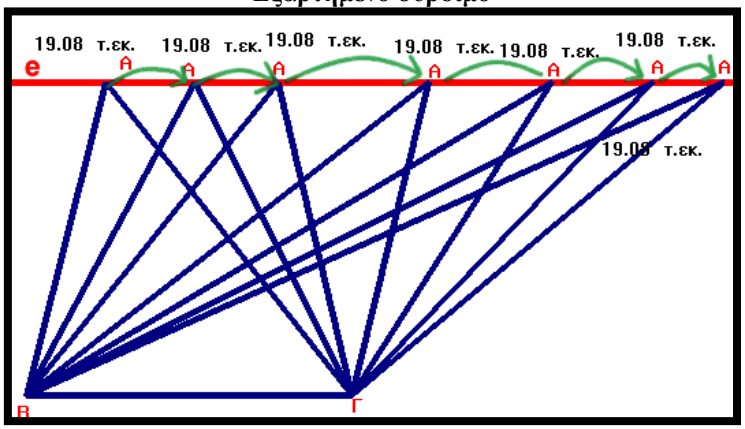
Δεσμευμένο σύρσιμο: Είναι εκείνες οι περιπτώσεις όπου κάποια σημεία, ως τμήματα μιας αρχικής κατασκευής, δεν μπορούν να συρθούν οπουδήποτε, παρά μόνο εντός των περιχαρακωμένων, δεσμευμένων πλαισίων του αρχικού αντικειμένου. Για παράδειγμα, ένα σημείο μιας ευθείας, σύρεται μόνο κατά μήκος της, ενώ ένα σημείο ενός τριγώνου ή ενός κύκλου διαγράφει μόνο την περίμετρό τους. Στην εικόνα 1 το σημείο Α, με σύρσιμο, κινείται μεν, αλλά δεν εγκαταλείπει την περιφέρεια του κύκλου (με κέντρο Ο), αφού παραμένει πάντοτε σημείο της.

Εικόνα 1
Δεσμευμένο σύρσιμο



Καθοδηγούμενο σύρσιμο: Οι μαθητές σέρνουν ένα γεωμετρικό αντικείμενο με επιμέλεια και ηθελημένα, ώστε να του προσδώσουν μια συγκεκριμένη και ιδιαίτερη μορφή. Παραδείγματος χάριν, σε ένα τυχαίο τρίγωνο (εικόνα 2), έχουν χαραχτεί όλα τα στοιχεία του, δηλαδή οι 3 διάμεσοι (μωβ), οι 3 διχοτόμοι (κίτρινες), οι 3 μεσοκάθετες (πράσινες) και τα 3 ύψη (κόκκινα). Ο δυναμικός, σκόπιμος μετασχηματισμός του αρχικού τριγώνου σε ισόπλευρο (π.χ. με τη συνεχή μετακίνηση του σημείου Α), προσφέρει το μαγικό αποτέλεσμα της απόλυτης ταύτισης και των 4 αυτών στοιχείων μεταξύ τους. Τα 12 «ατάκτως ερριμμένα» τμήματα, ταυτίζονται ανά 4, και συγχωνεύονται στα τελικά 3.

Εξαρτημένο σύρσιμο: Είναι η περίπτωση κατά την οποία ένα σημείο μιας κατασκευής σύρεται κατά μήκος ενός άλλου αντικειμένου, όντας συνδεδεμένο και εξαρτημένο από αυτό. Για παράδειγμα, στο τρίγωνο ΑΒΓ, το σημείο Α σύρεται κατά μήκος της ευθείας e, η οποία είναι εκ κατασκευής παράλληλη προς την πλευρά ΒΓ. Το σύρσιμο του Α παράγει κάθε στιγμή, μιαν απειρία ισεμβαδικών τριγώνων (εικόνα 3).



Σύρσιμο ελέγχου: Οι μαθητές σέρνουν μια γεωμετρική μορφή για να διαπιστώσουν, αν διατηρούνται οι αρχικές ιδιότητες, αν πληρούνται οι τιθέμενες «γεωμετρικές προδιαγραφές» και αν το σχήμα «συμπεριφέρεται» με τον ίδιο τρόπο, σε σχέση με το προγενέστερο. Για παράδειγμα, στην εικόνα 4, το αρχικό τραπέζιο ΑΒΓΔ με σύρσιμο του σημείου Γ σε κάποια δεδομένη στιγμή αυτό θα μετασχηματιστεί σε πλάγιο παραλληλόγραμμο (με «απαλοιφή» του μπλε χωρίου),

μετέπειτα πάλι σε τραπέζιο (με «σβήσιμο» του πράσινου τριγώνου) και τέλος στην οριακή περίπτωση, με τη σταδιακή εξάλειψη του πορτοκαλί τμήματος, το σημείο Γ θα συμπέσει με το Δ και το αρχικό σχήμα θα μετατραπεί σε τρίγωνο.

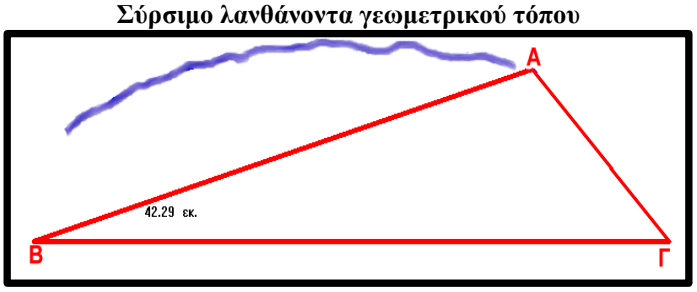
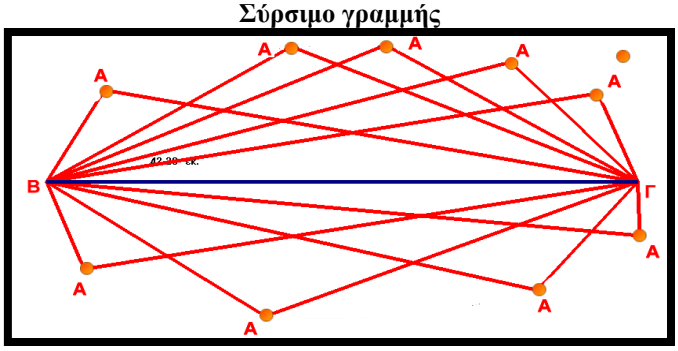
Εξαρτημένο σύρσιμο



Εικόνα 4
Σύρσιμο ελέγχου



Σύρσιμο λανθάνοντα γεωμετρικού τόπου: Οι μαθητές, χωρίς να το συνειδητοποιούν, σέρνουν ένα σημείο μιας κατασκευής κατά μήκος ενός γεωμετρικού τόπου, ο οποίος δεν είναι ορατός. Θεωρείται κατά έναν τρόπο, ως σύρσιμο περιπλάνησης που έχει βρει την πορεία του. Ως παράδειγμα, θα αναφερθεί η προσπάθεια των μαθητών να βρουν ισοπεριμετρικά τρίγωνα ΑΒΓ, με την προϋπόθεση ότι η πλευρά ΒΓ παραμένει σταθερή και σύρεται μόνο το σημείο Α (εικόνα 5). Το σύρσιμο δεν είναι τυχαίο και οι μαθητές με τη βοήθεια του λογισμικού εντοπίζουν πολλές θέσεις του Α (μπλε ίχνος), οι οποίες πληρούν την ισότητα ΑΒ+ΑΓ+ΒΓ = a και ανήκουν φυσικά στον γνωστό γεωμετρικό τόπο της έλλειψης, με εστίες τα σημεία Β και Γ. Ο γεωμετρικός τόπος της έλλειψης δεν γίνεται αντιληπτός.

Εικόνα 5
Σύρσιμο λανθάνοντα γεωμετρικού τόπου

Σύρσιμο γραμμής: Οι μαθητές σχεδιάζουν νέα σημεία τα οποία ανήκουν με μια γραμμή ενός σχήματος, το οποίο διατηρεί μια ορισμένη ιδιότητα. Το σύρσιμο της γραμμής έπεται του συρσίματος του λανθάνοντα γεωμετρικού τόπου, δεδομένου ότι καθιστά τον γεωμετρικό τόπο φανερό και τον αποκαλύπτει στην οθόνη. Στο προηγούμενο παράδειγμα, το μονοπάτι που διαγράφει το σημείο Α δε σχεδιάζεται. Οι μαθητές εντοπίζουν και μαρκάρουν πολλά σημεία από το ίχνος του Α, τα οποία πληρούν τη δεδομένη ιδιότητα (εικόνα 6). Ακολούθως, μπορούν να παρατηρήσουν το τελικό σχήμα της έλλειψης, που τα παραπάνω σχεδιασμένα σημεία διαγράφουν. Ο γνωστός γεωμετρικός τόπος της κωνικής τομής της έλλειψης παύει να είναι λανθάνων και αποκαλύπτεται.

Εικόνα 6
Σύρσιμο γραμμής

Γενικά, έχουν αναγνωριστεί και σκιαγραφηθεί 3 είδη γνωστικών ταξινομήσεων, με διδακτική δυναμική, συνδεδεμένων με τη διαμεσολαβητική αξιοποίηση του συρσίματος και τον γεφυροποιό ρόλο του, κατά τη συναρμογή θεωρίας και πράξης-σχήματος αλλά και των γνωστικών μεταβάσεων από το αντιληπτικό επίπεδο στο θεωρητικό και τανάπαλιν στη δραστηριότητα των μαθητών. Έχει αναπτυχτεί ένα θεωρητικό μοντέλο διαδικασιών, το οποίο αποκωδικοποιεί και αποσαφηνίζει όλη τη συνθετική διαδικασία με αφετηρία τη δυναμική διερεύνηση μιας γεωμετρικής κατασκευής, υστερότερα τη διατύπωση της υπόθεσης και τέλος την επικύρωσή της (Μιχαλοπούλου, 2012; Baccaglini-Frank, 2010; Arzarello et al., 2002).

Αναλυτικότερα:

1. Οι ανερχόμενες, ανιούσες διαδικασίες, με αφετηρία τα σχήματα και σταθμούς-καταφυγές τη θεωρία, τις οποίες οι μαθητές μετέρχονται κατά τη διερεύνηση των σχημάτων, με σκοπό να διατυπώσουν υποθέσεις και να εντοπίσουν κανονικότητες, σταθερές και αναλλοίωτες.
2. Οι κατερχόμενες, κατιούσες διαδικασίες, με αντίστροφη των προηγούμενων πορεία, από τη θεωρία δηλαδή στα σχήματα, με σκοπό τον έλεγχο ιδιοτήτων, την εξέταση και μελέτη χαρακτηριστικών αλλά και την επαλήθευση ή διάψευση εικασιών και υποθέσεων.

3. Οι απαγωγικές διαδικασίες, οι οποίες «εμφανίζονται», ως ένας διευκολυντικός, καθοδηγητικός, γνωστικο-λογικός οπλισμός, κατά τη μετάβαση από τις ανιούσες στις κατιούσες διαδικασίες. Οι μαθητές επιλέγουν τον «κανόνα», ο οποίος ταιριάζει στη δεδομένη περίπτωση που μελετούν, ενεργοποιώντας τις πρόσφορες, σχετικές, γεωμετρικές γνώσεις τους, ώστε να μετατρέψουν τις διερευνήσεις τους σε εικασία (του τύπου «εάν… τότε») και κατόπιν να καταπιαστούν με την απόδειξη.

Σε σχέση με την τελευταία περίπτωση, ως μια απαγωγική διαδικασία γενίκευσης υποθέσεων, αναφέρεται επίσης και το σύρσιμο διατήρησης (Baccaglini-Frank, 2019; Baccaglini-Frank & Antonini, 2016; Baccaglini-Frank, 2010), όπου ένα βασικό σημείο μιας μορφής σύρεται, διατηρώντας, ωστόσο, αναλλοίωτη μια ιδιότητά της. Για παράδειγμα, αν ένα ορθογώνιο τρίγωνο ΑΒΓ είναι σχεδιασμένο πάνω σε δυο κάθετες ευθείες, οι οποίες στη συνέχεια αποκρύπτονται, τότε οποιοσδήποτε μετασχηματισμός του τριγώνου, με σύρσιμο, δεν αλλοιώνει την ορθογωνικότητά του.

ΣΥΖΗΤΗΣΗ, ΣΥΜΠΕΡΑΣΜΑΤΑ, ΠΡΟΤΑΣΕΙΣ

Η θεωρητικοποίηση των Μαθηματικών και η απόδειξη ως μηχανισμός ολικής τεκμηρίωσης των νόμων και των αρχών της φύσης και του σύμπαντος θεμελιώθηκε από τους μεγάλους Έλληνες μαθηματικούς, τον Θαλή, τον Ευκλείδη, τον Πυθαγόρα και τον Αρχιμήδη, οι οποίοι αποδέσμευσαν την εμπειρία από την αλήθεια, εισάγοντας τη λογική θεμελίωση θεωρημάτων. Οι Πυθαγόρειοι θεωρούσαν ότι «παν εστί αριθμός» ασπαζόμενοι την άποψη ότι οι αριθμοί περιέκλειαν δύναμη και, κατά συνέπεια, δομούσαν και την ουσία των πάντων, ως οι μόνοι γεννήτορες, ως η αρχή και η ύλη για την παραγωγή των όντων. Επίσης, οι Πυθαγόρειοι πίστευαν (Finn, 2021) ότι το Σύμπαν μπορεί να αποκωδικοποιηθεί και να κατανοηθεί με την αξιοποίηση όρων Γεωμετρίας. Η Γεωμετρία, άλλωστε, θεωρούνταν ένας από τους τέσσερις υποκλάδους των Μαθηματικών (μαζί με την Αριθμητική, τη Μουσική και την Αστρονομία), τα οποία (Μαθηματικά) οι Πυθαγόρειοι τα ανήγαγαν σε ολοκληρωμένο κλάδο επιστημονικής δραστηριότητας. Βέβαια και η φράση του Πλάτωνα «Αεί ο Θεός ο Μέγας γεωμετρεί» καταδεικνύει την θεϊκότητα με την οποία οι αρχαίοι Έλληνες περιέβαλλαν τη Γεωμετρία.

Ακόμη και σήμερα, σύγχρονοι θεωρητικοί φυσικοί αποδέχονται και προσυπογράφουν την επιστημονική μεγαλοσύνη της Γεωμετρίας, ως ενός υπέρτατου επιστημονικού εργαλείου. Ο Antony Garrett Lisi (1968 -), Αμερικανός θεωρητικός φυσικός, δεν άφησε περιθώρια για υπονόμευση και αποδόμηση της αξίας της Γεωμετρίας, αφού δήλωσε ξεκάθαρα (Koizumi, 2017): «Νομίζω ότι το σύμπαν είναι καθαρή Γεωμετρία - βασικά, ένα όμορφο σχήμα που στριφογυρίζει και χορεύει πάνω στον χωροχρόνο». Ως μέρος του σύμπαντος, άρα και της Γεωμετρίας, η ανθρώπινη υπόσταση έχει γεωμετρική κατατομή και περιστοιχίζεται από γεωμετρική ομορφιά και αριστουργηματικότητα. Κατανοώντας τη Γεωμετρία, ο άνθρωπος κατανοεί και την ίδια του την ύπαρξη αλλά και τη φύση που τον περιτρέχει.

Για πολλούς λόγους, λοιπόν, το μάθημα της Γεωμετρίας στο σχολείο είναι «καταδικασμένο» να περιέχεται στα Προγράμματα Σπουδών σε όλα τα εκπαιδευτικά συστήματα του κόσμου. Τελευταία, ωστόσο, η Γεωμετρία έχει παραγκωνιστεί, ως σχολικό μάθημα, χάνοντας την πρωταγωνιστικότητα και τον παιδευτικό ρόλο που της αξίζει. Μάλιστα, ειδικά στο Δημοτικό Σχολείο, η Γεωμετρία ως μάθημα διδάσκεται μάλλον αποσπασματικά. Προς αυτήν την κατεύθυνση, τη συνηγορική υπέρ της Γεωμετρίας, μια δελεαστική πρόταση οπωσδήποτε θα συμπεριλάμβανε και τα λογισμικά Δυναμικής Γεωμετρίας, επειδή αυτά είναι παροτρυντικά και ενθουσιαστικά, αιχμαλωτίζουν την προσοχή και το ενδιαφέρον των μαθητών και προσδίδουν μια «αίσθηση ταχυδακτυλουργίας» στο καθημερινό μάθημα, με τη δημιουργία και τον συνεχή μετασχηματισμό διαγραμμάτων και άλλων μαθηματικών μορφών.

Σύμφωνα με τα Νέα Αναλυτικά Προγράμματα Σπουδών των Μαθηματικών, ειδικά για το Δημοτικό Σχολείο, μέρος της μαθηματικής ύλης θα αποτελούν και οι τρεις ευκλείδειοι μετασχηματισμοί, δηλαδή η συμμετρία η μεταφορά και η περιστροφή. Αυτή η λεγόμενη «Γεωμετρία της κίνησης» (οι ευκλείδειοι μετασχηματισμοί στηρίζονται στην κίνηση των σχημάτων) δε θα μπορούσε να βρει καλύτερο σύμμαχο παρά μόνο στις οθόνες των Δυναμικών Περιβαλλόντων Γεωμετρίας, των οποίων το κυρίαρχο πλεονέκτημα είναι η μετακίνηση και ο δυναμικός μετασχηματισμός. Για πολλούς λόγους, όπως αναφέρθηκαν στη τρέχουσα εργασία (η προστιθέμη αξία τους κατά τη μελέτη των μετασχηματισμών είναι ένας παραπανίσιος λόγος), τα Δυναμικά Περιβάλλοντα Γεωμετρίας πρέπει να αποτελούν, οπωσδήποτε, κρίσιμο διδακτικό μέσο, ως λαμπρό γνωστικό εργαλείο, στα μαθήματα της Γεωμετρίας, η οποία είναι παιδαγωγικά επιβεβλημένο να αποκτήσει και ένα πυρηνικό, συμπαγές, ολιστικό και γραμμικό πλαίσιο, ως σχολικό μάθημα, δίχως σαλαμοειδείς και τμηματικές προσεγγίσεις. Και ως μια απάντηση στον μεγάλο δάσκαλο Ευκλείδη, όντως μπορεί να υπάρξει βασιλική οδός για τη Γεωμετρία. Είναι, πιθανόν, και οι δρόμοι (ευθείς, τεθλασμένοι, καμπύλοι κ.λπ.) που χαράσσονται από τα ίχνη του ποντικιού, κατά τη λειτουργία του συρσίματος, στα εικονοστοιχεία των μαγευτικών Δυναμικών Περιβαλλόντων Γεωμετρίας.

ΠΕΡΙΛΗΨΗ

Η σχολική Γεωμετρία, που παρουσιάζεται αξιωματικά, υποθέτει ότι οι μαθητές σκέφτονται, μάλλον, με ένα τυπικά συμπερασματικό τρόπο. Μια άλλη θεωρία, όμως, σχετικά με την εκμάθηση της Γεωμετρίας είναι η θεωρία των van Hiele, που αποτελεί, σήμερα, παράγοντα με μεγάλη επίδραση στη σχολική Γεωμετρία, αφού παρά την τεράστια έρευνα για τη γεωμετρική σκέψη, καμία πρόταση δεν έχει προσελκύσει τόσο πολύ την προσοχή όσο η θεωρία των επιπέδων γεωμετρικής σκέψης των van Hiele. Μάλιστα, έχει αναγνωρισθεί η προστιθέμενη αξία του μοντέλου των van Hiele, κατά την περιγραφή, τη μελέτη και την ανάδειξη της γεωμετρικής σκέψης. Το μοντέλο των van Hiele απαρτίζεται από δύο κύριες πτυχές. Η πρώτη αποτελείται από μια ιεραρχική ακολουθία πέντε επιπέδων, συλλογιστικών διεργασιών και γεωμετρικής σκέψης. Το δεύτερο μέρος ενδιαφέρεται για την ανάπτυξη της διαίσθησης των μαθητών και επικεντρώνεται στις φάσεις εκμάθησης, στα μέσα, δηλαδή, τα οποία μετέρχεται ένας δάσκαλος, προκειμένου να αυξήσει την απόδοση των μαθητών του, μέσω αυτών των διάφορων επιπέδων σκέψης.

Έρευνες έχουν δείξει ότι τα Λογισμικά Δυναμικής Γεωμετρίας ενισχύουν τους μαθητές στη μελέτη των γεωμετρικών εννοιών στα παρωθητικά πλαίσια ενεργοποίησης και αξιοποίησης της θεωρίας των van Hiele. Οι δραστηριότητες που βασίζονται στα επίπεδα σκέψης των van Hiele καθίστανται ευκολότερες και αποτελεσματικότερες με την παρουσία διάφορων τεχνολογικών εργαλείων και ειδικά μέσω Δυναμικών Λογισμικών Γεωμετρίας. Η παρούσα εργασία αφού περιγράψει τη θεωρία των van Hiele επιχειρηματολογεί, ακολούθως, υπέρ των Δυναμικών Λογισμικών Γεωμετρίας ως πλεονεκτικών εργαλείων μη στατικής οπτικοποίησης, που δύνανται να προαγάγουν τη σκέψη των μαθητών και προτείνει, και μέσω παραδειγμάτων, μια επαναδιατύπωση και επανερμηνεία των πέντε επιπέδων σκέψης των van Hiele, υπό το φως των Δυναμικών Περιβαλλόντων Γεωμετρίας.

Λέξεις – κλειδιά: Γεωμετρία, Δυναμικά Περιβάλλοντα, Συστήματα, van Hiele

Η ΓΕΩΜΕΤΡΙΑ ΩΣ ΣΧΟΛΙΚΟ ΜΑΘΗΜΑ

Είναι διαχρονική και μάλλον αυταπόδεικτη η αξία των χωρικών και γεωμετρικών ιδιοτήτων του φυσικού περιβάλλοντος, καθώς διαμέσου των πολιτισμών η Γεωμετρία αποτελούσε, τόσο θεσμικά όσο και μεθοδολογικά, πεδίο δόξας για την πρόοδο των Μαθηματικών αλλά και για τη διανοητική ανάπτυξη των ανθρώπων (Jablonski & Ludwig, 2023; Pantsar, 2022; Scriba & Schreiber, 2015; NCTM, 2000). Η Γεωμετρία βοηθά κατά την περιγραφή, ανάλυση και κατανόηση του φυσικού κόσμου και δικαιωματικά αποτελεί μια βασική συνιστώσα της ομορφιάς και της σπουδαιότητας των Μαθηματικών. Το Εθνικό Συμβούλιο των Δασκάλων των Μαθηματικών των ΗΠΑ (NCTM) αναγνωρίζει και υπογραμμίζει την εκπαιδευτική αξία και σημασία του μαθήματος της Γεωμετρίας σε όλη τη μαθητική διαδρομή, από το Νηπιαγωγείο μέχρι το Λύκειο. Συγκεκριμένα, με τη σπουδή του μαθήματος της Γεωμετρίας, οι μαθητές (Mageed, 2025; Schoenherr, Strohmaier & Schukajlow, 2024; Ghorbani et al., 2023; Rohendi & Wihardi, 2020; Rau & Matthews, 2017; NCTM, 2000):

- Εξετάζουν και αναλύουν χαρακτηριστικά και ιδιότητες δισδιάστατων και τρισδιάστατων γεωμετρικών σχημάτων και εντοπίζουν γεωμετρικές σχέσεις.
- Καθορίζουν και εντοπίζουν θέσεις στο επίπεδο και στον χώρο και περιγράφουν χωρικές σχέσεις μέσω καρτεσιανών συντεταγμένων, γραφημάτων αλλά και άλλων συστημάτων αναπαράστασης (π.χ. σε μια υδρόγειο σφαίρα).
- Εφαρμόζουν τους ευκλείδειους μετασχηματισμούς της μεταφοράς-μετατόπισης, της περιστροφής και ιδιαίτερα της συμμετρίας στην ανάλυση μαθηματικών καταστάσεων.
- Κατά την επίλυση προβλημάτων επιστρατεύουν την οπτικοποίηση, τη γεωμετρική μοντελοποίηση και τη χωρική συλλογιστική (χρησιμοποιώντας χάρτες, προγραμματίζοντας διαδρομές και δημιουργώντας έργα τέχνης).
- Αντιλαμβάνονται τα στερεά και τα επίπεδα αντικείμενα από διαφορετικές οπτικές γωνίες, και μέσω της κατασκευής και χειρισμού νοητικών αναπαραστάσεων, αναπτύσσουν τη χωρική τους οπτικοποίηση, μια σημαντική πτυχή της γεωμετρικής τους σκέψης.
- Μπορούν να κατανοήσουν τα εμβαδά και τα κλάσματα, αφού μέσω σχετικών, γεωμετρικών αναπαραστάσεων δημιουργούνται ευνοϊκότερες συνθήκες μάθησης.
- Χρησιμοποιούν ιστογράμματα και διαγράμματα κατά την ανάλυση δεδομένων

Έχει υποστηριχτεί από τον Hoffer (1981) ότι, πέραν της σπουδαιότητας της απόδειξης γεωμετρικών θεωρημάτων, θα πρέπει να αποτελεί σημαντικό στόχο και να χρήζει ιδιαίτερης εκπαιδευτικής προσοχής, στο μάθημα της Γεωμετρίας, και η ανάπτυξη πέντε βασικών, μαθητικών ικανοτήτων (Astuti, Sutopo & Nurhasanah, 2020; Misnasanti & Mahmudi, 2018; Patsiomitou, et al; Patsiomitou & Emvalotis, 2010a; b; Dindyal, 2007; Tzifas, 2005; Zaranis, 2000). Συγκεκριμένα:

- Οπτικές ικανότητες. Οι μαθητές βελτιώνουν αυτές τις ικανότητές τους μέσω της αναγνώρισης σχημάτων σε διαφορετικές μορφές αναπαράστασης (και από διαφορετικές προοπτικές και γωνίες), της παρατήρησης ιδιοτήτων και της απεικόνισης.
- Λεκτικές, ικανότητες. Οι μαθητές αποκτούν εκφραστικές δεξιότητες, μέσω δραστηριοτήτων, οι οποίες διευκολύνουν τη σωστή, ακριβή και τυπική χρήση της ορολογίας και της επικοινωνίας κατά την περιγραφή χωρικών εννοιών, σχέσεων και γεωμετρικών ιδιοτήτων ενός σχήματος.
- Ικανότητες Σχεδίασης. Οι μαθητές έχουν την ικανότητα να αποτυπώνουν σχεδιαστικά τις πληροφορίες και τις ιδέες τους, αλλά και να επικοινωνούν μέσω των σχεδίων τους. Τα γεωμετρικά σχήματα αναπαρίστανται σε δισδιάστατη και τρισδιάστατη μορφή. Επιπλέον μέσω της ανάπτυξης των σχεδιαστικών ικανοτήτων, οι μαθητές κατανοούν καλύτερα τις γεωμετρικές σχέσεις και είναι ικανοί να εντοπίζουν ισομετρίες στο επίπεδο, δηλαδή μετασχηματισμούς όπου διατηρούνται τα μήκη και οι αποστάσεις μεταξύ των σημείων (συμμετρίες, περιστροφές και μετατοπίσεις).
- Ικανότητες Λογικής. Οι μαθητές χρησιμοποιώντας ως κριτήρια τις ουσιαστικές ιδιότητες των σχημάτων, τις διαφορές και τις ομοιότητές τους, τα ταξινομούν, τα κατηγοριοποιούν ή τα ομαδοποιούν, μέσω της ενεργοποίησης βασικών αρχών της θεωρίας συνόλων. Επιπλέον, διακρίνουν μοτίβα, διατυπώνουν και δοκιμάζουν υποθέσεις χαρακτηρίζοντάς τες «αληθείς» ή «ψευδείς», εξάγουν συμπεράσματα και διατυπώνουν αντιπαραδείγματα. Τέλος, οι μαθητές οριοθετούν και κατανοούν τα πλαίσια και τις λογικές συντεταγμένες των αξιωμάτων, των θεωρημάτων και των αποδείξεων.
- Ικανότητες Εφαρμογής. Οι μαθητές εφαρμόζουν σε θέματα και καταστάσεις της καθημερινής ζωής τις γνώσεις που αποκτούν στο μάθημα της Γεωμετρίας. Μέσω αυτής της μεταφοράς της σχολικής γνώσης μπορούν να αντιληφθούν ότι η γνώση είναι χρήσιμη στην καθημερινή ζωή. Ακόμη, οι μαθητές με διευρυμένες «ικανότητες εφαρμογής» επιλύουν μαθηματικά μοντέλα ή αναπαριστούν με ευχέρεια, αφηρημένα σχήματα και καταστάσεις. Εντοπίζουν τη «γεωμετρικότητα» καθημερινών, φυσικών αντικειμένων και μπορούν να συμπεραίνουν τις ιδιότητές τους από μια πληροφορία.

Σήμερα, η εστίαση στη διατύπωση και στη μάθηση ορισμών και ιδιοτήτων σχημάτων αλλά και στη στείρα αποστήθισή τους είναι παρωχημένοι και μυωπικοί εκπαιδευτικοί στόχοι μιας παραδοσιακής διδασκαλίας της Γεωμετρίας, που αντιμάχονται σαφώς τη μάθηση και την κατανόηση. Εδώ και μια εξηκονταετία, μια άλλη θεωρία που υποστηρίζει τη γεωμετρική σκέψη και μάθηση, η θεωρία των van Hiele, έχει γίνει ένας παράγοντας βαθιάς επιρροής στη σχολική Γεωμετρία (Alex & Mammen, 2016; Vojkuvkova, 2012). Η ιεραρχική θεωρία των πέντε επιπέδων γεωμετρικής σκέψης των van Hiele, από τη στιγμή της διατύπωσής της, έχει τραβήξει τα επιστημονικά βλέμματα και το ενδιαφέρον για τη μελέτη των αρχών και των ιδεών της. Έχει αναγνωριστεί η κρίσιμη συμβολή της, κατά την περιγραφή, την ανάλυση, την προώθηση και την ανάπτυξη της γεωμετρικής σκέψης αλλά και ο κυρίαρχος ρόλος της στη διαμόρφωση των διδακτικών προσεγγίσεων στο μάθημα της Γεωμετρίας. Μάλιστα, η θεωρία των van Hiele συνεισφέρει καθοριστικά και στην ανάπτυξη και καλλιέργεια των πέντε βασικών, μαθητικών ικανοτήτων στη Γεωμετρία, όπως αναφέρθηκαν αμέσως παραπάνω. Πολλοί ερευνητές σημειώνουν ότι οι σκέψεις των μαθητών, στη Γεωμετρία των δυο διαστάσεων, επεξηγούνται καλύτερα και αναλυτικότερα με τη χρήση του μοντέλου των πέντε επιπέδων των van Hiele για τη γεωμετρική σκέψη, ειδικά σε μαθητές με διάφορες μαθησιακές ανάγκες (Salud et al., 2022; Moru et al., 2021; Abdullah & Zakaria, 2012). Οι μαθητές οικοδομούν προσωπικά νοήματα ως προς τις γεωμετρικές έννοιες και αναπτύσσουν τρόπους επιχειρηματολογίας και συμπερασμού, που τους επιτρέπουν να αναλύουν προσεκτικά προβλήματα του χώρου και να επινοούν λύσεις (Tursynkulova et al., 2023; Ismail & Kasmin, 2007).

Η ΘΕΩΡΙΑ ΤΩΝ VAN HIELE

Το μοντέλο γεωμετρικής σκέψης των Van Hiele αναπτύχθηκε, από το 1957 και εντεύθεν, στις διδακτορικές διατριβές του Pierre van Hiele και της συζύγου του Dina van Hiele-Geldof, οι οποίες εκπονηθήκαν ταυτόχρονα στο Πανεπιστήμιο της Ουτρέχτης στην Ολλανδία. Μετά τον πρόωρο χαμό της Dina, αμέσως μετά από την ολοκλήρωση της διατριβής της, ο Pierre, μόνος πια, αποσαφήνισε, τροποποίησε και εξέλιξε τη θεωρία (Akosah et al., 2024; Ma et al., 2015; Crowley, 1987). Το μοντέλο των Van Hiele άργησε να κερδίσει τη διεθνή, επιστημονική προσοχή, πλην μιας αποδοχής που έλαβε στην Σοβιετική Ένωση τη δεκαετία του 60, μέσω της αναθεώρησης του αναλυτικού προγράμματος της Γεωμετρίας. Τελικά το 1984, οι μεταφράσεις στα αγγλικά των εργασιών των Van Hiele ήταν παγκοσμίως, σχεδόν καθοριστικές για την υιοθέτηση του μοντέλου, ως κύριου ρυθμιστικού παράγοντα κατά τη σύνταξη των Αναλυτικών Προγραμμάτων των Μαθηματικών (Mensah, Barton Odro & Williams, 2023; Crowley, 1987).

Η θεωρία των Van Hiele αντλεί σπουδαιότητα από τη διττή εκπαιδευτική και επιστημονική συνεισφορά της, αφού αξιοποιείται συγχρόνως, ως μια θεωρία μάθησης και ως μια θεωρία διδασκαλίας (Van Hiele, 2011). Το μοντέλο απαρτίζεται από δύο κύριες πτυχές. Η πρώτη αποτελείται από μια ιεραρχική ακολουθία πέντε επιπέδων, συλλογιστικών διεργασιών και γεωμετρικής σκέψης. Το δεύτερο μέρος ενδιαφέρεται για την ανάπτυξη της διαίσθησης των μαθητών και επικεντρώνεται στις φάσεις εκμάθησης, στα μέσα, δηλαδή, τα οποία μετέρχεται ένας δάσκαλος, προκειμένου να αυξήσει την απόδοση των μαθητών του, μέσω αυτών των διάφορων επιπέδων σκέψης. Τα επίπεδα έχουν μια συγκεκριμένη και αυστηρή αλληλουχία και καθώς το παιδί προχωράει γραμμικά, από ένα προηγούμενο επίπεδο στο επόμενο, το αντικείμενο των γεωμετρικών του συλλογισμών αλλάζει (Armah & Kissi, 2019; Tan et al., 2015; Olkun & Sinoplu & Deryakulu, 2009; Van de Walle, 2005). Συγκεκριμένα, η θεωρία των van Hiele εστιάζει σε δύο κύριους εκπαιδευτικούς πυλώνες και μαθησιακούς μηχανισμούς:

- Στα 5 επίπεδα της γεωμετρικής σκέψης
- Στα στάδια της μάθησης

Επιπλέον, μιαν άλλη βασική συνιστώσα της θεωρίας των van Hiele αποτελεί η ενόραση/διορατικότητα (insight), με ιδέες δανεισμένες από τη θεωρία της Μορφολογικής Ψυχολογίας (Gestalt). Οι van Hiele, διατυπώνοντας διαφορετικά, κάποιες από τις αρχές της θεωρίας Gestalt, υποστηρίζουν ότι η ενόραση εντοπίζεται, ως μια ικανότητα, όταν ένα πρόσωπο ενεργεί σε μια νέα κατάσταση επαρκώς και με πρόθεση (Umar, Alhaji & Shehu, 2023; Idris, 2007). Οι μαθητές είναι σε θέση, προσεκτικά και συνειδητά, να επινοούν λύσεις, να χρησιμοποιήσουν τη γνώση τους κατά την επίλυση προβλημάτων, αλλά και να γνωρίζουν και να κατανοούν ό,τι κάνουν, γιατί το κάνουν και πότε πρέπει να το κάνουν (Lee & Kim, 2012).

ΤΑ ΠΕΝΤΕ ΕΠΙΠΕΔΑ ΓΕΩΜΕΤΡΙΚΗΣ ΣΚΕΨΗΣ ΤΩΝ ΟΛΛΑΝΔΩΝ VAN HIELE

Όσον αφορά στα πέντε επίπεδα γεωμετρικής σκέψης, οι μαθητές μαθαίνουν και εμπεδώνουν τη Γεωμετρία, προχωρώντας διαδοχικά μέσω πέντε επιπέδων γεωμετρικής σκέψης. Η διερεύνηση, η αιτιολόγηση και η χρήση μαθηματικών υποθέσεων, με διαφορετικό βαθμό, βέβαια, αυστηρότητας κάθε φορά, είναι κοινός τόπος σε όλα αυτά τα πέντε επίπεδα (Gawlick, 2005). Αμερικανοί ερευνητές αριθμούν τα επίπεδα από 1 έως 5, ενώ άλλοι ξεκινούν με αφετηρία το «επίπεδο 0», όπως και οι van Hiele (Vojkuvkova, 2012; Usiskin, 1982). Σε κάθε περίπτωση, ασφαλώς, τυπική είναι

και μόνο, αυτή η διαφοροποίηση αρίθμησης. Δεδομένου ότι αυτά τα συστήματα χρησιμοποιούνται χωρίς ανταγωνισμό, στην παρούσα κατηγοριοποίηση υιοθετείται ο δεύτερος τρόπος.

Τα πέντε επίπεδα γεωμετρικής σκέψεις των van Hiele είναι, κατά βάση, ιεραρχικά και ακολουθιακά και, φυσικά, δεν είναι ηλικιακά συναρτημένα (Mastrogiannis & Anastopoulos,, 2012), αφού η μετάβαση στο ανώτερο επίπεδο συνδέεται με την εμπειρία, ανεξαρτήτως ηλικίας. Μια τέτοια προσέγγιση έρχεται, ωστόσο, αντιμέτωπη με την πιαζετιανή θεωρία της ηλικιακής ωρίμασης της σκέψης, είναι όμως περισσότερο διδακτικοκεντρική και αισιόδοξη, δεδομένου ότι προσδίδει πρωτεύοντα και επιταχυντικό ρόλο στον δάσκαλο και τη διδασκαλία του (Usiskin, 1982). Η πρόοδος από ένα στάδιο στο επόμενο, δεν είναι μια φυσική διαδικασία, αφού εξαρτάται και επηρεάζεται από τις μεθόδους διδασκαλίας, τις δραστηριότητες μάθησης και από ένα καλά προετοιμασμένο και επιλεγμένο περιεχόμενο μαθήματος, παρά από τη χρονολογική ή και βιολογική ωριμότητα του μαθητή (Idris, 2005).

Τα πέντε επίπεδα γεωμετρικής σκέψης των Ολλανδών van Hiele (εικόνα 1), συνοδευόμενα από τα κυριότερα χαρακτηριστικά τους, είναι τα εξής (Okeke, Egara & Mosia, 2025; Arnal-Bailera & Manero, 2024; Naufal et al., 2021; Mastrogiannis & Anastopoulos, 2012; Patsiomitou & Emvalotis, 2010a; b; Abdullah & Mohamed, 2008; Ismail & Kasmin, 2007; Gawlick, 2005; Crowley, 1987; Usiskin, 1982):

Επίπεδο 0: Νοερή Απεικόνιση (Visualisation). Οι μαθητές έχουν επίγνωση του χώρου μόνο ως κάτι που υπάρχει γύρω τους. Αναγνωρίζουν οπτικά τα σχήματα, από την εμφάνιση, ως συνολικές οντότητες, σύμφωνα με τη Μορφολογική Ψυχολογία (Gestalt). Ακόμη, γνωρίζουν τα γεωμετρικά ονόματά τους, αλλά παραβλέπουν τις ιδιότητες και τα ιδιαίτερα χαρακτηριστικά τους, τα οποία δε γίνονται αντιληπτά. Συχνά, καταφεύγουν στη σύγκριση των σχημάτων με ένα γνωστό πρότυπο. Για παράδειγμα στα τετράγωνα και τα ορθογώνια εντοπίζεται γενικά, η διαφορετικότητά τους, αφού «φαίνονται» διαφορετικά, ωστόσο όμως, οι μαθητές σε αυτό το αρχικό στάδιο δεν μπορούν να διακρίνουν, αν τα σχήματα αυτά έχουν ορθές γωνίες ή ότι οι απέναντι πλευρές είναι παράλληλες. Οι μαθητές μπορούν, επίσης, να αναγνωρίζουν ένα εξάγωνο, αλλά αδυνατούν να διακρίνουν τις ίσες πλευρές του. Επιπλέον, σε ένα χαρτί, οι μαθητές θα μπορούσαν να αντιγράψουν δοσμένα σχήματα. Τέλος, ένα περιεστρεμμένο ορθογώνιο τρίγωνο, για παράδειγμα, που η βάση του δεν είναι παράλληλη στις γραμμές ή στο περίγραμμα τού τετραδίου, πιθανόν, να μην αναγνωρίζεται ως τέτοιο.

Επίπεδο 1: Ανάλυση (Analysis). Στο δεύτερο αυτό στάδιο, μια πρώιμη ανάλυση των γεωμετρικών εννοιών είναι ορατή, ενώ αναδεικνύεται και η σημαντικότητα της γλώσσας κατά την περιγραφή των σχημάτων. Οι μαθητές εξοικειώνονται σταδιακά με την ορολογία, μέσω παρατήρησης και πειραματισμού εντοπίζουν τις ιδιότητες κάποιων σχημάτων και μέσω αυτών προβαίνουν σε χαλαρές γενικεύσεις και ομαδοποιήσεις. Αδυνατούν, όμως, να εξηγήσουν τις ιδιότητες και τις σχέσεις μεταξύ τους, οι αλληλεπιδράσεις μεταξύ των σχημάτων δεν εντοπίζονται και οι ορισμοί δεν είναι, ακόμη, πλήρως κατανοητοί. Όταν περιγράφεται ένα αντικείμενο, μάλλον απαριθμούνται όλες οι ιδιότητες, που ήδη είναι γνωστές, δίχως όμως να μπορεί να διακρίνεται, ποιες ιδιότητες είναι απαραίτητες και ποιες αρκετές για να περιγραφεί το γεωμετρικό σχήμα. Για παράδειγμα, οι μαθητές μπορούν να αναγνωρίσουν και να παραθέσουν κάποιες ιδιότητες του τραπεζίου ότι έχει, δηλαδή, τέσσερις γωνίες και τέσσερις πλευρές, με τις δυο απέναντι πλευρές παράλληλες.

Επίπεδο 2: Μη Τυπική Παραγωγή (Informal Deduction). Οι μαθητές μπορούν να δημιουργήσουν ορισμούς και να προβάλουν λογικά επιχειρήματα σχετικά με τα χαρακτηριστικά ή τις σχέσεις μεταξύ των ιδιοτήτων των σχημάτων, μέσω μιας ενορατικής κατανόησης των ιδιοτήτων των σχημάτων αλλά και κάποιων συσχετισμών μεταξύ των ιδιοτήτων διαφορετικών σχημάτων. Οι μαθητές συσχετίζουν τους κανόνες που διέπουν τις ιδιοτήτων σχημάτων, δίδοντας ή ακολουθώντας άτυπα επιχειρήματα, για να δικαιολογήσουν τον τρόπο σκέψης τους. Διατάσσουν λογικά αυτές τις ιδιότητες αξιοποιώντας και την αντίληψη τους ως προς τις αλληλεξαρτήσεις μεταξύ των σχημάτων, δίχως ωστόσο να λειτουργούν στα πλαίσια ενός μαθηματικού συστήματος, δεδομένου ότι μια θεωρητική απόδειξη είναι αδύνατο να κατανοηθεί, όπως και η σημασία της παραγωγής ή ο ρόλος των αξιωμάτων. Οι μαθητές μπορούν να συμπεράνουν τις ιδιότητες ενός σχήματος και να προσδιορίσουν τις κατηγορίες σχημάτων. Λογικές συνέπειες και κατηγοριοποιήσεις αλλά και τάξεις εγκλεισμού, όπως το τετράγωνο είναι ένας τύπος ορθογωνίου είναι κατανοητές. «Ένα τετράπλευρο είναι τετράγωνο, επειδή έχει τις τέσσερις πλευρές του ίσες και τις τέσσερις γωνίες του μεταξύ τους ίσες» είναι μια δήλωση μαθητή που η σκέψη του κινείται, τουλάχιστο, στο τρίτο επίπεδο της Μη Τυπικής Παραγωγής.

Επίπεδο 3: Παραγωγή (Deduction). Οι μαθητές, στηριζόμενοι σε ορισμούς και αξιώματα, μέσω αφαιρετικών διαδικασιών, αποδεικνύουν θεωρήματα. Ακόμη, μπορούν να κατασκευάζουν με περισσότερους από έναν τρόπους ή να κατανοούν (και όχι μόνο να απομνημονεύουν) αποδείξεις, για όλα τα γεωμετρικά θέματα, αλλά και να γνωρίζουν την έννοια των ικανών και αναγκαίων συνθηκών. Επιπλέον, οι μαθητές σε αυτό το τέταρτο στη σειρά επίπεδο, είναι σε θέση να διακρίνουν τη διαφορά, ανάμεσα σε μια δήλωση και την αντίστροφή της.

Εικόνα 1
Εικονιστική αποτύπωση των πέντε επίπεδων γεωμετρικής σκέψης των van Hiele

Επίπεδο 4: Αυστηρότητα (Rigor). Είναι το υψηλότερο επίπεδο σκέψης στην ιεραρχία των van Hiele. Οι μαθητές, ως φοιτητές πια, με υψηλή μαθηματική σκέψη, με τη δέουσα και την επιβεβλημένη αυστηρότητα, κατανοούν τις τυπικές πτυχές των αφηρημένων παραγωγικών συλλογισμών, τη μέθοδο της ατόπου απαγωγής, και της αντιθετοαντιστροφής. Μελετούν διάφορα, μη ευκλείδεια αξιωματικά συστήματα, όπως τη Γεωμετρία του Riemman ή την Υπερβολική Γεωμετρία του Lobachevsky, και αναλύουν και συγκρίνουν αυτά τα συστήματα. Ερευνητικά, στο επίπεδο αυτό δεν δόθηκε ιδιαίτερη προσοχή, καθότι μόνο τα τέσσερα πρώτα ε-πίπεδα του μοντέλου των van Hiele υπηρετούν τη γεωμετρική ύλη, η οποία διδάσκεται και μελετάται στα σχολεία της Δευτεροβάθμιας Εκπαίδευσης. Τέλος, μια μεστή, γραφική απεικόνιση των πέντε επιπέδων παρουσιάζεται στην παραπάνω εικόνα 1.

ΟΙ ΠΕΝΤΕ ΦΑΣΕΙΣ ΜΑΘΗΣΗΣ

Μιαν άλλη, σημαντική παράμετρο στη θεωρία των van Hiele αποτελούν οι πέντε φάσεις μάθησης, οι οποίες προσδιορίζουν τη μετάβαση από ένα επίπεδο γεωμετρικής σκέψης στο επόμενο. Οι φάσεις αυτές της μαθησιακής διαδικασίας περιγράφονται λεπτομερώς στο τελευταίο άρθρο, που γράφτηκε από την Dina van Hiele-Geldof, και συνθέτουν ένα προκαταβολικό-προοργανωτικό περίγραμμα για την οργάνωση της διδασκαλίας. Όπως αναφέρθηκε παραπάνω, οι van Hiele υποστηρίζουν ότι η εξέλιξη της γεωμετρικής σκέψης, μέσω των επιπέδων, εξαρτάται κυρίως από την εκπαίδευση. Ισχυρίζονται ότι η διδασκαλία η οποία θα αναπτυχτεί, μέσω σχετικών δραστηριοτήτων, και θα εγκολπωθεί αυτήν τη διδακτική, ακολουθιακή γραμμικότητα θα παράσχει σημαντικά ερείσματα για την κατάκτηση των υπερκείμενων επιπέδων. Συγκεκριμένα, οι πέντε φάσεις μάθησης, οι οποίες βοηθούν τους μαθητές κατά την πρόοδό τους μέσω των επιπέδων είναι (Ndungo Balimuttajjo & Akugizibwe, 2025; Rezky & Wijaya, 2018; Mastrogiannis & Anastopoulos, 2012; Abdullah & Zakaria, 2011; Meng, 2009; Patsiomitou, 2008; Idris, 2007; Tzifas, 2005; Choi-Koh, 2000; Crowley, 1987; Usiskin, 1982):

Διερεύνηση (inquiry-information). Οι μαθητές με τη βοήθεια διαμεσολαβητικών υλικών (χειραπτικών και ψηφιακών) αρχίζουν, μέσω διερευνητικών και ανακαλυπτικών μεθόδων, να προσεγγίζουν βασικές γεωμετρικές δομές. Οι μαθητές εξοικειώνονται με τη δομή των σχημάτων, μέσω παρατήρησης και παραδειγμάτων. Κάποιες ενδεικτικές κατευθύνσεις θα περιλάμβαναν, οπωσδήποτε, ερωτήσεις όπως «τι είναι τετράγωνο», «τι ορθογώνιο», «ποιες οι ομοιότητες και ποιες οι διαφορές τους», ποιο από αυτά τα σχήματα είναι ρόμβος». Στη φάση αυτή, αποσαφηνίζεται η πρότερη και προϋπάρχουσα γνώση, ενώ και η επίσημη ορολογία και το σχετικό λεξιλόγιο της ειδικής, επιστημονικής γλώσσας διευκρινίζονται. Ακόμη, εγείρονται τα σχετικά ερωτήματα, αξιολογούνται οι απαντήσεις των μαθητών, καθορίζονται και γίνονται εμφανή, μέσω συζήτησης, τα αντικείμενα της μελέτης, αλλά και οι επόμενες παράμετροι της διδακτικής παρέμβασης.

Καθοδηγούμενος προσανατολισμός (guided-directed orientation). Οι μαθητές, συμμετέχοντας ενεργά και με ομαδικές πρακτικές, διπλώνουν, μετρούν, αντιπαραβάλλουν, χρησιμοποιούν γνώμονα και διαβήτη. Γενικά, διερευνούν χαρακτηριστικές γεωμετρικές δομές που αποτελούν αντικείμενο της μελέτης τους, ολοκληρώνοντας σταδιακά σύντομες, σχολαστικά προγραμματισμένες δραστηριότητες, οι οποίες απαιτούν συγκεκριμένες απαντήσεις (π.χ. εύρεση αξόνων συμμετρίας στο τετράγωνο ή η σχεδίαση ενός παραλληλογράμμου). Τα αντικείμενα μελέτης αποκαλύπτονται βαθμιαία, μέσω ενισχύσεων νοητικής σκαλωσιάς, που παρέχονται από τον δάσκαλο.

Επεξήγηση/διευκρίνιση (explanation/explication/explicitation). Εισάγεται η κατάλληλη γεωμετρική ορολογία, όπως και οι «τεχνικοί όροι» και ενθαρρύνονται οι μαθητές να τους χρησιμοποιούν σε γεωμετρικές δραστηριότητες, όπου εξετάζονται γεωμετρικές σχέσεις. Η νέα γνώση διαμορφώνεται μέσω εμπειρίας και πρότερης γνώσης. Οι μαθητές ανταλλάσσουν ιδέες για τις ανακαλύψεις τους και τις παρατηρήσεις τους, εκφράζουν τις απόψεις τους σχετικά με τις δομές που παρατηρήθηκαν, εξηγούν στους συμμαθητές τους τα αποτελέσματα της δουλειάς τους, διορθώνουν εσφαλμένα συμπεράσματα και αναγνωρίζουν σχέσεις. Για παράδειγμα, οι μαθητές καταθέτουν και ανταλλάσσουν ιδέες και απόψεις για τις ιδιότητες ενός ρόμβου.

Ελεύθερος προσανατολισμός (free orientation). Στη συνέχεια, οι μαθητές αναλαμβάνουν και συμμετέχουν σε συνθετότερες εργασίες, με πολλά επιμέρους βήματα αλλά και σε ανοιχτά προβλήματα, με περισσότερες από μία εναλλακτικές λύσεις. Με την ενεργοποίηση ερευνητικών προσανατολισμών, πολλές σχέσεις, που διέπουν και καθορίζουν τα αντικείμενα της μελέτης, γίνονται σαφείς και ξεκάθαρες. Οι μαθητές αρχίζουν να εργάζονται δημιουργικά και ανεξάρτητα, χρησιμοποιώντας τις πρόσφατα ανακαλυμμένες σχέσεις και αποκτούν εμπειρία στην εύρεση του δικού τους προσωπικού τρόπου και ρυθμού, κατά την επίλυση προβλημάτων. Η νέα γνώση εμπεδώνεται. Ο δάσκαλος παροτρύνει τους μαθητές να αναλύουν και να επεξεργάζονται τα προβλήματα καθώς και τις στρατηγικές λύσεις τους. Για παράδειγμα, μια δραστηριότητα ελεύθερου προσανατολισμού θα αποτελούσε και η προσπάθεια απόδειξης ότι το εμβαδόν ρόμβου ισούται με το ημιγινόμενο των διαγωνίων του.

Ολοκλήρωση (integration). Στην τελευταία φάση οι μαθητές επανεξετάζουν, συνοψίζουν και οργανώσουν τις νέες γνώσεις, οι οποίες είναι άμεσα διαθέσιμες για άμεση ανάκληση. Οι μαθητές αποκτούν μια γενική εικόνα για το πλέγμα των μελετώμενων αντικειμένων και των σχέσεων μεταξύ τους. Οι ιδιότητες ενός ρόμβου, για παράδειγμα, συνοψίζονται και απομνημονεύονται. Ο δάσκαλος καθοδηγεί τους μαθητές με τη χρήση τυποποιημένου, φορμαλιστικού λεξιλογίου, χωρίς ωστόσο να παρουσιάζει γνωστικά, καμιά νέα έννοια και ιδέα. Με την ολοκλήρωση αυτής της πέμπτης φάσης, οι μαθητές θα πρέπει να έχουν μεταβεί σε ένα νέο, επόμενο επίπεδο σκέψης. Τέλος, ετοιμάζονται τα περιγράμματα και ερευνώνται οι μαθησιακές και διδακτικές προοπτικές, για την ενεργοποίηση και εφαρμογή της πρώτης φάση της «διερεύνησης», αλλά και των υπόλοιπων τεσσάρων φάσεων, του επόμενου επιπέδου.

Η ΘΕΩΡΙΑ VAN HIELE ΣΤΗΝ ΕΚΠΑΙΔΕΥΣΗ: ΕΥΡΗΜΑΤΑ

Η θεωρία των van Hiele διαθέτει τρία σημαντικά ελκυστικά χαρακτηριστικά, τα οποία της προσδίδουν μαθησιακό, διδακτικό και επιστημονικό κύρος και εγκυρότητα (Usiskin, 1982): Κομψότητα, περιεκτικότητα και ευρεία εφαρμοσιμότητα. Η απλή δομή της την κομψύνει, οι σαφείς επεξηγήσεις και οι οδηγίες της ως προς την άρση μαθησιακών εμποδίων την κάνει περιεκτική, ενώ και η διείσδυσή της σε Αναλυτικά Προγράμματα σε πολλές και διαφορετικές χώρες (Ολλανδία, Σοβιετική Ένωση, ΗΠΑ) την πριμοδοτεί και της χαρίζει εύκολη και ευρεία εφαρμοσιμότητα. Κατά τη διάρκεια κάθε περιόδου μάθησης, που χαρακτηρίζει κάθε μετάβαση σε υψηλότερο επίπεδο, οι μαθητές ερευνούν και καθορίζουν κατάλληλους στόχους και συμμετέχουν σε αλληλεπιδραστικές δραστηριότητες, που αποτελούν γέφυρες και γνωστικά οχήματα ταυτόχρονα, για τη μετακίνηση στο παραπάνω επίπεδο γεωμετρικής σκέψης (Choi-Koh, 2000). Υιοθετώντας εποικοδομητικές και κοινωνικο-πολιτισμικές πρακτικές, οι van Hiele προτρέπουν οι μεταβάσεις και οι μαθησιακές αναβαθμίσεις σε παραπάνω επίπεδα να είναι διαδικασίες μάθησης, που πρέπει να υλοποιούνται από τους μαθητές τους ίδιους, υπό τη φθίνουσα καθοδήγηση των δασκάλων (van Hiele, 2011).

Με τη δημιουργία κατάλληλων ακολουθιακών δραστηριοτήτων, που αφορούν σε κάθε ιεραρχικό επίπεδο, ενθαρρύνονται διαδικασίες διερεύνησης που ξεκινούν από την οπτικοποίηση (νοερή απεικόνιση), κατόπιν, «αναλύονται» και, τέλος, μέσω εικασιών και συσχετισμών (3ο επίπεδο) μπορούν να καταλήξουν σε μαθηματικά αυστηρές αποδείξεις (4ο επίπεδο). Τα παιδιά της υποχρεωτικής εκπαίδευσης είναι ικανά και αναμένεται να κινηθούν μέχρι το τρίτο επίπεδο του μοντέλου van Hiele. Αυτονοήτως, το τέταρτο επίπεδο συνάδει και προσιδιάζει περισσότερο στα αναλυτικά προγράμματα του Λυκείου. Οι ίδιοι οι επινοητές της θεωρίας παραδέχονται ότι τα τρία πρώτα επίπεδα είναι τα πλέον σημαντικά για τα Μαθηματικά της Υποχρεωτικής Εκπαίδευσης (Choi-Koh, 2000), ονομάζοντάς τα, σε μια μεταγενέστερη, κατοπινή εργασία τους και ως οπτικό, περιγραφικό και θεωρητικό επίπεδο, με αυτό το τελευταίο να είναι εμφανώς εκτεταμένο, έτσι ώστε να περιλαμβάνει δυο επίπεδα της αρχικής διαβάθμισης.

Μάλιστα, ένας ιδανικός, χρονικός προγραμματισμός, για δωδεκάχρονους μαθητές, σύμφωνα με τους van Hiele (Tzifas, 2005), θα απαιτούσε 20 μαθήματα για τη μετάβαση από το επίπεδο 0 στο επίπεδο 1 και 50 μαθήματα για τη μετάβαση από το επίπεδο 1 στο επίπεδο 2, δηλαδή μισό διδακτικό έτος, αν και προϋποτίθεται ότι κάθε μάθημα δεν ταυτίζεται με τους συμβατικούς σχολικούς χρόνους και υπερτερεί της μιας διδακτικής ώρας. Βέβαια, κάθε μαθητής έχει το δικό του ρυθμό μάθησης και κατά συνέπεια οι μεταβάσεις στα επόμενα επίπεδα διαφέρουν, από μαθητή σε μαθητή, ως προς την ταχύτητα κατάκτησης. Φυσικά, ο χρόνος που διατίθεται και αφιερώνεται σε κάθε επίπεδο μπορεί να

συντομευτεί, μέσω μιας πεφωτισμένης διδασκαλίας ή αντιθέτως να πολλαπλασιαστεί, εξαιτίας λανθασμένων και πλημμελών, διδακτικών παρεμβάσεων (Lee & Kim, 2012). Σε κάθε περίπτωση βέβαια και σύμφωνα και με τον Bernstein, η πετυχημένη κατάκτηση της σχολικής γνώσης βασίζεται, σε μεγάλο βαθμό, στην αδύνατη (ασθενή) περιχάραξη βηματισμού, δηλαδή από την προώθηση διαφοροποιημένων και εξατομικευμένων μαθησιακών περιβαλλόντων, που δίνουν στους μαθητές τον χρόνο που χρειάζονται για να προσεγγίσουν, να επεξεργαστούν και τελικά να κατακτήσουν τη νέα γνώση (Mastrogiannis, 2014).

Πάντως, οι μαθητές ενός χαμηλότερου επίπεδου σκέψης δεν αναμένεται να κατανοήσουν δραστηριότητες και διαδικασίες που ταιριάζουν σε ένα υψηλότερο επίπεδο σκέψης. Σύμφωνα με τους van Hiele, αυτή η μαθησιακή επιβάρυνση είναι πηγή κακοδαιμονιών στην εκπαίδευση των Μαθηματικών και αποτελεί την πλέον ανασχετική αιτία στην επίτευξη των προσδοκώμενων αποτελεσμάτων. Για παράδειγμα, ένα αρνητικό παρελκόμενο της έλλειψης ισορροπίας μεταξύ διδασκαλίας και επιπέδου σκέψης, στο οποίο απευθύνεται αυτή, το οποίο εύκολα μπορεί να προκύψει ως σκόπελος κατανόησης, είναι η καταφυγή στην πνευματοκτόνο, στείρα αποστήθιση. Ως εκ τούτου, προβάλλει ως καθοριστική η παράμετρος της γνώσης των επιπέδων της γεωμετρικής σκέψης από τους εκπαιδευτικούς, ώστε να αναπτυχθούν δραστηριότητες και παρεμβάσεις, με βάση το μοντέλο των van Hiele (Choi-Koh, 2000). Πάντως, ευρήματα ερευνών δείχνουν ότι και δόκιμοι εκπαιδευτικοί έχουν ελλιπή γεωμετρική σκέψη στα τρία πρώτα επίπεδα (Bonyah & Larbi, 2021).

Τα τελευταία σαράντα χρόνια σωρεία σχετικών ερευνών, σε παγκόσμιο επίπεδο αλλά και στον ελλαδικό χώρο, έχουν επαληθεύσει την «ύπαρξη», τη διαδοχικότητα και τη συμβολή των επιπέδων γεωμετρικής σκέψης των van Hiele στη διδασκαλία και μάθηση της Γεωμετρίας. Μερικά από τα σημαντικότερα συμπεράσματα αυτών των ερευνών σκιαγραφούνται και περιγράφονται παρακάτω (Muti & Kusuma, 2025; Ruslau & Dadi, 2025; Naufal et al., 2021; Abdullah & Zakaria, 2013; Idris, 2007; Tzifas, 2005; Burger & Shaughnessy, 1986; Usiskin, 1982):

- Η θεωρία van Hiele προσφέρει και προκρίνει εποικοδομιστικές προσεγγίσεις στη μάθηση.
- Οι εκπαιδευτικοί για να παράσχουν πληρέστερη βοήθεια και να προαγάγουν αποτελεσματικότερη μαθησιακή επικοινωνία πρέπει να εντοπίσουν το επίπεδο στο οποίο καθένας μαθητής λειτουργεί.
- Είναι σχετικά εύκολη η αντιστοίχιση των μαθητών με κάποιο από τα πέντε επίπεδα.
- Όλα τα επίπεδα είναι ελέγξιμα πλην του τελευταίου.
- Πολλοί μαθητές δεν είναι εξοικειωμένοι με τη βασική ορολογία και τις απλούστερες γεωμετρικές ιδέες της Γεωμετρίας και αγνοούν έννοιες των βασικών γεωμετρικών σχημάτων και των ιδιοτήτων τους.
- Γενικά, η διδασκαλία πρέπει να επικεντρώνεται στα τρία πρώτα επίπεδα γεωμετρικής σκέψης της θεωρίας των Van Hiele
- Επιτραπέζια παιχνίδια βελτιώνουν τις γεωμετρικές δεξιότητες με βάση τα επίπεδα σκέψης του Van Hiele σε μαθητές Δημοτικού.
- Οι περισσότεροι μαθητές λειτουργούν στο πρώτο ή δεύτερο επίπεδο van Hiele.
- Τα χαμηλότερα επίπεδα (1ο και 2ο) απαιτούν γενικά περισσότερο χρόνο κατάκτησης, σε σχέση με τα υψηλότερα.
- Δεν υπάρχει κανένα προνομιούχο επίπεδο Van Hiele το οποίο να εξασφαλίζει μελλοντική επιτυχία, κατά τη μελέτη αποδείξεων, αν και το επίπεδο 1 φαίνεται να είναι το πλέον κρίσιμο.
- Το 75% των μαθητών Δευτέρας τάξης ελληνικού Λυκείου υπολείποντων του επιπέδου 3 και συνεπακόλουθα αδυνατούσαν να παρακολουθήσουν μαθήματα θεωρητικής Γεωμετρίας και να μελετήσουν αποδείξεις. Γενικά, οι μαθητές δύσκολα φτάνουν στο επίπεδο 3 της θεωρίας, ώστε να μπορούν να κατανοήσουν τη διδασκόμενη στο Λύκειο, Ευκλείδεια Γεωμετρία.
- Η διδασκαλία και η μάθηση που βασίζεται στη μεταγνώση και αναφέρεται στα επίπεδα γεωμετρικής σκέψης καθώς και στις φάσεις μάθησης του van Hiele βελτιώνουν τις γεωμετρικές δεξιότητες των μαθητών.
- Η εφαρμογή δραστηριοτήτων που βασίζονται στις φάσεις Van Hiele έχει θετικό αντίκτυπο στην ανάπτυξη υψηλότερων επιπέδων γεωμετρικής σκέψης.
- Τα Δυναμικά Περιβάλλοντα Γεωμετρίας σε συνδυασμό με τη θεωρία των Van Hiele ενδυναμώνουν τη μελέτη της Γεωμετρίας.
- Τα Δυναμικά Περιβάλλοντα Γεωμετρίας συμβάλλουν στην προώθηση των επιπέδων Van Hiele και στην ενίσχυση της κατανόησης των γεωμετρικών εννοιών από τους μαθητές.

ΕΠΙΠΕΔΑ ΓΕΩΜΕΤΡΙΚΗΣ ΣΚΕΨΗΣ ΚΑΙ ΔΥΝΑΜΙΚΑ ΠΕΡΙΒΑΛΛΟΝΤΑ

Μια βασική αρχή στη θεωρία των van Hiele, αν και υπονοούμενη (Crowley, 1987), αποτελεί η ενίσχυση των γεωμετρικών εμπειριών, που πρέπει να αποκομίζουν οι μαθητές, μέσα από πληθώρα και ποικιλία ενεργητικών, διερευνητικών και ανακαλυπτικών δράσεων, με τη συνδρομή εποπτικών υλικών και διδακτικών μέσων. Από τα πρώτα χρόνια του Δημοτικού Σχολείου η επιλογή και χρήση χειραπτικών και ψηφιακών εργαλείων προσφέρεται ως ένας

καταλυτικός και πλούσιος τρόπος αποτελεσματικής, διδακτικής παρέμβασης. Υλικά, όπως γεωπίνακες, τάγκραμ, καλαμάκια, κύβοι, lego, ενσφηνώματα, μακέτες, διάφορα πλακίδια για επιστρώσεις, πλέγματα, γεωμετρικά παζλ και φυσικά οι ψηφιακές τεχνολογίες βελτιώνουν τις φάσεις της μάθησης, λιπαίνουν και καλλιεργούν τη γνωστική ανάπτυξη και τη σκέψη των μαθητών, κατά την κατάκτηση των επιπέδων van Hiele (Crowley, 1987). Η προσθήκη ενός Δυναμικού Περιβάλλοντος Γεωμετρίας προσφέρει διττά εκπαιδευτικά ευεργετήματα, καθότι αφενός αιχμαλωτίζει την προσοχή και αυξάνει το ενδιαφέρον των μαθητών για τη Γεωμετρία και αφετέρου ενισχύει την κατανόησή της. Ακόμη, στις θετικές επενέργειες των Δυναμικών Λογισμικών μπορούν να συγκαταλεχθούν η αύξηση της απόδοσης των μαθητών στη Γεωμετρία, καθώς επίσης και του επίπεδου της εμπιστοσύνης τους στη μάθηση της Γεωμετρίας (Muti & Kusuma, 2025; Ruslau & Dadi, 2025; Naufal et al., 2021; Abdullah & Zakaria, 2013)

Οι εκπαιδευτικές πρακτικές που βασίζονται στα πρότυπα Van Hiele και η ταυτόχρονη χρήση Δυναμικών Λογισμικών διαδραματίζουν έναν ειδικό, γενναιόδωρο ρόλο ως προς τη βοήθεια που παρέχουν στους μαθητές για να προχωρήσουν μέσα σε ένα επίπεδο ή ακόμη και να αντιμετωπίσουν και τα μαθησιακά «εμπόδια» ενός υψηλότερου επιπέδου (Abdullah & Zakaria, 2012; 2011; Idris, 2007). Μάλιστα, η διδασκαλία μέσω των επιπέδων Hiele φαίνεται να παρέχει ένα πλήρες πλάνο διδασκαλίας και μάθησης, όταν χρησιμοποιείται ταυτόχρονα ένα δυναμικό εργαλείο-λογισμικό (Muti & Kusuma, 2025; Ruslau & Dadi, 2025; Naufal et al., 2021; Abdullah & Zakaria,, 2012; Choi-Koh, 2000), αφού ο διαμεσολαβητικός ρόλος των εργαλείων στην εισαγωγή των γεωμετρικών εννοιών προκρίνεται ως λίαν καθοριστικός (Patsiomitou & Emvalotis, 2010a; b). Η αξιοποίηση των Δυναμικών Περιβαλλόντων Γεωμετρίας, μέσω κατάλληλων δραστηριοτήτων, οι οποίες συνάδουν με τη σκέψη των μαθητών και την αγκαλιάζουν, αποκλείει δυσαρμονίες και μαθησιακές παραφωνίες κατά τη μελέτη των επιπέδων van Hiele, προσφέροντας και στέρεες γεφυρώσεις και συνδετικούς κρίκους κατά την αλυσιδωτή μετάβαση, από το ένα επίπεδο στο επόμενο (Meng, 2009).

Έρευνες έχουν δείξει ότι τα Λογισμικά Δυναμικής Γεωμετρίας ενισχύουν τους μαθητές στη μελέτη των γεωμετρικών εννοιών στοπαρωθητικό πλαίσιο ενεργοποίησης και αξιοποίησης της θεωρίας των van Hiele (Hartono et al., 2025; Ntshangase, Ndlovu & Oladele; Elbehary, 2023; Skarkos, 2013; Patsiomitou & Emvalotis, 2010a; b). Οι δραστηριότητες που βασίζονται στα επίπεδα σκέψης των van Hiele καθίστανται ευκολότερες και αποτελεσματικότερες με την παρουσία διάφορων τεχνολογικών ερεισμάτων και ειδικά μέσω Δυναμικών Περιβαλλόντων Γεωμετρίας. Σύμφωνα με το πρότυπο van Hiele, κάθε επίπεδο μάθησης στηρίζεται στο προηγούμενο και επεκτείνει τη σκέψη προετοιμάζοντάς την για το παραπάνω επίπεδο. Αυτό είναι σημαντικό για τους δασκάλους κατά την επιλογή και την αλληλουχία των ψηφιακών εκπαιδευτικών δραστηριοτήτων. Η συνειδητοποίηση και η γνώση του προτύπου των Van Hiele μπορούν να αποτελέσουν ένα σημαντικό πλεονέκτημα και ένα εργαλείο στην τάξη (Idris, 2007).

Έχουν αναπτυχθεί, από το 2000 και εντεύθεν, σε παγκόσμιο επίπεδο, πλούσιες, ελκυστικές και διασκεδαστικές δραστηριότητες, που βασίζονται στα πρότυπα των Van Hiele και στις προτεινόμενες φάσεις μάθησης, οι οποίες υλοποιήθηκαν στα γόνιμα περιβάλλοντα των Δυναμικών Λογισμικών Γεωμετρίας και της τεχνολογίας και του διαδικτύου γενικότερα (Restrepo-Ochoa, Gualdrón-Pinto, & Ávila-Ascanio, 2023; Özçakır, B., Özdemir, D., & Kıymaz, Y. (2020; Choi-Koh, 2000; Gawlick, 2005; Olkun & Sinoplu & Deryakulu, 2005; Patsiomitou, 2008; Idris, 2007; Meng, 2009; Patsiomitou & Emvalotis, 2010; Abdullah & Zakaria,, 2012; 2011; Lee & Kim, 2012). Γενικά, δείχτηκε ότι οι φάσεις μάθησης των van Hiele αποτελούν γόνιμο, μαθησιακά έδαφος για οργάνωση δραστηριοτήτων, οι οποίες ευδοκιμούν καλύτερα και παράγουν καλύτερα μαθησιακά αποτελέσματα στα πλούσια περιβάλλοντα της Δυναμικής Γεωμετρίας. Επιπλέον, διαπιστώθηκε ότι η διδασκαλία με βάση τις φάσεις των van Hiele και η χρήση Δυναμικών Λογισμικών μπορεί να αυξήσει το επίπεδο γεωμετρικής σκέψης των μαθητών. Η ενεργοποίηση των Δυναμικών Λογισμικών ως μέσων διδασκαλίας προσδίδει μια πλουραλιστικότητα στους τρόπους, που παρουσιάζεται μια γεωμετρική έννοια ή και ιδέα. Η ιδέα αυτή, αν και μπορεί να βρίσκεται σε επίπεδο ψυχικής ανάπτυξης, που να υπερβαίνει το επίπεδο της ικανότητάς των μαθητών, εξαιτίας αυτής της ποικιλίας των διδακτικών προσεγγίσεων, μπορεί να μετουσιωθεί ευχερέστερα σε γνώση. Οι μαθητές σε κλίμα ενθουσιασμού απολαμβάνουν το μάθημα και μαθαίνουν περισσότερα. Μάλιστα, σε πλαίσια εξέλιξης της αποκλίνουσας σκέψης τους, προσεγγίζουν το ίδιο πρόβλημα από διαφορετικές οπτικές και δίνουν διάφορες εξηγήσεις για το ίδιο μαθηματικό γεγονός. Τα Δυναμικά Λογισμικά Γεωμετρίας αναγνωρίζονται ευρέως ως πλεονεκτικά εργαλεία μη στατικής οπτικοποίησης, που δύνανται να προαγάγουν τη σκέψη των μαθητών. Προτείνεται δε (Gawlick, 2005), λόγω της πλεονεκτικής συνεπικουρίας των Δυναμικών Λογισμικών, και μια επανερμηνεία των επιπέδων van Hiele, όπως εμφανίζεται στην εικόνα 2.

Κοντολογίς, οι μαθητές ενεργοποιούν διάφορες κρίσιμες και δημιουργικές δεξιότητες σκέψης, που τις χρησιμοποιούν κατά την επίλυση προβλημάτων, μέσω της χρήσης Δυναμικών Περιβαλλόντων. Αυτή η πραγματικότητα παροτρύνει επιτυχώς τους μαθητές να επιτύχουν υψηλότερο επίπεδο γεωμετρικής κατανόησης και ειδικότερα μέχρι το τρίτο σειρά, στη θεωρία των van Hiele (Abdullah & Mohamed, 2008). Ο ρόλος του εκπαιδευτικού στην εκτέλεση των δραστηριοτήτων είναι σημαντικός αλλά και ο σχεδιασμός του ψηφιακού περιβάλλοντος και οι εργασίες που έχουν σχεδιαστεί για να υλοποιηθούν με τους μαθητές είναι εξίσου θεμελιώδεις (Baccaglini-Frank et al., 2025).

Εικόνα 2
Μια επανερμηνεία των επιπέδων, εντός Δυναμικών Λογισμικών Γεωμετρίας

Κλασική κατηγοριοποίηση των Επιπέδων van Hiele		Επαναδιατύπωση στη σκιά των Δυναμικών Περιβαλλόντων
0. Αναγνωρίστε αντικείμενα ως γεωμετρικές μορφές		0. Αναγνωρίστε σχήματα μέσα σε αντικείμενα
1. Αναγνωρίστε σχήματα από τις γεωμετρικές τους ιδιότητες		1. Αναγνωρίστε τις ιδιότητες των σχημάτων
2. Επιχειρηματολογήστε στηριζόμενοι σε σχέσεις μεταξύ των ιδιοτήτων		2. Κατασκευάστε σχήματα από τις ιδιότητες
3. Συστηματοποιήστε επιχειρήματα, ώστε να διαμορφωθούν παραγωγικές αποδείξεις		3. Συνθέστε οικογένειες των σχημάτων
4. Αναλύστε παραγωγικά συστήματα		4. Αναλύστε τις οικογένειες των σχημάτων

Επίσης, υποστηρίζεται ότι οι μαθητές με τη βοήθεια δυναμικών χειρισμών κινούνται από το πρώτο προς το δεύτερο van Hiele επίπεδο (Patsiomitou, 2008). Ειδικότερα, το μεγαλύτερο μέρος του εκπαιδευτικού υλικού που προτείνεται για την τάξη φαίνεται να προσιδιάζει περισσότερο με τα 3 πρώτα επίπεδα, δεδομένου ότι τα Δυναμικά Περιβάλλοντα Γεωμετρίας καλύπτουν και υποστηρίζουν, τουλάχιστον τα τρία πρώτα επίπεδα γεωμετρικής σκέψης των van Hiele (Özçakır, Özdemir & Kıymaz, 2020; Stumbles, 2018; Mastrogiannis & Anastopoulos, 2012; Gawlick, 2005). Μάλιστα, οι δυναμικοί χειρισμοί βοηθούν ιδιαίτερα στη μετάβαση από το πρώτο στο δεύτερο επίπεδο van Hiele, αφού οι μαθητές αναλύοντας και μελετώντας τα άπειρα, «ομοειδή» σχήματα που προκύπτουν, μπορεί να ανακαλύψουν τις χαρακτηριστικές ιδιότητές τους και έτσι να τα διακρίνουν και να τα ονοματίσουν.

Η λειτουργία του συρσίματος αποτελεί βασική συνιστώσα και για τη μετάβαση από το επίπεδο 1 στο επίπεδο 2. Οι μακροεντολές και οι γεωμετρικοί τόποι είναι ισχυρά εργαλεία για το βήμα από το επίπεδο 2 στο επίπεδο 3. Τέλος, οι οικογένειες των γεωμετρικών τόπων μπορούν να χρησιμοποιηθούν για τη μετάβαση από το επίπεδο 3 στο τελευταίο επίπεδο 4, της «αυστηρότητας» των van Hiele (Gawlick, 2005). Ομολογουμένως, η ένταξη των ψηφιακών τεχνολογιών στην εκπαιδευτική διαδικασία παρέχει την επιζητούμενη προστιθέμενη αξία, μέσω της παροχής επαγωγικών εργαλείων στους μαθητές, τα οποία είναι ικανά να αυξήσουν το επίπεδο Van Hiele πριν από το στάδιο των παραγωγικών αποδείξεων (Tzifas, 2005).

Για παράδειγμα, τα Δυναμικά Περιβάλλοντα Γεωμετρίας παρέχουν την ευκαιρία εύκολης δημιουργίας όλων των επίπεδων γεωμετρικών σχημάτων, υποστηρίζοντας το πρώτο επίπεδο van Hiele αλλά και το δεύτερο, που ακολουθεί. Βασικό χαρακτηριστικό των Δυναμικών Λογισμικών είναι η δυναμική τροποποίηση, η μετακίνηση και ο μετασχηματισμός των σχημάτων, με διατήρηση, όμως, των βασικών σχέσεων και ιδιοτήτων τους. Είναι σαν τα σχήματα να αντιδρούν στους χειρισμούς του χρήστη, ακολουθώντας τους νόμους της Γεωμετρίας, ακριβώς όπως τα υλικά αντικείμενα αντιδρούν, σύμφωνα με τους νόμους της Φυσικής. Η λειτουργία του συρσίματος παρέχει, άμεσα, τη δυνατότητα δυναμικών μετασχηματισμών και διαμόρφωσης δυναμικών όψεων των γεωμετρικών κατασκευών και σχημάτων, με αποτέλεσμα μόνο οπτικές διαφοροποιήσεις, αφού οι βασικές τους γεωμετρικές ιδιότητες παραμένουν σταθερές. Μέσω της απειρίας των σχημάτων, οι μαθητές μπορούν να διατυπώνουν υποθέσεις, όσον αφορά στις κοινές ιδιότητες των σχημάτων, και να οδηγούνται, επαγωγικά, σε γενικεύσεις (3ο επίπεδο). Προκειμένου να δοθεί μια γεωμετρική απόδειξη, που μπορεί να κατανοηθεί από έναν μαθητή, είναι σημαντικό να ενισχυθεί αυτός, από ένα καλό σχήμα. Υπάρχουν πολλά καλά παραδείγματα λειψών και εσφαλμένων γεωμετρικών αποδείξεων, που βασίστηκαν σε λανθασμένα σχήματα. Μερικές φορές, μία απόδειξη πρέπει να εξετάσει όλες τις πιθανές περιπτώσεις και επομένως απαιτούνται πολλά σχήματα για ένα απλό θεώρημα. Αυτή τη δυνατότητα, ασφαλώς, την παρέχουν άμεσα τα Δυναμικά Λογισμικά,, εισάγοντας και μυώντας, τους μαθητές σε αποδεικτικούς μμηχανισμούς.

Το τέταρτο επίπεδο συνάδει και προσιδιάζει περισσότερο στα Αναλυτικά Προγράμματα του Λυκείου, ενώ τα 3 πρώτα σε μαθητές της υποχρεωτικής Εκπαίδευσης. Τα Δυναμικά Περιβάλλοντα Γεωμετρίας καλύπτουν και υποστηρίζουν αυτά τα τρία πρώτα επίπεδα γεωμετρικής σκέψης των van Hiele. Με τη δημιουργία κατάλληλων ακολουθιακών δραστηριοτήτων, που αφορούν σε κάθε ιεραρχικό επίπεδο, ενθαρρύνονται διαδικασίες διερεύνησης που ξεκινούν από την οπτικοποίηση (νοερή απεικόνιση), κατόπιν, «αναλύονται» και, τέλος, μέσω εικασιών και συσχετισμών (3ο επίπεδο) μπορούν να καταλήξουν σε μαθηματικά αυστηρές αποδείξεις (4ο επίπεδο).

Συγκεκριμένα, μελέτες, που αξιοποίησαν, κατά την ανάλυση των δεδομένων τους, τη θεωρία των van Hiele, εστίασαν σε τρεις κυρίως εκπαιδευτικές ωφέλειες, που κομίζει στις σχολικές αίθουσες η χρήση των Δυναμικών περιβαλλόντων και ειδικότερα το Sketchpad (στο Patsiomitou & Emvalotis, 2010a;b):

- Ασφαλέστερες συμπεριφορές κατά τη δοκιμή των εικασιών και των κατασκευών
- Σε τεστ τα οποία εξέταζαν έννοιες ευκλείδειων μετασχηματισμών (μετατόπιση, συμμετρία, περιστροφή) τα αποτελέσματα ήταν σημαντικά υψηλότερα.
- Σημαντικά υψηλότερα αποτελέσματα στα μετά-tests

Τέλος, σε κάθε περίπτωση τα πλεονεκτήματα της θεωρίας van Hiele, σε μια στοίχιση με τη δυναμικότητα των Λογισμικών της Γεωμετρίας, προσφέρουν πλούσια και ενθουσιαστικά περιβάλλοντα, τα οποία, παρά την αποσπασματικότητα και την υποβάθμιση της Γεωμετρίας ως σχολικού μαθήματος, μπορούν να στηρίξουν πολύπλευρα και αποτελεσματικά τη διδασκαλία και τη μάθηση της Γεωμετρίας

ΣΥΖΗΤΗΣΗ, ΣΥΜΠΕΡΑΣΜΑΤΑ, ΠΡΟΤΑΣΕΙΣ

Η μελέτη και η μάθηση της Γεωμετρίας προσφέρει πληθώρα νοητικών και γνωστικών απολαβών. Μάλιστα, ένας γνώστης του γεωμετρικού πλούτου αποκτά θεωρήσεις για την ίδια τη φύση, αφού μπορεί να κατανοήσει πληρέστερα και αποτελεσματικότερα τις μορφές και τα μοτίβα της, τόσο σε μικροσκοπικό όσο και σε μακροσκοπικό επίπεδο. Η Γεωμετρία, ευκλείδεια ή μη, μπορεί να αποκωδικοποιήσει το σύμπαν, καθώς αυτό, κατά βάση, έχει γεωμετρικό υπόβαθρο και παρά τα φράκταλ (μορφοκλάσματα ή μορφοκλασματικά σύνολα) και το χάος, οι γεωμετρικές κανονικότητες οι αναλογίες, συμμετρίες, η τάξη, η ομορφιά της τέχνης, η αρμονία και οι αναλλοίωτες στη φύση είναι επιβλητικές και συναρπαστικές. Το σχολικό μάθημα της Γεωμετρίας, πέρα από τη μαθησιακή μέθεξη και τον ενθουσιασμό, που μπορεί να δημιουργήσει, δίνει την ευκαιρία στους μαθητές να αναπτύξουν και να βελτιώσουν δεξιότητες, όπως τη λεπτή κινητικότητα, τη δημιουργικότητα, τη συνεργασία και την επικοινωνία (σε ένα σχολείο που προάγει τις κοινωνικοπολιτισμικές και εποικοδομιστικές προσεγγίσεις), την κριτική σκέψη, την προσοχή στη λεπτομέρεια και την ακρίβεια, τη σχολαστικότητα, τη μεθοδικότητα και την αυτοεκτίμηση.

Ο Κέπλερ πίστευε ότι η Γεωμετρία βρίθει θησαυρών και πολύτιμων κοσμημάτων, όπως το Πυθαγόρειο Θεώρημα και η Χρυσή Τομή (ο γνωστός αριθμός φ, ο γεννήτορας της ομορφιάς και της καλαισθησίας στη φύση). Παραταύτα, είναι γεγονός αναμφισβήτητο ότι η αποσπασματικότητα, η περιθωριοποίηση και η υποβάθμιση του μαθήματος της Γεωμετρίας στην ελληνική εκπαίδευση δρέπει τους λειψούς και ασθενικούς, γνωστικούς καρπούς της. Επιπλέον, οι μαθητές μάλλον αντιμετωπίζουν σοβαρά προβλήματα στις αυστηρές μαθηματικές αποδείξεις, αν ληφθεί υπόψη ότι κατά την εισαγωγή τους στο Γυμνάσιο κομίζουν ως γνωστική «προίκα», τα δυο πρώτα, το πολύ, επίπεδα γεωμετρικής σκέψης του μοντέλου των van Hiele.

Με την ταυτόχρονη και αλληλοσυμπληρωματική επιστράτευση-συμπαράταξη των επιπέδων γεωμετρικής σκέψης των van Hiele, των Δυναμικών Περιβαλλόντων Γεωμετρίας και μιας συνεχούς, συστηματικής και καλά οργανωμένης επιμόρφωσης είναι πολύ πιθανό να αμβλυνθούν πολλά διδακτικά προσκόμματα και να αυξηθούν τα περιθώρια συμφιλίωσης των μαθητών με τη Γεωμετρία, ώστε να προκύψουν πολλά από τα οφέλη αυτού του σαγηνευτικού και μαγευτικού μαθήματος. Βέβαια, η κρισιμότερη συνιστώσα αυτού του συμπαγούς τρίπτυχου δεν είναι άλλη, παρά ένας κραταιός, μισθολογικά και επιστημονικά, εκπαιδευτικός, ο οποίος σύμφωνα και με τον Pierre van Hiele, πρέπει να βλέπει τους μαθητές του, ως αντιπάλους με κύρος, ικανούς να αναπτύξουν νέα επιχειρήματα, όπως, επίσης, και να μην ξεχνά ότι για τα παιδιά η Γεωμετρία ξεκινά με το παιχνίδι.

ΠΕΡΙΛΗΨΗ

Αυτή η μελέτη ερευνά την αποτελεσματικότητα της Εκπαίδευσης Βασισμένης σε Προβλήματα (Problem Based Learning - PBL) και της Εκπαίδευσης Δημιουργών (Maker Education) στην ενίσχυση των δεξιοτήτων επίλυσης προβλημάτων μαθητών δευτεροβάθμιας εκπαίδευσης μέσω της ανάπτυξης ενός Ανιχνευτή Αερίων με ενσωματωμένη Τεχνητή Νοημοσύνη (ΤΝ). Με την ενσωμάτωση της ΤΝ στην βιωματική εκπαίδευση STEM, αυτή η έρευνα παρέχει πρακτικές γνώσεις για καινοτόμες εκπαιδευτικές προσεγγίσεις που ενθαρρύνουν την κριτική σκέψη και την τεχνική επάρκεια.

Χρησιμοποιήθηκε μια μικτή μέθοδος έρευνας, που περιλάμβανε 32 μαθητές δευτεροβάθμιας επαγγελματικής εκπαίδευσης του τομέα Ηλεκτρολογίας, Ηλεκτρονικής και Αυτοματισμού. Οι συμμετέχοντες κατηγοριοποιήθηκαν σε τρεις ομάδες: Δημιουργικής Μάθησης (πρακτικά έργα), Εικονικής Μάθησης (προσομοιώσεις) και Κλασικής Μάθησης (παραδοσιακή διδασκαλία). Η μελέτη αξιολόγησε τις στάσεις των μαθητών, πριν και μετά την διδακτική παρέμβαση, συγκεντρώνοντας ποσοτικές και ποιοτικές πληροφορίες ως προς την επίλυση προβλημάτων με χρήση ερωτηματολογίου και ημι-δομημένων συνεντεύξεων. Παρόλο που το μικρό μέγεθος δείγματος περιορίζει τη γενίκευση, τα αποτελέσματα παρέχουν σημαντικές γνώσεις για την αποτελεσματικότητα της μάθησης μέσω κατασκευών με ενσωματωμένη ΤΝ.

Τα ευρήματα δείχνουν ότι ενώ όλες οι ομάδες παρουσίασαν βελτιώσεις στις ικανότητες επίλυσης προβλημάτων, η ομάδα Δημιουργικής Μάθησης παρουσίασε την σημαντικότερη πρόοδο. Οι μαθητές παρουσίασαν υψηλό επίπεδο ενδιαφέροντος και εμπλοκής ενώ τόνισαν ότι έκριναν ως εξαιρετική την εφαρμογή των μαθησιακών τους εμπειριών στον πραγματικό κόσμο. Επιπλέον, η μελέτη εντόπισε προκλήσεις όπως οι περιορισμοί πόρων, η εκπαίδευση των εκπαιδευτικών και η ανάγκη για δομημένη ενσωμάτωση της ΤΝ σε εκπαιδευτικά περιβάλλοντα. Μια εκτενέστερη ανάλυση των δεδομένων σχεδιάζεται να ενισχύσει τα ευρήματα.

Για να ενισχυθεί η πρακτική εφαρμογή, αυτή η παρουσίαση περιλαμβάνει συγκεκριμένα παραδείγματα ενσωμάτωσης της τεχνητής νοημοσύνης στην τάξη, θα συζητήσει τις καλύτερες πρακτικές για την εφαρμογή της και θα αναδείξει πιθανές προκλήσεις σε φάση εφαρμογής ευρείας κλίμακας κατασκευών με ενσωματωμένη ΤΝ. Η συζήτηση θα παρέχει στους εκπαιδευτικούς και τους ερευνητές πρακτικές γνώσεις για την ανάπτυξη βιωματικών δραστηριοτήτων μάθησης μέσω κατασκευών με ενσωματωμένη ΤΝ σε προγράμματα σπουδών STEM, με έμφαση στην καλλιέργεια τόσο τεχνικών όσο και ήπιων δεξιοτήτων στη δευτεροβάθμια εκπαίδευση.

Λέξεις-κλειδιά: Εκπαίδευση Δημιουργών (Maker Education), Εκπαίδευση Βασισμένη σε Προβλήματα (Problem Based Learning - PBL), STEM, Τεχνητή Νοημοσύνη (ΤΝ), Ανιχνευτής Αερίων με ενσωματωμένη ΤΝ.

ΕΙΣΑΓΩΓΗ

ΙΣΤΟΡΙΚΟ

Τα τελευταία χρόνια, η Εκπαίδευση Βασισμένη σε Προβλήματα (PBL) έχει αναδειχθεί ως αποτελεσματική διδακτική στρατηγική για την ενίσχυση των δεξιοτήτων επίλυσης προβλημάτων των μαθητών, ειδικά στην εκπαίδευση STEM (Miliou et al., 2022; Habbal et al., 2024). Η Εκπαίδευση Βασισμένη σε Προβλήματα (PBL) μεταβαίνει από την παραδοσιακή δασκαλοκεντρική παιδαγωγική σε έρευνα καθοδηγούμενη από τους μαθητές, ενθαρρύνοντας τους περισσότερους μαθητές να αλληλεπιδρούν με πραγματικά ζητήματα μέσω της συμμετοχής, της συνεργασίας και της κριτικής σκέψης (Barrows, 1986; Hmelo-Silver, 2004; Savery, 2006). Ταυτόχρονα, η Εκπαίδευση Δημιουργών (Maker Education) προάγει τη βιωματική μάθηση, τη δημιουργικότητα και την εφεύρεση, επιτρέποντας στους μαθητές να σκέφτονται πρακτικές λύσεις μέσω εργαλείων μηχανικής και τεχνολογίας (Halverson & Sheridan, 2014; Martinez & Stager, 2019).

Από την άλλη πλευρά, η αυξανόμενη σημασία της Τεχνητής Νοημοσύνης (ΤΝ) και αισθητήρων νανοτεχνολογίας στις σύγχρονες εταιρείες απαιτεί την ενσωμάτωσή τους στη δευτεροβάθμια εκπαίδευση, εξοπλίζοντας τους μαθητές με κρίσιμες δεξιότητες για το εργατικό δυναμικό του 21ου αιώνα (Luckin, 2018). Η κατασκευή ενός Ανιχνευτή Αερίων με ενσωματωμένη ΤΝ, που χρησιμοποιεί ανίχνευση μέσω αισθητήρων και αλγορίθμους μηχανικής μάθησης για την αναγνώριση συγκεντρώσεων αερίων, προσφέρει μια ευκαιρία για την ενσωμάτωση της μηχανικής, της ΤΝ και της περιβαλλοντικής επιστήμης σε ένα εκπαιδευτικό πλαίσιο. Εμπλέκοντας τους μαθητές στο σχεδιασμό, την κατασκευή και τη δοκιμή τεχνολογιών, αυτή η εκπαιδευτική παρέμβαση ευθυγραμμίζεται με πραγματικές, εμπειρικές, ευκαιρίες μάθησης που αντικατοπτρίζουν τις προκλήσεις της μηχανικής στον πραγματικό κόσμο (Zawacki-Richter et al., 2019).

ΣΤΟΧΟΙ ΜΕΛΕΤΗΣ

Η ενίσχυση των ικανοτήτων επίλυσης προβλημάτων στους μαθητές της δευτεροβάθμιας εκπαίδευσης είναι απαραίτητη ώστε να αντιμετωπίσουν σύνθετες διεπιστημονικές προκλήσεις τόσο στις σπουδές τους όσο και στις καριέρες τους. Η συμβατική διδασκαλία στην τάξη συχνά αποτυγχάνει να παρέχει την διαδραστική και πρακτική εμπλοκή που είναι απαραίτητη για την βέλτιστη ανάπτυξη αυτών των ικανοτήτων. Η ενσωμάτωση της μάθησης μέσω προβλημάτων σε ένα πλαίσιο Εκπαίδευσης Δημιουργών επιτρέπει στους μαθητές να παράγουν ενεργά γνώση, να δοκιμάζουν υποθέσεις και να αναπτύσσουν λύσεις συνεργατικά.

Οι κύριοι στόχοι αυτής της έρευνας είναι:
Να προσδιοριστεί η επίδραση της PBL, στη βελτίωση των δεξιοτήτων επίλυσης προβλημάτων μεταξύ των μαθητών δευτεροβάθμιας εκπαίδευσης.
Να προσδιοριστούν τα ευεργετικά αποτελέσματα της Εκπαίδευσης Δημιουργών που περιλαμβάνει ΤΝ στη δευτεροβάθμια εκπαίδευση.
Να αναλύσουμε τις αντιλήψεις των μαθητών σχετικά με αυτή την εμπειρία μάθησης PBL, μέσω της Εκπαίδευσης Δημιουργών που περιλαμβάνει ΤΝ.

Οι ερευνητικές ερωτήσεις που καθοδηγούν αυτή τη μελέτη είναι οι εξής:
ΕΡ1: Ποια είναι η επίδραση στις ικανότητες επίλυσης προβλημάτων μαθητών δευτεροβάθμιας εκπαίδευσης μέσω της Εκπαίδευσης Δημιουργών και της ανάπτυξης ενός Ανιχνευτή Αερίων με ενσωματωμένη ΤΝ σε περιβάλλον Εκπαίδευσης Βασισμένο σε Προβλήματα (PBL);
ΕΡ2: Ποιες είναι οι αντιλήψεις των μαθητών δευτεροβάθμιας εκπαίδευσης σχετικά με την εμπειρία μάθησής τους σε περιβάλλον Εκπαίδευσης Βασισμένο σε Προβλήματα (PBL);

Μια μελέτη μεικτών μεθόδων θα διεξαχθεί για τη συλλογή ποσοτικών και ποιοτικών δεδομένων σχετικά με τις ικανότητες επίλυσης προβλημάτων των μαθητών δευτεροβάθμιας εκπαίδευσης και τις εντυπώσεις τους από την παρέμβαση PBL, προκειμένου να απαντηθούν τα ερευνητικά ερωτήματα.

ΑΝΑΣΚΟΠΗΣΗ ΤΗΣ ΒΙΒΛΙΟΓΡΑΦΙΑΣ

ΕΙΣΑΓΩΓΗ

Η αυξανόμενη πολυπλοκότητα των πραγματικών προβλημάτων μηχανικής και τεχνολογίας έχει οδηγήσει σε μια εξέλιξη των εκπαιδευτικών πλαισίων, προάγοντας την ανάπτυξη προηγμένων γνωστικών και δεξιοτήτων επίλυσης

προβλημάτων στους μαθητές (Miller, 2017). Ορισμένα σχολεία δεν καταφέρνουν να εξοπλίσουν επαρκώς τους μαθητές για την αγορά εργασίας, συχνά λόγω της ασυμφωνίας των προγραμμάτων σπουδών με τις ανάγκες της αγοράς, της έλλειψης επιχειρηματικής εμπειρίας μεταξύ των εκπαιδευτικών και της υπερβολικής έμφασης στη θεωρητική γνώση (Davidson & Major, 2014; Holgaard & Kolmos, 2017). Το χάσμα μεταξύ της ακαδημαϊκής εκπαίδευσης και των αναγκών της αγοράς εργασίας υπογραμμίζει την αναγκαιότητα για νέες μεθόδους διδασκαλίας, όπως η Εκπαίδευση Βασισμένη σε Προβλήματα (PBL), για να βοηθήσουν στη σύνδεση της εκπαίδευσης με την πραγματική ζωή (Chen et al., 2021).

ΕΚΠΑΙΔΕΥΣΗ ΒΑΣΙΣΜΕΝΗ ΣΕ ΠΡΟΒΛΗΜΑΤΑ (PROBLEM BASED LEARNING - PBL)

Η PBL, έχει καθιερωθεί ως μια πολύ αποτελεσματική εκπαιδευτική μέθοδος για την ανάπτυξη δεξιοτήτων επίλυσης προβλημάτων στην εκπαίδευση μηχανικών. Δίνει στους μαθητές την ευκαιρία να ασχοληθούν με σύνθετα προβλήματα του πραγματικού κόσμου σε διεπιστημονικά περιβάλλοντα, προάγοντας την αυτοκατευθυνόμενη μάθηση και την πρακτική εφαρμογή της γνώσης. Η PBL ευθυγραμμίζεται αποτελεσματικά με τις σύγχρονες απαιτήσεις (Industry 4.0), όπου οι μηχανικοί πρέπει να αντιμετωπίζουν πολυδιάστατα προβλήματα μέσω ενός συνδυασμού τεχνικής επάρκειας και ήπιων δεξιοτήτων (soft skills), συμπεριλαμβανομένης της συνεργασίας και της επικοινωνίας. Η έρευνα δείχνει ότι η PBL προάγει την ανάπτυξη των απαραίτητων επαγγελματικών δεξιοτήτων στους φοιτητές μηχανικής (Warnock & Mohammadi-Aragh, 2016). Μέσω της PBL, οι μαθητές αποκτούν τόσο τεχνική εξειδίκευση όσο και την ικανότητα να αξιολογούν και να επιλύουν κακώς δομημένα προβλήματα, ένα ταλέντο που εκτιμάται ιδιαίτερα στον επιχειρηματικό κόσμο (Hadgraft & Kolmos, 2020). Η έρευνα αποκαλύπτει ότι οι μαθητές που συμμετέχουν στην εκπαίδευση με βάση τα έργα PBL επιδεικνύουν υψηλότερα επίπεδα εμπλοκής, κίνητρου και αυτοαποτελεσματικότητας σε σύγκριση με εκείνους που παρακολουθούν κλασική διδασκαλία μέσω διαλέξεων (Marra et al., 2014; Savin-Baden, 2014).

Συνολικά, η PBL γίνεται ολοένα και πιο δημοφιλής στην εκπαίδευση λόγω της:
Ενίσχυσης της Διαθεματικής Μάθησης: Το PBL συνδυάζει την εκπαίδευση STEM σε ενιαίες δραστηριότητες, αφαιρώντας τα συμβατικά όρια μεταξύ των επιστημών (Bybee, 2010; Vasquez et al., 2013).
Ενσωμάτωσης Πραγματικών Σεναρίων: Ενσωματώνοντας τη μάθηση σε αυθεντικές, πραγματικές καταστάσεις, η PBL ενισχύει την εμπλοκή των μαθητών και τις επαγγελματικές δεξιότητες επίλυσης προβλημάτων (Habbal et al., 2024).
Προώθησης Συνεργασίας και Αυτοκατευθυνόμενης Μάθησης: Η PBL καλλιεργεί την ομαδική εργασία και την αυτοκατευθυνόμενη μάθηση, θεμελιώδεις δεξιότητες για επαγγελματική επιτυχία στους τομείς που σχετίζονται με την επιστήμη και την τεχνολογία (Smith et al., 2022).

ΕΚΠΑΙΔΕΥΣΗ ΔΗΜΙΟΥΡΓΩΝ ΚΑΙ ΤΕΧΝΗΤΗ ΝΟΗΜΟΣΥΝΗ

Η Εκπαίδευση Δημιουργών που ενσωματώνει ΤΝ (μηχανική μάθηση), προσφέρει μια νέα προσέγγιση που ενισχύει τους μαθητές με πολύτιμες τεχνικές δεξιότητες, δημιουργικότητας και επίλυσης προβλημάτων. Αυτή προσέγγιση έχει την δυναμική να συνδέσει τη θεωρητική γνώση με τις εφαρμογές στον πραγματικό κόσμο, διασφαλίζοντας ότι οι μαθητές διαθέτουν τις απαραίτητες δεξιότητες για τις σύνθετες ανάγκες των σύγχρονων επιχειρήσεων (Luckin, 2018; OECD, 2021).

Η κλασική εκπαίδευση που βασίζεται σε διαλέξεις συχνά αποτυγχάνει να επιτύχει την εμπλοκή των μαθητών και την ανάπτυξη πρακτικών δεξιοτήτων λόγω της εξάρτησής της από θεωρητικό περιεχόμενο και τυποποιημένες αξιολογήσεις. Η Εκπαίδευση Δημιουργών αφαιρεί αυτά τα προβλήματα παρέχοντας ενδιαφέρουσες, πρακτικές εκπαιδευτικές δραστηριότητες στις οποίες οι μαθητές συμμετέχουν στο σχεδιασμό, τον προγραμματισμό και τη δοκιμή λύσεων (Martinez & Stager, 2019). Η ενσωμάτωση πειραμάτων βασισμένων σε Arduino προσφέρει μια πρακτική και διαδραστική μέθοδο μάθησης που ευθυγραμμίζεται με τις αρχές της Εκπαίδευσης Δημιουργών. Επιπλέον, ο συνδυασμός πρακτικών πειραμάτων με εικονικά εργαστήρια δημιουργεί μια ολοκληρωμένη εκπαιδευτική εμπειρία, προσαρμόζοντας διάφορα στυλ μάθησης και η οποία θα μπορούσε να ενισχύσει τις ικανότητες επίλυσης προβλημάτων. (Papadimitropoulos & Pavlatou, 2021). Μελέτες δείχνουν ότι η εμπειρική, προσανατολισμένη σε κατασκευές μάθηση βελτιώνει την κινητοποίηση, την ομαδική εργασία και τις ικανότητες επίλυσης προβλημάτων των μαθητών, καθιστώντας την Εκπαίδευση Δημιουργών ένα βασικό στοιχείο στα σύγχρονα μαθήματα (Halverson & Sheridan, 2014).

Επιπλέον, η Εκπαίδευση Δημιουργών που περιλαμβάνει ΤΝ, καλλιεργεί τον υπολογιστικό τρόπο σκέψης και την εγγραμματοσύνη στην ΤΝ, δεξιότητες που εκτιμώνται ολοένα και περισσότερο σε διάφορους τομείς. Οι εφαρμογές της ΤΝ, συμπεριλαμβανομένης της μηχανικής μάθησης, της ρομποτικής και της ευφυούς αυτοματοποίησης, απαιτούν διεπιστημονική εξειδίκευση, και η ενσωμάτωσή τους στην δευτεροβάθμια εκπαίδευση διασφαλίζει ότι οι μαθητές θα αποκτήσουν μια σταθερή βάση στην ηθική της ΤΝ, την επιστήμη των δεδομένων και την αλγοριθμική επίλυση προβλημάτων (Zawacki-Richter et al., 2019). Καθώς οι τεχνολογίες ΤΝ εξαπλώνονται σε διάφορους τομείς, οι μαθητές πρέπει να διαθέτουν τις δεξιότητες που απαιτούνται για την εφαρμογή λύσεων ΤΝ σε σύνθετα προβλήματα (Patel et al.,

2022). Ένα κύριο όφελος της Εκπαίδευσης Δημιουργών που περιλαμβάνει ΤΝ είναι η δυνατότητά της για εξατομικευμένες μαθησιακές εμπειρίες. Αυτή η προσαρμογή βελτιώνει τα εκπαιδευτικά αποτελέσματα παρέχοντας στους μαθητές συγκεκριμένη υποστήριξη και αυξάνοντας την εμπλοκή τους με περιεχόμενο που αντικατοπτρίζει τα ενδιαφέροντα και τις δεξιότητές τους (Ng et al., 2023). Μια ισχυρή αντίληψη της αυτοαποτελεσματικότητας συσχετίζεται με το ισχυρό ενδιαφέρον των μαθητών για τη μελέτη των επιστημών, της τεχνολογίας, της μηχανικής και των μαθηματικών (STEM), υποδηλώνοντας ότι η αυτοπεποίθηση στις ικανότητές τους λειτουργεί ως κύρια κινητήρια δύναμη (Mitsopoulou & Pavlatou, 2024). Επιπλέον, με την δημιουργία κατασκευών με ενσωματωμένη ΤΝ, όπως έξυπνοι αισθητήρες και εργαλεία ανάλυσης δεδομένων, οι μαθητές αποκτούν πρακτική εμπειρία σε προηγμένες τεχνολογίες, προάγοντας τη δημιουργικότητα και την επιχειρηματική νοοτροπία (Lee & Tan, 2024).

ΣΥΜΠΕΡΑΣΜΑ

Η ενσωμάτωση της PBL στη εκπαίδευση σηματοδοτεί μια βιώσιμη στρατηγική που αντιμετωπίζει τις προκλήσεις του πραγματικού κόσμου στην μηχανική και την τεχνολογία, μειώνοντας αποτελεσματικά το χάσμα μεταξύ ακαδημαϊκής γνώσης και επιχειρηματικών αναγκών. Παρά τις δυσκολίες στην εφαρμογή, το πλεονέκτημα ανάπτυξης δεξιοτήτων επίλυσης προβλημάτων και της συμμετοχής των μαθητών στην δημιουργία της κατασκευής-λύσης το καθιστούν μια αξιόλογη εκπαιδευτική προσέγγιση. Η ενίσχυση της εξειδίκευσης των εκπαιδευτικών της δευτεροβάθμιας εκπαίδευσης σε αυτή την παιδαγωγική μέθοδο και η παροχή επαρκούς υποστήριξης για την εκπαίδευσή τους είναι βασικά στοιχεία για την αποτελεσματική εφαρμογή της PBL στα μαθήματα τεχνικών ειδικοτήτων της δευτεροβάθμιας εκπαίδευσης.

Συμπερασματικά, η ενσωμάτωση της Εκπαίδευσης Δημιουργών που περιλαμβάνει ΤΝ γίνεται απαραίτητη για την προετοιμασία των μαθητών για μια ταχέως μεταβαλλόμενη αγορά εργασίας και την ανάπτυξη των απαραίτητων δεξιοτήτων του 21ου αιώνα. Ενσωματώνοντας την ΤΝ στην Εκπαίδευση Δημιουργών, τα σχολεία μπορούν να παρέχουν στους μαθητές τις γνώσεις και τις δεξιότητες που είναι απαραίτητες για να πετύχουν σε μια κοινωνία που προσανατολίζεται όλο και περισσότερο στην ΤΝ.

ΜΕΘΟΔΟΛΟΓΙΑ

ΣΥΜΜΕΤΕΧΟΝΤΕΣ

Οι συμμετέχοντες σε αυτή τη μελέτη επιλέχθηκαν μέσω ανοιχτής πρόσκλησης και ήταν τριάντα δύο (32) μαθητές δευτεροβάθμιας εκπαίδευσης ηλικίας 15 έως 16 ετών, αποτελούμενοι από 94% αγόρια και 6% κορίτσια. Κάθε ένας από αυτούς ήταν μαθητής που ειδικευόταν στην Ηλεκτρολογία, Ηλεκτρονική και Αυτοματισμούς στην Β’ και Γ’ τάξη στο 1ο Επαγγελματικό Λύκειο Σχηματαρίου, Ελλάδα.

ΜΕΘΟΔΟΛΟΓΙΑ ΕΡΕΥΝΑΣ

Η έρευνα χρησιμοποίησε ένα σχεδιασμό μεικτών μεθόδων. Ποσοτικά και ποιοτικά δεδομένα συλλέχθηκαν συγκεκριμένα για τριγωνοποίηση και ανάλυση. Αυτή η μεθοδολογία παρέχει μια καλύτερη κατανόηση των ερευνητικών ερωτημάτων (Creswell & Plano, 2018). Τα ποσοτικά δεδομένα αποκτήθηκαν μέσω ενός ερωτηματολογίου αυτοαξιολόγησης, του Problem-Solving Inventory, που περιλάμβανε κλειστού τύπου ερωτήσεις σχετικά με τα χαρακτηριστικά της επίλυσης προβλημάτων, ενώ τα ποιοτικά δεδομένα συλλέχθηκαν μέσω ημι-δομημένων συνεντεύξεων που σχεδιάστηκαν για να εξερευνήσουν τις αντιλήψεις των συμμετεχόντων για το μάθημα PBL. Η έρευνα έλαβε έγκριση από την επιτροπή δεοντολογίας του πανεπιστημίου καθώς και τη συγκατάθεση των συμμετεχόντων και του σχολείου τους. Το ερωτηματολόγιο Q1 δόθηκε πριν από το αρχικό μέρος της εκπαιδευτικής παρέμβασης, ακολουθούμενο από το ερωτηματολόγιο Q2. Στη συνέχεια, κατά τη δεύτερη φάση, οι ομάδες των μαθητών χωρίστηκαν σε τρεις ομάδες. Η ομάδα Maker Learning (ML) ασχολείται με πρακτικές δημιουργικές δραστηριότητες με την τεχνολογία Arduino. Η ομάδα Εικονικής Μάθησης (VL) ασχολείται με προσομοιωτικές εργασίες με Arduino. Η ομάδα Κλασικής Μάθησης (C) παρέχει εκπαιδευτικό περιεχόμενο μέσω διαλέξεων βασισμένων σε παρουσιάσεις/στατικές απεικονίσεις μαθησιακού υλικού στον Διαδραστικό Πίνακα.

ΜΕΘΟΔΟΛΟΓΙΚΟ ΠΛΑΙΣΙΟ

MAKERSPACE - ΠΕΡΙΒΑΛΛΟΝ ΜΕΙΚΤΗΣ ΜΑΘΗΣΗΣ

Τα μαθήματα διδάσκονταν σε ένα «makerspace» - περιβάλλον μεικτής μάθησης σε εργαστήριο του σχολείου. Ένα «makerspace» είναι ένα περιβάλλον που προάγει την εμπλοκή των μαθητών στη δημιουργία και την αλληλεπίδραση

με υλικά, εξοπλισμό και εργαλεία, συμπεριλαμβανομένων αισθητήρων, ηλεκτρονικών, πολυμέτρων, πλακετών κυκλωμάτων, σταθμών συγκόλλησης και διάφορων ηλεκτρονικών συσκευών όπως τροφοδοτικά, γεννήτριες σημάτων και παλμογράφους. Πλατφόρμες προσομοίωσης όπως το Tinkercad και το Edge Impulse παρέχονταν στους μαθητές για να βοηθήσουν στη μελέτη και κατανόηση των εννοιών της μηχανικής μάθησης. Παραδείγματα εκτελούμενων εργασιών περιλαμβάνουν τη ρύθμιση μοντέλων μηχανικής μάθησης και το σχεδιασμό λειτουργιών βασισμένων σε μπλοκ για την αυτοματοποίηση συσκευών και αισθητήρων. Το προαναφερθέν περιβάλλον προάγει την ατομική πειραματική εργασία, τη συνεργατική μάθηση και την ομαδική εργασία (Saorin et al., 2017).

ΟΔΗΓΙΕΣ PBL

Το μάθημα βασίζεται στην PBL και αναπτύσσεται σύμφωνα με τις οδηγίες που παρατίθενται παρακάτω, κατευθυνόμενο προς τη δημιουργία του κατάλληλου PBL μαθησιακού περιβάλλοντος που καλύπτει τις ανάγκες των μαθητών. Η μαθησιακή εμπειρία καθοδηγείται από τους συμμετέχοντες μαθητές, οι οποίοι χρησιμοποιούν τους υλικοτεχνικούς πόρους που διαθέτουν και τις εμπειρίες τους κατά τη διάρκεια της εκπαιδευτικής διαδικασίας PBL (Chen et al., 2021). Ο σχεδιασμός του μαθήματος ακολούθησε τις ακόλουθες δώδεκα κατευθυντήριες οδηγίες προς εκπαιδευτικούς σχετικά με την εφαρμογή της PBL διαδικασίας.

1. Αφήστε την ιδιοκτησία του θέματος στους μαθητές, ως απαραίτητη PBL διαδικασία μάθησης.
2. Δείξτε ευελιξία στη συζήτηση των μαθησιακών αποτελεσμάτων.
3. Παροτρείνετε για ανώτερη απόδοση.
4. Επιτρέψτε στους μαθητές να επιτύχουν τα μαθησιακά αποτελέσματα μέσω εναλλακτικών διαδρομών.
5. Δώστε έμφαση στη μάθηση μέσω της αναστοχαστικής διαδικασίας.
6. Επιτρέψτε στους μαθητές να εκφράσουν τα σημεία κατανόησης και παρεξήγησης.
7. Υιοθετήστε τον ρόλο του διευκολυντή αντί αυτού του εκπαιδευτικού.
8. Μετατοπίστε την προσέγγιση διευκόλυνσης από το "Ακολούθησέ με" στο "Πειραματίσου".
9. Ανάδειξε τη μάθηση μέσω της αλληλεπίδρασης με άλλους.
10. Δημιουργήστε μαθησιακό περιβάλλον κατάλληλο για PBL.
11. Καθορίστε τον τρόπο αξιολόγησης.
12. .Λάβετε μέτρα για να ενισχύσετε τις δεξιότητες των μαθητών.

ΜΑΘΗΜΑ PBL «ΑΝΙΧΝΕΥΤΗΣ ΑΕΡΙΩΝ ΜΕ ΕΝΣΩΜΑΤΩΜΕΝΗ ΤΝ»

Οι μαθητές επέλεξαν την επίλυση του προβλήματος κατασκευής ενός «Ανιχνευτή Αερίων με ενσωματωμένη ΤΝ». Διδάχθηκαν τις βασικές γνώσεις κατά τη διάρκεια των πρώτων τεσσάρων μαθημάτων και ακολούθησαν πρακτικές δραστηριότητες από το πέμπτο μέχρι το δέκατο μάθημα, πως να συνθέτουν προγράμματα με βάση μπλοκ, να χρησιμοποιούν αισθητήρες και να δημιουργούν συσκευές για να αντιμετωπίσουν το πρόβλημα. Κάθε μάθημα διαρκούσε 40 λεπτά, και όλα τα μαθήματα ολοκληρώθηκαν μέσα σε διάστημα τριών μηνών. Οι μαθητές ολοκλήρωσαν τη δημιουργία και τον σχεδιασμό του «Ανιχνευτή Αερίων με ενσωματωμένη ΤΝ» στα δύο τελευταία μαθήματα. Μετά, τους δόθηκαν οδηγίες για να επιδείξουν και να αξιολογήσουν την λύση που δημιούργησαν.

Το ερωτηματολόγιο Q1 χορηγήθηκε σε όλους τους μαθητές για να καθοριστεί η ισοδυναμία όλων των ομάδων. Το πρώτο μέρος της Εκπαιδευτικής Παρέμβασης (ΕΠ1) εκτελέστηκε σε όλες τις ομάδες μαθητών. Στα πρώτα τέσσερα μαθήματα, οι εκπαιδευτικοί διατήρησαν τις δραστηριότητες σε βασικά επίπεδα (γνώση, κατανόηση, εφαρμογή), με στόχο να βοηθήσουν τους μαθητές να κατανοήσουν τις έννοιες του Arduino και της ΤΝ, συμπεριλαμβανομένης της μηχανικής μάθησης, και της ενσωμάτωσης λογισμικών και συστημάτων (π.χ., προγραμματισμός με μπλοκ, ηλεκτρονικές πλακέτες κυκλωμάτων), καθώς οι μελέτες έχουν δείξει την αποτελεσματικότητα αυτών των δραστηριοτήτων (Chiu et al., 2021; Johnson et al., 2020; Wang & Chen, 2022; Ng et al., 2023). Κατά τη διάρκεια αυτής της περιόδου, οι μαθητές δημιούργησαν ομάδες μάθησης που συμμετείχαν σε διάφορες δραστηριότητες προωθώντας τη μαθητοκεντρική μάθηση εντός του εκπαιδευτικού πλαισίου, χρησιμοποιώντας κατάλληλες παιδαγωγικές μεθόδους και διδακτικά εργαλεία για τη βελτίωση των αποτελεσμάτων της ψηφιακής εκπαίδευσης των μαθητών στην ΤΝ. Οι εκπαιδευτικοί παρείχαν σαφείς οδηγίες ενώ ταυτόχρονα επέτρεπαν στους μαθητές την ελευθερία να αναστοχάζονται τις εμπειρίες των μαθημάτων που απέκτησαν από τις δικές τους προσωπικές παρατηρήσεις, δημιουργώντας μια αίσθηση προσωπικής ιδιοκτησίας στους μαθητές σχετικά με τα αποτελέσματα της εκπαίδευσης.

Μετά την παραπάνω πρώτη φάση της εκπαιδευτικής παρέμβασης, το ερωτηματολόγιο Q2 διανεμήθηκε σε όλους τους μαθητές προκειμένου να ελεγχθεί αν όλες οι ομάδες ήταν ακόμη «ισοδύναμες». Στα επόμενα οκτώ μαθήματα, οι ομάδες των μαθητών χωρίστηκαν σε τρεις ομάδες και προετοιμάστηκαν να αντιμετωπίσουν το πρόβλημα του πραγματικού κόσμου που επέλεξαν. Η ομάδα Maker Learning (ML) μέσω πρακτικών και δημιουργικών δραστηριοτήτων με Arduino. Η ομάδα Εικονικής Μάθησης (VL) μέσω δραστηριοτήτων προσομοίωσης με Arduino. Η ομάδα Κλασικής

Μάθησης (C) μέσω διαλέξεων βασισμένων σε παρουσιάσεις/στατικές οπτικοποιήσεις μαθησιακού υλικού στον Διαδραστικό Πίνακα.

Οι μαθητές οργανώθηκαν σε ομάδες των τεσσάρων για να συνεργαστούν στον σχεδιασμό και την κατασκευή «Ανιχνευτή Αερίων με ενσωματωμένη ΤΝ». Οι μαθητές ενθαρρύνθηκαν να ξεκινήσουν την ανάπτυξη, αναλογιζόμενοι την κατανόησή τους για το πώς οι αισθητήρες μεταδίδουν σήματα στους υπολογιστές και αναρωτώμενοι πώς αυτά τα δεδομένα μπορούν να χρησιμοποιηθούν για την επίλυση προβλημάτων του πραγματικού κόσμου. Χρησιμοποίησαν την πλατφόρμα εκπαίδευσης μοντέλων μηχανικής μάθησης, γνωστή ως Edge Impulse, για να αποκτήσουν μια εικόνα της έκτασης των συνόλων δεδομένων που θα μπορούσαν να εκπαιδευτούν για αποτελεσματική επεξεργασία σημάτων. Οι μαθητές εισήχθησαν σε αρχές της ψηφιακής επεξεργασίας σήματος. Οι εκπαιδευτικοί παρουσίασαν διάφορες επιλογές για τη δειγματοληψία και επεξεργασία των σημάτων των αερίων για να βελτιώσουν την κατανόηση των μαθητών σχετικά με τη δύναμη της ΤΝ στη διαχείριση της ταξινόμησης των σημάτων. Οι μαθητές καθοδηγήθηκαν να χρησιμοποιήσουν τεχνικές μηχανικής μάθησης για να εντοπίσουν χαρακτηριστικά από σύνολα δεδομένων που οι συμβατικές μέθοδοι δεν μπορούσαν να διακρίνουν ως σήματα "βλαβερών αερίων". Σε αυτό το πλαίσιο, μετά την ανάλυση των χαρακτηριστικών των σημάτων "βλαβερών αερίων", η μηχανή ήταν σε θέση να εντοπίσει τις ειδοποιήσεις και να τις ταξινομήσει. Κάθε μάθημα επικεντρωνόταν στην εκπαίδευση των μαθητών σύμφωνα με τις αρχές και τις διαδικασίες του PBL, χρησιμοποιώντας συγκεκριμένες διδακτικές τεχνικές, με στόχο να βελτιώσουν την αυτοπεποίθηση των μαθητών. Ο κύριος στόχος ήταν να βελτιωθεί η κατανόηση των μαθητών για διαδικασίες PBL και την εφαρμογή τους για την δημιουργία ενός «Ανιχνευτή Αερίων με ενσωματωμένη ΤΝ».

Στο τελευταίο μάθημα, οι μαθητές παρουσίασαν τη εργασία τους ενώ εκτιμούσαν αυτή των άλλων μαθητών. Δείχνοντας τη δουλειά τους, αντιμετωπίζουν ερωτήσεις όπως "Τι είναι η ΤΝ;" και "Πώς λειτουργούν οι ανιχνευτές αερίων που χρησιμοποιούν ΤΝ;". Κατά τη διάρκεια των μαθημάτων, οι ηθικές έννοιες της ΤΝ, συμπεριλαμβανομένης της αξιοπιστίας, ασφάλειας, ιδιωτικότητας, ευθύνης, συμπερίληψης, ανοιχτότητας, συνειδητοποίησης, λογοδοσίας και άλλοι νομικοί κανόνες, εξηγήθηκαν. Επίσης, συζήτησαν τυχόν ηθικά ζητήματα που αντιμετωπίστηκαν σχετικά με την χρήση της ΤΝ.

Κατά τη διάρκεια αυτής της σειράς 12 μαθημάτων, οι μαθητές απέκτησαν βασικές γνώσεις και δεξιότητες στην ΤΝ, ενώ δημιουργούσαν, σχεδίαζαν και παρουσίαζαν τα επιτεύγματά τους. Η εφαρμογή των γνώσεων τους στον σχεδιασμό και την κατασκευή «Ανιχνευτή Αερίων με ενσωματωμένη ΤΝ» απεικονίζει μια αναβάθμιση των δεξιοτήτων επίλυσης προβλημάτων που εξαρτάται από την ανάπτυξη προηγμένων γνωστικών διαδικασιών και τη συνεργασία.

ΣΥΛΛΟΓΗ ΚΑΙ ΑΝΑΛΥΣΗ ΔΕΔΟΜΕΝΩΝ

Η μελέτη χρησιμοποίησε ένα σχεδιασμό μεικτών μεθόδων. Ποσοτικά και ποιοτικά δεδομένα συλλέχθηκαν ειδικά για τριγωνοποίηση και ανάλυση. Αυτή η μεθοδολογία παρέχει μια πιο ολοκληρωμένη εικόνα στις ερωτήσεις της μελέτης (Creswell & Plano, 2018). Τα ποσοτικά δεδομένα αποκτήθηκαν μέσω ενός ερωτηματολογίου αυτοαξιολόγησης, του Problem-Solving Inventory, που περιλάμβανε κλειστού τύπου ερωτήσεις σχετικά με τα χαρακτηριστικά της επίλυσης προβλημάτων, ενώ τα ποιοτικά δεδομένα συλλέχθηκαν μέσω ημι-δομημένων συνεντεύξεων που σχεδιάστηκαν για να εξερευνήσουν τις αντιλήψεις των μαθητών για το μάθημα PBL (Cohen, 2018).

ΤΟ ΕΡΓΑΛΕΙΟ ΑΞΙΟΛΟΓΗΣΗΣ ΕΠΙΛΥΣΗΣ ΠΡΟΒΛΗΜΑΤΩΝ (PSI)

Το Ερωτηματολόγιο Επίλυσης Προβλημάτων (PSI; Heppner & Petersen, 1982) έχει χρησιμοποιηθεί για την αξιολόγηση των στάσεων επίλυσης προβλημάτων. Το PSI έχει 32 στοιχεία που αξιολογούνται σε μια κλίμακα Likert (από 1 = Διαφωνώ Απόλυτα έως 6 = Συμφωνώ Απόλυτα) και κατηγοριοποιείται σε τρεις υποκλίμακες: (α) Αυτοπεποίθηση στην Επίλυση Προβλημάτων, (β) Στυλ Προσέγγισης-Αποφυγής και (γ) Προσωπικός Έλεγχος. Η Αυτοεκτίμηση στην Επίλυση Προβλημάτων αξιολογεί την αυτοεκτιμημένη αυτοπεποίθηση, πίστη και βεβαιότητα στην αποτελεσματική επίλυση ζητημάτων, με 11 στοιχεία (π.χ., "Εμπιστεύομαι την ικανότητά μου να επιλύω νέα και δύσκολα προβλήματα."). Το Στυλ Προσέγγισης-Αποφυγής αξιολογεί τις τάσεις των ατόμων να αντιμετωπίζουν ή να αποφεύγουν τα προβλήματα και αποτελείται από 16 στοιχεία (π.χ., "Όταν μια λύση σε ένα πρόβλημα δεν είναι επιτυχής, δεν εξετάζω γιατί δεν λειτούργησε."). Τέλος, ο Προσωπικός Έλεγχος αξιολογεί πτυχές της αυτορρύθμισης σχετικά με τα συναισθήματα και τη συμπεριφορά, περιλαμβάνοντας πέντε στοιχεία (π.χ., "Όταν οι πρώτες μου προσπάθειες να λύσω ένα πρόβλημα αποτυγχάνουν, γίνομαι ανήσυχος για την ικανότητά μου να χειριστώ την κατάσταση.").

Το PSI έχει προσαρμοστεί στην Ελλάδα και έχει δείξει αξιοπιστία και εγκυρότητα ως ένα έγκυρο εργαλείο για την αξιολόγηση των στάσεων επίλυσης προβλημάτων στον ελληνικό πληθυσμό, ενώ έδειξε συντελεστή αξιοπιστίας άλφα 0,90 για την αυτοπεποίθηση στην επίλυση προβλημάτων, 0,89 για το στυλ προσέγγισης-αποφυγής, 0,72 για τον προσωπικό έλεγχο και 0,91 για τη συνολική βαθμολογία της κλίμακας (Kourmousi et al., 2016). Οι ερευνητές αυτής της

πιλοτικής μελέτης βρήκαν έναν υψηλό συντελεστή αξιοπιστίας alpha 0,73 για το ερωτηματολόγιο Q2 PSI και 0,77 για το ερωτηματολόγιο Q1 PSI με βάση το δείγμα τους.

ΣΥΝΕΝΤΕΥΞΕΙΣ

Η αξιολόγηση νέων εκπαιδευτικών παρεμβάσεων είναι κρίσιμη, καθώς βασίζεται στις πληροφορίες που αποκτώνται από συνεντεύξεις με μαθητές και παρατηρήσεις εκπαιδευτικών για να καθοριστεί η χρησιμότητά τους και ο αντίκτυπός τους (Beagon et al., 2019). Για να αποκτήσουν ευρεία εικόνα της μεθοδολογίας του μαθήματος και να εντοπίσουν τάσεις που σχετίζονται με το PBL από την οπτική των μαθητών, οι ερευνητές δημιούργησαν έναν ημι-δομημένο οδηγό συνέντευξης. Ο οδηγός σχεδιάστηκε για να διασφαλίσει ότι οι απαντήσεις των μαθητών ευθυγραμμίζονταν άμεσα με τη μεθοδολογία PBL που χρησιμοποιήθηκε κατά τη διάρκεια της διδασκαλίας. Η τεχνική της τριγωνοποίησης ενισχύει τα ευρήματα μέσω του συνδυασμού πολλαπλών πηγών δεδομένων. Οι συνεντεύξεις πραγματοποιήθηκαν μετά την ολοκλήρωση του μαθήματος, με μέση διάρκεια σχεδόν 10 λεπτά. Πριν από τις συνεντεύξεις, οι ερευνητές καθόρισαν τους στόχους της μελέτης και έλαβαν συγκατάθεση. Στις συνεντεύξεις, οι συμμετέχοντες ζητήθηκε αρχικά να παρέχουν τις συνολικές τους εντυπώσεις για κάθε φάση, ακολουθούμενες από ερωτήσεις σχετικά με συγκεκριμένες πτυχές της PBL που αφορούν κάθε φάση (π.χ., διαδικασίες και στρατηγικές μάθησης που χρησιμοποιήθηκαν, αντιληπτές προκλήσεις και ευκαιρίες, καθοδήγηση και υποστηρικτικά χαρακτηριστικά, αντιληπτά αποτελέσματα μάθησης) (Patton, 2002).

ΣΥΖΗΤΗΣΗ

Μία πρωταρχική ανάλυση των δεδομένων αποκάλυψε ότι το περιβάλλον PBL μπορεί να επηρεάσει θετικά το επίπεδο των δεξιοτήτων επίλυσης προβλημάτων των μαθητών δευτεροβάθμιας εκπαίδευσης και, επιπλέον, την μαθησιακή τους εμπειρία. Με τη σύγκριση του βαθμού επιρροής μεταξύ των εκπαιδευτικών προσεγγίσεων Maker Learning (ML), Virtual Learning (VL) και Classic Learning (C), φαίνεται ότι τα αποτελέσματα της μάθησης μέσω της ML αναπτύσσει στους μαθητές δεξιότητες επίλυσης προβλημάτων σε πολύ υψηλό επίπεδο, ενώ τα αποτελέσματα μάθησης της VL ακολουθούν πολύ κοντά. Μέσω αυτής της μελέτης, στοχεύουμε να προσδιορίσουμε την επίδραση των εκπαιδευτικών προσεγγίσεων και των αποτελεσμάτων τους που ενισχύουν τους μαθητές με κρίσιμες δεξιότητες επίλυσης προβλημάτων, προετοιμάζοντάς τους για μελλοντικές καριέρες στην επιστήμη και την τεχνολογία.

Η Εκπαίδευση Βασισμένη σε Προβλήματα (PBL) και η Εκπαίδευση Δημιουργών που περιλαμβάνει ΤΝ έδειξε σαφή και στατιστικά σημαντική βελτίωση στις ικανότητες επίλυσης προβλημάτων των μαθητών δευτεροβάθμιας εκπαίδευσης. Ενώ όλες οι ομάδες παρουσίασαν ανάπτυξη, η ομάδα ML έδειξε τη μεγαλύτερη βελτίωση, αντηχώντας τα αποτελέσματα προηγούμενης έρευνας σε κατασκευαστικά, πρακτικά μαθησιακά περιβάλλοντα. Αυτό το εύρημα είναι ιδιαίτερα σχετικό με τα επιχειρήματα διεθνών οργανισμών (OECD) που τονίζουν τη σημασία του πλαισίου εμπειρικής μάθησης στην καλλιέργεια δεξιοτήτων του 21ου αιώνα, συμπεριλαμβανομένης της προσαρμοστικότητας, της καινοτομίας και της επίλυσης προβλημάτων. Καθώς οι εκπαιδευτικές τεχνολογίες και οι εφαρμογές ΤΝ συνεχίζουν να εξελίσσονται, η μελλοντική έρευνα θα πρέπει να εξετάσει πώς αυτά τα υβριδικά μοντέλα μάθησης αποδίδουν σε διάφορα εκπαιδευτικά περιβάλλοντα και πληθυσμούς μαθητών. Μια εκτενέστερη ανάλυση των δεδομένων σχεδιάζεται να ενισχύσει τα ευρήματα.

ΠΕΡΙΛΗΨΗ

Η παρούσα μελέτη διερευνά την αξιοποίηση των chatbots, στην καλλιέργεια της ήπιας δεξιότητας της κριτικής σκέψης σε μαθητές των μεγαλύτερων τάξεων του Δημοτικού Σχολείου. Σχεδιάστηκαν διδακτικά σενάρια σε πέντε γνωστικά αντικείμενα (Γλώσσα, Ιστορία, Αγωγή του Πολίτη, Γεωγραφία, Εργαστήρια Δεξιοτήτων), με τη συνδυαστική χρήση τριών δωρεάν εργαλείων: ChatGPT, Gemini 2.0 Flash και Gemini 2.0 Flash Thinking. Τα σενάρια εφαρμόστηκαν σε δύο Δημοτικά Σχολεία του νομού Θεσπρωτίας και η αποτίμηση των αποτελεσμάτων έγινε μέσω ημιδομημένων συνεντεύξεων σε πέντε εκπαιδευτικούς.

Τα ευρήματα ανέδειξαν ότι τα chatbots συνέβαλαν καθοριστικά στον σχεδιασμό δραστηριοτήτων που ενισχύουν την ανάλυση και τη σύγκριση απόψεων, την τεκμηρίωση ή την αμφισβήτηση άποψης, τον εντοπισμό έμμεσων μηνυμάτων και fake news, τη λήψη τεκμηριωμένης άποψης και την επίλυση προβλήματος. Επιπλέον, πρότειναν καινοτόμες ιδέες που υπερέβαιναν το αρχικό διδακτικό πλάνο των εκπαιδευτικών.

Ωστόσο, με το prompting παρατηρήθηκαν περιορισμοί ως προς την ακρίβεια συγκεκριμένων πληροφοριών, γεγονός που αντιμετωπίστηκε με τη συνδυαστική χρήση της διαδικτυακής αναζήτησης (searching). Συνολικά, η μελέτη επιβεβαιώνει τις προοπτικές των εργαλείων ΤΝ ως υποστηρικτικών μηχανισμών στην εκπαιδευτική πράξη, επισημαίνοντας όμως την ανάγκη για κριτικό ψηφιακό γραμματισμό τόσο από τους εκπαιδευτικούς όσο και από τους μαθητές.

Τέλος η έρευνα θέτει τη βάση για μελλοντικά προγράμματα ευρύτερης κλίμακας, ενταγμένα στο θεωρητικό πλαίσιο της Θεωρίας της Αλλαγής.

Λέξεις – κλειδιά: chatbots, καλλιέργεια κριτικής σκέψης, δημοτικό σχολείο.

ΕΙΣΑΓΩΓΗ

Ήπιες δεξιότητες

Ο όρος 'ήπιες δεξιότητες' (soft skills) από τον κόσμο των επιχειρήσεων και της εργασίας, πέρασε γρήγορα στην εκπαίδευση. Πολλοί παγκόσμιοι οργανισμοί (ΟΟΣΑ) και εκπαιδευτικά συστήματα, αντιλήφθηκαν την αξία τους για την ανάπτυξη της προσωπικότητας και φρόντισαν να τις καλλιεργήσουν μέσω σχολικών προγραμμάτων (Scheerens, et al., 2020).

Σύμφωνα με τον ΟΟΣΑ (OECD, 2019) και πολλούς ερευνητές (Taylor et al., 2017), οι ήπιες δεξιότητες καλλιεργούνται πιο αποτελεσματικά, όταν οι μαθητές στην παιδική ηλικία ενταχθούν σε περιβάλλοντα μάθησης και κοινωνικής αλληλεπίδρασης.

Σε αντιδιαστολή με τις σκληρές δεξιότητες (hard skills), που είναι αντικειμενικά μετρήσιμες και πιστοποιούνται, οι ήπιες δεξιότητες είναι υποκειμενικές και δύσκολά μετρήσιμες. Ωστόσο είναι εξαιρετικά σημαντικές για την προσωπική και επαγγελματική επιτυχία του ατόμου (Claxton et al., 2016), γιατί όπως εύστοχα παρατηρούν οι Heckman & Kautz (2012), αφορούν τα χαρακτηριστικά της προσωπικότητας.

Στη βιβλιογραφία δεν υπάρχει επίσημος ορισμός. Για την Allvin (2016) είναι οι δεξιότητες μάθησης του 21ου αιώνα. Ο Rao (2012) αναφέρεται σε δεξιότητες επικοινωνίας, διαπραγμάτευσης, γραφής, ακρόασης, και επίλυσης προβλημάτων. Η Soffel (2016) τις κατηγοριοποιεί σε βασικούς γραμματισμούς, ικανότητες και χαρακτηριστικά προσωπικότητας. Ο Diakiw (2016) αναφέρεται κυρίως στην αυτογνωσία και την ανάπτυξη θετικών σχέσεων. Οι Bhagra & Sharma (2018) τις κατηγοριοποίησαν σε τρεις ομάδες, που αφορούν ενδοπροσωπικά, διαπροσωπικά και διανοητικά χαρακτηριστικά. Οι Claxton et al. (2016) τις καθορίζουν ως τάσεις σκέψης, ενώ τέλος η Duckworth (2016) τις αναφέρει ως θέληση για επίτευξη κάποιου σκοπού.

Ιδιαίτερο ενδιαφέρον για την εκπαίδευση έχει το μοντέλο που πρότεινε το Παγκόσμιο Οικονομικό Φόρουμ (WEF, 2016), κατηγοριοποιώντας τις ήπιες δεξιότητες σε τρεις κατηγορίες, όπως και η Soffel (2016). Σε Βασικούς Γραμματισμούς - Foundational Literacies (βασικές δεξιότητες στην καθημερινότητα), σε Ικανότητες – Competencies (αντιμετώπιση σύνθετων προκλήσεων που απαιτούν κριτική σκέψη, συνεργασία, δημιουργικότητα, επικοινωνία) και σε Χαρακτηριστικά προσωπικότητας - Character Qualities (περιέργεια, επιμονή, πρωτοβουλία, προσαρμοστικότητα, κ.ά.). Το μοντέλο αυτό κατά την άποψη κάποιων ερευνητών προσφέρει μια πιο ολοκληρωμένη αντίληψη των ήπιων δεξιοτήτων, που χαρακτηρίζονται επίσης και ως δεξιότητες του 21ου αι (Feraco et al., 2022).

Θα μπορούσε να ειπωθεί ότι οι ήπιες δεξιότητες συνθέτουν τον χαρακτήρα του ανθρώπου, που όλοι θα θέλαμε να έχουμε φίλο, συνεργάτη, προϊστάμενο και γενικότερα δίπλα μας.

Στη συνέχεια θα γίνει αναφορά στην ήπια δεξιότητα που θα αποτελέσει το κεντρικό σημείο της παρούσας μελέτης, δηλαδή στην κριτική σκέψη και αν αυτή μπορεί να καλλιεργηθεί, με την αξιοποίηση της Τεχνητής Νοημοσύνης.

Κριτική Σκέψη

Η κριτική σκέψη, αν και ως ήπια δεξιότητα δεν είναι εύκολα μετρήσιμη ή παρατηρήσιμη, αποτυπώνεται σε συμπεριφορές και επιλογές των μαθητών (Shek & Merrick, 2017). Η κριτική σκέψη ορίζεται ως η ικανότητα ανεξάρτητης αξιολόγησης πληροφοριών και ιδεών. Αποτελεί απαραίτητο εφόδιο για την λήψη τεκμηριωμένων αποφάσεων, την επίλυση προβλημάτων και την αποτελεσματική επικοινωνία. Βοηθάει στη διάκριση της αλήθειας από την παραπληροφόρηση και στην κριτική αντιμετώπιση των επιχειρημάτων (Raj et al., 2022).

Η ανάπτυξη της κριτικής σκέψης στους μαθητές επηρεάζεται από πλήθος παραγόντων. Γνωστικές θεωρίες υπογραμμίζουν την σταδιακή εξέλιξη της ικανότητας κριτικής σκέψης (DeVries, 2000), με τον Piaget να εστιάζει στην ατομική κατασκευή γνώσης και τον Vygotsky στην κοινωνική αλληλεπίδραση (Nardo, 2021). Παράλληλα, ψυχολογικά χαρακτηριστικά όπως η νοημοσύνη, ευνοούν την κριτική σκέψη. Επιπρόσθετα, κοινωνικοί και περιβαλλοντικοί παράγοντες, όπως το υποστηρικτικό περιβάλλον στην οικογένεια και το σχολείο επιδρούν θετικά στην κριτική σκέψη (Kuhn, 1999).

Η υιοθέτηση κατάλληλων διδακτικών προσεγγίσεων, ενθαρρύνει την κριτική σκέψη μέσω της συμμετοχής, της ανάλυσης και της επίλυσης προβλημάτων (Marin & Halpern, 2011). Εκπαιδευτικές δραστηριότητες, όπως η ανάλυση πηγών, η αξιολόγηση επιχειρημάτων και η λύση προβλημάτων, προσφέρουν ευκαιρίες για εξάσκηση. Η ενθάρρυνση της

αμφισβήτησης, της έρευνας και της διατύπωσης τεκμηριωμένων απόψεων αποτελούν βασικά στοιχεία καλλιέργειας κριτικής σκέψης, όπως και οι ευκαιρίες για μεταφορά της σε πολλαπλά πεδία (Tiruneh et al., 2018).

Η ανάπτυξη καινοτόμων διδακτικών προσεγγίσεων και η αξιοποίηση της τεχνολογίας για την καλλιέργεια της κριτικής σκέψης, αποτελούν βασικές προκλήσεις (Meirbekoy et al., 2022). Επιπλέον, η καλλιέργεια κριτικής σκέψης οφείλει να υπερβεί τα στενά ακαδημαϊκά πλαίσια μιας συμβατικής αίθουσας διδασκαλίας και να ενσωματωθεί σε όλες τις εκπαιδευτικές βαθμίδες, από την παιδική ηλικία έως την ενηλικίωση και σε κάθε είδους δράση, εντός και εκτός σχολικής αίθουσας (Tiruneh et al., 2018).

Chatbots στην Εκπαίδευση

Τα chatbots είναι προηγμένα μοντέλα τεχνητής νοημοσύνης που μπορούν να κατανοήσουν και να παράγουν ανθρώπινες συνομιλίες. Λαμβάνουν πληροφορίες από Μεγάλα Δεδομένα (Big Data) και τις επεξεργάζονται μέσω Μηχανικής Μάθησης (Machine Learning). Έχουν γνωρίσει ραγδαία άνθηση τα τελευταία χρόνια (Agarwal & Wadhwa, 2020).

Η Τεχνητή Νοημοσύνη (ΤΝ) εφαρμόζεται σήμερα σε πολλά και διαφορετικά πεδία (Han, 2023· Nicolescu & Tudorache, 2022). Προφανώς ο τομέας της εκπαίδευσης δεν θα μπορούσε να μείνει ανεπηρέαστος (Guilherme, 2019).

Μοντέλα ΤΝ χρησιμοποιούνται για εξατομικευμένη μάθηση, προσαρμοσμένη στο μαθησιακό προφίλ του μαθητή. Chatbots, που δίνουν στους μαθητές πληροφορίες, απαντώντας άμεσα στις ερωτήσεις τους και σε τυχόν απορίες, εφαρμόζονται ήδη στις υποχρεωτικές βαθμίδες εκπαίδευσης (Amanatidis et al., 2021). Η χρήση των chatbots στην εκπαίδευση, χρησιμοποιείται σε διάφορα μαθησιακά αντικείμενα, όπως της Γλώσσας (Huang et al., 2022). Οι μελέτες αναφέρουν τις δυνατότητες των chatbots στην βελτίωση γλωσσικών δεξιοτήτων (Kwon et al., 2023), τη συμβολή τους σε σενάρια διδασκαλίας (Runtian, 2024), καθώς και σε παραγωγή ποικίλων γλωσσικών ασκήσεων (Theodorou et al, 2024a).

Η ΤΝ αξιοποιείται ήδη στην Ειδική Αγωγή για την αξιολόγηση και τον σχεδιασμό παρεμβάσεων (Marino et al., 2023), αλλά και στη διδασκαλία συναισθηματικών στόχων (Kang et al., 2022). Ακόμα, η ΤΝ εφαρμόζεται στη διοίκηση της σχολικής μονάδας για την αντιμετώπιση του βραχνά της γραφειοκρατίας στην εκπαίδευση (Lakasas, 2024), επιδρώντας θετικά στις δεξιότητες των εκπαιδευτικών (Hagag et al., 2023), απελευθερώνοντας χρόνο για πιο δημιουργικές ασχολίες (Filgueiras, 2023). Για παράδειγμα, σύμφωνα με τους Θεοδώρου κ.ά. (Theodorou 2024b), τα chatbots μπορούν να χρησιμοποιηθούν με επιτυχία στην συμπλήρωση όλων των πεδίων της πλατφόρμας διαχείρισης αναφορών για περιστατικά ενδοσχολικής βίας και εκφοβισμού.

Διλήμματα

Ωστόσο, η χρήση chatbots στην εκπαίδευση, ενώ προσφέρει αναμφισβήτητα πλεονεκτήματα, φέρνει στο προσκήνιο και ορισμένα ηθικά διλήμματα (Akgun & Greenhow, 2022). Η διασφάλιση της ιδιωτικότητας λόγω της συγκέντρωσης δεδομένων, η διαρροή εκπαιδευτικών πληροφοριών, η επίδραση στην ανθρώπινη σκέψη και στην ανθρώπινη αλληλεπίδραση, αλλά και η αντιμετώπιση των ψηφιακών ανισοτήτων (ψηφιακό χάσμα), αποτελούν ζωτικής σημασίας προκλήσεις που οφείλουμε να αντιμετωπίσουμε για να διασφαλίσουμε παράλληλα μια ολοκληρωμένη, δίκαιη και ηθική υιοθέτηση της ΤΝ στην εκπαίδευση, προς όφελος του κοινωνικού συνόλου (Bu, 2022).

Πολλοί ερευνητές επίσης, τονίζουν ότι η ανεξέλεγκτη χρήση της από τους μαθητές, μπορεί να προκαλέσει σύγχυση, ιδίως στους αρχάριους και στους νεότερους και θα πρέπει να γίνεται μέσα σε ένα καλά οριοθετημένο πλαίσιο (Runtian, 2024). Επιπλέον, στους κινδύνους που προκύπτουν έχει καταγραφεί και η πιθανότητα αποδόμησης της σχέσης δασκάλου μαθητή (Bu, 2022).

Η Ευρωπαϊκή Ένωση φαίνεται να αναγνωρίζει τη σημασία και την επίδραση της ΤΝ στην εκπαίδευση, αλλά και τους κινδύνους που εγκυμονεί η χρήση της. Για το σκοπό αυτό θέσπισε το "Σχέδιο δράσης για την Ψηφιακή Εκπαίδευση για την Ευρώπη 2021-2027". Το νομικό αυτό κείμενο εστιάζει στην ανάπτυξη ψηφιακών δεξιοτήτων στους μαθητές και στην ενσωμάτωση της ΤΝ στο εκπαιδευτικό σύστημα (Annette, 2021).

Η Ευρωπαϊκή Επιτροπή μέσω του Σχεδίου, έχει θέσει ως στόχο κυρίως τη διαμόρφωση ενός κοινού πλαισίου για την ανάπτυξη ψηφιακών δεξιοτήτων, μειώνοντας το ψηφιακό χάσμα μεταξύ των πολιτών της. Έτσι, φιλοδοξεί να

προωθήσει την τεχνητή νοημοσύνη με έναν κοινωνικά δίκαιο τρόπο, διασφαλίζοντας την ηθική και υπεύθυνη χρήση της στην εκπαίδευση, χωρίς να οξύνει τις κοινωνικές ανισότητες (European Commission, 2020).

Από την άλλη πλευρά, πρέπει να αναφερθεί ότι δεν συμμερίζονται όλοι τις ανησυχίες για την εξέλιξη και τις επιπτώσεις της ΤΝ σε θέματα. Για παράδειγμα ο Ν. Νεγρεπόντε (Negroponte, 2025) είναι αντίθετος με όσους ζητούν ρύθμιση της ΤΝ.

Η παρούσα μελέτη θα επιχειρήσει να απαντήσει στα παρακάτω ερευνητικά ερωτήματα:

Η αξιοποίηση των chatbots (ChatGPT, Gemini 2.0 Flash και Gemini 2.0 Flash Thinking) συμβάλλει στον σχεδιασμό διδακτικών σεναρίων που καλλιεργούν την κριτική σκέψη σε μαθητές των μεγάλων τάξεων του Δημοτικού Σχολείου;

Αν τα chatbots συμβάλλουν στην ανάπτυξη της κριτικής σκέψης, ποιες συγκεκριμένες όψεις της κριτικής σκέψης καλλιεργούν και ποιο είναι το επίπεδο πρωτοτυπίας των προτεινόμενων δραστηριοτήτων;

Ποιοι περιορισμοί και ποιες προκλήσεις επηρεάζουν την αποτελεσματικότητα των chatbots στην εκπαιδευτική πρακτική;

ΣΚΟΠΟΣ - ΜΕΘΟΔΟΣ

Σκοπός της παρούσας μελέτης είναι η διερεύνηση των δυνατοτήτων της Τεχνητής Νοημοσύνης στην καλλιέργεια της ήπιας δεξιότητας της κριτικής σκέψης σε μαθητές των μεγάλων τάξεων του Δημοτικού Σχολείου. Πιο συγκεκριμένα, η μελέτη επικεντρώνεται στην εξέταση της αποτελεσματικότητας των Chatbots στο σχεδιασμό διδακτικών σεναρίων που καλλιεργούν την κριτική σκέψη. Τα διδακτικά σενάρια θα σχεδιαστούν στα μαθήματα Γλώσσα, Ιστορία, Αγωγή του Πολίτη, Εργαστήρια Δεξιοτήτων και Γεωγραφία.

Η εφαρμογή των προηγμένων μοντέλων τεχνητής νοημοσύνης έγινε από εκπαιδευτικούς δυο διαφορετικών Δημοτικών Σχολείων του Ν. Θεσπρωτίας, οι οποίοι χρησιμοποίησαν τα chatbots, ως υποστηρικτικά εργαλεία στο σχεδιασμό και την ανάπτυξη διδακτικών σεναρίων.

Η αποτίμηση έγινε από ομάδα πέντε εκπαιδευτικών των δυο σχολείων, με ημιδομημένες συνεντεύξεις. Αξιολογήθηκε η συμβολή των προτεινόμενων δραστηριοτήτων στην επίτευξη των διδακτικών στόχων, η πρωτοτυπία των προτεινόμενων δραστηριοτήτων και η ταχύτητα απόκρισης των εργαλείων με βάση τον αριθμό των προτροπών.

Η εμπειρική έρευνα πραγματοποιήθηκε σε δυο φάσεις. Στην πρώτη φάση, που έλαβε χώρα κατά τη διάρκεια των δυο πρώτων τριμήνων του σχολικού έτους 2024 – 2025, σχεδιάστηκαν και υλοποιήθηκαν τα διδακτικά σενάρια. Στη δεύτερη φάση, μετά τις 10 Μαρτίου 2025, έγινε η ανάλυση και η συγγραφή των ευρημάτων.

Στην έρευνα χρησιμοποιήθηκαν οι δωρεάν εκδόσεις τριών διαδεδομένων εργαλείων Τεχνητής Νοημοσύνης (αλφαβητικά) : Chat GPT, Gemini 2.0 Flash & Gemini 2.0 Flash Thinking (experimental). Το πρώτο εργαλείο είναι της Microsoft και άλλα δυο της Google.

ΑΠΟΤΕΛΕΣΜΑΤΑ

Στα αποτελέσματα δεν παρουσιάζεται η διαδικασία των αλυσιδωτών προτροπών (chain prompting), λόγω περιορισμού χώρου. Τα διδακτικά σενάρια, επίσης λόγω περιορισμού χώρου, παρουσιάζονται συνοπτικά.

Ιστορία: Δ΄ τάξη, 18ο Κεφ., Η ναυμαχία της Σαλαμίνας.

«Συζήτηση – Debate: Πού θα έπρεπε να δοθεί η ναυμαχία;».

Στόχος: Οι μαθητές αναλύουν τα επιχειρήματα των δύο πλευρών (Ευρυβιάδης - Θεμιστοκλής) και αποφασίζουν. Διαδικασία: Χωρίζονται σε δύο ομάδες αντίστοιχα. Κάθε ομάδα συλλέγει επιχειρήματα από το κείμενο και προσπαθεί να πείσει την άλλη πλευρά. Στο τέλος, γίνεται ψηφοφορία με θέμα "Αν ήσουν ναύαρχος, τι θα αποφάσιζες;".

«Παιχνίδι ρόλων: Αν ήσουν ο Ξέρξης…».

Στόχος: Οι μαθητές αναπτύσσουν ενσυναίσθηση και σκέφτονται στρατηγικά. Διαδικασία: Κάποιοι μαθητές αναλαμβάνουν τον ρόλο του Ξέρξη και των συμβούλων του, διαβάζουν το κείμενο και προσπαθούν να σκεφτούν ένα διαφορετικό σχέδιο για τον περσικό στόλο. Παρουσιάζουν τη στρατηγική τους στην τάξη και εκτιμούν αν θα είχε αλλάξει η έκβαση της μάχης.

«Δημοσιογράφοι στην Αρχαία Ελλάδα».

Στόχος: Να ερμηνεύσουν τα γεγονότα με βάση διαφορετικές οπτικές. Διαδικασία: Οι μαθητές γράφουν ένα άρθρο εφημερίδας για τη Ναυμαχία της Σαλαμίνας από διαφορετικές οπτικές: Αθηναίος πολεμιστής, Πέρσης στρατηγός, Σπαρτιάτης πολίτης και ένας έμπορος που επηρεάζεται από τον πόλεμο. Μετά τη συγγραφή, οι μαθητές συζητούν πώς το ίδιο γεγονός μπορεί να ερμηνευτεί με διαφορετικούς τρόπους.

«Εξαφάνιση φιδιού από το Ερέχθειο».

Στόχος: αξιολόγηση ηθικών διλημμάτων και διάκριση γεγονότος από την παραπλάνηση. Διαδικασία: Τεχνική των ερωτήσεων. Γιατί ο Θεμιστοκλής χρειάστηκε να χρησιμοποιήσει ένα τέχνασμα για να πείσει τους Αθηναίους; Θεωρείτε ότι ήταν σωστός ο τρόπος που χρησιμοποίησε ο Θεμιστοκλής για να πείσει τους Αθηναίους; Γιατί; Μπορείτε να σκεφτείτε παρόμοιες περιπτώσεις σήμερα, όπου οι άνθρωποι προσπαθούν να πείσουν τους άλλους χρησιμοποιώντας μη λογικά επιχειρήματα;

Εργαστήρια Δεξιοτήτων: Ψηφιακή βιωσιμότητα (digital sustainability)

«Συζητήσεις και Debate»

Στόχος: Επιχειρηματολογία – Διαφορετικές οπτικές. Διαδικασία: Θέματα για συζήτηση: "Τα πλεονεκτήματα και μειονεκτήματα του cloud storage από περιβαλλοντική σκοπιά", "Είναι τα social media ενεργειακά σπάταλα;", "Να επιβληθεί περιορισμός στον χρόνο χρήσης ηλεκτρονικών συσκευών για οικολογικούς λόγους;". Διαχωρισμός ομάδων σε υποστηρικτές και αντιπάλους ενός θέματος, ώστε οι μαθητές να αναπτύξουν επιχειρήματα και να μάθουν να εξετάζουν πολλαπλές οπτικές.

«Υπολογισμός και Σύγκριση Ψηφιακού Αποτυπώματος»

Στόχος: Συγκέντρωση και Ανάλυση δεδομένων. Εργαστηριακή δραστηριότητα όπου οι μαθητές υπολογίζουν το ψηφιακό αποτύπωμά τους (κατανάλωση kWh, τόνερ, χαρτιού, κτλ) και προτείνουν τρόπους οικολογικής χρήσης της ψηφιακής τεχνολογίας

«Σύνδεση με πολιτικές και δίκτυα»

Στόχος: Αναζήτηση βιώσιμων πολιτικών. Διαδικασία: Σύνδεση με το Ευρωπαϊκό Πλαίσιο GreenComp, έναν κοινό οδηγό της ΕΕ για την ανάπτυξη 12 βασικών περιβαλλοντικών δεξιοτήτων. Σύνδεση με εθνικά δίκτυα (ecoschools) & διεθνή (FEE).

Κοινωνική και Πολιτική Αγωγή: Στ' τάξη, 2Β, Δικαιώματα και υποχρεώσεις του Πολίτη

"Φανταστείτε ότι ο Θεόδωρος Κολοκοτρώνης ζει σήμερα. Πώς θα έδειχνε τον πατριωτισμό του;»
Στόχος: Μεταφορά ιστορικών δεδομένων στο παρόν. Να αναγνωρίσουν ότι ο πατριωτισμός σε καιρό ειρήνης εκδηλώνεται με την καθημερινή στάση του υπεύθυνου πολίτη. Διαδικασία: Χωρίζουμε τους μαθητές σε 4 ομάδες και η κάθε ομάδα σκέφτεται πέντε πράξεις που θα έκανε σήμερα ο ήρωας για να αποδείξει την αγάπη του για την πατρίδα. Θεματικές: Σεβασμός στους Νόμους και τη Δημόσια περιουσία, Φορολογική συνείδηση, Σεβασμός στον Συμπολίτη και Παιδεία. Παρουσίαση ιδεών, διάλογος, ψηφοφορία.

Γεωγραφία: Στ΄ τάξη, 27ο Κεφ., Το κλίμα της Ευρώπης και οι ανθρώπινες δραστηριότητες

«Ζω στην Ισλανδία – Ζω στην Ελλάδα»
Στόχος: Οι μαθητές κατανοούν πώς διαφορετικά περιβάλλοντα επηρεάζουν τον τρόπο ζωής των ανθρώπων. Διαδικασία: Οι μαθητές σε έναν πίνακα 2 στηλών, συμπληρώνουν για την κάθε χώρα διαφορές στο ντύσιμο, φαγητό, διασκέδαση, αθλήματα.

«Έχει ψαράδες στην Αυστρία;»

Στόχος: Οι μαθητές ανακαλύπτουν πώς η γεωγραφία καθορίζει επαγγέλματα και οικονομικές δραστηριότητες. Διαδικασία: οι μαθητές χωρίζονται σε 3 ομάδες (Νάξος, Μόναχο, Όσλο). Γράφουν από ένα απλό κείμενο για τα επαγγέλματα, τα προϊόντα, τον Τουρισμό και τη Βιομηχανία κάθε περιοχής. Η Ελλάδα έχει 'βαριά βιομηχανία';

«Μεσογειακοί και Βόρειοι λαοί»

Στόχος: Οι μαθητές σκέφτονται αν οι άνθρωποι γίνονται πιο κοινωνικοί ή εσωστρεφείς λόγω του κλίματος. Διαδικασία: Προβληματισμός – Ερωτήματα – σύνδεση κλίματος με χαρακτήρα και καθημερινότητα (πχ σιέστα). Οι μαθητές καλούνται να τεκμηριώσουν την άποψη ότι οι Μεσογειακοί λαοί που ζουν σε ζεστό κλίμα, ανοιχτούς χώρους, έχουν περισσότερες κοινωνικές σχέσεις, γιατί ζουν έξω. Αντίστοιχα, οι Βόρειοι είναι πιο εσωστρεφείς.

«Γεωγραφικές γειτονιές: Ελλάδα – Ελβετία»

Στόχος: Να κατανοήσουν οι μαθητές ότι η γεωγραφική θέση μιας χώρας επηρεάζει την πολιτική, την οικονομία, την άμυνα, τον πολιτισμό και την καθημερινή ζωή των ανθρώπων της. Διαδικασία: οι μαθητές χωρίζονται σε δυο ομάδες και καταγράφουν με ποια κράτη συνορεύει η Ελλάδα και με ποια η Ελβετία. Στη συνέχεια βρίσκουν πηγές που να πληροφορούν για τις αμυντικές δαπάνες, τις πολιτισμικές επιρροές, την εξωτερική πολιτική, τις διαμάχες και τους πολέμους της κάθε χώρας. Στο τέλος συνδέουν αιτίες με αποτελέσματα σε οικονομία, εξωτερική πολιτική, ροές μεταναστών, υγεία, παιδεία.

Γλώσσα και Ανθολόγιο Ε΄ και Στ΄ τάξης. «Ανάλυση και Σύγκριση Κειμένων»

«Ανάλυση και Σύγκριση κειμένων»

Στόχος: Να αναπτύξουν οι μαθητές την ικανότητα σύγκρισης και αξιολόγησης διαφορετικών απόψεων και ύφους. Διαδικασία: Επιλέγουμε δύο κείμενα με διαφορετική σκοπιά για το ίδιο θέμα (π.χ. άρθρο υπέρ και κατά των social media).Οι μαθητές εντοπίζουν επιχειρήματα, σκοπό συγγραφέα, ύφος. Συζητούν: Ποιο επιχείρημα είναι πιο πειστικό;

"Ψάξε το Υπονοούμενο" (Κρυφά Μηνύματα στα Κείμενα)

Στόχος: Ανάπτυξη ενσυναίσθησης και ανάλυσης προθέσεων. Διαδικασία: Δίνουμε ένα κείμενο όπου δεν αναφέρεται άμεσα το βασικό μήνυμα (π.χ. μια διαφήμιση). Οι μαθητές καλούνται να απαντήσουν: "Τι υπονοεί το κείμενο χωρίς να το λέει ξεκάθαρα;"

«Fake News»

Στόχος: Να μάθουν οι μαθητές να αμφισβητούν πληροφορίες και να ελέγχουν πηγές. Διαδικασία: Δίνουμε μια αληθινή και μια ψεύτικη είδηση (π.χ. από εφημερίδες ή διαδίκτυο). Ζητάμε να εντοπίσουν: Πώς μπορούμε να καταλάβουμε αν είναι αλήθεια; Ποιες πηγές είναι αξιόπιστες; Πώς επηρεάζουν τα fake news τη γνώμη του κόσμου;"

«Δελτίο Ειδήσεων»

Στόχος: Ανάλυση και αξιολόγηση είδησης. Διαδικασία: παραθέτουμε ένα απόσπασμα μιας είδησης και ζητάμε από τους μαθητές να διακρίνουν σημεία που παρουσιάζουν το γεγονός ή μια υποκειμενική άποψη. Δείχνουμε ένα βίντεο με μια είδηση και ζητάμε από τους μαθητές να εντοπίσουν γλωσσικά στοιχεία (λέξεις, σχήματα υπερβολής) και παραγλωσσικά στοιχεία (ring tones, μουσική υπόκρουση, φωτισμός, ζουμ, κ.ά.), που επηρεάζουν την ερμηνεία της είδησης από το κοινό. Οι μαθητές καταγράφουν τη σειρά ειδήσεων σε διαφορετικά κανάλια και συζητάνε αν η σειρά μιας είδησης, επηρεάζει τον αντίκτυπό της.

ΣΥΜΠΕΡΑΣΜΑΤΑ - ΠΕΡΙΟΡΙΣΜΟΙ

Κρίνοντας από τα διδακτικά σενάρια που αναφέρθηκαν στα αποτελέσματα, παρατηρείται ότι και στα πέντε διδακτικά αντικείμενα προτάθηκαν δραστηριότητες που καλλιεργούν την κριτική σκέψη. Πιο συγκεκριμένα, προτάθηκαν δραστηριότητες που καλλιεργούν σημαντικές όψεις της κριτικής σκέψης, όπως την αξιολόγηση πληροφοριών και πηγών, τη λήψη τεκμηριωμένων αποφάσεων, την ανάλυση και επίλυση προβλημάτων, τη διάκριση της αλήθειας από την παραπληροφόρηση, την κριτική αντιμετώπιση των επιχειρημάτων, την ενθάρρυνση της αμφισβήτησης και τη μεταφορά των δεξιοτήτων αυτών σε πολλαπλά πεδία (Marin & Halpern, 2011; Raj et al., 2022; Tiruneh et al., 2018). Εκπαιδευτικές δραστηριότητες όπως οι παραπάνω, προσφέρουν ευκαιρίες για εξάσκηση και καλλιέργεια της κριτικής σκέψης (Tiruneh et al., 2018).

Οι εκπαιδευτικοί που συμπλήρωσαν τις ημιδομημένες συνεντεύξεις, συμφώνησαν ότι τα chatbots μπορούν να σχεδιάσουν σε ικανοποιητικό βαθμό διδακτικά σενάρια που καλλιεργούν την κριτική σκέψη. Επίσης ανέφεραν και περιπτώσεις όπου τα chatbots ξεπέρασαν τα όρια της σκέψης τους, προτείνοντας μάλιστα πρωτότυπες δραστηριότητες, που αυτοί δεν είχαν σκεφτεί: «η εξαφάνιση του φιδιού στο Ερέχθειο» και «η συνέντευξη με έναν έμπορο» (Ιστορία), η σύνδεση δράσεων με εθνικό και διεθνές δίκτυο (Εργαστήρια Δεξιοτήτων) και τα «Δελτία Ειδήσεων», ήταν μερικές από αυτές τις πρωτότυπες δραστηριότητες. Και όλα αυτά με υψηλή ταχύτητα απόκρισης, ελάχιστες προτροπές και ελάχιστα λάθη.

Από την άλλη πλευρά, παρατηρήθηκαν περιορισμοί και προκλήσεις, που σαφώς θα πρέπει να λάβει υπόψη ο εκπαιδευτικός στο σχεδιασμό των διδακτικών σεναρίων. Για παράδειγμα σε περιπτώσεις που χρειάστηκε να γίνει εστίαση σε συγκεκριμένη πληροφορία (όπως χρονολογία, όνομα, κ.ά.), τα chatbots φάνηκε κάποιες φορές να υστερούν, παρέχοντας αντικρουόμενες και λανθασμένες πληροφορίες. Σε αυτές τις περιπτώσεις, για αποφυγή του κινδύνου της παραπληροφόρησης, έγινε χρήση του διαδικτύου με αναζήτηση (search) στον ιστό. Φάνηκε δηλαδή το searching να υπερτερεί του prompting στην εγκυρότητα της πληροφορίας. Επίσης παρατηρήθηκε ότι ο τρόπος σύνταξης μιας προτροπής ή η γλώσσα που δίνεται η προτροπή (αγγλικά ή ελληνικά), επιδρά στα αποτελέσματα που θα λάβει ο χρήστης.

Συμπερασματικά μπορεί να υποστηριχθεί ότι τα chatbots είναι ελατήρια σκέψης, αρκεί να υπάρχει σκέψη. Δηλαδή αν δοθεί από τον χρήστη μια καλά δομημένη προτροπή (ή αλυσίδα προτροπών) και ο χρήστης γνωρίζει το αντικείμενο αναφοράς, τότε τα αποτελέσματα που θα λάβει, θα απογειώσουν την σκέψη του. Σε διαφορετική περίπτωση, υπάρχει σοβαρός κίνδυνος να ληφθούν αφιλτράριστα αποτελέσματα αμφίβολης ποιότητας και αναξιόπιστα.

Ένας σημαντικός περιορισμός στην παρούσα εμπειρική μελέτη, είναι ο μικρός αριθμός εκπαιδευτικών που χρησιμοποίησαν εργαλεία ΤΝ και συμπλήρωσαν τις ημιδομημένες συνεντεύξεις. Θα μπορούσε μελλοντικά να γίνει ένας ευρύτερος ερευνητικός σχεδιασμός, που να εμπλέκει μεγαλύτερο δείγμα εκπαιδευτικών και σχολείων και να περιλαμβάνει ένα πρόγραμμα παρέμβασης με σκοπό την τροποποίηση συμπεριφορών των μαθητών, σε πιο οργανωμένο, δομημένο και μετρήσιμο πλαίσιο, όπως αυτό που παρέχει η Θεωρία της Αλλαγής, με τα επιμέρους στάδιά της (Kail & Lumley, 2012).

E- TWINNING PROGRAM: "PHOTO MAGIC, FROM OLD PHOTOS TO AI"

Καλοκίδου Βασιλική
Εκπαιδευτικός Πρωτοβάθμιας Εκπαίδευσης ΠΕ60, Msc
23ο Νηπιαγωγείο Σταυρούπολης, Θεσσαλονίκη, Ελλάδα
e-mail: vaso.kal74@gmail.com

Ρουσσέτη Κυριακή
Εκπαιδευτικός Πρωτοβάθμιας Εκπαίδευσης ΠΕ60, Msc
2ο Νηπιαγωγείο Νέων Μαλγάρων, Θεσσαλονίκη, Ελλάδα
e-mail: krous81@gmail.com

ΠΕΡΙΛΗΨΗ

Το έργο αποτελεί ένα Ευρωπαϊκό project που εκπονήθηκε στην πλατφόρμα ESEP τη σχολική χρονιά 2024-2025. Στο έργο συμμετέχουν 19 μέλη, από την Ελλάδα, Τουρκία, Πορτογαλία, Ιταλία και Ρουμανία. Ιδρυτές του είναι το 23ο Νηπιαγωγείο Σταυρούπολης Θεσσαλονίκης και το ICS di Scandale από το San Mauro Marchesato, Ιταλία.

Το πρόγραμμα επικεντρώνεται στην παιδαγωγική αξιοποίηση της τεχνητής νοημοσύνης και την ενσωμάτωσή της σε υπάρχοντα μαθησιακά περιβάλλοντα και πλατφόρμες μάθησης. Αφόρμηση αποτελεί μία βαλίτσα που βρίσκεται τυχαία έξω από το νηπιαγωγείο, γεμάτη με παλιές φωτογραφίες και αντικείμενα μιας γυναίκας της παλιάς εποχής. Οι φωτογραφίες αποτελούν το έναυσμα για να ξεκινήσουμε το ταξίδι μας, από τις παλιές φωτογραφίες έως την Τεχνητή Νοημοσύνη. Ένα ταξίδι γνωριμίας με την ιστορία της φωτογραφίας, τις ασπρόμαυρες και έγχρωμες φωτογραφίες, τις φωτογραφίες πορτραίτα, τη φωτογραφία του δρόμου, αλλιώτικες φωτογραφίες με στόχο την καλλιέργεια ενσυναίσθησης και ευαισθησίας, σε συνδυασμό με τις δυνατότητες που προσφέρουν τα εργαλεία Τεχνητής Νοημοσύνης στη βελτίωση, δημιουργία, επεξεργασία και μετατροπή της εικόνας.

Εργαλεία ΤΝ που χρησιμοποιήθηκαν είναι τα εξής:
https://www.bing.com/images/create , https://www.remove.bg/el , https://padlet.com/ , https://deepai.org/ , https://genially.com/ , https://www.canva.com/ , https://www.artbreeder.com/ , https://ai.nero.com/ , http://vidnoz.com/ , https://en.linoit.com/ , https://www.cartoonize.net/

Λέξεις – κλειδιά: Προσχολική Αγωγή, Ευρωπαϊκά Προγράμματα, Τεχνητή Νοημοσύνη

ΕΙΣΑΓΩΓΗ

Ο όρος Τεχνητή Νοημοσύνη αναφέρεται στις διαδικασίες με τις οποίες οι μηχανές (δηλαδή τα συστήματα υπολογιστών) μπορούν να προσομοιώσουν τη φυσική νοημοσύνη που επιδεικνύουν οι άνθρωποι, όπως η μάθηση, η συλλογιστική και η αυτοδιόρθωση (Διδακτική των Νέων Τεχνολογιών). Ο όρος τεχνητή νοημοσύνη είναι ένας γενικός όρος που περιλαμβάνει ένα ευρύ φάσμα μεθόδων και τεχνικών. Η ανάπτυξή και η εξέλιξή της βασίζεται στην ποσότητα, στην ποιότητα και την ευκολία πρόσβασης των μεγάλων δεδομένων.

Η τεχνητή νοημοσύνη προσφέρει τεράστια οφέλη και ευκαιρίες στην οικονομική ανάπτυξη, τη βελτίωση των γεωργικών συστημάτων, την αντιμετώπιση της υγείας, την αποτελεσματική διαχείριση της κλιματικής αλλαγής καθώς και τη βελτίωση της ποιότητας της εκπαίδευσης.

Στον τομέα της εκπαίδευσης η τεχνητή νοημοσύνη μπορεί να ενδυναμώσει τους εκπαιδευτικούς εξατομικεύοντας τη μαθησιακή εμπειρία με τη συλλογή, ανάλυση και συσχέτιση αλληλεπιδράσεων που συμβαίνουν τόσο σε εικονικές αλλά και φυσικές τάξεις με δυνατότητα δημιουργίας ψηφιακών προφίλ για κάθε μαθητή. Εξασφαλίζονται δίκαιες και χωρίς αποκλεισμούς εκπαιδευτικές ευκαιρίες για άτομα που ζουν σε απομακρυσμένες περιοχές, πρόσφυγες, καθώς και άτομα με αναπηρίες. Προωθείται η συνεργατική μάθηση καθώς άτομα από διάφορα γεωγραφικά μέρη έχουν πρόσβαση σε συλλογική μάθηση που υποστηρίζεται από υπολογιστή. Επιπλέον η τεχνητή νοημοσύνη χρησιμοποιείται και για την υποστήριξη του συστήματος με την εξόρυξη εκπαιδευτικών δεδομένων για κατανομή πόρων και υπηρεσίες καθοδήγησης για τον σχηματισμό προφίλ ικανοτήτων του μαθητή, ώστε να επιλέξει με μεγαλύτερη ευκολία τις μελλοντικές σπουδές του, με απώτερο στόχο την καλύτερη δυνατή επαγγελματική του αποκατάσταση. Επίσης, η ΤΝ μπορεί να χρησιμοποιηθεί για την επέκταση της εκπαίδευσης πέρα από την παραδοσιακή τάξη μιμούμενη τη διαδικασία ενός ανθρώπινου δασκάλου.

ΤΟ ΣΧΕΔΙΟ ΔΡΑΣΗΣ ΤΗΣ ΕΥΡΩΠΑΪΚΗΣ ΕΝΩΣΗΣ ΓΙΑ ΤΗΝ Τ.Ν.

Τα τελευταία χρόνια γίνονται προσπάθειες για την τοποθέτηση της τεχνητής νοημοσύνης στην πρωτοβάθμια και δευτεροβάθμια εκπαίδευση, σε συνδυασμό με την εκπαίδευση υπολογιστικής σκέψης, την εκπαίδευση STEAM, την εκπαιδευτική ρομποτική κ.α. Το Σχέδιο Δράσης για την Ψηφιακή Εκπαίδευση (2021-2027) της Ευρωπαϊκής Επιτροπής, αποτελεί μία πρωτοβουλία της Ευρωπαϊκής Ένωσης, η οποία θέτει ένα κοινό όραμα μεταξύ των χωρών- μελών για εκπαίδευση υψηλής ποιότητας. Αποτελεί βασικό παράγοντα για την υλοποίηση του οράματος με στόχο τη δημιουργία ενός Ευρωπαϊκού Χώρου Εκπαίδευσης ως το 2025. Καθορίζει δύο στρατηγικές προτεραιότητες και 14 δράσεις για τη στήριξή τους.

Πρώτη προτεραιότητα είναι «η προώθηση της ανάπτυξης ενός οικοσυστήματος ψηφιακής εκπαίδευσης υψηλών επιδόσεων» με 6 δράσεις. Ξεκινώντας από τον εποικοδομητικό διάλογο μεταξύ των κρατών-μελών σχετικά με την ψηφιακή εκπαίδευση και τις ψηφιακές δεξιότητες και στη συνέχεια συστήνοντας ειδικά συμβούλια, καταλήγει στην καταγραφή κατευθυντήριων γραμμών δεοντολογίας για τη χρήση ΤΝ και δεδομένων στο πλαίσιο της διδασκαλίας και της μάθησης για τους εκπαιδευτικούς πρωτοβάθμιας και δευτεροβάθμιας εκπαίδευσης.

Ακολουθεί η δεύτερη προτεραιότητα, δηλαδή «η ενίσχυση των ψηφιακών δεξιοτήτων και ικανοτήτων για τον ψηφιακό μετασχηματισμό των εμπλεκομένων στην εκπαιδευτική διαδικασία» με τις υπόλοιπες 7 δράσεις. Αρχικά, καταρτίζονται οι κατευθυντήριες γραμμές για τους εκπαιδευτικούς και το υπόλοιπο προσωπικό με στόχο την προώθηση του ψηφιακού γραμματισμού και την αντιμετώπιση της παραπληροφόρησης μέσω της εκπαίδευσης και της κατάρτισης. Στη συνέχεια, ακολουθούν δράσεις όπως η επικαιροποίηση του ευρωπαϊκού πλαισίου ψηφιακών ικανοτήτων, ώστε να συμπεριληφθούν η τεχνητή νοημοσύνη και οι σχετικές δεξιότητες με τα δεδομένα, η έκδοση ευρωπαϊκού πιστοποιητικού ψηφιακών δεξιοτήτων και η σύσταση συμβουλίου σχετικά με τη βελτίωση της όλης διαδικασίας. Φυσικά, υπάρχει ανατροφοδότηση του όλου εγχειρήματος με συλλογή δεδομένων από τις εμπλεκόμενες χώρες- μέλη και ορίζονται περίοδοι πρακτικής άσκησης στο πλαίσιο της πρωτοβουλίας «ψηφιακή ευκαιρία». Η Ευρωπαϊκή Ένωση τέλος, δίνει μεγάλη σημασία στη συμμετοχή των γυναικών στις θετικές επιστήμες, την τεχνολογία, τη μηχανική και τα μαθηματικά, δηλαδή τις σπουδές πάνω στα STEM και προσπαθεί να το ενισχύσει αυτό από μικρότερες ηλικίες, σε όλη τη διάρκεια πρωτοβάθμιας και δευτεροβάθμιας εκπαίδευσης, ξεκινώντας από το νηπιαγωγείο.

ΠΕΡΙΓΡΑΦΗ ΠΡΟΓΡΑΜΜΑΤΟΣ

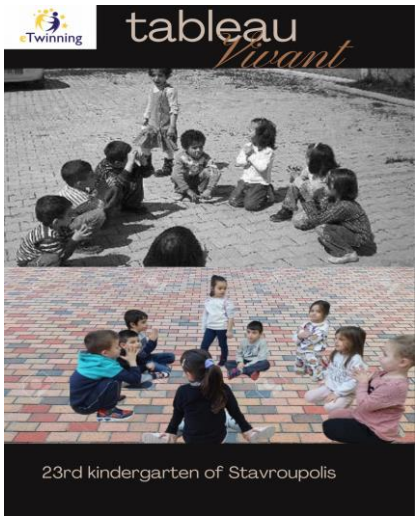
Το έργο αποτελεί ένα ευρωπαϊκό πρόγραμμα διάρκειας 8 μηνών, από τον Οκτώβριο του 2024 ως και τον Μάϊο του 2025. Συμμετείχαν συνολικά 19 εκπαιδευτικοί από 5 ευρωπαϊκές χώρες: Ελλάδα, Ιταλία, Ρουμανία, Πορτογαλία και

Τουρκία.

Το μαθησιακό περιβάλλον οργανώθηκε κατάλληλα δίνοντας έμφαση στις διεργασίες της διερευνητικής, της παιγνιώδους και της συνεργατικής μάθησης . Σύμφωνα με τη διερευνητική μάθηση δίνεται έμφαση στην ενεργό συμμετοχή του παιδιού στη μαθησιακή διαδικασία (Blessinger & Carfora, 2014, όπως παρατίθεται στο Πρόγραμμα Σπουδών για την Προσχολική Εκπαίδευση, 2022). Πρόκειται για μία διαδικασία ανάπτυξης εσωτερικών κινήτρων μάθησης και θετικών στάσεων και συμπεριφορών απέναντι στο καινούριο, που ενισχύει την ικανότητα των παιδιών να ανταποκρίνονται δημιουργικά στις προκλήσεις και οδηγεί στην αγάπη για τη μάθηση, βάζοντας τα θεμέλια για μια διά βίου προοπτική (Penderi, Petrogiannis & McDermott, 2014, όπως παρατίθεται στο Πρόγραμμα Σπουδών για την Προσχολική Εκπαίδευση, 2022). Η διερευνητική μάθηση στηρίζεται στην κονστρουκτιβιστική προσέγγιση, την κοινωνικοπολιτισμική και την ανακαλυπτική μάθηση όπου το παιδί επιστρατεύει τις προγενέστερες γνώσεις του για να ανταποκριθεί στις ανάγκες της διερευνητικής διαδικασίας, χειρίζεται τα αντικείμενα και επενεργεί στο περιβάλλον αποκτώντας νέες εμπειρίες. Επιπλέον στις δραστηριότητες του προγράμματος αποδόθηκαν χαρακτηριστικά παιγνιώδους διάθεσης υποκινούμενα από τα ενδιαφέροντα των παιδιών με σκοπό να κατακτήσουν γνώσεις, να αναπτύξουν στάσεις και δεξιότητες που είναι σημαντικές για την προσωπική τους εξέλιξη και την κατανόηση του κόσμου. Τέλος, μέσω της συνεργατικής μάθησης δόθηκε η ευκαιρία στα παιδιά των συνεργαζόμενων σχολείων να αλληλεπιδράσουν μεταξύ τους, με τους εκπαιδευτικούς αλλά και με τα εργαλεία και τα υλικά που χρησιμοποίησαν, ενισχύοντας με αυτό τον τρόπο την επικοινωνία αλλά και την κριτική τους σκέψη.

Πριν ξεκινήσουμε πρώτα συστηνόμαστε τόσο οι εκπαιδευτικοί όσο και τα σχολεία μας. Περιγράφουμε το μέρος που βρίσκεται το σχολείο μας, αν είναι σε αστική ή αγροτική περιοχή, καθώς και τι ακριβώς κάνουμε, πώς περνάμε τη μέρα μας, σύμφωνα πάντα με το Αναλυτικό Πρόγραμμα Σπουδών για την Προσχολική Αγωγή της κάθε χώρας. Κατόπιν, αναφερόμαστε στον Κώδικα Δεοντολογίας (netiquette), τον οποίο θα εφαρμόσουμε σε όλη τη διάρκεια του προγράμματος και περνάμε στις επιμέρους ενότητες.

Η κεντρική ιδέα του έργου είναι μία βαλίτσα, η οποία καταφθάνει σε κάθε σχολείο, γεμάτη με προσωπικά αντικείμενα και φωτογραφίες μίας γυναίκας, από όταν ήταν μωρό μέχρι και σήμερα. Τα παιδιά παρατηρούν ιδιαίτερα τις φωτογραφίες και ξεκινά μία συζήτηση για τις διαφορές μεταξύ των παλαιότερων φωτογραφιών και των σημερινών, αλλά και τους τρόπους με τους οποίους οι άνθρωποι απαθανάτιζαν στιγμές της ζωής τους στο παρελθόν (μέσω της ζωγραφικής, της φωτογραφίας από κάποιον επαγγελματία που διέθετε τον απαραίτητο φωτογραφικό εξοπλισμό) μέχρι και σήμερα που είναι πολύ εύκολο να φωτογραφίσουμε ακόμη και τον εαυτό μας με ένα κινητό τηλέφωνο, αλλά και να επεξεργαστούμε τις φωτογραφίες μέσω εργαλείων (πχ φίλτρα, αυτοκόλλητα). Το κάθε σχολείο συμπληρώνει έναν ψηφιακό συνεργατικό εννοιολογικό χάρτη σχετικά με αυτά που γνωρίζουν τα παιδιά για την τέχνη της φωτογραφίας, αλλά και αυτά που θέλουν να μάθουν. Σε αυτόν θα ανατρέξουμε στο τέλος του έργου, όταν θα έρθει η ώρα της ανασκόπησης και της αξιολόγησης, για να διαπιστώσουμε κατά πόσο οι στόχοι που είχαμε θέσει επιτεύχθηκαν.



Αρχικά, γίνεται μία διαδικτυακή έρευνα από τα σχολεία σχετικά με την ιστορία της φωτογραφίας και τους σταθμούς- ορόσημα στην εξέλιξή της και συμπληρώνεται μία ιστοριογραμμή και ένα ψηφιακό συνεργατικό έγγραφο. Ξεκινώντας από τον Κινέζο φιλόσοφο Mozi, το 400 π.Χ., ο οποίος θεωρούσε ότι ο άνθρωπος μπορεί να σκηνοθετήσει τη ζωή του και να αλλάξει τις συνθήκες μέσα στις οποίες ζει, απλά αλλάζοντας την οπτική του στα πράγματα. Ο Έλληνας φιλόσοφος Αριστοτέλης το 350 π.Χ. μίλησε πρώτος για τον τρόπο με τον οποίο ταξιδεύει το φως, παρατηρώντας τις ακτίνες του ήλιου κατά τη διάρκεια μίας ηλιακής έκλειψης. Στο σύγγραμμά του «Προβλήματα» περιγράφει την κατασκευή ενός σκοτεινού θαλάμου, μέσα από τον οποίο ταξιδεύει το φως και αντικατοπτρίζει την εξωτερική εικόνα μέσα σ΄ αυτόν, αλλά ανεστραμμένη. Αυτή η κατασκευή αιώνες μετά υπήρξε η έμπνευση για την πρώτη συσκευή φωτογράφισης με το ίδιο όνομα και το 1826 την πρώτη μόνιμη φωτογραφία. Πληροφορούμαστε επίσης για την εξέλιξη της φωτογραφίας από ασπρόμαυρη σε έγχρωμη, τα φωτογραφικά φιλμ, τα είδη των φακών και των φωτογραφικών μηχανών, μέχρι σήμερα που προτιμάμε συνήθως τις ψηφιακές φωτογραφίες, με τη χρήση των κινητών τηλεφώνων, των τάμπλετ, τις οποίες μπορούμε εύκολα να επεξεργαστούμε κιόλας μέσω ψηφιακών εργαλείων, φίλτρων και της Τεχνητής Νοημοσύνης φυσικά.

Στο σημείο αυτό εισάγουμε τα παιδιά στην έννοια της Τεχνητής Νοημοσύνης χρησιμοποιώντας την εργαλειοθήκη του προγράμματος Erasmus+ "I'm not a Robot: working with artificial intelligence in early childhood education". Συστήνουμε τον «Ψηφιακό Βοηθό» και με τη βοήθειά του αναπτύσσονται οι ακόλουθες δραστηριότητες:

- **Ασπρόμαυρη και έγχρωμη φωτογραφία**: Τα παιδιά συνειδητοποιούν τη σημασία των χρωμάτων στη ζωή μας και διαχωρίζουν ασπρόμαυρες και έγχρωμες φωτογραφίες σε ταμπλό.

- **«Tableau vivant- Ζωντανή φωτογραφία»**: Τα παιδιά διαλέγουν ασπρόμαυρες φωτογραφίες από το διαδίκτυο που απεικονίζουν παιδιά να παίζουν και τις αναρτούν σε συνεργατικό έγγραφο. Στη συνέχεια διαλέγουν κάποια/ ες και τη ζωντανεύουν. Τις τοποθετούν μαζί και συγκρίνουν τα αποτελέσματα. (Εικόνες 1α και 1β)

Εικόνα 1α και 1β
Tableau vivant

- **Χρωματισμός ασπρόμαυρης εικόνας με χρήση ΤΝ**: Τα παιδιά διαλέγουν μία εικόνα και προσπαθούν να μαντέψουν τι χρώματα έχει. Στη συνέχεια τη χρωματίζουν χρησιμοποιώντας διάφορα εργαλεία ΤΝ. (Εικόνα 2)

Εικόνα 2
Χρωματισμός ασπρόμαυρης εικόνας με ΤΝ

- **Η έννοια της «Προτροπής»:** Τα παιδιά καλούνται να βάλουν τις φωτογραφίες της γιαγιάς σε χρονολογική σειρά από το παρελθόν προς το παρόν. Στη συνέχεια με τη βοήθεια της ΤΝ φτιάχνουν νέες φωτογραφίες δίνοντας προτροπές, πχ «φτιάξε μου μία φωτογραφία με ένα κορίτσι (γιαγιά) και την οικογένειά της» (Εικόνα 3), «φτιάξε μου μία φωτογραφία με μία κοπέλα (γιαγιά) και τις φίλες της» (Εικόνα 4)

- **Πορτρέτο στη φωτογραφία**: Το κάθε σχολείο γράφει στη γλώσσα του τη λέξη «πορτρέτο» και δημιουργείται ένα πολυγλωσσικό συννεφόλεξο. Τα παιδιά μαθαίνουν για τα διάφορα ρεύματα ζωγραφικής και μελετούν αντιπροσωπευτικούς πίνακες ζωγραφικής του καθενός. Ακολουθεί παρατήρηση πορτρέτων και συζήτηση με τη στρατηγική See- Think- Wonder του Project Zero Visible Thinking routines απ΄ το Harvard University, μια μετασχηματιστική και μαθητοκεντρική προσέγγιση στη μάθηση, με την οποία ενθαρρύνονται οι μαθητές να παρατηρούν, να ερμηνεύουν και να διερευνούν διάφορα θέματα, προωθώντας την κριτική σκέψη και την ενεργό

συμμετοχή στην τάξη. Κατόπιν, γίνεται διαχωρισμός μεταξύ «πορτρέτα- πίνακες» και «πορτρέτα- φωτογραφίες». Επίσης, τα παιδιά μαθαίνουν για την **προσωπογραφία** και την **αυτοπροσωπογραφία**, μελετώντας τα έργα του Picasso. Χρησιμοποιούν κινητές συσκευές (κινητό τηλέφωνο, ταμπλέτα) για να φωτογραφίσουν και να δημιουργήσουν έκθεση με τα πορτρέτα των φίλων τους.

Εικόνα 3
«Φτιάξε μου μια φωτογραφία με ένα κορίτσι και την οικογένειά της»

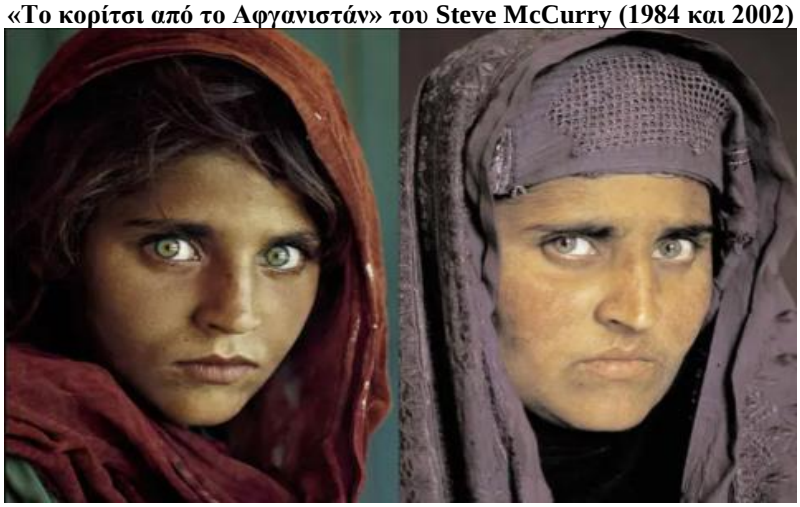
Εικόνα 4
«Φτιάξε μου μία φωτογραφία με μία κοπέλα και τις φίλες της»

- **Τέχνη και ΤΝ:** Τα σχολεία μέσω εποπτικού υλικού έρχονται σε επαφή με τα ρεύματα ζωγραφικής από τον 15ο αι. έως σήμερα. Γίνεται αναφορά στα ιδιαίτερα χαρακτηριστικά της κάθε εποχής και τα παιδιά μελετούν αντιπροσωπευτικούς πίνακες. Στη συνέχεια δημιουργούν μία συνεργατική παρουσίαση. Επιλέγουν έναν πίνακα ζωγραφικής, αναζητούν πληροφορίες στο διαδίκτυο για το όνομα του καλλιτέχνη, το κίνημα ζωγραφικής που εκπροσωπεί, την ιστορία πίσω από τον πίνακα. Επιλέγουν ένα πορτραίτο από τον πίνακα και χρησιμοποιούν εργαλεία τεχνητής νοημοσύνης για να μετατρέψουν το πορτραίτο σε πίνακα ζωγραφικής άλλης εποχής ή κινήματος. (Εικόνα 5,6)

Εικόνα 5
Δημιουργία του πίνακα του Van Gogh από ιμπρεσσιονιστική σε στυλ ροκοκό

Εικόνα 6
«Το κορίτσι με το μαργαριταρένιο σκουλαρίκι» του Johannes Vermeer

- **«Φωτογραφία του δρόμου»:** Πρόκειται για ένα είδος φωτογραφίας που καταγράφει την καθημερινή ζωή σε δημόσιο χώρο. Η ίδια η δημοσιότητα του χώρου επιτρέπει στον φωτογράφο να τραβήξει ειλικρινείς φωτογραφίες αγνώστων, συχνά εν αγνοία τους. Οι φωτογράφοι του δρόμου δεν έχουν απαραίτητα κάποιον κοινωνικό σκοπό στο μυαλό τους, αλλά προτιμούν να απομονώνουν και να αποτυπώνουν στιγμές που διαφορετικά θα μπορούσαν να περάσουν απαρατήρητες. Δίνονται οδηγίες στους γονείς των παιδιών να τα βοηθήσουν να φωτογραφήσουν τους δρόμους έξω από το σπίτι τους και να τις αναρτήσουν σε συνεργατικό διαδικτυακό χάρτη. Έτσι, χρησιμοποιείται η «ανεστραμμένη τάξη», μία εκπαιδευτική μέθοδος «η οποία μεταφέρει την παράδοση του μαθήματος έξω από την αίθουσα διδασκαλίας (κυρίως μέσω βίντεο) προκειμένου να αφιερωθεί περισσότερος χρόνος στην τάξη σε διαδραστικές δραστηριότητες όπου οι μαθητές ασχολούνται ενεργά με το περιεχόμενο της διδασκαλίας» (Flipped Learning Network, 2016).



- «**Ταξιδεύω σε άλλο μέρος**»: Τα παιδιά κάθε σχολείου αναρτούν σε συνεργατικό έγγραφο μία φωτογραφία της πόλης ή του χωριού τους. Στη συνέχεια φωτογραφίζονται ομαδικά στο σχολείο τους. Με τη βοήθεια ψηφιακού εργαλείου αφαιρείται το φόντο από τη φωτογραφία τους. Επιλέγουν μία φωτογραφία από το μέρος που βρίσκεται ένα άλλο σχολείο και προσθέτουν με την ΤΝ τους εαυτούς τους στο μέρος εκείνο. Έτσι, μπορούν να «ταξιδέψουν» σε όποιο μέρος τους αρέσει. (Εικόνα 7)

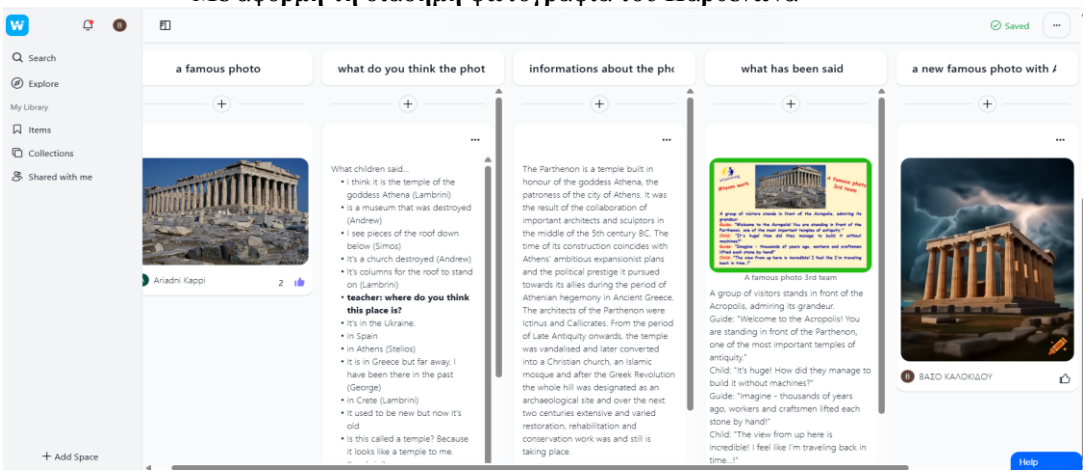
Εικόνα 7
«Ταξιδεύω σε μία άλλη πόλη»

- **Μια διαφορετική βαλίτσα. «Το κορίτσι από το Αφγανιστάν»**: Αφορμή για τη δραστηριότητα είναι η διάσημη φωτογραφία του φωτορεπόρτερ Steve McCurry, που το 1984, στη διάρκεια του Σοβιετοαφγανικού πολέμου απεικόνισε την νεαρή Αφγανή Sharbat Gula, η οποία κατέφυγε πρόσφυγας στο Πακιστάν και δημοσιεύτηκε στο εξώφυλλο του περιοδικού National Geografic(1985). Ο ίδιος φωτογράφος απαθανάτισε το ίδιο κορίτσι, γυναίκα πια, σχεδόν 20 χρόνια μετά (Εικόνα 8). Στη δραστηριότητα εφαρμόζεται το παιδαγωγικό μοντέλο των 5Ε, το οποίο βασίζεται στην εποικοδομητική θεωρία της μάθησης, η οποία υποδηλώνει ότι οι άνθρωποι κατασκευάζουν τη γνώση και το νόημα από τις εμπειρίες τους. Με την κατανόηση και τον αναστοχασμό των δραστηριοτήτων, οι μαθητές είναι σε θέση να συμβιβάσουν τη νέα γνώση με τις προηγούμενες ιδέες. Το μοντέλο 5Ε επικεντρώνεται στο να επιτρέπει στους μαθητές να κατανοήσουν μια έννοια με την πάροδο του χρόνου μέσω μιας σειράς καθορισμένων βημάτων ή φάσεων. Αυτές οι φάσεις περιλαμβάνουν: Ενεργοποίηση, Εξερεύνηση, Εξήγηση, Επεξεργασία και Αξιολόγηση. Τα παιδιά χωρίστηκαν σε ομάδες και δούλεψαν σε σταθμούς μάθησης, οι οποίοι περιελάμβαναν εποπτικό υλικό, βίντεο, φωτογραφίες και αντικείμενα προσφύγων. Ενημερώθηκαν σχετικά με τη σημασία του να είναι κανείς πρόσφυγας, γιατί συμβαίνει αυτό, αφού παρακολούθησαν σχετικά βίντεο και πήραν πληροφορίες, δραματοποίησαν τη ζωή ενός πρόσφυγα. Προβληματίστηκαν σχετικά με τα αντικείμενα που θα έπαιρναν τα ίδια τα παιδιά μαζί τους αν τους συνέβαινε να πρέπει να εγκαταλείψουν το σπίτι τους για να σωθούν και έκαναν ερωτήσεις στο chat gpt, όσα θα ήθελαν να ρωτήσουν το συγκεκριμένο κορίτσι. Δημιούργησαν συνεργατικά ψηφιακά βιβλία (e-books) με αφορμή μία φωτογραφία («λασπωμένα παπούτσια») αν την τοποθετούσαν στην αρχή, στη μέση και στο τέλος της ιστορίας. Τέλος, μετά από ψηφοφορία, αποφάσισαν και δημιούργησαν συνεργατικά μία αφίσα με μηνύματα αγάπης και συμπαράστασης για τους πρόσφυγες.

Εικόνα 8
«Το κορίτσι από το Αφγανιστάν» του Steve McCurry (1984 και 2002)

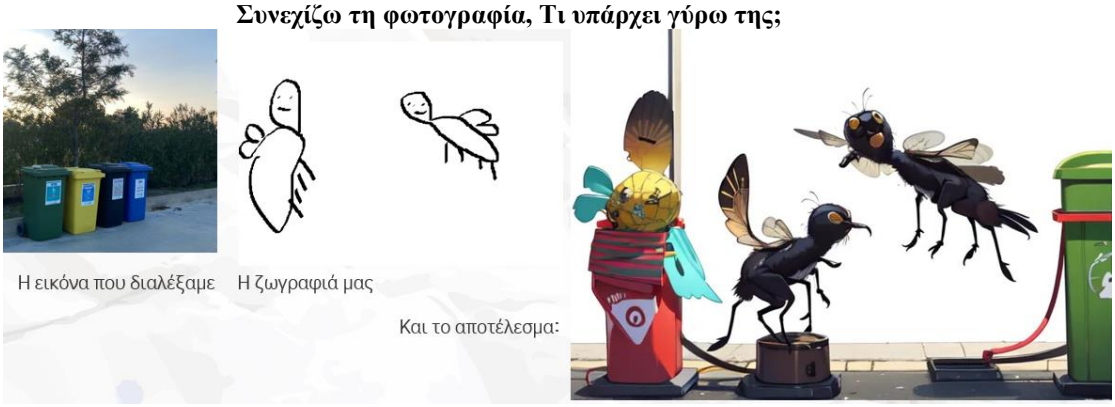
- **Διαγωνισμός φωτογραφίας:** Τα σχολεία σε συνεργατικό συννεφόλεξο αποφασίζουν το θέμα της φωτογραφίας που θα δημιουργήσουν να είναι η «Φαντασία». Στη συνέχεια σε συνεργατικό έγγραφο αποφασίζουν να θέσουν στα εργαλεία Τεχνητής Νοημοσύνης μία κοινή προτροπή και να παράγουν το καθένα σχολείο τη δική του φωτογραφία, ανάλογα με το στυλ που επιθυμεί. Η προτροπή είναι: «Άνοιξε μία μαγική πόρτα και πέρασε σε έναν κόσμο, όπου τα παιδιά βοηθούν έναν μονόκερο να επιστρέψει στο σπίτι του πετώντας πάνω σε ένα ουράνιο τόξο». Η φωτογραφία με τις περισσότερες ψήφους κερδίζει ένα βραβείο, φτιαγμένο από τα παιδιά (Εικόνα 9). Η δραστηριότητα έχει ως στόχους: α) να αναπτύξουν τα παιδιά τη δημιουργικότητά τους πειραματιζόμενα με διαφορετικά στυλ, β) να αποκτήσουν μια βασική κατανόηση του τρόπου λειτουργίας των εικόνων που δημιουργούνται με τεχνητή νοημοσύνη (π.χ. προτροπές, στυλ, παραλλαγές εικόνων), γ) να αναπτύξουν την ικανότητα να εκτιμούν τα έργα τέχνης των άλλων και να συμμετέχουν σε φιλικό ανταγωνισμό να αναπτύξουν την ικανότητα να δίνουν σαφείς υποδείξεις και να αξιολογούν τα αποτελέσματα και δ) να κατανοήσουν ότι οι εικόνες που δημιουργούνται από την ΤΝ βασίζονται σε δεδομένα και υποδείξεις και όχι σε τυχαία δημιουργία.

Εικόνα 9
Η φωτογραφία με τις περισσότερες ψήφους



- **Διάσημες φωτογραφίες:** Σκοπός της δραστηριότητας είναι να παρουσιαστούν στα παιδιά εικόνες που είχαν μεγάλη ιστορική ή κοινωνική επίδραση και να δημιουργήσουν τα ίδια μια νέα διάσημη φωτογραφία. Τα σχολεία χωρίζονται σε ομάδες των 5 μελών, όπου το κάθε μέλος έχει μία αποστολή: Το 1ο μέλος βρίσκει μία διάσημη φωτογραφία από το διαδίκτυο, το 2ο μέλος μαντεύει και γράφει τι νομίζει ότι δείχνει η φωτογραφία, πότε τραβήχτηκε, γιατί τραβήχτηκε κ.λπ. Το 3ο μέλος ψάχνει στο διαδίκτυο για τις πραγματικές πληροφορίες σχετικά με τη φωτογραφία, το 4ο μέλος φαντάζεται και δημιουργεί έναν διάλογο ή κάποιες λέξεις που θα μπορούσαν να έχουν ειπωθεί τη στιγμή που τραβήχτηκε η φωτογραφία και το 5ο μέλος χρησιμοποιεί το εργαλείο craiyon.com για να δημιουργήσει μια νέα διάσημη φωτογραφία με τη βοήθεια της τεχνητής νοημοσύνης, γράφοντας τον τίτλο της φωτογραφίας στο πλαίσιο της προτροπής. (Εικόνα 10)

- **Η γιαγιά μας αφηγείται τη ζωή της:** Στόχος της δραστηριότητας είναι να καταλάβουν οι μαθητές πως η τεχνητή νοημοσύνη μας βοηθά να μετατρέψουμε μία εικόνα σε βίντεο. Η δραστηριότητα πραγματοποιείται σε ζευγάρια που επιλέχτηκαν τυχαία με το διαδικτυακό εργαλείο τυχαίας επιλογής keamk. Τα ζευγάρια συνεργάζονται και χρησιμοποιούν το διαδικτυακό εργαλείο chatterpix kids για να αποδώσουν λόγο και ήχο στην εικόνα.



- **Συνεχίζω τη φωτογραφία. Τι υπάρχει γύρω της;:** Στόχος της δραστηριότητας είναι να κατανοήσουν τα παιδιά ότι με τη βοήθεια της ΤΝ μπορούμε να μετατρέψουμε ένα σκίτσο μας (σε χαρτί ή ψηφιακό) σε χρωματιστή εικόνα. Τα σχολεία διαλέγουν εικόνες από το διαδίκτυο και τις αναρτούν σε συνεργατικό έγγραφο. Στη συνέχεια, το κάθε σχολείο διαλέγει μία εικόνα που του αρέσει και προσπαθεί να φανταστεί τι μπορεί να υπάρχει γύρω της. Το σχεδιάζει (σε χαρτί ή στον υπολογιστή μέσω ενός προγράμματος ζωγραφικής) και κατόπιν, με τη βοήθεια εργαλείων ΤΝ ενώνει τις δύο εικόνες (του διαδικτύου και το σκίτσο) και χρησιμοποιώντας την κατάλληλη προτροπή, παράγεται μία τρίτη εικόνα. (Εικόνα 11)

- **Αξιολόγηση:** Τα παιδιά μέσω εργαλείων ΤΝ γίνονται καρτούν και στέλνουν τις εντυπώσεις τους από το πρόγραμμα και τις ευχές τους στους φίλους τους. (Εικόνα 12)

Εικόνα 10
Με αφορμή τη διάσημη φωτογραφία του Παρθενώνα

Εικόνα 11
Συνεχίζω τη φωτογραφία, Τι υπάρχει γύρω της;

Εικόνα 12
Γινόμαστε καρτούν

ΣΥΜΠΕΡΑΣΜΑΤΑ

Το Ευρωπαϊκό έργο eTwinning: "photo mAgIc - from old photos to AI" που υλοποιήθηκε τη φετινή χρονιά στα Νηπιαγωγεία μας ολοκληρώθηκε έχοντας επιτύχει τους στόχους οι οποίοι είχαν τεθεί αρχικά. Η μάθηση επιτεύχθηκε μέσα από διαδικασίες που ήταν αναπτυξιακά κατάλληλες για τα παιδιά προσχολικής ηλικίας, ήταν ευχάριστες και προωθούσαν την ενεργό συμμετοχή των παιδιών σε καταστάσεις που είχαν νόημα για εκείνα. Το πρόγραμμα έδωσε έμφαση στις διεργασίες της διερευνητικής, της παιγνιώδους και της συνεργατικής μάθησης . Κατάφερε με κατάλληλη παιδαγωγική προσέγγιση να φέρει τα παιδιά σε επαφή με την τεχνητή νοημοσύνη, καλλιεργώντας δεξιότητες που είναι θεμελιώδεις για το μέλλον τους, χωρίς να χάσει την ουσία του παιχνιδιού, της έκφρασης και της δημιουργίας.

Τα παιδιά εξοικειώθηκαν σταδιακά με τα εργαλεία τεχνητής νοημοσύνης καθώς χρησιμοποιήθηκαν αναπτυξιακά κατάλληλα ψηφιακά εργαλεία για να παίξουν, να εκφραστούν και να μάθουν. Αναγνώρισαν και εφάρμοσαν τις ορθές χρήσεις των εργαλείων τεχνητής νοημοσύνης ώστε να καταστούν ψηφιακά εγγράμματα και να αντιληφθούν τη θέση των τεχνολογιών στην κοινωνία και τον πολιτισμό. Ανέπτυξαν τις κοινωνικές δεξιότητές τους, τις δεξιότητες επικοινωνίας και συνεργασίας καθώς εργάστηκαν σε ομάδες και αξιοποίησαν τις δεξιότητές τους για την επίτευξη συλλογικών στόχων.

Τα παιδιά απέκτησαν κριτική σκέψη απέναντι στα εργαλεία ΤΠΕ και τεχνητής νοημοσύνης καθώς παρατήρησαν πως αρκετές φορές τα αποτελέσματα των εργαλείων τεχνητής νοημοσύνης είχαν κάποια «λάθη» (π.χ εικόνες στις οποίες έλειπαν κάποια μέλη του σώματος, δημιουργία ανθρώπων με ασιατικά χαρακτηριστικά κ.α). Παρατήρησαν πως όταν οι προτροπές είναι στην αγγλική γλώσσα τα αποτελέσματα είναι καλύτερα σε σχέση με τις προτροπές στα ελληνικά. Επιπλέον, προβληματίστηκαν σχετικά με την ηθική χρήση της τεχνητής νοημοσύνης και την αξιοπιστία των πληροφοριών που βλέπουμε στον υπολογιστή. Αφορμή ήταν η δραστηριότητα όπου με τη βοήθεια της τεχνητής νοημοσύνης ταξιδέψαμε σε ένα άλλο μέρος.

Τέλος, δεν πρέπει να παραληφθεί ότι από το πρόγραμμα δεν ωφελήθηκαν μόνο οι μαθητές/τριες, αλλά και οι εκπαιδευτικοί, καθώς αναπτύχθηκαν πρακτικές που εφαρμόστηκαν από τους νηπιαγωγούς όλων των συνεργαζόμενων χωρών συμβάλλοντας στη δική τους επιμόρφωση και επαγγελματική τους εξέλιξη.

ΠΕΡΙΛΗΨΗ

Η παρούσα εργασία εξετάζει τις εφαρμογές της Τεχνητής Νοημοσύνης (ΤΝ) στην πρωτοβάθμια εκπαίδευση ,εστιάζοντας στη βελτίωση της μαθησιακής διαδικασίας ,στην εξατομίκευση της μάθησης και στην υποστήριξη των εκπαιδευτικών. Μέσω βιβλιογραφικής επισκόπησης και ανάλυσης των υπαρχουσών εφαρμογών ,αναδεικνύονται οι βασικές χρήσεις της ΤΝ, όπως η προσωποποιημένη μάθηση, η αυτόματη αξιολόγηση, οι έξυπνοι βοηθοί και τα εκπαιδευτικά παιχνίδια**.**

Ιδιαίτερη έμφαση δίνεται στη χρήση της ΤΝ για την ανάπτυξη γλωσσικών δεξιοτήτων ,την ενσωμάτωση μαθητών με ειδικές ανάγκες και την ανάπτυξη γλωσσικών δεξιοτήτων και τη δημιουργία διαδραστικών περιβαλλόντων μάθησης. Στην παρούσα μελέτη, παρουσιάζεται ένα διδακτικό σενάριο για μαθητές/μαθήτριες ΣΤ' Δημοτικού, όπου εργαλεία ΤΝ, όπως το ChatGPT ,το LanguageTool, το Imagine AI και το Book Creator υποστηρίζουν τη διαδικασία παραγωγής γραπτού λόγου, ενισχύοντας τη δημιουργικότητα και τις ψηφιακές δεξιότητες των μαθητών/μαθητριών.

Τα αποτελέσματα δείχνουν ότι η ΤΝ συμβάλλει στη διαφοροποιημένη μάθηση, την ενίσχυση της ενεργούς συμμετοχής και την ανάπτυξη δεξιοτήτων του 21^{ου} αιώνα. Ωστόσο επισημαίνονται προκλήσεις, όπως η ηθική χρήση ,η προστασία προσωπικών δεδομένων και ο ρόλος του/της εκπαιδευτικού. Παρά τα εμπόδια, η ενσωμάτωση της ΤΝ στην εκπαίδευση προσφέρει σημαντικές ευκαιρίες για τον εκσυγχρονισμό της διδακτικής πρακτικής και την ενίσχυση της μαθησιακής εμπειρίας.

Λέξεις – κλειδιά: Τεχνητή Νοημοσύνη, Παραγωγή Λόγου, Εκπαίδευση, Τεχνολογία

ΕΙΣΑΓΩΓΗ

Η Τεχνητή Νοημοσύνη (ΤΝ) έχει αρχίσει να διαδραματίζει σημαντικό ρόλο στην εκπαίδευση, προσφέροντας νέες δυνατότητες στη μαθησιακή διαδικασία (Luckin et al., 2016). Στην πρωτοβάθμια εκπαίδευση ,οι εφαρμογές της ΤΝ συμβάλλουν στην εξατομίκευση της διδασκαλίας, στην προώθηση της ενεργούς συμμετοχής των μαθητών/μαθητριών και στη βελτίωση των γλωσσικών και ψηφιακών τους δεξιοτήτων (Holmes et al., 2019). Ωστόσο, η ενσωμάτωση αυτών των τεχνολογιών συνοδεύεται από προκλήσεις, όπως η ηθική χρήση των δεδομένων και η διατήρηση της παιδαγωγικής αξίας της διδασκαλίας (Selwyn, 2019).

Η παρούσα εργασία εξετάζει τις βασικές εφαρμογές της ΤΝ στην πρωτοβάθμια εκπαίδευση, παρουσιάζει μια μελέτη περίπτωσης σχετικά με τη χρήση εργαλειών ΤΝ στην ανάπτυξη του γραπτού λόγου και συζητά τα οφέλη και τις προκλήσεις που προκύπτουν από την υιοθέτησή της.

ΕΦΑΡΜΟΓΕΣ ΤΗΣ ΤΕΧΝΗΤΗΣ ΝΟΗΜΟΣΥΝΗΣ ΣΤΗΝ ΠΡΩΤΟΒΑΘΜΙΑ ΕΚΠΑΙΔΕΥΣΗ

Προσωποποιημένη Μάθηση

Η ΤΝ επιτρέπει την εξατομίκευση της διδασκαλίας, προσαρμόζοντας το περιεχόμενο και τον ρυθμό μάθησης στις ανάγκες κάθε μαθητή/μαθήτριας (Chen et al., 2020). Προγράμματα όπως τα έξυπνα εκπαιδευτικά λογισμικά αξιολογούν τις δεξιότητες των μαθητών/μαθητριών και παρέχουν προσαρμοσμένα μαθήματα. (Kulik & Fletcher, 2016).

Μερικές από τις εφαρμογές προσωποποιημένης μάθησης είναι το Dreambox Learning, η οποία παρέχει εξατομικευμένα μαθηματικά προσαρμοσμένα στο επίπεδο κάθε μαθητή/μαθήτριας. Χρησιμοποιεί προσαρμοστική τεχνολογία για να παρέχει εξατομικευμένες μαθησιακές εμπειρίες, προσαρμόζοντας τη δυσκολία των ασκήσεων στις ανάγκες του μαθητή/μαθήτριας. Είναι επί πληρωμή.

Το Duolingo είναι μια άλλη εφαρμογή Τεχνητής Νοημοσύνης. Χρησιμοποιείται για την εκμάθηση ξένων γλωσσών ,παρέχοντας εξατομικευμένες ασκήσεις και προσαρμογή της δυσκολίας ανάλογα με την πρόοδο του/της μαθητή/μαθήτριας .Διαθέτει δωρεάν βασική έκδοση με προαιρετική premium συνδρομή.

Έξυπνοι Βοηθοί και Chatbots

Οι ψηφιακοί βοηθοί ,όπως το ChatGPT, μπορούν να υποστηρίξουν τους/τις μαθήτριες στην αναζήτηση πληροφοριών, την εξάσκηση στη γραφή και τη λεκτική επικοινωνία (Wollny et al., 2021). Τα chatbots λειτουργούν ως διαδραστικοί δάσκαλοι, προσφέροντας υποστήριξη με ερωτήσεις και απαντήσεις (Molnar, 2020). Το ChatGPT έχει τόσο δωρεάν όσο και επί πληρωμή εκδόσεις

Gamification και Διαδραστικά Περιβάλλοντα

Η ενσωμάτωση στοιχείων παιχνιδιού στη μάθηση (gamification) αυξάνει τη δέσμευση των μαθητών/μαθητριών (Deterding et al., 2011). Πλατφόρμες που χρησιμοποιούν ΤΝ προσφέρουν διαδραστικά περιβάλλοντα, όπου οι μαθητές /μαθήτριες μαθαίνουν μέσω παιχνιδιών και προκλήσεων (Hamari et al., 2014). Μία από τις πιο δημοφιλείς διαδραστικές πλατφόρμες προγραμματισμού είναι το Scratch, η οποία επιτρέπει στους/στις μαθητές /μαθήτριες να δημιουργούν τα δικά τους παιχνίδια και ιστορίες και είναι *εντελώς δωρεάν* .*Ένα άλλο διαδραστικό εργαλείο* κουίζ που επιτρέπει στους/στις μαθητές/μαθήτριες να μαθαίνουν μέσω παιχνιδιού είναι το Kahoot , το οποίο είναι δωρεάν *με premium επιλογές.*

Αυτόματη Αξιολόγηση

Η ΤΝ επιτρέπει την αυτόματη διόρθωση εργασιών ,τη δημιουργία εξατομικευμένων σχολίων και την παροχή άμεσης ανατροφοδότησης στους/στις μαθητές/μαθήτριες (Jordan, 2020), διευκολύνοντας τους/τις εκπαιδευτικούς στη διαχείριση των μαθησιακών επιδόσεων (Chassignol et al., 2018).Τέτοιες εφαρμογές είναι το Google Forms & Quizzes, οι οποίες επιτρέπουν τη δημιουργία αυτοματοποιημένων ερωτηματολογίων με άμεση βαθμολόγηση και ανατροφοδότηση και είναι δωρεάν. Άλλες εφαρμογές δωρεάν αλλά με premium επιλογές είναι το Quizziz , και το Socrative ,οι οποίες παρέχουν διαδραστικά κουίζ με δυνατότητα αυτόματης αξιολόγησης και ανάλυσης απόδοσης. Επίσης το Edpuzzle δίνει τη δυνατότητα στους/στις εκπαιδευτικούς να προσθέσουν ερωτήσεις σε βίντεο και να λαμβάνουν αυτόματη αξιολόγηση των απαντήσεων. Είναι δωρεάν με περιορισμούς.

Υποστήριξη Μαθητών με Ειδικές Ανάγκες

Η ΤΝ συμβάλλει στην εκπαίδευση μαθητών/μαθητριών με ειδικές ανάγκες μέσω προγραμμάτων αναγνώρισης ομιλίας, μετατροπής κειμένου σε ομιλία και εργαλείων που προσαρμόζουν το εκπαιδευτικό περιεχόμενο στις ανάγκες κάθε μαθητή/μαθήτριας (Aroyo & Dicheva, 2004). Παραδείγματα τέτοιων εφαρμογών είναι Google Text-to-Speech, το Microsoft Immersive Reader ,το Speech Central τα οποία είναι δωρεάν για χρήση με ορισμένους περιορισμούς.

ΠΕΡΙΓΡΑΦΗ ΔΙΔΑΚΤΙΚΗΣ ΠΡΟΤΑΣΗΣ

Τίτλος εκπαιδευτικού σεναρίου: «Ακούω πολύ θόρυβο στο σχολείο από τα αυτοκίνητα. Τι μπορεί να γίνει για να βελτιωθεί η κατάσταση;» Δημοσίευση ενός άρθρου στη διαδικτυακή τοπική εφημερίδα.
Τάξη στην οποία απευθύνεται: Στ' Δημοτικού
Χρόνος υλοποίησης του σεναρίου:2 Διδακτικές ώρες
Εμπλεκόμενες Γνωστικές Περιοχές: Γλώσσα, Πληροφορική, Αισθητική Αγωγή

Προαπαιτούμενες γνώσεις μαθητών/μαθητριών

Ως προς το γνωστικό αντικείμενο οι μαθητές/μαθήτριες έχουν αποκτήσει τις βασικές δεξιότητες γραφής άρθρου (δομή, εισαγωγή, ανάπτυξη, συμπεράσματα), έχουν εξασκηθεί στη χρήση επιχειρημάτων και τεκμηρίωσης για την υποστήριξη προτάσεων και γνωρίζουν βασικούς ορθογραφικούς και γραμματικούς κανόνες.

Ως προς τις ψηφιακές δεξιότητες οι μαθητές/μαθήτριες είναι εξοικειωμένοι/ες με τη χρήση υπολογιστή, την πλοήγηση στο διαδίκτυο, τη γραφή προτάσεων στον επεξεργαστή κειμένου και έχουν εξασκηθεί στις βασικές λειτουργίες των χρησιμοποιούμενων λογισμικών (λογισμικά εννοιολογικής χαρτογράφησης ,οπτικοποίησης αλλά και λογισμικά ανάπτυξης της δημιουργικότητας ,καθώς επίσης και με τη χρήση διαδικτυακών πλατφόρμων για τη δημοσίευση άρθρων.

Γενικός σκοπός και στόχοι του σεναρίου

Οι μαθητές/μαθήτριες να αναπτύξουν δεξιότητες γραπτού λόγου και κριτικής σκέψης, διερευνώντας ένα πραγματικό πρόβλημα του σχολείου τους (θόρυβος από τα αυτοκίνητα) και διατυπώσουν τεκμηριωμένες προτάσεις για την αντιμετώπισή του, αξιοποιώντας σύγχρονα εργαλεία Τεχνητής Νοημοσύνης (ΤΝ).

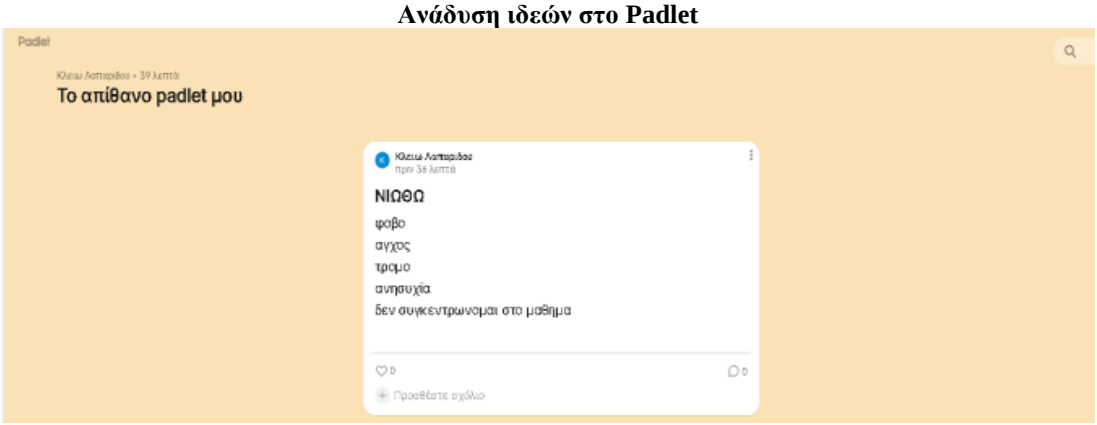
Ως προς τη γνωστική διαδικασία οι μαθητές/μαθήτριες να είναι σε θέση
- Να κατανοήσουν τη δομή και τα χαρακτηριστικά ενός άρθρου γνώμης.
- Να εξασκηθούν στη διατύπωση επιχειρημάτων και προτάσεων με σαφήνεια.
- Να ενισχύσουν τη δεξιότητα κριτικής σκέψης, αξιολογώντας την κατάσταση και προτείνοντας λύσεις.

Ως προς τη χρήση εφαρμογών ΤΝ
- Να χρησιμοποιήσουν εργαλεία ΤΝ (π.χ ChatGPT) για την αναδιαμόρφωση και βελτίωση του κειμένου τους.
- Να εφαρμόσουν εργαλεία γλωσσικού ελέγχου (π.χ Language Tool,) για τη διόρθωση γραμματικών και συντακτικών λαθών.
- Να δημιουργήσουν εικόνες με ΤΝ imagine και το Book Creator για την ενίσχυση του άρθρου τους.
- Να χρησιμοποιήσουν την εφαρμογή Padlet.

Ως προς τη μαθησιακή διαδικασία
- Να συνεργαστούν σε ομάδες για τη συλλογή πληροφοριών και τη σύνταξη του άρθρου.
- Να παρουσιάσουν τις απόψεις τους και να αναπτύξουν δεξιότητες επιχειρηματολογίας.
- Να δημοσιεύσουν το άρθρο τους σε μια διαδικτυακή πλατφόρμα, ενισχύοντας τη σύνδεση της μάθησης με την πραγματική ζωή.

Υλικοτεχνική Υποδομή

Οι μαθητές/μαθήτριες εργάζονται σε ανομοιογενείς ομάδες των τριών ή τεσσάρων ατόμων στο εργαστήριο Πληροφορικής. Στην επιφάνεια εργασίας των Ηλεκτρονικών Υπολογιστών θα υπάρχουν εγκατεστημένες εφαρμογές Τ.Ν ChatGPT, Language Tool, Imagine και Book Creator.

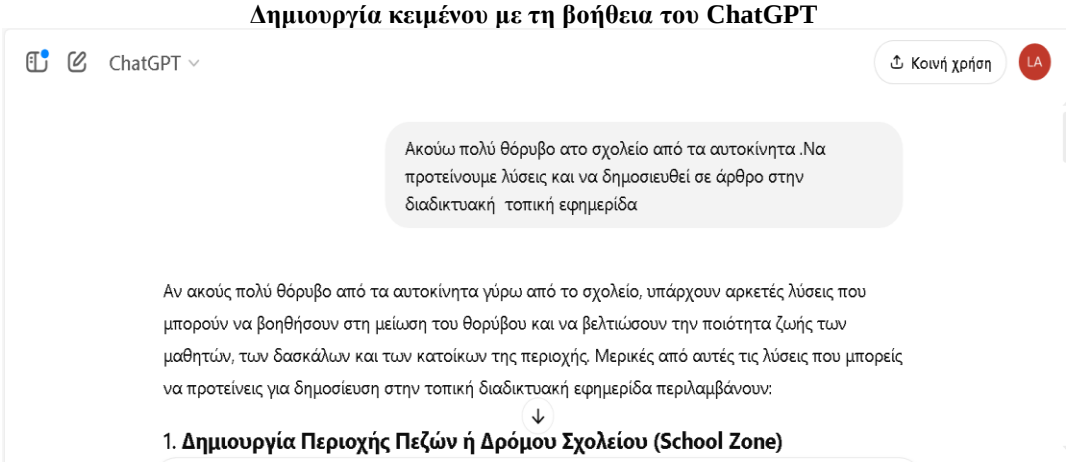


Περιγραφή δραστηριοτήτων σεναρίου

Στην αρχή γίνονται κάποιες δραστηριότητες ψυχολογικής και γνωστικής προετοιμασίας για την αποτίμηση υπάρχουσας γνώσης και ανίχνευση αναπαραστάσεων και γνωστικών δυσκολιών.

Στόχος: Ανάδυση ιδεών και προβληματισμός των μαθητών/μαθητριών σχετικά με τον θόρυβο που προκαλείται από τα αυτοκίνητα δίπλα στο σχολείο. Εξαιτίας του γεγονότος ότι το Δημοτικό Σχολείο Δρεπάνου-Κοζάνης βρίσκεται δίπλα σε κεντρικό δρόμο, η ενεργοποίηση των μαθητών γίνεται ακούγοντας πραγματικό θόρυβο από τα αυτοκίνητα έξω από το σχολείο. Ο/Η εκπαιδευτικός ζητάει τη διερεύνηση του προβλήματος και προσπαθεί να ανιχνεύσει τα αρνητικά συναισθήματα που προκαλούνται στους/στις μαθητές/μαθήτριες. Ύστερα από συζήτηση γίνεται καταγραφή των ιδεών στο Padlet.

Το Padlet είναι ένας ψηφιακός πίνακας ανακοινώσεων με πολλές δυνατότητες όπως το να γράφουν κείμενο, να ανεβάζουν εικόνες και βίντεο. Το σημαντικό στοιχείο του λογισμικού είναι πως όλοι οι συμμετέχοντες μπορούν να δουν τις αναρτήσεις των άλλων ομάδων και να αλληλεπιδρούν ταυτόχρονα.



Εικόνα 1
Ανάδυση ιδεών στο Padlet

Έπειτα ο, η εκπαιδευτικός προτείνει στα παιδιά την ιδέα να γράψουν ένα άρθρο με θέμα:
«Ακούω πολύ θόρυβο στο σχολείο από τα αυτοκίνητα. Τι μπορεί να γίνει για να βελτιωθεί η κατάσταση;» Το άρθρο αυτό μπορεί να δημοσιευτεί στην διαδικτυακή τοπική εφημερίδα προτείνοντας λύσεις αντιμετώπισης του προβλήματος. Η συγγραφή του άρθρου θα γίνει με τη βοήθεια εφαρμογών Τεχνητής Νοημοσύνης.

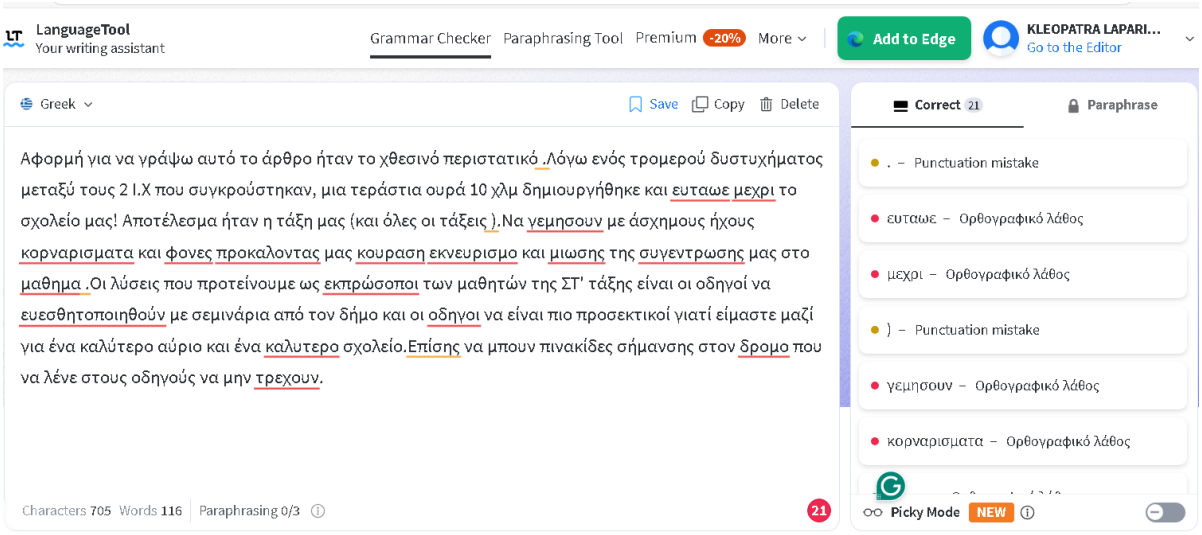
Ο ρόλος του/της εκπαιδευτικού καθ' όλη την διάρκεια της συγγραφής είναι καθοδηγητικός και υποστηρικτικός. Αρχικά τα παιδιά ανά ομάδες γράφουν στο τετράδιό τους, αφού συζητήσουμε στην τάξη ποια προβλήματα δημιουργεί ο θόρυβος στο σχολείο από τα αυτοκίνητα , τις ιδέες τους για πιθανές λύσεις που θα μπορούσαν να δοθούν για την αντιμετώπιση του προβλήματος. Οι λύσεις καταγράφονται στο Padlet.

Εικόνα 2
Δημιουργία κειμένου με τη βοήθεια του ChatGPT

Εφαρμογή ChatGPT

Στη συνέχεια οι μαθητές/τριες ανοίγουν την εφαρμογή ChatGpt στους υπολογιστές τους και προσπαθούν να βελτιώσουν το κείμενό τους. Η εφαρμογή ChatGPT διορθώνει, βελτιώνει και προτείνει ιδέες για κείμενα. Βοηθά στη συγγραφή ιστοριών, άρθρων ,ποιημάτων και άλλων δημιουργικών κειμένων.

Το ChatGPT προσφέρει στρατηγικές για να γίνει το κείμενο ακόμη πιο επαγγελματικό , οπότε οι μαθητές/μαθήτριες επεξεργάζονται το κείμενό τους και με τη βοήθεια της Τεχνητής Νοημοσύνης καταλήγουν στο τελικό άρθρο που θα σταλεί στη διαδικτυακή εφημερίδα.



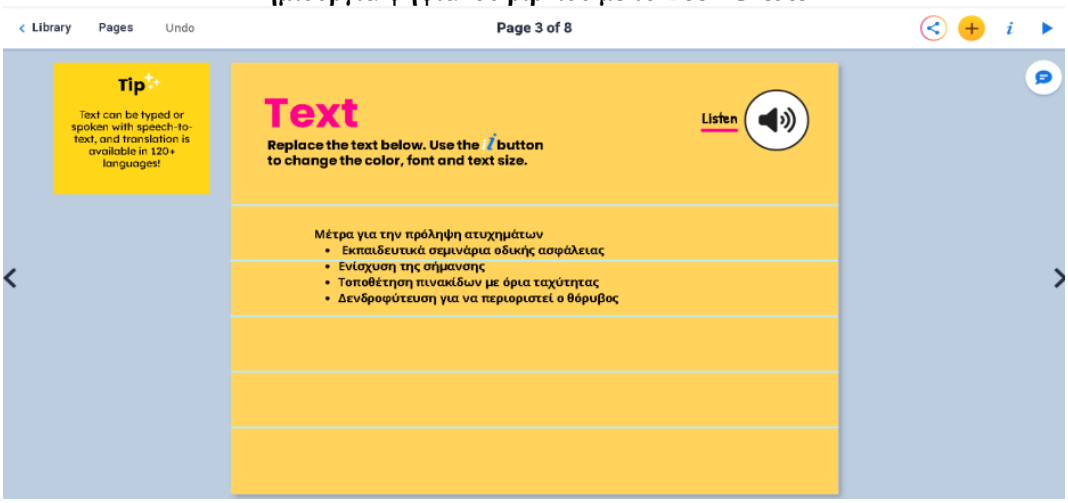
Εφαρμογή Language Tool

Έπειτα ,αφού γίνει η επιλογή του τελικού άρθρου, οι μαθητές/μαθήτριες πληκτρολογούν το άρθρο στην εφαρμογή Language Tool. Η εφαρμογή LanguageTool είναι ένα εργαλείο διόρθωσης κειμένων που παρέχει βοήθεια σε πολλές γλώσσες, συμπεριλαμβανομένων των ελληνικών. Εντοπίζει και προτείνει διορθώσεις για ορθογραφικά, γραμματικά και συντακτικά λάθη στο κείμενο. Εξετάζει τη σύνταξη και προτείνει αλλαγές για να γίνει το κείμενο πιο κατανοητό και επαγγελματικό.

Τα παιδιά συζητούν και ανταλλάσουν ιδέες μεταξύ τους, αναφέρονται στον τρόπο εργασίας τους, σε τυχόν προβλήματα που αντιμετώπισαν, εκφράζουν τις σκέψεις και τα συναισθήματά τους για τη διαδικασία και το παραγόμενο υλικό.

Μέσω της εφαρμογής γίνεται αυτόματη διόρθωση των άρθρων τους και βγαίνουν στατιστικά στοιχεία σχετικά με το ποσοστό γραμματικών και ορθογραφικών λαθών που υπάρχουν.

Εικόνα 3.
Διόρθωση κειμένου ορθογραφικά και γραμματικά με το Language Tool

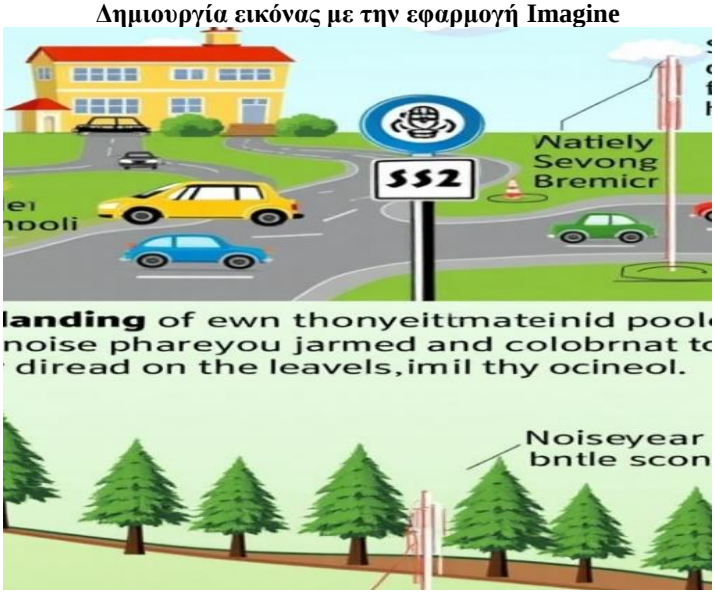


Εφαρμογή Book Creator

Αφού ολοκληρωθεί το άρθρο γραμματικά και συντακτικά τα παιδιά προτείνουν να γίνει ένα ψηφιακό βιβλίο εισάγοντας ήχο και εικόνα για να προσελκύσουν ακόμη περισσότερο το ενδιαφέρον των πολιτών και της Δημοτικής αρχής του τόπου. Αυτό θα γίνει αξιοποιώντας τη χρήση της Τεχνητής Νοημοσύνης χρησιμοποιώντας την εκπαιδευτική εφαρμογή Book Creator. Το ψηφιακό βιβλίο μπορεί να κοινοποιηθεί σε μαθητές/μαθήτριες ,γονείς και κοινότητες μέσω cloud

Το Book Creator επιτρέπει τη δημιουργία ψηφιακών βιβλίων και χρησιμοποιείται ευρέως σε σχολεία και εκπαιδευτικά περιβάλλοντα για να βοηθήσει μαθητές/μαθήτριες και εκπαιδευτικούς να δημιουργούν ,να μοιράζονται και

να διαβάζουν διαδραστικά βιβλία. Οι χρήστες μπορούν να γράφουν κείμενα, να προσθέτουν εικόνες, σχέδια, ηχητικά αποσπάσματα και βίντεο. Υποστηρίζει αφήγηση και ηχογράφηση, καθιστώντας το ιδανικό για πολυτροπικά βιβλία.



Εικόνα 4
Δημιουργία ψηφιακού βιβλίου με το Book Creator

Εφαρμογή Imagine

Τα παιδιά χρησιμοποιούν την εφαρμογή Imagine για να προσθέσουν εικόνα στο άρθρο τους. Η εφαρμογή Imagine χρησιμοποιεί την τεχνολογία τεχνητής νοημοσύνης για να δημιουργεί εικόνες από κείμενα (text-to-image), ο χρήστης δηλαδή μπορεί να πληκτρολογήσει μια περιγραφή ή μια ιδέα και η εφαρμογή δημιουργεί μια εικόνα που αντιπροσωπεύει αυτή την περιγραφή.

Εικόνα 5
Δημιουργία εικόνας με την εφαρμογή Imagine

Εντυπώσεις των παιδιών από την υλοποίηση του σεναρίου

Η υλοποίηση του σεναρίου «Ακούω πολύ θόρυβο στο σχολείο από τα αυτοκίνητα. Τι μπορεί να γίνει για να βελτιωθεί η κατάσταση;», δημοσίευση ενός άρθρου στη διαδικτυακή τοπική εφημερίδα, άφησε θετικές εντυπώσεις στους μαθητές/μαθήτριες ,τόσο ως προ το θέμα όσο και ως προς τις μεθόδους που χρησιμοποιήθηκαν. Εστιάζοντας ιδιαίτερα στην ενσωμάτωση της Τεχνητής Νοημοσύνης (AI) τα παιδιά εντυπωσιάστηκαν από τα εργαλεία AI που χρησιμοποιήθηκαν, όπως οι αυτόματες προτάσεις βελτίωσης των κειμένων. Έδειξαν ενθουσιασμό στο πως η AI μπορεί να συμβάλλει στη συλλογή και ανάλυση δεδομένων. Ενισχύθηκε η δημιουργική γραφή και η παραγωγή περιεχομένου

και η συγγραφή και η διόρθωση του άρθρου έγινε πιο εύκολη και πιο ενδιαφέρουσα με τη χρήση της Τεχνητής Νοημοσύνης . Πολλά παιδιά ανέφεραν ότι ένιωσαν πιο σίγουρα για τις ιδέες τους ,αφού μπορούσαν να λαμβάνουν άμεσες προτάσεις και να βελτιώνουν το κείμενό τους. Οι μαθητές/μαθήτριες οπτικοποίησαν τα δεδομένα τους με την Τεχνητή Νοημοσύνη και θεώρησαν ότι αυτό έκανε το άρθρο τους πιο εκλυστικό. Τα παιδιά εντυπωσιάστηκαν από το πώς η τεχνολογία μπορεί να μετατρέψει ένα κείμενο, έναν προβληματισμό σε ένα οπτικά ενδιαφέρον αποτέλεσμα. Επίσης ,το γεγονός ότι το άρθρο τους θα δημοσιευτεί σε μια τοπική διαδικτυακή εφημερίδα τα έκανε να νιώσουν ότι η φωνή τους έχει αξία και αντίκτυπο και ότι συμμετέχουν σε ένα πραγματικό πρόβλημα που αφορά όλους και όλες. Μερικά παιδιά εξέφρασαν τη χαρά τους και την ικανοποίησή τους που μπορούν να προτείνουν λύσεις και να ευαισθητοποιήσουν την κοινότητα.

Δυσκολίες και προβληματισμοί κατά την υλοποίηση του σεναρίου

Εξαιτίας του γεγονότος ότι οι μαθητές/μαθήτριες δεν είναι εξοικειωμένοι/ες ακόμη με τις διάφορες εφαρμογές της ΤΝ χρειάστηκε αρκετός χρόνος και περισσότερη καθοδήγηση από τον/την εκπαιδευτικό της τάξης. Ιδιαίτερα σημαντική ήταν η συμβολή και η πολύτιμη βοήθεια του πληροφορικού του σχολείου μας για περαιτέρω διευκρινήσεις γύρω από τη αξιοποίηση των εφαρμογών. Επιπροσθέτως, υπήρξαν αρκετά τεχνικά προβλήματα και εμπόδια ως προς τη σύνδεση με το διαδίκτυο τα οποία γρήγορα ξεπεράστηκαν. Κάποιοι/ες μαθητές/τριες εξέφρασαν τις ενστάσεις τους για την αξιοπιστία των πληροφοριών που παρέχουν οι εφαρμογές ΤΝ. Αυτό έδωσε το έναυσμα για ενδιαφέρουσες συζητήσεις μέσα στην τάξη και την ανάγκη κριτικής σκέψης και διασταύρωσης δεδομένων.

Μαρτυρίες των παιδιών σχετικά με το διδακτικό σενάριο

"Ήταν σαν να γίναμε μικροί δημοσιογράφοι! Μάθαμε πώς να γράφουμε καλύτερα και να χρησιμοποιούμε νέα εργαλεία !"

"Δεν ήξερα ότι η τεχνητή νοημοσύνη μπορεί να βοηθήσει σε περιβαλλοντικά θέματα! Μπορούμε να τη χρησιμοποιήσουμε και σε άλλα προβλήματα; "

"Είναι ωραίο να βλέπουμε τη δουλειά μας δημοσιευμένη. Νιώθουμε ότι προσφέρουμε κάτι στην κοινότητα!

ΣΥΜΠΕΡΑΣΜΑΤΑ

Οι μαθητές βίωσαν το σενάριο ως μια καινοτόμο και διαδραστική εμπειρία. Η χρήση της Τεχνητής Νοημοσύνης ενίσχυσε την ερευνητική τους διάθεση, τη δημιουργικότητά τους και την αίσθηση συμμετοχής σε μια πραγματική κοινωνική δράση. Παρά τις δυσκολίες, η συνολική τους στάση ήταν θετική, με ενδιαφέρον για περαιτέρω διερεύνηση της AI στην εκπαίδευση.

ΠΡΟΤΑΣΕΙΣ ΒΕΛΤΙΩΣΗΣ ΤΟΥ ΕΚΠΑΙΔΕΥΤΙΚΟΥ ΣΕΝΑΡΙΟΥ

Με βάση τις εμπειρίες των μαθητών/μαθητριών και τις εντυπώσεις που καταγράφηκαν προτείνονται τρόποι βελτίωσης του σεναρίου με έμφαση στην καλύτερη ενσωμάτωση της Τεχνητής Νοημοσύνης και τη διευκόλυνση της μαθησιακής διαδικασίας. Οι μαθητές/μαθήτριες μπορούν να πειραματιστούν περισσότερο με εργαλεία όπως το ChatGPT ή το Grammarly, ζητώντας προτάσεις για τίτλους, τρόπους ενίσχυσης επιχειρημάτων ή δομής άρθρου. Οι μαθητές/μαθήτριες μπορούν να αξιοποιήσουν εργαλεία AI για γραφιστική (π.χ Canva AI) ώστε να δημιουργήσουν αφίσες ή ακόμα και βίντεο που θα παρουσιάζουν το πρόβλημα της ηχορύπανσης και τις λύσεις που προτείνουν. Θα μπορούσε να προστεθεί ένα διαδραστικό quiz όπου οι μαθητές/μαθήτριες θα συζητήσουν τα οφέλη και τους κινδύνους της AI στη δημοσιογραφία και την περιβαλλοντική ευαισθητοποίηση και να γίνει με αυτόν τον τρόπο αξιολόγηση των διαδραστικών δραστηριοτήτων. Όλες αυτές οι βελτιώσεις μπορούν να κάνουν το σενάριο πιο εμπλουτισμένο, διαδραστικό και προσαρμοσμένο στις σύγχρονες δεξιότητες των μαθητών/μαθητριών. Η καλύτερη αξιοποίηση της AI και η ενίσχυση της συνεργασίας με την κοινότητα μπορούν να αυξήσουν τον αντίκτυπο της δράσης και να προσφέρουν στους/στις μαθητές/μαθήτριες μια ουσιαστική εμπειρία.

ΗΘΙΚΑ ΔΙΛΗΜΜΑΤΑ ΓΥΡΩ ΑΠΌ ΤΗΝ ΤΕΧΝΗΤΗ ΝΟΗΜΟΣΥΝΗ, ΠΡΟΣΤΑΣΙΑ ΠΡΟΣΩΠΙΚΩΝ ΔΕΔΟΜΕΝΩΝ ΚΑΙ Ο ΡΟΛΟΣ ΤΟΥ ΔΑΣΚΑΛΟΥ

Η Τεχνητή Νοημοσύνη(AI) έχει εισέλθει δυναμικά στην εκπαίδευση, δημιουργώντας τόσο ευκαιρίες όσο και προβληματισμούς. Η χρήση της από μαθητές/μαθήτριες και εκπαιδευτικούς συνοδεύεται από ηθικά διλήμματα, ζητήματα προστασίας προσωπικών δεδομένων και την ανάγκη επαναπροσδιορισμού του ρόλου του δασκάλου/δασκάλας.

Ηθικά Διλήμματα στη χρήση της AI στην εκπαίδευση

Η AI αλλάζει ριζικά τον τρόπο που οι μαθητές/μαθήτριες αναζητούν πληροφορίες, δημιουργούν περιεχόμενο και αλληλεπιδρούν με τη γνώση. Ωστόσο αυτό εγείρει σημαντικά ηθικά ζητήματα όπως η αξιοπιστία και η παραπληροφόρηση . Οι αλγόριθμοι δεν είναι αλάνθαστοι και μπορεί να παράγουν λανθασμένες ή παραπλανητικές πληροφορίες (Bender, Gebru, McMillan-Major, & Shmitchell, 2021).Οι μαθητές πρέπει να μαθαίνουν να ελέγχουν την εγκυρότητα των πηγών. Ακόμη, σύμφωνα με τον Selwyn (2019) υποθιστάται η δημιουργικότητα των μαθητών/μαθητριών, καθώς μειώνεται η κριτική σκέψη τους και η αυτενέργειά τους, αν βασίζονται στην Τεχνητή Νοημοσύνη για την παραγωγή κειμένων ,αφισών ή ερευνών. Επίσης, πρέπει να υπάρχει διαφάνεια και δεοντολογία. Όταν η AI συμμετέχει στη συγγραφή άρθρων ή στην ανάλυση δεδομένων, τίθεται το ερώτημα :ποιος/ποια είναι ο/η πραγματικός δημιουργός**; Οι μαθητές/μαθήτριες πρέπει να γνωρίζουν ότι η ηθική χρήση της AI απαιτεί στη συμβολή της τεχνολογίας** (Floridi & Cowls, 2019).

Προστασία προσωπικών δεδομένων

Η χρήση AI στην εκπαίδευση απαιτεί αυξημένη προσοχή στα προσωπικά δεδομένα των μαθητών/μαθητριών. Πρέπει να υπάρχει αυξημένη προσοχή στη συλλογή και αποθήκευση δεδομένων. Πολλά εργαλεία AI καταγράφουν δεδομένα χρηστών ,δημιουργώντας ανησυχίες για την ιδιωτικότητα και την ασφάλεια(Zuboff, 2019). Οι μαθητές/μαθήτριες πρέπει να γνωρίζουν ποια δεδομένα κοινοποιούν και πώς χρησιμοποιούνται. Σύμφωνα με τον West (2019) ο/η εκπαιδευτικός πρέπει να εκπαιδεύσει τους /τις μαθητές/μαθήτριες στον ψηφιακό αλφαβητισμό και να τους/τις εξηγήσει πώς να προστατεύουν τα προσωπικά τους στοιχεία ,να αποφεύγουν την καταχώρηση ευαίσθητων δεδομένων και να κατανοούν τους όρους χρήσης των εφαρμογών AI.Ακόμη οι μαθητές/μαθήτριες πρέπει να προβληματιστούν σχετικά με την ηθική χρήση των δεδομένων και το ποιος ελέγχει την AI και αν οι αλγόριθμοι αναπαράγουν κοινωνικές ανισότητες (Noble, 2018).

Ο ρόλος του/της εκπαιδευτικού στην Τεχνητή Νοημοσύνη

Ο/Η εκπαιδευτικός δεν αντικαθιστάται από την AI. Αντίθετα ,ο ρόλος του/της γίνεται ακόμα πιο χρήσιμος. Είναι σημαντικό να διδάξει στους/στις μαθητές/μαθήτριες πώς να χρησιμοποιούν την Τεχνητή Νοημοσύνη ως εργαλείο ενίσχυσης της μάθησης και όχι ως υποκατάστατο της σκέψης (Luckin, 2018). Ο ρόλος του/της εκπαιδευτικού δεν είναι απλά να διδάσκει ,αλλά να καθοδηγεί τους/τις μαθητές/μαθήτριες στην εξερεύνηση και κατανόηση της AI με έναν ισορροπημένο τρόπο (Holmes, Bialik, & Fadel, 2019).

Η AI στην εκπαίδευση φέρνει μεγάλες προκλήσεις αλλά και ευκαιρίες .Ο/Η δάσκαλος/α πρέπει να λειτουργεί ως διαμεσολαβητής ανάμεσα στην τεχνολογία και την ηθική χρήση της, διασφαλίζοντας ότι οι μαθητές/μαθήτριες αναπτύσσουν κριτική σκέψη, ψηφιακή υπευθυνότητα και συνείδηση γύρω από την προστασία προσωπικών δεδομένων.

ΠΕΡΙΛΗΨΗ

Στις μέρες μας εκατομμύρια μαθητές παγκοσμίως δεν έχουν εξασφαλισμένο ένα ασφαλές σχολικό περιβάλλον, καθώς σε σχολεία ανά την υφήλιο τα παιδιά και οι έφηβοι μαθαίνουν να ζουν με τον φόβο ως συνέπεια του σχολικού εκφοβισμού. Η σχετική μελέτη αναδεικνύει τη σοβαρότητα και τη περιπλοκότητα του κοινωνικού φαινομένου που ονομάζεται σχολικός εκφοβισμός. Την τελευταία δεκαετία, κυρίως συνεπεία της γρήγορης ψηφιοποίησης, οι εφαρμογές για κινητές συσκευές και ηλεκτρονικούς υπολογιστές επηρεάζουν καθοριστικά τις ζωές των παιδιών καθώς οι μαθητές σε σημαντικό βαθμό ζουν και μαθαίνουν μέσα από αυτές. Σκοπός της παρούσας μελέτης είναι να ενισχύσει την κατανόησή μας σχετικά με τον τρόπο με τον οποίο οι έξυπνες, διαδραστικές τεχνολογίες συμβάλλουν στη μάθηση και στην ενδυνάμωση των χρηστών των εφαρμογών που στοχεύουν στην καταπολέμηση του σχολικού εκφοβισμού.

Λέξεις – κλειδιά: Σχολικός εκφοβισμός, τεχνητή νοημοσύνη, εφαρμογές κατά του σχολικού εκφοβισμού.

ΕΙΣΑΓΩΓΗ

Το σχολείο διεθνώς διαδραματίζει ένα πολύπλευρο και πολυεπίπεδο ρόλο στην εξέλιξη των μαθητών. Παράλληλα στις μέρες μας οι εκπαιδευτικοί δεν έχουν μονοδιάστατο ρόλο, καθώς εκτός από τη μετάδοση γνώσεων και στη διευκόλυνση της μαθησιακής διαδικασίας, οφείλουν να στοχεύουν και στην ολόπλευρη ψυχοκοινωνική, συναισθηματική και σωματική ανάπτυξη των μαθητών ώστε αυτοί να μπορούν να ανταποκριθούν στις σύγχρονες προκλήσεις και απειλές της κοινωνίας (Artinopoulou et al, 2016). Μεταξύ άλλων ο ρόλος των εκπαιδευτικών στην πρόληψη, τον εντοπισμό και την αντιμετώπιση του σχολικού εκφοβισμού είναι κεφαλαιώδους σημασίας, καθώς συχνά είναι οι πρώτοι που καλούνται να διαχειριστούν τέτοιου είδους περιστατικά. Γενικότερα οι εκπαιδευτικοί παίζουν καθοριστικό ρόλο στην προώθηση ενός ασφαλούς σχολικού περιβάλλοντος, στο οποίο κάθε μαθητής αισθάνεται ότι ανήκει και γίνεται αποδεκτός. Βασική στόχευση η δημιουργία μιας σχολικής πολιτικής πρόληψης της σχολικής βίας και του εκφοβισμού, στην οποία οι εκπαιδευτικοί μπορούν να επηρεάσουν ουσιαστικά προς το καλύτερο τη ζωή των μαθητών τους (Antoniou et al, 2024).

Γίνεται εμφανές ότι τα σχολεία οφείλουν να παρέχουν στα παιδιά και τους εφήβους ασφάλεια. Στην σύγχρονη εποχή όμως φαίνεται ότι αρκετά παιδιά, αλλά και εκπαιδευτικοί, βλέπουν πως αυτή η προσδοκία δεν καλύπτεται επαρκώς από τις έως τώρα ακολουθούμενες πρακτικές, τις οποίες και τελικά αμφισβητούν (Stamelos et al, 2015) υποστηρίζοντας ότι απαιτούνται αλλαγές (Markolefas, 2021). Αυτή η πραγματικότητα έχει στρέψει το ενδιαφέρον της εκπαιδευτικής πολιτικής στην αναγκαιότητα λήψης αποφασιστικών μέτρων πρόληψης και αντιμετώπισής.

Ο σχολικός εκφοβισμός είναι ένα σημαντικό πρόβλημα για τα παιδιά και τους εφήβους (Biswas et al., 2020) και σύμφωνα με τον Παγκόσμιο Οργανισμό Υγείας αποτελεί σημαντική απειλή για τη δημόσια υγεία (Katsantonis et al, 2021). Οι συνέπειες του είναι πολυδιάστατες και πολύπλευρες καθώς δεν επηρεάζει μόνο την ψυχική υγεία και τις κοινωνικές δεξιότητες, αλλά ενδέχεται να έχει συνέπειες που διαρκούν ακόμη και μετά την ενηλικίωση (Man et al., 2022). Σύμφωνα με μελέτες του Ινστιτούτου Εκπαιδευτικής Πολιτικής, (IEP, 2017) μεταξύ άλλων προκύπτει η συσχέτιση κοινωνικών φαινόμενων όπως ο σχολικός εκφοβισμός/bullying και η μαθητική διαρροή/εγκατάλειψη. Σε πιο ακραίες περιπτώσεις, μπορεί να οδηγήσει σε σκέψεις αυτοκτονίας και, τελικά, σε θάνατο (Zhu et al., 2022).

Η σοβαρότητα των επιπτώσεων του σχολικού εκφοβισμού στα παιδιά και τους εφήβους τον καθιστά προτεραιότητα μελέτης ή και παρέμβασης για αρκετούς ερευνητές. Κομβικό ζήτημα είναι η απάντηση στο ερώτημα: Πώς μπορούμε να μειώσουμε τον επιπολασμό του σχολικού εκφοβισμού και τις επιπτώσεις του σε παιδιά και εφήβους; Επιπλέον να εξεταστεί η δυνατότητα ανάπτυξης νέων τρόπων παρέμβασης με τους οποίους θα «εφοδιάσουμε» όσους εμπλέκονται με το θέμα και κυρίως όσους παρεμβαίνουν σε τέτοια περιστατικά (εκπαιδευτικούς, ψυχολόγους, κοινωνικούς λειτουργούς, σχολικούς νοσηλευτές κλπ). Σε αυτό το πλαίσιο οι νέες τεχνολογίες συχνά θεωρούνται ελπιδοφόρες (Lafrance, et al., 2024). Αποτέλεσμα είναι τα τελευταία χρόνια, τα προγράμματα, οι εφαρμογές και η τεχνητή νοημοσύνη (ΤΝ) να έχουν μελετηθεί ως εργαλεία παρέμβασης σε περιβάλλοντα και περιπτώσεις σχολικού εκφοβισμού.

Η βιβλιογραφική μελέτη έγινε τον Φεβρουάριο του 2025 αξιοποιώντας τις βάσεις δεδομένων Google Scholar, Researchgate και Academia. Κριτήρια εισδοχής ήταν τα εξής: Η δημοσίευση να έχει γίνει στην ελληνική, αγγλική ή ισπανική γλώσσα κατά το χρονικό διάστημα 2015-2025, σε επιστημονικό περιοδικό είτε σε πρακτικά επιστημονικού συνεδρίου είτε να αποτελεί επίσημη πολιτική για τον σχολικό εκφοβισμό και την ΤΝ είτε να είναι κάποιο εμπεριστατωμένο εγχειρίδιο πάνω στη θεματική. Επιπλέον παρουσιάζονται συνοπτικά εφαρμογές οι οποίες αναφέρονται τουλάχιστον σε δύο δημοσιεύσεις προκειμένου να είναι δυνατή η αντιπαραβολή τους.

Ο ΣΧΟΛΙΚΟΣ ΕΚΦΟΒΙΣΜΟΣ

Ο σχολικός εκφοβισμός/θυματοποίηση (victimization) ή bullying στην Αγγλική γλώσσα ή και «νταηλίκι» στην Ελληνική καθομιλουμένη, αποτελεί έκφραση και μέρος της ενδοσχολικής βίας. Είναι ένα σοβαρό εκπαιδευτικό και κοινωνικό φαινόμενο (Trigka – Mertika, 2015) και ταυτόχρονα ένα φαινόμενο παγκόσμιας εμβέλειας (Artinopoulou, et al., 2025). Ειδικότερα, το φαινόμενο του σχολικού εκφοβισμού επισημαίνεται και καταγράφεται από τη δεκαετία του 1970. Η πρώτη ουσιαστική μελέτη του φαινομένου διεξήχθη το 1978 στη Νορβηγία (Markolefas, 2021). Ως ερευνητικός τομέας, οι δημοσιεύσεις και οι παρεμβάσεις έχουν αυξηθεί εκθετικά από τη δεκαετία του 1970, με αποτέλεσμα την εμφάνιση εκατοντάδων σχετικών άρθρων ετησίως. Η σημασία του ζητήματος αναγνωρίζεται και από την καθιέρωση, από το 2020, της ετήσιας Παγκόσμιας Ημέρας κατά της Βίας και του Εκφοβισμού στο Σχολείο, συμπεριλαμβανομένου και του Κυβερνοεκφοβισμού, όπως ορίστηκε από τη UNICEF (Artinopoulou et al., 2025). Σε έκθεση σχετικά με την ασφάλεια και την ένταξη σε μαθησιακά περιβάλλοντα, η UNESCO, σημειώνει (2018:60): «Έννοιες όπως ο εκφοβισμός δε διαθέτουν τυποποιημένο παγκόσμιο ορισμό και οι έρευνες ποικίλλουν σημαντικά».

Η Αμερικάνικη Ψυχολογική Εταιρία, ορίζει τον σχολικό εκφοβισμό (bullying) ως μια επίμονη, απειλητική και επιθετική σωματική συμπεριφορά ή λεκτική κακοποίηση που απευθύνεται σε άλλους ανθρώπους, ειδικά εκείνους που είναι νεότεροι, μικρότεροι, ασθενέστεροι ή σε κάποια άλλη κατάσταση σχετικής μειονεξίας (APA, 2018b). Στον καθηγητή Dan Olweus (Artinopoulou, et al, 2025) ο οποίος θεωρείται ο θεωρητικός και θεμελιωτής του πεδίου αποδίδεται ο ευρύτερα αποδεκτός ορισμός: *«ένας μαθητής γίνεται αντικείμενο εκφοβισμού ή θυματοποιείται όταν υποβάλλεται κατ' επανάληψη και κατ' εξακολούθηση σε αρνητικές ενέργειες από έναν ή περισσότερους μαθητές. Μία ενέργεια θεωρείται αρνητική όταν κάποιος σκόπιμα βλάπτει ή επιχειρεί να βλάψει ή να ενοχλήσει κάποιον άλλον. Επιπλέον, μεταξύ των μαθητών υπάρχει διαφορά δύναμης, που σημαίνει ότι ο μαθητής που εκτίθεται στις αρνητικές ενέργειες δυσκολεύεται να αμυνθεί»* (Olweus, 2009:29). Σύμφωνα με τον Olweus, το φαινόμενο του εκφοβισμού έχει τρία βασικά χαρακτηριστικά: «είναι σκόπιμη βλάβη, πραγματοποιείται κατ' επανάληψη και κατ' εξακολούθηση και λαμβάνει θέση μέσα σε μια διαπροσωπική σχέση που χαρακτηρίζεται από ανισότητα δύναμης» (Markolefas et al, 2024β:347).

Το μειονέκτημα αυτού του τύπου των προσεγγίσεων είναι ότι απαιτείται μια περαιτέρω διάκριση του ιστορικού του δράστη, καθιστώντας αναγκαία την κατηγοριοποίηση των εμπλεκομένων σε ομάδες (Αντωνίου, Βαλιανάτος &, Βαρθαλάμη, 2024). Ένας μεταγενέστερος ορισμός αναφέρει ότι ο εκφοβισμός των παιδιών και των νέων εμποδίζει την εμπειρία του ανήκειν, της ουσιαστικής συμμετοχής στην κοινότητα και της δυνατότητας συμμετοχής (Helgeland & Lund, 2017).

Όπως γίνεται εμφανές ο σχολικός εκφοβισμός αποτελεί ένα ομαδικό φαινόμενο, εφόσον δεν αφορά μόνο τον/τους εκφοβιζόμενο/ους μαθητή/ές και εκείνον/ους που εκφοβίζονται, αλλά περιλαμβάνει όσους τυγχάνει να είναι παρόντες σε αυτά τα περιστατικά, δηλαδή στους παρατηρητές. Επιπλέον αφορά ακόμα αυτούς που δεν είναι παρόντες, όμως έχουν γνώση των επαναλαμβανόμενων αρνητικών περιστατικών/πράξεων. Αυτοί μπορεί να είναι μαθητές, εκπαιδευτικοί, ειδικό εκπαιδευτικό προσωπικό, ή άλλοι εργαζόμενοι στη σχολική μονάδα ή ακόμα και γονείς/κηδεμόνες. Γενικά στο φαινόμενο του bullying εμπλέκονται πολλά μέρη, όπως: ο μαθητής ή ομάδα μαθητών που ασκεί εκφοβισμό, ο/οι μαθητής/ές που δέχεται/ονται εκφοβισμό, τα παιδιά θεατές, οι εκπαιδευτικοί ή άλλο προσωπικό της σχολικής μονάδας και οι γονείς/κηδεμόνες (KEDS, 2015).

Στη χώρα μας, η μελέτη της σχετικής βιβλιογραφίας αναδεικνύει ότι η σχολική βία και ο εκφοβισμός έχουν πάρει μεγάλες διαστάσεις στις ζωές παιδιών και εφήβων από τη δεκαετία του 1980 μέχρι σήμερα (KEDS, 2015; Karkania & Vaikousi, 2021; Markolefas et al, 2024α). Σύμφωνα με τα ευρήματα έρευνας από το Χαμόγελο του παιδιού (Xamogelo tou paidiou, 2023), στην οποία συμμετείχαν 2.293 παιδιά, κατά το σχολικό έτος 2022-2023 ένα στα τρία παιδιά (32,4%), στην Ελλάδα υπήρξε θύμα σχολικού εκφοβισμού. Νεότερη ερευνητική μελέτη από τον ίδιο φορέα για το σχολικό έτος 2023-2024, στην οποία συμμετείχαν 2047 παιδιά, τα ποσοστά ήταν κατά 3,1% αυξημένα με το 35,5% των μαθητών σε όλη τη χώρα να αναφέρει ότι έχει πέσει θύμα εκφοβισμού (Antoniou et al, 2024).

ΚΥΒΕΡΝΟΕΚΦΟΒΙΣΜΟΣ (CYBERBULLYING)

Μία ιδιαίτερη μορφή εκφοβισμού είναι ο κυβερνοεκφοβισμός (Cyberbullying). Σύμφωνα με τον κυβερνητικό οργανισμό των Η.Π.Α stopbullying (2024), ο κυβερνοεκφοβισμός περιγράφεται ως ο εκφοβισμός που λαμβάνει χώρα μέσω ψηφιακών συσκευών όπως κινητά τηλέφωνα, υπολογιστές και tablet. Ο κυβερνοεκφοβισμός μπορεί να συμβεί μέσω: SMS, κειμένου και εφαρμογών ή μέσω διαδικτύου σε μέσα κοινωνικής δικτύωσης, φόρουμ ή τυχερών παιχνιδιών όπου οι άνθρωποι μπορούν να δουν, να συμμετάσχουν ή να μοιραστούν περιεχόμενο. Ο κυβερνοεκφοβισμός περιλαμβάνει την αποστολή, δημοσίευση ή κοινοποίηση αρνητικού, επιβλαβούς, ψευδούς ή κακόβουλου περιεχομένου που αφορά κάποιο άτομο, καθώς και τη διάδοση προσωπικών δεδομένων ή πληροφοριών με σκοπό την πρόκληση αμηχανίας ή ταπείνωσης. Σε ορισμένες περιπτώσεις, ο κυβερνοεκφοβισμός μπορεί να υπερβεί τα όρια και να λάβει τη μορφή παράνομης ή ακόμη και εγκληματικής συμπεριφοράς (StopBullying, 2024).

Γινεται εμφανές ότι η τεχνολογία έχει δώσει ακόμα περισσότερους τρόπους στα παιδιά που εκφοβίζουν ακόμα και να βασανίσουν τα θύματά τους, κυρίως μέσω των πλατφόρμων κοινωνικής δικτύωσης, γραπτών μηνυμάτων και άλλων εικονικών αλληλεπιδράσεων (Kapari & Stavrou, 2022). Ο κυβερνοεκφοβισμός έχει γίνει μείζον ζήτημα για τα σχολεία, όπως αποδεικνύεται από τον αριθμό των αυτοκτονιών που μπορούν να εντοπιστούν άμεσα σε εκδηλώσεις εκφοβισμού. Λόγω της φύσης του φαινομένου οι νόμοι εξακολουθούν να είναι ασαφείς σχετικά με τον κυβερνοεκφοβισμό και αυτή η συνθήκη δημιουργεί μια επιπλέον πρόκληση για την αντιμετώπιση του φαινομένου, καθώς οι εμπλεκόμενοι δεν είναι σίγουροι για το πώς να χειριστούν νομικά τέτοια ζητήματα (Gaffney et al., 2019).

ΤΕΧΝΗΤΗ ΝΟΗΜΟΣΥΝΗ (ΤΝ)

Προκειμένου να προσεγγίσουμε τον όρο ΤΝ, οφείλουμε να αποδεχτούμε την παραδοχή ότι είναι μια δυναμική πραγματικότητα σε συνεχή εξέλιξη. Αυτό προκύπτει ακόμα και από τις συνεχείς τροποποιήσεις που προτείνονται στο σχετικό νομοθετικό πλαίσιο στο πλαίσιο της Ευρωπαϊκής Ένωσης (ΕΕ) (De Obesso Arias, et al., 2023). Ο κανονισμός της ΕΕ για την ΤΝ θεωρείται το πρώτο ολοκληρωμένο νομοθετικό πλαίσιο για την ΤΝ παγκοσμίως. Βασικός σκοπός του είναι η «αντιμετώπιση των κινδύνων για την υγεία, την ασφάλεια και τα θεμελιώδη δικαιώματα». Επίσης αυτός ο κανονισμός προστατεύει «τη δημοκρατία, το κράτος δικαίου και το περιβάλλον» (European Commission, 2024β:1).

Το έτος 1956, έντεκα από τα πιο λαμπρά μαθηματικά μυαλά της εποχής, συναντήθηκαν στο καλοκαιρινό ερευνητικό πρόγραμμα του Dartmouth. Σε αυτή τη συνάντηση, που διήρκεσε δύο μήνες, προέκυψαν διαφοροποιήσεις, αντιπαραθέσεις και προβληματισμός. Μετά από μια περίοδο χωρίς σταθερή πρόοδο φτάσαμε στον 21ο αιώνα. Αξιοποιώντας τα Big Data χάρη στον όγκο πληροφοριών (volume), την διαθέσιμη ταχύτητα (velocity) συλλογής πληροφοριών και την ποικιλία διαθέσιμων δεδομένων (variety), που παρέχουν δόθηκε μεγάλη ώθηση με αποτέλεσμα την οριστική απογείωση της τεχνολογίας της ΤΝ και στο άλμα από τη βιομηχανία 4.0 στη 5.0 βιομηχανική επανάσταση (De Obesso Arias, et al., 2023).όπου μηχανές και άνθρωποι συνεργάζονται για την επίτευξη των επιθυμητών αποτελεσμάτων.

Στις ημέρες μας μια βασική παραδοχή είναι ότι για την προσέγγιση του όρου ΤΝ δεν υπάρχει ένας κοινά αποδεκτός ορισμός, πιο σωστά υφίστανται πολλοί αποδεκτοί ορισμοί. Κατά μια ευρεία προσέγγιση, Τεχνητή Νοημοσύνη - ΤΝ (Artificial Intelligence - AI) είναι «η επιστήμη που έχει στόχο την ανάπτυξη ευφυών συστημάτων» (Koumbarakis, 2020:2). Με βάση τους στόχους της η ΤΝ είναι η επιστήμη που έχει στόχο την ανάπτυξη συστημάτων που: ενεργούν σαν τον άνθρωπο, σκέφτονται σαν τον άνθρωπο, σκέφτονται ορθολογικά (rationally), ενεργούν ορθολογικά (Koumbarakis, 2020:3). Με απόφαση της Ευρωπαικής Επιτροής (2024α) η ΤΝ *«είναι ένα ταχέως εξελισσόμενο σύνολο τεχνολογιών που μπορούν να συμβάλλουν στην επίτευξη ευρείας κλίμακας οικονομικών και κοινωνικών οφελών σε ολόκληρο το φάσμα των κλάδων και των κοινωνικών δραστηριοτήτων. Ταυτόχρονα, ανάλογα με τις περιστάσεις που αφορούν τη συγκεκριμένη εφαρμογή και χρήση της, η ΤΝ μπορεί να δημιουργήσει κινδύνους και να αποβεί επιζήμια για τα δημόσια συμφέροντα και τα θεμελιώδη δικαιώματα που προστατεύονται από το δίκαιο της Ένωσης».*

Σύμφωνα με το λεξικό ψυχολογίας της Αμερικάνικής Ψυχολογικής Εταιρίας (APA, 2018a), ως ΤΝ ορίζεται, ένας επιμέρους κλάδος της επιστήμης των υπολογιστών που στοχεύει στην παραγωγή προγραμμάτων που προσομοιώνουν την ανθρώπινη νοημοσύνη. Οι ερευνητές τεχνητής νοημοσύνης συχνά αναπτύσσουν πολύ υψηλού επιπέδου γλώσσες υπολογιστών για το σκοπό αυτό, όπως LISP, PROLOG και Smalltalk. Υπάρχουν πολλοί κλάδοι της τεχνητής νοημοσύνης, όπως η ρομποτική , η όραση υπολογιστών, η μηχανική μάθηση, το παιχνίδι και τα έμπειρα συστήματα . Η ΤΝ έχει υποστηρίξει επίσης την έρευνα σε άλλους σχετικούς τομείς, συμπεριλαμβανομένης της γνωστικής επιστήμης και της υπολογιστικής γλωσσολογίας. Τέλος οι Abduljabbar, et al, (2019) ορίζουν την ΤΝ (AI) ως ένα πεδίο της επιστήμης των υπολογιστών που κάνει τις μηχανές να λειτουργούν σαν ανθρώπινος εγκέφαλος

ΤΝ ΚΑΙ ΔΙΑΧΕΙΡΙΣΗ ΑΝΘΡΩΠΩΝ ΚΑΙ ΣΥΜΠΕΡΙΦΟΡΩΝ

Σε μελέτη των Palos-Sánchez, et al, (2022) μέσω βιβλιογραφικής ανάλυσης των πλεονεκτημάτων και των προκλήσεων της τεχνητής νοημοσύνης στη διαχείριση ανθρώπων φαίνεται ότι το κύριο πλεονέκτημα της τεχνητής νοημοσύνης είναι η βελτίωση των καναλιών επικοινωνίας όλων των εμπλεκομένων. Στον αντίποδα, μεταξύ των δυσκολιών που πρέπει να ξεπεραστούν είναι η πιθανή απανθρωποποίηση που μπορεί να προκαλέσει αυτή η νέα μορφή επικοινωνίας μεταξύ εργαζομένων (Fritts & Cabrera, 2021).

Η συνηθέστερη επαφή όμως που έχει ο μέσος χρήστης του διαδικτύου είναι η αξιοποίηση της ΤΝ από εταιρείες – μέσων κοινωνικής δικτύωσης, όπως το X (Twitter) και το Instagram. Οι οποίες εργάζονται ενεργά προκειμένου να δημιουργούν αλγόριθμους που μπορούν να χρησιμοποιηθούν για τον εντοπισμό κυβερνοεκφοβισμού επισημαίνοντας ύποπτο περιεχόμενο, με σκοπό να αντιμετωπιστούν, να προληφθούν και να ελαχιστοποιηθούν τα περιστατικά κυβερνοεκφοβισμού (Gomez, et al. 2021). Το 2019, το Instagram κυκλοφόρησε μια λειτουργία που προειδοποιεί έναν χρήστη εάν το σχόλιό του θεωρείται δυνητικά προσβλητικό. Αυτό επιτρέπει στον χρήστη να ξανασκεφτεί εάν επιθυμεί να συνεχίσει να δημοσιεύει το περιεχόμενο που έχει επισημανθεί. Το X λαμβάνει επίσης μέτρα για τον περιορισμό του επιβλαβούς περιεχομένου εφαρμόζοντας μια συγκεκριμένη πολιτική ανάλογα με το επίπεδο σοβαρότητας, όπως ο περιορισμός της ορατότητας μιας ανάρτησης ή η αποστολή άμεσου μηνύματος σε έναν χρήστη που αναφέρθηκε από άλλους χρήστες (Gomez, et al. 2021).

Η απεραντοσύνη του κοινόχρηστου περιεχομένου στις πλατφόρμες καθιστά αδύνατη τη διαχείριση του αποκλειστικά μέσω ανθρώπινης προσπάθειας, χωρίς να αναφερθεί το ενδεχόμενο ψυχολογικής βλάβης που μπορεί να

προκαλέσει στους συντονιστές η διαχείριση τέτοιων περιστατικών, λόγω της ευαισθησίας και της συναισθηματικά βαριάς φύσης του ίδιου του αντικειμένου (Roberts, 2019). Δεν είναι τυχαίο που τα τελευταία χρόνια έχουμε γίνει μάρτυρες μιας σταθερής αύξησης των ερευνητικών προσπαθειών για την εύρεση αποτελεσματικών τρόπων αξιοποίησης της φυσικής διαδικασίας της ΤΝ και την αποτελεσματική αντιμετώπιση του προβλήματος (Milosevic et al., 2022). Αυτό θα επέτρεπε μια πιο αποτελεσματική διαχείριση του φαινομένου κυρίως μέσω της πρόληψης. Σε αντίθεση με την αντιδραστική εποπτεία, όπου ένας χρήστης αναφέρει ένα μέρος περιεχομένου το οποίο στη συνέχεια αποστέλλεται σε εποπτεία και υποβάλλεται σε επεξεργασία με αυτοματοποιημένο τρόπο ή εναλλακτικά διερευνάται από ανθρώπους, η προληπτική εποπτεία βασίζεται στις προαναφερθείσες τεχνικές για τον αυτόματο εντοπισμό τέτοιων περιπτώσεων παραβίασης πολιτικής πριν αναφερθούν από τους χρήστες (Milosevic et al., 2022).

Εκτός από τον έλεγχο περιεχομένου η ΤΝ μας δίνει και την δυνατότητα τεχνολογιών προσαρμογής μάθησης. Οι οποίες αναφέρονται σε εκπαιδευτικά συστήματα που αξιοποιούν την ανάλυση δεδομένων μέσω τεχνητής νοημοσύνης με στόχο την εξατομίκευση της μαθησιακής εμπειρίας. Αυτές οι τεχνολογίες προσαρμόζουν δυναμικά την παρουσίαση του εκπαιδευτικού περιεχομένου με βάση την απόδοση, το ρυθμό μάθησης και τις προτιμήσεις ενός μεμονωμένου μαθητή. Με τη παρατεταμένη και συνεχή ανάλυση δεδομένων σχετικά με τις αλληλεπιδράσεις των μαθητών, οι τεχνολογίες προσαρμογής μάθησης παρέχουν εξατομικευμένη υποστήριξη/ανατροφοδότηση και βελτιστοποιημένες οδούς μάθησης για τη ενίσχυση της συμμετοχής και των επιδόσεων των μαθητών (Strielkowski et.al., 2024).

Αξίζει να σημειωθεί ότι ο κανονισμός της ΕΕ για την Τεχνητή Νοημοσύνη εισάγει ένα ενιαίο ρυθμιστικό πλαίσιο για όλα τα κράτη μέλη. Το πλαίσιο αυτό περιγράφει μη αποδεκτούς κινδύνους και προβλέπει την απαγόρευση ενός πολύ περιορισμένου αριθμού ιδιαίτερα επιβλαβών χρήσεων της ΤΝ, οι οποίες θεωρούνται αντίθετες με τις αξίες της ΕΕ και παραβιάζουν θεμελιώδη δικαιώματα (European Commission, 2024β: 1–2) όπως: εκμετάλλευση ευάλωτων χαρακτηριστικών των προσώπων, χειραγώγηση και χρήση τεχνικών που απευθύνονται στο υποσυνείδητο, κοινωνική βαθμολόγηση για δημόσιους και ιδιωτικούς σκοπούς, «ατομική προληπτική αστυνόμευση με βάση αποκλειστικά την κατάρτιση προφίλ, μη στοχευμένη συγκομιδή δεδομένων από το διαδίκτυο ή τις τηλεοράσεις κλειστού κυκλώματος για εικόνες προσώπου με σκοπό τη δημιουργία ή την επέκταση βάσεων δεδομένων, αναγνώριση συναισθημάτων στο χώρο εργασίας και στα εκπαιδευτικά ιδρύματα, εκτός αν χρησιμοποιείται για ιατρικούς λόγους ή λόγους ασφάλειας (π.χ. παρακολούθηση των επιπέδων κόπωσης ενός πιλότου), βιομετρική κατηγοριοποίηση φυσικών προσώπων με σκοπό να συναχθεί η φυλή, τα πολιτικά φρονήματα, η συμμετοχή σε συνδικαλιστική οργάνωση, οι θρησκευτικές ή φιλοσοφικές πεποιθήσεις ή ο γενετήσιος προσανατολισμός τους. Θα εξακολουθήσει να επιτρέπεται η επισήμανση ή το φιλτράρισμα συνόλων δεδομένων και η κατηγοριοποίηση των δεδομένων στον τομέα της επιβολής του νόμου, εξ αποστάσεως βιομετρική ταυτοποίηση σε πραγματικό χρόνο σε δημόσιους χώρους από τις αρχές επιβολής του νόμου, με την επιφύλαξη επακριβώς προσδιορισμένων εξαιρέσεων. Ο κανονισμός για την ΤΝ προβλέπεται να εφαρμοστεί στις 2 Αυγούστου 2026, δύο έτη μετά την έναρξη ισχύος του, με κάποιες εξαιρέσεις οι οποίες είναι πέρα του αντικειμένου τους παρούσας μελέτης (European Commission, 2024β:7).

ΤΝ ΚΑΙ ΔΙΑΧΕΙΡΙΣΗ ΣΧΟΛΙΚΟΥ ΕΚΦΟΒΙΣΜΟΥ

Τα τελευταία χρόνια έχουν δημοσιευτεί επιστημονικές μελέτες ανά τον κόσμο στον τομέα της προστασίας των παιδιών και των εφήβων από τον σχολικό εκφοβισμό και τον κυβερνοεκφοβισμό, ταυτόχρονα η αναζήτηση μιας αποτελεσματικής λύσης η οποία παράλληλα σέβεται βασικές αρχές ιδιωτικότητας και θεμελιωδών δικαιωμάτων (European Commission, 2024β) είναι πρόκληση. Παρακάτω παρουσιάζονται πέντε εφαρμογές/προγράμματα τα οποία πληρούν τα κριτήρια αποδοχής.

EMOTOTENT

Το EmotoTent είναι ένα διαδραστικό σύστημα κοινωνικο-συναισθηματικής μάθησης που αναπτύχθηκε από την Antle και την ερευνητική της ομάδα το 2019, το οποίο σχεδιάστηκε για να βοηθήσει τα παιδιά να διαχειρίζονται τα συναισθήματά τους και να τα διδάξει πώς να αλληλεπιδρούν με τους άλλους με ενσυναίσθηση (Kinnunen, 2022). Είναι ένα κοινωνικό-τεχνολογικό πρόγραμμα, που προβλέπεται να ολοκληρωθεί μέχρι το 2030, και αναμένεται να βοηθήσει τα παιδιά να εκπληρώσουν τους κοινωνικο-συναισθηματικούς τους στόχους, ώστε να βελτιωθεί η κουλτούρα των σχολείων και να προαχθεί η ευημερία των παιδιών σε όλη τους τη ζωή (Antle et al.,2019). Στο πρόγραμμα EmotoTent τα παιδιά μαθαίνουν και εξασκούνται στη ρύθμιση των συναισθημάτων και την ενσυναίσθηση, με συνομηλίκους, κατοικίδια ζώα και έναν ρομποτικό σκύλο, με τρόπους βιωματικούς, ενσώματους και παιγνιώδεις (Antle et al., 2019). Η σκηνή (ψηφιακός χώρος) EmotoTent περιλαμβάνει τέσσερα στοιχεία: αυτοκόλλητα τατουάζ βιοαισθητήρων, (πολύ)ακουστικά προβολής εικόνων, έναν ρομποτικό πράκτορα – σκύλο και ένα διαδραστικό τρισδιάστατο ολογραφικό περιβάλλον – σκηνή (Kinnunen, 2022).

Κατά τη χρήση του EmotoTent (Antle et al., 2019), κάθε παιδί φοράει ένα αυτοκόλλητο τατουάζ βιοαισθητήρων, το οποίο μετρά τις δραστηριότητες του εγκεφάλου, της καρδιάς και των μυϊκών ιστών. Αυτές οι δραστηριότητες μεταφράζονται σε δεδομένα συναισθήματος για να χρησιμοποιηθούν από τα άλλα εξαρτήματα. Τα ακουστικά προβολής εικόνων ανακατασκευάζουν τις νοητικές εικόνες των παιδιών σύμφωνα με τα δεδομένα συναισθημάτων και τις προβάλλουν σε διαδραστικά ολογράμματα μέσα στη σκηνή και στη συνέχεια η σκηνή επεξεργάζεται τις χειρονομίες των παιδιών. Ο ρομποτικός πράκτορας σκύλος βρίσκεται μέσα στη σκηνή μαζί με τα παιδιά, κυρίως για υποστήριξη κατά τη διάρκεια της (απειλητικής) κατάστασης, αλλά μπορεί επίσης να διδάξει στα παιδιά για τον εκφοβισμό ενώ ταυτόχρονα τα παιδιά μπορούν να παίξουν μαζί του (Antle et al., 2019).

Το σύστημα EmotoTent δεν αντιμετωπίζει άμεσα τον εκφοβισμό, αλλά επιδιώκει ένα καλύτερο σχολικό περιβάλλον για όλους, διδάσκοντας στα παιδιά πώς οφείλουν να αντιμετωπίζουν τους άλλους (Kinnunen, 2022). Ο σχεδιασμός της δραστηριότητας EmotoTent βασίζεται στην εξελισσόμενη εμπειρική κατανόηση της ενσυναίσθησης και της συμπόνιας. Μια βασική μορφή αλληλεπίδρασης του EmotoTent περιλαμβάνει ένα παιδί που θυμάται ένα γεγονός ή μια εμπειρία κατά την οποία ένιωσε ένα συγκεκριμένο συναίσθημα (Antleetal, 2019). Οι αναμνήσεις αμβλύνονται ως προς την σημαντικότητα εξασφαλίζοντας ότι η αναβίωση ενός συναισθήματος δεν είναι τραυματική.

STOPBULLY

Το StopBully είναι μια εφαρμογή για Android, που αναπτύχθηκε στη Μαλαισία, με σκοπό την εκπαίδευση κατά του εκφοβισμού και την ευαισθητοποίηση των εφήβων προκειμένου να αντιμετωπιστεί ο εκφοβισμός. Η εφαρμογή διαθέτει έξι διαφορετικές λειτουργίες. Οι τέσσερις πρώτες αφορούν σε: βίντεο, παιχνίδια, κουίζ και κόμικς, οι οποίες σχεδιάστηκαν για να διδάξουν τους χρήστες σχετικά με τον εκφοβισμό και τις συνέπειές του. Αφετηρία στη λειτουργία του είναι η προβολή εισαγωγικού βίντεο που απεικονίζει το ιστορικό μίας διαλυμένης φιλίας ως αποτέλεσμα του εκφοβισμού (Neo et a.l, 2018).

Ένα σημαντικό μέρος της εφαρμογής είναι τα εκπαιδευτικά παιχνίδια που περιέχει, αλλά εκεί που διαφέρει από τις άλλες λύσεις/προτάσεις είναι τα επιπλέον χαρακτηριστικά που διαθέτει. Οι άλλες δυο λειτουργίες του αφορούν στην ενημέρωση για μια σελίδα πληροφοριών, τους Befrienders, που είναι ένα διεθνές κέντρο υποστήριξης για την πρόληψη της αυτοκτονίας. Επιπλέον προβλέπεται η λειτουργία κομβίου έκτακτης ανάγκης, το οποίο συνδέει τον χρήστη της εφαρμογής απευθείας με τις αρμόδιες αρχές (Kinnunen, 2022). Αυτές οι λειτουργίες μπορούν να χρησιμοποιηθούν σε πραγματικές καταστάσεις εκφοβισμού ακόμα και όταν κάποιος βιώνει τις αρνητικές συνέπειες του εκφοβισμού. Γίνεται εμφανές ότι η εφαρμογή δεν περιορίζεται στην πρόληψη αλλά παρέχει δυνατότητα υποστήριξης κατά τη διάρκεια και μετά την εμφάνιση μιας εκφοβιστικής κατάστασης (Neo, et al., 2018). Επιπλέον υπάρχει πρόβλεψη εξέτασης των χρηστών μέσω σχετικών κουίζ τα οποία αξιολογούν την γνώση που απέκτησαν και εμπέδωσαν μέσω της εφαρμογής. Τέλος, παρέχονται βίντεο πρόληψης του εκφοβισμού στον κυβερνοχώρο με πρόθεση να εκπαιδεύσουν τους χρήστες στην αποφυγή του κυβερνοεκφοβισμού (Neo et al.,2018).

Η ομάδα που σχεδιάζει και εποπτεύει την εφαρμογή είναι διεπιστημονική και περιλαμβάνει μεταξύ άλλων, ψυχολόγους με γνώσεις και εμπειρία στα θέματα του εκφοβισμού και της ενσυναίσθησης, καθώς και ειδικούς στα γραφικά υπολογιστών. Οι χαρακτήρες του παιχνιδιού, σχεδιάστηκαν από δύο φοιτητές Καλών Τεχνών ακολουθώντας τις οδηγίες των ψυχολόγων. Πραγματοποιήθηκαν διάφορα στάδια αξιολόγησης του παιχνιδιού, από τα οποία προέκυψαν αρκετές ιδέες για την τελειοποίηση και τη βελτίωση της πιλοτικής εφαρμογής. Μετά τις απαραίτητες προσαρμογές, πραγματοποιήθηκε μια επαναληπτική μελέτη χρηστών, προκειμένου να αξιολογηθεί η χρηστικότητα, η δυνατότητα αναπαραγωγής και η αποτελεσματικότητα του παιχνιδιού στην αλλαγή των συμπεριφορών που σχετίζονται με τον εκφοβισμό (Raminhos, 2015).

Τα πειραματικά αποτελέσματα αναδεικνύουν την σημασία της θετικής ανατροφοδότησης των συμμετεχόντων. Επιπλέον συμφωνούν ότι η εφαρμογή είναι ένα αποτελεσματικό εργαλείο για διδασκαλία και διαδραστική μάθηση. Προκειμένου να βελτιωθεί η εφαρμογή του προγράμματος προτείνεται η προσαρμογή του στα ιδιαίτερα χαρακτηριστικά του κάθε σχολείου (Neo et al., 2018).

PREVER (Prevention of Racial Stigma)

Μία ακόμα εφαρμογή η οποία σχεδιάστηκε στην Ισπανία και απευθύνεται σε smartphones είναι το PREVER το οποίο επικεντρώνεται στην ανίχνευση εκφοβισμού σε μαθητές κάτω των 16 ετών. Έχει σχεδιαστεί για να εμπλέκει όχι μόνο τους μαθητές αλλά και τους εκπαιδευτικούς (Alberola et al, 2020). Επιπλέον αξιολογεί τις διακρίσεις με βάση τις προκαταλήψεις σε νέους κάτω των 16 ετών έναντι των αλλοδαπών συμμαθητών τους (Álvarez et al., 2016). Η εφαρμογή αυτή συνδυάζει την πρόσωπο με πρόσωπο αλληλεπίδραση μεταξύ των μαθητών με την εικονική αλληλεπίδραση. Ο

εκπαιδευτικός επιβλέπει αυτή την αλληλεπίδραση προκειμένου να ανιχνεύσει αρνητικές συμπεριφορές. Η εφαρμογή ενσωματώνει τεχνικές παιχνιδοποίησης με βάση ένα παιχνίδι επαυξημένης πραγματικότητας. Το κυρίαρχο στοιχείο είναι ότι οι μαθητές έχουν την δυνατότητα να παρακολουθούν την τάξη τους στα κινητά τους τηλέφωνά με επαυξημένες πληροφορίες ενώ παράλληλα τους δίνεται η δυνατότητα να σχετίζονται με τους αντιπάλους τους στην εφαρμογή. Οι μαθητές αλληλεπιδρούν ελεύθερα μεταξύ τους και η εφαρμογή συλλέγει δεδομένα.

Εργαλεία όπως το PREVER είναι προσανατολισμένα στην προώθηση της εικονικής και φυσικής αλληλεπίδρασης μεταξύ των μαθητών, δεδομένου ότι η αλληλεπίδραση είναι ζωτικής σημασίας για την καταπολέμηση του εκφοβισμού (Alberola et al, 2020). Η εφαρμογή καταγράφει όλες τις αλληλεπιδράσεις ανάμεσα στους μαθητές, ενώ παράλληλα δίνεται η δυνατότητα πρόσβασης στους εκπαιδευτικούς, στο διακομιστή και στη λήψη των σχετικών πληροφοριών ώστε να καταγράψουν και αυτοί τι συμβαίνει ανάμεσα στους μαθητές μέσα στην τάξη, σε ένα κοινωνιόγραμμα αλληλεπιδράσεων της ομάδας (Álvarez et al., 2016). Για την καλύτερη κατανόηση της λειτουργίας της εφαρμογής, μπορεί να παρουσιαστεί ένα παράδειγμα αλληλεπίδρασης κατά τη διάρκεια του παιχνιδιού. Συγκεκριμένα, η εφαρμογή δίνει στον μαθητή τη δυνατότητα να σχηματίσει μια ομάδα φίλων για την εκτέλεση μιας συγκεκριμένης εργασίας, όπως η οργάνωση ενός ποδοσφαιρικού αγώνα. Ο μαθητής έχει επίσης τη δυνατότητα να αποκλείσει συμμαθητές του από την ομάδα μέσω σχετικής επιλογής στο κινητό του τηλέφωνο. Η ενέργεια αυτή καταγράφεται και παρακολουθείται από τον υπεύθυνο εκπαιδευτικό (Álvarez et al., 2016).

Σχετικά με τους βασικούς περιορισμούς για τη χρήση αυτού του είδους των τεχνολογιών στην τάξη είναι η προϋπόθεση για τους μαθητές και τους εκπαιδευτικούς να έχουν πρόσβαση σε ένα κινητό τηλέφωνο με κατάλληλες προδιαγραφές. Μετά την εγκατάσταση της εφαρμογής απαιτείται η αλληλεπίδραση με τους συμμαθητές τους. Τέλος δεν μπορεί να εξασφαλιστεί το επαρκές επίπεδο εμπλοκής και αλληλεπίδρασης των μαθητών κατά τη διάρκεια χρήσης της εφαρμογής (Álvarez et al., 2016).

HAPPY 8-12 & HAPPY 12-16

Το Happy 8-12 και το Happy 12-16 είναι δύο λογισμικά σχεδιασμένα για την εκπαίδευση συναισθηματικών ικανοτήτων σε καταστάσεις καθημερινής ζωής καθώς και σε καταστάσεις σύγκρουσης μεταξύ συνομηλίκων στο δημοτικό και γυμνάσιο, αντίστοιχα (Ros-Morente et al, 2018). Οι εφαρμογές αυτές εξετάζουν τρεις διαφορετικούς ρόλους που διαδραματίζουν οι μαθητές: το άτομο που επιδεικνύει επιθετική συμπεριφορά, το άτομο που υφίσταται την επιθετικότητα και τους παρευρισκόμενους. Οι εφαρμογές δίνουν την δυνατότητα εξέτασης 25 καταστάσεων/συγκρούσεων που αναμένεται να εκπαιδεύσουν τους μαθητές. Το Happy 8-12 δοκιμάστηκε πιλοτικά σε σχεδόν 600 μαθητές, ενώ αντίστοιχά το Happy 12-16 δοκιμάστηκε πιλοτικά σε περισσότερους από 900 μαθητές (Alberola et al., 2020). Οι ικανότητες που καλλιεργούνται με αυτά τα λογισμικά όπως περιγράφονται από την Ερευνητική Ομάδα Ψυχοπαιδαγωγικού Προσανατολισμού (GROP), είναι ο ηθικός ρεαλισμός, η ισότητα και η δικαιοσύνη (Ros-Morente et al, 2018). Τα αποτελέσματα έρευνας σε δείγμα Ισπανών φοιτητών, δείχνουν ότι η εκπαίδευση συναισθηματικών ικανοτήτων μέσω νέων μεθόδων, όπως τα λογισμικά παιχνιδοποίησης, συμβάλλει στη βελτίωση της συναισθηματικής νοημοσύνης, στη μείωση του άγχους και στην ενίσχυση της ακαδημαϊκής επίδοσης (Ros-Morente et al., 2018).

Προκειμένου να εξασφαλιστεί η αποτελεσματικότητα του λογισμικού, απαιτείται η συνεισφορά του εκπαιδευτικού. Τα Happy 8-12 και Happy 12-16 έχουν σχεδιαστεί με στόχο τη διαδραστική συνεργασία των μαθητών ώστε να γίνουν πιο αυτόνομοι και ευέλικτοι (Ros-Morente et al, 2018). Στο πλαίσιο σχετικής έρευνας που έγινε σε 574 μαθητές στην 5η και 6η τάξη του δημοτικού σχολείου, τα αποτελέσματα έδειξαν ότι το Happy 8-12 βελτίωσε σημαντικά τις συναισθηματικές ικανότητες των μαθητών, μείωσε τα επίπεδα άγχους και βελτίωσε την ατμόσφαιρα τόσο στο προαύλιο όσο και στην τάξη, αυξάνοντας αισθητά την ακαδημαϊκή επιτυχία (Filella et al., 2016). Συνολικά, το εκπαιδευτικό βιντεοπαιχνίδι Happy αποδείχθηκε ένα πολλά υποσχόμενο εργαλείο, καθώς δίνει τη δυνατότητα τόσο στους μαθητές όσο και στους επαγγελματίες να εντοπίσουν το αρχικό τους επίπεδο συναισθηματικής ικανότητας και ευημερίας, με στόχο την εκπαίδευσή τους σε μια αποτελεσματική και προσαρμοστική διαχείριση των συναισθημάτων.

Παράλληλα, ενισχύει μια στάση πρόληψης της σύγκρουσης που μπορεί να υπάρχουν στο περιβάλλον των μαθητών ή και στην καθημερινή ζωή. Το έργο αυτό έχει αποδείξει ότι ένα λογισμικό ή ένα παιχνιδοποιημένο πρόγραμμα, όπως είναι το Happy στις δύο εκδόσεις του (8-12 και 12-16) μπορεί να προσαρμοστεί και να λειτουργήσει σε διαφορετικές ηλικιακές ομάδες και περιπτώσεις (Ros-Morente et al, 2018).

KIVA

Το KiVa είναι ένα ολοκληρωμένο πρόγραμμα κατά του σχολικού εκφοβισμού που καταρτίστηκε στο Πανεπιστήμιο Turku της Φινλανδίας. Πριν την εφαρμογή του στα σχολεία στηρίχτηκε σε μακρόχρονη έρευνα, από την

οποία προέκυψαν οι τρεις βασικοί του άξονες: ομαδικές δράσεις για όλους τους μαθητές, ατομικές δράσεις για τους εμπλεκόμενους σε περιστατικά εκφοβισμού και συνεχής επιτήρηση της κατάστασης. Είναι σημαντικό να τονιστεί πως κατά το σχεδιασμό του προγράμματος υπήρξε συστηματική συνεργασία με εκπαιδευτικούς, ώστε να διασφαλιστεί πως θα είναι λειτουργικό και εφαρμόσιμο (Markolefas et al, 2024β). Μεταξύ άλλων περιλαμβάνονται διαδικτυακά παιχνίδια, στα οποία δεν έχει δυνατότητα πρόσβασης το ευρύ κοινό. Ένα από αυτά αναπτύχθηκε σε στυλ κινουμένων σχεδίων 2D και παρουσιάζει διαφορετικές καταστάσεις, ενώ ο παίκτης καλείται να πάρει τη σωστή απόφαση. Τα δεδομένα που παράγονται από αυτά τα βιντεοπαιχνίδια δεν αποθηκεύονται (Raminhos et al., 2015). Το πρόγραμμα δεν δίνει έμφαση μόνο στα παιδιά που εκφοβίζονται και στα παιδιά που εκφοβίζουν, αλλά και στους παρευρισκόμενους ώστε να αυξήσει τη συμπόνια/ενσυναίσθηση των θεατών και να τους ενθαρρύνει να σκέφτονται για το πώς να παρεμβαίνουν στον εκφοβισμό.

Το KiVa έχει σχεδιαστεί για τη βασική εκπαίδευση (τάξεις 1-9, παιδιά ηλικίας 7-15 ετών) και έχει κριθεί αποτελεσματικό στη μείωση του εκφοβισμού μεταξύ των μαθητών στη φινλανδική πρωτοβάθμια εκπαίδευση (τάξεις 1-6), αλλά με πιο μέτρια αποτελεσματικότητα στη δευτεροβάθμια εκπαίδευση (Herkama, et al., 2023). Επίσης παρέχει γραφικές απεικονίσεις και ενημερωτικά δελτία για την εισαγωγή/παρουσίαση του προγράμματος στους γονείς. Για την αντιμετώπιση οξέων περιστατικών εκφοβισμού, στο πλαίσιο του προγράμματος KiVa συγκροτείται ειδική ομάδα από το προσωπικό του σχολείου, η οποία ακολουθεί συγκεκριμένες και λεπτομερείς κατευθυντήριες γραμμές για τη διαχείρισή τους. Επιπλέον, τα σχολεία που εφαρμόζουν το πρόγραμμα παρακολουθούν την πρόοδό τους μέσω ανατροφοδότησης που βασίζεται στις ετήσιες έρευνες του KiVa, στις οποίες συμμετέχουν τόσο οι μαθητές όσο και το προσωπικό (Herkama et al.,

Τα ερευνητικά δεδομένα δείχνουν ότι το πρόγραμμα KiVa είναι συνολικά αποτελεσματικό, καθώς στα φινλανδικά σχολεία όπου εφαρμόστηκε, οι περιπτώσεις σχολικού εκφοβισμού μειώθηκαν κατά το ήμισυ. Παράλληλα, διαπιστώθηκε μείωση του άγχους και της κατάθλιψης μεταξύ των παιδιών, γεγονός που συνέβαλε στη βελτίωση της αυτοεκτίμησής τους και στην ενίσχυση των ακαδημαϊκών τους κινήτρων (Neo et al., 2018).

ΣΥΜΠΕΡΑΣΜΑΤΑ

Το φαινόμενο του σχολικού εκφοβισμού συνδέεται άρρηκτα με το σχολείο, τόσο ως χώρο όσο και ως θεσμό, καθώς τα περιστατικά στα οποία ασκείται συστηματικά και με σαφή πρόθεση απευθύνονται στα αδύναμα μέλη της σχολικής κοινότητας. Απαραίτητη προϋπόθεση για την αποτελεσματική πρόληψη και διαχείριση της ενδοσχολικής βίας και του σχολικού εκφοβισμού είναι η διεξοδική μελέτη του φαινομένου η καταγραφή της υφιστάμενης κατάστασης σε διεθνές και εθνικό ερευνητικό επίπεδο (Artinopoulou et al, 2023) και η λήψη αντίστοιχων πρωτοβουλιών διαχείρισης και αντιμετώπισης. Γενικότερος στόχος των προαναφερθεισών εφαρμογών/προγραμμάτων είναι το σχολείο ως χώρος και ως θεσμός όπου οι μαθητές θα μάθουν να διαχειρίζονται πραγματικά προβλήματα, οι προτεινόμενες λύσεις να είναι ουσιαστικές και αποτελεσματικές και να υπάρχει η μέριμνα/δυνατότητα όσα μαθαίνουν στο σχολείο να τα εφαρμόζουν και εκτός σχολείου (Markolefas et al, 2024β).

Στην παρούσα μελέτη παρουσιάστηκε μια ποικιλία διαφορετικών επιλογών σχετικά με τον τρόπο χρήσης της τεχνολογίας ως μεθόδου πρόληψης και αντιμετώπισης του εκφοβισμού. Εξετάζοντας τις πιθανές λύσεις, έγινε εμφανές ότι διάφορα είδη τεχνολογιών μπορούν να αξιοποιηθούν στη μάχη κατά του εκφοβισμού. Η ανάπτυξη της ενσυναίσθησης είναι ένας κοινός παρονομαστής στις λύσεις που παρουσιάζονται. Σήμερα υπάρχουν εργαλεία και ανιχνευτές που έχουν την δυνατότητα άμεσης εμπλοκής στις πιθανές καταστάσεις εκφοβισμού. Οι επιτυχημένες τεχνολογικές λύσεις μειώνοντας τον αριθμό των περιστατικών εκφοβισμού που συμβαίνουν, θα ελαττώσουν και την εμφάνιση των πιο σοβαρών προβλημάτων που προκαλούνται από τον εκφοβισμό (Kinnunen, 2022).

Όποια εφαρμογή/πρόγραμμα επιλεγεί οφείλει να εξασφαλίζει την προστασία της ιδιωτικής ζωής και των δικαιωμάτων των εμπλεκομένων (European Commission, 2024β). Ενδεχομένως στο μέλλον όταν έχουν ωριμάσει οι συνθήκες να εξεταστεί ο εντοπισμός του τέλειου συνδυασμού λύσεων – προτάσεων, αξιοποιώντας τις απόψεις των εμπλεκομένων, σχετικά με την πρόληψη του εκφοβισμού, συνδυάζοντας τον εκφοβισμό με την τεχνολογία (Kinnunen, 2022). Όποια και να είναι τα προγράμματα/λύσεις που θα επιλεχθούν κατά του σχολικού εκφοβισμού απαιτείται η κατάλληλη επιμόρφωση των εκπαιδευτικών για την επιτυχή εφαρμογή και αποτελεσματική λειτουργία τους (Markolefas et al, 2024β). Αναγκαία συνθήκη και προϋπόθεση για την επιτυχή επιμόρφωση και την στοχευμένη επιστημονική υποστήριξη των υπηρετούντων στην εκπαίδευση, και κατ' επέκταση για την καλλιέργεια κατάλληλου παιδαγωγικού κλίματος στα σχολεία, είναι η παροχή χρηματοδότησης. Τέλος είναι αναγκαίο να δρομολογηθεί ένα νέο πλαίσιο οργάνωσης της σχολικής ζωής και στήριξη με δομές συμβουλευτικής υποστήριξης των σχολικών μονάδων (Karkania & Vaikousi, 2021) λαμβάνοντας υπόψη και τις σύγχρονες τεχνολογικές εξελίξεις.

ΠΕΡΙΛΗΨΗ

Η Τεχνητή Νοημοσύνη (ΤΝ) στην εκπαίδευση έχει εξελιχθεί τα τελευταία χρόνια σε έναν από τους πιο ραγδαία αναπτυσσόμενους και δυναμικούς ερευνητικούς τομείς. Η αυξανόμενη ενσωμάτωσή της στις εκπαιδευτικές διαδικασίες έχει δημιουργήσει νέες ευκαιρίες για καινοτομία στη διδασκαλία και τη μάθηση, αλλά και προκλήσεις που σχετίζονται με ζητήματα δεοντολογίας, ακαδημαϊκής ακεραιότητας και παιδαγωγικής αξιοποίησης. Η παρούσα μελέτη πραγματοποιεί μια συστηματική βιβλιομετρική ανάλυση της ερευνητικής δραστηριότητας γύρω από την ΤΝ στην εκπαίδευση, με στόχο τη χαρτογράφηση των τάσεων, των θεματικών αξόνων και των μελλοντικών κατευθύνσεων του πεδίου. Το δείγμα περιλαμβάνει συναφείς δημοσιεύσεις από τη βάση δεδομένων Scopus για την περίοδο 2016–2024, οι οποίες αναλύθηκαν με τα εργαλεία Bibliometrix R και VOSviewer. Τα πρώτα αποτελέσματα αναδεικνύουν μια εκθετική αύξηση του επιστημονικού ενδιαφέροντος μετά το 2019, με κυρίαρχες θεματικές τις εφαρμογές των μεγάλων γλωσσικών μοντέλων, την ηθική της ΤΝ, τη μαθησιακή εξατομίκευση και την ακαδημαϊκή ακεραιότητα. Η έρευνα συμβάλλει στη διαμόρφωση μιας επίκαιρης εικόνας του γνωστικού πεδίου και προσφέρει χρήσιμες προτάσεις για μελλοντικές ερευνητικές και εκπαιδευτικές πρωτοβουλίες.

Λέξεις-κλειδιά: Τεχνητή νοημοσύνη, εκπαίδευση, βιβλιομετρική ανάλυση, βάση δεδομένων Scopus

ΕΙΣΑΓΩΓΗ

Η Τέταρτη Βιομηχανική Επανάσταση έχει επιταχύνει την ανάπτυξη των τεχνολογιών πληροφορίας, με την Τεχνητή Νοημοσύνη (ΤΝ) να αποτελεί τον πλέον καθοριστικό παράγοντα της μετασχηματιστικής αυτής πορείας (Ibegbulam et al., 2023). Στην εκπαίδευση, οι εφαρμογές της ΤΝ, όπως τα ευφυή συστήματα διδασκαλίας, η αυτόματη αξιολόγηση, η ανάλυση συναισθημάτων και η ανάπτυξη της κριτικής σκέψης, έχουν αναδείξει νέες δυνατότητες για βελτίωση της ποιότητας και της αποδοτικότητας της μάθησης (Doroudi, 2023; Kamalov et al., 2023). Η εμφάνιση εργαλείων όπως το ChatGPT και τα Large Language Models (LLM) έχει επηρεάσει καθοριστικά τον τρόπο με τον οποίο η εκπαιδευτική κοινότητα προσεγγίζει τη μάθηση, την αξιολόγηση και την εκπαιδευτική δεοντολογία (Ali et al., 2024; Dwivedi et al., 2023).

Παρά την αυξανόμενη ερευνητική δραστηριότητα, η υπάρχουσα βιβλιογραφία παρουσιάζει ετερογένεια ως προς το θεωρητικό πλαίσιο, τις μεθοδολογικές προσεγγίσεις και το πεδίο εφαρμογής (Durak et al., 2024; Zawacki-Richter et al., 2019). Οι περισσότερες μελέτες επικεντρώνονται σε επιμέρους ζητήματα, χωρίς να προσφέρουν μια συνολική χαρτογράφηση του ερευνητικού οικοσυστήματος της ΤΝ στην εκπαίδευση. Για τον λόγο αυτό, η παρούσα εργασία επιδιώκει μια πολυδιάστατη αποτύπωση του πεδίου μέσω μιας βιβλιομετρικής ανάλυσης, απαντώντας σε πέντε αρχικά ερευνητικά ερωτήματα που αφορούν τις τάσεις δημοσιεύσεων και αναφορών, τους πιο επιδραστικούς ερευνητικούς φορείς, τις κυρίαρχες θεματικές, τα δίκτυα συνεργασίας και τις προοπτικές για μελλοντική έρευνα. Η συμβολή της μελέτης είναι διττή: αφενός ενισχύει τη θεωρητική κατανόηση της σχέσης ανάμεσα στην ΤΝ και την εκπαίδευση, και αφετέρου προσφέρει πρακτικές κατευθύνσεις για την ανάπτυξη εκπαιδευτικών πολιτικών και την ενίσχυση της επιστημονικής συνεργασίας.

ΜΕΘΟΔΟΛΟΓΙΑ

Η έρευνα βασίστηκε στη μέθοδο της βιβλιομετρικής ανάλυσης, η οποία συνδυάζει ποσοτικές και ποιοτικές τεχνικές για τη διερεύνηση της ερευνητικής δραστηριότητας σε ένα συγκεκριμένο επιστημονικό πεδίο (Donthu et al., 2021; Mukherjee et al., 2022). Η συγκεκριμένη μεθοδολογική προσέγγιση έχει εφαρμοστεί ευρέως σε πλήθος ερευνών από διαφορετικούς επιστημονικούς κλάδους (Chytis et al., 2024; Mitroulia et al., 2023), γεγονός που επιβεβαιώνει την αξιοπιστία και τη χρησιμότητά της για τη χαρτογράφηση της επιστημονικής παραγωγής.

Τα δεδομένα συλλέχθηκαν αποκλειστικά από τη βάση Scopus, μία από τις πιο αξιόπιστες και εκτενείς ακαδημαϊκές πηγές, χρησιμοποιώντας τον όρο αναζήτησης “artificial intelligence” AND “education” στα πεδία τίτλου, περίληψης και λέξεων-κλειδιών. Εφαρμόστηκαν κριτήρια επιλογής που περιόρισαν το δείγμα σε επιστημονικά άρθρα δημοσιευμένα μεταξύ 2016 και 2024 στην αγγλική γλώσσα και ενταγμένα στο πεδίο των «κοινωνικών επιστήμων». Το τελικό δείγμα περιλαμβάνει 3.744 άρθρα. Η ανάλυση πραγματοποιήθηκε σε δύο επίπεδα. Πρώτον, εφαρμόστηκε ανάλυση απόδοσης (performance analysis) για την αξιολόγηση της ερευνητικής παραγωγής συγγραφέων, ιδρυμάτων, χωρών και επιστημονικών περιοδικών βάσει δεικτών όπως ο αριθμός δημοσιεύσεων, οι αναφορές και ο δείκτης Hirsch (Hirsch, 2005). Δεύτερον, πραγματοποιήθηκε ανάλυση επιστημονικής χαρτογράφησης (science mapping), με χρήση των τεχνικών βιβλιογραφικής σύζευξης, ανάλυσης συν-συγγραφέων και ανάλυσης συν-λέξεων (Van Eck & Waltman, 2010). Η διαδικασία ακολούθησε το πρότυπο PRISMA (Page et al., 2021), εξασφαλίζοντας τη διαφάνεια των αποτελεσμάτων.

ΑΠΟΤΕΛΕΣΜΑΤΑ

Η ανάλυση ανέδειξε ραγδαία αύξηση των δημοσιεύσεων μετά το 2019, με ετήσιο ρυθμό ανάπτυξης 57,1% (Εικόνα 1). Ο μέσος αριθμός συγγραφέων ανά άρθρο ήταν 3,6, ενώ περίπου το 22% των δημοσιεύσεων προέκυψαν από διεθνείς συνεργασίες, γεγονός που υποδηλώνει ένα σταδιακά πιο διασυνδεδεμένο ερευνητικό περιβάλλον. Οι Ηνωμένες Πολιτείες ηγούνται του πεδίου με 774 δημοσιεύσεις και πάνω από 20.000 αναφορές, ακολουθούμενες από την Κίνα, το Ηνωμένο Βασίλειο και την Αυστραλία, ενώ το Χονγκ Κονγκ και η Ινδία παρουσιάζουν υψηλό δείκτη επιρροής ανά δημοσίευση. Τα περιοδικά «Sustainability» και «International Journal of Information Management» αποτελούν τις πιο παραγωγικές και επιδραστικές πηγές αντίστοιχα.

Η θεματική ανάλυση αποκάλυψε έξι κύριες ομάδες ερευνών. Η πρώτη αφορά τη μετασχηματιστική επίδραση της ΤΝ στην εκπαιδευτική πολιτική και πρακτική (Dwivedi et al., 2021, 2023). Η δεύτερη εστιάζει στη χρήση της ΤΝ στην ανώτατη εκπαίδευση και στη διαδικτυακή μάθηση (Crompton & Burke, 2023; Ouyang & Jiao, 2021). Η τρίτη ασχολείται με τα ζητήματα της ακαδημαϊκής ακεραιότητας που προκύπτουν από τη χρήση γενετικής ΤΝ (Cotton et al., 2024; Rudolph et al., 2023). Η τέταρτη αναλύει την επίδραση της ΤΝ στη διδακτική πράξη (Popenici & Kerr, 2017), ενώ οι δύο τελευταίες διερευνούν την αξιοποίηση των chatbots και τη συμβολή της ΤΝ στην ενίσχυση της μαθησιακής εμπειρίας (Cooper, 2023; Tlili et al., 2023).

Ετήσια Επιστημονική Παραγωγή για το χρονικό διάστημα 2016-2024

Πηγή: Δημιουργία από τους συγγραφείς

Η ανάλυση συν-συγγραφέων κατέδειξε περιορισμένη διασύνδεση μεταξύ των ερευνητικών ομάδων, γεγονός που καταδεικνύει την ανάγκη για μεγαλύτερη διεπιστημονική συνεργασία (Turner & Baker, 2020). Αντίθετα, η ανάλυση συν-λέξεων αποκάλυψε ένα δυναμικό και συνεχώς εξελισσόμενο εννοιολογικό τοπίο. Οι πιο συχνά εμφανιζόμενες λέξεις-κλειδιά ήταν "artificial intelligence", "education", "ChatGPT" και "machine learning" (Εικόνα 2). Η χρονική ανάλυση των όρων έδειξε τη σταδιακή μετάβαση του ενδιαφέροντος από τις τεχνολογικές εφαρμογές προς ζητήματα ηθικής, ψηφιακών δεξιοτήτων και εκπαιδευτικής πολιτικής (Holmes et al., 2022; Xiao et al., 2025).

Εικόνα 2.
Ανάλυση συν-λέξεων (οπτικοποίηση επικάλυψης) άρθρων

Πηγή: Δημιουργία από τους συγγραφείς

Σημειώσεις: Η εικόνα δείχνει την οπτικοποίηση της ανάλυσης συν-λέξεων, καταγράφοντας τη χρονική κατανομή των λέξεων-κλειδιών των συγγραφέων σε κάθε ομάδα. Δημιουργήθηκε από το λογισμικό VOSviewer. Η χρωματική κλίμακα ποικίλλει, με το μπλε να αντιπροσωπεύει τις παλαιότερες χρονικές περιόδους, ενώ το πράσινο και το κίτρινο τις πιο πρόσφατες.

ΣΥΜΠΕΡΑΣΜΑΤΑ

Η μελέτη αυτή προσφέρει μια ολοκληρωμένη χαρτογράφηση της ερευνητικής δραστηριότητας γύρω από την Τεχνητή Νοημοσύνη στην εκπαίδευση. Η ραγδαία αύξηση των δημοσιεύσεων, η διεθνής διάχυση της έρευνας και η ποικιλομορφία των θεματικών αποδεικνύουν ότι πρόκειται για ένα ώριμο, αλλά ταυτόχρονα αναδυόμενο πεδίο με έντονες προοπτικές ανάπτυξης. Τα αποτελέσματα υποδεικνύουν ότι η επιστημονική κοινότητα στρέφεται πλέον από την τεχνολογική διάσταση της ΤΝ προς την κατανόηση των κοινωνικών, ηθικών και παιδαγωγικών της επιπτώσεων. Επίσης,

αναδεικνύεται η ανάγκη ενίσχυσης της συνεργασίας μεταξύ ερευνητών και θεσμών, προκειμένου να ενισχυθεί η διεπιστημονικότητα και να προωθηθεί η υπεύθυνη χρήση της ΤΝ στην εκπαίδευση.

Παρά τους περιορισμούς που σχετίζονται με τη χρήση μόνο της βάσης Scopus και την εστίαση σε άρθρα περιοδικών, η παρούσα εργασία συμβάλλει σημαντικά στη συστηματική κατανόηση της δυναμικής του πεδίου. Επόμενες έρευνες μπορούν να επεκτείνουν τα αποτελέσματα μέσα από συγκριτικές προσεγγίσεις, διεύρυνση των πηγών και ανάλυση του τρόπου με τον οποίο η ΤΝ μετασχηματίζει την εκπαιδευτική πράξη, τη γνώση και τη μαθησιακή εμπειρία. Η Τεχνητή Νοημοσύνη δεν αποτελεί απλώς εργαλείο τεχνολογικής καινοτομίας, αλλά έναν καταλύτη που επαναπροσδιορίζει τη διδασκαλία, τη μάθηση και την εκπαιδευτική επιστήμη στον 21ο αιώνα.

ΠΕΡΙΛΗΨΗ

Οι μαθησιακές δυσκολίες είναι μια νευροαναπτυξιακή διαταραχή που επηρεάζει σημαντικό ποσοστό μαθητών παγκοσμίως, δημιουργώντας ακαδημαϊκές και κοινωνικοσυναισθηματικές προκλήσεις που μπορεί να επηρεάσουν την ενήλικη ζωή. Παρόλο που οι μαθησιακές δυσκολίες δεν είναι πλήρως αντιμετωπίσιμες, τα άτομα που ζουν με αυτές μπορούν να ενισχύσουν σημαντικά τις ικανότητές τους, με τη βοήθεια κατάλληλων μεθόδων διδασκαλίας και υποστηρικτικών εργαλείων. Ο έγκαιρος εντοπισμός των μαθησιακών δυσκολιών και η παροχή κατάλληλης παρέμβασης είναι υψίστης σημασίας όχι μόνο για την υποστήριξη των μαθητών με μαθησιακές δυσκολίες στην αντιμετώπιση των ακαδημαϊκών αναγκών τους αλλά και για την ενίσχυση της κοινωνικής και συναισθηματικής τους ευημερίας, της σωστής ανάπτυξής τους και τη βελτίωση της ποιότητας της ζωής τους. Η τεχνητή νοημοσύνη προσφέρει καινοτόμες δυνατότητες για την υποστήριξη των μαθητών με μαθησιακές δυσκολίες, προσφέροντας εξατομικευμένα ψηφιακά εργαλεία και στρατηγικές μάθησης προσαρμοσμένα στις ιδιαίτερες εκπαιδευτικές τους ανάγκες. Σκοπός αυτής της μελέτης είναι, μέσω της συστηματικής βιβλιογραφικής ανασκόπησης, να εξετάσει τις πιο πρόσφατες εφαρμογές τεχνητής νοημοσύνης που έχουν αναπτυχθεί για την υποστήριξη των μαθητών με μαθησιακές δυσκολίες και την αποτελεσματικότητά τους στη βελτίωση των ακαδημαϊκών τους επιδόσεων. Μέσα από τη βιβλιογραφική αναζήτηση στις βάσεις δεδομένων Scopus, PubMed και Google Scholar εντοπίστηκε περιορισμένος αριθμός μελετών αναφορικά με τον ρόλο της τεχνητής νοημοσύνης στην εκπαίδευση μαθητών με μαθησιακές δυσκολίες. Εντούτοις, μέσα από αυτές τις μελέτες φάνηκε ότι η τεχνητή νοημοσύνη μπορεί να ενισχύσει την εκπαιδευτική πορεία των ατόμων με μαθησιακές δυσκολίες και να διευκολύνει τη μαθησιακή διαδικασία, βελτιώνοντας τις μαθησιακές τους επιδόσεις, μειώνοντας τις προκλήσεις και τις ανισότητες που αντιμετωπίζουν και παρέχοντας με αυτόν τον τρόπο ίσες ευκαιρίες επιτυχίας στον εκπαιδευτικό τομέα. Η συστηματική ανασκόπηση της υπάρχουσας βιβλιογραφίας, σε συνδυασμό με τα ευρήματα της μελέτης, καταδεικνύει ουσιώδη κενά και ανάγκες στην ενσωμάτωση της τεχνητής νοημοσύνης στην εκπαίδευση μαθητών με μαθησιακές δυσκολίες. Συγκεκριμένα, για την περαιτέρω ανάπτυξη της τεχνητής νοημοσύνης στην εκπαίδευση, κρίνεται απαραίτητη η δημιουργία εφαρμογών που θα καλύπτουν τις μαθησιακές ανάγκες των μαθητών με μαθησιακές δυσκολίες και όχι μόνο των φοιτητών. Επιπλέον, η έρευνα επικεντρώνεται κυρίως στη δυσλεξία, αφήνοντας άλλες μαθησιακές δυσκολίες ανεξερεύνητες, γεγονός που αναδεικνύει την ανάγκη για περαιτέρω μελέτες. Παράλληλα, η έλλειψη ερευνών σχετικά με τις αντιλήψεις των εκπαιδευτικών υπογραμμίζει την ανάγκη διερεύνησης του ρόλου τους στην ενσωμάτωση της τεχνητής νοημοσύνης στη διδασκαλία. Τέλος, προτείνεται η περαιτέρω μελέτη υφιστάμενων εφαρμογών, με στόχο τη βελτίωση των αλγορίθμων εξατομίκευσης και τη βέλτιστη απόδοσή τους στην εκπαίδευση μαθητών και φοιτητών με μαθησιακές δυσκολίες.

Λέξεις – κλειδιά: Τεχνητή νοημοσύνη, μαθησιακές δυσκολίες, εξατομικευμένη μάθηση, ψηφιακά εργαλεία, στρατηγικές μάθησης, εξατομικευμένες παρεμβάσεις.

ΕΙΣΑΓΩΓΗ

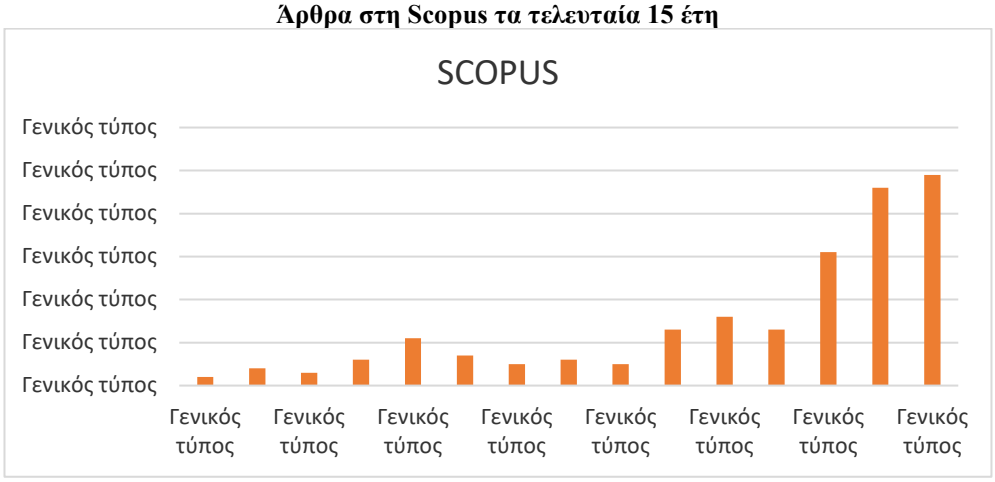
Οι Μαθησιακές Δυσκολίες (ΜΔ) είναι μια νευρολογική διαταραχή που επηρεάζει μία ή περισσότερες από τις βασικές ψυχολογικές διαδικασίες που εμπλέκονται στην κατανόηση ή στη χρήση προφορικού ή γραπτού λόγου και επηρεάζουν την ικανότητα ενός ατόμου να λαμβάνει, να αποθηκεύει, να επεξεργάζεται, να ανακτά ή να επικοινωνεί πληροφορίες (Handler, Fierson and Section on Ophthalmology and Council on Children with Disabilities, et al., 2011; Ouherrou, et al., 2019). Οι ΜΔ επηρεάζουν έως και το 10% του παγκόσμιου πληθυσμού (Alone and Bamnote, 2023; Dhamal and Mehrotra, 2021; Rico-Olarte, et al., 2020) και εμφανίζονται στους μαθητές ανεξάρτητα από τη μητρική τους γλώσσα ή το μέσο διδασκαλίας (Vidyadharan and Tharayil, 2019). Οι μαθητές με ΜΔ μπορεί να υποφέρουν ακαδημαϊκά και κοινωνικοσυναισθηματικά εάν οι δυσκολίες που αντιμετωπίζουν δεν ανιχνευθούν εγκαίρως (Ravichandran, et al., 2023). Ενώ οι ειδικές μαθησιακές δυσκολίες δεν μπορούν να επιλυθούν πλήρως και είναι δια βίου (Alshehri, et al., 2023; David and Balakrishnan, 2010; Turan and Atila, 2021; Youssef and Youssef, 2019), όσοι ζουν με αυτές εξακολουθούν να είναι σε θέση να βελτιώσουν σημαντικά τις δυνατότητές τους με τη βοήθεια κατάλληλων μεθόδων διδασκαλίας και βοηθητικών εργαλείων (David and Balakrishnan, 2010; Turan and Atila, 2021; Youssef and Youssef, 2019). Ο έγκαιρος εντοπισμός της ΜΔ και η παροχή κατάλληλης παρέμβασης είναι υψίστης σημασίας όχι μόνο για την υποστήριξη των μαθητών με ΜΔ στην αντιμετώπιση των ακαδημαϊκών αναγκών τους αλλά και για την ενίσχυση της κοινωνικής και συναισθηματικής τους ευημερίας (Bhatti, et al., 2024; Fortes, et al., 2016; Zhai and Panjwani-Charania, 2023), της σωστής ανάπτυξής τους και τη βελτίωση της ποιότητας της ζωής τους (Fortes, et al., 2016; Turan and Atila, 2021). Η ταχεία ανάπτυξη της τεχνητής νοημοσύνης (ΤΝ) στην εκπαίδευση έχει τη δυνατότητα να αυξήσει τις ευκαιρίες μάθησης, να εμπλουτίσει τις εξατομικευμένες μαθησιακές εμπειρίες, να προσφέρει απεριόριστες δυνατότητες και συναρπαστικές ευκαιρίες για την αντιμετώπιση εκπαιδευτικών ζητημάτων, να επιτύχει τα επιθυμητά μαθησιακά αποτελέσματα βελτιώνοντας τη μάθηση (Zheng, et al., 2023) και να βοηθήσει και να ενδυναμώσει τους εκπαιδευτικούς ώστε να κάνουν τη μαθησιακή διαδικασία μια απολαυστική εμπειρία για τους μαθητές (Fitria, 2021).

Σκοπός της μελέτης αποτελεί μία όσο το δυνατόν πληρέστερη καταγραφή των νέων ερευνητικών δεδομένων σχετικά με το ρόλο της ΤΝ στην εκπαίδευση των μαθητών και φοιτητών με ΜΔ. Για το σκοπό αυτό, διεξήχθη συστηματική ανασκόπηση (Systematic Literature Review – SLR) άρθρων της διεθνούς βιβλιογραφίας σχετικά με το θέμα.

Κατόπιν μελέτης της διεθνούς βιβλιογραφίας, διατυπώθηκαν τα ακόλουθα διερευνητικά ερωτήματα:

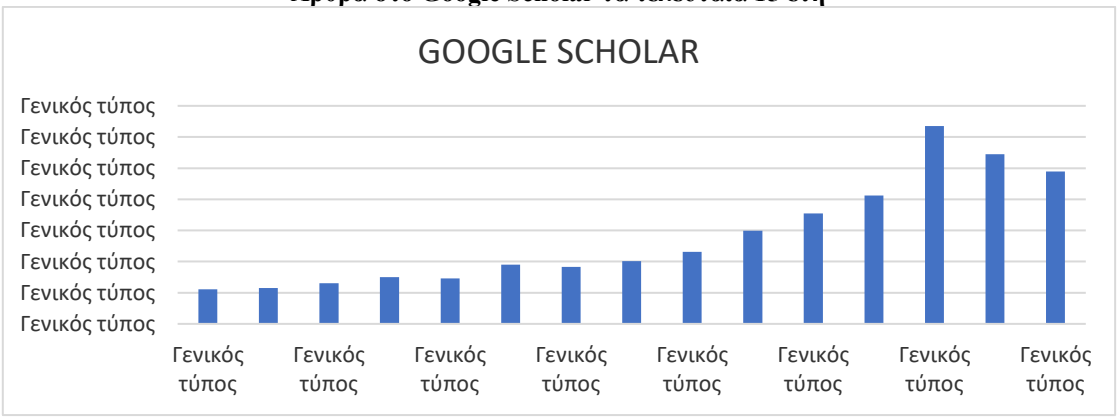
1. Ποιες εφαρμογές της τεχνητής νοημοσύνης έχουν αναπτυχθεί τα τελευταία χρόνια (2021-2024) για την υποστήριξη μαθητών και φοιτητών με μαθησιακές δυσκολίες;
2. Ποια είναι τα αποτελέσματα αυτών των εφαρμογών στη βελτίωση των μαθησιακών επιδόσεων των μαθητών και φοιτητών με ΜΔ;
3. Πώς αντιλαμβάνονται οι εκπαιδευτικοί τη χρήση της τεχνητής νοημοσύνης ως εργαλείο στήριξης των μαθητών και φοιτητών με μαθησιακές δυσκολίες;

ΜΕΘΟΔΟΛΟΓΙΑ



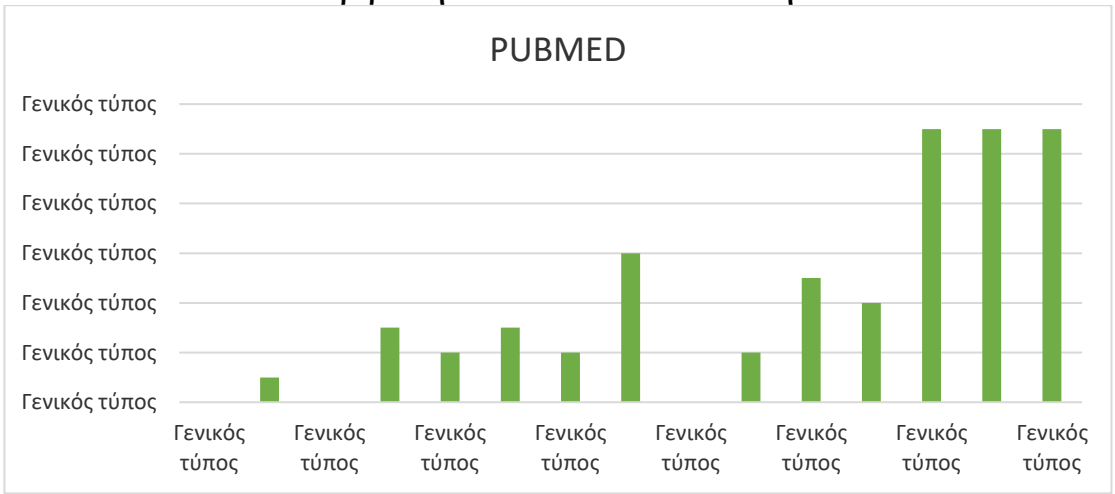
Η παρούσα εργασία βασίστηκε στη μέθοδο της συστηματικής ανασκόπησης. Για τη διεξαγωγή της ακολουθήθηκε μια διαδικασία 4 σταδίων:

1. Εύρεση διεθνούς βιβλιογραφίας βασισμένη στον τίτλο και την περίληψη
2. Επιλογή και εξαίρεση μελετών (βάσει κριτηρίων ένταξης και αποκλεισμού)
3. Διεξοδική μελέτη της επιλεγμένης βιβλιογραφίας
4. Εξαγωγή Αποτελεσμάτων



Αναφορικά με τη στρατηγική αναζήτησης, για τη συλλογή της κατάλληλης βιβλιογραφίας πραγματοποιήθηκε ηλεκτρονική αναζήτηση μελετών σε τρεις βάσεις δεδομένων, τη Scopus, τη Google Scholar και την PubMed. Η αναζήτηση ολοκληρώθηκε τον Οκτώβριο του 2024. Προκειμένου να απαντηθούν τα ερευνητικά ερωτήματα αποτελεσματικά, να εξασφαλιστεί η γενίκευση των ευρημάτων και να αποφευχθούν μεροληψίες στην επιλογή των άρθρων, τέθηκε ένα σύνολο ειδικών κριτηρίων ένταξης και αποκλεισμού σε αυτή τη μελέτη που στοχεύουν στη βελτίωση της εστίασης και τον εντοπισμό των σχετικών ερευνών, όπως φαίνεται στον (**Σφάλμα! Το αρχείο προέλευσης της αναφοράς δεν βρέθηκε.**). Η προκαταρκτική μελέτη που πραγματοποιήθηκε υποδηλώνει ότι η χρήση της ΤΝ στην υποστήριξη μαθητών με ΜΔ, αν και ξεκίνησε να αναπτύσσεται σημαντικά από τη δεκαετία του 1990, αυξήθηκε τα τελευταία 10-15 έτη. Οι (Εικόνες 1, 2 και 3) δείχνουν χρόνο με τον χρόνο τον αυξανόμενο αριθμό αποτελεσμάτων των δημοσιευμένων άρθρων με θέμα «τεχνητή νοημοσύνη» και «μαθησιακές δυσκολίες», όπως προκύπτουν από τη Scopus, τη Google Scholar και την PubMed τη χρονική περίοδο 2010 – 2024. Τα τελευταία τρία έτη, 2022 – 2024, υπήρξε ραγδαία αύξηση στον αριθμό των αποτελεσμάτων των δημοσιευμένων άρθρων. Αξιοσημείωτο είναι ότι τα έτη αυτά αναλογούν σε ένα μεγάλο ποσοστό, δηλαδή το 58.06%, 39.80% και 54.09% όλων των αποτελεσμάτων της 15ετίας στη

Scopus, Google Scholar και PubMed αντίστοιχα. Επομένως, η αναζήτηση περιορίστηκε σε αυτά τα έτη και επεκτάθηκε ένα έτος επιπλέον για να συμπεριλάβει το έτος 2021, καθώς το 2021 μπορεί να αποτέλεσε σημείο εκκίνησης της αυξητικής τάσης τα επόμενα έτη. Έτσι, διασφαλίζεται ότι όλες οι σχετικές με τα νέα δεδομένα μελέτες συμπεριλήφθηκαν στην ανασκόπηση.



Εικόνα 1
Άρθρα στη Scopus τα τελευταία 15 έτη

Εικόνα 2
Άρθρα στο Google Scholar τα τελευταία 15 έτη

Εικόνα 3
Άρθρα στην PubMed τα τελευταία 15 έτη

Αναφορικά με το δείγμα, η μελέτη αυτή εστιάζει σε μαθητές σχολικής ηλικίας και φοιτητές πανεπιστημίου. Καθώς το εκπαιδευτικό σύστημα ίσως διαφέρει από χώρα σε χώρα επιλέχθηκαν μελέτες που αφορούσαν μαθητές δημοτικού έως λυκείου ηλικίας 6-18 ετών καθώς και φοιτητές ανώτερης εκπαίδευσης. Ειδικότερα, η μελέτη περιλαμβάνει μόνο μαθητές και φοιτητές διαγνωσμένους με ΜΔ επειδή η εστίαση σε διαγνωσμένους μαθητές/ φοιτητές με ΜΔ εξασφαλίζει πιο ακριβή και στοχευμένα δεδομένα, αποφεύγοντας γενικεύσεις από μη διαγνωσμένους μαθητές/ φοιτητές με παρόμοια συμπτώματα. Επιπροσθέτως, επιλέχθηκαν άρθρα στην αγγλική γλώσσα δημοσιευμένα σε έγκριτα περιοδικά. Ως έγκριτα περιοδικά ορίζονται αυτά που αποδελτιώνονται σε βάσεις δεδομένων όπως η Google Scholar, η Scopus και η PubMed. Πιο συγκεκριμένα επιλέχθηκαν μόνο Έρευνες Πεδίου, Μετα- αναλύσεις και Συστηματικές Ανασκοπήσεις για να διασφαλιστεί η εγκυρότητα των αποτελεσμάτων και των συμπερασμάτων, καθώς αυτές παρέχουν τα πιο αξιόπιστα και τεκμηριωμένα δεδομένα σχετικά με την αποτελεσματικότητα των εφαρμογών της ΤΝ στην υποστήριξη μαθητών με ΜΔ. Ως τομέας μελέτης ορίστηκε αποκλειστικά ο τομέας της Εκπαίδευσης και αποκλείστηκαν μελέτες διεξαγμένες σε ιατρικά ή κλινικά περιβάλλοντα. Τέλος, το περιεχόμενο των μελετών που συμπεριλήφθηκαν εστιάζει στην υποστήριξη μαθητών και φοιτητών με ΜΔ αποκλείοντας μελέτες εστιασμένες στη διάγνωση, επειδή ο σκοπός αυτής της μελέτης είναι η υποστήριξη της διδασκαλίας και της μάθησης μαθητών και φοιτητών ήδη διαγνωσμένων με ΜΔ.

Πίνακας 1
Κριτήρια ένταξης και αποκλεισμού μελετών

	ΚΡΙΤΗΡΙΑ ΕΝΤΑΞΗΣ	ΚΡΙΤΗΡΙΑ ΑΠΟΚΛΕΙΣΜΟΥ
ΧΡΟΝΙΚΑ ΟΡΙΑ	2021-2024	Έτη πριν το 2021
ΔΕΙΓΜΑ	Μαθητές σχολικής ηλικίας και φοιτητές πανεπιστημίου	Μαθητές προσχολικής ηλικίας ή ενήλικες που δεν είναι φοιτητές
ΠΛΗΘΥΣΜΟΣ - ΣΤΟΧΟΣ	Μαθητές και φοιτητές διαγνωσμένοι με ΜΔ	Μαθητές/ φοιτητές μη διαγνωσμένοι με ΜΔ ή μαθητές/ φοιτητές χωρίς ΜΔ ή μαθητές/ φοιτητές με άλλες ειδικές εκπαιδευτικές ανάγκες
ΕΙΔΗ ΜΕΛΕΤΩΝ	Άρθρα	Άλλες πηγές εκτός άρθρων

Για την επιλογή των πιο συναφών μελετών, εφαρμόστηκαν φίλτρα βασισμένα στα καθορισμένα κριτήρια ένταξης και αποκλεισμού. Τα φίλτρα αυτά περιόρισαν την αναζήτηση σε άρθρα δημοσιευμένα την περίοδο 2021-2024, διαθέσιμα στα αγγλικά και σε μορφή πλήρους κειμένου ανοιχτής πρόσβασης. Στην περίπτωση της PubMed, χρησιμοποιήθηκαν επιπλέον φίλτρα για μετα-αναλύσεις και συστηματικές ανασκοπήσεις, προκειμένου να εξασφαλιστεί η επιλογή μελετών υψηλής ποιότητας.. Η αφαίρεση των διπλότυπων πραγματοποιήθηκε με τη χρήση του εργαλείου Zotero και η εξαγωγή αποτελεσμάτων διεξήχθη με τη χρήση του διαγράμματος ροής PRISMA (PRISMA Flow Diagram, 2020).

Για τη διαδικασία επιλογής μελετών, αρχικά πραγματοποιήθηκε ηλεκτρονική αναζήτηση στις τρεις βάσεις δεδομένων, τη Scopus, τη Google Scholar και την PubMed, όπως προαναφέρθηκε, με τη χρήση της λογικής Boolean και πιο συγκεκριμένα με τους όρους ("Artificial Intelligence" OR "AI") AND ("learning difficult*" OR "learning disabilit*" OR "learning disorder*"). Η αναζήτηση έφερε 111 αποτελέσματα στη Scopus, 8.070 στη Google Scholar και 71 στην PubMed. Ως εκ τούτου, 8.252 άρθρα συμπεριλήφθηκαν στο αρχικό στάδιο ελέγχου καταλληλότητας. Στη συνέχεια, εφαρμόστηκαν τα φίλτρα που προαναφέρθηκαν μειώνοντας έτσι τα αποτελέσματα στα 316. Έπειτα, τα αποτελέσματα μειώθηκαν σε 313 με την αφαίρεση των διπλότυπων που πραγματοποιήθηκε με τη χρήση του εργαλείου Zotero. Μετά τη διαδικασία ελέγχου του τίτλου και της περίληψης αποκλείστηκαν 245 μελέτες που δεν ήταν συναφείς με την έρευνα

καθώς και 19 που ήταν εκπονημένες στα Ιταλικά, Πορτογαλικά, Σουηδικά, Ισπανικά, Ινδονησιακά, Ρωσικά και Κινέζικα. Συνεπώς τα αποτελέσματα περιορίστηκαν σε 49.Στη συνέχεια, έγινε προσπάθεια ανάκτησης αυτών των μελετών, κατά την οποία τα αποτελέσματα μειώθηκαν σε 44 εφόσον δεν υπήρξε πρόσβαση σε 5 άρθρα. Τέλος, μετά τη διεξοδική μελέτη των 44 άρθρων τα αποτελέσματα μειώθηκαν σε 2, όπως φαίνεται στον **Σφάλμα! Το αρχείο προέλευσης της αναφοράς δ εν βρέθηκε.**. Από αυτά τα δύο άρθρα, το ένα που ήταν Έρευνα Πεδίου χρησιμοποιήθηκε εξ ολοκλήρου καθώς και μία αναφορά μελέτης του, ενώ από το δεύτερο, που ήταν συστηματική ανασκόπηση, αξιοποιήθηκαν μόνο δύο αναφορές μελετών που πληρούσαν τα κριτήρια ένταξης για αυτή την έρευνα. Συνεπώς, 4 άρθρα συμπεριλήφθηκαν στη μελέτη.

Το Prisma (Preferred Reporting Items for Systematic reviews and Meta-Analyses), το οποίο δημοσιεύτηκε για πρώτη φορά το 2009 και αναθεωρήθηκε το 2020, αναπτύχθηκε με σκοπό να αυξηθεί η σαφήνεια, η διαφάνεια, η ποιότητα και η αξία των συστηματικών ανασκοπήσεων και των μετα- αναλύσεων (Sohrabi, et al., 2021). Στην παρούσα συστηματική ανασκόπηση η διεξαγωγή των αποτελεσμάτων πραγματοποιήθηκε με τη χρήση του παρακάτω διαγράμματος ροής PRISMA 2020 (PRISMA Flow Diagram, 2020), που καθιστά τη διαδικασία επιλογής μελετών πιο διαφανή και αξιόπιστη και ενισχύει την εγκυρότητα της μεθοδολογικής διαδικασίας, και στο οποίο παρουσιάζεται η διαδικασία αναζήτησης, εντοπισμού, ελέγχου καταλληλόλητας και τελικής επιλογής των άρθρων που πληρούσαν τα κριτήρια ένταξης στη συστηματική ανασκόπηση (Εικόνα 4).

Εικόνα 4
Διάγραμμα Ροής 2 PRISMA 2020 (PRISMA Flow Diagram, 2020)

* Η μία εκ των δύο μελετών, η οποία ήταν συστηματική ανασκόπηση, δεν χρησιμοποιήθηκε ως μελέτη αλλά χρησιμοποιήθηκαν δύο αναφορές μελετών της οι οποίες πληρούσαν τα κριτήρια ένταξης για την έρευνα.

ΑΠΟΤΕΛΕΣΜΑΤΑ

Στην παρούσα συστηματική ανασκόπηση αναλύθηκαν μελέτες που πληρούσαν τα προκαθορισμένα κριτήρια ένταξης και αξιοποιούσαν την ΤΝ στην εκπαίδευση μαθητών και φοιτητών διαγνωσμένων με ΜΔ. Οι 4 αυτές μελέτες που συμπεριλήφθηκαν εφαρμόζουν διαφορετικές μεθόδους και τεχνολογίες ΤΝ, με στόχο την υποστήριξη των μαθητών/φοιτητών με ΜΔ και τη βελτίωση της μαθησιακής τους εμπειρίας. Από τα αποτελέσματα διαφαίνεται πως υπάρχει ένα ευρύ φάσμα δυνατοτήτων της ΤΝ, από συστήματα συστάσεων και πλατφόρμες προσαρμοσμένης μάθησης που προτείνουν εξατομικευμένο περιεχόμενο και στρατηγικές μάθησης, έως και εφαρμογές και ψηφιακά εργαλεία που διευκολύνουν την ανάγνωση και την επικοινωνία ατόμων με ΜΔ. Πιο αναλυτικά, τα κύρια ευρήματα των μελετών είναι τα εξής:

Στη μελέτη των Zingoni, et al. (2021) που διεξήχθη στην Ιταλία και την Ισπανία, διερευνήθηκε η ανάπτυξη και οι πρώτες εκτιμήσεις αποτελεσματικότητας της πλατφόρμας «BESPECIAL», η οποία σχεδιάστηκε στα πλαίσια του έργου VRAIlexia για να προσφέρει εξατομικευμένη υποστήριξη σε φοιτητές πανεπιστημίου με δυσλεξία. Η πλατφόρμα συνδυάζει τεχνητή νοημοσύνη και εικονική πραγματικότητα προσφέροντας με αυτόν τον τρόπο ένα καινοτόμο περιβάλλον μάθησης που ανταποκρίνεται στις ιδιαίτερες ανάγκες και στις δυσκολίες των φοιτητών. Οι φοιτητές με δυσλεξία αντιμετώπιζαν σημαντικές δυσκολίες στην πανεπιστημιακή τους πορεία κυρίως στην ανάγνωση, τη μνήμη και την κατανόηση σύνθετων εννοιών. Η πλατφόρμα αυτή αναπτύχθηκε για να παρέχει εξατομικευμένη υποστήριξη στους φοιτητές, λαμβάνοντας υπόψη αυτές τις δυσκολίες και προσφέροντας τα κατάλληλα εργαλεία και στρατηγικές μάθησης για την αντιμετώπισή τους. Στόχος ήταν να ενισχυθούν οι δεξιότητες των φοιτητών με δυσλεξία, να βελτιωθεί η ακαδημαϊκή επίδοσή τους και να μειωθεί ο κίνδυνος εγκατάλειψης των σπουδών τους. Το δείγμα της έρευνας αποτελούνταν από 700 πανεπιστημιακούς φοιτητές διαγνωσμένους με δυσλεξία, κυρίως από σχολές ανθρωπιστικών σπουδών. Τα εργαλεία που χρησιμοποιήθηκαν για τη συλλογή δεδομένων στην έρευνα ήταν τα εξής: 1) Η πλατφόρμα «BESPECIAL», η οποία χρησιμοποιεί ΤΝ για να αξιολογήσει τις ατομικές ανάγκες των φοιτητών και εικονική πραγματικότητα (Virtual Reality- VR) για την παρακολούθηση προόδου 2) ψυχομετρικές δοκιμασίες που μετρούν την αυτοπεποίθηση, το άγχος και την αυτοεκτίμηση 3) OCR (Optical Character Recognition) για τη συλλογή δεδομένων από κλινικές αναφορές και 4) ερωτηματολόγια που ανέλυσαν τις ιδιαίτερες ανάγκες των φοιτητών, ενώ η προσαρμογή των στρατηγικών μάθησης βασίστηκε σε αυτά τα δεδομένα. Στα προκαταρκτικά αποτελέσματα διαφαίνεται πως η πλατφόρμα επέδειξε σημαντική βελτίωση τόσο στην ακαδημαϊκή επίδοση των φοιτητών όσο και στην αυτοπεποίθησή τους, καθώς οι συμμετέχοντες ανέφεραν πως βελτιώθηκαν στην κατανόηση και στην ανάκληση των διδαγμένων εννοιών αλλά και πως ενισχύθηκε η αυτοπεποίθησή τους. Ανέφεραν επίσης τη χρησιμότητα των διαδραστικών εμπειριών εικονικής πραγματικότητας οι οποίες - μέσω της οπτικοποίησης – τους επέτρεψαν την ενεργή συμμετοχή στη μάθηση και την καλύτερη κατανόηση δύσκολων εννοιών, αλλά και της τεχνητής νοημοσύνης που πρόσφερε στρατηγικές μάθησης που ανταποκρίνονταν στις ατομικές προκλήσεις που αντιμετώπιζαν. Συμπερασματικά, η έρευνα έδειξε πως η πλατφόρμα «BESPECIAL» μπορεί να παρέχει υποστήριξη σε φοιτητές με δυσλεξία και αποδεικνύει πως η εξατομίκευση, σε συνδυασμό με τεχνολογίες όπως η τεχνητή νοημοσύνη και η εικονική πραγματικότητα, μπορεί να βελτιώσει την ακαδημαϊκή επίδοση των φοιτητών αυτών. Η μελέτη προτείνει την ενσωμάτωση των σύγχρονων τεχνολογιών στις στρατηγικές μάθησης, και όχι τον περιορισμό τους σε απλά υποστηρικτικά εργαλεία, προκειμένου να βελτιώνονται διαρκώς οι δεξιότητες των φοιτητών με δυσλεξία και να παρέχονται ίσες ευκαιρίες για την επιτυχία τους στον ακαδημαϊκό τομέα.

Η μελέτη των Wang, et al. (2022) διερεύνησε τη χρήση ενός μοντέλου Επαυξανόμενης Εναλλακτικής Επικοινωνίας (Augmentative Alternative Communication - AAC) που αξιοποιεί την τεχνητή νοημοσύνη για την υποστήριξη μαθητών και φοιτητών με δυσλεξία. Η έρευνα διεξήχθη στην Κίνα και την Ινδία και στόχος της ήταν να βελτιωθούν οι δεξιότητες ανάγνωσης και μάθησης των μαθητών και φοιτητών μέσω ενός ευέλικτου συστήματος προσαρμοσμένο στις ατομικές τους ιδιαίτερες ανάγκες. Αναφορικά με το δείγμα, η έρευνα περιέλαβε 20 μαθητές – φοιτητές με δυσλεξία από σχολεία και πανεπιστήμια. Τα εργαλεία που χρησιμοποιήθηκαν για τη συλλογή δεδομένων ήταν: 1) ερωτηματολόγια αξιολόγησης για τη συλλογή δεδομένων σχετικά με τις ανάγκες των μαθητών και τις δυσκολίες τους στην ανάγνωση και την κατανόηση 2) ειδικά σχεδιασμένα εικονογράμματα (pictograms) για την υποστήριξη των μαθητών και φοιτητών κατά τη διαδικασία της μάθησης μέσω της οπτικοποίησης των πληροφοριών 3) το υβριδικό μοντέλο AI-AAC το οποίο ενσωμάτωσε τα εικονογράμματα και 4) αλγόριθμοι μηχανικής μάθησης (Machine Learning-ML) για την ταξινόμηση δεδομένων και την παρουσίαση κατάλληλων συστάσεων. Πιο συγκεκριμένα οι αλγόριθμοι που εφαρμόστηκαν ήταν εξής: Maximum Entropy (ME), Support Vector Machine (SVM), Complement Naive Bayes (CNB) και Naive Bayes (NB). Οι αλγόριθμοι αυτοί συγκρίθηκαν ως προς την αποτελεσματικότητα τους τόσο στην ταξινόμηση δεδομένων όσο και στην παροχή κατάλληλων συστάσεων προσαρμοσμένων στις ιδιαίτερες ανάγκες των μαθητών και φοιτητών. Τα αποτελέσματα έδειξαν ότι το μοντέλο AI – AAC ήταν εξαιρετικά αποτελεσματικό στην υποστήριξη των μαθητών και φοιτητών με δυσλεξία και στη βελτίωση της μαθησιακής διαδικασίας. Ειδικότερα, η έρευνα διαπίστωσε ότι το AI – AAC αύξησε την ακρίβεια των εξατομικευμένων συστάσεων κατά 40.88%, με συνολική ακρίβεια 94.98%. Παράλληλα, η αποτελεσματικότητα αυξήθηκε κατά 39.71%, με συνολική απόδοση 96.95%. Επιπλέον, παρατηρήθηκε

μείωση κατά 36.56% στην προσπάθεια που χρειαζόταν ένας μαθητής – φοιτητής για την κατανόηση και ολοκλήρωση των εκπαιδευτικών δραστηριοτήτων, ενώ ο χρόνος απόκρισης μειώθηκε κατά 66.34%, βελτιώνοντας την εμπειρία μάθησης μέσω ταχύτερης πρόσβασης στις πληροφορίες και τα εργαλεία υποστήριξης. Συμπερασματικά, το μοντέλο AI – AAC αποδεικνύεται εξαιρετικά αποτελεσματικό στη βελτίωση των μαθησιακών δεξιοτήτων μαθητών και φοιτητών με δυσλεξία παρέχοντάς τους προσαρμοσμένη και εξατομικευμένη υποστήριξη. Τα υψηλά ποσοστά ακρίβειας και αποτελεσματικότητας του AI – AAC υποδεικνύουν ότι τέτοιου είδους εξατομικευμένα εργαλεία μπορούν να ανταποκριθούν στις ειδικές μαθησιακές ανάγκες των μαθητών και φοιτητών με δυσλεξία προσφέροντας καλύτερη πρόσβαση σε κατάλληλη υποστήριξη και αυξάνοντας τις δυνατότητές τους στην ανάγνωση και την κατανόηση.

Η μελέτη των Morciano, et al. (2024), η οποία έλαβε χώρα στην Ιταλία και την Ισπανία, επικεντρώθηκε στη χρήση ενός συστήματος συστάσεων με τεχνητή νοημοσύνη για την παροχή εξατομικευμένης υποστήριξης φοιτητών με δυσλεξία κατά τη μαθησιακή τους πορεία στο πανεπιστήμιο. Στόχος της έρευνας ήταν να συγκριθούν τρία μοντέλα συστάσεων συνεργατικού φιλτραρίσματος, ένα βάσει στοιχείων (item – based model), ένα βάσει χρήστη (user- based model) και ένα σταθμισμένο υβριδικό (weighted – hybrid model) ώστε να επιλεγεί το μοντέλο που προσφέρει τα βέλτιστα εργαλεία υποστήριξης και στρατηγικές μάθησης στους φοιτητές με δυσλεξία για βελτίωση της ακαδημαϊκής τους επίδοσης. Το δείγμα της έρευνας αποτελούνταν από 1.237 Ιταλούς φοιτητές με δυσλεξία οι οποίοι συμπλήρωσαν ερωτηματολόγια αυτοαξιολόγησης σχετικά με τα περισσότερο χρησιμοποιούμενα ψηφιακά εργαλεία (17) και στρατηγικές μάθησης (22). Επιπλέον, το σύστημα δοκιμάστηκε σε 50 φοιτητές (20 με δυσλεξία και 30 χωρίς) για την αξιολόγηση της αποτελεσματικότητας των συστάσεων. Τα εργαλεία που χρησιμοποιήθηκαν στην έρευνα ήταν: 1) τα τρία μοντέλα συστάσεων συνεργατικού φιλτραρίσματος (item-based model, user-based model και weighted hybrid model) 2) τρεις μετρικές ομοιότητας (Pearson correlation, Euclidean distance και Cosine similarity) 3) ο αλγόριθμος μηχανικής μάθησης K-Nearest Neighbors (k-NN) 4) ερωτηματολόγια που περιλάμβαναν τα 39 ψηφιακά εργαλεία και στρατηγικές μάθησης. Το κάθε μοντέλο συγκρίθηκε και με τις τρεις μετρικές ομοιότητας.

Στα αποτελέσματα διαφαίνεται πως το υβριδικό μοντέλο συστάσεων παρουσίασε την υψηλότερη απόδοση με ακρίβεια 85%, ανάκληση 83% και χαμηλό ποσοστό σφάλματος 11,93%. Το σύστημα αποδείχθηκε βοηθητικό στους φοιτητές με δυσλεξία εντοπίζοντας τα καταλληλότερα εργαλεία και στρατηγικές μάθησης με βάση τις ανάγκες τους. Οι φοιτητές με δυσλεξία που χρησιμοποίησαν αυτό το σύστημα αύξησαν τη βαθμολογία τους κατά σχεδόν μία μονάδα (σε κλίμακα 1-10) σε σύγκριση με εκείνους που δεν έλαβαν συστάσεις από το σύστημα. Συμπερασματικά, τα θετικά αποτελέσματα της μελέτης έδειξαν πως το σύστημα συστάσεων μπορεί να χρησιμοποιηθεί αποτελεσματικά στην εκπαίδευση για την υποστήριξη φοιτητών με ΜΔ κατά τη διάρκεια της εκπαιδευτικής τους πορείας, προτείνοντάς τους τα βέλτιστα εργαλεία και στρατηγικές μάθησης και παρέχοντάς τους εξατομικευμένη βοήθεια που βελτιώνει την επίδοσή τους και μειώνει τις προκλήσεις που αντιμετωπίζουν.

Στη μελέτη των Zingoni, et al. (2024), η οποία διεξήχθη στην Ιταλία, δημιουργήθηκε ένα μοντέλο ταξινόμησης των πιο χρήσιμων μεθοδολογιών για την εξατομικευμένη υποστήριξη των πανεπιστημιακών φοιτητών με δυσλεξία. Ο αλγόριθμος πρόβλεψης βασίστηκε σε τεχνικές εποπτευόμενης μηχανικής μάθησης (Machine Learning- ML) για να προτείνει προσαρμοσμένα ψηφιακά υποστηρικτικά εργαλεία και στρατηγικές μάθησης στους φοιτητές βάσει των ατομικών τους μαθησιακών δυσκολιών. Στόχος ήταν η βελτίωση της εκπαιδευτικής τους πορείας και η ενίσχυση των δεξιοτήτων τους. Ο αλγόριθμος εκπαιδεύτηκε και δοκιμάστηκε σε δεδομένα που αποκτήθηκαν μέσω ενός ερωτηματολογίου αυτοαξιολόγησης, το οποίο σχεδιάστηκε και στη συνέχεια συμπληρώθηκε από 1.217 Ιταλούς φοιτητές διαγνωσμένους με δυσλεξία, οι οποίοι αποτελούσαν το κύριο δείγμα της έρευνας. Επιπλέον, για την αξιολόγηση της αποτελεσματικότητας του συστήματος ταξινόμησης σε πραγματική περίπτωση, πραγματοποιήθηκε δοκιμή σε 43 φοιτητές. Τα ερωτηματολόγια περιλάμβαναν ερωτήσεις αναφορικά με τις μαθησιακές δυσκολίες των φοιτητών, τα υποστηρικτικά εργαλεία και τις στρατηγικές μάθησης που θεωρούσαν χρήσιμα και επέτρεψαν τον εντοπισμό 17 χρήσιμων εργαλείων και 22 χρήσιμων στρατηγικών. Οι απαντήσεις του ερωτηματολογίου δόθηκαν σε μορφή κλίμακας Likert, επιτρέποντας στους ερευνητές να ποσοτικοποιήσουν τη χρησιμότητα των προτεινόμενων υποστηρικτών εργαλείων και στρατηγικών μάθησης. Τα εργαλεία που χρησιμοποιήθηκαν στη μελέτη ήταν τα εξής: 1) τέσσερις από τους εποπτευόμενους αλγόριθμους μηχανικής μάθησης με τις καλύτερες επιδόσεις για ταξινόμηση και πιο συγκεκριμένα οι random forest (RF), linear/logistic regression (LR), k-nearest neighbors (kNN) και support-vector machines (SVM) 2) μετρικές απόδοσης: ακρίβεια, ανάκληση και βαθμολογία F1 (F1-score) 3) τα ερωτηματολόγια αυτοαξιολόγησης. Στα αποτελέσματα διαφαίνεται ότι η μέση ακρίβεια πρόβλεψης/ συστάσεων ήταν 88,7% για τα εργαλεία και 91,6% για τις στρατηγικές μάθησης. Παγκοσμίως, η επιτευχθείσα μέση ακρίβεια είναι 90,4%. Πραγματοποιήθηκε νέος υπολογισμός της μέσης ακρίβειας πρόβλεψης μετά τον αποκλεισμό των τεσσάρων εργαλείων και τεσσάρων στρατηγικών για τα οποία είχε επιτευχθεί ποσοστό χαμηλότερο από 85%, με αποτέλεσμα αύξηση της μέση ακρίβειας σε 92,7% για τα εργαλεία, 94,8% για τις στρατηγικές και 94,0% σε παγκόσμιο επίπεδο. Επιπλέον, ο προτεινόμενος αλγόριθμος δοκιμάστηκε σε πραγματική περίπτωση, επιτυγχάνοντας ακρίβεια πρόβλεψης υψηλότερη από 90% προτείνοντας χρήσιμες και μη μεθοδολογίες υποστήριξης σε ένα δείγμα 43 φοιτητών με δυσλεξία. Συμπερασματικά, το σύστημα ταξινόμησης που αναπτύχθηκε είναι αποτελεσματικό στη παροχή εξατομικευμένης υποστήριξης φοιτητών με δυσλεξία, βοηθώντας τους

να εντοπίζουν τα καταλληλότερα εργαλεία και στρατηγικές μάθησης με βάση τις ατομικές τους ανάγκες. Ο αλγόριθμος που εφαρμόστηκε μπορεί να επιτύχει τον επιδιωκόμενο στόχο μειώνοντας το χάσμα μεταξύ φοιτητών με δυσλεξία και χωρίς. Αυτή ή επιτυχία ανοίγει νέες προοπτικές για την προσέγγιση του ζητήματος της δυσλεξίας στα πανεπιστήμια, εστιάζοντας στην προσαρμογή των διδακτικών δραστηριοτήτων στις ανάγκες των φοιτητών, αντί να περιορίζεται μόνο στη μείωση του φόρτου σπουδών ή των υποχρεώσεών τους.

ΣΥΜΠΕΡΑΣΜΑΤΑ – ΣΥΖΗΤΗΣΗ

Σκοπός της παρούσας έρευνας υπήρξε η καταγραφή και ανάλυση των νέων ερευνητικών δεδομένων που αφορούν το ρόλο της ΤΝ στην εκπαίδευση ατόμων με ΜΔ. Στόχος ήταν μέσω μια συστηματικής ανασκόπησης της βιβλιογραφίας να διερευνηθούν τα εργαλεία και οι εφαρμογές ΤΝ που έχουν αναπτυχθεί τα τελευταία έτη (2021-2024) για την υποστήριξη μαθητών και φοιτητών με ΜΔ και η αποτελεσματικότητά τους στη βελτίωση των ακαδημαϊκών επιδόσεων αυτού του πληθυσμού.

Η ανάπτυξη της τεχνητής νοημοσύνης την τελευταία τετραετία έχει ενισχύσει τη δυνατότητα παροχής εξατομικευμένης υποστήριξης σε μαθητές και φοιτητές με ΜΔ με βάση τις ιδιαίτερες εκπαιδευτικές τους ανάγκες, βελτιώνοντας την εκπαιδευτική τους εμπειρία και επιτρέποντάς τους ευκαιρίες στη μάθηση ισάξιες με εκείνες των ατόμων χωρίς μαθησιακές δυσκολίες. Η ραγδαία αύξηση του αριθμού σχετικών δημοσιεύσεων αυτά τα τελευταία έτη υποδηλώνει την αυξανόμενη αναγνώριση της ΤΝ ως υποστηρικτικό εργαλείο στην εκπαίδευση. Παρά την πρόοδο αυτή, από τα αποτελέσματα της αναζήτησης των ερευνών που πραγματοποιήθηκε, φάνηκε ότι δεν έχει πραγματοποιηθεί σημαντικός αριθμός ερευνών που να αφορά το μαθητικό και φοιτητικό πληθυσμό με ΜΔ και επιπλέον, ο περιορισμένος αυτός αριθμός ερευνών αφορούσε αποκλειστικά τη δυσλεξία και όχι γενικότερα τις ΜΔ. Ειδικότερα, από τις 4 μελέτες που πληρούσαν τα κριτήρια ένταξης της συστηματικής ανασκόπησης, οι τρεις αναφερόταν αποκλειστικά σε φοιτητές πανεπιστημίου και μόνο η μία αφορούσε και ένα μικρό ποσοστό σχολικού πληθυσμού.

Σύμφωνα με το πρώτο διερευνητικό ερώτημα, οι εφαρμογές της ΤΝ που αναπτύχθηκαν για την υποστήριξη μαθητών και φοιτητών κατά τα έτη 2021-2024 είναι η πλατφόρμα «BESPECIAL» που χρησιμοποιεί τεχνητή νοημοσύνη και εικονική πραγματικότητα (Zingoni, et al., 2021), το μοντέλο Επαυξανόμενης Εναλλακτικής Επικοινωνίας (Augmentative Alternative Communication- AAC) που χρησιμοποιεί αλγόριθμους μηχανικής μάθησης (Wang, Muthu and Sivaparthipan, 2022), ένα υβριδικό μοντέλο συστάσεων συνεργατικού φιλτραρίσματος (Hybrid Recommendation System) που χρησιμοποιεί μετρικές ομοιότητας (Morciano, et al., 2024) και ένα σύστημα ταξινόμησης που χρησιμοποιεί αλγόριθμους μηχανικής μάθησης (Zingoni, Taborri and Calabrò,2024).

Σύμφωνα με το δεύτερο διερευνητικό ερώτημα, οι εφαρμογές αυτές έδειξαν θετικά αποτελέσματα στη βελτίωση των μαθησιακών επιδόσεων των μαθητών και φοιτητών με ΜΔ, οι οποίοι παρουσίασαν βελτίωση στην ανάγνωση και την επικοινωνία, βελτίωση στην κατανόηση και στην ανάκληση των διδαγμένων εννοιών, γενικότερη βελτίωση στη μαθησιακή διαδικασία, αύξηση στη βαθμολογία τους κατά περίπου μία μονάδα, καθώς και αύξηση στην αυτοπεποίθηση και την αυτοεκτίμησή τους. Μέσω αυτών των εφαρμογών που παρέχουν εξατομικευμένη υποστήριξη προτείνοντας τις καταλληλότερες στρατηγικές μάθησης και τα καταλληλότερα ψηφιακά εργαλεία, διευκολύνθηκε όλη η μαθησιακή διαδικασία και μειώθηκαν τα εμπόδια που αντιμετωπίζουν οι μαθητές και οι φοιτητές με ΜΔ. Επιπλέον, μειώθηκαν οι ανισότητες μεταξύ μαθητών/ φοιτητών με ΜΔ και χωρίς, παρέχοντας ίσες ευκαιρίες επιτυχίας στον εκπαιδευτικό τομέα. Συνεπώς, αποδεικνύεται η δυνατότητα της ΤΝ να υποστηρίζει πιο αποτελεσματικά την εκπαίδευση μαθητών και φοιτητών με ΜΔ.

Για την περαιτέρω ανάπτυξη της ΤΝ στην εκπαίδευση κρίνεται απαραίτητη η ανάπτυξη εφαρμογών που θα εστιάζουν στις μαθησιακές ανάγκες των μαθητών με ΜΔ και όχι μόνο των φοιτητών. Επιπλέον, τα άρθρα που συμπεριλήφθηκαν στη συστηματική ανασκόπηση αφορούσαν τη δυσλεξία και όχι γενικότερα τις μαθησιακές δυσκολίες, γεγονός που υποδεικνύει την ανάγκη για περαιτέρω έρευνες που να εξετάζουν και άλλες ΜΔ προκειμένου να καλυφθούν οι διαφορετικές εκπαιδευτικές ανάγκες των μαθητών. Επίσης, το τρίτο ερευνητικό ερώτημα δεν απαντήθηκε καθώς, παρά τη διεξοδική αναζήτηση, δεν βρέθηκαν έρευνες να διερευνούν τις αντιλήψεις των εκπαιδευτικών αναφορικά με τη χρήση της τεχνητής νοημοσύνης ως εργαλείο στήριξης των μαθητών με ΜΔ. Η έλλειψη αυτή υποδηλώνει ένα πιθανό κενό στη βιβλιογραφία και αναδεικνύει την ανάγκη για περαιτέρω έρευνα που θα εξετάζει τις αντιλήψεις των εκπαιδευτικών καθώς οι απόψεις τους μπορεί να είναι καθοριστικές στην ενσωμάτωση της ΤΝ στη μαθησιακή διαδικασία. Τέλος, προτείνεται περισσότερη έρευνα στις ήδη υπάρχουσες εφαρμογές προκειμένου να βελτιωθούν οι αλγόριθμοι εξατομίκευσης και να εξασφαλιστεί η βέλτιστη απόδοσή τους στην εκπαίδευση μαθητών και φοιτητών με ΜΔ.

ΠΕΡΙΛΗΨΗ

Η εργασία αυτή διερευνά τη συγκριτική δυναμική δύο ψηφιακών προσεγγίσεων στην εκπαιδευτική διαδικασία: της παραδοσιακής αναζήτησης πληροφοριών (search) και της διατύπωσης προτροπών σε γλωσσικά μοντέλα Τεχνητής Νοημοσύνης (prompting). Εστιάζοντας στις εφαρμογές τους στη σχολική τάξη, εξετάζεται πώς οι δύο αυτές πρακτικές επηρεάζουν τη γνωστική διαδικασία, την ανάπτυξη δεξιοτήτων του 21ου αιώνα, καθώς και τη στάση μαθητών και εκπαιδευτικών απέναντι στη γνώση.

Αξιοποιώντας μελέτες περίπτωσης από τη διδασκαλία της Πληροφορικής, των Μαθηματικών και της Περιβαλλοντικής Εκπαίδευσης, αποτυπώνονται οι δυνατότητες και οι περιορισμοί κάθε μεθόδου. Η μεθοδολογία βασίστηκε σε ποιοτική ανάλυση διδακτικών σεναρίων και εκπαιδευτικών παρεμβάσεων με εργαλεία τεχνητής νοημοσύνης, σε συνδυασμό με βιβλιογραφική επισκόπηση έγκριτων ακαδημαϊκών πηγών.

Τα αποτελέσματα αναδεικνύουν ότι η αναζήτηση απαιτεί δεξιότητες φιλτραρίσματος πληροφορίας και αξιολόγησης πηγών, αλλά είναι χρονοβόρα και επιρρεπής σε παραπληροφόρηση. Το prompting, αντίθετα, παρέχει άμεσες, προσωποποιημένες και ερμηνευτικές απαντήσεις, ενισχύοντας τη διερεύνηση και τον αναστοχασμό. Ωστόσο, η υπερβολική εξάρτηση από τα γλωσσικά μοντέλα μπορεί να υπονομεύσει την αυτονομία του μαθητή.

Η εργασία καταλήγει ότι ο συνδυασμός των δύο προσεγγίσεων είναι παιδαγωγικά και διδακτικά επωφελής. Προτείνεται η ανάπτυξη μικτών μοντέλων μάθησης που ενσωματώνουν τόσο τη δεξιότητα της αναζήτησης όσο και τη δημιουργική χρήση προτροπών, στο πλαίσιο ενός στοχαστικού, ψηφιακά ενισχυμένου σχολείου.

Λέξεις – κλειδιά: Τεχνητή Νοημοσύνη, Εκπαίδευση, Prompting, Αναζήτηση, ChatGPT, Ψηφιακός Γραμματισμός

ΕΙΣΑΓΩΓΗ

Η ενσωμάτωση της Τεχνητής Νοημοσύνης (Luckin, 2018; UNESCO, 2021) στην εκπαιδευτική διαδικασία προκαλεί σημαντικές εξελίξεις στον τρόπο με τον οποίο οι μαθητές αποκτούν και διαχειρίζονται τη γνώση. Η προτροπή είναι μια τεχνική που χρησιμοποιείται σε συστήματα γενετικής τεχνητής νοημοσύνης (GenAI) για τη διευκόλυνση της αλληλεπίδρασης μεταξύ προγραμματιστών, τελικών χρηστών και του μοντέλου και περιλαμβάνει την παροχή συγκεκριμένων οδηγιών ή ερωτημάτων για την καθοδήγηση των απαντήσεων του μοντέλου (Sander Schulhoff). Το prompting δίνει τη δυνατότητα (Allen, 2023; VanLehn, 2011) για διαλογική και εξατομικευμένη μάθηση, ενεργοποιώντας τον μαθητή και ενισχύοντας τη μεταγνωστική του ικανότητα.

Η αναζήτηση είναι μια διαδικασία που επιτρέπει στα άτομα να προμηθεύονται ανεξάρτητα πληροφορίες στο διαδίκτυο, μειώνοντας την εξάρτηση από τοπικά ιδρύματα όπως κυβερνήσεις ή βιβλιοθήκες. Τονίζει τη σημασία της πρόσβασης σε διάφορες πηγές πληροφοριών και της επαλήθευσης της ακρίβειάς τους, βοηθώντας τους χρήστες να αποφεύγουν την παραπληροφόρηση (Zhang, 2023). Συνεπώς, η χρήση search προάγει (Papamitsiou and Economides, 2014; Selwyn, 2022) την κριτική σκέψη και την ικανότητα πλοήγησης σε πολλαπλές πηγές. Ο εκπαιδευτικός καλείται (Floridi and Cowls, 2019; OECD, 2021) να διαμορφώσει ένα περιβάλλον που υποστηρίζει και τις δύο αυτές στρατηγικές μάθησης, αναπτύσσοντας ταυτόχρονα τον ψηφιακό γραμματισμό και την ηθική χρήση της ΤΝ.

ΘΕΩΡΗΤΙΚΟ ΠΛΑΙΣΙΟ

Η εργασία υπογραμμίζει ότι οι παραδοσιακές μέθοδοι αναζήτησης αντιμετωπίζουν συχνά προκλήσεις όπως ανεπαρκής επιλογή λέξεων-κλειδιών, περιορισμένη διασταύρωση πληροφοριών, και δυσκολίες στην αξιολόγηση της αξιοπιστίας της πηγής. Αυτοί οι περιορισμοί μπορούν να οδηγήσουν σε γνωστική υπερφόρτωση για τους χρήστες, καθώς αγωνίζονται να συνθέσουν τεράστιες ποσότητες πληροφοριών χωρίς αποτελεσματικές επιλογές φιλτραρίσματος. Το προτεινόμενο σύστημα στοχεύει στην αντιμετώπιση αυτών των ζητημάτων ενισχύοντας τις δυνατότητες αναζήτησης μέσω AI και NLP, βελτιώνοντας έτσι τη δυνατότητα ανακάλυψης των πόρων και μειώνοντας τη γνωστική επιβάρυνση των χρηστών στην ακαδημαϊκή έρευνα (Gupta, 2025).Η παραδοσιακή μέθοδος αναζήτησης πληροφοριών περιλαμβάνει διάφορα βασικά βήματα: επιλογή λέξεων-κλειδιών, διασταύρωση πληροφοριών, αξιολόγηση αξιοπιστίας πηγών, σύνθεση πληροφοριών και διαχείριση γνωστικής υπερφόρτωσης. Αυτά τα βήματα είναι ζωτικής σημασίας για την αποτελεσματική έρευνα και λήψη αποφάσεων, ειδικά σε ακαδημαϊκά και επαγγελματικά περιβάλλοντα. Κάθε βήμα έχει το δικό του σύνολο προκλήσεων και μεθοδολογιών. Η αποτελεσματική επιλογή λέξεων-κλειδιών είναι θεμελιώδης για την ανάκτηση πληροφοριών και περιλαμβάνει τον προσδιορισμό όρων που αντιπροσωπεύουν με ακρίβεια το ερευνητικό θέμα. Η μελέτη του Vaibhav Gupta υπογραμμίζει τη χρήση AI και NLP (Neuro-Linguistic Programming, Νευρογλωσσικό Προγραμματισμό) για την ενίσχυση των αναζητήσεων βάσει λέξεων-κλειδιών, επιτρέποντας πολύγλωσση υποστήριξη και προηγμένες επιλογές φιλτραρίσματος, οι οποίες βελτιώνουν την ακρίβεια και την ένταξη των αναζητήσεων (Gupta, 2025).

Η αξιολόγηση της αξιοπιστίας των πηγών είναι κρίσιμη για τη διασφάλιση της αξιοπιστίας των πληροφοριών εξασφαλίζεται με τη σύγκριση πληροφοριών από πολλαπλές πηγές για την επαλήθευση γεγονότων και την απόκτηση ολοκληρωμένης κατανόησης ενός θέματος. Αυτή η διασταύρωση βοηθά στην ελαχιστοποίηση της χρήσης αναξιόπιστων δεδομένων ακολουθώντας το προβλεπόμενο μοντέλο προσέγγισης (Prokopovych-Tkachenko et al., 2024). Επιπλέον στοιχείο που πρέπει να προσεχθεί είναι πως πραγματοποιείται η συγκέντρωση δεδομένων από διάφορες πηγές για τη δημιουργία μιας συνεκτικής κατανόησης ή συμπεράσματος, σύνθεση η οποία είναι απαραίτητη για την εξαγωγή ουσιαστικών συμπερασμάτων από διαφορετικά δεδομένα (Li et al., 2018). Θα πρέπει να αποφευχθεί η γνωστική υπερφόρτωση επειδή ο/η μαθητής/τρια κατακλύζεται από υπερβολικές πληροφορίες ώστε να αποφεύγεται η μειωμένη εστίαση και παραγωγικότητα. Αυτό το φαινόμενο είναι ιδιαίτερα διαδεδομένο μεταξύ φοιτητών και ερευνητών που έχουν πρόσβαση σε πολλαπλές πηγές πληροφοριών, οδηγώντας σε απόσπαση της προσοχής και μειωμένη ακαδημαϊκή επίδοση (Safy, 2024).

Ενώ οι παραδοσιακές μέθοδοι αναζήτησης πληροφοριών είναι αποτελεσματικές, δεν είναι χωρίς προκλήσεις. Η ταχεία ανάπτυξη των πληροφοριών και των τεχνολογικών εξελίξεων απαιτούν την εξέλιξη αυτών των μεθόδων. Η ενσωμάτωση της τεχνητής νοημοσύνης και της ανάλυσης μεγάλων δεδομένων μπορεί να ενισχύσει τις παραδοσιακές προσεγγίσεις, καθιστώντας τις πιο αποτελεσματικές και προσαρμόσιμες στις σύγχρονες ερευνητικές ανάγκες. Ωστόσο, είναι απαραίτητο να εξισορροπηθεί η τεχνολογική ολοκλήρωση με την κριτική σκέψη και τις αναλυτικές δεξιότητες για να διασφαλιστεί η αξιοπιστία και η συνάφεια των πληροφοριών. Σε ότι αφορά την τεχνική prompting, η διαδικασία διατύπωσης μιας ερώτησης, απόκτησης προσαρμοσμένης απάντησης, αίτησης διευκρίνισης και αναδιατύπωσης της ερώτησης περιλαμβάνει αρκετές προηγμένες τεχνικές επεξεργασίας φυσικής γλώσσας και αλληλεπίδρασης ανθρώπου-υπολογιστή. Αυτές οι τεχνικές έχουν σχεδιαστεί για να ενισχύσουν την ακρίβεια και τη συνάφεια των απαντήσεων στα συστήματα απάντησης ερωτήσεων. Η ενσωμάτωση αυτών των μεθόδων μπορεί να βελτιώσει σημαντικά την

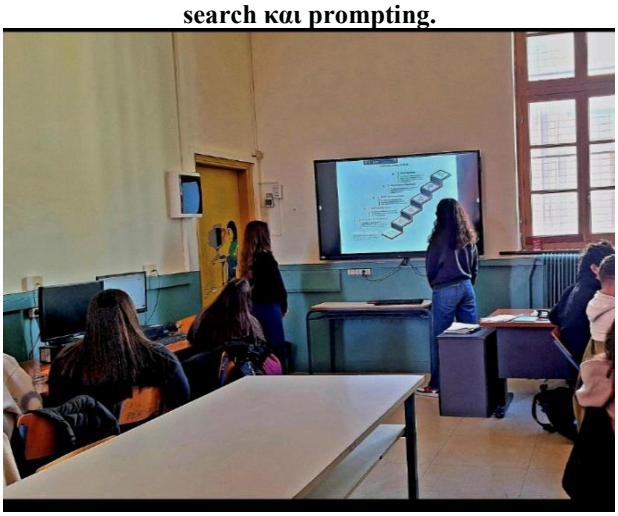
αλληλεπίδραση μεταξύ χρηστών και συστημάτων τεχνητής νοημοσύνης, διασφαλίζοντας ότι οι παρεχόμενες πληροφορίες είναι ακριβείς και κατάλληλες για το πλαίσιο.

Καθοριστικό είναι να προτρέπονται οι χρήστες - μαθητές χρηστών να συγκεντρώσουν πρόσθετες πληροφορίες με «ερωτήματα ενεργοποίησης» που απαιτούν διευκρίνιση πριν από την υποβολή για να βελτιώσουν το ερώτημα αναζήτησης, διασφαλίζοντας ότι το σύστημα αναζήτησης λαμβάνει ένα πιο ακριβές ερώτημα για επεξεργασία (Igarashi et al., 2008). Βαρύτητα πρέπει να δοθεί στη βελτίωση της αρχικής ερώτησης και στην ενσωμάτωση νέων περιορισμών για μια πιο ακριβή ερμηνεία μέσω διαλόγων διευκρίνισης για την αποσαφήνιση των ερωτήσεων (Quintano and Rodrigues, 2008). Οι μαθητές πρέπει να αντιληφθούν ότι η μέθοδος αλληλεπίδρασης ερωτήσεων και απαντήσεων περιλαμβάνει ανάλυση πρόθεσης για τον προσδιορισμό των προθέσεων του χρήστη και των σχετικών στοιχείων, η οποία βοηθά στη δημιουργία μιας ακριβούς απάντησης (Li et al., 2019) και ότι η συνεχής επαναδιατύπωση ερωτήσεων είναι μια στρατηγική που βελτιώνει τις εργασίες συλλογισμού ζητώντας από το μοντέλο να εξηγήσει την ερώτηση πριν τη λύσει. Αυτή η προσέγγιση ενισχύει την απόδοση του μοντέλου ενθαρρύνοντας λεπτομερείς απαντήσεις, οι οποίες είναι ευεργετικές για πολύπλοκες ερωτήσεις (Yugeswardeenoo et al., 2024).

Ενώ αυτές οι τεχνικές ενισχύουν σημαντικά την αλληλεπίδραση μεταξύ χρηστών και συστημάτων τεχνητής νοημοσύνης, εξακολουθούν να υπάρχουν προκλήσεις στη διασφάλιση της επεκτασιμότητας και της ακρίβειας με βάση τα συμφραζόμενα των αυτοματοποιημένων συστημάτων δημιουργίας ερωτήσεων. Επιπλέον, η αποτελεσματικότητα αυτών των συστημάτων βασίζεται σε μεγάλο βαθμό στην ποιότητα των προτροπών εισόδου, όπως επισημαίνεται σε μελέτες σχετικά με αποτελεσματικές τεχνικές προτροπής για μοντέλα όπως το ChatGPT (Kővári, 2024). Καθώς ο τομέας της αλληλεπίδρασης ανθρώπου-υπολογιστή συνεχίζει να εξελίσσεται, η ενσωμάτωση γνώσεων από διάφορους κλάδους θα είναι ζωτικής σημασίας για την αντιμετώπιση αυτών των προκλήσεων και την περαιτέρω βελτίωση των δυνατοτήτων των συστημάτων απάντησης ερωτήσεων.

ΥΛΙΚΟ ΚΑΙ ΜΕΘΟΔΟΛΟΓΙΑ

Η ανάλυση πραγματοποιήθηκε με θεματική κατηγοριοποίηση των παρατηρήσεων και των παραδοτέων (π.χ. δυσκολίες εντοπισμού αξιόπιστων πηγών, ακρίβεια/αιτιολόγηση απαντήσεων, βαθμός αυτονομίας), σε συνδυασμό με σύγκριση των δύο πρακτικών ως προς τον χρόνο, τη γνωστική επιβάρυνση και την ποιότητα της τεκμηρίωσης.



Ως δεδομένα αξιοποιήθηκαν: (α) τα παραγόμενα έργα των μαθητών, (β) οι ενδιάμεσες εκδοχές/διορθώσεις και τα συχνά σφάλματα που καταγράφηκαν κατά τη διάρκεια της εργασίας, και (γ) οι σύντομες παρατηρήσεις των εκπαιδευτικών κατά την υλοποίηση (εμπόδια, ερωτήματα, ανάγκες καθοδήγησης). Όπου υπήρχε δυνατότητα, αποτυπώθηκαν και απλά περιγραφικά μεγέθη (π.χ. ποσοστά ομάδων με συντακτικά σφάλματα, ποσοστά ορθών λύσεων).

Το υλικό προήλθε από τρεις μελέτες περίπτωσης σε διαφορετικά γνωστικά αντικείμενα (Πληροφορική, Μαθηματικά, Περιβαλλοντική Εκπαίδευση), όπως περιγράφονται αναλυτικά στη συνέχεια. Οι δραστηριότητες οργανώθηκαν σε φάσεις (Search και Prompting) και ολοκληρώθηκαν με παραδοτέα ανά ομάδα/μαθητή (κώδικας, λύσεις ασκήσεων, παρουσιάσεις, infographics, podcasts).

Η διδακτική εφαρμογή και η συλλογική επεξεργασία των δραστηριοτήτων στην τάξη αποτυπώνονται ενδεικτικά στην (Εικόνα 1).

Η παρούσα εργασία βασίζεται σε ποιοτική ανάλυση διδακτικών σεναρίων και εκπαιδευτικών παρεμβάσεων που υλοποιήθηκαν σε πραγματικές σχολικές τάξεις, με στόχο τη συγκριτική αποτίμηση των πρακτικών search και prompting. Η προσέγγιση είναι περιγραφική και ερμηνευτική και εστιάζει στον τρόπο με τον οποίο οι μαθητές αλληλεπιδρούν με τις πρακτικές search και prompting, στις δυσκολίες που αναδύονται, καθώς και στα μαθησιακά ίχνη που παράγονται κατά τη διάρκεια της διδακτικής διαδικασίας, όπως αποτυπώνεται ενδεικτικά στον κύκλο prompting που αξιοποιήθηκε στην τάξη. Η ανάλυση λαμβάνει υπόψη τόσο τη διαδικασία μάθησης όσο και την ποιότητα των παραγόμενων παραδοτέων, δίνοντας έμφαση στη γνωστική εμπλοκή και στη μεταγνωστική δραστηριοποίηση των μαθητών. Επιπλέον, εξετάζεται ο ρόλος της καθοδήγησης του εκπαιδευτικού στη διαμόρφωση στρατηγικών χρήσης των δύο πρακτικών και στη διαχείριση της γνωστικής επιβάρυνσης. Τέλος, η μελέτη επιχειρεί να αναδείξει παιδαγωγικές συνθήκες υπό τις οποίες η συνδυαστική αξιοποίηση search και prompting μπορεί να υποστηρίξει βαθύτερες μορφές μάθησης και κριτικού ψηφιακού γραμματισμού (Εικόνα 2).

Εικόνα 1
Στιγμιότυπο από τη διδακτική εφαρμογή σε πραγματικό σχολικό περιβάλλον, κατά το οποίο οι μαθητές παρακολουθούν και συζητούν τα στάδια της μαθησιακής διαδικασίας στο πλαίσιο της συγκριτικής προσέγγισης search και prompting.

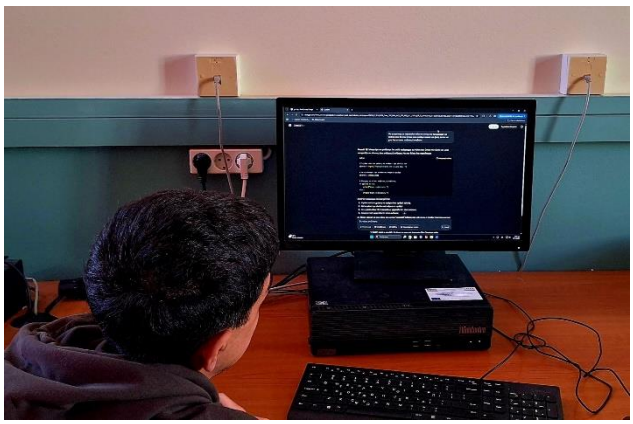
Εικόνα 2.
Οπτικοποίηση του κύκλου prompting κατά τη διάρκεια της διδασκαλίας, που αξιοποιήθηκε από τους μαθητές για αναδιατύπωση ερωτημάτων, αναστοχασμό και βελτίωση των παραγόμενων απαντήσεων.

Ερευνητικος Σχεδιασμος Και Πλαισιο

Πίνακας 1
Συνοπτική σύγκριση Search και Prompting στην εκπαιδευτική πράξη

Διάσταση	**Search**	**Prompting**
Χρόνος/Ροή εργασίας	Πολλαπλά βήματα (λέξεις-κλειδιά, επιλογή πηγών, ανάγνωση, σύνθεση). Συχνά χρονοβόρο.	Άμεση παραγωγή απάντησης/παραδείγματος. Επιτάχυνση, με ανάγκη ελέγχου.
Τεκμηρίωση	Απαιτεί παραπομπές και διασταύρωση πηγών.	Κίνδυνος «αφανών» πηγών – χρειάζεται έλεγχος/παραπομπές.
Γνωστική επιβάρυνση	Υψηλή όταν υπάρχει υπερπληθώρα πληροφοριών.	Μπορεί να μειώνει το φορτίο, αλλά να οδηγεί σε παθητικότητα αν δεν υπάρχει καθοδήγηση.
Κριτικός γραμματισμός	Ενισχύεται μέσω αξιολόγησης αξιοπιστίας.	Πρέπει να καλλιεργηθεί ρητά (έλεγχος ορθότητας, εντοπισμός σφαλμάτων/προκαταλήψεων).
Ρόλος εκπαιδευτικού	Καθοδήγηση σε στρατηγικές αναζήτησης και αξιολόγηση πηγών.	Διδασκαλία τεχνικών prompt, διατύπωση στόχων, και παιδαγωγικό πλαίσιο για υπεύθυνη χρήση.

ΜΕΛΕΤΕΣ ΠΕΡΙΠΤΩΣΗΣ / ΕΦΑΡΜΟΓΕΣ ΣΤΗΝ ΤΑΞΗ



Οι τεχνικές search (αναζήτηση πληροφοριών στο διαδίκτυο) και prompting (υποβολή ερωτήματος σε εργαλεία Τεχνητής Νοημοσύνης όπως το ChatGPT) μπορούν να αξιοποιηθούν με πολλούς τρόπους στην εκπαιδευτική διαδικασία, προσφέροντας στους μαθητές ευκαιρίες για αυτενέργεια, εξατομικευμένη μάθηση και καλλιέργεια ψηφιακών δεξιοτήτων. Παρακάτω παρουσιάζονται τρεις μελέτες περιπτώσεων που αναδεικνύουν την εφαρμογή των δύο αυτών τεχνικών σε διαφορετικά γνωστικά αντικείμενα.

Μελέτη Περίπτωσης: Πληροφορική - Κατανόηση της Δομής Επιλογής if/else σε Python με Search και Prompting.

Στην ενότητα της Πληροφορικής, οι μαθητές της Β΄ Γυμνασίου κλήθηκαν να κατανοήσουν τη λειτουργία των δομών επιλογής (if/else) στην Python. Η διδακτική παρέμβαση διαμορφώθηκε σε δύο φάσεις. Στην πρώτη, εφαρμόστηκε η παραδοσιακή μέθοδος αναζήτησης: οι μαθητές αναζήτησαν διαδικτυακά τη σύνταξη και χρήση της εντολής if/else. Οι πιο έμπειροι χρησιμοποίησαν εξειδικευμένες πηγές όπως το W3Schools και το StackOverflow, ενώ άλλοι περιορίστηκαν σε εισαγωγικά blogs ή βίντεο χωρίς επαρκή παιδαγωγική τεκμηρίωση. Αν και η αναζήτηση προσέφερε πληθώρα υλικού, πολλοί μαθητές δυσκολεύτηκαν να εντοπίσουν τη σωστή πληροφορία, να κατανοήσουν τη σύνταξη και να τη μεταφέρουν στο δικό τους πρόβλημα. Ενδεικτικά, το 58% των ομάδων παρουσίασε συντακτικά σφάλματα ή λανθασμένη λογική κατά την πρώτη φάση.

Στη δεύτερη φάση, χρησιμοποιήθηκε prompting: οι μαθητές έδωσαν στο ChatGPT σαφείς εντολές, όπως «Γράψε κώδικα σε Python που ελέγχει την ηλικία ενός χρήστη και τυπώνει “Ενήλικας” αν είναι άνω των 18 και “Ανήλικος” αλλιώς». Το εργαλείο παρείχε έτοιμο κώδικα, επεξήγηση, παραμετροποίηση και δυνατότητα διαλόγου. Η άμεση ανατροφοδότηση ενίσχυσε την κατανόηση, ενώ η δυνατότητα παραλλαγών βοήθησε στη γενίκευση του εννοιολογικού σχήματος. Η ατομική αλληλεπίδραση των μαθητών με το εργαλείο γενετικής ΤΝ στο πλαίσιο της συγκεκριμένης δραστηριότητας αποτυπώνεται ενδεικτικά στην (Εικόνα 3).

Εικόνα 3
ΣΤΙΓΜΙΟΤΥΠΟ ΑΠΟ ΤΗ ΜΕΛΕΤΗ ΠΕΡΙΠΤΩΣΗΣ ΠΛΗΡΟΦΟΡΙΚΗΣ: ΑΤΟΜΙΚΗ ΑΛΛΗΛΕΠΙΔΡΑΣΗ ΜΑΘΗΤΗ ΜΕ ΕΡΓΑΛΕΙΟ ΓΕΝΕΤΙΚΗΣ ΤΝ ΚΑΤΑ ΤΗ ΔΙΑΤΥΠΩΣΗ ΚΑΙ ΕΠΕΞΕΡΓΑΣΙΑ PROMPT ΓΙΑ ΤΗΝ ΚΑΤΑΝΟΗΣΗ ΤΗΣ ΔΟΜΗΣ ΕΠΙΛΟΓΗΣ IF/ELSE ΣΕ PYTHON.

Η σύγκριση ανέδειξε ότι η μέθοδος prompting:

- επιτάχυνε τη διαδικασία μάθησης,
- προσέφερε στοχευμένη καθοδήγηση,
- ενίσχυσε την αυτοπεποίθηση αρχάριων μαθητών.

Ωστόσο, παρατηρήθηκε ότι η υπερβολική εξάρτηση από τις απαντήσεις του ChatGPT μείωσε τη δημιουργική σκέψη στις ομάδες με υψηλότερο επίπεδο. Αυτό επιβεβαιώνει και τη σχετική μελέτη των Kasnecietal. (2023), που προειδοποιεί ότι χωρίς καθοδήγηση, το prompting ενδέχεται να περιορίσει τη διερευνητική σκέψη σε μαθητές υψηλών δυνατοτήτων.

Μελέτη Περίπτωσης: Μαθηματικά - Δευτεροβάθμιες Εξισώσεις με Search και Prompting.

Στη διδασκαλία των δευτεροβάθμιων εξισώσεων στην Α΄ Λυκείου, εφαρμόστηκε παρόμοιο σχήμα σύγκρισης. Οι μαθητές χωρίστηκαν σε δύο ομάδες. Η πρώτη ομάδα χρησιμοποίησε παραδοσιακή αναζήτηση (search): πληκτρολόγησαν στο Google «Πώς λύνουμε δευτεροβάθμια εξίσωση;». Οι πηγές που εμφανίστηκαν περιλάμβαναν σημειώσεις, εκπαιδευτικά βίντεο και άρθρα από blogs. Παρά την ποικιλία, η κατανόηση των εννοιών αποδείχθηκε ελλιπής: οι μαθητές αντιγράφουν τύπους χωρίς να κατανοούν το θεωρητικό τους υπόβαθρο, όπως έχει διαπιστωθεί και από σχετική μελέτη των Hew and Cheung (2013) για την επιφανειακή μάθηση μέσω διαδικτυακών πηγών.

Η δεύτερη ομάδα εργάστηκε με prompting: χρησιμοποίησε το εξής prompt στο ChatGPT: «Λύσε βήμα-βήμα την εξίσωση $2x^2 - 3x - 5 = 0$ και εξήγησέ το σαν να είμαι μαθητής Α΄ Λυκείου». Το αποτέλεσμα ήταν μια πλήρως αναλυτική και προσαρμοσμένη απάντηση, με επεξήγηση της διακρίνουσας, των τύπων και του συλλογισμού, σε γλώσσα προσιτή και με δυνατότητα επανάληψης.

Η εκπαιδευτική αξιολόγηση έδειξε:

- υψηλότερο ποσοστό σωστών λύσεων στην ομάδα του prompting (86% έναντι 64%),
- μεγαλύτερη αναστοχαστική κατανόηση (οι μαθητές μπορούσαν να εξηγήσουν «γιατί» ακολουθήθηκε κάθε βήμα),
- αλλά και τάση παθητικής αποδοχής της απάντησης χωρίς έλεγχο.

Όπως προτείνει και η Holmesetal. (2022), η χρήση LLMs στα Μαθηματικά πρέπει να πλαισιώνεται με καθοδήγηση και διασταύρωση, ώστε να αποφεύγεται η γνωστική απάθεια (cognitivepassivity).

Μελέτη Περίπτωσης: Περιβαλλοντικό Πρόγραμμα - Κλιματική Αλλαγή

Η τρίτη μελέτη περίπτωσης πραγματοποιήθηκε στο πλαίσιο Περιβαλλοντικού Προγράμματος, με στόχο την κατανόηση των επιπτώσεων της κλιματικής αλλαγής στον φυσικό και ανθρωπογενή χώρο. Οι μαθητές, σε ομάδες, κλήθηκαν να συγκρίνουν τις δύο προσεγγίσεις (search και prompting) για τη συλλογή, ανάλυση και σύνθεση πληροφοριών.

Φάση 1 - Search: Οι ομάδες αναζήτησαν δεδομένα από επιστημονικούς και θεσμικούς ιστότοπους (IPCC, WWF, ΥΠΕΝ, ΕΚΠΑ). Εκπαιδεύτηκαν στην επιλογή λέξεων-κλειδιών, στην αξιολόγηση πηγών και στη διασταύρωση στοιχείων. Παρά την προσπάθεια, υπήρξαν δυσκολίες:

- στην επεξεργασία πυκνών επιστημονικών κειμένων,
- στην κατανόηση των γεωπολιτικών διαφορών μεταξύ περιοχών,
- στην εννοιολογική σύνδεση δεδομένων.

Φάση 2 - Prompting: Οι μαθητές χρησιμοποίησαν εργαλεία ΤΝ για:

- να ζητήσουν περίληψη επιπτώσεων της κλιματικής αλλαγής στην Ελλάδα,
- να συγκρίνουν περιοχές (π.χ. Ελλάδα vs Σαχάρα),
- να δημιουργήσουν υποθετικά σενάρια (π.χ. αύξηση 2 °C),
- και να πάρουν προτάσεις πολιτικών προσαρμογής.

Το prompting επέτρεψε:

- σύνθεση πληροφορίας από διαφορετικά επίπεδα,
- ενίσχυση της συνθετικής ικανότητας,
- αλλά και βαθύτερη διατύπωση ερωτημάτων.

Αναλυτική αξιολόγηση των παραγόμενων έργων (PowerPoint, infographics, podcasts) έδειξε ότι η υβριδική χρήση Search and Prompting παρήγαγε ποιοτικά ανώτερες και πιο δημιουργικές εργασίες. Οι μαθητές ανέπτυξαν ικανότητες πληροφοριακού γραμματισμού, συνεργατικότητας και στοχαστικής χρήσης της ΤΝ. Αυτό συνάδει με τις κατευθύνσεις της UNESCO (2021) για την ενσωμάτωση ΤΝ σε περιβάλλοντα συμμετοχικής μάθησης. Ως Γενικά Συμπεράσματα προέκυψαν ότι οι τρεις μελέτες περιπτώσεων δείχνουν ότι η συνδυαστική αξιοποίηση των τεχνικών search και prompting:

- Εξυπηρετεί διαφορετικά μαθησιακά στυλ και επίπεδα ετοιμότητας.
- Ενισχύει την αυτονομία και την ενεργή μάθηση.
- Προσφέρει διαφοροποιημένες μαθησιακές διαδρομές.
- Υποστηρίζει την εξοικείωση με σύγχρονα ψηφιακά εργαλεία.

Ο εκπαιδευτικός καλείται να καθοδηγήσει τους μαθητές στη σωστή επιλογή μεθόδου, να ενισχύσει τον κριτικό γραμματισμό τους και να προάγει τη μεταγνωστική επίγνωση, ώστε να μπορούν να επιλέγουν συνειδητά το κατάλληλο εργαλείο ανάλογα με το πρόβλημα που αντιμετωπίζουν.

ΑΝΑΛΥΣΗ ΠΛΕΟΝΕΚΤΗΜΑΤΩΝ ΚΑΙ ΠΕΡΙΟΡΙΣΜΩΝ

Η τεχνική της αναζήτησης (searching) προσφέρει σημαντικά πλεονεκτήματα στην εκπαιδευτική διαδικασία, καθώς ενισχύει την αυτενέργεια του μαθητή, του επιτρέπει να εκτεθεί σε πληθώρα πηγών και να αναπτύξει δεξιότητες εντοπισμού, αξιολόγησης και επιλογής έγκυρης πληροφορίας. Στα παραδείγματα της Πληροφορικής και των Μαθηματικών, η αναζήτηση οδηγεί στη γνωριμία με ποικίλες προσεγγίσεις επίλυσης προβλημάτων, ενώ στο περιβαλλοντικό πρόγραμμα αναπτύσσει τη διερευνητική ικανότητα και τη συνεργατική μάθηση. Ωστόσο, πρόκειται για μία διαδικασία που μπορεί να αποδειχθεί χρονοβόρα, ιδιαίτερα όταν ο μαθητής δεν διαθέτει επαρκή εμπειρία στο φιλτράρισμα περιεχομένου ή όταν το υλικό είναι δυσνόητο. Η μη εξατομικευμένη φύση των αποτελεσμάτων μπορεί να προκαλέσει σύγχυση ή να οδηγήσει σε γνωστικά λάθη, ειδικά σε περιπτώσεις χαμηλής μαθησιακής ετοιμότητας.

Αντίθετα, η τεχνική του prompting με τη χρήση Τεχνητής Νοημοσύνης προσφέρει άμεση, προσαρμοσμένη και διαδραστική υποστήριξη. Οι μαθητές λαμβάνουν εξατομικευμένες απαντήσεις, επεξηγήσεις και δυνατότητες εμβάθυνσης μέσω αναδιατύπωσης των ερωτημάτων. Στην περίπτωση του προγραμματισμού, το prompting διευκολύνει τους αρχάριους να κατανοήσουν τη λογική του κώδικα, ενώ στα Μαθηματικά παρέχει καθοδήγηση βήμα-βήμα, προσαρμοσμένη στο επίπεδο του μαθητή. Στα περιβαλλοντικά σενάρια, υποστηρίζει τη σύνθεση δεδομένων, τη διατύπωση υποθετικών σεναρίων και την ερμηνεία πολύπλοκων φαινομένων. Παρ' όλα αυτά, η αποτελεσματικότητα της τεχνικής εξαρτάται σε μεγάλο βαθμό από την ικανότητα του μαθητή να διατυπώνει σωστά και σαφή prompts, γεγονός που απαιτεί καθοδήγηση και εξάσκηση. Επιπλέον, χρειάζεται κριτική στάση απέναντι στις απαντήσεις της ΤΝ, ώστε να αποφεύγεται η άκριτη αποδοχή ανακριβών ή απλουστευμένων πληροφοριών.

ΨΗΦΙΑΚΕΣ ΚΑΙ ΜΕΤΑΓΝΩΣΤΙΚΕΣ ΔΕΞΙΟΤΗΤΕΣ

Η αξιοποίηση των τεχνικών searching και prompting συμβάλλει ουσιαστικά στην ανάπτυξη ψηφιακών δεξιοτήτων, οι οποίες κρίνονται απαραίτητες στη σύγχρονη εκπαιδευτική πραγματικότητα. Μέσα από τις δραστηριότητες που περιγράφονται στις μελέτες περίπτωσης, οι μαθητές εξασκούνται στην πλοήγηση στο διαδίκτυο, στην επιλογή λέξεων-κλειδιών, στην αξιολόγηση της εγκυρότητας των πληροφοριών, καθώς και στη χρήση εργαλείων Τεχνητής Νοημοσύνης. Ειδικά στο περιβαλλοντικό πρόγραμμα, η αναζήτηση σε επιστημονικές πηγές και θεσμικούς φορείς απαιτεί την ικανότητα αναγνώρισης αξιόπιστων δεδομένων και σωστής ψηφιακής τεκμηρίωσης. Αντίστοιχα, η χρήση prompting καλλιεργεί δεξιότητες ψηφιακής επικοινωνίας με προηγμένα συστήματα, ενώ εισάγει τους μαθητές στις βασικές αρχές αλληλεπίδρασης με αυτόματα υπολογιστικά περιβάλλοντα, ενισχύοντας την τεχνολογική τους επάρκεια.

Παράλληλα, οι περιπτώσεις μελέτης αποδεικνύουν πως οι δύο τεχνικές ενισχύουν ουσιαστικά και τις μεταγνωστικές δεξιότητες των μαθητών. Μέσα από την αναζήτηση, οι μαθητές μαθαίνουν να παρακολουθούν τη διαδικασία της μάθησής τους, να εντοπίζουν σημεία που δεν κατανοούν, και να αναπροσαρμόζουν τις στρατηγικές τους (π.χ. αλλαγή λέξεων-κλειδιών, αναζήτηση απλούστερων πηγών). Στην περίπτωση του prompting, η επαναδιατύπωση ερωτημάτων, η κριτική αποτίμηση των απαντήσεων και η απαίτηση για περαιτέρω διευκρινίσεις ενισχύουν την ικανότητα εσωτερικού ελέγχου της μάθησης. Οι μαθητές καλούνται να αξιολογούν πότε και πώς να χρησιμοποιούν κάθε εργαλείο, να στοχάζονται πάνω στις δικές τους απορίες και να συνδέουν τη νέα γνώση με προηγούμενες εμπειρίες, καλλιεργώντας έτσι δεξιότητες αυτορρύθμισης και γνωστικής ευελιξίας.

Η αποτελεσματικότητα αυτών των τεχνικών μπορεί να ποικίλει ανάλογα με τις ατομικές διαφορές, όπως οι προηγούμενες γνώσεις και οι αρχικές μεταγνωστικές ικανότητες (Reid and Morrison, 2014). Επιπλέον, ενώ τα ψηφιακά εργαλεία μπορούν να βελτιώσουν τη μάθηση, ενδέχεται να μην αντικαταστήσουν πλήρως τις διακριτικές αλληλεπιδράσεις και τα σχόλια που παρέχονται από ανθρώπινους εκπαιδευτές, όπως τονίζεται από τη σημασία της γλωσσικής ανταλλαγής στη μάθηση (Schroeder, 2017). Επιπλέον, οι ηθικές επιπτώσεις της χρήσης της τεχνητής νοημοσύνης και των ψηφιακών τεχνολογιών στην εκπαίδευση πρέπει να εξεταστούν προσεκτικά για να εξασφαλιστούν δίκαιες και αποτελεσματικές μαθησιακές εμπειρίες (Pillajo, 2024).

ΚΟΜΒΙΚΟΣ ΡΟΛΟΣ ΤΩΝ ΕΚΠΑΙΔΕΥΤΙΚΩΝ

Ο ρόλος του δασκάλου είναι πράγματι καθοριστικός στη χρήση των τεχνικών αναζήτησης και προτροπής μέσα στην τάξη. Οι εκπαιδευτικοί ενεργούν ως κρίσιμοι μεσάζοντες μεταξύ των μαθητών και των τεχνολογικών εργαλείων που έχουν σχεδιαστεί για την ενίσχυση της μάθησης. Η συμμετοχή τους είναι απαραίτητη όχι μόνο στην εφαρμογή αυτών

των τεχνικών αλλά και στο σχεδιασμό και την προσαρμογή τους για την επίτευξη εκπαιδευτικών στόχων. Η τεχνογνωσία των εκπαιδευτικών και η κατανόηση των παιδαγωγικών αναγκών τους καθιστούν απαραίτητους για την αποτελεσματική ενσωμάτωση των τεχνικών αναζήτησης και προτροπής στις δραστηριότητες της τάξης. Αυτή η ενσωμάτωση είναι ζωτικής σημασίας για την προώθηση ενός περιβάλλοντος ευνοϊκού για τη μάθηση και την κριτική σκέψη.

Εκπαιδευτικοί ως Συνεργάτες στην Τεχνολογία Αναζήτησης

Οι εκπαιδευτικοί αποτελούν αναπόσπαστο μέρος του σχεδιασμού και της εφαρμογής εργαλείων αναζήτησης στην τάξη. Η συμμετοχή τους διασφαλίζει ότι αυτά τα εργαλεία είναι προσαρμοσμένα στο εκπαιδευτικό πλαίσιο και ανταποκρίνονται στις ειδικές ανάγκες των μαθητών (Murgia et al., 2021)].

Οι μαθητές χρειάζονται καθοδήγηση για την αποτελεσματική επιλογή λέξεων-κλειδιών, ώστε να διαμορφώσουν στοχευμένες και ακριβείς αναζητήσεις. Η εκπαίδευσή τους σε στρατηγικές αναζήτησης -όπως η χρήση φίλτρων, λογικών τελεστών και διαφοροποιημένων όρων- αποτελεί απαραίτητη δεξιότητα για την αξιόπιστη και αποδοτική πλοήγηση στο ψηφιακό περιβάλλον. Παράλληλα, είναι αναγκαίο οι μαθητές να διδαχθούν πώς να αξιολογούν τα αποτελέσματα της αναζήτησης κριτικά, να αναγνωρίζουν την εγκυρότητα και την αξιοπιστία των πηγών, να εντοπίζουν προκαταλήψεις ή διαφημιστικά κίνητρα, και να αποφεύγουν την άκριτη υιοθέτηση της πρώτης πληροφορίας που εντοπίζουν.

Τεχνικές Προτροπής στην Ψηφιακή Παιδαγωγική

Η προτροπή είναι μια κρίσιμη τεχνική διδασκαλίας που υποστηρίζει ψηφιακά περιβάλλοντα μάθησης. Οι εκπαιδευτικοί διαδραματίζουν βασικό ρόλο στην εφαρμογή διαφόρων τύπων προτροπής, όπως η διερεύνηση και η αποσαφήνιση ερωτήσεων, για την ενίσχυση της αφοσίωσης των μαθητών και των μαθησιακών αποτελεσμάτων (Rad et al., 2024), (Pearce and Chiavaroli, 2020). Η χρήση προτροπής σε εκπαιδευτικά περιβάλλοντα, έχει αποδειχθεί ότι βελτιώνει σημαντικά τις δεξιότητες κριτικής σκέψης και συλλογιστικής των μαθητών, υπογραμμίζοντας τη σημασία των στρατηγικών προτροπής υπό την καθοδήγηση δασκάλων (Wuryaningrum, 2022)].

Η παρέμβαση του εκπαιδευτικού είναι καθοριστική στη διαμόρφωση ουσιαστικών και αποτελεσματικών prompts, καθώς η ποιότητα του ερωτήματος επηρεάζει άμεσα την ποιότητα της απάντησης από την Τεχνητή Νοημοσύνη. Οι μαθητές πρέπει να μάθουν να διατυπώνουν σαφείς, πλήρεις και νοηματικά εύστοχες ερωτήσεις, να προσαρμόζουν τα prompts στις μαθησιακές τους ανάγκες, και να ζητούν διευκρινίσεις ή παραδείγματα όταν χρειάζεται. Ο εκπαιδευτικός οφείλει επίσης να ενθαρρύνει την κριτική χρήση των απαντήσεων που παρέχουν τα εργαλεία ΤΝ, προτρέποντας τους μαθητές να επαληθεύουν τις πληροφορίες, να εντοπίζουν πιθανές ανακρίβειες ή γενικεύσεις και να αναγνωρίζουν παραπλανητικά ή ψευδή στοιχεία. Μέσω αυτής της διαδικασίας, καλλιεργείται η δεξιότητα της κριτικής σκέψης, της μεταγνώσης και της υπεύθυνης ψηφιακής συμμετοχής, με τον εκπαιδευτικό να λειτουργεί ως εμψυχωτής και εγγυητής ποιότητας της μαθησιακής εμπειρίας.

ΣΥΖΗΤΗΣΗ

Τα ευρήματα από τις τρεις μελέτες περίπτωσης καταδεικνύουν ότι η επιλογή μεταξύ των πρακτικών search και prompting δεν συνιστά τεχνική λεπτομέρεια, αλλά ουσιαστική παιδαγωγική απόφαση, η οποία επηρεάζει τον τρόπο συγκρότησης της γνώσης, το επίπεδο μαθητικής εμπλοκής και την ανάπτυξη γνωστικών, μεταγνωστικών και ψηφιακών δεξιοτήτων. Η συγκριτική αποτίμηση των δύο προσεγγίσεων αναδεικνύει ότι ενεργοποιούν διαφορετικούς μηχανισμούς μάθησης και εξυπηρετούν διακριτούς μαθησιακούς στόχους.

Η πρακτική του search ενισχύει τον πληροφοριακό και κριτικό γραμματισμό, καθώς απαιτεί από τους μαθητές να διατυπώνουν κατάλληλες λέξεις-κλειδιά, να εντοπίζουν αξιόπιστες πηγές, να αξιολογούν την εγκυρότητα των πληροφοριών και να συνθέτουν δεδομένα από πολλαπλές αναφορές. Ωστόσο, τα δεδομένα των μελετών περίπτωσης δείχνουν ότι η υπερπληθώρα πληροφοριών και η ανομοιογένεια των διαδικτυακών πηγών συχνά οδηγούν σε αυξημένη γνωστική επιβάρυνση, ιδίως σε μαθητές με περιορισμένες στρατηγικές αναζήτησης. Τα συντακτικά σφάλματα, οι ελλιπείς αιτιολογήσεις και η δυσκολία μεταφοράς της γνώσης σε νέο πλαίσιο συνιστούν ενδεικτικά παραδείγματα των περιορισμών αυτής της προσέγγισης.

Αντίθετα, η πρακτική του prompting προσφέρει άμεση ανατροφοδότηση, προσωποποιημένη καθοδήγηση και δυνατότητα διαλόγου, στοιχεία που διευκολύνουν την κατανόηση σύνθετων εννοιών και επιταχύνουν τη μαθησιακή διαδικασία. Τα αυξημένα ποσοστά ορθών λύσεων και η βελτιωμένη ικανότητα των μαθητών να εξηγούν τον συλλογισμό τους υποδηλώνουν ότι τα εργαλεία γενετικής ΤΝ μπορούν να λειτουργήσουν ως γνωστικά υποστηρίγματα (scaffolds), ιδιαίτερα για αρχάριους μαθητές. Παράλληλα, όμως, αναδείχθηκε ο κίνδυνος παθητικής αποδοχής των παραγόμενων

απαντήσεων, κυρίως σε μαθητές υψηλότερου γνωστικού επιπέδου, γεγονός που επιβεβαιώνει την ανάγκη για σαφές παιδαγωγικό πλαίσιο.

Στο πλαίσιο αυτό, η αξιοποίηση της γενετικής ΤΝ στην τάξη προϋποθέτει ρητές διδακτικές συμβάσεις και συστηματική καθοδήγηση, ώστε οι μαθητές να διατηρούν έλεγχο στη μαθησιακή διαδικασία και να αναπτύσσουν δεξιότητες αυτορρύθμισης και μεταγνώσης. Κρίσιμης σημασίας αναδεικνύονται η διαφάνεια ως προς το τι παράγεται από το εργαλείο και τι από τον μαθητή, η αποφυγή κοινοποίησης προσωπικών δεδομένων, καθώς και η κατανόηση ότι οι απαντήσεις της ΤΝ ενδέχεται να περιέχουν σφάλματα, ανακρίβειες ή μεροληψίες. Η συστηματική διασταύρωση πληροφοριών, η απαίτηση τεκμηρίωσης και η ιεράρχηση κριτηρίων αξιοπιστίας λειτουργούν ως αντίβαρο στον κίνδυνο παραπληροφόρησης. Παράλληλα, πρακτικές όπως η διατύπωση σαφών μαθησιακών στόχων πριν από την αλληλεπίδραση, η καταγραφή ενδιάμεσων βημάτων και η αναστοχαστική αξιολόγηση του αποτελέσματος ενισχύουν τη μεταγνωστική επίγνωση και μετατρέπουν το prompting από μηχανιστική χρήση εργαλείου σε ενεργή γνωστική διαδικασία. Όταν αυτές οι δεξιότητες καλλιεργούνται ρητά, η γενετική ΤΝ δεν υποκαθιστά τη σκέψη, αλλά λειτουργεί ως μέσο ενίσχυσής της.

Ιδιαίτερη σημασία αποκτούν και τα ζητήματα ηθικής και υπεύθυνης χρήσης της ΤΝ. Τα ευρήματα δείχνουν ότι η παιδαγωγική αξιοποίηση οφείλει να περιλαμβάνει σαφείς κανόνες για την αναφορά χρήσης εργαλείων ΤΝ, την τεκμηρίωση πηγών, την αποφυγή αντιγραφής και την κριτική στάση απέναντι σε πιθανές μεροληψίες. Με αυτόν τον τρόπο, η ΤΝ μετασχηματίζεται από «μηχανή απαντήσεων» σε αφορμή για καλλιέργεια υπευθυνότητας, ακαδημαϊκής ακεραιότητας και κριτικής σκέψης. Ως προς τις παιδαγωγικές προεκτάσεις, προκύπτει η ανάγκη για σκόπιμο σχεδιασμό δραστηριοτήτων που συνδυάζουν search και prompting με διακριτούς στόχους. Η αναζήτηση μπορεί να αξιοποιείται για τον εντοπισμό και τη σύγκριση πηγών, ενώ το prompting για επεξεργασία, αναδιατύπωση, δημιουργία ερωτημάτων και αναστοχασμό. Ο κριτικός ψηφιακός γραμματισμός ενισχύεται όταν οι μαθητές καλούνται να τεκμηριώνουν επιλογές, να αιτιολογούν συμπεράσματα και να παρουσιάζουν τη διαδρομή σκέψης τους και όχι μόνο το τελικό αποτέλεσμα.

Συνεπώς, ο ρόλος του εκπαιδευτικού αναδεικνύεται καθοριστικός. Ο εκπαιδευτικός λειτουργεί ως ρυθμιστής της μαθησιακής διαδικασίας: διαμορφώνει κριτήρια, καθοδηγεί την επαλήθευση, σχεδιάζει αυθεντικές εργασίες και αξιολογεί με έμφαση στη διαδικασία. Η συνειδητή και παιδαγωγικά τεκμηριωμένη ενσωμάτωση των πρακτικών search και prompting μπορεί να συμβάλει ουσιαστικά στην ανάπτυξη κριτικού ψηφιακού γραμματισμού, μεταγνωστικής επίγνωσης και ενεργού συμμετοχής των μαθητών στη μαθησιακή διαδικασία.

ΣΥΜΠΕΡΑΣΜΑΤΑ

Ο συνδυασμός των τεχνικών search και prompting αναδεικνύεται ως ένα ισχυρό και συμπληρωματικό διδακτικό εργαλείο που προάγει την κριτική, ενεργητική και εξατομικευμένη μάθηση. Μέσω της αναζήτησης (search), οι μαθητές έρχονται σε επαφή με πληθώρα πηγών, αναπτύσσουν δεξιότητες εντοπισμού, αξιολόγησης και οργάνωσης πληροφοριών, και εξοικειώνονται με την ψηφιακή πλοήγηση σε αυθεντικά περιβάλλοντα. Η διαδικασία αυτή ενισχύει την αυτενέργεια και την κριτική σκέψη, ενώ η χρήση εργαλείων ΤΝ μέσω prompting επιτρέπει άμεση πρόσβαση σε εξατομικευμένο περιεχόμενο, ενισχύοντας τη μεταγνώση, την επανατροφοδότηση και τη βελτίωση της κατανόησης. Το ChatGPT, ως εκπαιδευτικός «συνομιλητής», προσφέρει τη δυνατότητα στους μαθητές να διερευνούν έννοιες, να ζητούν παραδείγματα και να αποσαφηνίζουν απορίες, με τρόπο ευέλικτο και διαδραστικό. Ωστόσο, και οι δύο τεχνικές απαιτούν παιδαγωγική καθοδήγηση, κριτική επίγνωση και δεοντολογική χρήση. Οι εκπαιδευτικοί καλούνται να διδάξουν στους μαθητές πώς να επιλέγουν αποτελεσματικές λέξεις-κλειδιά, πώς να αξιολογούν κριτικά τις πηγές και τις απαντήσεις, και πώς να διατυπώνουν ουσιαστικά και ακριβή prompts. Η ενσωμάτωση των τεχνικών αυτών στη διδακτική πράξη δεν αφορά απλώς την τεχνολογική καινοτομία, αλλά την καλλιέργεια ψηφιακού γραμματισμού, μεταγνωστικών δεξιοτήτων και υπεύθυνης μάθησης στον σύγχρονο ψηφιακό κόσμο.

Η ενσωμάτωση της τεχνολογίας στην τάξη είναι περίπλοκη και απαιτεί συνεχή προσαρμογή και υποστήριξη. Οι εκπαιδευτικοί πρέπει να είναι εξοπλισμένοι με την απαραίτητη εκπαίδευση και πόρους για την αποτελεσματική εφαρμογή αυτών των τεχνικών. Επιπλέον, η ταχεία εξέλιξη των εκπαιδευτικών τεχνολογιών απαιτεί συνεχή επαγγελματική ανάπτυξη για να συμβαδίζει με τις νέες μεθόδους και εργαλεία. Παρά τις προκλήσεις αυτές, ο αποφασιστικός ρόλος των εκπαιδευτικών στην αξιοποίηση των τεχνικών αναζήτησης και προτροπής παραμένει ακρογωνιαίος λίθος της αποτελεσματικής ψηφιακής παιδαγωγικής.

ΘΠ14: Διδακτική Αξιοποίηση της Εκπαιδευτικής Ρομποτικής

Wedosave: FORGOTTENBABYSYNDROME ΡΟΜΠΟΤΙΚΟ ΣΥΣΤΗΜΑ ΠΡΟΣΤΑΣΙΑΣ ΤΗΣ ΖΩΗΣ ΑΠΟ ΤΟ ΣΥΝΔΡΟΜΟ ΞΕΧΑΣΜΕΝΟΥ ΠΑΙΔΙΟΥ.

Αυγουλάς Νικόλαος
Καθηγητής Πληροφορικής ΠΕ86
Υποδιευθυντής 11ου Δημοτικού Σχολείου Καλαμαριάς
e-mail: navgou11dim@gmail.com

ΠΕΡΙΛΗΨΗ

Το Wedosave:ForgottenBabySyndrome είναι μια ρομποτική εφαρμογή που κατασκευάστηκε και προγραμματίστηκε από τους μαθητές και μαθήτριες της Στ τάξη του 11ου Δημοτικού Σχολείου Καλαμαριάς που περιλαμβάνει κατάλληλους αυτοματισμούς για την πρόληψη περιστατικών του Συνδρόμου Ξεχασμένου Παιδιού.

Η χρονική διάρκεια εκπόνησης του συγκεκριμένου Project ήταν 6 εβδομάδες στις οποίες τα παιδιά ήρθαν σε επαφή με τον μικροελεγκτή MICROBIT και το περιβάλλον προγραμματισμού του, δούλεψαν σε ομάδες των τεσσάρων και ακολουθώντας στοχευμένες δραστηριότητες κατανόησης της λειτουργίας της συσκευής και των δυνατοτήτων της και ανακάλυψαν τις λειτουργίες που αυτό προσφέρει για την επίλυση του προβλήματος που τους δόθηκε.

Το Σύνδρομο Ξεχασμένου Παιδιού αφορά την περίπτωση που ο/η οδηγός αυτοκινήτου που συνοδεύει ανήλικο ειδικά σε βρεφική ηλικία, δύναται να ξεχάσει την παρουσία του παιδιού στην καμπίνα και να αποχωρήσει, αφήνοντας το σε επικίνδυνο για την υγεία του περιβάλλον, ιδίως τους καλοκαιρινούς μήνες.

Η ρομποτική διάταξη αποτελείται από αισθητήρες βάρους που προσαρμόζονται στο παιδικό καρεκλάκι και αισθητήρα για τη μέτρηση της θερμοκρασίας εντός του αυτοκινήτου. Ταυτόχρονα, υπάρχουν συσκευές ειδοποίησης του συνοδού όπως κινητό τηλέφωνο και smart watch, αλλά και ενεργοποίησης του συναγερμού του αυτοκινήτου ώστε το παιδί, με τη βοήθεια κάποιου περαστικού, να βγει από το αυτοκίνητο και να μεταφερθεί σε δροσερό περιβάλλον.

Τέλος, κατασκευάστηκε αυτόματος μηχανισμός για να ανοίγει το παράθυρο και να δροσίζεται το παιδί, μέχρι ο συνοδός ή κάποιος περαστικός να το απομακρύνει από τον κίνδυνο.
Όλες οι κατασκευές, όπως ο μηχανισμός παραθύρου, και οι συσκευές με τους αισθητήρες και τους προειδοποιητικούς μηχανισμούς, αποτελούνται από Microbit τα οποία επικοινωνούν μεταξύ τους με ραδιοκύματα.

Το Wedosave προσέφερε μαθησιακά οφέλη σε πολλαπλά επίπεδα, καθώς βασίστηκε

- στον επικοδομητισμό καθώς οι μαθητές/τριες κατέγραψαν, σχεδίασαν κατασκεύασαν και ανέλυσαν παραμέτρους της λύσης του προβλήματος ,
- την ομαδοσυνεργατική διδασκαλία χωριζόμενοι σε ομάδες των 3 και 4 ατόμων,
- τη διαθεματική προσέγγιση αφού οι μαθητές χρησιμοποίησαν τις γνώσεις τους από τη φυσική και τα ηλεκτρικά κυκλώματα αλλά και τη βιολογία και τους τρόπους με τους οποίους δροσίζεται το σώμα μας,
- τη μέθοδο project καθώς οι εργασία πέρασε από διαφορετικά στάδια (σχεδιασμός, ανάλυση, κατασκευή και παρουσίαση)
- την εξατομικευμένη μάθηση καθώς οι μαθητές/τριες μπορούσαν να επιλέξουν με ποιο κομμάτι της εργασίας θα ήθελαν να ασχοληθούν περισσότερο.

Λόγω της ιδιαίτερης απήχησης του Wedosave, εκτός από την παρουσίαση του στο Μαθητικό Συνέδριο Πληροφορικής της Περιφερειακής Δ/νσης Κεντρικής Μακεδονίας και στο Φεστιβάλ Μαθητικές Ρομποτικής του Πειραματικού Γυμνασίου Πανεπιστημίου Μακεδονίας και Φεστιβάλ Ρομποτικής Δ/νσης Β/θμιας Νομού Πέλλας, οι μαθητές είχαν την ευκαιρία να δώσουν συνεντεύξεις σε πλήθος Μέσων Μαζικής Επικοινωνίας αποκτώντας εμπειρία αλλά και αυτοπεποίθηση για τις προσπάθειές και τις δυνατότητές τους.

Λέξεις – κλειδιά: Σύνδρομο Ξεχασμένου Παιδιού, STEM, Microbit, ρομποτική, προγραμματισμός.

ΕΙΣΑΓΩΓΗ

Το φαινόμενο του Συνδρόμου Ξεχασμένου Παιδιού (Forgotten Baby Syndrome – FBS) αποτελεί μία δυνητικά θανατηφόρα κατάσταση, η οποία έχει απασχολήσει έντονα τόσο τη διεθνή επιστημονική κοινότητα όσο και την κοινωνία των πολιτών (Barrington, 2019). Στις Ηνωμένες Πολιτείες Αμερικής, κατά τις τελευταίες δύο δεκαετίες, έχουν καταγραφεί πάνω από 900 θάνατοι βρεφών και μικρών παιδιών που εγκαταλείφθηκαν από λάθος σε σταθμευμένα οχήματα, κυρίως κατά τη διάρκεια των θερινών μηνών, λόγω της ταχείας ανόδου της θερμοκρασίας στο εσωτερικό των αυτοκινήτων (Turner, 2018, Middleton, 2022).

Ερευνητικά δεδομένα καταδεικνύουν ότι ακόμη και σε ήπιες εξωτερικές θερμοκρασίες, της τάξεως των 25–30°C (McLaren et al., 2005), το εσωτερικό ενός αυτοκινήτου μπορεί να φτάσει τους 50°C μέσα σε 10 λεπτά, και σε λιγότερο από 30 λεπτά να προσεγγίσει ή και να ξεπεράσει τους 65°C (NHTSA, 2023), θέτοντας σε άμεσο κίνδυνο τη ζωή οποιουδήποτε παγιδευμένου οργανισμού. Η θερμοπληξία και η αφυδάτωση επέρχονται ραγδαία, ιδιαίτερα στα βρέφη, τα οποία έχουν περιορισμένη ικανότητα ρύθμισης της θερμοκρασίας του σώματός τους (Null, 2023).

Το πρόβλημα αυτό, παρότι συνδέεται κυρίως με ψυχολογικούς και κοινωνικούς παράγοντες –όπως η έλλειψη ύπνου, το άγχος, ή η μεταβολή της ρουτίνας του φροντιστή–, απαιτεί καινοτόμες τεχνολογικές παρεμβάσεις που να μπορούν να εντοπίζουν εγκαίρως τον κίνδυνο και να ενεργοποιούν μηχανισμούς ειδοποίησης και αποσόβησης του κινδύνου, πριν να είναι αργά.

Απαντώντας σε αυτή την ανάγκη, μαθητές και μαθήτριες της Στ΄ τάξης του 11ου Δημοτικού Σχολείου Καλαμαριάς ανέπτυξαν, στο πλαίσιο του μαθήματος Πληροφορικής, την ρομποτική κατασκευή "Wedosave: Forgotten Baby Syndrome". Η κατασκευή αυτή βασίζεται στη χρήση μικροελεγκτών τύπου Microbit και στοχεύει στην ανίχνευση της παρουσίας βρέφους ή μικρού παιδιού εντός του οχήματος, καθώς και στην αυτόματη ειδοποίηση του/της συνοδού και την ενεργοποίηση μηχανισμών ασφαλείας, όπως το άνοιγμα των παραθύρων για αερισμό.

Το έργο εντάσσεται σε ένα ευρύτερο παιδαγωγικό πλαίσιο, όπου η εκπαίδευση STEM (Science, Technology, Engineering, Mathematics) συνδυάζεται με την κοινωνική ευαισθητοποίηση και ενσωματώνει την παιδαγωγική βιωματική μάθηση (Karagounis, 2023; De Costa, 2025). Πράγματι, η εμπλοκή των μαθητών σε ένα πρόβλημα πραγματικής ζωής ενίσχυσε τη βιωματική τους μάθηση, προήγαγε την ενσυναίσθηση και καλλιέργησε τη δημιουργική και αναλυτική τους σκέψη. Μέσω της μεθόδου project και της ομαδοσυνεργατικής προσέγγισης, οι μαθητές ανέλαβαν ενεργό ρόλο στη διαμόρφωση της λύσης, βιώνοντας σε βάθος την έννοια της υπεύθυνης και κοινωνικά προσανατολισμένης καινοτομίας.

Εικόνα 1
Wedosave:ForgottenBabySyndrome 11ο ΔΣ Καλαμαριάς

Η χρήση τέτοιων προσομοιώσεων επιτρέπει στους μαθητές να σχεδιάζουν, κατασκευάζουν και αξιολογούν αποτελεσματικές λύσεις σε πραγματικά προβλήματα, ενισχύοντας παράλληλα δεξιότητες όπως η επίλυση προβλήματος, ο προγραμματιστικός σχεδιασμός, η καινοτομία και η τεχνολογική έκφραση (De Costa, 2025). Επιπλέον, η διδακτική αυτή πρακτική εντάσσεται στα πλαίσια της διαφοροποιημένης διδασκαλίας, προσφέροντας ευκαιρίες συμμετοχής σε μαθητές με διαφορετικά μαθησιακά προφίλ, μέσω ανάθεσης ρόλων (π.χ. προγραμματισμός, κατασκευή, παρουσίαση) που ανταποκρίνονται στα ενδιαφέροντα και τις δεξιότητές τους (De Costa, 2025). Τέλος, η ενσωμάτωση της εκπαιδευτικής ρομποτικής στην πρωτοβάθμια εκπαίδευση προάγει την ανάπτυξη υπολογιστικής σκέψης (computational

thinking) – κεντρικής δεξιότητας σύμφωνα με τα αναλυτικά προγράμματα STEM (Anastasopoulou, 2022, Karagounis, 2023) – και συνεισφέρει στην τεχνολογικό γραμματισμό.

Η παρούσα εργασία παρουσιάζει τη σύλληψη, τον σχεδιασμό και την υλοποίηση του Wedosave, αναδεικνύοντας τόσο τη λειτουργική του διάσταση όσο και την παιδαγωγική του αξία. Η υλοποίηση του έργου αποδεικνύει ότι ακόμη και οι μαθητές του δημοτικού μπορούν να συμμετέχουν σε ουσιαστικές δράσεις κοινωνικής τεχνολογίας, όταν υποστηρίζονται από κατάλληλα εκπαιδευτικά περιβάλλοντα και μεθοδολογίες.

Η ΚΑΤΑΣΚΕΥΗ

Η κατασκευή του ρομποτικού συστήματος Wedosave συνιστά μια ολοκληρωμένη τεχνολογική λύση που ενσωματώνει αισθητήρες και αυτοματισμούς με στόχο την προστασία των παιδιών από τις θανατηφόρες συνέπειες της θερμοπληξίας εντός σταθμευμένων οχημάτων. Οι μαθητές/τριες εργάστηκαν ομαδικά για την ανάπτυξη ενός δικτύου μικροελεγκτών τύπου Microbit, οι οποίοι επικοινωνούν μεταξύ τους ασύρματα μέσω ραδιοκυμάτων, επιτρέποντας την ανταλλαγή κρίσιμων πληροφοριών για την κατάσταση εντός του οχήματος (εικόνα 2).

Εικόνα 2
Το σύστημα Wedosave:FSB

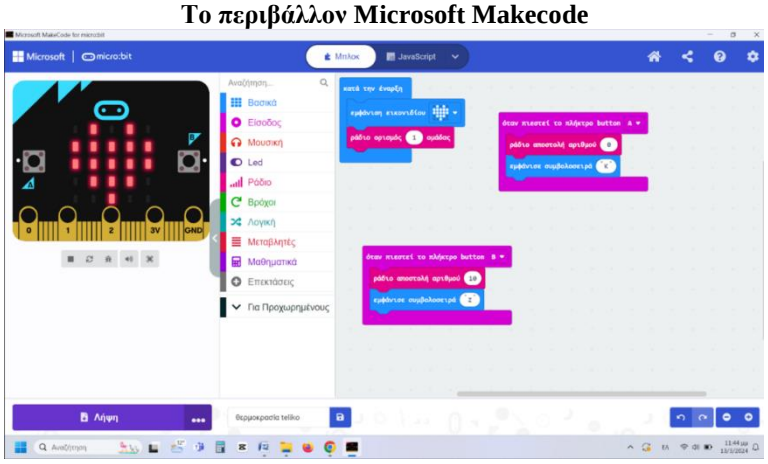
Κεντρικό ρόλο στη λειτουργικότητα του συστήματος κατέχει ο αισθητήρας βάρους, ο οποίος εντοπίζει την παρουσία παιδιού στο παιδικό κάθισμα. Ο αισθητήρας αυτός σχεδιάστηκε από τους μαθητές με αυτοσχέδια υλικά, αναδεικνύοντας τη δημιουργικότητα και την εφαρμογή της γνώσης Φυσικής (κυρίως στα ηλεκτρικά κυκλώματα) που απέκτησαν στο σχολείο. Παράλληλα, ενσωματώθηκε αισθητήρας θερμοκρασίας για την παρακολούθηση της εσωτερικής θερμοκρασίας της καμπίνας του αυτοκινήτου.

Σε περίπτωση που διαπιστωθεί ταυτόχρονη ύπαρξη παιδιού και επικίνδυνης θερμοκρασίας, το σύστημα ενεργοποιεί τρεις μηχανισμούς ειδοποίησης και παρέμβασης: αποστολή ειδοποίησης στον/στη συνοδό μέσω φορητής συσκευής (π.χ. ρολόι ή κινητό), ηχητικό συναγερμό εντός του αυτοκινήτου, καθώς και ενεργοποίηση κινητήρα για το άνοιγμα παραθύρων με σκοπό τη μείωση της θερμοκρασίας. Ο σχεδιασμός αυτός προϋπέθετε τη χρήση κατάλληλων δομών επιλογής και επανάληψης και παραμετροποίησης μέσω μεταβλητών στον προγραμματισμό των Microbit.

Επιπλέον, για τη διευκόλυνση της παρουσίασης του έργου σε συνέδρια και φεστιβάλ ρομποτικής, οι μαθητές δημιούργησαν ένα πρόσθετο Microbit προσομοίωσης, το οποίο στέλνει εντολές επικίνδυνης ή ασφαλούς θερμοκρασίας προς το κύριο σύστημα, επιτρέποντας την επιτάχυνση της επίδειξης. Η κατασκευή αυτή αποδεικνύει την κατανόηση των μαθητών στην έννοια της προσομοίωσης, η οποία αποτελεί βασικό εργαλείο στην εκπαιδευτική ρομποτική και την ερευνητική μεθοδολογία STEM (Zeigler & Nutaro, 2016, Anastasopoulou, 2022).

Η όλη διαδικασία αποτέλεσε για τους μαθητές ένα πλαίσιο εφαρμοσμένης μάθησης, όπου η θεωρητική γνώση συνδέθηκε με τη δημιουργία ενός λειτουργικού προϊόντος. Η ενσωμάτωση της κατασκευής στο γνωστικό αντικείμενο της Πληροφορικής υπηρέτησε διδακτικούς στόχους που σχετίζονται με την επίλυση προβλήματος, τον προγραμματιστικό σχεδιασμό και την καινοτομία (Papert, 1980), ενώ ενίσχυσε τις δεξιότητες συνεργασίας, αναστοχασμού και τεχνολογικής έκφρασης των παιδιών.

ΔΙΔΑΚΤΙΚΗ ΠΡΟΣΕΓΓΙΣΗ



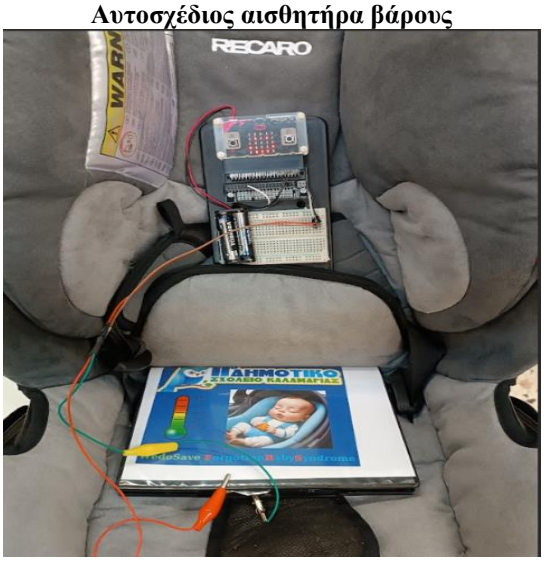
Η εκπαιδευτική αξιοποίηση της ρομποτικής κατασκευής Wedosave εντάσσεται στο πλαίσιο του μαθήματος της Πληροφορικής στην Στ΄ τάξη του Δημοτικού Σχολείου και σχετίζεται άμεσα με τις θεματικές ενότητες «Υλοποιώ Σχέδια

Έρευνας» και «Προγραμματίζω τον Υπολογιστή». Η εφαρμογή της εκπαιδευτικής ρομποτικής ως μέσο διδασκαλίας ενισχύει την εμπλοκή των μαθητών με το αντικείμενο μέσω βιωματικής και διερευνητικής μάθησης, όπως αυτή ορίζεται από τις σύγχρονες παιδαγωγικές προσεγγίσεις του STEM (Martín-Páez et al., 2019, Papadimitriou, 2020) και της μεθόδου project.

Η διδακτική πορεία ξεκίνησε ήδη από την Ε΄ τάξη, όπου οι μαθητές/τριες είχαν την ευκαιρία να γνωρίσουν βασικές δομές προγραμματισμού μέσω της δημιουργίας ψηφιακού παιχνιδιού στο περιβάλλον Scratch, διαδικασία κατά την οποία οι μαθητές/τριες γνώρισαν και χρησιμοποίησαν όλες τις βασικές δομές προγραμματισμού όπως η δομή επανάληψης και η δομή επιλογής αλλά και η δημιουργία και χρήση μεταβλητών. Κατά τη μετάβασή τους στη Στ΄ τάξη, μεταφέρθηκαν ομαλά σε πιο σύνθετες προγραμματιστικές απαιτήσεις, χρησιμοποιώντας το περιβάλλον Microsoft MakeCode, το οποίο προσφέρει οπτικό προγραμματισμό προσαρμοσμένο στο αναπτυξιακό επίπεδο των μαθητών του Δημοτικού.

Αρχικά, στα πρώτα εισαγωγικά μαθήματα πραγματοποιήθηκαν δραστηριότητες εξοικείωσης με το περιβάλλον προγραμματισμού και τις βασικές δυνατότητες του μικροελεγκτή microbit, όπως η μέτρηση και εμφάνιση θερμοκρασίας στην οθόνη LED. Προοδευτικά, προστέθηκαν συνθήκες ελέγχου που επιτρέπουν στο σύστημα να διακρίνει μεταξύ ασφαλών και επικίνδυνων θερμοκρασιών, στοιχείο που εμβαθύνει στην εννοιολογική κατανόηση των δομών επιλογής και μεταβλητών. Συγκεκριμένα, ζητήθηκε από τους μαθητές η μέτρηση της θερμοκρασίας από το ενσωματωμένο θερμόμετρο του microbit με απλή εμφάνιση της στην οθόνη του ενώ αργότερα προστέθηκε η λειτουργία εμφάνισης ανάλογου μηνύματος όταν η θερμοκρασία θεωρείται επικίνδυνη ή ασφαλής για τη ζωή (εικόνα 3).

Εικόνα 3
Το περιβάλλον Microsoft Makecode



Σταδιακά, οι μαθητές/τριες προγραμμάτισαν τα microbit ώστε να αποστέλλουν μηνύματα μεταξύ τους για να ενεργοποιούνται τα προειδοποιητικά ηχητικά σήματα αλλά και ο κινητήρας, ο οποίος αναμένεται να ανοίξει το παράθυρο σε περίπτωση κινδύνου. Αυτό επιτυγχάνεται με τη δυνατότητα που έχουν τα microbit αφενός να στέλνουν κωδικοποιημένα ραδιοσήματα μεταξύ τους και αφετέρου με κατάλληλο προγραμματισμό, να ελέγχουν τις τιμές που μεταδόθηκαν και να προβαίνουν σε ανάλογες ενέργειες.

Βασικό κομμάτι της κατασκευής, είναι ο αισθητήρας βάρους που τοποθετείται στο καθισματάκι και ειδοποιεί τα συστήματα για την ύπαρξη ή όχι παιδιού στο αυτοκίνητο. Έχοντας τη δυνατότητα να προστεθούν στο microbit και επιπλέον αισθητήρες από τους ήδη ενσωματωμένους, αποφασίστηκε να χρησιμοποιηθούν οι γνώσεις των μαθητών/τριων στη Φυσική Ε' Δημοτικού και συγκεκριμένα στα ηλεκτρικά κυκλώματα. Ο αυτοσχέδιος αισθητήρας αποτελείται από μία θήκη DVD στην οποία προσαρμόστηκε μικρό ελατήριο για να το κρατάει ανοιχτό όταν δεν κάθεται το παιδί, ενώ στις άκρες του συνδέθηκαν καλώδια με ένα κομμάτι αλουμινόχαρτο που θα λειτουργεί ως καλός αγωγός του ηλεκτρισμού. Η άλλη άκρη των καλωδίων συνδέθηκε στους ακροδέκτες του microbit το οποίο τα τροφοδοτεί με ηλεκτρικό ρεύμα χαμηλής τάσης από τις μπαταρίες του δημιουργώντας έτσι ένα ηλεκτρικό κύκλωμα που μένει ανοιχτό όταν το παιδικό κάθισμα είναι κενό, ενώ κλείνει λόγω βάρους όταν το παιδί κάθεται. (εικόνα 4).

Η συνολική προσέγγιση επιβεβαιώνει ότι η ενσωμάτωση της εκπαιδευτικής ρομποτικής στην Πρωτοβάθμια Εκπαίδευση (Alimisis, 2013) μπορεί να αποτελέσει ισχυρό εργαλείο ανάπτυξης υπολογιστικής σκέψης, δημιουργικότητας και τεχνολογικού γραμματισμού, ενώ παράλληλα ενισχύει τη διαθεματικότητα και την ενεργή συμμετοχή όλων των μαθητών στη μαθησιακή διαδικασία.

Εικόνα 4
Αυτοσχέδιος αισθητήρα βάρους

ΠΡΟΓΡΑΜΜΑΤΙΣΜΟΣ

Η ενότητα του προγραμματισμού αποτέλεσε το πιο δημιουργικό και απαιτητικό στάδιο του έργου Wedosave. Μέσα από τη διαχείριση πραγματικών συνθηκών, όπως η αυξημένη θερμοκρασία και η παρουσία παιδιού, οι μαθητές εφαρμόζουν έννοιες υπολογιστικής σκέψης (computational thinking), όπως παραμετροποίηση, λογική σύνδεση συνθηκών και ανάπτυξη αλγορίθμων (Chaudhary et al., 2016; Chevalier et al., 2021). Το σύστημα βασίζεται σε μια απλή αλλά αποτελεσματική κωδικοποίηση, όπου η θερμοκρασία αντιστοιχεί σε ακέραιες τιμές (π.χ. 1 = κρύο, 10 = ζέστη) και ο αισθητήρας βάρους σε 0 ή 1, επιτρέποντας την αξιολόγηση της κατάστασης και τη λήψη αποφάσεων μέσω δομών ελέγχου if-then-else (Chaudhary et al., 2016).

ΠΙΝΑΚΑΣ 1
Πίνακας τιμών και ενεργειών

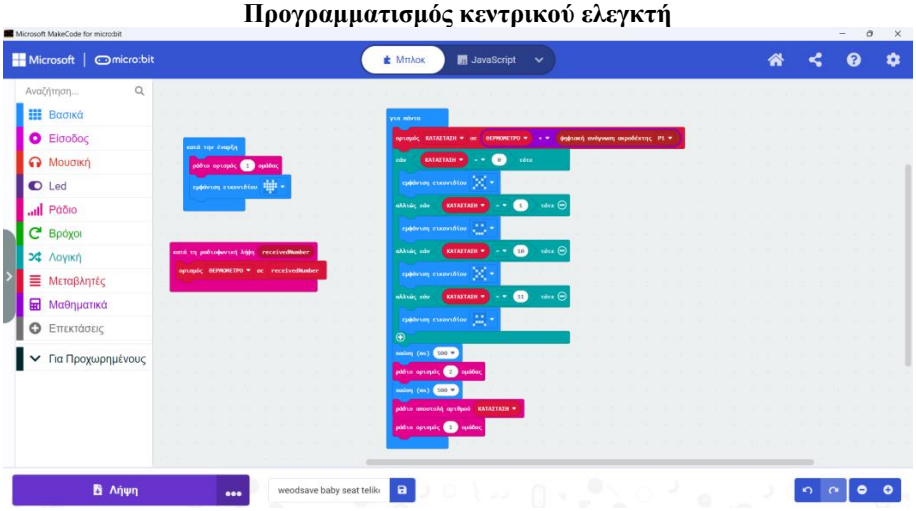
ΘΕΡΜΟΚΡΑΣΙΑ	ΑΙΣΘΗΤΗΡΑΣ ΒΑΡΟΥΣ	ΕΝΕΡΓΕΙΑ
ΚΡΥΟ = 1	ΟΧΙ ΠΑΙΔΙ ΣΤΟ ΚΑΘΙΣΜΑ = 0	ΕΜΦΑΝΙΣΕ Χ ΠΑΡΑΘΥΡΟ ΚΛΕΙΣΤΟ
ΚΡΥΟ = 1	ΠΑΙΔΙ ΣΤΟ ΚΑΘΙΣΜΑ = 1	ΕΜΦΑΝΙΣΕ ☺ ΠΑΡΑΘΥΡΟ ΚΛΕΙΣΤΟ
ΖΕΣΤΗ = 10	ΟΧΙ ΠΑΙΔΙ ΣΤΟ ΚΑΘΙΣΜΑ = 0	ΕΜΦΑΝΙΣΕ Χ ΠΑΡΑΘΥΡΟ ΚΛΕΙΣΤΟ
ΖΕΣΤΗ = 10	ΠΑΙΔΙ ΣΤΟ ΚΑΘΙΣΜΑ = 1	ΕΜΦΑΝΙΣΕ ☹ ΠΑΡΑΘΥΡΟ ΑΝΟΙΧΤΟ

Το σύστημα αποτελείται από ένα κεντρικό microbit που ελέγχει θερμοκρασία και βάρος στο καρεκλάκι, δύο προειδοποιητικά microbit που λειτουργούν σαν σειρήνες (ένα στο αυτοκίνητο σαν συναγερμός και ένα σαν ρολόι που θα φοράει ο οδηγός) και ένα Microbit το οποίο διαθέτει κινητήρα που θα ανοίγει το παράθυρο του αυτοκινήτου. Τα τρία τελευταία εκτελούν παρόμοια προγράμματα ενώ το κεντρικό είναι πιο πολύπλοκο καθώς λαμβάνει μηνύματα από τους αισθητήρες, υπολογίζει και μεταδίδει αντίστοιχα μηνύματα στα υπόλοιπα Microbit (εικόνα 5).

Οι μαθητές/τριές εκπαιδεύτηκαν στην πλειοψηφία τους να προγραμματίζουν και τα τέσσερα microbit, εντούτοις υπήρξε πρόβλεψη σε περίπτωση μαθητών με ειδικές μαθησιακές ανάγκες να ασχοληθούν είτε με τον προγραμματισμό των microbit που λειτουργούν προειδοποιητικά είτε να ασχοληθούν με την κατασκευή του παραθύρου με τα εκπαιδευτικά τουβλάκια κατασκευών. (εικόνα 6,7)

Ο προγραμματισμός περιλαμβάνει δομές επιλογής και επανάληψης που διδάχθηκαν τόσο κατά την προηγούμενη σχολική χρονιά στην Ε΄ δημοτικού όσο και στις αρχικές ασκήσεις εξοικείωσης. Το περιβάλλον προγραμματισμού microbit είναι εύχρηστο και διασκεδαστικό για τους μαθητές καθώς περιλαμβάνει γραφικό εξομοιωτή microbit που δείχνει άμεσα τα αποτελέσματα των εντολών που του δόθηκαν και δίνει τη δυνατότητα μελέτης στο σχολείο αλλά και από το σπίτι χωρίς την προϋπόθεση αγοράς microbit.

Η χρήση οπτικού περιβάλλοντος προγραμματισμού, όπως το Microsoft MakeCode, συνοδεύεται από γραφικό εξομοιωτή, ενισχύοντας την άμεση ανατροφοδότηση και ενθαρρύνοντας την ανάλυση σφαλμάτων σε πραγματικό χρόνο



(Chevalier et al., 2021; Karagounis, 2023). Αυτό υποστηρίζει ταυτόχρονα την ανάπτυξη της υπολογιστικής σκέψης και της ακρίβειας στην εκτέλεση εντολών

Εικόνα 5
Αυτοσχέδιος αισθητήρα βάρους

Ειδικά, η εφαρμογή διερευνητικής εκπαίδευσης μέσω της ρομποτικής συνδέεται με την ενίσχυση ενδιαφέροντος , όπως καταγράφεται σε μελέτες, ακόμα και σε μαθητικό επίπεδο (Chaudhary et al., 2016).

Εικόνα 6
Προγραμματισμός κεντρικού ελεγκτή

Εικόνα 7
Κατασκευή για τον μηχανισμό παραθύρου

Ιδιαίτερη φροντίδα δόθηκε στη διαφοροποιημένη διδασκαλία, με ανάθεση ρόλων όπως «προγραμματιστής», «μηχανικός» ή «παρουσιαστής», εξασφαλίζοντας την ενεργό συμμετοχή και των μαθητών με μαθησιακές ιδιαιτερότητες (Tomlinson, 2014, Chevalier et al., 2021). Τέλος, η εμπλοκή τους σε πολυπαραγοντικές αλληλεπιδράσεις πραγματικού χρόνου ενίσχυσε την κατανόηση των σχέσεων μεταξύ εισόδου–επεξεργασίας–εξόδου, αποτελώντας λειτουργικό παράδειγμα υπολογιστικής σκέψης, όπως ορίζεται στα σύγχρονα STEM προγράμματα (Chevalier et al., 2021; Karagounis, 2023).

ΣΥΜΠΕΡΑΣΜΑΤΑ

Το έργο Wedosave απέφερε ουσιαστικά μαθησιακά οφέλη σε πολλαπλά επίπεδα, εδραιωμένα σε σύγχρονες παιδαγωγικές προσεγγίσεις. Καταρχάς, στηρίχθηκε στις αρχές του εποικοδομητισμού, καθώς οι μαθητές και μαθήτριες είχαν την ευκαιρία να διατυπώσουν το πρόβλημα, να αναλύσουν τις κρίσιμες παραμέτρους του, να σχεδιάσουν και να υλοποιήσουν τις απαραίτητες ρομποτικές διατάξεις και, εν συνεχεία, να προγραμματίσουν και να αξιολογήσουν την αποτελεσματικότητα των λύσεων που πρότειναν. Παράλληλα, η μαθησιακή διαδικασία οργανώθηκε στη βάση της ομαδοσυγκεντρωτικής διδασκαλίας, με έντονη αλληλεπίδραση μεταξύ των μελών κάθε ομάδας, συνεργατική λήψη αποφάσεων και συστηματική παρουσίαση των αποτελεσμάτων στην ολομέλεια της τάξης.

Η εκπαιδευτική παρέμβαση ενσωμάτωσε στοιχεία διαθεματικής διδασκαλίας, αξιοποιώντας γνώσεις από τη Φυσική —κυρίως σε ό,τι αφορά τα ηλεκτρικά κυκλώματα— καθώς και από τη Βιολογία, όπως η κατανόηση της λειτουργίας της εφίδρωσης ως μηχανισμού θερμορύθμισης του ανθρώπινου οργανισμού. Παράλληλα, εφαρμόστηκαν αρχές εξατομικευμένης μάθησης, με σκοπό την ενεργό ένταξη όλων των μαθητών, συμπεριλαμβανομένων και εκείνων με ειδικές εκπαιδευτικές ανάγκες, οι οποίοι είχαν τη δυνατότητα να επιλέξουν το τμήμα της δραστηριότητας (κατασκευαστικό ή προγραμματιστικό) στο οποίο επιθυμούσαν να εμπλακούν. Η όλη διδακτική προσέγγιση βασίστηκε στη μεθοδολογία του project, η οποία περιλαμβάνει τον σχεδιασμό, την ανάλυση, την υλοποίηση και την παρουσίαση της εργασίας.

Η υλοποίηση ενός μαθητικού project με επίκεντρο την επίλυση αυθεντικών, κοινωνικά κρίσιμων προβλημάτων παρουσιάζει σημαντική εκπαιδευτική και κοινωνική προστιθέμενη αξία. Τέτοιου είδους εγχειρήματα γεφυρώνουν τη θεωρητική γνώση με την εφαρμογή της στην πράξη, ενισχύοντας τη βιωματική και ενεργό μάθηση, ενώ παράλληλα αναδεικνύουν τη χρηστικότητα της σχολικής γνώσης στη ζωή των μαθητών.

Πρωτίστως, τέτοιες παρεμβάσεις ενισχύουν την κριτική και δημιουργική σκέψη, καθιστώντας τους μαθητές ικανούς να αναλύουν πολύπλοκες καταστάσεις και να αναπτύσσουν λειτουργικές λύσεις, καλλιεργώντας πνεύμα καινοτομίας και πειραματισμού. Επιπλέον, ευνοούν την ανάπτυξη συνεργατικών δεξιοτήτων, με τους μαθητές να εργάζονται σε ομάδες, να διαμοιράζονται ρόλους και να αναλαμβάνουν ευθύνες, ενισχύοντας την επικοινωνία και την ομαδική συνέργεια.

Μία ακόμη καθοριστική παράμετρος αφορά την ανάπτυξη κοινωνικής ευαισθησίας. Οι μαθητές δεν εμπλέκονται απλώς με θεωρητικά σενάρια αλλά με πραγματικά προβλήματα που αφορούν την καθημερινότητα και την ευημερία της κοινότητας, όπως η ασφάλεια των παιδιών, η προστασία της ζωής και η χρήση της τεχνολογίας προς όφελος ευάλωτων κοινωνικών ομάδων. Έτσι, η εκπαιδευτική διαδικασία αποκτά πραγματιστική διάσταση και κοινωνικό αντίκτυπο, ενισχύοντας τη συνείδηση του ενεργού πολίτη.

Τέλος, η ενασχόληση με προβλήματα του πραγματικού κόσμου ενισχύει τη μαθησιακή κινητοποίηση και τη διάθεση για διερεύνηση. Οι μαθητές παρακινούνται να αναζητήσουν πληροφορίες, να πειραματιστούν με λύσεις και να αναστοχαστούν επάνω στα σφάλματα και τα αποτελέσματα των επιλογών τους, ενισχύοντας την ανθεκτικότητα και την ικανότητα διαχείρισης της αποτυχίας. Το project Wedosave, επομένως, δεν αποτέλεσε απλώς μια σχολική εργασία, αλλά μια ολοκληρωμένη εκπαιδευτική εμπειρία, η οποία συνέβαλε στη διαμόρφωση υπεύθυνων, δημιουργικών και κοινωνικά ευαισθητοποιημένων μαθητών, ικανών να ανταποκριθούν στις απαιτήσεις του σύγχρονου κόσμου.

ΠΕΡΙΛΗΨΗ

Θέματα όπως το Ατομικό Πρότυπο του Bohr και ο Περιοδικός Πίνακας, παραμένουν απαιτητικά στη διδασκαλία της Χημείας, με ιδιαίτερες δυσκολίες για τους μαθητές της Α' Λυκείου. Στο πλαίσιο αυτής της πρόκλησης, η παρούσα μελέτη διερευνά τον αντίκτυπο διαφορετικών στρατηγικών διδασκαλίας έναντι της παραδοσιακής τυπικής παράδοσης, αξιοποιώντας περιβάλλοντα ψηφιακής διάδρασης, επιτραπέζιου παιχνιδιού και χρήσης ρομποτικού συστήματος. Διερευνά πόσο συμβάλουν στην πραγματική κατανόηση του Ατομικού Προτύπου του Bohr και του Περιοδικού Πίνακα και αυξάνουν την ενεργό εμπλοκή των μαθητών. Ο σχεδιασμός και η διεξαγωγή της έρευνας αναπτύχθηκαν σε δύο φάσεις, ξεκινώντας με μια πιλοτική φάση για τη διόρθωση απαραίτητων αλλαγών και συνεχίζοντας με την κύρια φάση. Η ανάλυση των δεδομένων, τόσο ποσοτικών όσο και ποιοτικών, αποκαλύπτει ότι οι διδακτικές παρεμβάσεις που βασίζονται σε παιγνιώδεις προσεγγίσεις φαίνεται να ενισχύουν σημαντικά τόσο τη γνωστική απόδοση, όσο και την ενεργό συμμετοχή των μαθητών στη μαθησιακή διαδικασία, σε σύγκριση με την παραδοσιακή προσέγγιση, ενώ η ρομποτική παρέμβαση, αν και ελκυστική, δεν επιφέρει εξίσου υψηλές μαθησιακές αποδόσεις. Τα αποτελέσματα ενισχύουν την ανάγκη επαναπροσδιορισμού της διδασκαλίας της Χημείας με τη χρήση μοντέλων διδασκαλίας που να εκφράζουν μια πληθώρα στυλ μάθησης των εκάστοτε μαθητών. Η σύγκριση των εν λόγω παρεμβάσεων με την παραδοσιακή διδασκαλία αποκαλύπτει διαφορές στην επίδοση των μαθητών, προσφέροντας σημαντικά ερευνητικά συμπεράσματα για την αναμόρφωση της διδασκαλίας της Χημείας.

Λέξεις-κλειδιά: Χημεία, παιχνιδοποίηση, διδακτικές παρεμβάσεις, ψηφιακά μέσα, ρομποτική, Ατομικό Πρότυπο του Bohr.

ΕΙΣΑΓΩΓΗ

Η εκπαιδευτική πραγματικότητα του 21αιώνα, μέσα από την αλληλεπίδραση κοινωνικών, τεχνολογικών και παιδαγωγικών μετασχηματισμών, απαιτεί διδακτικές προσεγγίσεις που να μην στοχεύουν μόνο στη μεταφορά γνώσης αλλά και να επικεντρώνονται στην ενεργό συμμετοχή των μαθητών, στη βαθύτερη κατανόηση των γνώσεων και στην ενίσχυση της κριτικής σκέψης (Hoai et al., 2023). Στο πλαίσιο αυτό, η Χημεία αποτελεί ιδανικό πεδίο για την ανάπτυξη της επιστημονικής και αναλυτικής σκέψης. Οι σύγχρονες παιδαγωγικές μέθοδοι ενσωματώνουν τις αρχές της ενεργητικής και διερευνητικής μάθησης και μπορούν να βοηθήσουν τους μαθητές να χτίσουν ισχυρά θεμέλια γνώσεων.

Η μάθηση σύνθετων χημικών εννοιών, όπως το Ατομικό Πρότυπο του Bohr και ο Περιοδικός Πίνακας, ήδη από την Α' τάξη του Λυκείου, ενώ απαιτεί τη χρήση μεθόδων διδασκαλίας με ενεργή μάθηση, πολλοί εκπαιδευτικοί εξακολουθούν να χρησιμοποιούν παραδοσιακά μοντέλα διδασκαλίας (Musengimana et al., 2021). Οι έννοιες αυτές απαιτούν από τους μαθητές να κατανοήσουν μη ορατά φαινόμενα και να δομήσουν πολύπλοκες νοητικές αναπαραστάσεις. Παρά τις συστηματικές προσπάθειες των εκπαιδευτικών, οι παραδοσιακές μορφές διδασκαλίας αποδεικνύονται συχνά ανεπαρκείς στην επίτευξη βαθιάς κατανόησης, για αυτό και προτείνεται η χρήση ενός υβριδικού μοντέλου μάθησης, τυπικής παράδοσης και χρήσης εικονικών προσομοιώσεων και διαδραστικών οπτικοποιήσεων του μικρόκοσμου (Aldosari *et al.*, 2022 · Hoai *et al.*, 2023).

Η διεθνής βιβλιογραφία (Jani *et al.*, 2024· Ndabezitha & Gravett, 2024) υπογραμμίζει ότι δεν υφίσταται ένα «ιδανικό» διδακτικό μοντέλο που να ανταποκρίνεται στις ανάγκες όλων των μαθητών και όλων των εποχών. Κάθε παιδαγωγική προσέγγιση οφείλει να προσαρμόζεται δυναμικά στο εκάστοτε μαθησιακό πλαίσιο, λαμβάνοντας υπόψη το γνωστικό επίπεδο των μαθητών, τις κοινωνικές και πολιτισμικές παραμέτρους, αλλά και την τεχνολογική πρόοδο. Η εξέλιξη των διδακτικών παρεμβάσεων δείχνει την ανάγκη συνεχούς επαναπροσδιορισμού της σχέσης μεταξύ του εκπαιδευτικού, του μαθητή και της γνώσης, χωρίς φυσικά να αποκλείει τη διακριτική χρήση δασκαλοκεντρικών πρακτικών, όταν αυτές λειτουργούν υποστηρικτικά. Σίγουρα, υπάρχουν πολλά εμπόδια για να είναι η χρήση της κάθε διδακτικής προσέγγισης αποτελεσματική, όπως να μην έχει πλήρως κατανοήσει ο εκπαιδευτικός το διδακτικό μοντέλο που χρησιμοποιεί (Retnomurti *et al.*, 2024), οι ελλιπείς δεξιότητες (ψηφιακές και εκπαιδευτικές) των εκπαιδευτικών, οι χαμηλοί πόροι της σχολικής μονάδας και η μειωμένη διάθεση του διδακτικού προσωπικού να χρησιμοποιήσει κάποιο ενναλακτικό διδακτικό μοντέλο (Shah et al., 2024).

Νέες εκπαιδευτικές τεχνολογίες και καινοτόμα μοντέλα διδασκαλίας κερδίζουν έδαφος (Alsaedi, 2024). Διαφορετικά παιδαγωγικά σχήματα, όπως δραστηριότητες βασισμένες σε παιχνίδι, η χρήση διαδραστικών ψηφιακών μέσων και εφαρμογών ρομποτικής, συγκαταλέγονται στις σύγχρονες τεχνικές που δύναται να ενισχύσουν τη μαθησιακή συμμετοχή και εμπλοκή των μαθητών (Al-Hafdi & Alhalafawy, 2024· Zeybek & Saygı, 2024). Η παιχνιδοποίηση, είτε με τη μορφή επιτραπέζιων (T. C. Wang & Hung, 2024), είτε ψηφιακών δραστηριοτήτων, κινητοποιεί τους μαθητές μέσω της πρόκλησης του παιχνιδιού, δημιουργώντας μαθησιακά περιβάλλοντα υψηλής ελκυστικότητας και εμπλοκής (Badajos *et al.*, 2023 · Stojanovska, 2021). Τα ψηφιακά μέσα επιτρέπουν την εξατομίκευση της μάθησης και την άμεση ανατροφοδότηση (Lampropoulos & Kinshuk, 2024). Παράλληλα, τα ρομποτικά συστήματα, αν και περισσότερο γνωστά στον χώρο της Πληροφορικής και της Μηχανικής, αποκτούν σταδιακά εφαρμογή στις Φυσικές Επιστήμες, ενισχύοντας τη σύνδεση θεωρίας και πράξης, μέσω της σχεδίασης, της κατασκευής και του προγραμματισμού. Εύλογο είναι να απαιτείται περεταίρω έρευνα στο κατά πόσο βοηθάει η καθοδηγούμενη πρακτική με ενσωμάτωση των STEM (Science, Technology, Engineering and Mathematics) στα εκπαιδευτικά προγράμματα σπουδών (Jaipal-Jamani, 2023).

ΕΡΕΥΝΗΤΙΚΟΙ ΣΤΟΧΟΙ ΚΑΙ ΕΡΩΤΗΜΑΤΑ

Η παρούσα μελέτη επιδιώκει να διερευνήσει την εκπαιδευτική αξία τριών εναλλακτικών καινοτόμων προσεγγίσεων για την κατανόηση του Ατομικού Προτύπου του Bohr και του Περιοδικού Πίνακα έναντι της τυπικής παράδοσης. Οι διδακτικές παρεμβάσεις βασίζονται αντίστοιχα: (α) στη δημιουργία και χρήση ψηφιακού παιχνιδιού, (β) στη δημιουργία και εφαρμογή επιτραπέζιου παιχνιδιού και (γ) στην εκπαιδευτική αξιοποίηση ρομποτικού συστήματος EV3. Ο στόχος είναι να διερευνηθεί η επίδραση κάθε παρέμβασης στην ουσιαστική κατανόηση των επιστημονικών εννοιών από τους μαθητές, αλλά και στην κινητοποίηση, εμπλοκή και ικανοποίησή τους από τη μαθησιακή διαδικασία. Στο πλαίσιο αυτό, οι επιμέρους ερευνητικοί στόχοι διαμορφώνονται ως εξής:

- Να αξιολογηθεί η επίδραση τριών καινοτόμων παρεμβάσεων: ψηφιακού παιχνιδιού, επιτραπέζιου συνεργατικού παιχνιδιού και ρομποτικού συστήματος EV3 στη βελτίωση των επιδόσεων των μαθητών.
- Να συγκριθούν οι παραπάνω παρεμβάσεις με την παραδοσιακή διδασκαλία.
- Να εξαχθούν παιδαγωγικά συμπεράσματα και προτάσεις για τη δυνατότητα πρακτικής ενσωμάτωσης αυτών των προσεγγίσεων στη σχολική τάξη.

Με γνώμονα τους παραπάνω στόχους, η έρευνα διατυπώνει τα εξής ερευνητικά ερωτήματα:

1. Πόσο αυξάνεται η επίδοση των μαθητών μετά την εφαρμογή των τριών εναλλακτικών καινοτόμων διδακτικών παρεμβάσεων σε σύγκριση με την παραδοσιακή διδασκαλία;
2. Ποιες από τις παρεμβάσεις οδηγούν σε καλύτερα μαθησιακά αποτελέσματα;

Η απάντηση στα παραπάνω ερωτήματα στοχεύει να συμβάλει στην αναδιαμόρφωση των διδακτικών πρακτικών στο μάθημα της Χημείας και στη συστηματική ένταξη πολυτροπικών, ενεργητικών μοντέλων διδασκαλίας στην ελληνική εκπαιδευτική κοινότητα.

ΣΧΕΔΙΑΣΜΟΣ ΚΑΙ ΔΙΕΞΑΓΩΓΗ ΤΗΣ ΕΡΕΥΝΑΣ

Η παρούσα μελέτη οργανώθηκε σε δύο διακριτές φάσεις: την πιλοτική εφαρμογή και την κύρια φάση της έρευνας. Ο σχεδιασμός βασίστηκε σε πρότυπα ποσοτικής εκπαιδευτικής έρευνας, με στόχο την αποτίμηση της αποτελεσματικότητας τριών καινοτόμων διδακτικών παρεμβάσεων σε σύγκριση με την παραδοσιακή διδασκαλία.

Πιλοτική Φάση

Η πιλοτική φάση υλοποιήθηκε κατά το σχολικό έτος 2023–2024 σε σχολική μονάδα της Αριδαίας, με τη συμμετοχή 127 μαθητών της Α’ Λυκείου, κατανεμημένων σε πέντε ομάδες των 22–26 ατόμων. Στόχος της φάσης αυτής ήταν η διερεύνηση και η αξιολόγηση της καταλληλόλητας του ερευνητικού σχεδίου και ο εντοπισμός πιθανών δυσκολιών στην εφαρμογή των παρεμβάσεων. Με βάση τα ευρήματα της πιλοτικής φάσης, έγιναν οι απαραίτητες βελτιώσεις, στο υλικό, στο σχεδιασμό και στις διαδικασίες της διεξαγωγής της έρευνας.

Κύρια Φάση

Η κύρια φάση της έρευνας διεξήχθη σε σχολική μονάδα της Θεσσαλονίκης κατά το σχολικό έτος 2024–2025, με τη συμμετοχή 93 μαθητών της Α’ Λυκείου, οι οποίοι κατανεμήθηκαν με τυχαίο τρόπο σε τέσσερις σχεδόν ισάριθμες ομάδες (22-24 ατόμων), σε καθεμία από τις οποίες διεξήχθη διαφορετική διδακτική παρέμβαση:

- *Ομάδα Ψηφιακής Παρέμβασης:* εφαρμόστηκε ψηφιακό παιχνίδι εμπλουτισμένο με επεξηγηματικό πολυμεσικό υλικό, συνδυαστικά με παρουσίαση θεωρίας μέσω ψηφιακών διαφανειών.
- *Ομάδα Επιτραπέζιου Παιχνιδιού:* συμμετείχε σε απτό συνεργατικό παιχνίδι εμπλουτισμένο με συνοδευτική παρουσίαση θεωρίας μέσω ψηφιακών διαφανειών.
- *Ομάδα Ρομποτικού Συστήματος:* υλοποίησε δραστηριότητα με τη χρήση ρομποτικού συστήματος EV3, συνδυαστικά με παρουσίαση θεωρίας μέσω ψηφιακών διαφανειών .
- *Ομάδα Ελέγχου:* παρακολούθησε τη διδασκαλία με παραδοσιακή τυπική προσέγγιση, σύμφωνα με το εγκεκριμένο σχολικό εγχειρίδιο εμπλουτισμένο με συνοδευτική παρουσίαση θεωρίας μέσω ψηφιακών διαφανειών.

Όλοι οι μαθητές είχαν προηγουμένως διδαχθεί την ενότητα του Ατομικού Προτύπου και του Περιοδικού Πίνακα από τον υπεύθυνο καθηγητή του σχολείου τους, περίπου 2–3 εβδομάδες πριν από την ερευνητική παρέμβαση, γεγονός που διασφάλισε ότι όλοι οι συμμετέχοντες είχαν κοινό γνωστικό υπόβαθρο. Η ερευνητική διαδικασία τηρήθηκε εντός του πλαισίου του ωρολογίου προγράμματος, χωρίς να διαταράσσεται η κανονικότητα του σχολικού περιβάλλοντος.

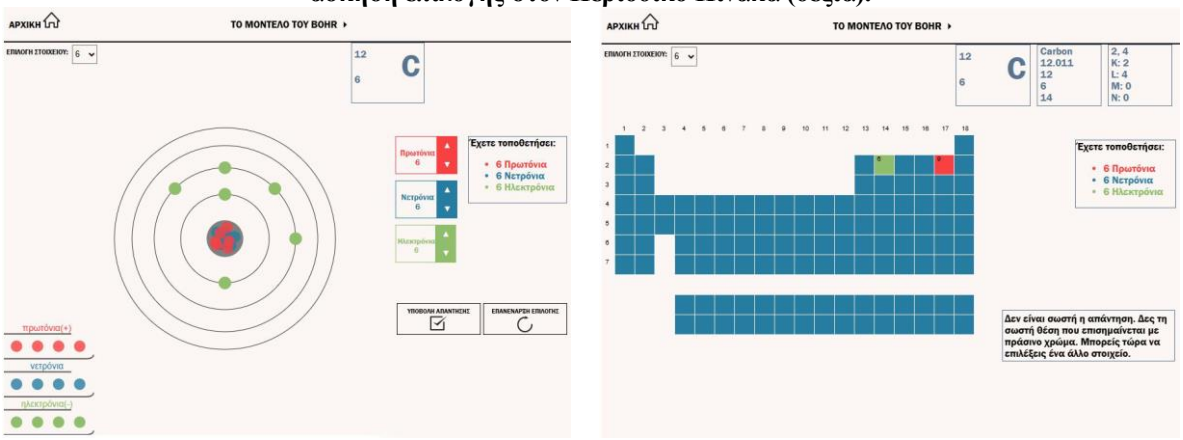
Η συνολική διάρκεια της ερευνητικής διαδικασίας για κάθε ομάδα ανήλθε σε 4–5 διδακτικές ώρες, κατανεμημένες ως εξής:

- 1 διδακτική ώρα: χορήγηση αρχικού ερωτηματολογίου και pre-test αξιολόγησης.
- 1–2 διδακτικές ώρες: εφαρμογή της αντίστοιχης διδακτικής παρέμβασης.
- 1 διδακτική ώρα: χορήγηση τελικού ερωτηματολογίου και post-test μετά την παρέμβαση (σε διάστημα 2–3 εβδομάδων από την έναρξη).

Εργαλεία της Έρευνας

- Τεστ αξιολόγησης των επιστημονικών εννοιών της ενότητας.
- Φύλλο ερωτήσεων απαντήσεων για το επιτραπέζιο παιχνίδι.
- Φύλλο ερωτήσεων απαντήσεων του ψηφιακού παιχνιδιού Bohr’s Model /Α’ Λυκείου (Α’ Επίπεδο).
- Φύλλο ερωτήσεων απαντήσεων με τη χρήση του EV3.

ΔΙΔΑΚΤΙΚΕΣ ΠΑΡΕΜΒΑΣΕΙΣ



Η ερευνητική μελέτη περιλάμβανε την ανάπτυξη και τη χρήση τριών εναλλακτικών διδακτικών παρεμβάσεων με στόχο την εμβάθυνση των συμμετεχόντων στις έννοιες της Δομής του Ατόμου, με έμφαση στο Ατομικό Πρότυπο του Bohr και τη σχέση του με τον Περιοδικό Πίνακα. Κάθε παρέμβαση σχεδιάστηκε με βάση τις αρχές της ενεργητικής και εμπειρικής μάθησης, ενσωματώνοντας διαφορετικές τεχνολογίες και τεχνικές μάθησης. Οι παρεμβάσεις αναπτύχθηκαν και εφαρμόστηκαν με παιδαγωγική συνέπεια και ενιαίο διδακτικό στόχο, ώστε να καταστεί δυνατή η σύγκριση της αποτελεσματικότητάς τους. Αναλυτικότερα:

Παρέμβαση 1: Ψηφιακό Εκπαιδευτικό Παιχνίδι (Ομάδα 1)

Η παρέμβαση αξιοποίησε διαδραστικό εκπαιδευτικό λογισμικό με τίτλο Bohr's Model, το οποίο σχεδιάστηκε και αναπτύχθηκε ειδικά για τις ανάγκες της μελέτης (Εικόνα 1). Το ψηφιακό παιχνίδι περιλάμβανε ασκήσεις διαβαθμισμένης δυσκολίας, που επέτρεπαν στους μαθητές να δομούν επιλεγμένα ή τυχαία άτομα τοποθετώντας σωματίδια πρωτονίων, νετρονίων και ηλεκτρονίων σε κατάλληλες προκαθορισμένες ή επιτρεπτές περιοχές. Κατόπιν, οι μαθητές καλούνταν να εντοπίσουν τη θέση του στοιχείου στον Περιοδικό Πίνακα. Το λογισμικό προσέφερε άμεση ανατροφοδότηση με ταυτόχρονη ενθάρρυνση των παικτών για την προσπάθειά τους, δυνατότητα επαναληπτικής εξάσκησης και προοδευτική αύξηση του επιπέδου δυσκολίας.

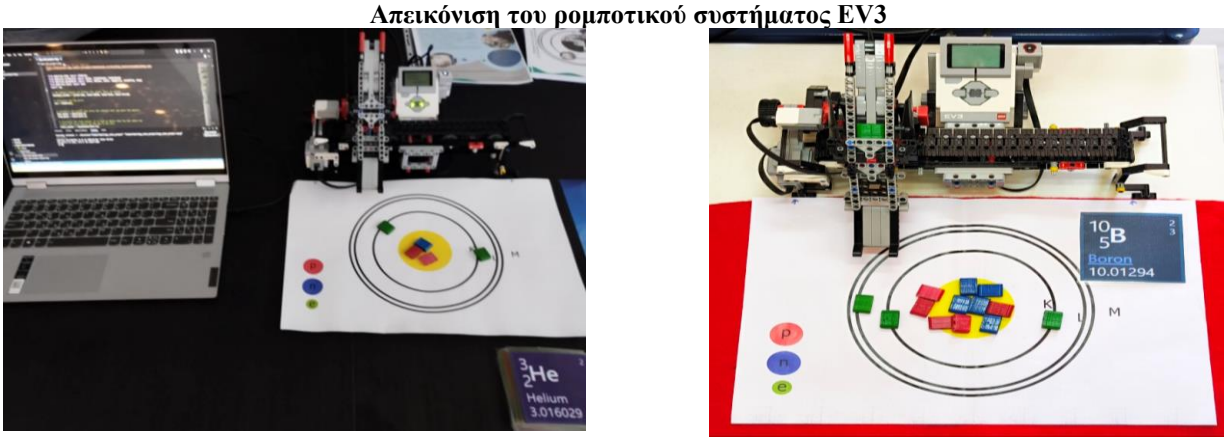
Οι μαθητές εργάζονταν σε ομάδες των 2–3 ατόμων με χρήση σταθερών υπολογιστών και παράλληλα συμπλήρωναν συνεργατικά ανώνυμο φύλλο εργασίας, έχοντας τη δυνατότητα να χρησιμοποιήσουν το παιχνίδι. Η διάρκεια της παρέμβασης ήταν μία διδακτική ώρα, στην οποία υπήρξε και παρουσίαση της θεωρίας μέσω ψηφιακών διαφανειών.

Εικόνα 1
Απεικόνιση του εκπαιδευτικού λογισμικού «Bohr's Model». Η άσκηση δόμησης του ατόμου (αριστερά) και η άσκηση επιλογής στον Περιοδικό Πίνακα (δεξιά).

Παρέμβαση 2: Επιτραπέζιο Εκπαιδευτικό Παιχνίδι (Ομάδα 2)

Το επιτραπέζιο παιχνίδι είχε ως στόχο την ενεργό συμμετοχή των μαθητών μέσω συνεργασίας και υγιούς ανταγωνισμού (Εικόνα 2). Οι ομάδες (2–3 μαθητές) καλούνταν να απαντήσουν σε ερωτήσεις σχετικές με τη δομή των ατόμων και την αντιστοίχιση της θέσης τους στον Περιοδικό Πίνακα, ενώ παράλληλα συναγωνίζονταν για την ταχύτερη και ορθότερη επίλυση των ερωτήσεων. Το ταμπλό του παιχνιδιού απεικόνιζε το Ατομικό Πρότυπο του Bohr και τα φύλλα δραστηριότητας περιλάμβαναν ερωτήσεις κατανόησης και εννοιολογικής αποσαφήνισης. Οι μαθητές διατηρούσαν υψηλό επίπεδο εμπλοκής, καθώς προσπαθούσαν να απαντήσουν σωστά και να κατακτήσουν τον στόχο του παιχνιδιού, δηλαδή να είναι οι πρώτοι που απαντούσαν σωστά σε όλες τις ερωτήσεις που τους υποδείκνυε ο αριθμός των ζαριών. Μετά το τέλος της δραστηριότητας, συμπλήρωναν ατομικό ερωτηματολόγιο αξιολόγησης. Η διάρκεια της παρέμβασης ήταν μία διδακτική ώρα, στην αρχή της οποίας προηγήθηκε από παρουσίαση της θεωρίας μέσω ψηφιακών διαφανειών.

Εικόνα 2
Το ταμπλό και τα αντικείμενα του επιτραπέζιου εκπαιδευτικού παιχνιδιού (αριστερά) και στιγμιότυπο από τη διεξαγωγή του παιχνιδιού σε δύο ομάδες μαθητών (δεξιά)



Παρέμβαση 3: Εκπαιδευτική Ρομποτική με EV3 (Ομάδα 3)

Η παρέμβαση βασίστηκε στη χρήση του ρομποτικού συστήματος LEGO Mindstorms EV3, συναρμολογημένο και προγραμματισμένο εκ των προτέρων ώστε να προσομοιώνει τον τρόπο δόμησης των ατόμων με υποατομικά σωματίδια (Εικόνα 3). Οι μαθητές, οργανωμένοι σε ομάδες των τεσσάρων, επέλεγαν τον αριθμό και το είδος των σωματιδίων ανά χρώμα (ηλεκτρόνια, πρωτόνια, νετρόνια) με βάση την κάρτα του εκάστοτε χημικού στοιχείου που λάμβαναν τυχαία από μια στοίβα καρτών-χημικών στοιχείων. Κατόπιν, παρατηρούσαν την κίνηση του ρομπότ που τοποθετούσε τα σωματίδια στο ταμπλό-μοντέλο του Bohr. Η προσομοίωση των σωματιδίων έγινε από χρωματιστά τουβλάκια (κόκκινα, μπλε και πράσινα), τα οποία είχαν σχεδιαστεί και εκτυπωθεί με εκτυπωτή 3D από τον εκπαιδευτικό - ερευνητή σε προηγούμενο χρόνο. Το κάθε τουβλάκι είχε ως εξόγκωμα τον αντίστοιχο συμβολισμό p, n, e στη γραφή του Braille.

Η διαδικασία παρείχε αυθεντικές ευκαιρίες βιωματικής μάθησης, καθώς οι μαθητές έλεγχαν την ακρίβεια της εκτέλεσης του ρομπότ και επιχειρηματολογούσαν σχετικά με την ορθότητα των αποτελεσμάτων. Τέλος, συμπλήρωσαν σχετικό φύλλο αξιολόγησης. Η συνολική διάρκεια της παρέμβασης ήταν δύο διδακτικές ώρες και περιείχε παρουσίαση της θεωρίας μέσω ψηφιακών διαφανειών.

Εικόνα 3
Απεικόνιση του ρομποτικού συστήματος EV3

Τυπική Διδασκαλία (Ομάδα Ελέγχου- Ομάδα 4)

Η διδασκαλία βασίστηκε στο εγκεκριμένο σχολικό εγχειρίδιο της Χημείας της Α΄ λυκείου, συνδυαστικά με ψηφιακή παρουσίαση των εννοιών και πραγματοποιήθηκε από τον ερευνητή-εκπαιδευτικό. Περιλάμβανε τη χρήση λευκού πίνακα, με στόχο την οπτικοποίηση μοντέλων και την καθοδηγούμενη επεξεργασία των εννοιών. Οι μαθητές συμμετείχαν σε συζήτηση, απαντούσαν σε ερωτήσεις και λύνανε ασκήσεις κατανόησης με την υποστήριξη του διδάσκοντος. Η παρέμβαση διήρκεσε συνολικά μία διδακτική ώρα.

ΚΡΙΤΗΡΙΑ ΣΥΜΜΕΤΟΧΗΣ ΚΑΙ ΗΘΙΚΕΣ ΔΙΑΣΦΑΛΙΣΕΙΣ

Η έρευνα σχεδιάστηκε και υλοποιήθηκε σύμφωνα με τις αρχές της επιστημονικής και εκπαιδευτικής δεοντολογίας, με στόχο την προστασία των δικαιωμάτων των συμμετεχόντων και την ενίσχυση της εγκυρότητας της διαδικασίας. Πριν από την υλοποίηση των παρεμβάσεων, πραγματοποιήθηκε λεπτομερής ενημέρωση των μαθητών και των γονέων/κηδεμόνων τους σχετικά με τους σκοπούς, τις μεθόδους, το περιεχόμενο και τη διάρκεια της έρευνας. Η συμμετοχή ήταν εθελοντική και πραγματοποιήθηκε μόνο κατόπιν υπογεγραμμένης συγκατάθεσης, διασφαλίζοντας τη συνειδητή και ενημερωμένη αποδοχή όλων των όρων. Τηρήθηκαν αυστηρά οι κανόνες προστασίας προσωπικών και ευαίσθητων δεδομένων, σύμφωνα με τον Γενικό Κανονισμό για την Προστασία Δεδομένων (GDPR), καθώς και οι αρχές ανωνυμίας και εμπιστευτικότητας που διέπουν την εκπαιδευτική έρευνα. Η συλλογή, διαχείριση και αποθήκευση των δεδομένων πραγματοποιήθηκε με τρόπο που αποτρέπει οποιονδήποτε συσχετισμό με την ταυτότητα των μαθητών.

Όσον αφορά τη σύνθεση του δείγματος, η επιλογή των συμμετεχόντων για την πιλοτική και την κύρια φάση βασίστηκε σε παιδαγωγικά τεκμηριωμένα κριτήρια. Ειδικότερα, δόθηκε έμφαση στο να εξαιρεθούν στην ανάλυση απαντήσεις συμμετεχόντων, οι οποίοι δεν απάντησαν στις ερωτήσεις των τεστ αξιολόγησης είτε λόγω ύπαρξης μη επαρκών επικοινωνιακών δεξιοτήτων στην ελληνική γλώσσα, ή στην απουσία διαπιστωμένων μαθησιακών δυσκολιών. Παρότι δεν κατέστη δυνατή η πλήρης ισοκατανομή ως προς το φύλο εξαιτίας λειτουργικών περιορισμών του σχολικού πλαισίου, σε όλες τις ομάδες ο εκπαιδευτικός της σχολικής κοινότητας είχε διδάξει τα συγκεκριμένα διδακτικά αντικείμενα πριν από την κάθε διδακτική παρέμβαση, ώστε να γίνει η προσπάθεια όλοι οι συμμετέχοντες να ξεκινήσουν από το ίδιο γνωστικό υπόβαθρο.

ΑΝΑΛΥΣΗ ΔΕΔΟΜΕΝΩΝ

Για την ποσοτική ανάλυση των δεδομένων χρησιμοποιήθηκε το στατιστικό πακέτο IBM SPSS Statistics (Version 29.0.1.0 (171)). Πραγματοποιήθηκε αρχικά περιγραφική ανάλυση των επιδόσεων στα pre-test και post-test, με σκοπό την αποτύπωση της γενικής εικόνας των μαθησιακών μεταβολών σε κάθε ομάδα. Υπολογίστηκαν βασικοί δείκτες όπως ο μέσος όρος (Μ.Ο.), η τυπική απόκλιση (Τ.Α.), καθώς και το εύρος τιμών.

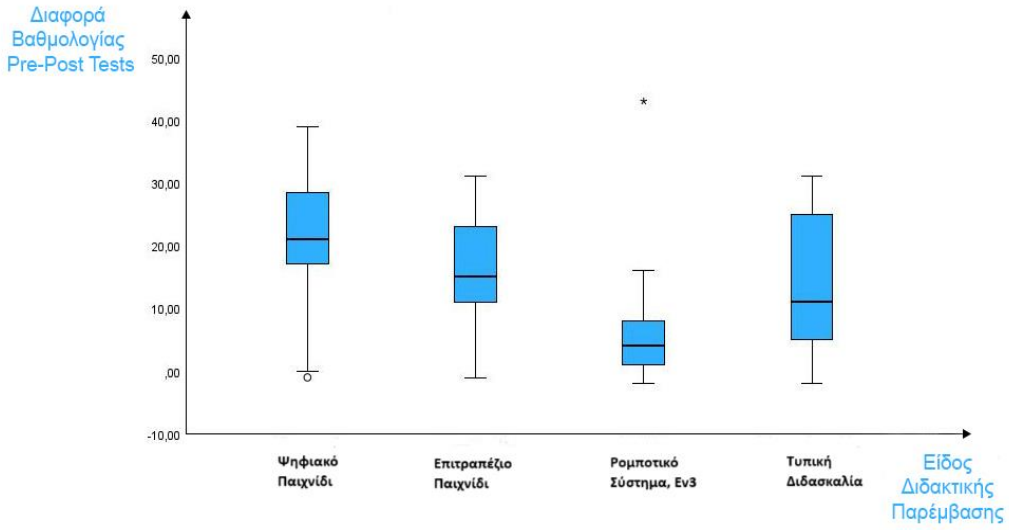
Στη συνέχεια, για τη διερεύνηση στατιστικά σημαντικών διαφορών μεταξύ των τεσσάρων ομάδων, επιλέχθηκε ο μη παραμετρικός έλεγχος Kruskal–Wallis, καθώς δεν πληρούνταν οι προϋποθέσεις κανονικότητας για όλες τις ομάδες. Οι πολλαπλές συγκρίσεις πραγματοποιήθηκαν με post hoc ελέγχους πολλαπλών συγκρίσεων.

ΑΠΟΤΕΛΕΣΜΑΤΑ

Η επεξεργασία και ανάλυση των δεδομένων που συλλέχθηκαν μέσω των ερευνητικών εργαλείων πραγματοποιήθηκε με τη χρήση τόσο ποσοτικών όσο και ποιοτικών μεθόδων. Οι βασικοί άξονες της ανάλυσης περιλαμβάνουν τις επιδόσεις των μαθητών στα αρχικά και τελικά τεστ αξιολόγησης (pre-test και post-test).

Περιγραφική Στατιστική και Συγκριτική Ανάλυση

Αρχικά, διενεργήθηκε περιγραφική ανάλυση των επιδόσεων των μαθητών, με υπολογισμό βασικών στατιστικών δεικτών, όπως ο μέσος όρος και η τυπική απόκλιση για τα pre-test και post-test. Από το δείγμα αφαιρέθηκαν 5 άτομα, των οποίων οι απαντήσεις δεν καλύπταν τις προϋποθέσεις (τυχαίες ή μηδενικές απαντήσεις). Η συνολική εικόνα καταδεικνύει θετική μεταβολή των επιδόσεων, με μέσο όρο στο pre-test 26,24 μονάδες (SD = 18,82) και στο post-test 40,84 μονάδες (SD = 25,34). Η μέση βελτίωση ανήλθε σε 14,60 μονάδες (SD = 11,60), γεγονός που υποδηλώνει μια γενικευμένη αύξηση των γνωστικών επιδόσεων στο σύνολο του δείγματος. Τα περιγραφικά στατιστικά για τους μέσους όρους επίδοσης ανά παρέμβαση ήταν τα παρακάτω:



- Στο ψηφιακό παιχνίδι ο μέσος όρος βελτιώθηκε από 30,43 στο pre-test, σε 52,78 στο post-test.
- Στο επιτραπέζιο παιχνίδι ο μέσος όρος βελτιώθηκε από 42,24 στο pre-test, σε 58,52 στο post-test.
- Στο ρομποτικό σύστημα ο μέσος όρος βελτιώθηκε από 13,38 στο pre-test, σε 19,83 στο post-test.
- Στην τυπική παράδοση ο μέσος όρος βελτιώθηκε από 20,05 στο pre-test, σε 33,75 στο post-test.

Ο μη παραμετρικός έλεγχος Kruskal–Wallis που διενεργήθηκε, λόγω της μη κανονικότητας της κατανομής των δεδομένων και της ανισομερούς κατανομής του δείγματος, έδειξε στατιστικά σημαντικές διαφορές στις επιδόσεις των μαθητών μεταξύ των ομάδων ($\chi^2(3) = 24{,}701$, $p < .001$), επιβεβαιώνοντας ότι η διδακτική μέθοδος επηρέασε ουσιαστικά τα μαθησιακά αποτελέσματα. Η ανάλυση πολλαπλών συγκρίσεων (post hoc) ανέδειξε ότι οι ομάδες που συμμετείχαν σε ψηφιακή και επιτραπέζια παιχνιδοποίηση παρουσίασαν τη μεγαλύτερη βελτίωση, ενώ η ομάδα με ρομποτικό σύστημα κατέγραψε τη μικρότερη πρόοδο.

Πιο συγκεκριμένα η βελτίωση παρουσιάζεται ως εξής (Διάγραμμα 1):

- Η ψηφιακή παρέμβαση σημείωσε τη μεγαλύτερη μέση βελτίωση επιδόσεων (22,35 μονάδες).
- Ακολούθησε η επιτραπέζια παρέμβαση με μέση αύξηση 16,29 μονάδων.
- Η τυπική διδασκαλία σημείωσε βελτίωση 13,70 μονάδων.
- Η ρομποτική παρέμβαση είχε τη μικρότερη επίδοση (6,46 μονάδες).

Διάγραμμα 1
Θηκογράμματα βελτίωσης ανά παρέμβαση

Αν και η παρέμβαση με το ρομποτικό σύστημα προσέφερε ενδιαφέροντα στοιχεία βιωματικής μάθησης, ενδέχεται η χαμηλότερη αποτελεσματικότητά της να οφείλεται στον περιορισμένο διαθέσιμο χρόνο και στο ήδη συναρμολογημένο και προγραμματισμένο ρομποτικό σύστημα, δηλαδή στην μη ενεργό και εξατομικευμένη συμμετοχή των μαθητών ή ακόμα και στο αρχικό χαμηλό γνωστικό επίπεδο των συμμετεχόντων. Αυτές οι υποθέσεις απαιτούν περαιτέρω διερεύνηση σε μελλοντικές μελέτες.

ΣΥΖΗΤΗΣΗ

Τα ευρήματα της παρούσας μελέτης επιβεβαιώνουν την αποτελεσματικότητα των καινοτόμων διδακτικών παρεμβάσεων στην κατανόηση θεμελιωδών επιστημονικών εννοιών από μαθητές της Α' Λυκείου. Η αξιοσημείωτη βελτίωση των επιδόσεων στο post-test σε σύγκριση με το pre-test καταδεικνύει τη δυνατότητα των παιχνιδοποιημένων και ψηφιακών μεθόδων να ενισχύσουν ουσιαστικά τη γνωστική πρόοδο των μαθητών σε θέματα που με παραδοσιακό τρόπο διδασκαλίας ήταν δύσκολο να γίνουν κατανοητά από τους μαθητές.

Ειδικότερα, η παρέμβαση με το ψηφιακό παιχνίδι φάνηκε να λειτουργεί ενισχυτικά, αξιοποιώντας τη φιλική στάση των μαθητών προς τις νέες τεχνολογίες και προσφέροντας άμεση ανατροφοδότηση, εξατομικευμένη εμπλοκή και προσαρμογή στο γνωστικό τους επίπεδο. Η πλούσια διαδραστικότητα και η δυνατότητα διερεύνησης με εξατομικευμένο ρυθμό φαίνεται να διευκόλυναν την κατανόηση και την εμβάθυνση στις έννοιες του Ατομικού Προτύπου του Bohr και του Περιοδικού Πίνακα.

Αντίστοιχα, η παρέμβαση με το εκπαιδευτικό επιτραπέζιο παιχνίδι, παρότι λιγότερο τεχνολογικά προσαρμοσμένη, καλλιέργησε τη συνεργασία, την επικοινωνία μεταξύ των μαθητών και την ενεργό εμπλοκή τους σε μαθησιακές δραστηριότητες με απτικό και κοινωνικό χαρακτήρα. Η συνδυαστική επίδραση του ανταγωνιστικού και συνεργατικού πλαισίου φαίνεται να διατήρησε υψηλό το ενδιαφέρον και να ενίσχυσε την εμπέδωση των εννοιών μέσα από την αλληλεπίδραση και την ανατροφοδότηση μεταξύ συνομηλίκων.

Η παρέμβαση με τη χρήση του ρομποτικού συστήματος EV3, αν και παιδαγωγικά ενδιαφέρουσα και πρωτότυπη, παρουσίασε τη μικρότερη βελτίωση. Παρά το υψηλό επίπεδο τεχνολογικής καινοτομίας, φαίνεται ότι το περιορισμένο χρονικό πλαίσιο, η μειωμένη ενεργή συμμετοχή των μαθητών, το αυξημένο τεχνικό βάρος και η ανάγκη για προϋπάρχουσες δεξιότητες διαχείρισης του υλικού, λειτούργησαν ανασταλτικά. Οι μαθητές ενδέχεται να

επικεντρώθηκαν περισσότερο στον χειρισμό του ρομποτικού μέσου και λιγότερο στη σύνδεσή του με το γνωστικό αντικείμενο, γεγονός που καθιστά εμφανή την ανάγκη για καλύτερο διδακτικό σχεδιασμό και περισσότερο χρόνο αλληλεπίδρασης σε μελλοντικές εφαρμογές.

Η παρούσα μελέτη αποδεικνύει ότι η τεχνολογία δεν αποτελεί από μόνη της εγγύηση μαθησιακής επιτυχίας. Αντίθετα, η παιδαγωγική αξιοποίηση των ψηφιακών και φυσικών εργαλείων, ο προσεκτικός διδακτικός σχεδιασμός και η ευελιξία προσαρμογής στις ανάγκες των μαθητών, αναδεικνύονται ως κρίσιμοι παράγοντες για την επιτυχία των καινοτόμων μεθόδων.

ΣΥΜΠΕΡΑΣΜΑΤΑ ΚΑΙ ΠΑΙΔΑΓΩΓΙΚΕΣ ΠΡΟΤΑΣΕΙΣ

Η παρούσα έρευνα τονίζει τη δυναμική των παιχνιδοποιημένων και πολυτροπικών διδακτικών παρεμβάσεων στη βελτίωση της μαθησιακής εμπειρίας και των γνωστικών επιδόσεων στη Χημεία. Οι μέθοδοι που αξιοποιούν διαδραστικά ψηφιακά εργαλεία και ομαδοσυνεργατικές πρακτικές φαίνεται να προσφέρουν πολλαπλά οφέλη: γνωστικά, κοινωνικά και συναισθηματικά.

Η παρέμβαση με το επιτραπέζιο παιχνίδι, αν και τεχνολογικά λιγότερο προηγμένη, ενίσχυσε την ενεργή συμμετοχή, την αναστοχαστική συζήτηση και τη συνεργατική μάθηση. Από την άλλη, η ρομποτική εφαρμογή, παρότι παρέχει υψηλό επίπεδο κινητοποίησης και σύνδεσης με την τεχνολογία STEM, απαιτεί αναθεώρηση του διδακτικού χρόνου, περισσότερη εμπλοκή στη χρήση του ρομποτικού συστήματος, ώστε να είναι μεγαλύτερη η ενεργός συμμετοχή των μαθητών στη διαδικασία της μάθησης.

Με βάση τα συμπεράσματα της παρούσας έρευνας προτείνεται**:**

- Η συστηματική ένταξη παιχνιδοποιημένων και συνεργατικών μεθόδων στη διδασκαλία των Φυσικών Επιστημών.
- Η ενίσχυση της επιμόρφωσης των εκπαιδευτικών σε παιδαγωγικές πρακτικές που αξιοποιούν τεχνολογικά και απτικά μέσα.
- Η επέκταση της έρευνας σε διαφορετικά γνωστικά αντικείμενα της Χημείας σε όλες τις τάξεις.
- Η υιοθέτηση μακροπρόθεσμων ερευνητικών σχεδίων που να εξετάζουν την επίδραση αυτών των παρεμβάσεων.
- Η συνεργασία καθηγητών με διαφορετικά γνωστικά αντικείμενα, με στόχο την εύρεση ιδανικότερου τρόπου χρήσης του συγκεκριμένου ρομποτικού συστήματος, ώστε να επιτευχθεί η μάθηση των διαφόρων γνωστικών αντικειμένων.

Η συνολική αποτίμηση των αποτελεσμάτων αναδεικνύει την αναγκαιότητα μετάβασης από μονοδιάστατα δασκαλοκεντρικά μοντέλα διδασκαλίας σε μαθητοκεντρικές, εμπειρικές και πολυτροπικές προσεγγίσεις. Η ανάπτυξη ενός εκπαιδευτικού περιβάλλοντος, που προάγει τη δημιουργική και ενεργή συμμετοχή του μαθητή, συνιστά θεμέλιο για τη διαμόρφωση ενός ουσιαστικού, βιώσιμου και παιδαγωγικά σύγχρονου σχολείου.

ΠΕΡΙΛΗΨΗ

Ο σχεδιασμός, η εφαρμογή και η αξιολόγηση εκπαιδευτικών μουσειοπαιδαγωγικών προγραμμάτων αποτέλεσε προτεραιότητα για την αστική μη κερδοσκοπική εταιρία «Μουσείο Γέσιου - Ο Μακεδονικός Αγώνας και η Έδεσσα ΑΜΚΕ».

Συγκεκριμένα, -μέσα σε ένα πολυαισθητηριακό περιβάλλον –στις αίθουσες του Μουσείου- και Αδιαδραστικό εκπαιδευτικό πλαίσιο, που χρησιμοποιεί και αναδεικνύει την αξία των Ν.Τ. και των web2 εργαλείων-, επιχειρήθηκε η καλλιέργεια των πολιτισμικών δεξιοτήτων των μαθητών/τριών γυμνασίων και λυκείων στα περιεχόμενα και στα εκθέματα της συλλογής του μουσείου, στην τοπική ιστορία και στον πολιτισμό.

Ο σχεδιασμός του εκπαιδευτικού προγράμματος «Μαθαίνω τον Μακεδονικό Αγώνα», για μαθητές/τριες Γυμνασίων και Λυκείων (ηλικίας 13-17 ετών) βασίστηκε σε διάφορες μεθόδους, τεχνικές,προσεγγίσεις και περιβάλλοντα. Δόθηκε ιδιαίτερη έμφαση στις αρχές της παιχνιδοκεντρικής προσέγγισης (Domnus, 2010) και έτσι σχεδιάστηκε ένα εκπαιδευτικό, ψηφιακό δωμάτιο απόδρασης - escape room, ακολουθώντας τα τρία βασικά στάδια, σύμφωνα με τα χαρακτηριστικά της δραστηριοκεντρικής προσέγγισης–προστάδιο, κύριο στάδιο, μεταστάδιο- (Willis, 1996). Στο πρόγραμμα ενσωματώθηκαν εναλλακτικοί τρόποι αξιολόγησης καταγραφής συναισθημάτων των μαθητών/τριών που συμμετέχουν.

Λέξεις - κλειδιά: παιχνιδοκεντρική προσέγγιση, μουσειοπαιδαγωγικά προγράμματα, εκπαιδευτικά δωμάτια απόδρασης, educational escape rooms

ΕΙΣΑΓΩΓΗ

Τα τελευταία χρόνια παρατηρείται μια αυξανόμενη έμφαση στον κοινωνικό ρόλο των μουσείων, τα οποία μετασχηματίζονται από απλοί χώροι φύλαξης εκθεμάτων σε ζωντανούς κόμβους μάθησης και κοινωνικής αλληλεπίδρασης. Ιδιαίτερα η εκπαιδευτική διάσταση των μουσείων αναδεικνύεται ως κεντρικός άξονας της σύγχρονης μουσειοπαιδαγωγικής, η οποία επιδιώκει να ενεργοποιήσει τους επισκέπτες μέσα από βιωματικές, διαδραστικές και πολυαισθητηριακές προσεγγίσεις (Hein, 1998, Hooper-Greenhill, 2007).

Στο πλαίσιο αυτό, το Μουσείο Γέσιου – Ο Μακεδονικός Αγώνας και η Έδεσσα, ακολουθώντας τις επιταγές της σύγχρονης μουσειοπαιδαγωγικής επιστήμης, υιοθετεί μια επικοινωνιακή προσέγγιση με στόχο την αποτελεσματική προσέλκυση και ενεργό συμμετοχή του σχολικού κοινού (Stefanou, 2010· Nikonanou & Nakou, 2015). Μέσω της σχεδίασης και υλοποίησης καινοτόμων εκπαιδευτικών προγραμμάτων, το μουσείο ενισχύει τη σύνδεση της τοπικής ιστορίας με τις σύγχρονες μαθησιακές πρακτικές, ενθαρρύνοντας την κριτική σκέψη και τη συναισθηματική εμπλοκή των μαθητών/τριών.

ΤΟ ΜΟΥΣΕΙΟ ΓΕΣΙΟΥ – Ο ΜΑΚΕΔΟΝΙΚΟΣ ΑΓΩΝΑΣ ΚΑΙ Η ΕΔΕΣΣΑ

Το Μουσείο «Γέσιου – Ο Μακεδονικός Αγώνας και η Έδεσσα», το οποίο ιδρύθηκε το 2024 με πρωτοβουλία του Χρήστου Γέσιου, συνιστά έναν σημαντικό τόπο συλλογικής μνήμης, αφιερωμένο στην ανάδειξη και διατήρηση της ιστορικής παρακαταθήκης του Μακεδονικού Αγώνα (1904–1908). Μέσα από τρεις διακριτές θεματικές ενότητες, η έκθεση επιδιώκει να προσφέρει μια πολύπλευρη και βιωματική παρουσίαση της ιστορικής διαδρομής που οδήγησε στην ενσωμάτωση της Μακεδονίας στον εθνικό κορμό.

Εικόνα 1
Το Μουσείο Γέσσιου

Η πρώτη ενότητα αποτελεί έναν ιστορικό άξονα αφήγησης που ξεκινά από την Ελληνική Επανάσταση του 1821 και εκτείνεται έως την εγκατάσταση των προσφύγων μετά τη Μικρασιατική Καταστροφή. Το χρονολόγιο αναδεικνύει κρίσιμους σταθμούς και μεταβατικές φάσεις της ιστορικής πορείας του ελληνισμού στη Μακεδονία, ενισχύοντας την κατανόηση των μακροϊστορικών συνθηκών που οδήγησαν στον Μακεδονικό Αγώνα.

Η δεύτερη ενότητα εστιάζει στην ένοπλη φάση του Αγώνα, την περίοδο 1904–1908, φωτίζοντας τη δράση των «αόρατων» αγωνιστών που έδρασαν υπό εξαιρετικά δύσκολες και επικίνδυνες συνθήκες στα βαλτώδη μέρη της περιοχής.

Η προσέγγιση αυτή αποδίδει έμφαση όχι μόνο στα στρατιωτικά γεγονότα, αλλά και στην ανθρώπινη διάσταση του Αγώνα, αναδεικνύοντας τις θυσίες και την ανιδιοτελή προσφορά εκείνων που έδρασαν στον Μακεδονικό Αγώνα.

Η τρίτη ενότητα επικεντρώνεται στον τοπικό πληθυσμό και ειδικότερα στους Εδεσσαίους, αναδεικνύοντας τον καθοριστικό ρόλο της πόλης της Έδεσσας και των κατοίκων της. Μέσα από προσωπικές αφηγήσεις, προφορικές μαρτυρίες και τεκμήρια, η ενότητα συνθέτει μια πολυφωνική εικόνα της συμμετοχής της τοπικής κοινωνίας στον Αγώνα, φέρνοντας στο προσκήνιο τις μικρές, αλλά καθοριστικές πράξεις προσφοράς.

ΤΑ ΕΚΠΑΙΔΕΥΤΙΚΑ ΠΡΟΓΡΑΜΜΑΤΑ – ΣΚΟΠΟΣ – ΜΕΘΟΔΟΛΟΓΙΑ

Το Μουσείο «Γέσιου – Ο Μακεδονικός Αγώνας και η Έδεσσα», αναγνωρίζοντας τον πολιτισμικό και εκπαιδευτικό του ρόλο, αξιοποιεί τη μουσειακή εμπειρία ως εργαλείο μεταφοράς ιστορικών γνώσεων και καλλιέργειας κριτικής ιστορικής συνείδησης. Μέσα από τη διαρκή αλληλεπίδραση με την τοπική κοινωνία και ειδικότερα με τη μαθητική κοινότητα, το μουσείο επιδιώκει την ανάπτυξη εκπαιδευτικών δράσεων, βασισμένων στη συνεργασία με ειδικούς επιστήμονες και εκπαιδευτικούς, σε εθελοντική βάση, για τον σχεδιασμό και την εφαρμογή παιδαγωγικών παρεμβάσεων. Τα προγράμματα οργανώθηκαν ηλικιακά, λαμβάνοντας υπόψη τις γνωστικές και συναισθηματικές ανάγκες των παιδιών, και εστιάζουν στην αξιοποίηση της ιστορικής αφήγησης και των μουσειακών αντικειμένων ως αφηγηματικών και παιδαγωγικών εργαλείων. Στόχος είναι η ενίσχυση της σχέσης των μαθητών με την τοπική ιστορία και η ανάδειξη της σημασίας του Μακεδονικού Αγώνα στην ιστορική ένταξη της Μακεδονίας στον εθνικό κορμό. Παράλληλα, δίνεται έμφαση στη μελέτη της συμβολής της Έδεσσας και των αποκαλούμενων Αόρατων Αγωνιστών στην επιτυχή έκβαση του Αγώνα, προσφέροντας ένα παράδειγμα ηρωισμού και τοπικής συλλογικής δράσης, που λειτουργεί παιδαγωγικά (Kasvikis et al., 2020· Nikonanou, 2015).

Τα εκπαιδευτικά προγράμματα εντάσσονται σε μια γενικότερη επιδίωξη προώθησης της τοπικής ιστορίας στην εκπαιδευτική κοινότητα, με τρόπο ενεργητικό και συμμετοχικό. Έχουν ως στόχο να κινητοποιήσουν τους εκπαιδευτικούς ως διαμεσολαβητές γνώσης και τους μαθητές ως ενεργούς ερευνητές, ενισχύοντας τις διαδικασίες της διερεύνησης, της παρατήρησης, της βιωματικής εμπειρίας και της σύνδεσης των νέων γνώσεων με τις προσωπικές εμπειρίες των συμμετεχόντων. Η παιδαγωγική προσέγγιση βασίζεται σε αρχές που ενθαρρύνουν την αυτενέργεια και την καλλιέργεια της ιστορικής ενσυναίσθησης (Fourliga et al; Nikonanou & Nakou, 2002).

ΣΧΕΔΙΑΣΜΟΣ – ΜΕΘΟΔΟΛΟΓΙΑ – ΥΛΟΠΟΙΗΣΗ ΤΩΝ ΕΚΠΑΙΔΕΥΤΙΚΩΝ ΠΡΟΓΡΑΜΜΑΤΩΝ

Ο σχεδιασμός των προγραμμάτων στηρίχθηκε στις εξής θεωρητικές και μεθοδολογικές προσεγγίσεις:

- τη μουσειακή μάθηση, ως διαδικασία μάθησης με αυθεντικά αντικείμενα και χωρικά συμφραζόμενα,
- τη βιωματική προσέγγιση, που δίνει έμφαση στην εμπειρία και τη συναισθηματική εμπλοκή,
- τη θεματοκεντρική προσέγγιση, που οργανώνει τη γνώση με βάση θεματικούς άξονες,
- τη χρήση παιγνιωδών στοιχείων και μεθοδολογιών (εκπαιδευτική παιχνιδοποίηση, game based learning),
- την εφαρμογή εκπαιδευτικών δωματίων απόδρασης (educational escape rooms) με τη χρήση web2 εργαλείων, όπως το Genially –στο οποίο ενσωματώθηκε επιπλέον αυθεντικό υλικό, εκπαιδευτικά εργαλεία και πλατφόρμες (learning apps, google forms, padlet, κλπ.) ακολουθώντας έτσι και τις αρχές των Τεχνολογιών Πληροφορίας και Επικοινωνιών (ΤΠΕ) στον εκπαιδευτικό σχεδιασμό,
- την πολιτισμική αγωγή ως εφαλτήριο για την ανάπτυξη ιστορικής, κοινωνικής και αισθητικής κατανόησης και συνείδησης.

Ως προς τους μαθησιακούς στόχους του συγκεκριμένου προγράμματος, οι συμμετέχοντες μαθητές και μαθήτριες αναμένεται:

- να αποκτήσουν ιστορική γνώση για τον Μακεδονικό Αγώνα και την καθημερινότητα των Εδεσσαίων της εποχής,
- να αναπτύξουν αυξημένο ενδιαφέρον για την τοπική ιστορία και τη μουσειακή εμπειρία,
- να συμμετάσχουν ενεργά μέσω διαδραστικών, δημιουργικών και παιγνιωδών δραστηριοτήτων,
- να συνεργαστούν και να αλληλεπιδράσουν ομαδικά, ενισχύοντας την κοινωνική μάθηση,
- και τέλος, να δημιουργήσουν θετική συναισθηματική σύνδεση με τον χώρο του μουσείου και να βιώσουν τη μάθηση ως προσωπική και συλλογική εμπειρία.

ΤΟ ΕΚΠΑΙΔΕΥΤΙΚΟ ΠΡΟΓΡΑΜΜΑ

Διαρκεια: 90 λεπτά
Μέγιστος αριθμός: 27 μαθητές/ τριες Β/θμιας Εκπ/σης

«Μαθαίνω τον Μακεδονικό Αγώνα» για μαθητές/ τριες Γυμνασίων και Λυκείων (ηλικίας 13-17 ετών)

Η κινητροδότηση των μαθητών/ τριών Γυμνασίων και Λυκείων επιχειρείται με το εκπαιδευτικό πρόγραμμα «Μαθαίνω τον Μακεδονικό Αγώνα»! Μία μοναδική εμπειρία βιώνουν οι μαθητές/ τριες Γυμνασίων και Λυκείων που παρακολουθούν το συγκεκριμένο εκπαιδευτικό πρόγραμμα, καθώς ο σχεδιασμός του βασίστηκε στις ιδιαίτερες ηλικιακές ανάγκες τους. Χρησιμοποιώντας τις Νέες Τεχνολογίες, σε μικρές ομάδες (ομαδοσυνεργατική), σε tablet, μαθαίνουν για τον Μακεδονικό Αγώνα. Προσπαθούν να λύσουν γρίφους και να απαντήσουν σε κουίζ που υπάρχουν ενσωματωμένα σε ψηφιακό, εκπαιδευτικό δωμάτιο απόδρασης (escape room) ακολουθώντας τις αρχές της εκπαιδευτικής παιχνιδοποίησης και τέλος αξιοποιούν τον χρόνο τους στο μουσείο ευχάριστα, βγάζοντας τις δικές τους φωτογραφίες σε ειδικά διαμορφωμένο stand Μακεδονομάχου. Ο σχεδιασμός του προγράμματος ακολουθεί τα τρία βασικά στάδια, σύμφωνα με τα χαρακτηριστικά της δραστηριοκεντρικής προσέγγισης –προστάδιο, κύριο στάδιο, μεταστάδιο- (Willis, 1996)

Εικόνα 2
Στιγμιότυπο από δωμάτιο απόδρασης

ΣΥΜΠΕΡΑΣΜΑΤΑ – ΑΠΟΤΕΛΕΣΜΑΤΑ

Στο πλαίσιο του κοινωνικού και διαμεσολαβητικού του ρόλου, το Μουσείο «Γέσιου – Ο Μακεδονικός Αγώνας και η Έδεσσα» ανέπτυξε ένα δυναμικό μοντέλο μουσειοπαιδαγωγικής παρέμβασης, με έμφαση στην εισαγωγή καινοτόμων, πολυτροπικών και βιωματικών προσεγγίσεων. Η εκπαιδευτική του δράση δεν περιορίστηκε στην παθητική μετάδοση ιστορικής πληροφορίας, αλλά σχεδιάστηκε ολιστικά, ενσωματώνοντας στοιχεία ενεργητικής μάθησης, συναισθηματικής εμπλοκής και κοινωνικογνωστικής αλληλεπίδρασης, σύμφωνα με τις αρχές της κονστρουκτιβιστικής μάθησης σε μουσειακά περιβάλλοντα (Hein, 1998).

Εικόνα 3
Εφαρμογή του προγράμματος

Ο σχεδιασμός των εκπαιδευτικών προγραμμάτων οργανώθηκε με βάση τη διαθεματικότητα, την ηλικιακή καταλληλότητα και τη σύνδεση της γνώσης με τις εμπειρίες των μαθητών. Ιδιαίτερη μέριμνα δόθηκε στο μεταγνωστικό στάδιο της εκπαιδευτικής διαδικασίας, με την ενσωμάτωση εναλλακτικών μεθόδων αξιολόγησης, όπως η ανάλυση συναισθηματικών αποκρίσεων, η χρήση ψηφιακού πίνακα ανακοινώσεων (padlet), ερωτηματολογίων στάσεων, καθώς και η συμπλήρωση ερωτηματολογίου google forms.

Αυτό το παιδαγωγικό πλαίσιο ενισχύει την ανατροφοδότηση (feedback) σε πολλαπλά επίπεδα: τόσο από τους μαθητές προς τον εκπαιδευτικό και το μουσείο. Παράλληλα, η διαδικασία αυτή συμβάλλει στη συνεχή βελτίωση του περιεχομένου και της προσέγγισης των προγραμμάτων, μετατρέποντας τη μουσειακή εμπειρία σε δυναμικό πεδίο αναστοχασμού και παιδαγωγικής καινοτομίας.

Συνολικά, η μουσειοπαιδαγωγική φιλοσοφία και μάθηση που διέπει τη λειτουργία του Μουσείου Γένσιου προτάσσει μια πολιτειοκεντρική προσέγγιση της ιστορίας, όπου η τοπική μνήμη μετασχηματίζεται σε ενεργή γνώση και πολιτισμική κατανόηση. Η προσέγγιση αυτή εναρμονίζεται με τις σύγχρονες θεωρίες μουσειακής μάθησης, δίνοντας έμφαση στην εμπειρία, στη βιωματική μάθηση και στη διάδραση, στην εμπλοκή.

ΠΕΡΙΛΗΨΗ

Η παρούσα μελέτη περίπτωσης αποτελεί κομμάτι ενός ευρύτερου ερευνητικού έργου του Πανεπιστημίου Δυτικής Μακεδονίας που αφορά τον συνδυασμό καινοτόμων τεχνολογικών εργαλείων και εκπαιδευτικών μεθόδων με σκοπό τη βελτίωση των μαθησιακών αποτελεσμάτων και την ενίσχυση της διαδικασίας μάθησης.

Η έρευνα πραγματοποιήθηκε στο Τμήμα Μηχανικών Σχεδίασης Προϊόντων και Συστημάτων και αφορά τον σχεδιασμό και ανάπτυξη μιας ψηφιακής εφαρμογής σε περιβάλλον εικονικής πραγματικότητας που έχει ως στόχο να αποτελέσει ένα βοηθητικό εργαλείο εκπαίδευσης για τη διδασκαλία εικαστικών και καλλιτεχνικών κινημάτων. Η προτεινόμενη εφαρμογή εισάγει την τεχνολογία εικονικής πραγματικότητας για την εκπαίδευση φοιτητών του τμήματος πάνω στο καλλιτεχνικό κίνημα του De Stijl. Η εκπαιδευτική διαδικασία ενισχύεται αξιοποιώντας στρατηγικές μάθησης που βασίζονται στο παιχνίδι εξυπηρετώντας συγκεκριμένους εκπαιδευτικούς στόχους. Η τελική μορφή της εφαρμογής προσομοιάζει με ένα παιχνίδι εικονικής πραγματικότητας που βασίζεται στη λογική ανάπτυξης ψηφιακών εκπαιδευτικών δωματίων διαφυγής. Το εκπαιδευτικό αντικείμενο ενσωματώνεται αρμονικά στο συνολικό σχεδιασμό της εφαρμογής, μέσα από τη δημιουργία ειδικά σχεδιασμένων γρίφων όπου οι χρήστες καλούνται να επιλύσουν. Τελικός στόχος είναι μέσω της αλληλεπίδρασης με αντικείμενα του εικονικού περιβάλλοντος, οι φοιτητές να γνωρίσουν και να κατανοήσουν καλύτερα βασικά ιστορικά στοιχεία, αισθητικά κριτήρια και τις κύριες σχεδιαστικές αρχές του καλλιτεχνικού κινήματος.

Η εφαρμογή σχεδιάστηκε σύμφωνα με ένα μεθοδολογικό πλαίσιο που υιοθετεί στοιχεία από την σχεδιαστική σκέψη και δημιουργική διαδικασία για την ανάπτυξη νέων προϊόντων, έχοντας ως άξονες σχεδιασμού τις δυνατότητες χρήσης της τεχνολογίας εικονικής πραγματικότητας και την αξιοποίηση της παιχνιδοποίησης ως βασική μέθοδο μάθησης.

Η δοκιμή της εφαρμογής πραγματοποιήθηκε στο Τμήμα Μηχανικών Σχεδίασης Προϊόντων και Συστημάτων. Στην διαδικασία πρώιμης αξιολόγησης συμμετείχε ένα πρώτο δείγμα 8 φοιτητών του τμήματος. Η μεθοδολογία που ακολουθήθηκε αφορούσε τη συμπλήρωση ερωτηματολογίων και την απάντηση σε ερωτήσεις γνώσεων σχετικών με το εκπαιδευτικό αντικείμενο, πριν και μετά την χρήση της εφαρμογής.

Τα αποτελέσματα που προέκυψαν έδειξαν σημαντική βελτίωση στα μαθησιακά αποτελέσματα όσον αφορά την επίδοση των φοιτητών. Από ένα σύνολο 10 ερωτήσεων, ο μέσος όρος των σωστών απαντήσεων ήταν 6,63 πριν τη χρήση της εφαρμογής και 9,00 μετά τη χρήση της εφαρμογής (αύξηση 35,75%). Αύξηση επίσης σημειώθηκε και στην θετική άποψη των φοιτητών για την ενσωμάτωση της τεχνολογίας εικονικής πραγματικότητας στην διαδικασία μάθησης, πριν και μετά τη χρήση της εφαρμογής (αύξηση 15,15%) όπως και των εκπαιδευτικών παιχνιδιών (αύξηση 8,82%). Όσον αφορά τη συνολική εμπειρία τα αποτελέσματα έδειξαν ότι οι φοιτητές έκριναν πολύ θετικά την εμπειρία τους από τη χρήση της εφαρμογής με μέσο όρο αξιολόγησης σύμφωνα με την 5βάθμια κλίμακα του Likert, 4,5 (90%). Ως προς τον παράγοντα του ενθουσιασμού, η αξιολόγηση των φοιτητών ήταν 4,38 (87,50%). Ενώ στο κατά πόσο η εμπειρία τους φάνηκε παρακινητική και ενδιαφέρουσα, η αξιολόγηση ήταν 4,63 (92,50%).

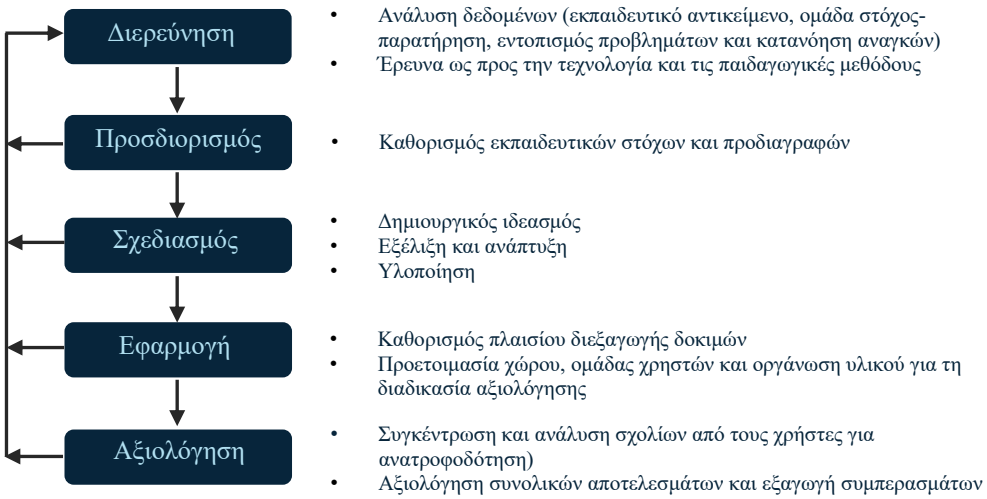
Συνολικά, τα πρώτα ευρήματα της αξιολόγησης δείχνουν μια πολύ ενθαρρυντική προοπτική για τη δημιουργία μιας ελκυστικής εκπαιδευτικής εμπειρίας που παρακινεί σημαντικά το ενδιαφέρον, και τον ενθουσιασμό των φοιτητών ως προς το εκπαιδευτικό αντικείμενο.

Η παρούσα εργασία αναμένεται να συμβάλει στη συνεχιζόμενη έρευνα στον τομέα των τεχνολογικών εξελίξεων και στην εφαρμογή καινοτόμων πρακτικών σε εκπαιδευτικά περιβάλλοντα, με στόχο τη βελτιστοποίηση της μαθησιακής εμπειρίας και των μαθησιακών αποτελεσμάτων. Διερευνά και προτείνει δημιουργικούς τρόπους συνδυασμού εργαλείων τεχνολογίας εμβύθισης και μεθοδολογιών μάθησης που βασίζονται στο παιχνίδι εστιάζοντας παράλληλα σε συγκεκριμένους εκπαιδευτικούς στόχους.

Λέξεις – κλειδιά: Μεθοδολογίες εκπαίδευσης, τεχνολογίες εμβύθισης, εικονική πραγματικότητα, παιχνιδοποίηση, σχεδιασμός προϊόντων.

ΕΙΣΑΓΩΓΗ

Η ολοένα και αυξανόμενη τάση της ενσωμάτωσης αναδυόμενων τεχνολογιών σε εκπαιδευτικά περιβάλλοντα, διαμορφώνει πλέον ένα νέο τοπίο εκπαιδευτικών απαιτήσεων για καινοτομία και δημιουργικότητα και στην τριτοβάθμια εκπαίδευση (Montés et al., 2022). Η ταχύτατη αυτή εξέλιξη των σύγχρονων τεχνολογιών προσφέρει νέες ευκαιρίες για τη δημιουργία και ενίσχυση των μαθησιακών εμπειριών. Προς αυτήν τη κατεύθυνση, οι εκπαιδευτικοί καλούνται να εντάξουν την τεχνολογική πρόκληση σε ένα δημιουργικό εκπαιδευτικό πλαίσιο το οποίο θα προσελκύσει το ενδιαφέρον των φοιτητών ενώ παράλληλα θα αποτελεί ένα αποτελεσματικό εκπαιδευτικό εργαλείο αναφορικά με την βελτίωση της μαθησιακής επίδοσης (Bertrand and Namukasa, 2023).



Η παρούσα μελέτη εντάσσεται σε μία ευρύτερη έρευνα του Τμήματος Μηχανικών Σχεδίασης Προϊόντων και Συστημάτων, του Πανεπιστημίου Δυτικής Μακεδονίας και αφορά τον συνδυασμό καινοτόμων τεχνολογικών εργαλείων και εκπαιδευτικών μεθόδων με σκοπό τη βελτίωση των μαθησιακών αποτελεσμάτων και την ενίσχυση της διαδικασίας μάθησης. Η συγκεκριμένη εργασία αφορά τον σχεδιασμό και ανάπτυξη μιας ψηφιακής εφαρμογής σε περιβάλλον εικονικής πραγματικότητας, αξιοποιώντας στρατηγικές μάθησης που βασίζονται στο παιχνίδι με στόχο να αποτελέσει ένα βοηθητικό εργαλείο εκπαίδευσης για τη διδασκαλία εικαστικών και καλλιτεχνικών κινημάτων.

ΕΙΚΟΝΙΚΗ ΠΡΑΓΜΑΤΙΚΟΤΗΤΑ ΚΑΙ ΠΑΙΧΝΙΔΟΠΟΙΗΣΗ ΣΤΗΝ ΕΚΠΑΙΔΕΥΣΗ

Η εικονική πραγματικότητα είναι ένας τύπος καθηλωτικής τεχνολογίας που προσομοιώνει διαδραστικά εικονικά περιβάλλοντα, στα οποία οι χρήστες αισθάνονται ότι είναι φυσικά παρόντες. Τα κύρια χαρακτηριστικά της είναι η αίσθηση της εμβύθισης *(immersion),* της παρουσίας *(presence)* και της διαδραστικότητας *(interactivity)* (Walsh and Pawlowski, 2002). Η αξιοποίηση της εικονικής πραγματικότητας στην εκπαίδευση μπορεί να θεωρηθεί ως μια μετασχηματιστική πλατφόρμα μάθησης που μπορεί να προσαρμοστεί για διαφορετικές παιδαγωγικές προσεγγίσεις (Tsivitanidou et al., 2021). Μπορεί να προσφέρει μια ισχυρή νοητική και γνωστική σύνδεση με το παρουσιαζόμενο εκπαιδευτικό περιεχόμενο, που θα διεγείρει και θα παρακινήσει τους εκπαιδευόμενους (Riva et al., 2007).

Από την άλλη η ενσωμάτωση στοιχείων παιχνιδιού στην εκπαιδευτική διαδικασία μπορεί να ενισχύσει τους παιδαγωγικούς στόχους. Τα εκπαιδευτικά παιχνίδια προσφέρουν ένα ιδανικό πλαίσιο για την ανάπτυξη ποικίλων δεξιοτήτων σε διαφορετικά γνωστικά αντικείμενα, ενώ ταυτόχρονα ενισχύουν την ικανότητα επίλυσης προβλημάτων, οδηγώντας τους εκπαιδευόμενους στην αναζήτηση δημιουργικών λύσεων (Giannakos, 2013). Η αξιοποίηση τεχνικών παιχνιδιού στην διαδικασία μάθησης, βοηθά σε καλύτερη αφομοίωση του περιεχομένου του μαθήματος και συμβάλλει στη δημιουργία θετικών συμπεριφορικών στάσεων (Gill et al., 2022). Οι μεθοδολογίες μάθησης που βασίζονται στο παιχνίδι, ενσωματωμένες σε περιβάλλοντα εικονικής πραγματικότητας, προσφέρουν μια ενισχυμένη και εμβυθιστική εμπειρία παιχνιδιού. Αυτός ο τύπος παιχνιδιού εικονικής πραγματικότητας εμπλέκει ενεργά τους εκπαιδευόμενους στη μαθησιακή διαδικασία, βελτιώνοντας την συνολική εμπειρία μάθησης (Udeozor et al., 2021).

Διάγραμμα 1
Προτεινόμενη μεθοδολογία.

ΜΕΘΟΔΟΛΟΓΙΑ

Το βασικό ζητούμενο στον σχεδιασμό προϊόντων αφορά την εύρεση δημιουργικών λύσεων για την επίλυση σύνθετων προβλημάτων (Kyratsis et al., 2020). Ο σχεδιασμός της εφαρμογής στη παρούσα εργασία αντιμετωπίζεται ως μία σύνθετη σχεδιαστική πρόκληση με στόχο όχι μόνο την ανάπτυξη μιας εκπαιδευτικής εφαρμογής σε περιβάλλον εικονικής πραγματικότητας αλλά τη δημιουργία μιας ελκυστικής και μαθητοκεντρικής εκπαιδευτικής εμπειρίας. Μια μεθοδολογία σχεδίασης άμεσα συνυφασμένη με τη δημιουργία νέων προϊόντων είναι η σχεδιαστική σκέψη *(Design Thinking).* Η σχεδιαστική σκέψη αναφέρεται στην ικανότητα χρήσης της δημιουργικότητας και της ανθρωποκεντρικής σκέψης για την εύρεση λύσεων και τη δημιουργία νέων ιδεών (Chon and Sim, 2019). Αποτελεί μία μεθοδολογία δημιουργικής επίλυσης προβλημάτων, η οποία εστιάζει στις ανάγκες των χρηστών. Το πιο ευρέως γνωστό μοντέλο σχεδιαστικής σκέψης είναι το μοντέλο του Stanford, και τα πιο συχνά χρησιμοποιούμενα στάδια της διαδικασίας σχεδιαστικής σκέψης είναι τα εξής: *ενσυναίσθηση (empathize), ορισμός (define), ιδεοποίηση (ideate), πρωτοτυποποίηση (prototype) και δοκιμή (test)* (Plattner, 2020).

Η προτεινόμενη μεθοδολογία υιοθετεί στοιχεία από την σχεδιαστική σκέψη *(Design Thinking)* και δημιουργική διαδικασία για την ανάπτυξη νέων προϊόντων, έχοντας ως άξονες σχεδιασμού τις δυνατότητες ενσωμάτωσης της τεχνολογίας εικονικής πραγματικότητας και την αξιοποίηση της παιχνιδοποίησης ως βασική μέθοδο μάθησης. Τα βήματα και τα επιμέρους στάδια της προτεινόμενης μεθοδολογίας αποτυπώνονται στο παρακάτω διάγραμμα (Διάγραμμα 1).

ΣΧΕΔΙΑΣΜΟΣ ΚΑΙ ΑΝΑΠΤΥΞΗ ΕΚΠΑΙΔΕΥΤΙΚΗΣ ΕΦΑΡΜΟΓΗΣ

ΔΙΕΡΕΥΝΗΣΗ:

Εκπαιδευτικό αντικείμενο: Αφορά το θεωρητικό μάθημα της Ιστορίας Design, το οποίο διδάσκεται στους φοιτητές κατά το πρώτο εξάμηνο σπουδών στο τμήμα Μηχανικών Σχεδίασης Προϊόντων και Συστημάτων. Περιλαμβάνει τη διδασκαλία σε συγκεκριμένες ιστορικές περιόδους που ξεχωρίζουν για τα σχεδιαστικά τους στυλ, τις φιλοσοφίες τους και τα ιδανικά. Στόχος του μαθήματος είναι οι φοιτητές να κατανοήσουν και να αξιολογήσουν τα διαφορετικά ιστορικά πλαίσια, ώστε να μπορούν να ερμηνεύσουν σχεδιαστικά αντικείμενα, περιβάλλοντα και συστήματα σε σχέση με τις σύγχρονες σχεδιαστικές πρακτικές. Ως αντικείμενο μάθησης στη μελέτη περίπτωσης, επιλέχτηκε το καλλιτεχνικό κίνημα ‘De Stijl’

Ομάδα στόχος: Η εφαρμογή απευθύνεται σε φοιτητές του τμήματος Μηχανικών Σχεδίασης Προϊόντων και Συστημάτων και κυρίως φοιτητές μεγαλύτερων ετών που έχουν ήδη διδαχτεί το συγκεκριμένο αντικείμενο. Πραγματοποιήθηκε παρακολούθηση του μαθήματος, συζητήσεις με φοιτητές και διδάσκοντες, όπου καταγράφηκαν τα ανάλογα σχόλια και οι παρατηρήσεις. Τα βασικά ζητήματα που εντοπίστηκαν αφορούν κυρίως την δυσκολία συγκέντρωσης των φοιτητών και την γενικότερη έλλειψη ενδιαφέροντος ως αποτέλεσμα της φυσικής και αναμενόμενης αντίδρασης τους προς τα θεωρητικά μαθήματα. Επίσης διαπιστώθηκε η ανάγκη δημιουργίας ενός πλαισίου πρακτικής αλληλεπίδρασης με το αντικείμενο του μαθήματος το οποίο θα μπορούσε να προσελκύσει περισσότερο το ενδιαφέρον των φοιτητών.

Αξιοποίηση τεχνολογίας εικονικής πραγματικότητας και παιδαγωγικών μεθόδων παιχνιδιού: Σε προηγούμενη έρευνα μας πραγματοποιήθηκε μία εκτενής βιβλιογραφική ανασκόπηση σε περιπτώσεις που αφορούσαν τους τρόπους ενσωμάτωσης διαφορετικών διαδραστικών τεχνολογιών στην εκπαίδευση σχεδιασμού προϊόντων (Nazlidou et al., 2024). Αναφορικά με την αξιοποίηση της τεχνολογίας εικονικής πραγματικότητας οι περισσότερες περιπτώσεις αφορούσαν την ενσωμάτωση της στα πλαίσια εξάσκησης των φοιτητών στη διαδικασία σχεδιασμού προϊόντων. Η εικονική πραγματικότητα μπορεί να ενταχθεί είτε στα αρχικά στάδια της διαδικασίας σχεδιασμού, είτε πιο μετά σαν μέσο οπτικοποίησης και πρωτοτυποίησης των σχεδίων, κατανόησης σύνθετων πτυχών του, αξιολόγησης διάφορων παραμέτρων και παρουσίασης του τελικού σχεδίου. Πέρα από την διαδικασία σχεδίασης συγκεκριμένων προϊόντων, η εικονική πραγματικότητα μπορεί να ενσωματωθεί και για τη διδασκαλία διαφορετικών εκπαιδευτικών αντικειμένων. Σε θεωρητικά μαθήματα η εικονική πραγματικότητα μπορεί να αποτελέσει ένα υποστηρικτικό εργαλείο μάθησης εμβυθίζοντας τους φοιτητές σε ένα προσομοιωμένο περιβάλλον όπου μπορούν να αλληλοεπιδράσουν με το μαθησιακό αντικείμενο με ποικίλους τρόπους (Cordero-Guridi et al., 2022; Zhang, 2023). Άλλες χρήσεις αφορούν την βελτίωση διάφορων τεχνικών δεξιοτήτων (Acuña and Melón, 2022; Mathur et al., 2023) ή ενίσχυση απαραίτητων ικανοτήτων στους φοιτητές όπως για παράδειγμα την ενίσχυση της χωρικής αντίληψης των φοιτητών και την ικανότητα τους να κατανοούν πολύπλοκες γεωμετρικές μορφολογίες (González, 2018). Ενδιαφέρον παρουσιάζουν οι περιπτώσεις που η τεχνολογία εικονικής πραγματικότητας συνδυάζεται με μεθόδους μάθησης που βασίζονται σε στρατηγικές παιχνιδιών (Gonzalez Almaguer et al., 2021; Gonzalez-Almaguer et al., 2022). Στις περιπτώσεις αυτές το εκπαιδευτικό αντικείμενο ενσωματώνεται μέσα σε μηχανισμούς παιχνιδιών, βοηθώντας τους φοιτητές να είναι πιο προσηλωμένοι στους στόχους

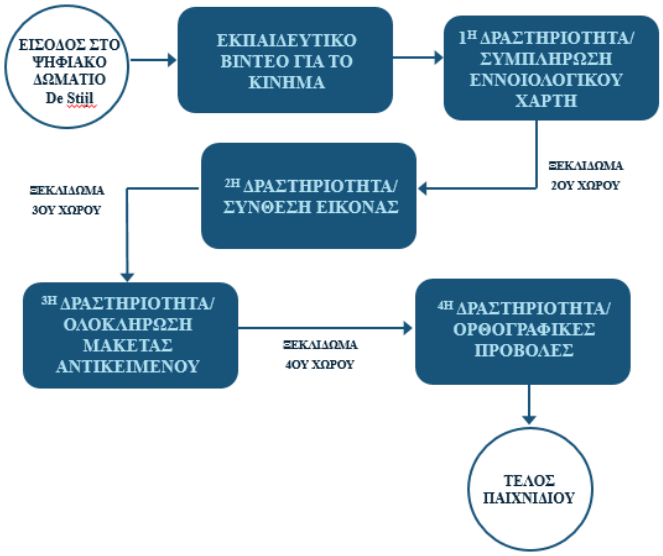
και να συμμετέχουν πιο ενεργά στη διαδικασία μάθησης. Στην έρευνα (Chandramouli et al., 2018) παρουσιάζεται μία εκπαιδευτική ενότητα για την εκπαίδευση φοιτητών σε προηγμένες διαδικασίες παραγωγής όπου το εκπαιδευτικό περιεχόμενο παρουσιάζεται μέσω στοιχείων παιχνιδιού κάνοντας την αλληλεπίδραση πιο διασκεδαστική μειώνοντας το γνωστικό φορτίο. Μία περίπτωση που επίσης σχετίζεται και με το εκπαιδευτικό αντικείμενο της παρούσας εργασίας, είναι η μελέτη των Gill et al., οι οποίοι ανέπτυξαν ένα θεωρητικό μάθημα για το καλλιτεχνικό κίνημα του Bauhaus, σε περιβάλλον εικονικής πραγματικότητας με διαδραστικές δραστηριότητες εμπλουτισμένες με στοιχεία παιχνιδοποίησης, πάζλ και γρίφους (Gill et al., 2022).

ΠΡΟΣΔΙΟΡΙΣΜΟΣ:

Ο κύριος εκπαιδευτικός στόχος της εκπαιδευτικής εφαρμογής είναι να δημιουργήσει μια διαφορετική εμπειρία μάθησης, μέσω της οποίας οι φοιτητές να κατανοήσουν καλύτερα τα βασικά ιστορικά στοιχεία, τα αισθητικά κριτήρια και τις κύριες σχεδιαστικές αρχές του καλλιτεχνικού κινήματος De Stijl. Η εκπαιδευτική εφαρμογή θα πρέπει να είναι αποτελεσματική ως προς:

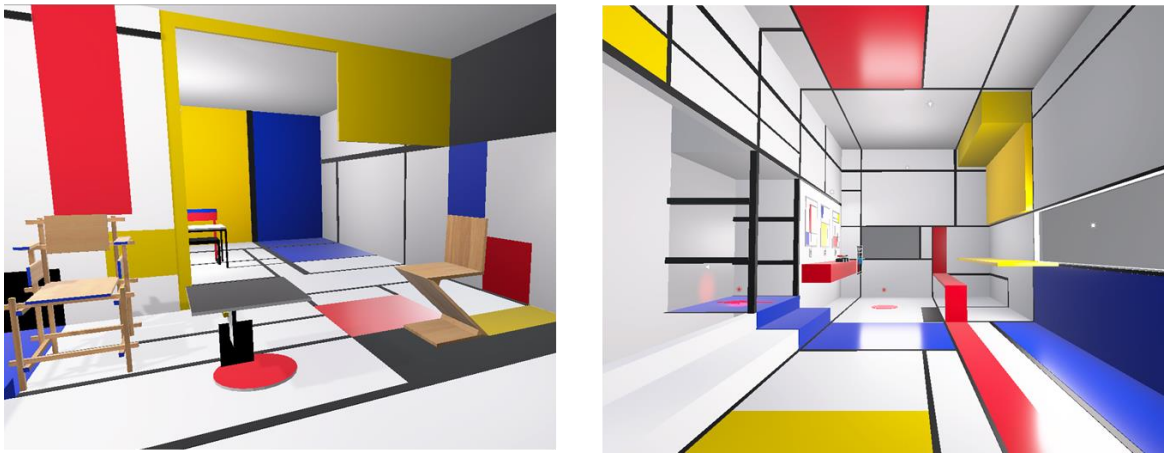
α) τη βελτίωση της μαθησιακής απόδοσης
β) την αύξηση του ενδιαφέροντος και του κινήτρου των φοιτητών
γ) την δημιουργία μιας θετικής εκπαιδευτικής εμπειρίας

ΣΧΕΔΙΑΣΜΟΣ:



Δημιουργικός Ιδεασμός: Στο αρχικό στάδιο του σχεδιασμού περιλαμβάνει μία ελεύθερη καταγραφή ιδεών με λέξεις και φράσεις που συνδέονται νοηματικά και ιεραρχικά μέσω ενός εννοιολογικού χάρτη (Εικόνα 1). Η καταγραφή περιλαμβάνει την οργάνωση των ιδεών που έχουν προκύψει από το προηγούμενο στάδιο της έρευνας και αφορά τον τρόπο διασύνδεσης των επιμέρους θεματικών γύρω από ένα ενιαίο κεντρικό πυρήνα.

Εικόνα 1
Εννοιολογικός χάρτης ιδεών.



Περιγραφή εφαρμογής: Ο σχεδιασμός της εφαρμογής ανταποκρίνεται στη λογική ανάπτυξης των ψηφιακών εκπαιδευτικών δωματίων διαφυγής. Ο χρήστης βρίσκεται εγκλωβισμένος στο παρελθόν, στη χρονική περίοδο που υπήρξε το κίνημα De Stijl. Το υλικό του εκπαιδευτικού αντικειμένου ενσωματώνεται αρμονικά μέσα σε ειδικά σχεδιασμένους γρίφους όπου ο χρήστης καλείται να επιλύσει. Η λύση κάθε γρίφου, ανοίγει έναν επιπλέον χώρο στο δωμάτιο για τον επόμενο γρίφο, μέχρι να ολοκληρωθεί το παιχνίδι. Ο χρήστης μπορεί να περιηγηθεί ελεύθερα στο χώρο χωρίς τη πίεση του χρόνου. Σκοπός είναι μέσω της αλληλεπίδρασης του με αντικείμενα του εικονικού περιβάλλοντος και να διασκεδάσει και να επιτευχθούν οι ζητούμενοι εκπαιδευτικοί στόχοι. Στην παρακάτω εικόνα αποτυπώνεται το διάγραμμα ροής του παιχνιδιού (Διάγραμμα 2).

Διάγραμμα 2
Διάγραμμα ροής παιχνιδιού

Σχεδιασμός γραφικών: Το ψηφιακό περιβάλλον μέσα στο οποίο περιηγούνται οι χρήστες αποτέλεσε κανονικό αντικείμενο σχεδιασμού κατά τη δημιουργία της εφαρμογής. Πρόθεση στον σχεδιασμό των γραφικών, δεν ήταν οι χρήστες να επισκέπτονται έναν εικονικό χώρο που απλά θα μαθαίνουν πληροφορίες για το κίνημα του De Stijl αλλά να βιώνουν την εμπειρία περιήγησης σ΄έναν περιβάλλον που ο ίδιος θα έχει σχεδιαστεί σύμφωνα με τις αρχές του κινήματος De Stijl (Εικόνα 2).

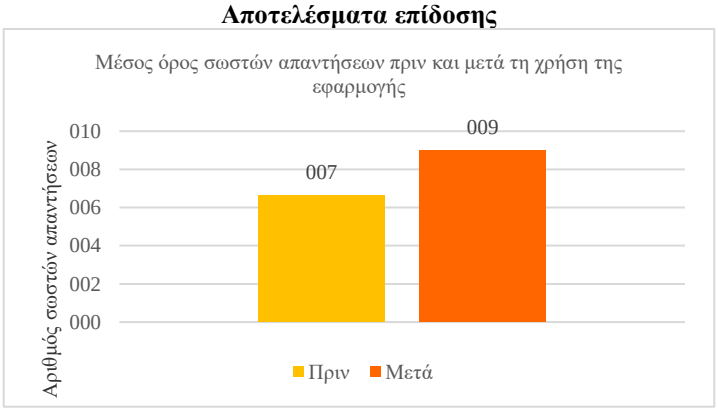
Εικόνα 2
Σχεδιασμός γραφικών

Σχεδιασμός δραστηριοτήτων: Οι δραστηριότητες που καλείται να ολοκληρώσει ο χρήστης κατά τη διάρκεια του παιχνιδιού είναι ευθυγραμμισμένες με τους μαθησιακούς στόχους και βασίζονται στη λογική της γενετικής θεωρίας μάθησης (Tobias, 2010), σύμφωνα με την οποία, οι νέες πληροφορίες ενσωματώνονται στις ήδη προϋπάρχουσες γνώσεις και τις γνωστικές διεργασίες του εκπαιδευόμενου. Όλες οι δραστηριότητες έχουν σχεδιαστεί ώστε να ανταποκρίνονται στις σχεδιαστικές αρχές του κινήματος De Stijl και αποδίδονται μέσα από γνώριμα μαθησιακά αντικείμενα που έχουν διδαχτεί οι φοιτητές κατά τη διάρκεια της φοίτησης τους στη σχολή. Πιο συγκεκριμένα, αφορούν τη συμπλήρωση εννοιολογικού χάρτη, την ικανότητα αναγνώρισης στοιχείων σύνθεσης σε εικόνα, την κατασκευή μακέτας και την κατανόηση της τρισδιάστατης γεωμετρίας μέσω των ορθογραφικών προβολών.

Υλοποίηση: Για την υλοποίηση της εφαρμογής, αξιοποιήθηκε η τεχνολογία iVR (immersive Virtual Reality) μέσω συστήματος HMD (Head-Mounted Display). Η συγκεκριμένη συσκευή φοριέται στο κεφάλι του χρήστη και

προβάλλει το εικονικό περιβάλλον με βάση τη θέση και τον προσανατολισμό της κεφαλής του. Παράλληλα, με τη χρήση ειδικών χειριστηρίων, καταγράφονται οι κινήσεις των χεριών στον ψηφιακό χώρο, επιτρέποντας την ενεργή αλληλεπίδραση με το περιβάλλον. Κατά αυτόν τον τρόπο ο εξοπλισμός παρέχει υποστήριξη με ηχητικές, απτικές και αισθητηριακές διεπαφές. Η εφαρμογή δημιουργήθηκε στο Unity3D, που αποτελεί μια πλατφόρμα ανάπτυξης παιχνιδιών και διαδραστικών εμπειριών, η οποία χρησιμοποιείται και παρέχει εκτενή υποστήριξη για VR συσκευές με κύρια γλώσσα προγραμματισμού τη C#. Ο σχεδιασμός των γραφικών πραγματοποιήθηκε με το λογισμικό μοντελοποίησης 3D αντικειμένων: Blender.

ΕΦΑΡΜΟΓΗ:



Στο επόμενο στάδιο μετά την υλοποίηση ακολούθησε η δοκιμή της εκπαιδευτικής εφαρμογής από φοιτητές του τμήματος Μηχανικών Σχεδίασης Προϊόντων και Συστημάτων, ώστε να ελεγχθεί η αποτελεσματικό της σε σχέση με τα κριτήρια αξιολόγησης. Η εφαρμογή βρίσκεται ακόμα στη 1η φάση της αξιολόγησης, όπου συμμετείχε ένα πρώτο δείγμα 8 φοιτητών. Οι δοκιμές πραγματοποιήθηκαν στους χώρους των εργαστηρίων του τμήματος. Η διαδικασία που ακολουθήθηκε είναι η εξής:

- εισαγωγική ενημέρωση των φοιτητών αναφορικά με την εκπαιδευτική εφαρμογή
- μικρή παρουσίαση για την χρήση του εξοπλισμού
- συμπλήρωση τεστ γνώσεων και ερωτηματολογίου πριν τη διεξαγωγή των δοκιμών
- χρήση της εφαρμογής από τους φοιτητές κατά τη διάρκεια των οποίων καταγράφηκαν σχόλια και παρατηρήσεις από τους ερευνητές
- συμπλήρωση τεστ γνώσεων και ερωτηματολογίου μετά την ολοκλήρωση των δοκιμών.

ΑΠΟΤΕΛΕΣΜΑΤΑ ΑΞΙΟΛΟΓΗΣΗΣ/ΣΥΜΠΕΡΑΣΜΑΤΑ

Τα τεστ γνώσεων πριν και μετά τη διεξαγωγή των δοκιμών περιελάμβαναν 10 ερωτήσεις πολλαπλής επιλογής και ήταν πανομοιότητα, καθώς ο στόχος ήταν να αξιολογηθούν οι γνώσεις των φοιτητών σχετικά με το κίνημα De Stijl και να διαπιστωθεί εάν υπήρξε βελτίωση μετά τη χρήση της εκπαιδευτικής εφαρμογής. Τα αποτελέσματα που προέκυψαν έδειξαν σημαντική βελτίωση στα μαθησιακά αποτελέσματα όσον αφορά την επίδοση των φοιτητών (Διάγραμμα 3). Ο μέσος όρος των σωστών απαντήσεων ήταν 6,63 πριν τη χρήση της εφαρμογής και 9,00 μετά τη χρήση της εφαρμογής. Σημειώθηκε αύξηση επίδοσης κατά 35,75%.

Διάγραμμα 3
Αποτελέσματα επίδοσης

Το ερωτηματολόγιο που συμπληρώθηκε πριν τις δοκιμές περιελάμβανε ερωτήσεις τύπου κλίμακας Likert αναφορικά με προηγούμενες εμπειρίες των φοιτητών με την τεχνολογία εικονικής πραγματικότητας και τα εκπαιδευτικά παιχνίδια καθώς και την άποψη τους για την ενσωμάτωση τους στην εκπαίδευση (Πίνακας 1). Αντίστοιχα το ερωτηματολόγιο που συμπληρώθηκε μετά τις δοκιμές περιέλαμβανε κάποιες κοινές ερωτήσεις και κάποιες γενικές που κατέγραφαν την συνολική εμπειρία των συμμετεχόντων από τη χρήση της εφαρμογής.

Σύμφωνα με τα αποτελέσματα, λιγότεροι από τους μισούς φοιτητές είχαν προηγούμενη εμπειρία χρήσης της τεχνολογίας εικονικής πραγματικότητας. Η άποψη τους για την ενσωμάτωση της τεχνολογίας εικονικής πραγματικότητας και των εκπαιδευτικών παιχνιδιών στην εκπαίδευση ήταν γενικά θετική και σημείωσε περεταίρω αύξηση μετά τις δοκιμές. Όσον αφορά τη συνολική εμπειρία τα αποτελέσματα έδειξαν ότι οι φοιτητές έκριναν πολύ θετικά την εκπαιδευτική εφαρμογή, με μέσο όρο αξιολόγησης σύμφωνα με την 5βάθμια κλίμακα του Likert, 4,5 (90%). Ως προς τον

παράγοντα του ενθουσιασμού, η αξιολόγηση των φοιτητών ήταν 4,38 (87,50%). Ενώ στο κατά πόσο η εμπειρία τους φάνηκε παρακινητική και ενδιαφέρουσα, η αξιολόγηση ήταν 4,63 (92,50%).

Πίνακας 1
Αποτελέσματα ερωτηματολογίων πριν και μετά τη χρήση της εφαρμογής

Ερώτηση	**Μ.Ο.**	
	Πριν	**Μετά**
Έχετε χρησιμοποιήσει και πόσο συχνά τεχνολογία εικονικής πραγματικότητας;	2,25	-
Πόσο θεωρείτε ότι μπορεί να συμβάλει θετικά η τεχνολογία εικονικής πραγματικότητας στην εκπαίδευση;	4,13	4,75
Πόσο θεωρείτε ότι τα εκπαιδευτικά παιχνίδια μπορούν να συμβάλουν θετικά στη μάθηση;	4,38	4,75
Πόσο θεωρείτε ότι τα εκπαιδευτικά παιχνίδια σε περιβάλλον εικονικής πραγματικότητας μπορούν να συμβάλουν θετικά στη μάθηση;	4,25	4,63
Πως θα χαρακτηρίζατε τη συνολική εμπειρία σας από τη χρήση της εφαρμογής;	-	4,50
Πόσο θεωρείτε ότι μπορεί να σας ενθουσίασε η χρήση της εφαρμογής;	-	4,38
Πόσο θεωρείτε ότι η διαδικασία μάθησης μέσω της εφαρμογή γίνεται πιο παρακινητική και ενδιαφέρουσα;	-	4,63

Σύμφωνα με τα αποτελέσματα, λιγότεροι από τους μισούς φοιτητές είχαν προηγούμενη εμπειρία χρήσης της τεχνολογίας εικονικής πραγματικότητας. Η άποψη τους για την ενσωμάτωση της τεχνολογίας εικονικής πραγματικότητας και των εκπαιδευτικών παιχνιδιών στην εκπαίδευση ήταν γενικά θετική και σημείωσε περεταίρω αύξηση μετά τις δοκιμές. Όσον αφορά τη συνολική εμπειρία τα αποτελέσματα έδειξαν ότι οι φοιτητές έκριναν πολύ θετικά την εκπαιδευτική εφαρμογή, με μέσο όρο αξιολόγησης σύμφωνα με την 5βάθμια κλίμακα του Likert, 4,5 (90%). Ως προς τον παράγοντα του ενθουσιασμού, η αξιολόγηση των φοιτητών ήταν 4,38 (87,50%). Ενώ στο κατά πόσο η εμπειρία τους φάνηκε παρακινητική και ενδιαφέρουσα, η αξιολόγηση ήταν 4,63 (92,50%).

Τα σχόλια των φοιτητών κατά τη διάρκεια των δοκιμών ήταν γενικά θετικά. Παρατηρήθηκε ότι υπήρξε αυξημένο ενδιαφέρον και ανταπόκριση από όλους τους φοιτητές για την συμμετοχή τους στην έρευνα. Οι περισσότερες ερωτήσεις που σημειώθηκαν αφορούσαν κατά κύριο λόγο την χρήση του εξοπλισμού και τη δυσκολία προσαρμογής στο περιβάλλον εικονικής πραγματικότητας. Συνολικά, τα πρώτα ευρήματα της αξιολόγησης δείχνουν μια πολύ ενθαρρυντική προοπτική για τη δημιουργία μιας ελκυστικής εκπαιδευτικής εμπειρίας που παρακινεί σημαντικά το ενδιαφέρον, και τον ενθουσιασμό των φοιτητών ως προς το εκπαιδευτικό αντικείμενο.

Για την ολοκλήρωση αξιολόγησης της εφαρμογής σε επόμενο στάδιο, θα χρησιμοποιηθεί μεγαλύτερο δείγμα φοιτητών ώστε να ενσωματωθούν περισσότερα δεδομένα, που σχετίζονται με την αποτελεσματικότητα της ως εργαλείο βελτίωσης της μαθησιακής απόδοσης. Επίσης θα αξιολογηθεί ως προς επιπλέον ποιοτικά κριτήρια και παρακινητικούς παράγοντες που θα κρίνουν την συνολική εμπειρία και στάση των χρηστών απέναντι στην εφαρμογή. Τέλος σε επόμενη φάση, η εφαρμογή πρόκειται να ενισχυθεί περεταίρω με την προσθήκη και άλλων καλλιτεχνικών κινημάτων για τον εμπλουτισμό της εκπαιδευτικής εμπειρίας όσον αφορά το συγκεκριμένο εκπαιδευτικό αντικείμενο.

ΟΤΑΝ Η ΙΣΤΟΡΙΑ ΓΙΝΕΤΑΙ ΠΑΙΧΝΙΔΙ: ΑΞΙΟΠΟΙΩΝΤΑΣ ΤΗΝ ΤΕΧΝΗΤΗ ΝΟΗΜΟΣΥΝΗ ΚΑΙ ΤΗΝ ΠΑΙΧΝΙΔΟΠΟΙΗΣΗ ΣΤΟ ΜΑΘΗΜΑ ΤΗΣ ΙΣΤΟΡΙΑΣ

Δρ. Ευάγγελος Σίτας
Εκπαιδευτικός ΠΕ02
1ο Γυμνάσιο Νεοχωρίου - ΔΔΕ Αιτωλοακαρνανίας, Ελλάδα
e-mail: vagsit@gmail.com

ΠΕΡΙΛΗΨΗ

Ανέκαθεν η πλειονότητα των μαθητών υποστηρίζει ότι η Ιστορία είναι ένα δύσκολο μάθημα και πως η επιτυχία έρχεται μέσα από την αποστήθιση της διδακτέας ύλης. Στην παρούσα εργασία προτείνεται ένας νέος τρόπος προσέγγισης που έχει ως στόχο να βελτιώσει την εμπλοκή των μαθητών απελευθερώνοντας τους από τα δεσμά της μετωπικής αφήγησης και της αποστήθισης. Θα προτείνουμε μεθόδους για την ενσωμάτωση της ΤΝ σε παιχνιδοποιημένες δραστηριότητες διδασκαλίας και θα εξετάσουμε κατά πόσο η χρήση αυτών των μηχανισμών μπορεί να βελτιώσει την εμπλοκή των μαθητών και τη γνωστική τους απόδοση σε σύγκριση με παραδοσιακές μεθόδους διδασκαλίας.

Αρχικά, αναλύθηκαν οι ανάγκες των μαθητών και καθορίστηκαν οι εκπαιδευτικοί στόχοι. Έπειτα σχεδιάστηκαν οι παιχνιδοποιημένες δραστηριότητες. Με τη βοήθεια της τεχνητής νοημοσύνης προσαρμόσαμε και βελτιώσαμε τις υπάρχουσες δραστηριότητες. Δυο ομάδες μαθητών συμμετείχαν στην έρευνα και ο διαχωρισμός τους σε πειραματική ομάδα και ομάδα ελέγχου έγινε τυχαία. Συγκρίναμε τα αποτελέσματα των ομάδων με χρήση διαγνωστικών και τελικών αξιολογήσεων. Η πιλοτική εφαρμογή έδειξε αυξημένη εμπλοκή και βελτιωμένη απόδοση των μαθητών σε σύγκριση με παραδοσιακές μεθόδους.

Τα τελευταία χρόνια, η παιχνιδοποίηση έχει αναδειχθεί ως μια σύγχρονη παιδαγωγική προσέγγιση, που στην πιο απλή της εκδοχή, χρησιμοποιώντας δηλαδή προκλήσεις, ανταμοιβές και πίνακες κατάταξης, έχει αποδειχθεί ότι μπορεί να βελτιώσει την μαθησιακή εμπειρία. Σήμερα, η τεχνητή νοημοσύνη συνιστά ίσως μια από τις μεγαλύτερες τάσεις στο χώρο της ψηφιακής τεχνολογίας και ολοένα εξελίσσεται ως η τεχνολογία του μέλλοντος φέρνοντας επανάσταση τόσο στον τρόπο που διδάσκουμε όσο και στον τρόπο που μαθαίνουμε. Ο συνδυασμός αυτών των δύο μπορεί να προσφέρει σημαντικά οφέλη στην εκπαίδευση γενικότερα και στην διδασκαλία της ιστορίας ειδικότερα..

Λέξεις – κλειδιά: παιχνιδοποίηση, τεχνητή νοημοσύνη, διδασκαλία ιστορίας, καινοτόμες παιδαγωγικές προσεγγίσεις.

ΕΙΣΑΓΩΓΗ

Η διδασκαλία της Ιστορίας στη δευτεροβάθμια εκπαίδευση αντιμετωπίζει διαχρονικά προκλήσεις που σχετίζονται με τη χαμηλή εμπλοκή των μαθητών και τη δυσκολία σύνδεσης των ιστορικών γνώσεων με τις προσωπικές τους εμπειρίες. Πολλοί μαθητές αντιλαμβάνονται το μάθημα ως αποστήθιση αποκομμένων γεγονότων και ημερομηνιών, χωρίς αφήγηση ή κριτική επεξεργασία (Wineburg, 2001, p. 65). Η τάση αυτή περιορίζει την ενεργό συμμετοχή και τη νοηματοδότηση της ιστορικής γνώσης.

Σύγχρονες παιδαγωγικές προσεγγίσεις υπογραμμίζουν τη σημασία της ενεργητικής, βιωματικής μάθησης, κατά την οποία ο μαθητής αποκτά γνώση μέσα από την εμπειρία και τη στοχαστική ενασχόληση με πραγματικά προβλήματα (Kolb, 1984, p. 38). Εντός αυτού του πλαισίου, ιδιαίτερο ενδιαφέρον παρουσιάζει ο συνδυασμός δύο καινοτόμων μεθόδων: της παιχνιδοποίησης και της τεχνητής νοημοσύνης (ΤΝ), που αξιοποιούνται όλο και περισσότερο σε σύγχρονα περιβάλλοντα μάθησης.

Η παιχνιδοποίηση μεταφέρει χαρακτηριστικά των παιχνιδιών όπως για παράδειγμα οι πόντοι, οι προκλήσεις και οι επιβραβεύσεις στο εκπαιδευτικό περιβάλλον, ενισχύοντας την εσωτερική παρακίνηση, την περιέργεια και τη γνωστική δέσμευση (Gee, 2007, pp. 19–21). Πλήθος μελετών επιβεβαιώνουν τη θετική της συμβολή στην ενίσχυση της εμπλοκής και των επιδόσεων των μαθητών (Deterding et al., 2011, p. 10). Παράλληλα, η ΤΝ προσφέρει δυναμικά, διαδραστικά μαθησιακά περιβάλλοντα, υποστηρίζοντας την εξατομίκευση της διδασκαλίας, την αυτόματη προσαρμογή της δυσκολίας και την παροχή προσωποποιημένης ανατροφοδότησης (Luckin et al., 2016, p. 6). Εφαρμογές όπως οι διάλογοι με ιστορικές προσωπικότητες μέσω γενετικών γλωσσικών μοντέλων (π.χ. ChatGPT) αναδεικνύουν τις δυνατότητες της ΤΝ για προσομοίωση, αφήγηση και κριτική επεξεργασία του ιστορικού παρελθόντος (Holmes et al., 2021, p. 3).

Ο συνδυασμός παιχνιδοποίησης και ΤΝ οδηγεί στη διαμόρφωση ενός υβριδικού παιδαγωγικού μοντέλου, το οποίο μετατρέπει τη μάθηση της Ιστορίας σε μια εμπειρία «παιχνιδιού σκέψης». Η παιχνιδοποίηση λειτουργεί ως μηχανισμός ενεργοποίησης, ενώ η ΤΝ προσφέρει προσαρμοστική υποστήριξη και ευκαιρίες για διερευνητική μάθηση (Bruner, 1996, pp. 43–45; Vygotsky, 1978, p. 86). Η προσέγγιση αυτή εδράζεται σε θεωρίες όπως ο εποικοδομισμός (Piaget, 1952, Vygotsky, 1978), η βιωματική μάθηση (Kolb, 1984), η αυτοκαθοριζόμενη παρακίνηση (Deci & Ryan, 2000) και η εκπαιδευτική ευθυγράμμιση (Biggs & Tang, 2011), που τονίζουν τη σημασία της ενεργού εμπλοκής και της σύνδεσης στόχων, δραστηριοτήτων και αξιολόγησης.

Η παρούσα μελέτη διερευνά πώς ο συνδυασμός παιχνιδοποίησης και ΤΝ επηρεάζει την εμπλοκή, τις επιδόσεις και τη στάση των μαθητών απέναντι στη διδασκαλία της Ιστορίας. Εστιάζει στην ενίσχυση της νοηματοδοτημένης και βιωματικής μάθησης μέσω τεχνολογικά υποστηριζόμενων στρατηγικών. Παρά την αυξανόμενη έρευνα για τις δύο αυτές τεχνολογίες ξεχωριστά, η συνδυαστική τους εφαρμογή στο μάθημα της Ιστορίας παραμένει ελλιπώς διερευνημένη. Η παρούσα εργασία στοχεύει να καλύψει αυτό το ερευνητικό κενό, προτείνοντας ένα παιδαγωγικά τεκμηριωμένο, καινοτόμο και εφαρμοσμένο μοντέλο διδασκαλίας.

ΜΕΘΟΔΟΛΟΓΙΑ ΚΑΙ ΠΕΡΙΓΡΑΦΗ ΤΗΣ ΠΑΡΕΜΒΑΣΗΣ

Δεδομένου ότι τα σχολικά τμήματα είχαν ήδη διαμορφωθεί από τη σχολική μονάδα, η επιλογή των ομάδων έγινε με βάση τις υπάρχουσες συνθήκες και όχι μέσω τυχαίας κατανομής. Συνεπώς, η παρούσα μελέτη ακολούθησε σχέδιο προ-τεστ/μετά-τεστ με ομάδα ελέγχου στο πλαίσιο ενός σχεδιασμού quasi-experimental (Creswell & Creswell, 2018). Συμμετείχαν είκοσι (20) μαθητές της Γ΄ τάξης Γυμνασίου από δύο παράλληλα τμήματα της ίδιας σχολικής μονάδας. Ένα τμήμα ορίστηκε ως πειραματική ομάδα, όπου εφαρμόστηκε η διδακτική παρέμβαση με στοιχεία παιχνιδοποίησης και τεχνητής νοημοσύνης, ενώ το άλλο αποτέλεσε την ομάδα ελέγχου, στην οποία εφαρμόστηκε παραδοσιακή διδασκαλία.

Για τη διασφάλιση της αρχικής ομοιογένειας των ομάδων (Fraenkel et al., 2012), διεξήχθη προκαταρκτικό διαγνωστικό τεστ. Η μεθοδολογική αυτή επιλογή ενίσχυσε την αξιοπιστία της σύγκρισης, επιτρέποντας οι ενδεχόμενες διαφορές στα μαθησιακά αποτελέσματα να αποδοθούν στην εκπαιδευτική παρέμβαση και όχι σε προϋπάρχουσες διαφορές μεταξύ των ομάδων.

Η παρέμβαση περιλάμβανε τον σχεδιασμό και την εφαρμογή ενός ψηφιακού μαθησιακού περιβάλλοντος εμπλουτισμένου, με στοιχεία παιχνιδοποίησης και τεχνητής νοημοσύνης (Shute & Ke, 2012; Holmes et al., 2021). Στο πλαίσιο της παιχνιδοποίησης, το περιβάλλον ενσωμάτωνε σύστημα πόντων, επιπέδων και επιβραβεύσεων που ανταμείβουν την ολοκλήρωση δραστηριοτήτων. Παράλληλα, υπήρχε πίνακας κατάταξης όπου οι μαθητές μπορούσαν να παρακολουθούν την πρόοδό τους. Η κάθε διδακτική ενότητα είχε σχεδιαστεί ως «κεφάλαιο» μιας αφηγηματικής περιπέτειας, στην οποία οι μαθητές αναλάμβαναν ρόλους και εκπλήρωναν αποστολές εμπνευσμένες από ιστορικά γεγονότα.

Η τεχνητή νοημοσύνη αξιοποιήθηκε μέσω δύο βασικών εργαλείων: ενός chatbot και ενός προσαρμοστικού συστήματος κουίζ. Το chatbot βασίστηκε σε σύγχρονο γλωσσικό μοντέλο TN (παρόμοιο με το ChatGPT) και χρησιμοποιήθηκε μέσω του διαδραστικού πίνακα της τάξης. Ο εκπαιδευτικός είχε προσχεδιάσει την αλληλεπίδραση με το chatbot μέσω κατάλληλων προτροπών (prompts), που παρείχαν ιστορικό πλαίσιο, αφηγηματικά στοιχεία και ρόλους ιστορικών προσώπων. Οι μαθητές μπορούσαν να του απευθύνουν ερωτήσεις σχετικά με το περιεχόμενο της ενότητας ή να εμπλακούν σε προσομοιωμένους διαλόγους, «συνεντεύξεις» ή σεναριακές αλληλεπιδράσεις με πρόσωπα του παρελθόντος.

Παράλληλα, το προσαρμοστικό σύστημα κουίζ λειτουργούσε ως εργαλείο αυτοαξιολόγησης, προσαρμόζοντας τη δυσκολία των ερωτήσεων βάσει της απόδοσης κάθε μαθητή. Οι μαθητές λάμβαναν άμεση και εξατομικευμένη ανατροφοδότηση, με προτάσεις για επανάληψη ή ενίσχυση όπου κρινόταν απαραίτητο (Shute, 2008). Επιπλέον, στο περιβάλλον είχαν ενσωματωθεί προγραμματισμένα «μυστικά μπόνους», σχεδιασμένα από τον εκπαιδευτικό, τα οποία ενεργοποιούνταν από συγκεκριμένους συνδυασμούς σωστών απαντήσεων ή ενεργειών. Η προσθήκη αυτή είχε στόχο να ενισχύσει την περιέργεια, το ενδιαφέρον και την εξερεύνηση, στοιχεία που είναι κρίσιμα στην καλλιέργεια εσωτερικής παρακίνησης.

Η διδακτική παρέμβαση διήρκεσε οκτώ εβδομάδες. Κατά την πρώτη εβδομάδα, πραγματοποιήθηκε το αρχικό διαγνωστικό τεστ (pre-test) και διανεμήθηκε ερωτηματολόγιο μέτρησης του ενδιαφέροντος και της εμπλοκής των μαθητών. Στις επόμενες έξι εβδομάδες εφαρμόστηκε η κύρια φάση της παρέμβασης. Η πειραματική ομάδα εργάστηκε στο ψηφιακό περιβάλλον με στοιχεία παιχνιδοποίησης και τεχνητής νοημοσύνης, ενώ η ομάδα ελέγχου διδάχθηκε την ίδια ύλη με παραδοσιακές μεθόδους. Ο διδάσκων εκπαιδευτικός ήταν κοινός και για τις δύο ομάδες, γεγονός που επέτρεψε τον έλεγχο της μεταβλητής της διδακτικής επάρκειας και συνέπειας. Την όγδοη εβδομάδα διεξήχθη το post-test και επαναλήφθηκε το ερωτηματολόγιο εμπλοκής.

Η συλλογή δεδομένων περιλάμβανε ποσοτικά και ποιοτικά στοιχεία. Τα ποσοτικά δεδομένα περιλάμβαναν τις επιδόσεις των μαθητών στα τεστ και τα κουίζ, καθώς και δείκτες εμπλοκής όπως ο χρόνος ενασχόλησης και η συχνότητα συμμετοχής. Για την πειραματική ομάδα, τα δεδομένα καταγράφηκαν αυτόματα από την πλατφόρμα, ενώ για την ομάδα ελέγχου βασίστηκαν σε παρατηρήσεις. Παράλληλα, διεξήχθησαν ημιδομημένες συνεντεύξεις με δείγμα μαθητών από κάθε ομάδα και τηρήθηκε ημερολόγιο παρατηρήσεων από τον εκπαιδευτικό.

Η ανάλυση των ποσοτικών δεδομένων πραγματοποιήθηκε με ελέγχους t-test για ανεξάρτητα και εξαρτημένα δείγματα, καθώς και με ανάλυση συσχετίσεων Pearson. Για τα ποιοτικά δεδομένα εφαρμόστηκε θεματική ανάλυση, μέσω της οποίας κωδικοποιήθηκαν οι απαντήσεις των μαθητών και αναδείχθηκαν τάσεις σχετικά με το ενδιαφέρον, τη συμμετοχή και τις αντιλήψεις τους για την παρέμβαση. Όλες οι διαδικασίες διεξήχθησαν τηρώντας τις ηθικές αρχές της ανωνυμίας και της εθελοντικής συμμετοχής, με προηγούμενη συγκατάθεση των γονέων.

Στο πλαίσιο της διδακτικής παρέμβασης αναπτύχθηκαν και εφαρμόστηκαν τρία αντιπροσωπευτικά διδακτικά σενάρια που ενσωμάτωναν την παιχνιδοποίηση και την τεχνητή νοημοσύνη, με σκοπό την ενίσχυση της βιωματικής μάθησης, της συνεργατικής εργασίας και της ενεργούς συμμετοχής των μαθητών.

Στο πρώτο σενάριο, οι μαθητές εργάστηκαν ομαδικά για να ετοιμάσουν ερωτήσεις και να «συνομιλήσουν» με ιστορικές προσωπικότητες, όπως ο Ιωάννης Καποδίστριας, μέσω ενός chatbot βασισμένου σε τεχνητή νοημοσύνη (Holmes et al., 2021; Zawacki-Richter et al., 2019). Αφού μελέτησαν το ιστορικό πλαίσιο και τον ρόλο κάθε προσώπου, σχεδίασαν ερωτήσεις που εμβάθυναν σε ιστορικά γεγονότα, προσωπικά διλήμματα και κοινωνικές συγκρούσεις της εποχής. Οι απαντήσεις του ψηφιακού βοηθού έδιναν την ευκαιρία για διάλογο και ερμηνεία, και συχνά γεννούσαν συζήτηση μέσα στην τάξη σχετικά με την ιστορική αξιοπιστία και τη νοηματοδότηση του παρελθόντος. Η παιχνιδοποίηση υποστηρίχθηκε μέσω πόντων (Ryan & Deci, 2000) για την πρωτοτυπία των ερωτήσεων και την ακρίβεια των συμπερασμάτων, καθώς και με τη χορήγηση του εμβλήματος «Ιστορικός Ερευνητής» σε ομάδες που επέδειξαν αυξημένη ικανότητα κριτικής ανάλυσης.

Το δεύτερο σενάριο αφορούσε τη συμμετοχή των μαθητών σε ένα διαδραστικό, προσαρμοστικό ιστορικό quiz. Η δραστηριότητα υλοποιήθηκε σε προσαρμοσμένο ψηφιακό περιβάλλον, βασισμένο σε Moodle με προσθήκες quiz, το οποίο υποστήριζε την παροχή ανατροφοδότησης και την προσαρμογή της δυσκολίας των ερωτήσεων (Keller, 2008). Όσο οι μαθητές απαντούσαν σωστά, το σύστημα παρήγαγε πιο απαιτητικές ερωτήσεις, ενώ σε περιπτώσεις δυσκολίας, ενεργοποιούνταν βοηθητικά hints. Η πλατφόρμα παρουσίαζε σταδιακά νέες ενότητες ως «πίστες» και η πρόοδος καταγραφόταν σε leaderboard, ενισχύοντας τη διάθεση συμμετοχής. Στόχος ήταν να ενισχυθεί η κατανόηση και η ενεργή εμπλοκή μέσα από ένα δυναμικό μαθησιακό παιχνίδι γνώσεων. Η παιχνιδοποίηση περιλάμβανε πόντους, προσωπικά επιτεύγματα και προαιρετικά σήματα διάκρισης για συνέπεια ή βελτίωση.

Στο τρίτο σενάριο, οι μαθητές ανέλαβαν να δημιουργήσουν εικόνες με τη βοήθεια ενός εργαλείου τεχνητής νοημοσύνης (Mayer, 2009), επιλέγοντας μια συγκεκριμένη ιστορική περίοδο ή γεγονός. Η κάθε ομάδα δημιουργούσε μία εικόνα (π.χ. μια σκηνή από τη μάχη των Θερμοπυλών ή από την καθημερινή ζωή στο Βυζάντιο) και την παρουσίαζε στις υπόλοιπες ομάδες χωρίς να αποκαλύψει το πλαίσιο. Οι υπόλοιποι προσπαθούσαν να μαντέψουν την ιστορική περίοδο και το γεγονός, τεκμηριώνοντας την άποψή τους με βάση ενδυμασία, σκηνικό και σύμβολα. Ακολουθούσε συζήτηση και διόρθωση, με έμφαση στη σύνδεση οπτικών στοιχείων και ιστορικής πληροφορίας. Η παιχνιδοποίηση ενισχύθηκε με βαθμούς για σωστή τεκμηρίωση, και η ομάδα με τις περισσότερες εύστοχες αναγνωρίσεις ή την πιο δημιουργική παρουσίαση λάμβανε το ψηφιακό σήμα «Ιστορικός Ντετέκτιβ».

Κοινό χαρακτηριστικό των τριών σεναρίων αποτέλεσε η ενεργός συμμετοχή των μαθητών ως πρωταγωνιστών της μαθησιακής διαδικασίας. Αντί να περιορίζονται στον ρόλο του παθητικού δέκτη γνώσης, οι μαθητές ανέλαβαν ρόλους παίκτη, ερευνητή, δημοσιογράφου και συνεργάτη, εμπλεκόμενοι σε διαδικασίες λήψης αποφάσεων, επίλυσης προβλημάτων και αλληλεπίδρασης με ένα δυναμικό μαθησιακό περιβάλλον. Η χρήση της τεχνητής νοημοσύνης ενίσχυσε την εξατομίκευση της μάθησης και την ανάπτυξη της κριτικής σκέψης, ενώ η παιχνιδοποίηση αύξησε το ενδιαφέρον, την περιέργεια και το εσωτερικό κίνητρο των μαθητών. Η παιδαγωγική αυτή προσέγγιση ευθυγραμμίζεται με τις αρχές της ενεργού και βιωματικής μάθησης και ανταποκρίνεται στις σύγχρονες θεωρίες παρακίνησης και συνεργατικής εκπαίδευσης (Ryan & Deci, 2000; Keller, 2008) . Όπως θα αναδειχθεί και στην ανάλυση των αποτελεσμάτων που ακολουθεί, η εφαρμογή αυτών των καινοτόμων σεναρίων συσχετίστηκε με σημαντικές βελτιώσεις τόσο στις μαθησιακές επιδόσεις όσο και στις στάσεις των μαθητών απέναντι στο μάθημα της Ιστορίας.

ΑΝΑΛΥΣΗ ΚΑΙ ΕΡΜΗΝΕΙΑ ΔΕΔΟΜΕΝΩΝ

Μετά την ολοκλήρωση της διδακτικής παρέμβασης, τα δεδομένα που συλλέχθηκαν αναλύθηκαν ποσοτικά και ποιοτικά, με στόχο να διερευνηθούν οι διαφορές μεταξύ της πειραματικής ομάδας (παιχνιδοποίηση και τεχνητή νοημοσύνη) και της ομάδας ελέγχου, καθώς και η εσωτερική εξέλιξη κάθε ομάδας από το προ-τεστ στο μετά-τεστ.

Τα αποτελέσματα του τελικού τεστ (post-test) στην ύλη της Ιστορίας ανέδειξαν σαφή υπεροχή της πειραματικής ομάδας έναντι της ομάδας ελέγχου. Η μέση επίδοση της πειραματικής ομάδας διαμορφώθηκε στο 81% (με τυπική απόκλιση ≈6,5%), ενώ η ομάδα ελέγχου σημείωσε μέση βαθμολογία 71% (ΤΑ ≈7,2%). Η διαφορά των 10 ποσοστιαίων μονάδων κρίθηκε στατιστικά σημαντική με βάση τον έλεγχο t-test για ανεξάρτητα δείγματα ($t(23) \approx 2.18$, $p < 0.05$), γεγονός που ενισχύει την υπόθεση ότι η εφαρμογή της εκπαιδευτικής παρέμβασης συνέβαλε θετικά στη μαθησιακή πρόοδο.

Αξίζει να σημειωθεί ότι στο αρχικό διαγνωστικό τεστ (pre-test), οι δύο ομάδες είχαν παρόμοια απόδοση, με μέσο όρο περίπου 62% και για τις δύο. Παρότι οι μέσοι όροι των δύο ομάδων ήταν παρόμοιοι, υπήρχαν μικρές διαφοροποιήσεις στην κατανομή των επιμέρους επιδόσεων, γεγονός που ενισχύει τη μεθοδολογική αξιοπιστία της παρέμβασης. Η αριθμητική σύμπτωση στον μέσο όρο υποδηλώνει ότι οι ομάδες ξεκίνησαν από παρόμοιο επίπεδο γνώσεων, καθιστώντας τις παρατηρούμενες μεταβολές στο post-test πιο εύλογα αποδιδόμενες στην επίδραση της διδακτικής προσέγγισης και όχι σε εξωτερικούς παράγοντες. Μετά την παρέμβαση, η πειραματική ομάδα εμφάνισε μέση βελτίωση περίπου 19 ποσοστιαίων μονάδων, έναντι 9 μονάδων της ομάδας ελέγχου. Η στατιστική ανάλυση εντός ομάδων με paired t-test επιβεβαίωσε τη σημαντική βελτίωση (Creswell & Creswell, 2018; Cohen, Manion, & Morrison, 2017) της πειραματικής ομάδας ($p < 0.01$), ενώ και η ομάδα ελέγχου παρουσίασε βελτίωση ($p < 0.05$), αλλά με μικρότερο εύρος και ένταση.

Πίνακας 1
Σύγκριση Απόδοσης Πειραματικής και Ομάδας Ελέγχου

Φάση	**Ομάδα**	**Μέσος Όρος (%)**
Pre-test	Πειραματική	62
Post-test	Πειραματική	81
Pre-test	Έλεγχος	62
Post-test	Έλεγχος	71

Το γράφημα που συνοδεύει την ενότητα (Πίνακας 1) απεικονίζει τη σύγκριση των μέσων όρων πριν και μετά την παρέμβαση. Φαίνεται καθαρά ότι, ενώ οι δύο ομάδες ξεκίνησαν από παρόμοια αφετηρία, μόνο η πειραματική ομάδα σημείωσε αισθητή πρόοδο άνω των 15 ποσοστιαίων μονάδων.

Τα ευρήματα αυτά συνάδουν με αντίστοιχα αποτελέσματα της διεθνούς βιβλιογραφίας που τεκμηριώνουν τη θετική επίδραση της παιχνιδοποίησης και της τεχνολογικά υποστηριζόμενης μάθησης. Για παράδειγμα, έρευνες σε μαθητικό πληθυσμό Δευτεροβάθμιας Εκπαίδευσης έχουν δείξει ότι η ενσωμάτωση ψηφιακών εργαλείων και προσαρμοστικής αξιολόγησης οδηγεί σε βελτίωση των επιδόσεων, της αυτοπεποίθησης και της ενεργούς εμπλοκής (Huang et al., 2020). Η παρούσα μελέτη προσθέτει σε αυτή τη συζήτηση, προτείνοντας ένα παιδαγωγικά τεκμηριωμένο μοντέλο μάθησης που συνδυάζει την τεχνητή νοημοσύνη με την εκπαιδευτική παιχνιδοποίηση.

Η ανάλυση των δεικτών εμπλοκής ανέδειξε επίσης ουσιώδεις διαφορές μεταξύ των δύο ομάδων. Σύμφωνα με τα δεδομένα καταγραφής της ψηφιακής πλατφόρμας, οι μαθητές της πειραματικής ομάδας αφιέρωσαν, κατά μέσο όρο, περίπου 45 λεπτά περισσότερα την εβδομάδα σε δραστηριότητες σχετικές με την Ιστορία πέρα από τον τυπικό διδακτικό χρόνο. Αντίθετα, οι μαθητές της ομάδας ελέγχου αφιέρωσαν περίπου 20 λεπτά, κυρίως για εργασία στο σπίτι ή μελέτη.

Σε σχετική ερώτηση του τελικού ερωτηματολογίου, 10 από τους 13 μαθητές της πειραματικής ομάδας (περίπου 77%) δήλωσαν ότι τα παιχνιδοποιημένα στοιχεία και τα εργαλεία τεχνητής νοημοσύνης ενίσχυσαν το ενδιαφέρον, την εμπλοκή και την απόδοσή τους. Αντίστοιχα, στην ομάδα ελέγχου, 5 από τους 12 μαθητές (ποσοστό 42%) χαρακτήρισαν το μάθημα «πολύ ενδιαφέρον», ενώ το αντίστοιχο ποσοστό στην πειραματική ομάδα ανήλθε σε 62%.

Η βαθμολογία ενδιαφέροντος/εμπλοκής σε πενταβάθμια κλίμακα Likert ήταν κατά μέσο όρο 4.3/5 για την πειραματική ομάδα και 3.0/5 για την ομάδα ελέγχου, γεγονός που αποτυπώνει την υψηλότερη συναισθηματική και γνωστική επένδυση των μαθητών στο καινοτόμο περιβάλλον.

Οι ποιοτικές παρατηρήσεις επιβεβαίωσαν τα ποσοτικά ευρήματα: οι μαθητές της πειραματικής ομάδας έδειξαν αυξημένη προθυμία για συμμετοχή, αναζητούσαν πρόσθετες αποστολές, και αλληλεπιδρούσαν ενεργά με τον chatbot. Στην ομάδα ελέγχου, η συμμετοχή περιοριζόταν κυρίως σε λίγους, ήδη δραστήριους μαθητές. Χαρακτηριστικές είναι οι μαρτυρίες που καταγράφηκαν. Ένας μαθητής της πειραματικής ομάδας δήλωσε: *«Κάθε μέρα ανυπομονούσα να δω τι νέο θα έχει το "παιχνίδι" της ιστορίας. Έμαθα πράγματα χωρίς να βαρεθώ καθόλου.»* Αντίστοιχα, μια μαθήτρια της ομάδας ελέγχου ανέφερε: *«Μου άρεσε η ιστορία φέτος, αλλά νομίζω θα μου άρεσε πιο πολύ αν κάναμε κι εμείς αυτά τα παιχνίδια που έκαναν οι άλλοι.»* Τα παραπάνω στοιχεία ενισχύουν την ερμηνεία ότι η αξιοποίηση της τεχνητής νοημοσύνης και της παιχνιδοποίησης δεν ενίσχυσε μόνο τη γνωστική εμπλοκή, αλλά και τη συναισθηματική σύνδεση των μαθητών με το μάθημα της Ιστορίας (Fredricks et al., 2004)

Πέρα από τις ποσοτικές επιδόσεις, αξιολογήθηκε και η ποιότητα της μάθησης μέσω ανοικτών ερωτήσεων και συζητήσεων στην τάξη. Οι απαντήσεις των μαθητών της πειραματικής ομάδας παρουσίαζαν, κατά μέσο όρο, μεγαλύτερη πληρότητα και βάθος ερμηνείας. Για παράδειγμα, στην ερώτηση «Εξήγησε δύο βασικούς λόγους που οδήγησαν στη Γαλλική Επανάσταση», οι μαθητές της ομάδας ελέγχου ανέφεραν γενικά σύντομες απαντήσεις με λέξεις-κλειδιά όπως «φορολογία» και «ανισότητες». Αντίθετα, αρκετοί μαθητές της πειραματικής ομάδας ανέπτυξαν ευρύτερα τις απαντήσεις τους, ενσωματώνοντας ιστορικό πλαίσιο και πληροφορίες που εντόπισαν μέσω του διαλόγου με το chatbot τεχνητής νοημοσύνης.

Αυτό υποδηλώνει όχι μόνο ενίσχυση της κατανόησης, αλλά και ενθάρρυνση της κριτικής σκέψης και της αυτονομίας στη μάθηση. Οι μαθητές δεν περιορίστηκαν στην ανάκληση απομνημονευμένων στοιχείων, αλλά ερμήνευσαν, συνέδεσαν και επιχειρηματολόγησαν — δεξιότητες που καλλιεργούνται σε περιβάλλοντα αυξημένης εμπλοκής και νοήματος.

Ιδιαίτερο ενδιαφέρον παρουσιάζει η πορεία μαθητών με χαμηλή αρχική επίδοση. Στην ομάδα ελέγχου, οι μαθητές που σημείωσαν κάτω από 50% στο προ-τεστ παρουσίασαν περιορισμένη βελτίωση και παρέμειναν σε συγκριτικά χαμηλά επίπεδα. Στην πειραματική ομάδα, ωστόσο, αρκετοί από τους μαθητές αυτούς βελτίωσαν σημαντικά τις επιδόσεις τους, με ορισμένους να φτάνουν ή και να ξεπερνούν το 70% στο μετά-τεστ.

Η πρόοδος αυτή αποδίδεται αφενός στην ανατροφοδότηση του προσαρμοστικού quiz, που επιτρέπει στους μαθητές να εργάζονται με βάση τον ρυθμό και τις ανάγκες τους, και αφετέρου στη θετική ψυχολογική επίδραση της παιχνιδοποίησης, που ενίσχυσε το ενδιαφέρον, την επιμονή και την αυτοπεποίθησή τους. Όπως δήλωσε χαρακτηριστικά ένας μαθητής με ΔΕΠΥ: «Ήταν η πρώτη φορά που κατάφερα να μην αποσπαστώ σε μάθημα Ιστορίας.»

Το εύρημα αυτό τονίζει τον ρόλο των ψηφιακών εργαλείων όχι ως υποκατάστατων, αλλά ως ενισχυτών της μαθησιακής εμπειρίας, ιδιαίτερα για μαθητές που αντιμετωπίζουν προκλήσεις στο παραδοσιακό μοντέλο διδασκαλίας.

Όπως παρουσιάζεται στον Πίνακα 1, η πειραματική ομάδα (με χρήση παιχνιδοποίησης και τεχνητής νοημοσύνης) υπερείχε της ομάδας ελέγχου σε όλους τους εξεταζόμενους δείκτες. Ιδιαίτερα αξιοσημείωτη ήταν η σημαντικά μεγαλύτερη μέση βελτίωση στη βαθμολογία του τεστ: 18,6 ποσοστιαίες μονάδες για την πειραματική ομάδα, έναντι 9,2 μονάδων της ομάδας ελέγχου.

Επιπλέον, 8 από τους 13 μαθητές της πειραματικής ομάδας (περίπου 62%) βελτίωσαν την απόδοσή τους κατά πάνω από 15 μονάδες (π.χ. από 52% σε 70% ή από 65% σε 83%), ενώ μόνο 3 από τους 12 μαθητές της ομάδας ελέγχου (25%) παρουσίασαν ανάλογη πρόοδο. Τα στοιχεία αυτά υποδεικνύουν ότι η διδακτική παρέμβαση συνέβαλε ουσιαστικά στην ποιοτική ενίσχυση της μαθησιακής επίδοσης.

Η αυξημένη εμπλοκή των μαθητών τεκμηριώνεται επίσης από τα ποιοτικά και ποσοτικά δεδομένα. Στο τελικό ερωτηματολόγιο, 11 από τους 13 μαθητές της πειραματικής ομάδας (περίπου 85%) ανέφεραν ότι ένιωσαν «πολύ ενεργά εμπλεκόμενοι» στο μάθημα, σε αντίθεση με 5 από τους 12 στην ομάδα ελέγχου (42%) (Reeve, 2012; Deci & Ryan, 2000). Παράλληλα, το 77% των μαθητών της πειραματικής ομάδας αξιολόγησε θετικά τη συμβολή της νέας μεθόδου στην κατανόηση και στο κίνητρό τους για μάθηση.

Ένα πρόσθετο στοιχείο αποτελεί η αυτοαναφερόμενη ενασχόληση εκτός τάξης: οι μαθητές της πειραματικής ομάδας αφιέρωσαν, κατά μέσο όρο, 45 λεπτά επιπλέον την εβδομάδα σε δραστηριότητες σχετικές με την Ιστορία — είτε για την ολοκλήρωση αποστολών, είτε από αυξημένο προσωπικό ενδιαφέρον. Αντιθέτως, στην ομάδα ελέγχου ο αντίστοιχος μέσος όρος ήταν μόλις 20 λεπτά. Τα αποτελέσματα αυτά υποδεικνύουν ότι οι δύο ομάδες ακολούθησαν διαφορετική τροχιά μάθησης, με την πειραματική ομάδα να παρουσιάζει σαφώς ταχύτερη και ουσιαστικότερη πρόοδο (Clark et al., 2017; Dichev & Dicheva, 2017).

Σε συμφωνία με επισημάνσεις των Dichev & Dicheva, (2017), η αποτελεσματικότητα της παιχνιδοποίησης εξαρτάται από το πλαίσιο. Παρά τα γενικά θετικά αποτελέσματα, παρατηρήθηκαν και ορισμένες προκλήσεις. Σε κάποιες περιπτώσεις, ορισμένοι μαθητές επικεντρώθηκαν υπερβολικά στους πόντους και τις επιβραβεύσεις, προσεγγίζοντας τη δραστηριότητα ως ανταγωνιστικό παιχνίδι σε βάρος της ουσίας. Ο εκπαιδευτικός χρειάστηκε να παρέμβει για να τονίσει τη σημασία της ιστορικής επιχειρηματολογίας. Επιπλέον, σημειώθηκαν μεμονωμένα περιστατικά όπου ο AI βοηθός παρείχε απλουστευμένες ή ελαφρώς ανακριβείς απαντήσεις. Ωστόσο, αυτά τα περιστατικά αξιοποιήθηκαν ως ευκαιρίες για συζήτηση σχετικά με τα όρια και τους κινδύνους της τεχνητής νοημοσύνης, ενισχύοντας την ψηφιακή εγγραμματοσύνη των μαθητών.

Συνολικά, η ποσοτική ανάλυση επιβεβαίωσε τη θετική επίδραση της παρέμβασης στις επιδόσεις και τη συμμετοχή, ενώ η ποιοτική ανάλυση αποκάλυψε βελτίωση στη στάση των μαθητών και ενδείξεις βαθύτερης μάθησης. Τα αποτελέσματα που ακολουθούν, συνοδευόμενα από πίνακες και γραφήματα, τεκμηριώνουν με περισσότερη λεπτομέρεια τις διαφορές μεταξύ των ομάδων και τις βελτιώσεις που παρατηρήθηκαν.

Η θεματική ανάλυση των ημιδομημένων συνεντεύξεων αποκάλυψε κυρίως θετικές εμπειρίες. Η πλειονότητα των μαθητών της πειραματικής ομάδας (7 από τους 10) ανέφερε ότι αισθανόταν πιο ενεργή στο μάθημα. Όλοι οι συμμετέχοντες της πειραματικής ομάδας (10 στους 10) επεσήμαναν ότι «το μάθημα έμοιαζε με παιχνίδι», γεγονός που ενίσχυσε το ενδιαφέρον τους. Πέντε μαθητές σημείωσαν ότι δεν φοβούνταν να κάνουν λάθη, καθώς είχαν τη δυνατότητα να προσπαθήσουν ξανά, μια εμπειρία που προωθεί την ασφαλή μάθηση και ενθαρρύνει τη συνεχή προσπάθεια. Τέσσερις μαθητές δήλωσαν ότι η αλληλεπίδραση με το chatbot ήταν από τα αγαπημένα τους στοιχεία. Όπως ανέφεραν χαρακτηριστικά: «Ήταν σαν να έχω τον δικό μου καθηγητή προσωπικά» και «με βοήθησε όταν κόλλησα, χωρίς να νιώσω ντροπή που ρώτησα». Αυτές οι παρατηρήσεις υπογραμμίζουν τον ρόλο της ΤΝ στη δημιουργία ενός υποστηρικτικού περιβάλλοντος, όπου οι μαθητές λαμβάνουν καθοδήγηση ακριβώς όταν τη χρειάζονται.

Ένα μικρό ποσοστό μαθητών (2 στους 10) εξέφρασε επιφυλάξεις ή μεικτές εμπειρίες. Κάποιοι ανέφεραν ότι αρχικά βρήκαν το σύστημα πολύπλοκο *(«είχε πολλά πράγματα να κάνεις, στην αρχή μπερδεύτηκα»*), ενώ ένας μαθητής προτίμησε έναν πιο παραδοσιακό ρυθμό, δηλώνοντας ότι *«μερικές φορές σκεφτόμουν τους πόντους αντί για το μάθημα»*. Αυτές οι απόψεις αναδεικνύουν ότι οι μαθησιακές καινοτομίες δεν ταιριάζουν το ίδιο σε όλους τους μαθητές και επηρεάζονται από χαρακτηριστικά προσωπικότητας και μαθησιακές προτιμήσεις. Αξιοσημείωτο είναι ότι ακόμη και μαθητές με ήδη υψηλό ενδιαφέρον για την Ιστορία δήλωσαν πως η παρέμβαση δεν άλλαξε ουσιαστικά τη στάση τους, καθώς είχαν ούτως ή άλλως εσωτερικό κίνητρο. Αντιθέτως, οι μαθητές που στο παρελθόν έδειχναν αδιαφορία, παρουσίασαν τη μεγαλύτερη μεταστροφή. Όπως σημείωσε ένας μαθητής: «*Παλιά κοιτούσα το ρολόι πότε θα τελειώσει το μάθημα. Τώρα περνάει η ώρα και δεν το καταλαβαίνω*».

ΣΥΜΠΕΡΑΣΜΑΤΑ

Η ενσωμάτωση της παιχνιδοποίησης και της τεχνητής νοημοσύνης στη διδασκαλία της Ιστορίας οδήγησε σε σημαντικές βελτιώσεις τόσο στις ακαδημαϊκές επιδόσεις όσο και στη συμμετοχή και τη στάση των μαθητών. Οι σύγχρονες αυτές προσεγγίσεις αποδείχθηκαν αποτελεσματικές στην υπέρβαση παραδοσιακών εμποδίων, όπως η μονοτονία και η παθητικότητα, μετατρέποντας το μάθημα σε μια συμμετοχική και ζωντανή μαθησιακή εμπειρία. Τα δεδομένα επιβεβαιώνουν την υπόθεση ότι η παιγνιώδης μάθηση, σε συνδυασμό με την προσαρμοστική υποστήριξη της τεχνητής νοημοσύνης, μπορεί να παρακινήσει ακόμη και τους μαθητές με χαμηλό αρχικό ενδιαφέρον ή απόδοση, ενισχύοντας την αυτοπεποίθησή τους και προάγοντας βαθύτερη κατανόηση του ιστορικού περιεχομένου.

Τα ευρήματα της μελέτης καταδεικνύουν ότι ο συνδυασμός παιχνιδοποίησης και τεχνητής νοημοσύνης (ΤΝ) συνιστά αποτελεσματική παιδαγωγική προσέγγιση στη διδασκαλία της Ιστορίας στη δευτεροβάθμια εκπαίδευση. Η βελτίωση των επιδόσεων της πειραματικής ομάδας συμφωνεί με διεθνείς έρευνες όπου η παιχνιδοποίηση συνέβαλε στη βελτίωση της κατανόησης πολύπλοκων ιστορικών εννοιών. Στην παρούσα μελέτη, η χρήση παιχνιδοποιημένων δραστηριοτήτων παρείχε στους μαθητές σκοπό και νόημα στη μάθηση, ευνοώντας το ενδογενές κίνητρο και την ενεργό συμμετοχή, όπως υποστηρίζεται και από τις θεωρίες παρακίνησης (Deci & Ryan, 2000) και εμπλοκής. Η άμεση ανατροφοδότηση και η δυνατότητα προσαρμογής του επιπέδου δυσκολίας μέσω της ΤΝ επέτρεψαν έναν κύκλο ταχείας μάθησης, που δύσκολα επιτυγχάνεται σε παραδοσιακά περιβάλλοντα. Το γεγονός ότι οι μαθητές της πειραματικής ομάδας αφιέρωσαν περισσότερο χρόνο και ανέπτυξαν πληρέστερες απαντήσεις υποδηλώνει ουσιαστική μάθηση, πέραν της απλής απόκτησης βαθμών. Η αυξημένη εμπλοκή των μαθητών ερμηνεύεται εν μέρει από τη θεωρία της ροής, όπου η ισορροπία πρόκλησης και δεξιοτήτων, οι σαφείς στόχοι και η άμεση ανατροφοδότηση προάγουν βαθιά συμμετοχή (Csikszentmihalyi, 1990; Hamari et al., 2014). Χαρακτηριστικές είναι οι μαρτυρίες μαθητών που περιέγραψαν ότι «δεν καταλάβαιναν πώς περνούσε η ώρα» ή ότι «ήθελαν να συνεχίσουν και στο σπίτι», φράσεις που συνάδουν με τα γνωρίσματα της εμπειρίας ροής. Η ΤΝ διαδραμάτισε καίριο ρόλο σε αυτήν την ισορροπία, προσαρμόζοντας την πρόκληση και παρέχοντας στήριξη όταν απαιτούνταν. Αυτή η μορφή παιχνιδοποίησης με δυναμική προσαρμογή στις ανάγκες των μαθητών ενίσχυσε την εξατομικευμένη μάθηση, κάτι που ευθυγραμμίζεται με τις τάσεις εξατομικευμένης εκπαίδευσης με AI (Holmes et al., 2021; Zawacki-Richter et al., 2019). Τα ποιοτικά δεδομένα ανέδειξαν επίσης σημαντικά παιδαγωγικά οφέλη. Η πλειονότητα των μαθητών ανέφερε αυξημένο ενδιαφέρον, αίσθημα ασφάλειας ως προς την έκφραση ερωτήσεων και θετική εμπειρία μάθησης. Ιδιαίτερα, μαθητές με χαμηλότερες αρχικές επιδόσεις σημείωσαν δυσανάλογα μεγάλη πρόοδο, όπως έχει καταγραφεί και σε άλλες έρευνες όπου η παιχνιδοποίηση βελτίωσε την αυτοπεποίθηση και τη συμμετοχή ευάλωτων ομάδων (Clark et al., 2017). Παρότι το συνολικό αποτέλεσμα ήταν θετικό, επισημάνθηκαν και προκλήσεις. Μικρή μερίδα μαθητών δυσκολεύτηκε με τη πολυπλοκότητα του παιχνιδιού ή επικεντρώθηκε υπερβολικά στην απόκτηση πόντων εις βάρος της μάθησης. Επιπλέον, η ΤΝ παρείχε σε λίγες περιπτώσεις ανακριβείς ή απλουστευμένες απαντήσεις, κάτι που ανέδειξε την ανάγκη για κριτική αξιολόγηση ακόμη και ψηφιακών πηγών – μια δεξιότητα που διδάχθηκε ως μέρος της διαδικασίας. Οι περιορισμοί της μελέτης περιλαμβάνουν το μικρό μέγεθος δείγματος, την πιθανή επίδραση του νεωτερισμού και τον ρόλο του εκπαιδευτικού, του οποίου η θετική στάση και η τεχνολογική επάρκεια ήταν κρίσιμες για την επιτυχία της παρέμβασης. Η μακροπρόθεσμη αποτελεσματικότητα της προσέγγισης παραμένει επίσης αντικείμενο μελλοντικής διερεύνησης.

Η παρούσα μελέτη έδειξε ότι η παιχνιδοποίηση, όταν συνδυάζεται με τεχνητή νοημοσύνη και εντάσσεται σε παιδαγωγικά τεκμηριωμένο πλαίσιο, μπορεί να βελτιώσει σημαντικά τις μαθησιακές επιδόσεις, την εμπλοκή και την ποιότητα μάθησης στο μάθημα της Ιστορίας. Η προσέγγιση ωφέλησε ιδιαίτερα μαθητές που παραδοσιακά αντιμετώπιζαν δυσκολίες, ενισχύοντας τη συμμετοχή και την αυτοπεποίθησή τους. Τα ευρήματα υποδεικνύουν ότι η εφαρμογή παιχνιδοποιημένων και τεχνολογικά υποστηριζόμενων στρατηγικών μπορεί να μεταμορφώσει τη διδακτική πράξη, ευθυγραμμίζοντας τη μάθηση με τις συνήθειες και τις ανάγκες των σύγχρονων μαθητών. Η χρήση της ΤΝ δεν αντικατέστησε τον ρόλο του εκπαιδευτικού αλλά λειτούργησε υποστηρικτικά, προάγοντας την εξατομικευμένη μάθηση και ενισχύοντας τις δεξιότητες κριτικής σκέψης (Luckin et al., 2016; Holmes et al., 2021). Για μελλοντικές έρευνες, προτείνεται η διεύρυνση του δείγματος, η μακροχρόνια παρακολούθηση των αποτελεσμάτων και η διερεύνηση της επίδρασης διαφορετικών μορφών παιχνιδιού και AI στην εκπαίδευση (Creswell & Creswell, 2018; Reeves & Hedberg, 2003). Οι εκπαιδευτικοί και οι σχεδιαστές προγραμμάτων σπουδών καλούνται να εξετάσουν πώς μπορούν να αξιοποιήσουν αυτές τις καινοτομίες, με παιδαγωγική σκοπιμότητα και τεχνική προετοιμασία. Η διδασκαλία της Ιστορίας μπορεί να πάψει να θεωρείται μονότονη και να εξελιχθεί σε μια δυναμική διαδικασία μάθησης που καλλιεργεί όχι μόνο τη γνώση αλλά και τις δεξιότητες του 21ου αιώνα, μετατρέποντας την τάξη σε έναν χώρο ενεργής ανακάλυψης και συμμετοχής.

ΠΕΡΙΛΗΨΗ

Στο συγκεκριμένο άρθρο παρουσιάζεται ένα καινοτόμο εκπαιδευτικό λογισμικό, το D_Read-Narrate, το οποίο έχει σχεδιαστεί για να υποστηρίξει τις γλωσσικές, αναγνωστικές και αφηγηματικές δεξιότητες, μονόγλωσσων, αλλά κυρίως δίγλωσσων παιδιών (8-12 ετών), που φοιτούν σε ελληνικά δημόσια δημοτικά σχολεία. Το λογισμικό αξιοποιεί τμήματα του iRead, ενός ήδη ολοκληρωμένου λογισμικού (https://iread-project.eu/), το οποίο σχεδιάστηκε στο πλαίσιο του προγράμματος χρηματοδότησης Horizon 2020. Στόχος είναι να παρουσιαστεί ο σχεδιασμός του λογισμικού, ο τρόπος λειτουργίας του καθώς και να δοθεί ένα ενδεικτικό σχέδιο μαθήματος που αφορά στη χρήση του λογισμικού κατά την εκπαιδευτική πράξη. Το συγκεκριμένο λογισμικό αναπτύχθηκε στο πλαίσιο του έργου: «Ψηφιακές εφαρμογές για τη διδασκαλία της ανάγνωσης και της αφήγησης σε πολύγλωσσες τάξεις ελληνικού δημοτικού σχολείου: D_Read-Narrate». Το έργο υλοποιείται στο πλαίσιο του Εθνικού Σχεδίου Ανάκαμψης και Ανθεκτικότητας «Ελλάδα 2.0», με τη χρηματοδότηση της Ευρωπαϊκής Ένωσης – NextGenerationEU (Φορέας Υλοποίησης: ΕΛ.ΙΔ.Ε.Κ.). Έχει ως αντικείμενο την ανάπτυξη μιας σειράς εκπαιδευτικών διαδικτυακών εφαρμογών που ενισχύουν τις γλωσσικές δεξιότητες των μαθητών/τριών δημοτικού σχολείου που κατακτούν την Ελληνική ως δεύτερη γλώσσα (Γ2). Το λογισμικό περιλαμβάνει: εργαλεία εκπαιδευτικού (ψηφιακές τάξεις, αξιολόγηση, ανάθεση εργασιών), λογισμικό γλωσσικής αξιολόγησης πριν, κατά και μετά τη χρήση του, καθώς και προφίλ μαθητών με αποθηκευμένες επιδόσεις και εξατομικευμένη ανατροφοδότηση. Και οι τρεις εφαρμογές του λογισμικού αλληλεπιδρούν με το Μοντέλο Πεδίου (Domain Model), το οποίο αποτελεί τον μαθησιακό και γλωσσικό πυρήνα του D_Read-Narrate και διαμορφώνει τα ατομικά Μοντέλα Χρήστη (User Models) κατά τη διάρκεια της χρήσης του. Από τον Μάρτιο του 2025, το λογισμικό χρησιμοποιείται σε δημόσια δημοτικά σχολεία με τάξεις υποδοχής, καθώς και σε σχολεία με μεγάλο αριθμό δίγλωσσων μαθητών (π.χ. σχολεία διαπολιτισμικής εκπαίδευσης) με στόχο και την αξιολόγηση της αποτελεσματικότητάς του.

Λέξεις – κλειδιά: Έξυπνα παιχνίδια, ανάγνωση, δίγλωσσοι, γλωσσικές δεξιότητες.

ΕΙΣΑΓΩΓΗ

Ο γραμματισμός είναι μια βασική δεξιότητα που διαμορφώνει το μορφωτικό επίπεδο, την ένταξη στην κοινωνική ζωή και τις μελλοντικές ευκαιρίες απασχόλησης των ατόμων (UNESCO, 1959). Η ανάπτυξη του γραμματισμού και των δεξιοτήτων ανάγνωσης κατά τα πρώτα σχολικά έτη είναι θεμελιώδους σημασίας για τις μετέπειτα σχολικές τους επιδόσεις, αλλά δεν επιτυγχάνεται στον ίδιο βαθμό από όλους/όλες τους/τις μαθητές/μαθήτριες. Διάφοροι παράγοντες όπως η περιορισμένη γνώση της γλώσσας του σχολείου, όπως συμβαίνει συχνά με μαθητές από οικογένειες μεταναστών ή προσφύγων, μπορεί να αποτελέσει εμπόδιο για την ανάπτυξη αυτών των δεξιοτήτων, θέτοντας έναν μεγάλο αριθμό μαθητ(ρι)ών σε μειονεκτική θέση, τόσο σε ακαδημαϊκό όσο και σε κοινωνικό επίπεδο.

Τα διαδοχικά δίγλωσσα παιδιά που εκτέθηκαν σε μια δεύτερη γλώσσα (Γ2) μετά την ηλικία των 3-4 ετών τείνουν να παρουσιάζουν ελλείμματα σε διάφορα επίπεδα της γλώσσας (φωνολογία, ορθογραφία, μορφοσύνταξη, λεξιλόγιο), γεγονός που, όπως δείχνουν σχετικές έρευνες (August and Shanahan, 2009; Bonifaci et al., 2020), τείνει να επηρεάζει αρνητικά τις αναγνωστικές και αφηγηματικές τους δεξιότητες.

Μελέτες έχουν δείξει ότι τα ψηφιακά εκπαιδευτικά παιχνίδια έχουν τη δυνατότητα να ενισχύουν την ανάπτυξη των δεξιοτήτων γραμματισμού των ατόμων γιατί: α) επιτρέπουν στους/στις μαθητές/μαθήτριες να επαναλαμβάνουν ασκήσεις και να παίρνουν άμεση ανατροφοδότηση (Holmes, 2011; Prensky, 2001α) και β) ενθαρρύνουν τη διάθεσή τους να συμμετέχουν ενεργά στην επίλυση προβλημάτων και στην αλληλεπίδραση με τους/τις δασκάλους/ες (Vasalou et al., 2021; Zakopoulou et al., 2017). Η χρήση εφαρμογών για την ανάπτυξη του γραπτού λόγου έχει συσχετιστεί με τη βελτίωση της ικανότητας αναγνώρισης των γραφημάτων από παιδιά στην πρώιμη σχολική ηλικία (Neumann, 2016), ενώ έχει φανεί ότι η χρήση ηλεκτρονικών βιβλίων μπορεί να ενισχύσει την ανάπτυξη του λεξιλογίου και τις ικανότητες φωνολογικής επίγνωσης (Ihmeideh, 2014). Αξίζει να σημειωθεί ότι τα ψηφιακά παιχνίδια γραμματισμού συμβάλλουν στη διαμόρφωση θετικής στάσης των μαθητ(ρι)ών απέναντι σε ένα γνωστικό αντικείμενο (Hidi and Renninger, 2006), καθώς οι δεξιότητές τους ενισχύονται μέσω της εξάσκησης και της άμεσης ανατροφοδότησης (Prensky, 2001α), μέσα από διαφορετικά επίπεδα δυσκολίας (Holmes, 2011), εφόσον στα παιχνίδια αυξάνεται το επίπεδο δυσκολίας όσο παίζουν τα παιδιά. Πρέπει, επίσης, να τονιστεί ότι τα παιχνίδια θεωρούνται ιδιαίτερα αποτελεσματικά στις μικρές ηλικίες (Prensky, 2001β), καθώς οι μαθητές ασχολούνται περισσότερο με δραστηριότητες που παρουσιάζονται μέσω παιχνιδιού (Garris et al., 2002), κάτι που ενισχύει άτυπα τη διαδικασία της μάθησης (Tobias et al., 2011), εφόσον δημιουργούνται κίνητρα μέσω της διασκέδασης (Bisson and Luckner, 1996).

Εν κατακλείδι, ολοένα και περισσότερα επιστημονικά στοιχεία δείχνουν ότι η τεχνολογία και η παιχνιδοποίηση (gamification) μπορούν να ενισχύσουν την ανάπτυξη γλωσσικών δεξιοτήτων γενικά και, ειδικά, δεξιοτήτων γραμματισμού μέσω της επανάληψης και της ανατροφοδότησης (Holmes, 2011), της αυξημένης εμπλοκής και της αύξησης των κινήτρων (Abrams and Walsh, 2014), ενώ τα οφέλη της παιχνιδοποίησης για την εκμάθηση της Γ2 έχουν επίσης τεκμηριωθεί ευρέως από σχετικά ερευνητικά δεδομένα (Flores, 2015; Rachels and Rockinson-Szapkiw, 2018).

Στόχος της παρούσας μελέτης είναι να αναλύσει τον σχεδιασμό και τις βασικές λειτουργίες του εκπαιδευτικού λογισμικού D_Read-Narrate, καθώς και να παρουσιάσει ένα ενδεικτικό σχέδιο μαθήματος για την εκπαιδευτική του εφαρμογή στην πράξη. Δεδομένου ότι η αξιολόγηση της αποτελεσματικότητάς του λογισμικού βρίσκεται σε εξέλιξη κατά την τρέχουσα περίοδο, η παρούσα μελέτη εστιάζει στην αναλυτική περιγραφή του εργαλείου καθώς και στην παρουσίαση ενός ενδεικτικού παιδαγωγικού σεναρίου χρήσης του.

ΤΟ ΛΟΓΙΣΜΙΚΟ D_READ-NARRATE

Το λογισμικό D_Read-Narrate (https://dread-narrate.gr/) αναπτύχθηκε στο πλαίσιο του έργου: «Ψηφιακές εφαρμογές για τη διδασκαλία της ανάγνωσης και της αφήγησης σε πολύγλωσσες τάξεις ελληνικού δημοτικού σχολείου: D_Read-Narrate». Το έργο υλοποιείται στο πλαίσιο του Εθνικού Σχεδίου Ανάκαμψης και Ανθεκτικότητας «Ελλάδα 2.0», με τη χρηματοδότηση της Ευρωπαϊκής Ένωσης – NextGenerationEU (Φορέας Υλοποίησης: ΕΛ.ΙΔ.Ε.Κ.). Έχει ως στόχο την εξέλιξη και την ενσωμάτωση των υφιστάμενων εφαρμογών του iRead (https://iread-project.eu/), ενός ολοκληρωμένου εκπαιδευτικού εργαλείου σχεδιασμένου να υποστηρίξει την ανάπτυξη αναγνωστικών δεξιοτήτων σε μαθητές/τριες με δυσλεξία, αρχάριους/ες αναγνώστες/ριες και μαθητές/τριες αγγλικής ως ξένης γλώσσας. Το έργο υλοποιήθηκε στο πλαίσιο του προγράμματος «Ψηφιακές υποδομές εξατομικευμένης εκμάθησης της ανάγνωσης (iRead)» και χρηματοδοτήθηκε από το Horizon 2020. Στο πλαίσιο του D_Read-Narrate επεκτείνονται και προσαρμόζονται οι λειτουργίες του iRead στις ιδιαίτερες γλωσσικές ανάγκες δίγλωσσων μαθητ(ρι)ών (κατώτερου) μεσαίου επιπέδου γλωσσομάθειας ως προς την ελληνική γλώσσα. Στόχος του συγκεκριμένου προγράμματος είναι η δημιουργία ενός νέου, καινοτόμου εκπαιδευτικού λογισμικού, το οποίο απευθύνεται σε έναν πληθυσμό που αντιμετωπίζει γλωσσικά, εκπαιδευτικά και συχνά κοινωνικά προβλήματα, δηλαδή σε δίγλωσσους μαθητές που κατακτούν την Ελληνική ως Γ2. Το

περιεχόμενο και το γλωσσικό υλικό που περιλαμβάνεται στο D_Read-Narrate έχει επιλεγεί έτσι ώστε να στοχεύει τόσο στις γλωσσικές όσο και στις εκπαιδευτικές/σχολικές ανάγκες των δίγλωσσων μαθητ(ρι)ών του δημοτικού σχολείου, εξασφαλίζοντας άμεση αντιστοιχία μεταξύ του περιεχομένου του λογισμικού και του Αναλυτικού προγράμματος σπουδών ως προς τη Γλώσσα στο Δημοτικό Σχολείο, το οποίο έχει ήδη καταγραφεί προκειμένου να γίνει η τελική ανάλυση και αντιστοίχιση του περιεχομένου του με το λογισμικό D_Read-Narrate. Τα γλωσσικά φαινόμενα καταγράφηκαν και στη συνέχεια κατηγοριοποιήθηκαν ανά τάξη. Ειδικότερα, μελετήθηκε το Αναλυτικό Πρόγραμμα Γλώσσας για όλες τις τάξεις του δημοτικού (Α΄–ΣΤ΄), τα εγχειρίδια της Γλώσσας και τα επίσημα κείμενα οδηγιών διδασκαλίας, ώστε να εξαχθεί μια πλήρης λίστα γλωσσικών φαινομένων. Όλα τα παραπάνω συγκεντρώθηκαν σ' έναν πίνακα αντιστοιχιών («φαινόμενο ↔ τάξη»), με σύντομες οδηγίες. Έτσι, διασφαλίζεται ότι κάθε δραστηριότητα του D_Read-Narrate εστιάζει σε συγκεκριμένες γλωσσικές δεξιότητες, ακριβώς εκεί όπου απαιτούνται σύμφωνα με το εκάστοτε Αναλυτικό Πρόγραμμα.

Το D_Read-Narrate αποτελείται από δύο κύριες εφαρμογές: μια εφαρμογή Έξυπνων Παιχνιδιών (Smart Games), η οποία επικεντρώνεται στην παρουσίαση γραμματικών φαινομένων της Ελληνικής εν είδη ασκήσεων, και μια εφαρμογή Αναγνώστη/Αφηγητή (Reader/Narrator), με δραστηριότητες που προάγουν την ανάγνωση και τις αφηγηματικές δεξιότητες των μαθητών. Εκτός από τις δύο κύριες εφαρμογές που υπάρχουν στο συγκεκριμένο λογισμικό, το D_Read-Narrate περιλαμβάνει και τα εξής: α) ένα ολοκληρωμένο λεξικό, το οποίο περιέχει γραμματικά επισημειωμένες λέξεις, β) εργαλεία εκπαιδευτικού (πρωτόκολλα και διαδικασίες αξιολόγησης μαθητών, ψηφιακές τάξεις, ανάθεση εργασιών), γ) λογισμικό αξιολόγησης γλωσσικών δεξιοτήτων για να διαπιστωθεί το επίπεδο γλωσσομάθειας των δίγλωσσων μαθητών και δ) σελίδα με το προφίλ μαθητών. Τα χαρακτηριστικά των παιχνιδιών[1] και των βοηθητικών εφαρμογών του D_Read-Narrate περιγράφονται παρακάτω. Πριν την περιγραφή των παιχνιδιών είναι απαραίτητη η επεξήγηση της λειτουργίας των Μοντέλων Πεδίου, πάνω στα οποία βασίζονται τα παιχνίδια και τα οποία είναι απαραίτητα για την ανάπτυξη των παιχνιδιών.

Τα Μοντέλα Πεδίου (Domain Models)

Στο D_Read-Narrate υπάρχουν δύο Μοντέλα Πεδίου, ένα για μονόγλωσσους και ένα για δίγλωσσους μαθητές. Κάθε μοντέλο πεδίου είναι ένα μια ολοκληρωμένη βάση δεδομένων γνώσεων η οποία αποτελεί το γλωσσικό υλικό που περιλαμβάνεται στο D_Read-Narrate και καθορίζει ποια γλωσσικά στοιχεία εμπεριέχονται στα παιχνίδια, το επίπεδο δυσκολίας των φαινομένων αλλά και τα προαπαιτούμενά τους. Οι πληροφορίες στα Μοντέλα Πεδίου τροφοδοτούν σε πραγματικό χρόνο τα παιχνίδια με κατάλληλο υλικό και υποστηρίζουν την εξατομικευμένη πορεία μάθησης για τον κάθε μαθητή. Το γλωσσικό υλικό κατηγοριοποιείται σε 4 επίπεδα δυσκολίας.

Τα παιχνίδια αλληλεπιδρούν με τα Μοντέλα Πεδίου, τα οποία αποτελούν τον μαθησιακό και γλωσσικό πυρήνα του D_Read-Narrate και διαμορφώνουν τα ατομικά Μοντέλα Χρήστη (User Models) κατά τη διάρκεια της χρήσης των παιχνιδιών. Τα Μοντέλα Πεδίου είναι το στοιχείο εκείνο που καθιστά το D_Read-Narrate καινοτόμο για τα ελληνικά και διεθνή δεδομένα. Οι γλωσσικές κατηγορίες εντός των Μοντέλων Πεδίου επιλέχθηκαν με βάση τα αποτελέσματα εκτεταμένης βιβλιογραφικής ανασκόπησης και ταξινομήθηκαν ως προς τη δυσκολία ή την πολυπλοκότητά τους με βάση μια αρχική ταξινόμηση των πεδίων ανά κατηγορία, η οποία διαμορφώθηκε από εμπειρικά δεδομένα (Mastropavlou et al., 2020). Τα επιλεγμένα χαρακτηριστικά καλύπτουν φαινόμενα απαραίτητα για την ανάπτυξη της ανάγνωσης, δομές που συνήθως διδάσκονται/αναπτύσσονται πρώτα και εμφανίζονται περισσότερο στα κείμενα που απευθύνονται σε παιδιά των ομάδων στόχων μας, καθώς και πιο δύσκολα φαινόμενα που δυσκολεύουν τα δίγλωσσα παιδιά. Τα επίπεδα γλωσσικής ανάλυσης που περιλαμβάνονται στα Μοντέλα Πεδίου και τα οποία αξιοποιούνται στα Έξυπνα Παιχνίδια είναι: η φωνολογία, η μορφολογία και η σύνταξη. Σε κάθε γλωσσικό επίπεδο εμπεριέχονται διάφορες γλωσσικές υποκατηγορίες και συσχετιζόμενα γλωσσικά φαινόμενα (Πίνακας 1).

Τα Μοντέλα Πεδίου φιλτράρουν και επιλέγουν ποιες ασκήσεις θα αντλήσουν τα παιχνίδια, με βάση το επίπεδο του μαθητή. Μέσα από τον καθορισμό των επιπέδων δυσκολίας και τον ορισμό των προαπαιτούμενων φαινομένων καθορίζεται με ποια φαινόμενα θα έρθει αρχικά σε επαφή το παιδί και ποια θα ακολουθήσουν. Τα Μοντέλα ενημερώνονται για τη γλωσσική ικανότητα των παιδιών μέσω των επιδόσεών τους στα παιχνίδια. Για παράδειγμα, για ένα παιδί μπορεί να μην είναι διαθέσιμα όλα τα γλωσσικά χαρακτηριστικά για εξάσκηση μέσω των παιχνιδιών καθώς υπάρχουν γλωσσικά προαπαιτούμενα. Συγκεκριμένα, ένα παιδί θα έρθει σε επαφή αρχικά με παιχνίδια για το κλιτικό επίθημα *-ος* (άνθρωπος) και ακολούθως με το κλιτικό επίθημα *-ών* (πορτών), δεδομένου ότι κρίνεται πιο δύσκολη η γενική πληθυντικού συγκριτικά με την ονομαστική ενικού.

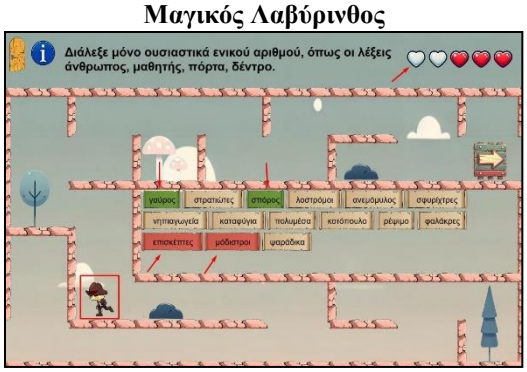
[1] Η εφαρμογή για τον Αναγνώστη/Αφηγητή δεν έχει ακόμη ολοκληρωθεί.

Πίνακας 1
Ενδεικτικό περιεχόμενο των Μοντέλων Πεδίου

Γλωσσικά επίπεδα	**Γλωσσικές υποκατηγορίες**	**Φαινόμενα**
Φωνολογία	Αντιστοιχία γραφήματος με φώνημα	2:1 (μπ - /b/ κλπ.)
		1:2 (π.χ. ξ - /ks/, ψ - /ps/)
Μορφολογία	Κλιτική μορφολογία	Καταλήξεις ουσιαστικών (-ος/-ού/-ό(ν)/..., -α/-ας/-α,... κλπ.)
		Καταλήξεις ρημάτων (-ω/-εις/-ει/... κλπ.)
	Παραγωγική μορφολογία	Καταλήξεις ονομάτων (-άκι, -ίτσα, ίτης κλπ.), ρημάτων (-ίζω, -ώνω, -εύω, κλπ.) και επιθέτων (-ώδης, -ικός, κλπ.)
		Προθήματα (προσ-, υπο-, υπερ-, κλπ.)
Σύνταξη	Λειτουργικές λέξεις	Προθέσεις (από, με, για, σε)
		Άρθρα (ο/η/το/..., ένας/μία/ένα/...)
		Αντωνυμίες (με, σε, τον κλπ.)
	Φωνή (ενεργητική, παθητική κλπ.)	Παθητικά ρήματα (συλλαμβάνομαι)
		Αυτοπαθητικά (χτενίζομαι)
		Αλληλοπαθητικά (αγκαλιάζονται)
		Αποθετικά (σκέφτομαι)
	Εξαρτημένες προτάσεις	Αναφορικές
		Συμπληρωματικές
		Επιρρηματικές
	Αναφορικά στοιχεία	Προσωπικές αντωνυμίες
		Οριστικές και αόριστες ονοματικές φράσεις
		Κενά υποκείμενα

<u>Τα «Έξυπνα Παιχνίδια» (Smart Games)</u>

Η εφαρμογή «Έξυπνα Παιχνίδια» (Smart Games) είναι μια ψηφιακή εφαρμογή που περιλαμβάνει ένα σύνολο δραστηριοτήτων με τη μορφή γλωσσικών παιχνιδιών και γρίφων, τα οποία αποσκοπούν στη βελτίωση των δεξιοτήτων των μαθητ(ρι)ών στους τομείς της φωνολογίας, της δομής των λέξεων (μορφολογία) και της κατανόησης των προτάσεων (σύνταξη) με διασκεδαστικό τρόπο, κάτι που δίνει κίνητρο στα παιδιά για μάθηση. Τα συγκεκριμένα παιχνίδια χαρακτηρίζονται «έξυπνα», μιας και παρέχουν στους μαθητές εξατομικευμένη υποστήριξη, προκειμένου να αντιμετωπιστούν τα γλωσσικά ελλείμματα που τυχόν έχουν. Με αυτόν τον τρόπο, οι μαθητές έχουν τη δυνατότητα να βελτιωθούν, εφόσον, μέσω της εξατομικευμένης βοήθειας που λαμβάνουν, μπορούν να μεταφέρονται αυτόματα από το



λογισμικό σταδιακά σε δραστηριότητες αυξανόμενης δυσκολίας και πολυπλοκότητας. Παράλληλα, οδηγούνται σε δραστηριότητες που καθορίζονται με βάση τα ατομικά τους χαρακτηριστικά και δυσκολίες (γλωσσικό προφίλ και επίπεδο ελληνομάθειας). Τα παιχνίδια είναι σχεδιασμένα, ώστε να ενισχύουν τις δεξιότητες της αυτοματοποίησης και της ακρίβειας ως προς τη χρήση της γλώσσας.

Οι δραστηριότητες, οι οποίες έχουν τη μορφή παιχνιδιών ή γρίφων, περιλαμβάνουν ασκήσεις δημιουργίας λέξεων (π.χ. επιλογή κατάλληλων τμημάτων για τη δημιουργία μιας νέας λέξης), δημιουργίας προτάσεων (επιλογή κατάλληλης λέξης για τοποθέτηση σε κενό μέσα σε μια πρόταση με βάση τη σημασία, τοποθέτηση λέξεων στο σωστό πλαίσιο με βάση τη γραμματική τους κατηγορία). Το εκπαιδευτικό περιεχόμενο (π.χ. γράμματα, λέξεις, φράσεις, προτάσεις) αντλείται από τα Μοντέλα Πεδίου του D_Read-Narrate και παρουσιάζεται με σειρά αυξανόμενης δυσκολίας, με βάση τον καθορισμό του επιπέδου δυσκολίας που αντιστοιχεί σε κάθε φαινόμενο όπως επισημαίνεται στα Μοντέλα Πεδίου, καθώς και την ατομική επίδοση κάθε μαθητή στα παιχνίδια.

Αερόστατα

Στο D_Read-Narrate περιλαμβάνονται 5 παιχνίδια: 1) «Ποταμόπλοιο» (Εικόνα 1). Στο συγκεκριμένο παιχνίδι, εμφανίζεται ένα σύνολο από σακούλες αλευριού με επιλογές που απαντούν στην ερώτηση που έχει τεθεί. Πατώντας πάνω

σε μια σακούλα, το παιχνίδι αποθηκεύει την απάντηση. Αν το παιδί πατήσει λάθος σακούλα, ο ήρωας θα προσπαθήσει να μεταφέρει τη συγκεκριμένη σακούλα, αλλά το σκάφος θα βυθιστεί και ο ήρωας θα επιστρέψει στην αρχική θέση, ενώ η επιλεγμένη σακούλα δε θα είναι πλέον διαθέσιμη. Εάν το παιδί πατήσει τη σωστή σακούλα (μόνο μία μπορεί να είναι η σωστή), ο ήρωας θα τη μεταφέρει στην πλευρά του φάρου. 2) «Μαγικός Λαβύρινθος» (Εικόνα 2). Στο παιχνίδι «Μαγικός Λαβύρινθος» εμφανίζεται ένα σύνολο παπύρων με επιλογές που μπορούν να απαντήσουν στο συγκεκριμένο ερώτημα. Αν το παιδί πατήσει έναν σωστό πάπυρο (υπάρχουν πολλοί σωστοί πάπυροι), ο συγκεκριμένος πάπυρος θα χρωματιστεί πράσινος και ο ήρωας θα μεταφερθεί στην έξοδο. Αν πατήσει σε λάθος πάπυρο, ο συγκεκριμένος πάπυρος θα χρωματιστεί κόκκινος. Αν το παιδί βρει όλους τους σωστούς παπύρους ο ήρωας θα φτάσει στην έξοδο του λαβυρίνθου. 3) «Βαρέλια» (Εικόνα 3). Το παιχνίδι «Βαρέλια», εμφανίζει ένα σύνολο βαρελιών με επιλογές που μπορούν να γεμίσουν το συγκεκριμένο πλαίσιο. Το παιδί πρέπει να μετακινήσει τα βαρέλια στις σωστές θέσεις. Σέρνοντας και αφήνοντας το βαρέλι στις κενές θέσεις το παιδί μπορεί να απαντήσει στην ερώτηση. Εάν το παιδί μετακινήσει το βαρέλι σε λανθασμένη θέση, το βαρέλι θα επιστρέψει στην αρχική του θέση. Αν γεμίσει όλα τα κενά με τα σωστά βαρέλια, ο ήρωας θα πηδήξει πάνω από τα βαρέλια και θα φτάσει στην άλλη πλευρά. 4) «Γέφυρα Σπηλαίου» (Εικόνα 4). Στο συγκεκριμένο παιχνίδι, εμφανίζονται κάποια πλακίδια με επιλογές που μπορούν να συμπληρώσουν το δεδομένο πλαίσιο. Τα παιδιά πρέπει να τα μετακινήσουν στις σωστές θέσεις σέρνοντας και αφήνοντάς τα όπου θεωρούν κατάλληλο. 5) «Αερόστατα» (Εικόνα 5). Το παιχνίδι αυτό παρουσιάζει ένα σύνολο μπαλονιών με επιλογές που απαντούν σε συγκεκριμένη ερώτηση. Πατώντας πάνω σε ένα μπαλόνι, το παιχνίδι επικυρώνει την απάντηση. Σε όλα τα παιχνίδια, σε περίπτωση λάθους, χάνεται μια καρδιά και εμφανίζεται στην οθόνη μήνυμα ανατροφοδότησης, ενώ όταν ολοκληρώνεται μια δραστηριότητα εμφανίζεται μήνυμα επιβράβευσης.

Υποστηρικτικές εφαρμογές

Το λογισμικό D_Read-Narrate περιλαμβάνει επίσης υποστηρικτικές εφαρμογές που βοηθούν στη διαδικασία διδασκαλίας/μάθησης τόσο για τους/τις εκπαιδευτικούς όσο και για τους/τις μαθητές/μαθήτριες. Αυτές περιλαμβάνουν τα εξής:

- Εργαλεία εκπαιδευτικού: Οι εκπαιδευτικοί μπορούν να συνδεθούν με έναν προσωπικό λογαριασμό, ο οποίος τους προσφέρει εξατομικευμένα εργαλεία που βοηθούν τη διδασκαλία. Μέσω του προφίλ τους, οι εκπαιδευτικοί μπορούν:
    - να συμπληρώνουν λίστες αξιολόγησης αφηγήσεων για να αξιολογούν τις προφορικές αφηγήσεις των μαθητ(ρι)ών τους και να τους στέλνουν ανατροφοδότηση,
    - να δημιουργούν ψηφιακές τάξεις για ομαδικές εργασίες, όπως η ομαδική δημιουργία ιστοριών κ.λπ.,
    - να παρακολουθούν τις επιδόσεις των μαθητ(ρι)ών τους σε δραστηριότητες που αφορούν τη γλώσσα ή την ανάγνωση,
    - να αναθέτουν δραστηριότητες κ.λπ..

- Εφαρμογή αξιολόγησης γλωσσικού επιπέδου (screening). Η συγκεκριμένη εφαρμογή δίνει τη δυνατότητα στους εκπαιδευτικούς να αξιολογήσουν σε μικρό χρονικό διάστημα τις γλωσσικές ικανότητες των μαθητ(ρι)ών τους πριν από την πρώτη χρήση του λογισμικού D_Read-Narrate. Τη συγκεκριμένη εφαρμογή έχουν τη δυνατότητα να τη χρησιμοποιήσουν τόσο κατά τη διάρκεια όσο και μετά τη χρήση του D_Read-Narrate, ώστε να παρακολουθούν την πρόοδο και τις επιδόσεις των μαθητών τους. Συγκεκριμένα, για την ενσωμάτωση της εφαρμογής αξιολόγησης γλωσσικού επιπέδου έγινε προσαρμογή των σταθμισμένων τεστ «Ας Μιλήσουμε Ελληνικά» (ΙΙ, ΙΙΙ), τα οποία δημιουργήθηκαν για την αξιολόγηση του επιπέδου γλωσσικής επάρκειας των δίγλωσσων μαθητών στο πλαίσιο του προγράμματος «Εκπαίδευση Μουσουλμανοπαίδων 2002-2004» (Τζεβελέκου κ.ά. 2004). Τα συγκεκριμένα τεστ υπάρχουν στο διαδίκτυο στη σελίδα: http://www.diapolis.auth.gr/eclass/mod/folder/view.php?id=457.

- Προφίλ μαθητ(ρι)ών : Οι μαθητές/μαθήτριες θα μπορούν να:
    - αποθηκεύουν την επίδοσή τους
    - βλέπουν τις βαθμολογίες τους κ.λπ.
    - ενημερώνουν για την επίδοση και την επιλογή του εκπαιδευτικού περιεχομένου τα Έξυπνα Παιχνίδια, παρέχοντας εξατομικευμένη μάθηση.

ΑΞΙΟΛΟΓΗΣΗ ΤΟΥ ΛΟΓΙΣΜΙΚΟΥ

Με την ολοκλήρωση το λογισμικού, κρίνεται απαραίτητη η αξιολόγηση της λειτουργίας και αποτελεσματικότητας των εφαρμογών του D_Read-Narrate ως εργαλείων διδασκαλίας σε φυσικές συνθήκες. Βασικός στόχος της αξιολόγησης του λογισμικού D_Read-Narrate είναι να διερευνηθεί η επίδρασή του:(α) στις γλωσσικές δεξιότητες (λεξιλόγιο, γραμματική) καθώς και στην αναγνωστική και αφηγηματική ικανοτήτων των μαθητ(ρι)ών, (β) στη

συνολική σχολική τους επίδοση, και (γ) στα κίνητρα, την αυτοπεποίθηση και τη στάση τους απέναντι στη χρήση της ελληνικής γλώσσας στην τάξη. Επίσης, δευτερεύων στόχος της αξιολόγησης του λογισμικού είναι να καταγράψει τις στάσεις και εντυπώσεις των μαθητ(ρι)ών και εκπαιδευτικών απέναντι στη χρήση του λογισμικού και στην ένταξή του στη διδασκαλία.

Συγκεκριμένα, αξιολογείται η πρώτη έκδοση των εφαρμογών του D_Read-Narrate, οι οποίες εφαρμόζονται σε δείγμα 33 δίγλωσσων μαθητ(ρι)ών και 90 μονόγλωσσων μαθητ(ρι)ών τυπικής ανάπτυξης με μητρική γλώσσα την ελληνική από ερευνητές/ερευνήτριες της ομάδας του Πανεπιστημίου Ιωαννίνων (Π.Ι.). Οι συμμετέχοντες/ουσες της πειραματικής ομάδας επιλέχθηκαν με βάση συγκεκριμένα κριτήρια επιλογής, τα οποία περιλαμβάνουν: (i) χρονολογική ηλικία (8-12 ετών), (ii) μη ελληνική Γ1, (iii) 2-5 χρόνια έκθεσης στην ελληνική γλώσσα και (iv) απουσία οποιασδήποτε γλωσσικής παθολογίας ή μαθησιακής δυσκολίας. Η ομάδα ελέγχου επελέγη με βάση τα κριτήρια (i) και (iv) παραπάνω, ενώ το κριτήριο (ii) περιλαμβάνει την ελληνική ως Γ1.

Πριν και μετά τη χρήση του λογισμικού γίνεται αξιολόγηση των επικοινωνιακών δεξιοτήτων καθώς και των δεξιοτήτων ανάγνωσης των μαθητ(ρι)ών (στα ελληνικά) με την αξιοποίηση του εργαλείου γλωσσικής αξιολόγησης που θα είναι ενσωματωμένο στο D_Read-Narrate. Επιπρόσθετα, αξιολογείται η αναγνωστική ικανότητα των μαθητ(ρι)ών με το Τεστ Ανάγνωσης-Α (Τεστ-Α) (Παντελιάδου και Αντωνίου, 2008). Το συγκεκριμένο τεστ απευθύνεται σε μαθητές Γ΄ Δημοτικού έως Γ΄ Γυμνασίου και περιέχει 10 δραστηριότητες, οι οποίες αποσκοπούν στην αξιολόγηση των παιδιών στα εξής: α) Αποκωδικοποίηση, β) Ευχέρεια, γ) Μορφολογία-Σύνταξη και δ) Κατανόηση. Παράλληλα, οι δίγλωσσοι/ες μαθητές/μαθήτριες κλήθηκαν να συμπληρώσουν με τη βοήθεια των ερευνητών και ένα ερωτηματολόγιο καταγραφής γλωσσικού ιστορικού. Το ερωτηματολόγιο αποτελείται από τρεις ενότητες οι οποίες αφορούν: 1) γενικές πληροφορίες για τους/τις μαθητές/μαθήτριες, 2) πληροφορίες για το οικογενειακό και γλωσσικό ιστορικό, 3) πληροφορίες για την τρέχουσα χρήση της γλώσσας από τα παιδιά.

Πίνακας 2
Σύντομο σχέδιο μαθήματος

Στόχοι μαθήματος: Ενίσχυση της εκμάθησης των συμπληρωματικών προτάσεων και άσκηση της χρήσης τους. *Προτεινόμενη τάξη-στόχος:* Μονόγλωσσοι: Δ΄ τάξη, Δίγλωσσοι: Δ΄, Ε΄ ή ΣΤ΄ τάξη. Μπορεί να χρησιμοποιηθεί με όλη την τάξη και σε μαθήματα μικρών ομάδων. *Δραστηριότητα* (35 λεπτά): *Απαιτούμενα*: τάμπλετ, πίνακας, διαδραστικός πίνακας, τετράδιο. *Εισαγωγή* (5 λεπτά): Ο/Η εκπαιδευτικός εισάγει τον τρόπο εισαγωγής, τη σημασία και τη λειτουργία των συμπληρωματικών προτάσεων («ότι», «να») και χρησιμοποιεί τον πίνακα για να δώσει παραδείγματα προτάσεων που εισάγονται με ότι, να. Παράλληλα, ακούει και καταγράφει προτάσεις από τα παιδιά. *Ομαδικό παιχνίδι* (20 λεπτά): *Εκπαιδευτικός*: Με τη χρήση του διαδραστικού πίνακα ή του υπολογιστή και του προτζέκτορα ξεκινάει μαζί με τα παιδιά να παίζουν τα παιχνίδια που έχει ήδη επιλέξει (Ακρίβειας: Λαβύρινθος, Μπαλόνια, Σύνθεσης πρότασης: Γέφυρα, ποταμόπλοιο). Καλεί κάποια παιδιά να επιλέγουν τις απαντήσεις. Σημειώνουν στο τετράδιο τα ρήματα που υπάρχουν πριν από το τους συμπληρωματικούς δείκτες «ότι» και «να». *Παιδιά*: Συζητούν τις διαθέσιμες επιλογές και συμφωνούν στη σωστή απάντηση πριν την επιλέξουν στο παιχνίδι. Πριν κάνουν την επιλογή στο παιχνίδι, γράφουν στο τετράδιο τα ρήματα που εισάγουν συμπληρωματική πρόταση. *Ομαδική συζήτηση* (10 λεπτά): Ο/Η εκπαιδευτικός συζητά και αναλύει τις λανθασμένες επιλογές των παιδιών. Σχηματίζονται μεγαλύτερες ομάδες 4-6 ατόμων. Τα παιδιά συζητούν τι έχουν μάθει κατά τη διάρκεια του μαθήματος. *Ολοκλήρωση μαθήματος* (5 λεπτά): Ο/Η εκπαιδευτικός δίνει εργασία για το σπίτι, κατά την οποία καλούνται οι μαθητές/ μαθήτριες να γράψουν 10 δικές τους προτάσεις με «ότι», «να».

Πριν τη χρήση και αξιολόγηση του λογισμικού στις τάξεις, έγινε ένα εργαστήριο εκπαίδευσης και συνεργασίας μεταξύ των ερευνητών του Π.Ι. και των εκπαιδευτικών που συμμετέχουν στο πρόγραμμα, μέσω του οποίου επιτεύχθηκε η εξοικείωση των εκπαιδευτικών με τις εφαρμογές του D_Read-Narrate. Στο πλαίσιο του εργαστηρίου συζητήθηκαν και τρόποι πιθανής ένταξης του λογισμικού στο μάθημα. Ενδεικτικά, παρατίθεται ένα σύντομο σχέδιο μαθήματος, στο οποίο φαίνεται η αξιοποίηση του λογισμικού κατά τη διδασκαλία των Συμπληρωματικών προτάσεων (Πίνακας 2).

Αφού ολοκληρώθηκε το εργαστήριο ξεκίνησε η αξιοποίηση των εφαρμογών του D_Read-Narrate από τους/τις εκπαιδευτικούς. Η χρήση του λογισμικού κυμαίνεται από 10 έως 20 λεπτά κάθε φορά στο πλαίσιο του μαθήματος και

γίνεται από τον/την εκπαιδευτικό με την υποστήριξη μέλους της ερευνητικής ομάδας. Η αξιολόγηση του λογισμικού πρόκειται να ολοκληρωθεί τον Δεκέμβριο του 2025, οπότε και αναμένονται τα συνολικά τελικά αποτελέσματα

ΣΥΜΠΕΡΑΣΜΑ

Το συγκεκριμένο έργο αναμένεται να έχει σημαντικό κοινωνικό και επιστημονικό αντίκτυπο. Ο κοινωνικός του αντίκτυπος σχετίζεται με το γεγονός ότι το D_Read-Narrate στοχεύει στην ενίσχυση των δεξιοτήτων επικοινωνίας και μάθησης των δίγλωσσων μαθητ(ρι)ών και, ως εκ τούτου, αναμένεται να βελτιώσει τις ακαδημαϊκές τους επιδόσεις. Παράλληλα, φιλοδοξεί να μειώσει τα μαθησιακά χάσματα που δημιουργούνται από τη γλωσσική ποικιλότητα και την όποια καθυστέρηση στην κατάκτηση της γλώσσας του σχολείου, βελτιώνοντας την ομαλή ένταξη και τις σχολικές επιδόσεις των παιδιών με μεταναστευτικό υπόβαθρο ή με άλλη μητρική γλώσσα εκτός της Ελληνικής.

Ο επιστημονικός αντίκτυπος του έργου έγκειται στη συμβολή του στην επιστημονική γνώση σχετικά με την αλληλεπίδραση μεταξύ της γραμματικής γνώσης και των δεξιοτήτων που σχετίζονται με το κείμενο (ανάγνωση και αφήγηση) σε δίγλωσσα και ελληνόφωνα παιδιά. Επιπλέον, δεδομένης της καθολικότητας της δι-/πολυγλωσσίας, το έργο αναμένεται να έχει ευρύτερο επιστημονικό αντίκτυπο, καθώς τα ευρήματά του μπορούν να μεταφερθούν σε άλλα δίγλωσσα (μη ελληνικά) περιβάλλοντα. Η παραγόμενη υποδομή, ο σχεδιασμός του παιχνιδιού και το παιδαγωγικό μοντέλο μπορούν να αξιοποιηθούν και μετά το τέλος του έργου για ερευνητικούς σκοπούς.

Τέλος, μέσα από την πιλοτική εφαρμογή του D_Read-Narrate καταδεικνύεται ότι η στοχευμένη, εξατομικευμένη μάθηση ενισχύει με τρόπο ουσιαστικό τις γλωσσικές και αναγνωστικές δεξιότητες των μαθητών δημοτικού, ιδιαίτερα των δίγλωσσων που μαθαίνουν την Ελληνική ως Γ2. Μέσα από τα δυναμικά Μοντέλα Πεδίου το λογισμικό προσαρμόζει σε πραγματικό χρόνο το επίπεδο δυσκολίας και το είδος των δραστηριοτήτων στις επιδόσεις και ανάγκες του κάθε παιδιού. Το λογισμικό υποστηρίζει την αυτονομία των μαθητών, δίνοντάς τους την αίσθηση ελέγχου της μαθησιακής τους διαδρομής και ενισχύοντας την αυτοπεποίθηση μέσω συνεχούς ανατροφοδότησης. Επίσης, διευκολύνει τους εκπαιδευτικούς να εντοπίσουν γλωσσικά κενά και να παρέμβουν με στοχευμένο τρόπο, αξιοποιώντας εξατομικευμένα πρωτόκολλα αξιολόγησης και ψηφιακά εργαλεία παρακολούθησης επιδόσεων.

Η οριστική αξιολόγηση του λογισμικού, σε εξέλιξη έως τον Δεκέμβριο του 2025, θα επιτρέψει την ποσοτική και ποιοτική εκτίμηση της αποτελεσματικότητάς του, δίνοντας τη δυνατότητα περαιτέρω βελτιστοποίησης και κλιμάκωσης σε ολοένα μεγαλύτερο αριθμό σχολικών μονάδων.

ΠΕΡΙΛΗΨΗ

Η παρούσα εργασία επικεντρώνεται στην υποστήριξη της διδασκαλίας βασικών εννοιών των Δομών Δεδομένων και Αλγορίθμων, μέσω της ανάπτυξης ενός διαδραστικού εκπαιδευτικού περιβάλλοντος εικονικής πραγματικότητας (Virtual Reality – VR). Στόχος είναι η ενίσχυση της εννοιολογικής κατανόησης μέσω βιωματικής και πειραματικής αλληλεπίδρασης, αξιοποιώντας τις δυνατότητες της VR τεχνολογίας.

Το Virtual AlgoLab, είναι ένα εκπαιδευτικό VR παιχνίδι, υλοποιημένο στην πλατφόρμα Unity, το οποίο περιλαμβάνει έναν εικονικό χώρο με τέσσερα ανεξάρτητα παιχνίδια (minigame). Κάθε παιχνίδι (minigame) έχει σχεδιαστεί ώστε να αποτυπώνει και να αναδεικνύει μία θεμελιώδη έννοια της Πληροφορικής: συνδεδεμένες λίστες, κόμβους, κύκλους Hamilton και δυαδική αναζήτηση. Η δομή του περιβάλλοντος χρήστη είναι εργονομική και απλοποιημένη, με στόχο την υποστήριξη της πλοήγησης από αρχάριους χρήστες χωρίς προηγούμενη εμπειρία σε VR συστήματα.

Η λειτουργικότητα του παιχνιδιού εστιάζει στην ενεργή εμπλοκή των χρηστών μέσω πλοήγησης, επιλογής, και αλληλεπίδρασης με αντικείμενα και έννοιες που αντιστοιχούν σε αλγοριθμικές διαδικασίες ή δομές δεδομένων. Η σχεδίαση βασίστηκε σε παιδαγωγικές αρχές ενεργητικής μάθησης και εννοιολογικής μεταφοράς σε ψηφιακά περιβάλλοντα.

Για την αποτίμηση της αποτελεσματικότητας του παιχνιδιού στην επίτευξη του σκοπού του, πραγματοποιήθηκαν δοκιμές με μαθητές δημοτικού, και φοιτητές. Παρατηρήθηκε πως το VR Algolabs καταφέρνει με επιτυχία να ελκύσει το ενδιαφέρον όλων των ηλικιακών ομάδων, ενώ οι χρήστες που το αξιολόγησαν δεν παρουσίασαν ιδιαίτερη δυσκολία στην κατανόηση του στόχου και του θεωρητικού υπόβαθρου από κάθε minigame.

Λέξεις-Κλειδιά: Virtual Reality, AlgoLab, εκπαιδευτικό παιχνίδι, Δομές Δεδομένων, Αλγόριθμοι, Unity.

ΕΙΣΑΓΩΓΗ

Η διδασκαλία αφηρημένων εννοιών, όπως οι δομές δεδομένων και οι αλγόριθμοι, αποτελεί σήμερα αναγκαιότητα, αλλά και διαχρονική πρόκληση, ιδίως στον τομέα της πληροφορικής, όπου η κατανόηση αφηρημένων εννοιών όπως οι δομές δεδομένων και οι αλγόριθμοι μπορεί να αποδειχθεί δύσκολη για τους φοιτητές. Η καλλιέργεια της αλγοριθμικής και υπολογιστικής σκέψης (αναφορά ΠΣ) και αποτελεί βασική δεξιότητα του 21ου αιώνα ξεκινώντας από την προσχολική κιόλας εκπαίδευση.

Η υπολογιστική σκέψη είναι έννοια ευρύτερη της αλγοριθμικής. Η υπολογιστική σκέψη υπάρχει στον τομέα της επιστήμης των υπολογιστών από τη δεκαετία του 1950, όπου συχνά διατυπωνόταν ως αλγοριθμική σκέψη (Denning 2009). Καθώς ο τομέας προχωρούσε, αναπτύχθηκε μια διάκριση μεταξύ των δύο όρων. Η αλγοριθμική σκέψη πηγάζει από την έννοια του αλγορίθμου, η οποία αναφέρεται στην επίλυση ενός προβλήματος αναπτύσσοντας ένα σύνολο βημάτων που λαμβάνονται σε μια ακολουθία για την επίτευξη του επιθυμητού αποτελέσματος (Katai 2014). Η αλγοριθμική σκέψη είναι η διαδικασία σκέψης για τη διαμόρφωση των βημάτων που οδηγούν στο επιθυμητό αποτέλεσμα (Hu 2011; Katai 2014), ή όπως αναφέρεται από τους (Cooper et al. 2010) «η αλγοριθμική σκέψη δεν απαιτεί υπολογιστή και μαθηματική σκέψη και εξαρτάται σχεδόν αποκλειστικά από την ικανότητα τυποποίησης του ανθρώπου για αφαίρεση». Συγκεκριμένα, η αλγοριθμική σκέψη είναι μια δεξιότητα προσανατολισμένη στη λεπτομέρεια που εμπλέκει τη γνωστική ικανότητα κάποιου για κατανόηση και ανάλυση προβλημάτων, αναπτύσσοντας μια ακολουθία βημάτων προς μια κατάλληλη λύση, βελτιστοποιώντας την ακολουθία βημάτων και βρίσκοντας εναλλακτικά βήματα για να διασφαλιστεί ότι λαμβάνονται υπόψη εναλλακτικές προσεγγίσεις στη λύση (Futschek 2006). Παραδοσιακά, η πληροφορική ακολουθούσε μια αλγοριθμική δομή όπου λαμβάνεται μια είσοδος και υποβάλλεται σε επεξεργασία διαδοχικά για να παρέχει μια έξοδο. Έτσι, η αλγοριθμική σκέψη είναι μια από τις βασικές δεξιότητες στην υπολογιστική σκέψη. Πράγματι, οι Yadav, Stephenson και Hong (Yadav et al. 2017) υποστήριξαν ότι «οι αλγόριθμοι είναι κεντρικοί τόσο στην επιστήμη των υπολογιστών όσο και στην υπολογιστική σκέψη. Οι αλγόριθμοι αποτελούν τη βάση των πιο βασικών εργασιών που εκτελεί ο καθένας, από την τήρηση μιας απλής συνταγής μαγειρικής έως την παροχή περίπλοκων οδηγιών οδήγησης». Οι Kiss και Akri (Kiss and Akri, 2017) διαπίστωσαν ότι η έλλειψη υπόβαθρου στην αλγοριθμική σκέψη μείωνε τους φοιτητές στην τριτοβάθμια εκπαίδευση και υποστήριξαν ότι οι παραδοσιακές στρατηγικές διδασκαλίας ήταν ακατάλληλες για την ενίσχυση του εννοιολογικού πλαισίου που απαιτείται για τον προγραμματισμό και την επίλυση προβλημάτων. Έτσι, τόνισαν την ανάγκη για στρατηγική εστίαση στην αλγοριθμική και υπολογιστική σκέψη στην πρωτοβάθμια και δευτεροβάθμια εκπαίδευση.

Στα Νέα Προγράμματα Σπουδών (ΠΣ) αναδεικνύεται η σημαντικότητα καλλιέργειας της αλγοριθμικής σκέψης θέτοντάς την στο 1ο Θεματικό πεδίο όλων των τάξεων της Πρωτοβάθμιας και Δευτεροβάθμιας εκπαίδευσης, καθώς η ανάπτυξή της αποτελεί βασικό πυλώνα για την καλλιέργεια της υπολογιστικής σκέψης των μαθητών με σκοπό την επίλυση αυθεντικών προβλημάτων του πραγματικού κόσμου.

Στο πλαίσιο αυτό, η ανάπτυξη διαδραστικών και ελκυστικών εκπαιδευτικών εργαλείων αποτελεί πρόκληση, ιδίως για έννοιες όπως οι δομές δεδομένων και οι αλγόριθμοι. Η εικονική πραγματικότητα (VR) έχει αναδειχθεί ως μια πολλά υποσχόμενη τεχνολογία για την εκπαίδευση, προσφέροντας νέες δυνατότητες στη διδασκαλία (Mikropoulos and Natsis 2011). Η ενσωμάτωση της εικονικής πραγματικότητας στην εκπαίδευση παρουσιάζει ουσιαστικά ένα μέσο για την παροχή εξατομικευμένης ανατροφοδότησης στους μαθητές, βελτιώνοντας την κατανόηση του αντικειμένου (Marougkas et al. 2023). Οι μαθητές μπορούν να δουν και να τροποποιήσουν δυναμικά αλγορίθμους, να πειραματιστούν με δεδομένα και να παρατηρήσουν σε πραγματικό χρόνο την εκτέλεση προγραμματιστικών διαδικασιών.

ΚΙΝΗΤΡΑ ΚΑΙ ΣΤΟΧΟΙ

Σκοπός της παρούσας εργασίας είναι η ανάπτυξη ενός VR παιχνιδιού με στόχο την υποστήριξη της εκπαίδευσης στις δομές δεδομένων και τους αλγορίθμους, το οποίο ονομάζεται Virtual AlgoLab. Το Virtual AlgoLab, στοχεύει στην αξιοποίηση των δυνατοτήτων της εικονικής πραγματικότητας για τη δημιουργία ενός καινοτόμου εκπαιδευτικού παιχνιδιού που θα διδάσκει δομές δεδομένων και αλγορίθμους με έναν ελκυστικό και διαισθητικό τρόπο. Το παιχνίδι επιτρέπει στους χρήστες να οπτικοποιούν και να αλληλεπιδρούν με αφηρημένες έννοιες, όπως ο πίνακας, η λίστα, η συνδεδεμένη λίστα, και με τους αλγορίθμους δυαδικής αναζήτησης και εύρεσης κύκλων Hamilton, σε ένα εικονικό περιβάλλον. Αυτό επιτυγχάνεται μέσω της χρήσης ελκυστικών τρισδιάστατων γραφικών και διαδραστικών μηχανισμών, με σκοπό να ενισχυθεί η συμμετοχή των μαθητών και να διευκολυνθεί η βαθύτερη κατανόηση των θεμελιωδών αρχών της πληροφορικής. Επίσης, στα νέα προγράμματα σπουδών έχει εισαχθεί η διδασκαλία ποιο σύνθετων αλγορίθμων, όπως ο αλγόριθμος εύρεσης σύντομων μονοπατιών (αλγόριθμος Dijkstra) στο Γυμνάσιο, γεγονός που καθιστά αναγκαία τη κατανόηση της δομής της συνδεδεμένης λίστας.

Η έρευνα για τη χρήση εργαλείων εικονικής πραγματικότητας μετρά αρκετά χρόνια. Οι Μικρόπουλος και Νάτσης στην εργασία τους (Mikropoulos and Natsis 2011), παρουσίασαν μια ανασκόπηση της εμπειρικής έρευνας που έγινε μέσα σε μία δεκαετία (1999–2009) γύρω από τη χρήση εικονικών περιβαλλόντων (virtual environments - VEs) στην εκπαίδευση, τα αποτελέσματα της οποίας υποστηρίζουν ότι τα εικονικά περιβάλλοντα έχουν σημαντική δυναμική στην εκπαίδευση, ιδίως όταν είναι σχεδιασμένα με βάση παιδαγωγικές αρχές. Επίσης, οι συγγραφείς τονίζουν την ανάγκη για περαιτέρω έρευνα σε πιο εμβυθιστικά VEs και σε μεγαλύτερη ποικιλία γνωστικών αντικειμένων. Αντίστοιχη μελέτη για την περίοδο 2010–2022 (Al-Ansi 2023), τονίζει τη σημασία της AR και VR στην εκπαιδευτική διαδικασία, αναγνωρίζοντας τα πλεονεκτήματά τους, αλλά και τις προκλήσεις που συνδέονται με την εφαρμογή τους. Επισημαίνεται η ανάγκη για περαιτέρω έρευνα και ανάπτυξη, ώστε να επιτευχθεί η ευρεία και αποτελεσματική ενσωμάτωσή τους στην εκπαίδευση.

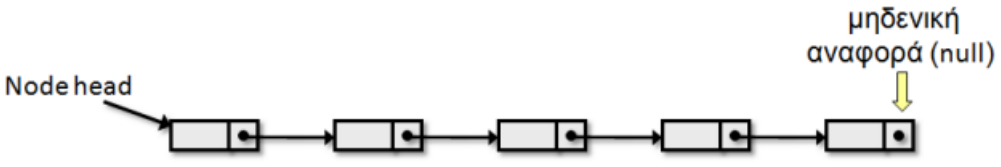
Οι οπτικοποιήσεις αποτελούν μια κοινή προσέγγιση για την αντιμετώπιση των δυσκολιών της εκμάθησης αφηρημένων εννοιών. Ειδικότερα για τις δομές δεδομένων και τους αλγόριθμους, τα διαγράμματα και οι κινούμενες εικόνες (animations) χρησιμοποιούνται συχνά για τη γραφική απεικόνιση των τυποποιημένων λειτουργιών τους (Brown et al., 1984; Halim et al., 2012; Hansen et al., 2002; Shaffer et al.; 2010). Ωστόσο, πρόσφατες μελέτες έχουν δείξει ότι οι οπτικοποιήσεις από μόνες τους δεν επαρκούν για την επιτυχή εκμάθηση δομών δεδομένων και αλγορίθμων. Καθώς οι μαθητές τείνουν να ενδιαφέρονται περισσότερο για περιβάλλοντα όπου μπορούν να εξερευνήσουν, να πειραματιστούν και να προβλέψουν, τα εργαλεία οπτικοποίησης που δεν προσφέρουν υψηλή διαδραστικότητα και επαρκή ανατροφοδότηση μπορεί να μην αποτελούν κίνητρο για πολλούς μαθητές (Dicheva and Hodge, 2018; Esponda-Argüero, 2010; Hundhausen, 2002).

Για την αντιμετώπιση των προβλημάτων που σχετίζονται με τα χαμηλά κίνητρα, η μάθηση βασισμένη σε παιχνίδια (GBL) έχει δείξει πολλά υποσχόμενα αποτελέσματα σε διάφορους κλάδους και ακαδημαϊκά επίπεδα (Li και Tsai, 2013; Qian και Clark; 2016). Τα εκπαιδευτικά παιχνίδια έχει αποδειχθεί ότι βελτιώνουν την αποτελεσματικότητα της μάθησης, το ενδιαφέρον και τα κίνητρα, ενώ επιτρέπουν στους μαθητές να επιτύχουν μια σειρά μαθησιακών στόχων (Dicheva και Hodge, 2018; Souza et al., 2017). Τα παιχνίδια ικανοποιούν σημαντικές παιδαγωγικές αρχές, όπως η παροχή άμεσης ανατροφοδότησης και η σαφήνεια των στόχων. Υπάρχει μια ιδιαίτερη ευκαιρία για τη χρήση εκπαιδευτικών παιχνιδιών για τη διδασκαλία των δομών δεδομένων και των αλγορίθμων. Μια πρόσφατη μελέτη των Battistella κ.ά. διαπίστωσε ότι λιγότερο από το 10% των παιχνιδιών που σχετίζονται με την πληροφορική ήταν υλοποιημένα γύρω από θεμελιώδεις έννοιες των δομών δεδομένων και των αλγορίθμων (Battistella κ.ά.; 2017).

Στην εργασία (Gerini et al.;2023) προτείνεται το VRCoding, ένα σύστημα μπλοκ-προγραμματισμού σε περιβάλλον εικονικής πραγματικότητας που συνδυάζει gamification με passive haptics, με στόχο την ενίσχυση της υπολογιστικής σκέψης. Το περιβάλλον υλοποιείται ως μια εικονική αίθουσα arcade, όπου οι χρήστες λύνουν προγραμματιστικές ασκήσεις χειριζόμενοι φυσικά αντικείμενα τα οποία αντιστοιχούν σε εικονικά μπλοκ. Πειραματική αξιολόγηση με μαθητές και φοιτητές έδειξε ότι το VRCoding αυξάνει το αίσθημα εμβύθισης και τη θετική εμπειρία χρήστη σε σχέση με παραδοσιακά περιβάλλοντα τύπου Blockly, αν και εντοπίστηκαν ζητήματα απόδοσης λόγω προβλημάτων στην παρακολούθηση αντικειμένων. Οι Shabanah et al. (Shabanah et al.; 2010) προτείνουν την έννοια του Algorithm Game Visualization, όπου εκπαιδευτικά ψηφιακά παιχνίδια σχεδιάζονται έτσι ώστε να αναπαριστούν αλγορίθμους μέσω γραφικών και παιγνιώδους αλληλεπίδρασης. Αναλύεται η αρχιτεκτονική και οι βασικές σχεδιαστικές αρχές των "αλγοριθμικών παιχνιδιών", ενώ παρουσιάζονται παραδείγματα όπως παιχνίδια για δυαδική αναζήτηση, συνδεδεμένες λίστες και δυαδικά δέντρα αναζήτησης. Η εργασία υποστηρίζει ότι το "παίζω" αποτελεί μια νέα μορφή ενεργής εμπλοκής με τις οπτικοποιήσεις, που συνδυάζει ευχαρίστηση με γνωστική εμπλοκή, ενισχύοντας έτσι την κατανόηση πολύπλοκων εννοιών αλγορίθμων. Οι Oyelere et al. (Oyelere et al.; 2023) πραγματοποίησαν πιλοτική αξιολόγηση της εφαρμογής iThinkSmart, η οποία ενσωματώνει εκπαιδευτικά mini-games σε περιβάλλον εικονικής πραγματικότητας με σκοπό την ενίσχυση των δεξιοτήτων υπολογιστικής σκέψης σε φοιτητές ανώτατης εκπαίδευσης. Τα παιχνίδια —συμπεριλαμβανομένων των Tower of Hanoi και River Crossing— υλοποιούνται μέσα σε μια εικονική εξερεύνηση τοποθεσιών και αξιολογούνται τόσο ποσοτικά (μέσω του Objective Distance μοντέλου αξιολόγησης) όσο και ποιοτικά (με συνεντεύξεις χρηστών). Τα ευρήματα δείχνουν ότι το παιχνίδι ενίσχυσε τη γνωστική εμπλοκή, την περιέργεια και την απόκτηση δεξιοτήτων όπως η αναδρομή, η αποσύνθεση προβλήματος και η αλγοριθμική σκέψη. Στην εργασία των Rajeev και Sharma, προτείνεται ένα 3D-μοντέλο που χρησιμοποιεί το 3d-max και το sketch-up για τη διδασκαλία συνδεδεμένης λίστας και δυαδικών δέντρων αναζήτησης (Rajeev και Sharma;2020). Άλλη μια εργασία που αφορά τους αλγόριθμους, (Grivokostopoulou et al. 2016) παρουσιάζεται ένα εκπαιδευτικό περιβάλλον που συνδυάζει εικονική πραγματικότητα (VR) και gamification για τη διδασκαλία αλγορίθμων αναζήτησης σε προπτυχιακούς φοιτητές.

Αυτή η εργασία συμβάλλει στην εμβάθυνση της έρευνας σχετικά με τη χρήση της εικονικής πραγματικότητας ως εκπαιδευτικού εργαλείου για την κατανόηση των βασικών δομών δεδομένων, του πίνακα, της λίστας και της συνδεδεμένης λίστας καθώς και των αλγορίθμων εύρεσης κύκλου Hamilton και δυαδικής αναζήτησης από μαθητές. Η συνεισφορά της παρούσας εργασίας έγκειται στην εμπεριστατωμένη περιγραφή του σχεδιασμού και της υλοποίησης του

Virtual AlgoLab, ένα VR παιχνίδι που έχει σχεδιαστεί με γνώμονα την εκμάθηση των στοιχειωδών δομών από παιδιά μικρής ηλικίας. Το παιχνίδι αυτό ενσωματώνει στοιχεία gamification, διαδραστικότητας και εικονικής πραγματικότητας, προσφέροντας μια μοναδική συνδυαστική προσέγγιση για τη δημιουργία ενός ελκυστικού και αποτελεσματικού εκπαιδευτικού περιβάλλοντος. Επίσης, υλοποιεί δομές και αλγόριθμους με τρόπο κατανοητό για παιδιά σχολικής ηλικίας που έρχονται πρώτη φορά σε επαφή με τις έννοιες αυτές. Η χρήση εικονικών αναπαραστάσεων αποτελεί μια καινοτόμο εναλλακτική λύση στα παραδοσιακά εργαστήρια, προσφέροντας στους μαθητές τη δυνατότητα να βιώσουν αυθεντικές εμπειρίες μάθησης, ιδίως σε περιπτώσεις όπου η φυσική παρουσία μπορεί να ενέχει κινδύνους ή να υπόκειται σε περιορισμούς χωροχρόνου. Τα περιβάλλοντα εικονικής πραγματικότητας παρέχουν μια μοναδική ευκαιρία στους μαθητές να πειραματιστούν και να εξερευνήσουν πολύπλοκες έννοιες με έναν τρόπο που δεν είναι εφικτός στα παραδοσιακά εκπαιδευτικά πλαίσια (Duwan et al., 2019).



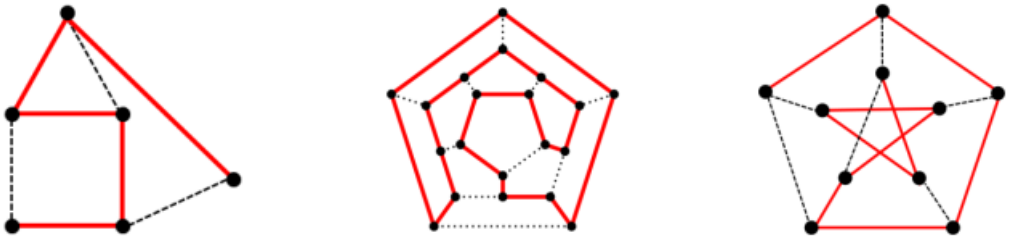
Στην επόμενη ενότητα, θα παρουσιαστεί το θεωρητικό υπόβαθρο, το οποίο θα περιλαμβάνει μια επισκόπηση των δομών δεδομένων και των αλγόριθμων που υλοποιήθηκα. Στην συνέχεια, θα παρουσιαστεί η περιγραφή της εφαρμογής εικονικής πραγματικότητας που υλοποιήθηκε, παρέχοντας μια εμπεριστατωμένη παρουσίαση της αρχιτεκτονικής του συστήματος, των κύριων λειτουργικών μονάδων και των διεπαφών χρήστη που συνθέτουν το Virtual AlgoLab. Επιπλέον, θα αναφερθούμε στις τεχνικές λεπτομέρειες της διαδικασίας ανάπτυξης, παρέχοντας πληροφορίες σχετικά με τις γλώσσες προγραμματισμού, τα εργαλεία και τις βιβλιοθήκες που χρησιμοποιήθηκαν για τη δημιουργία του παιχνιδιού. Η τελευταία ενότητα αφορά στα συμπεράσματα σχετικά με την αποτελεσματικότητα του παιχνιδιού και θα προταθούν κατευθύνσεις για μελλοντική έρευνα.

ΘΕΩΡΗΤΙΚΌ ΥΠΟΒΑΘΡΟ

Ένας πίνακας (array), η θεμελιώδης δομή δεδομένων, είναι ένας τύπος δεδομένων που αποθηκεύει δεδομένα (στοιχεία) του ιδίου τύπου (π.χ. πίνακας ακεραίων, πίνακας δεικτών σε ακέραιους κ.λπ.), σε συνεχόμενες θέσεις στη μνήμη (δηλαδή στη μνήμη, το i-οστο στοιχείο κάθε πίνακα βρίσκεται αμέσως μετά το $(i-1)$-οστο στοιχείο του και αμέσως πριν από το $(i+1)$-οστο στοιχείο του) και στα οποία γίνεται αναφορά με χρήση ακέραιου δείκτη (δηλαδή, για έναν πίνακα A χρησιμοποιούμε τον συμβολισμό $A[2]$ για το 3ο στοιχείο του A εάν θεωρήσουμε ότι το 1ο στοιχείο του πίνακα είναι το $A[0]$ (όπως συμβαίνει στις γλώσσες προγραμματισμού C και Java)) (Georgiadis et al.; 2016). Ο δείκτης, είναι μια μεταβλητή που μπορεί να έχει οποιοδήποτε όνομα. Είναι όμως σύνηθες στον προγραμματισμό να χρησιμοποιούνται ως δείκτες οι μεταβλητές i, j, k. Η ευελιξία των πινάκων έγκειται στην ικανότητά τους να αποθηκεύουν δεδομένα διαφόρων τύπων, όπως ακέραιους αριθμούς, χαρακτήρες ή ακόμα και άλλους πίνακες, καθιστώντας τους απαραίτητους σε πολλούς αλγορίθμους. Οι πίνακες αποτελούν μια θεμελιώδη δομή δεδομένων στην επιστήμη των υπολογιστών, αλλά οι μαθητές συχνά αντιμετωπίζουν δυσκολίες στην κατανόηση και τη χρήση τους (Vrachnos & Jimoyiannis, 2017). Οι μαθητές συχνά δυσκολεύονται να κατανοήσουν την έννοια των δεικτών, τη διάκριση μεταξύ δεικτών και τιμών στοιχείων και τη διαχείριση της μνήμης που σχετίζεται με τη δημιουργία και την τροποποίηση πινάκων.

Μια συνδεδεμένη λίστα (Εικόνα 1), σε αντίθεση με έναν πίνακα, είναι μια δυναμική δομή δεδομένων, που αποτελείται από μια ακολουθία κόμβων, όπου κάθε κόμβος περιέχει ένα στοιχείο δεδομένων και έναν δείκτη προς τον επόμενο κόμβο της ακολουθίας. Οι μαθητές συχνά δυσκολεύονται να κατανοήσουν την έννοια των δεικτών, τις διαδικασίες εισαγωγής και διαγραφής κόμβων και τη διαχείριση της μνήμης που σχετίζεται με τη δημιουργία και την τροποποίηση συνδεδεμένων λιστών. Η εργασία των Zingaro et al. (Zingaro et al., 2018) διερευνά τις δυσκολίες που αντιμετωπίζουν οι φοιτητές με τις βασικές δομές δεδομένων, όπως οι πίνακες, οι συνδεδεμένες λίστες και τα δυαδικά δέντρα αναζήτησης. Η εν λόγω έρευνα, αναδεικνύοντας τις κοινές παρανοήσεις και τις προκλήσεις που αντιμετωπίζουν οι μαθητές, υπογραμμίζει την ανάγκη για εναλλακτικές διδακτικές προσεγγίσεις, όπως η χρήση της εικονικής πραγματικότητας, για την αποτελεσματικότερη εκμάθηση των πινάκων.

Εικόνα 1
Μια απλά συνδεδεμένη λίστα με 5 κόμβους



Ο αλγόριθμος δυαδικής αναζήτησης είναι ένας αποτελεσματικός αλγόριθμος για την εύρεση ενός συγκεκριμένου στοιχείου σε έναν ταξινομημένο πίνακα σε χρόνο $O(\log_2 n)$. Ο αλγόριθμος λειτουργεί διαιρώντας

επανειλημμένα το διάστημα αναζήτησης στο μισό μέχρι να βρεθεί το στοιχείο ή να προσδιοριστεί ότι το στοιχείο δεν υπάρχει στον πίνακα. Ο αλγόριθμος χρησιμοποιεί την μέθοδο «διαίρει και βασίλευε» (divide and conquer). Η βασική ιδέα της μεθόδου συνίσταται στη διάσπαση του προβλήματος που μας ενδιαφέρει σε (δύο, τις περισσότερες φορές) μικρότερα προβλήματα. Εάν αυτά δεν είναι αρκετά μικρά, ώστε να μπορούμε να τα επιλύσουμε απευθείας, επαναλαμβάνουμε τη διαδικασία διάσπασης και ούτω καθεξής. Όταν πλέον φθάσουμε σε προβλήματα τα οποία μπορούν να επιλυθούν απευθείας, τα επιλύουμε και αρχίζουμε να συνθέτουμε κατάλληλα τις λύσεις των προβλημάτων αυτών, ώστε να υπολογίσουμε τη λύση μεγαλύτερων προβλημάτων της διάσπασης και ούτω καθεξής, έως ότου φθάσουμε στο αρχικό μας πρόβλημα (Georgiadis et al.; 2016).

Κατά την ενασχόληση των μαθητών με τον αλγόριθμο της δυαδικής αναζήτησης σε ταξινομημένες λίστες, προωθείται η ανάπτυξη θεμελιωδών δεξιοτήτων υπολογιστικής σκέψης. Αρχικά, οι μαθητές μαθαίνουν να αναλύουν και να κατανοούν τη διατύπωση του προβλήματος, αναγνωρίζοντας τη σημασία της διάταξης των στοιχείων (Wing, 2006· Grover & Pea, 2013). Καθώς εισάγονται στη στρατηγική "divide and conquer", κατανοούν τη λογική διαμερισμού της λίστας, εντοπίζοντας το μέσο στοιχείο και συγκρίνοντάς το με το ζητούμενο, ώστε να περιορίσουν το εύρος αναζήτησης (Cormen et al., 2009). Η διαδικασία αυτή ενισχύει την κατανόηση αφηρημένων εννοιών όπως η δυαδική λογική, η υπό συνθήκη εκτέλεση και η αναδρομή (Lye & Koh, 2014). Παράλληλα, οι μαθητές αντιλαμβάνονται ότι η υλοποίηση μπορεί να επιτευχθεί είτε επαναληπτικά είτε αναδρομικά, γεγονός που ενισχύει τη μεταγνωστική τους επίγνωση σχετικά με διαφορετικές προσεγγίσεις στην επίλυση προβλημάτων (Grover et al., 2015). Η οπτική αναπαράσταση της διαδικασίας μέσω γραφικών εργαλείων ή εκπαιδευτικών παιχνιδιών διευκολύνει την κατανόηση και την εσωτερίκευση της αλγοριθμικής ροής (Hundhausen et al., 2002), ενώ ταυτόχρονα δημιουργεί συνθήκες ενεργούς εμπλοκής των μαθητών. Τέλος, η συζήτηση για την αποδοτικότητα του αλγορίθμου, ιδίως ως προς την πολυπλοκότητα O(log n), προσφέρει μια εισαγωγή σε έννοιες ανάλυσης απόδοσης, συγκριτικής αξιολόγησης και επιλογής κατάλληλων αλγορίθμων, που αποτελούν βασικά στοιχεία του ψηφιακού εγγραμματισμού (Denning, 2009).

Παρά την ευρεία χρήση του, ο αλγόριθμος της δυαδικής αναζήτησης παρουσιάζει σημαντικές γνωστικές προκλήσεις για τους μαθητές, ακόμη και σε προχωρημένα επίπεδα εκπαίδευσης. Έρευνες έχουν δείξει ότι πολλοί φοιτητές δυσκολεύονται να κατανοήσουν τη λογική του "διαίρει και βασίλευε", ιδιαίτερα τον εντοπισμό και τη σωστή χρήση του μέσου δείκτη (Zingaro & Porter, 2014). Συχνές παρανοήσεις περιλαμβάνουν τη σύγχυση μεταξύ των ορίων της υπολίστας (αρχή–τέλος) και την εσφαλμένη σύγκριση του ζητούμενου στοιχείου με το μεσαίο (Lister et al., 2009). Επιπλέον, η αφηρημένη φύση της δυαδικής αναζήτησης —η οποία προϋποθέτει αναδρομική ή επαναληπτική σκέψη, καθώς και διανοητική παρακολούθηση του διαμερισμού της λίστας— καθιστά δύσκολη τη διατήρηση της γνωστικής συνέπειας, ιδίως σε μαθητές με ελλιπή εμπειρία σε αλγοριθμική σκέψη (Fouh, Akbar, & Shaffer, 2012). Οι αναπαραστάσεις που βασίζονται μόνο σε κείμενο ή ψευδοκώδικα συχνά επιδεινώνουν τη σύγχυση, ενώ η ενσωμάτωση οπτικών εργαλείων ή διαδραστικών προσομοιώσεων έχει αποδειχθεί αποτελεσματική στην ενίσχυση της κατανόησης (Hundhausen et al., 2002). Οι παραπάνω δυσκολίες καθιστούν τη διδασκαλία της δυαδικής αναζήτησης ιδιαίτερα απαιτητική, ενώ υποδεικνύουν την ανάγκη για πολυτροπικές στρατηγικές και παραδείγματα που γεφυρώνουν τη θεωρία με την πράξη.

Εικόνα 2
Γραφήματα με διαδρομές και κύκλους Hamilton

Στην θεωρία γραφημάτων το πρόβλημα της διαδρομής Hamilton (Hamiltonian path problem ή HP) και το πρόβλημα του κύκλου Hamilton (Hamiltonian cycle problem ή HC) ορίζονται ως τα προβλήματα καθορισμού, εάν ένα γράφημα έχει ή όχι μία διαδρομή ή έναν κύκλο Hamilton. Μία διαδρομή $P = (u, x_1, x_2, \ldots, x_p, v)$ μεταξύ δύο κόμβων u και v ενός γραφήματος G ονομάζεται διαδρομή Hamilton, εάν περιέχει όλους τους κόμβους του G ακριβώς μία φορά (άρα, $p=n$-2 εάν P είναι διαδρομή Hamilton). Μία διαδρομή Hamilton $((u, x_1, x_2, \ldots, x_{v-2}, v)$ ονομάζεται κύκλος Hamilton, εάν οι τερματικοί κόμβοι u και v της διαδρομής είναι γειτονικοί (δηλαδή συνδέονται με ακμή). Το γράφημα (α) της Εικόνας 2 έχει μία διαδρομή Hamilton (κόκκινη διαδρομή), ενώ το γράφημα (β) έχει κύκλο Hamilton. Το γράφημα (γ)

του ίδιου σχήματος, γράφημα Herschel, είναι το μικρότερο δυνατό πολυεδρικό γράφημα που δεν έχει κύκλο Hamilton (Nikolopoulos et al. 2015).

Η έννοια των γραφημάτων (graphs) αποτελεί κεντρικό θεμέλιο της σύγχρονης υπολογιστικής επιστήμης, με εφαρμογές που εκτείνονται από τα κοινωνικά δίκτυα και τη χαρτογράφηση δικτύων έως τη ρομποτική και τη θεωρία βελτιστοποίησης. Η ενσωμάτωση της διδασκαλίας των γραφημάτων από την πρωτοβάθμια και δευτεροβάθμια εκπαίδευση προτείνεται όλο και συχνότερα στη βιβλιογραφία ως στρατηγική για την ενίσχυση της υπολογιστικής σκέψης, της αφηρημένης αναπαράστασης και της συστημικής επίλυσης προβλημάτων (Bocconi et al., 2022· Grover & Pea, 2013). Ειδικότερα, η ενασχόληση με τον κύκλο Hamilton, αν και αποτελεί NP-πλήρες πρόβλημα στη θεωρία της πολυπλοκότητας, μπορεί να προσεγγιστεί παιδαγωγικά μέσω δραστηριοτήτων που ενθαρρύνουν τον πειραματισμό, την αναζήτηση διαδρομών και την ανακάλυψη μέσω διερεύνησης (Dagienė & Stupurienė, 2016). Μέσα από κατάλληλες αναπαραστάσεις (π.χ. παιχνίδια ρόλων, εφαρμογές τύπου "ταξιδιώτη") τα παιδιά μπορούν να οικοδομήσουν ισχυρές εννοιολογικές βάσεις σχετικά με την έννοια της βελτιστοποίησης και των αλγοριθμικών περιορισμών. Πολλές μελέτες έχουν αναδείξει ότι η πρώιμη επαφή των μαθητών με έννοιες όπως οι γράφοι, οι κύκλοι και οι διαδρομές βελτιώνει την κατανόηση θεμελιωδών εννοιών της επιστήμης υπολογιστών και αναπτύσσει κριτική και στρατηγική σκέψη (Tedre & Denning, 2021). Συνεπώς, η συστηματική εισαγωγή της έννοιας των γραφημάτων —συμπεριλαμβανομένου του κύκλου Hamilton— στην υποχρεωτική εκπαίδευση δεν είναι απλώς εφικτή, αλλά παιδαγωγικά επιθυμητή, καθώς προάγει δεξιότητες που σχετίζονται με τον 21ο αιώνα και δημιουργεί τις βάσεις για τη μελλοντική ενασχόληση των μαθητών με πιο προχωρημένα αντικείμενα, όπως η θεωρία αλγορίθμων και η τεχνητή νοημοσύνη.

ΣΧΕΔΙΑΣΜΟΣ ΚΑΙ ΑΝΑΠΤΥΞΗ VR ΕΦΑΡΜΟΓΗΣ

Η τεχνολογία εικονικής πραγματικότητας (VR) αποτελεί ένα διαρκώς εξελισσόμενο πεδίο, το οποίο δημιουργεί νέες προκλήσεις αλλά και δυνατότητες για την ανάπτυξη εκπαιδευτικών εφαρμογών. Η ανάπτυξη τέτοιων εφαρμογών υποστηρίζεται από ένα ευρύ φάσμα εργαλείων λογισμικού και κατασκευαστών συσκευών, που προσφέρουν τόσο εξοπλισμό όσο και απαραίτητες βιβλιοθήκες. Στο πλαίσιο της παρούσας εργασίας, αναπτύχθηκε το VR AlgoLab, ένα εκπαιδευτικό εργαλείο βασισμένο σε τεχνολογία VR, με στόχο την υποστήριξη της διδασκαλίας εννοιών Δομών Δεδομένων και Αλγορίθμων σε νεαρές ηλικίες.

Η εφαρμογή αναπτύχθηκε στην πλατφόρμα Unity (έκδοση 6000.0.39f1) και έχει σχεδιαστεί ώστε να είναι πλήρως συμβατή με τον εξοπλισμό Meta Quest 2, που χρησιμοποιήθηκε ως περιβάλλον εκτέλεσης και αξιολόγησης. Η βασική πρόκληση της υλοποίησης εντοπίστηκε στην εναρμόνιση του λογισμικού με τα συστήματα παρακολούθησης κίνησης και αλληλεπίδρασης του Meta Quest 2, καθώς και στην προσαρμογή του περιβάλλοντος χρήστη στις εργονομικές ανάγκες νεαρών μαθητών.

Το πρώτο στάδιο της ανάπτυξης αφορούσε τον καθορισμό της δομής της εφαρμογής. Η εκπαιδευτική εμπειρία σχεδιάστηκε να προσομοιώνει τη λειτουργία ενός εικονικού εργαστηρίου, στο οποίο ο χρήστης μπορεί να περιηγείται ελεύθερα και να αλληλεπιδρά με θεματικούς πάγκους εργασίας. Κάθε πάγκος αντιπροσωπεύει ένα υποπαιχνίδι (minigame), το οποίο επικεντρώνεται σε μια θεμελιώδη έννοια, όπως συνδεδεμένες λίστες, κόμβοι, κύκλοι Hamilton και δυαδική αναζήτηση..

Εικόνα 3
Τα χειριστήρια ενός Meta Quest 2

Η διαμόρφωση του εικονικού περιβάλλοντος πραγματοποιήθηκε εξ ολοκλήρου στο Unity, με σχεδιαστικές αρχές που ενισχύουν την ευκρίνεια, την προσβασιμότητα και την εργονομία. Για την παραγωγή των τρισδιάστατων

μοντέλων που χρησιμοποιούνται στους πάγκους, αξιοποιήθηκε το λογισμικό Blender, επιτρέποντας την προσαρμοσμένη δημιουργία διαδραστικών αντικειμένων που ενσωματώθηκαν στο παιχνίδι. Μετά την ολοκλήρωση του σχεδιασμού του περιβάλλοντος, προχωρήσαμε στην ενσωμάτωση των VR βιβλιοθηκών και των πακέτων υποστήριξης του Meta Quest 2 εντός του Unity, προκειμένου να διασφαλιστεί η αξιόπιστη και χαμηλής καθυστέρησης επικοινωνία μεταξύ χρήστη και εφαρμογής. Η επιτυχής διασύνδεση επέτρεψε την πλήρη αντιστοίχιση κινήσεων του χρήστη στον πραγματικό κόσμο με τις ενέργειες εντός του εικονικού περιβάλλοντος, διασφαλίζοντας έτσι φυσική αλληλεπίδραση και αυξημένη εμπειρία εμβύθισης. Στην Εικόνα 3, απεικονίζονται οι πάγκοι με τα παιχνίδια.

Κατά την ανάπτυξη, εντοπίστηκαν δύο βασικές προκλήσεις σχετικές με την αλληλεπίδραση του χρήστη. Η πρώτη αφορούσε τον χωρικό περιορισμό του πραγματικού περιβάλλοντος, που εμπόδιζε την προσέγγιση απομακρυσμένων σημείων του εργαστηρίου. Για την επίλυση, υλοποιήθηκαν δύο μηχανισμοί πλοήγησης: α.Κίνηση μέσω των αναλογικών μοχλών (joysticks) στα χειριστήρια του Meta Quest 2. β. Σύστημα τηλεμεταφοράς (teleportation) από πάγκο σε πάγκο, ενεργοποιούμενο μέσω του δεύτερου joystick.

Η δεύτερη πρόκληση σχετιζόταν με την αλληλεπίδραση με τα αντικείμενα στους πάγκους. Για την υποστήριξή της, σχεδιάστηκε ένα σύνολο βασικών ενεργειών, οι οποίες ενεργοποιούνται ανάλογα με το εκάστοτε υποπαιχνίδι:

- Μετακίνηση αντικειμένων και τοποθέτησή τους σε προκαθορισμένες θέσεις.
- Σύνδεση κόμβων με ευθύγραμμα τμήματα με διαδραστικό τρόπο.
- Ελεύθερη μετακίνηση αντικειμένων χωρίς συγκεκριμένο τελικό στόχο.

Αυτοί οι μηχανισμοί διαμορφώνουν το πλαίσιο των δραστηριοτήτων σε κάθε πάγκο εργασίας, προσφέροντας πλήρη λειτουργικότητα και ενεργή εμπλοκή του χρήστη με τις υπό διδασκαλία έννοιες.

Για την καθοδήγηση του χρήστη κατά την εκτέλεση κάθε υποπαιχνιδιού, σχεδιάστηκε ένα σύστημα παρουσίασης οδηγιών με χρήση των UI Elements του Unity. Συγκεκριμένα, χρησιμοποιήθηκαν Panels και Text Meshes, τα οποία παρέχουν τις απαραίτητες πληροφορίες σχετικά με τον στόχο και τα βήματα κάθε δραστηριότητας. Το σύστημα έχει δομηθεί ώστε να προσαρμόζεται δυναμικά στο περιεχόμενο και στη διάταξη της οθόνης, διασφαλίζοντας αναγνωσιμότητα και σαφήνεια, ακόμη και για μικρές οθόνες VR. Τα UI στοιχεία ενσωματώνονται τόσο κατά την είσοδο του χρήστη στο εργαστήριο (οθόνη καλωσορίσματος), όσο και τοπικά σε κάθε πάγκο εργασίας, με σκοπό τη συνεχή υποστήριξη της μαθησιακής διαδικασίας. Η Εικόνα 4 παρουσιάζει μερικά από αυτά τα UI Elements.

Εικόνα 4
UI στοιχεία στο VR Algolabs

Τέλος, η σχεδίαση του VR AlgoLab περιλαμβάνει μηχανισμό επιβράβευσης και οπτικής ανατροφοδότησης κατά την ολοκλήρωση κάθε υποπαιχνιδιού. Για τον σκοπό αυτό αξιοποιήθηκε το Unity Particle System, το οποίο επιτρέπει την ενσωμάτωση εφέ, όπως έκρηξη κονφετί, που σηματοδοτούν επιτυχία και δημιουργούν θετική συναισθηματική απόκριση. Τα εφέ αυτά λειτουργούν ως ένδειξη ολοκλήρωσης και παρέχουν σαφές νοηματικό κλείσιμο για τον χρήστη, όπως φαίνεται και στην Εικόνα 5.

ΣΥΜΠΕΡΑΣΜΑΤΑ

Η εργασία αυτή ανέδειξε τη δυνατότητα αξιοποίησης της Εικονικής Πραγματικότητας ως αποτελεσματικού μέσου διδακτικής υποστήριξης σε έννοιες Δομών Δεδομένων και Αλγορίθμων. Η ανάπτυξη του VR AlgoLab κατέδειξε ότι είναι εφικτή η δημιουργία εργονομικών και λειτουργικών περιβαλλόντων μάθησης, τα οποία ενισχύουν τη μαθησιακή εμπλοκή μέσω βιωματικής αλληλεπίδρασης. Πιλοτικές δοκιμές σε μαθητές και φοιτητές έδειξαν θετική αποδοχή, επιβεβαιώνοντας την καταλληλότητά του για εκπαιδευτική χρήση. Μελλοντική έρευνα προτείνεται να επικεντρωθεί στην

εμπειρική αποτίμηση της αποτελεσματικότητας της εφαρμογής σε μεγαλύτερο δείγμα μαθητών, καθώς και στην επέκταση του περιεχομένου της με επιπλέον θεματικές ενότητες και παιγνιώδεις δραστηριότητες.

ΠΕΡΙΛΗΨΗ

Οι εξ αποστάσεως εξετάσεις, που καθιερώθηκαν κατά την περίοδο της πανδημίας και παραμένουν σε χρήση στο Ελληνικό Ανοικτό Πανεπιστήμιο (ΕΑΠ), αποτελούν μια διαδικασία που απαιτεί συνεχή επαναπροσδιορισμό. Και αυτό διότι οι εξετάσεις αυτής της μορφής όχι μόνο εισάγουν νέες προκλήσεις, αλλά και απαιτούν διαφορετικές στρατηγικές αξιολόγησης για τη διασφάλιση της εγκυρότητας και αξιοπιστίας των αποτελεσμάτων. Σημαντικά ζητήματα που εγείρονται περιλαμβάνουν τις διαδικασίες ταυτοποίησης και επιτήρησης των φοιτητών/τριών, την επιλογή θεμάτων εξετάσεων (μορφή, περιεχόμενο κ.ά.), καθώς και την εξασφάλιση της ευθυγράμμισης αυτών με τους εκπαιδευτικούς στόχους.

Στο πλαίσιο αυτό, η τεχνολογία έχει διαδραματίσει καίριο ρόλο σε αυτή τη μεταμόρφωση, ενσωματώνοντας εργαλεία όπως το λογισμικό ανίχνευσης ομοιότητας (Turnitin) και εξειδικευμένα λογισμικά επιτήρησης. Παράλληλα, η εμφάνιση της Τεχνητής Νοημοσύνης ενισχύει τις προκλήσεις, καθώς απαιτείται μια πιο σύνθετη και στοχευμένη προσέγγιση για την ανάπτυξη θεμάτων που αποτρέπουν τη μη αυθεντική συμμετοχή των φοιτητών/τριών. Για παράδειγμα, οι εξετάσεις με ανοικτά βιβλία, βασική επιλογή στο υπό μελέτη Πρόγραμμα Μεταπτυχιακών Σπουδών (ΠΜΣ) «Εκπαίδευση & Τεχνολογίες σε Συστήματα Εξ Αποστάσεως Διδασκαλίας και Μάθησης - Επιστήμες της Αγωγής (ΕΤΑ)» του ΕΑΠ της παρούσας εργασίας, αναδεικνύουν την κριτική σκέψη ως τον πρωταρχικό παράγοντα αξιολόγησης. Η εστίαση στη δεξιότητα αυτή αποτελεί ακρογωνιαίο λίθο της εκπαιδευτικής διαδικασίας και αντανακλά τις απαιτήσεις της σύγχρονης εποχής.

Στη βάση αυτή, η εργασία αυτή στοχεύει στη συστηματική παρουσίαση και ανάλυση των διαδικασιών που εφαρμόστηκαν στις εξ αποστάσεως εξετάσεις του ΠΜΣ ΕΤΑ του ΕΑΠ κατά την πενταετία (2020-2025), καταδεικνύοντας τα οφέλη και τις προκλήσεις. Επιπλέον, συζητείται η εξέλιξη των μεθόδων αξιολόγησης, με έμφαση στη διασφάλιση ότι οι φοιτητές/τριες εμπλέκονται ουσιαστικά και αποδεικνύουν τη γνώση και τις δεξιότητες που ανέπτυξαν κατά τη διάρκεια των Θεματικών Ενοτήτων.

Ως προς τη μεθοδολογία της, η παρούσα εργασία εστιάζει στο σύνολο των διαδικασιών των εξ αποστάσεως εξετάσεων και πρακτικών αξιολόγησης που εφαρμόστηκαν στο ΠΜΣ «ΕΤΑ» του ΕΑΠ στη διάρκεια 11 εξαμήνων. Εξετάζεται η ανάπτυξη θεμάτων εξετάσεων και πρακτικών αξιολόγησης και κατά πόσο αυτές ευθυγραμμίζονται με τις τεχνολογικές και παιδαγωγικές εξελίξεις. Μελετάται ο τρόπος με τον οποίο οι διδάσκοντες/ουσες προσαρμόζονται στην ενσωμάτωση εργαλείων όπως το Turnitin, για την αποτροπή φαινομένων λογοκλοπής, και της Τεχνητής Νοημοσύνης, για την πρόκληση αυθεντικής εμπλοκής των φοιτητών/τριών στις εξετάσεις. Διερευνάται η εφαρμογή κάποιων από τις πρακτικές που υιοθετήθηκαν στο πλαίσιο της μορφής αυτών των εξ αποστάσεως εξετάσεων.

Λέξεις κλειδιά: εξ αποστάσεως εκπαίδευση, τεχνολογία, ψηφιακές εξετάσεις, εγκυρότητα, αξιοπιστία, αυθεντική αξιολόγηση, κριτική σκέψη

ΕΙΣΑΓΩΓΗ

Παρά την αυξανόμενη διεθνή βιβλιογραφία σχετικά με την εξ αποστάσεως αξιολόγηση και τις επιπτώσεις της ΤΝ στη μαθησιακή διαδικασία (Vorvilas et al., 2023· Aristeidou et al., 2024), παραμένει περιορισμένη η συστηματική μελέτη πραγματικών πανεπιστημιακών πρακτικών αξιολόγησης σε περιβάλλοντα όπου η ΤΝ είναι ήδη διαθέσιμη και χρησιμοποιείται από τους φοιτητές. Οι περισσότερες έρευνες επικεντρώνονται σε θεωρητικές προσεγγίσεις, σε τεχνολογικά εργαλεία ή σε μεμονωμένες μορφές αξιολόγησης, χωρίς να εξετάζουν ολιστικά πώς ένα πρόγραμμα σπουδών ανασχεδιάζει τις εξετάσεις του σε βάθος χρόνου (Ioakeimidou et al., 2023· Froehlich et al., 2023). Ειδικότερα, απουσιάζουν μελέτες που να καταγράφουν διαχρονικά (2020–2025) τις αλλαγές στις εξ αποστάσεως εξετάσεις ενός ελληνικού ΑΕΙ και να αναλύουν πώς οι εκπαιδευτικοί προσαρμόζουν τις πρακτικές τους σε συνθήκες αυξημένης χρήσης εργαλείων ΤΝ. Η παρούσα εργασία καλύπτει αυτό το ερευνητικό κενό, προσφέροντας μια τεκμηριωμένη μελέτη περίπτωσης που συνδέει τις τεχνολογικές εξελίξεις με τις παιδαγωγικές αποφάσεις και τις πρακτικές αξιολόγησης.

Σκοπός της εργασίας είναι η συστηματική παρουσίαση και ανάλυση των διαδικασιών που εφαρμόστηκαν στις εξ αποστάσεως εξετάσεις του ΠΜΣ ΕΤΑ του ΕΑΠ κατά την πενταετία 2020–2025, αναδεικνύοντας τα οφέλη, τις προκλήσεις και τις στρατηγικές προσαρμογής. Ειδικότερα, η εργασία επιδιώκει να:(α) αποτυπώσει τη διαδικασία λήψης αποφάσεων και τον ανασχεδιασμό των εξ αποστάσεως εξετάσεων, (β) αξιολογήσει τους κύριους τύπους εξέτασης ως προς την καλλιέργεια κριτικής σκέψης και τη διασφάλιση της ακαδημαϊκής ακεραιότητας, και (γ) προτείνει κατευθύνσεις πολιτικής και πρακτικής για τη βιώσιμη ενσωμάτωση της ΤΝ στην εξ αποστάσεως αξιολόγηση.

Με βάση τα παραπάνω, η εργασία μελετά τα ακόλουθα ερευνητικά ερωτήματα:

- Πώς έχει επηρεάσει η ΤΝ τη διαδικασία των εξ αποστάσεως εξετάσεων στο ΠΜΣ ΕΤΑ του ΕΑΠ την περίοδο 2020–2025;
- Με ποιους τρόπους διασφαλίζονται η ισοτιμία, η ακεραιότητα, η εγκυρότητα και η αξιοπιστία των εξ αποστάσεως εξετάσεων στην εποχή της ΤΝ;
- Ποιες μορφές αξιολόγησης αναδεικνύονται ως παιδαγωγικά βιώσιμες και αποτελεσματικές για το μέλλον, λαμβάνοντας υπόψη τις δυνατότητες και τους περιορισμούς της ΤΝ;

Η εργασία συμβάλλει στη διεθνή συζήτηση για την εξ αποστάσεως αξιολόγηση καθώς προσφέρει μια διαχρονική μελέτη περίπτωσης που αποτυπώνει την εξέλιξη των εξετάσεων σε πραγματικό πρόγραμμα σπουδών.. Επιπλέον αναδεικνύει παιδαγωγικές και τεχνολογικές στρατηγικές που μπορούν να αξιοποιηθούν από άλλα ΑΕΙ, και προτείνει πλαίσιο κατευθύνσεων για τη βιώσιμη ενσωμάτωση της ΤΝ στην αξιολόγηση, συνδέοντας θεωρία, πρακτική και θεσμικές ανάγκες. Ειδικότερα, παρουσιάζονται σχεδιαστικές προσεγγίσεις θεμάτων και χαρτογραφούνται οι ρόλοι εργαλείων όπως το Turnitin και οι τεχνολογίες επιτήρησης, ενταγμένα σε μια ανθρωποκεντρική κουλτούρα αξιολόγησης που θέτει στο επίκεντρο την κριτική σκέψη και την ακαδημαϊκή δεοντολογία.

ΒΙΒΛΙΟΓΡΑΦΙΚΗ ΕΠΙΣΚΟΠΗΣΗ

Η αξιολόγηση στην ανώτατη εκπαίδευση αποτελεί κρίσιμο και πολυδιάστατο πεδίο, καθώς δεν αποσκοπεί μόνο στη μέτρηση της επίδοσης αλλά στην αποτύπωση των μαθησιακών αποτελεσμάτων και στην καλλιέργεια δεξιοτήτων με διάρκεια (Creswell, 2016· Balboni, 2016). Στην εξ αποστάσεως εκπαίδευση, η ανάγκη για έγκυρα και αξιόπιστα μοντέλα αξιολόγησης γίνεται εντονότερη, καθώς εγείρονται αμφιβολίες για την αυθεντικότητα και τη διαφάνεια της διαδικασίας (Vorvilas et al., 2023· Aristeidou et al., 2024). Η διεθνής βιβλιογραφία αναδεικνύει τέσσερις βασικούς άξονες:

α) Μετατόπιση από την αναπαραγωγή γνώσης σε αυθεντικές αξιολογήσεις: Έρευνες δείχνουν ότι οι εκπαιδευτικές διαδικασίες κάθε είδους (δραστηριότητες, εξετάσεις κτλ) που βασίζονται στην απομνημόνευση και στην απλή αναπαραγωγή δεν οδηγούν σε ουσιαστική μάθηση. Αντιθέτως, ζητούμενα είναι η εκπόνηση δραστηριοτήτων που προάγουν τον κριτικό στοχασμό, τον αναστοχασμό και τη δημιουργία νέας γνώσης (Mezzadri, 2020· Lionarakis, 2005). Η διατύπωση θεμάτων που απαιτούν σύνθετη σκέψη και προσωπικό αποτύπωμα συμβάλλει στην καλλιέργεια γνωστικών και μεταγνωστικών δεξιοτήτων. Ειδικότερα, η διεθνής βιβλιογραφία επιβεβαιώνει τη σημασία της κριτικής σκέψης ως θεμελιώδους δεξιότητας στην εξ αποστάσεως εκπαίδευση με την ανάγκη για κατάλληλες διδακτικές προσεγγίσεις που να ενθαρρύνουν τον αναστοχασμό, την ανάλυση και τη σύνθεση πληροφοριών, μιας δεξιότητας που ανάγεται σε προτεραιότητα (Manousou, 2025).

β) Θεσμικά και ηθικά πλαίσια: Η διεθνής και ελληνική βιβλιογραφία συγκλίνει στο ότι η αξιολόγηση στην εξ αποστάσεως εκπαίδευση δεν μπορεί να αποσυνδεθεί από τη θέσπιση σαφών θεσμικών και δεοντολογικών πλαισίων, τα οποία διασφαλίζουν την ισότητα πρόσβασης, τη διαφάνεια των διαδικασιών και την ποιότητα των αποτελεσμάτων (Chaudhary & Dey, 2013· Baume, 2020· Domínguez-Figaredo et al., 2022). Η ανάγκη αυτή γίνεται ακόμη πιο έντονη σε περιόδους κρίσης, όπως η πανδημία, όταν τα ΑΕΙ αναγκάστηκαν να υιοθετήσουν αιφνιδίως εξ αποστάσεως εξετάσεις. Η

ελληνική εμπειρία ανέδειξε μεν σοβαρές προκλήσεις που αφορούν την ακαδημαϊκή ακεραιότητα, την προστασία των προσωπικών δεδομένων και την αποτροπή φαινομένων ανισότητας, αλλά ταυτόχρονα ανέδειξε και δυνατότητες για αναθεώρηση των παραδοσιακών προσεγγίσεων, με έμφαση σε εναλλακτικές μορφές αξιολόγησης που προάγουν την κριτική σκέψη και την αυτονομία του φοιτητή (Ioakeimidou et al., 2023· Froehlich et al., 2023).

Πέραν της τεχνοκρατικής διάστασης, η συζήτηση για την αξιολόγηση στην εξ αποστάσεως εκπαίδευση συνδέεται με τις ανθρωποκεντρικές και ηθικές αξίες που πρέπει να τη διέπουν. Ήδη από τις κατευθυντήριες γραμμές της UNESCO (2006) τονίζεται η ανάγκη για παιδαγωγικές προσεγγίσεις που θέτουν τον φοιτητή/την φοιτήτρια στο επίκεντρο, ενσωματώνοντας αρχές ισότητας, σεβασμού και κοινωνικής δικαιοσύνης. Νεότερες μελέτες (Bozkurt et al., 2024· Tasis, 2022) ενισχύουν αυτή την κατεύθυνση, υποστηρίζοντας ότι η αξιολόγηση δεν πρέπει να περιορίζεται σε εργαλείο μέτρησης επιδόσεων, αλλά να λειτουργεί ως οργανικό μέρος της μαθησιακής διαδικασίας που καλλιεργεί υπευθυνότητα, διάλογο και ηθική συνείδηση. Συνεπώς, τα θεσμικά και ηθικά πλαίσια συνιστούν τον θεμέλιο λίθο για τη διαμόρφωση μιας κουλτούρας αξιολόγησης στην εξ αποστάσεως εκπαίδευση που να είναι όχι μόνο αξιόπιστη και δίκαιη, αλλά και βαθιά συμβατή με τις αρχές της δημοκρατίας, της ισότητας ευκαιριών και της δια βίου μάθησης.

γ) Ρόλος της Τεχνητής Νοημοσύνης: Όσον αφορά την τεχνητή νοημοσύνη, οι έρευνα διεθνώς υπογραμμίζει την ανάγκη για κριτική χρήση της στην εκπαιδευτική διαδικασία. Είναι γεγονός ότι η αξιοποίησή της μπορεί να συμβάλει στην παροχή εξατομικευμένης μάθησης και στην ανάπτυξη ψηφιακών δεξιοτήτων, ωστόσο η αλόγιστη χρήση της μπορεί να προκαλέσει απώλεια αυθεντικής σκέψης, παγίωση προκαταλήψεων και αναστολή πρωτοβουλίας. Συνεπώς, η ενσωμάτωσή της στην εκπαιδευτική διαδικασία θα πρέπει να γίνει με τρόπο που να μην υποκαθιστά αλλά να υποστηρίζει την αναλυτική και αναστοχαστική σκέψη (Manousou, 2025).

Το πλαίσιο Artificial Intelligence-Based Assessment in Education (AIBA) που προτείνουν οι Fang, Roscoe και McNamara (2023) αναδεικνύει την πολυδιάστατη φύση αυτών των συστημάτων, λαμβάνοντας υπόψη σκοπούς, δομές, πηγές δεδομένων, υπολογιστικές μεθόδους και βαθμό ορατότητας. Τα ευρήματα αυτά επιβεβαιώνουν την άποψη των Vlachopoulos και Makri (2024) ότι οι αυθεντικές μορφές αξιολόγησης είναι απαραίτητες για την καλλιέργεια δεξιοτήτων του 21ου αιώνα. Παρομοίως, ο Du Plessis (2025) τονίζει ότι η δυναμική της αξιολόγησης με έργα (project-based) μπορεί να ενισχύσει τη μάθηση όταν αυτή υποστηρίζεται από την ΤΝ. Την ίδια στιγμή, οι ανησυχίες των Bozkurt et al. (2024) σχετικά με τις αλγοριθμικές προκαταλήψεις και τους κινδύνους της «λανθάνουσας αξιολόγησης» (stealth assessment) υπογραμμίζουν την ανάγκη για προσεκτικά σχεδιασμένα πλαίσια. Τα στοιχεία δείχνουν ότι η ΤΝ αναδιαμορφώνει τις πρακτικές αξιολόγησης, ωστόσο η αποτελεσματικότητά της εξαρτάται από την ισορροπία ανάμεσα στην καινοτομία, τη διαφάνεια και την παιδαγωγική υπευθυνότητα.

Επομένως, στο πεδίο των εξ αποστάσεως εξετάσεων, η εισαγωγή εργαλείων ΤΝ μεταβάλλει ριζικά το τοπίο, λειτουργώντας τόσο ως πηγή προσαρμοστικότητας και ανατροφοδότησης όσο και ως πρόκληση για την ακαδημαϊκή ακεραιότητα. Ζητήματα όπως η λογοκλοπή, η αυθεντικότητα και η δεοντολογία καθιστούν αναγκαία τη διαμόρφωση νέων κατευθυντήριων γραμμών για τη χρήση της.

δ) Ανάμεικτες και εναλλακτικές μορφές αξιολόγησης: Στη διεθνή και ελληνική βιβλιογραφία, όπως στις έρευνες των Ioakeimidou et al. (2023), Aristeidou et al. (2024) και Kinley (2023), καταγράφεται ένα πλουραλιστικό φάσμα εναλλακτικών μορφών αξιολόγησης που υιοθετούνται από τα Ανοικτά και εξ Αποστάσεως Πανεπιστήμια. Οι γραπτές εξετάσεις εξακολουθούν να αποτελούν μια από τις πιο διαδεδομένες μορφές εξέτασης, οι οποίες μπορεί να είναι με ανοικτά ή κλειστά βιβλία και να συνοδεύονται από ηλεκτρονικό έλεγχο λογοκλοπής. Στόχος τους είναι να περιοριστεί η αποστήθιση και να ενισχυθεί η κριτική ανάλυση, με τις ερωτήσεις να απαιτούν συχνά αναπτυξιακές απαντήσεις που βασίζονται σε βιβλιογραφικές αναφορές. Δίπλα σε αυτές, σημαντική θέση κατέχουν οι προφορικές εξετάσεις, οι οποίες χρησιμοποιούνται είτε αυτόνομα είτε συνδυαστικά με γραπτή αξιολόγηση. Παρότι προτείνονται από τη συντριπτική πλειονότητα των ιδρυμάτων, η εφαρμογή τους είναι σχετικά περιορισμένη, καθώς απαιτούν υψηλή επένδυση σε χρόνο και οργάνωση (Ioakeimidou et al., 2023). Εξίσου κεντρικό ρόλο διαδραματίζουν τα projects και οι ερευνητικές εργασίες, που συνδέονται με την αυθεντική μάθηση και την ανάπτυξη δεξιοτήτων συνεργασίας, έρευνας και επίλυσης προβλημάτων. Η παρουσίασή τους μπορεί να γίνεται με τη μορφή γραπτών μελετών, αλλά και μέσω βίντεο παρουσιάσεων ή προσομοιώσεων, που προσφέρουν μια πιο δυναμική διάσταση στην αξιολόγηση. Σημαντική καινοτομία αποτελεί επίσης η αξιοποίηση των e-portfolios, τα οποία συγκεντρώνουν αντιπροσωπευτικές εργασίες του φοιτητή/τριας κατά τη διάρκεια του εξαμήνου, αναδεικνύοντας όχι μόνο τα μαθησιακά αποτελέσματα αλλά και τον τρόπο με τον οποίο αυτά κατακτήθηκαν. Το εργαλείο αυτό ενισχύει τη μεταγνωστική επίγνωση και την αυτοαξιολόγηση, ωστόσο απαιτεί σημαντική χρονική επένδυση και πρέπει να ενταχθεί εξαρχής στο σχεδιασμό του μαθήματος, ώστε να συνδέεται άμεσα με τους μαθησιακούς στόχους. Η καταγραφή αυτή δείχνει ότι τα πανεπιστήμια υιοθετούν μια μεγάλη ποικιλία μορφών αξιολόγησης, οι οποίες ανταποκρίνονται στις ανάγκες της εξ αποστάσεως εκπαίδευσης και επιδιώκουν να ισορροπήσουν την εγκυρότητα και την αξιοπιστία με την αυθεντικότητα και τη φοιτητοκεντρική προσέγγιση (Manousou & Rassia, 2024).

Οι προφορικές εξετάσεις, τα projects, τα portfolios, οι εξετάσεις με ανοικτά βιβλία και οι προσομοιώσεις αναγνωρίζονται όλο και περισσότερο στη διεθνή βιβλιογραφία ως πρακτικές που ενισχύουν την εγκυρότητα και την αξιοπιστία της αξιολόγησης, προσφέροντας ταυτόχρονα δυνατότητες αποτροπής της επιφανειακής μάθησης (Hughes & Tait, 2021· Guangul, 2020· Ioakeimidou et al., 2023). Σε αντίθεση με τις παραδοσιακές μορφές εξέτασης που εστιάζουν κυρίως στην αναπαραγωγή γνώσεων, οι πρακτικές αυτές καλλιεργούν την ικανότητα κριτικής σκέψης, την ανάλυση, τη δημιουργικότητα και την εφαρμογή της γνώσης σε πραγματικά ή προσομοιωμένα περιβάλλοντα.

Σημαντική παράμετρος αποτελεί, επίσης, η ανάπτυξη μικτών μοντέλων αξιολόγησης (blended assessment), τα οποία συνδυάζουν την εξ αποστάσεως με τη δια ζώσης διάσταση. Έρευνες καταδεικνύουν ότι τα μοντέλα αυτά ενισχύουν την εμπιστοσύνη των φοιτητών/τριών, καθώς προσφέρουν ευελιξία χωρίς να αποδυναμώνουν την αίσθηση ακαδημαϊκής ακεραιότητας (Cross, et al., 2023). Παράλληλα, συμβάλλουν στη βελτίωση της εκπαιδευτικής εμπειρίας, εφόσον συνδυάζουν τα πλεονεκτήματα της τεχνολογικής υποστήριξης με την αξία της άμεσης ανθρώπινης αλληλεπίδρασης και της προσωπικής ανατροφοδότησης.

Φαίνεται, επομένως, ότι η ενσωμάτωση αυτών των πρακτικών συνιστά ουσιαστική μετατόπιση από τη μονοδιάστατη αξιολόγηση γνώσεων προς ένα πιο πλούσιο, ευέλικτο και ανθρωποκεντρικό σύστημα, το οποίο ανταποκρίνεται καλύτερα στις ανάγκες της σύγχρονης εκπαίδευσης. Συνολικά, η βιβλιογραφία συγκλίνει στο ότι η εξ αποστάσεως αξιολόγηση χρειάζεται να ξεπεράσει τα στενά τεχνικά ζητήματα και να εδραιωθεί σε παιδαγωγικές και δεοντολογικές αρχές που προάγουν την κριτική σκέψη, την ισότητα και την ακαδημαϊκή ακεραιότητα. Η ενότητα αυτή λειτουργεί ως φακός ερμηνείας των ευρημάτων της παρούσας μελέτης περίπτωσης, φωτίζοντας τόσο τις προκλήσεις όσο και τις προοπτικές για μια ανθρωποκεντρική και βιώσιμη αξιολόγηση στην ανώτατη εξ αποστάσεως εκπαίδευση.

ΜΕΛΕΤΗ ΠΕΡΙΠΤΩΣΗΣ ΤΟ ΠΡΟΓΡΑΜΜΑ ΜΕΤΑΠΤΥΧΙΑΚΩΝ ΣΠΟΥΔΩΝ ΕΤΑ ΤΟΥ ΕΑΠ

Το Ελληνικό Ανοικτό Πανεπιστήμιο (ΕΑΠ), ως ίδρυμα εξειδικευμένο στην εξ αποστάσεως εκπαίδευση, διαθέτει ένα κεντρικά οργανωμένο αλλά και αποκεντρωμένα εφαρμοζόμενο πλαίσιο εξετάσεων, στο οποίο οι γενικές κατευθύνσεις συναρθρώνονται με τις επιλογές κάθε Προγράμματος Σπουδών και Θεματικής Ενότητας (ΘΕ). Στο Πρόγραμμα Μεταπτυχιακών Σπουδών «Εκπαίδευση & Τεχνολογίες σε Συστήματα Εξ Αποστάσεως Διδασκαλίας και Μάθησης – Επιστήμες της Αγωγής» (ΕΤΑ), το πλαίσιο αυτό αποτυπώνεται στη δυναμική αξιοποίηση των υποδομών, των λογισμικών και των μορφών αξιολόγησης με γνώμονα τη διασφάλιση ποιότητας και τη φοιτητοκεντρική υποστήριξη. Η διαδικασία εξετάσεων δεν αποτελεί μια στατική πρακτική, αλλά εξελίσσεται σε συνάρτηση με τις τεχνολογικές εξελίξεις και τις παιδαγωγικές προτεραιότητες. Στο πλαίσιο αυτό, αξιοποιείται μια σειρά πολυμορφικών τύπων αξιολόγησης: projects με προφορική υποστήριξη με ενδιάμεση καθοδήγηση και ανατροφοδότηση, γραπτές δοκιμασίες με ανοικτές σημειώσεις (open-book) με έμφαση στον κριτικό και αναστοχαστικό λόγο, καθώς και παραδοσιακά δοκίμια ή ερωτήσεις ανάπτυξης για την αποτίμηση της θεωρητικής εμβάθυνσης. Η ακεραιότητα των διαδικασιών ενισχύεται μέσω της χρήσης εργαλείων κειμενικής ομοιότητας (π.χ. Turnitin) και στοχευμένων πρακτικών επιτήρησης όπου αυτό κρίνεται αναγκαίο, με στόχο την εξισορρόπηση της αξιοπιστίας με τον σεβασμό στην αυτονομία των φοιτητών/τριών. Το πλαίσιο αυτό συνιστά το υπόβαθρο μέσα στο οποίο διερευνώνται οι στρατηγικές ανασχεδιασμού και οι προκλήσεις της αξιολόγησης την περίοδο 2020–2025.

ΜΕΘΟΔΟΛΟΓΙΑ

Η παρούσα έρευνα εντάσσεται στο πλαίσιο της μελέτης περίπτωσης, με σκοπό την κατανόηση των εξελίξεων και των προκλήσεων που συνοδεύουν τη διαμόρφωση εξ αποστάσεως εξετάσεων στο Ελληνικό Ανοικτό Πανεπιστήμιο. Ακολουθώντας τη λογική του Robson (2010), δόθηκε έμφαση σε μια «έρευνα του πραγματικού κόσμου» που συνδυάζει πολλαπλές πηγές και μεθόδους, ώστε να αποτυπωθεί η πολυπλοκότητα του θεσμικού και παιδαγωγικού πλαισίου.

Στην κατεύθυνση αυτή και προκειμένου να ακολουθηθούν αξιοποιήθηκαν αρχικά τα πρακτικά της Επιτροπής Προγράμματος Σπουδών (ΕΠΣ), τα οποία αποτυπώνουν τις επίσημες αποφάσεις και κατευθύνσεις. στο οποίο συμμετείχαν και θεσμικοί και ακαδημαϊκοί παράγοντες: ο Διευθυντής του Προγράμματος Μεταπτυχιακών Σπουδών (ΠΜΣ) ΕΤΑ, η βοηθός του, το μέλος ΔΕΠ με θέση στο συγκεκριμένο ΠΜΣ και μια από τις παλαιότερες ΣΕΠ στη «μητρική»[2] Θεματική Ενότητα (ΘΕ) ΕΚΠ65 και συντονίστρια σε ΘΕ του ΠΜΣ ΕΤΑ. Η σύνθεση αυτή επέτρεψε την αντιπροσώπευση διαφορετικών οπτικών, αλλά και τη σύνδεση της καθημερινής πρακτικής με τον στρατηγικό σχεδιασμό.

[2] Η ΘΕ ΕΚΠ65 «Ανοικτή και εξ Αποστάσεως Εκπαίδευση» είναι η ΘΕ του ΠΜΣ «Επιστήμες της Αγωγής» (Πρώην «Σπουδές στην Εκπαίδευση») από την οποία προήλθε το ΠΜΣ ΕΤΑ. Σε αυτήν υπηρέτησαν για περισσότερα από 20 χρόνια κάποιοι ΣΕΠ, η εμπειρία των οποία είναι πολύτιμη σε πολλά επίπεδα.

Παράλληλα, συγκροτήθηκε ομάδα εστίασης (focus group) με τη συμμετοχή συντονιστών/τριών διαφορετικών Θεματικών Ενοτήτων, όπου καταγράφηκαν οι προβληματισμοί των συμμετεχόντων σε σχέση με τα πλεονεκτήματα και τα μειονεκτήματα κάθε μορφής αξιολόγησης (προφορικές εξετάσεις, projects, μικτά μοντέλα). Κάθε συντονιστής/τρια κατέθεσε την προσωπική του θέση – θετική ή αρνητική – συμβάλλοντας έτσι σε μια πολυφωνική χαρτογράφηση στάσεων. Μέσα από αυτές τις τοποθετήσεις αναδείχθηκαν και τα βασικά ερευνητικά ερωτήματα: πώς διασφαλίζεται η ισοτιμία και η ακεραιότητα, πώς ενισχύεται η εγκυρότητα και η αυθεντικότητα, ποιες μορφές θεωρούνται πιο βιώσιμες για το μέλλον.

Για την ανάλυση των δεδομένων ακολουθήθηκε θεματική προσέγγιση, με ομαδοποίηση των απόψεων σε κατηγορίες όπως αξιοπιστία, κριτική σκέψη, τεχνικές και χρονικές απαιτήσεις. Η τριγωνοποίηση πηγών και μεθόδων (πρακτικά επιτροπής, συζητήσεις, focus group) ενίσχυσε την εγκυρότητα των ευρημάτων, καθώς επέτρεψε τη σύγκριση επίσημων κειμένων με βιωμένες εμπειρίες και προσωπικές θέσεις.

Η διαδικασία συλλογής και ανάλυσης βρίσκεται ακόμη σε εξέλιξη, γεγονός που προσδίδει στην έρευνα έναν δυναμικό χαρακτήρα. Αναμένεται να συνεχιστεί με διαχρονική παρακολούθηση (longitudinal study), ώστε να εξεταστεί πώς μεταβάλλονται οι επιλογές και οι στάσεις των συντονιστών/τριών στο μέλλον, υπό το φως θεσμικών αλλαγών, τεχνολογικών εξελίξεων – ιδίως της Τεχνητής Νοημοσύνης – και νέων παιδαγωγικών κατευθύνσεων.

Στάδια μετασχηματισμούΟ μετασχηματισμός των εξεταστικών πρακτικών στην εξ αποστάσεως εκπαίδευση μπορεί να αποτυπωθεί σε τρία διακριτά στάδια (Πίνακας 1), τα οποία αντανακλούν τις ανάγκες, τις προτεραιότητες και τις παιδαγωγικές στοχεύσεις κάθε περιόδου ως εξής:

ΑΠΟΤΕΛΕΣΜΑΤΑ ΚΑΙ ΣΥΖΗΤΗΣΗ

Η ΘΕ ΕΚΠ65 «Ανοικτή και εξ Αποστάσεως Εκπαίδευση» είναι η ΘΕ του ΠΜΣ «Επιστήμες της Αγωγής» (Πρώην «Σπουδές στην Εκπαίδευση») από την οποία προήλθε το ΠΜΣ ΕΤΑ. Σε αυτήν υπηρέτησαν για περισσότερα από 20 χρόνια κάποιοι ΣΕΠ, η εμπειρία των οποία είναι πολύτιμη σε πολλά επίπεδα.

Α΄ Στάδιο (2020–2021). Κατά την πρώτη φάση, που συνέπεσε με την αιφνίδια μετάβαση σε εξ αποστάσεως εξετάσεις λόγω της πανδημίας, οι διαδικασίες αξιολόγησης χαρακτηρίστηκαν από μια ταχεία προσαρμογή στις νέες συνθήκες. Ο συνδυασμός ανοικτών θεμάτων με στοιχεία αντικειμενικού τύπου αποτέλεσε την κύρια πρακτική, με στόχο να εξασφαλιστεί αφενός η ακαδημαϊκή ακεραιότητα και αφετέρου η λειτουργικότητα του νέου μοντέλου. Οι εξετάσεις με ανοικτά βιβλία ως διαδικασία επέτρεψαν μια σχετική ευελιξία, ενώ η χρήση αντικειμενικών ερωτήσεων λειτούργησε ως αντιστάθμισμα στην ανάγκη για γρήγορη και μαζική υλοποίηση. Η φάση αυτή ήταν κυρίως προσανατολισμένη στην άμεση προσαρμογή και στην αντιμετώπιση των πρακτικών δυσκολιών.

Β΄ Στάδιο (2022–2025). Στη δεύτερη φάση καταγράφεται μια διαφορετική προσέγγιση. Οι εξ αποστάσεως εξετάσεις οργανώθηκαν γύρω από δύο κύριους άξονες που αφορούσαν ο μεν πρώτος τέσσερις ΘΕ με έμφαση στην ανάπτυξη θεμάτων με ανοικτά βιβλία και ο δεύτερος τέσσερις ΘΕ που στηρίχθηκαν σε projects, τα οποία συνοδεύονταν από υποστηρικτικές συνεδρίες. Η επιλογή αυτή στόχευε στην ενίσχυση της κριτικής σκέψης και στην καλλιέργεια πολυεπίπεδων δεξιοτήτων, απομακρυνόμενη από την απλή απομνημόνευση. Σε αυτό το στάδιο ενισχύθηκε η διάσταση της μαθησιακής υποστήριξης, με παράλληλες δράσεις που στόχευαν στη βελτίωση της φοιτητικής εμπειρίας και στην ανάπτυξη δεξιοτήτων που ανταποκρίνονται στις απαιτήσεις της σύγχρονης εκπαιδευτικής πραγματικότητας, της επαγγελματικής ανάπτυξης και της κοινωνίας.

Πίνακας 1
Χρονογραμμή μεταβολών τύπων εξέτασης (2020–2025)

Περίοδος	Βασικές επιλογές	Στόχευση
2020–2021	Ανοικτά βιβλία + αντικειμενικού τύπου	Ταχεία προσαρμογή, βασική ακεραιότητα
2022–2025	4 ΘΕ ανάπτυξης, 4 ΘΕ projects	Κριτική σκέψη, αυθεντικότητα, υποστήριξη
2026→	Επανασχεδιασμός	Εγκυρότητα/αξιοπιστία

Γ΄ Στάδιο (υπό σχεδίαση). Η τρίτη φάση, η οποία βρίσκεται σε διαδικασία σχεδιασμού, στοχεύει στον εξορθολογισμό και στον συνδυασμό εξεταστικών μορφών. Προβλέπεται η δημιουργία τράπεζας θεμάτων με στοχευμένες παραλλαγές, ώστε να ενισχυθεί η ποικιλία αλλά και η ισοτιμία στην αξιολόγηση. Παράλληλα, σχεδιάζεται η διεύρυνση της χρήσης των προφορικών εξετάσεων, κυρίως σε περιπτώσεις όπου αυτές μπορούν να ενισχύσουν την εγκυρότητα και την αξιοπιστία των αποτελεσμάτων. Η έμφαση μετατοπίζεται πλέον στην ισορροπία ανάμεσα στη διαφάνεια, την παιδαγωγική ευελιξία και την ακαδημαϊκή ποιότητα.

ΤΥΠΟΙ ΕΞΕΤΑΣΗΣ

Η αποτίμηση των διαφορετικών τύπων εξέτασης αναδεικνύει τα ιδιαίτερα πλεονεκτήματα αλλά και τις προκλήσεις που τους συνοδεύουν (Πίνακας 2 & 3). Οι προφορικές εξετάσεις ξεχωρίζουν για την αυξημένη αυθεντικότητα που προσφέρουν, καθώς μειώνουν σημαντικά την πιθανότητα μη γνήσιας παραγωγής απαντήσεων και επιτρέπουν τόσο την εμβάθυνση στις απαντήσεις όσο και την επαναδιατύπωση όπου χρειάζεται. Ωστόσο, συνοδεύονται από σημαντικές δυσκολίες, όπως η εξασφάλιση ισοδυναμίας των θεμάτων μεταξύ των εξεταζομένων, η διασφάλιση συνέπειας και αντικειμενικότητας στα κριτήρια βαθμολόγησης, καθώς και τα τεχνικά και χρονικά κόστη που συνεπάγονται.

Τα projects με υποστήριξη προσφέρουν μια άλλη διάσταση, καθώς ενθαρρύνουν την εφαρμογή της θεωρίας σε πρακτικά σενάρια, την αιτιολόγηση των επιλογών, τον αναστοχασμό και την ανάπτυξη πολύπλευρων επαγγελματικών δεξιοτήτων. Η εμβάθυνση αυτή καθιστά τα projects ιδιαίτερα χρήσιμα στην εξ αποστάσεως εκπαίδευση, όμως αναδεικνύονται παράλληλα προκλήσεις όπως η ανάγκη επαρκούς διαχείρισης χρόνου και πόρων, η πιθανότητα υποκειμενικότητας στην αξιολόγηση, καθώς και η απαίτηση για τη διαμόρφωση σαφών και διαφανών αξόνων και κριτηρίων για τη βαθμολόγησή τους, με τη μορφή ρουμπρικών.

Οι εξετάσεις με ανοικτά βιβλία με έμφαση στην κριτική σκέψη προβάλλουν ως ένα ακόμη εργαλείο που συνδέει τη μάθηση με πραγματικές συνθήκες εργασίας. Τα πλεονεκτήματά τους περιλαμβάνουν την έμφαση στον έλεγχο της ικανότητας μεταφοράς και σύνθεσης γνώσεων, την αποθάρρυνση της στείρας αποστήθισης και την εναρμόνιση με τις πρακτικές που συναντώνται σε επαγγελματικά περιβάλλοντα. Παρά ταύτα, προϋποθέτουν ιδιαίτερα προσεκτικό σχεδιασμό θεμάτων, τα οποία πρέπει να είναι κατά βάση μελέτες περίπτωσης, (case-based ή data-informed), ώστε να διασφαλίζεται η εγκυρότητα. Επιπλέον, η αξιοπιστία στη βαθμολόγηση απαιτεί σαφή κριτήρια και κατάλληλη επιμόρφωση των διδασκόντων/ουσών.

Για την ενίσχυση της ακεραιότητας στις εξετάσεις, τα ιδρύματα καταφεύγουν σε πολλαπλά μέτρα. Στα σημαντικότερα συγκαταλέγονται η χρήση εργαλείων ελέγχου ομοιότητας κειμένου, η τεκμηρίωση του ατομικού αποτυπώματος συμβολής στις ομαδικές εργασίες, η προσθήκη προφορικής υποστήριξης ή διευκρινίσεων όπου απαιτείται, καθώς και η σαφής τεκμηρίωση πηγών και ροών εργασίας από τους φοιτητές/τριες. Οι στρατηγικές αυτές λειτουργούν συμπληρωματικά προς τους επιμέρους τύπους αξιολόγησης, ενισχύοντας την αξιοπιστία και τη διαφάνεια της διαδικασίας.

Πίνακας 2.
SWOT Προφορικών Εξετάσεων

Δυνατά σημεία	Αδυναμίες	Ευκαιρίες	Απειλές
Αυθεντικότητα, άμεση διάδραση	Ισοδυναμία/συνέπεια	Εξατομίκευση, διερεύνηση σκέψης	Τεχνικά/χρόνος, πιθανή μεροληψία

Πίνακας 3.
SWOT Projects

Δυνατά σημεία	Αδυναμίες	Ευκαιρίες	Απειλές
Εφαρμογή, αναστοχασμός	Πόροι/υποκειμενικότητα	Ανάπτυξη δεξιοτήτων	Υπέρμετρη επιβάρυνση, άνιση πρόσβαση

Στρατηγική Μετατόπιση προς την Αυθεντική Αξιολόγηση: Η ανάλυση της μελέτης περίπτωσης του ΠΜΣ ΕΤΑ αποκαλύπτει μια συστηματική μετάβαση από τη διαχείριση της πανδημικής κρίσης προς έναν ώριμο παιδαγωγικό ανασχεδιασμό. Η τριγωνοποίηση των πηγών επιβεβαιώνει ότι η επιλογή των εξετάσεων με «ανοικτά βιβλία» και η χρήση projects δεν υπήρξε μια απλή τεχνική λύση, αλλά μια βαθιά εκπαιδευτική επιλογή που μειώνει τη συναλλακτική απόσταση (Lionarakis, 2001). Τα ευρήματα από τα Focus Groups των Επιτροπών Προγραμμάτων Σπουδών (ΕΠΣ ΕΤΑ και ΕΠΣ ΕΚΠ) συγκλίνουν στο ότι η απομάκρυνση από την απομνημόνευση και η στροφή σε θέματα που απαιτούν σύνθεση και εφαρμογή της θεωρίας αποτελεί τη μόνη βιώσιμη απάντηση στις προκλήσεις της εξ αποστάσεως εκπαίδευσης. Η κατεύθυνση αυτή εναρμονίζεται πλήρως με τη διεθνή βιβλιογραφία, η οποία αναδεικνύει την πανδημία

ως καταλύτη για την αναθεώρηση της αξιολόγησης προς όφελος της ακαδημαϊκής ακεραιότητας (Cross et al., 2023; Ioakeimidou et al., 2023).

Κριτική Σκέψη ως Μηχανισμός Διασφάλισης Ακεραιότητας: Κεντρικό εύρημα της έρευνας αποτελεί η ανάδειξη της κριτικής σκέψης ως του ισχυρότερου αναχώματος απέναντι στη μη γνήσια παραγωγή έργου. Η μελέτη περίπτωσης έδειξε ότι οι δραστηριότητες που απαιτούν προσωπικό αποτύπωμα και αναστοχασμό καθιστούν τη χρήση Τεχνητής Νοημοσύνης (ΤΝ) λιγότερο ελκυστική ως υποκατάστατο σκέψης. Η άποψη αυτή ενισχύθηκε από το Focus Group της ΕΠΣ ΕΤΑ, το οποίο υπογράμμισε ότι η αυθεντική αξιολόγηση είναι ο αποτελεσματικότερος τρόπος αντιμετώπισης των γενετικών μοντέλων ΤΝ. Παράλληλα, η ΕΠΣ ΕΚΠ επιβεβαίωσε ότι η καλλιέργεια ανώτερων γνωστικών λειτουργιών μειώνει τα περιστατικά λογοκλοπής, εύρημα που τεκμηριώνεται βιβλιογραφικά από τη θέση ότι οι αυθεντικές μορφές αξιολόγησης ενισχύουν τη βαθιά μάθηση (Vlachopoulos & Makri, 2024; Manousou, 2025).

Η Τεχνητή Νοημοσύνη από Απειλή σε Αφορμή Ανασχεδιασμού: Η τριγωνοποίηση αναδεικνύει έναν αμφίσημο αλλά δημιουργικό ρόλο για την Τεχνητή Νοημοσύνη. Ενώ η μελέτη περίπτωσης κατέγραψε την ανάγκη για εργαλεία ελέγχου ομοιότητας, τα Focus Groups πρόταξαν την παιδαγωγική θωράκιση έναντι της αστυνόμευσης. Συγκεκριμένα, η ΕΠΣ ΕΤΑ αναγνώρισε ότι η ΤΝ επιβάλλει την αναθεώρηση της θεματολογίας των εξετάσεων, ενώ η ΕΠΣ ΕΚΠ προειδοποίησε για τους κινδύνους της υπερβολικής τεχνολογικής επιτήρησης. Η σύγκλιση των απόψεων αυτών με τη βιβλιογραφία οδηγεί στο συμπέρασμα ότι η ΤΝ λειτουργεί ως επιταχυντής για τον εξορθολογισμό των εξετάσεων, επιβάλλοντας τη χρήση μικτών μορφών αξιολόγησης και προφορικών δοκιμασιών όπου απαιτείται αυξημένη εγκυρότητα (Bozkurt et al., 2024; Fang et al., 2023)

Θεσμική Θωράκιση και Ποιοτική Ανατροφοδότηση Η τριγωνοποίηση των δεδομένων αναδεικνύει ότι η διασφάλιση της αξιολόγησης υπερβαίνει την τεχνική επιτήρηση, εστιάζοντας στη λειτουργική ισορροπία μεταξύ ενός σταθερού θεσμικού πλαισίου και της παιδαγωγικής ευελιξίας. Ενώ η ανάλυση της πλατφόρμας exams.eap.gr και των κανονισμών σπουδών (Ελληνικό Ανοικτό Πανεπιστήμιο, 2023) υπογραμμίζει την ανάγκη για επιχειρησιακή συνέπεια και ισοτιμία, οι απόψεις των ΕΠΣ μετατοπίζουν την έμφαση από την τεχνολογική «ασφάλεια» στη διαφάνεια των κριτηρίων και την ποιότητα της ερμηνευτικής ανατροφοδότησης.

Υπό αυτό το πρίσμα, η εξ αποστάσεως αξιολόγηση μετεξελίσσεται σε μια ανθρωποκεντρική διαδικασία, όπου η τεχνολογία υπηρετεί την παιδαγωγική στοχοθεσία (Mayer, 2021) και την ακαδημαϊκή ποιότητα. Η υιοθέτηση μικτών εξεταστικών διαδρομών —όπως ο συνδυασμός ανοικτών βιβλίων, projects και προφορικών δοκιμασιών— δεν αποτελεί απλώς τεχνική επιλογή, αλλά μια συνειδητή στροφή προς μια εκπαιδευτική κουλτούρα δημοκρατίας και ισότητας ευκαιριών. Σε αυτόν τον ανασχεδιασμό, η ηθική δεοντολογία και η ποιοτική αλληλεπίδραση αναδεικνύονται σε εξίσου κρίσιμες παραμέτρους με την αξιοπιστία της διαδικασίας.

ΣΥΜΠΕΡΑΣΜΑΤΑ

Η παρούσα εργασία ολοκληρώνεται ανακεφαλαιώνοντας τα ευρήματα γύρω από τους τρεις κεντρικούς άξονες της έρευνας, προσφέροντας μια ολοκληρωμένη εικόνα για το μετασχηματισμό της αξιολόγησης στο ΠΜΣ ΕΤΑ του ΕΑΠ.

Η Επίδραση της ΤΝ στη Διαδικασία των Εξετάσεων (2020–2025) Η έρευνα κατέδειξε ότι η ΤΝ λειτούργησε ως επιταχυντής για τη μετάβαση από την «ψηφιακή μεταφορά» παραδοσιακών εξετάσεων σε έναν βαθύ παιδαγωγικό ανασχεδιασμό. Ενώ η πρώτη φάση (2020-2021) εστίασε στην επιβίωση του συστήματος μέσω της ταχείας προσαρμογής, η ανάδυση της γενετικής ΤΝ μετά το 2022 επέβαλε τη σταδιακή εγκατάλειψη θεμάτων που βασίζονται στην ανάκληση πληροφοριών. Η μελέτη περίπτωσης, σε σύγκλιση με τις απόψεις των ΕΠΣ, αναδεικνύει ότι η ΤΝ δεν επηρέασε μόνο τα εργαλεία (π.χ. Turnitin), αλλά κυρίως τη φιλοσοφία των θεμάτων, οδηγώντας σε μορφές αξιολόγησης που απαιτούν προσωπικό αναστοχασμό και αυθεντική σύνθεση γνώσης. Η ΤΝ, επομένως, δεν μετασχημάτισε μόνο το «μέσο» της εξέτασης, αλλά επαναπροσδιόρισε το ίδιο το γνωστικό αντικείμενο, καθιστώντας την ικανότητα κριτικής αξιολόγησης των πηγών σημαντικότερη από τη συσσώρευση πληροφορίας.

Διασφάλιση Ισοτιμίας, Ακεραιότητας και Εγκυρότητας Η διασφάλιση της αξιοπιστίας στην εποχή της ΤΝ επιτυγχάνεται μέσα από ένα πολυεπίπεδο σχήμα θωράκισης. Η μελέτη αποκαλύπτει ότι η ακεραιότητα δεν διασφαλίζεται μόνο με την τεχνολογική επιτήρηση, η οποία αντιμετωπίζεται με επιφυλακτικότητα από την ακαδημαϊκή κοινότητα (ΕΠΣ ΕΚΠ), αλλά κυρίως μέσω του παιδαγωγικού σχεδιασμού. Η χρήση αναλυτικών ρουμπρικών, η χρονική οριοθέτηση και η σύνδεση των θεμάτων με το συγκεκριμένο εκπαιδευτικό υλικό της Θεματικής Ενότητας αποτελούν τις κρισιμότερες «ασφαλιστικές δικλείδες». Η ισοτιμία κατοχυρώνεται θεσμικά μέσω της πλατφόρμας exams.eap.gr (Ελληνικό Ανοικτό Πανεπιστήμιο, 2023), διασφαλίζοντας ότι η τεχνολογία παραμένει στην υπηρεσία της παιδαγωγικής στοχοθεσίας (Mayer, 2021). Αυτή η θεσμική εγρήγορση προάγει ένα περιβάλλον εμπιστοσύνης, όπου η ακαδημαϊκή δεοντολογία δεν επιβάλλεται μόνο μέσω ελέγχου, αλλά καλλιεργείται ως εσωτερικευμένη αξία του/της φοιτητή/-τριας.

Βιώσιμες Μορφές Αξιολόγησης για το Μέλλον Ως παιδαγωγικά βιώσιμα μοντέλα αναδεικνύονται οι μικτές εξεταστικές διαδρομές που συνδυάζουν αυθεντικά projects, εξετάσεις με ανοικτά βιβλία (case-based) και προφορικές δοκιμασιές. Η κατεύθυνση αυτή, όπως επιβεβαιώνεται από τη διεθνή εμπειρία (Kinley, 2023; Hatzipanagos et al., 2024), επιτρέπει την αξιολόγηση δεξιοτήτων ανώτερης τάξης που η ΤΝ αδυνατεί να υποκαταστήσει πλήρως. Η μελέτη προκρίνει τη χρήση τράπεζας θεμάτων με στοχευμένες παραλλαγές και την ενσωμάτωση της τεκμηριωμένης ροής εργασίας (process-based assessment) ως εργαλεία που ενισχύουν την εμπιστοσύνη και τη διαφάνεια. Η εστίαση στη «διαδρομή» της μάθησης και όχι μόνο στο τελικό αποτέλεσμα, προσφέρει μια πιο δίκαιη και συμπεριληπτική αποτίμηση της φοιτητικής προσπάθειας.

Συμβολή της Εργασίας και Διεθνής Προοπτική Η παρούσα εργασία συμβάλλει στη διεθνή συζήτηση προσφέροντας μια διαχρονική μελέτη περίπτωσης που αποτυπώνει την εξέλιξη των εξετάσεων σε ένα πραγματικό, μεγάλης κλίμακας πρόγραμμα σπουδών. Πέρα από τη χαρτογράφηση εργαλείων και στρατηγικών, η μελέτη προτείνει ένα πλαίσιο κατευθύνσεων για τη βιώσιμη ενσωμάτωση της ΤΝ, συνδέοντας τη θεωρητική τεκμηρίωση με τις θεσμικές ανάγκες των ΑΕΙ. Το τελικό συμπέρασμα υπογραμμίζει ότι η μετάβαση στην εποχή της ΤΝ απαιτεί μια ανθρωποκεντρική κουλτούρα αξιολόγησης, όπου η κριτική σκέψη και η ακαδημαϊκή δεοντολογία αποτελούν τον πυρήνα της εκπαιδευτικής διαδικασίας, καθιστώντας την αξιολόγηση μια πράξη μάθησης και όχι απλώς ελέγχου. Η μελέτη φιλοδοξεί να αποτελέσει έναυσμα για έναν ευρύτερο διάλογο σχετικά με τον επαναπροσδιορισμό της ακαδημαϊκής εγκυρότητας σε έναν κόσμο όπου η ανθρώπινη και η τεχνητή νοημοσύνη καλούνται να συνυπάρξουν δημιουργικά.

ΠΕΡΙΛΗΨΗ

Οι Ειδικές Μαθησιακές Δυσκολίες (ΕΜΔ) αποτελούν νευροαναπτυξιακές διαταραχές που επηρεάζουν βασικές ακαδημαϊκές δεξιότητες, καθιστώντας αναγκαία την εφαρμογή εξατομικευμένων και συμπεριληπτικών εκπαιδευτικών προσεγγίσεων. Η ενσωμάτωση των ψηφιακών τεχνολογιών στη σύγχρονη εκπαιδευτική πραγματικότητα, ιδιαίτερα κατά και μετά την πανδημία COVID-19, ανέδειξε νέες δυνατότητες υποστήριξης των μαθητών/τριών με ΕΜΔ, αλλά παράλληλα κατέστησε εμφανείς υφιστάμενες ανισότητες ως προς την πρόσβαση και την παιδαγωγική αξιοποίηση των τεχνολογικών μέσων.

Σκοπός της παρούσας μελέτης είναι η διερεύνηση της αποτελεσματικότητας των ψηφιακών εργαλείων στην υποστήριξη μαθητών/τριών με ΕΜΔ, καθώς και η κριτική αποτίμηση των προκλήσεων που σχετίζονται με την ψηφιακή προσβασιμότητα και την εκπαιδευτική συμπερίληψη. Σε μεθοδολογικό επίπεδο, η έρευνα βασίζεται σε συστηματική επισκόπηση και δευτερογενή ανάλυση δεδομένων από διεθνείς εκθέσεις οργανισμών, όπως η UNESCO, ο OECD και η Ευρωπαϊκή Επιτροπή, για την περίοδο 2020–2023, με έμφαση στη συγκριτική ανάλυση της χρήσης ψηφιακών τεχνολογιών ανά κατηγορία ΕΜΔ.

Τα ευρήματα της μελέτης καταδεικνύουν υψηλότερα επίπεδα υιοθέτησης και τεχνολογικής ωριμότητας για παρεμβάσεις που αφορούν τη δυσλεξία, σε σύγκριση με άλλες μαθησιακές δυσκολίες, όπως η δυσαριθμησία. Παράλληλα, αναδεικνύεται η ύπαρξη σημαντικού ψηφιακού χάσματος και ελλείψεων στην εξειδικευμένη επιμόρφωση των εκπαιδευτικών στην Ελλάδα σε σύγκριση με άλλες χώρες του δυτικού κόσμου. Η μελέτη καταλήγει στην ανάγκη διαμόρφωσης μιας ολιστικής ψηφιακής στρατηγικής που θα στηρίζεται στις αρχές της Καθολικής Σχεδίασης για τη Μάθηση, με στόχο τη διασφάλιση της ισότιμης πρόσβασης και της ουσιαστικής εκπαιδευτικής συμπερίληψης όλων των μαθητών/τριών με ΕΜΔ.

Λέξεις-κλειδιά: Ειδικές Μαθησιακές Δυσκολίες, ψηφιακά μέσα, ψηφιακό χάσμα, εξ αποστάσεως εκπαίδευση, συμπερίληψη

ΕΙΣΑΓΩΓΗ

Η ραγδαία ενσωμάτωση των ψηφιακών τεχνολογιών στην εκπαίδευση, η οποία επιταχύνθηκε σημαντικά κατά την περίοδο της πανδημίας COVID-19, ανέδειξε νέες δυνατότητες αλλά και ουσιώδεις προκλήσεις για τα εκπαιδευτικά συστήματα διεθνώς. Ιδιαίτερα για τους μαθητές και τις μαθήτριες με Ειδικές Μαθησιακές Δυσκολίες (ΕΜΔ), όπως η δυσλεξία, η δυσαριθμησία, η Διαταραχή Ελλειμματικής Προσοχής/Υπερκινητικότητας (ΔΕΠ-Υ) και οι Διαταραχές Αυτιστικού Φάσματος (ΔΑΦ), η ψηφιακή μετάβαση δεν συνιστά απλώς μια τεχνολογική αλλαγή, αλλά μια σύνθετη παιδαγωγική διαδικασία με άμεσες επιπτώσεις στη μαθησιακή ισότητα και τη συμπερίληψη (UNESCO, 2020). Παρότι αναδυόμενες τεχνολογίες, όπως η τεχνητή νοημοσύνη και η εικονική πραγματικότητα, προσφέρουν δυνατότητες εξατομίκευσης της μάθησης, η διεθνής βιβλιογραφία καταγράφει σημαντικές αποκλίσεις ως προς τον βαθμό υιοθέτησης και την παιδαγωγική τους αξιοποίηση, ιδίως σε ευάλωτες μαθητικές ομάδες (European Agency for Special Needs and Inclusive Education, 2022).

Παρά τον αυξανόμενο όγκο ερευνών που εξετάζουν τη χρήση των Τεχνολογιών Πληροφορίας και Επικοινωνιών στην ειδική αγωγή, εντοπίζεται ένα σαφές ερευνητικό έλλειμμα όσον αφορά τη συγκριτική αποτίμηση της αποτελεσματικότητας συγκεκριμένων ψηφιακών εργαλείων σε σχέση με διαφορετικές κατηγορίες ΕΜΔ. Οι περισσότερες μελέτες εστιάζουν είτε στη γενική παιδαγωγική αξία των ψηφιακών μέσων είτε στην περιγραφή μεμονωμένων τεχνολογικών εφαρμογών, χωρίς να εξετάζουν συστηματικά ποια εργαλεία ανταποκρίνονται αποτελεσματικότερα στις ιδιαίτερες ανάγκες κάθε μαθησιακής δυσκολίας. Επιπλέον, η σύνδεση των διεθνών ερευνητικών ευρημάτων με το εθνικό εκπαιδευτικό πλαίσιο παραμένει περιορισμένη, γεγονός που δυσχεραίνει τη διαμόρφωση τεκμηριωμένων πολιτικών ένταξης της εκπαιδευτικής τεχνολογίας σε χώρες όπως η Ελλάδα, όπου καταγράφονται δομικές ανισότητες στην ψηφιακή ετοιμότητα και στην επιμόρφωση των εκπαιδευτικών.

Παρά τη ραγδαία αύξηση της χρήσης ψηφιακών εργαλείων στην εκπαίδευση, παραμένει περιορισμένη η συγκριτική αποτίμηση της υιοθέτησής τους ανά κατηγορία Ειδικών Μαθησιακών Δυσκολιών, ιδιαίτερα στο ελληνικό εκπαιδευτικό πλαίσιο. Η παρούσα μελέτη επιχειρεί να καλύψει αυτό το κενό, εξετάζοντας συγκριτικά τη χρήση και την αποτελεσματικότητα ψηφιακών εργαλείων ανά κατηγορία Ειδικών Μαθησιακών Δυσκολιών, σε συνδυασμό με το επίπεδο ψηφιακής ετοιμότητας του ελληνικού εκπαιδευτικού συστήματος σε αντιπαραβολή με διεθνή δεδομένα. Μέσα από τη δευτερογενή ανάλυση στοιχείων διεθνών οργανισμών και πρόσφατων επιστημονικών ερευνών, η εργασία διερευνά τις δομικές αποκλίσεις που επηρεάζουν την εκπαιδευτική πρόσβαση και την αποτελεσματική αξιοποίηση των ψηφιακών μέσων από μαθητές/τριες με ΕΜΔ. Η συμβολή της μελέτης έγκειται στην ανάδειξη διαφοροποιημένων προτύπων υιοθέτησης τεχνολογιών ανά τύπο μαθησιακής δυσκολίας, καθώς και στον εντοπισμό των βασικών παραγόντων που περιορίζουν ή ενισχύουν τη συμπεριληπτική λειτουργία της εκπαιδευτικής τεχνολογίας στο ελληνικό σχολείο. Με τον τρόπο αυτό, η έρευνα φιλοδοξεί να συνεισφέρει στον επιστημονικό διάλογο γύρω από τον ψηφιακό μετασχηματισμό της ειδικής αγωγής, υποστηρίζοντας την ανάγκη για στοχευμένες και παιδαγωγικά τεκμηριωμένες στρατηγικές ένταξης των ψηφιακών μέσων.

ΜΕΘΟΔΟΛΟΓΙΑ

Η παρούσα μελέτη υιοθετεί ποιοτική ερευνητική προσέγγιση, βασισμένη στη συστηματική βιβλιογραφική επισκόπηση και στη δευτερογενή ανάλυση δεδομένων. Η επιλογή της συγκεκριμένης μεθοδολογίας θεωρείται κατάλληλη για μελέτες που αποσκοπούν στη σύνθεση και ερμηνεία υφιστάμενων ερευνητικών ευρημάτων και θεσμικών δεδομένων, ιδίως σε πεδία όπου η πρωτογενής συλλογή δεδομένων παρουσιάζει πρακτικούς και δεοντολογικούς περιορισμούς, όπως η ειδική αγωγή και η εκπαιδευτική τεχνολογία (Creswell & Poth, 2018·Komis, 2020). Τα δεδομένα αντλήθηκαν από επίσημες εκθέσεις και βάσεις δεδομένων διεθνών οργανισμών, επιλεγμένες με κριτήρια εγκυρότητας, επικαιρότητας και θεσμικής αξιοπιστίας.

Η συλλογή του ερευνητικού υλικού πραγματοποιήθηκε σε δύο συμπληρωματικούς άξονες. Στον πρώτο άξονα αναλύθηκαν επίσημες εκθέσεις και στατιστικά δεδομένα διεθνών και ευρωπαϊκών οργανισμών, όπως η UNESCO, ο OECD, η Ευρωπαϊκή Επιτροπή και η European Agency for Special Needs and Inclusive Education, καθώς και εθνικά θεσμικά κείμενα του Ελληνικού Υπουργείου Παιδείας και του Ινστιτούτου Εκπαιδευτικής Πολιτικής. Η αξιοποίηση θεσμικών πηγών κρίνεται μεθοδολογικά έγκυρη, καθώς προσφέρει αξιόπιστα συγκρίσιμα δεδομένα και αποτυπώνει τις κυρίαρχες πολιτικές και πρακτικές σε διακρατικό επίπεδο (OECD, 2021· IEP, 2021).

Το χρονικό εύρος της ανάλυσης περιορίστηκε στην περίοδο 2020–2023, προκειμένου να καταγραφούν οι επιπτώσεις της επιτάχυνσης της ψηφιακής εκπαίδευσης κατά την πανδημία COVID-19 και στη μεταπανδημική φάση. Η επιλογή αυτής της περιόδου ευθυγραμμίζεται με σχετικές μελέτες που επισημαίνουν ότι η συγκεκριμένη συγκυρία αποτέλεσε κρίσιμο σημείο καμπής για την ενσωμάτωση των ψηφιακών τεχνολογιών στην εκπαίδευση και ειδικότερα στην ειδική αγωγή (UNESCO, 2020· Borup & Archambault, 2023).

Στον δεύτερο άξονα πραγματοποιήθηκε συστηματική επισκόπηση της διεθνούς επιστημονικής βιβλιογραφίας σε έγκριτα περιοδικά, με έμφαση σε μελέτες που εξετάζουν την αποτελεσματικότητα ψηφιακών εργαλείων ανά κατηγορία Ειδικών Μαθησιακών Δυσκολιών, όπως η δυσλεξία, η δυσαριθμησία, η Διαταραχή Ελλειμματικής Προσοχής/Υπερκινητικότητας και οι Διαταραχές Αυτιστικού Φάσματος. Η συστηματική βιβλιογραφική επισκόπηση αποτελεί αναγνωρισμένη μεθοδολογική πρακτική για τη χαρτογράφηση ερευνητικών τάσεων και την ανάδειξη ερευνητικών κενών σε σύνθετα διεπιστημονικά πεδία (Kitchenham & Charters, 2007· Voultsiou & Moussiades, 2025).

Η επιλογή των μελετών βασίστηκε σε κριτήρια συνάφειας με το ερευνητικό αντικείμενο, επιστημονικής εγκυρότητας και επικαιρότητας, με προτεραιότητα σε δημοσιεύσεις της τελευταίας πενταετίας. Αντίστοιχη προσέγγιση προτείνεται στη διεθνή βιβλιογραφία για ανασκοπήσεις που αφορούν ταχέως εξελισσόμενες τεχνολογικές εφαρμογές στην εκπαίδευση (Holmes et al., 2021).

Αναφορικά με τα ποσοτικά στοιχεία που παρουσιάζονται στους πίνακες της μελέτης, διευκρινίζεται ότι δεν προέρχονται από πρωτογενή δειγματοληψία, αλλά αποτελούν συνθετικές εκτιμήσεις που προκύπτουν από τη συγκριτική σύνθεση των ευρημάτων των επιλεγμένων πηγών. Η πρακτική αυτή είναι σύμφωνη με τη μεθοδολογία της δευτερογενούς ανάλυσης δεδομένων, η οποία επιτρέπει τη διερεύνηση γενικών προτύπων και ανισοτήτων χωρίς τη διεκδίκηση στατιστικής γενίκευσης (Johnston, 2017).

Τέλος, η ανάλυση των δεδομένων πραγματοποιήθηκε με συγκριτική και ερμηνευτική λογική, εστιάζοντας στις διαφοροποιήσεις μεταξύ τύπων ΕΜΔ και μεταξύ της ελληνικής και της διεθνούς εκπαιδευτικής πραγματικότητας. Η συγκριτική αυτή προσέγγιση θεωρείται ιδιαίτερα κατάλληλη για μελέτες εκπαιδευτικής πολιτικής και συμπερίληψης, καθώς επιτρέπει την ανάδειξη δομικών παραγόντων που επηρεάζουν την αποτελεσματική αξιοποίηση των ψηφιακών μέσων (Phillips & Schweisfurth, 2014· Stasinos, 2020).

ΠΑΡΟΥΣΙΑΣΗ ΚΑΙ ΑΝΑΛΥΣΗ ΕΡΕΥΝΗΤΙΚΩΝ ΔΕΔΟΜΕΝΩΝ

Στην παρούσα ενότητα παρουσιάζονται συγκριτικά δεδομένα που αποτυπώνουν βασικές πτυχές της ψηφιακής εκπαίδευσης μαθητών/τριών με Ειδικές Μαθησιακές Δυσκολίες (ΕΜΔ) κατά την περίοδο της πανδημίας COVID-19. Η ανάλυση βασίζεται σε δευτερογενή στοιχεία διεθνών και εθνικών οργανισμών και εστιάζει στην πρόσβαση σε τεχνολογικό εξοπλισμό, στο επίπεδο επιμόρφωσης των εκπαιδευτικών και στη σχετική ακαδημαϊκή πρόοδο των μαθητών/τριών.

Πίνακας 1
Στατιστικά Δεδομένα: Ελλάδα και Διεθνής Πραγματικότητα
Χρήση Τεχνολογιών στην Εκπαίδευση Παιδιών με ΕΜΔ κατά τη Διάρκεια της Πανδημίας

Χώρα	Ποσοστό Παιδιών με Πρόσβαση σε Τεχνολογία (%)	Ποσοστό Εκπαιδευτικών με Εκπαίδευση σε Τεχνολογίες (%)	Ποσοστό Παιδιών που Βελτιώθηκαν Ακαδημαϊκά (%)
Ελλάδα	65	40	55
ΗΠΑ	85	70	75
Γερμανία	80	65	70
Ηνωμένο Βασίλειο	75	60	65

Πηγή: UNESCO (2021), European Commission (2022), Ελληνικό Υπουργείο Παιδείας (2021)

Ο Πίνακας 1 παρουσιάζει συγκριτικά δεδομένα μεταξύ της Ελλάδας και επιλεγμένων χωρών του δυτικού κόσμου αναφορικά με τρεις κρίσιμες παραμέτρους της ψηφιακής εκπαίδευσης μαθητών/τριών με Ειδικές Μαθησιακές Δυσκολίες (ΕΜΔ): (α) την πρόσβαση σε ψηφιακό εξοπλισμό, (β) το επίπεδο επιμόρφωσης των εκπαιδευτικών στη χρήση τεχνολογιών και (γ) την αναφερόμενη ακαδημαϊκή βελτίωση των μαθητών/τριών κατά την περίοδο της πανδημίας COVID-19. Θα πρέπει να επισημανθεί στο σημείο αυτό ότι τα ποσοστά του Πίνακα 1 λειτουργούν ενδεικτικά και δεν επιτρέπουν αιτιώδεις συσχετίσεις, αλλά αποτυπώνουν συγκριτικές τάσεις ψηφιακής ετοιμότητας σε διαφορετικά εκπαιδευτικά συστήματα.

Πιο συγκεκριμένα, στην ελληνική περίπτωση, το ποσοστό πρόσβασης σε τεχνολογικό εξοπλισμό ανέρχεται στο 65%, ενώ μόλις το 40% των εκπαιδευτικών δηλώνει ότι έχει λάβει σχετική επιμόρφωση. Το ποσοστό ακαδημαϊκής βελτίωσης των μαθητών/τριών με ΕΜΔ περιορίζεται στο 55%, στοιχείο που υποδηλώνει ότι η ψηφιακή μετάβαση δεν

συνοδεύτηκε από επαρκείς παιδαγωγικές και οργανωτικές προϋποθέσεις. Τα δεδομένα αυτά αποτυπώνουν έναν συστημικό περιορισμό στην αποτελεσματική ενσωμάτωση των ψηφιακών μέσων στην εκπαιδευτική πράξη, ο οποίος ενδέχεται να επηρεάζει δυσανάλογα ευάλωτες ομάδες μαθητών, όπως εκείνους με ΕΜΔ.

Αντιθέτως, στις Ηνωμένες Πολιτείες καταγράφονται σημαντικά υψηλότερα ποσοστά τόσο πρόσβασης (85%) όσο και επιμόρφωσης των εκπαιδευτικών (70%), με αντίστοιχη αύξηση του ποσοστού ακαδημαϊκής βελτίωσης των μαθητών/τριών (75%). Το εύρημα αυτό ενισχύει την άποψη ότι η ψηφιακή ένταξη δεν περιορίζεται στην υλικοτεχνική υποδομή, αλλά προϋποθέτει τη συστηματική επένδυση στο ανθρώπινο δυναμικό και την παιδαγωγική αξιοποίηση των τεχνολογιών. Παρόμοια εικόνα παρουσιάζει και η Γερμανία, όπου τα υψηλά επίπεδα πρόσβασης (80%) και επιμόρφωσης (65%) συνοδεύονται από αυξημένη ακαδημαϊκή πρόοδο (70%), γεγονός που υποδηλώνει θετικό συσχετισμό μεταξύ ψηφιακής ετοιμότητας και μαθησιακών αποτελεσμάτων.

Στο Ηνωμένο Βασίλειο, τα ποσοστά πρόσβασης (75%) και επιμόρφωσης (60%) κινούνται σε ενδιάμεσα επίπεδα σε σχέση με τις υπόλοιπες χώρες, ενώ το ποσοστό ακαδημαϊκής βελτίωσης ανέρχεται στο 65%. Παρότι τα αποτελέσματα υπολείπονται εκείνων των ΗΠΑ, η συνολική εικόνα καταδεικνύει ότι η συνδυαστική ενίσχυση υποδομών και επιμόρφωσης δύναται να έχει ουσιαστικό αντίκτυπο στην εκπαιδευτική επίδοση των μαθητών/τριών με ΕΜΔ.

Συνολικά, τα δεδομένα του Πίνακα 1 υποστηρίζουν την υπόθεση ότι η αποτελεσματικότητα της ψηφιακής εκπαίδευσης για μαθητές/τριες με ΕΜΔ συνδέεται άμεσα με το επίπεδο ψηφιακής ετοιμότητας των εκπαιδευτικών συστημάτων. Η απλή παροχή τεχνολογικού εξοπλισμού δεν επαρκεί, εάν δεν συνοδεύεται από στοχευμένη επιμόρφωση και παιδαγωγικό σχεδιασμό, γεγονός που αποκτά ιδιαίτερη σημασία για χώρες όπως η Ελλάδα, όπου καταγράφονται διαρθρωτικές αδυναμίες στον ψηφιακό μετασχηματισμό της ειδικής αγωγής.

ΕΙΔΙΚΕΣ ΜΑΘΗΣΙΑΚΕΣ ΔΥΣΚΟΛΙΕΣ ΚΑΙ ΨΗΦΙΑΚΗ ΥΠΟΣΤΗΡΙΞΗ

Οι Ειδικές Μαθησιακές Δυσκολίες (ΕΜΔ) αποτελούν νευροαναπτυξιακές διαταραχές που επηρεάζουν βασικές ακαδημαϊκές δεξιότητες, όπως η ανάγνωση, η γραφή και τα μαθηματικά, χωρίς να συνδέονται με μειωμένη γενική νοημοσύνη (American Psychiatric Association, 2022). Η σύγχρονη ερευνητική προσέγγιση αναγνωρίζει ότι οι δυσκολίες αυτές δεν απορρέουν από έλλειψη ικανοτήτων, αλλά από διαφοροποιήσεις στον τρόπο επεξεργασίας των πληροφοριών, γεγονός που καθιστά αναγκαία την υιοθέτηση ευέλικτων και εξατομικευμένων εκπαιδευτικών πρακτικών (Stasinos, 2020· OECD, 2021). Στο πλαίσιο της ψηφιακής εκπαίδευσης, οι διαφοροποιήσεις αυτές αποκτούν ιδιαίτερη σημασία, καθώς τα ψηφιακά περιβάλλοντα μάθησης δύνανται να λειτουργήσουν τόσο ως μηχανισμοί ενίσχυσης όσο και ως παράγοντες αποκλεισμού, εάν δεν σχεδιαστούν με όρους προσβασιμότητας και συμπερίληψης (UNESCO, 2020).

Η βιβλιογραφία καταγράφει ότι οι ΕΜΔ περιλαμβάνουν ετερογενείς κατηγορίες, οι οποίες παρουσιάζουν διαφορετικά μαθησιακά προφίλ και, κατ' επέκταση, διαφοροποιημένες ανάγκες εκπαιδευτικής και τεχνολογικής υποστήριξης. Η δυσλεξία, ως η συχνότερα μελετημένη μορφή ΕΜΔ, έχει αποτελέσει πεδίο ανάπτυξης πληθώρας ψηφιακών εργαλείων, όπως εφαρμογές μετατροπής κειμένου σε ομιλία, λογισμικά υποστήριξης ανάγνωσης και πλατφόρμες εξατομικευμένης διδασκαλίας (International Dyslexia Association, 2021· Holmes et al., 2021). Αντίθετα, η δυσαριθμησία παραμένει λιγότερο υποστηριζόμενη σε επίπεδο ψηφιακών παρεμβάσεων, παρά το γεγονός ότι επηρεάζει σημαντικό ποσοστό μαθητών και συνδέεται με μακροπρόθεσμες ακαδημαϊκές και επαγγελματικές επιπτώσεις (Butterworth et al., 2011).

Παράλληλα, οι μαθητές/τριες με Διαταραχή Ελλειμματικής Προσοχής/Υπερκινητικότητας και Διαταραχές Αυτιστικού Φάσματος παρουσιάζουν αυξημένες ανάγκες για δομημένα, προβλέψιμα και οπτικοποιημένα μαθησιακά περιβάλλοντα. Η διεθνής έρευνα υποδεικνύει ότι ψηφιακά εργαλεία, όπως εφαρμογές ενίσχυσης εκτελεστικών λειτουργιών, συστήματα διαχείρισης μάθησης και τεχνολογίες εικονικής πραγματικότητας, μπορούν να υποστηρίξουν την αυτορρύθμιση και την κοινωνική αλληλεπίδραση, υπό την προϋπόθεση ότι εντάσσονται σε παιδαγωγικά σχεδιασμένες παρεμβάσεις (European Agency for Special Needs and Inclusive Education, 2022· Borup & Archambault, 2023).

Η διαφοροποιημένη φύση των ΕΜΔ καθιστά σαφές ότι η αποτελεσματικότητα των ψηφιακών μέσων δεν μπορεί να εξετάζεται ενιαία ή ομοιόμορφα. Αντιθέτως, απαιτείται συγκριτική προσέγγιση που λαμβάνει υπόψη τόσο τον τύπο της μαθησιακής δυσκολίας όσο και το ευρύτερο εκπαιδευτικό και θεσμικό πλαίσιο εντός του οποίου εφαρμόζονται οι ψηφιακές παρεμβάσεις (Phillips & Schweisfurth, 2014·Komis, 2020). Στην ελληνική πραγματικότητα, οι περιορισμοί σε επίπεδο επιμόρφωσης εκπαιδευτικών και ψηφιακής υποδομής ενδέχεται να επηρεάζουν δυσανάλογα μαθητές/τριες με ΕΜΔ, γεγονός που καθιστά αναγκαία τη συστηματική διερεύνηση των υφιστάμενων πρακτικών (Institute of Educational Policy, 2021).

Στο πλαίσιο αυτό, η παρούσα μελέτη υιοθετεί συγκριτική οπτική, εξετάζοντας πρότυπα χρήσης και αποτελεσματικότητας ψηφιακών εργαλείων ανά κατηγορία Ειδικών Μαθησιακών Δυσκολιών. Η προσέγγιση αυτή επιτρέπει την ανάδειξη διαφοροποιήσεων και ελλειμμάτων ψηφιακής υποστήριξης, συμβάλλοντας στη συζήτηση γύρω από τον σχεδιασμό συμπεριληπτικών ψηφιακών μαθησιακών περιβαλλόντων και τη διαμόρφωση τεκμηριωμένων εκπαιδευτικών πολιτικών.

ΨΗΦΙΑΚΑ ΜΕΣΑ ΣΤΗ ΣΥΓΧΡΟΝΗ ΕΚΠΑΙΔΕΥΤΙΚΗ ΠΡΑΓΜΑΤΙΚΟΤΗΤΑ

Η αξιοποίηση των ψηφιακών μέσων στη σύγχρονη εκπαιδευτική πραγματικότητα έχει αναδειχθεί ως κρίσιμος παράγοντας υποστήριξης μαθητών/τριών με Ειδικές Μαθησιακές Δυσκολίες (ΕΜΔ), ιδιαίτερα στο πλαίσιο της εξ αποστάσεως και της μικτής μάθησης. Τα ψηφιακά μαθησιακά περιβάλλοντα παρέχουν αυξημένη ευελιξία και δυνατότητες εξατομίκευσης, επιτρέποντας την προσαρμογή του ρυθμού, του τρόπου παρουσίασης και του περιεχομένου της διδασκαλίας στις ανάγκες κάθε μαθητή (European Commission, 2022). Τεχνολογίες υποστηρικτικής μάθησης, όπως εφαρμογές μετατροπής κειμένου σε ομιλία, οπτικοποιημένα μαθησιακά αντικείμενα και διαδραστικά πολυμεσικά υλικά, έχουν αναφερθεί ως ιδιαίτερα ωφέλιμες για μαθητές με δυσλεξία, δυσαριθμησία και Διαταραχές Αυτιστικού Φάσματος, ενισχύοντας την κατανόηση και τη μαθησιακή εμπλοκή (Smith & Hattingh, 2020).

Παράλληλα, η χρήση πολυτροπικών ψηφιακών υλικών συμβάλλει στη μείωση γνωστικών φραγμών, επιτρέποντας την προσέγγιση της γνώσης μέσω πολλαπλών αισθητηριακών καναλιών. Ωστόσο, η αποτελεσματικότητα των ψηφιακών μέσων δεν είναι δεδομένη και εξαρτάται σε μεγάλο βαθμό από το ευρύτερο κοινωνικό και θεσμικό πλαίσιο εντός του οποίου εφαρμόζονται. Η διεθνής και ελληνική βιβλιογραφία επισημαίνει την ύπαρξη έντονων ανισοτήτων πρόσβασης σε τεχνολογικό εξοπλισμό και αξιόπιστη διαδικτυακή σύνδεση, γεγονός που εντείνει το ψηφιακό χάσμα και επηρεάζει δυσανάλογα μαθητές/τριες με ΕΜΔ (Hellenic Ministry of Education and Religious Affairs, 2021).

Επιπλέον, η εξ αποστάσεως εκπαιδευτική διαδικασία ενδέχεται να περιορίσει τις ευκαιρίες κοινωνικής αλληλεπίδρασης, στοιχείο ιδιαίτερα κρίσιμο για μαθητές με αυξημένες κοινωνικοσυναισθηματικές ανάγκες. Έρευνες έχουν δείξει ότι η μειωμένη άμεση επικοινωνία με συνομηλίκους και εκπαιδευτικούς μπορεί να επηρεάσει αρνητικά την ψυχολογική ευημερία και το αίσθημα σχολικής ένταξης των μαθητών, εάν δεν συνοδεύεται από στοχευμένες παιδαγωγικές παρεμβάσεις (Mazurek & Wenstrup, 2022· UNICEF, 2021).

Κεντρικό ρόλο στην αποτελεσματική αξιοποίηση των ψηφιακών μέσων διαδραματίζει η επιμόρφωση των εκπαιδευτικών. Η έλλειψη επαρκούς παιδαγωγικής κατάρτισης στη χρήση ψηφιακών εργαλείων για την υποστήριξη μαθητών με ΕΜΔ αποτελεί διαχρονική πρόκληση, ιδιαίτερα στο ελληνικό εκπαιδευτικό σύστημα (Hellenic Ministry of Education and Religious Affairs, 2021). Η διεθνής εμπειρία καταδεικνύει ότι η επαγγελματική ανάπτυξη των εκπαιδευτικών συνδέεται άμεσα με την ποιότητα των ψηφιακών παρεμβάσεων και τα μαθησιακά αποτελέσματα.

Παρά τις προκλήσεις αυτές, οι σύγχρονες τεχνολογικές εξελίξεις δημιουργούν νέες προοπτικές για τη συμπεριληπτική εκπαίδευση. Εφαρμογές τεχνητής νοημοσύνης και εικονικής πραγματικότητας προσφέρουν δυνατότητες δυναμικής προσαρμογής του μαθησιακού περιεχομένου και ενίσχυσης της αυτορρύθμισης, ενώ η συνεργασία μεταξύ σχολείου, οικογένειας και ειδικών επιστημόνων δύναται να ενισχύσει τη συνολική αποτελεσματικότητα των ψηφιακών παρεμβάσεων (Clark et al., 2022· Voultsiou & Moussiades, 2025). Υπό αυτές τις συνθήκες, τα ψηφιακά μέσα μπορούν να λειτουργήσουν όχι μόνο ως τεχνολογικά εργαλεία, αλλά ως καταλύτες για τον ανασχεδιασμό πιο ισότιμων και προσβάσιμων εκπαιδευτικών πρακτικών.

ΚΑΤΗΓΟΡΙΕΣ ΨΗΦΙΑΚΩΝ ΠΑΡΕΜΒΑΣΕΩΝ ΓΙΑ ΜΑΘΗΤΕΣ/ΤΡΙΕΣ ΜΕ ΕΙΔΙΚΕΣ ΜΑΘΗΣΙΑΚΕΣ ΔΥΣΚΟΛΙΕΣ

Η διεθνής βιβλιογραφία καταδεικνύει ότι τα ψηφιακά εργαλεία που αξιοποιούνται για την υποστήριξη μαθητών/τριών με Ειδικές Μαθησιακές Δυσκολίες (ΕΜΔ) μπορούν να ομαδοποιηθούν σε διακριτές λειτουργικές κατηγορίες, ανάλογα με τον τύπο της μαθησιακής δυσκολίας και τις εκπαιδευτικές ανάγκες που εξυπηρετούν. Οι κατηγορίες αυτές περιλαμβάνουν εργαλεία υποστηρικτικής ανάγνωσης και γραφής, διαδραστικά μαθηματικά περιβάλλοντα, εφαρμογές ενίσχυσης εκτελεστικών λειτουργιών, τεχνολογίες κοινωνικής μάθησης και γενικές πλατφόρμες διαχείρισης μάθησης. Η διαφοροποιημένη υιοθέτηση των παραπάνω κατηγοριών αποτυπώνει τόσο τις ιδιαίτερες ανάγκες των μαθητών/τριών με ΕΜΔ όσο και το επίπεδο ωρίμανσης των αντίστοιχων τεχνολογικών λύσεων σε διεθνές επίπεδο.

Στον Πίνακα 2 παρουσιάζονται ενδεικτικά ποσοστά χρήσης ψηφιακών εργαλείων ανά κατηγορία Ειδικών Μαθησιακών Δυσκολιών, όπως αυτά καταγράφονται στη διεθνή βιβλιογραφία.

Πίνακας 2
Ποσοστά χρήσης ψηφιακών εργαλείων από μαθητές/τριες με Ειδικές Μαθησιακές Δυσκολίες (ΕΜΔ) σε διεθνές επίπεδο

Κατηγορία ΕΜΔ	Τύπος Ψηφιακού Εργαλείου	Αναφερόμενο Ποσοστό Χρήσης (%)	Πηγή Δεδομένων
Δυσλεξία	Εφαρμογές μετατροπής κειμένου σε ομιλία (π.χ. NaturalReader)	65% (ΗΠΑ)	International Dyslexia Association (2021)
Δυσλεξία	Λογισμικό ορθογραφικού και γλωσσικού ελέγχου (π.χ. Grammarly)	50% (Ευρώπη)	European Agency for Special Needs and Inclusive Education (2022)
Δυσαριθμησία	Διαδραστικά μαθηματικά λογισμικά (π.χ. Mathway)	40% (Χώρες OECD)	OECD (2021)
Δυσαριθμησία	Εφαρμογές διαχείρισης χρόνου (π.χ. Time Timer)	30% (Παγκόσμιο δείγμα)	UNESCO (2021)
Διαταραχές Αυτιστικού Φάσματος (ΔΑΦ)	Εφαρμογές κοινωνικής μάθησης και προσομοίωσης (π.χ. ψηφιακές κοινωνικές ιστορίες)	35% (Παγκόσμιο δείγμα)	Autism Speaks (2021)
Διαταραχές Αυτιστικού Φάσματος (ΔΑΦ)	Τεχνολογίες εικονικής πραγματικότητας για κοινωνικές δεξιότητες	25% (ΗΠΑ)	Smith & Hattingh (2020)
Διαταραχή Ελλειμματικής Προσοχής / Υπερκινητικότητας (ΔΕΠ-Υ)	Εφαρμογές εστίασης προσοχής και αυτορρύθμισης (π.χ. Focus@Will)	45% (ΗΠΑ)	Zheng et al. (2021)
Διαταραχή Ελλειμματικής Προσοχής / Υπερκινητικότητας (ΔΕΠ-Υ)	Ψηφιακά εργαλεία οργάνωσης μαθησιακών εργασιών (π.χ. Trello)	30% (Ευρώπη)	European Commission (2022)
Γενική κατηγορία ΕΜΔ	Πλατφόρμες Διαχείρισης Μάθησης (LMS)	70% (Παγκόσμιο δείγμα)	UNESCO (2021)
Γενική κατηγορία ΕΜΔ	Εφαρμογές παιγνιώδους μάθησης (gamification)	50% (ΗΠΑ)	Clark et al. (2022)
Γονείς & Εκπαιδευτικοί	Εφαρμογές επικοινωνίας σχολείου–οικογένειας	60% (Χώρες OECD)	OECD (2021)

Σημείωση: Τα αναγραφόμενα ποσοστά δεν αποτελούν προϊόν πρωτογενούς έρευνας της παρούσας μελέτης, αλλά προέρχονται από δευτερογενή ανάλυση ευρημάτων της διεθνούς βιβλιογραφίας για τους αντίστοιχους πληθυσμούς αναφοράς (π.χ. ΗΠΑ, Ευρώπη, χώρες OECD) κατά την περίοδο 2020–2023.

Στην περίπτωση της δυσλεξίας, καταγράφεται η υψηλότερη ενσωμάτωση ψηφιακών παρεμβάσεων, με έμφαση σε εργαλεία υποστηρικτικής ανάγνωσης και γραφής, όπως εφαρμογές μετατροπής κειμένου σε ομιλία και λογισμικά ορθογραφικής και γλωσσικής υποστήριξης. Η εκτεταμένη χρήση αυτών των εργαλείων αποδίδεται αφενός στη συχνότητα εμφάνισης της δυσλεξίας και αφετέρου στη μακρόχρονη ερευνητική ενασχόληση με τη συγκεκριμένη μαθησιακή δυσκολία, η οποία έχει οδηγήσει στην ανάπτυξη ώριμων και ευρέως διαθέσιμων τεχνολογικών λύσεων (International Dyslexia Association, 2021· European Agency for Special Needs and Inclusive Education, 2022).

Αντίθετα, για τη δυσαριθμησία παρατηρούνται χαμηλότερα ποσοστά χρήσης ψηφιακών εργαλείων, τα οποία επικεντρώνονται κυρίως σε διαδραστικά μαθηματικά περιβάλλοντα και εφαρμογές οπτικοποίησης αριθμητικών εννοιών. Παρά τη δυνατότητα των εργαλείων αυτών να υποστηρίξουν την κατανόηση βασικών μαθηματικών δομών, η περιορισμένη υιοθέτησή τους υποδηλώνει ελλείμματα τόσο στη διαθεσιμότητα εξειδικευμένων εφαρμογών όσο και στην επιμόρφωση των εκπαιδευτικών ως προς την παιδαγωγική τους αξιοποίηση (OECD, 2021· UNESCO, 2021).

Για τους μαθητές/τριες με Διαταραχές Αυτιστικού Φάσματος, οι ψηφιακές παρεμβάσεις εστιάζουν κυρίως στην ενίσχυση κοινωνικών και επικοινωνιακών δεξιοτήτων μέσω τεχνολογιών κοινωνικής μάθησης και εφαρμογών προσομοίωσης. Ιδιαίτερο ενδιαφέρον παρουσιάζουν τεχνολογίες εικονικής πραγματικότητας και ψηφιακές κοινωνικές

ιστορίες, οι οποίες προσφέρουν δομημένα και προβλέψιμα μαθησιακά περιβάλλοντα. Ωστόσο, τα σχετικά ποσοστά χρήσης παραμένουν συγκριτικά χαμηλότερα, γεγονός που αποδίδεται σε παράγοντες όπως το αυξημένο κόστος, η τεχνική πολυπλοκότητα και η ανάγκη εξειδικευμένης καθοδήγησης για την αποτελεσματική εφαρμογή τους (Smith & Hattingh, 2020).

Στην περίπτωση της Διαταραχής Ελλειμματικής Προσοχής/Υπερκινητικότητας (ΔΕΠ-Υ), τα ψηφιακά εργαλεία επικεντρώνονται κυρίως στην υποστήριξη των εκτελεστικών λειτουργιών, όπως η διαχείριση προσοχής, οργάνωσης και χρόνου. Τα υψηλότερα ποσοστά χρήσης τέτοιων εφαρμογών υποδηλώνουν ότι οι τεχνολογικές παρεμβάσεις που στοχεύουν άμεσα στα βασικά συμπτώματα της διαταραχής θεωρούνται περισσότερο λειτουργικές και άμεσα αξιοποιήσιμες στην εκπαιδευτική πράξη (Zheng et al., 2021· European Commission, 2022).

Ιδιαίτερα σημαντική είναι η εκτεταμένη χρήση γενικών εκπαιδευτικών πλατφορμών και εργαλείων παιγνιώδους μάθησης από μαθητές/τριες με ΕΜΔ. Τα υψηλά ποσοστά υιοθέτησης πλατφορμών διαχείρισης μάθησης και εφαρμογών gamification υπογραμμίζουν τη σημασία της καθολικής σχεδίασης για τη μάθηση, καθώς τα εργαλεία γενικής χρήσης, όταν ενσωματώνουν αρχές προσβασιμότητας και ευελιξίας, μπορούν να λειτουργήσουν υποστηρικτικά για ευρύ φάσμα μαθησιακών αναγκών (UNESCO, 2021).

Παράλληλα, η αξιοποίηση ψηφιακών εργαλείων επικοινωνίας μεταξύ σχολείου και οικογένειας αναδεικνύεται ως κρίσιμος παράγοντας υποστήριξης των μαθητών/τριών με ΕΜΔ. Η ενίσχυση της συνεργασίας μεταξύ εκπαιδευτικών, γονέων και ειδικών επιστημόνων συμβάλλει στη συστηματική παρακολούθηση της μαθησιακής προόδου και στη διαμόρφωση συνεκτικών παρεμβάσεων, γεγονός που αποτυπώνεται στα αυξημένα ποσοστά χρήσης σχετικών εφαρμογών (OECD, 2021).

Ο Πίνακας 2 συνοψίζει τα αναφερόμενα ποσοστά χρήσης ψηφιακών εργαλείων ανά κατηγορία Ειδικών Μαθησιακών Δυσκολιών, όπως αυτά καταγράφονται στη διεθνή βιβλιογραφία. Τα ποσοστά αυτά δεν αποσκοπούν σε άμεση συγκριτική αξιολόγηση μεταξύ χωρών, αλλά λειτουργούν ενδεικτικά, αποτυπώνοντας τάσεις υιοθέτησης ψηφιακών παρεμβάσεων σε διαφορετικά θεσμικά και γεωγραφικά πλαίσια. Συνολικά, τα ευρήματα αναδεικνύουν σημαντική διακύμανση στον βαθμό ωρίμανσης και αξιοποίησης των ψηφιακών εργαλείων ανά τύπο ΕΜΔ, υπογραμμίζοντας την ανάγκη για περαιτέρω ανάπτυξη εξειδικευμένων παρεμβάσεων, ενίσχυση της επιμόρφωσης των εκπαιδευτικών και συστηματική αξιολόγηση της παιδαγωγικής αποτελεσματικότητας των ψηφιακών τεχνολογιών στην ειδική αγωγή. Η εννοιολογική αυτή προσέγγιση αναδεικνύει την ανάγκη μετάβασης από γενικευμένες τεχνολογικές λύσεις σε στοχευμένες ψηφιακές παρεμβάσεις, στοιχείο που αποτελεί βασικό άξονα της ανάλυσης που ακολουθεί.

ΣΥΜΠΕΡΑΣΜΑΤΑ

Η παρούσα μελέτη ανέδειξε τον κρίσιμο ρόλο των ψηφιακών τεχνολογιών στην εκπαίδευση μαθητών/τριών με Ειδικές Μαθησιακές Δυσκολίες (ΕΜΔ), συμβάλλοντας στη συζήτηση γύρω από τη συγκριτική αποτελεσματικότητα των ψηφιακών παρεμβάσεων σε διαφορετικά εκπαιδευτικά πλαίσια. Μέσα από την ανάλυση δευτερογενών δεδομένων, προέκυψαν ευρήματα που απαντούν στα ερευνητικά ερωτήματα και φωτίζουν τόσο τις δυνατότητες όσο και τους περιορισμούς του ψηφιακού μετασχηματισμού στην ειδική αγωγή.

Σε σχέση με το πρώτο ερευνητικό ερώτημα, τα αποτελέσματα κατέδειξαν σημαντική απόκλιση μεταξύ της ελληνικής και της διεθνούς πραγματικότητας ως προς τον βαθμό ψηφιακής ετοιμότητας. Παρότι σε χώρες όπως οι Ηνωμένες Πολιτείες και η Γερμανία καταγράφονται υψηλά επίπεδα ψηφιακής πρόσβασης και ενσωμάτωσης, η ελληνική περίπτωση χαρακτηρίζεται από υστέρηση, η οποία δεν αφορά τόσο τη διαθεσιμότητα εξοπλισμού όσο την παιδαγωγική αξιοποίησή του. Το εύρημα αυτό ενισχύει την άποψη ότι η ψηφιακή ένταξη συνιστά μια πολυδιάστατη διαδικασία και ότι η τεχνολογία από μόνη της δεν αρκεί για τη βελτίωση των μαθησιακών αποτελεσμάτων, εάν δεν συνοδεύεται από θεσμικές και παιδαγωγικές μεταβολές. Παράλληλα, αναδεικνύεται η ανάγκη προσεκτικής διαχείρισης κινδύνων, όπως η κοινωνική απομόνωση και η περιορισμένη διαπροσωπική αλληλεπίδραση, ιδιαίτερα για ορισμένους τύπους ΕΜΔ.

Αναφορικά με το δεύτερο ερευνητικό ερώτημα, η ανάλυση αποκάλυψε σαφή ανισομέρεια στην ωριμότητα και τη διάδοση των ψηφιακών εργαλείων ανά κατηγορία ΕΜΔ. Οι παρεμβάσεις για τη δυσλεξία εμφανίζουν υψηλά επίπεδα υιοθέτησης, γεγονός που συνδέεται με τη μακροχρόνια ερευνητική εστίαση στη συγκεκριμένη μαθησιακή δυσκολία. Αντιθέτως, κατηγορίες όπως η δυσαριθμησία παραμένουν λιγότερο υποστηριζόμενες τεχνολογικά, με αποτέλεσμα χαμηλότερα ποσοστά χρήσης ψηφιακών εργαλείων. Το εύρημα αυτό υπογραμμίζει την ανάγκη αναπροσανατολισμού του ερευνητικού και σχεδιαστικού ενδιαφέροντος προς λιγότερο προβεβλημένες μαθησιακές δυσκολίες, προκειμένου να περιοριστούν οι ανισότητες στην εκπαίδευση.

Τέλος, σε σχέση με τα εμπόδια ενσωμάτωσης των ψηφιακών μέσων, τα αποτελέσματα δείχνουν ότι ο σημαντικότερος ανασταλτικός παράγοντας δεν είναι η ίδια η τεχνολογία, αλλά η ανεπαρκής επιμόρφωση του ανθρώπινου δυναμικού. Το χαμηλό ποσοστό καταρτισμένων εκπαιδευτικών, σε συνδυασμό με τα μέτρια επίπεδα ακαδημαϊκής βελτίωσης των μαθητών/τριών, υποδεικνύει ότι η επένδυση στο ανθρώπινο κεφάλαιο αποτελεί βασική προϋπόθεση για έναν ουσιαστικό ψηφιακό μετασχηματισμό. Συνεπώς, η δημιουργία ενός συμπεριληπτικού σχολείου στην ψηφιακή εποχή προϋποθέτει μια ολιστική στρατηγική που συνδυάζει την Καθολική Σχεδίαση για τη Μάθηση με τη συνεχή επαγγελματική ανάπτυξη των εκπαιδευτικών.

ΘΠ18: Κοινωνικά δίκτυα και εκπαίδευση

ΚΟΙΝΩΝΙΚΑ ΔΙΚΤΥΑ ΚΑΙ ΕΚΠΑΙΔΕΥΣΗ

Κούλης Ιωάννης
Διευθυντής 9ου Δημοτικού Σχολείου Άρτας
Διεύθυνση Πρωτοβάθμιας Εκπαιδευσης Άρτας
Ελλάδα

ΠΕΡΙΛΗΨΗ

Τα κοινωνικά δίκτυα έχουν γίνει αναπόσπαστο κομμάτι της σύγχρονης ζωής, επηρεάζοντας σχεδόν όλους τους τομείς, συμπεριλαμβανομένης και της εκπαίδευσης. Η χρήση τους στην εκπαιδευτική διαδικασία έχει ανοίξει νέους ορίζοντες, αλλά ταυτόχρονα θέτει και σημαντικές προκλήσεις. Η παρούσα εργασία αποσκοπεί στο να εξετάσει τη σχέση αυτή, να αναλύσει τη σχετική νομοθεσία και να προτείνει κατευθύνσεις για την ορθή χρήση των κοινωνικών δικτύων στο εκπαιδευτικό περιβάλλον. Αναλυτικότερα, τα κοινωνικά δίκτυα έχουν γίνει αναπόσπαστο κομμάτι της σύγχρονης ζωής, επηρεάζοντας σχεδόν όλους τους τομείς, συμπεριλαμβανομένης και της εκπαίδευσης. Η ραγδαία εξέλιξη της τεχνολογίας και η διείσδυση των ψηφιακών πλατφορμών στην καθημερινότητά μας, έχουν μεταβάλει τον τρόπο με τον οποίο μαθαίνουμε, επικοινωνούμε και συνεργαζόμαστε. Στο πλαίσιο της εκπαίδευσης, τα κοινωνικά δίκτυα έχουν ανοίξει νέους ορίζοντες, προσφέροντας ευκαιρίες για διαδραστική μάθηση, συνεργασία και πρόσβαση σε πλούσιους εκπαιδευτικούς πόρους. Ωστόσο, η χρήση τους δεν υφίσταται χωρίς προκλήσεις. Ζητήματα όπως η προστασία της ιδιωτικής ζωής, η ασφάλεια των δεδομένων, ο κυβερνοεκφοβισμός και η ανάγκη για ψηφιακή παιδεία αποτελούν σημαντικές ανησυχίες που απαιτούν προσοχή και αντιμετώπιση. Για τούτο, θα προσπαθήσουμε να εξετάσουμε τη σχέση αυτή, αναλύοντας τόσο τις ευκαιρίες όσο και τις προκλήσεις που προκύπτουν από τη χρήση των κοινωνικών δικτύων στο εκπαιδευτικό περιβάλλον. Στόχος είναι να κατανοήσουμε πώς αυτές οι πλατφόρμες μπορούν να ενισχύσουν την εκπαιδευτική διαδικασία, να διευκολύνουν την επικοινωνία μεταξύ μαθητών και εκπαιδευτικών και να προωθήσουν την καινοτομία στη διδασκαλία. Παράλληλα, θα εξεταστούν οι νομικές και ηθικές διαστάσεις της χρήσης των κοινωνικών δικτύων, με έμφαση στην προστασία των δεδομένων και των δικαιωμάτων των μαθητών. Η συζήτηση θα επικεντρωθεί και στην ορθή χρήση των κοινωνικών δικτύων, προτείνοντας κατευθύνσεις και καλές πρακτικές που μπορούν να υιοθετηθούν από εκπαιδευτικούς και εκπαιδευτικούς φορείς. Θα αναλυθούν τα πλεονεκτήματα της ψηφιακής παιδείας, η σημασία της ευαισθητοποίησης των μαθητών για τους κινδύνους του διαδικτύου και ο ρόλος των εκπαιδευτικών ως μεντόρων στην ψηφιακή εποχή. Επιπλέον, θα διερευνηθεί πώς τα κοινωνικά δίκτυα μπορούν να συμβάλλουν στη δημιουργία ενός πιο συμπεριληπτικού και δίκαιου εκπαιδευτικού συστήματος, παρέχοντας πρόσβαση σε γνώση και πόρους σε μαθητές από διαφορετικά κοινωνικά και γεωγραφικά πλαίσια.

Τέλος η παρούσα εργασία στοχεύει να προσφέρει μια ολοκληρωμένη προσέγγιση στη σχέση μεταξύ κοινωνικών δικτύων και εκπαίδευσης, συνδυάζοντας θεωρητική ανάλυση, πρακτικές εφαρμογές και νομικές προοπτικές. Μέσα από τη συλλογική συζήτηση και την ανταλλαγή ιδεών, επιδιώκεται να διαμορφωθεί ένας οδικός χάρτης για την ασφαλή, υπεύθυνη και αποτελεσματική χρήση των κοινωνικών δικτύων στην εκπαίδευση, προς όφελος τόσο των μαθητών όσο και της εκπαιδευτικής κοινότητας στο σύνολό της.

Λέξεις – κλειδιά: Κοινωνικά δίκτυα, εκπαίδευση, διδασκαλία, συμπερίληψη.

ΕΙΣΑΓΩΓΗ

Στην εποχή της ραγδαίας ψηφιακής εξέλιξης και της συνεχούς διαδικτυακής διασύνδεσης, τα κοινωνικά δίκτυα δεν αποτελούν πλέον απλά μέσα κοινωνικής αλληλεπίδρασης ή ψυχαγωγίας. Έχουν εξελιχθεί σε πολύπλευρα εργαλεία που επηρεάζουν κάθε πτυχή της καθημερινής ζωής, από την πολιτική και την οικονομία έως – και κυρίως – την εκπαίδευση. Πλατφόρμες όπως το Facebook, το Instagram, το YouTube, το TikTok, αλλά και ειδικά σχεδιασμένα δίκτυα όπως το Edmodo, δεν περιορίζονται μόνο στη διάδοση περιεχομένου. Λειτουργούν ως κόμβοι πληροφόρησης, συνεργασίας και δημιουργικής έκφρασης, επαναπροσδιορίζοντας τον τρόπο με τον οποίο οι μαθητές αλληλεπιδρούν, οι εκπαιδευτικοί διδάσκουν και οι κοινότητες μαθαίνουν.

Ωστόσο, πίσω από τα likes, τα shares και τα hashtags, αναδύονται εύλογες ανησυχίες: Πόσο ασφαλής είναι η συμμετοχή των μαθητών σε τέτοιες πλατφόρμες; Ποια είναι τα όρια ανάμεσα στην προσωπική έκφραση και στην παραβίαση της ιδιωτικότητας; Πώς διασφαλίζεται ότι τα δεδομένα των παιδιών και εφήβων προστατεύονται επαρκώς; Και, το πιο σημαντικό, είναι πράγματι τα κοινωνικά δίκτυα σύμμαχος της εκπαίδευσης ή ένας ψηφιακός αντιπερισπασμός που θολώνει τα όρια ανάμεσα στο ουσιώδες και στο επιφανειακό;

Η παρούσα εργασία επιχειρεί να προσεγγίσει ολιστικά το ζήτημα της σχέσης μεταξύ κοινωνικών δικτύων και εκπαίδευσης. Αρχικά, αναλύονται οι τρόποι με τους οποίους τα δίκτυα μπορούν να ενισχύσουν τη μαθησιακή διαδικασία, προσφέροντας διαδραστικά περιβάλλοντα, δυνατότητες συνεργασίας και πρόσβαση σε ποικίλους εκπαιδευτικούς πόρους. Στη συνέχεια, εξετάζονται οι προκλήσεις και οι κίνδυνοι που ενέχει η χρήση τους – από τον κυβερνοεκφοβισμό και την υπερπληροφόρηση μέχρι την έκθεση σε ακατάλληλο περιεχόμενο και την εξάρτηση από την ψηφιακή παρουσία. Ιδιαίτερη έμφαση δίδεται στην έννοια της ψηφιακής παιδείας και στον ρόλο του εκπαιδευτικού ως καθοδηγητή, μέντορα και διαχειριστή του ψηφιακού οικοσυστήματος. Παράλληλα, παρουσιάζονται νομικά και ηθικά ζητήματα που σχετίζονται με την προστασία των προσωπικών δεδομένων, την εφαρμογή της νομοθεσίας και τη διαμόρφωση ενός ασφαλούς και υποστηρικτικού ψηφιακού περιβάλλοντος.

Τέλος, διατυπώνονται συγκεκριμένες προτάσεις πολιτικής και καλές πρακτικές για την ενσωμάτωση των κοινωνικών δικτύων στην εκπαιδευτική διαδικασία, με στόχο τη διαμόρφωση ενός σχολείου που όχι μόνο παρακολουθεί τις τεχνολογικές εξελίξεις, αλλά τις αξιοποιεί υπεύθυνα προς όφελος όλων των μαθητών – ανεξαρτήτως κοινωνικού, γεωγραφικού ή πολιτισμικού υπόβαθρου.

ΣΚΟΠΟΣ ΚΑΙ ΔΟΜΗ ΤΗΣ ΕΡΓΑΣΙΑΣ

Ο σκοπός της παρούσας εργασίας είναι να διερευνήσει εις βάθος τον ρόλο των κοινωνικών δικτύων στο εκπαιδευτικό περιβάλλον, τόσο από τη σκοπιά των δυνατοτήτων που προσφέρουν, όσο και των προκλήσεων που ενέχουν. Ιδιαίτερη έμφαση δίδεται στη μελέτη του τρόπου με τον οποίο τα κοινωνικά δίκτυα μπορούν να ενισχύσουν τη μαθησιακή διαδικασία, να ενθαρρύνουν τη συνεργατική μάθηση και να καλλιεργήσουν ψηφιακές δεξιότητες, ενώ παράλληλα επισημαίνονται οι κίνδυνοι που σχετίζονται με την ασφάλεια, την ιδιωτικότητα και την ορθή χρήση της τεχνολογίας από τους μαθητές. Η εργασία επιδιώκει επίσης να καλύψει το νομικό και ηθικό πλαίσιο που διέπει τη χρήση των κοινωνικών δικτύων στην εκπαίδευση, παρουσιάζοντας σχετικές ρυθμίσεις, οδηγίες και κανονισμούς, τόσο σε εθνικό όσο και σε ευρωπαϊκό επίπεδο. Η ανάγκη για ψηφιακή παιδεία αναδεικνύεται ως κρίσιμος παράγοντας για την επιτυχία οποιασδήποτε εκπαιδευτικής ενσωμάτωσης κοινωνικών μέσων.

Η δομή της εργασίας έχει οργανωθεί ως εξής:

Στο πρώτο κεφάλαιο, αναλύεται ο ρόλος των κοινωνικών δικτύων στην εκπαίδευση, εστιάζοντας στα πλεονεκτήματα και τις εκπαιδευτικές ευκαιρίες που προσφέρουν.

Στο δεύτερο κεφάλαιο, εξετάζονται οι προκλήσεις και οι κίνδυνοι που ενδέχεται να προκύψουν από τη χρήση τους από μαθητές και εκπαιδευτικούς.

Στο τρίτο κεφάλαιο, παρουσιάζεται η έννοια της ψηφιακής παιδείας και η σημασία της για τη διαμόρφωση υπεύθυνων ψηφιακών πολιτών.

Στο τέταρτο κεφάλαιο, εστιάζουμε στον ρόλο του εκπαιδευτικού ως διαμεσολαβητή και καθοδηγητή στη χρήση των κοινωνικών δικτύων.

Στο πέμπτο κεφάλαιο, προσεγγίζονται οι νομικές και ηθικές διαστάσεις, με αναφορά στη σχετική νομοθεσία και τα δικαιώματα των μαθητών.

Στο έκτο κεφάλαιο, διατυπώνονται καλές πρακτικές και προτάσεις πολιτικής για την ενσωμάτωση των κοινωνικών δικτύων στο σχολείο με ασφαλή και αποτελεσματικό τρόπο.

Το έβδομο κεφάλαιο, αναλύει τις δυνατότητες πρόσβασης και συμπερίληψης στα κοινωνικά δίκτυα.

Το όγδοο και τελευταίο κεφάλαιο ολοκληρώνει την εργασία με αποτελεσματική και ασφαλή ένταξη των κοινωνικών δικτύων στην εκπαιδευτική διαδικασία για μελλοντική έρευνα και δράση στον τομέα της ψηφιακής εκπαίδευσης.

Μέσα από αυτή τη δομημένη προσέγγιση, η εργασία στοχεύει να συμβάλει στην καλλιέργεια ενός γόνιμου διαλόγου γύρω από την υπεύθυνη αξιοποίηση των κοινωνικών δικτύων στην εκπαιδευτική κοινότητα.

Ο ΡΟΛΟΣ ΤΩΝ ΚΟΙΝΩΝΙΚΩΝ ΔΙΚΤΥΩΝ ΣΤΗΝ ΕΚΠΑΙΔΕΥΣΗ

Τα κοινωνικά δίκτυα, με παιδαγωγικά κριτήρια και υπεύθυνη καθοδήγηση, μπορούν να λειτουργήσουν ως πολύτιμοι σύμμαχοι στην εκπαιδευτική διαδικασία. Δεν πρόκειται μόνο για τεχνολογικά εργαλεία, αλλά για διαδραστικά περιβάλλοντα που ενισχύουν τη μάθηση, την επικοινωνία και τη συνεργασία, κυρίως στους μαθητές της δευτεροβάθμιας εκπαίδευσης που ήδη είναι εξοικειωμένοι με τις ψηφιακές πλατφόρμες.

Συνεργατική μάθηση και ανταλλαγή ιδεών

Οι πλατφόρμες κοινωνικής δικτύωσης διευκολύνουν τη δημιουργία συνεργατικών μαθησιακών εμπειριών. Μαθητές μπορούν να εργάζονται μαζί σε ομαδικές εργασίες, ακόμα κι αν βρίσκονται σε διαφορετικά φυσικά σημεία, ανταλλάσσοντας απόψεις, ιδέες και υλικό. Συγκεκριμένα, σε Λύκειο της Αθήνας, μαθητές δημιούργησαν ομάδα στο Facebook για να συνεργαστούν σε project Ιστορίας με θέμα «Η Κατοχή στην Ελλάδα». Εκεί αντάλλασσαν πηγές, συζητούσαν για την κατανομή ρόλων και μοιράζονταν προσχέδια. Η εργασία παρουσιάστηκε τελικά δημόσια ως διαδραστικό Padlet, ενισχυμένο με βίντεο και αφηγήσεις. Επομένως μέσα από τα κοινωνικά δίκτυα, δημιουργούνται εικονικές κοινότητες μάθησης, όπου συμμετέχουν όχι μόνο οι μαθητές, αλλά και οι εκπαιδευτικοί, οι γονείς ή ακόμη και εξωτερικοί συνεργάτες. Αυτές οι κοινότητες ενισχύουν το αίσθημα του «ανήκειν» και προωθούν τη διαμοίραση της γνώσης. Συγκεκριμένα, σχολείο στην Καλαμάτα αξιοποίησε την πλατφόρμα Edmodo, δημιουργώντας τάξη για το μάθημα των Αγγλικών. Οι μαθητές ανέβαζαν εργασίες, συζητούσαν τις απαντήσεις όλων και συμμετείχαν σε ψηφιακές συζητήσεις που προωθούσαν την κατανόηση γραμματικών φαινομένων μέσα από πραγματικά παραδείγματα.

Εξ αποστάσεως εκπαίδευση

Η περίοδος της πανδημίας κατέδειξε με σαφήνεια πόσο κρίσιμη είναι η τεχνολογική υποδομή στην εκπαίδευση. Πέρα από τις επίσημες πλατφόρμες (όπως το e-class ή το Webex), πολλοί εκπαιδευτικοί στράφηκαν στα κοινωνικά δίκτυα για να διατηρήσουν ζωντανή την επικοινωνία και τη ροή της μάθησης. Συγκεκριμένα, καθηγήτρια Φιλολογίας σε ΕΠΑΛ δημιούργησε εκπαιδευτικό κανάλι στο YouTube, όπου ανέβαζε επεξηγηματικά βίντεο για τη Νεοελληνική Γλώσσα και τη Λογοτεχνία. Οι μαθητές παρακολουθούσαν το περιεχόμενο ασύγχρονα και ακολουθούσε συζήτηση σε κλειστή ομάδα στο Messenger.

Ενίσχυση της κριτικής σκέψης και των ψηφιακών δεξιοτήτων

Η καθοδηγούμενη χρήση κοινωνικών δικτύων δίνει την ευκαιρία στους μαθητές να καλλιεργήσουν την κριτική τους σκέψη μέσα από την ανάλυση και την αξιολόγηση των πληροφοριών που προσλαμβάνουν καθημερινά. Παράλληλα, αναπτύσσουν δεξιότητες όπως η υπεύθυνη αναζήτηση, η τεκμηρίωση απόψεων και η ψηφιακή δημιουργικότητα. Για παράδειγμα, μαθητές Γυμνασίου κλήθηκαν να δημιουργήσουν ένα εκπαιδευτικό podcast με τίτλο «Μύθοι και Αλήθειες για τα Social Media», το οποίο διανεμήθηκε μέσω Spotify και Instagram. Η δράση αυτή ενίσχυσε την κατανόηση των μαθητών σχετικά με τη διάδοση της παραπληροφόρησης και τους ώθησε να αξιολογούν πιο προσεκτικά τα διαδικτυακά δεδομένα.

ΠΡΟΚΛΗΣΕΙΣ ΚΑΙ ΚΙΝΔΥΝΟΙ

Η χρήση των κοινωνικών δικτύων στο πλαίσιο της εκπαίδευσης, αν και συνοδεύεται από σημαντικές ευκαιρίες, ενέχει και σοβαρές προκλήσεις που επηρεάζουν τόσο το μαθησιακό αποτέλεσμα όσο και τη ψυχοκοινωνική ανάπτυξη των μαθητών. Οι κίνδυνοι που προκύπτουν δεν είναι θεωρητικοί ούτε ακραία σενάρια· είναι παρόντες στη σχολική καθημερινότητα και, σε αρκετές περιπτώσεις, επιφέρουν συνέπειες δύσκολα αναστρέψιμες.

Κυβερνοεκφοβισμός (Cyberbullying)

Η διαδικτυακή παρενόχληση αποτελεί μία από τις πιο συχνές και ύπουλες μορφές βίας στη σχολική κοινότητα. Μέσω πλατφορμών όπως Instagram, WhatsApp, TikTok ή Snapchat, μαθητές γίνονται στόχοι προσβολών, χλευασμού ή

απομόνωσης. Το φαινόμενο αυτό έχει επιπτώσεις στην ψυχοσυναισθηματική ισορροπία των παιδιών, οδηγώντας σε άγχος, απομόνωση, ακόμη και εγκατάλειψη του σχολείου (Kowalski et al., 2014). Ενδεικτικό περιστατικό αποτελεί το γεγονός ότι μαθητής Γυμνασίου έγινε στόχος σχολίων για την εξωτερική του εμφάνιση σε σχολική ομαδική συνομιλία στο Messenger. Η κατάσταση κλιμακώθηκε, με αποτέλεσμα την εμπλοκή ψυχολόγου και κοινωνικού λειτουργού της σχολικής μονάδας.

Έκθεση σε ακατάλληλο περιεχόμενο

Οι μαθητές, ιδίως οι μικρότεροι, συχνά εκτίθενται σε περιεχόμενο που δεν είναι κατάλληλο για την ηλικία τους: βία, ρατσιστικός λόγος, σεξουαλικά υπονοούμενα ή επικίνδυνες «προκλήσεις». Οι αλγόριθμοι προβολής περιεχομένου δεν διαχωρίζουν εκπαιδευτικούς από μη εκπαιδευτικούς χρήστες, με αποτέλεσμα η έκθεση να είναι ανεξέλεγκτη. Σχολική συνθήκη: ενδεικτικά αναφέρουμε τάξη δημοτικού σχολείου, όπου οι ίδιοι οι μαθητές ανέφεραν ότι παρακολούθησαν βίντεο στο TikTok που υποκινούσαν επικίνδυνες συμπεριφορές, όπως η πρόκληση ασφυξίας για «δοκιμή αντοχής». Η σχολική κοινότητα κινητοποιήθηκε άμεσα για να ενημερώσει και να ευαισθητοποιήσει, ώστε να αποφευχθούν τέτοια ακραία φαινόμενα.

Παραβίαση προσωπικών δεδομένων

Η ανάρτηση φωτογραφιών, η κοινοποίηση τοποθεσίας ή η απρόσεκτη αποδοχή όρων χρήσης είναι πράξεις που συχνά γίνονται από μαθητές χωρίς επίγνωση των συνεπειών. Η ανυπαρξία ορίων και η έλλειψη ενημέρωσης μπορεί να οδηγήσουν σε κατάχρηση δεδομένων, διαδικτυακή παρενόχληση ή ακόμη και εκβιασμό. Σύμφωνα με τη Livingstone & Haddon (2009), τα παιδιά συχνά δεν αντιλαμβάνονται το εύρος του ψηφιακού αποτυπώματός τους, ούτε τις νομικές συνέπειες που ενδέχεται να επιφέρει η δημοσιοποίηση ευαίσθητων πληροφοριών.

Ψευδείς ειδήσεις και παραπληροφόρηση

Η ευκολία αναπαραγωγής και διασποράς πληροφοριών στα κοινωνικά δίκτυα συνιστά ένα πεδίο υψηλού ρίσκου. Οι μαθητές, χωρίς επαρκή κριτική ικανότητα, γίνονται δέκτες παραπλανητικού ή ψευδούς περιεχομένου, το οποίο μπορεί να επηρεάσει τις αντιλήψεις τους, την εμπιστοσύνη στους θεσμούς ή ακόμα και την ψυχική τους υγεία. Ενδεικτικά αναφέρουμε μαθητική συζήτηση σε Λύκειο για τον πόλεμο στην Ουκρανία, όπου έγινε χρήση βίντεο από YouTube με αποδεδειγμένα παραποιημένες εικόνες. Το συμβάν στάθηκε αφορμή για εργαστήριο κριτικής ανάλυσης πηγών, υπό την καθοδήγηση φιλολόγου.

Εθισμός και διάσπαση προσοχής

Ο συνεχής καταιγισμός ερεθισμάτων, ειδοποιήσεων και ψηφιακής αλληλεπίδρασης, αποσπά την προσοχή των μαθητών και επηρεάζει τη συγκέντρωση και την αποδοτικότητά τους. Η εξάρτηση από τα social media μπορεί να οδηγήσει σε μείωση των ωρών μελέτης, διαταραχές ύπνου και μειωμένη σχολική επίδοση (Anderson & Jiang, 2018). Ενδεικτικά αναφέρουμε ότι σε ερωτηματολόγιο που διανεμήθηκε σε μαθητές Λυκείου, το 64% παραδέχτηκε ότι χρησιμοποιεί τα κοινωνικά δίκτυα κατά τη διάρκεια της μελέτης, με αποτέλεσμα να καθυστερεί την ολοκλήρωση των εργασιών τους.

Διακρίνοντας την ανάγκη για ψηφιακή εκπαίδευση και καθοδήγηση, καθίσταται σαφές ότι οι παραπάνω προκλήσεις δεν μπορούν να αντιμετωπιστούν με απαγορεύσεις ή δαιμονοποίηση των μέσων κοινωνικής δικτύωσης. Αντιθέτως, απαιτούν στοχευμένη παρέμβαση και ενεργή καθοδήγηση. Οι εκπαιδευτικοί οφείλουν να λειτουργούν ως πλοηγοί στη διαδικτυακή ζωή των μαθητών, να καλλιεργούν τη συνείδηση του ψηφιακού πολίτη και να ενσωματώνουν δραστηριότητες που ενδυναμώνουν τη λογική, την ηθική και την αυτορρύθμιση.

ΨΗΦΙΑΚΗ ΠΑΙΔΕΙΑ: ΜΙΑ ΑΝΑΓΚΑΙΟΤΗΤΑ

Στο σύγχρονο κοινωνικό και εκπαιδευτικό περιβάλλον, η έννοια της ψηφιακής παιδείας δεν μπορεί πλέον να θεωρείται συμπληρωματική ή εθελοντική. Αντιθέτως, αποτελεί θεμελιώδη δεξιότητα ζωής – στο ίδιο επίπεδο με τη γλωσσική κατανόηση, τη μαθηματική λογική και την κοινωνική συνείδηση. Ο πολίτης του 21ου αιώνα, και κατ' επέκταση ο μαθητής, οφείλει να είναι σε θέση όχι μόνο να χειρίζεται τεχνολογικά εργαλεία, αλλά να τα κατανοεί, να τα αξιολογεί και να τα χρησιμοποιεί με κριτικό πνεύμα και υπευθυνότητα (UNESCO, 2021).

Η ψηφιακή παιδεία (digital literacy) δεν ταυτίζεται με την τεχνολογική δεξιότητα. Δεν αρκεί η ικανότητα χρήσης ενός εργαλείου· απαιτείται επίγνωση των συνεπειών της χρήσης του. Πρόκειται για έναν συνδυασμό γνώσης, στάσεων

και ικανοτήτων, που επιτρέπει στους μαθητές να συμμετέχουν ενεργά και κριτικά στο ψηφιακό περιβάλλον, χωρίς να γίνονται θύματα παραπληροφόρησης ή κατάχρησης της τεχνολογίας (Hobbs, 2010).

Εκπαίδευση στην κριτική αξιολόγηση των πηγών

Η διαδικτυακή πληροφορία βρίσκεται σε μοναδική για τον αιώνα μας αφθονία, όμως η αξιοπιστία της παραμένει ζήτημα αμφισβήτησης. Οι μαθητές συχνά αντιμετωπίζουν ιστότοπους, βίντεο ή αναρτήσεις στα κοινωνικά δίκτυα χωρίς τα απαραίτητα εργαλεία για να διακρίνουν την πηγή, την πρόθεση και την ακρίβεια του περιεχομένου. Μια δυνατότητα υπερπήδησης αυτού του φαινομένου αποτελεί τοΝΠΣ και συγκεκριμένα το πρόγραμμα φιλαναγνωσίας, όπου οι μαθητές καλούνται να συγκρίνουν διαφορετικά άρθρα για το ίδιο γεγονός (π.χ. μια οικολογική καταστροφή) και να εντοπίσουν διαφορές στην παρουσίαση, τις πηγές, το λεξιλόγιο και τις εικόνες. Επιπροσθέτως, σύμφωνα με έρευνα του Stanford History Education Group (2016), η πλειονότητα των μαθητών Λυκείου στις ΗΠΑ αδυνατεί να ξεχωρίσει αν μια είδηση είναι διαφημιστική καταχώρηση ή έγκυρο ρεπορτάζ.

Ανάπτυξη δεξιοτήτων ψηφιακής ασφάλειας

Η προστασία από ιούς, κακόβουλο λογισμικό, ψεύτικους λογαριασμούς και διαδικτυακές απάτες είναι μέρος της καθημερινότητας ενός ενεργού χρήστη του διαδικτύου. Οι μαθητές συχνά δεν γνωρίζουν βασικές λειτουργίες ασφαλείας: πώς να δημιουργούν ισχυρούς κωδικούς, να αναγνωρίζουν phising links ή να προσαρμόζουν ρυθμίσεις απορρήτου. Σε μάθημα Πληροφορικής της Α' Γυμνασίου, γίνεται χρήση σεναρίων κινδύνου όπου οι μαθητές καλούνται να αντιδράσουν σε προσομοιωμένες απειλές (π.χ. απρόσκλητο μήνυμα, ψεύτικη προσφορά). Επίσης, η μελέτη του Livingstone & Helsper (2007) δείχνει ότι η πλειονότητα των εφήβων στην Ευρώπη αγνοεί βασικές πρακτικές κυβερνοασφάλειας, αν και είναι εξοικειωμένοι με τις ψηφιακές πλατφόρμες.

Ευαισθητοποίηση για την προστασία της ιδιωτικότητας

Η ανάρτηση προσωπικών φωτογραφιών, η συμμετοχή σε δημόσιες ομάδες ή ακόμη και η απλή συμπλήρωση προφίλ, μπορεί να εμπεριέχει ρίσκα όταν δεν υπάρχει ενημέρωση και συνειδητή χρήση. Η καλλιέργεια ενός «ψηφιακού ήθους» είναι απαραίτητη, ώστε οι μαθητές να σέβονται όχι μόνο τα δικά τους δεδομένα, αλλά και των άλλων. Ως εκπαιδευτική παρέμβαση, θα μπορούσε να χρησιμοποιηθεί εργαστήριο Ψηφιακού Αποτυπώματος, όπου οι μαθητές θα κληθούν να εντοπίσουν τις δημόσιες πληροφορίες που είναι προσβάσιμες μέσω απλής αναζήτησης Google, και να συζητήσουν τρόπους περιορισμού της έκθεσής τους. Η Boyd (2014) επισημαίνει ότι οι έφηβοι δεν αδιαφορούν για την ιδιωτικότητά τους, αλλά έχουν συχνά εσφαλμένη αντίληψη για το ποιος έχει πρόσβαση στο περιεχόμενό τους.

Κατανόηση του ψηφιακού αποτυπώματος

Ό,τι δημοσιεύεται στο διαδίκτυο μένει, και οι μαθητές οφείλουν αυτό το γεγονός να το γνωρίζουν. Η κάθε ανάρτηση, το κάθε σχόλιο, ακόμη και τα likes, διαμορφώνουν μια δημόσια εικόνα που ενδέχεται να τους ακολουθήσει στην ακαδημαϊκή ή επαγγελματική τους πορεία. Η καλλιέργεια της ψηφιακής συνείδησης είναι εξίσου σημαντική με τη γνώση των ίδιων των εργαλείων. Για παράδειγμα, εκπαιδευτικός Οικονομίας ζητά από τους μαθητές να δημιουργήσουν ένα υποθετικό «προφίλ υποψηφίου για εργασία», βασισμένο σε δημοσιεύσεις κοινωνικών μέσων. Σκοπός είναι να κατανοήσουν πώς το ψηφιακό αποτύπωμα μπορεί να επηρεάσει τη δημόσια εικόνα ενός ανθρώπου.

Επομένως, η ψηφιακή παιδεία δεν αποτελεί μια πολυτελή δεξιότητα για «προχωρημένους» χρήστες, αλλά βασικό θεμέλιο μιας δημοκρατικής, ασφαλούς και συνειδητής συμμετοχής στον ψηφιακό κόσμο, λαμβάνοντας υπόψη το ηθικό ζήτημα του ψηφιακού σεβασμού, της ενσυναίσθησης και της ισότητας πρόσβασης σε τεχνολογία. Το σχολείο έχει την ηθική υποχρέωση να δώσει στους μαθητές τα εργαλεία να σταθούν απέναντι στην πληροφορία με κριτικό πνεύμα, να προστατεύουν τον εαυτό τους και τους άλλους, και να αναπτύξουν μια υπεύθυνη, ανθρώπινη και ώριμη σχέση με την τεχνολογία.

Ο ΡΟΛΟΣ ΤΟΥ ΕΚΠΑΙΔΕΥΤΙΚΟΥ

Σε ένα περιβάλλον όπου η τεχνολογία εξελίσσεται ταχύτερα από τις εκπαιδευτικές πολιτικές, ο ρόλος του εκπαιδευτικού καθίσταται κρίσιμος. Ο σύγχρονος δάσκαλος δεν είναι απλώς μεταδότης γνώσεων, αλλά ενεργός καθοδηγητής, μέντορας και πρότυπο υπεύθυνης ψηφιακής συμπεριφοράς. Η παρουσία του στον χώρο των κοινωνικών δικτύων πρέπει να είναι στρατηγική, με στόχο τη διαμόρφωση ενός κριτικού και ασφαλούς μαθησιακού πλαισίου (Ribble, 2011).

Ο εκπαιδευτικός ως μέντορας

Ο εκπαιδευτικός καλείται να ερμηνεύσει το ψηφιακό περιβάλλον για τους μαθητές, να τους δείξει πώς να διαχειρίζονται τις πλατφόρμες με υπευθυνότητα και πώς να αποφεύγουν διαδικτυακές παγίδες. Δεν αρκεί η παροχή πληροφοριών· χρειάζεται διάλογος, παρατήρηση και διακριτική καθοδήγηση. Καθηγητής Πληροφορικής σε Γυμνάσιο υλοποίησε πρόγραμμα mentoring, όπου οι μαθητές δούλεψαν πάνω σε πραγματικά «ψηφιακά διλήμματα» (π.χ. bullying σε stories, δημόσια έκθεση προσωπικών στιγμών), προσεγγίζοντας τα με συλλογική συζήτηση.

Το κοινωνικό δίκτυο ως εργαλείο, όχι αυτοσκοπός

Η εκπαιδευτική αξιοποίηση των κοινωνικών μέσων πρέπει να υπηρετεί μαθησιακούς στόχους. Η χρήση μιας πλατφόρμας δεν εγγυάται από μόνη της ποιότητα ή ενδιαφέρον. Ο εκπαιδευτικός είναι εκείνος που σχεδιάζει το πλαίσιο, θέτει σκοπούς και καθοδηγεί τη χρήση. Ενδεικτικά αναφέρουμε καθηγητή φιλόλογο που ενσωμάτωσε το Instagram σε μάθημα Νεοελληνικής Λογοτεχνίας, ζητώντας από τους μαθητές να δημιουργήσουν προφίλ ηρώων από το έργο του Παπαδιαμάντη, με stories και σχόλια που να αντανακλούν τις προσωπικότητές τους.

Θέσπιση κανόνων και ορίων

Η εκπαιδευτική διαδικασία σε ψηφιακό περιβάλλον οφείλει να λειτουργεί εντός ορίων. Οι κανόνες δεν επιβάλλονται αυθαίρετα, αλλά συνδιαμορφώνονται, εξηγούνται και εφαρμόζονται με συνέπεια. Αυτό ενισχύει την υπευθυνότητα και τη συνεργασία. Μια καλή πρακτική αποτελεί σχολική μονάδα στη Θεσσαλονίκη, η οποία καθιέρωσε «Συμβόλαιο Ψηφιακής Συμπεριφοράς» για όλα τα μέλη της τάξης, το οποίο υπογράφεται από μαθητές, γονείς και εκπαιδευτικούς στην αρχή κάθε σχολικού έτους.

Συνεργασία με γονείς και θεσμούς

Η αγωγή στη χρήση των κοινωνικών μέσων δεν μπορεί να γίνεται απομονωμένα μέσα στην τάξη. Απαιτεί ευρύτερη συνέργεια με γονείς, ψυχολόγους, κοινωνικούς λειτουργούς και θεσμικούς φορείς. Ο εκπαιδευτικός μπορεί να διαδραματίσει καταλυτικό ρόλο ως συνδετικός κρίκος. Σε σχολείο της Λάρισας, για παράδειγμα, διοργανώθηκε διαδικτυακό σεμινάριο με τη συμμετοχή γονέων και ειδικών από τη Δίωξη Ηλεκτρονικού Εγκλήματος για ζητήματα ασφάλειας στα social media.

ΝΟΜΙΚΕΣ ΚΑΙ ΗΘΙΚΕΣ ΠΡΟΕΚΤΑΣΕΙΣ

Η ένταξη των κοινωνικών δικτύων στην εκπαιδευτική πράξη δεν είναι μόνο παιδαγωγικό ή τεχνολογικό ζήτημα· είναι και νομικό. Η προστασία των μαθητών και η ορθή διαχείριση των δεδομένων τους επιβάλλουν τη συμμόρφωση με συγκεκριμένα θεσμικά πλαίσια, τόσο σε εθνικό όσο και σε ευρωπαϊκό επίπεδο.

Γενικός Κανονισμός Προστασίας Δεδομένων (GDPR)

Ο Κανονισμός 2016/679 της ΕΕ (γνωστός ως GDPR) θέτει αυστηρές προδιαγραφές για τη συλλογή, αποθήκευση και επεξεργασία προσωπικών δεδομένων, ιδιαίτερα όταν πρόκειται για ανηλίκους. Η συγκατάθεση πρέπει να είναι σαφής, ενημερωμένη και, όπου απαιτείται, να παρέχεται από τον γονέα ή κηδεμόνα. Η Ελληνική Αρχή Προστασίας Δεδομένων (HDPA,n.d.) έχει εκδώσει ειδικές οδηγίες για τα σχολεία, επισημαίνοντας ότι ακόμη και η απλή ανάρτηση φωτογραφιών από σχολικές εκδηλώσεις μπορεί να δημιουργεί νομικές ευθύνες.

Νομοθεσία για την προστασία ανηλίκων

Ο Ποινικός Κώδικας (άρθρο 348Α) και η σχετική νομολογία προστατεύουν τους ανηλίκους από εκμετάλλευση, προσβολή της γενετήσιας αξιοπρέπειας και έκθεση σε επιβλαβές περιεχόμενο. Οι εκπαιδευτικοί φέρουν ευθύνη εποπτείας όταν τα σχολικά μέσα ή οι σχολικές δραστηριότητες σχετίζονται με τα social media. Σε σχολείο της Αθήνας για παράδειγμα, αναρτήθηκε βίντεο μαθητή σε TikTok με περιεχόμενο που εμπεριείχε προσβλητικά σχόλια από άλλους. Το σχολείο υποχρεώθηκε να κινηθεί νομικά, ενώ έγινε ενημέρωση από την Εισαγγελία Ανηλίκων.

Οδηγίες Υπουργείου Παιδείας

Το Υπουργείο Παιδείας έχει εκδώσει κατευθυντήριες γραμμές για τη χρήση τεχνολογιών πληροφορίας και επικοινωνιών στην εκπαίδευση (Hellenic Ministry of Education and Religious Affairs, n.d.). Αν και δεν απαγορεύει τη

χρήση κοινωνικών δικτύων, συνιστά προσεκτική χρήση, εντός καθορισμένων πλαισίων, και με σεβασμό στην ιδιωτικότητα των μαθητών.

Ηθικά ζητήματα και αξιακές αρχές

Ωστόσο, πέρα από τις νομικές δεσμεύσεις, υπάρχει το ηθικό καθήκον της καλλιέργειας αξιών: σεβασμός, ενσυναίσθηση, αλληλεγγύη. Οι μαθητές πρέπει να μάθουν όχι απλώς «τι επιτρέπεται», αλλά «τι είναι ορθό». Αυτό προϋποθέτει την ανάδειξη του κοινωνικού ρόλου της τεχνολογίας και τη συνειδητή στάση απέναντι στην ισότητα πρόσβασης. Ο Freire (1970) υποστήριζε ότι η εκπαίδευση δεν είναι ουδέτερη· είτε απελευθερώνει είτε καταπιέζει. Η στάση μας απέναντι στα social media μπορεί να ενισχύσει ή να περιορίσει τη δυνατότητα των μαθητών να εκφραστούν ισότιμα και υπεύθυνα.

ΚΑΛΕΣ ΠΡΑΚΤΙΚΕΣ ΧΡΗΣΗΣ ΚΟΙΝΩΝΙΚΩΝ ΔΙΚΤΥΩΝ ΣΤΗΝ ΕΚΠΑΙΔΕΥΣΗ

Η ορθή χρήση των κοινωνικών δικτύων στην εκπαίδευση απαιτεί σχεδιασμό, επίγνωση και θεσμοθετημένες πρακτικές. Δεν πρόκειται απλώς για την υιοθέτηση «νέων μέσων», αλλά για μια παιδαγωγική επιλογή που ενισχύει τη μάθηση μόνο όταν εντάσσεται σε κατάλληλο πλαίσιο, με καθαρούς κανόνες και σαφείς στόχους.

Εκπαιδευτικοί λογαριασμοί αποκλειστικά για σχολική χρήση

Η δημιουργία ειδικών λογαριασμών που προορίζονται αποκλειστικά για εκπαιδευτικές αλληλεπιδράσεις συμβάλλει στη διατήρηση ορίων μεταξύ προσωπικού και σχολικού περιεχομένου. Οι εκπαιδευτικοί που χρησιμοποιούν τέτοιους λογαριασμούς αποφεύγουν τις παγίδες της υπερέκθεσης ή των «παρεξηγήσιμων» διαδικτυακών σχέσεων. Δάσκαλος της ΣΤ’ τάξης Δημοτικού διαχειρίζεται κλειστή ομάδα στο Facebook με όνομα «Η Τάξη μας 2024», όπου αναρτώνται ασκήσεις, εργασίες, και ανακοινώσεις — χωρίς καμία προσωπική αλληλεπίδραση ή περιεχόμενο.

Ενσωμάτωση εργαλείων ασφαλείας και ιδιωτικότητας

Η χρήση φίλτρων, ρυθμίσεων απορρήτου και εποπτευόμενων συζητήσεων είναι απαραίτητη προϋπόθεση για την προστασία των μαθητών. Πλατφόρμες όπως το YouTube ή το Padlet προσφέρουν δυνατότητες περιορισμένης πρόσβασης και εποπτείας περιεχομένου. Μια καλή πρακτική αποτελεί Δημοτικό σχολείο στην Κρήτη που χρησιμοποιεί το YouTube με λειτουργία «unlisted» (μη καταχωρημένα βίντεο), ώστε οι παρουσιάσεις μαθητών να είναι διαθέσιμες μόνο μέσω συνδέσμου που διαχειρίζεται ο εκπαιδευτικός.

Συνδυασμός κοινωνικών δικτύων με πλατφόρμες LMS

Η συμπληρωματική χρήση κοινωνικών μέσων και πλατφορμών διαχείρισης μάθησης (Learning Management Systems – LMS), όπως το Moodle ή το e-class, προσφέρει ευελιξία, τεκμηρίωση, και αναλυτική παρακολούθηση της προόδου των μαθητών. Μελέτες (Tang & Hew, 2017) δείχνουν ότι ο συνδυασμός κοινωνικών δικτύων με LMS αυξάνει τη συμμετοχή των μαθητών και τη διατήρηση της γνώσης, καθώς τα πρώτα ενισχύουν την προσβασιμότητα και τα δεύτερα διασφαλίζουν την παιδαγωγική δομή.

Συμμετοχή μαθητών στη δημιουργία περιεχομένου

Η ενεργή εμπλοκή των μαθητών στη δημιουργία εκπαιδευτικού περιεχομένου (π.χ. βίντεο, ψηφιακά κόμικ, podcasts) τους μετατρέπει από παθητικούς καταναλωτές σε συνειδητούς παραγωγούς γνώσης. Αυτή η διαδικασία ενισχύει την αυτοπεποίθηση, τη συνεργατικότητα και την αίσθηση σκοπού. Σχολική μονάδα στη Χίο οργάνωσε project όπου οι μαθητές δημιούργησαν λογαριασμό στο TikTok για να ανεβάζουν σύντομα εκπαιδευτικά βίντεο γραμματικής και λεξιλογίου. Οι εκπαιδευτικοί συντόνιζαν το περιεχόμενο, εξασφαλίζοντας την ορθότητα και ασφάλεια.

ΠΡΟΣΒΑΣΗ ΚΑΙ ΣΥΜΠΕΡΙΛΗΨΗ

Ένα από τα μεγαλύτερα πλεονεκτήματα των κοινωνικών δικτύων είναι η δυνατότητα να γεφυρώνουν ανισότητες — τόσο γεωγραφικές όσο και κοινωνικές. Όταν αξιοποιούνται με προσοχή, μπορούν να γίνουν εργαλείο συμπερίληψης, ισότητας και διαπολιτισμικής κατανόησης.

Μαθητές από απομακρυσμένες περιοχές

Σε περιοχές με γεωγραφική απομόνωση ή περιορισμένη πρόσβαση σε εξειδικευμένο προσωπικό, τα κοινωνικά δίκτυα λειτουργούν ως δίαυλοι επικοινωνίας με τον υπόλοιπο κόσμο. Μέσα από ψηφιακές τάξεις και κοινωνικές πλατφόρμες, οι μαθητές μπορούν να συμμετέχουν σε προγράμματα που αλλιώς δεν θα ήταν διαθέσιμα. Σχολείο σε νησί των Δωδεκανήσων συμμετείχε σε πρόγραμμα eTwinning όπου οι μαθητές συνεργάστηκαν με τάξεις από τη Σουηδία και την Ιταλία μέσω Facebook Groups και Zoom, δημιουργώντας από κοινού παρουσιάσεις για την πολιτιστική κληρονομιά της κάθε χώρας.

Μαθητές με ειδικές ανάγκες

Η προσαρμογή του εκπαιδευτικού περιβάλλοντος στις ανάγκες των ΑμεΑ αποτελεί θεμελιώδη όρο ισότητας. Τα κοινωνικά δίκτυα, σε συνδυασμό με εργαλεία προσβασιμότητας (όπως υπότιτλοι, φωνητική ανάγνωση, gesture control), επιτρέπουν την ενεργή συμμετοχή μαθητών με δυσκολίες επικοινωνίας ή κινητικότητας. Μαθητής με δυσλεξία συμμετείχε στην ψηφιακή σχολική εφημερίδα χρησιμοποιώντας βίντεο-log με φωνητικά σχόλια, τα οποία ανέβαζε με τη βοήθεια συμμαθητών στο YouTube. Το μέσο δεν τον περιόρισε, αντιθέτως τον απελευθέρωσε.

Διαπολιτισμική επικοινωνία και αλληλεπίδραση

Τα κοινωνικά δίκτυα επιτρέπουν στους μαθητές να έρχονται σε επαφή με πολιτισμούς, γλώσσες και απόψεις διαφορετικές από τις δικές τους. Αυτή η επικοινωνία ενισχύει την ανεκτικότητα, την ενσυναίσθηση και την κοινωνική συνείδηση, λειτουργώντας ως πρακτική εφαρμογή της εκπαίδευσης για την παγκόσμια πολιτειότητα (global citizenship education). Η χρήση πλατφορμών όπως το Facebook και το TwinSpace στο πλαίσιο διακρατικών σχολικών συμπράξεων έχει θετική επίδραση στην καλλιέργεια της διαπολιτισμικής συνείδησης (UNESCO, 2021).

ΠΡΟΤΑΣΕΙΣ / ΠΟΛΙΤΙΚΗ / ΟΔΙΚΟΣ ΧΑΡΤΗΣ

Η αποτελεσματική και ασφαλής ένταξη των κοινωνικών δικτύων στην εκπαιδευτική διαδικασία δεν μπορεί να βασίζεται αποκλειστικά στην ατομική πρωτοβουλία των εκπαιδευτικών ή στην ευκαιριακή αξιοποίησή τους από μαθητές. Απαιτείται θεσμική υποστήριξη, παιδαγωγικός σχεδιασμός και διαρκής επιμόρφωση. Ένας οδικός χάρτης, με συγκεκριμένες προτάσεις πολιτικής και στρατηγική, αποτελεί αναγκαίο εργαλείο για τη διαμόρφωση ενός σύγχρονου και συμπεριληπτικού ψηφιακού σχολείου.

Επιμόρφωση εκπαιδευτικών

Η ενίσχυση της ψηφιακής επάρκειας των εκπαιδευτικών αποτελεί βασική προϋπόθεση για την αποτελεσματική ενσωμάτωση των κοινωνικών δικτύων. Η επιμόρφωση δεν πρέπει να περιορίζεται σε τεχνικές γνώσεις, αλλά να επεκτείνεται σε ζητήματα παιδαγωγικής χρήσης, προστασίας προσωπικών δεδομένων, δεοντολογίας και σχεδιασμού ψηφιακού εκπαιδευτικού περιεχομένου. Ως πρόταση καταθέτουμε τη δημιουργία ετήσιων σεμιναρίων και μικτών μαθημάτων (διά ζώσης και διαδικτυακών) με πιστοποίηση στην «Ψηφιακή Παιδαγωγική και Κοινωνικά Δίκτυα». Οπότε το θεσμικό πλαίσιο σε επίπεδο σχολικής μονάδας θα δώσει τη δυνατότητα σε κάθε σχολείο να υιοθετεί εσωτερικούς κανόνες (π.χ. ψηφιακός κανονισμός σχολικής ζωής), που να ρυθμίζουν τη χρήση των κοινωνικών δικτύων σε σχολικό πλαίσιο. Αυτοί οι κανόνες θα πρέπει να συν- διαμορφώνονται με μαθητές, γονείς και εκπαιδευτικούς και να είναι σαφείς, δημοσιευμένοι και αξιολογήσιμοι. Θα μπορούσε για παράδειγμα να καθιερωθεί μια «Χάρτας Ψηφιακής Συμπεριφοράς» για κάθε τάξη ή σχολείο, υπογεγραμμένη από όλα τα μέλη της κοινότητας.

Εισαγωγή της Ψηφιακής Παιδείας ως διακριτό μάθημα

Παρότι στοιχεία ψηφιακής εκπαίδευσης υπάρχουν ήδη σε μαθήματα όπως η Πληροφορική, δεν επαρκούν. Χρειάζεται διακριτό μάθημα – με διαθεματική προσέγγιση – που να εστιάζει σε ψηφιακές δεξιότητες, στην ανάλυση περιεχομένου, στις νομικές πτυχές της διαδικτυακής παρουσίας και στην ανάπτυξη της ψηφιακής ηθικής. Ως πρόταση καταθέτουμε την εισαγωγή του μαθήματος «Ψηφιακός Πολίτης» από την Ε΄τάξη του Δημοτικού σχολείου, με εφαρμοσμένα σενάρια βασισμένα σε πραγματικά δεδομένα. Όμως η ενημέρωση και ενεργοποίηση των γονέων μετατρέπει τους γονείς σε συμμέτοχους, όχι απλώς παρατηρητές, στην εκπαιδευτική χρήση των κοινωνικών μέσων. Η ενδυνάμωσή τους μέσω ενημερωτικών δράσεων και σεμιναρίων μπορεί να συμβάλει καθοριστικά στην πρόληψη διαδικτυακών κινδύνων και στην ενίσχυση της οικιακής καθοδήγησης. Ως πρόταση καταθέτουμε την καθιέρωση μηνιαίων ενημερωτικών συναντήσεων σε κάθε σχολική μονάδα, με συμμετοχή ειδικών από τον χώρο της ψηφιακής

ασφάλειας και της ψυχικής υγείας. Ωστόσο προκειμένου να είναι δίκαιη η ψηφιακή εκπαίδευση, πρέπει να είναι προσβάσιμη σε όλους. Η χρήση κοινωνικών δικτύων οφείλει να συνδυάζεται με παρεμβάσεις που εξασφαλίζουν τεχνολογικό εξοπλισμό, διαδίκτυο και ψηφιακή υποστήριξη σε μαθητές από ευάλωτες ομάδες. Ως πρόταση καταθέτουμε τη δημιουργία εθνικού δικτύου «Ψηφιακών Μεντόρων», με σκοπό την υποστήριξη σχολικών μονάδων και τη διάχυση καλών πρακτικών. Ωστόσο, ο ρόλος των κοινωνικών δικτύων στην εκπαίδευση είναι διττός: είναι εργαλείο και ταυτόχρονα πρόκληση. Η αποτελεσματική ενσωμάτωσή τους απαιτεί διαρκή επαγρύπνηση, παιδαγωγική οξυδέρκεια και συλλογική δέσμευση. Μέσα από συντονισμένες πολιτικές, επιμορφωτικές δράσεις και θεσμικά κατοχυρωμένη κουλτούρα ασφάλειας, μπορούμε να αξιοποιήσουμε στο έπακρο τις δυνατότητες που προσφέρουν – προς όφελος ενός σχολείου πιο ανοιχτού, πιο δίκαιου και πιο προσαρμοσμένου στις ανάγκες της εποχής μας.

ΠΕΡΙΛΗΨΗ

Η παρούσα μελέτη εξετάζει την εφαρμογή του RQDA, ενός λογισμικού ανοιχτού κώδικα για ποιοτική ανάλυση κειμένων, στη συστηματική ανάλυση συνεδριών εκπαιδευτικής συμβουλευτικής. Οκτώ ηχογραφημένες συνεδρίες, διάρκειας περίπου μίας ώρας η καθεμία, απομαγνητοφωνήθηκαν, εισήχθησαν στο RQDA και οργανώθηκαν μέσω του περιβάλλοντος εργασίας που παρέχει. Η επαγωγική θεματική κωδικοποίηση παρήγαγε πέντε τύπους οπτικοποιήσεων: ραβδογράμματα συχνότητας κωδικών, θεματικούς χάρτες, δίκτυα συνύπαρξης κωδικών, λεκτικά δενδροδιαγράμματα και συννεφόλεξα. Από την ποιοτική θεματική ανάλυση προέκυψε ότι τα τμήματα που αφορούσαν την εφαρμογή σχεδίου δράσης, την παροχή πληροφοριών και την έγκαιρη ανταπόκριση αντιστοιχούσαν σε πάνω από το 85% του συνόλου των κωδικοποιήσεων, αναδεικνύοντας την κυρίαρχη έμφαση στην πρακτική καθοδήγηση και την υποστήριξη σε πραγματικό χρόνο. Κωδικοί με μικρότερη συχνότητα, όπως οι δεξιότητες ακρόασης, η οικοδόμηση σχέσεων και η συναισθηματική καθησύχαση, ανέδειξαν δευτερεύουσες συναισθηματικές διαστάσεις. Τα δίκτυα συνύπαρξης επιβεβαίωσαν ισχυρές σχέσεις μεταξύ του σχεδιασμού δράσης και της ανταλλαγής πληροφοριών, ενώ οι οπτικοποιήσεις λέξεων αποκάλυψαν επαναλαμβανόμενα γλωσσικά μοτίβα συνεργατικής λήψης αποφάσεων. Τα αποτελέσματα αναδεικνύουν τη συμβολή του RQDA στην ενίσχυση της διαφάνειας και της επαναληψιμότητας της ποιοτικής ανάλυσης, καθώς και στη λειτουργική του ένταξη σε ποσοτικές διαδικασίες στο πλαίσιο σύνθετων ερευνητικών σχεδιασμών. Εφεξής, η αξιοποίηση συνδυαστικών μεθοδολογιών που ενσωματώνουν ποιοτικά δεδομένα σε ποσοτικά μοντέλα δύναται να προσφέρει βαθύτερη κατανόηση των συμβουλευτικών διεργασιών και να ενισχύσει τη συνολική μεθοδολογική εγκυρότητα.

Λέξεις-κλειδιά: RQDA, Ποιοτική Ανάλυση, Εργαλεία Λογισμικού Ανοιχτού Κώδικα, Εκπαιδευτική Συμβουλευτική

ΕΙΣΑΓΩΓΗ

Η εκπαιδευτική συμβουλευτική είναι ένας κρίσιμος τομέας του ευρύτερου επιστημονικού πεδίου της εκπαίδευσης, ο οποίος επικεντρώνεται στην υποστήριξη των μαθητών στη λήψη ακαδημαϊκών αποφάσεων, στην προσωπική ανάπτυξη και στην κοινωνική ένταξη (Hussaini & Jamshaid, 2025). Οι ποιοτικές ερευνητικές μέθοδοι χρησιμοποιούνται συχνά στην εκπαιδευτική συμβουλευτική για τη διερεύνηση πολύπλοκων διαδικασιών, όπως οι αλληλεπιδράσεις μεταξύ συμβούλων και μαθητών, οι αντιλήψεις για τις υπηρεσίες συμβουλευτικής και οι εξελισσόμενες ανάγκες των μαθητών (Raju et al., 2025). Η ανάλυση κειμενικών δεδομένων, όπως πρακτικά συνεντεύξεων, ερωτηματολόγια ανοικτού τύπου και ημερολόγια αναστοχασμού, αποτελεί απαραίτητο εργαλείο για την ανάπτυξη τεκμηριωμένων προσεγγίσεων και την εις βάθος κατανόηση των αποχρώσεων των συμβουλευτικών πρακτικών (Brailas et al., 2023; Bazeley & Jackson, 2013).

Κατά τα τελευταία χρόνια, η ερευνητική δραστηριότητα στον τομέα της εκπαιδευτικής συμβουλευτικής αξιοποιεί ολοένα και συχνότερα λογισμικά CAQDAS για την οργάνωση και ερμηνεία εκτεταμένων ποιοτικών δεδομένων (Kumar Kar & Panigrahi, 2023). Τα εργαλεία CAQDAS επιτρέπουν στους ερευνητές να διαχειρίζονται συστηματικά τα σχήματα κωδικοποίησης, να βελτιώνουν την ανάκτηση σχετικών αποσπασμάτων δεδομένων και να υποστηρίζουν την επαναληπτική διερεύνηση του ποιοτικού υλικού, αυξάνοντας έτσι τόσο το εύρος όσο και τη διαφάνεια των αναλυτικών διαδικασιών (García-Horta & Guerra-Ramos, 2009). Επιπλέον, σύμφωνα με τους Paulus και Lester (2015), τα λογισμικά CAQDAS ενισχύουν τη διαφάνεια της ποιοτικής ανάλυσης μέσω της δυνατότητας δημιουργίας πλήρους *audit trail*, δηλαδή αναλυτικής καταγραφής των ερευνητικών διαδικασιών και αποφάσεων, στοιχείο κρίσιμο για τη διασφάλιση της αξιοπιστίας και της εγκυρότητας της μελέτης. Εντούτοις, μολονότι τα τεχνολογικά εργαλεία ανάλυσης δεδομένων προσφέρουν σημαντική βοήθεια, είναι σαφές ότι η ερμηνευτική εργασία και η κριτική σκέψη του ερευνητή παραμένουν αναντικατάστατες. Μολονότι τα CAQDAS διευκολύνουν σημαντικά την ανάλυση, σημειώνονται δύο βασικοί περιορισμοί: η αρχική καμπύλη μάθησης για τους νέους χρήστες και η ενδεχόμενη απόσταση από τα πρωτογενή δεδομένα όταν η διεργασία πραγματοποιείται κυρίως μέσω λογισμικού (Paulus & Lester, 2015).

Η αυξανόμενη διαθεσιμότητα λογισμικού ανοικτού κώδικα έχει εμπλουτίσει τη μεθοδολογική εργαλειοθήκη των ερευνητών στον συγκεκριμένο τομέα. Μεταξύ των εν λόγω εργαλείων, το RQDA (R Qualitative Data Analysis) παρέχει μια έγκριτη λύση για την ποιοτική ανάλυση κειμένου. Το RQDA αναπτύχθηκε ως πακέτο στο στατιστικό περιβάλλον της R και επιτρέπει στους χρήστες να εισάγουν, να κωδικοποιούν και να οργανώνουν μεγάλους όγκους δεδομένων κειμένου, υποστηρίζοντας την αυστηρή θεματική ανάλυση (Koutsoupias, 2022). Τα χαρακτηριστικά του περιλαμβάνουν την κωδικοποίηση σε επίπεδο χαρακτήρα, τη σύνταξη υπομνημάτων και την κατηγοριοποίηση των κωδικών, καθώς και την απρόσκοπτη ενσωμάτωση με ροές εργασίας ποσοτικής ανάλυσης μέσω της R (Huang, 2016). Αυτή η ενσωμάτωση επιτρέπει την έρευνα μεικτών μεθόδων, προσφέροντας ευελιξία για τη διερεύνηση ποιοτικών ευρημάτων παράλληλα με στατιστικά δεδομένα (Chandra & Shang, 2019).

Η υιοθέτηση του RQDA έχει καταγραφεί σε ευρύ φάσμα εκπαιδευτικών και συμβουλευτικών ερευνητικών πλαισίων. Επι παραδείγματι, οι Nason et al. (2022) αναδεικνύουν το RQDA ως μία προσιτή και λειτουργικά επαρκή λύση ανοικτού κώδικα για την ανάλυση ποιοτικών δεδομένων, υπογραμμίζοντας τη φιλικότητα προς τον χρήστη, τη δυνατότητα ενσωμάτωσης στατιστικών αναλύσεων μέσω του περιβάλλοντος R, καθώς και την αποτελεσματικότητά του στην υποστήριξη σύνθετων συστημάτων κωδικοποίησης. Στη μελέτη τους περιλαμβάνεται λεπτομερής, βήμα προς βήμα παρουσίαση των βασικών λειτουργιών του λογισμικού, ενώ παράλληλα αναλύονται διεξοδικά τα πλεονεκτήματα και οι δυνητικοί περιορισμοί που συνοδεύουν τη χρήση του συγκεκριμένου εργαλείου (Nason et al., 2022). Στο ίδιο πνεύμα, οι Chandra και Shang (2019) εξετάζουν τη χρήση του RQDA ως μέσου ενίσχυσης της μεθοδολογικής αυστηρότητας και διαφάνειας στην ποιοτική έρευνα, αναδεικνύοντας τη συμβολή του όχι μόνο στη διαδικασία κωδικοποίησης, αλλά και ως παιδαγωγικού εργαλείου για την κατάρτιση μεταπτυχιακών φοιτητών στη μεθοδολογία.

Εν κατακλείδι, η αυξανόμενη αξιοποίηση εργαλείων ποιοτικής ανάλυσης ανοικτού κώδικα, όπως το RQDA, προσφέρει στους ερευνητές της εκπαιδευτικής συμβουλευτικής ένα έγκυρο και συστηματικό πλαίσιο ανάλυσης κειμενικών δεδομένων. Οι εν λόγω πλατφόρμες ενισχύουν τη διαφάνεια της διαδικασίας κωδικοποίησης, διευκολύνουν την ανταλλαγή προτύπων και πρακτικών ανάλυσης, και επιτρέπουν την ενσωμάτωση ποσοτικών προσεγγίσεων όπου αυτό είναι μεθοδολογικά σκόπιμο. Παράλληλα, απελευθερώνοντας την ποιοτική έρευνα από τους οικονομικούς περιορισμούς των εμπορικών λογισμικών, οι λύσεις ανοικτού κώδικα συμβάλλουν στη διαμόρφωση ενός πιο περιεκτικού και αναπαραγώγιμου επιστημονικού περιβάλλοντος.

ΜΕΘΟΔΟΛΟΓΙΑ

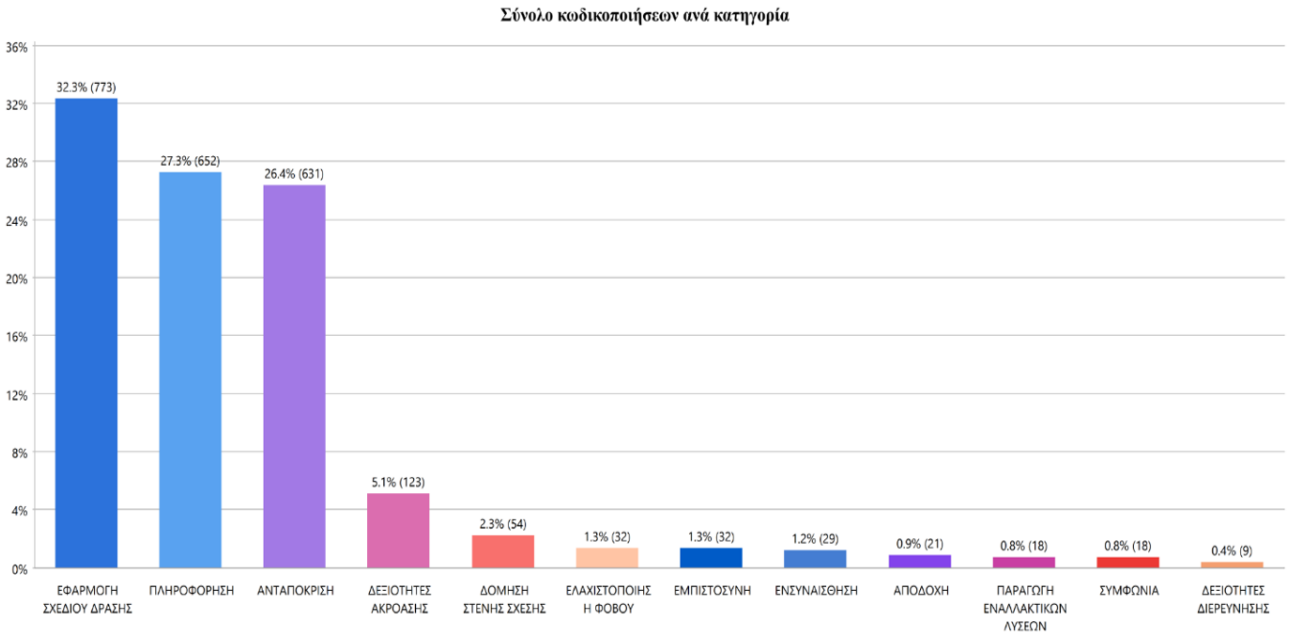
Η υλοποίηση της παρούσας ποιοτικής μελέτης στηρίχθηκε στη συστηματική ανάλυση καταγεγραμμένων πρακτικών αλληλεπιδράσεων στο πλαίσιο της εκπαιδευτικής συμβουλευτικής, με το συγκεκριμένο υλικό να αποτελεί το κεντρικό και αποκλειστικό ερευνητικό corpus (Zourna et al., 2021). Τα δεδομένα περιλαμβάνουν ηχογραφημένες συνεντεύξεις και εκτενείς σημειώσεις συνεδριών, παρέχοντας μια ολοκληρωμένη και πολυδιάστατη χαρτογράφηση της αλληλεπίδρασης μαθητών-συμβούλων στο περιβάλλον της σχολικής συμβουλευτικής. Για τη διατήρηση των γλωσσικών λεπτομερειών και την εξασφάλιση της γνησιότητας των λεκτικών αλληλεπιδράσεων, οι πηγές απομαγνητοφωνήθηκαν πιστά αυτολεξεί (Thomos et al., 2023).

Η έρευνα βασίστηκε στις αρχές της θεματικής ανάλυσης, μέσω της συστηματικής εισαγωγής των πρακτικών στο περιβάλλον RQDA (Koutsoupias & Nosios, 2025; Chandra & Shang, 2017). Τα δεδομένα εισήχθησαν στο περιβάλλον του RQDA και υποβλήθηκαν σε διερευνητική ποιοτική ανάλυση, με σκοπό την ανάδειξη επαναλαμβανόμενων θεμάτων και την αναγνώριση προτύπων σχετικών με τα ερευνητικά ερωτήματα (Bitzenis et al., 2025A; Bitzenis & Koutsoupias, 2023B). Η κωδικοποίηση πραγματοποιήθηκε απευθείας στο κειμενικό υλικό, επιτρέποντας την κατηγοριοποίηση ουσιαστικών μονάδων και την επαγωγική ανάδειξη επαναλαμβανόμενων θεμάτων (Chandra & Shang, 2019). Καθ' όλη τη διάρκεια της διαδικασίας τηρήθηκαν αναλυτικές σημειώσεις, στις οποίες καταγράφονταν αναδυόμενες ιδέες, θεωρητικές συλλήψεις και ερμηνευτικές αναπροσαρμογές, ενισχύοντας τη διαφάνεια και τη δυνατότητα ελέγχου της ερευνητικής διαδικασίας (Bitzenis & Koutsoupias, 2023A; Bitzenis et al., 2023).

Η διαδικασία κωδικοποίησης υποστηρίχθηκε από πρακτικές που προάγουν τη μεθοδολογική συνέπεια και ενισχύουν τη διαφάνεια της ποιοτικής ανάλυσης, όπως η επαναλαμβανόμενη ανασκόπηση του υλικού σε διακριτά χρονικά διαστήματα (intra-coder consistency), η συστηματική τήρηση αναλυτικών υπομνημάτων, καθώς και η τεκμηρίωση ενδεχόμενων θεωρητικών μετατοπίσεων μέσω της δημιουργίας ενός audit trail (O'Connor & Joffe, 2020; Syed & Nelson, 2015). Η ενσωμάτωση αυτών των πρακτικών ευθυγραμμίζεται με καθιερωμένες μεθοδολογικές παραδόσεις, οι οποίες αναδεικνύουν τη σημασία της τεκμηριωμένης, αναστοχαστικής και θεωρητικά ενσυνείδητης ερμηνευτικής διαδικασίας. Τέτοιες προσεγγίσεις αποκτούν ιδιαίτερη σημασία σε ερευνητικά συμφραζόμενα που δίνουν έμφαση στην εις βάθος ανάλυση των δεδομένων και επιδιώκουν εννοιολογική συνοχή σε όλα τα στάδια της έρευνας (Cypress, 2017; MacPhail et al., 2015).

Εν τέλει, η ενσωμάτωση της R παρείχε πρόσθετη ικανότητα για προηγμένη διαχείριση και οπτικοποίηση των ευρημάτων (Bitzenis & Koutsoupias, 2024A; Bitzenis & Koutsoupias, 2024B). Παρήχθησαν γραφικές αναπαραστάσεις, όπως διαγράμματα συχνότητας κωδικών και θεματικοί χάρτες, με στόχο την ενίσχυση τόσο της ερμηνευτικής εμβάθυνσης όσο και της επικοινωνιακής σαφήνειας των ευρημάτων (Bitzenis et al., 2025B; Bitzenis et al., 2025C). Τα οπτικά αποτελέσματα παρείχαν συγκροτημένη απεικόνιση της κατανομής και των διασυνδέσεων των κεντρικών θεμάτων στο σύνολο των δεδομένων. Συνολικά, η οπτικοποίηση διευκόλυνε τόσο την παρουσίαση όσο και την ερμηνεία των ευρημάτων, ολοκληρώνοντας το μεθοδολογικό πλαίσιο της μελέτης.

ΑΠΟΤΕΛΕΣΜΑΤΑ



Στην παρούσα ενότητα παρουσιάζονται τα βασικά ευρήματα της ποιοτικής ανάλυσης των συνεδριών εκπαιδευτικής συμβουλευτικής, όπως προέκυψαν από τη συστηματική κωδικοποίηση και οπτικοποίηση των δεδομένων μέσω του λογισμικού RQDA. Η ανάλυση επικεντρώνεται αφενός στην κατανομή των θεματικών κωδικών και αφετέρου στη διερεύνηση των εννοιολογικών σχέσεων και γλωσσικών μοτίβων που αναδύονται εντός των συμβουλευτικών αλληλεπιδράσεων, αναδεικνύοντας τα δομικά στοιχεία που συγκροτούν το περιεχόμενο και τη δυναμική των συνεδριών.

Το ραβδόγραμμα στην Εικόνα 1 παρουσιάζει τη συνολική κατανομή των κωδικοποιημένων αναφορών ανά θεματική κατηγορία, με βάση το πλήρες σύνολο των απομαγνητοφωνημένων πρακτικών των συνεδριών μαθητών-συμβούλων. Κάθε ράβδος αντιστοιχεί σε έναν συγκεκριμένο θεματικό κωδικό, με τις τιμές να παρουσιάζονται τόσο αριθμητικά όσο και ως ποσοστά του συνολικού συνόλου δεδομένων. Στον οριζόντιο άξονα απαριθμούνται οι κατηγορίες, ενώ ο κάθετος άξονας αντικατοπτρίζει την αναλογική συχνότητά τους στο σώμα κειμένων.

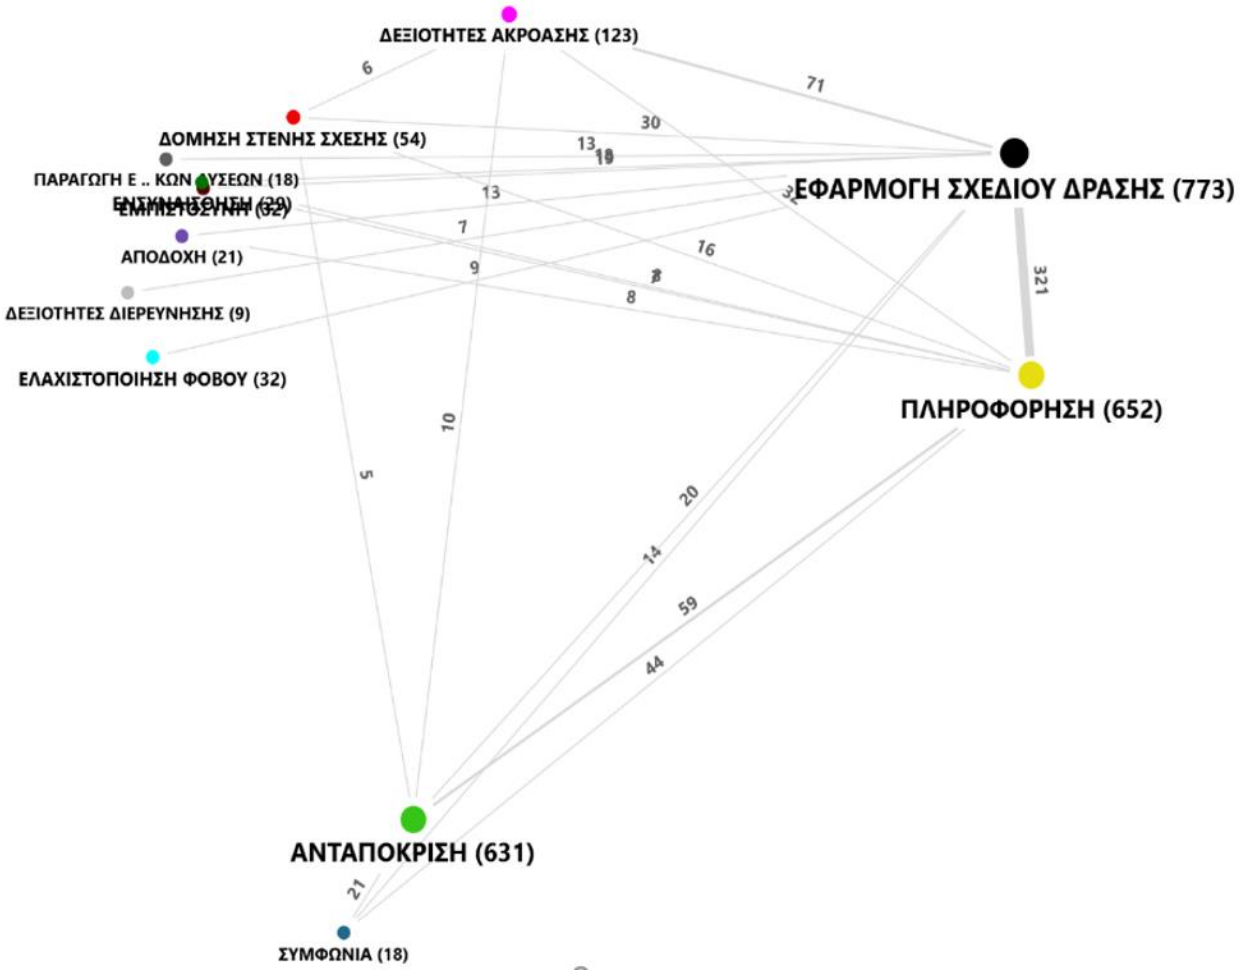
Στην κατανομή κυριαρχούν τρεις κωδικοί, *ΕΦΑΡΜΟΓΗ ΣΧΕΔΙΟΥ ΔΡΑΣΗΣ* (32,3%), *ΠΛΗΡΟΦΟΡΗΣΗ* (27,3%) και *ΑΝΤΑΠΟΚΡΙΣΗ* (26,4%), οι οποίοι μαζί αντιπροσωπεύουν πάνω από το 85% του συνόλου του κωδικοποιημένου περιεχομένου. Η εν λόγω συγκέντρωση αναδεικνύει τον πρωταρχικό λειτουργικό προσανατολισμό των συνεδριών, όπου οι σύμβουλοι έθεσαν ως προτεραιότητα τον προγραμματισμό δράσης, την παροχή πληροφοριών και την προσαρμοστική ανταπόκριση στις ανησυχίες των μαθητών. Τα τρία αυτά θέματα αποτελούν το δομικό θεμέλιο των

αλληλεπιδράσεων, υποδηλώνοντας ένα συμβουλευτικό πλαίσιο που επικεντρώνεται στην πρακτική καθοδήγηση, τις συμβουλές για την κατάσταση και την εμπλοκή σε πραγματικό χρόνο με τις ανάγκες των μαθητών.

Εικόνα 1
Σύνολο κωδικοποιήσεων ανά κατηγορία

Αντιθέτως, σημαντικά χαμηλότερες συχνότητες παρατηρούνται σε κωδικούς όπως *ΔΕΞΙΟΤΗΤΕΣ ΑΚΡΟΑΣΗΣ* (5,1%) και *ΔΟΜΗΣΗ ΣΤΕΝΗΣ ΣΧΕΣΗΣ* (2,3%), υποδεικνύοντας ότι μολονότι οι επικοινωνιακές δεξιότητες και η οικοδόμηση σχέσεων ήταν παρούσες, ήταν πολύ λιγότερο κεντρικές στις συζητήσεις. Τα θέματα συναισθηματικής υποστήριξης, *ΕΛΑΧΙΣΤΟΠΟΙΗΣΗ ΦΟΒΟΥ* και *ΕΜΠΙΣΤΟΣΥΝΗ* καταγράφουν μόλις 1,3% το καθένα, υποδεικνύοντας μια περιορισμένη αλλά όχι αμελητέα εστίαση στην καθησυχαστική υποστήριξη και την εμπιστοσύνη. Τα θέματα αυτά εμφανίζονται να διαδραματίζουν υποστηρικτικό ρόλο, να ενσωματώνονται όταν είναι αναγκαία, αλλά να μην καθορίζουν τη συνολική πορεία του διαλόγου.

Οι υπόλοιποι κωδικοί, όπως: *ΕΝΣΥΝΑΙΣΘΗΣΗ, ΑΠΟΔΟΧΗ, ΠΑΡΑΓΩΓΗ ΕΝΑΛΛΑΚΤΙΚΩΝ ΛΥΣΕΩΝ, ΣΥΜΦΩΝΙΑ* και *ΔΕΞΙΟΤΗΤΕΣ ΔΙΕΡΕΥΝΗΣΗΣ*, αντιπροσωπεύουν ο καθένας λιγότερο από το 1,2% των δεδομένων. Η χαμηλή τους συχνότητα υποδηλώνει ότι οι πιο αφηρημένες ή διερευνητικές διαστάσεις, όπως η ενσυναίσθηση, η εναλλακτική σκέψη ή η αμοιβαία συμφωνία, σπάνια τονίζονταν. Τα αποτελέσματα αυτά ενδέχεται να αντικατοπτρίζουν είτε τον περιορισμένο διαθέσιμο χρόνο κατά τη διάρκεια των συνεδριών, είτε τη στρατηγική εστίαση σε πρακτικά εφαρμόσιμο και πληροφοριακό περιεχόμενο έναντι της συναισθηματικής ή γνωστικής ανάπτυξης.



Συνολικά, το ραβδόγραμμα αναδεικνύει την έμφαση σε συμβουλευτικές στρατηγικές που επικεντρώνονται στη λήψη αποφάσεων και στη χρήση εργαλείων δράσης. Τονίζεται ότι η θεματική κατανομή επικεντρώνεται κυρίως σε λειτουργίες εκτέλεσης, υποστήριξης και διευκρίνισης, ενώ οι διαπροσωπικές και συναισθηματικές διαστάσεις φαίνεται να διαδραματίζουν έναν περισσότερο δευτερεύοντα ή συμφραζόμενα προσδιορισμένο ρόλο (βλ. Εικόνα 1).

Η Εικόνα 2 παρέχει ένα χάρτη συνεμφάνισης κωδικών, ο οποίος απεικονίζει τις θεματικές διασυνδέσεις μεταξύ ποιοτικών κωδικών που αντλήθηκαν από τα πρακτικά των συνεδριών μαθητών-συμβούλων. Κάθε κόμβος απεικονίζει μία θεματική κατηγορία, ενώ το μέγεθός του καθορίζεται από τη συνολική της συχνότητα στο σύνολο των δεδομένων. Οι γραμμές που συνδέουν τους κόμβους υποδηλώνουν τη συνύπαρξη μεταξύ των κωδικών, με το πάχος της γραμμής και τους αριθμούς που τη συνοδεύουν να αντικατοπτρίζουν τη σθεναρότητα και τη συχνότητα της συσχέτισής τους.

Η εμφανέστερη σύνδεση προκύπτει μεταξύ του *ΕΦΑΡΜΟΓΗ ΣΧΕΔΙΟΥ ΔΡΑΣΗΣ* (773) και του *ΠΛΗΡΟΦΟΡΗΣΗ* (652), η οποία χαρακτηρίζεται από την πιο έντονη γραμμή και μια τιμή συνύπαρξης 321. Η υψηλή συσχέτιση υπογραμμίζει την ενσωμάτωση της πρακτικής καθοδήγησης με την παροχή σχετικών πληροφοριών, υποδηλώνοντας ότι ο σχεδιασμός δράσης ήταν στενά συνδεδεμένος με την επικοινωνία του περιεχομένου που σχετίζεται με την εκπαίδευση ή τη σταδιοδρομία. Η συχνή διασταύρωση αυτών των δύο θεμάτων υποδηλώνει ένα συμβουλευτικό

μοντέλο στο οποίο οι ενημερωμένες επιλογές υποστηρίζουν σε σημαντικό βαθμό τις αποφάσεις σχεδιασμού. Μια αντίστοιχη αξιοσημείωτη σύνδεση παρατηρείται μεταξύ του *ΕΦΑΡΜΟΓΗ ΣΧΕΔΙΟΥ ΔΡΑΣΗΣ* και του *ΔΕΞΙΟΤΗΤΕΣ ΑΚΡΟΑΣΗΣ* (123), με τιμή συνύπαρξης 71, υποδηλώνοντας ότι η αποτελεσματική ακρόαση εκ μέρους του συμβούλου συνέβαλε σημαντικά στη διαμόρφωση εξατομικευμένων σχεδίων δράσης.

Εικόνα 2
Χάρτης συνεμφάνισης κωδικών

Η *ΑΝΤΑΠΟΚΡΙΣΗ* (631) παρουσιάζει επίσης μέτρια συνδεσιμότητα, ιδίως με την *ΠΛΗΡΟΦΟΡΗΣΗ* (59) και την *ΕΦΑΡΜΟΓΗ ΣΧΕΔΙΟΥ ΔΡΑΣΗΣ* (44). Το εν λόγω μοτίβο αντικατοπτρίζει τη δυναμική φύση των απαντήσεων των συμβούλων, οι οποίες συνδέονται άμεσα τόσο με την παροχή πληροφοριών όσο και με την υποστήριξη εφαρμόσιμων στρατηγικών δράσης. Επιπλέον, ορισμένες συν-εμφανίσεις, μολονότι αριθμητικά λιγότερες, υποδεικνύουν συμπληρωματικούς ρόλους μέσω κωδικών που εμφανίζονται σπανιότερα αλλά παραμένουν εννοιολογικά ουσιώδεις, όπως *ΕΜΠΙΣΤΟΣΥΝΗ* (32), *ΔΟΜΗΣΗ ΣΤΕΝΗΣ ΣΧΕΣΗΣ* (54) και *ΑΠΟΔΟΧΗ* (21). Οι συσχετισμοί αυτοί υποδεικνύουν ότι, παρά τη συγκριτικά χαμηλή συχνότητά τους, οι συναισθηματικές και διαπροσωπικές διαστάσεις διατηρούν λειτουργικές αλληλεξαρτήσεις με τους κυρίαρχους θεματικούς άξονες.

Εν τέλει, κωδικοί όπως *ΔΕΞΙΟΤΗΤΕΣ ΔΙΕΡΕΥΝΗΣΗΣ* (9) και *ΣΥΜΦΩΝΙΑ* (18) εμφανίζονται πιο περιφερειακά, με ελάχιστους δεσμούς συνύπαρξης. Η περιορισμένη εμπλοκή ενδέχεται να αντανακλά μειωμένη έμφαση στη συνεργατική διερεύνηση ή τη διαπραγματευτική συναίνεση, σε αντιδιαστολή προς το περισσότερο κατευθυντικό και υποστηρικτικό ύφος που αναδεικνύεται από τους κυρίαρχους θεματικούς κωδικούς. Συνολικά, η οπτική αναπαράσταση του χάρτη αναδεικνύει τη στενή διασύνδεση μεταξύ ακρόασης, παροχής πληροφοριών και σχεδιασμού δράσης, ενισχύοντας τη δεδομενοκεντρική διαπίστωση ότι οι τρεις αυτές λειτουργίες συγκροτούν τον πυρήνα της συμβουλευτικής διαδικασίας. Τα λιγότερο συχνά συναισθηματικά και σχεσιακά θέματα συμβάλλουν σε μια συμπληρωματική ιδιότητα, προσφέροντας πλαισιακή υποστήριξη στις βασικές στρατηγικές αλληλεπιδράσεις (βλ. Εικόνα 2).

Εικόνα 3
Συννεφόλεξο

Το συννεφόλεξο στην Εικόνα 3 οπτικοποιεί τις πιο συχνές φράσεις που βρέθηκαν σε όλα τα πρακτικά των συνεντεύξεων, εφιστώντας την προσοχή στις κυρίαρχες εκφράσεις και τα γλωσσικά μοτίβα που χρησιμοποιήθηκαν κατά τη διάρκεια των συμβουλευτικών συνεδριών. Οι μεγαλύτερες φράσεις εμφανίζονται συχνότερα, ενώ οι διαφοροποιήσεις στο μέγεθος και το χρώμα της γραμματοσειράς αντικατοπτρίζουν τη σχετική επικράτηση αντί της θεματικής κατηγοριοποίησης.

Στο κέντρο του νέφους, φράσεις όπως *είναι πάρα πολύ*, *είναι πολύ πιο* και *το θέμα είναι ότι* αναδεικνύονται ως ιδιαίτερα εμφανείς, αποκαλύπτοντας μια γλωσσική τάση προς την έμφαση και τον αξιολογικό σχολιασμό. Οι εν λόγω εκφράσεις χρησιμεύουν συχνά ως λεκτικές ενδείξεις για την εκδήλωση ανησυχίας, κρίσης ή διευκρίνισης, γεγονός που υποδηλώνει ότι τόσο οι μαθητές όσο και οι σύμβουλοι τις χρησιμοποιούν όταν επεξηγούν επιλογές, προκλήσεις ή αβεβαιότητες. Ομοίως, φράσεις υψηλής συχνότητας όπως *μαθήματα γενικής παιδείας*, *αρχές οικονομικής θεωρίας*, και *στην αγορά εργασίας* υποδεικνύουν τους βασικούς τομείς περιεχομένου και τα πλαίσια εντός των συνεδριών, ενισχύοντας την κεντρική σημασία των ακαδημαϊκών επιλογών και των εκτιμήσεων για την αγορά εργασίας στις συζητήσεις για τη σταδιοδρομία.

Ένα αξιοσημείωτο χαρακτηριστικό είναι η επανάληψη εκφράσεων που αντανακλούν καθησυχασμό ή διαπραγμάτευση, όπως το *δεν έχουμε πρόβλημα, δεν σημαίνει ότι* και το *δεν είναι μόνο*. Οι φράσεις αυτές, που συχνά αποτελούν μέρος του λόγου του συμβούλου, φαίνεται ότι αποσκοπούν στη μείωση του άγχους των μαθητών, στη διόρθωση παρανοήσεων ή στο άνοιγμα εναλλακτικών ερμηνειών. Η συχνή χρήση του *δεν* (άρνηση) σε πολλές φράσεις υπογραμμίζει περαιτέρω την επικράτηση των αντιρροπιστικών σκέψεων, οι οποίες μπορεί να αποσκοπούν στην αμφισβήτηση άκαμπτων πεποιθήσεων ή στην αντιμετώπιση φόβων σχετικά με μελλοντικά αποτελέσματα. Επιπροσθέτως, φράσεις όπως *δεν ξέρει ποτέ*, *δεν θα σου πω* και *δεν έχει βγει* αναδεικνύουν την αβεβαιότητα ως επαναλαμβανόμενο θέμα, αντανακλώντας ενδεχομένως τόσο τις ανασφάλειες των μαθητών, όσο και το εγγενές απρόβλεπτο της εκπαιδευτικής πορείας (βλ. Εικόνα 3).

ΣΥΜΠΕΡΑΣΜΑΤΑ

Η παρούσα μελέτη τεκμηριώνει τη μεθοδολογική αξία των εργαλείων ανοικτού λογισμικού, όπως του RQDA, ως μέσα ανάλυσης κειμενικών δεδομένων στο πεδίο της εκπαιδευτικής συμβουλευτικής. Τα ευρήματα καταδεικνύουν μια διακριτή προτεραιοποίηση της πρακτικής καθοδήγησης, της πληροφόρησης και της άμεσης ανταπόκρισης στις ανάγκες των μαθητών, όπως αυτό αποτυπώθηκε στην ανάλυση των απομαγνητοφωνημένων συνεδριών. Οι κωδικοί *ΕΦΑΡΜΟΓΗ ΣΧΕΔΙΟΥ ΔΡΑΣΗΣ*, *ΠΛΗΡΟΦΟΡΗΣΗ* και *ΑΝΤΑΠΟΚΡΙΣΗ* εμφανίζονται με ιδιαίτερη συχνότητα, συγκεντρώνοντας άνω του 85% των συνολικών δεδομένων· στοιχείο που αποτυπώνει μια στρατηγική σαφώς προσανατολισμένη στην άμεση υποστήριξη και καθοδήγηση των μαθητών κατά τη διαδικασία λήψης αποφάσεων.

Η περιορισμένη καταγραφή κωδικών όπως *ΔΕΞΙΟΤΗΤΕΣ ΑΚΡΟΑΣΗΣ*, *ΕΜΠΙΣΤΟΣΥΝΗ* και *ΔΟΜΗΣΗ ΣΤΕΝΗΣ ΣΧΕΣΗΣ* υποδηλώνει ότι οι συνεδρίες τείνουν να δίνουν μειωμένη έμφαση στις συναισθηματικές και

διαπροσωπικές διαστάσεις, παρά τη θεμελιώδη συμβολή τους στην οικοδόμηση αποτελεσματικού συμβουλευτικού πλαισίο. Παράλληλα, η περιορισμένη παρουσία πρακτικών, όπως η σχεδίαση εναλλακτικών λύσεων και η ενίσχυση διερευνητικού τρόπου σκέψης, ενδέχεται να αποδίδεται είτε σε περιορισμούς του χρονοδιαγράμματος, είτε σε προτεραιοποίηση της άμεσης εφαρμοσμένης στήριξης των μαθητών. Σε επίπεδο γλωσσικής ανάλυσης, οι συνεδρίες διακρίνονται για τον διάλογο που διαμορφώνεται σε καθοδηγητικό και διαπραγματευτικό ύφος, γεγονός που τεκμηριώνεται από τη συχνότητα συγκεκριμένων γλωσσικών μοτίβων. Εκφράσεις επιβεβαίωσης, αξιολόγησης και καθησύχασης, όπως για παράδειγμα *είναι πάρα πολύ* και *δεν έχουμε πρόβλημα*, συνθέτουν ένα επικοινωνιακό περιβάλλον όπου η συμβουλευτική καθοδήγηση συνυπάρχει με τη συστηματική προσπάθεια μείωσης της αβεβαιότητας εκ μέρους των μαθητών.

Η αξιοποίηση του RQDA ως εργαλείου ποιοτικής ανάλυσης παρέχει ένα οργανωμένο, διαφανές και μεθοδολογικά συνεπές πλαίσιο επεξεργασίας των δεδομένων, ενισχύοντας την ανάδειξη και ερμηνεία των κυρίαρχων θεματικών (Chandra & Shang, 2017). Ενώ το εργαλείο παρέχει ουσιώδη οφέλη, όπως την αποτελεσματική διαχείριση μεγάλου όγκου δεδομένων και την ενσωμάτωση στατιστικών μεθόδων, καταγράφονται ταυτόχρονα ορισμένοι περιορισμοί, ιδίως όσον αφορά την αρχική εξοικείωση των χρηστών και τη δυνητική αποστασιοποίηση του ερευνητή από την πρωτογενή εμπειρία του ερευνητικού υλικού (Gilbert, 2002).

Στο πλαίσιο μελλοντικής ερευνητικής δραστηριότητας, προτείνεται η υιοθέτηση μεικτών μεθόδων που συνδυάζουν ερμηνευτικές προσεγγίσεις με συστηματικές ποσοτικές μετρήσεις, με στόχο μια πιο ολιστική αξιολόγηση των συμβουλευτικών πρακτικών. Η διεύρυνση αυτή δύναται να ενισχύσει την αξιοπιστία και την επάρκεια των ευρημάτων, συμβάλλοντας στη συγκρότηση τεκμηριωμένων αναλυτικών πλαισίων. «Παράλληλα, αναδεικνύεται η ανάγκη για συμπληρωματική έρευνα σχετικά με την επίδραση των τεχνολογικών εργαλείων στην ποιότητα των συμβουλευτικών αλληλεπιδράσεων, με έμφαση στις συναισθηματικές και διαπροσωπικές τους διαστάσεις, ώστε να διαμορφωθούν πιο λεπτομερή θεωρητικά και εφαρμοσμένα υποδείγματα εκπαιδευτικής συμβουλευτικής.

Συνοψίζοντας, τα ευρήματα της παρούσας μελέτης αναδεικνύουν τη χρησιμότητα των εργαλείων ανοικτού λογισμικού στην ποιοτική ανάλυση συνεδριών εκπαιδευτικής συμβουλευτικής, ιδίως ως προς την ενίσχυση της αναλυτικής συνέπειας και της τεκμηρίωσης της ερευνητικής πορείας. Η εφαρμογή του RQDA ανέδειξε τη λειτουργική σύνδεση μεταξύ κωδικοποίησης, θεματικής χαρτογράφησης και οπτικοποίησης των δεδομένων, υποστηρίζοντας τόσο την ερμηνευτική εμβάθυνση όσο και τη βελτίωση των συμβουλευτικών παρεμβάσεων. Τέλος, η μελέτη σκιαγραφεί τις προϋποθέσεις για μια διεπιστημονική προσέγγιση στην εκπαιδευτική συμβουλευτική, η οποία συνδυάζει τεχνολογικά εργαλεία με ερμηνευτικά σχήματα, ενισχύοντας την αναπαραγωγιμότητα και την τεκμηριωμένη λήψη αποφάσεων.

ΠΕΡΙΛΗΨΗ

Η διδασκαλία της Ιστορίας αποτελεί μία ιδιαίτερη παιδαγωγική πρόκληση, απαιτώντας την ενεργοποίηση της κριτικής σκέψης, την ερμηνεία ιστορικών πηγών και τη σύνδεση παρελθόντος και παρόντος. Η αξιοποίηση των ψηφιακών μέσων παρέχει νέες δυνατότητες προς αυτή την κατεύθυνση, καθιστώντας την ιστορική γνώση περισσότερο διαδραστική και προσιτή στους μαθητές.

Η ενσωμάτωση της τεχνολογίας στην ιστορική εκπαίδευση περιλαμβάνει τη χρήση διαδραστικών χαρτών, εικονικών αναπαραστάσεων, πολυμεσικού υλικού, ψηφιακών αρχείων και εκπαιδευτικών πλατφορμών. Τα εργαλεία αυτά επιτρέπουν στους μαθητές να εξερευνούν ιστορικά γεγονότα μέσω οπτικοποιημένων δεδομένων, να αναλύουν πρωτογενείς πηγές και να συμμετέχουν σε βιωματικές δραστηριότητες. Για παράδειγμα, οι γεωγραφικά πληροφοριακά συστήματα (GIS) και εφαρμογές όπως το Google Earth επιτρέπουν την ιστορική χαρτογράφηση, διευκολύνοντας την κατανόηση του χωροχρονικού πλαισίου των γεγονότων. Επιπλέον, οι τεχνολογίες εικονικής και επαυξημένης πραγματικότητας (VR/AR) δίνουν τη δυνατότητα «ψηφιακών επισκέψεων» σε ιστορικούς χώρους, ενισχύοντας την εμπειρική προσέγγιση της Ιστορίας.

Το πολυμεσικό υλικό, όπως ντοκιμαντέρ, διαδραστικά βίντεο και ιστορικά αρχεία, προσφέρει μια πολυτροπική διδακτική προσέγγιση που ανταποκρίνεται στις διαφοροποιημένες μαθησιακές ανάγκες. Παράλληλα, η ψηφιακή αφήγηση (digital storytelling) ενισχύει τη δημιουργική συμμετοχή των μαθητών, επιτρέποντάς τους να κατασκευάζουν τις δικές τους ιστορικές αφηγήσεις, συνδυάζοντας πηγές, εικόνες και βίντεο.

Η παιγνιοποίηση (gamification) αποτελεί έναν ακόμη καινοτόμο διδακτικό μηχανισμό, καθώς ενσωματώνει στοιχεία πρόκλησης, ανταμοιβής και συνεργασίας. Πλατφόρμες όπως το Kahoot!, το Quizizz και το Mission US επιτρέπουν την αφομοίωση ιστορικών γνώσεων μέσω διαδραστικών δραστηριοτήτων, αυξάνοντας το ενδιαφέρον των μαθητών.

Παρά τις δυνατότητες που προσφέρει η τεχνολογία, προκύπτουν προκλήσεις που απαιτούν προσεκτική διαχείριση. Η αξιοπιστία των ψηφιακών πηγών, η ανάπτυξη κριτικής προσέγγισης στην πληροφορία και η επιμόρφωση των εκπαιδευτικών στη χρήση ψηφιακών εργαλείων συνιστούν βασικούς παράγοντες επιτυχούς ενσωμάτωσης της τεχνολογίας στην ιστορική διδασκαλία.

Συμπερασματικά, η αξιοποίηση των ψηφιακών μέσων στη διδασκαλία της Ιστορίας δεν αποτελεί απλώς έναν τεχνολογικό εκσυγχρονισμό, αλλά μια παιδαγωγική αναβάθμιση που ενισχύει την κριτική σκέψη, τη βιωματική μάθηση και τη βαθύτερη κατανόηση του ιστορικού παρελθόντος. Με τη σωστή χρήση των εργαλείων αυτών, η Ιστορία καθίσταται πιο προσιτή και ελκυστική, διαμορφώνοντας ενεργούς και συνειδητοποιημένους πολίτες.

Η παρούσα εργασία εξετάζει τον ρόλο των ψηφιακών τεχνολογιών στη διδασκαλία της Ιστορίας, εστιάζοντας σε σύγχρονες μεθόδους που αξιοποιούν διαδραστικούς χάρτες, εικονικές αναπαραστάσεις, πολυμεσικό υλικό και εργαλεία παιχνιδοποίησης μέσα από την παρουσίαση ενός σχεδίου διδασκαλίας δύο ωρών, στο μάθημα της Ιστορίας της Στ΄ τάξης, στην ενότητα: «Η δεύτερη πολιορκία και η έξοδος του Μεσολογγίου».

Η ενσωμάτωση ψηφιακών τεχνολογιών στη διδασκαλία της ενότητας συνέβαλε καθοριστικά στην ενίσχυση της ιστορικής σκέψης και της ενεργού συμμετοχής των μαθητών. Η χρήση διαδραστικών χαρτών και εικονικών αναπαραστάσεων διευκόλυνε την κατανόηση του χωροχρονικού πλαισίου των γεγονότων, ενώ το πολυμεσικό υλικό και

η ψηφιακή αφήγηση προήγαγαν τη βιωματική και δημιουργική μάθηση. Επιπλέον, η αξιοποίηση παιχνιδοποιημένων δραστηριοτήτων ενίσχυσε το ενδιαφέρον και την αφομοίωση του περιεχομένου. Παράλληλα, οι μαθητές ανέπτυξαν δεξιότητες κριτικής ανάλυσης ψηφιακών πηγών. Ωστόσο, αναδείχθηκαν προκλήσεις σχετικές με τη διαχείριση του διδακτικού χρόνου και την ανάγκη συστηματικής επιμόρφωσης των εκπαιδευτικών στη χρήση ψηφιακών μέσων.

Λέξεις - κλειδιά: διδασκαλία Ιστορίας, ψηφιακά μέσα, διαδραστική μάθηση, εικονικές αναπαραστάσεις, παιχνιδοποίηση, τεχνολογία στην εκπαίδευση

ΕΙΣΑΓΩΓΗ

Η διδασκαλία της Ιστορίας στο σύγχρονο σχολείο συνιστά ένα σύνθετο παιδαγωγικό εγχείρημα, το οποίο υπερβαίνει την απλή απομνημόνευση γεγονότων. Ο βασικός στόχος της ιστορικής εκπαίδευσης είναι η καλλιέργεια της ιστορικής σκέψης, δηλαδή η ικανότητα των μαθητών να ερμηνεύουν ιστορικές πηγές, να κατανοούν τις συνθήκες υπό τις οποίες διαμορφώθηκαν τα γεγονότα, να εντοπίζουν αιτίες και συνέπειες και να εντάσσουν τα γεγονότα σε ένα ευρύτερο χωροχρονικό και νοηματικό πλαίσιο. Η σύνδεση παρελθόντος και παρόντος, η καλλιέργεια της κριτικής σκέψης και η ανάπτυξη ιστορικής ενσυναίσθησης αποτελούν θεμελιώδεις διαστάσεις αυτής της διαδικασίας (Wineburg, 2010).

Τα τελευταία χρόνια, η ένταξη των ψηφιακών τεχνολογιών στην εκπαιδευτική πράξη μετασχηματίζει τους τρόπους με τους οποίους προσεγγίζεται η ιστορική γνώση. Η ψηφιακή παιδαγωγική, ως θεωρητικό και πρακτικό πλαίσιο, εστιάζει στη δημιουργική, πολυτροπική και διαδραστική μάθηση, όπου οι μαθητές δεν είναι παθητικοί δέκτες πληροφορίας, αλλά ενεργοί συμμετέχοντες στη διαδικασία οικοδόμησης της γνώσης (Selwyn, 2011). Η αξιοποίηση ψηφιακών εργαλείων στη διδασκαλία της Ιστορίας προάγει τη βιωματική εμπλοκή, την αναστοχαστική ενασχόληση με το παρελθόν και την ανάπτυξη δεξιοτήτων του 21ου αιώνα, όπως η πληροφοριακή παιδεία και ο ψηφιακός γραμματισμός (Slekar, 2009).

Η τεχνολογία προσφέρει τη δυνατότητα οπτικοποίησης ιστορικών δεδομένων, σύνδεσης με ψηφιακές πρωτογενείς πηγές, εικονικών περιηγήσεων σε ιστορικούς τόπους και ανασύνθεσης ιστορικών αφηγήσεων. Οι διαδραστικοί χάρτες, οι εφαρμογές εικονικής και επαυξημένης πραγματικότητας (VR/AR), τα πολυμεσικά ντοκιμαντέρ, οι προσομοιώσεις και τα ψηφιακά αρχεία αποτελούν εργαλεία που μπορούν να μεταμορφώσουν την ιστορική αφήγηση σε μια εμπειρία προσβάσιμη, πολυαισθητηριακή και ουσιαστική για τους μαθητές (Lee & Hammer, 2011, Hübner, 2023). Σύγχρονες μελέτες επιβεβαιώνουν ότι η χρήση εικονικών τεχνολογιών ενισχύει τη μαθησιακή εμπλοκή, τη συγκέντρωση και τη χωροχρονική κατανόηση της ιστορικής πραγματικότητας (Serrano, 2025).

Στο πλαίσιο αυτό, η ψηφιακή αφήγηση (digital storytelling) αναδεικνύεται ως μια ιδιαίτερα αποτελεσματική μέθοδος, καθώς επιτρέπει στους μαθητές να συνδυάζουν πηγές, εικόνες, βίντεο και ήχο για να δημιουργήσουν τις δικές τους ιστορικές αφηγήσεις. Μέσα από αυτή τη διαδικασία ενισχύεται όχι μόνο η δημιουργικότητά τους, αλλά και η κατανόηση της πολλαπλότητας των ιστορικών φωνών και οπτικών (Robin, 2008, Robin, 2016). Η δυνατότητα οπτικοποίησης και ανακατασκευής της ιστορίας μέσω ψηφιακών εργαλείων καλλιεργεί δεξιότητες αφηγηματικής σύνθεσης και ιστορικής ενσυναίσθησης (Oskoz & Elola, 2014).

Αντίστοιχα, η παιγνιοποίηση (gamification) εισάγει τη διάσταση του παιχνιδιού, προσφέροντας ένα περιβάλλον αλληλεπίδρασης και κινήτρων, το οποίο ενισχύει τη μνήμη, την προσοχή και την ενεργή συμμετοχή των μαθητών. Πλατφόρμες όπως το Kahoot!, το Quizizz και ιστορικά παιχνίδια ρόλων, όπως το Mission US, έχουν αποδειχθεί αποτελεσματικά εργαλεία κινητοποίησης μαθητών σε περιβάλλοντα διδασκαλίας Ιστορίας (Gee, 2003, Dicheva et al., 2015).

Παρά τα πολλαπλά πλεονεκτήματα, η ενσωμάτωση της τεχνολογίας στην ιστορική εκπαίδευση συνεπάγεται και σημαντικές προκλήσεις. Οφείλει να λαμβάνει υπόψη την αξιοπιστία των ψηφιακών πηγών, την ανάγκη για κριτική αξιολόγηση της πληροφορίας από τους μαθητές και, κυρίως, την επιμόρφωση των εκπαιδευτικών στην ουσιαστική και παιδαγωγικά στοχευμένη χρήση των τεχνολογικών εργαλείων (Dicheva et al., 2015). Η τεχνολογία δεν αποτελεί αυτοσκοπό, αλλά εργαλείο που όταν αξιοποιηθεί με σχέδιο και γνώση, μπορεί να συμβάλει ουσιαστικά στη δημιουργία ενός πιο ανοιχτού, συνεργατικού και νοηματοδοτημένου μαθήματος Ιστορίας (Selwyn, 2011).

ΘΕΩΡΗΤΙΚΟ ΠΛΑΙΣΙΟ

Η αξιοποίηση ψηφιακών εργαλείων στη διδασκαλία της Ιστορίας προσφέρει νέες δυνατότητες εμπλουτισμού της μαθησιακής διαδικασίας, ενισχύοντας τη βιωματικότητα, τη διαδραστικότητα και την ενεργό εμπλοκή των μαθητών. Ένα από τα πλέον χρήσιμα μέσα αποτελεί η χρήση διαδραστικών χαρτών και γεωγραφικών πληροφοριακών συστημάτων (GIS), όπως το Google Earth. Μέσα από αυτά, οι μαθητές έχουν τη δυνατότητα να χαρτογραφήσουν ιστορικά γεγονότα, να εντοπίσουν γεωγραφικές μετατοπίσεις πληθυσμών, να εξετάσουν τη στρατηγική σημασία περιοχών και να κατανοήσουν την πολυπλοκότητα του χωροχρονικού πλαισίου στο οποίο εκτυλίχθηκαν τα γεγονότα. Η οπτικοποίηση της γεωγραφικής διάστασης της Ιστορίας διευκολύνει τη βαθύτερη κατανόηση των γεγονότων, ενισχύοντας τη συνδετική ικανότητα των μαθητών ανάμεσα στον χώρο και το ιστορικό αφήγημα (Trepal, et al., 2020).

Παράλληλα, οι τεχνολογίες εικονικής και επαυξημένης πραγματικότητας (VR και AR) προσφέρουν μοναδικές δυνατότητες εμπλοκής των μαθητών με το ιστορικό παρελθόν. Μέσα από εργαλεία όπως το Google Expeditions ή

εφαρμογές VR σε πλατφόρμες όπως το HistoryView VR, οι μαθητές μπορούν να βιώσουν «ψηφιακές επισκέψεις» σε ιστορικούς τόπους, να περιηγηθούν σε αναπαραστάσεις μαχών, να εισέλθουν σε ψηφιακά μουσεία ή να «συνομιλήσουν» με τρισδιάστατα μοντέλα ιστορικών αντικειμένων. Αυτή η προσέγγιση όχι μόνο προκαλεί το ενδιαφέρον, αλλά καλλιεργεί και τη συναισθηματική εμπλοκή με το ιστορικό αντικείμενο, ενισχύοντας την ιστορική ενσυναίσθηση (Huang, 2022).

Η χρήση πολυμεσικού υλικού, όπως ντοκιμαντέρ, ιστορικά αρχεία, ηχητικά αποσπάσματα και διαδραστικά βίντεο, αποτελεί έναν άλλο πυλώνα της ψηφιακής ιστορικής εκπαίδευσης. Τα μέσα αυτά επιτρέπουν την πρόσβαση σε πρωτογενείς ή δευτερογενείς πηγές σε μορφή που ανταποκρίνεται στις ανάγκες διαφορετικών μαθησιακών τύπων. Για παράδειγμα, ένα ντοκιμαντέρ για την Έξοδο του Μεσολογγίου μπορεί να συνοδεύεται από διαδραστικές ερωτήσεις, πηγές και χάρτες, δημιουργώντας ένα ενιαίο, πολυτροπικό μαθησιακό περιβάλλον (González & Carretero, 2013).

Η ψηφιακή αφήγηση (digital storytelling) συνιστά μια δημιουργική εκπαιδευτική προσέγγιση που ενισχύει τη συμμετοχή των μαθητών στη διαδικασία της ιστορικής ερμηνείας. Μέσω εργαλείων όπως το Canva, το Adobe Express ή το WeVideo, οι μαθητές μπορούν να δημιουργήσουν τις δικές τους ιστορικές αφηγήσεις, συνδυάζοντας πηγές, εικόνες, ήχους και προσωπική ερμηνεία. Αυτή η μέθοδος όχι μόνο καλλιεργεί τη δημιουργική έκφραση, αλλά διδάσκει και τη σύνθεση πληροφοριών από πολλαπλές πηγές, αναπτύσσοντας δεξιότητες ιστορικής σκέψης και ψηφιακού γραμματισμού (Robin, 2016, Petousi, et al., (2022).

Η παιγνιοποίηση (gamification) έρχεται να ενισχύσει την εμπλοκή και το ενδιαφέρον των μαθητών μέσω στοιχείων πρόκλησης, ανταμοιβής και συνεργασίας. Πλατφόρμες όπως το Kahoot! και το Quizizz, μέσω ερωτήσεων κλειστού τύπου και δυναμικής αξιολόγησης, μετατρέπουν την ανατροφοδότηση σε παιχνίδι, δίνοντας κίνητρα για επανάληψη και εμπέδωση. Πιο σύνθετες εφαρμογές, όπως το Mission US, επιτρέπουν στους μαθητές να βιώσουν εικονικά ιστορικά σενάρια, αναλαμβάνοντας ρόλους ιστορικών προσώπων και λαμβάνοντας αποφάσεις στο πλαίσιο ιστορικών περιόδων. Η παιγνιοποίηση συμβάλλει ιδιαίτερα στην ανάπτυξη της ιστορικής ενσυναίσθησης, της κριτικής σκέψης και της συνεργατικότητας (Dicheva et al., 2015, Lee & Hammer, 2011).

Στο πλαίσιο καλών πρακτικών, αξίζει να αναφερθεί ένα εκπαιδευτικό σχέδιο στο οποίο οι μαθητές της Στ΄ τάξης μελέτησαν την Έξοδο του Μεσολογγίου με συνδυασμό εργαλείων: παρακολούθησαν ένα ντοκιμαντέρ με ενσωματωμένα ερωτήματα, περιηγήθηκαν εικονικά στον Κήπο των Ηρώων μέσω Google Earth, δημιούργησαν ψηφιακές αφηγήσεις με εικόνες και αποσπάσματα πηγών, και συμμετείχαν σε ένα παιχνίδι γνώσεων στο Kahoot! ως τελική αξιολόγηση. Οι μαθητές έδειξαν αυξημένη κατανόηση του ιστορικού πλαισίου και ενεργή συμμετοχή σε όλη τη διαδικασία.

Συνολικά, τα ψηφιακά εργαλεία μετασχηματίζουν τη διδασκαλία της Ιστορίας σε ένα δυναμικό και πολυδιάστατο περιβάλλον, ευνοώντας την εμβάθυνση, τη δημιουργική έκφραση και τη βιωματική μάθηση. Η ουσιαστική ενσωμάτωσή τους, με κατάλληλη παιδαγωγική καθοδήγηση, μπορεί να ενισχύσει την ιστορική σκέψη και τη σχέση των μαθητών με το παρελθόν (Selwyn, 2011).

ΔΙΔΑΚΤΙΚΟ ΣΧΕΔΙΟ

Η διδακτική πρόταση που παρουσιάζεται έχει ως αντικείμενο τη διδασκαλία της ενότητας «Η δεύτερη πολιορκία και η έξοδος του Μεσολογγίου» στο πλαίσιο του μαθήματος της Ιστορίας της Στ΄ Δημοτικού, διάρκειας δύο διδακτικών ωρών. Βασικός στόχος του σχεδίου είναι η ενίσχυση της ιστορικής σκέψης, της ενεργούς συμμετοχής και της βιωματικής μάθησης των μαθητών μέσω της δημιουργικής αξιοποίησης ψηφιακών εργαλείων. Οι επιμέρους διδακτικοί στόχοι αφορούν τόσο το γνωστικό επίπεδο (κατανόηση των αιτίων, της πορείας και των συνεπειών της πολιορκίας), όσο και την ανάπτυξη δεξιοτήτων (ανάλυση πρωτογενών πηγών, χρήση ψηφιακών μέσων, ιστορικός γραμματισμός), αλλά και τη διαμόρφωση στάσεων (σεβασμός στην ιστορική μνήμη, καλλιέργεια ενσυναίσθησης, ενεργός συμμετοχή στη συλλογική μάθηση).

Η διδακτική διαδικασία ξεκινά με την ενεργοποίηση του ενδιαφέροντος των μαθητών μέσω πολυμεσικού υλικού. Ειδικότερα, οι μαθητές παρακολουθούν ένα σύντομο ντοκιμαντέρ ή δραματοποιημένο απόσπασμα για τα γεγονότα του Μεσολογγίου, συνοδευόμενο από εικόνες της εποχής και μουσική επένδυση, προκειμένου να δημιουργηθεί ένα συναισθηματικά φορτισμένο πλαίσιο που ευνοεί τη σύνδεση με το περιεχόμενο. Η πρώτη δραστηριότητα επικεντρώνεται στην ανασύνθεση του ιστορικού πλαισίου της πολιορκίας. Με τη βοήθεια της εφαρμογής Google Earth, οι μαθητές εντοπίζουν το Μεσολόγγι στον χάρτη, αναλύουν τη γεωγραφική του θέση και επιχειρούν μια ψηφιακή αναπαράσταση των στρατοπέδων και των διαδρομών της εξόδου. Η δραστηριότητα αυτή διευκολύνει την κατανόηση του χωροχρονικού πλαισίου των γεγονότων, καθιστώντας τα πιο προσιτά και οπτικά κατανοητά.

Στη συνέχεια, αξιοποιούνται ψηφιακές πηγές (κειμενικά και ηχητικά αποσπάσματα από μαρτυρίες μαχητών ή περιηγητών της εποχής) τις οποίες οι μαθητές διαβάζουν ή ακούν μέσα από την εκπαιδευτική πλατφόρμα ή μέσω κατάλληλα διαμορφωμένου PowerPoint. Η δραστηριότητα αυτή προάγει την εξοικείωση με πρωτογενείς πηγές και την εξάσκηση στην ερμηνεία πολλαπλών οπτικών γωνιών, ενώ παράλληλα ενισχύει την ενσυναίσθηση, καθώς οι μαθητές «συνομιλούν» με βιώματα ανθρώπων της εποχής. Ακολουθεί δημιουργική εργασία με την τεχνική της ψηφιακής αφήγησης (digital storytelling). Οι μαθητές, σε ομάδες, επιλέγουν ένα ιστορικό πρόσωπο ή μια πλευρά της εξόδου (π.χ. οι πολιορκημένοι, οι γυναίκες, οι στρατιώτες, οι Φιλέλληνες), και δημιουργούν τη δική τους αφήγηση, αξιοποιώντας εργαλεία όπως το Canva ή το Adobe Express. Ενσωματώνουν εικόνες, αποσπάσματα πηγών και μουσική υπόκρουση, προκειμένου να ανασυνθέσουν ένα ιστορικό αφήγημα βασισμένο σε τεκμήρια και δημιουργική έκφραση. Η δραστηριότητα αυτή επιτρέπει τη σύνθεση και παρουσίαση ιστορικών πληροφοριών μέσα από προσωπική προοπτική και ενισχύει τον γραμματισμό στην Ιστορία.

Ως μορφή ανατροφοδότησης και επανάληψης, αξιοποιείται η πλατφόρμα Kahoot!, μέσω της οποίας οι μαθητές συμμετέχουν σε ένα διαδραστικό παιχνίδι γνώσεων, που περιλαμβάνει ερωτήσεις κατανόησης, χρονική σειρά γεγονότων και συσχέτιση αιτίας-αποτελέσματος. Η παιγνιώδης μορφή ενισχύει τη συμμετοχικότητα και επιτρέπει στον εκπαιδευτικό να ελέγξει άμεσα τον βαθμό εμπέδωσης του περιεχομένου. Κατά τη διάρκεια της όλης διδακτικής διαδικασίας, η εμπλοκή των μαθητών ενισχύεται με την εναλλαγή δραστηριοτήτων, την εργασία σε ομάδες, τη χρήση πολυτροπικών υλικών και την ενσωμάτωση δημιουργικών μέσων. Οι μαθητές λειτουργούν ως ερευνητές, αφηγητές και αναλυτές, καλλιεργώντας ιστορικές, κοινωνικές και ψηφιακές δεξιότητες.

Η αξιολόγηση είναι διαμορφωτική και συνεχής, στηριζόμενη στην παρατήρηση της συμμετοχής, την ποιότητα των παραγόμενων αφηγήσεων, την αλληλεπίδραση στην ομαδική εργασία και την επίδοση στο διαδραστικό παιχνίδι. Παράλληλα, ενσωματώνεται και αυτοαξιολόγηση, μέσω σύντομου ερωτηματολογίου στο τέλος της διδακτικής ενότητας, όπου οι μαθητές αποτυπώνουν τις εντυπώσεις, τις δυσκολίες και όσα έμαθαν. Συμπερασματικά, το συγκεκριμένο σχέδιο διδασκαλίας αξιοποιεί στοχευμένα τις δυνατότητες της τεχνολογίας, δημιουργώντας ένα μαθητοκεντρικό, βιωματικό και κριτικά στοχαστικό περιβάλλον μάθησης, που φέρνει τους μαθητές σε ουσιαστική επαφή με το ιστορικό παρελθόν μέσα από σύγχρονες παιδαγωγικές πρακτικές.

ΑΠΟΤΕΛΕΣΜΑΤΑ

Η εφαρμογή του διδακτικού σχεδίου ανέδειξε σημαντικά παιδαγωγικά οφέλη που συνδέονται με την ενίσχυση της ιστορικής σκέψης, την ενεργή συμμετοχή των μαθητών και την ουσιαστική αξιοποίηση των ψηφιακών τεχνολογιών στην ιστορική εκπαίδευση. Οι μαθητές ανταποκρίθηκαν θετικά στο ψηφιακά εμπλουτισμένο περιβάλλον μάθησης, παρουσιάζοντας αυξημένο ενδιαφέρον και ενεργή εμπλοκή καθ’ όλη τη διάρκεια των δραστηριοτήτων. Μέσω της οπτικοποίησης των ιστορικών γεγονότων με εργαλεία όπως το Google Earth και η χρήση πολυμεσικού υλικού, διευκολύνθηκε η κατανόηση της χωροχρονικής διάστασης των γεγονότων, ενισχύοντας την ιστορική ενσυναίσθηση και την κριτική προσέγγιση του παρελθόντος.

Παράλληλα, η χρήση πρωτογενών πηγών και η δημιουργία ψηφιακής αφήγησης επέτρεψαν στους μαθητές να κινητοποιήσουν δεξιότητες ανάλυσης, σύνθεσης και ερμηνείας ιστορικών τεκμηρίων, αναπτύσσοντας βασικά στοιχεία ιστορικού και ψηφιακού γραμματισμού. Η εργασία σε ομάδες για την παραγωγή των αφηγήσεων ενίσχυσε την ανάπτυξη συνεργατικού πνεύματος και την ικανότητα διαμοιρασμού ρόλων και ευθυνών. Οι μαθητές επέδειξαν ιδιαίτερο ενθουσιασμό στη χρήση δημιουργικών εφαρμογών (π.χ. Canva), γεγονός που ενίσχυσε τη φαντασία και την προσωπική έκφραση. Η παιγνιώδης αξιολόγηση μέσω του Kahoot! λειτούργησε τόσο ως εργαλείο ανατροφοδότησης, όσο και ως κίνητρο για τη διατήρηση της προσοχής και της συμμετοχής. Τα αποτελέσματα του κουίζ ανέδειξαν σημαντικό βαθμό κατανόησης των ιστορικών γεγονότων, ενώ οι προφορικές και γραπτές παρατηρήσεις των μαθητών κατά τη διάρκεια και στο τέλος του μαθήματος κατέδειξαν εσωτερίκευση του περιεχομένου και προσωπική σύνδεση με το υλικό.

Ωστόσο, καταγράφηκαν και ορισμένες παιδαγωγικές προκλήσεις, όπως η ανάγκη προσεκτικής διαχείρισης του χρόνου ώστε να ολοκληρωθούν οι δραστηριότητες χωρίς βιασύνη, καθώς και η διαφοροποίηση της υποστήριξης για μαθητές με περιορισμένη εξοικείωση με τα ψηφιακά εργαλεία. Σε γενικές γραμμές, η εφαρμογή του σχεδίου επιβεβαίωσε ότι η δημιουργική ενσωμάτωση της τεχνολογίας μπορεί να αναβαθμίσει ποιοτικά τη διδασκαλία της Ιστορίας, ενισχύοντας την κατανόηση, τη βιωματική εμπλοκή και την ενεργό συμμετοχή των μαθητών σε νοηματοδοτημένες μαθησιακές εμπειρίες.

ΠΡΟΒΛΗΜΑΤΙΣΜΟΙ ΚΑΙ ΠΡΟΚΛΗΣΕΙΣ

Η εφαρμογή του διδακτικού σχεδίου ανέδειξε ορισμένες κρίσιμες προκλήσεις, οι οποίες πρέπει να ληφθούν υπόψη για την αποτελεσματική ενσωμάτωση των ψηφιακών τεχνολογιών στη διδασκαλία της Ιστορίας. Πρώτο και βασικό ζήτημα αποτελεί η διαχείριση του διδακτικού χρόνου. Η ένταξη ποικίλων δραστηριοτήτων, κυρίως όταν αυτές περιλαμβάνουν δημιουργικές ή τεχνολογικά απαιτητικές διαδικασίες (όπως η ψηφιακή αφήγηση), συχνά υπερβαίνει τα χρονικά όρια μιας τυπικής διδακτικής ώρας. Απαιτείται, συνεπώς, προσεκτικός σχεδιασμός με εναλλακτικά σενάρια και ευελιξία κατά την υλοποίηση. Παράλληλα, προέκυψε η ανάγκη για ουσιαστική και συνεχόμενη επιμόρφωση των εκπαιδευτικών, όχι μόνο στη χρήση των ψηφιακών εργαλείων αλλά και στην παιδαγωγική αξιοποίησή τους, ώστε να αποφεύγεται η τεχνολογική χρήση χωρίς διδακτική σκοπιμότητα.

Ένα ακόμη σημείο προβληματισμού αφορά την ικανότητα των μαθητών να προσεγγίζουν με κριτικό τρόπο τις ψηφιακές πηγές. Η αυξημένη προσβασιμότητα στο διαδίκτυο δεν συνεπάγεται και ικανότητα αξιολόγησης της εγκυρότητας ή της ιστορικής αξιοπιστίας των πληροφοριών. Η καλλιέργεια αυτής της δεξιότητας απαιτεί καθοδηγούμενη εξάσκηση και ενίσχυση του ψηφιακού και ιστορικού γραμματισμού. Επιπλέον, σε αρκετές σχολικές μονάδες καταγράφονται τεχνικά ζητήματα, όπως προβλήματα σύνδεσης στο διαδίκτυο, ελλείψεις σε εξοπλισμό ή περιορισμένος αριθμός διαθέσιμων υπολογιστών και ταμπλετών, τα οποία δυσχεραίνουν τη συστηματική αξιοποίηση των προτεινόμενων τεχνολογιών. Οι παράγοντες αυτοί υπογραμμίζουν την ανάγκη για θεσμική στήριξη και μακροπρόθεσμη στρατηγική ένταξης των ψηφιακών εργαλείων στη σχολική πράξη, προκειμένου να μεταβούμε από αποσπασματικές εφαρμογές σε οργανωμένες παιδαγωγικές πρακτικές.

ΣΥΜΠΕΡΑΣΜΑΤΑ ΚΑΙ ΠΑΙΔΑΓΩΓΙΚΕΣ ΠΡΟΕΚΤΑΣΕΙΣ

Η παρούσα μελέτη επιβεβαιώνει ότι η ενσωμάτωση των ψηφιακών τεχνολογιών στη διδασκαλία της Ιστορίας δεν λειτουργεί ως υποκατάστατο της διδασκαλίας, αλλά ως ενισχυτικός και μετασχηματιστικός παράγοντας. Τα ψηφιακά μέσα, όταν αξιοποιούνται με παιδαγωγικά κριτήρια, εμπλουτίζουν τη μαθησιακή διαδικασία, υποστηρίζοντας την πολυτροπική προσέγγιση της γνώσης και προσφέροντας δυνατότητες βιωματικής, διερευνητικής και συνεργατικής μάθησης. Μέσα από δραστηριότητες όπως η ψηφιακή αφήγηση, η χαρτογράφηση και η ανάλυση πηγών, οι μαθητές αναπτύσσουν ιστορική σκέψη, ψηφιακές δεξιότητες και κριτικό πνεύμα.

Η μετάβαση προς ένα σύγχρονο, ανθρωποκεντρικό μάθημα Ιστορίας, που καλλιεργεί τη δημιουργικότητα και ενισχύει τη σύνδεση του μαθητή με το παρελθόν, προϋποθέτει την αξιοποίηση της τεχνολογίας ως εργαλείου κατανόησης και ερμηνείας και όχι ως αυτοσκοπό. Η παιδαγωγική αναβάθμιση της διδασκαλίας της Ιστορίας μέσα από τα ψηφιακά μέσα συνιστά μια αναγκαία εξέλιξη για τη σύγχρονη σχολική πραγματικότητα, θέτοντας τις βάσεις για την ανάπτυξη ενεργών, σκεπτόμενων και ιστορικά εγγράμματων πολιτών.

ΠΕΡΙΛΗΨΗ

Στόχος της συγκεκριμένης εισήγησης αποτελεί η ανίχνευση και η αποτύπωση των διακειμενικών όψεων της μπωντλαιρικής ποίησης σε επιγενόμενους Έλληνες ποιητές μέσω της ψηφιακής αφήγησης. Αρχικά, θα αποδοθεί η σημασία της αφήγησης, η συμβολή της στην εκπαιδευτική διαδικασία, καθώς και τα βασικά στοιχεία που διέπουν την αφηγηματολογία. Θα εξεταστούν οι βασικές αρχές της ψηφιακής αφήγησης, τα στάδια δημιουργίας της σε συσχέτιση με τα μαθησιακά οφέλη σε επίπεδο πρόσληψης. Θα παρατεθούν μεθοδολογικά εργαλεία αξιοποίησης της ψηφιακής αφήγησης με βασικότερο στόχο οι μαθητές να αποκτήσουν μια διασταλτική οπτική και αντίληψη της λογοτεχνίας σε συγκριτολογικό και σε διακειμενικό επίπεδο. Θα δοθεί έμφαση στην επιλογή των κατάλληλων ψηφιακών εργαλείων που να αναδεικνύουν την ιδέα του ταξιδιού στην ουτοπία ως ένα βασικό μέσο εικονοπλαστικής αφήγησης με έντονες κινηματογραφικές συνηχήσεις. Η έννοια του ταξιδιού είναι καταλυτική ως μοτίβο ενεργοποίησης της δημιουργικής φαντασίας. Σε αυτή τη βάση, η μπωντλαιρική ποίηση εξαπέλυσε ανιχνευτές εδάφους στην ενεργοποίηση των αόρατων μηχανισμών που συνέχουν την κοσμική τάξη. Ο σταθερός απόηχος του Μπωντλαίρ είναι εμφανής στην μοντέρνα και στην μεταμοντέρνα νεοελληνική ποίηση σε ζητήματα που σχετίζονται με την απόδραση στο επέκεινα ως ένα μη-τόπο, συνιστώντας ένα δυνητικό πεδίο εναλλακτικής βίωσης του είναι. Ο Μπωνλαίρ σηματοδότησε ποιητικά την αέναη μετάβαση μέσα στο πλήθος. Επικαθόρισε το πεπρωμένο του σύγχρονου ανθρώπου, καταδικασμένου μέσα στην σθεναρή πάλη αντίρροπων δυνάμεων, στο μεταίχμιο ανάμεσα στο φως και στο σκοτάδι, στην αναζήτηση της εσωτερικής πληρότητας και του κενού, στη διεκδίκηση ενός λειασμένου αύριο που να αντιπαρέρχεται την καταβαράθρωση στα έγκατα της ύπαρξης. Μέσω της ψηφιακής αφήγησης στην λογοτεχνία, οι μαθητές θα είναι σε θέση να αφομοιώσουν με άκρως δημιουργικό τρόπο τη σημασία του ταξιδιού ως μέσου εσωτερικής αναζήτησης και παράλληλα εξοικείωσης σε επίπεδο εξωτερικής πραγματικότητας με αδιερεύνητα μέχρι στιγμής πεδία. Η επενέργεια της ψηφιακής αφήγησης στην ποίηση σηματοδοτεί την ενεργοποίηση στο έπακρο της μαγείας των ποιητικών εικόνων δημιουργώντας μια ιδιοσύστατη ποιητική της τεχνολογίας. Οι προσδοκώμενοι στόχοι της συγκεκριμένης εισήγησης σχετίζονται με την καλλιέργεια μιας ευρυγώνιας οπτικής των μαθητών και παράλληλα με την εξοικείωσή τους με την ποίηση ως διαχρονικό πεδίο έμπνευσης.

Λέξεις – κλειδιά: ψηφιακή αφήγηση, αφηγηματολογία, εικονοπλαστική αφήγηση.

ΕΙΣΑΓΩΓΗ

Στόχος της συγκεκριμένης εισήγησης είναι η αποτύπωση των όψεων του Καβαφικού ταξιδιού στην Ιθάκη σε συγκερασμό με την μπωντλαιρική πλεύση στα Κύθηρα όσο και το αντίστοιχο «ταξίδι στα Κύθηρα» του Κώστα Ουράνη, με εργαλείο προσέγγισης όσο και απόδοσης την ψηφιακή αφήγηση. Εφάρμοσα το συγκεκριμένο διδακτικό σενάριο κατά το σχολικό έτος 2022-2023 όταν δίδασκα το μάθημα της Νέας Ελληνικής Λογοτεχνίας στην Α΄ τάξη στο 2ο ΓΕΛ Πρέβεζας. Η καβαφική Ιθάκη είναι ένα οικείο σύμβολο στους μαθητές το οποίο ήθελα να διδαχθεί με ένα σύγχρονο και καινοτόμο τρόπο, ιδωμένο μέσα από την ερμηνευτική πολυσημία και την πολυτροπικότητα που συνεπάγεται η ψηφιακή αφήγηση (Γκουτσιουκώστα, 2020:50-75). Το συγκεκριμένο ποίημα έχει ένα διαχρονικό ενδιαφέρον για τον άνθρωπο της κάθε ηλικίας και εποχής καθώς κινείται στα αμφίδρομα πλαίσια του μέσου και του σκοπού. Ενίοτε να μην φτάσεις ποτέ στον τελικό προορισμό αλλά η διαδρομή να είναι αυτή που έχει να σου προσφέρει πολλά, σηματοδοτεί την άσκηση του νου, την απόκτηση βαθιάς εμπειρίας και σοφίας.

Η Ιλίνσκαγια για το συγκεκριμένο ποίημα αναφέρει χαρακτηριστικά ότι συνιστά μια μετάβαση: «από την προσωπική πείρα του ενός στην πείρα του έθνους, στη διανοητική εμπειρία που η εποχή υπαγορεύει στην ανθρωπότητα ολόκληρη. Γεγονός της προσωπικής εμπειρίας του ποιητή γίνεται η ίδια η ιστορία» (Ιλίνσκαγια, 1983: 197). Ο ίδιος ο ποιητής το θεωρεί ως ένα από τα πιο υποβλητικά ποιήματά του: «Υπάρχει μια τάξις ποιημάτων που ο ρόλος των είναι να "υποβάλλουν". Το ποίημά μου υπάγεται σ' αυτή την κατηγορία. Σ' έναν καλλιεργημένο αναγνώστη με συμπαθητική διάθεση, που θα στοχασθή λίγο πάνω στο ποίημα, οι στίχοι μου, είμαι βέβαιος, θα υποβάλλουν μιαν εικόνα της βαθειάς κι ατέλειωτης απελπισίας που περιέχουν αλλά δεν μπορούν ν' αποκαλύψουν [πλήρως] (Λεχωνίτης, 1942: 26)». Η «Ιθάκη» γίνεται μετωνυμία της ανθρώπινης ύπαρξης (Savvidis, 1987: 190). Ο οξυδερκής κριτικός Τέλλος Άγρας διαβλέπει το βαθύ ψυχογραφικό υπόστρωμα του ποιήματος (Agras, 1980: 97 και 99). Το πιο σπουδαίο που συνεπάγεται μια τέτοια καβαφικη διαδρομή είναι η απόκτηση με το χρόνο μιας βαθιάς πνευματικότητας που αντιπαρέρχεται την όποια υπέρμετρη επιδίωξη υλικότητας. Σε αυτή την προοπτική συντελεί και η απροσδιοριστία του χρόνου ως δυνάμει βιωμένη εμπειρία για τον ταξιδευτή της κάθε εποχής. Οι διδακτικοί τόνοι του ποιήματος επιβεβαιώνονται από την απεύθυνση στον αναγνώστη στο β΄ ενικό πρόσωπο σε συνδυασμό με το βαθύ φιλοσοφικό του υπόστρωμα.

ΕΦΑΡΜΟΓΗ ΤΟΥ ΔΙΔΑΚΤΙΚΟΥ ΣΕΝΑΡΙΟΥ

Το συγκεκριμένο ποίημα είναι κατάλληλο ώστε να εξοικειωθούν οι μαθητές με την έννοια του ταξιδιού ως βάση για κάθε μορφή αναζήτησης, εσωτερική ή στην εξωτερική πραγματικότητα. Στόχος μου, επίσης, μέσα από την συγκεκριμένη διδακτική πρόταση είναι η εξοικείωση των μαθητών με τα ψηφιακά περιβάλλοντα και εργαλεία. Η ψηφιακή αφήγηση προσφέρεται ως μια δημιουργική διαδικασία μετασχηματισμού επενεργώντας καταλυτικά στην ενεργή εμπλοκή των μαθητών, στην καλλιέργεια της δημιουργικής τους φαντασίας και στην απόκτηση μιας όλο και περισσότερο ανοιχτής πρόσληψης των κειμένων. Η διδασκαλία του συγκεκριμένου ποιήματος σε συνδυασμό με τα άλλα δύο υπό εξέταση ποιήματα με συγγενική θεματική, του Μπωντλαίρ και του Ουράνη διήρκεσε τέσσερις ώρες.

Στην πρώτη διδακτική ώρα οι μαθητές μετέβησαν στην αίθουσα των πολυμέσων του σχολείου. Αρχικά, έβαλα τους μαθητές να ακούσουν από το youtube τη θεατρική απαγγελία της καβαφικής «Ιθάκης» από την Έλλη Λαμπέτη και τους ζήτησα να μοιραστούν κάποιες σκέψεις για την πολυπόθητη ομηρική Ιθάκη, όπως την θυμούνται από το Γυμνάσιο ως ιδεατό τόπο προορισμού του Οδυσσέα. Ο χώρος έχει σχέση με τη μνήμη και την επάνοδο. Αυτή η βασική ιδέα του καβαφικού ποιήματος το φέρνει κοντά στον ποιητικό μύθο των Κυθήρων ως χώρο της αιώνιας επιστροφής, όπως αξιοποιείται στην περίπτωση του Μπωντλαίρ από την γαλλική ποίηση και στο χαρακτηριστικό παράδειγμα του Κώστα Ουράνη από την ελληνική ποίηση.

Σε αυτή τη βάση, και στην δεύτερη διδακτική ώρα έγινε μια απόπειρα εμπέδωσης από τους μαθητές της σημασίας της Ιθάκης στη λογοτεχνία ως ιδανικός προορισμός και καταφύγιο. Από την άλλη, τα Κύθηρα συμβολοποιοιούν έναν αιώνιο όσο και αινιγματικό προορισμό. Οι μαθητές χωρίστηκαν σε ομάδες προκειμένου να συγκεντρώσουν πληροφορίες σχετικά με την πορεία των Κυθήρων σε ιστορικό επίπεδο και τη σχέση του νησιού με την θεά Αφροδίτη σε επίπεδο μύθου αλλά και ως λογοτεχνικού συμβόλου. Τα Κύθηρα παράλληλα είναι το νησί που προστατεύεται από την συγκεκριμένη θεά του έρωτα, άρα για πολλούς περιηγητές του πνεύματος και της ύπαρξης θα μπορούσε να είναι το εξιδανικευμένο μέρος, όπως και η καβαφική Ιθάκη.

Τα Κύθηρα, ωστόσο, στον Μπωντλαίρ έχουν μια άλλη διάσταση, μετατρέπονται σε ένα άγονο μέρος, αποτροπιαστικό που ενεργοποιεί τις έντονες υπαρξιακές ανησυχίες του ποιητή για το φόβο ενός επικείμενου τέλους, τη μοναξιά και την εσωτερική φθορά ενός καταραμένου ποιητή που δεν μπορεί να βρει ανταπόκριση στην εποχή του. Ο ,Μπωντλαίρ «εισήγαγε μέσα στην τρικυμισμένη μάζα μιας τέτοιας παλίρροιας την κατάθλιψη μιας καταραμένης ποίησης, που δεν έφερε πια καμιά ευθύνη και που υφίστατο ανυπεράσπιστη μια γοητεία ανίκανη να ικανοποιήσει, μια γοητεία που κατέστρεφε. Έτσι η ποίηση απομακρυνόταν από απαιτήσεις δοσμένες σ' αυτήν από τα έξω, από απαιτήσεις της θέλησης,

για να ανταποκριθεί σε μια μόνο εσωτερική απαίτηση, η οποία τη συνέδεε με ό,τι γοητεύει, η οποία τη μετέβαλε στο αντίθετο της θέλησης» (Bataille, 1979:50). Καίρια η παρακάτω επισήμανση για το βαθύτερο νόημα του συγκεκριμένου μπωντλαιρικού ποιήματος: «Αν η ζωή του Μπωντλαίρ αξίζει να μελετηθεί σε ένα γραπτό κείμενο που στοχεύει, πριν απ' όλα, να προβάλει το νόημα και την επικαιρότητα των βιβλίων του, αυτό συμβαίνει μόνο στο μέτρο που η θεώρηση αυτή επιτρέπει να ανακαλύψουμε πως το έργο υπερβαίνει και, κατά κάποιον τρόπο, σβήνει την ύπαρξη, από την οποία επήγασε. Κάθε άνθρωπος αγαπά απελπισμένα τη ζωή του, ωσάν το μοναδικό και αναντικατάστατο αγαθό του. Εννοεί, λοιπόν, πάντα να τη δικαιώνει. Κι όμως δεν αξίζει τίποτε, θα καταργηθεί από τον θάνατο. Και μόνο ένα θα παραμείνει: η λάμψη, με την οποία η ζωή θα έχει μπορέσει να κυκλωθεί, μια λάμψη που τελικά της γίνεται ξένη» (Rigetti, 2005:3,5).

Το «ταξίδι στα Κύθηρα» του Ουράνη εκφράζει μια διαφορετική διαδρομή, όχι τόσο ζοφερή όσο του Γάλλου ομότεχνού του. Στον Ουράνη τα Κύθηρα συμβολίζουν την ουτοπία, τον ιδανικό τόπο στον οποίο κανείς ποτέ δεν θα μπορέσει να φτάσει (Stergiopoulos, 2000: 40-45, 58, 286-289). Όλα αυτοί οι κατευθυντήριοι θεματικοί άξονες τέθηκαν από τον καθηγητή, για να επακολουθήσει στις δύο επόμενες διδακτικές ώρες στο εργαστήρι της πληροφορικής του σχολείου μαζί με τις επιμέρους ομάδες μαθητών ένας καταιγισμός ιδεών και ψηφιακής απόδοσής τους εκφράζοντας έτσι την επιθυμία να αποδώσουν την προσωπική τους Ιθάκη, τα δικά τους Κύθηρα μέσα από τις συνθέσεις ομαδοσυνεργατικών ψηφιακών αφηγήσεων.

Κάθε μια είχε και ένα διαφορετικό οδοδείκτη και ένα συμβολικά διαφορετικό προορισμό. Οι μαθητές, με το τέλος της τρίτης διδακτικής ώρας, επέλεγαν ανάλογα με την περίπτωση τις εικόνες. Το μπωντλαιρικό ταξίδι στα Κύθηρα ήταν σκοτεινό, μέσα στη ζοφερή νύχτα, δίχως φεγγάρι, με καταιγίδες και θύελλες να ταλανίζουν τους θαλασσοπόρους, υποδηλώνοντας την εναγώνια επιθυμία του ατόμου να ξεπεράσει τα προσωπικά τούνελ και να βρει την αυτοέκφραση ως πυξίδα για την αυτοπραγμάτωση. Το ποιητικό ταξίδι του Ουράνη στα Κύθηρα οι μαθητές το φαντάστηκαν μέσα στη βροχή, την ώρα του δειλινού, με περίσσια τη διάθεση περισυλλογής, αναπόλησης και αναστοχασμού για τα περασμένα ή για τα ανείπωτα. Συμβολίζει την απατηλότητα μιας ζωής που ποτέ δεν θα βιωθεί με τον τρόπο που προσδοκάται ή αναμένεται, κάτι που φαντάζει μελαγχολικό και άκρως πεσιμιστικό αλλά κατά βάση δεν είναι, γιατί το τέλος σηματοδοτεί ένα νέο ξεκίνημα προς άλλη πλεύση.

Για την Καβαφική Ιθάκη οι μαθητές επέλεξαν εικόνες της ανατολής, των πρώτων ωρών της μέρας, με τον ελπιδοφόρο ήλιο να ανατέλλει εκπέμποντας ευοίωνα σήματα σε πολλαπλές συχνότητες. Οι δύο ομάδες μαθητών σχετικά με την καβαφική Ιθάκη έθεσαν δύο εντελώς διαφορετικές πορείες, ένα καράβι να ξεκινά από την Ανατολή στη Δύση και τανάπαλιν. Και τα δύο καράβια δεν θα συναντηθούν ποτέ, θα φτάσουν, όμως μέσα από την φαντασία των μαθητών κάποτε στους προορισμούς τους που είναι η Σίκινος, ένα από τα πιο μικρά νησιά των Κυκλάδων και το Bishop Rock, το πιο μικρό νησί του κόσμου, μόλις 46 τετραγωνικών μέτρων. Όταν τους ρώτησα γιατί επέλεξαν αυτά τα μέρη ως τη δική τους Ιθάκη μού απάντησαν ότι και αυτοί οι τόσο μικροί τόποι δικαιούνται τον δικό τους επισκέπτη, για να αποτελέσουν το προσωπικό καταφύγιο κάποιου. Η σχέση είναι πάντα αμφίδρομη τόσο του επισκέπτη ως ταξιδιώτη του παντός όσο και του τέρματος του ταξιδιού ως μια νέα αφετηρία. Ακόμη και αν ένα ταξίδι δεν έχει τέλος, έχει, ωστόσο, πάντα κάποιο σκοπό και αυτό το εμπέδωσαν οι μαθητές. Αξιοποιήθηκαν ως ψηφιακά εργαλεία το photostory 3 και Windows movie maker, αξιοσημείωτο είναι ότι οι μαθητές επέλεγαν κατά περίπτωση ανάλογα με τον ρυθμό, τον επιτονισμό, το συναίσθημα, την εκάστοτε οπτική στην παρουσίαση των ιστοριών τους, κατά την τέταρτη διδακτική ώρα, και από ένα διαφορετικό είδος μουσικής που κυμαινόταν από κλασική μουσική έως εναλλακτική ροκ μουσική.

ΣΥΜΠΕΡΑΣΜΑΤΑ

Συνεπώς, προέκυψαν τέσσερις ψηφιακές ιστορίες στις οποίες συμπεριλαμβάνονται οι στίχοι των ποιημάτων του Μπωντλαίρ, του Ουράνη και του Καβάφη σε συνδυασμό με διαφορετικές κατά περίπτωση οπτικές αναπαραστάσεις μέσα από τις κατάλληλες εικόνες και μουσική. Παράλληλα, με τη χρήση της εφαρμογής show me είχα τη δυνατότητα να προβάλλω οπτικά, την τέταρτη διδακτική ώρα έχοντας προηγηθεί η βιωματική προσέγγιση, το βασικό μας ποίημα προς εξέταση, την «Ιθάκη» του Καβάφη, δίνοντας έμφαση στα σχήματα λόγου που ήταν απαραίτητα για την εμπέδωση όλων των ερμηνευτικών επιπέδων του ποιήματος, τις επιμέρους θεματικές ενότητες και τα βαθύτερα νοήματα που συνέχουν την καβαφική φιλοσοφική θεωρία.

Το δεύτερο μισό της τέταρτης ώρας, αφού προβλήθηκαν οι ψηφιακές ιστορίες με βιωματικές εκδοχές των περιγραφόμενων ποιημάτων, συζητήσαμε για μια ακόμη ανίχνευση του θέματος από μια άλλη οπτική την οποία και την ολοκληρώσαμε στο πρώτο εικοσάλεπτο της πέμπτης ώρας όπου και τυπικά τελείωσε το προσωπικό μας ταξίδι στην καβαφική «Ιθάκη». Οι μαθητές εξέφρασαν την επιθυμία να ακούσουν σε μια ενιαία ιστορία ανάμεικτους κάθε φορά στίχους από το κάθε ποίημα έτσι ώστε και οι τρεις ποιητές να συνυπάρχουν, Μπωντλαίρ, Ουράνης, Καβάφης, αλλά κάθε φορά να καταλήγουμε στην «Ιθάκη» του Καβάφη, με διαφορετικό, όμως, συναίσθημα. Ήθελαν οι απαγγελίες να γίνουν από ποιητές, πράγμα που έγινε. Αξιοσημείωτο είναι ότι προέκυπταν από τις εκάστοτε απαγγελίες νέα συναισθήματα, διαφορετικοί καταιγισμοί ιδεών, αλλά πάντα συνυφασμένοι με την νοσταλγία για τα παρελθοντικά.

Τα βίντεο προβλήθηκαν εντός του εικοσαλέπτου της πέμπτης διδακτικής ώρας. Ήταν σαν οι ποιητές που απήγγειλαν ποιητές σε αυτά τα τέσσερα νέα βίντεο μέσω του movie maker να είχαν βρει ήδη την προσωπική τους «Ιθάκη», γεγονός που διαπίστωσαν και οι μαθητές με σημαντικές παρατηρήσεις. Η συζήτηση έκλεισε με την επιθυμία τους να κάνουν ένα νέο βίντεο μελλοντικά, όταν θα νιώσουν έτοιμοι, με ένα δικό τους ποίημα που να αφηγείται την δική τους «Ιθάκη», μια «Ιθάκη», όπως ανέφεραν αρκετοί, όχι πλέον απόκοσμη, μακρινή, ομιχλώδη, αλλά κοντινή και οικεία, όχι ένα μη τόπο, αλλά τον δικό τους ξεχωριστό χώρο, εκείνον της διπλανής πόρτας. Ως εκ τούτου, εκείνο που κατά βάση αποκομίστηκε από την ψηφιακή προσέγγιση των συγκεκριμένων ποιημάτων είναι το να ψάχνουμε να βρούμε την ευτυχία όχι σε μακρινά μέρη, αλλά δίπλα μας, σε όσα δεν μπορέσαμε ακόμη να αποκρυπτογραφήσουμε, να αποτυπώσουμε, να εσωτερικεύσουμε.

Είναι σημαντικό να θεάται κανείς τον καθημερινό του μικρόκοσμο ως μεγάκοσμο, τότε θα καταλάβει ότι ορισμένες φορές το ταξίδι μπορεί να μην διαρκέσει πολύ, μπορεί να μην συναντήσει Κύκλωπες και Λαιστρυγόνες αλλά πρόσωπα οικεία, ασκώντας καταλυτική επιρροή μέσα από τη μαγεία μιας εναλλακτικής δημιουργικής αλληλεπίδρασης. Οι μαθητές ένιωσαν τα σύμβολα της «Ιθάκης», όσο και των «Κυθήρων» εντός τους σαν μια δυνατή όσμωση, σαν μια συμπαντική έκρηξη που να ελευθερώνει στοιχεία για να τα ανασυνθέτει κανείς διαρκώς μέσα από μια νέα κάθε φορά διάσταση και προοπτική. Κάθε ταξίδι αφήνει στον καθένα μας ένα ισχυρό αποτύπωμα συναισθημάτων και ιδεών, άρα η μετωνυμία της «Ιθάκης» και των «Κυθήρων» στη ζωή μας συνιστούν ζήτημα προσωπικής δημιουργίας.

ΠΕΡΙΛΗΨΗ

Οι Αρχαίες Τραγωδίες στην προσχολική εκπαίδευση δύνανται να αποτελέσουν σημαντικό εργαλείο διδασκαλίας. Οι εκπαιδευτικοί οφείλουν να τις εντάξουν στην εκπαιδευτική καθημερινότητα και να τις ενσωματώσουν στο πρόγραμμα σπουδών. Τα οφέλη του Δράματος, ως μεθόδου διδασκαλίας, είναι πολλαπλά. Πρωτίστως, το Δράμα μπορεί να προσφέρει τη δυνατότητα στους εκπαιδευτικούς να προσεγγίσουν μαθητές, οι οποίοι δυσκολεύονται να παρακολουθήσουν την εκπαιδευτική διαδικασία, η οποία στηρίζεται σε παραδοσιακές μεθόδους, αυξάνοντας το ενδιαφέρον τους για όσα διαδραματίζονται εντός της σχολικής τάξης. Επιπλέον, έχει αναδειχθεί ότι συνδέει τους μαθητές με τον εαυτόν τους και τους άλλους, μεταμορφώνει το παραδοσιακό περιβάλλον μάθησης και προκαλεί τους μαθητές να προσεγγίσουν και εκείνοι τις γνώσεις με έναν διαφορετικό τρόπο, πολυαισθητηριακό, ο οποίος εντάσσει τους μαθητές ως ολότητα εντός της εκπαιδευτικής διαδικασίας και αξιοποιεί γνώσεις, εμπειρίες, βιώματα και συναισθήματα σε όλη τη διαδικασία. Το συναίσθημα, το οποίο βρίσκεται στην καρδιά του δράματος, συχνά αγνοείται στην εκπαίδευση. Ωστόσο μια εκπαιδευτική διαδικασία, η οποία στηρίζεται μόνο στη λογική και απομονώνει το συναίσθημα, δεν μπορεί να προσφέρει στους μαθητές μια ολιστική γνωστική πράξη και κατ' επέκταση ολιστική μόρφωση.

Η παρούσα εργασία εστιάζει στη διερεύνηση του ρόλου που μπορεί να διαδραματίσει η προσέγγιση της Σοφόκλειας Αντιγόνης στην Προσχολική Εκπαίδευση, αξιοποιώντας ψηφιακά εργαλεία για την ενίσχυση της μαθησιακής εμπειρίας. Στόχος είναι η ανάδειξη των αξιών του έργου – Ελεύθερη Βούληση, Θρησκεία και η σχέση της με την Πόλη, Άγραφοι Θεϊκοί Νόμοι, Δικαιοσύνη, Καθήκον, Αγάπη – και η αναζήτηση διδακτικών πρακτικών για τη διδασκαλία τους σε παιδιά προσχολικής ηλικίας. Η μεθοδολογία της εργασίας βασίζεται στη χρήση ψηφιακών εργαλείων, όπως διαδραστικές παρουσιάσεις με εικόνες, βίντεο και ήχο, ψηφιακά παιχνίδια που ενισχύουν την κατανόηση των αξιών του έργου, καθώς και εφαρμογές όπως το Puppet Pals και το Toontastic, οι οποίες επιτρέπουν στα παιδιά να δημιουργήσουν και να αφηγηθούν δικές τους εκδοχές της ιστορίας. Επιπλέον, η ψηφιακή σχεδίαση αξιοποιείται ως εργαλείο έκφρασης και αναστοχασμού, δίνοντας στα παιδιά τη δυνατότητα να αποτυπώσουν εικαστικά τις ιδέες και τα συναισθήματά τους. Τα ευρήματα της εργασίας δείχνουν ότι η ενσωμάτωση ψηφιακών εργαλείων στη διδασκαλία της Αντιγόνης στην προσχολική εκπαίδευση ενισχύει την ενεργό συμμετοχή των παιδιών, προάγει τη δημιουργική σκέψη και διευκολύνει την κατανόηση αφηρημένων εννοιών. Τα αποτελέσματα υπογραμμίζουν τη σημασία της διαδραστικής μάθησης και της αξιοποίησης της τεχνολογίας στη διαμόρφωση ενός ελκυστικού και παιδαγωγικά αποτελεσματικού περιβάλλοντος διδασκαλίας.

Λέξεις κλειδιά: Δράμα, Σοφοκλής, Αντιγόνη, Αξίες, Προσχολική Εκπαίδευση, Ψηφιακά εργαλεία, Παιδαγωγικές Προσεγγίσεις.

Η ΔΙΔΑΚΤΙΚΗ ΑΞΙΑ ΤΟΥ ΜΥΘΟΥ

Οι μύθοι αποτελούν σημαντικό μέρος της πολιτιστικής κληρονομιάς και παρέχουν σημαντική γνώση σχετικά με τη σχέση των Ανθρώπων με τη Φύση και τον τρόπο αντίληψης του Κόσμου. Σύμφωνα με τον Siikala (2002, σ. 18) οι μυθικές παραδόσεις φέρουν στοιχεία από το παρελθόν και είναι σε θέση να μιλήσουν για αυτό, επανατοποθετώντας το παρελθόν στο παρόν. Την εποχή των μύθων η σχέση με τη φύση ήταν πνευματική, με στόχο να βρει και να διατηρήσει μια ισορροπία μεταξύ ανθρώπου και φύσης. Η επιβίωση της ζωής των ανθρώπων, κατά την εποχή των μύθων και στη αρχαιότητα, εξαρτιόταν από τη φύση και η ισορροπία μεταξύ ανθρώπων και φύσης ήταν πολύ σημαντική για την εξέλιξη της ανθρωπότητας. Ειδικότερα στην αρχαιότητα υπήρχε σταθερή αλληλεπίδραση τόσο με τις ορατές, όσο και με τις αόρατες δυνάμεις της φύσης, ενώ μέσω της φύσης έρχονταν σε επαφή με τα πνεύματα και τις θεϊκές δυνάμεις αυτής (Alhonen, 2012). Για παράδειγμα, για τους αρχαίους Φιλανδούς όλα στη φύση είχαν τη δική τους αόρατη Ψυχή, η οποία κατά κάποιον τρόπο ήταν συνδεδεμένη με το φυσικό φαινόμενο, το οποίο γίνεται αντιληπτό από τις αισθήσεις. Το δάσος και άλλα στοιχεία της φύσης, όπως τα δέντρα, το νερό, οι πέτρες, η φωτιά, τα ζώα και τα φυτά ελέγχονταν από πνεύματα στη φύση, ενώ σε μεγάλο βαθμό η μυθική τους παράδοση διέθετε ξωτικά ή νεράιδες. Όλα τα πράγματα, είτε έμψυχα είτε άψυχα, ανθρώπινα ή μη, είχαν το δικό τους Πνεύμα, ενώ το καθήκον των πνευμάτων ήταν να προστατεύει και να υπερασπίζεται πολλά πράγματα και μερικές φορές, επίσης,να τα ελέγχει. (Hyry et al., 1995; Alhonen 2012.)

Στη σύγχρονη εποχή, οι μύθοι είναι σημαντικοί, καθώς δημιουργούν μια σύνδεση με αμετάβλητα κύρια γεγονότα του παρελθόντος. Οι μύθοι επίσης καθιερώνουν ένα κοινωνικό σύνολο ενωμένο με έννοιες κοινής προέλευσης. Αντιμετωπίζοντας τόσο πολιτισμικά όσο και υπαρξιακά τους μύθους, αποδεικνύεται ότι αποτελούν βάση για τον αυτοπροσδιορισμό και τις εθνικές ταυτότητες. (Siikala 2002.) Μέσω των μύθων τα παιδιά είναι σε θέση να γνωρίσουν το παρελθόν και να πάρουν δάνεια πολύτιμα από αυτό, ενώ σε μικρότερες ηλικίες οι μύθοι, συνδεδεμένοι με τη δράση των παιδιών, τους παρέχουν τη δυνατότητα να προσεγγίσουν με έναν βιωματικό τρόπο το παρελθόν και να λάβουν γνώσεις σχετικά με αυτό, στηριζόμενα στη φαντασία τους (Kumpulainen, 2018). Αυτό δίνει επίσης τη δυνατότητα στα παιδιά να συμμετέχουν σε σχεδιασμό, δημιουργία και αξιολόγηση των δικών τους δραστηριοτήτων και περιβαλλόντων μάθησης (Kumpulainen, 2018.) Επίσης, μια εκπαιδευτική διαδικασία, που στηρίζεται στους μύθους, δημιουργεί πιο ελεύθερα περιβάλλοντα μάθησης, όπου οι ίδιοι οι μαθητές είναι σε θέση να σχεδιάσουν τις εκπαιδευτικές δραστηριότητες, ζωντανεύοντας ιστορίες και συσχετίζοντας τη δική τους πραγματικότητα με το παρελθόν. Επιπλέον, μέσω των μύθων, δημιουργείται ένα *παιγνιώδες* περιβάλλον μάθησης, προσφέροντας στους μαθητές προσχολικής ηλικίας τη δυνατότητα να προσεγγίσουν ολιστικά το παρελθόν. Η *παιγνιώδης* αυτή φύση, την οποία διαθέτουν οι μύθοι, αποτελεί και τον βασικό τρόπο εκπαίδευσης στην προσχολική ηλικία, καθώς το παιχνίδι συνιστά από μόνο του μια διαδικασία μάθησης (Pramling Samuelson & Asplund Carlson, 2008)

ΤΟ ΔΡΑΜΑ ΩΣ ΠΑΙΔΕΥΤΙΚΟ ΕΡΓΑΛΕΙΟ

Το αρχαίο δράμα όμως, που στηρίζεται στον μύθο και θέτει τα παιδιά μετόχους σε ένα φανταστικό περιβάλλον, επιτρέπει σε όλα τα παιδιά να εξετάσουν με τη δική τους οπτική και με τον δικό τους τρόπο σημαντικά για την ανθρωπότητα ζητήματα (Papadopoulos, 2010).

Η Παιδαγωγική Αξία του Αρχαίου Δράματος διαφαίνεται, επίσης, και στην χρήση όλων των γνώσεων και εμπειριών από τα παιδιά, για να προσεγγίσουν τα όσα ο τραγικός Υποκριτής τους παρουσιάζει, παροτρύνοντάς τα να συμμετέχουν στην ανακατασκευή της πραγματικότητας και στην διαφορετική της προσέγγιση. Όπως επισημαίνει η Karamitrou (2004:47) αυτό συμβαίνει διότι «*Το Θέατρο δεν αντανακλά τη στατικότητα μιας καθιερωμένης πραγματικότητας, αλλά αναζωπυρώνει καταλυτικά σε μιαν εγγραφή, που είναι ανεπανάληπτη και την μετάθεση σε μιαν άλλη αρχέτυπη κι επικίνδυνη πραγματικότητα*». Μέσα από την παρακολούθηση έργων του Αρχαίου Θεάτρου ο σύγχρονος θεατής καλείται να επαναπροσεγγίσει τα ζητήματα, τα οποία απασχολούσαν στην αρχαιότητα τους πολίτες, και να τα επανατοποθετήσει στη σύγχρονη εποχή, διερευνώντας κατά πόσο οι αξίες, οι οποίες προβάλλονται, υφίστανται και σήμερα και καθορίζουν και τη δική του πραγματικότητα (Walton, 2009). Η πνευματική του κληρονομιά, μάλιστα, αποτυπώνεται και στα χρόνια τα οποία το Αρχαίο Δράμα αποτελεί ύψιστη μορφή καλλιτεχνικής *αποτύπωσης*, με αποτέλεσμα η κληρονομιά αυτή να κρίνεται αναγκαίο, με *παιγνιώδη* πάντα τρόπο και σύμφωνα με τη φύση τους και τα αναπτυξιακά τους στάδια, να προσεγγίζεται από τα παιδιά. Όπως τονίζει η Karamitrou (2004:58) «η Δραματική Τέχνη είναι Καθολική…. Της Τραγωδίας λοιπόν ο χαρακτήρας είναι Ανθρωποκεντρικός και Πανευρωπαϊκός…», διασαφηνίζοντας ότι είναι σε θέση να προσεγγιστεί από όλους και όλοι να αποκομίσουν τα οφέλη της.

Ο ΜΥΘΟΣ ΤΗΣ ΣΟΦΟΚΛΕΙΑΣ *ΑΝΤΙΓΟΝΗΣ*

Ο Πολυνείκης και ο Ετεοκλής, προσπαθώντας να μοιράσουν την *κληρονομιά* του πατέρα τους, συμφώνησαν να βασιλεύουν ανά έτος στη Θήβα. Ο Ετεοκλής ήταν ο πρώτος που έγινε βασιλιάς, αλλά, όταν ήλθε η ώρα να παραδώσει τη βασιλεία στον Πολυνείκη, αρνήθηκε. Τότε ο Πολυνείκης έφυγε από τη Θήβα και κατέφυγε στο Άργος. Στο Άργος

παντρεύτηκε την κόρη του βασιλιά Άδραστου και μαζί με πέντε ηγεμόνες του Άργους εκστράτευσε εναντίον της Θήβας, με στόχο να εκδικηθεί τον αδελφό του για την αδικία που βίωσε. Μαζί με τον Πολυνείκη και τους ηγεμόνες πήγε και ο πεθερός του Πολυνείκη. Έτσι οι επτά Αργείοι στρατηγοί αντιμετώπισαν τους επτά ήρωες των Θηβών,οι οποίοι υπερασπίζονταν την Πόλη. Η τελική μονομαχία ήταν ανάμεσα στον Ετεοκλή και στον Πολυνείκη, η οποία και έληξε με τον Θάνατο τον δύο αδελφών. Η πόλη σώθηκε και στη συνέχεια έπρεπε να ληφθούν αποφάσεις σχετικά με τα Σώματα των Νεκρών.

Έπειτα από τον Θάνατο του Ετεοκλέους, άρχοντας της πόλης γίνεται ο Κρέων, ο οποίος ήταν αδελφός της Ιοκάστης και θείος των παιδιών. Η Αντιγόνη ήταν αρραβωνιασμένη με τον γιο του, Αίμωνα, και επρόκειτο σύντομα να τον παντρευτεί. Ο Κρέοντας, ανακοινώνοντας ότι ο Πολυνείκης ευθύνεται για την τραγωδία, εξέδωσε διαταγή να ταφεί το Σώμα του Ετεοκλέους με τις αντίστοιχες τιμές, ενώ για το Σώμα του Πολυνείκη διάταξε να παραμείνει άταφο, για να αποδείξει σε όλους την *προδοσία* του. Η διαταγή αυτή αποτελεί και το βασικό σημείο έναρξης του έργου, καθώς η Αντιγόνη, παρακινημένη από την Αγάπη της για τον αδελφό της, αποφασίζει να τον θάψει. Η ίδια ενημερώνει για την απόφασή της αυτή, μόνον, την αδελφή της Ισμήνη, η οποία και προσπαθεί να τη μεταπείσει, γιατί η εντολή του Κρέοντος ήταν ρητή και ανέφερε ότι όποιος τολμήσει να παραβεί τη διαταγή και να θάψει τον Πολυνείκη θα θανατωθεί. Η Αντιγόνη ανένδοτη αποφασίζει να θάψει το Σώμα του Πολυνείκη και να του αποδώσει τις κατάλληλες τιμές, αδιαφορώντας για τις συνέπειες που θα της επιβάλλονταν.

Κατά τη διάρκεια της πράξης της ταφής, οι στρατιώτες του Κρέοντα συλλαμβάνουν την Αντιγόνη και την οδηγούν στον Κρέοντα, ο οποίος, μένοντας πιστός στις αρχές τους και στην αρχική του διαταγή, δίνει την εντολή να θανατωθεί η Αντιγόνη. Το έργο στηρίζεται και περιγράφει την αντιπαράθεση ανάμεσα στον Κρέοντα και στην Αντιγόνη, η οποία δε μετανοιώνει για την πράξη της και την υπερασπίζεται σθεναρά, με αποτέλεσμα ο Κρέοντας να την κλείσει ζωντανή σε έναν υπόγειο θάλαμο με σκοπό να πεθάνει. Τελικά η Αντιγόνη πεθαίνει και ο Αίμων, μόλις μαθαίνει τον χαμό της, αυτοκτονεί. Μετά την αυτοκτονία του Αίμονα ακολουθεί ένα ακόμη τραγικό γεγονός καθώς και η Ευρυδίκη, η μητέρα του και γυναίκα του Κρέοντα, αυτοκτονεί από την αγάπη της για το παιδί της. Το τέλος του έργου δεν αναδεικνύει κάποιον νικητή ανάμεσα στη σύγκρουση που είχε αρχίσει στον Κρέοντα και στην Αντιγόνη, καθώς και οι δύο εν τέλει βγαίνουν χαμένοι από τις αποφάσεις που έλαβαν, στοιχείο που το αναγνωρίζει και ο ίδιος ο Κρέοντας στο τέλος του έργου.

ΠΑΙΔΑΓΩΓΙΚΕΣ ΑΞΙΕΣ ΣΤΗΝ *ΑΝΤΙΓΟΝΗ* ΤΟΥ ΣΟΦΟΚΛΕΟΥΣ

Οι Αξίες της Σοφόκλειας *Αντιγόνης* προσφέρουν στα παιδιά τη δυνατότητα να χτίσουν ένα σύστημα Αξιών.

Η ΕΝΝΟΙΑ ΤΟΥ «ΝΟΜΟΥ» ΣΤΗΝ *ΑΝΤΙΓΟΝΗ*

Η βασική έννοια στο έργο *Αντιγόνη* του Σοφοκλέους είναι η έννοια του Νόμου, η οποία και προκαλεί τη διαμάχη μεταξύ του Κρέοντος και της *Αντιγόνης*. Ειδικότερα, ο Κρέων υπερασπιζόταν με σθένος τους Νόμους του Κράτους, οι οποίοι και απαγόρευαν σε έναν προδότη της πατρίδας του να ταφεί, ενώ αντίθετα, η *Αντιγόνη* αψήφησε τους Νόμους των Ανθρώπων και παράκουσε τις εντολές του Κρέοντος, υπερασπιζόμενη με αυταπάρνηση τους Νόμους των θεών.

Η ΑΞΙΑ ΤΗΣ ΘΡΗΣΚΕΙΑΣ ΚΑΙ Η ΣΧΕΣΗ ΤΗΣ ΜΕ ΤΗΝ ΠΟΛΗ

Η αντιπαράθεση της *Αντιγόνης* και του Κρέωντος σε όλο το έργο αποτυπώνει την αξία της Θρησκείας στη Ζωή των πολιτών της εποχής. Οι Θεοί αποτελούν τα πρόσωπα εκείνα που έχουν θέσει εξαρχής τον τρόπο με τον οποίο πρέπει να ζουν οι άνθρωποι και η *ανυπακοή* τους απέναντι στα όσα έχουν προστάξει δύναται να επιφέρει την *καταστροφή*. Το *δίκαιο* και το *άδικο* καθορίζεται από τους Θεούς και εν τέλει Εκείνοι μπορούν να αποφασίσουν πότε ένας άνθρωπος πρέπει να καταστραφεί και πότε να σωθεί. Οι δίκαιοι νόμοι, τους οποίους έχουν προσφέρει στους ανθρώπους, αποτελούν τα στοιχεία εκείνα που έχουν καθορίσει τη λειτουργία των πόλεων και για τον λόγο αυτό οι νόμοι και οι αποφάσεις των ανθρώπων δεν μπορούν να υπερβούν τη δική τους *βούληση*.

Η ΑΞΙΑ ΤΗΣ ΔΙΚΑΙΟΣΥΝΗΣ ΚΑΙ ΤΟΥ ΚΑΘΗΚΟΝΤΟΣ

Η Δικαιοσύνη και ο τρόπος με τον οποίο εκφραζόταν την εποχή εκείνη αποτυπώνεται στο έργο ως μια βασική αξία. Για την *Αντιγόνη* η αξία αυτή απορρέει από τους Θεϊκούς νόμους, ενώ για τον Κρέοντα η Δικαιοσύνη απορρέει από τον ίδιο και από τον ρόλο που κατέχει στην Πόλη.

Η ΑΞΙΑ ΤΗΣ ΑΓΑΠΗΣ

Η αδελφική Αγάπη της *Αντιγόνης* την παρακινεί να παραβιάσει τις διαταγές του Κρέοντος και να αψηφήσει τον Θάνατο, θέτοντας ανώτερους τους Θεϊκούς Νόμους και αποφασίζει με κίνδυνο της ζωή της να του προσφέρει τις πρέπουσες *τιμές*. Η ίδια, μάλιστα, υποστηρίζει ότι *δεν γεννήθηκε για να μισεί, αλλά για να αγαπά* (*ουτοι συνέχθειν αλλά συμφιλείν έφυν*).

Η ΑΞΙΑ ΤΗΣ ΙΚΑΝΟΤΗΤΑΣ ΤΟΥ ΑΝΘΡΩΠΟΥ ΝΑ ΑΝΤΙΔΡΑ ΣΤΙΣ ΑΠΟΦΑΣΕΙΣ ΤΗΣ ΕΞΟΥΣΙΑΣ

Η *Αντιγόνη* αποτελεί μια ηρωίδα με ανθρώπινη διάσταση, μια κοινή θνητή, η οποία αποφασίζει να δράσει ενάντια στους νόμους της τότε κοινωνίας και να ακολουθήσει πιστά τις δικές της Απαρασάλευτες Αρχές και Αξίες.

Η ΑΞΙΟΠΟΙΗΣΗ ΤΩΝ ΨΗΦΙΑΚΩΝ ΤΕΧΝΟΛΟΓΙΩΝ ΣΤΗ ΔΙΔΑΣΚΑΛΙΑ ΤΗΣ ΑΝΤΙΓΟΝΗΣ ΣΤΗΝ ΠΡΟΣΧΟΛΙΚΗ ΕΚΠΑΙΔΕΥΣΗ

Η διδασκαλία του Μύθου έγινε με εικονική αναπαράσταση, για να γίνει διαδραστικότερη και κατανοητότερη στα παιδιά. Οι εικονικές αναπαραστάσεις είναι ένα πολύτιμο εργαλείο στη διδακτική πράξη της προσχολικής εκπαίδευσης, ειδικά στη διδασκαλία μύθων όπως της Αντιγόνης. Τα παιδιά μπορούν να κατανοήσουν καλύτερα την πλοκή, τους χαρακτήρες και τα συναισθήματα του μύθου, μέσα από εικόνες. Η οπτική προσέγγιση ενισχύει την αφηγηματική κατανόηση, καθώς τα παιδιά συνδέουν το λόγο με την εικόνα, διευκολύνοντας την απομνημόνευση και τη συσχέτιση. Επιπλέον, οι εικόνες καλλιεργούν τη φαντασία και τη δημιουργικότητα, ενώ ενθαρρύνουν τη συναισθηματική εμπλοκή, βοηθώντας τα παιδιά να ταυτιστούν με τους ήρωες και να κατανοήσουν αξίες, όπως η αυτοθυσία και η αγάπη. Τέλος, η εικονική προσέγγιση καθιστά τη μάθηση πιο ευχάριστη και προσιτή.

Για την αφήγηση της ιστορίας χρησιμοποιήθηκαν οι κούκλες-ήρωες, δίνοντας έμφαση στους βασικούς χαρακτήρες και τα συναισθήματά τους. Οι μαθητές χρησιμοποιώντας τις μαριονέτες, υποδύθηκαν τους ρόλους της *Αντιγόνης*, του Κρέοντα, της Ισμήνης και έτσι πυροδοτήθηκε συζήτηση για τα μηνύματα του μύθου, όπως η σημασία της αυτοθυσίας και της αγάπης.

Έγινε χρήση του ψηφιακού εργαλείου Puppet Pals, προσφέροντας μια σύγχρονη και συναρπαστική διάσταση στη διδασκαλία μύθων. Τα παιδιά ανέλαβαν ενεργό ρόλο στην αφήγηση, δημιουργώντας τις δικές τους θεατρικές παραστάσεις με χαρακτήρες-κούκλες. Οι μαθητές επέλεξαν τους χαρακτήρες, σχεδίασαν σκηνικά και συνέθεσαν διαλόγους, αναπαριστώντας την ιστορία με τρόπο που αντανακλά τη φαντασία και τη δημιουργικότητά τους. Το Puppet Pals μετατρέπει την παραδοσιακή αφήγηση σε διαδραστικό παιχνίδι, προσφέροντας στα παιδιά την ευκαιρία να πειραματιστούν με διαφορετικά σενάρια και εκδοχές της ιστορίας. Οι μαθητές, ως σκηνοθέτες και ηθοποιοί ταυτόχρονα, χειρίζονται ψηφιακές κούκλες που κινούνται στην οθόνη, ζωντανεύοντας τους χαρακτήρες του μύθου. Έτσι, η αφήγηση μεταμορφώνεται σε ένα διασκεδαστικό θεατρικό έργο, που ενισχύει τη φαντασία και τη συναισθηματική εμπλοκή. Ταυτόχρονα η χρήση της εφαρμογής καλλιεργεί σημαντικές δεξιότητες, όπως η συνεργασία, η επικοινωνία και η επίλυση προβλημάτων. Τα παιδιά όχι μόνο μαθαίνουν την ιστορία της *Αντιγόνης*, αλλά αναπτύσσουν κριτική σκέψη, εκφραστικότητα και δημιουργική αυτοέκφραση. Το Puppet Pals καθιστά τη μάθηση ευχάριστη και καινοτόμα, ενσωματώνοντας την τεχνολογία σε ένα περιβάλλον που εμπνέει δημιουργικότητα και ενθουσιασμό.

Χρησιμοποιήθηκαν και άλλα ψηφιακά εργαλεία, όπως το Toontastic. Το Toontastic είναι μια διαδραστική ψηφιακή εφαρμογή, η οποία επιτρέπει στα παιδιά να δημιουργούν και να αφηγούνται τις δικές τους ιστορίες μέσω κινουμένων σχεδίων. Στη διδασκαλία του μύθου της *Αντιγόνης* η εφαρμογή αξιοποιήθηκε δημιουργικά**,** προσφέροντας έναν ελκυστικό τρόπο μάθησης.

Καθώς η ιστορία περιέχει έννοιες όπως η αυτοθυσία, η αγάπη και η οικογένεια, το Toontastic επιτρέπει στους μαθητές να κατανοήσουν αυτές τις ιδέες μέσα από τη δική τους ενεργό συμμετοχή. Οι εκπαιδευτικοί παρουσίασαν την ιστορία μέσα από απλά λόγια και να ζήτησαν από τα παιδιά να δημιουργήσουν σκηνές που να αποτυπώνουν βασικές στιγμές, όπως την απόφαση της *Αντιγόνης* να θυσιαστεί για την ταφή του αδερφού της.

Η χρήση χαρακτήρων και φωνών, τα οποία προσφέρονται στην εφαρμογή, ενίσχυσαν την κατανόηση και την ενσυναίσθηση, ενώ τα παιδιά είχαν την ευκαιρία να συμμετάσχουν στη διαδικασία δημιουργίας, ενισχύοντας τη φαντασία και την αυτοέκφραση. Με τη βοήθεια του Toontastic τα παιδιά συνεργάστηκαν, δημιούργησαν οπτικοποιημένες αφηγήσεις και παρουσίασαν τις δικές τους εκδοχές του μύθου, ενισχύοντας τη γλωσσική ανάπτυξη, τη δημιουργικότητα και την ομαδικότητα. Η εφαρμογή προσέφερε έναν ευχάριστο τρόπο εισαγωγής της μυθολογίας στην τάξη, συνδυάζοντας τη μάθηση με το παιχνίδι.

Επιπλέον, χρησιμοποιήθηκαν για την καλύτερη κατανόηση του κειμένου εικονογραφημένα βιβλία. Η αφήγηση με εικονογραφημένα βιβλία ή παρουσιάσεις αποτελεί έναν ιδανικό τρόπο διδασκαλίας του μύθου στην προσχολική ηλικία, καθώς ενισχύει την κατανόηση και την αλληλεπίδραση των παιδιών με την ιστορία. Ακόμα, όπου ήταν δυνατό έγιναν παρουσιάσεις με υλικό από βιβλία όπως «Αρχαίες Ελληνικές Τραγωδίες σε διασκευή για παιδιά» Η δημιουργία παρουσιάσεων με απλές, ζωντανές και χρωματιστές εικόνες βοήθησε τα παιδιά να οπτικοποιήσουν τα γεγονότα και να συνδεθούν συναισθηματικά με τους χαρακτήρες.

Η αφήγηση συνοδεύτηκε από απλά κείμενα ή διαλόγους, ώστε να είναι πιο κατανοητά στα παιδιά. Ταυτόχρονα συμμετείχαν ενεργά στην αφήγηση προσθέτοντας τα δικά τους σχόλια, διαλόγους, ενισχύοντας τη φαντασία και τη γλωσσική τους ανάπτυξη. Επίσης οι μικροί μαθητές ζωγράφισαν εικόνες της ιστορίας, οι οποίες στη συνέχεια θα ενσωματώθηκαν στην παρουσίαση. Αυτό καλλιέργησε την αυτοέκφραση και ενίσχυσε το αίσθημα της συμμετοχής τους στη διαδικασία. Με αυτόν τον τρόπο η ιστορία της *Αντιγόνης* γίνεται πιο κατανοητή και βιωματική, προσφέροντας στα παιδιά την ευκαιρία να αναπτύξουν τόσο τη δημιουργικότητά τους, όσο και την ενσυναίσθησή τους για τις αξίες που πρεσβεύει ο μύθος.

Η δραματοποίηση μέσω της ανάληψης ρόλων είναι σημαντική για την κατανόηση και την εμπέδωση του μύθου. Έτσι, τα παιδιά ανέλαβαν ρόλους από την τραγωδία της *Αντιγόνης* και ζωντάνεψαν την ιστορία με δραματοποιημένη προσέγγιση, συνδυάζοντας δημιουργικότητα και φαντασία. Φόρεσαν απλά κοστούμια και αξεσουάρ που ενίσχυσαν την ατμόσφαιρα, ενώ το σκηνικό τους πλαισιώθηκε από μουσική και ηχητικά εφέ, τα οποία προστέθηκαν ψηφιακά. Οι ήχοι τόνισαν τις συναισθηματικές στιγμές της ιστορίας, δημιουργώντας μια συναρπαστική εμπειρία, τόσο για τους συμμετέχοντες όσο και για τους θεατές. Η δραστηριότητα ανέδειξε το θεατρικό ταλέντο των παιδιών, προάγοντας την ομαδικότητα, την έκφραση και τη σύνδεση με τον αρχαίο ελληνικό πολιτισμό μέσω μιας διαδραστικής και σύγχρονης προσέγγισης.

Επιπλέον χρησιμοποιήθηκαν και άλλες ψηφιακές εφαρμογές στη διδασκαλία του μύθου. Η εφαρμογή Επαυξημένης Πραγματικότητας (AR) Quiver προσέφερε μια συναρπαστική διάσταση στη διδασκαλία του μύθου της *Αντιγόνης*, ενισχύοντας τη φαντασία και τη συμμετοχή των μαθητών. Μέσω της εφαρμογής οι μαθητές χρωμάτισαν ειδικά σχεδιασμένα πρότυπα, τα οποία απεικόνιζαν σκηνές και χαρακτήρες από την τραγωδία. Σαρώνοντας τα σχέδια με την κάμερα του κινητού ή του tablet, οι εικόνες ζωντάνεψαν τρισδιάστατα μπροστά τους, δημιουργώντας έναν αλληλεπιδραστικό κόσμο. Στη συγκεκριμένη περίπτωση οι μαθητές χρωμάτισαν και «ζωντάνεψαν» την *Αντιγόνη*, τον Κρέοντα, την Ισμήνη, παρακολουθώντας τους να εκτελούν βασικές σκηνές της ιστορίας, όπως η αυτοθυσία της *Αντιγόνης*. Με τα τρισδιάστατα μοντέλα οι μαθητές απέκτησαν μια πιο ζωντανή εικόνα της αφήγησης, ενώ μπόρεσαν να εξερευνήσουν τις λεπτομέρειες κάθε χαρακτήρα. Επιπλέον η εφαρμογή ενσωματώθηκε σε δραματοποιήσεις ή αναπαραστάσεις σκηνών. Τα παιδιά χρησιμοποίησαν τις AR εικόνες ως εικονικά σκηνικά, δημιουργώντας μια μοναδική θεατρική εμπειρία. Αυτή η προσέγγιση εμπλούτισε τη διδασκαλία, προσέφερε κίνητρα για μάθηση και συνέδεσε την αρχαία ελληνική μυθολογία με σύγχρονες τεχνολογίες.

Τέλος το ψηφιακό πάζλ αγαπήθηκε ιδιαίτερα από τα παιδιά, μέσω της ψηφιακής εφαρμογής Jigsaw Planet (διαδικτυακή πλατφόρμα για δημιουργία ψηφιακών παζλ). Δημιουργήθηκε ένα ψηφιακό παζλ με εικόνες από την ιστορία. Τα παιδιά κλήθηκαν να συναρμολογήσουν το παζλ και μόλις ολοκληρώθηκε η εικόνα εντόπισαν τη σκηνή που τους θύμιζε από την τραγωδία.

ΣΥΜΠΕΡΑΣΜΑΤΑ

Η διδασκαλία του μύθου της *Αντιγόνης* στην προσχολική εκπαίδευση με ψηφιακά εργαλεία αποτελεί μια πολυδιάστατη προσέγγιση, η οποία ενισχύει την ενεργή συμμετοχή των παιδιών και προάγει τη μαθησιακή διαδικασία. Προϋποθέτει φυσικά ο ο εκπαιδευτικός να έχει δομήσει ορθά τις διαδικασίες, τις οποίες θα εφαρμόσει και τον τρόπο με τον οποίο θα παρουσιαστεί ο μύθος, ώστε να μπορούν οι μαθητές να παρακολουθούν την εξέλιξη του.

Ο συνδυασμός παραδοσιακών και σύγχρονων μεθόδων προσφέρει μια ολιστική προσέγγιση στη διδασκαλία, ενθαρρύνοντας τη συμμετοχή, την κατανόηση και την αγάπη για τη μάθηση, αναδεικνύοντας την αξία της δημιουργικότητας και της καινοτομίας στη σύγχρονη εκπαίδευση. Επίσης τα παιδιά έρχονται σε επαφή με την αρχαία ελληνική μυθολογία, καθιστώντας τον μύθο προσιτό και ελκυστικό για τα παιδιά του σήμερα.

ΘΠ25: Η ψηφιακή αφήγηση στη διδακτική πράξη

Η ΣΥΜΒΟΛΗ ΤΗΣ ΨΗΦΙΑΚΗΣ ΑΦΗΓΗΣΗΣ ΣΤΗΝ ΛΟΓΟΤΕΧΝΙΑ ΣΤΗΝ ΔΕΥΤΕΡΟΒΑΘΜΙΑ ΕΚΠΑΙΔΕΥΣΗ: Η ΠΕΡΙΠΤΩΣΗ ΤΗΣ ΠΛΑΤΩΝΙΚΗΣ ΑΛΛΗΓΟΡΙΑΣ ΤΟΥ ΣΠΗΛΑΙΟΥ

Δρ. Κοψάρης Κοσμάς
Διευθυντής 2ου Γυμνασίου Πρέβεζας
e-mail: kkopsaris@hotmail.com

ΠΕΡΙΛΗΨΗ

Στόχος της συγκεκριμένης εισήγησης αποτελεί η απόδοση των καταλυτικών εννοιών που συνέχουν την αλληγορία του σπηλαίου μέσω της ψηφιακής αφήγησης. Αρχικά, θα γίνει μια επισκόπηση της σημασίας της λογοτεχνικής εκπαίδευσης κατά τον 21ο αιώνα, καθώς και της βαρύτητας της λογοτεχνίας στην σύγχρονη εποχή ως μέσο αξιοποίησης των νέων γραμματισμών. Θα γίνει αναφορά στο κατά πόσο η ψηφιακή αφήγηση μπορεί να συντελέσει καταλυτικά στην εξοικείωση, στη δημιουργική εμβάθυνση και στην αφομοίωση θεματικών που διέπονται από έντονες εννοιολογικές διχοστασίες, όπως γνώση-άγνοια, φως-σκοτάδι, δεσμά-ελευθερία, θεωρητικός βίος στον αντίποδα του ενεργού-πρακτικού βίου. Θα τονιστεί ο ρόλος των μαθητών στο σχεδιασμό και στην επιτυχή πραγμάτωση του συγκεκριμένου εκπαιδευτικού σεναρίου. Ο πλατωνικός μύθος του σπηλαίου συνιστά μια αστείρευτη δεξαμενή έμπνευσης για τους σύγχρονους δημιουργούς. Μεθοδολογικά, γίνεται εφαρμογή της ψηφιακής αφήγησης κατά την φάση της ανάγνωσης της αλληγορίας και σε ένα δεύτερο επίπεδο στην φάση ύστερα από την ανάγνωση ώστε να προβούν οι μαθητές σε σύνθετους κριτικούς συσχετισμούς και σε διακειμενικές προσεγγίσεις. Για μια διαγνωστική προσέγγιση μέσω της ψηφιακής αφήγησης, ανατέθηκαν εργασίες στους μαθητές, όπως για παράδειγμα η κατασκευή μιας χρονογραμμής αποτύπωσης των σταδίων αποδέσμευσης με τη χρήση του διαδικτυακού εργαλείου timerime ή της δημιουργίας μιας πολυμεσικής αφίσας με τη χρήση των διαδικτυακών εργαλείων popplet ή glogster.

Σε αυτή τη βάση, η εξιστόρηση της πλατωνικής αλληγορίας του σπηλαίου μέσω των εργαλείων της ψηφιακής αφήγησης συνέβαλε σημαντικά στην κατανόηση των δύσκολων φιλοσοφικών εννοιών της από τους μαθητές, καθιστώντας την φιλοσοφική αφήγηση περισσότερο εύληπτη και συντελώντας ώστε να εμπεδωθεί η έννοια της αναπαράστασης στη λογοτεχνία, καθώς και των ειδικότερων αφηγηματικών μέσων και τεχνικών, όπως ο διάλογος ή η μίμηση.

Παράλληλα, η ψηφιακή αξιοποίηση μέσα από τη συγκεκριμένη περίπτωση είναι χρήσιμη για την κατανόηση των βαθύτερων και συμπαντικών νοημάτων που ενέχει η αλληγορία του σπηλαίου του Πλάτωνα ως λογοτεχνικό είδος που επικοινωνεί με πλήθος έργων της σύγχρονης λογοτεχνίας. Ως εκ τούτου, ο πλατωνικός απόηχος σχετίζεται με τη δυνατότητα της αυτοπραγμάτωσης όταν η εκάστοτε τρέχουσα πραγματικότητα συνθλίβει την αυτενέργεια και ετεροκαθορίζει το άτομο. Μέσω μιας ψηφιακής αφήγησης οι μαθητές, όπως και κάθε αναγνώστης, έχουν τη δυνατότητα να μυηθούν στα άδυτα του πλατωνικού σπηλαίου, ακολουθώντας τους δεσμώτες στον ανηφορικό δρόμο προς την ελευθερία της ύπαρξης. Αυτό συνεπάγεται ότι μέσω μιας ψηφιακής αποτύπωσης οι μαθητές είναι σε θέση να εσωτερικεύσουν και να εμπεδώσουν πλήρως ένα θεωρητικό μοντέλο που μπορεί να τους φανεί ιδιαίτερα δύσκολο και απρόσιτο.

Συνοψίζοντας, μέσω των ψηφιακών εργαλείων οι μαθητές γίνονται ενεργοί δείκτες μιας αναπαριστώμενης ιστορίας, προσλαμβάνουν βιωματικά την πλατωνική αλληγορία, έχοντας την αίσθηση μιας προσωπικής συμβολής στην μετάβαση των δεσμωτών από το σκοτάδι στο φως. Το φιλοσοφικό ταξίδι έτσι τρέπεται σε ένα προσωπικό οδοιπορικό στην πλήρη γνώση του κοσμικού μηχανισμού ως ελλείπον σημείο και συνάμα απώτερος στόχος της πλατωνικής αλληγορίας του σπηλαίου.

Λέξεις – κλειδιά: ψηφιακή αφήγηση, πλατωνική αλληγορία

ΕΙΣΑΓΩΓΗ

Το συγκεκριμένο κείμενο αποβλέπει στην απόδοση όψεων της αξιοποίησης της ψηφιακής αφήγησης για την αναπαράσταση της πλατωνικής αλληγορίας του σπηλαίου, μιας ιδιαίτερης ενότητας στην ύλη των αρχαίων προσανατολισμού της θεωρητικής κατεύθυνσης για την Γ Λυκείου. Διαμόρφωσα το παρουσιαζόμενο διδακτικό σενάριο κατά το διάστημα που δίδασκα το συγκεκριμένο μάθημα στο Γενικό Λύκειο. Αξίζει να επισημανθεί ότι: «η ψηφιακή αφήγηση είναι ο συνδυασμός της παραδοσιακής, προφορικής αφήγησης με σύγχρονα εργαλεία τεχνολογίας και πολυμέσων του 21ου αιώνα, ενώ θα μπορούσαμε να πούμε ότι αποτελεί και μία νέα μορφή έκφρασης που χρησιμοποιεί την εικόνα, τη μουσική, τον ήχο, το βίντεο και την αφήγηση.

Σύμφωνα με τον Πασχαλίδη, η λογοτεχνική εκπαίδευση συνδέεται με τον λογοτεχνικό γραμματισμό (Paschalidis, 2018:37-39). Η λογοτεχνία βοηθά τον εκάστοτε δέκτη να έχει μια διασταλτική οπτική (Langer, 2018:28-29), συμβάλλοντας καταλυτικά στην «οικοδόμηση αναπαραστάσεων» (Langer, 28-29). Η αναγνωστική εμπειρία συντελεί ουσιαστικά στον έφηβο-αναγνώστη στην όξυνση της κριτικής του ικανότητας (Frydaki, 2006: 170). Η δημιουργικότητα στην λογοτεχνία συνδέεται με τη δημιουργική γραφή (Souliotis, 1995:18). Στη σύγχρονη εποχή ο γραμματισμός δεν έχει σχέση μόνο με το λόγο αλλά διέπεται από πολυτροπικότητα. (Koutsogiannis 2011: 18, 21, 44-46). Σε αυτό το πλαίσιο, επιτυγχάνεται η διαμεσολάβηση που είναι βασικό εργαλείο της διερευνητικής μάθησης (Siegel, 1995: 473). Η ψηφιακή αφήγηση αναδιαμορφώνει τη χρήση της τεχνολογίας σε νέα δεδομένα δημιουργικής συμμετοχής των εμπλεκόμενων (Ohler, 2008:15-16).

Οι ιστορίες που κατασκευάζει ο ψηφιακός δημιουργός, βασίζονται στην εικόνα και τον ήχο, μέσω των οποίων μεταφέρεται το μήνυμα που επιθυμεί να μεταδώσει. Πρόκειται για μία διαδικασία σύνθετη και ουσιώδη, η οποία δεν μεταφέρει απλώς ένα μήνυμα, αλλά δίνει ταυτόχρονα στον δημιουργό ένα ισχυρό μέσο προσωπικής έκφρασης και τη δυνατότητα να μπορέσει ανεξαρτήτως τόπου και χρόνου, να ακουστεί και να προβληθεί αυτό που θέλει μέσω της ιστορίας του» (Terzaki, 2023:6). Ορθά επισημαίνεται ότι: «ο κριτικός ψηφιακός γραμματισμός δεν εξαντλείται στην κριτική ανάγνωση της ψηφιακής πραγματικότητας, αλλά ολοκληρώνεται μέσα από τη δημιουργία και την κατασκευή προϊόντων ΤΠΕ και ηλεκτρονικών ΜΜΕ, δίνοντας στους μαθητές την αναντικατάστατη μαθησιακή ευκαιρία για πρόσβαση σε επίμαχο περιεχόμενο, συγκρουσιακές ιδέες και αντιλήψεις, αντιφατικές αξίες και ιδεολογίες και για δημιουργία, παραγωγή και διάδοση προσωπικών περιεχομένων, γνωστικών κατασκευών και 'προβολών' του κόσμου, επιτρέποντας την ανάληψη δράσης προς την οικοδόμηση ενός δημοκρατικότερου τεχνολογικού μέλλοντος και την ενεργοποίηση της συμμετοχής όλων στην κοινή ζωή και στην παραγωγή γνώσης και πολιτισμού» (Goutsioukosta, 2020:50).

Εξάλλου, «η μορφή και η έκταση της μάθησης καθορίζεται από τις πολιτισμικές συνθήκες υπό τις οποίες εμφανίζεται. Δύο συνθήκες, ιδιαίτερα, έχουν επίπτωση στη μάθηση: αφενός, αν η ταυτότητα ενός ατόμου, η υποκειμενικότητά του ή η αίσθηση του εαυτού του έχουν αναδειχθεί/ εμπλακεί επαρκώς στη μαθησιακή διαδικασία. Και, δεύτερον, αν η δέσμευση είναι τέτοια, ώστε να μπορούν να διευρύνουν τους ορίζοντες της γνώσης και της ικανότητάς τους. Για να μάθουν, οι μαθητές πρέπει να αισθάνονται ότι η μάθηση είναι για αυτούς. Θα πρέπει να αισθάνονται ότι ανήκουν στη διαμόρφωση περιεχομένου, αλλά και στην κοινότητα μάθησης ή στο μαθησιακό περιβάλλον. Πρέπει επίσης να αισθάνονται οικεία με το είδος της μάθησης ή με τον τρόπο που προτίθενται να γνωρίσουν τον κόσμο. Οι εκπαιδευόμενοι πρέπει να κινητοποιούνται από αυτό που μαθαίνουν και θα πρέπει να συμμετέχουν ως ενδιαφερόμενα μέρη/μέτοχοι στη διαδικασία μάθησης. Η διαδικασία μάθησης πρέπει να τους συμπεριλαμβάνει. Όσο πιο πολύ ένας εκπαιδευόμενος 'ανήκει' σε όλα αυτά τα επίπεδα πραγμάτωσης της μάθησης τόσο περισσότερο είναι πιθανό να μαθαίνει με παραγωγικό τρόπο» (Goutsioukosta, 2020:50, Kalantzis, Cope, & Arvanitis: 27-58).

Σε αυτό το πλαίσιο, η «διαμεσολάβηση μπορεί να αποδειχθεί ένα πολύ σπουδαίο εργαλείο για την άσκηση των γραμματισμών στο μάθημα της λογοτεχνίας, καθώς μπορεί να διευρύνει τις ερμηνευτικές δυνατότητες που παρέχουν στους μαθητές τα γραπτά κείμενα, τα οποία συνιστούν το βασικό τύπο σημειωτικού αντικειμένου […]: Πρώτον, ενεργοποιώντας πολλαπλές εναλλακτικές ερμηνείες και οπτικές. Δεύτερον, επιτρέποντας στους μαθητές να αναδιατυπώσουν τα κείμενα χρησιμοποιώντας τροπικότητες και γραμματισμούς με τους οποίους είναι εξοικειωμένοι και έχουν νόημα γι' αυτούς. Άλλωστε, οι καθημερινές τους πρακτικές περιλαμβάνουν μια διαρκή μετακίνηση από σημειωτικό σύστημα σε σημειωτικό σύστημα, καθώς γεμίζουν τα γραπτά μηνύματά τους με emoticons, gifs, memes και στιγμιότυπα βίντεο από το youtube. Η διαμεσολάβηση, λοιπόν, επιτρέπει στους μαθητές να εκφράσουν τις γνώσεις τους και τις ιδέες τους, ενώ συντελεί στην έκφραση νέων ιδεών δυνητικά μη διαθέσιμων σε κάποια άλλα σημειωτικά συστήματα» (Goutsioukosta, 2020:63).

Προσδιορίζοντας περαιτέρω εννοιολογικά την ψηφιακή αφήγηση, αξίζει να ειπωθεί ότι: «ο όρος ψηφιακή αφήγηση αποτελεί μετάφραση του αγγλικού όρου digital storytelling, ο οποίος απαντά συχνότερα στην ξενόγλωσση βιβλιογραφία, χωρίς, ωστόσο, να αποκλείονται και άλλοι όροι όπως digital story, digitale, new media narrative, transmedia storytelling, computer based narratives, digital essays, electronic memoirs κ.α. Στην ελληνική βιβλιογραφία

απαντά συχνά και ο όρος ψηφιακή ιστορία (μετάφραση του αγγλικού όρου digital story), ωστόσο, ο όρος ψηφιακή αφήγηση είναι επικρατέστερος, κυρίως στο διαδίκτυο. Καθώς ο όρος ψηφιακή αφήγηση αποτελεί σύνθεση δύο επιμέρους όρων (digital & storytelling), που ούτως ή άλλως κουβαλούν πολλαπλά σημασιολογικά φορτία και μακρόχρονη ακαδημαϊκή πορεία, είναι εύλογο ο νέος όρος που προκύπτει από τον συνδυασμό των προηγούμενων να καλύπτει ένα ευρύτατο πεδίο και να συσκοτίζει περισσότερο παρά να διαφωτίζει την ορολογία. Αρκετές φορές, λοιπόν, ο όρος ψηφιακή αφήγηση χρησιμοποιείται στη βιβλιογραφία με μια πολύ ευρεία έννοια περικλείοντας οποιαδήποτε αφηγηματική εφαρμογή σε ψηφιακή μορφή, από τα αφηγήματα των ηλεκτρονικών παιχνιδιών (video games), τις διαδραστικές ιστορίες (interactive stories) και τα υπερκείμενα (hypertexts), μέχρι τις ιστο-ιστορίες (web-based stories) και τις προσωπικές αναπαραστάσεις στα μέσα κοινωνικής δικτύωσης»(Goutsioukosta, 2020:68). Επιπλέον, «Οι περισσότερες ψηφιακές αφηγήσεις εστιάζουν σε ένα συγκεκριμένο θέμα το οποίο προσεγγίζεται από μία ιδιαίτερη οπτική» (Xesternou, 2013:42).

Σύμφωνα με τον Sheneman, «ψηφιακή αφήγηση είναι η πρακτική συγκερασμού αφηγηματικού και ψηφιακού περιεχομένου, συμπεριλαμβανομένων εικόνων, ήχου και βίντεο, ώστε να δημιουργηθεί μία μικρού μήκους ταινία με δυνατό συγκινησιακό συστατικό» (Sheneman, 2010:40-42& Xesternou, 2013:41).

ΜΕΘΟΔΟΛΟΓΙΑ

Αξιοποιήθηκε το μοντέλο της Frazel σε συνδυασμό με εκείνο του Lambert (2010) από τα οποία προκύπτουν τελικά τέσσερα στάδια επεξεργασίας του υλικού: της προ-παραγωγής, της παραγωγής, της μετά-παραγωγής και της δημοσίευσης. Στην όλη διαδικασία συμμετέχει και ο εκπαιδευτικός ο οποίος βοηθά τους μαθητές προκειμένου να τεθεί μια ασφαλής στοχοθεσία και η υλοποίησή της. (Kay, 1996). Επιπλέον, μεθοδολογικά, εφαρμόστηκε η μελέτη περίπτωσης, η οποία ως ερευνητική προσέγγιση βοηθά τον ερευνητή να εστιάζει στην κάθε ομάδα, να παρατηρεί, να αναλύει και να ερμηνεύει τα εκάστοτε πορίσματα σε συνδυασμό με την ομαδοσυνεργατική μέθοδο μέσω της οποίας συμπεριλαμβάνονται συζητήσεις μέσα από τον καταιγισμό ιδεών.

ΕΦΑΡΜΟΓΗ ΤΟΥ ΔΙΔΑΚΤΙΚΟΥ ΣΕΝΑΡΙΟΥ

Ειδικότερα, ως προς το συγκεκριμένο διδακτικό σενάριο, αξίζει να αναφερθεί ότι η πλατωνική αλληγορία του σπηλαίου από μόνη της σηματοδοτεί μια αυτή καθαυτή αναπαράσταση. Ο ίδιος ο περιγραφικός λόγος στην αφήγηση της ιστορίας έχει μια έντονη απεικονιστική διάσταση. Με δυο λόγια, είναι ένα παιχνίδι συμβόλων. Πρόκειται για ανθρώπους εγκλωβισμένους στα άδυτα ενός σπηλαίου, καθηλωμένους στα δεσμά τους, χωρίς να έχουν τη δυνατότητα να στρέψουν το κεφάλι τους αριστερά ή δεξιά ούτε να δουν πίσω τους. Το τραγικό είναι ότι δεν έχουν εμπεδώσει ποτέ ότι είναι σκλάβοι στα δεσμά τους, για αυτούς η συγκεκριμένη πραγματικότητα είναι νόρμα, συνεπώς δεν υφίσταται ζήτημα αντίδρασης, αμφισβήτησης, επανάστασης (Taylor,2009).

Η ελευθερία για εκείνους στην πραγματική της διάσταση αποτελεί ένα σκοτεινό χωνευτήρι ψυχών πνευματικά ναρκοθετημένων, αγκυλωμένων. Εδώ, αναφύεται ο δύσκολος ρόλος των πνευματικών ανθρώπων που καλούνται να ενεργοποιήσουν στους δεσμώτες τον αόρατο μηχανισμό προς την ελευθερία. Η αποδέσμευση είναι δύσκολη υπόθεση, θα πρέπει σταδιακά να βγουν από το σκοτάδι στο φως που και αυτό με τη σειρά του διαφοροποιείται σε φως του εντός σπηλαίου και του φωτός του ήλιου. Οι αναβαθμοί αυτοί συμβολοποιούν την πορεία από το απατηλό των αισθήσεων στην μήτρα της γνώσης που ενέχεται στην ιδέα του αγαθού. Βγαίνοντας από τον σκοτεινό κόσμο του σπηλαίου, οι δεσμώτες αρχίζουν μια νέα φωτεινή διαδρομή, όχι πια μέσω των πραγμάτων που συλλαμβάνονται από τις αισθήσεις αλλά μέσω των ιδεών.

Η συγκεκριμένη μετάβαση είναι μια πρόκληση για τους ίδιους τους μαθητές, μια δοκιμασία εμβάθυνσης σε βαθιά φιλοσοφικά νοήματα που διαπερνούν την αλληγορία, συνιστώντας παράλληλα μέρος της εξεταστέας ύλης τους για τις πανελλαδικές εξετάσεις. Σε αυτή τη βάση, παιδαγωγικός και διδακτικός μου στόχος κατά κύριο λόγο ήταν να μεταδοθεί η συγκεκριμένη γνώση στους μαθητές άκρως δημιουργικά, πρωτότυπα και κατά μια έννοια βιωματικά μέσω της ψηφιακής αφήγησης, αξιοποιώντας εκλεκτικές συγγένειες και διακείμενα, όπως για παράδειγμα την καβαφική ποίηση.

Η έννοια της αφήγησης και της μάθησης είναι άρρηκτα συνυφασμένες. Η ψηφιακή αφήγηση συμβάλλει στην γνωστική, συναισθηματική και στην κοινωνική καλλιέργεια των μαθητών, μέσω της διεύρυνσης της κριτικής τους σκέψης. Στηρίζεται στην προφορική αφήγηση αξιοποιώντας τα σύγχρονα εργαλεία της τεχνολογίας και των πολυμέσων του 21ου αιώνα. Ο ψηφιακός δημιουργός αξιοποιεί ιστορίες βασιζόμενος στην εικόνα, στον ήχο, στην μουσική, το βίντεο.

Με τον τρόπο αυτό, πραγματώνεται η προσωπική αυτοέκφραση. Για το συγκεκριμένο διδακτικό σενάριο που υλοποιήθηκε κατά το σχολικό έτος 2020-2021 στο 2 ΓΕΛ Πρέβεζας αφιερώθηκαν 7 διδακτικές ώρες, κατά τις οποίες οι μαθητές οικειοποιήθηκαν την πλατωνική φιλοσοφία με έναν άκρως δημιουργικό και σύγχρονο τρόπο. Κατά τις δύο

πρώτες διδακτικές ώρες, στην αίθουσα των πολυμέσων του σχολείου παρακολούθησαν ένα εισαγωγικό βίντεο σχετικά με την σημασία της Πλατωνικής *Πολιτείας*.

Στο εισαγωγικό αυτό μέρος, άρχισαν να κινούνται διερευνητικά στην κατεύθυνση του τι σημαίνει πολίτευμα, πως επιτυγχάνεται η δικαιοσύνη. Κάπου από αυτό το σημείο, αρχίσαμε να ξετυλίγουμε το νήμα, να μπαίνουμε στην υπόθεση του έργου. Αυτή συνίσταται στη συζήτηση του Σωκράτη και ορισμένων εξεχόντων Αθηναίων σχετικά με τη σημασία της δικαιοσύνης. Σε αυτή τη βάση, στο έργο εξετάζεται το κατά πόσο είναι πιο ευτυχισμένος ένας δίκαιος άνθρωπος από έναν άδικο, κατασκευάζοντας μια ουτοπική πολιτεία, την "Καλλίπολη", με κυβερνώντες τους φιλόσοφους-βασιλείς. Στο έργο γίνεται απόπειρα να προσδιοριστεί εννοιολογικά η δικαιοσύνη από τα πρόσωπα που συμμετέχουν στη συζήτηση.

Αφού οι μαθητές αποτύπωσαν το πλήθος των διαφορετικών απόψεων, ακολούθησε στην τάξη μια εκτεταμένη συνομιλία σχετικά με το ποια άποψη περί δικαιοσύνης από όσες διατυπώθηκαν στο έργο θεωρούν ότι είναι η επικρατέστερη. Αφού δόθηκαν στους μαθητές ορισμένες ασκήσεις και ερωτήσεις εμβάθυνσης τέθηκε προς περαιτέρω διερεύνηση το γιατί χρειάζεται η φιλοσοφία προκειμένου να κατασταλάξει κανείς στο τι είναι δίκαιο και σε ένα δεύτερο επίπεδο αυτό να συνδεθεί με το ιδανικό πολίτευμα.

Όσο προχωρούσε η ώρα, οι μαθητές στο συγκεκριμένο δίωρο ένιωθαν μέρος της δραματικής αναπαράστασης της *Πολιτείας*, βίωναν ενεργά τον ρόλο τους. Για τον συγκεκριμένο ρόλο τους ζητήθηκε να κατασκευάσουν ένα ψηφιακό κόμικ μέσω του διαδικτυακού εργαλείου ψηφιακής αφήγησης pixton στο οποίο να επιλέξουν να αφηγηθούν τη συγκεκριμένη συζήτηση περί δικαιοσύνης, όντας κάποιος από τους ομιλητές. Όπως αναφέρεται χαρακτηριστικά στην εισαγωγή του σχολικού βιβλίου: «Στην αρχή του διαλόγου διατυπώνονται διάφορες απόψεις περί του τι είναι δικαιοσύνη. Ο Κέφαλος που εκπροσωπεί την παλιά γενιά νομίζει ότι δικαιοσύνη είναι η εντιμότητα στις συναλλαγές.

Έτσι, ο πλούσιος έχει τη δυνατότητα να είναι δίκαιος, επειδή μπορεί να εξοφλεί τα χρέη του. Ο Πολέμαρχος διισχυρίζεται ότι δικαιοσύνη είναι να αποδίδεις τα ίσα, καλό στον φίλο, κακό στον εχθρό. Παραβλέπει όμως το γεγονός ότι ο φίλος ενδέχεται να είναι άδικος και ο εχθρός δίκαιος. Ο σοφιστής Θρασύμαχος είναι ωμός· το συμφέρον του ισχυρού καθορίζει το τι είναι δίκαιο. Ο Γλαύκων, που είναι κατά κάποιο τρόπο το φερέφωνο της αριστοκρατικής ηθικής, θεωρεί τη δικαιοσύνη ως μια υποκριτική κοινωνική σύμβαση που επιβάλλεται από τους πολλούς και αδύνατους για την αυτοπροστασία τους. Όλοι αυτοί οι ορισμοί εμπεριέχουν ένα κόκκο αλήθειας, αλλά αποδεκτός τελικά γίνεται ο ορισμός του Σωκράτη: "τὸ τὰ αὑτοῦ πράττειν", με άλλα λόγια: ο καθένας οφείλει να πράττει για το κοινωνικό σύνολο εκείνο "εἰς ὃ αὐτοῦ ἡ φύσις ἐπιτηδειοτάτη πεφυκυῖα εἴη"(Kopidakis et al., 2024:83-93).

Οι μαθητές, στην πορεία, κλήθηκαν να αποδώσουν μέσω μια νέας ψηφιακής ιστορίας κομικ τον σχετικό διάλογο με την διαφορά ότι τώρα θα έπρεπε να ενισχύσουν την επιχειρηματολογία εκάστου ομιλητή με δικές τους προσωπικές απόψεις, αν αυτές θα μπορούσαν να ευδοκιμήσουν χωρίς να συγκρουστούν με το συγκείμενο ούτε να οδηγηθούν σε κάποιο σόφισμα ή παραλογισμό στα επιχειρήματά τους. Με το τέλος του πρώτου διδακτικού δίωρου, τούς ζητήθηκε, χωριζόμενοι σε ομάδες, να καταγράψουν την πληθώρα των απόψεων που ακούστηκαν βασιζόμενοι στην ανωτέρω συζήτηση και να τις καταγράψουν μέσω ενός ψηφιακού πίνακα αξιοποιώντας το ψηφιακό εργαλείο padlet.

Στην αρχή της τρίτης διδακτικής ώρας, παρουσίασα σε power point τις σχετικές ενότητες από την πλατωνική αλληγορία του σπηλαίου υπογραμμίζοντας με bold τις λέξεις κλειδιά στις οποίες οι μαθητές θα πρέπει να εστιάσουν. Στη συνέχεια, έγινε απόπειρα απόδοσης στα νέα ελληνικά του κειμένου από τους μαθητές με την βοήθεια του καθηγητή. Εκείνοι άρχισαν ήδη να εσωτερικεύουν την ιστορία, να εντυπώνουν τις λέξεις του σπηλαίου, της φωτιάς, των δεσμών, του φωτός, του ανηφορικού δρόμου, των απελευθερωμένων δεσμωτών, του φιλοσόφου βασιλέα, της ιδέας του αγαθού. Η τρίτη διδακτική ώρα έκλεισε με ένα κριτικό προβληματισμό από την πλευρά των μαθητών σχετικά με τη δυσκολία κατάκτησης της αληθινής γνώσης όσο και των βαθμίδων τους, τις οποίες κλήθηκαν να αποδώσουν ιεραρχικά και αξιολογικά σε ένα ψηφιακό πίνακα με την βοήθεια πάντα του εκπαιδευτικού.

Την 4η και την 5η διδακτική ώρα κατανοήθηκε πλήρως η σημασία της γνώσης, της παιδείας και του ρόλου του φιλοσόφου βασιλέα, έχοντας εμβαθύνει στις σχετικές ενότητες και ολοκληρώσει την λεξιλογική και την νοηματική επεξεργασία, αναλύοντας τα σχετικά κείμενα. Στο τέλος της 5ης ώρας τέθηκαν οι εξής εργασίες στους μαθητές, έχοντας χωριστεί σε τρεις ομάδες. Να παρουσιάσουν τμηματικά όλη την αλληγορία του σπηλαίου, το ζήτημα της απροθυμίας των φιλοσόφων να κυβερνήσουν και του σχετικού διαλόγου του Σωκράτη και του Γλαύκωνα περί παιδείας μέσα από τέσσερις διαφορετικές ψηφιακές ιστορίες, αξιοποιώντας αυτή τη φορά τα διαδικτυακά εργαλείο storyboardthat, storify, καθώς και το λογισμικό Microsoft Photostory 3.

Για τον συγκεκριμένο λόγο, τόσο στο συγκεκριμένο δίωρο όσο και στο τελευταίο το μάθημα έγινε στο εργαστήριο πληροφορικής του σχολείου για την πλήρη εξοικείωση των μαθητών με τα συγκεκριμένα ψηφιακά εργαλεία,

την ολοκλήρωση των ιστοριών τους ή για την επίλυση απορίων. Στην τελική σύνθεση για την κάθε ομάδα στόχος ήταν να αποδώσουν διαφορετικές οπτικές της αλληγορίας στηριζόμενοι σε ήδη υπάρχουσες εικόνες απόδοσής της ή σε σχετικά βίντεο στο διαδίκτυο. Με τον τρόπο αυτό, διαμορφώθηκε ένα κολάζ στηριζόμενο σε διαφορετικές οπτικές. Η μια στον χρόνο που απαιτείται για την άνοδο και στις δυσκολίες που διέπουν την ανάβαση, όπως και την εκ νέου κατάβαση των απελεύθερων δεσμωτών. Υπήρχαν πολλές εικόνες στη διάθεσή τους στο διαδίκτυο, οι μαθητές επέλεξαν αυτές που οι ίδιοι ήθελαν να προσδώσουν μεγαλύτερη έμφαση ανάλογα με το στοιχείο του σπηλαίου που τους εντυπωσίασε περισσότερο στη ροή της εξέλιξης.

ΣΥΜΠΕΡΑΣΜΑΤΑ

Δημιουργήθηκαν συνολικά τέσσερις ψηφιακές ιστορίες που ενείχαν τα επιμέρους συμπεράσματα κατά περίπτωση. Η πρώτη αφορούσε το εύρος της διαδρομής, τα επίπεδα της ανόδου και την τελική έξοδο από το σπήλαιο, η δεύτερη την αντίθεση φωτός και σκοταδιού στην απεικόνιση, η τρίτη την απόδοση σε κομικ του διαλόγου Σωκράτη και Γλαύκωνα περί παιδείας και του ηθικού εξαναγκασμού των φιλοσόφων και η τέταρτη, η πιο γοητευτική ίσως, την απαγγελία με την παρουσίαση των σχετικών στίχων από τα «Τείχη» και τα «Παράθυρα» του Καβάφη που συνομιλούν άμεσα νοηματικά με την πλατωνική αλληγορία του σπηλαίου.

Για την τελευταία περίπτωση, αξιοποιήθηκε το λογισμικό Format Factory. Από τα βίντεο που αποδίδουν οπτικά τους στίχους αφαιρέθηκαν οι αρχικοί ήχοι και εισήχθησαν ως ένθετοι ήχοι που εμπεριέχουν τμηματικά απαγγελίες των ποιημάτων τόσο από γνωστούς καλλιτέχνες, από άλλους ποιητές όσο και από τον ίδιο τον καθηγητή. Τα μέλη της κάθε ομάδας συνεργατικά βοήθησαν στο άρτιο αποτέλεσμα ως προς την απαιτούμενη τεχνογνωσία κατά περίπτωση.

Για τις τρεις πρώτες περιπτώσεις ψηφιακής αφήγησης έγιναν φωνητικές εγγραφές με τη φωνή του διδάσκοντα στους μονολόγους των αφηγήσεων, ενώ στους διαλόγους συνεργάστηκε στην ηχογράφηση ο καθηγητής της πληροφορικής του σχολείου. Τα αποτελέσματα ήταν θεαματικά γιατί οι μαθητές απέδρασαν για λίγο από τον μηχανισμό των εξετάσεων, εμπέδωσαν πολυεπίπεδα, πολυδιάστατα και πολυτροπικά τη σημασία της αλληγορίας, συνεργάστηκαν αναδεικνύοντας στο έπακρο τη δημιουργικότητά τους, ένιωσαν τόσο ως σκηνοθέτες που γυρίζουν ένα ντοκιμαντέρ όσο και ως ηθοποιοί. Προέβησαν σε μια βιωματική πρόσληψη της διδακτέας ύλης, μοιράστηκαν συναισθήματα, εμβάθυναν σε ένα καταιγισμό ιδεών και εικόνων που βοηθά ιδιαίτερα σε μια ευρυγώνια, διασταλτική, οπτική και σε ένα αφυπνισμένο κριτικό αισθητήρα. Αισθάνθηκαν ότι κατέκτησαν το φως του αγαθού με την συνάλληλη εσωτερίκευση του ηθικού χρέους της μεταλαμπάδευσης της αληθινής γνώσης στους δεσμώτες, δίχως καμία αίσθηση ηθικού εξαναγκασμού. Εισήλθαν πλέον στο φως του ιδεατού πλατωνικού κόσμου της γνώσης όσο και της μεταλαμπάδευσής της.

Στο τέλος, οι μαθητές κλήθηκαν να αξιολογήσουν το βαθμό σαφήνειας του περιεχομένου των ψηφιακών τους αφηγήσεων λειτουργώντας ως βασικό μέσο ανατροφοδότησής τους για ανάλογο εγχείρημα μελλοντικά. Το 76.2% των μαθητών κατά μέσο όρο απάντησε ότι το περιεχόμενο των ιστοριών που δημιουργήθηκαν ήταν σαφές ως προς το μήνυμα, ενώ το υπόλοιπο ποσοστό έθεσε το ζήτημα ότι στην κάθε ιστορία θα έπρεπε να υπήρχε μια πιο ελεύθερη διασκευή από τα στοιχεία της *αλληγορίας του Σπηλαίου* που αξιοποιήθηκαν. Επίσης, όσον αφορά τη συνοχή του σεναρίου της κάθε ιστορίας, η πρώτη ομάδα βαθμολογήθηκε από τους συμμαθητές της με άριστα κατά ποσοστό 88.9%, η δεύτερη σε ποσοστό 66.8%, η τρίτη σε ποσοστό 74.7% και η τέταρτη σε ποσοστό 97.7 %.

ΠΕΡΙΛΗΨΗ

Η αφήγηση αποτελεί κρίσιμη διάσταση του ανθρώπινου πολιτισμού. Είναι ένας φυσικός τρόπος επικοινωνίας και οργάνωσης των εμπειριών σε βάθος χρόνου. Η ισχύς της συνίσταται στο συναισθηματικό αποτέλεσμα, επειδή εμπνέει τη φαντασία, προσελκύοντας περισσότερο και καλύτερα το ενδιαφέρον από οποιαδήποτε άλλη μορφή πληροφοριών. Ιδιαίτερα στο εκπαιδευτικό συγκείμενο, οι ιστορίες βοηθούν τους μαθητές να εκφραστούν καλύτερα, να αναπτύξουν τη φαντασία και το λεξιλόγιό τους, αλλά και να εξωτερικεύουν τα συναισθήματα τους, να βελτιώσουν την ενσυναίσθηση, την κριτική σκέψη και τις κοινωνικές τους δεξιότητες.

Η ψηφιακή αφήγηση χρησιμοποιεί εφαρμογές πολυμέσων, όπως κείμενο, ήχους, μουσική, κόμικς και βίντεο. Στο χρονικό διάστημα των τελευταίων τουλάχιστον 25 ετών, έχει εξελιχθεί σε ένα εξαιρετικά ισχυρό γνωστικό εργαλείο και μέσο διδασκαλίας. Αξιοποιώντας την πανάρχαια τέχνη της αφήγησης και συνδέοντάς την με την τεχνολογία, η ψηφιακή αφήγηση παρέχει ένα πολυαισθητηριακό περιβάλλον μάθησης. Ειδικά, στην Ειδική Αγωγή, η ψηφιακή αφήγηση συμβάλλει στην ενεργοποίηση του ενδιαφέροντος και στη διευκόλυνση της επίτευξης των μαθησιακών στόχων, αποτελώντας μια σημαντική διδακτική και μαθησιακή εξάρτυση, ιδίως στα γλωσσικά μαθήματα.

Η παρούσα εργασία επικεντρώνεται σε μια διδακτική πρόταση βασισμένη σε ένα ψηφιακό παραμύθι με τίτλο «Δύο φίλοι μα τι φίλοι!», το οποίο σχεδιάστηκε και γράφτηκε από εκπαιδευτικό Ειδικού Σχολείου, για μαθητές με αναπηρία ή/και ειδικές εκπαιδευτικές ανάγκες. Μέσω της μελέτης της συγκεκριμένης ιστορίας, οι μαθητές μπορεί να αναπτύξουν τη γλωσσική και την κοινωνική τους συναίσθηση, αλλά και να μάθουν για τον αληθινό ανθρώπινο πλούτο, με την ανάδειξη των υψηλών αξιών της φιλίας, της αποδοχής και της αλληλοϋποστήριξης. Δεδομένου ότι οι μαθητές Ειδικών Σχολείων δυσκολεύονται να κάνουν φίλους, τέτοιες παρεμβάσεις θεωρούνται απαραίτητες για την ένταξή τους, την υγιή κοινωνική τους εξέλιξη, καθώς και για τη συνολική τους ανάπτυξη ως ενεργών και ισότιμων πολιτών.

Λέξεις – κλειδιά: Ψηφιακή αφήγηση, φιλία, Ειδικό Σχολείο

ΕΙΣΑΓΩΓΗ

Η αφήγηση ιστοριών ήταν πάντα μια βασική ανάγκη, η οποία υπηρέτησε, διαχρονικά, την ανθρώπινη επικοινωνία. Από τις προφορικές παραδόσεις μέχρι την «περιποιημένη» λογοτεχνική έκφραση, οι ιστορίες διαμορφώνουν τον τρόπο με τον οποίο ένα άτομο αντιλαμβάνεται την πραγματικότητα, οργανώνει τις εμπειρίες μέσα στον χρόνο και συνδέεται με άλλους ανθρώπους. Όμως, πέραν της μακρόχρονης γοητείας και σαγήνης της, έχει αποδειχθεί ότι η αφήγηση επηρεάζει έντονα τόσο τη σκέψη όσο και το συναίσθημα, και ως εκ τούτου την καθιστά μιαν από τις καλύτερες διόδους μέσω της οποίας σφυρηλατούνται γνώσεις, αρχές, ιδανικά και αξίες. Στον εκπαιδευτικό χώρο, η παιδαγωγική δύναμη της αφήγησης αποτελεί ένα ισχυρό ενθουσιαστικό μέσο που χρησιμοποιείται στις τάξεις, για να οικοδομηθούν γόνιμα περιβάλλοντα ανάπτυξης της ενσυναίσθησης, της αποδοχής της διαφορετικότητας, της αναγνώρισης και του σεβασμού των ατομικών διαφορών αλλά και βελτίωσης των γλωσσικών δεξιοτήτων. Η σύγχρονη ψηφιακή τεχνολογία χάραξε νέους δρόμους και ανέπτυξε καινούργιες δυνατότητες διδασκαλίας, προσδίδοντας στην αφήγηση μιαν αλληλεπιδραστική πολυμεσική πολυτροπικότητα, ενσωματώνοντας εικόνες, ήχους, ομιλία και βίντεο, δημιουργώντας, έτσι, ένα δυναμικό και συναρπαστικό μαθησιακό περιβάλλον. Η ψηφιακή αφήγηση είναι πολύ περισσότερο από μια απλή τεχνολογική τάση, δεδομένου ότι μπορεί, υπό προϋποθέσεις, να αποτελέσει ένα «μαγικό ραβδί» για να ενισχύει τη συμμετοχή, την επικοινωνία και το ενδιαφέρον των μαθητών, για να ενθαρρύνει τη επινοητικότητά τους, καθώς και για να δημιουργεί έναν ατείχιστο χώρο προσωπικής τους έκφρασης και συνεργασίας. Ιδιαίτερα στην Ειδική Αγωγή, η ψηφιακή αφήγηση μοιάζει πολλά υποσχόμενη. Παρέχει ένα ευέλικτο, μαγνητικό και παρωθητικό περιβάλλον μάθησης, ιδανικό για μαθητές με αναπηρίες ή/και ειδικές εκπαιδευτικές ανάγκες. Υπό αυτό το αβανταδόρικο παιδαγωγικό πλαίσιο, η παρούσα εργασία παρουσιάζει μια διδακτική προσέγγιση που αξιοποιεί τα πλεονεκτήματα της ψηφιακής αφήγησης, με σκοπό να βοηθήσει τους μαθητές να αναπτύξουν κοινωνικές και γλωσσικές ικανότητες, υποστηρίζοντας και προωθώντας, ταυτόχρονα, την κοινωνική ένταξη και ενδυνάμωσή τους.

Η ΨΗΦΙΑΚΗ ΑΦΗΓΗΣΗ ΩΣ ΚΡΙΣΙΜΟ ΕΚΠΑΙΔΕΥΤΙΚΟ ΕΠΟΙΚΟΔΟΜΙΣΤΙΚΟ ΜΕΣΟ

Στον ανθρώπινο πολιτισμό, η αφήγηση έχει μια μακρόχρονη παράδοση, καθώς οι άνθρωποι αρέσκονται να αφηγούνται ιστορίες, οι οποίες, μάλιστα, αποτελούν μιαν από τις κύριες μορφές επικοινωνίας μεταξύ τους (McDowell, 2021; Lugmayr et al., 2017; Maggio, 2014; Worth, 2008). Είναι μια μακραίωνη ανθρώπινη συνήθεια και πρακτική, μέσω της οποίας οι άνθρωποι εκφράζονται και μεταδίδουν προσωπικές εμπειρίες και πολιτιστικά στοιχεία, με ιδιαίτερους και ξεχωριστούς τρόπους. Επιπλέον, αποτελεί τον κυρίαρχο μηχανισμό με τον οποίο οργανώνονται και κατανοούνται οι ανθρώπινες εμπειρίες μέσα στον χρόνο (Alameen, 2011; Wort, 2008). Οι ιστορίες (Intelliminds, 2025; Srivastava, Oberoi & Gupta, 2023; Quah & Ng, 2022; Brockington et al., 2021; Riga, Ioannidi & Papayiannis, 2021; Armstrong, 2020; Zak, 2015; 2014; Hoopes, 2013) έχουν, μάλιστα, ισχυρό πνευματικό αντίκτυπο, αφού το φυσικό και συναισθηματικό ίχνος που παράγεται στον εγκέφαλο, κατά τη διάρκεια των αφηγήσεων, είναι τερπνό, αναζωογονητικό και δημιουργικό. Επιπροσθέτως, οι αφηγήσεις επηρεάζουν τη στάση και τη συμπεριφορά των ακροατών, αλλά και βελτιώνουν τη μνήμη. Μάλιστα, μέσω των ιστοριών, καθένας μπορεί να μάθει από τις εμπειρίες των άλλων, διαμορφώνοντας έτσι το σύστημα αξιών του, είτε συμφωνώντας με αυτά που ακούει είτε αμφισβητώντας τα (Gupta & Jha, 2022). Για αυτόν τον λόγο, οι ιστορίες προσελκύουν, καλύτερα και περισσότερο, την προσοχή από άλλου είδους πληροφορίες (Rodríguez, 2023; Srivastava, Oberoi & Gupta, 2023; Quah & Ng, 2022).

Στην εκπαίδευση είναι επιβεβαιωμένα τα οφέλη των αφηγήσεων ακόμη και στα Μαθηματικά, επειδή παρέχονται ευκαιρίες συνδέσεων μεταξύ εικόνων και λέξεων, αυτοέκφρασης, διέγερσης της φαντασίας των μαθητών, αιχμαλώτισης του ενδιαφέροντός τους, εμπλουτισμού του λεξιλογίου τους αλλά και ενθάρρυνσης και υποστήριξης, τόσο λεκτικά όσο και οπτικά, με την ανάπτυξη δεξιοτήτων ομιλίας και γραφής (Irmayanti, Chou & Anuar, 2025; Mbachi, Ogechukwu & Apiti, 2025; Sugiharti, 2024; Riga, Ioannidi & Papayiannis, 2021; Lemonidis & Kaiafa, 2019). Επιπλέον (Ramamurthy et al., 2024; Gupta & Jha, 2022; Beck & Neil, 2021; Satriani, 2019; Hibbin,2016), η ενσυναίσθηση, η αναζήτηση της ηθικής αξίας της ιστορίας ως εργαλείου αξιολόγησης, οι νύξεις για κοινωνικά κατάλληλες στάσεις και φιλοκοινωνικές συμπεριφορές, η παρότρυνση για αναστοχασμό, η κατανόηση του εαυτού και των άλλων, η ανάπτυξη κριτικής σκέψης και δημιουργικότητας, η ταύτιση με τους χαρακτήρες της ιστορίας, αλλά και η αμφίδρομη επικοινωνία και η συνεργασία αποτελούν μερικές ακόμη περιπτώσεις προστιθέμενης μαθησιακής αξίας που προσφέρουν οι αφηγήσεις, ως μέσα διδασκαλίας και ως αξιόλογα γνωστικά εργαλεία.

Προς αυτή τη ζηλευτή παιδαγωγική κατεύθυνση που αναδεικνύει τον αφηγηματικό λόγο, η ψηφιακή αφήγηση, εδώ και τουλάχιστον είκοσι πέντε χρόνια (ειδικά μετά την ευκολία της προσβασιμότητας στο γρήγορο-ευρυζωνικό Διαδίκτυο), έχει εξελιχθεί σε ένα σημαντικό μέσο μάθησης, χρήσιμο τόσο για τους μαθητές όσο και για τους δασκάλους, αποτελώντας ένα δυναμικό και εποικοδομιστικό γνωστικό εργαλείο που ενεργοποιεί και παροτρύνει τους μαθητές, συμβάλλοντας στη δημιουργία πιο ελκυστικών και ενδιαφερουσών μαθησιακών εμπειριών (Bouchrika, 2025; Nair & Yunus, 2021; Alismail, 2015; Robin, 2008; 2006; Ohler, 2006). Η ψηφιακή αφήγηση, που είναι μια σύντομη, ευχάριστη και συγκινητική ιστορία, γεμάτη ένταση, με δυνατότητα κάλυψης ευρέος φάσματος θεμάτων, αναφέρεται σε ένα

οπτικοακουστικό κλιπ διάρκειας μερικών λεπτών, το οποίο συνδυάζει φωτογραφίες, εικόνες, μουσική, φωνητική αφήγηση και άλλους ήχους (Logie al., 2025; Kalkanoğlu, 2024; De Jager et al., 2017; Christiansen & Koelzer, 2016). Είναι, δηλαδή, μια μορφή καλλιτεχνικής έκφρασης που αξιοποιεί τα ψηφιακά πολυμεσικά μέσα και εργαλεία, για τη δημιουργία και παρουσίαση ιστοριών. Πρόκειται για μια σύνθετη και πολυμορφική διαδικασία, η οποία περιλαμβάνει ποικίλα μέσα, όπως κείμενο, εικόνες, ιστολόγια, ηχητικά αρχεία (podcast), βίντεο και διαδραστικές εφαρμογές ή παιχνίδια, παρέχοντας ευκαιρίες στους μαθητές, για να συνδυάσουν τις σκέψεις τους, οπτικά, ακουστικά και κιναισθητικά (Smith, 2024; Quah & Ng, 2022; Michalski, Hodges & Banister, 2005). Ο πυρήνας της ψηφιακής αφήγησης βρίσκεται στην ικανότητά της να γεφυρώνει την παραδοσιακή μορφή αφήγησης με τις δυνατότητες που προσφέρει η σύγχρονη τεχνολογία, με αποτέλεσμα (Rahiem, 2021) η αφήγηση να αποκτά περισσότερη διασκεδαστική, σαγηνευτική, ελκυστική, επικοινωνιακή και θεατρική διάσταση.

Επιπλέον, μια βασική πλεονεκτούσα πτυχή της ψηφιακής αφήγησης μπορεί να αποτελέσει και η διαδραστικότητα (Riga, Ioannidi & Papayiannis, 2021; Dalod, 2020; Alameen, 2011), η οποία επιτρέπει στους χρήστες να συμμετέχουν ενεργά στη δημιουργία και εξέλιξη των ιστοριών, αφαιρώντας, τροποποιώντας και προσθέτοντας πολυμεσικές εφαρμογές. Οι συμμετέχοντες ενσωματώνονται ενεργά στην ιστορία, αναλαμβάνοντας κάποιο ρόλο που τους επιτρέπει να διαμορφώσουν την πλοκή, αλλά, ακόμη, και να δημιουργήσουν δικό τους ψηφιακό περιεχόμενο, αφήνοντας, έτσι, το προσωπικό τους αποτύπωμα και ρυθμό στη ροή της αφήγησης. Αυτό είναι δυνατό να γίνει, μέσω αμφίδρομων αλληλεπιδράσεων, όπου οι μαθητές μπορούν να μοιραστούν εύκολα τις ιστορίες τους με ένα ευρύ κοινό, είτε ανεβάζοντας τις δημιουργίες τους σε διαδικτυακές πλατφόρμες Web 2.0, είτε χρησιμοποιώντας εφαρμογές Web 2.0 για να δημιουργήσουν τις δικές τους ψηφιακές ιστορίες.

Τα αποτελέσματα πολλών ερευνών και μελετών (Benabbes & Taleb, 2024; Belda-Medina & Goddard 2024; Ginting et al., 2024; Gkoutsioukosta & Apostolidou, 2023; Purnama et al., 2022; Nair & Yunus, 2021; Bratitsis & Ziannas, 2015; Di Blas & Paolini, 2013) υπογραμμίζουν ότι η ψηφιακή αφήγηση χρησιμοποιείται με επιτυχία, ως μια σημαντική παιδαγωγική μέθοδος και ως ένα διαμεσολαβητικό μέσο και γνωστικό εργαλείο, που βοηθά τους μαθητές, για παράδειγμα, να αποκτήσουν γνώσεις, να εξελίξουν τις δεξιότητες ομιλίας (και κατά την εκμάθηση ξένων γλωσσών), να εγγραμματιστούν στα μέσα ενημέρωσης, να ενισχύσουν την ενσυναίσθησή τους, να βελτιώσουν τις στάσεις και τις συμπεριφορές τους και, γενικά να έχουν ευχάριστες και συναρπαστικές μαθησιακές εμπειρίες. Είναι πολύ πιθανό η τεχνολογία να βελτιώσει μια ιστορία ή ένα παραμύθι, καθιστώντας το πιο διασκεδαστικό, ενδιαφέρον και επικοινωνιακό. Ειδικότερα, η ενσωμάτωση της διαδικασίας της ψηφιακής αφήγησης σε τάξεις Ειδικής Αγωγής, κυρίως στα γλωσσικά μαθήματα, αποφέρει πολλά μαθησιακά οφέλη (Barua, 2023; Riga, Ioannidi & Papayiannis 2017; Michalski, Hodges & Banister, 2005).

Πράγματι, η εφαρμογή της ψηφιακής αφήγησης στην Ειδική Αγωγή είναι πολλά υποσχόμενη και γεννά ελπίδες (Kritsotaki, Castro–Kemp & Kamenopoulou, 2025; Yasar-Akyar et al., 2024; di Furia, Guarini & Finestrone, 2022). Τα οπτικά ερεθίσματα δημιουργούν καλύτερες συνθήκες μάθησης σε μαθητές Ειδικών Σχολείων, επειδή αυτοί παρουσιάζουν βελτιωμένη απόκριση όταν η πληροφόρηση παρουσιάζεται οπτικά (Diasse & Kawai, 2024). Επίσης, βελτιώνουν τη στοχοκεντρωμένη συμπεριφορά μαθητών με ειδικές ανάγκες, βελτιώνοντας την επικοινωνιακή και αφηγηματική ικανότητά τους, καθώς και τη συμμετοχή και τη διαδικασία ολοκλήρωσης των δραστηριοτήτων (Manganello & Baldacci, 2024; Liang et al., 2024). Γενικά, παρέχουν ένα εξαιρετικά προσαρμόσιμο περιβάλλον, το οποίο προσφέρει τη δυνατότητα να υλοποιούνται ποιοτικότερα οι διδακτικές παρεμβάσεις (Sakellariou & Sakellariou, 2022), αλλά και να δημιουργούνται συνθήκες αιχμαλώτισης της προσοχής των μαθητών και της προσέλκυσης του ενδιαφέροντός τους.

Η παρούσα εργασία θα παρουσιάσει μια δομημένη δραστηριότητα ψηφιακής αφήγησης, μέσω της διδακτικής αξιοποίησης σχετικού κλιπ με τίτλο «Δύο φίλοι μα τι φίλοι!», δημιουργία εκπαιδευτικού ενός τμήματος με μαθητές με αναπηρία ή/και ειδικές εκπαιδευτικές ανάγκες. Το κλιπ εξυπηρετεί μια πληθώρα στόχων, που σχετίζονται με την ανάπτυξη γλωσσικών και κοινωνικών δεξιοτήτων των μαθητών, και μπορεί να αξιοποιηθεί στο μάθημα της Γλώσσας. Η παρούσα ψηφιακή αφήγηση είναι δυνατό να αποτελέσει έναν πλούσιο στοχευμένο πόρο, καθώς μπορεί να προσφέρει στα παιδιά τη δυνατότητα να εξερευνήσουν την αξία της φιλίας και της αποδοχής, υπό το σενάριο μιας χαριτωμένης και συγκινητικής-συγκινησιακής ιστορίας. Τα παιδιά, επίσης, είναι πιθανό να αναγνωρίσουν και τη σημασία της αλληλοϋποστήριξης και της αντιμετώπισης των προκαταλήψεων, εννοιών, δηλαδή, που είναι ουσιαστικές για την κοινωνική τους ανάπτυξη. Τα παιδιά είναι επίσης πιθανό να εκτιμήσουν τη σημασία της αλληλοβοήθειας και την ανάγκη για καταπολέμηση στερεοτύπων, ρατσισμού και αρνητικών προδιαθέσεων, ώστε η κοινωνική τους ανάπτυξη να διαπλάθεται υγιώς και ολοκληρωμένα.

Ας σημειωθεί ότι τα παιδιά με αναπηρία ή/και ειδικές εκπαιδευτικές ανάγκες είναι δύσκολο να αναπτύξουν φιλίες με συνομηλίκους τους και να συμμετέχουν, ενεργά, σε κοινωνικές αλληλεπιδράσεις (Lin et al., 2025; Athamanah et al., 2019; Harris, 2014; Guralnick et al., 2007). Για αυτό, με σκοπό να υπάρξουν θετικά αποτελέσματα, όσον αφορά

στην κοινωνική τους ανάπτυξη και εξέλιξη, απαιτούνται οργανωμένες πρωτοβουλίες και καθοδήγηση από εκπαιδευτικούς, αλλά και να δίνονται σε αυτά τα παιδιά ευκαιρίες στην τάξη, ώστε να αναπτύσσουν κοινωνικές δεξιότητες ενός ενεργού πολίτη και να καλλιεργούν συναισθηματικό υπόβαθρο, για τη δημιουργία και διατήρηση νέων φιλιών (Amadi et al., 2022; Harris, 2014; Carter, Asmus & Moss, 2013; Wilkerson, Perzigian & Schurr, 2013).

Η ΔΙΔΑΚΤΙΚΗ ΠΑΡΕΜΒΑΣΗ

Η συγκεκριμένη διδακτική παρέμβαση εντάσσεται στο μάθημα της Γλώσσας, σύμφωνα με το Αναλυτικό Πρόγραμμα Σπουδών για την Πρωτοβάθμια Εκπαίδευση. Η διδακτική αξιοποίηση του παιδικού βιβλίου «Δύο φίλοι μα τι φίλοι!» συνδυάζει την ανάγνωση, τη γραφή, τη συζήτηση και την καλλιέργεια γλωσσικών και κοινωνικών δεξιοτήτων, που αποτελούν βασικά στοιχεία του Αναλυτικού Προγράμματος Σπουδών για την Πρώτη Δημοτικού, εξυπηρετώντας μια πληθώρα στόχων οι οποίοι κατέχουν κεντρική θέση στο μάθημα της Γλώσσας. Το βιβλίο «Δύο φίλοι μα τι φίλοι!» αποτελεί έναν θαυμάσιο πόρο για την εκπαίδευση σε παιδιά Πρωτοβάθμιας Εκπαίδευσης, καθώς προσφέρει τη δυνατότητα να εξερευνήσουν την αξία της φιλίας και της αποδοχής, αλλά και να κατανοήσουν τη σημασία της αναγνώρισης, της αντίληψης και της λειτουργικής διαχείρισης των φιλικών σχέσεων, μέσα από μια χαριτωμένη και γοητευτική ιστορία. Τα παιδιά δύνανται, επίσης, μέσω της διδακτικής αξιοποίησης του συγκεκριμένου βιντεοβιβλίου να αναγνωρίσουν την αξία της αλληλοϋποστήριξης και της αντιμετώπισης των προκαταλήψεων, έννοιες που είναι ουσιώδεις για την κοινωνική τους ανάπτυξη.

Το γεγονός ότι οι μαθητές με ειδικές εκπαιδευτικές ανάγκες, και ιδιαίτερα αυτοί που ανήκουν στο φάσμα του Αυτισμού, αντιμετωπίζουν ιδιαίτερη δυσκολία ως προς την έκφραση και τη διαχείριση των συναισθημάτων τους, ανάγει την ανάπτυξη της συναισθηματικής τους νοημοσύνης σε στοιχείο κρίσιμης σημασίας για τον καθημερινό βίο τους. Για τον λόγο αυτό, δίνεται έμφαση στη διαθεματική προσέγγιση της γνώσης, καθώς οι σχετικές δραστηριότητες που θα πραγματοποιηθούν συνδέονται με διαφορετικά γνωστικά αντικείμενα (προφορικός λόγος, νοητικές ικανότητες, ψυχοκινητικότητα, και βασικές σχολικές δεξιότητες στη γλώσσα και τις προμαθηματικές δεξιότητες). Με αυτόν τον τρόπο, το ενδιαφέρον των μαθητών μπορεί να ενισχυθεί, με την προσφορά μιας σφαιρικής διάστασης της γνώσης, μέσω της γενίκευσης.

Ο εκπαιδευτικός Ειδικής Αγωγής προσαρμόζει το διδακτικό υλικό, σύμφωνα με τις ιδιαίτερες ανάγκες και τις δυσκολίες των μαθητών, το κοινωνικο-οικονομικό και πολιτισμικό τους πλαίσιο και τα ενδιαφέροντά τους, οικοδομεί ένα μαθησιακό περιβάλλον με σαφείς κανόνες και δομημένες διδακτικές δραστηριότητες, που είναι ασφαλές, υποστηρικτικό και ενθαρρυντικό για το σύνολο των μαθητών του. Τέλος, ο εκπαιδευτικός Ειδικής Αγωγής, με τη δημιουργική αξιοποίηση των ιδιαίτερων στοιχείων κάθε μαθητή, παρέχει υποστήριξη για την ανάπτυξη των κοινωνικών και συναισθηματικών δεξιοτήτων των μαθητών, μέσω της ενθάρρυνσης της ενεργής εμπλοκής τους στη διδασκαλία, καθώς και της επιβράβευσης έπειτα από κάθε μαθησιακή επίτευξη.

Μέσω της διαδικτυακής εκπαιδευτικής πλατφόρμας Nearpod, επιχειρείται η αξιοποίηση όλων των δυνατοτήτων που παρέχονται για τη δημιουργία ενός διαδραστικού μαθήματος συμπεριλαμβανομένων αναδρομικών ερωτήσεων κατανόησης και εμβάθυνσης της ψηφιακής αφήγησης, πρόσθετο υλικό και άλλες διαδραστικές δραστηριότητες που θα ενισχύσουν την κατανόηση και το ενδιαφέρον των μαθητών. Καθ' όλη τη διάρκεια της παρέμβασης είναι διδακτικό ορθό να αξιοποιείται η μέθοδος της διαμορφωτικής αξιολόγησης, με ερωτήσεις ανοικτού τύπου ή δημοσκοπήσεις, οι οποίες εκτός της αξιολόγησης των γνώσεων των μαθητών αποσκοπούν και στην παροχή ανατροφοδότησης, σχετικά με το είδος των διδακτικών δραστηριοτήτων που «ταιριάζουν» στους μαθητές, στοιχείο αρκετά πολύτιμο για τον σχεδιασμό μελλοντικών σεναρίων διδασκαλίας προσαρμοσμένων στις ανάγκες και τα ιδιαίτερα χαρακτηριστικά τους. Το μάθημα συνολικά προσφέρει έναν διασκεδαστικό τρόπο για να κατανοήσουν οι μαθητές περισσότερα για την έννοια της φιλίας, τη σημασία της αποδοχής του διαφορετικού, του κατάλληλου τρόπου έκφρασής τους αλλά και της λειτουργικής διαχείρισης των προκαταλήψεων στη ζωή τους.

ΔΟΜΗ – ΥΛΙΚΑ

Η διδακτική παρέμβαση απαρτίζεται από δραστηριότητες τριών ειδών: α) Δραστηριότητες Προθέρμανσης, β) Κεντρικές δραστηριότητες και γ) Δραστηριότητες Αξιολόγησης και Ολοκλήρωσης. Ειδικότερα αποτελείται από πέντε διαδραστικές διδακτικές δραστηριότητες, οι οποίες δημιουργήθηκαν κατά κύριο λόγο μέσω του ψηφιακού εργαλείου e-me content και του Audacity. Συγκεκριμένα, αξιοποιήθηκαν οι λειτουργίες E-me content: Course Presentation, Iframe Embedder, Image Slider, Audio Recorder, Single Choice Set, False/Wrong Question. Αξιοποιήθηκε, επίσης, και το ψηφιακό εργαλείο Genial.ly, το οποίο ενσωματώθηκε στη διδασκαλία μέσω της λειτουργίας Iframe Embedder του Eme-Content. Για την επεξεργασία των εικόνων της διδασκαλίας αξιοποιήθηκε το ψηφιακό εργαλείο Paint.net. Οι εικόνες αντλήθηκαν από την ιστοσελίδα Pixabay, η οποία επιτρέπει την ελεύθερη χρήση εικόνων, καθώς και από το εικονόλεξο της εκπαιδευτικής σελίδας «Προσβάσιμο» του ΙΕΠ.

Οι φάσεις της διδασκαλίας ήταν οι εξής:

- Εισαγωγή - Καλωσόρισμα στην ψηφιακή τάξη
- Μαθησιακό Συμβόλαιο - Οι κανόνες μας
- Δραστηριότητα 1: Διερεύνηση Προηγούμενων Γνώσεων των Μαθητών
- Δραστηριότητα 2: Ψηφιακή Ανάγνωση ιστορίας «Δύο φίλοι μα τι φίλοι!»
- Δραστηριότητα 3: Ερωτήσεις κατανόησης και εμβάθυνσης
- Δραστηριότητα 4: Κατασκευή Μάσκας Χαρακτήρων
- Δραστηριότητα 5: Αναστοχασμός - Συζήτηση σε ομάδες

Οι στόχοι ήταν οι παρακάτω:

- Κατανόηση της φιλίας: Οι μαθητές θα γνωρίσουν την έννοια της φιλίας και τον τρόπο με τον οποίο οι πραγματικοί φίλοι στηρίζουν ο ένας τον άλλον, ανεξάρτητα από τις διαφορές τους.
- Αντιμετώπιση και λειτουργική διαχείριση των προκαταλήψεων: Συζήτηση και πρόκληση διαλόγου, σχετικά με τον τρόπο με τον οποίο οι προκαταλήψεις επηρεάζουν τις σχέσεις, αλλά και πώς μπορούν οι μαθητές να τις εξαλείψουν και να τις υπερβούν.
- Ενίσχυση της Συναισθηματικής Νοημοσύνης: Ενθάρρυνση των παιδιών να εκφράζουν τα συναισθήματά τους και τη συμπάθειά τους στους άλλους.
- Προβληματισμός: Αναστοχασμός και πρόκληση προβληματισμού σχετικά με τον τρόπο δράσης των μαθητών σε παρόμοιες καταστάσεις.

Εποπτικά Μέσα και Υλικά για τη διδακτική παρέμβαση:

- Βιβλίο «Δύο φίλοι μα τι φίλοι!»
- Το φυσικό βιβλίο για ανάγνωση στην τάξη μέσω ψηφιακής αφήγησης
- Διαδραστικός πίνακας για προβολή του ψηφιακού περιεχομένου και χρήση εφαρμογών, όπως το Kahoot & Nearpod, για τη δημιουργία και την υλοποίηση του κουίζ
- Χαρτόνια και χαρτιά, για την κατασκευή μάσκας των χαρακτήρων.
- Χρώματα, μαρκαδόροι, κολλητική ταινία και ψαλίδια, για τη δημιουργία των χειροτεχνιών και των σκηνικών
- Κάρτες συναισθημάτων, με εικόνες που απεικονίζουν διάφορα συναισθήματα για την ανάλυση των συναισθημάτων των χαρακτήρων
- Κάρτες με σκηνές από την ιστορία, με εικόνες από την ιστορία για την αναπαράσταση σκηνών και την αφήγηση
- Κούκλες ή μαριονέτες, για την αναπαράσταση της ιστορίας και την ενίσχυση της κατανόησης
- Μουσικά όργανα και ηχητικά εφέ, κατά την αφήγηση της ιστορίας (π.χ. κρουστά όργανα)
- Εφαρμογή StoryJumper, για τη δημιουργία ψηφιακών ιστοριών από τους μαθητές
- Πλατφόρμα Padlet, για τη διαδραστική συζήτηση και ανταλλαγή ιδεών
- Εφαρμογή Tux Paint, για τη δημιουργία ψηφιακών σχεδίων και κατασκευών
- Εφαρμογή Voki, για τη δημιουργία άβαταρ και την αναπαράσταση σκηνών από το βιβλίο.

ΠΕΡΙΓΡΑΦΗ ΦΑΣΕΩΝ ΤΗΣ ΔΙΔΑΚΤΙΚΗΣ ΠΑΡΕΜΒΑΣΗΣ

Η εκπαιδευτικός παρουσιάζει το θέμα, τον σκοπό του μαθήματος και τους στόχους μέσω ψηφιακής παρουσίασης με προβολή και επισήμανση των κανόνων του μαθήματος με οπτικοποιημένη μορφή προκειμένου να γίνουν κατανοητοί από το σύνολο των μαθητών (Εικόνα 1).

Στη συνέχεια, οι μαθητές παρακολουθούν ένα εκπαιδευτικό διαδραστικό βίντεο για τα συναισθήματα που έχει ετοιμάσει η εκπαιδευτικός. Το βίντεο είναι εμπλουτισμένο με διαγνωστικές ερωτήσεις πολλαπλής επιλογής και Σωστού-Λάθους, για την αυτοαξιολόγηση και τη διερεύνηση των προϋπαρχουσών γνώσεων των μαθητών. Στη συνέχεια, μετά το πέρας του βίντεο και των δραστηριοτήτων που εμπεριέχονται σε αυτό, η εκπαιδευτικός λαμβάνει ανατροφοδότηση για τις πρότερες γνώσεις των μαθητών σχετικά με τα συναισθήματα. Η παρουσίαση του βιβλίου (ψηφιακής αφήγησης) θα ακολουθήσει τα στάδια που προτείνονται για την επεξεργασία ενός παραμυθιού στο πλαίσιο της μεθόδου CLIL (Συνδυασμένη Εκμάθηση Επιστημονικού Αντικειμένου και Ξένης Γλώσσας). Ειδικότερα, κατά την πρώτη φάση της εισαγωγής, η οποία αποσκοπεί στην προετοιμασία των μαθητών για την κατανόηση και την παρακολούθηση της ιστορίας, πριν από την έναρξη της αφήγησης θα πραγματοποιηθεί εισαγωγή του βιβλίου με επίδειξη του εξωφύλλου από την εκπαιδευτικό προκειμένου να αναδυθούν οι απόψεις των μαθητών σχετικές με το τι παρατηρούν. Εν συνεχεία, η εκπαιδευτικός θα απευθύνει στους μαθητές ερώτηση σχετικά με το τι πιστεύουν ότι σημαίνει ο τίτλος της ιστορίας που

πρόκειται να διδαχθούν, καθώς και με το πώς φαντάζονται την εξέλιξη της ιστορίας. Ακολούθως, θα πραγματοποιηθεί σύντομη περιγραφή των βασικών χαρακτήρων και του πλαισίου της ιστορίας. Τέλος, η εκπαιδευτικός θα απευθύνει στους μαθητές ερώτηση σχετικά με το πώς αντιλαμβάνονται την έννοια της φιλίας στην οποία καθένας μαθητής θα δώσει την προσωπική ερμηνεία του.

Εικόνα 1
Μια από τις διαφάνειες που αναφέρονται στους στόχους της παρέμβασης

Μέσω της συζήτησης με τους μαθητές, που θα προκληθεί από την εκπαιδευτικό, στόχο θα αποτελέσει η εκμαίευση του κεντρικού μηνύματος του παραμυθιού το οποίο θα παρουσιαστεί ως εξής: «Για εμένα, φιλία σημαίνει να έχω κάποιον δίπλα μου σε κάθε κατάσταση, είτε καλή είτε δύσκολη. Σημαίνει να στηρίζουμε ο ένας τον άλλον, να γελάμε και να κλαίμε μαζί, να παραπονιόμαστε, αλλά και να συζητάμε ανοιχτά για να ξεπερνάμε τις παρεξηγήσεις. Δε χρειάζεται ο φίλος μου να μοιάζει μαζί μου για να έχουμε αυτή τη σχέση· αρκεί να αισθάνομαι καλά και ασφαλής μαζί του». Το ψηφιακό βιβλίο (Εικόνα 2), που είναι αναρτημένο στη διαδικτυακή διεύθυνση https://youtu.be/_vPU5UzL_pM, αξιοποιεί διαφορετικές φωνές για κάθε χαρακτήρα-πρωταγωνιστή, ηχητικά εφέ, όπως για παράδειγμα προσθήκη ήχου κατά την εναλλαγή σελίδας, ήχους εισαγωγής και κλεισίματος της ανάγνωσης, όπως και ηχητικά εφέ με κάποια από τα ζώα που εμφανίζονται στο βιβλίο, προκειμένου να ενισχυθεί η διατήρηση της προσοχής των μαθητών κατά τη διαδικασία της ανάγνωσης, να κινητοποιηθεί το ενδιαφέρον τους για ενεργή εμπλοκή στη μαθησιακή διαδικασία και να αναχθεί η ανάγνωση σε ελκυστική και ευχάριστη διαδικασία. Κατά τη διάρκεια της ανάγνωσης, είναι ευεργετική η πραγματοποίηση σύντομων παύσεων για την επεξήγηση δύσκολων λέξεων ή για τη διευκρίνιση διάφορων σκέψεων ή τυχόν απορίων των μαθητών.

Εικόνα 2
Το εξώφυλλο το ψηφιακού βιβλίου

Το παραμύθι - ψηφιακό βιβλίο «Δύο φίλοι μα τι φίλοι!» της Emily Gravett αφηγείται την ιστορία δύο απροσδόκητων φίλων, του Ρος του σκίουρου και ενός αρουραίου, οι οποίοι παρότι είναι διαφορετικοί σε εμφάνιση και συνήθειες, καταφέρνουν να ξεπεράσουν τις δυσκολίες και τις διαφορές τους μέσα από την αλληλοκατανόηση και την αποδοχή. Ο Ρος, το σκιουράκι της ιστορίας μας, ένιωθε μεγάλη μοναξιά, ώσπου γνώρισε τον Ρέο, έναν αρουραίο με τον οποίο περνούσαν υπέροχα. Ωστόσο, ο Ρέος, ως αρουραίος, φάνταζε παράταιρος στα μάτια των άλλων, με αποτέλεσμα να επηρεαστεί και ο Ρος από όσα άκουγε για τον φίλο του και να απομακρυνθεί από κοντά του, μένοντας και πάλι μόνος του. Στη δύσκολη στιγμή του, ωστόσο, ο Ρος ήταν εκείνος που ήρθε δίπλα του να τον βοηθήσει....παρότι ήταν διαφορετικός. Η ιστορία αναδεικνύει τις αξίες της φιλίας, της συνεργασίας και της συγχώρεσης, δίνοντας στα παιδιά ένα ισχυρό μήνυμα για τη δύναμη των ανθρώπινων σχέσεων και την ομορφιά τού να είμαστε διαφορετικοί αλλά ενωμένοι.

Τέλος, κάποιες ενδεικτικές ερωτήσεις κατανόησης και προβληματισμού κλειστού και ανοιχτού τύπου μπορεί να είναι οι παρακάτω:

- Ποιοι είναι οι δύο κεντρικοί ήρωες και φίλοι στη σημερινή μας ιστορία;
- Γιατί πιστεύετε ότι ο Ρος ένιωσε λυπημένος σε αυτό το σημείο;
- Τι θα κάνατε αν βρισκόσασταν στη θέση του Ρος;
- Τι θα κάνατε, αν εσείς ή κάποιος φίλος σας ήταν διαφορετικός από εσάς;
- Πώς πιστεύετε ότι ένιωσε ο αρουραίος, όταν το σκιουράκι σταμάτησε να τον κάνει παρέα;
- Πώς πιστεύετε ότι ένιωσε το σκιουράκι, όταν ο αρουραίος το βοήθησε;

Μετά την προβολή του βίντεο, η εκπαιδευτικός θα κινητοποιήσει μια αναστοχαστική συζήτηση με ερωτήσεις οι οποίες θα ενθαρρύνουν τους μαθητές να εκφράσουν τις σκέψεις και τα συναισθήματά τους σχετικά με τη φιλία. Προτείνεται η αξιοποίηση κινούμενων εικόνων (π.χ. εικόνες από το βίντεο) για να ενισχυθεί η συζήτηση και να βοηθηθούν οι μαθητές να εκφραστούν καλύτερα. Παραδείγματα ερωτήσεων:

- Τι σημαίνει για εσάς η φιλία;
- Ποια χαρακτηριστικά πρέπει να έχει ένας καλός φίλος;
- Μπορείτε να μοιραστείτε μια ιστορία όπου εσείς ή κάποιος φίλος σας έκανε κάτι καλό για εσάς;

Ακολούθως στο πλαίσιο της μικροομαδικής διδασκαλίας και υπό το παροτρυντικό δίχτυ της διαφοροποιημένης διδασκαλίας, οι μαθητές, για ενίσχυση της κατανόησής τους σχετικά με τους χαρακτήρες της ιστορίας, παίζουν ένα ζωντανό ψηφιακό παιχνίδι μνήμης πολλαπλής επιλογής που ονομάζεται «Time to Climb», το οποίο αυξάνει τη συμμετοχή μέσω του φιλικού ανταγωνισμού (Εικόνα 3).

Εικόνα 3
Ένα στιγμιότυπο από το παιχνίδι μνήμης

Στη συνέχεια, η εκπαιδευτικός, σύμφωνα με τα αποτελέσματα των απαντήσεων των μαθητών, τους ομαδοποιεί σε ζευγάρια και εφαρμόζει διαφοροποιημένες πρακτικές. Αναθέτει στους μαθητές που απάντησαν λιγότερες από 4 σωστές απαντήσεις μια εύκολη δραστηριότητα περιγραφής εικόνων που απεικονίζουν δραστηριότητες μεταξύ φίλων, ενώ σε όσους βρίσκονται σε πιο ανεπτυγμένο γνωστικό επίπεδο μια δυσκολότερη δραστηριότητα παραγωγής γραπτού λόγου.

Κατόπιν, οι μαθητές συμπληρώνουν διάφορα φύλλα αξιολόγησης-ανατροφοδότησης, απαντώντας σε διάφορες έρευνες και δημοσκοπήσεις, όπου δίνουν τη γνώμη τους για τον βαθμό δυσκολίας των δραστηριοτήτων του μαθήματος και τον βαθμό στον οποίο προσέλκυσαν το ενδιαφέρον τους. Απαντούν στο τέλος σε μία γενική ερώτηση αναστοχασμού σχετικά με τη φιλία. Τέλος, καρφιτσώνουν σε έναν ψηφιακό συνεργατικό πίνακα είτε με μια εικόνα ή με κείμενο ή με ηχογράφηση φωνής απαντήσεις στην ερώτηση «Πώς μπορεί ένας καλός φίλος να αντιμετωπίσει κάποιον που είναι διαφορετικός από εκείνον». Τέλος, μετά από την παρουσίαση της σύνοψης του μαθήματος, μέσω μιας διαδραστικής παρουσίασης από την εκπαιδευτικό, το μάθημα ολοκληρώνεται με μια αναστοχαστική συζήτηση μεταξύ της εκπαιδευτικού και των μαθητών.

Για δραστηριότητες επέκτασης τα παιδιά μπορούν να κατασκευάσουν μάσκες των κεντρικών χαρακτήρων της ιστορίας, του σκίουρου και του αρουραίου, για να ενισχύσουν τις δεξιότητες της αναγνώρισης και της εκφραστικότητας. Επιλπέον, μπορεί να πραγματοποιηθεί αναπαράσταση ορισμένων σκηνών του βιβλίου, προκειμένου να βιώσουν οι μαθητές τις καταστάσεις και να εξασκήσουν τις δεξιότητες του διαλόγου και της συμφιλίωσης μεταξύ τους. Ακόμη, μπορεί να δοθεί η ευκαιρία στα παιδιά να διαμοιραστούν σε ομάδες, ώστε να συζητήσουν σχετικά με τον τρόπο με τον οποίο μπορούν να είναι καλοί φίλοι, καθώς και για τον τρόπο με οποίο οφείλουν να αντιμετωπίζουν όσους είναι διαφορετικοί από τους ίδιους. Με αυτές τις δραστηριότητες, το βιβλίο «Δύο φίλοι μα τι φίλοι!» μπορεί να μετατραπεί σε μια πλούσια εμπειρία ανάγνωσης που θα βοηθήσει τα παιδιά να εξελίξουν κοινωνικές και συναισθηματικές τους δεξιότητες, μαθαίνοντας παράλληλα να σέβονται και να διαχειρίζονται αποτελεσματικά τη διαφορετικότητα.

Στην παρούσα παρέμβαση (αλλά και γενικά), ο εκπαιδευτικός δρα ως εμψυχωτής, καθοδηγητής και διαμεσολαβητής, εφαρμόζοντας διδακτικές προσεγγίσεις ενεργής μάθησης που επιτρέπουν στον μαθητή να αναπτύξει τις προσδοκώμενες δεξιότητες, βελτιώνοντας τη δέσμευση των μαθητών στην πορεία της μάθησής τους και προωθώντας παράλληλα την ενεργό συμμετοχή τους στη διδασκαλία. Ο μαθητής βρίσκεται στο κέντρο της εκπαιδευτικής διαδικασίας και κατασκευάζει τη δική του γνώση, ενσωματώνοντάς τη στο προϋπάρχον γνωστικό του υπόβαθρο από την πραγματική καθημερινή του ζωή. Συμμετέχει σε ομαδικές δραστηριότητες που προάγουν την επίλυση προβλημάτων, την επικοινωνία, την κριτική σκέψη, τη συνεργασία και τη δημιουργικότητα.

ΣΥΖΗΤΗΣΗ, ΣΥΜΠΕΡΑΣΜΑΤΑ, ΠΡΟΤΑΣΕΙΣ

Η παρούσα εργασία επιχείρησε να καταδείξει τη μετασχηματιστική δυναμική και τη σημασία της ψηφιακής αφήγησης ως ενός πολυτροπικού και πολυαισθητηριακού εργαλείου μάθησης στο πλαίσιο της Ειδικής Αγωγής. Μέσα από την εφαρμογή μιας στοχευμένης διδακτικής παρέμβασης, βασισμένης στο ψηφιακό παραμύθι «Δύο φίλοι μα τι φίλοι!», υπό τη μορφή ενός διαδραστικού βίντεο Ψηφιακής Δομημένης Αφήγησης πιθανόν να αναδείχθηκε η εκπαιδευτική αξία της αφήγησης, ως μέσου ενίσχυσης της γλωσσικής έκφρασης, της συναισθηματικής νοημοσύνης και της κοινωνικής αλληλεπίδρασης μαθητών με αναπηρία ή/και ειδικές εκπαιδευτικές ανάγκες. Αυτή η εκπαιδευτική παρέμβαση αποπειράθηκε να μετατραπεί σε μια πλούσια αφηγηματική εμπειρία, ώστε να λειτουργήσει ως καταλύτης για την ευδοκίμηση των κοινωνικών και συναισθηματικών δεξιοτήτων των μαθητών αλλά και ως μοχλός για την ανάπτυξη του σεβασμού προς τους άλλους, καθώς για την αποτελεσματικότερη διαχείριση της διαφορετικότητας.

Η παρούσα ψηφιακή ιστορία μοιράζεται βασικές ανθρώπινες αξίες, όπως η φιλία, η υποστήριξη, ο αλληλοσεβασμός και η κατανόηση της διαφορετικότητας, οι οποίες μπορούν να αναπτυχθούν ουσιαστικότερα, υπό το παιδαγωγικό ενδιαίτημα της ψηφιακής αφήγησης. Η οικοδόμηση του αξιακού κώδικα των μαθητών με τέτοια ανθρωπιστική διάσταση είναι πολύ σημαντική για την καλλιέργεια και εδραίωση της αυτογνωσίας, της κοινωνικής ταυτότητας και της συνείδησής τους, ως ενεργών και ισότιμων μελών-πολιτών του σχολικού περιβάλλοντος-κοινότητας και της κοινωνίας γενικότερα. Η ψηφιακή αφήγηση μπορεί να αποτελέσει καθοριστικό μέσο ενδυνάμωσης, καλλιέργειας και ανάπτυξης βασικών δεξιοτήτων, πέρα από τις γνωστικές, για εκείνους τους μαθητές που πολύ συχνά αντιμετωπίζουν φραγμούς κατά την καθολική ένταξή τους στην εκπαιδευτική διαδικασία. Η αξιοποίηση της ψηφιακής αφήγησης, αδιαμφισβήτητα, μπορεί να οδηγήσει σε ενταξιακά, γόνιμα και παροτρυντικά περιβάλλοντα μάθησης. Εξάλλου, η ψηφιακή αλλά και η παραδοσιακή αφήγηση ήταν ανέκαθεν δίαυλοι επικοινωνίας, ενσυναίσθησης συνεργασίας και αυτενέργειας. Γενικά, η αφήγηση δεν είναι μόνο μια ριζοσπαστική, καινοτόμος πρακτική, αλλά κυρίως αποτελεί μια ουσιώδη παιδαγωγική επιλογή, που υποστηρίζει τη διαφοροποίηση στη διδασκαλία, την ενεργητική συμμετοχή και τον ενθουσιασμό των μαθητών, καθώς και τη βιωματική μάθηση, με τη δημιουργία πλούσιων συναρπαστικών, χειραφετικών, συμπεριληπτικών και αλληλεπιδραστικών περιβαλλόντων μάθησης.

Η συστηματική ενσωμάτωση εργαλείων Web 2.0 στην καθημερινή διδακτική πρακτική μπορεί να δημιουργήσει συνθήκες προσέλκυσης της προσοχής των μαθητών με ειδικές εκπαιδευτικές ανάγκες, αυξάνοντας το ενδιαφέρον τους, την προσήλωση και τη συμμετοχή τους. Για την πλήρη αξιοποίηση της ψηφιακής αφήγησης απαιτείται διεύρυνση της χρήσης της σε ποικίλα θέματα και γνωστικά αντικείμενα και σε διάφορα ηλικιακά επίπεδα, με θεμιτή επιδίωξη μια ολιστική και διεπιστημονική γνωστική προσέγγιση. Παράλληλα, είναι απαραίτητα και συστηματικά, οργανωμένα και

περιοδικά προγράμματα επιμόρφωσης για εκπαιδευτικούς που θα ενισχύσουν σταδιακά τις πρακτικές δεξιότητές τους στη μελέτη, τον σχεδιασμό και την εφαρμογή ψηφιακών αφηγηματικών, διαφοροποιημένων διαμεσολαβήσεων, με γνώμονα την κάλυψη των αναγκών των μαθητών τους. Τα επιμορφωτικά προγράμματα θα πρέπει οπωσδήποτε να περιλαμβάνουν τόσο θεωρητικές αρχές όσο και ανάπτυξη τεχνικών δεξιοτήτων που είναι κρίσιμες για τη δημιουργία ψηφιακών αφηγήσεων υψηλής προστιθέμενης μαθησιακής αξίας.

Ένας άλλος βασικός πυλώνας παιδαγωγικής αποτελεσματικότητας είναι η ενίσχυση της μαθησιακής ένταξης, μέσω της σύνθεσης ψηφιακού περιεχομένου με εστίαση στην ατομική έκφραση, τη συνεργατική μάθηση και τη διαφοροποίηση, με τους ίδιους τους μαθητές στον ρόλο του κατασκευαστή, όπως και η θεωρία του κονστρουκτιονισμού του Seymour Papert (1928 - 2016) προτείνει. Επιπλέον, μια ισχυρή σχέση μεταξύ σχολικού περιβάλλοντος, οικογένειας και ευρύτερης σχολικής κοινότητας δεν μπορεί να μη σηματοδοτηθεί. Τα προϊόντα ψηφιακής αφήγησης μπορούν να χρησιμοποιηθούν ως επαυξημένα εργαλεία για τη μετάδοση αρχών και αξιών, ενισχύοντας έτσι την αποδοχή της διαφορετικότητας και βελτιώνοντας τη σχολική κουλτούρα. Αυτή η συνεργασία με γονείς και άλλους σχετικούς φορείς μπορεί να οδηγήσει στην ανάπτυξη κοινωνικών δεξιοτήτων στο οικογενειακό και κοινοτικό περιβάλλον, κεφαλαιοποιώντας τη σύνδεση σχολείου, οικογένειας και κοινότητας και αυξάνοντας την ευαισθητοποίηση σε θέματα συνεκπαίδευσης, συμπερίληψης και γενικότερα σε ζητήματα ενταξιακής εκπαίδευσης.

Τέλος, κομβική θεωρείται και η διεξαγωγή σχετικών ποιοτικών και ποσοτικών ερευνών, με σκοπό να κατανοηθούν πληρέστερα όχι μόνο οι γνωστικοί μηχανισμοί της ψηφιακής αφήγησης αλλά και ο βαθμός του αντικτύπου τους, όσον αφορά στις γλωσσικές, κοινωνικές και νοητικές δεξιότητες των μαθητών, ειδικά των Ειδικών Σχολείων. Μια τέτοια ερευνητική προσέγγιση είναι δυνατό να παράσχει έναν πυρήνα απαραίτητων «αποδείξεων», ώστε να δρομολογηθούν διαδικασίες για μια πληρέστερη ένταξη της ψηφιακής αφήγησης στη σχολική καθημερινότητα. Η επαγόμενη ανάπτυξη μαθητοκεντρικών, διερευνητικών αναστοχαστικών και μεταγνωστικών περιβαλλόντων μάθησης θα αποτελέσουν εγγυητές εξατομίκευσης της μαθησιακής επιτυχίας, για την πλειονότητα των ηλικιακών και γνωστικών επιπέδων. Ωστόσο, ιδιαίτερη προσοχή χρειάζεται, καθώς μόνο μια καλή ιστορία γίνεται με την αξιοποίηση της τεχνολογίας καλύτερη, μια κακή όχι, τουναντίον μάλιστα. Ο Jason Ohler, ειδικός στην ψηφιακή αφήγηση, το είπε ξεκάθαρα αλλά και πολύ επιτυχημένα και εύστοχα (Bhalla, 2020): «Το να λες αδύναμες ιστορίες με την τεχνολογία είναι σαν να δίνεις σε έναν κακό κιθαρίστα έναν μεγαλύτερο ενισχυτή».

ΠΕΡΙΛΗΨΗ

Η παρούσα βιβλιογραφική ανασκόπηση εξετάζει διεξοδικά τη σχέση ανάμεσα στην ψηφιακή αφήγηση και την ανάπτυξη της κριτικής σκέψης στους μαθητές. Στόχος της παρούσας μελέτης είναι να αναδείξει πώς η δημιουργία, η ανάλυση και η αξιολόγηση ψηφιακών αφηγήσεων μπορούν να ενισχύσουν ουσιαστικά την ικανότητα των μαθητών/-τριών να αξιολογούν πληροφορίες με κριτικό πνεύμα, να διατυπώνουν έγκυρα επιχειρήματα και να επιλύουν σύνθετα προβλήματα με δημιουργικό τρόπο.

Η μεθοδολογία που ακολουθήθηκε βασίζεται σε συστηματική βιβλιογραφική ανασκόπηση, με κριτήρια επιλογής που περιλαμβάνουν τη συνάφεια με το αντικείμενο της ψηφιακής αφήγησης και της κριτικής σκέψης, τη δημοσίευση σε έγκριτα επιστημονικά περιοδικά και τη χρονολογική εγγύτητα των ερευνών (τελευταία δεκαετία). Οι πηγές περιλαμβάνουν θεωρητικά άρθρα, εμπειρικές μελέτες και μετα-αναλύσεις που εστιάζουν στις εκπαιδευτικές εφαρμογές της ψηφιακής αφήγησης.

Η ανασκόπηση αυτή καλύπτει ένα ευρύ φάσμα ερευνητικών εργασιών και εξετάζει τις εφαρμογές της ψηφιακής αφήγησης σε διάφορα εκπαιδευτικά πλαίσια, από την Πρωτοβάθμια έως την Τριτοβάθμια εκπαίδευση. Εμβαθύνει στις προκλήσεις και τις ευκαιρίες που αναδύονται κατά την ενσωμάτωση της ψηφιακής αφήγησης στην εκπαιδευτική πρακτική, καθώς και στις επιπτώσεις της στην ανάπτυξη Δεξιοτήτων του 21ου αιώνα, όπως η συνεργασία, η επικοινωνία και η δημιουργικότητα.

Μεταξύ των κύριων θεματικών ενοτήτων που αναλύονται, περιλαμβάνονται ο ακριβής ορισμός και τα βασικά χαρακτηριστικά της ψηφιακής αφήγησης, τα θεωρητικά πλαίσια που συνδέουν την αφήγηση με την κριτική σκέψη, οι συγκεκριμένες εφαρμογές της ψηφιακής αφήγησης στην εκπαίδευση, τα εργαλεία και οι τεχνικές που χρησιμοποιούνται για τη δημιουργία και την ανάλυση ψηφιακών ιστοριών, καθώς και τα αποτελέσματα της ψηφιακής αφήγησης στην ανάπτυξη δεξιοτήτων κριτικής σκέψης. Επιπλέον, διερευνώνται οι προκλήσεις και οι προτάσεις για την αποτελεσματική ενσωμάτωση της ψηφιακής αφήγησης στην εκπαιδευτική διαδικασία.

Η συμβολή της παρούσας ανασκόπησης έγκειται στην ανάδειξη τόσο των κύριων ευρημάτων της υπάρχουσας έρευνας όσο και των υφιστάμενων κενών. Ειδικότερα, διαπιστώνεται ότι η ψηφιακή αφήγηση έχει θετική επίδραση στην κριτική σκέψη, αλλά απαιτούνται περισσότερες εμπειρικές μελέτες που να εξετάζουν τη μακροπρόθεσμη επίδρασή της και την προσαρμογή της σε διαφορετικά εκπαιδευτικά περιβάλλοντα.

Συνοψίζοντας, η βιβλιογραφική ανασκόπηση καταλήγει ότι η ψηφιακή αφήγηση αποτελεί ένα πολλά υποσχόμενο εργαλείο για την καλλιέργεια της κριτικής σκέψης στους μαθητές. Η δημιουργία και η ανάλυση ψηφιακών ιστοριών μπορούν να ενισχύσουν σημαντικά την ενεργό μάθηση, την συνεργασία και την ανάπτυξη δεξιοτήτων που είναι απαραίτητες για την επιτυχία στον σύγχρονο ψηφιακό κόσμο. Η αποτελεσματική ενσωμάτωση της ψηφιακής αφήγησης στην εκπαίδευση απαιτεί την κατάλληλη εκπαίδευση και υποστήριξη των εκπαιδευτικών, την πρόσβαση σε σύγχρονα τεχνολογικά εργαλεία και τη δημιουργία ενός υποστηρικτικού μαθησιακού περιβάλλοντος που ενθαρρύνει την καινοτομία και τη δημιουργικότητα.

Λέξεις – κλειδιά: Ψηφιακή αφήγηση, κριτική σκέψη, ανάπτυξη δεξιοτήτων

ΕΙΣΑΓΩΓΗ

Η εκπαίδευση στον 21ο αιώνα χαρακτηρίζεται από την ανάγκη ενσωμάτωσης καινοτόμων παιδαγωγικών προσεγγίσεων που αξιοποιούν τις δυνατότητες της ψηφιακής τεχνολογίας και ταυτόχρονα προάγουν τις δεξιότητες του 21ου αιώνα. Η ψηφιακή αφήγηση (digital storytelling), ως μία μορφή πολυτροπικού και πολυμεσικού λόγου, αναδύεται τα τελευταία χρόνια ως ένα δυναμικό εκπαιδευτικό εργαλείο, καθώς συνδυάζει τη δύναμη της αφήγησης με τις δυνατότητες των νέων τεχνολογιών. Παράλληλα, η ανάπτυξη της κριτικής σκέψης θεωρείται μία από τις βασικότερες επιδιώξεις της σύγχρονης εκπαίδευσης, καθώς συμβάλλει στην αυτόνομη μάθηση, στη λήψη αποφάσεων και στην κοινωνική ενσυναίσθηση. Στην παρούσα εργασία εξετάζεται η αξιοποίηση της ψηφιακής αφήγησης ως μέσου καλλιέργειας της κριτικής σκέψης στους/στις μαθητές/-τριες, αναδεικνύοντας τις θεωρητικές βάσεις, τα πλεονεκτήματα και τις παιδαγωγικές εφαρμογές της.

Η έννοια της κριτικής σκέψης δεν περιορίζεται μόνο στην ικανότητα αξιολόγησης πληροφοριών, αλλά περιλαμβάνει επίσης δεξιότητες όπως η ανάλυση, η σύνθεση, η επιχειρηματολογία και η επίλυση προβλημάτων. Στο σχολικό πλαίσιο, η καλλιέργεια της κριτικής σκέψης καθίσταται απαραίτητη για την προώθηση της ενεργού συμμετοχής των μαθητών/-τριών, την ενίσχυση της αυτονομίας τους και την κατανόηση πολύπλοκων κοινωνικών ζητημάτων. Η ενσωμάτωση αυτής της δεξιότητας στη διδακτική πράξη απαιτεί μεθόδους που ξεπερνούν τη συμβατική διδασκαλία και δημιουργούν συνθήκες αυθεντικής μάθησης. Σε αυτό το πλαίσιο, η ψηφιακή αφήγηση προσφέρει ένα περιβάλλον πλούσιο σε ερεθίσματα και προκλήσεις.

Η ψηφιακή αφήγηση, ως διδακτική πρακτική, εστιάζει στην προσωπική έκφραση και δημιουργικότητα των μαθητών/-τριών, παρέχοντας τους τη δυνατότητα να συνθέσουν τις δικές τους αφηγήσεις μέσα από τη χρήση εικόνων, ήχου, βίντεο και γραπτού λόγου. Καθώς οι μαθητές/-τριες εμπλέκονται ενεργά στη δημιουργία περιεχομένου, αναπτύσσουν δεξιότητες όπως η αναζήτηση και αξιολόγηση πληροφοριών, η οργάνωση και παρουσίαση επιχειρημάτων, καθώς και η συνεργατική επίλυση προβλημάτων. Αυτές οι διαδικασίες ενεργοποιούν ταυτόχρονα γνωστικές και μεταγνωστικές λειτουργίες, συμβάλλοντας στη βαθύτερη κατανόηση και στην καλλιέργεια της κριτικής σκέψης.

Επιπλέον, η ψηφιακή αφήγηση ευνοεί τη διαφοροποιημένη διδασκαλία, επιτρέποντας την προσαρμογή του μαθησιακού περιεχομένου στις ανάγκες, τα ενδιαφέροντα και το επίπεδο των μαθητών/-τριών. Η πολυτροπικότητα του εργαλείου ενισχύει τη συμμετοχή μαθητών/-τριών με διαφορετικά μαθησιακά προφίλ, δίνοντας φωνή και σε εκείνους που δυσκολεύονται να εκφραστούν με τον παραδοσιακό γραπτό λόγο. Η συνεργατική φύση των δραστηριοτήτων ψηφιακής αφήγησης ενδυναμώνει τη διαπραγμάτευση απόψεων, την επιχειρηματολογία και την αποδοχή της διαφορετικότητας, στοιχεία που ενισχύουν τόσο τη γνωστική όσο και τη συναισθηματική διάσταση της κριτικής σκέψης.

Η παρούσα εργασία επιχειρεί να αναδείξει τη συμβολή της ψηφιακής αφήγησης στην καλλιέργεια της κριτικής σκέψης, αξιοποιώντας τη σχετική βιβλιογραφία και τεκμηριωμένες παιδαγωγικές προσεγγίσεις. Αφού παρουσιαστεί το θεωρητικό υπόβαθρο των δύο εννοιών (ψηφιακή αφήγηση και κριτική σκέψη), θα ακολουθήσει ανάλυση της δυναμικής τους αλληλεπίδρασης στο εκπαιδευτικό περιβάλλον. Τέλος, θα εξεταστούν τρόποι εφαρμογής της ψηφιακής αφήγησης στην τάξη και προτάσεις αξιοποίησής της στο ελληνικό σχολείο, με βάση τις αρχές της σύγχρονης παιδαγωγικής.

Η αξιοποίηση της ψηφιακής αφήγησης στην εκπαίδευση μπορεί να προσφέρει σημαντικά πλεονεκτήματα για τη διδασκαλία και την ανάπτυξη των μαθητών/-τριων. Η διαδικασία της ψηφιακής αφήγησης είναι πολυδιάστατη και ενσωματώνει μέσα μαζικής ενημέρωσης, διαδραστικότητα και δημιουργική γραφή. Αυτά τα χαρακτηριστικά επιτρέπουν στους/στις μαθητές/-τριες να εμπλακούν ενεργά στη διαδικασία μάθησης και να δημιουργήσουν έργα που συνδυάζουν την προσωπική τους έκφραση με τη συλλογική γνώση. Η χρήση των ψηφιακών εργαλείων στην τάξη επιτρέπει στους μαθητές να αποκτήσουν δεξιότητες που είναι απαραίτητες για τον 21ο αιώνα, όπως η ψηφιακή εγγραμματοσύνη, η αναλυτική σκέψη, η συνεργασία και η επικοινωνία.

Η έννοια της κριτικής σκέψης, ως μία ικανότητα που προϋποθέτει την ικανότητα αξιολόγησης, ερμηνείας και εφαρμογής πληροφοριών, έχει αυξηθεί στον σύγχρονο κόσμο, καθώς οι μαθητές/-τριες καλούνται να κατανοήσουν και να αναλύσουν σύνθετες καταστάσεις, να συνθέσουν και να αξιολογήσουν πληροφορίες από διάφορες πηγές και να αναπτύξουν στρατηγικές για την επίλυση προβλημάτων. Μέσα από την ψηφιακή αφήγηση, οι μαθητές/-τριες έχουν την ευκαιρία να εξασκήσουν αυτές τις δεξιότητες σε ένα ασφαλές και υποστηρικτικό περιβάλλον, όπου η μάθηση είναι ενεργητική και αλληλεπιδραστική.

Η παιδαγωγική αξία της ψηφιακής αφήγησης έγκειται στο γεγονός ότι ενθαρρύνει τη διατύπωση ερωτημάτων, την αναζήτηση πληροφοριών και τη διαπραγμάτευση απόψεων, δημιουργώντας έτσι ευκαιρίες για βαθύτερη κατανόηση και κριτική σκέψη. Επιπλέον, η χρήση των ΤΠΕ στην τάξη προσφέρει στους/στις μαθητές/-τριες τη δυνατότητα να αναπτύξουν δεξιότητες ικανές να τους εξοπλίσουν για την κοινωνία του 21ου αιώνα, δίνοντάς τους εργαλεία για την

αντιμετώπιση των προκλήσεων του σύγχρονου κόσμου. Η σύνδεση της ψηφιακής αφήγησης με την τοπική ιστορία, για παράδειγμα, ενισχύει την αίσθηση του τόπου και της κοινότητας στους/στις μαθητές/-τριες, ενώ ταυτόχρονα τους βοηθά να αντιληφθούν τη σημασία της κριτικής αξιολόγησης των ιστορικών δεδομένων και της αξιοποίησης ποικίλων πηγών πληροφόρησης.

Η διαδικασία της ψηφιακής αφήγησης δεν είναι απλώς μια αναπαραγωγή γεγονότων, αλλά μία ενεργή διαδικασία επεξεργασίας και αναστοχασμού. Οι μαθητές/-τριες καλούνται να ενσωματώσουν τη δική τους προσωπική αίσθηση και κατανόηση στα έργα τους, επεξεργαζόμενοι και αξιολογώντας πληροφορίες για να δημιουργήσουν κάτι καινούριο και ενδιαφέρον. Αυτό προάγει την ικανότητά τους να σκέφτονται κριτικά, να αμφισβητούν δεδομένα και να αναγνωρίζουν την πολυπλοκότητα του κόσμου γύρω τους.

Η δυνατότητα συνεργασίας και αλληλεπίδρασης μέσω της ψηφιακής αφήγησης δημιουργεί έναν κοινοτικό χαρακτήρα στην μάθηση. Η συνεργασία είναι ουσιαστική στην ανάπτυξη της κριτικής σκέψης, καθώς οι μαθητές/-τριες καλούνται να ανταλλάξουν απόψεις, να προτείνουν λύσεις και να εξετάσουν διαφορετικές οπτικές γωνίες σε σχέση με το ίδιο θέμα. Αυτή η διαδικασία ενισχύει την αναλυτική σκέψη τους και τους βοηθά να αναγνωρίζουν τις δυνατότητες και τα όρια των απόψεων που εκφράζονται από άλλους.

Η εφαρμογή της ψηφιακής αφήγησης μπορεί να προσφέρει επίσης μια σημαντική ευκαιρία για την ανάπτυξη της ενσυναίσθησης, καθώς οι μαθητές/-τριες καλούνται να αντιληφθούν και να εκφράσουν τις εμπειρίες άλλων ατόμων ή ομάδων μέσω των αφηγημάτων τους. Η ενσυναίσθηση είναι απαραίτητη για την ανάπτυξη μιας κριτικής σκέψης που λαμβάνει υπόψη τις διαφορετικές ανάγκες, πεποιθήσεις και καταστάσεις των άλλων. Μέσω της ψηφιακής αφήγησης, οι μαθητές/-τριες ενθαρρύνονται να διαμορφώσουν μια κριτική και συναισθηματική σύνδεση με τα θέματα που εξετάζουν, γεγονός που ενδυναμώνει την ηθική τους ανάπτυξη και την κοινωνική τους ευαισθησία.

Αξιοποιώντας τη δύναμη της ψηφιακής αφήγησης, οι δάσκαλοι μπορούν να προσφέρουν στους μαθητές μια εξατομικευμένη και διαδραστική εμπειρία μάθησης, η οποία ενισχύει την προσωπική τους ανάπτυξη και την κοινωνική τους συνείδηση. Η συνύπαρξη των παραδοσιακών και ψηφιακών μορφών μάθησης μπορεί να επιφέρει μια πιο ολοκληρωμένη και ποικιλόμορφη μαθησιακή εμπειρία, όπου οι μαθητές/-τριες είναι σε θέση να αναπτύξουν πλήρως τις ικανότητές τους και να ανταποκριθούν στις προκλήσεις του σύγχρονου κόσμου.

Συνολικά, η ψηφιακή αφήγηση μπορεί να αποτελέσει έναν πολύτιμο σύμμαχο για τη διδασκαλία της κριτικής σκέψης στους/στις μαθητές/-τριες, προσφέροντας όχι μόνο εργαλεία για την ανάπτυξή τους αλλά και μια ευκαιρία να συνδεθούν με τη γνώση με έναν πιο δημιουργικό και συμμετοχικό τρόπο. Η επιτυχής ενσωμάτωσή της στην εκπαιδευτική διαδικασία προϋποθέτει τη συνεργασία όλων των εμπλεκόμενων φορέων, ώστε να δημιουργηθεί ένα υποστηρικτικό και ερευνών περιβάλλον που ενθαρρύνει τη συνεχιζόμενη μάθηση, την αναστοχαστική σκέψη και την κοινωνική συμμετοχή των μαθητών/-τριών.

Η ΨΗΦΙΑΚΗ ΑΦΗΓΗΣΗ ΣΤΗ ΣΥΓΧΡΟΝΗ ΕΚΠΑΙΔΕΥΣΗ

Η ψηφιακή αφήγηση συνδυάζει τη δύναμη της προσωπικής ή συλλογικής αφήγησης με τη χρήση πολυμέσων όπως εικόνες, ήχος, βίντεο και κείμενο. Πρόκειται για μια διαδικασία δημιουργίας ενός αφηγήματος, το οποίο μπορεί να είναι αφηγηματικό, πληροφοριακό, περιγραφικό ή και ερμηνευτικό, με τη χρήση εργαλείων ΤΠΕ (Robin, 2008).

Στο εκπαιδευτικό πλαίσιο, η ψηφιακή αφήγηση δεν αξιοποιείται μόνο για την ενίσχυση των τεχνολογικών δεξιοτήτων των μαθητών/-τριών αλλά, κυρίως, για την ανάπτυξη της δημιουργικότητας, της κριτικής σκέψης, της ενσυναίσθησης και της συνεργατικότητας. Ενισχύει τη διαθεματική προσέγγιση της γνώσης και προάγει την ενεργητική και βιωματική μάθηση (Sadik, 2008). Εφαρμόζεται σε όλα τα γνωστικά αντικείμενα και σε όλες τις βαθμίδες εκπαίδευσης, προσαρμοζόμενη στις ανάγκες και τα ενδιαφέροντα των μαθητών.

Η ψηφιακή αφήγηση, ως μέσο εκπαίδευσης, υπερβαίνει το παραδοσιακό μοντέλο της διδακτικής προσέγγισης, όπου η έμφαση δίνεται κυρίως στην απομνημόνευση και την παθητική αποδοχή πληροφοριών. Αντίθετα, ενισχύει τη συμμετοχική μάθηση, επιτρέποντας στους/στις μαθητές/-τριες να δημιουργήσουν και να μοιραστούν τη δική τους γνώση μέσω της αφήγησης προσωπικών ή συλλογικών ιστοριών. Με τη χρήση ΤΠΕ, οι μαθητές/-τριών έχουν τη δυνατότητα να ενσωματώσουν διάφορα μέσα (όπως φωτογραφίες, βίντεο, ήχο, κείμενα), κάτι που καθιστά τη διαδικασία μάθησης πιο δυναμική και ελκυστική. Μέσα από τη δημιουργία ψηφιακών αφηγήσεων, οι μαθητές/-τριες συνδέουν τη θεωρία με την πράξη και αποκτούν ενεργό ρόλο στην παραγωγή και κατανόηση του εκπαιδευτικού περιεχομένου.

Η ψηφιακή αφήγηση ενσωματώνει και ενδυναμώνει τις δεξιότητες του 21ου αιώνα, με έμφαση στην ανάπτυξη της κριτικής σκέψης, της δημιουργικότητας και της συνεργασίας. Σύμφωνα με τον Robin (2008), η δημιουργία ψηφιακών

αφηγήσεων βοηθά τους μαθητές να αναπτύξουν τη δυνατότητα να σκέφτονται κριτικά, να αναλύουν πληροφορίες και να οργανώνουν ιδέες με σαφήνεια και συνέπεια. Κατά τη διάρκεια της διαδικασίας, οι μαθητές/-τριες καλούνται να αξιολογήσουν τις πηγές που χρησιμοποιούν, να επιλέξουν τα πιο κατάλληλα εργαλεία για την παρουσίαση του περιεχομένου τους και να αναπτύξουν επιχειρηματολογία που υποστηρίζει την αφήγησή τους. Αυτή η διαδικασία συνδέεται άμεσα με τη δυνατότητα ανάπτυξης κριτικής σκέψης, καθώς οι μαθητές/-τριες αναγκάζονται να προβληματιστούν για την εγκυρότητα των πληροφοριών που επιλέγουν και για τον τρόπο με τον οποίο αυτές θα παρουσιαστούν στο κοινό τους.

Επιπλέον, η ψηφιακή αφήγηση προάγει την ενσυναίσθηση, καθώς οι μαθητές/-τριες καλούνται να ενσωματώσουν προσωπικά στοιχεία ή να υιοθετήσουν διαφορετικές οπτικές γωνίες, αναπτύσσοντας έτσι κατανόηση για τις εμπειρίες των άλλων. Μέσω της αφήγησης ιστοριών, μπορούν να εξετάσουν διάφορα κοινωνικά, ηθικά και πολιτιστικά ζητήματα, προάγοντας τη συναισθηματική νοημοσύνη και ενισχύοντας τη σύνδεση τους με τον κόσμο γύρω τους. Η διαδικασία αυτή ευνοεί την αυτοεκτίμηση και την ενίσχυση της προσωπικής έκφρασης, καθώς οι μαθητές/-τριες μπορούν να μοιραστούν τις σκέψεις και τα συναισθήματά τους με το κοινό, ενώ ταυτόχρονα ενθαρρύνεται η αποδοχή και η σεβαστή διαχείριση των διαφορετικών απόψεων.

Η ψηφιακή αφήγηση ενσωματώνει, επίσης, τη συνεργασία, καθώς πολλές φορές οι μαθητές/-τριες καλούνται να δουλέψουν σε ομάδες για τη δημιουργία κοινών έργων. Αυτή η συνεργατική διαδικασία ενισχύει την ικανότητα των μαθητών/-τριών να επικοινωνούν και να συνεργάζονται, να διαπραγματεύονται ιδέες και να ενσωματώνουν τη γνώμη των άλλων. Η συνεργασία αυτή είναι κρίσιμη για την ανάπτυξη κοινωνικών δεξιοτήτων και την καλλιέργεια μιας θετικής σχολικής κουλτούρας. Επιπλέον, οι μαθητές/-τριες αποκτούν εμπειρία στην αξιολόγηση και στη συστηματική βελτίωση της δουλειάς τους, καθώς συνήθως το έργο της ψηφιακής αφήγησης ενσωματώνει διαδικασίες ανατροφοδότησης και επεξεργασίας.

Η εφαρμογή της ψηφιακής αφήγησης σε όλα τα γνωστικά αντικείμενα, από τη γλώσσα και τη λογοτεχνία μέχρι τις φυσικές επιστήμες και την τοπική ιστορία, επιτρέπει στους/στις μαθητές/-τριες να εμπλέκονται με τη γνώση με έναν πιο ενεργό και προσωπικό τρόπο. Η ψηφιακή αφήγηση μπορεί να ενσωματωθεί και σε διαθεματικά προγράμματα, ενθαρρύνοντας τη σύνδεση διαφορετικών γνωστικών περιοχών και προάγοντας την ολοκληρωμένη κατανόηση του κόσμου γύρω μας. Για παράδειγμα, στην κοινωνική και πολιτιστική ιστορία, οι μαθητές/-τριες μπορούν να δημιουργήσουν αφηγήσεις για ιστορικά γεγονότα ή να εξετάσουν την επίδραση του παρελθόντος στην κοινωνία του σήμερα, συνδυάζοντας ιστορικά δεδομένα με προσωπικές μαρτυρίες ή δημιουργικές απεικονίσεις του παρελθόντος.

Η εφαρμογή της ψηφιακής αφήγησης στις τάξεις δημιουργεί ένα περιβάλλον όπου οι μαθητές/-τριες δεν είναι απλώς θεατές της μάθησης, αλλά ενεργοί δημιουργοί περιεχομένου. Αντί να περιμένουν τη μετάδοση πληροφοριών από τον δάσκαλο, αναλαμβάνουν την ευθύνη για τη μάθησή τους, αναπτύσσοντας δεξιότητες επίλυσης προβλημάτων και αναπτύσσοντας την ικανότητα να προσαρμόζονται σε νέες τεχνολογίες και νέες προκλήσεις. Με αυτόν τον τρόπο, η ψηφιακή αφήγηση προάγει την αναγνώριση της αξίας της προσωπικής μάθησης και ενθαρρύνει τους/τις μαθητές/-τριες να σκέφτονται κριτικά και δημιουργικά για τον κόσμο που τους περιβάλλει.

Αξιοσημείωτο είναι το γεγονός ότι, εκτός από την ενίσχυση των γνωστικών και συναισθηματικών δεξιοτήτων, η ψηφιακή αφήγηση έχει τη δυνατότητα να ενσωματώνει μια ευρύτερη διαθεματική και βιωματική προσέγγιση της μάθησης, επιτρέποντας στους/στις μαθητές/-τριες να συνδέσουν την προσωπική τους εμπειρία με τη μάθηση στο σχολείο. Η μαθησιακή αυτή διαδικασία ενθαρρύνει την προσωπική έκφραση και την ατομική ανάπτυξη, ενώ ταυτόχρονα ενισχύει τη συνεργασία και τη συλλογική μάθηση, στοιχεία απαραίτητα για τον 21ο αιώνα.

Η ανάπτυξη της κριτικής σκέψης είναι από τα πιο σημαντικά παιδαγωγικά επιτεύγματα της σύγχρονης εκπαίδευσης. Η κριτική σκέψη δεν περιορίζεται μόνο στην ικανότητα αξιολόγησης ή ανάλυσης δεδομένων, αλλά απαιτεί από τους/τις μαθητές/-τριες να αναπτύξουν μια συνειδητή στάση απέναντι στην πληροφορία, τη διαδικασία της μάθησης και την ίδια τη ζωή. Εδώ ακριβώς έρχεται η ψηφιακή αφήγηση, προσφέροντας ένα αποτελεσματικό μέσο για την ανάπτυξή της.

Η δημιουργία ψηφιακών αφηγήσεων απαιτεί από τους/τις μαθητές/-τριες να εμπλακούν ενεργά στην αξιολόγηση της πληροφορίας, να αναλύσουν δεδομένα, να συνθέσουν διαφορετικές απόψεις και να επιλέξουν τα κατάλληλα εργαλεία και μέσα για την παρουσίαση των επιχειρημάτων τους. Όλες αυτές οι διαδικασίες ενισχύουν τη διαδικασία της κριτικής σκέψης. Επιπλέον, καθώς οι μαθητές/-τριες καλούνται να δημιουργήσουν μια αφήγηση, αναπτύσσουν τη δυνατότητα να σκεφτούν όχι μόνο το "τι" αλλά και το "πώς" και το "γιατί" ενός θέματος, αξιολογώντας ταυτόχρονα τα αποτελέσματα της σκέψης τους.

Μία από τις πιο σημαντικές πτυχές της ψηφιακής αφήγησης είναι η ικανότητά της να ενσωματώνει την αναστοχαστική σκέψη. Μέσα από την παραγωγή και παρουσίαση των ιστοριών τους, οι μαθητές/-τριες καλούνται να εξετάσουν και να επανεξετάσουν τις ιδέες τους, να συγκρίνουν τα επιχειρήματά τους και να σκεφτούν κριτικά την αντίκρουση ή τη συμφωνία με τις θέσεις των άλλων. Αυτή η αναστοχαστική διαδικασία τους βοηθά να ενισχύσουν την ικανότητά τους να παίρνουν συνειδητές αποφάσεις και να δημιουργούν επιχειρήματα με βάση τα δεδομένα.

Η κριτική σκέψη που αναπτύσσεται μέσα από τη διαδικασία της ψηφιακής αφήγησης δεν είναι μόνο ακαδημαϊκή, αλλά επηρεάζει και τη ζωή των μαθητών/-τριών σε προσωπικό επίπεδο. Η ικανότητα να αναλύουν τις κοινωνικές, ηθικές και πολιτιστικές πτυχές των θεμάτων τους και να εξετάζουν τις διαφορετικές οπτικές γωνίες τους βοηθά να αναπτύξουν την κοινωνική ενσυναίσθηση και να ενδυναμώσουν τις ηθικές τους αξίες. Η διαδικασία της αφήγησης δημιουργεί ένα ασφαλές περιβάλλον για την εξερεύνηση δύσκολων ή συναισθηματικά φορτισμένων θεμάτων, χωρίς φόβο για κρίσεις ή επικρίσεις, κάτι που προάγει τη συναισθηματική νοημοσύνη και την ενσυναίσθηση.

Η πολυτροπικότητα αποτελεί βασικό χαρακτηριστικό της ψηφιακής αφήγησης και της διαφοροποιημένης διδασκαλίας. Ειδικότερα, η ψηφιακή αφήγηση επιτρέπει στους/στις μαθητές/-τριες να εκφράσουν τη γνώση τους μέσω διαφορετικών μορφών και μέσων. Η χρήση εικόνας, ήχου, βίντεο και γραπτού λόγου προσφέρει μια μοναδική ευκαιρία για να επικοινωνήσουν πιο δημιουργικά και να προσεγγίσουν τις έννοιες με ποικίλους τρόπους.

Η πολυτροπικότητα ενισχύει τη μαθησιακή εμπειρία, κάνοντάς τη πιο ελκυστική και κατανοητή. Οι μαθητές/-τριες έχουν την ευκαιρία να αναπτύξουν νέες δεξιότητες, όπως η δημιουργία πολυμεσικών παρουσιάσεων, η ανάπτυξη ιστοριών με χρήση ήχου και εικόνας, και η χρήση της τεχνολογίας για να ενσωματώσουν τον γραπτό λόγο σε διάφορες μορφές πολυμέσων. Αυτές οι δεξιότητες είναι πολύτιμες, καθώς ενδυναμώνουν τους/τις μαθητές/-τριες σε όλα τα επίπεδα του μαθησιακού τους ταξιδιού και τους προετοιμάζουν για την ενεργό συμμετοχή τους στην κοινωνία του 21ου αιώνα.

Συγχρόνως, η πολυτροπικότητα της ψηφιακής αφήγησης επιτρέπει στους/στις μαθητές/-τριες να επιλέξουν και να προσαρμόσουν τα μέσα παρουσίασης σύμφωνα με τις προσωπικές τους προτιμήσεις και τις μαθησιακές τους ανάγκες. Για παράδειγμα, ένας/μια μαθητής/-τρια με δυσκολίες στον γραπτό λόγο μπορεί να επιλέξει να επικεντρωθεί περισσότερο στην εικόνα ή στο βίντεο, ενώ ένας/μια μαθητής/-τρια με ισχυρές δεξιότητες γραφής μπορεί να επιλέξει να αναπτύξει περισσότερο τον κειμενικό λόγο. Αυτή η δυνατότητα προσαρμογής ενισχύει την αίσθηση της προσωπικής ευθύνης και της ατομικής μάθησης, ενώ παράλληλα διατηρεί την κοινή μαθησιακή εμπειρία.

Επιπλέον, η πολυτροπικότητα ενισχύει τη δυνατότητα εφαρμογής της ψηφιακής αφήγησης σε διαθεματικά προγράμματα. Ο συνδυασμός διαφόρων μορφών έκφρασης δημιουργεί συνθήκες για την ενσωμάτωση γνώσεων από διάφορα γνωστικά πεδία. Για παράδειγμα, σε ένα διαθεματικό έργο για την τοπική ιστορία, οι μαθητές μπορούν να χρησιμοποιήσουν ιστορικά δεδομένα, εικόνες και βίντεο από την τοπική κοινωνία, συνδυάζοντας έτσι τη γνώση της ιστορίας με την προσωπική τους εμπειρία και δημιουργώντας μια μοναδική αφήγηση.

Αν και η ψηφιακή αφήγηση προσφέρει μια πληθώρα πλεονεκτημάτων για τη μαθησιακή διαδικασία, υπάρχουν και κάποιες προκλήσεις και περιορισμοί που πρέπει να ληφθούν υπόψη. Ένα από τα κύρια προβλήματα που αντιμετωπίζουν οι δάσκαλοι είναι η διαθεσιμότητα των τεχνολογικών πόρων. Η έλλειψη εξοπλισμού, όπως υπολογιστές ή tablet, αλλά και η περιορισμένη πρόσβαση στο διαδίκτυο μπορούν να αποτελέσουν σημαντικό εμπόδιο στην εφαρμογή της ψηφιακής αφήγησης στην τάξη. Επιπλέον, η χρήση πολυμέσων απαιτεί ορισμένες τεχνικές γνώσεις από τους/τις μαθητές/-τριες και τους δασκάλους, οι οποίες δεν είναι πάντα διαθέσιμες ή εύκολα προσβάσιμες.

Μια άλλη πρόκληση αφορά την εκπαιδευτική διαδικασία που περιλαμβάνει τη δημιουργία και αξιολόγηση ψηφιακών αφηγήσεων. Η διαδικασία αυτή μπορεί να είναι χρονοβόρα και απαιτεί μεγάλη προετοιμασία από τους δασκάλους και τους μαθητές, ενώ η αξιολόγηση των έργων τους μπορεί να είναι περίπλοκη, καθώς οι ψηφιακές αφηγήσεις ενσωματώνουν πολλές διαστάσεις, όπως την τεχνική ποιότητα, τη δημιουργικότητα και την εκπαιδευτική αξία του περιεχομένου.

Τέλος, ορισμένοι μαθητές/-τριες μπορεί να δυσκολεύονται με την αξιολόγηση των πηγών ή να βρίσκουν την τεχνολογία αποπροσανατολιστική, γεγονός που μπορεί να επηρεάσει την ποιότητα των ψηφιακών αφηγήσεων τους. Σε αυτές τις περιπτώσεις, είναι σημαντικό οι δάσκαλοι να προσφέρουν καθοδήγηση για την αξιολόγηση των πληροφοριών και τη σωστή χρήση των τεχνολογικών εργαλείων.

Η ψηφιακή αφήγηση αποτελεί ένα ισχυρό εργαλείο για την καλλιέργεια κριτικής σκέψης στους/στις μαθητές/-τριες, καθώς τους επιτρέπει να αναπτύξουν δεξιότητες όπως η ανάλυση, η σύνθεση και η επιχειρηματολογία. Παράλληλα, προάγει τη συνεργασία, την ενσυναίσθηση και τη δημιουργικότητα, ενσωματώνοντας ταυτόχρονα τη χρήση τεχνολογικών εργαλείων. Αν και υπάρχουν προκλήσεις στην εφαρμογή της ψηφιακής αφήγησης, οι δυνατότητες που

προσφέρει για την ανάπτυξη του/της μαθητή/-τριας και την ενίσχυση της μαθησιακής εμπειρίας καθιστούν την ψηφιακή αφήγηση ένα ουσιαστικό εργαλείο στην εκπαίδευση του 21ου αιώνα.

Η ΚΡΙΤΙΚΗ ΣΚΕΨΗ ΩΣ ΔΕΞΙΟΤΗΤΑ ΖΩΗΣ

Η κριτική σκέψη ορίζεται ως η ικανότητα ανάλυσης, αξιολόγησης, σύνθεσης και ερμηνείας πληροφοριών με σκοπό τη λήψη τεκμηριωμένων αποφάσεων και την επίλυση προβλημάτων (Facione, 1990). Περιλαμβάνει τη διατύπωση ερωτημάτων, τη συλλογή στοιχείων, τη στάθμιση δεδομένων, την κατανόηση διαφορετικών οπτικών και την ανάπτυξη επιχειρηματολογίας.

Η καλλιέργεια της κριτικής σκέψης στο σχολείο συμβάλλει στη διαμόρφωση ενεργών, υπεύθυνων και συμμετοχικών πολιτών. Αποτελεί θεμέλιο λίθο της δημοκρατικής παιδείας και προϋποθέτει ένα παιδαγωγικό περιβάλλον που ενθαρρύνει τη διερεύνηση, την αμφισβήτηση, τον διάλογο και τον στοχασμό (Ennis, 1985).

Η κριτική σκέψη είναι μια δεξιότητα ζωής που αποκτά ολοένα και μεγαλύτερη σημασία στον σύγχρονο κόσμο, ο οποίος χαρακτηρίζεται από την υπερπληθώρα πληροφοριών και τις συνεχείς αλλαγές. Η ικανότητα να αναλύουμε, να αξιολογούμε και να συνθέτουμε πληροφορίες με βάση τεκμηριωμένα δεδομένα και λογικά επιχειρήματα, είναι ουσιαστική για την ανάπτυξη ενεργών και υπεύθυνων πολιτών. Ο Facione (1990) τονίζει ότι η κριτική σκέψη δεν είναι απλώς μια ακαδημαϊκή ικανότητα, αλλά μια ζωτική δεξιότητα για την καθημερινή ζωή, καθώς βοηθά τα άτομα να παίρνουν τεκμηριωμένες αποφάσεις και να επιλύουν προβλήματα με πιο αποτελεσματικό και δημιουργικό τρόπο.

Η καλλιέργεια της κριτικής σκέψης στο σχολείο αποτελεί ένα από τα βασικά στοιχεία για την προετοιμασία των μαθητών για τη ζωή στο 21ο αιώνα. Στη σύγχρονη κοινωνία, όπου η πληροφορία είναι άμεσα διαθέσιμη και συνεχώς εξελίσσεται, η ικανότητα να κρίνουμε και να αξιολογούμε τις πληροφορίες με βάση τη λογική και τις αποδείξεις είναι πιο σημαντική από ποτέ. Οι μαθητές/-τριες που καλλιεργούν την κριτική σκέψη μαθαίνουν να διακρίνουν τη βασιμότητα των ισχυρισμών, να αναγνωρίζουν προκαταλήψεις και να προσεγγίζουν τα θέματα από πολλές οπτικές γωνίες. Αυτές οι δεξιότητες είναι κρίσιμες για την ανάπτυξη μιας δημοκρατικής συνείδησης και την ενεργό συμμετοχή στην κοινωνία.

Η κριτική σκέψη είναι άρρηκτα συνδεδεμένη με την ανάπτυξη της δημοκρατικής παιδείας, καθώς προάγει την ικανότητα των μαθητών/-τριών να σκέφτονται ανεξάρτητα και να συμμετέχουν σε διαδικασίες διαλόγου και αμφισβήτησης. Ο Ennis (1985) αναφέρει ότι η κριτική σκέψη προϋποθέτει ένα παιδαγωγικό περιβάλλον που ενθαρρύνει τη διερεύνηση και την αμφισβήτηση, το οποίο βοηθά τους/τις μαθητές/-τριες να αναπτύξουν μια στάση ανοιχτότητας και προθυμίας για αναθεώρηση των απόψεών τους, όταν τους προσφέρονται νέα δεδομένα ή διαφορετικές οπτικές. Με αυτόν τον τρόπο, η κριτική σκέψη δεν αποτελεί μόνο μια τεχνική για την επίλυση προβλημάτων, αλλά και μια στάση ζωής που επιτρέπει στα άτομα να αμφισβητούν και να αναθεωρούν τις πεποιθήσεις τους με στόχο τη συνεχιζόμενη βελτίωση και εξέλιξή τους.

Η ανάπτυξη της κριτικής σκέψης ενισχύει την ικανότητα των μαθητών/-τριών να σκέφτονται λογικά και αναλυτικά. Η διαδικασία αυτή περιλαμβάνει τη διατύπωση ερωτημάτων, τη συλλογή δεδομένων, την αξιολόγηση των πληροφοριών και τη σύνθεση επιχειρημάτων. Όταν οι μαθητές/-τριες αναλαμβάνουν το ρόλο του «ερευνητή» και του «κριτικού», μαθαίνουν να αμφισβητούν τις καθιερωμένες αλήθειες και να προσεγγίζουν τα θέματα με τη δέουσα προσοχή και αντικειμενικότητα. Στο πλαίσιο της ψηφιακής εποχής, η ικανότητα αυτή αποκτά επιπλέον σημασία, καθώς οι μαθητές/-τριες καλούνται να κρίνουν τις πηγές και να διαχειριστούν ένα τεράστιο όγκο δεδομένων, ενδεχομένως αμφιλεγόμενων ή ανακριβών.

Η κριτική σκέψη ενισχύεται μέσα από τη συνεργασία και τη συζήτηση με τους άλλους. Ο διάλογος και η αλληλεπίδραση με τους συνομηλίκους ή τους δασκάλους επιτρέπουν στους/στις μαθητές/-τριες να εκφράσουν και να αναπτύξουν τις απόψεις τους, να ακούσουν τις αντιφάσεις και τα επιχειρήματα των άλλων και να προσαρμόσουν τις δικές τους σκέψεις. Οι μαθητές/-τριες που συμμετέχουν σε συνεργατικές δραστηριότητες μαθαίνουν να εκτιμούν τις διαφορετικές απόψεις και να αναπτύσσουν την ικανότητα να επιχειρηματολογούν με βάση τεκμηριωμένα στοιχεία. Αυτή η διαδικασία δημιουργεί ένα περιβάλλον όπου η κριτική σκέψη δεν είναι μόνο ατομική, αλλά και συλλογική, καθώς όλοι συμμετέχουν στην οικοδόμηση και στην αμφισβήτηση της γνώσης.

Η κριτική σκέψη συμβάλλει επίσης στην ενίσχυση της αυτονομίας των μαθητών/-τριών, καθώς τους επιτρέπει να αναλάβουν την ευθύνη για τη δική τους μάθηση. Αντί να εξαρτώνται από εξωτερικές πληροφορίες ή απόλυτες αλήθειες, οι μαθητές/-τριες που καλλιεργούν την κριτική σκέψη αναπτύσσουν την ικανότητα να αναγνωρίζουν τις δικές τους αδυναμίες και τις προτιμήσεις τους, να διαμορφώνουν τις δικές τους απόψεις και να κατανοούν τη διαδικασία της σκέψης τους. Αυτή η αυτογνωσία ενισχύει την ικανότητα για αυτοκαθοδήγηση και βοηθά τους μαθητές να αναπτύξουν μια πιο αποτελεσματική στρατηγική για την επίλυση προβλημάτων και τη λήψη αποφάσεων.

Η ενίσχυση της κριτικής σκέψης απαιτεί τη δημιουργία ενός υποστηρικτικού και ενθαρρυντικού περιβάλλοντος στο σχολείο, το οποίο επιτρέπει στους μαθητές να εκφράζουν ελεύθερα τις απόψεις τους, να αναλαμβάνουν πρωτοβουλίες και να προσεγγίζουν τα προβλήματα με δημιουργικότητα και ανεξαρτησία. Αυτό το περιβάλλον ενισχύει την αίσθηση της ευθύνης και της συνειδητής συμμετοχής στην κοινωνία, κάτι που είναι θεμελιώδες για την ανάπτυξη δημοκρατικών αξιών και την καλλιέργεια ενεργών πολιτών.

Η εκπαίδευση για την κριτική σκέψη δεν περιορίζεται μόνο στην ανάπτυξη γνωστικών δεξιοτήτων, αλλά επεκτείνεται και στην καλλιέργεια συναισθηματικών και κοινωνικών ικανοτήτων. Οι μαθητές/-τριες που καλλιεργούν την κριτική σκέψη μαθαίνουν να σκέφτονται με σαφήνεια, να εκφράζουν τις σκέψεις τους με σεβασμό στους άλλους και να αμφισβητούν με υπευθυνότητα τις διάφορες ιδέες και αξίες που συναντούν στον κόσμο τους. Μέσω αυτής της διαδικασίας, αποκτούν τις δεξιότητες που είναι απαραίτητες για την επίλυση σύνθετων προβλημάτων και την προώθηση της κοινωνικής συνοχής σε έναν πολύπλοκο και συνεχώς εξελισσόμενο κόσμο.

Η καλλιέργεια της κριτικής σκέψης στο σχολείο συμβάλλει, επομένως, στη δημιουργία ατόμων ικανά να συμμετέχουν ενεργά και υπεύθυνα στην κοινωνία τους, να λαμβάνουν ενημερωμένες αποφάσεις και να συνεισφέρουν στην επίλυση των προκλήσεων του σύγχρονου κόσμου.

ΨΗΦΙΑΚΗ ΑΦΗΓΗΣΗ ΚΑΙ ΚΡΙΤΙΚΗ ΣΚΕΨΗ

Η δημιουργία μιας ψηφιακής αφήγησης εμπλέκει τους/τις μαθητές/-τριες σε μια σειρά γνωστικών και μεταγνωστικών διαδικασιών που ενισχύουν την κριτική σκέψη. Καθώς σχεδιάζουν την ιστορία τους, επιλέγουν και οργανώνουν τις πληροφορίες, αξιολογούν τις πηγές, αναπτύσσουν ερωτήματα, λαμβάνουν αποφάσεις σχετικά με την παρουσίαση και αναστοχάζονται πάνω στο τελικό προϊόν (Ohler, 2013).

Η διαδικασία αυτή ενθαρρύνει τη σύνθεση πληροφοριών από πολλαπλές πηγές, την αποδόμηση στερεοτύπων, την κατανόηση κοινωνικών φαινομένων και την ανάπτυξη πολυτροπικού γραμματισμού. Οι μαθητές/-τριες γίνονται δημιουργοί περιεχομένου, διαμορφώνοντας τη δική τους φωνή και θέση για τα θέματα που τους απασχολούν.

Η δημιουργία μιας ψηφιακής αφήγησης εμπλέκει τους μαθητές σε μια σειρά γνωστικών και μεταγνωστικών διαδικασιών που ενισχύουν την κριτική σκέψη. Καθώς οι μαθητές/-τριες σχεδιάζουν την ιστορία τους, επιλέγουν και οργανώνουν τις πληροφορίες, αξιολογούν τις πηγές, αναπτύσσουν ερωτήματα, λαμβάνουν αποφάσεις σχετικά με την παρουσίαση και αναστοχάζονται πάνω στο τελικό προϊόν (Ohler, 2013). Η διαδικασία αυτή προσφέρει στους/στις μαθητές/-τριες μια ολοκληρωμένη μαθησιακή εμπειρία, καθώς τους επιτρέπει να επεξεργαστούν τις πληροφορίες από διάφορες οπτικές γωνίες, να κατανοήσουν τη σημασία των πηγών και να διαμορφώσουν λογικά επιχειρήματα.

Η διαδικασία της ψηφιακής αφήγησης ενισχύει τη σύνθεση πληροφοριών από πολλαπλές πηγές και τις διευκολύνει στην κατανόηση και αξιολόγηση διαφορετικών απόψεων. Στη διάρκεια αυτής της διαδικασίας, οι μαθητές/-τριες καλούνται να «διαβάσουν» και να αναλύσουν όχι μόνο το κείμενο, αλλά και τα πολυμεσικά μέσα (εικόνες, ήχους, βίντεο) που χρησιμοποιούν για να ενισχύσουν την αφήγησή τους. Αυτή η πολλαπλή ανάλυση ενισχύει τις ικανότητες κριτικής σκέψης τους, καθώς μαθαίνουν να διακρίνουν την αλήθεια από την παραπληροφόρηση, να κατανοούν τις δυναμικές της εξουσίας και των κοινωνικών κατασκευών και να αποδομούν στερεότυπα που ενδέχεται να υπάρχουν στις διάφορες πηγές.

Η ανάπτυξη της κριτικής σκέψης μέσω της ψηφιακής αφήγησης δεν περιορίζεται μόνο στην επεξεργασία των πληροφοριών, αλλά επεκτείνεται στην ανάπτυξη πολυτροπικού γραμματισμού. Οι μαθητές/-τριες καλούνται να χρησιμοποιήσουν διαφορετικά μέσα και τεχνικές για να αποδώσουν το μήνυμά τους, όπως γραφικά, μουσική, ήχο, βίντεο και κείμενο. Αυτό τους επιτρέπει να κατανοήσουν τη σύνθετη φύση της επικοινωνίας στον ψηφιακό κόσμο και να διαμορφώσουν το προσωπικό τους στυλ στην παρουσίαση των ιδεών τους. Μέσω αυτής της διαδικασίας, οι μαθητές/-τριες αναπτύσσουν τη δυνατότητα να ερμηνεύουν και να δημιουργούν πολυτροπικά μηνύματα, ενισχύοντας τη διαπολιτισμική τους αντίληψη και την κοινωνική τους συνείδηση.

Επιπλέον, οι μαθητές/-τριες που δημιουργούν ψηφιακές αφηγήσεις συχνά καλούνται να εξετάσουν κοινωνικά φαινόμενα και να αναπτύξουν κριτική σκέψη γύρω από αυτά. Παράδειγμα αποτελεί η εξερεύνηση κοινωνικών προβλημάτων, όπως η φτώχεια, η εκπαίδευση, η ισότητα ή η κλιματική αλλαγή, όπου οι μαθητές/-τριες καλούνται να αναγνωρίσουν την αιτία του προβλήματος, να συλλέξουν δεδομένα από αξιόπιστες πηγές και να αναπτύξουν προτάσεις λύσεων. Κατά την παρουσίαση αυτών των θεμάτων, η χρήση της ψηφιακής αφήγησης τους επιτρέπει να «ζωντανέψουν» τις αφηγήσεις με εικόνες και ήχους, δημιουργώντας μια συναισθηματική σύνδεση με το κοινό τους και ενισχύοντας την ικανότητά τους να διαχειρίζονται το συναισθηματικό και το λογικό περιεχόμενο ενός θέματος.

Αυτή η διαδικασία της δημιουργίας ψηφιακής αφήγησης βοηθά τους/τις μαθητές/-τριες να γίνουν δημιουργοί περιεχομένου, διαμορφώνοντας τη δική τους φωνή και θέση για τα θέματα που τους απασχολούν. Η ικανότητα αυτή ενισχύει την αίσθηση της προσωπικής ευθύνης και της κοινωνικής συνείδησης. Όταν οι μαθητές/-τριες δημιουργούν περιεχόμενο με ψηφιακά εργαλεία, ενδυναμώνονται με τη γνώση ότι είναι μέρος μιας ευρύτερης κοινότητας δημιουργών και επικοινωνούν τις ιδέες τους σε ένα παγκόσμιο κοινό. Αυτή η διάσταση της ψηφιακής αφήγησης δεν περιορίζεται μόνο στην ατομική δημιουργία, αλλά ενθαρρύνει τη συνεργασία και την ανταλλαγή ιδεών, αφού οι μαθητές/-τριες συχνά εργάζονται σε ομάδες, ανταλλάσσουν απόψεις και βελτιώνουν τις ιστορίες τους μέσα από την αλληλεπίδραση με άλλους.

Η κριτική σκέψη που αναπτύσσεται μέσω της ψηφιακής αφήγησης έχει και ένα κοινωνικό αντίκτυπο. Καθώς οι μαθητές/-τριες δημιουργούν ιστορίες που σχετίζονται με κοινωνικά ζητήματα, συχνά αναπτύσσουν μια βαθύτερη κατανόηση των προβλημάτων που αντιμετωπίζουν οι κοινότητες και τα άτομα γύρω τους. Αυτή η αναγνώριση ενθαρρύνει τη συνεργασία και την ενσυναίσθηση, καθώς οι μαθητές/-τριες αναγνωρίζουν την αξία της ποικιλομορφίας και της διαφορετικότητας στην κοινωνία. Μέσω αυτής της διαδικασίας, οι μαθητές/-τριες δεν αναπτύσσουν μόνο κριτική σκέψη, αλλά και συναισθηματική νοημοσύνη, η οποία είναι εξίσου σημαντική για την ενίσχυση της κοινωνικής αλληλεγγύης.

Η ψηφιακή αφήγηση παρέχει, λοιπόν, στους/στις μαθητές/-τριες μια πλατφόρμα για να εκφράσουν τις απόψεις τους και να συνειδητοποιήσουν τη δύναμη των λόγων και των εικόνων. Αυτή η συνειδητοποίηση ενισχύει τη συμμετοχική τους στάση και την ευθύνη τους ως πολίτες σε έναν παγκόσμιο και ψηφιακό κόσμο. Ενισχύοντας τη σχέση της κριτικής σκέψης με τη δημιουργία περιεχομένου, η ψηφιακή αφήγηση συμβάλλει όχι μόνο στην ανάπτυξη των γνωστικών και επικοινωνιακών δεξιοτήτων των μαθητών/-τριών, αλλά και στην κοινωνική τους εξέλιξη και τη συνειδητοποίηση του ρόλου τους στην κοινωνία.

Η δημιουργία ψηφιακής αφήγησης, με τη χρήση νέων τεχνολογιών και πολυμέσων, δεν είναι απλώς μια εκπαιδευτική δραστηριότητα, αλλά και ένα μέσο για την ανάπτυξη κοινωνικών δεξιοτήτων, δημιουργικότητας και συναισθηματικής νοημοσύνης, που είναι θεμελιώδη για τη διαμόρφωση της προσωπικότητας και του χαρακτήρα των μαθητών/-τριών.

ΜΕΘΟΔΟΛΟΓΙΑ -ΠΑΙΔΑΓΩΓΙΚΗ ΑΞΙΟΠΟΙΗΣΗ ΣΤΟ ΠΛΑΙΣΙΟ ΤΗΣ ΤΟΠΙΚΗΣ ΙΣΤΟΡΙΑΣ

Στο πλαίσιο της τοπικής ιστορίας, η ψηφιακή αφήγηση μπορεί να αξιοποιηθεί ως εργαλείο ενεργού μάθησης και κριτικής ενασχόλησης των μαθητών/-τριών με ιστορικά τεκμήρια και αφηγήσεις. Οι μαθητές/-τριες ενθαρρύνονται να διερευνούν πηγές, να συλλέγουν πληροφορίες από προφορικές μαρτυρίες, φωτογραφίες ή χάρτες και να ερμηνεύουν τα δεδομένα με βάση την προσωπική και συλλογική τους εμπειρία. Μέσω της δημιουργίας ψηφιακών αφηγημάτων, αποκτούν τη δυνατότητα να αναστοχαστούν πάνω σε ερωτήματα όπως: Πώς διαμορφώνεται η ιστορική μνήμη; Ποιες πηγές θεωρούνται αξιόπιστες; Πώς συνδέεται η τοπική ιστορία με τη σημερινή κοινωνική πραγματικότητα;

Δείγμα και πλαίσιο εφαρμογής: Η διδακτική παρέμβαση υλοποιήθηκε σε τμήμα της Ε΄ Δημοτικού και συμμετείχαν 22 μαθητές/-τριες, ηλικίας 10–11 ετών. Η εφαρμογή πραγματοποιήθηκε στο πλαίσιο του μαθήματος της Γλώσσας και είχε διάρκεια τέσσερις διδακτικές εβδομάδες.

Περιγραφή της παρέμβασης: Οι μαθητές/-τριες εργάστηκαν σε μικρές ομάδες και κλήθηκαν να δημιουργήσουν μια ψηφιακή αφήγηση με θεματικό άξονα τα συναισθήματα, τη διαφορετικότητα και τη συνεργασία. Η διαδικασία περιλάμβανε: συζήτηση και καταιγισμό ιδεών, συγγραφή σεναρίου, επιλογή πολυμεσικού υλικού, δημιουργία ψηφιακής ιστορίας, παρουσίαση και αναστοχασμό.

Μέθοδοι αξιολόγησης: Η αξιολόγηση της παρέμβασης πραγματοποιήθηκε με ποιοτικές μεθόδους και περιλάμβανε: συστηματική παρατήρηση της συμμετοχής και της αλληλεπίδρασης των μαθητών/-τριών, ανάλυση των παραγόμενων ψηφιακών έργων, σύντομη γραπτή ανατροφοδότηση των μαθητών/-τριών.

Η όλη διαδικασία προάγει την ερευνητική διάθεση, την καλλιέργεια της ενσυναίσθησης και της δημιουργικής έκφρασης, ενώ αναπτύσσει την ικανότητα των μαθητών/-τριών να αξιολογούν, να συγκρίνουν και να συνθέτουν πληροφορίες από διαφορετικές πηγές. Επιπλέον, μέσω της συνεργατικής δημιουργίας του ψηφιακού υλικού, ενισχύεται η κοινωνική μάθηση και η ενεργός συμμετοχή όλων των μαθητών/-τριών, συμβάλλοντας έτσι σε ένα πιο δημοκρατικό και συμπεριληπτικό σχολικό περιβάλλον.

Η ψηφιακή αφήγηση, ως εργαλείο διδασκαλίας και μάθησης, ενσωματώνει τεχνολογίες αιχμής και πολυμεσικές προσεγγίσεις που ενισχύουν τη μάθηση και την κριτική σκέψη. Στο πλαίσιο της τοπικής ιστορίας, η ψηφιακή αφήγηση προσφέρει μοναδικές δυνατότητες στους/στις μαθητές/-τριες να συνδεθούν με την ιστορία του τόπου τους, να

εμβαθύνουν στην κατανόηση της τοπικής κληρονομιάς και να εμπλακούν ενεργά στη διαδικασία της μάθησης. Με την αξιοποίηση αυτής της προσέγγισης, οι μαθητές/-τριες έχουν την ευκαιρία να ερευνήσουν, να συγκεντρώσουν πληροφορίες από διαφορετικές πηγές, να αναλύσουν ιστορικά δεδομένα και να συνθέσουν τα δικά τους ψηφιακά αφηγήματα, δίνοντάς τους την ευκαιρία να αποτυπώσουν τη δική τους οπτική για την τοπική ιστορία.

Η διαδικασία της ψηφιακής αφήγησης στο πλαίσιο της τοπικής ιστορίας αναπτύσσει τις ικανότητες των μαθητών/-τριών να σκέφτονται κριτικά, να αξιολογούν και να συγκρίνουν πληροφορίες από διάφορες ιστορικές πηγές. Οι μαθητές/-τριες έχουν τη δυνατότητα να συνεργάζονται με άλλους, να ανταλλάσσουν απόψεις, να συζητούν και να αναπτύσσουν κοινές θέσεις για την ερμηνεία των ιστορικών γεγονότων. Επιπλέον, ενθαρρύνονται να συλλέγουν δεδομένα από ποικιλία πηγών, όπως προφορικές μαρτυρίες, φωτογραφίες, χάρτες και άλλα ιστορικά τεκμήρια που σχετίζονται με την τοπική τους κοινότητα. Αυτή η διαδικασία ενδυναμώνει την κατανόηση της τοπικής ιστορίας, προσφέροντας μια προσωπική διάσταση στην έρευνα και στην παρουσίαση των αποτελεσμάτων τους.

Η τοπική ιστορία έχει μια μοναδική θέση στην εκπαιδευτική διαδικασία, καθώς συνδέει τους μαθητές με τη δική τους κοινότητα και τους βοηθά να αντιληφθούν τις ιστορικές ρίζες των κοινωνικών δομών και των πολιτιστικών τους χαρακτηριστικών. Μέσω της ψηφιακής αφήγησης, οι μαθητές/-τριες αποκτούν τη δυνατότητα να αναστοχαστούν και να αμφισβητήσουν την ιστορική μνήμη, εστιάζοντας σε ερωτήματα όπως: Πώς διαμορφώνεται η ιστορική μνήμη; Ποιες πηγές θεωρούνται αξιόπιστες και ποιοι παράγοντες ενδέχεται να τις διαστρεβλώσουν; Ποιες είναι οι σύγχρονες ερμηνείες των τοπικών ιστορικών γεγονότων και πώς επηρεάζουν αυτές τις κοινωνίες;

Η ψηφιακή αφήγηση προάγει την ερευνητική διάθεση των μαθητών/-τριών, καθώς τους δίνει τη δυνατότητα να συμμετέχουν ενεργά στη διαδικασία της ιστορικής έρευνας και να βρουν το δικό τους τρόπο έκφρασης. Η συνεργασία με άλλους/ες μαθητές/-τριες και δασκάλους ενισχύει την κοινωνική μάθηση, επιτρέποντας στους/στις μαθητές/-τριες να μάθουν ο ένας από τον άλλο, να ανταλλάξουν ιδέες και να συμβάλουν στην κοινή δημιουργία του τελικού ψηφιακού προϊόντος. Αυτή η συνεργατική προσέγγιση προάγει την ενσυναίσθηση, καθώς οι μαθητές/-τριες καλούνται να κατανοήσουν τις απόψεις και τις εμπειρίες των άλλων, να ακούσουν τις ιστορίες των άλλων και να αναπτύξουν μια βαθύτερη αντίληψη για τις διαφορετικές κοινωνικές και ιστορικές πραγματικότητες.

Η διαδικασία της ψηφιακής αφήγησης συνιστά, επίσης, ένα μέσο για την ενίσχυση της δημιουργικής έκφρασης. Καθώς οι μαθητές/-τριες καλούνται να δημιουργήσουν ιστορίες που συνδέονται με την τοπική ιστορία, έχουν την ευκαιρία να επιλέξουν τα πολυμεσικά εργαλεία που θα χρησιμοποιήσουν για να αναδείξουν το ιστορικό τους αφήγημα, όπως εικόνες, βίντεο, ήχο και κείμενο. Αυτή η ελευθερία δημιουργίας ενθαρρύνει τη φαντασία των μαθητών/-τριών και τους επιτρέπει να εκφράσουν τις ιδέες τους με έναν πρωτότυπο και καινοτόμο τρόπο.

Το ψηφιακό αφήγημα που προκύπτει από αυτή τη διαδικασία λειτουργεί ως ένα διαδραστικό μέσο για τη διάδοση της τοπικής ιστορίας και την ανάπτυξη της τοπικής ταυτότητας. Το ψηφιακό υλικό που δημιουργούν οι μαθητές/-τριες μπορεί να αποτελέσει έναν πολύτιμο πόρο για την κοινότητα, προσφέροντας νέες προσεγγίσεις στην εκπαίδευση της τοπικής ιστορίας. Οι μαθητές/-τριες, μέσω της ψηφιακής αφήγησης, αναπτύσσουν τη συνειδητοποίηση ότι η τοπική ιστορία είναι ένα ζωντανό, εξελισσόμενο κομμάτι της καθημερινής τους ζωής και ότι τα δικά τους βιώματα, οι ιστορίες τους και οι απόψεις τους έχουν αξία για την κατανόηση της ιστορικής πορείας της κοινότητας.

Η ψηφιακή αφήγηση ενισχύει την κοινωνική διάσταση της μάθησης, καθώς ενθαρρύνει τη συμμετοχή όλων των μαθητών/-τριών, ανεξαρτήτως των διαφορετικών ικανοτήτων τους. Μέσω της συνεργασίας, οι μαθητές/-τριες έχουν την ευκαιρία να αναπτύξουν δεξιότητες επικοινωνίας, ομαδικής δουλειάς και επίλυσης διαφορών, ενώ ταυτόχρονα ενισχύεται η κοινωνική ενσωμάτωσή τους στο σχολικό περιβάλλον. Η δημιουργία ενός κοινού ψηφιακού αφηγήματος ενισχύει το αίσθημα της κοινότητας και της αλληλεγγύης μεταξύ των μαθητών/-τριών, ενώ ενθαρρύνει την ανταλλαγή ιδεών και την αποδοχή της διαφορετικότητας. Στη διάρκεια αυτής της διαδικασίας, οι μαθητές/-τριες όχι μόνο μαθαίνουν για την τοπική τους ιστορία, αλλά και αναπτύσσουν τη συνείδηση ότι η ιστορία είναι κάτι που συνεχώς εξελίσσεται και ότι έχουν την ευθύνη να τη διατηρήσουν και να τη μεταδώσουν στις επόμενες γενιές.

Η ψηφιακή αφήγηση προάγει την ενεργό συμμετοχή των μαθητών/-τριών στη μαθησιακή διαδικασία, προσφέροντάς τους μια ευκαιρία να συνδέσουν τη θεωρία με την πράξη. Καθώς οι μαθητές/-τριες εμβαθύνουν στην τοπική ιστορία και συνδέουν τις γνώσεις τους με τη σύγχρονη κοινωνική πραγματικότητα, αναπτύσσουν σημαντικές δεξιότητες, όπως η κριτική σκέψη, η αναλυτική σκέψη, η δημιουργικότητα και η συνεργασία. Το γεγονός ότι οι μαθητές/-τριες καλούνται να διαμορφώσουν το περιεχόμενο ενός ψηφιακού αφηγήματος τους επιτρέπει να κατανοήσουν την αξία της έρευνας, της ανάλυσης και της σύνθεσης πληροφοριών, ενώ τους ενθαρρύνει να αναπτύξουν ένα ενεργό ενδιαφέρον για τα ιστορικά και κοινωνικά ζητήματα που τους αφορούν.

Επιπλέον, μέσω της ψηφιακής αφήγησης, οι μαθητές/-τριες μαθαίνουν να αναγνωρίζουν τη σημασία των ιστορικών πηγών και της ακρίβειας στην παρουσίαση της ιστορίας. Αντιλαμβάνονται τη δύναμη της αφήγησης ως μέσο ερμηνείας της πραγματικότητας και τις ευθύνες που συνεπάγεται η παρουσίαση και η διάδοση ιστορικών γεγονότων. Στο πλαίσιο αυτό, οι μαθητές/-τριες αναπτύσσουν μια ώριμη και κριτική στάση απέναντι στις πηγές, αναγνωρίζοντας τις αδυναμίες τους και μαθαίνοντας να αξιολογούν τη βασιμότητά τους.

ΣΥΖΗΤΗΣΗ - ΣΥΜΠΕΡΑΣΜΑΤΑ

Τα ποιοτικά δεδομένα έδειξαν αυξημένη εμπλοκή των μαθητών/-τριών στη μαθησιακή διαδικασία, βελτίωση της συνεργασίας και ενίσχυση της ικανότητάς τους να εκφράζουν συναισθήματα και σκέψεις. Ενδεικτικά, μαθητές ανέφεραν ότι «δουλέψαμε καλύτερα ως ομάδα» και ότι «ήταν πιο εύκολο να καταλάβουμε πώς νιώθουν οι άλλοι μέσα από την ιστορία».

Επιπλέον, τα ψηφιακά παραδοτέα παρουσίασαν στοιχεία κριτικής σκέψης, όπως αιτιολόγηση επιλογών και σύνδεση της ιστορίας με προσωπικά βιώματα.

Τα ευρήματα της παρέμβασης συνάδουν με τη διεθνή βιβλιογραφία, η οποία αναδεικνύει την ψηφιακή αφήγηση ως αποτελεσματικό μέσο καλλιέργειας της κριτικής σκέψης και της συναισθηματικής μάθησης. Ωστόσο, προέκυψαν και προκλήσεις, όπως ο αυξημένος απαιτούμενος χρόνος και οι διαφοροποιήσεις στο επίπεδο ψηφιακών δεξιοτήτων των μαθητών/-τριών.

Η κριτική αποτίμηση της εφαρμογής υπογραμμίζει την ανάγκη παιδαγωγικής καθοδήγησης και σαφών κριτηρίων αξιολόγησης.

Η ψηφιακή αφήγηση αποτελεί μια δημιουργική και αποτελεσματική παιδαγωγική πρακτική που ευνοεί την καλλιέργεια της κριτικής σκέψης στους/στις μαθητές/-τριες. Μέσα από τη διαδικασία σύλληψης, σχεδιασμού και παρουσίασης της αφήγησης, οι μαθητές/-τριες ενεργοποιούν πλήθος γνωστικών και κοινωνικοσυναισθηματικών δεξιοτήτων. Η αξιοποίησή της, ειδικά στο πλαίσιο της τοπικής ιστορίας ή της διαθεματικής διδασκαλίας, μπορεί να ενισχύσει την ενεργό συμμετοχή, την ενσυναίσθηση και τον μετασχηματισμό της μάθησης σε ένα προσωπικά και κοινωνικά σημαντικό γεγονός.

Η υιοθέτηση της ψηφιακής αφήγησης απαιτεί την υποστήριξη του εκπαιδευτικού, τον κατάλληλο παιδαγωγικό σχεδιασμό και την ενσωμάτωσή της σε ένα μαθητοκεντρικό και ερευνητικό μοντέλο μάθησης. Όταν αυτά εξασφαλίζονται, τότε η αφήγηση με τη βοήθεια των ΤΠΕ μετατρέπεται σε ένα ουσιαστικό εργαλείο προσωπικής έκφρασης, αναστοχασμού και κοινωνικής δράσης.

Η ψηφιακή αφήγηση αποδεικνύεται μια ισχυρή παιδαγωγική μέθοδος που προσφέρει στους/στις μαθητές/-τριες τη δυνατότητα να αναπτύξουν σημαντικές δεξιότητες για τη ζωή τους, και κυρίως την κριτική σκέψη. Μέσω της δημιουργικής διαδικασίας, οι μαθητές/-τριες όχι μόνο κατανοούν και επεξεργάζονται πληροφορίες, αλλά ταυτόχρονα ενθαρρύνονται να αναλύσουν, να ερμηνεύσουν και να αμφισβητήσουν τα δεδομένα που συλλέγουν. Το γεγονός ότι οι μαθητές/-τριες συμμετέχουν ενεργά στη διαμόρφωση του περιεχομένου της αφήγησής τους, τους επιτρέπει να αναπτύξουν μια προσωπική και υπεύθυνη στάση απέναντι στις πληροφορίες και τα ιστορικά γεγονότα που παρουσιάζουν.

Στο πλαίσιο της τοπικής ιστορίας, η ψηφιακή αφήγηση αναδεικνύει τη σχέση των μαθητών/-τριών με τον τόπο τους και την ιστορική τους κληρονομιά. Η διαδικασία αυτή καθιστά την τοπική ιστορία ένα ζωντανό και δυναμικό πεδίο μάθησης, καθώς οι μαθητές/-τριες έχουν την ευκαιρία να ανακαλύψουν και να ερμηνεύσουν τα ιστορικά γεγονότα με τρόπο που συνδέεται άμεσα με την καθημερινότητά τους. Επιπλέον, η ψηφιακή αφήγηση ενισχύει την ενεργό συμμετοχή των μαθητών/-τριών, καθώς τους ενθαρρύνει να συνεργάζονται, να επικοινωνούν και να ανταλλάσσουν απόψεις, κάτι που ενδυναμώνει τις κοινωνικές τους δεξιότητες και την ικανότητα συνεργασίας.

Η χρήση των ΤΠΕ (Τεχνολογίες Πληροφορίας και Επικοινωνίας) στην εκπαιδευτική διαδικασία της ψηφιακής αφήγησης είναι καθοριστική, καθώς διευρύνει τις δυνατότητες δημιουργίας, προσφέροντας μια ποικιλία εργαλείων και μέσων, όπως εικόνες, ήχο, βίντεο και κείμενο. Αυτή η πολυτροπική προσέγγιση επιτρέπει στους/στις μαθητές/-τριες να εκφράσουν τις ιδέες τους με ποικιλία τρόπων και να δημιουργήσουν αφηγήματα που συνδυάζουν διαφορετικές μορφές έκφρασης, κάνοντάς τα πιο ενδιαφέροντα και ελκυστικά. Επιπλέον, η ενσωμάτωσή της στο μαθητοκεντρικό μοντέλο μάθησης ενισχύει τη συμμετοχή των μαθητών/-τριών στη διαδικασία και προάγει την προσωπική τους έκφραση.

Η επιτυχής ενσωμάτωση της ψηφιακής αφήγησης στο σχολικό περιβάλλον προϋποθέτει την υποστήριξη των δασκάλων μέσω κατάλληλης επιμόρφωσης και παιδαγωγικής καθοδήγησης. Ο εκπαιδευτικός, ως καθοδηγητής της

διαδικασίας, πρέπει να ενσωματώσει στρατηγικές που ενθαρρύνουν τη διερεύνηση, την κριτική σκέψη και τη συνεργασία, ενώ παράλληλα πρέπει να δημιουργήσει ένα υποστηρικτικό περιβάλλον όπου οι μαθητές/-τριες νιώθουν ασφαλείς να εκφράσουν τις απόψεις και τις ιδέες τους. Το εκπαιδευτικό περιβάλλον πρέπει να είναι ανοιχτό στην καινοτομία και να παρέχει τα κατάλληλα εργαλεία για να υλοποιηθούν οι στόχοι του μαθήματος.

Η ψηφιακή αφήγηση δεν είναι απλώς ένα μέσο διδασκαλίας, αλλά ένα εργαλείο ενδυνάμωσης της μαθησιακής διαδικασίας. Προάγει τη βιωματική μάθηση, καθώς οι μαθητές/-τριες αναλαμβάνουν ενεργό ρόλο στη δημιουργία του περιεχομένου, συνδέοντας τις μαθησιακές τους εμπειρίες με την καθημερινή τους ζωή και τα κοινωνικά τους βιώματα. Μέσα από την ενεργό συμμετοχή τους στη διαδικασία της αφήγησης, οι μαθητές/-τριες αναπτύσσουν τις δεξιότητες του αναστοχασμού και της κριτικής αξιολόγησης, κάτι που αποτελεί απαραίτητη προϋπόθεση για την ανάπτυξη της κριτικής σκέψης.

Επιπλέον, η ψηφιακή αφήγηση ενισχύει την αυτοεκτίμηση των μαθητών/-τριών, καθώς τους επιτρέπει να παράγουν κάτι μοναδικό και προσωπικό, το οποίο μπορεί να παρουσιαστεί στους άλλους. Αυτό το στοιχείο της αναγνώρισης της προσωπικής τους δουλειάς και της δυνατότητας να μοιραστούν τα αποτελέσματά τους με τους υπόλοιπους, αυξάνει την αίσθηση της ολοκλήρωσης και της επιτυχίας.

Συνολικά, η ψηφιακή αφήγηση ως εργαλείο εκπαίδευσης προσφέρει πληθώρα ευκαιριών για την ενίσχυση της μάθησης και την καλλιέργεια δεξιοτήτων που είναι απαραίτητες για την προσωπική και κοινωνική ανάπτυξη των μαθητών/-τριών. Η υιοθέτησή της στο εκπαιδευτικό σύστημα, εάν συνδυαστεί με τον κατάλληλο παιδαγωγικό σχεδιασμό και τη σωστή υποστήριξη, έχει τη δυνατότητα να μεταμορφώσει τη μαθησιακή εμπειρία, καθιστώντας την πιο προσωπική, εντατική και συνδεδεμένη με τον πραγματικό κόσμο.

ΠΕΡΙΛΗΨΗ

Τα σημερινά παιδιά ζουν σ' έναν ψηφιακό κόσμο και οι νέες τεχνολογίες αποτελούν ένα σημαντικό στοιχείο της παιδικής κουλτούρας. Ο Prensky (2006) χρησιμοποίησε τον όρο «ψηφιακοί αυτόχθονες»(digital natives), για να αναφερθεί στα σημερινά παιδιά που μιλούν την ψηφιακή γλώσσα των υπολογιστών, των βιντεοπαιχνιδιών και του διαδικτύου. Σε αντίθεση, εκείνοι που δεν γεννήθηκαν στην ψηφιακή εποχή θεωρούνται «ψηφιακοί μετανάστες» (digital immigrants), επειδή έχουν υιοθετήσει πολλές πλευρές των ΤΠΕ, ακριβώς όπως όσοι μαθαίνουν μια δεύτερη γλώσσα αργότερα στη ζωή τους .(Nikolopoulou, 2018).

Στο πλαίσιο της εκπαίδευσης τονίζονται ιδιαίτερα τα οφέλη της ψηφιακής τεχνολογίας, καθώς οι υπολογιστές προσφέρουν στα παιδιά πρόσβαση σε νέους, άγνωρους κόσμους και διεγείρουν τη δίψα τους για μάθηση.

Μια ιδιαίτερη θέση στον τομέα της προσχολικής εκπαίδευσης και της Ειδικής Αγωγής κατέχει η αφήγηση, η οποία συμβάλλει αποτελεσματικά στη μάθηση. Άλλωστε η μάθηση είναι αποτελεσματική, όταν προσφέρεται στα παιδιά πολυτροπικά, με έναν ευχάριστο και διασκεδαστικό τρόπο.

Με την εμφάνιση των νέων τεχνολογιών δημιουργήθηκε μια νέα μορφή αφήγησης, η ψηφιακή αφήγηση (Digital Story telling), από την οποία τα παιδιά αποκομίζουν πολλά οφέλη, αποκτούν περαιτέρω δεξιότητες και όχι μόνο μια απλή γνωριμία κι εξοικείωση με τους ηλεκτρονικούς υπολογιστές. Αλληλοεπιδρούν με τους συμμαθητές τους, δημιουργώντας σχέσεις οικειότητας κι εμπιστοσύνης, εκφράζονται δημιουργικά και αποκτούν ψηφιακές δεξιότητες.

Λέξεις κλειδιά: Νέες Τεχνολογίες, Ψηφιακή Αφήγηση, Προσχολική Εκπαίδευση, Ειδική Αγωγή

ΕΙΣΑΓΩΓΗ

Ψηφιακή αφήγηση ιστοριών ονομάζεται η σύγχρονη έκφραση της αρχαίας τέχνης της αφήγησης στο περιβάλλον της ψηφιακής τεχνολογίας, αντλώντας τη δύναμή της από την αρμονία μεταξύ εικόνας, μουσικής, αφήγησης και φωνής, μετουσιώνοντάς τη με ζωηρά χρώματα χαρακτήρες, καταστάσεις, εμπειρίες και ιδέες (Lowenthal ,2008). Πρόκειται για μια δημιουργική διαδικασία, κατά την οποία η παραδοσιακή αφήγηση, μετατρέπεται σε ψηφιακή, συνδυάζοντας τα πολυμέσα του 21ου αι. και τα εργαλεία της τηλεπικοινωνίας (Ohler, 2008).

Όπως αναφέρουν οι Κοτρωνίδου, Τόζιου (Kotronidou & Toziou, 2011), *ουσιαστικά, οι ψηφιακές αφηγήσεις είναι μικρής διάρκειας (2-5 λεπτά) αφηγηματικές ιστορίες που περιέχουν ήχο, βίντεο, κείμενο.*

Παρόλο που η αφήγηση ιστοριών στην προσχολική εκπαίδευση και την ειδική αγωγή για την ανάπτυξη της προφορικότητας , δεν είναι μια καινούρια πρακτική, η εφαρμογή της ψηφιακής αφήγησης είναι μια νέα μορφή αφήγησης που προσδίδει πολλά οφέλη στην εκπαιδευτική διαδικασία. Με την χρήση των ψηφιακών μέσων, η παραδοσιακή αφήγηση εμπλουτίζεται και αποκτά μια πολυμεσική διάσταση.

«Οι ψηφιακές ιστορίες μπορούν να ενταχθούν στην εκπαίδευση, προσελκύοντας το ενδιαφέρον των παιδιών και προσφέροντας κίνητρα για τη συμμετοχή τους σε μαθησιακές δραστηριότητες» (Prentzas, 2017).

Η συμμετοχή των παιδιών στη λήψη αποφάσεων, που αποτελεί τη βάση εξέλιξης της μεθόδου, εναρμονίζεται με την «παιδαγωγική της ακρόασης». Η Rinaldi (2005),διευθύντρια των διεθνώς αναγνωρισμένων μονάδων προσχολικής εκπαίδευσης του Ρέτζιο Εμίλιο, ορίζει ως «ακρόαση», μια μεταφορά της ανοιχτοσύνης και της ενσυναίσθησης να ακούσουμε ,όχι μόνο με την ακοή μας ,αλλά και με όλες μας τις αισθήσεις ,τις μύριες γλώσσες των παιδιών. Η «ψηφιακή αφήγηση» ,τεκμηριώνει παιδαγωγικά ,τους ορατούς τρόπους που μαθαίνουν τα παιδιά.

Σήμερα οι εκπαιδευτικοί έχουν στα χέρια τους πολλά αξιόλογα λογισμικά, τα οποία μπορούν να αξιοποιήσουν για τη δημιουργία ψηφιακών αφηγήσεων, τόσο στην διά ζώσης, όσο και στην εξ αποστάσεως εκπαίδευση. Η εμπλοκή των παιδιών με τα λογισμικά αυτά τα εμπνέει να καλλιεργήσουν τη δημιουργική τους έκφραση, να αποκτήσουν ποικίλες ψηφιακές δεξιότητες και να ανακαλύψουν διαφορετικούς τρόπους για να εκφράσουν τις ιδέες και τα συναισθήματα τους. Οι ψηφιακές αφηγήσεις τους μπορούν να αναρτηθούν σε ιστοσελίδες, διαχέοντας και γνωστοποιώντας την καλή πρακτική, σε γονείς, μαθητές άλλων τάξεων, αλλά και στην ευρύτερη κοινότητα, κάτι που προσφέρει κίνητρα στα παιδιά και προσελκύει το ενδιαφέρον τους.

Τα παιδιά συμμετέχουν εξ ολοκλήρου στην δημιουργία του υλικού που απαιτείται, προκειμένου να δημιουργηθεί μια ψηφιακή ιστορία με τη χρήση ενός λογισμικού. Η προσθήκη κειμένου, φωνής ή μουσικής, κάνει την ιστορία ακόμη πιο ενδιαφέρουσα. Ο εκπαιδευτικός μπορεί να δημιουργήσει τις κατάλληλες συνθήκες, ενθαρρύνοντας τα παιδιά να συμμετέχουν ενεργά και συνεργατικά σε δραστηριότητες και σχέδια εργασίας που τα εμπλέκουν στην οπτικοποίηση του υλικού που δημιούργησαν αλλά και να εξοικειωθούν με τα λογισμικά ψηφιακής αφήγησης.

Οι μαθητές του 1ου Νηπιαγωγείου Φερών, που το παράδειγμα χρήσης τους θα παρουσιάσουμε, όντας εξοικειωμένοι με την δημιουργία ψηφιακών ιστοριών, είτε δημιουργούν δικά τους σενάρια τα οποία παίρνουν τη μορφή ψηφιακής αφήγησης, είτε εικονογραφούν ιστορίες που προηγουμένως έχουν διαβαστεί μέσα στην τάξη, οι οποίες ψηφιοποιούνται. Στην παρούσα εργασία περιγράφεται η δημιουργία μιας ψηφιακής ιστορίας με τίτλο: **«Η Μόνα σε καινούριο Σχολείο»** η οποία δημιουργήθηκε στα πλαίσια της ημέρας για την Σχολική Βία.

Η ψηφιακή αφήγηση έχει αναγνωριστεί διεθνώς ως ένα ισχυρό παιδαγωγικό εργαλείο που υποστηρίζει την ενεργό μάθηση, τον ψηφιακό γραμματισμό και τη γλωσσική ανάπτυξη των παιδιών (Robin, 2016; Sadik, 2008). Έρευνες δείχνουν ότι, όταν τα παιδιά δημιουργούν τις δικές τους ψηφιακές ιστορίες, εμπλέκονται σε αυθεντικές μαθησιακές καταστάσεις που ενισχύουν τη δημιουργικότητα, την κριτική σκέψη και το ενδιαφέρον για μάθηση (Yang & Wu, 2012; Niemi et al., 2014). Στην προσχολική ηλικία, η ψηφιακή αφήγηση συνδέεται άμεσα με την πρώιμη παιδική γραμματιστική ανάπτυξη, καθώς τα παιδιά συνδυάζουν εικόνα, προφορικό λόγο και αφήγηση, οικοδομώντας νόημα μέσα από πολυτροπικές εμπειρίες (Flewitt et al., 2015; Kervin & Mantei, 2017).

ΜΕΘΟΔΟΛΟΓΙΑ-ΠΛΑΙΣΙΟ ΚΑΙ ΔΕΙΓΜΑ

Στην παρούσα εφαρμογή συμμετείχαν δεκαπέντε (15) νήπια, εκ των οποίων επτά (7) αγόρια και οκτώ (8) κορίτσια, ηλικίας 4–6 ετών, τα οποία φοιτούσαν στο ολοήμερο τμήμα του 1ου Νηπιαγωγείου Φερών. Στην ομάδα υπήρχαν παιδιά τυπικής ανάπτυξης και παιδιά με μαθησιακές δυσκολίες. Η εκπαιδευτική παρέμβαση υλοποιήθηκε κατά τη διάρκεια μίας εβδομάδας και εντάχθηκε στο πλαίσιο σχεδίου εργασίας για τη σχολική βία.

ΕΦΑΡΜΟΓΗ

Σχεδιασμός εκπαιδευτικού σεναρίου

Αρχικά σχεδιάσαμε ένα εκπαιδευτικό σενάριο με τη δημιουργία μιας ψηφιακής ιστορίας από τα παιδιά, προσπαθώντας να ακολουθήσουμε τα βήματα δημιουργίας μιας ψηφιακής αφήγησης. Τέθηκαν σε πρώτη φάση ο σκοπός και οι στόχοι του σεναρίου, ενώ καθ' όλη τη διάρκεια της υλοποίησης πραγματοποιούνταν «διαλείμματα» αξιολόγησης κι ανατροφοδότησης για να αποφασιστεί η πορεία του έργου και να εντοπιστούν πιθανές αδυναμίες που έχρηζαν διόρθωσης.

Γενικός σκοπός

Σκοπός του συγκεκριμένου σεναρίου ήταν η καλλιέργεια του προφορικού και γραπτού λόγου των μαθητών κι αφετέρου η εκπαίδευση τους στην αξιοποίηση των δυνατοτήτων του υπολογιστή με την εξοικείωσή τους στο λογισμικό Clipchamp, το οποίο ενδείκνυται για την δημιουργία ψηφιακών ιστοριών.

Ειδικοί στόχοι

Οι στόχοι που τέθηκαν είναι οι εξής:
- Να καλλιεργήσουν τα παιδιά τον προφορικό τους λόγο, δημιουργώντας τις δικές τους ιστορίες
- Να αντιγράφουν κείμενα στα πλαίσια των δυνατοτήτων τους
- Να καλλιεργούν τη φαντασία και τη δημιουργικότητά τους
- Να διατυπώνουν προτάσεις, να κάνουν υποθέσεις, να βρίσκουν λύσεις σε προβλήματα.
- Να αναγνωρίζουν τα στοιχεία που είναι απαραίτητα για τη δημιουργία μιας ιστορίας, απαντώντας στα ερωτήματα πραγματολογικού επιπέδου (Πώς ,Πού, Πότε, Ποιος, Πόσο, Τι)
- Να γνωρίσουν ένα νέο είδος αφήγησης, αυτό της ψηφιακής αφήγησης και να τους κεντρίσει το ενδιαφέρον η δημιουργία ψηφιακών ιστοριών.
- Να εξοικειωθούν με την χρήση του Η/Υ
- Να εξοικειωθούν με τη χρήση του συγκεκριμένου λογισμικού
- Να δουλεύουν ομαδικά και συνεργατικά για τη δημιουργία μιας ψηφιακής ιστορίας

Μεθοδολογία

Ο χρόνος υλοποίησης του προγράμματος ήταν μία εβδομάδα, καθώς τα παιδιά εργάζονταν μ' αυτό παράλληλα με τις άλλες δραστηριότητες του ημερήσιου προγράμματος. Το συγκεκριμένο πρόγραμμα πραγματοποιήθηκε στο ολοήμερο τμήμα του νηπιαγωγείου και πήρε την μορφή ενός project. Τα νήπια δούλευαν σε ομάδες. Οι ομάδες ήταν μεικτής ηλικίας και ικανότητας, ώστε να ενισχυθεί η αλληλεπίδραση μεταξύ των νηπίων. Στα παιδιά δόθηκε ο απαραίτητος χρόνος, ώστε να εξοικειωθούν με κάποιες βασικές λειτουργίες του υπολογιστή και τη λειτουργία του Scanner, ιδιαίτερα τα παιδιά που δυσκολεύονταν περισσότερο, καθώς στόχος μας ήταν να συμμετέχουν ισότιμα όλα τα παιδιά. Επίσης δόθηκε αρκετός χρόνος, ώστε να εξοικειωθούν με το λογισμικό Clipchamp και να καταλάβουν τον τρόπο χρήσης του.

Γενικότερα η προσέγγισή μας διαπνέεται από τις πέντε θεμελιώδεις αρχές του πλαισίου RAMPS:
RECOGNIZING, Αναγνωρίζοντας τις πολλές γλώσσες των παιδιών
ASSIGNING, Εκχώρηση χώρων επικοινωνίας
MAKING , Δημιουργία χρόνου

SUBSCRIBING,Έκφραση μιας αναστοχαστικής πρακτικής (Lancaster & Kirby 2010)

Δημιουργία του σεναρίου

Σ' αυτήν τη φάση τα παιδιά κλήθηκαν να φτιάξουν την δική τους ψηφιακή ιστορία. Τα νήπια αρχικά ρωτήθηκαν
- Από ποια στοιχεία αποτελείται μια ιστορία;
- Που μπορούμε να βρούμε ιστορίες ώστε να δούμε τα συστατικά στοιχεία τους;

Τα παιδιά ανέτρεξαν στη βιβλιοθήκη της τάξης τους, ξεφύλλισαν βιβλία και ξεκίνησε ένας καταιγισμός ιδεών σχετικά με το τι θα ήθελαν να γράψουν, τι θα τους ενδιέφερε να λέει η ιστορία τους. Τελικά αποφασίστηκε να

επεξεργαστούν και να εικονογραφήσουν την ιστορία «Τα μπαλόνια της φιλίας και η Μόνα σε καινούριο σχολείο» που είχαν διαβάσει στα πλαίσια της Πανελλήνιας Ημέρας κατά της Σχολικής Βίας

Αρχικά τα παιδιά επεξεργάστηκαν το σενάριο της δικής τους ιστορίας κι επέλεξαν ποιες σκηνές θα ήθελαν να συμπεριλάβουν σ' αυτήν. Έτσι δημιουργήθηκε μια νέα απλοποιημένη έκδοση της ιστορίας «Τα μπαλόνια της Φιλίας και η Μόνα σε καινούριο σχολείο».

Εικονογράφηση

Στη συνέχεια, κάθε ομάδα ανέλαβε να εικονογραφήσει από ένα τμήμα της ιστορίας. Όταν ολοκληρώθηκε αυτό το στάδιο, η ιστορία ξαναδιαβάστηκε παράλληλα με τις ζωγραφιές των παιδιών. Σ' αυτήν την φάση διαπίστωσαν τα νήπια κάποια κενά που υπήρχαν στην εικονογράφηση και έκαναν τις απαραίτητες συμπληρωματικές ζωγραφιές.

Σάρωση των εικόνων

Για την σάρωση των εικόνων υπήρχαν δύο επιλογές:
- Σάρωση με την εφαρμογή cam scan στη συσκευή του κινητού τηλεφώνου (μεταφέροντας τη δεξιότητα κι εκτός σχολείου)
- Σάρωση με τον εκτυπωτή της τάξης.

Τα παιδιά χρησιμοποίησαν και τους δύο τρόπους. Οι δύο πρώτες ομάδες προτίμησαν τη σάρωση με τη βοήθεια του εκτυπωτή και η τρίτη ομάδα με την βοήθεια του κινητού τηλεφώνου. Δόθηκαν οι απαραίτητες οδηγίες στα παιδιά και χρειάστηκε να επαναληφθεί η διαδικασία της σάρωσης αρκετές φορές, ώστε τα παιδιά να εξοικειωθούν με τη χρήση της. Τα παιδιά εργάστηκαν ομαδικά, σαρώνοντας τις ζωγραφιές τους, οι οποίες αποθηκεύτηκαν με την βοήθειά μας στην επιφάνεια εργασίας του υπολογιστή. Σταδιακά τα νήπια γίνονταν ολοένα και πιο ανεξάρτητα και απέδιδαν περισσότερο, με λιγότερη βοήθεια από την εκπαιδευτικό.

Ηχογράφηση

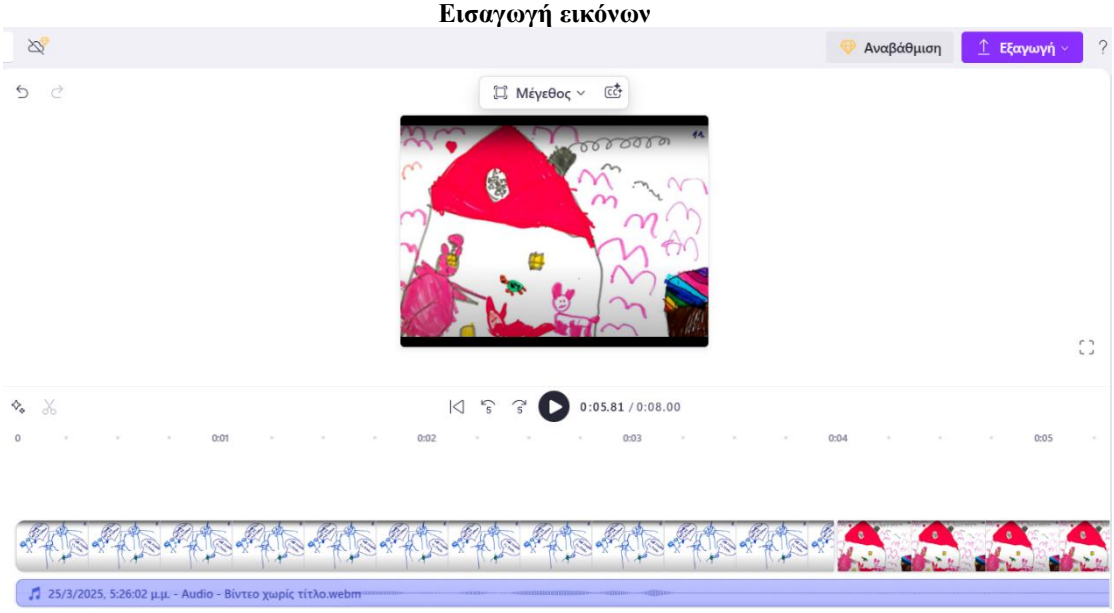
Για την σύνθεση της ψηφιακής ιστορίας αξιοποιήθηκε το λογισμικό Clipchamp το οποίο είναι πολύ εύχρηστο και ιδιαίτερα προσιτό σε παιδιά προσχολικής ηλικίας. Τα νήπια επέλεγαν τις εικόνες από τον φάκελο που υπήρχε στην επιφάνεια εργασίας του Η/Υ και τις τοποθετούσαν στη θέση που έπρεπε, ώστε να συμπληρωθεί η ιστορία. Ακολούθησε η ηχογράφηση της ιστορίας. Το λογισμικό δίνει τη δυνατότητα ηχογράφησης φωνής, οπότε δεν χρειάστηκε η χρήση κάποιου άλλου λογισμικού (πχ audacity)

Σχήμα 1: Το περιβάλλον του Clipchamp

Αναπαραγωγή της ιστορίας

Η δημιουργία της ιστορίας ολοκληρώθηκε κι ήρθε η ώρα για την αναπαραγωγή της, η οποία ενθουσίασε τα παιδιά, καθώς είδαν όλη την δουλειά τους να ξετυλίγεται μπροστά στα μάτια τους.

Η Μόνα η μικρή χελώνα αλλάζει σχολικό περιβάλλον και γίνεται θύμα σχολικού εκφοβισμού από μια ομάδα ζώων. Τα ζώα αυτά της δημιουργούν πολλά προβλήματα με αποτέλεσμα να προφασίζεται διάφορους λόγους για να μην



πάει σχολείο. Με τη βοηθεια της δασκάλας τα πράγματα πήραν μια άλλη τροπή, επικράτησε η ηρεμία στο σχολείο και όλα τα ζωάκια έγιναν φίλοι.

Η ψηφιακή ιστορία αναρτήθηκε στην ιστοσελίδα του νηπιαγωγείου (https://blogs.sch.gr/1nipfer/2023/03/06/panellinia-imera-kata-tis-scholikis-vias/), για να έχουν πρόσβαση σ' αυτήν τα υπόλοιπα παιδιά του σχολείου, αλλά και οι γονείς. Η διαδικτυακή δημοσίευση της ιστορίας δίνει τη δυνατότητα σε μαθητές άλλων σχολείων να δουν και να αξιολογήσουν την δουλειά των δημιουργών. Με τον τρόπο αυτό οι μικροί δημιουργοί, αξιολογούνται, αξιολογούν κι ανταλλάσσουν ιδέες.

Αξιολόγηση

Η αξιολόγηση της χρήσης της ψηφιακής αφήγησης στη συγκεκριμένη μελέτη βασίστηκε σε μια ολοκληρωμένη προσέγγιση που περιλάμβανε την ανάλυση της εκπαιδευτικής διαδικασίας, την παρατήρηση της αλληλεπίδρασης των μαθητών με τα ψηφιακά εργαλεία και την αποτίμηση των μαθησιακών αποτελεσμάτων.

Η διαδικασία αξιολόγησης πραγματοποιήθηκε μέσω:

- Παρατήρησης της διδακτικής πρακτικής: Η αλληλεπίδραση των μαθητών με το ψηφιακό εργαλείο και η εμπλοκή τους στις δραστηριότητες παρακολουθήθηκε από την εκπαιδευτικό.
- Ανάλυσης της συμμετοχής των μαθητών: Καταγράφηκε το επίπεδο εμπλοκής των παιδιών, η διάθεσή τους να συνεργαστούν και να δημιουργήσουν ιστορίες.
- Ανατροφοδότησης από τους μαθητές: Οι εκπαιδευτικοί κατέγραψαν τις αντιδράσεις των παιδιών και την ικανοποίησή τους από τη διαδικασία.
- Αξιολόγησης του παραγόμενου υλικού: Οι δημιουργημένες ψηφιακές ιστορίες αναλύθηκαν ως προς τη συνοχή, τη φαντασία και την ορθότητα στη χρήση του ψηφιακού εργαλείου.
- Η επιτυχία της εφαρμογής της ψηφιακής αφήγησης αξιολογήθηκε βάσει των εξής κριτηρίων:
- Ενεργός συμμετοχή των μαθητών: Καταγράφηκε το ποσοστό των μαθητών που συμμετείχαν ενεργά στη διαδικασία.
- Ανάπτυξη ψηφιακών δεξιοτήτων: Εξετάστηκε η ικανότητα των μαθητών να χρησιμοποιούν το λογισμικό για τη δημιουργία ιστοριών.
- Καλλιέργεια προφορικού και γραπτού λόγου: Αξιολογήθηκε η ικανότητα των μαθητών να δημιουργούν αφηγηματικές ιστορίες και να τις εκφράζουν λεκτικά.
- Δημιουργικότητα και φαντασία: Αναλύθηκε η πρωτοτυπία και η ποικιλομορφία των ιστοριών που δημιούργησαν τα παιδιά.
- Ομαδική συνεργασία: Παρατηρήθηκε η αλληλεπίδραση των μαθητών στις ομάδες τους και η δυνατότητα συνεργασίας.

Αξιολογώντας το πρόγραμμα, θεωρούμε ότι οι αρχικοί στόχοι επιτεύχθηκαν σε μεγάλο βαθμό. Τα παιδιά εκφράστηκαν δημιουργικά, χρησιμοποίησαν τη φαντασία τους για να δημιουργήσουν την ιστορία, ανέπτυξαν τον προφορικό τους λόγο, δημιουργήθηκαν οι ευκαιρίες για την πολυαισθητηριακή εμπλοκή τους, αλληλεπίδρασαν .

Ως προς την χρήση των ΤΠΕ, το πρόγραμμα συνέβαλε στην ανάπτυξη του τεχνολογικού και ψηφιακού γραμματισμού των παιδιών και την αναγνώριση του Η/Υ ως ενός πολύ χρήσιμου και δημιουργικού εργαλείου μάθησης.

ΑΠΟΤΕΛΕΣΜΑΤΑ

Κατά την εφαρμογή του προγράμματος παρατηρήθηκε υψηλός βαθμός συμμετοχής, ενθουσιασμού και ενεργού εμπλοκής των νηπίων σε όλα τα στάδια της διαδικασίας. Τα παιδιά συμμετείχαν με προθυμία, τόσο στη διαμόρφωση του σεναρίου, όσο και στην εικονογράφηση, στη σάρωση των εικόνων και στην ηχογράφηση της ιστορίας. Ιδιαίτερα σημαντική ήταν η σταδιακή αυτονόμησή τους στη χρήση των ψηφιακών εργαλείων, καθώς, μετά τις πρώτες καθοδηγούμενες προσπάθειες, αρκετά νήπια ήταν σε θέση να επιλέγουν αρχεία, να τα τοποθετούν στη σωστή σειρά και να συμμετέχουν ενεργά στη διαδικασία της ψηφιακής σύνθεσης.

Από τα δεκαπέντε (15) παιδιά, τα δεκατρία (13) εξέφρασαν αυθόρμητα την επιθυμία να επαναληφθεί η δραστηριότητα και να δημιουργήσουν νέες ψηφιακές ιστορίες. Χαρακτηριστικές φράσεις που καταγράφηκαν ήταν: «Κυρία, είναι σαν να φτιάχνουμε ταινία!», «Μπορούμε να κάνουμε κι άλλη ιστορία;» και «Θέλω να πω κι εγώ ένα κομμάτι». Οι λεκτικές αυτές αναφορές, σε συνδυασμό με τη διαρκή ενασχόληση των παιδιών με το έργο, καταδεικνύουν το υψηλό επίπεδο κινήτρου και εσωτερικής παρακίνησης.

Σε επίπεδο κοινωνικής αλληλεπίδρασης, παρατηρήθηκε ενίσχυση της συνεργασίας, της ανάληψης ρόλων και της αμοιβαίας υποστήριξης μεταξύ των νηπίων. Τα παιδιά διαπραγματεύονταν τη σειρά των εικόνων, πρότειναν ιδέες για την εξέλιξη της ιστορίας και βοηθούσαν συμμαθητές τους που δυσκολεύονταν, ιδιαίτερα στη χρήση του εξοπλισμού. Παράλληλα, καταγράφηκε βελτίωση στην προφορική έκφραση, καθώς τα νήπια επιχειρούσαν να αφηγηθούν πιο ολοκληρωμένες προτάσεις, να περιγράψουν συναισθήματα των ηρώων και να αιτιολογήσουν τις επιλογές τους στο σενάριο.

Τέλος, ως προς τον ψηφιακό γραμματισμό, διαπιστώθηκε πρόοδος στη βασική χρήση του υπολογιστή και του λογισμικού Clipchamp (επιλογή αρχείων, αλληλουχία εικόνων, ηχογράφηση), ενώ τα παιδιά ανέπτυξαν μεγαλύτερη αυτοπεποίθηση και εξοικείωση με τις ψηφιακές διαδικασίες.

ΣΥΖΗΤΗΣΗ – ΣΥΝΔΕΣΗ ΜΕ ΤΗ ΘΕΩΡΙΑ

Τα αποτελέσματα της εφαρμογής επιβεβαιώνουν τη διεθνή βιβλιογραφία που αναδεικνύει την ψηφιακή αφήγηση ως ένα ισχυρό παιδαγωγικό εργαλείο για την ενίσχυση της γλωσσικής ανάπτυξης, της ενεργού συμμετοχής και του ψηφιακού γραμματισμού των παιδιών προσχολικής ηλικίας (Robin, 2016; Sadik, 2008; Flewitt et al., 2015). Η αυξημένη

εμπλοκή, το ενδιαφέρον και η επιθυμία των παιδιών να επαναλάβουν τη δραστηριότητα συνάδουν με έρευνες που δείχνουν ότι η ψηφιακή αφήγηση ενισχύει την εσωτερική παρακίνηση και τη βιωματική μάθηση (Yang & Wu, 2012; Niemi et al., 2014).

Η βελτίωση της προφορικής έκφρασης και της αφηγηματικής ικανότητας των νηπίων συμφωνεί με μελέτες που υποστηρίζουν ότι η ψηφιακή αφήγηση συμβάλλει ουσιαστικά στην ανάπτυξη του πρώιμου γραμματισμού, καθώς τα παιδιά λειτουργούν ως δημιουργοί και όχι ως παθητικοί δέκτες περιεχομένου (Kervin & Mantei, 2017; Hull & Katz, 2006). Παράλληλα, η ενίσχυση της συνεργασίας και της κοινωνικής αλληλεπίδρασης επιβεβαιώνει κοινωνικοπολιτισμικές προσεγγίσεις της μάθησης, σύμφωνα με τις οποίες η γνώση οικοδομείται μέσα από τη συμμετοχή σε αυθεντικές κοινωνικές πρακτικές (Vygotsky, 1978).

Ιδιαίτερη σημασία έχει το γεγονός ότι η δράση λειτούργησε ως πλαίσιο έκφρασης συναισθημάτων και επεξεργασίας κοινωνικών ζητημάτων, όπως ο σχολικός εκφοβισμός, στοιχείο που συνδέεται με έρευνες οι οποίες τονίζουν τη συμβολή της ψηφιακής αφήγησης στην κοινωνικοσυναισθηματική μάθηση και την ενσυναίσθηση (Sadik, 2008; Robin, 2016).

Τέλος, η ενεργός συμμετοχή των παιδιών στη λήψη αποφάσεων και στη διαμόρφωση του τελικού προϊόντος επιβεβαιώνει τις αρχές της «παιδαγωγικής της ακρόασης» (Rinaldi, 2005), καθώς η φωνή των παιδιών αποτέλεσε κεντρικό άξονα της μαθησιακής διαδικασίας.

ΣΥΝΟΠΤΙΚΟ ΜΟΝΤΕΛΟ ΥΛΟΠΟΙΗΣΗΣ

(Η ψηφιακή αφήγηση ως καλή πρακτική στην προσχολική εκπαίδευση)

Για την υποστήριξη της αναπαραγωγής της δράσης σε άλλα εκπαιδευτικά πλαίσια, προτείνεται το ακόλουθο συνοπτικό μοντέλο υλοποίησης:

Επιλογή παιδαγωγικού θέματος και στόχων

Ο/η εκπαιδευτικός, σε συνεργασία με τα παιδιά, επιλέγει ένα θέμα που συνδέεται με τα ενδιαφέροντά τους ή με κοινωνικά ζητήματα της σχολικής ζωής και διαμορφώνει σαφείς γλωσσικούς, κοινωνικούς και ψηφιακούς στόχους.

Δημιουργία σεναρίου με τα παιδιά

Μέσα από συζήτηση, καταιγισμό ιδεών και επεξεργασία ιστοριών, τα παιδιά συνδιαμορφώνουν την πλοκή, τους χαρακτήρες και τις βασικές σκηνές της ιστορίας.

Εικονογράφηση και παραγωγή υλικού

Τα νήπια δημιουργούν τις εικόνες, τις μακέτες ή τα αντικείμενα που θα αξιοποιηθούν στην ιστορία, αναπτύσσοντας τη φαντασία και τη δημιουργική τους έκφραση.

Ψηφιοποίηση και σύνθεση ιστορίας

Το υλικό σαρώνεται ή φωτογραφίζεται και εισάγεται σε λογισμικό ψηφιακής αφήγησης. Τα παιδιά, με την υποστήριξη του/της εκπαιδευτικού, οργανώνουν τη σειρά των εικόνων, ηχογραφούν την αφήγηση και επιλέγουν ήχους ή μουσική

Αξιολόγηση και αναστοχασμός

Πραγματοποιείται συζήτηση με τα παιδιά για τη διαδικασία και το τελικό προϊόν, καταγραφή παρατηρήσεων και ανατροφοδότηση σχετικά με τη συνεργασία, τη μάθηση και τις δυσκολίες.

Δημοσίευση και διάχυση

Η ψηφιακή ιστορία παρουσιάζεται στην τάξη, αναρτάται στην ιστοσελίδα του σχολείου ή κοινοποιείται στην εκπαιδευτική κοινότητα, ενισχύοντας το κίνητρο, την αυτοεκτίμηση και τη διάχυση της καλής πρακτικής.

ΣΥΜΠΕΡΑΣΜΑΤΑ

Ο Η/Υ αποτελεί μέρος της εκπαιδευτικής διαδικασίας και συμβάλλει στην αποτελεσματικότερη και ουσιαστική προσέγγιση της γνώσης, βοηθώντας τα παιδιά να την προσεγγίσουν αποτελεσματικά (δημιουργική μάθηση), γιατί αυτή αποκτάται με δραστηριότητες που ανταποκρίνονται στα ενδιαφέροντά τους και έχουν νόημα γι'αυτά.

Όταν η χρήση του Η/Υ ανταποκρίνεται στις ανάγκες των παιδιών, αποτελεί μια μοναδική πηγή μάθησης.

Ένα λογισμικό όταν είναι αναπτυξιακά κατάλληλο, δίνει τη δυνατότητα στα παιδιά να πειραματιστούν, να ανακαλύψουν, να μάθουν.

Ο εκπαιδευτικός θα βοηθήσει τα παιδιά σ' αυτή τη διαδικασία ανακάλυψης και μάθησης.

Η μέθοδος της ψηφιακής αφήγησης αποτελεί μια ατραπό δημιουργικής ανακάλυψης αφού είναι:
α) πολυμεθοδική ,καθώς αναγνωρίζει τις διαφορετικές φωνές των παιδιών ,β) συμμετοχική ,καθώς αντιμετωπίζει τα παιδιά ως ειδικούς , γ)στοχαστική ,εμπλέκοντας παιδιά και παιδαγωγούς στον στοχασμό,δ) προσαρμοστική ,καθώς μπορεί να εφαρμοστεί σε ποίκιλες προσχολικές δομές και ε) εστιασμένη στις εμπειρίες των παιδιών. (Sofou,2019:128-129)

Όμως οι εκπαιδευτικοί δεν αρκεί απλά να είναι γνώστες και καλοί χειριστές της τεχνολογίας, αλλά θα πρέπει να είναι ενημερωμένοι σχετικά με τα εκπαιδευτικά λογισμικά που απευθύνονται στα παιδιά, να επιλέγουν αυτά που είναι αναπτυξιακά κατάλληλα και να τα χρησιμοποιούν με εποικοδομητικό τρόπο. Γι' αυτό θα πρέπει να επιμορφώνονται συνεχώς πάνω στην εκπαιδευτική αξιοποίηση των νέων τεχνολογιών.

Αν η ενασχόληση γίνεται με μέτρο και υπό την επίβλεψη του εκπαιδευτικού, τα παιδιά θα αποκομίσουν από τη χρήση της ψηφιακής τεχνολογίας τα μέγιστα δυνατά οφέλη.

Εν κατακλείδι, η επιθυμία να ακούσεις και να εμπλέξεις τα παιδιά είναι ζήτημα κουλτούρας.

ΠΕΡΙΛΗΨΗ

Η πραγματολογική ικανότητα αποτελεί κρίσιμο στοιχείο της κοινωνικής επικοινωνίας, ιδίως κατά την παιδική ηλικία. Παιδιά με Πραγματολογική Διαταραχή (ΠΔ) ή άλλες Νευροαναπτυξιακές Διαταραχές (ΝαΔ) συχνά εμφανίζουν ελλείμματα που επηρεάζουν την κοινωνική τους ενσωμάτωση. Η τεχνολογία eye-tracking προσφέρει ένα καινοτόμο και αντικειμενικό εργαλείο αξιολόγησης, που επιτρέπει την καταγραφή και ανάλυση των οφθαλμικών κινήσεων και της εστίασης της προσοχής κατά την επικοινωνία. Η παρούσα συστηματική ανασκόπηση, βάσει PRISMA 2020, αναλύει 43 σχετικές μελέτες (2019–2025) από την PubMed, με στόχο την αξιολόγηση της εφαρμογής του eye-tracking στην ανίχνευση πρώιμων πραγματολογικών δεικτών. Τα αποτελέσματα αυτής της εργασίας δείχνουν ότι η τεχνολογία eye-tracking μπορεί να ανιχνεύσει πρώιμες διαφοροποιήσεις στις κοινωνικές-επικοινωνιακές δεξιότητες των παιδιών, συμβάλλοντας στην έγκαιρη διάγνωση. Η μειωμένη διάρκεια κοινωνικού βλέμματος και η περιορισμένη χρήση χαμόγελου κατά την κοινωνική αλληλεπίδραση συνδέονται με αυξημένα συμπτώματα σε παιδιά με αυτισμό και δυσκολίες επεξεργασίας κοινωνικών μηνυμάτων. Η χρήση eye-tracking ενισχύει την εγκυρότητα των διαγνώσεων, υποστηρίζει την πρώιμη παρέμβαση και προτείνεται ως εργαλείο ενσωματωμένο σε θεραπευτικά και εκπαιδευτικά προγράμματα. Η τεχνολογία αυτή δίνει νέες προοπτικές στη βελτίωση της ποιότητας ζωής παιδιών με ΝαΔ μέσω στοχευμένης και τεκμηριωμένης παρέμβασης.

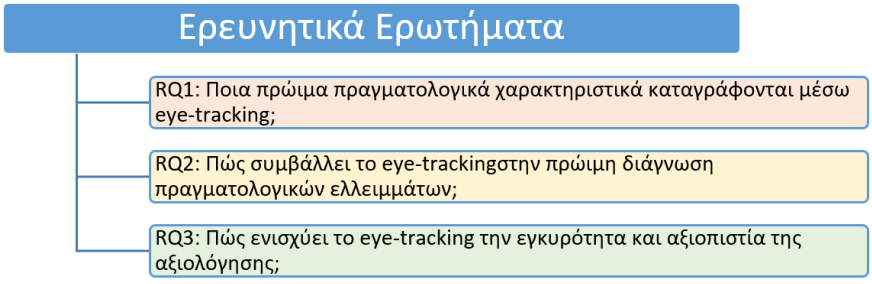
Λέξεις – κλειδιά: eye-tracking, πραγματολογικές δεξιότητες, νευροαναπτυξιακές διαταραχές, πρώιμη διάγνωση, λογοθεραπεία, εκπαιδευτική παρέμβαση

ΕΙΣΑΓΩΓΗ

Η πραγματολογική ικανότητα, δηλαδή η ικανότητα χρήσης της γλώσσας με τρόπο κατάλληλο στα εκάστοτε κοινωνικά συμφραζόμενα, αποτελεί θεμελιώδη παράγοντα για την επικοινωνιακή και ακαδημαϊκή ανάπτυξη των παιδιών (Helland et al., 2024). Παιδιά που διαγιγνώσκονται με ΝαΔ, όπως η ΠΔ, η Ειδική Γλωσσική Διαταραχή (ΕΓΔ), η Διαταραχή Ελλειμματικής Προσοχής-Υπερκινητικότητας (ΔΕΠΥ) και η Διαταραχή Αυτιστικού Φάσματος (ΔΑΦ), παρουσιάζουν σημαντικά ελλείμματα σε αυτές τις δεξιότητες, γεγονός που επηρεάζει αρνητικά την κοινωνική τους προσαρμογή (Saul et al., 2023; Guerra et al., 2024; Carruthers et al., 2021).

Πιο συγκεκριμένα, παιδιά με ΔΑΦ συχνά δυσκολεύονται να αναγνωρίσουν κοινωνικές ενδείξεις και να προσαρμόσουν τον λόγο τους στο επικοινωνιακό πλαίσιο, με τα ελλείμματα να σχετίζονται με ελλείμματα Θεωρίας του Νου και χαμηλή απόδοση στη μνήμη εργασίας (Baixauli-Fortea et al., 2019; Hilviu et al., 2023). Αντίστοιχες προκλήσεις εμφανίζουν και παιδιά με ΔΕΠΥ, τα οποία αντιμετωπίζουν δυσκολίες στην έναρξη και διατήρηση συνομιλιών, στην αφήγηση και στη χρονολογικά κατάλληλη λεκτική απόκριση (Vassiliu et al., 2023).

Παραδοσιακά, η αξιολόγηση πραγματολογικών δεξιοτήτων βασιζόταν κυρίως σε ερωτηματολόγια και κλινική παρατήρηση, μεθόδους που συχνά υστερούν σε αντικειμενικότητα και εγκυρότητα (Adams, 2002). Η είσοδος των σύγχρονων τεχνολογιών στον χώρο της αξιολόγησης έχει επιφέρει σημαντική αλλαγή, με το eye-tracking να ξεχωρίζει ως μια αξιόπιστη, ακριβής και ποσοτικοποιημένη μέθοδο καταγραφής της οπτικής προσοχής σε κοινωνικά και γλωσσικά ερεθίσματα (Rudling et al., 2024; Toki, 2024). Η τεχνολογία eye-tracking, αξιοποιώντας ειδικούς αισθητήρες ή κάμερες, καταγράφει με μεγάλη ακρίβεια πού και για πόσο χρόνο εστιάζει το βλέμμα ενός ατόμου, με τη βοήθεια υπέρυθρου φωτός που ανιχνεύει μικρές αλλαγές στις κινήσεις των ματιών (Rudling et al., 2024; Toki, 2024; Zhou et al., 2020). Η εφαρμογή της είναι ιδιαίτερα χρήσιμη σε παιδιά, καθώς μπορεί να συνδυαστεί με κατάλληλα οπτικοακουστικά ερεθίσματα, ενώ η επιλογή του κατάλληλου eye-tracker προσαρμόζεται στις ανάγκες κάθε ερευνητικού πρωτοκόλλου και πληθυσμού (Franco et al., 2023; Vargas-Cuentas et al., 2017).

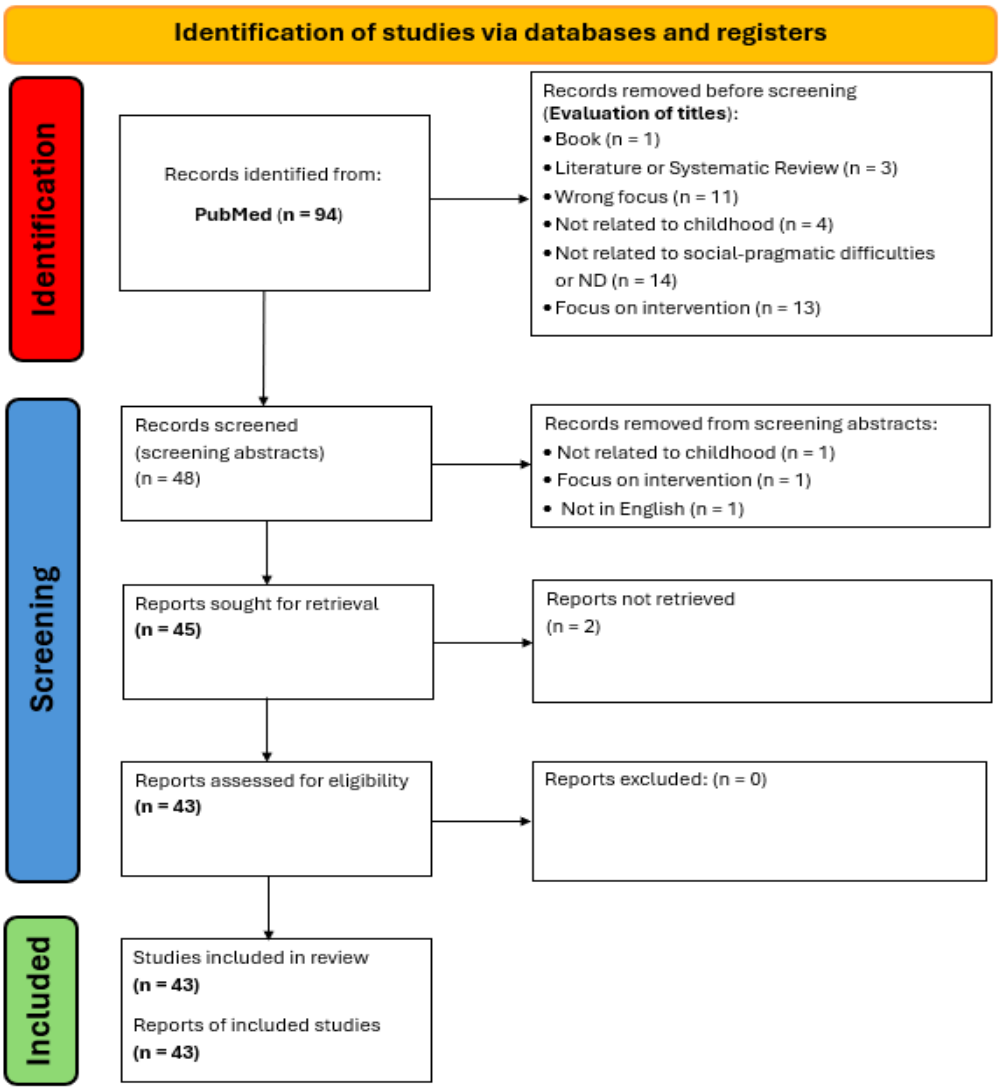


Επιπλέον, το eye-tracking επιτρέπει την εις βάθος μελέτη της οπτικής προσοχής σε πραγματικές κοινωνικές αλληλεπιδράσεις, δίνοντας τη δυνατότητα στους ερευνητές να αξιολογήσουν εάν τα παιδιά εστιάζουν στα κατάλληλα κοινωνικά σήματα, όπως το βλέμμα, τις εκφράσεις προσώπου ή άλλα κοινωνικά ερεθίσματα. Αυτό το στοιχείο θεωρείται κρίσιμο για την ανάπτυξη αποτελεσματικών πραγματολογικών δεξιοτήτων (Wang et al., 2025; Zhou et al., 2024).

Παρά τα σημαντικά πλεονεκτήματα της τεχνολογίας, η χρήση του eye-tracking για την αξιολόγηση των πραγματολογικών δεξιοτήτων σε παιδιά με ΔΑΦ και ΔΕΠΥ είναι ακόμη περιορισμένη, ενώ οι υπάρχουσες μελέτες χαρακτηρίζονται από μεθοδολογική ποικιλομορφία (Ioannou et al., 2020; Liu et al., 2021). Ειδικά σε μικρότερες ηλικίες, παρατηρείται η απουσία ενοποιημένων προσεγγίσεων για την ανίχνευση πρώιμων κοινωνικών δυσκολιών, αναδεικνύοντας την ανάγκη για συστηματική ανασκόπηση της σχετικής βιβλιογραφίας. Σε αυτό το πλαίσιο, η παρούσα εργασία εστιάζει συστηματικά στη χρήση της τεχνολογίας eye-tracking για την πρώιμη ανίχνευση ελλειμμάτων πραγματολογικών δεξιοτήτων σε παιδιά με ΝαΔ.

ΥΛΙΚΟ & ΜΕΘΟΔΟΣ

Τα κύρια ερευνητικά ερωτήματα αυτής της εργασίας αποτυπώνονται ακολούθως στην Εικόνα 1.



Εικόνα 1
Κύρια Ερευνητικά Ερωτήματα της εργασίας

Η συστηματική ανασκόπηση ακολουθεί τις κατευθυντήριες οδηγίες Preferred Reporting Items for Systematic Reviews and Meta-Analyses (PRISMA) 2020, παρέχοντας βασικά στοιχεία αναφοράς για τη διεξαγωγή ανασκοπήσεων και μετα-αναλύσεων (Page et al., 2021).

Η αναζήτηση πραγματοποιήθηκε στη βάση δεδομένων PubMed[3], με επίκεντρο μελέτες που εξετάζουν την Πραγματολογική Διαταραχή στο πλαίσιο της ΔΑΦ και άλλων ΝαΔ, σε παιδιά, κατά το διάστημα 2019-2025 με τελευταία ημερομηνία αναζήτησης την 26η Μαρτίου 2025. Η περίοδος αυτή επελέγη καθώς καλύπτει την πιο πρόσφατη και μεθοδολογικά προηγμένη βιβλιογραφία, ιδίως μετά την αυξημένη χρήση eye-tracking στην λογοθεραπεία για παιδιά κατά τα τελευταία χρόνια.

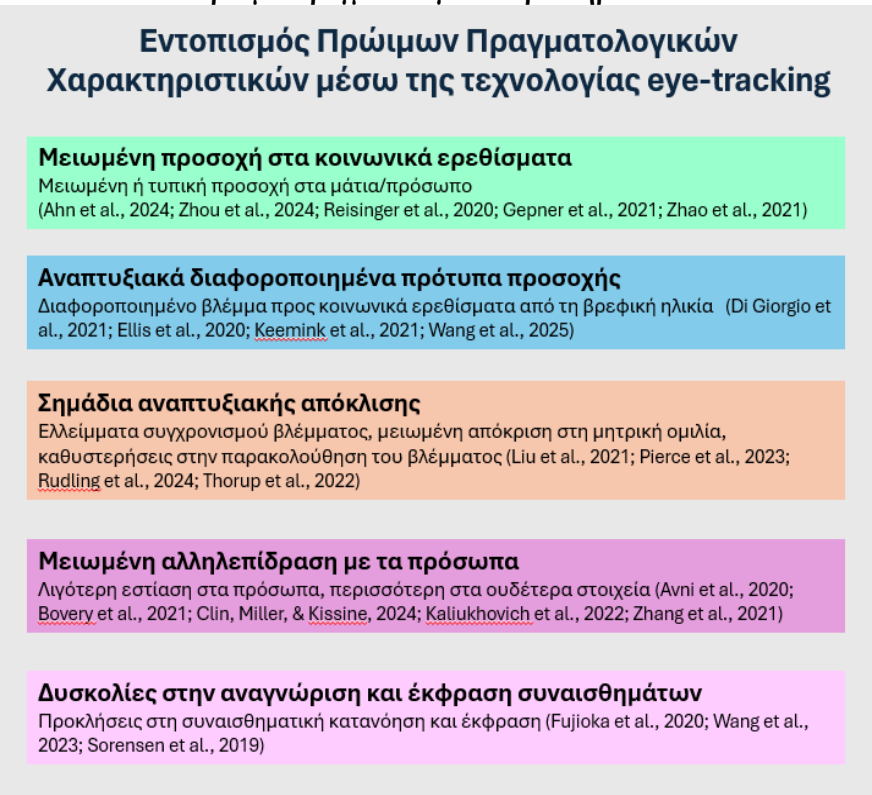
Εικόνα 2
Διάγραμμα ροής PRISMA 2020 – Συστηματική Ανασκόπηση

Τα κριτήρια ένταξης περιλάμβαναν πρωτότυπες, αγγλόφωνες μελέτες, δημοσιευμένες σε περιοδικά με κριτές (peer-reviewed), που χρησιμοποιούν την τεχνολογία eye-tracking είτε ως βασική μέθοδο είτε ως συμπληρωματικό εργαλείο αξιολόγησης, σε δραστηριότητες οπτικής παρατήρησης κοινωνικών προσώπων, εικόνων ή σκηνών σε φυσικές ή εργαστηριακές συνθήκες. Οι όροι για τη διαμόρφωση του ερωτήματος αναζήτησης ήταν: *"pragmatic disorder", "pragmatic communication disorder", "neurodevelopmental disorder", "autis*", "eye-tracking", "screen", "assess", "diagnosis", "child*", "preschool", "infant", "baby"*.

Αρχικά εντοπίστηκαν 94 μελέτες, απομακρύνθηκαν οι μη επιλέξιμες μελέτες. Εξαιρέθηκαν μελέτες που επικεντρώνονταν αποκλειστικά σε γνωστικά ή γλωσσικά ελλείμματα χωρίς ανάλυση πραγματολογικών δεικτών, καθώς

[3] Η επιλογή της συγκεκριμένης βάσης οφείλεται στην πληρότητα και εγκυρότητα της σε θέματα νευροαναπτυξιακών διαταραχών και παιδιατρικής έρευνας.

και ερευνητικές εργασίες που δεν τεκμηρίωναν επαρκώς τη χρήση eye-tracking. Εξετάστηκαν τίτλοι και περιλήψεις, εκ των οποίων 45 κρίθηκαν κατάλληλοι για πλήρη ανάγνωση. Τελικά, 43 μελέτες πληρούσαν τα κριτήρια συμπερίληψης και εντάχθηκαν στην παρούσα ανασκόπηση. Η Εικόνα 2 παρουσιάζει το διάγραμμα ροής PRISMA, απεικονίζοντας τη διαδικασία επιλογής των μελετών.



ΑΠΟΤΕΛΕΣΜΑΤΑ

Η ανασκόπηση αυτή βασίστηκε σε 43 πρωτογενείς μελέτες που αξιολόγησαν την κοινωνική και πραγματολογική συμπεριφορά παιδιών με αναπτυξιακές διαταραχές μέσω της τεχνολογίας eye-tracking. Οι εργασίες αυτές, που καλύπτουν διαφορετικές ηλικιακές ομάδες, μεθοδολογίες και τύπους οφθαλμοκίνησης, προσφέρουν ένα πλούσιο ερευνητικό υπόβαθρο για την κατανόηση των πρώιμων κοινωνικών ενδείξεων (βλ. Ahn et al., 2024; Avni et al., 2020, 2021; Bochet et al., 2021; Bovery et al., 2021; Bozkurt et al., 2024; Bradshaw et al., 2021; Chang et al., 2021; Clin et al., 2024; Costanzo et al., 2022; Di Giorgio et al., 2021; Dow et al., 2020; Ellis et al., 2020; Frazier et al., 2021; Fujioka et al., 2020; Gepner et al., 2021; Harrop et al., 2019; Ioannou et al., 2020; Kaliukhovich et al., 2022; Keemink et al., 2021; Kochhar et al., 2024; Kou et al., 2019; Król et al., 2019; Lauttia et al., 2019; Liu et al., 2021; Mori et al., 2023; Nayar et al., 2022; Nyström et al., 2019; Pierce et al., 2023; Plesa Skwerer et al., 2019; Reisinger et al., 2020; Rudling et al., 2024; Shic et al., 2023; Sorensen et al., 2019; Thorup et al., 2022; Tsang et al., 2023; Van Der Donck et al., 2021; Viktorsson et al., 2024; Wang et al., 2023, 2025; Zhang et al., 2021; Zhao et al., 2021; Zhou et al., 2024 Τα κύρια ευρήματα παρουσιάζονται στις επόμενες ενότητες, με βάση τα βασικά ερευνητικά ερωτήματα της μελέτης..

Πρώιμα πραγματολογικά χαρακτηριστικά που καταγράφονται μέσω eye-tracking

Η συστηματική βιβλιογραφική ανασκόπηση ανέδειξε πρώιμα πραγματολογικά χαρακτηριστικά που μπορούν να εντοπιστούν μέσω της τεχνολογίας eye-tracking, ιδίως σε παιδιά με ΔΑΦ. Ενδεικτικά, η μελέτη των Ioannou et al. (2020) αποκάλυψε διακριτά πρότυπα κοινωνικής οπτικής προσοχής μεταξύ παιδιών με ΔΑΦ, ΔΕΠΥ και συννοσηρότητα των δύο διαταραχών, υπογραμμίζοντας τη σημασία της τεχνολογίας αυτής για την κατανόηση πρώιμων κοινωνικών αποκλίσεων. Η εστίαση του βλέμματος στην περιοχή των ματιών σχετίζεται με κρίσιμες πρώιμες πραγματολογικές δεξιότητες, όπως η κοινή προσοχή, η αναγνώριση συναισθημάτων και η κοινωνική ανταπόκριση (Bradshaw et al., 2021; Liu et al., 2021; Nyström et al., 2019). Ακόμα και σε βρέφη μόλις 4 μηνών με αυξημένο κίνδυνο για ΔΑΦ, καταγράφονται διαφοροποιημένα πρότυπα οπτικής προσήλωσης, όπως μειωμένη προσοχή στα μάτια και μεγαλύτερη προσήλωση σε αντικείμενα.

Εικόνα 3
Πρώιμα Πραγματολογικά Χαρακτηριστικά

Επιπλέον, δείκτες όπως η δυσκολία στον συγχρονισμό του βλέμματος, η μειωμένη ανταπόκριση στη μητρική ομιλία, και η καθυστέρηση στην παρακολούθηση βλέμματος, λειτουργούν ως πρώιμες ενδείξεις αναπτυξιακής διαφοροποίησης. Παράλληλα, νευροφυσιολογικά δεδομένα (Lauttia et al., 2019) δείχνουν διαφοροποιημένη εγκεφαλική δραστηριότητα κατά τη διάρκεια της άμεσης βλεμματικής επαφής. Ενδιαφέρον παρουσιάζει και η διαπίστωση ότι ακόμη και αδέλφια παιδιών με ΔΑΦ παρουσιάζουν ανάλογα μοτίβα προσοχής (Costanzo et al., 2022).

Μελέτες που αξιοποίησαν στατικές ή δυναμικές κοινωνικές σκηνές έδειξαν πως τα παιδιά με ΔΑΦ εστιάζουν λιγότερο σε πρόσωπα και περισσότερο σε ουδέτερα στοιχεία. Οι Bochet et al. (2021) εντόπισαν ταχύτερη εξοικείωση με συναισθηματικά πρόσωπα και μεγαλύτερη προσήλωση σε ουδέτερα ερεθίσματα. Οι Avni et al. (2020; 2021), δεν κατέγραψαν διαφοροποιήσεις στις βασικές οφθαλμοκινητικές λειτουργίες, γεγονός που υποδηλώνει πως οι δυσκολίες εδράζονται κυρίως σε ανώτερες γνωστικές διεργασίες. Τα ευρήματα αυτά παραμένουν σταθερά διαπολιτισμικά (Frazier et al., 2021) και παρατηρούνται ακόμη και σε παιδιά χωρίς λεκτική επικοινωνία (Plesa Skwerer et al., 2019).

Τα πρώιμα πραγματολογικά χαρακτηριστικά που μπορεί να ανιχνευτούν με τη χρήση των eye-trackers συνοψίζονται στις Εικόνα 3 και Εικόνα 4. Η έγκαιρη αναγνώριση αυτών των προτύπων αναδεικνύει τη διαγνωστική αξία του eye-tracking και δημιουργεί νέες δυνατότητες για πρώιμη παρέμβαση.

Εικόνα 4.
Πρώιμα Πραγματολογικά Χαρακτηριστικά – Αξιολόγηση με Χρήση Eye-Tracking

Συμβολή Eye-Tracking στην πρώιμη διάγνωση πραγματολογικών ελλειμμάτων

Η τεχνολογία eye-tracking αποτελεί ένα ισχυρό, μη επεμβατικό εργαλείο, που επιτρέπει την πρώιμη αναγνώριση των ΝαΔ, προσφέροντας ποσοτικά δεδομένα κοινωνικής προσοχής ήδη από τη βρεφική ηλικία (Bradshaw et al., 2021; Nyström et al., 2019). Μοτίβα όπως η μειωμένη προσήλωση στο στόμα ή στα μάτια (Mori et al., 2023) ή η προτίμηση σε μη κοινωνικά ερεθίσματα έχουν εντοπιστεί ήδη από τον πρώτο χρόνο ζωής (Di Giorgio et al., 2021; Pierce et al., 2023).

Οι eye-trackers έχουν εφαρμοστεί σε πληθυσμούς υψηλού κινδύνου, όπως αδέλφια παιδιών με ΔΑΦ (Costanzo et al., 2022; Rudling et al., 2024), προσφέροντας αξιόπιστη πρόγνωση. Παράλληλα, ενσωματώνονται σε υπολογιστικά μοντέλα και τεχνητή νοημοσύνη, αυξάνοντας τη διαγνωστική ακρίβεια (Kou et al., 2019; Zhao et al., 2021). Η τεχνολογία αυτή προσφέρει ευκαιρίες πρώιμης παρέμβασης, ακόμη και σε ηλικίες όπου δεν έχει αναπτυχθεί ο λόγος (Dow et al., 2020; Shic et al., 2023; Wang et al., 2025).

Eye-Tracking στην ενίσχυση εγκυρότητας και αξιοπιστίας στην αξιολόγηση

Η τεχνολογία eye-tracking έχει ενισχύσει την αξιοπιστία και εγκυρότητα της αξιολόγησης πραγματολογικών δεξιοτήτων. Οι Ahn et al. (2024) και Kochhar et al. (2024) τεκμηριώνουν τη χρήση της κατά την εφαρμογή της ADOS-

2, προσφέροντας αντικειμενικά δεδομένα για την κοινωνική προσήλωση. Οι Zhao et al. (2021) αξιοποίησαν την τεχνολογία αυτή σε φυσικές αλληλεπιδράσεις, ενισχύοντας τη διαγνωστική ακρίβεια μέσω μοντέλων μηχανικής μάθησης.

Συμπληρωματικά, οι Król & Król (2019) ανέδειξαν την εννοιολογική εγκυρότητα του eye-tracking, ενώ οι Gepner et al. (2021) έδειξαν ότι η ταχύτητα των κοινωνικών ερεθισμάτων επηρεάζει την προσήλωση σε παιδιά με αυτισμό. Η αξιοπιστία της μεθόδου ενισχύεται μέσω πολυπαραμετρικών αναλύσεων (Nayar et al., 2022), και οι συγκρίσεις μεταξύ διαφορετικών δοκιμασιών επιβεβαιώνουν τη σταθερότητα των ευρημάτων (Kou et al., 2019). Η διαπολιτισμική εγκυρότητα της τεχνολογίας τεκμηριώνεται περαιτέρω από τους Frazier et al. (2021).

Τέλος, μελέτες που συνδύασαν την οφθαλμοκίνηση με άλλες παραμέτρους, όπως εκφράσεις προσώπου, ανέδειξαν την ευρύτερη αξιοπιστία του εργαλείου στην αποτύπωση λεπτών διαφορών (Van Der Donck et al., 2021; Zhou et al., 2024). Συνολικά, το eye-tracking υπερβαίνει τους περιορισμούς της απλής παρατήρησης και αναδεικνύεται ως ένα ακριβές, επαναλήψιμο και επιστημονικά έγκυρο εργαλείο, με ουσιαστικές δυνατότητες για πρώιμη και εξατομικευμένη παρέμβαση.

ΣΥΖΗΤΗΣΗ

Η παρούσα συστηματική βιβλιογραφική ανασκόπηση επιβεβαιώνει τον καίριο ρόλο της τεχνολογίας eye-tracking στη διερεύνηση, αξιολόγηση και πρώιμη ανίχνευση πραγματολογικών δυσκολιών σε παιδιά με ΝαΔ. Τα ευρήματα της τελευταίας πενταετίας αναδεικνύουν τη μοναδική ικανότητα της τεχνολογίας οφθαλμοκίνησης να καταγράφει με ακρίβεια κρίσιμες πτυχές της κοινωνικής προσοχής και της επικοινωνιακής συμπεριφοράς.

Ένα από τα πλέον χαρακτηριστικά πρώιμα ευρήματα αφορά τη μειωμένη προσήλωση σε κοινωνικά ερεθίσματα, όπως τα μάτια ή το πρόσωπο του συνομιλητή (Ahn et al., 2024; Zhou et al., 2024). Αντίθετα, παρατηρείται αυξημένη εστίαση σε ουδέτερα αντικείμενα ή περιοχές του περιβάλλοντος χωρίς κοινωνική σημασία (Zhao et al., 2021; Gepner et al., 2021). Επιπλέον, οι δυσκολίες στην αναγνώριση συναισθημάτων και στην κατανόηση προθέσεων (Zhang et al., 2021; Van Der Donck et al., 2021), καθώς και η καθυστερημένη ή ανύπαρκτη εκδήλωση κοινής προσοχής (Liu et al., 2021; Nyström et al., 2019), συνιστούν βασικούς δείκτες πραγματολογικής διαφοροποίησης.

Τα πρότυπα οπτικής προσήλωσης φαίνεται να διαφοροποιούνται ήδη από τους πρώτους μήνες ζωής, όπως καταγράφεται σε βρέφη υψηλού κινδύνου για ΔΑΦ (Di Giorgio et al., 2021; Rudling et al., 2024). Η δυνατότητα εντοπισμού τέτοιων μοτίβων ακόμη και πριν την εμφάνιση κλινικών συμπτωμάτων ή την ανάπτυξη του λόγου, υποστηρίζει τη διαγνωστική χρησιμότητα της τεχνολογίας eye-tracking (Pierce et al., 2023; Shic et al., 2023). Επιπλέον, η αξιοποίηση υπολογιστικών μεθόδων, όπως η μηχανική μάθηση, ενισχύει περαιτέρω την ακρίβεια και την ταξινομητική ισχύ της μεθόδου (Król & Król, 2019; Kou et al., 2019).

Ιδιαίτερο ενδιαφέρον παρουσιάζει το γεγονός ότι ακόμη και τα αδέλφια παιδιών με ΔΑΦ παρουσιάζουν αντίστοιχα μοτίβα οπτικής προσοχής (Costanzo et al., 2022), γεγονός που προσδίδει στη μέθοδο και προγνωστική αξία. Παράλληλα, τα μοτίβα βλέμματος εμφανίζουν εντυπωσιακή διαχρονική σταθερότητα και πολιτισμική εγκυρότητα, όπως επιβεβαιώνεται από διαπολιτισμικές μελέτες (Frazier et al., 2021). Η αξιοπιστία των δεδομένων ενισχύεται περαιτέρω από τη δυνατότητα τυποποιημένης, μη επεμβατικής και επαναλήψιμης καταγραφής (Bovery et al., 2021; Zhao et al., 2021), ενισχύοντας έτσι την εφαρμοστικότητα του eye-tracking στην πρώιμη αξιολόγηση και παρέμβαση.

ΣΥΜΠΕΡΑΣΜΑΤΑ

Συμπερασματικά, η τεχνολογία eye-tracking φαίνεται να είναι μια επιστημονικά τεκμηριωμένη και αντικειμενικά αξιόπιστη μέθοδος αξιολόγησης των πραγματολογικών δεξιοτήτων σε παιδιά με Νευροαναπτυξιακές Διαταραχές. Η συμβολή της εκτείνεται πέρα από την πρώιμη ανίχνευση, προσφέροντας δυνατότητες παρακολούθησης της προόδου κατά τη διάρκεια της κλινικής παρέμβασης και αξιολόγησης των κοινωνικών δεξιοτήτων με ακρίβεια και συνέπεια. Η ενσωμάτωσή της στο κλινικό και ερευνητικό πεδίο ανοίγει νέους ορίζοντες για έγκαιρη και στοχευμένη διάγνωση, ενώ ταυτόχρονα ενισχύει την ανάπτυξη εξατομικευμένων παρεμβάσεων. Η αξιοποίηση του eye-tracking μπορεί να συμβάλει ουσιαστικά στη βελτίωση της ποιότητας ζωής των παιδιών με ΝαΔ και των οικογενειών τους, αποτελώντας έναν σύγχρονο και καινοτόμο πυλώνα στην κατανόηση και υποστήριξη των κοινωνικών δεξιοτήτων.

ΠΕΡΙΛΗΨΗ

Η ψήφιση του νόμου περί εισαγωγής του «Ψηφιακού Βιβλίου Πράξεων Συλλόγου Διδασκόντων» (Αριθμ. 3446/16-05-2024 – ΦΕΚ 2988/Β/28-05-2024) στις 28 Μαΐου του 2024, και η εφαρμογή τον Σεπτέμβριο του 2024 στις σχολικές μονάδες, σηματοδότησε σημαντικές ποιοτικές και ποσοτικές αλλαγές στη διοίκηση των σχολικών μονάδων. Για όσες σχολικές μονάδες υλοποίησαν και εφάρμοσαν τον νόμο, και τον ενσωμάτωσαν ως εργαλείο «ψηφιακής διαχείρισης» εντός των διοικητικών διαδικασιών, διαπίστωσαν υποβόσκουσες αντιθέσεις και συγκρούσεις χρόνων, αντιφάσεις κατά την υλοποίηση, αλλά και προκλήσεις από τα οφέλη. Η εφαρμογή του συγκεκριμένου νόμου σηματοδότησε μία μετάβαση από τις παγιωμένες τυποποιημένες πρακτικές των διαδικασιών των Συλλόγων σε μία νέα ρυθμιστική πραγματικότητα, η οποία εισήγαγε στοιχεία και χαρακτηριστικά ψηφιακού μετασχηματισμού στην σχολική μονάδα, τα οποία αναγνωρίστηκαν από όλους/-ες τους/τις εκπαιδευτικούς. Το παρόν άρθρο εντασσόμενο στον γόνιμο ακαδημαϊκό διάλογο του Συνεδρίου για μία δυναμική σχέση ψηφιακών μέσων, διοικητικής μέριμνας και εκπαιδευτικού έργου, κατατίθεται με την μορφή «απολογισμού» και αποτυπώνει εμπειρίες, δυσκολίες και προοπτικές από αυτήν την νέα πραγματικότητα. Η εισήγηση, από την πλευρά της διοίκησης και του διαχειριστικού ελέγχου των σχολικών μονάδων δεν αποσιωπά, ειδικά εκείνα τη σημεία της εφαρμογής του νόμου για το «Ψηφιακό Βιβλίο Πράξεων Συλλόγου Διδασκόντων», τα οποία λειτούργησαν ως εμπόδιο στην ομαλή υλοποίηση του διοικητικού έργου, αλλά ούτε και την δυσοίωνη προοπτική της εδραίωσης των συναδελφικών σχέσεων σε υπαγωγικές και ιεραρχικές σχέσεις που ενισχύουν την ψηφιακή γραφειοκρατία, αντί της διευκόλυνσης της άσκησης του διοικητικού έργου. Περισσότερο όμως από όλα δεν αποσιωπά ότι τελικά για τον ψηφιακό μετασχηματισμό των σχολικών μονάδων δεν αρκεί μία επίπλαστη πληροφοριακή ενημέρωση, αλλά απαιτείται μία επένδυση στον ψηφιακό εγγραμματισμό όλων των μελών της σχολικής μονάδας χωρίς αποκλεισμούς και χωρίς μονομέρειες. Αυτό όμως δεν είναι υπόθεση ενός νόμου αλλά μίας συνολικής αυθεντικής μετασχηματίζουσας διοικητικής πολιτικής για όλες τις σχολικές μονάδες.

Λέξεις – κλειδιά: Διοίκηση Εκπαίδευσης και ψηφιακές τεχνολογίες, Ψηφιακού βιβλίου πράξεων Συλλόγου Διδασκόντων, διοικητικές σχέσεις των εκπαιδευτικών, ψηφιακή γραφειοκρατία

ΕΙΣΑΓΩΓΗ

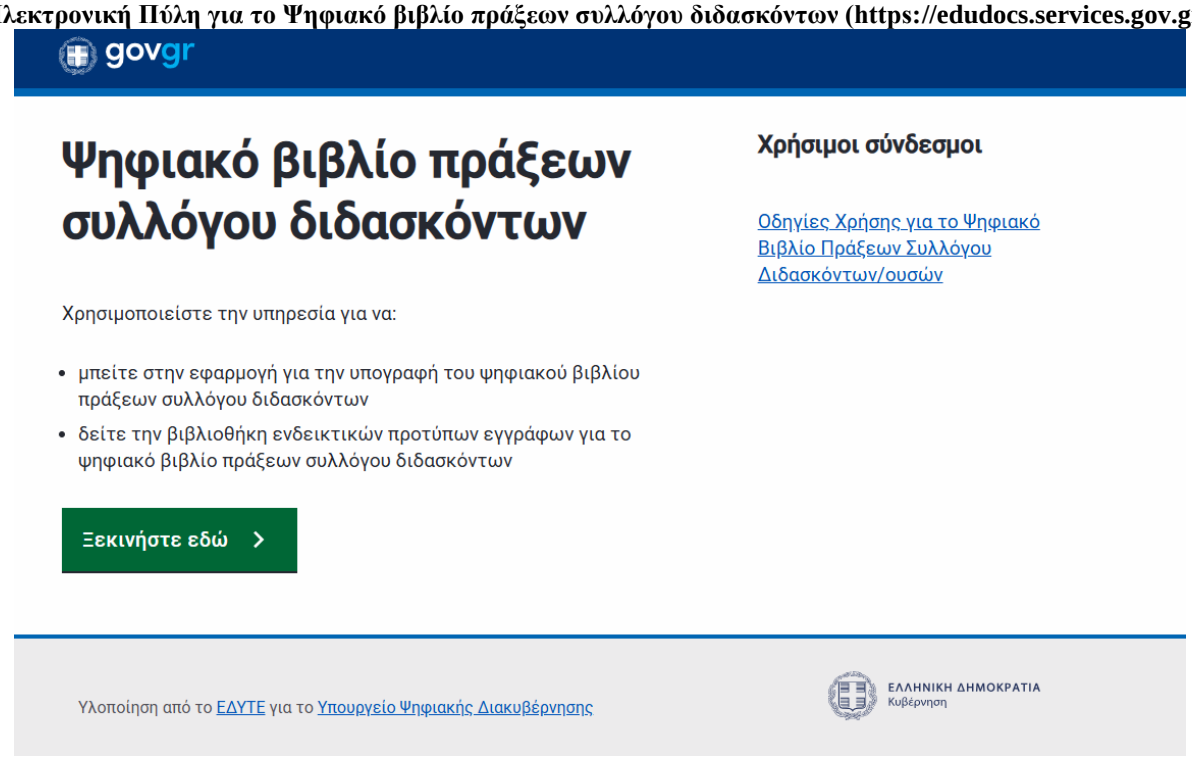
Η παρούσα εργασία ως μέρος μία σειρά άρθρων τα οποία αφορούν την διοίκηση των σχολικών μονάδων (Sarlis & Kotsifakos, 2024), εστιάζει στην εφαρμογή του Νόμου 3446/16-05-2024 για την καθιέρωση του «Ψηφιακού Βιβλίου Πράξεων Συλλόγου Διδασκόντων» στις σχολικές μονάδες από τον Σεπτέμβριο του 2024. Πραγματεύεται τις ποιοτικές και ποσοτικές αλλαγές (Zavlanos, 2003), αλλά και τον συνολικότερο αντίκτυπο που προκλήθηκε στη διοίκηση των σχολικών μονάδων, καταγράφοντας τις εμπειρίες, τις δυσκολίες, τις προοπτικές, καθώς και τις εσωτερικές αντιθέσεις και αντιφάσεις που αναδύθηκαν κατά τη διαδικασία υλοποίησης (Brinia, 2008). Επιπλέον, θίγει τον τρόπο με τον οποίο ο ψηφιακός μετασχηματισμός εντάσσεται και γίνεται αποδεκτός ή προκαλεί αντιδράσεις από μέλη της σχολικής κοινότητας, αναδεικνύοντας το ζήτημα της αυθεντικής διοικητικής αλλαγής έναντι της επιφανειακής ψηφιακής συμμόρφωσης (Ross, 2017).

Στόχος της παρούσας εργασίας είναι να διερευνήσει τις επιπτώσεις από την εφαρμογή του Νόμου 3446/16-05-2024 σχετικά με την καθιέρωση του «Ψηφιακού Βιβλίου Πράξεων Συλλόγου Διδασκόντων» στις σχολικές μονάδες, εστιάζοντας στις αλλαγές που προκλήθηκαν στο επίπεδο της σχολικής διοίκησης, στις σχέσεις μεταξύ των μελών του συλλόγου διδασκόντων, αλλά και στην αναδυόμενη κουλτούρα ψηφιακής διαχείρισης. Η εργασία επιχειρεί να αποτυπώσει όχι μόνο τις τεχνικές και γραφειοκρατικές διαστάσεις της εφαρμογής, αλλά και τον τρόπο με τον οποίο τα μέλη της σχολικής κοινότητας ερμηνεύουν και βιώνουν την ψηφιακή αυτή μετάβαση, προσαρμοζόμενοι στα επιβαλλόμενα διεθνή Ευρωπαϊκά πρότυπα (Outeda, 2024). Βασικά ερευνητικά ερωτήματα που καθοδηγούν την εργασία είναι τα εξής:

- Ποιες είναι οι βασικές ποιοτικές και ποσοτικές αλλαγές που επέφερε η εφαρμογή του Ψηφιακού βιβλίου πράξεων στις σχολικές μονάδες, όπως εφαρμόστηκε;
- Πώς αντιλήφθηκαν και πώς ερμήνευσαν οι διευθυντές/-τριες και οι εκπαιδευτικοί τη λειτουργία του νέου ψηφιακού διοικητικού μηχανισμού;
- Ποιες είναι οι δυσκολίες, οι εντάσεις ή και οι αντιφάσεις που προέκυψαν κατά την ενσωμάτωσή του στις διοικητικές διαδικασίες;
- Πώς διαμορφώθηκαν οι σχέσεις μεταξύ των μελών της σχολικής κοινότητας υπό το νέο καθεστώς ψηφιακής καταγραφής και διαφάνειας;
- Σε ποιο βαθμό η εφαρμογή του νόμου συνέβαλε ή ανέστειλε την αποτελεσματικότητα του διοικητικού έργου και την ανάπτυξη συνεργατικού κλίματος στο σχολείο;

Οι απαντήσεις στα παραπάνω ερωτήματα δεν είναι ευθύγραμμες, αλλά αντιμετωπίζονται ως πολυδύναμες, και στην παρούσα φάση, μπορούν να αποτυπωθούν μόνο αν αποσκοπούν στην ανάδειξη των προϋποθέσεων για έναν ουσιαστικό ψηφιακό μετασχηματισμό που θα στηρίζεται όχι μόνο στην τεχνολογική εφαρμογή, αλλά κυρίως στη συμμετοχική, παιδαγωγικά ευαίσθητη και διοικητικά βιώσιμη αξιοποίησή του (Matthaiou, 2007). Από πλευράς μεθοδολογίας η παρούσα εργασία εντάσσεται αφενός στο πλαίσιο των ερευνών των εκπαιδευτικών που μελετούν το έργο τους (Altrichter et al., 2001), και αφετέρου, στον πλαίσιο απολογισμού εφαρμογής μιας εκπαιδευτικής και διοικητικής πολιτικής, βασισμένη κυρίως σε εμπειρική καταγραφή δεδομένων (Liakopoulou et al., 2021). Από την στερεότυπη διαδικασία της ποσοτικής ή της ποιοτικής ερευνητικής μεθόδου (π.χ. συνεντεύξεις, ερωτηματολόγια), θεωρήσαμε ότι για τον διπλό μας ρόλο ως ερευνητές και ως διευθυντές θα πρέπει να καταγράψουμε και να δηλώσουμε την εμπειρική-αναστοχαστική προσέγγιση μας, έχοντας ως μελέτες περίπτωσης τις σχολικές μονάδες που εφάρμοσαν τον νόμο. Η εργασία μας σηματοδοτεί τις εφαρμογές της διαχείρισης γνώσης στην αύξηση της αποτελεσματικότητας στις δημόσιες υπηρεσίες και οργανισμούς εκπαίδευσης (Zygouris & Valcanos, 2019), και καταγράφοντας την πρακτική εμπειρία από την πλευρά της σχολικής διοίκησης, στο 1ο Εργαστηριακό Κέντρο Αγίου Δημητρίου στην Αττική, και στο 1ο Γενικό Λύκειο Άρτας, και λειτουργώντας ως μια σύνθεση παρατηρήσεων και βιωμάτων από την ίδια την διοικητική και την εκπαιδευτική πράξη.

Ανάμεσα στα κύρια ευρήματα, πέραν του ισχύοντος εφαρμοστικού πλαισίου (Κεφάλαιο 2), αναφέρονται σημαντικά στοιχεία για την μεθοδολογία της έρευνας (Κεφάλαιο 3), ενώ αναφέρονται σημαντικά συμπεράσματα από την εφαρμογή του νόμου για τον σύλλογο διδασκόντων και τον καθοριστικό ρόλο του διευθυντή της σχολικής μονάδας (Κεφάλαιο 4). Στο Κεφάλαιο 5 αναφέρονται διαπιστώσεις, αιτιάσεις και μαρτυρίες, σχετικά με την εισαγωγή του ψηφιακού βιβλίου στις σχολικές μονάδες. Η θεσμική εισαγωγή ανέδειξε χρόνιες συγκρούσεις και διοικητικές αντιφάσεις, αλλά και ότι λειτούργησε ως καταλύτης για τη μετάβαση σε μία νέα μορφή ψηφιακής διακυβέρνησης.



Στο παρόν άρθρο, ως προστιθέμενη επιστημονική αξία, αναδεικνύονται οι προκλήσεις ως προς την ενσωμάτωση των νέων πρακτικών μέσα από τους χώρους εργασίας, η αίσθηση επιβολής επιτελικών-γραφειοκρατικών λογικών, αντί για την υλοποίηση υποστηρικτικών δομών, καθώς και το συμπέρασμα ότι η επιτυχία της εφαρμογής εξαρτάται από την ουσιαστική ψηφιακή κατάρτιση των μελών της σχολικής μονάδας. Ακόμη και με δεδομένη την νομοθεσία η αναζήτηση προτύπων, οδηγών αποτελεσματικών εφαρμογών και κατάλληλων συμπεριφορών συμμόρφωσης (Abou-Zahra & Brewer,

2019), όχι μόνο δεν σταματά, αλλά είναι το ζητούμενο για την επόμενη ημέρα εφαρμογής ενός νομοθετικού πλαισίου. Και στις δύο εκδοχές διαχείρισης της ποιότητας στις σχολικές μονάδες (Goddard & Leask, 1992), τόσο ως διευθυντές, όσο και ως ερευνητές, καταλήγουμε στη θέση ότι η ανάπτυξη της ποιότητας στην εκπαίδευση (Creemers & Kyriakides, 2012), ο ψηφιακός μετασχηματισμός των σχολικών μονάδων δεν μπορεί να στηριχθεί αποκλειστικά σε νομικές ρυθμίσεις ή τεχνικές οδηγίες, αλλά προϋποθέτει μια γνήσια διοικητική πολιτική Διαχείρισης Ολικής Ποιότητας (ΔΟΠ), η οποία να επενδύει στον ψηφιακό εγγραμματισμό χωρίς αποκλεισμούς (Vlachos et al., 2007). Η θεσμική παρέμβαση του Ν. 3446/2024 αποτελεί μία αφετηρία, αλλά η αποτελεσματικότητα του εγχειρήματος εξαρτάται από το αν θα υπάρξει ολιστική συνέχεια και στήριξη σε επίπεδο εκπαίδευσης, παιδαγωγικών μοντέλων χειραφέτησης, και αποτελεσματικής διοικητικής κουλτούρας.

ΤΟ ΕΦΑΡΜΟΣΤΙΚΟ, ΝΟΜΙΚΟ ΚΑΙ ΤΕΧΝΟΛΟΓΙΚΟ ΠΛΑΙΣΙΟ, ΤΟΥ ΨΗΦΙΑΚΟΥ ΒΙΒΛΙΟΥ ΠΡΑΞΕΩΝ ΣΥΛΛΟΓΟΥ

Η διοίκηση της εκπαίδευσης, και όχι μόνο στις ημέρες μας, συνιστά ένα κρίσιμο πεδίο για την κατανόηση των μετασχηματισμών που επιφέρει ο ψηφιακός μετασχηματισμός, τόσο στη λειτουργία των σχολικών μονάδων όσο και στις σχέσεις εξουσίας εντός τους. Ο ψηφιακός μετασχηματισμός, ως καταγραφή μεγάλων δεδομένων (Ozga, 2009), επηρεάζει καθοριστικά τον τρόπο με τον οποίο οι εκπαιδευτικοί και τα διοικητικά στελέχη αλληλοεπιδρούν, επικοινωνούν, λαμβάνουν αποφάσεις και υλοποιούν διοικητικές πρακτικές. Παράλληλα, αναδύεται η ανάγκη για νέες δεξιότητες ψηφιακής διακυβέρνησης και διαχείρισης αυτών των δεδομένων (Williamson, 2017), τα οποία επαναπροσδιορίζουν όχι μόνο την μορφή αλλά και την ίδια την έννοια της ηγεσίας στην εκπαίδευση. Στην εποχή της ψηφιακής επιτάχυνσης, η εκπαιδευτική διοίκηση μετατοπίζεται από παραδοσιακές ιεραρχικές μορφές ελέγχου και επίβλεψης προς πιο αποκεντρωμένες, διασυνδεδεμένες και τεχνολογικά εξαρτώμενες μορφές οργάνωσης. Η χρήση Τεχνολογιών Πληροφορικής και Επικοινωνιών (ΤΠΕ) δεν περιορίζεται πλέον στη διδακτική διαδικασία, αλλά επεκτείνεται δυναμικά και στο επίπεδο της διοίκησης, με εργαλεία όπως το “myschool”, οι πλατφόρμες ηλεκτρονικής αλληλογραφίας, τα πληροφοριακά συστήματα καταγραφής επιδόσεων και παρουσιών, καθώς και με την αξιοποίηση ψηφιακών μορφών αξιολόγησης.

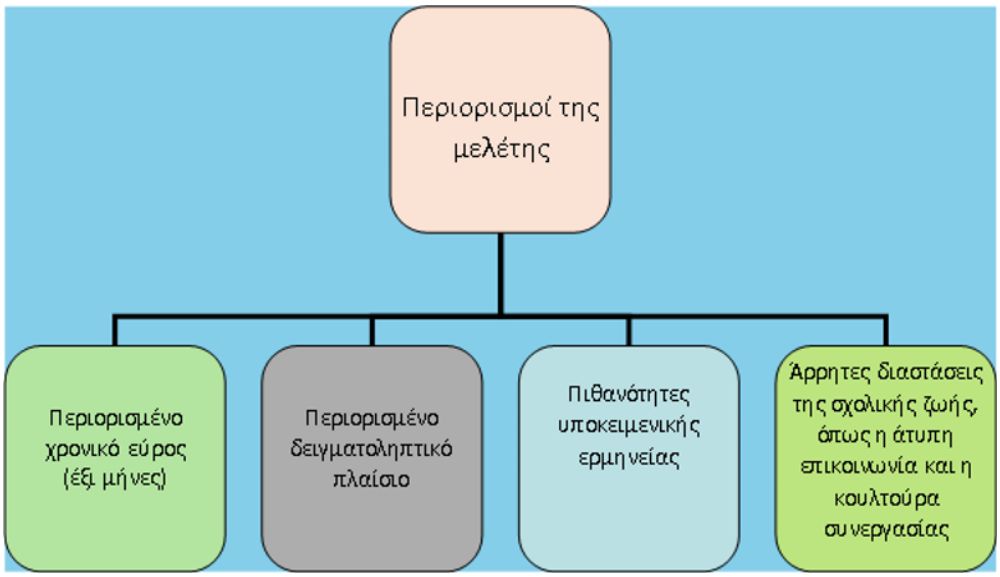
Εικόνα 1
Ηλεκτρονική Πύλη για το Ψηφιακό βιβλίο πράξεων συλλόγου διδασκόντων (https://edudocs.services.gov.gr/)

Η διαδικτυακή υπηρεσία “https://edudocs.services.gov.gr” αποτελεί την επίσημη πλατφόρμα παροχής ψηφιακών εγγράφων για εκπαιδευτικούς και διοικητικά στελέχη του Υπουργείου Παιδείας, Θρησκευμάτων και Αθλητισμού (ΥΠΑΙΘΑ). Μέσω αυτής, οι χρήστες μπορούν να αποκτούν πρόσβαση σε έγγραφα που εκδίδονται αυτόματα, όπως πράξεις ανάληψης υπηρεσίας, βεβαιώσεις τοποθέτησης ή υπηρεσιακής κατάστασης, συμβάλλοντας στον εκσυγχρονισμό και την απλοποίηση της εκπαιδευτικής γραφειοκρατίας. Η εφαρμογή του Ψηφιακού βιβλίου πράξεων συλλόγου

διδασκόντων θεσμοθετήθηκε στο πλαίσιο του εκσυγχρονισμού της διοίκησης των σχολικών μονάδων, με στόχο την ενίσχυση της διαφάνειας, της ιχνηλασιμότητας και της αποδοτικότητας των διαδικασιών. Η νομική βάση της πλατφόρμας ορίζεται στο ΦΕΚ Β' 4210/27.07.2023 και εντάσσεται στον ευρύτερο σχεδιασμό του Υπουργείου Παιδείας, Θρησκευμάτων και Αθλητισμού για τον ψηφιακό μετασχηματισμό της εκπαίδευσης. Η πλατφόρμα «Ψηφιακό βιβλίο πράξεων συλλόγου διδασκόντων» (Εικόνα 1) ενσωματώνεται στο myschool.gov.gr, αποτελώντας ένα «υποσύστημα», και διαμορφώνει ένα ενιαίο περιβάλλον τεκμηρίωσης των αποφάσεων του συλλογικού οργάνου των σχολείων. Παρέχει δυνατότητα δημιουργίας, υπογραφής, αποθήκευσης και ανάκτησης Πράξεων μέσω ψηφιακής διακίνησης εγγράφων, με χρήση των προσωπικών κωδικών των διευθυντών και των εκπαιδευτικών. Η πρόσβαση, ο χρόνος σύνδεσης και η δράση κάθε χρήστη καταγράφονται με ακρίβεια, εξασφαλίζοντας διαφάνεια και έλεγχο.

Ο κύριος στόχος του ΥΠΑΙΘΑ μέσω της συγκεκριμένης θεσμικής και τεχνολογικής παρέμβασης είναι η διοικητική αναβάθμιση των σχολικών μονάδων, η μείωση της γραφειοκρατίας, και η ψηφιακή τεκμηρίωση όλων των συλλογικών αποφάσεων. Το ΦΕΚ προβλέπει ότι όλες οι πράξεις του Συλλόγου Διδασκόντων καταχωρίζονται αποκλειστικά στο ψηφιακό περιβάλλον, με συγκεκριμένη διαδικασία σύνταξης, αποδοχής και υπογραφής από τα εμπλεκόμενα μέλη. Επισημαίνεται ότι καταργείται η χειρόγραφη τήρηση των βιβλίων Πράξεων, ενώ σε περιπτώσεις τεχνικής αδυναμίας προβλέπεται προσωρινή έντυπη καταγραφή με μεταγενέστερη ψηφιακή αποτύπωση. Η χρήση ψηφιακής υπογραφής και η δυνατότητα ταυτοποίησης κάθε ενέργειας αποτελούν κρίσιμες δικλίδες ασφαλείας. Το ΥΠΑΙΘΑ τονίζει τη σημασία του ψηφιακού αρχείου ως νόμιμου και δεσμευτικού τεκμηρίου, ενώ επιδιώκει μέσω της οριζόντιας αυτής δράσης την καθολική και ομοιόμορφη εφαρμογή διοικητικών διαδικασιών σε όλα τα σχολεία της χώρας.

Η συνολική εφαρμογή του ψηφιακού βιβλίου πράξεων διδασκόντων αντανακλά τη στρατηγική επιλογή για μετάβαση της εκπαίδευσης στην ψηφιακή εποχή, με την τεχνολογία να λειτουργεί όχι ως απλή υποστήριξη αλλά ως θεμελιώδες εργαλείο διακυβέρνησης. Παρά τις θετικές προσδοκίες, επισημαίνεται από την εκπαιδευτική κοινότητα η ανάγκη συνεχούς επιμόρφωσης των διευθυντών και των εκπαιδευτικών, καθώς και η διασφάλιση της τεχνικής υποστήριξης, ώστε να αποφευχθούν προβλήματα πρόσβασης και καθυστερήσεις. Επιπλέον, εγείρονται ερωτήματα για τη νομική ευθύνη και την ισχύ των Πράξεων σε περιπτώσεις δυσλειτουργίας ή σφάλματος στο σύστημα. Παρόλα αυτά, η θεσμοθέτηση του ψηφιακού περιβάλλοντος, όπως περιγράφεται στο ΦΕΚ, θα μπορούσε, υπό προϋποθέσεις να αποτελέσει ένα σημαντικό βήμα προς τον εκσυγχρονισμό της σχολικής διοίκησης, την ενίσχυση της λογοδοσίας και τη δημιουργία ενός διαφανούς και λειτουργικού πλαισίου συνεργασίας εντός των σχολικών μονάδων.



ΜΕΘΟΔΟΛΟΓΙΑ ΕΡΕΥΝΑΣ

Η παρούσα δημοσίευση από πλευράς μεθοδολογίας, βασίζεται σε μία απολογιστική – περιγραφική ερευνητική αποτύπωση, με στόχο να καταγράψει και να ερμηνεύσει εμπειρικά τις επιδράσεις που επέφερε η εισαγωγή της εν λόγω ψηφιακής διοικητικής πρότασης στην καθημερινή σχολική ζωή και στις εσωτερικές διοικητικές σχέσεις των εκπαιδευτικών. Ως πλαίσιο αναφοράς ενοποιεί το θεωρητικό μέρος των εννοιών της ψηφιακής διακυβέρνησης (e-governance) και της νέας δημόσιας διαχείρισης των εκπαιδευτικών οργανισμών, προσεγγίζοντας τον ψηφιακό μετασχηματισμό της σχολικής διοίκησης ως μια παράλληλη διαδικασία τεχνολογικής επιτήρησης και κανονιστικού ελέγχου. Η ψηφιακή διακυβέρνηση (e-governance) λειτουργεί ως εργαλείο εφαρμογής των αρχών της αποδοτικότητας, της λογοδοσίας και της τυποποίησης που προτάσσουν τα νέα πρότυπα για την δημόσια διοίκηση. Η συγκεκριμένη προσέγγιση ούτε στοχεύει, αλλά ούτε μπορεί να εξαγάγει γενικευμένα ποσοτικά συμπεράσματα, αλλά, αποτυπώνει συστηματικά εμπειρίες, στάσεις και αναδυόμενα πρότυπα συμπεριφοράς εντός των σχολικών μονάδων. Η ανάλυση βασίζεται μερικώς σε καταγραφή ποιοτικών δεδομένων, τα οποία προέρχονται κυρίως από αφηγήσεις και περιγραφές διευθυντών και εκπαιδευτικών, καθώς και από την εσωτερική τεκμηρίωση της σχολικής λειτουργίας (όπως Πράξεις Συλλόγου, ανακοινώσεις, και υπηρεσιακή αλληλογραφία), με στόχο να φωτιστούν οι τρόποι με τους οποίους η νέα ψηφιακή πρακτική αφομοιώνεται ή διαφοροποιεί τις καθιερωμένες ρουτίνες.

Οι επιλογές των περιπτώσεων μελέτης ακολούθησαν την σκοπούμενη δειγματοληψία με βάση κριτήρια λειτουργικής ετερογένειας. Συγκεκριμένα, επιλέχθηκαν σχολικές μονάδες δευτεροβάθμιας εκπαίδευσης από διαφορετικές γεωγραφικές και κοινωνικές περιοχές της χώρας (αστικά κέντρα, περιφέρεια, Εργαστηριακά Κέντρα και Γενικά Λύκεια), ώστε να αναδειχθεί η ποικιλομορφία στην εφαρμογή και αποδοχή του «Ψηφιακού Βιβλίου Πράξεων Συλλόγου Διδασκόντων» ως ψηφιακού εργαλείου για τις διοικητικές πράξεις. Το χρονικό πλαίσιο της έρευνας περιορίστηκε στο πρώτο εξάμηνο του σχολικού έτους 2024–2025, κατά το οποίο η χρήση του Ψηφιακού βιβλίου πράξεων έγινε υποχρεωτική σε όλα τα σχολεία. Το διάστημα αυτό αποτέλεσε το πρώτο πεδίο ωρίμανσης της εμπειρίας και προσέφερε επαρκή δεδομένα για την κατανόηση των αρχικών αντιδράσεων, προσαρμογών και δυσκολιών από την πλευρά των στελεχών και του συλλόγου διδασκόντων. Η αποτύπωση πραγματοποιήθηκε μέσω άτυπων ημιδομημένων προφορικών συνεντεύξεων με εκπαιδευτικούς Διευθυντές και Υποδιευθυντές, σε συνδυασμό με ανάλυση διοικητικών τεκμηρίων.

Η μεθοδολογία αξιοποίησε κυρίως την περιπτωσιολογική ανάλυση (case study), εστιάζοντας στις διαδικασίες λήψης αποφάσεων, καταγραφής, σύνταξης και επικύρωσης των Πράξεων Συλλόγου, καθώς και στους τρόπους με τους οποίους η χρήση της πλατφόρμας επέδρασσε στις σχέσεις μεταξύ Διευθυντή και εκπαιδευτικών. Ιδιαίτερη έμφαση δίνεται στην ανάδυση νέων μορφών «ψηφιακού ελέγχου» ή αντίστασης, όπως φάνηκαν από τις καθυστερήσεις υπογραφής, τις ανεπίσημες διαβουλεύσεις ή τις παρακάμψεις της τυπικής διαδικασίας. Εξετάζεται επίσης η αλληλεπίδραση μεταξύ τεχνικών προβλημάτων και του βαθμού αποδοχής από τα μέλη του Συλλόγου. Με τον τρόπο αυτό, επιχειρείται μια ολιστική προσέγγιση της εμπειρίας από τη σκοπιά των εκπαιδευτικών πρακτικών, της οργανωσιακής κουλτούρας και του διοικητικού φορτίου. Το πλαίσιο ανάλυσης δεν αποσκοπεί μόνο στην αξιολόγηση της λειτουργικότητας του ψηφιακού εργαλείου, αλλά κυρίως στην ανάδειξη των κοινωνικών, ιδεολογικών και οργανωτικών μετατοπίσεων που αυτό επιφέρει.

Διάγραμμα 1
Περιορισμοί της μελέτης

Ωστόσο, η παρούσα μελέτη περιλαμβάνει και σημαντικούς περιορισμούς (Διάγραμμα 1).

Πρώτον, το περιορισμένο χρονικό εύρος (έξι μήνες) δεν επιτρέπει την αποτίμηση της μακροπρόθεσμης επίδρασης του μέτρου.

Δεύτερον, το δειγματοληπτικό πλαίσιο, αν και επιλεκτικά διαφοροποιημένο, δεν καλύπτει το σύνολο της ποικιλίας των σχολικών μονάδων (π.χ. σχολεία με έντονα προβλήματα στελέχωσης, δυσπρόσιτα).

Τρίτον, υπάρχει η πιθανότητα υποκειμενικής ερμηνείας εκ μέρους των συμμετεχόντων, ειδικά σε ζητήματα που σχετίζονται με τον φόρτο εργασίας και τις σχέσεις εξουσίας.

Τέλος, η ερμηνεία των διοικητικών εγγράφων δεν μπορεί να αποδώσει πλήρως τις άρρητες διαστάσεις της σχολικής ζωής, όπως η άτυπη επικοινωνία και η κουλτούρα συνεργασίας.

Παρά ταύτα, η παρούσα ερευνητική προσέγγιση προσφέρει ως προστιθέμενη αξία, μια πρώτη ουσιαστική ποιοτική βάση για μελλοντική σύγκριση και για την ανάπτυξη εμπειρικών δεικτών αξιολόγησης του ψηφιακού μετασχηματισμού της σχολικής διοίκησης.

ΕΥΡΗΜΑΤΑ – ΕΜΠΕΙΡΙΕΣ ΑΠΟ ΤΗΝ ΕΦΑΡΜΟΓΗ, Ο ΣΥΛΛΟΓΟΣ ΔΙΔΑΣΚΟΝΤΩΝ ΚΑΙ Ο ΡΟΛΟΣ ΤΟΥ ΔΙΕΥΘΥΝΤΗ

Μια βασική αρνητική συνιστώσα του ψηφιακού μετασχηματισμού της εκπαίδευσης στις ημέρες μας είναι η ανάδυση της ψηφιακής γραφειοκρατίας μέσα από τις διοικητικές εργασίες του σχολείου. Πρόκειται για μια νέα μορφή διοικητικής λειτουργίας, η οποία διατηρεί την ορθολογικότητα και την τυποποίηση, όπως την περιέγραψε ο Max Weber (επ. 1978) για τη γραφειοκρατική οργάνωση, πολλούς αιώνες πριν τον ψηφιακό μετασχηματισμό του 21ου αιώνα. Η ψηφιακή γραφειοκρατία χαρακτηρίζεται από την αυτοματοποίηση των διαδικασιών, την ελαχιστοποίηση της φυσικής γραφής και της δια ζώσης επαφής, και την εξάρτηση από πλατφόρμες, εφαρμογές και ψηφιακά πρότυπα. Αν και στοχεύει

στη διαφάνεια, την ταχύτητα και την αποδοτικότητα, ενδέχεται να ενισχύσει νέες μορφές αδιαφάνειας ή εξάρτησης από την τεχνολογία, εφόσον δεν συνοδεύεται από κριτική προσέγγιση και διαφανή σχεδιασμό. Η έννοια της "ηλεκτρονικής διακυβέρνησης" στην εκπαίδευση (e-governance) αντικαθιστά σταδιακά τις παραδοσιακές μορφές διοικητικής επικοινωνίας με κωδικοποιημένες ροές πληροφοριών. Αυτό μπορεί να μετασχηματίσει την κουλτούρα της συνεργασίας και της εμπιστοσύνης μεταξύ των μελών της εκπαιδευτικής κοινότητας, μεταθέτοντας το βάρος από την ουσιαστική συζήτηση προς την τεχνική συμμόρφωση με διαδικαστικά πρότυπα. Όλα αυτά βέβαια εφαρμόζονται από ένα συλλογικό όργανο τον Σύλλογο Διδασκόντων.

Στο πλαίσιο των Συλλόγων Διδασκόντων, οι διοικητικές σχέσεις επηρεάζονται ουσιωδώς από τον τρόπο ενσωμάτωσης των ψηφιακών εργαλείων. Οι πολυεπίπεδες υποχρεωτικές δραστηριότητες που επιβάλλονται στους εκπαιδευτικούς της δευτεροβάθμιας εκπαίδευσης, από τη διοίκηση και τον κανονισμό λειτουργίας των σχολείων επηρεάζουν σημαντικά τις συναδελφικές σχέσεις. Η σωρευτική επιβάρυνση με εξωδιδακτικές ευθύνες, όπως η συμμετοχή σε επιτροπές, η διοργάνωση προγραμμάτων, η υποστήριξη δράσεων σχολικής ζωής και η συμβολή σε διαδικασίες αξιολόγησης, οδηγεί συχνά σε ανισοκατανομή του φόρτου εργασίας. Ειδικότερα στα Επαγγελματικά Λύκεια, και τα Εργαστηριακά Κέντρα οι υπεύθυνοι Εργαστηρίων και οι Τομεάρχες, οποία επιβαρύνονται και με την συντήρηση του εξοπλισμού των εργαστηρίων. Αυτό προκαλεί εντάσεις μεταξύ συναδέλφων, ιδίως όταν υπάρχει έντονος ψηφιακός αναλφαβητισμός σε συνδυασμό με την αποσπασματική ενημέρωση, και ταυτόχρονα δεν υπάρχουν σαφή και δίκαια κριτήρια ανάθεσης των καθηκόντων. Αυτό έχει ως συνέπεια κάποιοι εκπαιδευτικοί, ακόμη και οι Διευθυντές να αναλαμβάνουν συνεχώς περισσότερες ευθύνες, είτε από προσωπική διάθεση είτε λόγω διοικητικών πιέσεων. Σε αρκετές περιπτώσεις, η έλλειψη διαφάνειας και ουσιαστικής συμμετοχής του Συλλόγου Διδασκόντων στη λήψη αποφάσεων ενισχύει την αίσθηση αδικίας και διαβρώνει το αίσθημα εμπιστοσύνης μεταξύ των μελών του συλλόγου. Παράλληλα, η πίεση χρόνου και η επαγγελματική εξουθένωση περιορίζουν τον χώρο για αυθόρμητη συνεργασία και αλληλοϋποστήριξη. Συνεπώς, οι εν λόγω διοικητικές επιταγές, αντί να ενισχύουν το συλλογικό πνεύμα, συχνά υπονομεύουν τη συναδελφικότητα και την κουλτούρα συνεργασίας στο σχολείο.

Οι Σύλλογοι Διδασκόντων ως βασικά συλλογικά όργανα λήψης αποφάσεων εντός της σχολικής μονάδας, αντιμετωπίζουν προκλήσεις αλλά και ευκαιρίες από την ψηφιακή μετάβαση, τις οποίες αντιμετωπίσαμε κατά την εφαρμογή του Ψηφιακού βιβλίου πράξεων συλλόγου διδασκόντων στις σχολικές μονάδες την σχολική περίοδο 2024 – 2025. Από τη μία πλευρά, διευκολύνεται η πρόσβαση σε πληροφορίες, η οργάνωση συνεδριάσεων, η τήρηση πρακτικών και η διανομή εισηγήσεων. Από την άλλη, όμως, διακυβεύεται η ποιότητα του διαλόγου, και η ουσιαστική συμμετοχή, καθώς η διαδικασία «αποϋλοποιείται» ή αντικαθίσταται από την αλληλογραφία ή τις ψηφιακές φόρμες. Επιπλέον, η εξοικείωση των μελών με τα εργαλεία αυτά δεν είναι ομοιογενής, γεγονός που μπορεί να δημιουργήσει σχέσεις εξάρτησης ή αποκλεισμού. Η χρήση ψηφιακών μέσων μπορεί να επιφέρει μια «αποπροσωποποίηση» των σχέσεων, περιορίζοντας τις δυνατότητες ανάπτυξης παιδαγωγικής κοινότητας και συλλογικού στοχασμού. Σημαντική είναι επίσης η μετατόπιση εξουσίας που μπορεί να προκύψει, με τον Διευθυντή της σχολικής μονάδας ή τον υπεύθυνο ψηφιακής διαχείρισης, να αποκτά αυξημένο έλεγχο στην πληροφορία και στις ροές της.

Ο ρόλος του Διευθυντή σε ένα Λύκειο ως παιδαγωγικού και διοικητικού ηγέτη γίνεται ακόμη πιο κρίσιμος στην επίλυση των προβλημάτων τα οποία προκαλούνται από την υπερφόρτωση των εκπαιδευτικών με πολυεπίπεδες υποχρεωτικές δραστηριότητες. Πέρα από τη διαχείριση των διοικητικών απαιτήσεων, ο Διευθυντής οφείλει να λειτουργεί επιστημονικά, διοικητικά, και παιδαγωγικά υπεύθυνος του οργανισμού, και ως συντονιστής λειτουργεί ως διαμεσολαβητής και υπερασπιστής των αναγκών των εκπαιδευτικών και της έκφρασης της βούλησης του Συλλόγου Διδασκόντων. Ως Διευθυντής του οργανισμού χρειάζεται να αναγνωρίσει έγκαιρα τα σημάδια επαγγελματικής κόπωσης και ψυχολογικής επιβάρυνσης των εκπαιδευτικών και να λειτουργεί προληπτικά, διασφαλίζοντας την ισοκατανομή καθηκόντων με βάση διαφανή και συμφωνημένα κριτήρια. Πρέπει να προάγει ένα κλίμα εμπιστοσύνης και συλλογικότητας, ενισχύοντας τη συμμετοχή όλων στις αποφάσεις που αφορούν την κατανομή εργασιών, την επιλογή δράσεων και τον ετήσιο προγραμματισμό. Η καθιέρωση των τακτικών διαλόγων και εσωτερικής διαβούλευσης μέσα από παιδαγωγικές συνεδριάσεις με ενεργό ακρόαση και αναγνώριση των διαφορετικών φωνών και δυνατοτήτων κάθε συναδέλφου, ενισχύει τη συναδελφική κουλτούρα και αποτρέπει τις συγκρούσεις. Παράλληλα, ο Διευθυντής πρέπει να ενθαρρύνει την καλλιέργεια δεσμών μεταξύ των εκπαιδευτικών, δημιουργώντας ευκαιρίες για συνεργατική εργασία, ανταλλαγή καλών πρακτικών, και ανάδειξη της προσφοράς του καθενός στην κοινή σχολική ζωή. Η αναγνώριση και ηθική επιβράβευση της προσπάθειας, ακόμα και χωρίς υλική ανταμοιβή, αποτελεί βασικό κίνητρο για τη διατήρηση της δέσμευσης και της θετικής στάσης των εκπαιδευτικών. Τέλος, είναι απαραίτητο ο Διευθυντής να λειτουργεί και ως διαμεσολαβητής με την ανώτερη διοίκηση, μεταφέροντας τεκμηριωμένα τα όρια και τις δυνατότητες του ανθρώπινου δυναμικού του σχολείου, προασπίζοντας την ποιότητα της σχολικής ζωής και της διδασκαλίας. Όταν ο Διευθυντής λειτουργεί με παιδαγωγική ευαισθησία, οργανωτική δικαιοσύνη και ανθρωποκεντρική προσέγγιση, μπορεί να μετατρέψει τις διοικητικές προκλήσεις σε ευκαιρίες ενδυνάμωσης των συναδελφικών σχέσεων και σε μοχλό επαγγελματικής ανάπτυξης και συλλογικής ευημερίας στο σχολικό περιβάλλον.

Η ψηφιοποίηση, πέρα από εργαλειακή, έχει και θεσμικές και διαχειριστικές προεκτάσεις, καθώς επιφέρει μετατοπίσεις στον τρόπο με τον οποίο σχεδιάζεται, υλοποιείται και αξιολογείται η εκπαιδευτική πολιτική. Στόχος της εφαρμογής των ψηφιακών μηχανισμών και τεχνολογιών στην εκπαίδευση είναι να ενισχύουν τον κεντρικό έλεγχο μέσω της άμεσης διασύνδεσης των σχολικών μονάδων με το Υπουργείο Παιδείας, μειώνοντας τη σχετική αυτονομία τους και εντείνοντας την καταγραφική και ελεγκτική λειτουργία της διοίκησης. Οι εκπαιδευτικοί μετατρέπονται σταδιακά από επαγγελματίες με παιδαγωγική αυτονομία σε χρήστες συστημάτων που καταγράφουν, κωδικοποιούν και αναφέρουν. Αυτό συνδέεται με ευρύτερες τάσεις «νέας δημόσιας διοίκησης» (new public management), όπου η αποδοτικότητα, η λογοδοσία και οι δείκτες επίδοσης αποκτούν προτεραιότητα έναντι της συμμετοχής και του παιδαγωγικού στοχασμού (Kotsifakos, 2025). Παράλληλα, νέες θεσμικές πρακτικές εμφανίζονται, όπως η διαχείριση προσωπικών δεδομένων, η εφαρμογή ψηφιακών πρωτοκόλλων ασφάλειας, και η δημιουργία δεικτών παρακολούθησης της σχολικής ζωής. Σε αυτό το πλαίσιο, ο ρόλος του διευθυντή μετασχηματίζεται: από παιδαγωγικός ηγέτης καλείται να λειτουργεί και ως διαχειριστής ψηφιακών πληροφοριακών ροών, φέρνοντας στο προσκήνιο την ανάγκη για πολυεπίπεδη επαγγελματική ανάπτυξη. Κατά το πρώτο εξάμηνο εφαρμογής του, διαπιστώθηκαν διαφοροποιημένες στάσεις και αντιδράσεις από πλευράς εκπαιδευτικών. Ορισμένοι το υποδέχθηκαν θετικά ως εργαλείο εκσυγχρονισμού και διαφάνειας, ενώ άλλοι εξέφρασαν επιφυλάξεις, θεωρώντας ότι πρόκειται για έναν ακόμα διοικητικό μηχανισμό που επιβαρύνει την καθημερινότητά τους χωρίς ουσιαστική υποστήριξη.

ΣΥΖΗΤΗΣΗ – ΑΝΑΛΥΣΗ ΤΩΝ ΑΠΟΤΕΛΕΣΜΑΤΩΝ, ΣΥΜΠΕΡΑΣΜΑΤΑ ΚΑΙ ΠΡΟΤΑΣΕΙΣ

Απαντώντας αναστοχαστικά τις αρχικές ερωτήσεις του άρθρου θα καταγράφαμε τα εξής:

- Η εφαρμογή του Ψηφιακού βιβλίου πράξεων συλλόγου στις σχολικές μονάδες επέφερε σημαντικές ποιοτικές και ποσοτικές αλλαγές στη λειτουργία της σχολικής διοίκησης. Ποσοτικά, μειώθηκε δραστικά η χρήση έντυπου υλικού και αναλώσιμων, συμβάλλοντας σε εξοικονόμηση πόρων και χρόνου. Οι πράξεις πλέον καταχωρούνται, αποθηκεύονται και ανακτώνται ψηφιακά, μειώνοντας τον διοικητικό φόρτο. Η πρόσβαση σε παλαιότερες πράξεις είναι άμεση, χωρίς φυσική αναζήτηση ή φθορά αρχείων. Οι εκπαιδευτικοί μπορούν να υπογράφουν εξ αποστάσεως, γεγονός που διευκολύνει τη λειτουργία των συλλογικών οργάνων. Ενισχύθηκε η διαφάνεια και η λογοδοσία, καθώς κάθε ενέργεια καταγράφεται ηλεκτρονικά με χρονοσήμανση. Παράλληλα, αυξήθηκε η ασφάλεια των δεδομένων μέσω συστημάτων ταυτοποίησης και ψηφιακών υπογραφών. Ποιοτικά, το Ψηφιακό βιβλίο πράξεων συλλόγου προώθησε μια πιο οργανωμένη και επαγγελματική εικόνα της σχολικής μονάδας. Διευκόλυνε τη συνεργασία μεταξύ των μελών του Συλλόγου Διδασκόντων, ιδίως σε περιπτώσεις απουσιών ή εξ αποστάσεως συμμετοχών. Καθιερώθηκε μια ενιαία μορφοποίηση και τεκμηρίωση των πράξεων, περιορίζοντας τα λάθη. Επιπλέον, ενισχύθηκε η συμμόρφωση με το θεσμικό πλαίσιο και τις προβλεπόμενες διαδικασίες. Η διαδικασία καταγραφής έγινε πιο αντικειμενική και λιγότερο επιρρεπής σε παρερμηνείες. Οι διευθυντές απέκτησαν ένα ευέλικτο εργαλείο για τη διοικητική τους λειτουργία. Η επιμόρφωση και η ενασχόληση του προσωπικού σε ψηφιακές δεξιότητες αποτέλεσε ένα θετικό αποτέλεσμα. Ενισχύθηκε η κουλτούρα ψηφιακού μετασχηματισμού στη σχολική κοινότητα. Η εφαρμογή διευκόλυνε την παρακολούθηση και αξιολόγηση της σχολικής λειτουργίας από ανώτερα διοικητικά όργανα. Αν και υπήρχαν αρχικά τεχνικά ή οργανωτικά προβλήματα, με την πάροδο του χρόνου υπερκεράστηκαν. Η διαλειτουργικότητα με άλλα πληροφοριακά συστήματα (π.χ. myschool) ενισχύθηκε. Το Ψηφιακό βιβλίο πράξεων συλλόγου διευκόλυνε την τεκμηρίωση δράσεων και την αποτύπωση των αποφάσεων για ιστορικούς και αξιολογικούς λόγους. Τέλος, αποτέλεσε παράδειγμα για τον εκσυγχρονισμό και άλλων διοικητικών πρακτικών στο σχολείο.
- Οι διευθυντές και οι εκπαιδευτικοί αντιλήφθηκαν τη λειτουργία του νέου ψηφιακού διοικητικού μηχανισμού ως βήμα προς τον εκσυγχρονισμό της σχολικής διοίκησης. Μέρος των εκπαιδευτικών εκφράστηκε αρνητικά, για ιδεολογικούς λόγους. Ένα μεγάλο μέρος όμως των εκπαιδευτικών ερμήνευσαν την αλλαγή ως αναγκαία προσαρμογή στις απαιτήσεις της ψηφιακής εποχής. Εκτίμησαν ιδιαίτερα τη μείωση της γραφειοκρατίας και την ευκολία πρόσβασης στις πράξεις. Η δυνατότητα εξ αποστάσεως συμμετοχής και υπογραφής θεωρήθηκε ιδιαίτερα χρήσιμη σε περιόδους απουσιών ή έκτακτων καταστάσεων. Αντιμετώπισαν όμως αρχικά προκλήσεις που σχετίζονταν με την τεχνική εξοικείωση και τη μετάβαση από τις έντυπες στις ψηφιακές διαδικασίες. Σταδιακά, υιοθέτησαν θετικότερη στάση, αναγνωρίζοντας την αποτελεσματικότητα και την ασφάλεια του συστήματος. Οι διευθυντές είδαν το εργαλείο ως ενίσχυση της οργανωτικής τους ικανότητας και της διαφάνειας στη λήψη αποφάσεων. Ορισμένοι εκπαιδευτικοί επεσήμαναν την ανάγκη για συνεχή επιμόρφωση και τεχνική υποστήριξη. Συνολικά, το ψηφιακό βιβλίο πράξεων ερμηνεύθηκε ως μια μεταρρύθμιση που εξυπηρετεί την αξιοπιστία και τη θεσμική τεκμηρίωση. Τελικά η συγκεκριμένη αλλαγή συνέβαλε στη διαμόρφωση μιας νέας κουλτούρας διοίκησης, περισσότερο συνεργατικής και τεχνολογικά υποστηριζόμενης.
- Παρ’ όλα αυτά κατά την ενσωμάτωση του Ψηφιακού βιβλίου πράξεων συλλόγου διδασκόντων στις διοικητικές διαδικασίες προέκυψαν αρκετές δυσκολίες, εντάσεις και αντιφάσεις. Ορισμένοι εκπαιδευτικοί αντιμετώπισαν τεχνικά προβλήματα ή έλλειψη ψηφιακών δεξιοτήτων, γεγονός που προκάλεσε ανασφάλεια και καθυστερήσεις. Παρατηρήθηκε ένταση ανάμεσα στην ανάγκη για άμεση προσαρμογή και την απουσία επαρκούς επιμόρφωσης ή υποστήριξης. Αντιφατικά, ενώ το σύστημα προωθεί τη διαφάνεια και την τυποποίηση, σε ορισμένες περιπτώσεις υπήρξε αμφιβολία για την ευελιξία και την παιδαγωγική διάσταση της σχολικής διοίκησης. Επιπλέον, η ψηφιακή

υπογραφή και η ηλεκτρονική τεκμηρίωση έφεραν στην επιφάνεια ερωτήματα για την ατομική ευθύνη και την πραγματική συμμετοχή στις συλλογικές αποφάσεις.

- Η εφαρμογή του νέου καθεστώτος ψηφιακής καταγραφής και διαφάνειας επηρέασε ουσιαστικά τις σχέσεις μεταξύ των μελών της σχολικής κοινότητας. Δημιουργήθηκε ένα πλαίσιο μεγαλύτερης λογοδοσίας, όπου κάθε ενέργεια καταγράφεται και είναι προσβάσιμη από όλα τα εμπλεκόμενα μέλη. Αυτό ενίσχυσε το αίσθημα ευθύνης και σοβαρότητας στη διατύπωση γνώμης και στη λήψη αποφάσεων. Οι συνεδριάσεις του συλλόγου διδασκόντων απέκτησαν πιο επίσημο και τεκμηριωμένο χαρακτήρα. Η διαφάνεια συνέβαλε στη μείωση παρασκηνιακών ή άτυπων διαδικασιών. Ορισμένα μέλη ένιωσαν μεγαλύτερη πίεση να ευθυγραμμιστούν με τις πλειοψηφικές αποφάσεις. Παράλληλα, ενισχύθηκε η εμπιστοσύνη στις διοικητικές πρακτικές της διεύθυνσης. Οι νέοι εκπαιδευτικοί είχαν την ευκαιρία να κατανοήσουν καλύτερα τις δομές και τους κανόνες λειτουργίας του σχολείου. Καθιερώθηκε μια πιο τυποποιημένη και αντικειμενική επικοινωνία. Ωστόσο, η επίσημη καταγραφή περιόρισε κάποιες φορές τον αυθορμητισμό και τη ζωντανή παιδαγωγική συζήτηση. Δημιουργήθηκε ένα νέο είδος "ψηφιακής πειθαρχίας", που άλλαξε τη δυναμική των συναδελφικών σχέσεων. Σε ορισμένες περιπτώσεις, υπήρξε δισταγμός στην έκφραση εναλλακτικών ή κριτικών απόψεων. Ταυτόχρονα, διαμορφώθηκαν συνθήκες ισότιμης πρόσβασης στην πληροφόρηση και στις αποφάσεις. Οι σχέσεις διευθυντών και εκπαιδευτικών απέκτησαν περισσότερο θεσμικό περιεχόμενο. Η διαθεσιμότητα των πράξεων ενίσχυσε τη διαγενεακή γνώση και τη συνέχεια της σχολικής μνήμης. Η τυποποίηση οδήγησε σε μια πιο επαγγελματική κουλτούρα συνεργασίας. Η εξ αποστάσεως συμμετοχή ενίσχυσε την ένταξη μελών που παλαιότερα απουσίαζαν. Η συντονισμένη χρήση του εργαλείου απαιτούσε αυξημένο επίπεδο εμπιστοσύνης και επικοινωνίας. Εντέλει, το νέο πλαίσιο καλλιέργησε μια κουλτούρα διαφάνειας και συλλογικής ευθύνης. Παρ' όλες τις προκλήσεις, οι σχέσεις εξελίχθηκαν προς ένα πιο θεσμικό, συντονισμένο και συνεκτικό μοντέλο συνεργασίας.
- Η εφαρμογή του νόμου για το Ψηφιακό Βιβλίο Πράξεων συνέβαλε ουσιαστικά στη βελτίωση της αποτελεσματικότητας του διοικητικού έργου και, σε αρκετές περιπτώσεις, στην ενίσχυση του συνεργατικού κλίματος στο σχολείο. Η τυποποίηση των διαδικασιών απλοποίησε τη διαχείριση των συνεδριάσεων και τον τρόπο λήψης αποφάσεων. Η δυνατότητα ψηφιακής καταγραφής και αρχειοθέτησης διευκόλυνε τον συντονισμό των δράσεων και την παρακολούθηση της πορείας τους. Η ηλεκτρονική πρόσβαση στις πράξεις επέτρεψε σε όλα τα μέλη της σχολικής κοινότητας να ενημερώνονται άμεσα και ισότιμα. Οι διευθυντές απέκτησαν ένα χρήσιμο εργαλείο που ενίσχυσε τη διαχειριστική τους επάρκεια. Παράλληλα, η χρήση της πλατφόρμας δημιούργησε προϋποθέσεις για ανάπτυξη μιας κουλτούρας διαφάνειας. Οι διαδικασίες έγιναν πιο θεσμικά καθαρές και καταγεγραμμένες, κάτι που ενίσχυσε τη συλλογική ευθύνη. Ο χρόνος συνεδριάσεων αξιοποιήθηκε πιο παραγωγικά, καθώς περιορίστηκαν οι παρεκκλίσεις από την ημερήσια διάταξη. Σε περιόδους κρίσης ή απουσιών, η εξ αποστάσεως συμμετοχή διασφάλισε τη συνέχεια της διοικητικής λειτουργίας. Τα μέλη ένιωσαν ότι η φωνή τους καταγράφεται επίσημα, γεγονός που αύξησε το αίσθημα συμμετοχής. Ωστόσο, η εφαρμογή του μέτρου δεν ήταν απολύτως ομαλή. Υπήρξαν αρχικά δυσκολίες στην εξοικείωση με την τεχνολογία, ιδιαίτερα σε μέλη με περιορισμένες ψηφιακές δεξιότητες. Σε κάποιες περιπτώσεις, η τυποποίηση προκάλεσε αίσθηση αποπροσωποποίησης ή και γραφειοκρατικής υπερφόρτωσης. Το στοιχείο της αυθόρμητης συζήτησης περιορίστηκε, γεγονός που επηρέασε την ελευθερία έκφρασης. Επίσης, ο φόβος για την επίσημη καταγραφή απόψεων οδήγησε σε πιο επιφυλακτικές τοποθετήσεις. Σε ορισμένα σχολεία παρατηρήθηκε συγκεντρωτισμός στην καταγραφή των πράξεων από τη διεύθυνση, με περιορισμένη ανάληψη ευθύνης από τα υπόλοιπα μέλη. Ωστόσο, με την πάροδο του χρόνου, αναπτύχθηκαν μηχανισμοί προσαρμογής. Οι εκπαιδευτικοί απέκτησαν μεγαλύτερη εξοικείωση και εμπιστοσύνη στο σύστημα. Οι σχολικές μονάδες αξιοποίησαν την τεχνολογία ως αφορμή για επιμόρφωση και αναστοχασμό πάνω στις διαδικασίες τους. Η καταγραφή πράξεων ενίσχυσε τη διαχρονικότητα και τη μνήμη του σχολείου. Οι νεοεισερχόμενοι εκπαιδευτικοί μπορούσαν να προσεγγίσουν το ιστορικό αποφάσεων και να ενταχθούν πιο αποτελεσματικά στο κλίμα του σχολείου. Η διεύθυνση είχε πλέον ένα σταθερό σημείο αναφοράς για την παρακολούθηση των αποφάσεων. Σε περιπτώσεις αλλαγής ηγεσίας, η μετάβαση γινόταν πιο ομαλά. Η αποτίμηση του διοικητικού έργου βασιζόταν σε τεκμηριωμένα δεδομένα. Το συνεργατικό κλίμα ενισχύθηκε όταν υπήρχε σαφής και ισότιμη κατανομή ρόλων στην παραγωγή των διοικητικών πράξεων. Το εργαλείο έγινε αφορμή για ανταλλαγή τεχνογνωσίας και καλών πρακτικών. Σε ορισμένα σχολεία, οι εκπαιδευτικοί πρότειναν βελτιώσεις στη χρήση του, ενισχύοντας τη συμμετοχικότητα. Η αίσθηση θεσμικής ισοτιμίας ενισχύθηκε όταν το εργαλείο χρησιμοποιήθηκε με διαφάνεια και χωρίς αποκλεισμούς. Οι εκπαιδευτικοί ένιωσαν μεγαλύτερη σύνδεση με τη σχολική μονάδα ως θεσμική οντότητα. Η ποιότητα της εσωτερικής επικοινωνίας ενισχύθηκε με την τακτική ανατροφοδότηση. Παρότι οι αρχικές προκλήσεις ήταν σημαντικές, η συνολική επίδραση του νόμου στην αποτελεσματικότητα και τη συνεργασία κρίθηκε θετική. Το ψηφιακό περιβάλλον, αν και αρχικά ξένο για κάποιους, λειτούργησε τελικά ως μοχλός επαγγελματικής ανάπτυξης και εσωτερικής συνοχής.

Συνολικά μιλώντας στην πράξη, η εφαρμογή του ψηφιακού βιβλίου ανέδειξε αρκετές διοικητικές αντινομίες και αντιφάσεις. Η περιορισμένη τεχνική κατάρτιση ορισμένων στελεχών και εκπαιδευτικών, η απουσία επαρκούς καθοδήγησης και τα ασυμβίβαστα μεταξύ ψηφιακών πλατφορμών οδήγησαν σε περιπτώσεις δυσλειτουργιών. Επιπλέον, η ανάγκη για απόλυτη τήρηση των βημάτων καταχώρισης και επικύρωσης ενίσχυσε μια λογική τυπικής συμμόρφωσης, σε βάρος της ουσίας της παιδαγωγικής συναπόφασης. Πώς θα μπορούσε, λόγου χάρη, να ελεγχθεί αν, κατά τον ετήσιο

προγραμματισμό, ένας διευθυντής εισήγαγε έτοιμο σχέδιο δράσης προς ψήφιση, χωρίς να προηγηθεί ουσιαστικός διάλογος στον σύλλογο διδασκόντων και ενώ η πράξη καταχωρείται ψηφιακά, η συμμετοχή των εκπαιδευτικών περιορίζεται στην τυπική συμμόρφωση, αντί μιας γνήσιας παιδαγωγικής συναπόφασης.

Ταυτόχρονα, η εμπειρία ανέδειξε πεδία αντιφάσεων και συγκρούσεων. Ορισμένοι διευθυντές σχολείων αντιλήφθηκαν το εργαλείο ως ενίσχυση της διοικητικής τους εξουσίας, ενώ άλλοι το είδαν ως απειλή για την παραδοσιακή, άτυπη διαχείριση των σχολικών πρακτικών. Οι εκπαιδευτικοί, από την πλευρά τους, βρέθηκαν συχνά σε διλήμματα μεταξύ του υπηρεσιακού καθήκοντος και της προσωπικής τους εκτίμησης για τη λειτουργικότητα του νέου συστήματος. Σε ορισμένες περιπτώσεις παρατηρήθηκε δυσλειτουργία στην καταγραφή αποφάσεων λόγω καθυστερήσεων, ασαφειών στις οδηγίες ή απροθυμίας εμπλοκής. Η ερμηνεία των ευρημάτων, με βάση το θεωρητικό πλαίσιο της επιτελικότητας και των υπαγωγικών σχέσεων, δείχνει το πώς η ψηφιοποίηση μπορεί να λειτουργήσει όχι ως εργαλείο διευκόλυνσης, αλλά και ως μηχανισμός εντατικοποίησης του ελέγχου. Αντί να προάγεται η αυτονομία της σχολικής μονάδας, ενισχύεται η κεντρική κανονιστική εποπτεία. Το αποτέλεσμα είναι η εμπέδωση μιας «ψηφιακής γραφειοκρατίας», που μεταφέρει τον έλεγχο από τις τυπικές πράξεις στις δομές δεδομένων και τις ροές πληροφοριών.

Το άμεσο συμπέρασμα που προκύπτει σε αυτή την φάση είναι ότι η μετάβαση στην ψηφιακή διοίκηση δεν μπορεί να βασίζεται αποκλειστικά στην τεχνολογική υποδομή ή στην ευμενή διάθεση κάποιων διευθυντών με ένα μέρος των εκπαιδευτικών. Απαιτείται σοβαρή επένδυση στον ψηφιακό εγγραμματισμό των εκπαιδευτικών, ουσιαστική παιδαγωγική επιμόρφωση και αναστοχαστική αξιολόγηση των εργαλείων, όχι μόνο ως τεχνικών λύσεων αλλά και ως πολιτικών πρακτικών. Μόνο έτσι μπορεί να διασφαλιστεί ότι η τεχνολογία δεν θα ενισχύσει τους ήδη υπάρχοντες μηχανισμούς ελέγχου, αλλά θα αποτελέσει πραγματικό μέσο συμμετοχής, συνεργασίας και ενδυνάμωσης της εκπαιδευτικής κοινότητας. Η εισαγωγή του Ψηφιακού βιβλίου πράξεων συλλόγου διδασκόντων στο πλαίσιο της διοίκησης των σχολικών μονάδων, κατ' εφαρμογή των σχετικών νομοθετικών προβλέψεων, σηματοδότησε μια σημαντική τομή στη γραφειοκρατική και οργανωτική λειτουργία των σχολικών μονάδων. Ωστόσο, για να αποδώσει καρπούς αυτή η αλλαγή, είναι απαραίτητο να ενταχθεί σε μια ευρύτερη στρατηγική ποιότητας. Η φιλοσοφία της ΔΟΠ εστιάζει στη συμμετοχική διοίκηση, στη διαρκή βελτίωση και στην ενεργή εμπλοκή όλων των μελών του οργανισμού, μπορεί να λειτουργήσει ως πλαίσιο ερμηνείας και εφαρμογής των νέων ψηφιακών εργαλείων. Η εφαρμογή του νόμου με διοικητικούς όρους συχνά οδηγεί σε μηχανιστική συμμόρφωση: οι εκπαιδευτικοί καλούνται να συμπληρώνουν το ψηφιακό βιβλίο ως διαδικαστική υποχρέωση, χωρίς να αναγνωρίζεται ο παιδαγωγικός ή αναστοχαστικός του χαρακτήρας. Η ΔΟΠ, αντίθετα, προτείνει την ανάδειξη της καταγραφής πράξεων ως ευκαιρία για εσωτερική αξιολόγηση, συλλογικό σχεδιασμό και τεκμηριωμένη λήψη αποφάσεων. Μέσω της ενεργού συμμετοχής του συνόλου του συλλόγου διδασκόντων, ενισχύεται η κουλτούρα συνεργασίας και ενδυναμώνεται η αίσθηση κοινού σκοπού. Βασική αρχή της ΔΟΠ αποτελεί η πρόληψη των προβλημάτων και όχι η καταστολή τους μέσω ελέγχου. Η απλή τήρηση του ψηφιακού βιβλίου δεν επαρκεί για να επιφέρει ποιοτική βελτίωση. Αντίθετα, όταν συνδέεται με εργαλεία αποτίμησης, όπως η αποτύπωση της αποτελεσματικότητας των δράσεων και η ανατροφοδότηση του συλλόγου, τότε μετατρέπεται σε εργαλείο αυτορρύθμισης και στρατηγικού σχεδιασμού. Επιπλέον, η ΔΟΠ τονίζει τη σημασία της επιμόρφωσης και της ενίσχυσης του ανθρώπινου δυναμικού (Kotsifakos, 2025).

Η εφαρμογή της νομοθεσίας χωρίς ουσιαστική κατάρτιση των εκπαιδευτικών στον ψηφιακό εγγραμματισμό και στη λειτουργία των νέων εργαλείων, εγκυμονεί κινδύνους επιφανειακής εφαρμογής ή και απονομιμοποίησης της ίδιας της διαδικασίας. Συμπερασματικά, η σύνδεση της ΔΟΠ με την εφαρμογή του του ψηφιακού βιβλίου πράξεων συλλόγου διδασκόντων στις σχολικές μονάδες προτείνει μια διαφορετική οπτική: το ψηφιακό πρακτικό να αποτελέσει όχι ένα ακόμη εργαλείο καταγραφής και ελέγχου, αλλά ένα μέσο στοχαστικής δράσης και ποιοτικής ανατροφοδότησης. Μόνο μέσα από αυτή την ολιστική προσέγγιση μπορεί να διασφαλιστεί ότι η διοικητική καινοτομία υπηρετεί τις ανάγκες της εκπαιδευτικής κοινότητας και συμβάλλει στη βελτίωση της σχολικής ζωής.

ΠΕΡΙΛΗΨΗ

Η ψηφιακή μετάβαση στην εκπαίδευση έχει επαναπροσδιορίσει ριζικά τον ρόλο των εκπαιδευτικών ηγετών, οι οποίοι καλούνται να διαχειριστούν πολύπλοκες συνθήκες, να αναπτύξουν νέες δεξιότητες και να διαμορφώσουν στρατηγικές που ανταποκρίνονται στις απαιτήσεις του 21ου αιώνα. Η εργασία αυτή εξετάζει τις βασικές προκλήσεις, τις αναδυόμενες καινοτομίες και τις μετασχηματιστικές πρακτικές που επανακαθορίζουν την εκπαιδευτική ηγεσία στη σύγχρονη ψηφιακή εποχή.

Κεντρική πρόκληση αποτελεί το ψηφιακό χάσμα, που δημιουργεί ανισότητες στην πρόσβαση σε τεχνολογικές υποδομές και ψηφιακές ευκαιρίες μάθησης. Παράλληλα, οι αυξανόμενες ανησυχίες για την προστασία των προσωπικών δεδομένων απαιτούν την εφαρμογή αυστηρών πολιτικών και την ανάληψη ευθύνης από υπεύθυνους προστασίας δεδομένων εντός των σχολικών μονάδων. Η ανάγκη συνεχούς επαγγελματικής ανάπτυξης αναδεικνύεται ως κρίσιμος παράγοντας για την επιτυχή ενσωμάτωση της τεχνολογίας στη διδασκαλία, ενώ η αξιοποίηση νέων τεχνολογιών, όπως η τεχνητή νοημοσύνη, το cloud computing και τα μεγάλα δεδομένα, απαιτεί στρατηγικό σχεδιασμό και στοχοθετημένη επιμόρφωση.

Στην προσπάθεια αντιμετώπισης αυτών των προκλήσεων, οι εκπαιδευτικοί ηγέτες υιοθετούν καινοτόμες προσεγγίσεις, όπως η λήψη αποφάσεων βάσει δεδομένων, που ενισχύει την αποτελεσματικότητα των εκπαιδευτικών παρεμβάσεων και των πολιτικών. Η προσαρμοστική και μετασχηματιστική ηγεσία προωθεί την ευελιξία, τη συλλογικότητα και τη δημιουργία διαφανούς, συνεργατικού εκπαιδευτικού περιβάλλοντος. Παράλληλα, εργαλεία όπως οι διαδικτυακές πλατφόρμες μάθησης και τα μικρο-πιστοποιητικά αξιοποιούνται για την ενίσχυση του ψηφιακού γραμματισμού των εκπαιδευτικών και την υποστήριξη της επαγγελματικής τους ανέλιξης.

Ιδιαίτερη έμφαση δίνεται σε μετασχηματιστικές πρακτικές, όπως η εξατομικευμένη μάθηση, η οποία αξιοποιεί την τεχνολογία για να προσαρμόσει το μαθησιακό περιεχόμενο στις ανάγκες και τα ενδιαφέροντα των μαθητών, ενισχύοντας τη συμμετοχή και την επίδοσή τους. Εξίσου σημαντική είναι η συνεργατική λήψη αποφάσεων, η οποία προωθεί τη συμμετοχή όλων των εμπλεκόμενων μερών —εκπαιδευτικών, μαθητών, γονέων— στη διαμόρφωση της στρατηγικής του σχολείου, ενδυναμώνοντας το αίσθημα εμπιστοσύνης και συνιδιοκτησίας. Η εργασία αναδεικνύει παραδείγματα εφαρμογής καινοτόμων προσεγγίσεων σε σχολικές μονάδες και εκπαιδευτικά δίκτυα, αναδεικνύοντας τη δυναμική των σύγχρονων μοντέλων ηγεσίας.

Συμπερασματικά, η εκπαιδευτική ηγεσία στην ψηφιακή εποχή απαιτεί επαναπροσδιορισμό στρατηγικών, ενίσχυση του επαγγελματισμού και υιοθέτηση μιας κουλτούρας συνεχούς μάθησης και προσαρμογής. Οι εκπαιδευτικοί ηγέτες καλούνται να ηγηθούν με όραμα, συνδυάζοντας τεχνογνωσία, συνεργασία και τεχνολογική ενσωμάτωση, προκειμένου να ανταποκριθούν στις απαιτήσεις της σύγχρονης εκπαίδευσης. Η εργασία προσφέρει ένα εννοιολογικό πλαίσιο και ένα σύνολο πρακτικών εργαλείων που συμβάλλουν στον επιστημονικό και επαγγελματικό διάλογο για την εκπαίδευση στην εποχή της ψηφιακής μετάβασης.

Λέξεις – κλειδιά: Ηγεσία στην Εκπαίδευση, Ψηφιακός Μετασχηματισμός, Διοίκηση Σχολικών Μονάδων, Εκπαιδευτική Καινοτομία, Λήψη Αποφάσεων βάσει Δεδομένων, Επαγγελματική Ανάπτυξη

ΕΙΣΑΓΩΓΗ

Η ταχεία πρόοδος της ψηφιοποίησης και η αυξανόμενη πολυπλοκότητα των ψηφιακών εργαλείων καθιστούν αναγκαία την αναπροσαρμογή των ηγετικών προσεγγίσεων σε όλα τα επίπεδα της εκπαίδευσης, από τη σχολική έως την τριτοβάθμια. Οι εκπαιδευτικοί ηγέτες καλούνται να ανταποκριθούν στις νέες απαιτήσεις, ενσωματώνοντας την καινοτομία και την ψηφιακή τεχνολογία τόσο στις διοικητικές δομές όσο και στις μαθησιακές εμπειρίες.

Η αποτελεσματική ηγεσία αναδεικνύεται ως κρίσιμος παράγοντας σε αυτή τη μετάβαση, ανεξαρτήτως πολιτισμικού ή θεσμικού πλαισίου. Η καινοτόμος εκπαιδευτική ηγεσία δεν αποτελεί πλέον επιλογή αλλά επιτακτική ανάγκη, καθώς καλείται να συνδυάσει την προσωπική ενσυναίσθηση με την καθοδήγηση προς την αξιοποίηση της τεχνολογίας για την προώθηση της παιδαγωγικής ανανέωσης και της θεσμικής ευελιξίας.

Καθώς οι οργανισμοί και τα εκπαιδευτικά συστήματα εξελίσσονται για να ανταποκριθούν στις αυξανόμενες ανάγκες μάθησης, οι ηγέτες καλούνται να επαναπροσδιορίσουν το λεξιλόγιο και τη στρατηγική τους. Μια σύγχρονη, στοχαστική ηγεσία είναι απαραίτητη για την πλοήγηση στη σύνθετη πραγματικότητα της ψηφιακής εποχής, προωθώντας μετασχηματιστικές πρακτικές που ανταποκρίνονται στις προκλήσεις και τις δυνατότητες του σήμερα.

ΙΣΤΟΡΙΚΟ ΚΑΙ ΣΚΕΠΤΙΚΟ

Ο ρόλος και η πρακτική της εκπαιδευτικής ηγεσίας έχουν εξελιχθεί σημαντικά ως απόκριση σε κοινωνικές μεταβολές που απαιτούν μετασχηματιστικές αλλαγές. Αν και οι εξελίξεις αυτές εντάσσονται σε ένα συστημικό πλαίσιο, η κατανόηση των επιπτώσεων των ψηφιακών μετασχηματισμών στην εκπαιδευτική διαδικασία και, συνακόλουθα, στην ηγεσία παραμένει περιορισμένη. Οι τεχνολογίες πληροφορίας και επικοινωνίας (ΤΠΕ) αναδιαμορφώνουν τη μαθησιακή εμπειρία, αμφισβητώντας παραδοσιακές κατηγοριοποιήσεις και εντείνοντας τις προσδοκίες από τους εκπαιδευτικούς για την υιοθέτηση καινοτόμων ψηφιακών πρακτικών. Ωστόσο, οι παραδοσιακές ηγετικές μέθοδοι αποδεικνύονται συχνά ανεπαρκείς για την αντιμετώπιση των σύγχρονων πολιτισμικών, γλωσσικών και τεχνολογικών προκλήσεων. Οι ΤΠΕ, ως απαραίτητο στοιχείο των δεξιοτήτων του 21ου αιώνα, διαταράσσουν κατεστημένες δομές γνώσης και καθοδήγησης (Haleem et al., 2022).

Το παρόν κείμενο υποστηρίζει ότι μεγάλο μέρος των υπαρχόντων μοντέλων εκπαιδευτικής ηγεσίας βασίζεται σε παραδοχές ενός παρελθόντος που αποδιαρθρώνεται ταχύτατα και, ως εκ τούτου, δεν επαρκούν για την υποστήριξη των αναγκών της ψηφιακής εποχής. Η μετάβαση από ατομοκεντρικές και τεχνικές στρατηγικές σε ένα μοντέλο προσαρμοστικής και μετασχηματιστικής ηγεσίας, που δίνει έμφαση στη διασύνδεση και στη συλλογική δράση, κρίνεται αναγκαία. Αυτή η προσέγγιση βασίζεται στη συνδημιουργία λύσεων μέσα σε δικτυωμένα περιβάλλοντα, με ενεργή συμμετοχή όλων όσοι επιδιώκουν να συμβάλουν στην αλλαγή. Επιπλέον, εντοπίζεται ένα σημαντικό ερευνητικό κενό ως προς την τεκμηρίωση της πρακτικής της ηγεσίας στο πεδίο της ψηφιακής εκπαίδευσης. Απαιτείται συστηματική έρευνα που να καθοδηγεί την αποτελεσματική παιδαγωγική πρακτική και να υποστηρίζει την επαγγελματική προσαρμογή των εκπαιδευτικών στις εξελισσόμενες γνωστικές απαιτήσεις. Η τοποθέτηση της εκπαιδευτικής ηγεσίας στο πλαίσιο της ψηφιακής εκπαίδευσης προϋποθέτει νέες ερευνητικές προσεγγίσεις, ικανές να επαναπλαισιώσουν τα υφιστάμενα συστήματα ως απάντηση στους ψηφιακούς μετασχηματισμούς, ενισχύοντας τόσο την παρούσα όσο και τη μελλοντική πρακτική. Οι τεχνολογικές και κοινωνικοπολιτισμικές εξελίξεις επιβάλλουν διαρκή αναπροσαρμογή των εκπαιδευτικών συστημάτων. Ως κύριος καταλύτης αυτών των αλλαγών, οι ψηφιακές τεχνολογίες απαιτούν περαιτέρω έρευνα που θα ενισχύει παιδαγωγικές μεθόδους ευαίσθητες στις ανάγκες των μαθητών και τις κοινωνικές παραμέτρους της εκπαίδευσης (Ahmed et al., 2024).

Εστιάζοντας στην τεχνολογία, έρευνες δείχνουν ότι σημαντικό ποσοστό του εκπαιδευτικού προσωπικού αξιοποιεί ψηφιακούς πόρους στην καθημερινή διδακτική πρακτική. Οι τεχνολογίες αυτές, που περιλαμβάνουν οπτικές αναπαραστάσεις και πολυμέσα, ενισχύουν τη μαθητική συμμετοχή στις δραστηριότητες της τάξης, κυρίως μέσω της ενθάρρυνσης της δημιουργικής έκφρασης και της ενεργητικής εμπλοκής. Η ενσωμάτωση εργαλείων με ισχυρές απεικονιστικές δυνατότητες ανταποκρίνεται στις ανάγκες μιας γενιάς μαθητών που έχει διαμορφωθεί από την κυριαρχία της οπτικής πληροφορίας και την αμεσότητα στην πρόσβαση γνώσης. Στο πλαίσιο της τριτοβάθμιας εκπαίδευσης, αυτή η χρήση επεκτείνεται, εδραιώνοντας την προσδοκία ότι οι φοιτητές θα έχουν πρόσβαση σε πλούσιο θεματικό υλικό και διαφοροποιημένες μορφές μάθησης. Οι πανεπιστημιακοί ενθαρρύνονται να ενσωματώνουν πολυμεσικό περιεχόμενο για την παρουσίαση πληροφοριών, την υλοποίηση προσομοιώσεων και την εφαρμογή θεωρίας στην πράξη. Οι φοιτητές, αντίστοιχα, καλούνται να αλληλεπιδρούν με μαθησιακά αντικείμενα όπως προσομοιώσεις, διαγράμματα και γραφικά, συμμετέχοντας σε δραστηριότητες που περιλαμβάνουν ανάπτυξη σεναρίων, παιχνίδια ρόλων, γραπτές αναλύσεις, μελέτες περίπτωσης και αναστοχαστικές συζητήσεις. Οι ψηφιακές τεχνολογίες, ως υψηλής παιδαγωγικής αξίας εργαλεία,

προσφέρουν στους εκπαιδευτικούς ηγέτες ευέλικτες και δυναμικές πλατφόρμες για την υιοθέτηση καινοτόμων διδακτικών προσεγγίσεων (Saikkonen & Kaarakainen, 2021).

ΠΕΔΙΟ ΕΦΑΡΜΟΓΗΣ ΚΑΙ ΣΤΟΧΟΙ

Ερευνητές, επαγγελματίες και υπεύθυνοι χάραξης πολιτικής συγκλίνουν στην παραδοχή ότι οι κοινωνικές απαιτήσεις από την εκπαίδευση, καθώς και οι ρόλοι και οι ευθύνες των σχολείων, μεταβάλλονται διαρκώς. Παράλληλα, η ενσωμάτωση των ψηφιακών τεχνολογιών έχει οδηγήσει σε μια στροφή από αποσπασματικές σε περισσότερο ολιστικές προσεγγίσεις στην ηγεσία, επηρεάζοντας ουσιαστικά τις εκπαιδευτικές πρακτικές. Αυτή η αλλαγή αντικατοπτρίζει τη μετατόπιση της εστίασης από ατομικούς και τεχνικούς παράγοντες προς τη σχολική κουλτούρα, το κοινό όραμα και τη συμμετοχική ηγεσία. Οι μετασχηματιστικές αυτές διαδικασίες αναδιαμορφώνουν το πλαίσιο άσκησης της ηγεσίας και απαιτούν από τους εκπαιδευτικούς ηγέτες την αναθεώρηση των ρόλων και στρατηγικών τους. Η παρούσα εργασία εξετάζει τις βασικές προκλήσεις αυτής της μετάβασης και προτείνει εννοιολογικά εργαλεία που επιτρέπουν την επανερμηνεία της ηγεσίας στην ψηφιακή εποχή μέσα από ένα πρίσμα αναστοχασμού και μεταρρύθμισης.

Η σημασία της μελέτης εδράζεται στην αυξανόμενη αναγνώριση ότι η αποτελεσματικότητα των εκπαιδευτικών συστημάτων εξαρτάται σε μεγάλο βαθμό από την ποιότητα της ηγεσίας, η οποία απαιτεί συστηματική διερεύνηση στο πεδίο της έρευνας, της πολιτικής και της πρακτικής. Σε τοπικό επίπεδο, οι εκπαιδευτικοί ηγέτες και οι υπεύθυνοι χάραξης πολιτικής καλούνται να ενισχύσουν την κατανόησή τους για τις προκλήσεις που επιφέρει ο ψηφιακός μετασχηματισμός. Στο πλαίσιο αυτό, η παρούσα εργασία επιδιώκει, αφενός, την εις βάθος διερεύνηση των τομών μεταξύ ψηφιακής τεχνολογίας και εκπαιδευτικής ηγεσίας και, αφετέρου, την πρόταση καινοτόμων εννοιολογικών πλαισίων και μετασχηματιστικών πρακτικών, ικανών να εμπλουτίσουν τη θεωρητική συζήτηση και να επηρεάσουν τη μελλοντική έρευνα, τη χάραξη πολιτικής και την εκπαιδευτική πράξη. Το κοινό-στόχος περιλαμβάνει εκπαιδευτικούς ηγέτες, διευθυντές σχολείων, ερευνητές με προσανατολισμό στην εφαρμογή, καθώς και σχεδιαστές προγραμμάτων σπουδών.

ΚΑΤΑΝΟΗΣΗ ΤΗΣ ΕΚΠΑΙΔΕΥΤΙΚΗΣ ΗΓΕΣΙΑΣ ΣΤΗΝ ΨΗΦΙΑΚΗ ΕΠΟΧΗ

Στο σύγχρονο, ταχέως μεταβαλλόμενο τεχνολογικό περιβάλλον, κάθε πτυχή της ζωής επηρεάζεται από την ψηφιοποίηση, και η εκπαίδευση δεν αποτελεί εξαίρεση. Η ανάγκη επανεκτίμησης των παραδοσιακών πρακτικών είναι επιτακτική, ώστε να ανταποκρίνονται στις νέες συνθήκες. Η αυξημένη πολυπλοκότητα των εκπαιδευτικών απαιτήσεων προϋποθέτει την ενίσχυση των επαγγελματικών δεξιοτήτων και την υιοθέτηση καινοτόμων στρατηγικών διδασκαλίας και ηγεσίας. Παράλληλα, τα νέα οργανωτικά μοντέλα –όπως οι δικτυωμένοι ή μητροπολιτικοί οργανισμοί– καθιστούν αναγκαία την αναθεώρηση των παραδοσιακών αντιλήψεων για την ηγεσία. Η αποκέντρωση στη διοίκηση της εκπαίδευσης απαιτεί εναλλακτικές διαχειριστικές προσεγγίσεις και μεταρρυθμιστικές παρεμβάσεις εντός των υφιστάμενων δομών. Στο πλαίσιο αυτό, η παρούσα ανάλυση διερευνά πολιτικές και πρακτικές που προϋποθέτουν νέες μορφές ηγεσίας, σε μια κοινωνία διαμορφωμένη από τον ψηφιακό γραμματισμό και την καινοτομία (Kaur et al., 2024).

Υπό αυτές τις συνθήκες επιτάχυνσης και αυξανόμενης πολυπλοκότητας, καθίσταται κρίσιμη η κατανόηση των χαρακτηριστικών, των εννοιών και των πρακτικών που διέπουν την εκπαιδευτική ηγεσία στην ψηφιακή εποχή. Η διάκριση μεταξύ «ψηφιοποίησης» και «ψηφιακού» είναι καθοριστική: η πρώτη αφορά τη μετατροπή αναλογικών πληροφοριών σε ψηφιακή μορφή και την οργάνωσή τους μέσω δεδομένων, ενώ ο δεύτερος όρος παραπέμπει στη χρήση τεχνολογιών που επεξεργάζονται και αναδομούν τις πληροφορίες προς ενίσχυση της νοηματοδότησης. Επιπλέον, η έννοια του «ψηφιακού» εντάσσεται σε ένα ιστορικό πλαίσιο που διαχωρίζει τις σύγχρονες προσεγγίσεις από εκείνες προηγούμενων περιόδων (Philip & Gavrilova Aguilar, 2022).

Ο ορισμός της εκπαιδευτικής ηγεσίας παραμένει σύνθετος, καθώς δεν υπάρχει ευρεία συναίνεση μεταξύ ερευνητών και επαγγελματιών. Η ηγεσία περιλαμβάνει ενέργειες που προσφέρουν κατεύθυνση, προωθούν την αλλαγή, ενισχύουν την εμπιστοσύνη, αναπτύσσουν δεξιότητες και διαμορφώνουν υποστηρικτικά μαθησιακά περιβάλλοντα. Διάφορα εννοιολογικά πλαίσια έχουν προταθεί για την κατηγοριοποίηση των μορφών ηγεσίας στην ψηφιακή εποχή. Αντλώντας από θεωρίες ισχύος, βελτίωσης και συστημικής προσέγγισης, τα πλαίσια αυτά αναπτύχθηκαν παράλληλα με την ενσωμάτωση της τεχνολογίας σε σύνθετα μαθησιακά περιβάλλοντα. Μπορούν να αξιοποιηθούν για τη διάγνωση αναγκών ηγεσίας σε πολλαπλά επίπεδα, ενισχύοντας τη στελέχωση, την επαγγελματική ανάπτυξη και την κατανομή ρόλων σε πολυεπίπεδους μαθησιακούς οργανισμούς (Avidov-Ungar et al., 2022).

Την τελευταία δεκαετία, η ιστορική προσέγγιση απέκτησε αυξανόμενη σημασία, αναδεικνύοντας την εξέλιξη των κοινωνιών σε σχέση με τα οικονομικά και πολιτικά τους συστήματα και επιτρέποντας προβλέψεις για μελλοντικές ανάγκες ηγεσίας στην εκπαίδευση. Το ενδιαφέρον στράφηκε σε καινοτόμα οργανωτικά μοντέλα εκπαιδευτικών ιδρυμάτων, εμπλουτίζοντας τον διεθνή εκπαιδευτικό διάλογο. Η ανάγκη προσαρμογής στις ραγδαίες αλλαγές που επιφέρει η παγκοσμιοποίηση οδήγησε στην ανάδειξη νέων εννοιών όπως «οργάνωση μάθησης», «διαχείριση γνώσης»

και «συναισθηματική νοημοσύνη». Τα παραδοσιακά πρότυπα ηγεσίας καλούνται να ευθυγραμμιστούν με σύγχρονες στρατηγικές και παιδαγωγικούς στόχους. Νεότερα εννοιολογικά πλαίσια εστιάζουν στα χαρακτηριστικά και τις πρακτικές που απαιτούνται από τους σημερινούς σχολικούς ηγέτες στο ψηφιακό περιβάλλον, αναδεικνύοντας τη σύνδεση μεταξύ των δραστηριοτήτων, ικανοτήτων και αξιών του ηγέτη και των αναμενόμενων μεταβολών. Μέσα από τη μεθοδολογία της μελέτης περίπτωσης παρουσιάστηκε μία εφαρμογή σε δημοτικό σχολείο που συμμετέχει σε καινοτόμο δίκτυο ψηφιακής εκπαίδευσης και μία ακόμη σε σχολείο διοίκησης, όπου χρησιμοποιείται ηλεκτρονική μάθηση στο πλαίσιο μεταπτυχιακού προγράμματος για τη διαχείριση εκπαιδευτικών δικτύων (Andrin et al., 2023).

Οι ιδιότητες, τα χαρακτηριστικά και οι δεξιότητες που ορίζουν έναν αποτελεσματικό ηγέτη στον τομέα της ψηφιακής εκπαίδευσης μπορούν να ταξινομηθούν σε επιμέρους κατηγορίες, οι οποίες αναλύονται στη συνέχεια. Πρώτον, κεντρική σημασία αποδίδεται στην ικανότητα διαμόρφωσης ενός σαφούς και μακρόπνοου οράματος για το μέλλον της εξατομικευμένης και ψηφιακής μάθησης. Η ανάπτυξη ενός τέτοιου οράματος, που εκτείνεται από το επίπεδο της τάξης έως και το σύνολο του εκπαιδευτικού συστήματος, αποτελεί βασική προϋπόθεση για την αποτελεσματική άσκηση ηγεσίας στον ψηφιακό μετασχηματισμό (Sailer et al., 2021).

Δεύτερον, η κατανόηση της πολυπλοκότητας που διέπει τη σύγχρονη προσωπική και ψηφιακή μάθηση, καθώς και των μεταβολών που επηρεάζουν τόσο τα μικρο- όσο και τα μακρο-επίπεδα της εκπαιδευτικής λειτουργίας, ενισχύει την ικανότητα των ηγετών να εμπνέουν, να κινητοποιούν και να ενεργοποιούν όλα τα εμπλεκόμενα μέλη ενός οργανισμού. Η χάραξη αποτελεσματικής στρατηγικής και η ενίσχυση της συμμετοχής των ενδιαφερομένων —ιδίως των μαθητών, των οικογενειών και της τοπικής κοινότητας— συνιστούν θεμελιώδεις άξονες της ηγετικής πρακτικής (Pettersson, 2021).

Τρίτον, ιδιαίτερη έμφαση δίνεται στη βαθιά κατανόηση των στόχων —προσωπικών και θεσμικών— που συνδέονται με τον εκπαιδευτικό μετασχηματισμό. Η κατανόηση αυτή οφείλει να βασίζεται στην αναγνώριση υπαρκτών αναγκών, στην επίλυση εντοπισμένων προβλημάτων και στην αξιοποίηση των δυνατοτήτων τόσο των εκπαιδευτικών όσο και των μαθητών στο πλαίσιο του σχολείου. Στρατηγικές που ενισχύουν τη συνεργασία και προωθούν την ισότιμη πρόσβαση των μαθητών σε ευκαιρίες μάθησης αποτελούν κρίσιμα πεδία ηγετικής παρέμβασης (Sweet & Michaelsen, 2023).

Η εκπαιδευτική ηγεσία καλείται να ανταποκριθεί στις προκλήσεις που απορρέουν από τη διαρκώς αυξανόμενη σημασία της ψηφιακής επάρκειας στην εποχή των Τεχνολογιών Πληροφορίας και Επικοινωνίας. Οι εκπαιδευτικοί ηγέτες, μέσω του ρόλου τους, οφείλουν να ενισχύσουν την ανάπτυξη ψηφιακών δεξιοτήτων όχι μόνο στο διδακτικό προσωπικό, αλλά και στο διοικητικό και βοηθητικό προσωπικό, καθώς και στους μαθητές, προωθώντας τη συνεργασία, την καινοτομία και τη δημιουργία ενός υποστηρικτικού μαθησιακού περιβάλλοντος. Ο διευθυντής της σχολικής μονάδας διαδραματίζει καταλυτικό ρόλο στην καλλιέργεια του ψηφιακού γραμματισμού των εκπαιδευτικών, σχεδιάζοντας και υλοποιώντας ένα συνεκτικό όραμα βασισμένο στη διά βίου μάθηση. Η στρατηγική αυτή ενισχύει το σύνολο της σχολικής κοινότητας —μαθητές, γονείς και εκπαιδευτικούς— ώστε να αξιοποιούν δημιουργικά τις ψηφιακές τεχνολογίες, αναδεικνύοντας τις δεξιότητες και τις προσπάθειες κάθε μαθητή. Η εκπαιδευτική ηγεσία οφείλει να προσδιορίσει τις βασικές ικανότητες που πρέπει να ενταχθούν στις πολιτικές διά βίου μάθησης, αναγνωρίζοντας τις ψηφιακές δεξιότητες ως αναπόσπαστο μέρος του σύγχρονου εκπαιδευτικού σχεδιασμού (Cordova et al., 2024).

ΠΡΟΚΛΗΣΕΙΣ ΠΟΥ ΑΝΤΙΜΕΤΩΠΙΖΟΥΝ ΟΙ ΗΓΕΤΕΣ ΣΤΗΝ ΨΗΦΙΑΚΗ ΕΠΟΧΗ

Οι πρόσφατες εξελίξεις στην ευρυζωνική πρόσβαση και στα έξυπνα εργαλεία επικοινωνίας μετασχηματίζουν ριζικά την καθημερινότητα και την εκπαιδευτική διαδικασία. Οι εκπαιδευτικοί ηγέτες αναζητούν πρακτικές που ενισχύουν τη δημιουργική, συνεργατική και αυθεντική εμπλοκή των μαθητών, αξιοποιώντας το δυναμικό της τεχνολογίας. Όσοι διαμορφώνουν ένα σαφές ψηφιακό όραμα επιδιώκουν την ενσωμάτωση καινοτόμων τεχνολογιών για τη θεμελίωση ευέλικτων, διαφανών και λειτουργικών οργανωτικών δομών. Παράλληλα, όμως, έρχονται αντιμέτωποι με προκλήσεις που επηρεάζουν τις ηγετικές τους πρακτικές, καθώς και τις αντιλήψεις τους για τον ρόλο της εκπαίδευσης, τη χρήση της τεχνολογίας και τη θέση των εκπαιδευτικών. Η κριτική προσέγγιση αυτών των ζητημάτων είναι καθοριστική για την αξιοποίηση του μετασχηματιστικού δυναμικού της τεχνολογίας. Οι ηγέτες καλούνται να διαχειριστούν ζητήματα που σχετίζονται με την καλλιέργεια ψηφιακής νοοτροπίας, τις επιστημολογικές αντιλήψεις για την τεχνολογία, τις ψηφιακές ανισότητες, αλλά και τη διατήρηση ισορροπίας ανάμεσα στις μαθησιακές ανάγκες και στην ψυχαγωγική χρήση των ψηφιακών εργαλείων. Παράλληλα, οφείλουν να εστιάσουν στην οικοδόμηση ικανοτήτων εντός των ψηφιακών πλαισίων, διαμορφώνοντας τεχνολογικά ενισχυμένα μαθησιακά περιβάλλοντα που ανταποκρίνονται στις απαιτήσεις του διαρκώς μεταβαλλόμενου τεχνολογικού τοπίου (Andrin et al., 2024).

Η ενσωμάτωση της τεχνολογίας στη διδασκαλία ενισχύει τις γνώσεις, τις αξίες και τις δεξιότητες των μαθητών του 21ου αιώνα, μετατρέποντάς τους σε ενεργούς δημιουργούς γνώσης. Εκπαιδευτικό λογισμικό και ψηφιακές εφαρμογές διευκολύνουν την ανάπτυξη δεξιοτήτων ανώτερης τάξης, όπως η επίλυση προβλημάτων, η κριτική σκέψη και η δημιουργικότητα. Οι εκπαιδευτικοί αναλαμβάνουν ρόλο καθοδηγητή, ενισχύοντας την εξατομικευμένη μαθησιακή πορεία των μαθητών. Δεδομένης της εξοικείωσης των νέων με τις ψηφιακές συσκευές, η αξιοποίηση της τεχνολογίας στην εκπαίδευση εμφανίζει σημαντικά οφέλη, προωθώντας την υπευθυνότητα και παρέχοντας πρόσβαση σε πολλαπλούς πόρους — όπως podcast, προσομοιώσεις και μηχανές αναζήτησης — που διευκολύνουν την κατανόηση αφηρημένων εννοιών. Παρά τη δυναμική της εκπαιδευτικής τεχνολογίας, πολλοί θεωρούν ότι τα εκπαιδευτικά συστήματα υστερούν στην ουσιαστική ενσωμάτωσή της. Κρίσιμος παράγοντας επιτυχίας αποτελεί η ύπαρξη κατάλληλης τεχνολογικής υποδομής, ενώ οι εκπαιδευτικοί ηγέτες οφείλουν να ενισχύουν τη συνεχή επαγγελματική ανάπτυξη και να παρέχουν στοχευμένη υποστήριξη στο προσωπικό. Παράλληλα, απαιτούνται σαφείς πολιτικές και μηχανισμοί ασφαλούς πρόσβασης. Η συστηματική αξιολόγηση της ενσωμάτωσης της τεχνολογίας στη μαθησιακή διαδικασία είναι απαραίτητη, καθώς συμβάλλει στον εντοπισμό εμποδίων και στη διαμόρφωση στοχευμένων παρεμβάσεων για την αναβάθμιση της εκπαιδευτικής εμπειρίας (Cukurova et al., 2023).

Η αυξανόμενη χρήση εκπαιδευτικών τεχνολογιών έχει εγείρει σοβαρές ανησυχίες σχετικά με την προστασία του ψηφιακού απορρήτου και την ασφάλεια των δεδομένων, μεταξύ εκπαιδευτικών, παρόχων λογισμικού και κρατικών φορέων. Το ισχύον σύστημα ενδέχεται να εκθέσει προσωπικά δεδομένα μαθητών, να παραβιάσει δικαιώματα απορρήτου και να δημιουργήσει οικονομικές και νομικές υποχρεώσεις για τα εκπαιδευτικά ιδρύματα. Τρεις παράγοντες εντείνουν την ανάγκη για αυστηρότερο πλαίσιο προστασίας δεδομένων στο σχολικό περιβάλλον. Πρώτον, η διασφάλιση των ευαίσθητων πληροφοριών των μαθητών και η ισότιμη πρόσβαση στη μάθηση συνιστούν θεμελιώδεις αρχές του σύγχρονου εκπαιδευτικού παραδείγματος, που στοχεύει στη συμπερίληψη όλων των μαθητών, ιδιαίτερα των ευάλωτων ομάδων. Η ορθή διακυβέρνηση των δεδομένων και η συμμόρφωση με τις νομοθεσίες περί απορρήτου αποτελούν προϋπόθεση για την επίτευξη ψηφιακής δικαιοσύνης. Η επέκταση των συστημάτων ηλεκτρονικής διαχείρισης στα σχολεία έχει αυξήσει τη συλλογή, επεξεργασία και ανταλλαγή μεγάλου όγκου προσωπικών δεδομένων (Personally Identifiable Information – PII), τα οποία προστατεύονται από αυστηρό νομικό πλαίσιο. Δεύτερον, η δημοσίευση εκπαιδευτικών δραστηριοτήτων σε ιστολόγια και μέσα κοινωνικής δικτύωσης έχει εντείνει τους κινδύνους για τους εκπαιδευτικούς, συμπεριλαμβανομένων περιπτώσεων κλοπής ταυτότητας και επιθέσεων phishing, ιδίως όταν χρησιμοποιούνται λειτουργίες γεωεντοπισμού ή επισήμανσης εικόνων. Τρίτον, η μεταφορά δεδομένων μεταξύ σχολικών διοικητικών υπαλλήλων και μαθητών —συχνά στο πλαίσιο διακυβερνητικών οδηγιών— ενδέχεται να επιφέρει νομικές συνέπειες σε περιπτώσεις μη συμμόρφωσης. Η διαχείριση αυτών των δεδομένων πρέπει να εποπτεύεται από εξειδικευμένο υπεύθυνο προστασίας δεδομένων (Data Protection Officer), ώστε να διασφαλίζεται η νομιμότητα, η ασφάλεια και η υπεύθυνη αξιοποίησή τους (Quach et al., 2022).

ΚΑΙΝΟΤΟΜΙΕΣ ΣΤΗΝ ΕΚΠΑΙΔΕΥΤΙΚΗ ΗΓΕΣΙΑ

Η πρόοδος της τεχνολογίας έχει εισαγάγει καινοτόμα εργαλεία που ενισχύουν τις ηγετικές πρακτικές στον χώρο της εκπαίδευσης. Οι ηγέτες μπορούν πλέον να συλλέγουν, να οργανώνουν και να αναλύουν μεγάλα σύνολα δεδομένων, ενισχύοντας την τεκμηριωμένη λήψη αποφάσεων. Οι εκπαιδευτικοί ηγέτες αξιοποιούν δεδομένα και αναλύσεις συμπεριφοράς για την αναγνώριση προτύπων και την πρόβλεψη μαθησιακών αποτελεσμάτων, σχεδιάζοντας στοχευμένες παρεμβάσεις για διαφορετικές ομάδες μαθητών. Έτσι, συμβάλλουν ουσιαστικά στη βελτίωση των εκπαιδευτικών και επαγγελματικών διαδρομών. Μέσω στρατηγικού σχεδιασμού, τα εν λόγω εργαλεία υποστηρίζουν κρίσιμες αποφάσεις σχετικά με τη διαχείριση προσωπικού, την κατανομή πόρων και τον σχεδιασμό αναλυτικών προγραμμάτων. Παράλληλα, η διαρκής επαγγελματική ανάπτυξη αποτελεί βασικό στοιχείο ενός ποιοτικού εκπαιδευτικού συστήματος, με τις διαδικτυακές πλατφόρμες να προσφέρουν αξιόπιστους, ερευνητικά τεκμηριωμένους πόρους μάθησης (Wang, 2021).

Οι καινοτομίες που βασίζονται στα δεδομένα ενισχύουν ουσιαστικά την ηγεσία σε σχολικό και περιφερειακό επίπεδο. Ορισμένα εκπαιδευτικά συστήματα αναπτύσσουν ψηφιακές πλατφόρμες για την παρακολούθηση μικροδιαπιστευτηρίων, διευκολύνοντας τον σχεδιασμό κοινού οράματος, την ενίσχυση των ηγετικών δεξιοτήτων και την αξιοποίηση υπαρχόντων δυνατοτήτων. Σε συνδυασμό με εικονικές κοινότητες μάθησης, ενισχύουν τη συνεργασία με ειδικούς σε εθνικό επίπεδο. Εφόσον εφαρμοστούν ορθά, τα εργαλεία αυτά μπορούν να ξεπεράσουν παρωχημένα μοντέλα ηγεσίας, ενισχύοντας την εσωτερική επικοινωνία και καταργώντας γραφειοκρατικές δομές. Επιπλέον, προάγουν δυναμικά και ευέλικτα ηγετικά μοντέλα, ενδυναμώνοντας τους σχολικούς ηγέτες στον ρόλο του προσαρμοστικού διευθυντή και διευκολύνοντας τη διαχείριση πόρων και προτεραιοτήτων σε περιβάλλοντα βασισμένα σε έργα (Badawy & Alkaabi, 2023).

Η ραγδαία τεχνολογική πρόοδος προσφέρει σημαντικές ευκαιρίες για την αναβάθμιση των οργανωτικών δομών στην εκπαίδευση μέσω καινοτόμων προσεγγίσεων. Κρίσιμες τεχνολογίες όπως το cloud computing, τα big data και τα εικονικά περιβάλλοντα μάθησης διαμορφώνουν το τοπίο της εκπαιδευτικής ηγεσίας. Η παρούσα παρουσίαση εξετάζει

αυτές τις τεχνολογίες και προτείνει διδακτικές στρατηγικές που ανταποκρίνονται στις αναδυόμενες απαιτήσεις της ψηφιακής εποχής. Παρά τα οφέλη, η τεχνολογία δεν προσφέρει αυτόματα θετικό αντίκτυπο στην ηγεσία, εάν δεν ευθυγραμμίζεται με τις πραγματικές ανάγκες των σχολικών μονάδων, των ομοσπονδιών και των πολυακαδημαϊκών ομάδων (ΜΑΤ). Οι διευθυντές σχολείων συνεχίζουν να φέρουν την ευθύνη για τις ανθρώπινες σχέσεις και το φυσικό περιβάλλον, που παραμένουν θεμελιώδη. Παρουσιάζονται πέντε τρόποι με τους οποίους η τεχνολογία μπορεί να ενδυναμώσει την ηγεσία, μαζί με προτάσεις για μελλοντικές δράσεις. Οι εξελίξεις απαιτούν από τους οργανισμούς να προετοιμαστούν για ένα ψηφιακό μέλλον, ενσωματώνοντας τεχνολογίες που ενισχύουν τη μαθησιακή διαδικασία. Σε αντίθεση με τις επιχειρήσεις, τα σχολεία δεν προσανατολίζονται στη μείωση κόστους, αλλά στη βελτίωση των διοικητικών λειτουργιών και της λήψης αποφάσεων μέσω τεχνολογίας. Με την ευρεία υιοθέτηση των υπηρεσιών cloud, είναι απαραίτητη η επιλογή κατάλληλων λύσεων προσαρμοσμένων στις ανάγκες κάθε οργανισμού. Η στρατηγική χρήση τεχνολογίας σε θεσμικό επίπεδο απαιτεί επίγνωση της παρακολούθησης από μητρικούς φορείς και των πρακτικών διαχείρισης δεδομένων. Η ανάλυση εμπιστοσύνης, υποδομών και ροών δεδομένων από τα εμπλεκόμενα μέρη αποτελεί προϋπόθεση για την ανάπτυξη μιας αποτελεσματικής στρατηγικής, η οποία θα καθορίσει τη λειτουργία των σχολείων του μέλλοντος (Matthew et al., 2021; Tiwari & Fahrudin, 2024).

Στην ψηφιακή εποχή, πληθώρα συνεργατικών εργαλείων υποστηρίζει την ανάπτυξη της εκπαιδευτικής ηγεσίας. Διευθυντές και ηγέτες εκπαιδευτικών οργανώνουν συναντήσεις μάθησης, αναστοχασμού και επίλυσης προβλημάτων μέσω ψηφιακών εφαρμογών και πλατφορμών επικοινωνίας. Διαδικτυακά προγράμματα εκπαίδευσης και μαζικά ανοικτά διαδικτυακά μαθήματα (MOOC) προσφέρουν εξειδικευμένες θεματικές σε ηγεσία, διοίκηση και στρατηγική, επιτρέποντας την εξατομικευμένη εξέλιξη σύμφωνα με τις δεξιότητες και τις επαγγελματικές φιλοδοξίες των συμμετεχόντων. Επιπλέον, επαγγελματικοί οργανισμοί και συμβουλευτικές εταιρείες παρέχουν διαδικτυακά σεμινάρια, podcast, άρθρα και ερευνητικές αναφορές, ενισχύοντας τη διαρκή ενημέρωση σχετικά με τις εξελίξεις στην ηγεσία και τη διαχείριση αλλαγών (Laufer et al., 2021).

Παράλληλα, διαδικτυακά προγράμματα ανάπτυξης ηγεσίας, που απευθύνονται σε υφιστάμενους και αναδυόμενους ηγέτες, προσφέρουν ευέλικτη πρόσβαση μέσω καταγεγραμμένων διαλέξεων και πόρων. Παραδείγματα όπως η Leading Australia προωθούν τοπικά σεμινάρια για μέλη, ενθαρρύνοντας τη συμμετοχή σε δίκτυα ομοτίμων μέσω επαγγελματικών ενώσεων ή πλατφορμών καθοδήγησης. Η εύρεση μέντορα ή προπονητή, μέσω ειδικών ψηφιακών εργαλείων αντιστοίχισης, αποτελεί αποτελεσματική στρατηγική επαγγελματικής ανάπτυξης. Ωστόσο, η αποδοτική αξιοποίηση αυτών των ευκαιριών προϋποθέτει την ευθυγράμμισή τους με τους στόχους του ατομικού ή οργανωσιακού σχεδίου ανάπτυξης (Shah et al., 2021).

ΜΕΤΑΣΧΗΜΑΤΙΣΤΙΚΕΣ ΠΡΑΚΤΙΚΕΣ ΣΤΗΝ ΕΚΠΑΙΔΕΥΤΙΚΗ ΗΓΕΣΙΑ

Μια μετασχηματιστική πρακτική που μπορούν να υιοθετήσουν οι εκπαιδευτικοί ηγέτες για την ενίσχυση της εκπαιδευτικής διαδικασίας είναι η εξατομικευμένη μάθηση. Καθώς οι μαθητές διαφέρουν ως προς τα μαθησιακά τους προφίλ, τους ρυθμούς και τα ενδιαφέροντα, η προσέγγιση αυτή τούς προσφέρει αυξημένη αυτονομία, με παιδαγωγικές παρεμβάσεις προσαρμοσμένες στις ατομικές τους ανάγκες και φιλοδοξίες. Τεχνολογικά εργαλεία όπως προσαρμοστικό λογισμικό ή διαδικτυακές πλατφόρμες μάθησης διευκολύνουν αυτή τη διαφοροποίηση, ενισχύοντας την προσβασιμότητα και την ενεργή εμπλοκή των μαθητών (Bernacki et al., 2021).

Παράλληλα, η συλλογική λήψη αποφάσεων αποτελεί μια ακόμη μετασχηματιστική πρακτική, ενισχύοντας τη συμμετοχικότητα στη σχολική διοίκηση. Οι εκπαιδευτικοί ηγέτες ενθαρρύνουν τη συμμετοχή διαφόρων εμπλεκόμενων φορέων στη διαχείριση εκπαιδευτικών πόρων, προάγοντας την ανατροφοδότηση και τη συνευθύνη. Η καλλιέργεια μιας κουλτούρας εμπιστοσύνης και συνεργασίας απαιτεί χρόνο και συστηματικότητα. Μέσω τακτικών διαδικασιών, όπως η συνδιαμόρφωση οράματος, η κατανομή ρόλων και ο σχεδιασμός πολιτικών ασφάλειας, διαμορφώνονται ευέλικτα μοντέλα συμμετοχής. Ιδιαίτερα σημαντικά είναι τα «δίκτυα εμπιστοσύνης» —κοινότητες πρακτικής στις οποίες οι εκπαιδευτικοί ανταλλάσσουν εμπειρίες, πόρους και καινοτόμες ιδέες. Τέτοιες πρωτοβουλίες προωθούν τη συνεχή επαγγελματική εξέλιξη μέσω ενδοϋπηρεσιακής μάθησης, αυτόνομης επιμόρφωσης και αλληλοϋποστήριξης. Η αξιοποίηση ψηφιακών εργαλείων όπως «σελίδες συμβουλών» ενισχύει περαιτέρω την αυτοβελτίωση και την παρακολούθηση των προτεινόμενων βελτιώσεων (Barrane et al., 2021).

Η εξατομικευμένη μάθηση αποτελεί θεμελιώδη μετασχηματιστική πρακτική ηγεσίας, η οποία ενισχύεται σημαντικά από τις ψηφιακές τεχνολογίες. Οι σύγχρονες υπολογιστικές δυνατότητες επιτρέπουν την εφαρμογή διαφοροποιημένης διδασκαλίας, αν και απαιτούνται προσεκτικός σχεδιασμός και στρατηγική παιδαγωγική προσέγγιση. Η εξατομίκευση αφορά την προσαρμογή της διδασκαλίας, του αναλυτικού προγράμματος και των παρεχόμενων υποστηρικτικών μηχανισμών, ώστε να ανταποκρίνονται στις ετερογενείς ανάγκες των μαθητών. Με την ενεργή συμμετοχή των μαθητών στον σχεδιασμό της μαθησιακής τους εμπειρίας, παρατηρείται αύξηση του κινήτρου, της

επιμονής και της δέσμευσής τους. Ωστόσο, οι εκπαιδευτικοί ηγέτες καλούνται να αντιμετωπίσουν σημαντικές προκλήσεις, όπως οι διαφοροποιήσεις στο κοινωνικοπολιτισμικό υπόβαθρο, στις μαθησιακές ικανότητες και στους στόχους των μαθητών. Η προσαρμογή του αναλυτικού προγράμματος στο πλαίσιο μιας εκπαίδευσης χωρίς αποκλεισμούς αποτελεί πρόκληση, αλλά και αναγκαιότητα για τους ηγέτες που επιδιώκουν την εφαρμογή ουσιαστικής εξατομικευμένης μάθησης. Η προσέγγιση αυτή απαιτεί την υπέρβαση προκαταλήψεων και την κατοχύρωση ίσων ευκαιριών πρόσβασης, ανεξάρτητα από το επίπεδο προηγούμενης γνώσης ή εμπειρίας των μαθητών. Δεδομένου ότι η εξατομικευμένη μάθηση συνδέεται άρρηκτα με την προσαρμοσμένη διδασκαλία, οι εκπαιδευτικοί καλούνται να προσαρμόζουν συνεχώς τις διδακτικές τους πρακτικές, με βάση την ανατροφοδότηση, την αξιολόγηση και τις επιδόσεις των μαθητών. Η εφαρμογή πολιτικών που συνδέουν τις μαθησιακές δραστηριότητες και τα παραγόμενα μαθητικά προϊόντα με τους στόχους του προγράμματος σπουδών είναι καίριας σημασίας για την υποστήριξη αυτής της προσέγγισης (Habib et al., 2021).

Η εκπαιδευτική ηγεσία ενισχύει τη συμμετοχικότητα, επιτρέποντας στους ηγέτες των σχολικών μονάδων να μοιράζονται διαδικασίες και αρμοδιότητες λήψης αποφάσεων με τους εμπλεκόμενους φορείς, ενθαρρύνοντας τη συλλογική λήψη αποφάσεων ως θεμελιώδη αρχή στην εκπαιδευτική κοινότητα. Αυτή η πρακτική ενισχύει τη διαρκή ανταλλαγή πεποιθήσεων σχετικά με την επιτυχία των μαθητών, η οποία είναι κρίσιμη για τη διαμόρφωση στρατηγικών που βελτιώνουν τη διδακτική ποιότητα. Ως αποτέλεσμα, οι σχολικές κοινότητες μετασχηματίζονται σε κοινότητες μάθησης με στόχο τη συνεχή βελτίωση. Επιπλέον, το σχολικό προσωπικό, αλληλεπιδρώντας καθημερινά με μαθητές που επιδιώκουν αλλαγές, ενσαρκώνει τη δημοκρατική πεποίθηση ότι η συμμετοχή πολλαπλών φωνών συμβάλλει σε θετικές και αποτελεσματικές εξελίξεις μέσω μιας χωρίς αποκλεισμούς ηγετικής προσέγγισης. Η έννοια της «συνεργασίας» προέρχεται από τα λατινικά και δηλώνει τη συλλογική εργασία σε κοινό πλαίσιο. Στο επιχειρηματικό περιβάλλον υποδηλώνει συνεργατική δράση, αντανακλώντας τη σοφία και τον σκοπό που ενυπάρχουν στις διαπροσωπικές σχέσεις. Παρότι οι οργανισμοί αναγνωρίζουν τη σημασία της συνεργασίας, η ερμηνεία και η εφαρμογή της συχνά διαφέρουν. Για την πληρέστερη κατανόηση της συνεργασίας στην εκπαίδευση, προτείνεται η θεώρησή της ως ηθικής πρακτικής που ενσωματώνει ενεργά τους πολίτες ή ωφελούμενους ως εταίρους στη λήψη αποφάσεων. Η προσέγγιση αυτή βασίζεται σε ηθικές αρχές και σε συμμετοχικές μεθοδολογίες που αποσκοπούν στην επίτευξη αμοιβαία επωφελών λύσεων για όλους τους εμπλεκόμενους, πέραν των ορίων του ίδιου του οργανισμού (Dumlao, 2023; Stout & Keast, 2021).

ΣΥΜΠΕΡΑΣΜΑ

Η ραγδαία πρόοδος της ψηφιοποίησης και η αυξανόμενη πολυπλοκότητα των ψηφιακών εργαλείων απαιτούν από τους εκπαιδευτικούς ηγέτες – από τη σχολική εκπαίδευση έως την τριτοβάθμια – να αναπροσαρμόσουν τις ηγετικές τους προσεγγίσεις ώστε να ανταποκρίνονται στις απαιτήσεις του νέου ψηφιακού περιβάλλοντος. Τα πανεπιστήμια αποτελούν χαρακτηριστικά παραδείγματα αυτής της μετάβασης, προωθώντας περιβάλλοντα όπου η καινοτομία και η ψηφιοποίηση ενσωματώνονται τόσο στις θεσμικές δομές όσο και στις μαθησιακές εμπειρίες των φοιτητών. Παράλληλα, καθίσταται σαφές ότι η αποτελεσματική ηγεσία είναι καθοριστικής σημασίας σε όλα τα επίπεδα του εκπαιδευτικού συστήματος, ιδίως στη σημερινή περίοδο παγκόσμιας μετάβασης που διαμορφώνεται από τις τεχνολογικές εξελίξεις. Η ανάγκη για αναπροσαρμογή των ηγετικών προσεγγίσεων υπερβαίνει πολιτισμικά και εθνικά πλαίσια, αποκτώντας παγκόσμια διάσταση.

Η καινοτόμος ηγεσία δεν αποτελεί απλώς απαίτηση των καιρών, αλλά αναγκαιότητα για την εδραίωση μιας συνεκτικής προσωπικής και επαγγελματικής ταυτότητας των ηγετών στο δυναμικό και συνεχώς μεταβαλλόμενο διεθνές πλαίσιο. Η ηγεσία στην ψηφιακή εποχή προϋποθέτει ισορροπία μεταξύ αυτοκαθοδήγησης και υποστήριξης της συλλογικής μετάβασης σε τεχνολογικά προηγμένες πρακτικές, που προάγουν τη φυσική εξέλιξη, τον μετασχηματισμό και την παιδαγωγική καινοτομία. Η κοινωνική και οργανωσιακή μετάβαση καθιστά αναγκαία την ικανότητα των ηγετών να ανταποκρίνονται ευέλικτα και αποτελεσματικά στις αυξημένες απαιτήσεις για γνώση, μάθηση και εκπαιδευτικά αποτελέσματα.

Μέσα σε αυτό το πλαίσιο, μια από τις θεμελιώδεις ευθύνες των εκπαιδευτικών ηγετών είναι η διαμόρφωση νέων εννοιολογικών πλαισίων και λεξιλογίου που αποτυπώνουν πώς μπορεί να ασκηθεί αποτελεσματική ηγεσία στη σύγχρονη, σύνθετη και διαρκώς μεταβαλλόμενη ψηφιακή εποχή. Μέσω της υιοθέτησης προσαρμοστικών προτύπων ηγεσίας, της αξιοποίησης δεδομένων για τη λήψη αποφάσεων και της ενίσχυσης της διαρκούς επαγγελματικής ανάπτυξης, οι εκπαιδευτικοί ηγέτες μπορούν να επιφέρουν ουσιαστικές αλλαγές, διασφαλίζοντας ότι ο ψηφιακός μετασχηματισμός ενδυναμώνει τις μαθησιακές εμπειρίες και ενισχύει τη θεσμική αποτελεσματικότητα.

ΨΗΦΙΑΚΑ ΜΕΣΑ ΚΑΙ ΔΙΟΙΚΗΣΗ ΕΚΠΑΙΔΕΥΤΙΚΩΝ ΜΟΝΑΔΩΝ

Χαλβαντζής Βασίλειος, ΠΕ79.01
Διευθυντής Μουσικού Σχολείου Πρέβεζας
Πρέβεζα, Ελλάδα
email: billchalv@gmail.com

ΠΕΡΙΛΗΨΗ

Η ενσωμάτωση των ψηφιακών μέσων στη διαχείριση εκπαιδευτικών μονάδων έχει αλλάξει σημαντικά τον τρόπο λειτουργίας των σχολείων και των ακαδημαϊκών ιδρυμάτων. Με την ταχεία πρόοδο της τεχνολογίας, τα ψηφιακά εργαλεία έχουν γίνει απαραίτητα για τους διευθυντές σχολείων, τους δασκάλους και το διοικητικό προσωπικό, ενισχύοντας την επικοινωνία, τη λήψη αποφάσεων και τη συνολική αποτελεσματικότητα. Αυτή η εισήγηση διερευνά τον ρόλο των ψηφιακών μέσων στη διαχείριση εκπαιδευτικών μονάδων, επισημαίνοντας τα οφέλη, τις προκλήσεις και τις βέλτιστες πρακτικές για αποτελεσματική εφαρμογή.

Τα ψηφιακά μέσα περιλαμβάνουν ένα ευρύ φάσμα τεχνολογικών εργαλείων, όπως οι πλατφόρμες κοινωνικών μέσων, τα συστήματα διαχείρισης μάθησης (LMS), τα εργαλεία συνεργασίας που βασίζονται σε σύννεφο και το λογισμικό ανάλυσης δεδομένων. Πλατφόρμες όπως το Google Workspace for Education και το Microsoft 365 Education επιτρέπουν τη συνεργασία σε πραγματικό χρόνο, τη διαχείριση εγγράφων και την οργάνωση εργασιών, προσφέροντας μια ολοκληρωμένη λύση για τη διοίκηση των σχολικών μονάδων.

Ένα από τα βασικά πλεονεκτήματα των ψηφιακών μέσων στη διαχείριση του σχολείου είναι η ικανότητά τους να διευκολύνουν την άμεση και διαφανή επικοινωνία. Εφαρμογές όπως το Zoom, Microsoft Teams και Google Meet υποστηρίζουν διαδικτυακές συναντήσεις, διασφαλίζοντας την απρόσκοπτη αλληλεπίδραση μεταξύ σχολικού προσωπικού, μαθητών και γονέων. Επιπλέον, πλατφόρμες κοινωνικής δικτύωσης, όπως το Facebook, Twitter και LinkedIn, βοηθούν τα εκπαιδευτικά ιδρύματα να επικοινωνούν με τις κοινότητές τους, να μοιράζονται ενημερώσεις και να προωθούν τις δραστηριότητές τους.

Τα συστήματα διαχείρισης μάθησης (LMS), όπως το Moodle, Google Classroom και Blackboard, έχουν φέρει επανάσταση στη διαχείριση της εκπαίδευσης απλοποιώντας τη διαχείριση μαθημάτων, την παρακολούθηση και την κοινή χρήση πόρων. Οι εκπαιδευτικοί μπορούν να οργανώνουν σχέδια μαθημάτων, να διανέμουν εργασίες και να παρακολουθούν την πρόοδο των μαθητών μέσω αυτών των εργαλείων, καθιστώντας τη διαδικασία πιο διαφανή και αποδοτική.

Η ανάλυση δεδομένων παίζει καθοριστικό ρόλο στη σύγχρονη εκπαιδευτική διαχείριση. Εργαλεία όπως το Google Forms, Microsoft Forms και Power BI επιτρέπουν στους διαχειριστές να συλλέγουν και να αναλύουν δεδομένα που σχετίζονται με την απόδοση των μαθητών, τη συμμετοχή, την αποτελεσματικότητα των εκπαιδευτικών και την κατανομή των πόρων. Χρησιμοποιώντας προγνωστικά αναλυτικά στοιχεία, οι διευθυντές σχολείων μπορούν να εντοπίσουν τάσεις, να αντιμετωπίσουν προληπτικά προκλήσεις και να βελτιώσουν τα ακαδημαϊκά αποτελέσματα.

Επιπλέον, τα ψηφιακά μέσα υποστηρίζουν τη συμμετοχική διακυβέρνηση ενθαρρύνοντας τη συνεργασία μεταξύ εκπαιδευτικών, μαθητών και ενδιαφερόμενων μερών. Εργαλεία όπως το Slack, Trello και Asana προσφέρουν πλατφόρμες για αποτελεσματική διαχείριση έργων, συντονισμό εργασιών και βελτίωση της ομαδικής εργασίας.

Παρά τα πολυάριθμα πλεονεκτήματά τους, η υιοθέτηση των ψηφιακών μέσων στη διαχείριση εκπαιδευτικών μονάδων παρουσιάζει αρκετές προκλήσεις. Η ασφάλεια των δεδομένων και το απόρρητο αποτελούν σημαντικές ανησυχίες, γι' αυτό απαιτούνται λύσεις όπως τα GDPR Compliance Tools (OneTrust, TrustArc) για τη διαχείριση προσωπικών δεδομένων. Επιπλέον, το ψηφιακό χάσμα αποτελεί πρόβλημα, καθώς δεν έχουν όλα τα εκπαιδευτικά ιδρύματα ίση πρόσβαση σε τεχνολογικούς πόρους. Η αντίσταση στην αλλαγή μεταξύ των εκπαιδευτικών και των διαχειριστών μπορεί επίσης να εμποδίσει την επιτυχή εφαρμογή των ψηφιακών εργαλείων.

Η παροχή επαρκούς κατάρτισης και προγραμμάτων επαγγελματικής ανάπτυξης είναι ζωτικής σημασίας για να ξεπεραστούν αυτά τα εμπόδια. Επενδύοντας σε προγράμματα επιμόρφωσης και τεχνολογικές λύσεις, οι εκπαιδευτικές μονάδες μπορούν να αξιοποιήσουν πλήρως τα ψηφιακά μέσα, διασφαλίζοντας την αποτελεσματική και βιώσιμη ενσωμάτωσή τους στη σχολική διοίκηση.

Συμπερασματικά, τα ψηφιακά μέσα έχουν φέρει επανάσταση στη διαχείριση εκπαιδευτικών μονάδων βελτιώνοντας την επικοινωνία, ενισχύοντας τη λήψη αποφάσεων και εξορθολογίζοντας τα διοικητικά καθήκοντα. Ενώ εξακολουθούν να υπάρχουν προκλήσεις όπως η ασφάλεια των δεδομένων, το ψηφιακό χάσμα και η αντίσταση στην αλλαγή, η υιοθέτηση στρατηγικών πολιτικών και η επένδυση στην επαγγελματική ανάπτυξη μπορούν να εξασφαλίσουν την επιτυχή ενσωμάτωση των ψηφιακών εργαλείων στην εκπαίδευση. Καθώς η τεχνολογία συνεχίζει να εξελίσσεται, τα εκπαιδευτικά ιδρύματα πρέπει να αγκαλιάσουν τον ψηφιακό μετασχηματισμό για να δημιουργήσουν πιο αποτελεσματικά, περιεκτικά και προσαρμοστικά περιβάλλοντα μάθησης.

Λέξεις – κλειδιά: Ψηφιακά μέσα, διοίκηση εκπαιδευτικών μονάδων.

ΕΙΣΑΓΩΓΗ

Η ραγδαία πρόοδος της τεχνολογίας και η ευρεία διάδοση των ψηφιακών μέσων έχουν επιφέρει σημαντικές αλλαγές στον τρόπο με τον οποίο οργανώνονται και διοικούνται οι εκπαιδευτικές μονάδες παγκοσμίως. Η μεταμόρφωση αυτή δεν αφορά μόνο τη διδασκαλία και τη μάθηση, αλλά και τις διοικητικές λειτουργίες που υποστηρίζουν το εκπαιδευτικό έργο, όπως η επικοινωνία μεταξύ των μελών της σχολικής κοινότητας, η διαχείριση ανθρώπινου δυναμικού, η λήψη αποφάσεων, καθώς και η αξιολόγηση και ανάλυση δεδομένων. Οι σύγχρονες τεχνολογικές λύσεις, που περιλαμβάνουν πλατφόρμες διαχείρισης μάθησης, εργαλεία συνεργασίας και προγράμματα επεξεργασίας και ανάλυσης δεδομένων, συμβάλλουν καθοριστικά στη βελτίωση της αποτελεσματικότητας, της διαφάνειας και της ευελιξίας στη διοίκηση των σχολικών μονάδων (Selwyn, 2016).

Το ενδιαφέρον για τον ρόλο των ψηφιακών μέσων στην εκπαιδευτική διοίκηση έχει ενισχυθεί ιδιαίτερα μετά την πανδημία COVID-19, η οποία κατέδειξε την ανάγκη για άμεση και αποτελεσματική προσαρμογή των εκπαιδευτικών συστημάτων στις νέες απαιτήσεις της εξ αποστάσεως εκπαίδευσης και της ψηφιακής διακυβέρνησης (Reimers & Schleicher, 2020). Η εμπειρία αυτή οδήγησε πολλούς εκπαιδευτικούς οργανισμούς στην αναθεώρηση των πρακτικών τους, αναγνωρίζοντας πλέον την τεχνολογία ως εργαλείο στρατηγικής σημασίας και όχι ως απλό υποστηρικτικό μέσο.

Η ενσωμάτωση των ψηφιακών μέσων δεν είναι, ωστόσο, μια διαδικασία απλή ή μονοδιάστατη. Συνοδεύεται από προκλήσεις, όπως η ανάγκη για επαρκή επιμόρφωση του προσωπικού, η ύπαρξη ψηφιακού χάσματος μεταξύ σχολείων, η προστασία των προσωπικών δεδομένων και η ενδεχόμενη αντίσταση στην αλλαγή. Παράλληλα, γεννώνται ζητήματα ηγεσίας, στρατηγικού σχεδιασμού και διαχείρισης αλλαγής, που απαιτούν τη διαμόρφωση μιας συνεκτικής ψηφιακής πολιτικής εκ μέρους της διοίκησης (Leithwood et al., 2020).

Στόχος του παρόντος άρθρου είναι η διερεύνηση του ρόλου των ψηφιακών μέσων στη διοίκηση των εκπαιδευτικών μονάδων, με έμφαση στα εργαλεία που χρησιμοποιούνται, στα οφέλη που απορρέουν από τη χρήση τους, στις προκλήσεις που αντιμετωπίζουν οι διευθυντές και το προσωπικό, καθώς και στις βέλτιστες πρακτικές που ενδείκνυνται για μια αποτελεσματική και βιώσιμη ενσωμάτωσή τους. Η ανάλυση βασίζεται σε σύγχρονη βιβλιογραφία και επιδιώκει να προσφέρει μια εμπεριστατωμένη και πρακτικά χρήσιμη προσέγγιση για ερευνητές, εκπαιδευτικούς ηγέτες και φορείς εκπαιδευτικής πολιτικής.

Ο ΡΟΛΟΣ ΤΩΝ ΨΗΦΙΑΚΩΝ ΜΕΣΩΝ ΣΤΗΝ ΕΚΠΑΙΔΕΥΤΙΚΗ ΔΙΟΙΚΗΣΗ

Η διοίκηση μιας σύγχρονης εκπαιδευτικής μονάδας προϋποθέτει τη συντονισμένη και συστηματική διαχείριση πολλαπλών παραμέτρων, όπως η οργάνωση του ανθρώπινου δυναμικού, η αξιολόγηση του εκπαιδευτικού έργου, η αποτελεσματική επικοινωνία με τους γονείς και η σύνδεση με την ευρύτερη κοινότητα. Στο πλαίσιο αυτό, τα ψηφιακά μέσα αποτελούν κρίσιμα εργαλεία για τον εκπαιδευτικό ηγέτη, διευκολύνοντας όχι μόνο την καθημερινή λειτουργία του σχολείου, αλλά και τη χάραξη στρατηγικής με βάση δεδομένα και τεκμήρια (Mandinach & Gummer, 2016).

Ένα από τα βασικότερα πλεονεκτήματα της ενσωμάτωσης ψηφιακών εργαλείων είναι η βελτίωση της επικοινωνίας εντός και εκτός της σχολικής μονάδας. Η χρήση εφαρμογών όπως το Microsoft Teams, το Zoom και το Google Meet έχει καταστήσει εφικτή τη διεξαγωγή συναντήσεων σε πραγματικό χρόνο, ανεξαρτήτως φυσικής παρουσίας. Οι διευθυντές μπορούν να οργανώνουν τακτικές ενημερώσεις του προσωπικού, να συντονίζουν επιτροπές, αλλά και να διατηρούν στενή επαφή με τους γονείς (Trust & Whalen, 2020). Επιπλέον, τα μέσα κοινωνικής δικτύωσης, όπως το Facebook, το Twitter και το Instagram, χρησιμοποιούνται συχνά για την εξωστρέφεια των σχολικών μονάδων. Μέσα από αυτές τις πλατφόρμες, προβάλλονται δράσεις, δημοσιεύονται ανακοινώσεις και καλλιεργείται ένα θετικό δημόσιο προφίλ του σχολείου, που ενισχύει την εμπιστοσύνη της κοινότητας (Greenhow & Lewin, 2016).

Τα Συστήματα Διαχείρισης Μάθησης (Learning Management Systems – LMS), όπως τα Moodle, Google Classroom και Blackboard, προσφέρουν ένα ψηφιακό περιβάλλον στο οποίο οργανώνεται και παρακολουθείται ολόκληρη η εκπαιδευτική διαδικασία. Μέσω αυτών, οι εκπαιδευτικοί μπορούν να αναρτούν εκπαιδευτικό υλικό, να ορίζουν εργασίες, να λαμβάνουν ανατροφοδότηση από τους μαθητές και να παρακολουθούν την πρόοδό τους. Για τη διοίκηση, τα LMS λειτουργούν ως πλατφόρμες παρακολούθησης της λειτουργικότητας των τμημάτων, της συνέπειας των διδασκόντων και των επιπέδων εμπλοκής των μαθητών. Η διαχείριση μαθημάτων σε συνδυασμό με αναλυτικές αναφορές παρέχει τη δυνατότητα στους διευθυντές να στηρίξουν αποφάσεις για την πορεία της σχολικής μονάδας και να εφαρμόσουν στοχευμένες παρεμβάσεις (Al-Fraihat et al., 2020). Η διοίκηση σχολικών μονάδων συνεπάγεται συνεργασία μεταξύ πολλών ομάδων: διευθυντών, εκπαιδευτικών, συμβούλων, μαθητών και γονέων. Η χρήση εργαλείων διαχείρισης έργων, όπως το Trello, το Asana και το Slack, επιτρέπει την αποτελεσματική κατανομή αρμοδιοτήτων, τον χρονοπρογραμματισμό εργασιών και την άμεση ανατροφοδότηση μεταξύ των μελών της ομάδας.

Παράλληλα, η δημιουργία κοινών εγγράφων μέσω του Google Workspace for Education ή του Microsoft 365 Education ενισχύει τη συνεργασία σε πραγματικό χρόνο. Οι εκπαιδευτικοί μπορούν να δουλεύουν από κοινού πάνω σε σχέδια μαθήματος, η διοίκηση μπορεί να αναπτύσσει σχέδια δράσης, ενώ όλα τα εμπλεκόμενα μέρη έχουν πρόσβαση σε κοινά αρχεία, ενισχύοντας τη διαφάνεια και την αλληλεπίδραση (Manca, 2020). Ένα από τα πιο καινοτόμα χαρακτηριστικά της ψηφιακής διοίκησης είναι η χρήση εργαλείων ανάλυσης δεδομένων για τη λήψη στρατηγικών αποφάσεων. Εφαρμογές όπως τα Google Forms, Microsoft Forms, Power BI και Tableau επιτρέπουν στους διευθυντές να συλλέγουν ποσοτικά και ποιοτικά δεδομένα από μαθητές, εκπαιδευτικούς και γονείς. Τα δεδομένα αυτά, όταν οργανώνονται και αναλύονται σωστά, συμβάλλουν στον εντοπισμό προβλημάτων (π.χ. πτώση επίδοσης, μειωμένη συμμετοχή, αυξημένα περιστατικά απουσιών) και στη διαμόρφωση πολιτικών βελτίωσης. Ειδικότερα, τα εργαλεία αυτά υποστηρίζουν τη χρήση προγνωστικών αναλύσεων (predictive analytics), μέσω των οποίων μπορούν να προβλεφθούν μελλοντικές τάσεις και να διαμορφωθούν προληπτικά μέτρα (Williamson & Hogan, 2020).

Τα ψηφιακά μέσα υποστηρίζουν επίσης τη μετάβαση από την παραδοσιακή ιεραρχική διοίκηση στη συμμετοχική και διαμοιρασμένη ηγεσία, όπου τα μέλη της σχολικής κοινότητας έχουν ενεργό ρόλο στις αποφάσεις. Μέσω κοινών ψηφιακών πλατφορμών, επιτροπών, συνεργατικών εγγράφων και ανοιχτών φόρουμ, οι εκπαιδευτικοί συμμετέχουν πιο ενεργά στον σχεδιασμό και την εφαρμογή πολιτικών.

Αυτό το μοντέλο ηγεσίας δεν μόνο αυξάνει τη δέσμευση των εκπαιδευτικών και τη συναίσθηση ευθύνης, αλλά ενισχύει και τη συνοχή της σχολικής κοινότητας, στοιχείο ζωτικής σημασίας για την επιτυχή εφαρμογή ψηφιακών μεταρρυθμίσεων (Leithwood et al., 2020).

Η ΑΝΑΛΥΣΗ ΔΕΔΟΜΕΝΩΝ ΩΣ ΜΗΧΑΝΙΣΜΟΣ ΛΗΨΗΣ ΑΠΟΦΑΣΕΩΝ

Στο πλαίσιο της σύγχρονης εκπαιδευτικής διοίκησης, η ανάγκη για τεκμηριωμένη λήψη αποφάσεων αποτελεί βασική προϋπόθεση για την αποτελεσματική λειτουργία των σχολικών μονάδων. Η αξιοποίηση των ψηφιακών τεχνολογιών για τη συλλογή, επεξεργασία και ανάλυση δεδομένων προσφέρει στους εκπαιδευτικούς ηγέτες τη δυνατότητα να λαμβάνουν αποφάσεις που βασίζονται σε αποδείξεις (evidence-based decision making) και όχι σε προσωπικές εκτιμήσεις ή διοικητικά στερεότυπα (Mandinach & Gummer, 2016).

Η έννοια της ηγεσίας με βάση τα δεδομένα (data-informed leadership) περιγράφει μια προσέγγιση διοίκησης όπου οι εκπαιδευτικοί ηγέτες αντλούν πληροφορίες από πολλαπλές πηγές — όπως επιδόσεις μαθητών, ποιοτικά δεδομένα από συνεντεύξεις, ερωτηματολόγια, αναφορές αξιολόγησης και αναλύσεις συμμετοχής — προκειμένου να χαράξουν στρατηγικές και να καθορίσουν προτεραιότητες (Datnow & Park, 2019). Ο ρόλος του διευθυντή, σε αυτή την προσέγγιση, μετασχηματίζεται από διαχειριστικός σε στρατηγικός, καθώς βασίζεται στη συνεχή ερμηνεία και αξιολόγηση δεδομένων.

Οι πιο συνηθισμένες μορφές δεδομένων που χρησιμοποιούνται στη σχολική διοίκηση περιλαμβάνουν:

- Ακαδημαϊκά δεδομένα: βαθμολογίες, αποτελέσματα εξετάσεων, επιδόσεις κατά την αξιολόγηση.
- Δεδομένα συμμετοχής: αριθμός απουσιών, καθυστερήσεις, δείκτες εμπλοκής μαθητών.
- Δεδομένα συμπεριφοράς: περιστατικά πειθαρχίας, κοινωνική αλληλεπίδραση.
- Δεδομένα εκπαιδευτικών: αυτοαξιολογήσεις, ανατροφοδότηση, επιμορφώσεις.

Για τη συλλογή αυτών των δεδομένων, χρησιμοποιούνται ψηφιακά εργαλεία όπως τα Google Forms, Microsoft Forms, SurveyMonkey και Qualtrics. Αυτά τα εργαλεία επιτρέπουν τη δημιουργία προσαρμοσμένων ερωτηματολογίων, την αυτόματη καταγραφή των απαντήσεων και την εξαγωγή στατιστικών. Η απλή συλλογή δεδομένων δεν επαρκεί. Απαραίτητο είναι να ακολουθείται από ανάλυση και ερμηνεία, μέσω λογισμικών όπως το Power BI, το Google Data Studio, το Excel, ή πιο σύνθετα στατιστικά πακέτα (π.χ., SPSS, Tableau). Η οπτικοποίηση των αποτελεσμάτων βοηθά τη διοίκηση και τους εκπαιδευτικούς να κατανοούν ευκολότερα τις τάσεις και να εντοπίζουν ευκαιρίες παρέμβασης (Williamson & Hogan, 2020). Για παράδειγμα, η ανάλυση δεδομένων παρουσιών μπορεί να αποκαλύψει πρότυπα αποχής συγκεκριμένων ομάδων μαθητών, οδηγώντας σε στοχευμένες παρεμβάσεις. Αντίστοιχα, η αξιολόγηση των επιδόσεων μπορεί να συνδυαστεί με κοινωνικοσυναισθηματικά δεδομένα, προσφέροντας μια ολιστική εικόνα του μαθητικού πληθυσμού. Η τεχνολογία προσφέρει πλέον τη δυνατότητα προγνωστικής ανάλυσης (predictive analytics), μέσω της οποίας μπορούν να εντοπιστούν ενδείξεις για μελλοντικά προβλήματα, όπως πτώση επίδοσης ή πρόωρη εγκατάλειψη του σχολείου. Τα προγνωστικά μοντέλα βασίζονται σε ιστορικά δεδομένα και αλγόριθμους μηχανικής μάθησης, δίνοντας στους διευθυντές τη δυνατότητα να σχεδιάσουν προληπτικές στρατηγικές (Luckin, 2017).

Αυτό το είδος λήψης αποφάσεων είναι ιδιαίτερα χρήσιμο για τον σχεδιασμό προγραμμάτων υποστήριξης μαθητών, την κατανομή πόρων και την επιλογή επιμορφωτικών δράσεων για τους εκπαιδευτικούς.

Η ικανότητα ερμηνείας και αξιοποίησης δεδομένων (data literacy) δεν είναι αυτονόητη. Αρκετοί διευθυντές ενδέχεται να διαθέτουν περιορισμένη εξοικείωση με τη χρήση εργαλείων ανάλυσης ή να αντιμετωπίζουν δυσκολία στην κατανόηση στατιστικών εννοιών (Mandinach & Gummer, 2016). Για τον λόγο αυτό, είναι κρίσιμο τα προγράμματα επιμόρφωσης των εκπαιδευτικών ηγετών να περιλαμβάνουν βασικές δεξιότητες ανάλυσης δεδομένων, σε συνδυασμό με την ικανότητα λήψης αποφάσεων που βασίζονται σε τεκμηριωμένες πληροφορίες.

Αν και η αξιοποίηση των δεδομένων προσφέρει σημαντικά πλεονεκτήματα, εγείρει και ηθικά ζητήματα. Η υπερβολική εξάρτηση από αριθμούς μπορεί να οδηγήσει σε απλοϊκές ερμηνείες, αγνοώντας τις ποιοτικές και ανθρώπινες διαστάσεις της εκπαίδευσης. Επιπλέον, είναι κρίσιμο να προστατεύονται τα προσωπικά δεδομένα μαθητών και εκπαιδευτικών, σύμφωνα με τις απαιτήσεις του Γενικού Κανονισμού Προστασίας Δεδομένων (GDPR) (European Union, 2016).

Η εκπαιδευτική διοίκηση οφείλει να προσεγγίζει την ανάλυση δεδομένων με κριτική παιδαγωγική ματιά, ως εργαλείο υποστήριξης και ενδυνάμωσης, όχι ως μηχανισμό ελέγχου και τιμωρίας.

ΟΦΕΛΗ ΑΠΟ ΤΗΝ ΕΝΣΩΜΑΤΩΣΗ ΤΩΝ ΨΗΦΙΑΚΩΝ ΜΕΣΩΝ

Η αξιοποίηση των ψηφιακών μέσων στη διοίκηση των εκπαιδευτικών μονάδων έχει αναδείξει πολυάριθμα οφέλη σε επίπεδο λειτουργίας, επικοινωνίας, λήψης αποφάσεων και μαθησιακών αποτελεσμάτων. Η τεχνολογία, όταν ενσωματώνεται στρατηγικά, ενισχύει όχι μόνο την αποδοτικότητα των διοικητικών διαδικασιών, αλλά και την κουλτούρα της συνεργασίας και της καινοτομίας εντός της σχολικής κοινότητας (Selwyn, 2016). Παρακάτω παρουσιάζονται οι σημαντικότεροι τομείς στους οποίους η χρήση των ψηφιακών εργαλείων επιφέρει θετικές αλλαγές.

Η αυτοματοποίηση διαδικασιών όπως η καταγραφή απουσιών, η τήρηση αρχείων, η επικοινωνία με γονείς και η σύνταξη αναφορών οδηγεί σε σημαντική εξοικονόμηση χρόνου και ανθρώπινων πόρων. Οι διευθυντές μπορούν να οργανώνουν ημερολόγια, να αναθέτουν αρμοδιότητες και να παρακολουθούν έργα μέσω ψηφιακών πλατφορμών (π.χ. Google Workspace, Microsoft 365), μειώνοντας τον φόρτο ρουτίνας και επιτρέποντας τη συγκέντρωση σε στρατηγικά ζητήματα (Means et al., 2014).

Η ψηφιακή διαχείριση εγγράφων συμβάλλει επίσης στην οικολογική συνείδηση και στην ασφάλεια των δεδομένων, καθώς οι έντυπες φόρμες αντικαθίστανται από ηλεκτρονικά αρχεία που είναι ευκολότερο να διατηρηθούν, να ταξινομηθούν και να ανακτηθούν.

Τα ψηφιακά μέσα καθιστούν την επικοινωνία μεταξύ των εμπλεκόμενων μερών ταχύτερη, αμεσότερη και πιο δομημένη. Οι διευθυντές μπορούν να ενημερώνουν μαζικά εκπαιδευτικούς, μαθητές και γονείς, να διοργανώνουν τηλεδιασκέψεις και να δημιουργούν ψηφιακά newsletters. Η αυξημένη διαφάνεια που προκύπτει από την ανοικτή πρόσβαση σε πληροφορίες ενισχύει το κλίμα εμπιστοσύνης και τη συμμετοχική κουλτούρα (Greenhow & Lewin, 2016).

Επιπλέον, τα μέσα κοινωνικής δικτύωσης διευκολύνουν την εξωστρέφεια της σχολικής μονάδας, ενισχύοντας τη σύνδεσή της με την τοπική κοινότητα και προβάλλοντας τις καινοτόμες δράσεις της. Η επικοινωνία παύει να είναι γραφειοκρατική και αποκτά πιο συμμετοχικό και διαδραστικό χαρακτήρα. Η δυνατότητα συνεργασίας σε πραγματικό χρόνο μέσω ψηφιακών εργαλείων (όπως Google Docs, Trello, Asana) καλλιεργεί μια πιο ομαδική και δημοκρατική προσέγγιση στη λήψη αποφάσεων και στον σχεδιασμό εκπαιδευτικών δράσεων. Οι εκπαιδευτικοί μπορούν να συν-δημιουργούν υλικό, να συντονίζουν προγράμματα και να ανταλλάσσουν ιδέες άμεσα, ανεξαρτήτως φυσικής παρουσίας (Manca, 2020). Η ενδυνάμωση της συνεργασίας εντός της σχολικής μονάδας έχει θετικό αντίκτυπο και στους μαθητές, καθώς δημιουργείται ένα συνεκτικό και συνεπές μαθησιακό περιβάλλον, όπου όλοι οι εκπαιδευτικοί λειτουργούν με κοινή στοχοθεσία.

Τα ψηφιακά εργαλεία επιτρέπουν την προσαρμογή των διοικητικών και εκπαιδευτικών διαδικασιών στις ιδιαίτερες συνθήκες κάθε περιόδου. Ειδικά κατά τη διάρκεια της πανδημίας COVID-19, η δυνατότητα λειτουργίας μέσω τηλεργασίας και τηλεκπαίδευσης διασφάλισε τη συνέχεια της εκπαίδευσης και της διοίκησης (Reimers & Schleicher, 2020). Οι διευθυντές κλήθηκαν να αναπτύξουν στρατηγικές κρίσης και να επιδείξουν ψηφιακή ηγεσία, αξιοποιώντας τις τεχνολογίες με ευελιξία. Η εμπειρία αυτή ανέδειξε τη σημασία της τεχνολογικής ετοιμότητας ως βασικό στοιχείο εκπαιδευτικής ανθεκτικότητας απέναντι σε απρόβλεπτες καταστάσεις.

Η χρήση ψηφιακών εργαλείων από τους εκπαιδευτικούς στην καθημερινή τους πρακτική συμβάλλει όχι μόνο στην ενίσχυση της διδακτικής αποτελεσματικότητας, αλλά και στην αυτονομία και τον επαγγελματικό τους ρόλο. Μέσω

της πρόσβασης σε κοινόχρηστους πόρους, στατιστικά δεδομένα και ανατροφοδότηση, οι εκπαιδευτικοί αποκτούν σαφέστερη εικόνα των αναγκών των μαθητών τους και της αποδοτικότητας των πρακτικών τους (Darling-Hammond et al., 2017).

Ταυτόχρονα, ενισχύεται η συμμετοχή τους στη διαμόρφωση στρατηγικών και πολιτικών της σχολικής μονάδας, γεγονός που οδηγεί σε υψηλότερη ικανοποίηση και δέσμευση στο επαγγελματικό τους έργο (Leithwood et al., 2020).

Τέλος, η χρήση ψηφιακών μέσων ενισχύει τον ρόλο του διευθυντή ως ηγέτη μετασχηματισμού, που υιοθετεί και προωθεί καινοτόμες πρακτικές, ενθαρρύνει τη διαρκή βελτίωση και λειτουργεί ως φορέας αλλαγής (Fullan, 2016). Η αποτελεσματική χρήση της τεχνολογίας αποτελεί εργαλείο διαφοροποίησης του ηγέτη που δεν αρκείται στη διαχείριση της καθημερινότητας, αλλά οραματίζεται και υλοποιεί την εξέλιξη της σχολικής μονάδας.

ΠΡΟΚΛΗΣΕΙΣ ΚΑΙ ΠΕΡΙΟΡΙΣΜΟΙ

Παρά τα αδιαμφισβήτητα οφέλη που προσφέρει η ενσωμάτωση των ψηφιακών μέσων στη σχολική διοίκηση, η πορεία προς τον ψηφιακό μετασχηματισμό δεν είναι απαλλαγμένη από εμπόδια. Οι εκπαιδευτικές μονάδες καλούνται να διαχειριστούν ένα ευρύ φάσμα προκλήσεων που σχετίζονται με θεσμικές, τεχνικές, κοινωνικές και παιδαγωγικές παραμέτρους. Η επιτυχής μετάβαση σε ένα ψηφιακά υποστηριζόμενο διοικητικό μοντέλο απαιτεί αναγνώριση αυτών των δυσκολιών και ανάπτυξη στρατηγικών αντιμετώπισης.

Μία από τις σημαντικότερες προκλήσεις αφορά το ψηφιακό χάσμα, δηλαδή τις ανισότητες στην πρόσβαση σε τεχνολογικούς πόρους μεταξύ σχολείων, περιοχών ή κοινωνικών ομάδων. Σχολικές μονάδες σε αγροτικές ή απομακρυσμένες περιοχές συχνά αντιμετωπίζουν ελλείψεις σε εξοπλισμό, ταχύτητα διαδικτύου ή τεχνική υποστήριξη (van Dijk, 2020). Αυτό έχει ως αποτέλεσμα τη δημιουργία ενός άνισου περιβάλλοντος, όπου οι δυνατότητες για καινοτομία περιορίζονται σημαντικά.

Επιπλέον, οι κοινωνικοοικονομικές ανισότητες μεταξύ των οικογενειών των μαθητών μπορούν να οδηγήσουν σε περιορισμένη συμμετοχή σε ψηφιακές δράσεις του σχολείου, ιδίως όταν η επικοινωνία ή η μάθηση προϋποθέτουν χρήση συσκευών στο σπίτι.

Ένας άλλος σημαντικός περιορισμός είναι η αντίσταση στην αλλαγή από πλευράς διευθυντών, εκπαιδευτικών και διοικητικού προσωπικού. Η ενσωμάτωση ψηφιακών μέσων απαιτεί αλλαγή στον τρόπο σκέψης, την αναδιοργάνωση ρόλων και την αμφισβήτηση καθιερωμένων πρακτικών. Όπως υποστηρίζουν οι Ertmer και Ottenbreit-Leftwich (2013), η αποδοχή της τεχνολογίας συνδέεται άμεσα με τις πεποιθήσεις των εκπαιδευτικών, την αυτοπεποίθησή τους και την κουλτούρα του οργανισμού στον οποίο ανήκουν.

Σε περιβάλλοντα όπου επικρατεί γραφειοκρατική ή αυταρχική διοίκηση, η πρωτοβουλία, η καινοτομία και η συνεργατικότητα υποχωρούν, περιορίζοντας την ουσιαστική ενσωμάτωση των ψηφιακών εργαλείων. Η χρήση ψηφιακών μέσων απαιτεί την κατοχή συγκεκριμένων δεξιοτήτων από το διοικητικό και εκπαιδευτικό προσωπικό. Όταν οι εμπλεκόμενοι δεν έχουν επαρκή εξοικείωση με τις τεχνολογίες, είναι πιθανό να τις χρησιμοποιούν επιφανειακά ή αποσπασματικά, χωρίς να αξιοποιούν τις πλήρεις δυνατότητές τους (Mandinach & Gummer, 2016). Η έλλειψη επιμόρφωσης, είτε σε επίπεδο τεχνικών γνώσεων είτε σε στρατηγικές ηγεσίας, αποτελεί έναν από τους βασικούς παράγοντες αποτυχίας υλοποίησης ψηφιακών σχεδίων.

Παρά τις πολιτικές επιμόρφωσης που προωθούνται σε πολλές χώρες, παρατηρείται συχνά η απουσία συνεκτικού, βιώσιμου και διαφοροποιημένου σχεδιασμού, που να ανταποκρίνεται στις πραγματικές ανάγκες των σχολικών μονάδων. Η χρήση ψηφιακών μέσων στην εκπαιδευτική διοίκηση συνεπάγεται τη διαχείριση μεγάλου όγκου προσωπικών δεδομένων, τόσο μαθητών όσο και εκπαιδευτικών. Η συμμόρφωση με τον Γενικό Κανονισμό Προστασίας Δεδομένων (GDPR) αποτελεί όχι μόνο νομική υποχρέωση, αλλά και ηθική δέσμευση των σχολικών μονάδων (European Union, 2016).

Η αποθήκευση και μεταφορά δεδομένων μέσω cloud εφαρμογών, η χρήση κοινωνικών μέσων και η ανάλυση ευαίσθητων πληροφοριών (π.χ. ακαδημαϊκές επιδόσεις, ψυχοκοινωνικά χαρακτηριστικά) απαιτούν υψηλό επίπεδο προστασίας και υπεύθυνης διαχείρισης. Η έλλειψη τεχνικής γνώσης ή η απουσία πρωτοκόλλων ασφαλείας αυξάνουν τον κίνδυνο παραβίασης της ιδιωτικότητας.

Η έντονη παρουσία ψηφιακών εργαλείων μπορεί επίσης να οδηγήσει σε υπερφόρτωση πληροφορίας, με αποτέλεσμα την αδυναμία προτεραιοποίησης και τη μείωση της συγκέντρωσης. Ιδιαίτερα για τους διευθυντές που

δέχονται συνεχείς ειδοποιήσεις, μηνύματα και δεδομένα, υπάρχει ο κίνδυνος της «τεχνολογικής κόπωσης» (technology fatigue), η οποία επιδρά αρνητικά στην ψυχική ευεξία και την αποτελεσματικότητα (Trust & Whalen, 2020).

Είναι απαραίτητο να αναπτυχθούν στρατηγικές ψηφιακής ισορροπίας (digital balance) και σαφή όρια χρήσης των μέσων, ώστε να διασφαλιστεί η αποδοτικότητα χωρίς εξουθένωση.

Η επιτυχής ενσωμάτωση των ψηφιακών μέσων προϋποθέτει και την υποστήριξη από το θεσμικό πλαίσιο. Όταν οι εκπαιδευτικές πολιτικές είναι αποσπασματικές, ελλιπώς χρηματοδοτούμενες ή ασαφείς ως προς τις τεχνολογικές κατευθύνσεις, η εφαρμογή των εργαλείων στη σχολική πράξη καθίσταται επισφαλής (Williamson & Hogan, 2020). Είναι απαραίτητο τα υπουργεία παιδείας και οι αρμόδιοι φορείς να παρέχουν σταθερή υποστήριξη, σαφείς οδηγίες, ψηφιακές υποδομές και συνεχή καθοδήγηση.

ΒΕΛΤΙΣΤΕΣ ΠΡΑΚΤΙΚΕΣ ΕΦΑΡΜΟΓΗΣ

Η αποτελεσματική και βιώσιμη ενσωμάτωση των ψηφιακών μέσων στη διοίκηση των σχολικών μονάδων δεν προκύπτει αυτόματα με την απόκτηση τεχνολογικού εξοπλισμού. Απαιτείται στρατηγικός σχεδιασμός, ηγεσία με όραμα, επιμόρφωση, συνεργατικό πνεύμα και συνεκτικές πολιτικές. Οι βέλτιστες πρακτικές που έχουν καταγραφεί σε σχετική βιβλιογραφία και διεθνή παραδείγματα δείχνουν ότι η επιτυχία εδράζεται σε μια πολύπλευρη και συμμετοχική προσέγγιση (Fullan, 2016).

Κάθε εκπαιδευτική μονάδα που επιθυμεί να ενσωματώσει την τεχνολογία στη διοικητική της λειτουργία πρέπει να διαμορφώσει ένα ψηφιακό όραμα, το οποίο να είναι συνδεδεμένο με τις αξίες, τις ανάγκες και τους στόχους της σχολικής κοινότητας. Ο ρόλος του διευθυντή είναι κρίσιμος στη φάση αυτή, καθώς καλείται να εμπνεύσει, να επικοινωνήσει το όραμα και να σχεδιάσει ένα πλάνο με σαφές χρονοδιάγραμμα και μετρήσιμους δείκτες επιτυχίας (Leithwood et al., 2020).

Η ένταξη των ψηφιακών μέσων δεν πρέπει να προσεγγίζεται αποσπασματικά ή τεχνοκρατικά, αλλά ως μέρος μιας ευρύτερης πολιτικής εκπαιδευτικής μεταρρύθμισης, με στόχο την ενδυνάμωση της σχολικής μονάδας ως κοινότητας μάθησης. Η συνεχής και στοχευμένη επιμόρφωση του προσωπικού αποτελεί θεμέλιο για τη βιωσιμότητα της ψηφιακής καινοτομίας. Τα προγράμματα επαγγελματικής ανάπτυξης οφείλουν να εστιάζουν τόσο στις τεχνικές δεξιότητες όσο και στις παιδαγωγικές και ηγετικές διαστάσεις της χρήσης της τεχνολογίας (Darling-Hammond et al., 2017).

Ιδιαίτερα αποτελεσματικές θεωρούνται οι μορφές συνεργατικής επιμόρφωσης (peer learning, coaching, learning communities), στις οποίες οι εκπαιδευτικοί μοιράζονται πρακτικές, ανταλλάσσουν εμπειρίες και στηρίζονται μεταξύ τους στην επίλυση προβλημάτων που σχετίζονται με την τεχνολογία. Ο ρόλος του διευθυντή ως υποστηρικτή και συντονιστή της επιμόρφωσης είναι καθοριστικός για την επιτυχία αυτών των διαδικασιών.

Μια από τις πιο επιτυχημένες πρακτικές για την ενσωμάτωση ψηφιακών μέσων είναι η πιλοτική εφαρμογή σε μικρή κλίμακα, με σκοπό τον έλεγχο λειτουργικότητας, την αναγνώριση τεχνικών και οργανωτικών προβλημάτων και τη σταδιακή εξοικείωση του προσωπικού. Η πιλοτική φάση πρέπει να συνοδεύεται από μηχανισμούς ανατροφοδότησης και αξιολόγησης, ώστε να προσαρμόζονται οι στρατηγικές πριν τη γενίκευση (Selwyn, 2016).

Η συνεχής αξιολόγηση δεν αφορά μόνο τεχνικές παραμέτρους, αλλά και τον βαθμό αποδοχής από την κοινότητα, την αποτελεσματικότητα των διαδικασιών και τον αντίκτυπο στα μαθησιακά αποτελέσματα και στην ποιότητα του εκπαιδευτικού έργου.

Η διαμοιρασμένη ηγεσία (distributed leadership) αποτελεί κρίσιμη παράμετρο για τη διατήρηση της καινοτομίας. Όταν εκπαιδευτικοί, μαθητές, γονείς και λοιπά μέλη της σχολικής κοινότητας έχουν ενεργό ρόλο στον σχεδιασμό, την υλοποίηση και την αξιολόγηση των ψηφιακών παρεμβάσεων, τότε αυξάνεται η αίσθηση του ανήκειν και η δέσμευση όλων προς την επιτυχία (Spillane, 2006).

Η διοίκηση οφείλει να δημιουργεί ευκαιρίες για ουσιαστικό διάλογο, να ενισχύει τις οριζόντιες συνεργασίες και να δίνει χώρο στις φωνές της κοινότητας να επηρεάσουν τις αποφάσεις.

Η τεχνολογική υποδομή είναι βασική προϋπόθεση για την επιτυχή εφαρμογή ψηφιακών εργαλείων. Η σχολική μονάδα χρειάζεται επαρκή εξοπλισμό, σταθερή σύνδεση στο διαδίκτυο, τεχνική υποστήριξη και ασφαλείς πλατφόρμες. Παράλληλα, απαιτείται οργάνωση του ψηφιακού περιβάλλοντος με κριτήρια ασφάλειας, προσβασιμότητας και απλότητας στη χρήση (European Union, 2016).

Η συνεργασία με τεχνικούς συμβούλους, η δημιουργία εσωτερικών ομάδων τεχνολογικής υποστήριξης και η καθιέρωση πολιτικών διαχείρισης ψηφιακών πόρων είναι πρακτικές που διευκολύνουν την καθημερινή λειτουργία και μειώνουν τα εμπόδια.

Η επιτυχία των τοπικών ψηφιακών πρωτοβουλιών εξαρτάται και από την ευρύτερη πολιτική υποστήριξη. Οι σχολικές μονάδες χρειάζονται καθοδήγηση, θεσμικά εργαλεία και χρηματοδότηση από τα υπουργεία παιδείας, ώστε να αναπτύξουν μακροπρόθεσμες στρατηγικές ενσωμάτωσης των ψηφιακών μέσων (Williamson & Hogan, 2020).

Οι βέλτιστες πρακτικές προτείνουν τη σύσταση εθνικών πλαισίων ψηφιακής ηγεσίας, την αναγνώριση των επιτυχημένων σχολικών εγχειρημάτων και την ανταλλαγή καλών πρακτικών μεταξύ σχολείων, προωθώντας έτσι μια κουλτούρα καινοτομίας και συνεργασίας σε ευρύτερη κλίμακα.

ΜΕΛΛΟΝΤΙΚΕΣ ΠΡΟΟΠΤΙΚΕΣ ΚΑΙ ΚΑΙΝΟΤΟΜΙΕΣ

Καθώς η τεχνολογία εξελίσσεται με εκθετικό ρυθμό, οι προοπτικές για τη μελλοντική εφαρμογή των ψηφιακών μέσων στην εκπαιδευτική διοίκηση διαγράφονται εξαιρετικά δυναμικές. Η είσοδος νέων τεχνολογικών εργαλείων όπως η τεχνητή νοημοσύνη (Artificial Intelligence – AI), η μηχανική μάθηση (Machine Learning) και το Internet of Things (IoT) υπόσχεται ένα νέο κύμα καινοτομίας, που επεκτείνεται πέρα από τα παραδοσιακά ψηφιακά εργαλεία και εισέρχεται σε πεδία αυξημένης αυτοματοποίησης, προσωποποίησης και έξυπνης υποστήριξης της διοίκησης (Luckin, 2017).

Η τεχνητή νοημοσύνη μπορεί να υποστηρίξει την εκπαιδευτική διοίκηση μέσα από συστήματα πρόβλεψης μαθητικής επίδοσης, αναγνώριση μαθητών σε κίνδυνο εγκατάλειψης και αυτόματη δημιουργία προσωποποιημένων παρεμβάσεων. Οι διευθυντές θα μπορούν να λαμβάνουν ειδοποιήσεις για συγκεκριμένα μοτίβα συμπεριφοράς ή επίδοσης και να εφαρμόζουν άμεσες ενέργειες πρόληψης.

Παράλληλα, εργαλεία AI μπορούν να διευκολύνουν την ανάλυση δεδομένων, τη διαχείριση προσωπικού και την παραγωγή αναφορών, μειώνοντας σημαντικά τον διοικητικό φόρτο.

Η χρήση τεχνολογιών εικονικής (VR) και επαυξημένης πραγματικότητας (AR) αναμένεται να επηρεάσει και την εκπαιδευτική διοίκηση, καθώς θα προσφέρει νέους τρόπους προσομοίωσης καταστάσεων, εκπαίδευσης προσωπικού και οργάνωσης διαδικασιών. Οι διευθυντές θα μπορούν να αξιολογούν την εφαρμογή πολιτικών μέσα από εικονικά σενάρια, ενώ οι εκπαιδευτικοί θα επιμορφώνονται σε προσομοιωμένα ψηφιακά περιβάλλοντα.

Το blockchain μπορεί να χρησιμοποιηθεί για τη δημιουργία αδιάβλητων συστημάτων διαχείρισης αρχείων, πιστοποιητικών, αξιολογήσεων και αποφάσεων, ενισχύοντας τη διαφάνεια και τη λογοδοσία στην εκπαιδευτική διοίκηση. Οι μαθητές, γονείς και εκπαιδευτικοί θα έχουν ασφαλή και αποκεντρωμένη πρόσβαση στα δεδομένα που τους αφορούν, χωρίς την ανάγκη μεσολάβησης τρίτων.

Στο μέλλον, οι εκπαιδευτικοί ηγέτες θα κληθούν να αναπτύξουν ένα νέο προφίλ, αυτό του ψηφιακά εγγράμματου ηγέτη (digitally literate leader), ικανού να αναγνωρίζει τις ευκαιρίες που προσφέρει η τεχνολογία, να καθοδηγεί την κοινότητα στην αλλαγή και να στοχεύει στη συμπερίληψη, την καινοτομία και την κοινωνική δικαιοσύνη (Dexter, 2018).

Οι επόμενες δεκαετίες προβλέπεται να είναι περίοδος ριζικών μετασχηματισμών. Η διοίκηση των σχολείων δεν θα είναι απλώς πιο ψηφιακή, αλλά πιο έξυπνη, ευέλικτη και προσαρμοστική, σε ένα διαρκώς μεταβαλλόμενο κοινωνικό και τεχνολογικό περιβάλλον.

ΣΥΜΠΕΡΑΣΜΑΤΑ

Η ενσωμάτωση των ψηφιακών μέσων στη διοίκηση των εκπαιδευτικών μονάδων δεν αποτελεί απλώς μια τεχνολογική εξέλιξη, αλλά μια βαθιά εκπαιδευτική και διοικητική μεταρρύθμιση. Μέσα από εργαλεία επικοινωνίας, ανάλυσης δεδομένων, συνεργασίας και διαχείρισης μάθησης, οι σχολικές μονάδες μπορούν να λειτουργούν πιο αποτελεσματικά, διαφανώς και με επίκεντρο τις ανάγκες των μαθητών και της κοινότητας.

Παρότι η πορεία αυτή συνοδεύεται από προκλήσεις, όπως το ψηφιακό χάσμα, η αντίσταση στην αλλαγή και οι ανησυχίες για την προστασία των προσωπικών δεδομένων, η εμπειρία και η έρευνα δείχνουν ότι οι βέλτιστες πρακτικές —όπως η επιμόρφωση του προσωπικού, η διαμοιρασμένη ηγεσία, ο στρατηγικός σχεδιασμός και η συνεχής αξιολόγηση— μπορούν να εξασφαλίσουν τη βιώσιμη εφαρμογή της ψηφιακής διοίκησης.

Καθώς οι τεχνολογικές και κοινωνικές εξελίξεις συνεχίζονται, τα εκπαιδευτικά ιδρύματα καλούνται να ηγηθούν του μετασχηματισμού, αξιοποιώντας τα ψηφιακά μέσα όχι μόνο για την καλύτερη οργάνωση, αλλά και για τη δημιουργία πιο συμμετοχικών, προσαρμοστικών και δίκαιων εκπαιδευτικών περιβαλλόντων. Το σχολείο του μέλλοντος είναι ήδη εδώ — και η ψηφιακή διοίκηση είναι η γέφυρα που οδηγεί σε αυτό.

ΘΠ28: Επαγγελματική ανάπτυξη εκπαιδευτικών με την αξιοποίηση νέων τεχνολογιών

ΑΥΤΟΕΠΙΜΟΡΦΩΣΗ ΕΚΠΑΙΔΕΥΤΙΚΩΝ ΜΕ ΑΞΙΟΠΟΙΗΣΗ ΤΟΥ E- LEARNING - LAMAP ΣΤΟ ΓΑΛΛΙΚΟ ΕΚΠΑΙΔΕΥΤΙΚΟ ΣΥΣΤΗΜΑ

Γριβόπουλος Κωνσταντίνος
Φυσικός, Δρ. Διδακτικής Φυσικών Επιστημών
Γενικό Λύκειο Νεοχωρίου Δήμου Ι.Π. Μεσολογγίου
Μεσολόγγι, Ελλάδα
e-mail: kgrivop@gmail.com

ΠΕΡΙΛΗΨΗ

Για τις επιμορφωτικές ανάγκες των Γάλλων εκπαιδευτικών στη διδασκαλία των φυσικών επιστημών δημιουργήθηκε το ψηφιακό μέσο e-learning-Lamap. Οι διαχειριστές και οι επιμορφωτές της πλατφόρμας προσφέρουν σε νηπιαγωγούς, δασκάλους και καθηγητές Γυμνασίων μια σειρά ωριαίων βιντεοπαρουσιάσεων (tutoriels) για την εκμάθηση και εμπέδωση της επιστημονικής - διερευνητικής μεθόδου. Ωστόσο, σε αυτόν τον ψηφιακό πόρο προσεγγίζεται και θεματολογία ευρύτερου ενδιαφέροντος, προσαρμοσμένη στη σχολική βαθμίδα για την οποία κάθε χρήστης - εκπαιδευτικός ενδιαφέρεται. Ειδικότερα, η σελίδα για την ψηφιακή αυτοεπιμόρφωση « démarches d'investigation » συμβάλλει στην προετοιμασία των εκπαιδευτικών στη μαθητοκεντρική διδασκαλία των φυσικών επιστημών με εφαρμογή της διερευνητικής μεθόδου, εξοικειώνοντάς τους με τα επιμέρους στάδια αυτής. Οι χρήστες της πλατφόρμας έχουν τη δυνατότητα ελεύθερης πρόσβασης σε επιστημονικό και παιδαγωγικό υλικό. Επιπρόσθετα, αλληλεπιδρούν με συναδέλφους τους για ανταλλαγή εμπειριών, απόψεων, ιδεών κλπ., μέσα από προβλεπόμενα φόρουμ που οργανώνονται ανά θεματολογία. Έτσι, οι εκπαιδευτικοί καλλιεργούν εξ' αποστάσεως επαγγελματικές δεξιότητες σε χρόνο της δικής τους επιλογής και με τους προσωπικούς τους ρυθμούς.

Το κείμενο διαρθρώνεται ως εξής: η εισαγωγή ακολουθείται από τη διασάφηση των εννοιών αυτοεπιμόρφωση, κοινότητες μάθησης και επιστημονική - διερευνητική μέθοδος διδασκαλίας. Κατόπιν, παρουσιάζεται η αρχιτεκτονική της πλατφόρμας e - learning - Lamap και ο τρόπος λειτουργίας της στην αυτοεπιμόρφωση και διάδραση των εκπαιδευτικών.

Λέξεις-κλειδιά: Αυτοεπιμόρφωση, επιστημονική - διερευνητική μέθοδος διδασκαλίας, ψηφιακό μέσο e-learning-Lamap.

ΕΙΣΑΓΩΓΗ

Στο πλαίσιο της επαγγελματικής ανάπτυξης των εκπαιδευτικών στο γαλλικό εκπαιδευτικό σύστημα, η πλατφόρμα e-learning-Lamap αξιοποιεί τις νέες τεχνολογίες για την επιμόρφωση των εκπαιδευτικών στη διδασκαλία των φυσικών επιστημών.

Στην παρούσα μελέτη περίπτωσης, επικεντρώνουμε το ενδιαφέρον μας στην εξ' αποστάσεως αυτοεπιμόρφωση εκπαιδευτικών και επιμορφωτών των εκπαιδευτικών στην παιδαγωγική διερευνητική μέθοδο (démarches d'investigation), που ακολουθείται στη διδασκαλία των πειραματικών επιστημών και της τεχνολογίας. Προϊόν του Ιδρύματος «La main à la pâte», το οποίο επικουρεί το Υπουργείο Παιδείας στην προώθηση της επιστημονικής παιδείας στο σχολείο, αυτό το ανοιχτό διαδικτυακό και διαδραστικό μέσο προσφέρει μια σειρά βιντεοσκοπημένων ωριαίων σεμιναρίων (tutoriels) για την εκμάθηση και εμπέδωση της διερευνητικής μεθόδου σε εκπαιδευτικούς της Πρωτοβάθμιας εκπαίδευσης και του Γυμνασίου. Οι σχεδιαστές της πλατφόρμας πραγματεύονται ποικίλες θεματικές, όπως «φαινόμενο θερμοκηπίου», «ενέργεια και ανθρώπινο σώμα» κλπ., οι οποίες είναι προσαρμοσμένες στη σχολική βαθμίδα για την οποία προορίζονται.

Αντικειμενικός σκοπός αυτής της ψηφιακής αυτοεπιμόρφωσης είναι για, μεν, τους εκπαιδευτικούς η προετοιμασία τους στη μαθητοκεντρική διδασκαλία των φυσικών επιστημών με εφαρμογή της διερευνητικής μεθόδου και, παράλληλα, στην ανάπτυξη επιστημονικού και κριτικού πνεύματος στους μαθητές. Για, δε, τους επιμορφωτές, η πλατφόρμα e-learning-Lamap προσφέρει υποστήριξη στο επιμορφωτικό έργο τους. Οι χρήστες της πλατφόρμας έχουν τη δυνατότητα α) της εξοικείωσης με δραστηριότητες που προορίζονται να εκτελούνται στην τάξη, καθώς και της a posteriori ανάλυσης των αποτελεσμάτων που προκύπτουν από τις υλοποιημένες διδασκαλίες, β) της πρόσβασης σε επιστημονικό και παιδαγωγικό υλικό και, γ) της αλληλεπίδρασης με συναδέλφους για ανταλλαγή εμπειριών, απόψεων, ιδεών κλπ., μέσα από προβλεπόμενα φόρουμ που οργανώνονται ανά σεμινάριο και θεματολογία.

Αναφορικά στην εκμάθηση της διερευνητικής μεθόδου, οι επιμορφούμενοι μπορούν να παρακολουθήσουν τα επιμέρους στάδια, εκκινώντας από την παρατήρηση ενός φυσικού φαινομένου και τη συνακόλουθη αφόρμηση και περνώντας, σταδιακά, στον καθορισμό του προβλήματος, στη διατύπωση υποθέσεων, στον σχεδιασμό ενός διερευνητικού πειραματικού πρωτοκόλλου για την επαλήθευση ή διάψευσή τους με αποσαφήνιση των ρόλων του εκπαιδευτικού και των μαθητών. Ακόμη, επιμορφώνονται στις φάσεις της εξαγωγής νομοτελειακών συμπερασμάτων (φυσικών νόμων) και της εφαρμογής αυτών σε άλλες καταστάσεις. Επίσης, οι επιμορφούμενοι εκπαιδεύονται στις μεταγνωστικές δραστηριότητες των μαθητών. Παράλληλα, το εν λόγω ψηφιακό μέσο προτείνει στους διδάσκοντες διάφορες ενεργητικές δραστηριότητες, σχετικές με τους διδακτικούς στόχους κάθε θεματικής, για την ανάπτυξη των κιναισθητικών ικανοτήτων των μαθητών. Έτσι, οι εκπαιδευτικοί καλλιεργούν επαγγελματικές δεξιότητες σε χρόνο της επιλογής τους και με τους προσωπικούς τους ρυθμούς.

ΑΥΤΟΕΠΙΜΟΡΦΩΣΗ ΕΚΠΑΙΔΕΥΤΙΚΩΝ ΚΑΙ ΚΟΙΝΟΤΗΤΕΣ ΜΑΘΗΣΗΣ

Η έννοια της επιμόρφωσης προσδιορίζεται ως «ένα σύνολο από ειδικά προγράμματα μέσω των οποίων ο εκπαιδευόμενος επιτυγχάνει τη βελτίωση, την ενδυνάμωση και εν τέλει την ανάπτυξη των ήδη κατεκτημένων ακαδημαϊκών ή πρακτικών ικανοτήτων, δεξιοτήτων και γνώσεών του κατά την επαγγελματική του πορεία.» (Μαυρογιώργος, 2005, όπως αναφέρεται στο Chourdaki, 2023). Αναφορικά στον κλάδο της εκπαίδευσης, ο Ματσαγγούρας (2005) προσθέτει στον ορισμό αυτόν το στοιχείο της αυτοκριτικής των εκπαιδευτικών για την ίδια τη διδασκαλία τους, η έκβαση της οποίας τους υποδεικνύει, ενδεχομένως, την ανάγκη πρόσθετης και αυτόνομης επιμόρφωσης, σε επαγγελματικό και ακαδημαϊκό επίπεδο (Giannouli, 2017). Επομένως, ένας ακόμη όρος, η αυτοεπιμόρφωση, αποτελεί ερευνητικό αντικείμενο για το οποίο αναπτύσσεται σχετική βιβλιογραφία.

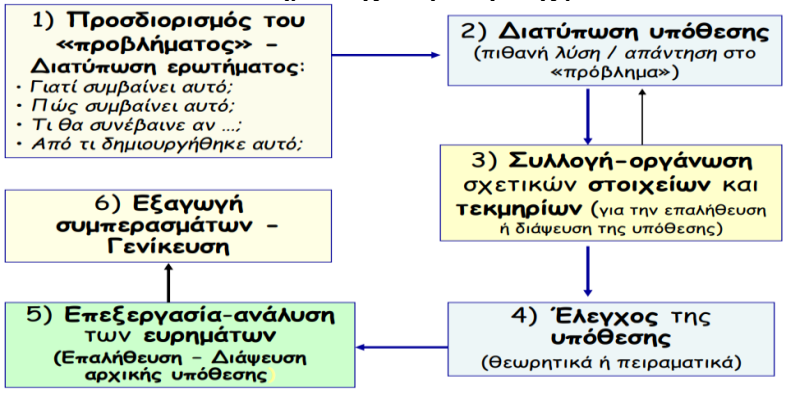
Στο πλαίσιο της διά βίου εκπαίδευσης, η αυτοεπιμόρφωση ορίζεται ως μια διαδικασία επιμόρφωσης στην οποία ο επιμορφούμενος αναλαμβάνει πρωτοβουλίες, κατά τρόπο αυτόνομο, για την επιλογή των μέσων, των μεθόδων και των μαθησιακών στόχων που θα του επιτρέψουν να αποκτήσει γνώσεις και δεξιότητες (Tremblay, 2003). Ωστόσο, η έννοια της αυτοεπιμόρφωσης διευρύνεται, ώστε να συμπεριλάβει την υποστήριξη, κατά την επιμόρφωση του υποκειμένου, από εικονικές κοινότητες. Ένα παράδειγμα αποτελούν οι δικτυακές κοινότητες μάθησης της πράξης (on-line communities of practice), τα μέλη των οποίων έχουν κοινή εργασιακή ενασχόληση και συμμετέχουν μέσα από άτυπες σχέσεις για να επιλύσουν ή να μοιραστούν ένα πρόβλημα ή μία κατάσταση που θα έχει απήχηση στην επαγγελματική τους ανάπτυξη (Bowels, 2002, όπως αναφέρεται στο Papadakis et al., 2005). Οι εικονικές κοινότητες υποστηρίζονται από τις τεχνολογίες πληροφορίας και επικοινωνιών (ΤΠΕ).

Σε ό,τι αφορά στα κίνητρα ενεργού συμμετοχής του επιμορφούμενου σε μια κοινότητα μάθησης, αναφέρουμε (Papadakis et al., 2005):

- τη συνεργατική μάθηση μέσω αλληλεπίδρασης και αξιοποίησης των πόρων της κοινότητας
- την ανατροφοδότηση από τα άλλα μέλη της κοινότητας
- τη διεπιστημονική προσέγγιση με συνεισφορά ανθρώπων με διαφορετικές εμπειρίες και γνώσεις
- την κάλυψη προσωπικών, κοινωνικών και επαγγελματικών αναγκών
- την ενίσχυση της αυτοεκτίμησης μέσα από την επίτευξη γνωστικών και άλλων κοινών στόχων της κοινότητας

Οι μαθησιακές κοινότητες, με τα τεχνολογικά εργαλεία που διαθέτουν, μπορούν να υποστηρίζουν τόσο την ενεργητική και συνεργατική μάθηση όσο και την αυτοεπιμόρφωση μεταξύ των μελών της κοινότητας.

ΕΠΙΣΤΗΜΟΝΙΚΗ - ΔΙΕΡΕΥΝΗΤΙΚΗ ΜΕΘΟΔΟΣ ΔΙΔΑΣΚΑΛΙΑΣ



Με τον όρο επιστημονική - διερευνητική μέθοδος διδασκαλίας ή επιστημονική - εκπαιδευτική μέθοδος με διερεύνηση αποδίδεται στην ελληνική ο όρος Inquiry-Based Science Education ή Démarches d'investigation (στη γαλλική βιβλιογραφία). Πρόκειται για μαθητοκεντρική προσέγγιση όπου επιδιώκεται οι μαθητές να γνωρίσουν την ερευνητική μέθοδο παραγωγής της γνώσης και να είναι ικανοί να την εφαρμόζουν για την επαλήθευση εννοιών και ιδεών (Massialas, 1989). Ο επιθετικός προσδιορισμός «επιστημονική» για τη μέθοδο αυτή θέλει, ακριβώς, να σηματοδοτήσει παιδαγωγικά τον παραλληλισμό στον τρόπο εργασίας μεταξύ του επιστήμονα και του μαθητή με προοπτική τη γνώση (Kokkotas, 2002). Ακόμη, η μέθοδος χαρακτηρίζεται ως υποθετικο-επαγωγική, καθόσον οδηγεί σε γενικευμένα συμπεράσματα, νόμους ή θεωρίες για την εξήγηση των φυσικών φαινομένων (Kokkotas, 1999). Φυσικά, αυτά τα συμπεράσματα και οι φυσικοί νόμοι συνιστούν τη διδακτέα ύλη, την οποία οι μαθητές καλούνται να οικοδομήσουν, μέσω της αξιοποίησης της στρατηγικής των γνωστικών συγκρούσεων (Mathé et al., 2008) και της ενεργοποίησης της μάθησης στη Ζώνη Επικείμενης Ανάπτυξης (Vygotsky, 1978; Salvaras, 2013). Κατά συνέπεια, η μέθοδος της επιστημονικής διερεύνησης εντάσσεται στο κοινωνικο-εποικοδομιστικό παιδαγωγικό επιστημολογικό παράδειγμα.

Αναφερόμενοι στα χαρακτηριστικά της διερευνητικής μεθόδου, οι Vainas et al. (2007) σημειώνουν ότι βασίζεται στην αναλυτική σκέψη με εξοικείωση με τους κανόνες της λογικής, ενώ απαιτεί λογική ακολουθία βημάτων με επίγνωση του σκοπού εκτέλεσης κάθε βήματος. Στις οδηγίες για τον εκπαιδευτικό στο σχολικό βιβλίο της Φυσικής Α΄ Γυμνασίου, οι Kalkanis et al (2013) σταχυολογούν τα στάδια της επιστημονικής διερεύνησης, δίνοντας ταυτόχρονα ενδεικτικά ενεργητικά ρήματα που περιγράφουν τις ακολουθούμενες από τους μαθητές διαδικασίες:

- παρατήρηση και οριοθέτηση προβλήματος ή κατάστασης με όρους ποσοτικής διερεύνησης μέσω ανεξάρτητων και εξαρτημένων μεταβλητών → παρατηρώ, πληροφορούμαι, ενδιαφέρομαι
- διατύπωση υποθέσεων → συζητώ, αναρωτιέμαι, υποθέτω
- σχεδιασμός πειραματικού πρωτοκόλλου → ενεργώ, πειραματίζομαι, μετρώ
- εξαγωγή συμπερασμάτων και φυσικών νόμων → συμπεραίνω, καταγράφω
- αξιολόγηση, μοντελοποίηση, μεταγνώση → εφαρμόζω, εξηγώ, γενικεύω.

Η ακόλουθη εικόνα 1 σχηματοποιεί τα στάδια στα οποία αναλύεται η επιστημονική - διερευνητική μέθοδος διδασκαλίας (Pavlatou, 2015):

Εικόνα 1
Στάδια επιστημονικής- διερευνητικής μεθόδου

Όπως παρατηρούμε, πρόκειται ουσιαστικά για την ίδια μεθοδολογική πορεία που παραθέσαμε πιο πάνω, με την επιπλέον ρητή προσθήκη του ενεργήματος συλλογής πληροφοριών και στοιχείων που σχετίζονται με το προς διερεύνηση αφετηριακό πρόβλημα / κατάσταση. Μάλιστα, αυτό το βήμα τροφοδοτεί το στάδιο της διατύπωσης υποθέσεων με το οποίο συνδυάζεται κατά τρόπο αμφίδρομο, όπως το απεικονίζει το διπλό βέλος της εικόνας.

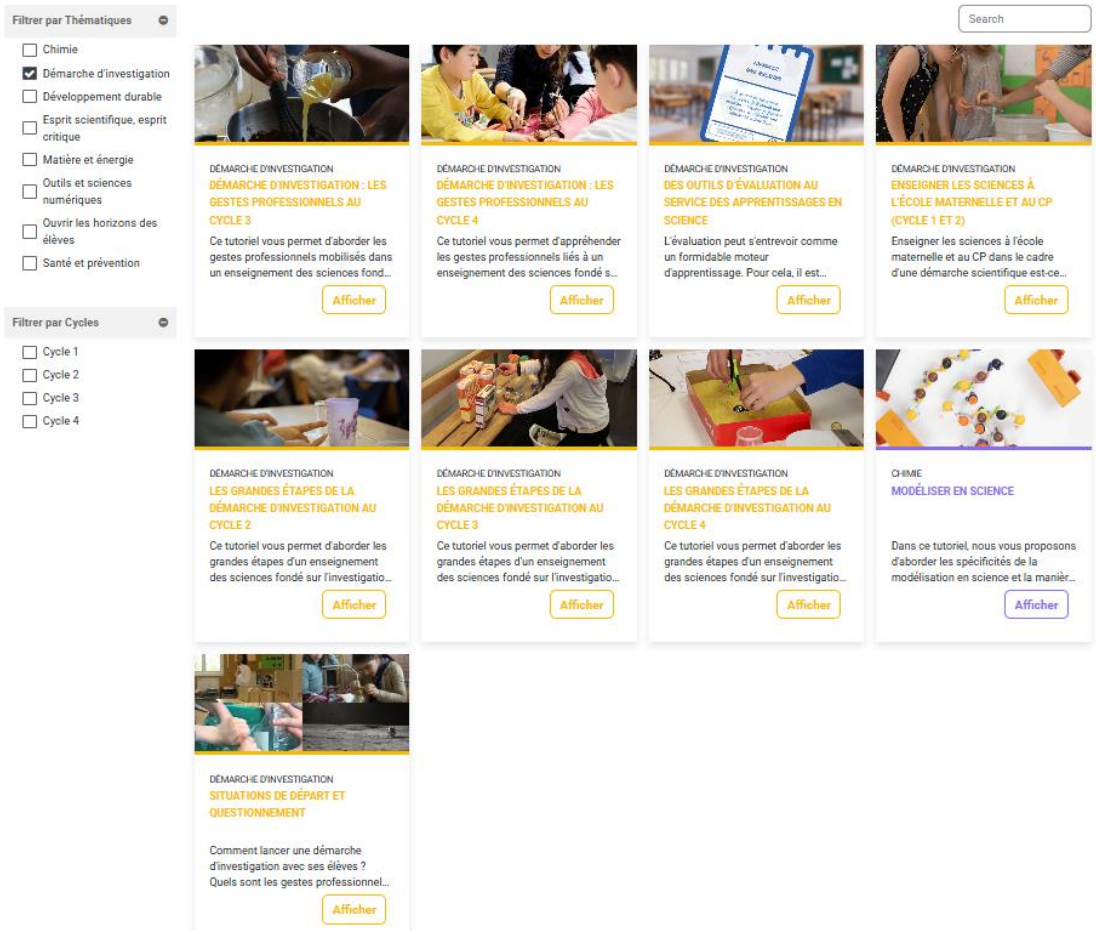
Στο γαλλικό συγκείμενο, πραγματοποιήθηκε μια εκτεταμένη έρευνα με θέμα τις αντιλήψεις (représentations) εκπαιδευτικών για την επιστημονική - διερευνητική μέθοδο διδασκαλίας, σε δείγμα 2606 διδασκόντων θετικών επιστημών, εκ των οποίων 771 ήταν καθηγητές φυσικής - χημείας και 702 βιολογίας - γεωλογίας, που δίδασκαν σε Γυμνάσια και Λύκεια της Γαλλίας. Διευκρινιστικά, στο γαλλικό εκπαιδευτικό σύστημα, η φυσική και η χημεία διδάσκονται ως ένα μάθημα υπό τον τίτλο « sciences physiques et chimiques », με ενιαίο αναλυτικό πρόγραμμα σπουδών, ενιαίο σχολικό εγχειρίδιο, ενιαία αξιολόγηση, τον ίδιο διδάσκοντα κλπ. Ομοίως, για τη βιολογία και τη γεωλογία (« sciences de la vie et de la Terre »). Μεταξύ των ευρημάτων της έρευνας, σημειώνουμε πολύ συνοπτικά πως για τους διδάσκοντες φυσικής - χημείας και βιολογίας - γεωλογίας, ένα από τα σημαντικότερα οφέλη της διερευνητικής μεθόδου είναι ότι ευνοεί την ανάπτυξη δεξιοτήτων, καθώς και τη σταδιακή ικανότητα των μαθητών για αυτόνομη εργασία. Επίσης, οι φυσικοί - χημικοί, πρωτίστως, θέτουν ως κύριο διδακτικό στόχο την ανάδειξη των πρότερων ιδεών των μαθητών (Driver κ.ά., 1993), βάσει των οποίων δίνουν τη δική τους εξήγηση – προτού διδαχθούν την επιστημονική – στα φυσικά φαινόμενα που παρατηρούν. Επίσης, οι εκπαιδευτικοί αναγνωρίζουν την παιδαγωγική αξία της εμπειρίας που βιώνουν οι μαθητές, ενόσω εργάζονται με την επιστημονική - διερευνητική μέθοδο, και ειδικότερα όταν δοκιμάζεται η ανθεκτικότητα των εναλλακτικών ιδεών τους (Monod-Ansaldi and Prieur, 2011).

ΠΛΑΤΦΟΡΜΑ E – LEARNING - LAMAP

Το ίδρυμα « La main à la pâte» (Lamap) – «τα χέρια στη ζύμη», ή σε ελεύθερη απόδοση, «δουλεύουμε χειραπτικά» –, που ιδρύθηκε με πρωτοβουλία του Georges Charpak (Νόμπελ Φυσικής, 1992) και τη συνδρομή της Ακαδημίας Επιστημών της Γαλλίας, φιλοδοξεί να καλλιεργήσει μια αντίληψη της επιστήμης περισσότερο ως μεθόδου αντιμετώπισης και επίλυσης προβλημάτων, παρά ως θεωρητικού συστήματος παγιωμένων και ετοιμοπαράδοτων γνώσεων. Σε όλη τη γαλλική επικράτεια, τα πιλοτικά κέντρα Lamap σχηματίζουν ένα επικουρικό προς τους εκπαιδευτικούς δίκτυο προωθώντας τη μαθητοκεντρική διδασκαλία της επιστήμης και της τεχνολογίας.

Μεταξύ άλλων υποστηρικτικών δομών, οι εκπαιδευτικοί διαθέτουν ένα εκπαιδευτικό αποθετήριο, απ' όπου μπορούν να αντλούν εκπαιδευτικούς πόρους για τη διδασκαλία τους, αλλά και για τις ανάγκες της δικής τους επιμόρφωσης. Στην ψηφιακή πλατφόρμα L@map (https://elearning-lamap.org/) έχουν ελεύθερη πρόσβαση, κατόπιν δημιουργίας λογαριασμού χρήστη, εκπαιδευτικοί Δημοτικών σχολείων και Γυμνασίων. Αυτό το ψηφιακό μέσο περιλαμβάνει πλήθος βιντεοπαρουσιάσεων (tutoriels) σχετικών με ποικίλες επιστημονικές θεματικές, όπως βιώσιμη ανάπτυξη, πράσινη χημεία, βιοποικιλότητα, υλικότητα του αέρα, ύλη και ενέργεια, θερμοπυρηνικά εργοστάσια κλπ. Παράλληλα, ο χρήστης μπορεί να παρακολουθήσει βιντεοπαρουσιάσεις πάνω στην επιστημονική - διερευνητική μέθοδο, οι οποίες συμβάλλουν στην αυτοεπιμόρφωσή του και επικουρούν το διδακτικό έργο του.

Η συλλογή αυτών των βιντεομαθημάτων αυτοεπιμόρφωσης εμπλουτίζονται συνεχώς, αφού δίνεται η δυνατότητα στους χρήστες να παρεμβαίνουν στην πλατφόρμα για να αναρτούν, παραδείγματος χάρη, βιντεοσκοπημένες διδασκαλίες από την τάξη τους τις οποίες αναλύουν μεταξύ τους. Μάλιστα, οι ίδιοι οι διαχειριστές της πλατφόρμας παρακινούν κάθε χρήστη να δηλώσει τις προσδοκίες του και τους ειδικότερους στόχους στους οποίους προσβλέπει μέσω της αυτοεπιμόρφωσης. Οι επιμορφωτές των εκπαιδευτικών, επίσης μέλη της διαδικτυακής κοινότητας, αναλαμβάνουν να συγκεντρώνουν υλικό, να οργανώνουν ομοειδείς ομάδες εκπαιδευτικών, να τους συντονίζουν και να ανατροφοδοτούν τον προβληματισμό και τις αλληλεπιδράσεις μεταξύ των επιμορφούμενων. Φυσικά, προσφέρεται πάντα και η δυνατότητα ασύγχρονης επιμόρφωσης, που λαμβάνει υπόψη τα προσωπικά κριτήρια και τους ρυθμούς κάθε εκπαιδευτικού.



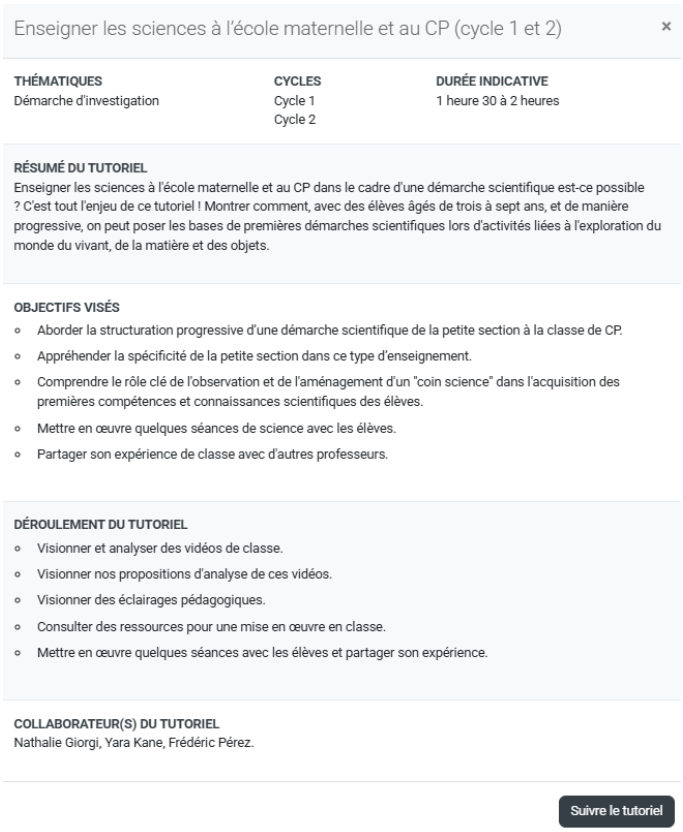
ΑΥΤΟΕΠΙΜΟΡΦΩΣΗ ΣΤΗΝ ΕΠΙΣΤΗΜΟΝΙΚΗ - ΔΙΕΡΕΥΝΗΤΙΚΗ ΜΕΘΟΔΟ ΔΙΔΑΣΚΑΛΙΑΣ ΜΕΣΩ ΤΟΥ E – LEARNING - LAMAP

Ανάμεσα στις θεματικές που εμφανίζονται στο μενού της πλατφόρμας, εντοπίζουμε την ιστοσελίδα που περιγράφει την επιστημονική - διερευνητική μέθοδο. Η εξερεύνησή της από τους χρήστες - εκπαιδευτικούς συμβάλλει στην αυτοεπιμόρφωσή τους, επικουρώντας έτσι το διδακτικό έργο τους. Στην ακόλουθη εικόνα 2 φαίνεται η εν λόγω σελίδα:

Τα περιεχόμενα της σελίδας επιτρέπουν στον χρήστη να επιλέξει το σχολικό επίπεδο που τον ενδιαφέρει, από το Νηπιαγωγείο μέχρι το Γυμνάσιο. Οι προσφερόμενες βιντεοπαρουσιάσεις αναλύουν τη διεξαγωγή ενός μαθήματος σχεδιασμένου με την επιστημονική - διερευνητική μέθοδο, τόσο από την άποψη των επαγγελματικών χειρισμών του

διδάσκοντα, π.χ. κατά τη διάρκεια υλοποίησης των σταδίων της μεθόδου, όσο και από γνωστική άποψη, όπως είναι οι διεργασίες μοντελοποίησης στη φυσική.

Εικόνα 2
Βιντεοπαρουσιάσεις για την επιστημονική - διερευνητική μέθοδο



Όταν ο χρήστης-εκπαιδευτικός επιλέξει κάποιο από τα εικονιζόμενα θέματα, θα ανοίξει μια νέα σελίδα. Αν, λόγου χάρη, ένας/μία νηπιαγωγός ενδιαφερθεί για το 4ο εικονίδιο (Πρβλ. εικόνα 2), θα μεταφερθεί στην παρακάτω ιστοσελίδα:

Περιληπτικά, αυτή η υποσελίδα δομείται από έναν τίτλο, όπου προσδιορίζεται το αντίστοιχο σχολικό επίπεδο και η ενδεικτική διάρκεια για την εξατομικευμένη μελέτη από τον χρήστη. Ακολουθεί μια σύνοψη και ορίζονται οι διδακτικοί στόχοι της βιντεοπαρουσίασης, τους οποίους αναμένεται να επιτύχουν οι χρήστες μετά την παρακολούθησή της. Για το υλικό που έχουν τη δυνατότητα να παρακολουθήσουν δίνονται οδηγίες, ενώ παρακινούνται να μοιραστούν τις εμπειρίες από τη διδασκαλία στην τάξη με άλλους επιμορφούμενους, μέσω σχετικού forum. Τέλος, αναφέρονται οι δημιουργοί της συγκεκριμένης υποσελίδας.

Οι διαχειριστές του e-learning-Lamap έχουν σχεδιάσει την εφαρμογή MapEval μέσω της οποίας οι χρήστες έχουν την ευχέρεια να αξιολογούν το ψηφιακό εργαλείο, στο τέλος κάποιας αυτοεπιμόρφωσης. Η εφαρμογή μπορεί να εγκατασταθεί ακόμη και στο κινητό τους τηλέφωνο. Πιο συγκεκριμένα, ο χρήστης:

- εισάγει τα αποτελέσματα της αξιολόγησης των δεξιοτήτων που σχετίζονται με τις δραστηριότητες που αναπτύχθηκαν σε μια βιντεοπαρουσίαση
- εκτιμά τον βαθμό προόδου των γνώσεων και δεξιοτήτων του, πριν και μετά τη δραστηριότητα που παρακολούθησε
- πληροφορείται για τις αξιολογήσεις των υπολοίπων χρηστών της ομάδας του
- σχολιάζει τα συγκεντρωτικά αποτελέσματα, ανταλλάσσοντας απόψεις σχετικά με τις δραστηριότητες και τις επαγγελματικές ενέργειες των επιμορφούμενων.

Εικόνα 3
Η υποσελίδα για την Προδημοτική και Πρωτοδημοτική βαθμίδα

Στην εικόνα 4 προβάλλεται η οθόνη από ενδεικτική αξιολογική ανατροφοδότηση ενός χρήστη:

Εικόνα 4
Ενδεικτική οθόνη από αξιολόγηση χρήστη, στην εφαρμογή MapEval

Η απόδοση των εικονιζόμενων ερωτήσεων από το γαλλικό συγκείμενο στο ελληνικό είναι η εξής: Σε ποιόν βαθμό

- το αναγκαίο υλικό για τη συνεδρία (μάθημα) είναι εύκολα προσπελάσιμο (στην πλατφόρμα);
- το προτεινόμενο εκπαιδευτικό σενάριο επιτρέπει να αντιληφθείτε σύντομα την αντικειμενικούς στόχους και τις ενέργειες προς εκτέλεση;
- ο προτεινόμενος οδηγός του εκπαιδευτικού διευκολύνει την υλοποίηση της δραστηριότητας στην τάξη;
- η δραστηριότητα αποκρίνεται στις ανάγκες των μαθητών για την ανάπτυξη δεξιοτήτων;

Σαν μια επιπλέον χρήση της εφαρμογής MapEval, ο εκπαιδευτικός έχει τη δυνατότητα να αξιολογήσει το διδακτικό έργο, που έχει παραχθεί στην δική του τάξη και να μετρήσει την πρόοδο των μαθητών γνωστοποιώντας τους το αποτέλεσμα. Προαιρετικά, μπορεί να αναρτήσει τα δεδομένα αυτά στην πλατφόρμα, τηρώντας φυσικά τους δεοντολογικούς κανόνες.

ΣΥΜΠΕΡΑΣΜΑΤΑ

Η ψηφιακή πλατφόρμα e-learning-Lamap προσφέρει υποστήριξη στο επιμορφωτικό έργο των Γάλλων εκπαιδευτικών Πρωτοβάθμιας και Δευτεροβάθμιας εκπαίδευσης, που διδάσκουν φυσικές επιστήμες. Παράλληλα, αποτελεί ένα διαδικτυακό μέσω εξ' αποστάσεως αυτοεπιμόρφωσης, μέσα από κατάλληλα σχεδιασμένες δραστηριότητες και βιντεοπαρουσιάσεις. Οι χρήστες - εκπαιδευτικοί έχουν πρόσβαση σε επιστημονικό και παιδαγωγικό υλικό, ενώ μπορούν να αλληλεπιδρούν με συναδέλφους τους για ανταλλαγή εμπειριών, απόψεων, ιδεών κλπ.

Σύμφωνα με τον πρόσφατο απολογισμό δραστηριοτήτων της e-learning-Lamap για το σχολικό έτος 2022-23, μεταξύ των προσφερόμενων θεματικών, οι βιντεοπαρουσιάσεις που είναι αφιερωμένες στην επιστημονική - διερευνητική μέθοδο διδασκαλίας γνωρίζουν ευρεία αποδοχή και εμπλουτίζονται συνεχώς. Επίσης, επανεπιβεβαιώνεται η ανταπόκριση των διαχειριστών και επιμορφωτών της πλατφόρμας e-learning-Lamap, στις τρέχουσες εκπαιδευτικές συνθήκες και ανάγκες, αναπτύσσοντας σύγχρονα εργαλεία, δράσεις και νέο υποστηρικτικό υλικό και συμβάλλοντας έτσι στην επαγγελματική ανάπτυξη των εκπαιδευτικών.

ΠΕΡΙΛΗΨΗ

Η επιμόρφωση των εκπαιδευτικών αποτελεί κλειδί για την ουσιαστική αναβάθμιση της ποιότητας της εκπαίδευσης. Ένας επιμορφωμένος εκπαιδευτικός μπορεί να βελτιώσει σημαντικά τις παιδαγωγικές και διδακτικές του δεξιότητες, να αυξήσει την επιστημονική αυτογνωσία του, την επαγγελματική του αυτοπεποίθηση και τον ενθουσιασμό του, ώστε να δημιουργήσει τις συνθήκες εκείνες που θα του επιτρέψουν να ανταποκρίνεται πληρέστερα και επιτυχέστερα στην ποικιλομορφία και την ετερογένεια των αναγκών των μαθητών του. Η συνεχής επιστημονική και επαγγελματική αναβάθμιση των εκπαιδευτικών θεωρείται απαραίτητη όχι μόνο για τους νέους αλλά και για τους έμπειρους εκπαιδευτικούς, αφού πέραν των άλλων ενισχύει και το πάθος τους αλλά και την αποτελεσματικότητα του πολυδύναμου και πολυσύνθετου ρόλου τους. Μολονότι έχουν παρατηρηθεί δυσκολίες στην αλλαγή των διδακτικών πρακτικών και των πεποιθήσεων των εκπαιδευτικών, είναι αναγνωρισμένη η αξία στοχευμένων προγραμμάτων επιμόρφωσης υπό την προϋπόθεση, βέβαια, ότι αυτά θα γεφυρώνουν το χάσμα μεταξύ της θεωρίας και της πράξης, όπως ήδη είχε επισημάνει, από το 1914, ο μεγάλος John Dewey.

Στη σημερινή ψηφιακή εποχή, η επιμόρφωση των εκπαιδευτικών είναι περισσότερο αναγκαία από ποτέ, καθώς πέραν της ενίσχυσης και του βέλτιστου μετασχηματισμού των διαδικασιών, των μεγεθών και των διαστάσεων της διδασκαλίας και της μάθησης, μπορεί να αναδείξει και να προσφέρει νέες παιδαγωγικές δεξιότητες στους μάχιμους εκπαιδευτικούς, απαραίτητες για τη δημιουργία αλληλεπιδραστικών και εποικοδομιστικών περιβαλλόντων μάθησης τα οποία θα ανταποκρίνονται στις σύγχρονες κοινωνικοοικονομικές και τεχνολογικές συνθήκες. Προς αυτή την προκλητική σύγχρονη εκπαιδευτική απαίτηση, η αξιοποίηση της Τεχνητής Νοημοσύνης (ΤΝ) στην επιμόρφωση των εκπαιδευτικών προβάλλει ως μία εκ των ων ουκ άνευ ψηφιακή διαμεσολάβηση, καθώς μπορεί να προσφέρει καινοτόμες και ριζοσπαστικές δυνατότητες υποστήριξης της επαγγελματικής και επιστημονικής αναβάθμισής τους. Η ΤΝ μπορεί να παρέχει πλούσιες ευκαιρίες μικρομάθησης και δια βίου μάθησης στους εκπαιδευτικούς, να αναλύει πληθώρα εκπαιδευτικών δεδομένων, να προτείνει στοχευμένες διδακτικές και παιδαγωγικές παρεμβάσεις, να δημιουργεί εξατομικευμένα και διαφοροποιημένα σχέδια διδασκαλίας αλλά και ρεαλιστικά σενάρια, όπως και να παρέχει συνεχή και αντικειμενική ανατροφοδότηση. Η ΤΝ, από τώρα και στο εξής, θα διεκδικεί σημαντικό ρόλο και μερίδιο στην οικοδόμηση ενός αποτελεσματικού μοντέλου επιμόρφωσης, το οποίο θα είναι ικανό να υποστηρίζει τον εκπαιδευτικό στον απαιτητικό και πληθωρικό ρόλο του, ώστε, τελικά, να ενισχύεται η συνολική ποιότητα του εκπαιδευτικού έργου, αλλά και να παγιώνεται το θετικό αποτύπωμα της μαθησιακής εμπειρίας των μαθητών.

Προς την κατεύθυνση αυτή, η παρούσα εργασία θα παρουσιάσει πρακτικές εφαρμογές της ΤΝ, οι οποίες μπορούν να υποστηρίξουν την επαγγελματική και επιστημονική ανάπτυξη των εκπαιδευτικών και να συμβάλουν σημαντικά στην αναμόρφωση της εκπαιδευτικής διαδικασίας, καθώς και στη διαρκώς επιζητούμενη βελτίωση της ποιότητας της εκπαίδευσης.

Λέξεις – κλειδιά: Τεχνητή Νοημοσύνη, επιμόρφωση, αναβάθμιση, εκπαιδευτικός

ΕΙΣΑΓΩΓΗ

Η σημερινή λίαν απαιτητική σχολική πραγματικότητα απαιτεί τη δημιουργία μαθητοκεντρικών, συνεργατικών, αναστοχαστικών και μεταγνωστικών περιβαλλόντων μάθησης, τα οποία θα προάγουν την καλλιέργεια νοητικών δεξιοτήτων ανώτερης τάξης. Μια τέτοια παιδαγωγική περίσταση επιζητεί εκπαιδευτικούς ενημερωμένους και άριστα καταρτισμένους, ώστε να ανταπεξέρχονται αποτελεσματικά στο πολυδιάστατο και δύσκολο εκπαιδευτικό έργο τους, προσδίδοντας ποιότητα στις εκπαιδευτικές πρακτικές τους. Μια συστηματική περιοδική και καλά οργανωμένη επιμόρφωση των εκπαιδευτικών μπορεί να λειτουργήσει ως υποστήριγμα και ως καταλύτης βελτίωσης της καθημερινής εκπαιδευτική διαδικασίας. Η επαγγελματική και επιστημονική αναβάθμιση των εκπαιδευτικών, αν και δαπανηρή, είναι δυνατόν να καλύψει και τυχόν επιστημονικά και διδακτικά ελλείμματα των εκπαιδευτικών, να επικαιροποιήσει τις γνώσεις του και, γενικά, να τους προσδώσει πλούσιες παιδαγωγικές εξαρτύσεις για επιτυχημένη και δυναμική επιτέλεση του λειτουργήματός τους. Το δεύτερο μισό της τρίτης δεκαετίας του 21ου αιώνα έχει συσχετιστεί συμπαγώς και αδιάσπαστα με την έλευση, από το μέλλον, της εξωπραγματικής και απόκοσμης ΤΝ. Η αξιοποίηση της ΤΝ, μέσω των ανεξάντλητων εφαρμογών της, διαπερνά-τέμνει οριζόντια, σχεδόν κάθε ενέργεια, δράση, γεγονός και έκφανση της ανθρώπινης ζωής και καθημερινότητας. Στον εκπαιδευτικό χώρο, η ΤΝ έχει αρχίσει να επιφέρει επαναστατικές αλλαγές στον τρόπο διδασκαλίας και μάθησης, αντικαθιστώντας ή παραμερίζοντας παραδοσιακές στρατηγικές και μεθόδους. Η παρούσα εργασία θα επικεντρωθεί σε μια πτυχή των ωφελημάτων της ΤΝ προς την εκπαίδευση. Συγκεκριμένα, θα παράσχει πολλούς τρόπους και παραδειγματικές περιπτώσεις, που μπορεί να διευκολύνουν τον εκπαιδευτικό, στην αναβάθμιση της επαγγελματικής και επιστημονικής του υπόστασης, και κατ' επέκταση να συμβάλουν στη βελτίωση της ποιότητας του παραγόμενο εκπαιδευτικού έργου.

Η ΕΠΑΓΓΕΛΜΑΤΙΚΗ ΚΑΙ ΕΠΙΣΤΗΜΟΝΙΚΗ ΑΝΑΒΑΘΜΙΣΗ ΤΩΝ ΕΚΠΑΙΔΕΥΤΙΚΩΝ

Η επαγγελματική και επιστημονική αναβάθμιση των εκπαιδευτικών αποτελεί βασικό πυλώνα για την αναβάθμιση της ποιότητας της εκπαίδευσης σε βάθος χρόνου, σε όλες τις βαθμίδες της εκπαίδευσης (Stavermann, 2025; You et al., 2025; Sodiya & Quliyeva, 2019; Darling-Hammond et al., 2017; Day, 1999). Δε νοείται σύγχρονο εκπαιδευτικό σύστημα χωρίς την πρόβλεψη για συνεχή επιμόρφωση και διαρκή επαγγελματική εξέλιξη του ανθρώπινου δυναμικού του. Η παιδαγωγική, η διδακτική και οι επιστήμες της εκπαίδευσης εξελίσσονται ραγδαία, για αυτό η ενεργός συμμετοχή των εκπαιδευτικών σε προγράμματα κατάρτισης, μετεκπαίδευσης και επιμόρφωσης είναι αναγκαία, ώστε να παραμένουν ενημερωμένοι, αποτελεσματικοί και καινοτόμοι. Πράγματι, ως θεμελιώδες στοιχείο της επαγγελματικής εξέλιξης, τα προγράμματα συνεχιζόμενης εκπαίδευσης και επιμόρφωσης των μάχιμων εκπαιδευτικών διαδραματίζουν καθοριστικό ρόλο (Uzorka, Kalabuki & Odebiyi, 2024). Η συστηματική επιμόρφωση των εκπαιδευτικών προβάλλει ως μια ύψιστη προτεραιότητα για κάθε εκπαιδευτικό μοντέλο και μετασχηματισμό, ώστε οι εκπαιδευτικοί να καλύπτουν την ετερογένεια και την ποικιλία των παιδαγωγικών αναγκών κάθε μαθητή (Eurydice, 2025). Πλήθος ερευνών (Morina et al., 2025; Amemasor et al., 2025; Ambon et al., 2024; Ventista & Brown, 2023; Rangel-Pacheco & Witte, 2019; Phillips, McElwain & Clemmer, 2016), καταδεικνύει ότι η διαρκής επιμόρφωση (αυτή που γίνεται για μεγάλο χρονικό διάστημα φαίνεται να είναι πιο ωφέλιμη) και η συνακόλουθη επιστημονική εξέλιξη και αναβάθμιση των εκπαιδευτικών συμβάλλει ουσιαστικά στη βελτίωση της διδακτικής διαδικασίας και την υιοθέτηση σύγχρονων διδακτικών μεθόδων, καθώς ενισχύει τόσο τις παιδαγωγικές διδακτικές και μεταγνωστικές τους δεξιότητες όσο και την ικανότητά τους να αναστοχάζονται και να διαχειρίζονται αποτελεσματικά κρίσεις στο σχολικό περιβάλλον, αλλά και προβλήματα που ανακύπτουν στην τάξη.

Παράλληλα, η επιμόρφωση συνδέεται θετικά με την αυξημένη επαγγελματική ικανοποίηση των εκπαιδευτικών, καθώς και με την ενίσχυση της πρόθεσής τους να παραμείνουν στον χώρο της εκπαίδευσης μακροπρόθεσμα, μειώνοντας, μάλιστα, και το αίσθημα επαγγελματικής εξουθένωσης (Rajendran et al., 2023). Έχει διαπιστωθεί (Koulis, 2019; Day, 1999) θετική συνάφεια μεταξύ επαγγελματικής ανάπτυξης, ηθικής και εργασιακής ικανοποίησης αλλά και αφοσίωσης των εκπαιδευτικών, υπό τη μορφή μιας κυκλοτερικής σχέσης. Επίσης, έχει δειχθεί (Zhao, Byun & Jeon, 2025; Muñoz-Fernández et al., 2025; Asiyah et al., 2021; OECD, 2019) ότι η επαγγελματική ανάπτυξη των εκπαιδευτικών έχει σημαντική θετική επίδραση στην εργασιακή δέσμευση (work commitment), η οποία με τη σειρά της σχετίζεται με την αίσθηση ασφάλειας των εκπαιδευτικών, την επίδοση των μαθητών και γενικά με την ποιότητα της εκπαίδευσης. Η βελτίωση των δεξιοτήτων και των κινήτρων των εκπαιδευτικών (αυτό δε συναρτάται μόνο με την αύξηση του επιπέδου των τυπικών προσόντων τους αλλά και με την επιμόρφωσή τους) έχει βρεθεί ότι έχει θετικό αντίκτυπο στη διαδικασία και την οικοδόμηση της μάθησης από τους μαθητές τους (Government Office for Science, 2018; Mastrogiannis, 2015; LaChausse, Clark & Chapple, 2014).

Ωστόσο, το εκπαιδευτικό έργο - διδακτικό και παιδαγωγικό - απαιτεί συνεχή ενημέρωση και ανανέωση τόσο των γνώσεων όσο και των δεξιοτήτων των εκπαιδευτικών, συμπεριλαμβανομένης της τακτικής αναθεώρησης και προσαρμογής των διδακτικών προσεγγίσεων και μεθόδων τους. Η διδασκαλία πρέπει να αντιμετωπίζεται ως επάγγελμα της γνώσης (Ulferts, 2021), όπου οι εκπαιδευτικοί πρέπει να είναι ειδικοί που ενημερώνουν συνεχώς τις επαγγελματικές τους γνώσεις και δεξιότητες, για να ανταποκρίνονται αποτελεσματικά στις εξελισσόμενες εκπαιδευτικές προκλήσεις. Οι

εκπαιδευτικοί πρέπει να λειτουργούν ως δια βίου μαθητές, προσαρμόζοντας τις γνώσεις και τις παιδαγωγικές τους στρατηγικές στις σύγχρονες απαιτήσεις. Η προσαρμογή αυτή στις εκάστοτε κοινωνικές και παιδαγωγικές απαιτήσεις καθίσταται αναγκαία, ώστε οι παρεμβάσεις στο σχολικό πλαίσιο να είναι ουσιαστικές και αποδοτικές, και η μαθησιακή εμπειρία να αποκτά νόημα και αξία (Anane & Kuranchie, 2022), διαμορφωμένη μέσα σε ασφαλή, ευχάριστα και εστιασμένα στον μαθητή περιβάλλοντα.

Μολονότι οι εκπαιδευτικοί, από μισθολογικής άποψης, είναι πολύ δαπανηροί για τους κρατικούς προϋπολογισμούς των χωρών (Olsen & Wyss, 2022; Li Siu Pang & Kwo Wai Yu, 2005), όπως και τα προγράμματα επιμόρφωσής τους (Allen et al., 2016), η ανάγκη για έναν σύγχρονο και προοδευτικό προσανατολισμό καθιστά επιτακτική τη συνεχή επαγγελματική και επιστημονική αναβάθμιση των εκπαιδευτικών. Σκοπός είναι η ουσιαστική αναβάθμιση της ποιότητας του εκπαιδευτικού τους έργου σε όλες τις διαστάσεις, στοιχείο που είναι καθοριστικής σημασίας για την αναμόρφωση της εκπαιδευτικής διαδικασίας σε παγκόσμιο επίπεδο, τόσο στην Πρωτοβάθμια όσο και στη Δευτεροβάθμια εκπαίδευση. Σε κάθε περίπτωση, η ανάγκη για συνεχή, καλά οργανωμένη, συστηματική και περιοδική επιμόρφωση των εκπαιδευτικών συνιστά θεμελιώδη και αδιαπραγμάτευτη προτεραιότητα. Οι εκπαιδευτικοί, αναμφισβήτητα, θεωρούνται το κλειδί για την εδραίωση και σταθεροποίηση της ποιότητας στα εκπαιδευτικά συστήματα αλλά και για τη βελτίωση όλων σχεδόν των σχολικών συνιστωσών και παραγόντων. Αναμφίβολα, οι εκπαιδευτικοί θα πρέπει να στοχεύουν απαραίτητα και στην εξέλιξη και αναβάθμιση του εαυτού τους, και όχι μόνο στην ανάπτυξη και πρόοδο των μαθητών τους (Coppe et al., 2024).

Υποστηρίζεται ότι η αποτελεσματική επιμόρφωση οφείλει να προσθέτει και να αλλάζει όχι μόνο τη γνώση αλλά και τις πεποιθήσεις των εκπαιδευτικών, προκειμένου να έχει διαρκή αντίκτυπο στη διδασκαλία και στη μάθηση (Guskey, 2002). Ωστόσο, είναι ερευνητικά επιβεβαιωμένο ότι η αλλαγή των πεποιθήσεων και των πρακτικών των εκπαιδευτικών είναι δύσκολη υπόθεση (Krulatz et al., 2024). Πάντως, και οι ίδιοι οι εκπαιδευτικοί θεωρούν ότι στοχευμένα προγράμματα επιμόρφωσής τους είναι ικανά να συμβάλλουν κατά πολύ στην επιδιωκόμενη επαγγελματική τους ανάπτυξη, υπό τον κάθετο όρο ότι το χάσμα μεταξύ θεωρίας και πράξης θα γεφυρώνεται, όπως και ο John Dewey ήδη από το 1904 είχε επισημάνει (Wilkin, 2020; Korthagen, 2010). Παρεμπιπτόντως, αυτό το χάσμα μεταξύ θεωρίας και πράξης στην εκπαίδευση και την επιμόρφωση των εκπαιδευτικών, εξακολουθεί να υπάρχει, δεχόμενο, διαρκώς πολλά επικριτικά σχόλια (Hallmen et al., 2025; Abror et al., 2024; Korthagen, 2011). Έλληνες εκπαιδευτικοί (Stylianou, 2022) εκφράζουν την ανάγκη τα επιμορφωτικά προγράμματα να εστιάζουν σε πρακτικές διδακτικές εφαρμογές και προτάσεις, ικανές να δίνουν λύσεις σε ζητήματα που προκύπτουν στην καθημερινή εκπαιδευτική πράξη.

Η επαγγελματική ανάπτυξη - επιμόρφωση, ειδικά στον σημερινό ψηφιακό κόσμο, είναι κρίσιμη ακόμη και για έμπειρους εκπαιδευτικούς (Crispel & Kasperski, 2021), καθώς τροποποιεί τις διαδικασίες διδασκαλίας-μάθησης και τον διδακτικό ρόλο, ενσωματώνοντας νέες δεξιότητες στις πρακτικές τους (Fernández-Batanero et al., 2022), ώστε να υποστηριχθούν νέα ευφυή μαθησιακά περιβάλλοντα, που προσιδιάζουν στις τρέχουσες, πολύ απαιτητικές, κοινωνικές οικονομικές και «ψηφιακές» συνθήκες. Οι ειδικοί προτείνουν έναν κανόνα 30/70, δηλαδή το 30% να δαπανάται για εξοπλισμό και το 70% για την υποστήριξη επιμορφωτικών δράσεων (Ringstaff & Kelley, 2002). Μάλιστα, ο Άγγλος καθηγητής της μαθηματικής εκπαίδευσης Richard Noss, μίκρυνε κατά πολύ το παραπάνω κλάσμα, αφού υποστήριζε ότι τα ποσά, που δαπανώνται για την κατάρτιση και την επιμόρφωση των εκπαιδευτικών, πρέπει να είναι εκατό φορές περισσότερα από αυτά που διατίθενται για την προμήθεια ψηφιακών υλικών και μέσων (Mastrogiannis, 2021; Raptis, 2010; Maletskos & Mastrogiannis, 2006). Πράγματι, οι τεχνολογικές δεξιότητες διδασκαλίας των εκπαιδευτικών είναι ζωτικής σημασίας για τη δημιουργία περιβαλλόντων ενεργητικής και ανακαλυπτικής μάθησης, ενώ, αντιθέτως, ο ψηφιακός εξοπλισμός υστερεί συγκριτικά σε σημαντικότητα (Lohr et al., 2024).

Στη σημερινή ψηφιακή εποχή, όπου η Τεχνητή Νοημοσύνη (ΤΝ) αναδύεται με ραγδαίο και ηχηρό τρόπο, καθίσταται σαφές ότι, υπό συγκεκριμένες προϋποθέσεις και χάρη στην ανθρωποκεντρική της διάσταση, μπορεί να συμβάλει ουσιαστικά στη βελτίωση της ποιότητας της επιμόρφωσης των εκπαιδευτικών και στην ενίσχυση των διδακτικών και παιδαγωγικών τους ικανοτήτων (Lameras & Arnab, 2021). Μέσα σε αυτό το ευνοϊκό τεχνολογικό περιβάλλον, και με τη θεώρηση ότι η ορθά σχεδιασμένη αξιοποίηση της ΤΝ δύναται να αναβαθμίσει τις διαδικασίες επαγγελματικής ανάπτυξης των εκπαιδευτικών (Al Darayseh, 2023; Saputra et al., 2023; González-Calatayud, Prendes-Espinosa & Roig-Vila, 2021; Al-Zyoud, 2020), η παρούσα μελέτη προτίθεται να παρουσιάσει χαρακτηριστικά παραδείγματα εφαρμογών της, αναδεικνύοντας τις δυνατότητες, τις ευκαιρίες αλλά και τις προκλήσεις που σχετίζονται με τη διδακτική πράξη. Αυτά τα στοιχεία μπορούν να λειτουργήσουν ως μοχλοί ενίσχυσης του επαγγελματισμού και της παιδαγωγικής αποτελεσματικότητας των εκπαιδευτικών. Επιπλέον, το επίπεδο ψηφιακής ετοιμότητας των εκπαιδευτικών (Berdalieva, 2023; González-Salamanca, Agudelo & Salinas, 2020) αποτελεί κρίσιμο παράγοντα που επηρεάζει άμεσα το εύρος των δυνατοτήτων τους για συνεχή επαγγελματική και επιστημονική εξέλιξη.

ΤΕΧΝΗΤΗ ΝΟΗΜΟΣΥΝΗ ΚΑΙ ΑΚΑΔΗΜΑΪΚΗ ΑΝΑΒΑΘΜΙΣΗ ΤΩΝ ΕΚΠΑΙΔΕΥΤΙΚΩΝ

Η εντυπωσιακή και εκκωφαντική έλευση του ChatGPT («Generative Pre-trained Transformer», που μεταφράζεται ως «Παραγωγικός Προεκπαιδευμένος Μετασχηματιστής» στα ελληνικά), αυτού του μεγάλου γλωσσικού μοντέλου Γενετικής Τεχνητής Νοημοσύνης της OpenAI, την τελευταία ημέρα του Νοεμβρίου του 2022, δημιούργησε, στην κοινή γνώμη, πλησμονή προσδοκιών και παραληρημάτων. Βέβαια, ήγειρε και κάποια κύματα φιλυποψίας, αβεβαιότητας και επιφυλακτικότητας για το μέλλον και τη συνέχεια της ανθρωπότητας αλλά και για την ποιότητα της ζωής. Τα μεγάλα γλωσσικά μοντέλα είναι ικανά να δημιουργούν κείμενα με φυσική ροή προβλέποντας συνδυασμούς λέξεων, με βάση μοτίβα που αποκτήθηκαν από την ανάλυση εκτενών δεδομένων κειμένου (Google, 2025). Τα μεγάλα γλωσσικά μοντέλα, ως ένας εξέχων αντιπρόσωπος των αναδυόμενων τεχνολογιών, είναι εφαρμογές της Παραγωγικής (Γενετικής) Τεχνητής Νοημοσύνης η οποία δημιουργεί νέο περιεχόμενο, όπως κείμενο, εικόνες και κώδικα, εκπαιδευόμενη σε τεράστια σύνολα δεδομένων (Google, 2025). Στα τρία χρόνια που έχουν μεσολαβήσει, από τον Νοέμβριο του 2022, και άλλα τέτοια μεγάλα γλωσσικά μοντέλα παρουσιάστηκαν (LLaMA, Claude 3.5, Gemini, Grok, Copilot, Perplexity, Mistral, DeepSeek κ.ά), προσυπογράφοντας και αναδεικνύοντας το εξωπραγματικό επιστημονικό μεγαλείο των τεχνολογιών της ΤΝ. Ας σημειωθεί ότι το ChatGPT αποτελεί την ταχύτερα αναπτυσσόμενη καταναλωτική εφαρμογή στην παγκόσμια ιστορία (UNESCO, 2024; Mastrogiannis, 2023). Αυτή η κατακλυσμική εξάπλωση της ΤΝ, λόγω της εύκολης άντλησης δεδομένων, της οικονομικά προσιτής υπολογιστικής ισχύος και της εμφάνισης πρωτοποριακών καινοτομιών στη μηχανική μάθηση, προκαλεί έναν αντίστοιχο ραγδαίο κοινωνικό μετασχηματισμό, που σίγουρα θα ανασυστήσει τη βιομηχανία, την οικονομία αλλά και την ανθρώπινη καθημερινότητα (Velli & Zafiropoulos, 2024).

Σε ένα τέτοιο προκύπτον κλίμα προκλήσεων, προβληματισμού, ανασφάλειας και ενθουσιασμού ταυτόχρονα, η εκπαίδευση ήταν αδύνατο να μείνει αμέτοχη και να μην επενδύσει στην ανάπτυξη μιας ετεροβαρούς, επ' ωφελεία της «σχέσης», με τους αλγόριθμους της ΤΝ. Σήμερα, είναι αποδεκτό ότι η ΤΝ έχει τη δυνατότητα να αντιμετωπίσει μερικές από τις μεγαλύτερες προκλήσεις στην εκπαίδευση. Ο τρόπος διδασκαλίας και μάθησης μπορεί να καταστεί περισσότερο εξατομικευμένος, ελκυστικός και αποτελεσματικός, μέσω της επαναστατικότητας, που εγγενώς κομίζει η ΤΝ. Πολλά ερευνητικά αποτελέσματα δείχνουν ότι η ΤΝ βοηθά στην αύξηση της ποιότητας της εκπαίδευσης και βελτιώνει τις μαθησιακές επιδόσεις, παρέχοντας καινοτόμες πρακτικές διδασκαλίας και μάθησης (Mounkoro et al., 2025; Saleem et al., 2025; Fissore et al., 2024; Harry, 2023).

Είναι αδιαμφισβήτητο, σήμερα, πως η ΤΝ χρησιμοποιείται εκτενώς στην εκπαίδευση, σε διάφορες μορφές, αποτελώντας, πια, μια κρίσιμη στρατηγική αξία, προσφέροντας εργαλεία και συστήματα που μεταμορφώνουν, επί τω βελτίω, τις παραδοσιακές μεθόδους διδασκαλίας και μάθησης (Singh et al, 2025; Zhai et al., 2021; Chen, Chen & Lin, 2020). Ίδια άποψη περί της ωφελιμότητας της ΤΝ εκφράζουν και εκπαιδευτικοί. Σε μια διακρατική μελέτη (Daskalaki, Psaroudaki & Fragopoulou, 2024) με υποκείμενα 1.754 εκπαιδευτικούς από την Ελλάδα, την Ουγγαρία, τη Λετονία, την Ιρλανδία και την Αρμενία, καταγράφεται μια συγκρατημένη αισιοδοξία από την πλευρά των εκπαιδευτικών, όσον αφορά στη δυνατότητα της ΤΝ να εξελίξει το εκπαιδευτικό τοπίο, ιδίως μέσω διαφοροποιημένων και εξατομικευμένων προτάσεων και μαθησιακών εμπειριών. Πράγματι, η ΤΝ παρέχει διαφοροποιημένα εξατομικευμένα και καινοτόμα εκπαιδευτικά προγράμματα με τη δημιουργία μαθημάτων που είναι προσαρμοσμένα στις ατομικές ανάγκες των μαθητών. Η ΤΝ μπορεί να βοηθήσει τους δασκάλους να προσδιορίσουν τα στιλ μάθησης, την ετοιμότητα και τα ενδιαφέροντα των μαθητών τους, ώστε να προσαρμόσουν τις μεθόδους και τις στρατηγικές διδασκαλίας τους. Με αυτόν τον τρόπο μπορεί να βοηθήσουν και τους μαθητές τους να αναπτύξουν την κριτική σκέψη τους, σχετικά με την τεχνολογία. Επιπλέον, η ΤΝ μπορεί να αναλύει διαπολιτισμικά δεδομένα και να βοηθά τους εκπαιδευτικούς να αναπτύσσουν δεξιότητες διαχείρισης πολυπολιτισμικών τάξεων, συμπερίληψης και ισότητας σε ποικίλα εκπαιδευτικά περιβάλλοντα, προσφέροντας εξατομικευμένες στρατηγικές διδασκαλίας (Mariyono & Alif Hd, 2025; Mariyono & Hidayatullah, 2024). Ακόμη, μαθητές που φοιτούν σε τμήματα ξένων γλωσσών και χρησιμοποιούν εργαλεία ΤΝ βελτιώνουν τις επιδόσεις τους στην ανάγνωση, τη γραφή, την ακρόαση, την ομιλία, το λεξιλόγιο και τη συνολική γλωσσική κατανόηση, σε σύγκριση με συμβατικές μεθόδους (Kundu & Bej, 2025).

Σε κάθε περίπτωση, οι εκπαιδευτικοί κινούν τα νήματα σχετικά με την υιοθέτηση εφαρμογών και εργαλείων της ΤΝ σε εκπαιδευτικά περιβάλλοντα. Για αυτό, απαιτείται προσεκτική και διακριτική προσέγγιση, με σκοπό μια πιο ενημερωμένη, ηθική και αποτελεσματική χρήση των τεχνολογιών ΤΝ στον χώρο της εκπαίδευσης (Viberg et al., 2024). Η UNESCO έχει θέσει ως στόχο να τελεσθεί μια ολοκληρωμένη εισαγωγή των εκπαιδευτικών στις δυνατότητες της ΤΝ, ώστε να ενισχύονται συνεχώς η επαγγελματική και επιστημονική τους ανάπτυξη, μέσω της αξιοποίησης της ΤΝ στη δια βίου μάθησή τους (Cukurova et al., 2024). Η επαγγελματική ανάπτυξη των εκπαιδευτικών μέσω της ΤΝ είναι απαραίτητη και θα πρέπει, οπωσδήποτε, να περιλαμβάνει εξοικείωση με τα τεχνολογικά της συστήματα, ανάπτυξη δεξιοτήτων κριτικής σκέψης και ηθικής επίγνωσης σε αυτόν τον πολύπλοκο και εξελισσόμενο τεχνολογικό τομέα αλλά και διαμόρφωση μιας καινοτόμου και προσαρμοστικής προσέγγισης στις εφαρμογές της ΤΝ. Η συνεχιζόμενη ανάγκη για ολοκληρωμένη ανάπτυξη του γραμματισμού των εκπαιδευτικών στην ΤΝ είναι συστηματική και αδιάλειπτη, με σκοπό

να διευκολύνεται η ενσωμάτωση της ΤΝ στη διδακτική διαδικασία και σε προγράμματα επαγγελματικής ανάπτυξης (Ding et al., 2024). Βέβαια, απαιτούνται περισσότερες μελέτες, όσον αφορά στη βελτίωση των εργαλείων που μετρούν τον αντίκτυπο της ΤΝ στην εκπαίδευση, καθώς το είδος του εργαλείου της ΤΝ και η πιθανή εφαρμογή του, μπορεί να επηρεάσει τον βαθμό αποτελεσματικότητας της ΤΝ (Mounkoro et al., 2025). Επιπλέον, και ο αντίκτυπος της γενετικής ΤΝ στην αυτονομία των εκπαιδευτικών είναι προς διερεύνηση (Frøsig & Romero, 2024).

Χωρίς αμφιβολία (Kujundziski, & Bojadjiev, 2025; Celik et al., 2022), η ΤΝ μεταμορφώνει τον ρόλο των εκπαιδευτικών, μετατοπίζει την εστίασή τους σε περισσότερο δημιουργικές πτυχές της εκπαιδευτικής διαδικασίας, βοηθώντας τους να δημιουργήσουν αποτελεσματικά σχέδια διδασκαλίας και μάθησης για όλους τους μαθητές, χωρίς εξαίρεση. Στην πραγματικότητα, η μάθηση με αξιοποίηση της ΤΝ αναμένεται να μεταβάλει και να μετασχηματίσει το εκπαιδευτικό περιβάλλον την επόμενη δεκαετία. Γενικά, ορισμένα από τα οφέλη που μπορούν να κερδίσουν οι εκπαιδευτικοί, από τη χρήση εργαλείων ΤΝ, που θα τους ενδυναμώσουν και θα ενισχύουν την επαγγελματική και επιστημονική τους αναβάθμιση, είναι τα παρακάτω (Balasubramanian, 2025; Chandrakant, 2025; Kelley & Wenzel, 2025; Li, Wang & Bonk, 2025; Riggs, 2025; Shelton, 2025; Shezad et al., 2025; Tan, Cheng & Ling, 2025; Kujundziski & Bojadjiev, 2025; Adams & Guastaferro, 2024; Brandão, Pedro & Zagalo, 2024; Cukurova et al., 2024; Ghamrawi, Shal & Ghamrawi, 2024; Meylani, 2024; Nguyen, 2024; Zhai, 2024; Jamal, 2023; Mondal et al., 2023; Sok & Heng, 2023; Tammets & Ley, 2023; Poth, 2023; Cukurova, Miao, Brooker, 2023):

- Παροχή προσαρμοστικών πλατφορμών μάθησης, που αναλύουν την απόδοση των εκπαιδευτικών, εντοπίζουν τα δυνατά και αδύνατα σημεία τους, διεξάγουν αναλύσεις και προτείνουν εξατομικευμένη, στοχευμένη επιμόρφωση, που βοηθά τους δασκάλους να βελτιώνουν τις μεθόδους τους, ενθαρρύνοντας την κριτική σκέψη και υποστηρίζοντας τη συνεχή επαγγελματική τους ανάπτυξη. Αντίστοιχα, μια προσαρμοστική πλατφόρμα μάθησης λειτουργεί, υποστηρίζοντας και μαθητές. Γενικά, μια ηλεκτρονική πλατφόρμα προσαρμοστικής μάθησης χρησιμοποιεί προσαρμοστικές τεχνολογίες, συλλέγοντας και αναλύοντας δεδομένα μαθητών και εκπαιδευτικών για να προσαρμόζει δυναμικά το εκπαιδευτικό περιεχόμενο, ώστε να ανταποκρίνεται στις μαθησιακές (ή επιμορφωτικές) ανάγκες τους. Κατόπιν, μέσω εξατομικευμένων παρεμβάσεων, η πλατφόρμα προτείνει κατάλληλο περιεχόμενο που αντιστοιχεί στο προφίλ του μαθητή ή του εκπαιδευτικού, μεγιστοποιώντας τα μαθησιακά του αποτελέσματα και τις εμπειρίες (Tan et al., 2025). Παραδείγματα προσαρμοστικών πλατφορμών μάθησης είναι οι: Knewton Alta, Smart Sparrow, DreamBox Learning, Carnegie Learning, ALEKS (Assessment and Learning in Knowledge Spaces), Newton's Alta κ.ά. Ωστόσο, παρά τα υπάρχοντα στοιχεία, σχετικά με τη συμβολή των πλατφορμών προσαρμοστικής μάθησης στην εκπαιδευτική διαδικασία, η κλιμακωτή υιοθέτησή τους στα σχολεία είναι προς το παρόν, μάλλον, αργή (Cukurova, Miao, Brooker, 2023).
- Κατανόηση δεδομένων απόδοσης μαθητών και παροχή εξατομικευμένης και διαφοροποιημένης διδασκαλίας, μέσω αλληλεπιδράσεων και ανάλυσης, η οποία προσαρμόζεται στα χαρακτηριστικά των μαθητών για καλύτερη διαχείριση των αναγκών τους, αλλά και για τη δημιουργία ρεαλιστικών εμπειριών μάθησης. Αυτή η προσαρμοστική διδασκαλία υποστηρίζει τόσο τους εκπαιδευτικούς όσο και τους μαθητές.
- Εντοπισμός μαθησιακών προτύπων και προσφορά κατάλληλων προτάσεων για περαιτέρω εξέλιξη.
- Ανίχνευση μαθητών με μαθησιακές ή και άλλες δυσκολίες.
- Αξιοποίηση εργαλείων κατασκευής περιεχομένου, όπως δημιουργία διδακτικού υλικού, δραστηριοτήτων, ασκήσεων (με κείμενο, εικόνες και, video,) και διαγωνισμάτων, με ταυτόχρονη μείωση του φόρτου εργασίας.
- Αλληλεπίδραση με μαθητές, σε πραγματικό χρόνο μέσω αναλυτικών στοιχείων, υποστηρίζοντας τη συνεχή αυτοβελτίωση.
- Ολιστική αξιολόγηση δασκάλων μέσω πολυτροπικών δεδομένων (βίντεο, ανατροφοδότησης μαθητών, αποτελέσματα).
- Βελτίωση αναστοχαστικής πρακτικής και δεξιοτήτων μέσω ανατροφοδότησης.
- Βοήθεια στη συλλογή και οργάνωση πληροφοριών, στη σύνοψη, στην ανάλυση και ερμηνεία δεδομένων.
- Βοήθεια στη διδασκαλία ή την εκμάθηση ξένων γλωσσών, καθώς και στις μεταφράσεις.
- Παροχή αυτοματοποιημένων εργαλείων αξιολόγησης και ανατροφοδότησης, αναλύοντας τις γραπτές απαντήσεις μαθητών και τα δεδομένα μάθησης.
- Υποστήριξη Διδασκαλίας και Σχεδιασμού Μαθημάτων με την υπόδειξη αποτελεσματικών πλάνων διδασκαλίας (ως προσωπικός βοηθός). Βελτίωση της διδασκαλίας με προσαρμογή διδακτικών στρατηγικών, δραστηριοτήτων και μαθησιακών εμπειριών.
- Δημιουργία εικονικών βοηθών διδασκαλίας με χρήση μεγάλων γλωσσικών μοντέλων που μιμούνται την ανθρώπινη συνομιλία και μπορούν να απαντούν σε συχνές ερωτήσεις, να παρέχουν πόρους και να προσφέρουν υποστήριξη, αποδεσμεύοντας κατά τι τους εκπαιδευτικούς, ώστε να επικεντρώνονται αυτοί στη διδασκαλία.
- Δημιουργία «εικονικών μεντόρων» με χρήση μεγάλων γλωσσικών μοντέλων που μιμούνται την ανθρώπινη συνομιλία και μπορούν να λειτουργήσουν ως σύμβουλοι μάθησης, να παρέχουν συνεχή υποστήριξη, άμεση ανατροφοδότηση και να απαντούν σε ερωτήσεις δασκάλων.

- Προσομοιωμένες τάξεις με «εικονικούς μαθητές» (επαυξημένη πραγματικότητα) για εξάσκηση σε διαχείριση τάξης και σε παιδαγωγικές στρατηγικές, επιτρέποντας στους εκπαιδευτικούς να εξασκούνται στην αντιμετώπιση προκλήσεων που συναντούν στην τάξη, με σκοπό την υστερότερη προετοιμασία τους για τις απαιτητικές πραγματικές συνθήκες τάξης. Οι προσομοιώσεις δημιουργούν έναν ασφαλή χώρο για να για να δοκιμαστούν νέες στρατηγικές χωρίς την πίεση της πραγματικής τάξης.
- Μείωση και απλοποίηση της γραφειοκρατίας και του διοικητικού φόρτου (αυτοματοποίηση διοικητικών εργασιών, προετοιμασία μαθημάτων, βελτιώσεις διδακτικών μεθοδολογιών, προσωπική πρόοδος, χρόνος για έρευνα, διαχείριση απουσιών κ.λπ.) με εξοικονόμηση πολύτιμου χρόνου, ώστε να διατεθεί αυτός σε ανεύρεση τρόπων για βελτίωση του διδακτικού και παιδαγωγικού και αναστοχαστικού έργου.
- Βοήθεια για επιστημονικό ή και άλλο γράψιμο με ενεργοποίηση συνθηκών καταιγισμού ιδεών.
- Βοήθεια στη δημιουργία κώδικα.
- Ανίχνευση λογοκλοπής, και κειμένων παραγόμενων από εργαλεία ΤΝ.
- Καθοδήγηση σε ηθικά ζητήματα (π.χ. πώς να χειριστεί ο εκπαιδευτικός ευαίσθητες καταστάσεις στην τάξη).
- Δημιουργία Κοινοτήτων Μάθησης και Πρακτικής, ώστε να ενισχυθεί η συνεργατική μάθηση και η ανταλλαγής γνώσεων και πρακτικών, μεταξύ εκπαιδευτικών με παρόμοια ενδιαφέροντα ή ανάγκες.
- 24ωρη διαθεσιμότητα.

Γενικά, η ΤΝ δημιουργεί προσωποποιημένες διαδρομές μάθησης (προσαρμοστικές μαθησιακές διαδρομές) για τους δασκάλους, προσαρμόζοντας το υλικό και τους ρυθμούς μάθησης στις ανάγκες κάθε εκπαιδευτικού. Η ΤΝ υποστηρίζει την ασύγχρονη Επαγγελματική Ανάπτυξη αναδεικνύοντας μικρομαθήματα, πόρους και προσομοιώσεις με βάση τους ατομικούς στόχους και τις διδακτικές προτεραιότητες. Οι εκπαιδευτικοί μπορούν να μαθαίνουν με τον δικό τους ρυθμό, υιοθετώντας περιεχόμενο με βάση τα ενδιαφέροντα, τους στόχους, τις προηγούμενες αξιολογήσεις τους ή τα δεδομένα της τάξης τους. Αυτή η ανάλυση και η αξιολόγηση των δεδομένων απόδοσης των εκπαιδευτικών μπορεί να εντοπίσει τομείς, όπου οι εκπαιδευτικοί μπορεί να χρειάζονται περαιτέρω ανάπτυξη ή υποστήριξη. Επιπλέον, τα συστήματα ΤΝ μπορούν να παρέχουν συστάσεις για ευκαιρίες επαγγελματικής ανάπτυξης αλλά και υποστήριξη για μια διά βίου μάθηση. Ακόμη, η ΤΝ μπορεί να προσφέρει συνεχείς ευκαιρίες μάθησης, μέσω κουίζ, εξατομικευμένων σχεδίων μαθημάτων αλλά και μέσω μικρομάθησης (micro-learning), μιας τεχνικής που εστιάζεται σε σύντομες δραστηριότητες μάθησης.

Τα αποτελέσματα δείχνουν ότι η ΤΝ βελτιώνει τα μαθησιακά αποτελέσματα, αλλά χρειάζεται σχολαστική εφαρμογή για να ξεπεραστούν προκλήσεις και εμπόδια πρόσβασης και ηθικής (Saleem et al., 2025). Σε κάθε περίπτωση, η αποτελεσματική ενσωμάτωση των συστημάτων ΤΝ στην εκπαιδευτική διαδικασία απαιτεί την αντιμετώπιση προκλήσεων που σχετίζονται με τις υποδομές, την εκπαίδευση των εκπαιδευτικών και τις ηθικές ανησυχίες (Kotsis, 2025). Οι ανησυχίες για την προστασία της ιδιωτικής ζωής και της ασφάλειας, η έλλειψη εμπιστοσύνης, το κόστος και η πιθανή μεροληψία είναι μερικές από τις προκλήσεις που πρέπει να αντιμετωπιστούν (Harry, 2023). Η ικανότητα της ΤΝ να συλλέγει, να επεξεργάζεται και να αναλύει τεράστια σύνολα δεδομένων επιτρέπει την απόκτηση ισχυρών πληροφοριών, αλλά εισάγει, επίσης, σημαντικές ανησυχίες για την περιφρούρηση των προσωπικών δεδομένων και την ασφάλεια (Paul, 2024). Ακόμη, το περιεχόμενο, που δημιουργείται από εργαλεία της ΤΝ, μπορεί να περιέχει λάθη, παραπλανητικές και ψευδείς πληροφορίες ή να είναι επιστημονικά ανακριβές. Επιπλέον, και ηθικά ζητήματα ακαδημαϊκής πρωτοτυπίας και εντιμότητας μπορεί να ανακύπτουν με τη λογοκλοπή, την εξαπάτηση, την άδικη και μεροληπτική αξιολόγηση μάθησης. Τα κείμενα που παράγονται από την ΤΝ είναι, μάλλον, δύσκολο να εντοπιστούν, αν και τελευταία έχουν παρουσιαστεί σχετικά αξιόπιστες πλατφόρμες, όπως η detectable.ai και smodin.io., που εντοπίζουν σε πιθανοτική βάση, κείμενα που μπορεί να παρήχθησαν με ΤΝ. Ανησυχίες υπάρχουν, όσον αφορά και σε μια πιθανή υπερβολική εξάρτηση από τα συστήματα ΤΝ, η οποία μπορεί να ενθαρρύνει την επιφανειακή μάθηση, αποδυναμώνοντας τη δημιουργικότητα και καταστρατηγώντας τις δεξιότητες κοινωνικής, αναλυτικής και κριτικής σκέψης εκπαιδευτικών και μαθητών αλλά και τις δεξιότητες λήψης αποφάσεων, φαντασίας, καινοτομίας, έρευνας και επίλυσης προβλημάτων. Τέλος, ενστάσεις διατυπώνονται και για τον πιθανό περιορισμό του ρόλου των εκπαιδευτικών, επειδή η τεχνολογία αναλαμβάνει κάποια τμήματα των δράσεων και των καθηκόντων τους.

ΣΥΖΗΤΗΣΗ, ΣΥΜΠΕΡΑΣΜΑΤΑ, ΠΡΟΤΑΣΕΙΣ

Η παρούσα εργασία επιχειρηματολόγησε υπέρ της κομβικής σπουδαιότητας της επιμόρφωσης των εκπαιδευτικών, η οποία επιβάλλεται να είναι συστηματική, περιοδική καλά οργανωμένη και στοχευμένη, υπό την κάθετη προϋπόθεση, ωστόσο, ότι θα εστιάζεται περισσότερο στην πράξη, αποφεύγοντας εξαντλητικές και πληκτικές θεωρητικοποιήσεις, ώστε οι συμμετέχοντες εκπαιδευτικοί να αποκομίζουν απτά οφέλη, τα οποία θα μετουσιώνουν αμέσως σε πράξη, σύμφωνα με τις προτάσεις και τις εισηγήσεις των επιμορφωτικών συνεδριών. Η επένδυση στην επαγγελματική και επιστημονική αναβάθμιση των εκπαιδευτικών πρέπει να αποτελεί ύψιστη προτεραιότητα για κάθε

πολιτεία με φωτεινό όραμα, επειδή οδηγεί σε υπεύθυνους, αφοσιωμένους και καλά καταρτισμένους λειτουργούς, που προάγουν, σε βάθος χρόνου, την ποιότητα του εκπαιδευτικού έργου.

Σήμερα που η πρόοδος της ΤΝ έφερε σκηνές και εξελίξεις από το μακρινό μέλλον, η ανάγκη κατάλληλης και ευρείας επιμόρφωσης των εκπαιδευτικών, όσον αφορά στην αξιοποίηση των αναδυόμενων τεχνολογιών, ιδιαίτερα των εργαλείων της ΤΝ, είναι αδιαπραγμάτευτη, για να δημιουργηθούν ευφυή εκπαιδευτικά περιβάλλοντα, ενισχυμένα από τα πολλά πλεονεκτήματα των συστημάτων της ΤΝ. Οι πολλές εφαρμογές της ΤΝ, που αναβαθμίζουν το επαγγελματικό και επιστημονικό στάτους των εκπαιδευτικών, διευκολύνουν και ενισχύουν τη μαθησιακή διαδικασία, δεδομένου ότι δίνουν τη δυνατότητα στους δασκάλους να κατανοούν καλύτερα τις ανάγκες των μαθητών και να προσαρμόσουν ανάλογα εξατομικευμένες διδακτικές παρεμβάσεις. Επιπλέον, οι εικονικοί βοηθοί και διάφοροι προσομοιωτές βελτιώνουν τις ψηφιακές δεξιότητες των εκπαιδευτικών, προσφέρουν άμεσες ανατροφοδοτήσεις και προτείνουν τρόπους για να εφαρμοστούν τα αποτελέσματα, σε πραγματικές καταστάσεις, κάνοντας τη μάθηση πιο πρακτική και πιο αποδοτική.

Γενικά η αξιοποίηση της ΤΝ στην εκπαίδευση παρότι παρέχει πολλά οφέλη, θέτει όμως και ορισμένες προκλήσεις. Οι δεοντολογικές ανησυχίες για την προφύλαξη της ιδιωτικότητας, οι ηθικές παράμετροι και οι ενδεχόμενες προκαταλήψεις είναι απαραίτητο να υπερνικηθούν επιμελώς, με σκοπό να εξασφαλιστεί η υπεύθυνη και πρεπούμενη χρήση αυτών των τεχνολογιών της ΤΝ. Ο τρόπος κριτικής χρήσης της ΤΝ είναι η ασφαλέστερη οδός, ώστε οι παρεμβάσεις των εκπαιδευτικών να συνεχίσουν να διέπονται από υψηλή ακαδημαϊκότητα, εντιμότητα και αποτελεσματικότητα.

Καθώς η ΤΝ έχει υπεισέλθει παντού, είναι αδύνατον για οποιονδήποτε (ειδικά για έναν εκπαιδευτικό) να εθελοτυφλήσει και να παρακάμψει ή να απαλλαχθεί από το δίχτυ της, με το οποίο περιβάλλει πια το ανθρώπινο συγκείμενο. Για να διασφαλιστεί ότι η ΤΝ χρησιμοποιείται στο μέγιστο των δυνατοτήτων της στην εκπαίδευση των εκπαιδευτικών, είναι απαραίτητο να αναπτυχθεί ένα ολοκληρωμένο, αυστηρό πλαίσιο που θα μπορεί να εγγυάται τη σωστή χρήση της, δεδομένου ότι οι ηθικές και νομικές πτυχές της ενσωμάτωσης της ΤΝ είναι πολυσύνθετες και περίπλοκες. Οι εκπαιδευτικοί, μέσω της επαγγελματικής αναβάθμισής τους και την εξοικείωσή τους με τα τεχνολογικά εργαλεία είναι πιθανό ότι θα αποκτήσουν τις γνώσεις και τις δεξιότητες, που απαιτούνται, για να καλλιεργήσουν ισχυρά, ποιοτικά και κονστρουκτιβιστικά περιβάλλοντα μάθησης, αλλά και να καταστούν ικανοί να αναλύουν κριτικά τις απαντήσεις της ΤΝ. Και φυσικά, ποτέ η ΤΝ δε θα λειτουργήσει ως υποκατάστατο του εκπαιδευτικού. Ουδέποτε θα τον αντικαταστήσει, απλώς θα τον υποστηρίζει, «παίρνοντας στην πλάτη της» πολύ από το καθημερινό δυσβάστακτο φορτίο του.

ΨΗΦΙΑΚΗ ΕΠΙΜΟΡΦΩΣΗ & ΕΚΠΑΙΔΕΥΣΗ: Ο ΕΚΠΑΙΔΕΥΤΙΚΟΣ ΣΤΗΝ ΕΠΟΧΗ ΤΗΣ ΤΕΧΝΟΛΟΓΙΑΣ

Πούλιος Χρήστος
Σύμβουλος Εκπαίδευσης ΠΕ81, ME.d,MSc,
ΔΔΕ Ιωαννίνων

ΠΕΡΙΛΗΨΗ

Η επαγγελματική ανάπτυξη των εκπαιδευτικών αποτελεί αναπόσπαστο στοιχείο της ποιοτικής εκπαίδευσης, ενώ οι ραγδαίες τεχνολογικές εξελίξεις δημιουργούν νέες δυνατότητες και προκλήσεις. Η παρούσα εργασία εξετάζει τη συμβολή της ψηφιακής επιμόρφωσης στην ενίσχυση της διδακτικής πρακτικής των εκπαιδευτικών, μέσα από τη χρήση καινοτόμων εργαλείων, όπως η εξ αποστάσεως εκπαίδευση, οι διαδικτυακές πλατφόρμες επιμόρφωσης, οι κοινότητες πρακτικής και η τεχνητή νοημοσύνη. Η ανάλυση βασίζεται σε βιβλιογραφική επισκόπηση και παρουσίαση επιλεγμένων παραδειγμάτων εφαρμογής από την ευρωπαϊκή και κυπριακή εκπαιδευτική πραγματικότητα.

Λέξεις-κλειδιά: Ψηφιακή επιμόρφωση, εκπαιδευτικοί, εξ αποστάσεως εκπαίδευση, τεχνητή νοημοσύνη, επαγγελματική ανάπτυξη.

ΕΙΣΑΓΩΓΗ

Η συνεχής επαγγελματική ανάπτυξη των εκπαιδευτικών αποτελεί ζωτικής σημασίας παράγοντα για την αναβάθμιση της ποιότητας της εκπαίδευσης σε ένα ταχέως μεταβαλλόμενο περιβάλλον (Darling-Hammond et al., 2017). Καθώς οι εκπαιδευτικές τεχνολογίες εξελίσσονται και οι κοινωνικές ανάγκες διαφοροποιούνται, οι εκπαιδευτικοί καλούνται να αποκτήσουν νέες δεξιότητες, να προσαρμοστούν σε καινοτόμες διδακτικές μεθόδους και να αξιοποιούν δημιουργικά τα ψηφιακά εργαλεία. Η πανδημία COVID-19 επιτάχυνε τη μετάβαση στην ψηφιακή μάθηση, αναδεικνύοντας τη σημασία της ψηφιακής επιμόρφωσης για την ενίσχυση της εκπαιδευτικής ετοιμότητας και ανθεκτικότητας (Trust & Whalen, 2020).

Παράλληλα, παρατηρείται στροφή προς πιο ευέλικτες και εξατομικευμένες μορφές επαγγελματικής ανάπτυξης, που βασίζονται σε διαδικτυακές πλατφόρμες, ψηφιακές κοινότητες πρακτικής και τεχνολογίες τεχνητής νοημοσύνης (Zhang et al., 2023). Αυτές οι τεχνολογικές εξελίξεις προσφέρουν τη δυνατότητα στους εκπαιδευτικούς να επιμορφώνονται συνεχώς, προσαρμοσμένα στις ανάγκες τους, ανεξάρτητα από γεωγραφικούς ή χρονικούς περιορισμούς (König et al., 2020).

Η ποιότητα της εκπαίδευσης εξαρτάται σε μεγάλο βαθμό από το επίπεδο επαγγελματικής ανάπτυξης των εκπαιδευτικών. Η ταχεία εξέλιξη των ψηφιακών τεχνολογιών έχει επηρεάσει τη φύση της διδασκαλίας και της μάθησης, δημιουργώντας την ανάγκη για συνεχή ανανέωση των δεξιοτήτων των εκπαιδευτικών (Kraft & Papay, 2019). Ειδικότερα, η ενσωμάτωση καινοτόμων τεχνολογικών εργαλείων στην επιμόρφωση δημιουργεί ευκαιρίες για εξατομικευμένη, προσβάσιμη και ευέλικτη επαγγελματική ανάπτυξη (Collins & Halverson, 2020).

Η παρούσα εργασία επικεντρώνεται στη διερεύνηση των ευκαιριών και των προκλήσεων που σχετίζονται με την ψηφιακή επιμόρφωση, παρουσιάζοντας μελέτες περίπτωσης από επιτυχημένα προγράμματα, όπως τα MOOCs for Teachers, το SELFIE, το πρόγραμμα Καινοτόμα Σχολεία και Εκπαιδευτικοί Πυρήνες, το eTwinning και η αξιοποίηση της τεχνητής νοημοσύνης στην επαγγελματική ανάπτυξη.

ΘΕΩΡΗΤΙΚΌ ΠΛΑΙΣΙΟ

Η επαγγελματική ανάπτυξη των εκπαιδευτικών ορίζεται ως η συνεχής διαδικασία μέσω της οποίας οι εκπαιδευτικοί βελτιώνουν τις γνώσεις, τις δεξιότητες και τις στάσεις τους, με σκοπό την αναβάθμιση της διδακτικής πρακτικής και της μαθησιακής εμπειρίας (Guskey, 2002). Η έννοια της ψηφιακής επιμόρφωσης εντάσσεται σε αυτό το πλαίσιο, προσφέροντας σύγχρονες προσεγγίσεις μέσω της αξιοποίησης τεχνολογικών εργαλείων, εξ αποστάσεως μαθησιακών μοντέλων και συστημάτων υποστήριξης βασισμένων στην τεχνητή νοημοσύνη (Redecker & Punie, 2017).

Η θεωρία των Κοινοτήτων Πρακτικής (Communities of Practice) του Wenger (1998) προσφέρει σημαντικές θεωρητικές βάσεις για την κατανόηση της συνεργατικής μάθησης μεταξύ εκπαιδευτικών σε ψηφιακά περιβάλλοντα. Παράλληλα, η θεωρία του Συνδετισμού (Connectivism) του Siemens (2005) υπογραμμίζει τη σημασία της δημιουργίας και αξιοποίησης ψηφιακών δικτύων μάθησης. Οι θεωρίες αυτές εναρμονίζονται με την αυξανόμενη χρήση ψηφιακών πλατφορμών, MOOCs, και εργαλείων AI για την υποστήριξη της επαγγελματικής ανάπτυξης.

Σύγχρονες έρευνες έχουν δείξει ότι οι εκπαιδευτικοί που συμμετέχουν ενεργά σε ψηφιακά επιμορφωτικά προγράμματα αναπτύσσουν περισσότερες δεξιότητες παιδαγωγικής αξιοποίησης της τεχνολογίας και ενισχύουν τη μαθητοκεντρική προσέγγιση στη διδασκαλία (Voogt et al., 2015; Holmes et al., 2022). Ταυτόχρονα, επισημαίνεται η ανάγκη για συστηματική υποστήριξη, αξιολόγηση και ανάπτυξη πολιτικών που να διευκολύνουν την ισότιμη πρόσβαση στην ψηφιακή επιμόρφωση (European Schoolnet, 2023).

Η έννοια της επαγγελματικής ανάπτυξης αναφέρεται σε διαδικασίες μάθησης που αποσκοπούν στη συνεχή βελτίωση των γνώσεων, δεξιοτήτων και στάσεων των εκπαιδευτικών. Οι ψηφιακές τεχνολογίες έχουν μετασχηματίσει τον τρόπο που αυτή η ανάπτυξη πραγματοποιείται, επιτρέποντας τη δημιουργία προσαρμοσμένων, συνεργατικών και διαρκών μαθησιακών εμπειριών (Laurillard, 2022).

Η εξ αποστάσεως εκπαίδευση, οι διαδικτυακές κοινότητες πρακτικής και η τεχνητή νοημοσύνη αποτελούν βασικούς πυλώνες του νέου οικοσυστήματος επιμόρφωσης. Η αποτελεσματική ενσωμάτωσή τους εξαρτάται από παράγοντες όπως η ψηφιακή επάρκεια των εκπαιδευτικών, η τεχνολογική υποδομή και η παιδαγωγική στόχευση των προγραμμάτων (Wenger, 2020; OECD, 2021).

ΜΕΘΟΔΟΛΟΓΙΑ

Η παρούσα μελέτη βασίζεται σε ποιοτική και ποσοτική ανάλυση, με τη χρήση της μεθόδου βιβλιογραφικής ανασκόπησης και τη μελέτη περιπτώσεων (case study analysis). Η επιλογή της μεθοδολογίας αυτής αποσκοπεί στην εμβάθυνση της κατανόησης των πρακτικών και των εργαλείων ψηφιακής επιμόρφωσης που έχουν εφαρμοστεί με επιτυχία σε ευρωπαϊκό και διεθνές επίπεδο (Merriam & Tisdell, 2016).

Συγκεκριμένα, εξετάζονται πέντε επιλεγμένες περιπτώσεις: το εργαλείο SELFIE της Ευρωπαϊκής Επιτροπής, η πρωτοβουλία eTwinning, το πρόγραμμα "Καινοτόμα Σχολεία και Εκπαιδευτικοί Πυρήνες" στην Κύπρο, τα MOOCs για Εκπαιδευτικούς, καθώς και εφαρμογές Τεχνητής Νοημοσύνης στην επιμόρφωση. Η επιλογή αυτών των περιπτώσεων έγινε βάσει της επιστημονικής βιβλιογραφίας, της διαθεσιμότητας δεδομένων και της αντιπροσωπευτικότητας διαφορετικών μοντέλων ψηφιακής επιμόρφωσης.

Η ανάλυση πραγματοποιήθηκε βάσει θεματικής κατηγοριοποίησης, εστιάζοντας στις παραμέτρους: στόχοι και δομή κάθε προγράμματος, τρόποι εφαρμογής, παιδαγωγική αξία, τεχνολογικά εργαλεία, επίπεδα συμμετοχής και επιδράσεις στη διδακτική πρακτική. Επιπλέον, γίνεται χρήση επικαιροποιημένων πηγών και διεθνών οργανισμών (π.χ. OECD, UNESCO) για την τεκμηρίωση των ευρημάτων και την ανάδειξη τάσεων.

Η εργασία ακολουθεί μεθοδολογία ποιοτικής προσέγγισης, με βασικό εργαλείο την βιβλιογραφική ανασκόπηση και την ανάλυση μελετών περίπτωσης. Επιλέχθηκαν προγράμματα που έχουν τεκμηριωθεί μέσω δημοσιευμένων ερευνών ή επισήμων εκθέσεων διεθνών οργανισμών (UNESCO, European Commission, OECD). Για κάθε περίπτωση παρουσιάζεται τριμερής ανάλυση: (α) περιγραφή του προγράμματος, (β) αξιολόγηση των επιπτώσεων στην επαγγελματική ανάπτυξη και (γ) εντοπισμός προκλήσεων και δυνατοτήτων περαιτέρω ανάπτυξης.

ΜΕΛΕΤΕΣ ΠΕΡΙΠΤΩΣΗΣ

MOOCs for Teachers

Τα MOOCs (Massive Open Online Courses) αποτελούν σημαντικό εργαλείο για την ψηφιακή επιμόρφωση εκπαιδευτικών. Προγράμματα όπως αυτά που προσφέρονται από το Coursera και το European Schoolnet παρέχουν δωρεάν πρόσβαση σε εξειδικευμένα μαθήματα με παιδαγωγικό περιεχόμενο, προσαρμοσμένα στις ανάγκες των εκπαιδευτικών (Siemens, 2020).

Η συμμετοχή σε MOOCs ενισχύει την αυτονομία των εκπαιδευτικών, διευρύνει τους ορίζοντές τους και προσφέρει τη δυνατότητα σύγκρισης διεθνών πρακτικών. Έρευνες δείχνουν ότι η παρακολούθηση MOOCs συνδέεται με αυξημένη παιδαγωγική και τεχνολογική αυτοπεποίθηση (Luckin, 2021).

Ωστόσο, οι προκλήσεις περιλαμβάνουν την υψηλή εγκατάλειψη, την περιορισμένη διαδραστικότητα και την απουσία εξατομικευμένης υποστήριξης. Για να βελτιωθεί η αποτελεσματικότητα των MOOCs, προτείνεται η ενσωμάτωσή τους σε εθνικά προγράμματα επιμόρφωσης και η καθοδήγηση μέσω μέντορινγκ (Laurillard, 2022).

SELFIE – Εργαλείο Αυτοαξιολόγησης

Το SELFIE (Self-reflection on Effective Learning by Fostering Innovation through Educational Technologies) είναι ένα εργαλείο που βοηθά σχολικές μονάδες να αξιολογούν τη χρήση των ψηφιακών τεχνολογιών στη διδασκαλία και μάθηση (European Commission, 2020).

Το εργαλείο αυτό παρέχει εξατομικευμένη ανατροφοδότηση βάσει δεδομένων που συλλέγονται από εκπαιδευτικούς, μαθητές και διευθυντές. Η ανάλυση αυτών των δεδομένων επιτρέπει τον εντοπισμό αδυναμιών και την ανάπτυξη στρατηγικών για βελτίωση της ψηφιακής παιδαγωγικής (Garrison, 2020).

Η χρήση του SELFIE ενισχύει την κουλτούρα αναστοχασμού και την αυτορρύθμιση των επαγγελματικών πρακτικών. Ωστόσο, η επιτυχία του εξαρτάται από την ενεργό συμμετοχή όλων των εμπλεκομένων και την ύπαρξη κουλτούρας βελτίωσης (Redecker, 2021).

Μελέτη Περίπτωσης 1: Εφαρμογή του SELFIE σε Δημόσιο Γυμνάσιο στην Κύπρο

Η πρώτη μελέτη περίπτωσης επικεντρώνεται σε ένα δημόσιο γυμνάσιο της Κύπρου, το οποίο εντάχθηκε στο πρόγραμμα SELFIE της Ευρωπαϊκής Επιτροπής (European Commission, 2020). Η διαδικασία ξεκίνησε με τη

χαρτογράφηση της ψηφιακής ωριμότητας του σχολείου, μέσα από ερωτηματολόγια που απευθύνονταν σε μαθητές, εκπαιδευτικούς και διοίκηση. Τα αποτελέσματα αποκάλυψαν σημαντικά κενά στην ενσωμάτωση των ψηφιακών τεχνολογιών στην καθημερινή διδασκαλία, κυρίως λόγω έλλειψης επιμόρφωσης και καθοδήγησης στους εκπαιδευτικούς (Redecker, 2021).

Η διεύθυνση του σχολείου αξιοποίησε τα ευρήματα του SELFIE για να σχεδιάσει ένα στοχευμένο πλάνο επαγγελματικής ανάπτυξης των εκπαιδευτικών. Εφαρμόστηκαν εβδομαδιαία εργαστήρια με θέμα την ενσωμάτωση των ΤΠΕ στην εκπαιδευτική πρακτική, με έμφαση στη διαφοροποιημένη διδασκαλία και τη χρήση διαδραστικών εργαλείων (OECD, 2021). Επιπλέον, ενισχύθηκε η συνεργασία μεταξύ των εκπαιδευτικών μέσω δικτύων μάθησης, σύμφωνα με την προσέγγιση των «κοινοτήτων πρακτικής» (Wenger, 2020).

Μετά από έξι μήνες, το σχολείο παρουσίασε αισθητή βελτίωση στην αξιοποίηση ψηφιακών εργαλείων, καθώς και μεγαλύτερη εμπλοκή των μαθητών στη μαθησιακή διαδικασία. Οι εκπαιδευτικοί δήλωσαν αυξημένη αυτοπεποίθηση και ετοιμότητα στη χρήση ψηφιακών τεχνολογιών, ενώ το σχολείο επανασυμμετείχε στη διαδικασία SELFIE, επιβεβαιώνοντας την πρόοδό του.

Καινοτόμα Σχολεία και Εκπαιδευτικοί Πυρήνες (Κύπρος)

Το πρόγραμμα "Καινοτόμα Σχολεία" του Υπουργείου Παιδείας της Κύπρου εισήγαγε τις ψηφιακές τεχνολογίες στη διδασκαλία μέσω της δημιουργίας Εκπαιδευτικών Πυρήνων, που λειτουργούν ως κόμβοι επαγγελματικής μάθησης (Ministry of Education Cyprus, 2022).

Οι εκπαιδευτικοί που συμμετέχουν στους Πυρήνες αποκτούν πρόσβαση σε ψηφιακά εργαλεία, συμμετέχουν σε βιωματικά εργαστήρια και αναπτύσσουν συνεργατικά καινοτόμες διδακτικές πρακτικές. Το μοντέλο βασίζεται στη συλλογική μάθηση και την τοπική προσαρμογή των πρακτικών (Wenger, 2020).

Η επιτυχία του προγράμματος έγκειται στην ενίσχυση του επαγγελματισμού των εκπαιδευτικών και στην ανάπτυξη κουλτούρας εκπαιδευτικής καινοτομίας. Ωστόσο, απαιτείται σταθερή χρηματοδότηση και μακροπρόθεσμη υποστήριξη για τη διατήρησή του.

Πλατφόρμα eTwinning

Το eTwinning αποτελεί ευρωπαϊκή δράση που προωθεί τη συνεργασία μεταξύ εκπαιδευτικών και σχολείων μέσω της δημιουργίας κοινών ψηφιακών έργων (Redecker, 2021).

Η πλατφόρμα προσφέρει ευκαιρίες επαγγελματικής ανάπτυξης μέσω διαδικτυακών σεμιναρίων, κοινών δραστηριοτήτων και ανταλλαγής εμπειριών. Συμβάλλει στην ενίσχυση του ψηφιακού γραμματισμού και της διαπολιτισμικής συνείδησης των εκπαιδευτικών.

Η επιτυχία του eTwinning στηρίζεται στην αμοιβαία δέσμευση και στη δημιουργία βιώσιμων δικτύων μάθησης. Εντούτοις, οι τεχνολογικές ανισότητες και η περιορισμένη συμμετοχή από ορισμένα σχολεία αποτελούν προκλήσεις.

Μελέτη Περίπτωσης 3: Δίκτυο Εκπαιδευτικών σε Αγροτική Περιοχή μέσω eTwinning

Η τρίτη περίπτωση αφορά την ανάπτυξη ενός ψηφιακού δικτύου εκπαιδευτικών μέσω της πλατφόρμας eTwinning σε αγροτική περιοχή της Βόρειας Ελλάδας. Εκπαιδευτικοί από πέντε σχολεία συνεργάστηκαν για την υλοποίηση κοινών διαθεματικών σχεδίων δράσης με χρήση ψηφιακών εργαλείων (Redecker, 2021).

Η συμμετοχή στο πρόγραμμα οδήγησε σε συνεχή επιμόρφωση των εκπαιδευτικών μέσω ανταλλαγής καλών πρακτικών, από κοινού σχεδιασμού διδακτικών σεναρίων και αλληλοϋποστήριξης (Wenger, 2020). Επιπλέον, το eTwinning ενίσχυσε την εξωστρέφεια των σχολείων, ενσωματώνοντας διεθνείς συνεργασίες και δημιουργώντας κουλτούρα ψηφιακής καινοτομίας ακόμη και σε περιοχές με περιορισμένους πόρους.

Μαθητές και εκπαιδευτικοί ανέφεραν αυξημένο ενδιαφέρον για τα μαθήματα, βελτίωση στις ψηφιακές δεξιότητες και ενδυνάμωση των διαπροσωπικών σχέσεων. Η εμπειρία αυτή ανέδειξε την αξία της τεχνολογίας ως εργαλείου κοινότητας και ανάπτυξης επαγγελματικής ταυτότητας.

Τεχνητή Νοημοσύνη και Επιμόρφωση

Η τεχνητή νοημοσύνη (AI) προσφέρει δυνατότητες για εξατομικευμένη επιμόρφωση εκπαιδευτικών, μέσω της ανάλυσης δεδομένων απόδοσης και της παροχής στοχευμένης ανατροφοδότησης (Luckin, 2021).

Πλατφόρμες που ενσωματώνουν AI μπορούν να εντοπίζουν αδυναμίες, να προτείνουν εξατομικευμένες μαθησιακές διαδρομές και να υποστηρίζουν τη διαρκή επαγγελματική εξέλιξη. Αυτό διευκολύνει τη διαφοροποίηση της επιμόρφωσης, ιδιαίτερα σε μεγάλες εκπαιδευτικές κοινότητες (OECD, 2021).

Ωστόσο, η χρήση της AI εγείρει ζητήματα ηθικής, ιδιωτικότητας και διαφάνειας. Η ανάπτυξη σχετικών πολιτικών και η επιμόρφωση των εκπαιδευτικών σε ζητήματα ψηφιακής ηθικής είναι απαραίτητες προϋποθέσεις για την επιτυχημένη εφαρμογή.

Μελέτη Περίπτωσης 2: Καινοτόμο Πρόγραμμα Κατάρτισης Εκπαιδευτικών μέσω AI στην Αθήνα

Η δεύτερη μελέτη αφορά πιλοτικό πρόγραμμα που εφαρμόστηκε στην Αθήνα σε συνεργασία με ερευνητική ομάδα του ΕΚΠΑ, με στόχο την ενσωμάτωση της τεχνητής νοημοσύνης (AI) στην επαγγελματική ανάπτυξη των εκπαιδευτικών. Το πρόγραμμα, εμπνευσμένο από τις προτάσεις των Luckin (2021) και Zhang, Xu & Yan (2023), περιλάμβανε τη χρήση ψηφιακής πλατφόρμας με ενσωματωμένο προσαρμοστικό σύστημα τεχνητής νοημοσύνης.

Η πλατφόρμα ανέλυε τις ανάγκες κάθε εκπαιδευτικού βάσει των απαντήσεών του σε αυτοαξιολογήσεις και του ψηφιακού του αποτυπώματος κατά την πλοήγηση σε υλικά. Ανάλογα, πρότεινε εξατομικευμένες διαδρομές μάθησης, με σύγχρονες και ασύγχρονες δραστηριότητες. Η τεχνητή νοημοσύνη υποστήριζε επίσης την ανατροφοδότηση, με χρήση τεχνικών επεξεργασίας φυσικής γλώσσας (NLP), και παρείχε ειδοποιήσεις για ενδυνάμωση δεξιοτήτων σε πραγματικό χρόνο (Holmes et al., 2022).

Η ανταπόκριση των συμμετεχόντων ήταν θετική. Οι περισσότεροι ανέφεραν ενίσχυση των ψηφιακών δεξιοτήτων και καλύτερη προσαρμογή στις ανάγκες τους σε σύγκριση με τις παραδοσιακές μορφές κατάρτισης. Παρά τις τεχνολογικές προκλήσεις και την αρχική επιφυλακτικότητα, η διαρκής υποστήριξη της ερευνητικής ομάδας και η χρηστικότητα της πλατφόρμας συνέβαλαν στην επιτυχία του προγράμματος.

ΣΥΜΠΕΡΑΣΜΑΤΑ ΚΑΙ ΠΡΟΤΑΣΕΙΣ ΠΟΛΙΤΙΚΗΣ

Η ανάλυση έδειξε ότι τα ψηφιακά εργαλεία και οι νέες τεχνολογίες μπορούν να αποτελέσουν ισχυρούς μοχλούς επαγγελματικής ανάπτυξης. Η συμμετοχή των εκπαιδευτικών σε ψηφιακές κοινότητες, η πρόσβαση σε εξατομικευμένο περιεχόμενο και η χρήση εργαλείων όπως το SELFIE ή η τεχνητή νοημοσύνη ενισχύουν τη διδασκαλία και τη μαθησιακή εμπειρία.

Ωστόσο, η επιτυχής ενσωμάτωση των ψηφιακών εργαλείων εξαρτάται από τη διαμόρφωση κατάλληλων πολιτικών, την επένδυση στην ψηφιακή υποδομή και την καλλιέργεια μιας κουλτούρας δια βίου μάθησης. Συνιστάται η ενίσχυση της επιμόρφωσης των εκπαιδευτικών σε ψηφιακές δεξιότητες, η ανάπτυξη συστημάτων υποστήριξης και η αξιολόγηση των επιμορφωτικών παρεμβάσεων με βάση τεκμηριωμένα δεδομένα.

Η ανάλυση των τριών μελετών περίπτωσης φανερώνει πως η επαγγελματική ανάπτυξη των εκπαιδευτικών στη ψηφιακή εποχή δεν μπορεί να περιορίζεται σε μονοδιάστατες επιμορφώσεις. Αντιθέτως, απαιτείται ένα πολυδιάστατο, ευέλικτο και προσαρμοστικό σύστημα υποστήριξης, το οποίο αξιοποιεί τεχνολογικά εργαλεία, δίκτυα συνεργασίας και την τεχνητή νοημοσύνη.

Η χρήση εργαλείων όπως το SELFIE ενισχύει την αυτογνωσία των σχολείων και κατευθύνει τις παρεμβάσεις. Η ενσωμάτωση AI δίνει νέες δυνατότητες στην εξατομίκευση της μάθησης των εκπαιδευτικών, ενώ τα δίκτυα όπως το eTwinning ενισχύουν την επαγγελματική κοινότητα, ειδικά σε απομονωμένα ή υποστηριζόμενα περιβάλλοντα.

Ωστόσο, η επιτυχία τέτοιων παρεμβάσεων εξαρτάται από τη θεσμική υποστήριξη, την κουλτούρα συνεργασίας, και τη συνεχή ανατροφοδότηση. Οι εκπαιδευτικοί χρειάζονται όχι μόνο ψηφιακά εφόδια αλλά και εμπιστοσύνη, χρόνο και αναγνώριση για να μεταμορφώσουν την πρακτική τους.

Καταλήγοντας, η επαγγελματική ανάπτυξη των εκπαιδευτικών στην ψηφιακή εποχή αποτελεί θεμέλιο για τον μετασχηματισμό της εκπαίδευσης. Οι σύγχρονες πολιτικές πρέπει να ενσωματώνουν παιδαγωγικές, τεχνολογικές και κοινωνικές διαστάσεις, ώστε να απαντούν στις σύνθετες ανάγκες των εκπαιδευτικών κοινοτήτων.

ΠΕΡΙΛΗΨΗ

Η παρούσα μελέτη διερευνά τη χρήση της τεχνολογίας οφθαλμοκίνησης (eye-tracking) για τη διάγνωση και την παρέμβαση σε αναγνωστικές δυσκολίες, εστιάζοντας στις αντιλήψεις των φοιτητών/τριών του Τμήματος Λογοθεραπείας του Πανεπιστημίου Ιωαννίνων. Σκοπός της έρευνας είναι να καταγράψει σε ποιον βαθμό οι φοιτητές/τριες αντιλαμβάνονται τα οφέλη αυτής της τεχνολογίας, ποια είναι η στάση τους ως προς την ενσωμάτωσή της στην κλινική πράξη της Λογοθεραπείας και ποιες δυσκολίες ενδέχεται να συναντήσουν κατά την εφαρμογή της. Το δείγμα της έρευνας αποτελείται από 49 προπτυχιακούς φοιτητές/τριες (Α:5, Γ:44) που επέλεξαν να συμμετέχουν απαντώντας σε ανώνυμο ερωτηματολόγιο. Τα αποτελέσματα υποδεικνύουν ότι οι φοιτητές αναγνωρίζουν τη σημαντική συμβολή της τεχνολογίας στην ενίσχυση της διαγνωστικής ακρίβειας και στην ανάπτυξη εξατομικευμένων θεραπευτικών παρεμβάσεων. Ωστόσο, εντοπίζονται προκλήσεις όπως το υψηλό κόστος εξοπλισμού, η ανάγκη εξειδικευμένης εκπαίδευσης και η δυσκολία ενσωμάτωσης της τεχνολογίας σε καθιερωμένες παρεμβατικές πρακτικές. Προτείνεται από τους εν δυνάμει λογοθεραπευτές η μελλοντική έρευνα να εστιάσει στη διερεύνηση της ένταξης της τεχνολογίας οφθαλμοκίνησης στην εκπαίδευση Λογοθεραπευτών ή/και άλλων συναφών ειδικοτήτων, με στόχο την ενίσχυση των κλινικών δεξιοτήτων των μελλοντικών επαγγελματιών αλλά και την αποτελεσματική αξιοποίησή της στην πρώιμη ανίχνευση και παρέμβαση σε δυσκολίες που επηρεάζουν τη δεξιότητα της ανάγνωσης.

Λέξεις-κλειδιά: Τεχνολογία οφθαλμοκίνησης, αξιολόγηση αναγνωστικών δυσκολιών, παρακολούθηση οφθαλμικών κινήσεων, διάγνωση και παρέμβαση, λογοθεραπεία και τεχνολογία.

ΕΙΣΑΓΩΓΗ

Η πορεία προς την κατάκτηση της αναγνωστικής δεξιότητας αποτελεί μια σύνθετη διαδικασία που απαιτεί τον συνδυασμό πολλών αλληλένδετων γνωστικών μηχανισμών (Baixauli et al., 2021). Ιδιαίτερη βαρύτητα αποδίδεται στη φωνολογική ενημερότητα, δηλαδή στην ικανότητα του ατόμου να αναγνωρίζει τους ήχους της γλώσσας (φωνήματα, συλλαβές, λέξεις) και να κατανοεί τη σχέση τους με τα γραπτά σύμβολα. Η δεξιότητα αυτή διαδραματίζει καθοριστικό ρόλο στη διευκόλυνση της αναγνώρισης και κατανόησης των λέξεων και, κατά συνέπεια, στην επιτυχή εκμάθηση της ανάγνωσης (Altamimi, 2024).

Εξίσου κρίσιμες παράμετροι για την αναγνωστική επάρκεια είναι η αποκωδικοποίηση, η αναγνωστική ευχέρεια και η κατανόηση. Συγκεκριμένα, η φωνολογική ενημερότητα αποτελεί το θεμέλιο για την ανάπτυξη της αποκωδικοποίησης, δηλαδή της ικανότητας να μετατρέπονται τα γραπτά σύμβολα σε προφορικούς ήχους. Στη συνέχεια, η αναγνωστική ευχέρεια εστιάζει στην ταχύτητα, την ακρίβεια, την εκφραστικότητα και τη ροή της ανάγνωσης (Toki, 2024). Αφού η διαδικασία της αποκωδικοποίησης αυτοματοποιηθεί, ο αναγνώστης μπορεί να επικεντρωθεί στην κατανόηση του περιεχομένου. Η κατανόηση, ως ανώτερη φάση της αναγνωστικής διαδικασίας, απαιτεί την ερμηνεία και ανάλυση των πληροφοριών του κειμένου, μέσω της σύνδεσής τους με τις προϋπάρχουσες γνώσεις (Snowling et al., 2022).

Η πορεία για την κατάκτηση της αναγνωστικής δεξιότητας δεν εξελίσσεται με τον ίδιο ρυθμό σε όλα τα άτομα. Για τους/τις τυπικούς/ες αναγνώστες/στριες η ανάγνωση σταδιακά αυτοματοποιείται, επιτρέποντας την εστίαση στην κατανόηση των νοημάτων που απορρέουν από τη συνεχή ροή του λόγου. Αντίθετα, στα άτομα με νευροαναπτυξιακές διαταραχές, όπως η Δυσλεξία, η αναγνωστική διαδικασία επηρεάζεται από βιολογικούς και περιβαλλοντικούς παράγοντες. Αυτοί συχνά διαταράσσουν την ακρίβεια λέξεων και περιορίζουν την αυτοματοποίηση της αποκωδικοποίησης. Επιπλέον, παρατηρούνται ελλείμματα στην οπτική προσοχή, τόσο σε άτομα με Δυσλεξία όσο και με ΔΕΠ-Υ καθιστώντας τη διαδικασία της ανάγνωσης λιγότερο αυτοματοποιημένη (Vajs et al., 2022; Luke et al., 2024). Παράλληλα, ελλείμματα στην οπτική προσοχή παρατηρούνται τόσο σε άτομα με Δυσλεξία όσο και σε εκείνα με Διαταραχή Ελλειμματικής Προσοχής και Υπερκινητικότητας (ADHD). Τα άτομα αυτά εμφανίζονται σαφώς βραδύτερα σε σειριακές δοκιμασίες αναζήτησης συγκριτικά με τα συνομήλικά τους με τυπική ανάπτυξη, γεγονός που υποδηλώνει δυσκολίες στη διαχείριση της οπτικής πληροφορίας (Hokken et al., 2023). Εκτός από την αποκωδικοποίηση μεμονωμένων λέξεων ή φράσεων, διαπιστώνονται ελλείμματα και στο πεδίο της κατανόησης. Όταν μάλιστα συνυπάρχουν Δυσλεξία και ADHD, οι γνωστικές δυσκολίες εντείνονται, επηρεάζοντας κρίσιμες λειτουργίες, όπως η εργαζόμενη μνήμη, η ταχεία ονομασία και η ταχύτητα επεξεργασίας των ερεθισμάτων. Τα ερευνητικά δεδομένα δείχνουν ότι η ελλειμματική προσοχή σχετίζεται με χαμηλή αναγνωστική επίδοση, ενώ η υπερκινητικότητα φαίνεται να επιδρά αρνητικά στη συγκέντρωση και στη σταθερότητα κατά την αναγνωστική διαδικασία (Caldani et al., 2022). Επιπρόσθετα τα άτομα με Διαταραχή Αυτιστικού Φάσματος (ASD) συχνά δυσκολεύονται να εφαρμόσουν συστηματικές στρατηγικές ανάγνωσης. Τείνουν να βασίζονται σε προσωπικές, εσωτερικές εμπειρίες, γεγονός που μπορεί να επηρεάσει την κατανόηση του νοήματος (Micai et al., 2021). Η γνωστική ευελιξία, η οποία συνιστά μία από τις βασικές εκτελεστικές λειτουργίες, πλήττεται σε μεγάλο βαθμό σε αυτόν τον πληθυσμό. Κατά συνέπεια, τα άτομα με ASD ενδέχεται να δυσκολεύονται να προσαρμόσουν αποτελεσματικά τις στρατηγικές τους κατά την ανάγνωση, κάτι που επηρεάζει την ευρύτερη αναγνωστική τους απόδοση (Baixauli et al., 2021).

Τα τελευταία χρόνια, η ανάπτυξη καινοτόμων τεχνολογικών εργαλείων έχει συμβάλει σημαντικά στη διάγνωση γλωσσικών και γνωστικών διαταραχών. Ενδεικτικά παραδείγματα είναι η εφαρμογή νευρωνικών δικτύων σε βιομετρικά σύνολα δεδομένων (Toki et al., 2023), η χρήση ταξινομητικών τεχνικών σε δεδομένα της πλατφόρμας SmartSpeech (Toki et al., 2023), καθώς και διαδικτυακά διαγνωστικά εργαλεία, όπως το **Askisi-SD,** τα οποία στοχεύουν στην ανίχνευση ορθογραφικών και γνωστικών ελλειμμάτων (Zygouris et al., 2025). Παράλληλα, έχει σημειωθεί πρόοδος στην ενσωμάτωση τεχνικών μηχανικής μάθησης, μέσω της αξιοποίησης «σοβαρών παιχνιδιών», για την ανίχνευση νευροαναπτυξιακών διαταραχών. Οι προσεγγίσεις αυτές αποσκοπούν στον πρώιμο εντοπισμό δυσκολιών, κάνοντας χρήση φιλικών προς τον χρήστη, αυτοματοποιημένων και υψηλής ακρίβειας εργαλείων (Toki et al., 2024).

Μέσα σε αυτό το πλαίσιο, μια ιδιαίτερα υποσχόμενη μέθοδος για την εξέταση της οπτικής προσοχής, η οποία σχετίζεται άμεσα με αναπτυξιακές διαταραχές, είναι η τεχνολογία οφθαλμοκίνησης (eye-tracking) (Wang et al., 2023). Η συγκεκριμένη τεχνική, αν και αναπτύχθηκε ήδη από τη δεκαετία του 1950 για τη μέτρηση των κινήσεων των ματιών με αντικειμενικό τρόπο, βρίσκει τα τελευταία χρόνια εφαρμογή και στον τομέα της εκπαίδευσης (Chan et al., 2022). Πρόκειται για μια μη επεμβατική, εύχρηστη τεχνολογία, η οποία καταγράφει το σημείο εστίασης του βλέμματος και προσφέρει πολύτιμες πληροφορίες σχετικά με την οπτική προσοχή, καθιστώντας την χρήσιμη και στη λογοθεραπευτική πρακτική (Toki et al., 2023).

Κατά τη διαδικασία, το άτομο κάθεται μπροστά σε μια οθόνη εξοπλισμένη με ειδικούς αισθητήρες. Καθώς εκτελεί οπτικές εργασίες ή διαβάζει, οι αισθητήρες καταγράφουν τις κινήσεις των ματιών και τα δεδομένα αξιοποιούνται

για ανάλυση. Με τη χρήση υπέρυθρου φωτός καταγράφεται ο αριθμός και η χρονική διάρκεια των εστιάσεων σε λέξεις και φράσεις, παρέχοντας ενδείξεις για το επίπεδο δυσκολίας της επεξεργασίας τους. Επιπλέον, παρακολουθείται η ταχύτητα των οφθαλμικών κινήσεων, η κατεύθυνση του βλέμματος, καθώς και οι σακκαδικές κινήσεις, δηλαδή οι ταχείες μετακινήσεις του βλέμματος από το ένα σημείο στο άλλο (Da Silva Soares et al., 2023). Καταγράφονται επίσης οι οπισθοδρομικές εστιάσεις, που αποκαλύπτουν εάν και πότε ο αναγνώστης επιστρέφει σε προηγούμενες λέξεις, ενδεχομένως για να νοηματοδοτήσει εκ νέου το περιεχόμενο (Smyrnakis et al., 2021).

Η ανάλυση αυτών των δεδομένων παρέχει τη δυνατότητα κατανόησης των αναγνωστικών δυσκολιών, προσφέρει άμεση ανατροφοδότηση και διευκολύνει την αξιολόγηση της προόδου των μαθητών (Da Silva Soares et al., 2023). Ως εκ τούτου, η αξιοποίηση της τεχνολογίας οφθαλμοκίνησης μπορεί να συμβάλει ουσιαστικά τόσο στη γρήγορη και αντικειμενική διάγνωση όσο και στην πρώιμη παρέμβαση, μέσω της διαμόρφωσης εξατομικευμένων προγραμμάτων υποστήριξης για μαθητές με αναγνωστικές δυσκολίες (Andreadakis et al., 2022).

Ο σκοπός της παρούσας μελέτης είναι να διερευνήσει τις αντιλήψεις και απόψεις των προπτυχιακών φοιτητών/τριών του Τμήματος Λογοθεραπείας του Πανεπιστημίου Ιωαννίνων σχετικά με την εφαρμογή της τεχνολογίας της οφθαλμοκίνησης για τη διάγνωση και παρέμβαση σε αναγνωστικές δυσκολίες. Ειδικότερα, διερευνάται ο βαθμός επίγνωσης των φοιτητών ως προς τα οφέλη της τεχνολογίας, η στάση τους απέναντι στην ενσωμάτωσή της στη λογοθεραπευτική πρακτική, καθώς και οι προκλήσεις που ενδέχεται να συναντήσουν κατά την εφαρμογή της. Επιπλέον, εξετάζεται αν η προηγούμενη έκθεση ή εμπειρία των φοιτητών/τριών με την εν λόγω τεχνολογία επηρεάζει τη στάση τους ως προς τη χρησιμότητά της στην κλινική πράξη.

ΥΛΙΚΟ ΚΑΙ ΜΕΘΟΔΟΣ

Ερευνητικά ερωτήματα μελέτης

RQ1. Ποια είναι η συμβολή της τεχνολογίας eye tracking στη διάγνωση αναγνωστικών δυσκολιών;
RQ2. Ποια είναι η συμβολή του eye tracking στην παρέμβαση για αναγνωστικές δυσκολίες;
RQ3. Ποια είναι τα πλεονεκτήματα και οι παράγοντες που δυσχεραίνουν τη χρήση του eye tracking;

Δείγμα

Το δείγμα της έρευνας αποτελείται από 49 τριτοετείς φοιτητές/τριες του Τμήματος Λογοθεραπείας, εκ των οποίων 5 είναι άνδρες και 44 γυναίκες.

Διαδικασία και Μέθοδοι Συλλογής Δεδομένων

Για τη συλλογή των δεδομένων χρησιμοποιήθηκε η μέθοδος του αυτοεπιλεγμένου δείγματος. Από το σύνολο των 155 φοιτητών/τριών που προσκλήθηκαν να συμμετάσχουν, ανταποκρίθηκαν οι 49, οι οποίοι κλήθηκαν να συμπληρώσουν ένα ανώνυμο διαδικτυακό ερωτηματολόγιο. Το ερωτηματολόγιο σχεδιάστηκε με σκοπό να καταγράψει: (i) τις απόψεις των φοιτητών/τριών σχετικά με τη συμβολή της τεχνολογίας της οφθαλμοκίνησης στην ανίχνευση και διάγνωση αναγνωστικών δυσκολιών, (ii) τις αντιλήψεις τους για τον ρόλο της τεχνολογίας αυτής στο πλαίσιο παρεμβάσεων, (iii) τις δυσκολίες και τους προβληματισμούς που ενδέχεται να προκύψουν κατά την εφαρμογή της στην πράξη και (iv) την προσωπική τους εμπειρία ως προς την αποτελεσματικότητα της εν λόγω τεχνολογίας.

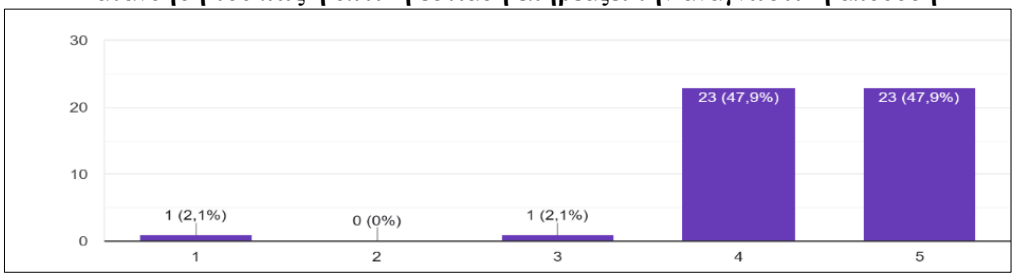
Η μέθοδος του αυτοεπιλεγμένου δείγματος επελέγη ώστε να διασφαλιστεί η ανωνυμία και, κατά συνέπεια, η αυθεντικότητα και ειλικρίνεια των απαντήσεων των συμμετεχόντων. Το ερωτηματολόγιο περιλάμβανε τόσο κλειστές ερωτήσεις τύπου Likert όσο και ανοιχτού τύπου ερωτήσεις, ώστε να εξεταστεί σε βάθος πώς οι μελλοντικοί λογοθεραπευτές/τριες αντιλαμβάνονται την πιθανή ένταξη της τεχνολογίας της οφθαλμοκίνησης στην κλινική τους πρακτική.

Ανάλυση Δεδομένων

Οι απαντήσεις στις κλειστές ερωτήσεις αναλύθηκαν ποσοτικά με τη χρήση περιγραφικών στατιστικών δεικτών (όπως συχνότητες, ποσοστά και μέσοι όροι). Οι απαντήσεις στις ανοιχτές ερωτήσεις υποβλήθηκαν σε θεματική ανάλυση περιεχομένου, με στόχο την ανάδειξη κυρίαρχων μοτίβων και θεμάτων αναφορικά με τις στάσεις και τις εμπειρίες των φοιτητών/τριών. Ο συνδυασμός ποσοτικών και ποιοτικών εργαλείων επέτρεψε μια περισσότερο σφαιρική κατανόηση των αντιλήψεων των συμμετεχόντων ως προς τη χρήση της τεχνολογίας της οφθαλμοκίνησης — τόσο σε εκπαιδευτικό πλαίσιο όσο και στην κλινική πράξη.

ΑΠΟΤΕΛΕΣΜΑΤΑ

Η παρούσα μελέτη πραγματοποιήθηκε με στόχο τη διερεύνηση των αντιλήψεων φοιτητών/τριών του Τμήματος Λογοθεραπείας αναφορικά με τη συμβολή της τεχνολογίας ανίχνευσης της οφθαλμοκίνησης στην ανίχνευση, τη διάγνωση και την παρέμβαση σε περιπτώσεις αναγνωστικών δυσκολιών. Τα ευρήματα προέκυψαν από ανώνυμη, διαδικτυακή έρευνα στην οποία συμμετείχαν εθελοντικά 49 φοιτητές/τριες (45 γυναίκες και 4 άνδρες), κυρίως ηλικίας 18–21 ετών. Οι συμμετέχοντες/ουσες ήταν τριτοετείς φοιτητές/τριες που είχαν διδαχθεί τη χρήση και την εφαρμογή του eye tracking στο πλαίσιο της Λογοθεραπείας.



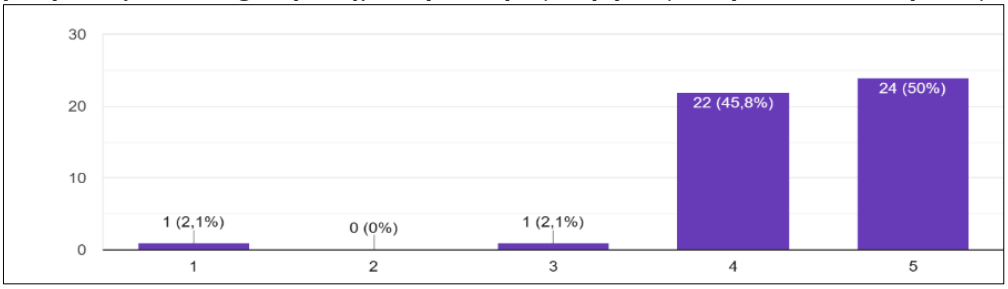
RQ1. Η συμβολή της τεχνολογίας eye tracking στη διάγνωση αναγνωστικών δυσκολιών:

1. Συσχέτιση οπτικής εστίασης και αναγνωστικής απόδοσης

Η πλειονότητα των φοιτητών/τριών εκτιμά ότι η τεχνολογία eye tracking βοηθά στην κατανόηση του πώς η οπτική εστίαση επηρεάζει την αναγνωστική απόδοση. Συγκεκριμένα:

47,9% συμφωνούν απόλυτα
47,9% συμφωνούν
2,1% ούτε συμφωνούν ούτε διαφωνούν
2,1% διαφωνούν απόλυτα (Εικόνα 1).

Εικόνα 3
Κατανόηση του πώς η οπτική εστίαση επηρεάζει την αναγνωστική απόδοση

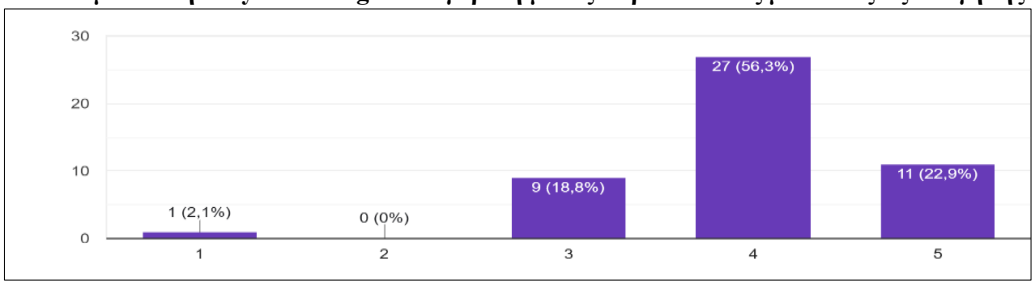


2. Ανίχνευση και έγκαιρη διάγνωση δυσκολιών στην ανάγνωση

Η τεχνολογία θεωρείται ιδιαίτερα χρήσιμη για την ανίχνευση και την έγκαιρη διάγνωση δυσκολιών στην ανάγνωση:

50% συμφωνούν απόλυτα
45,8% συμφωνούν
2,1% ούτε συμφωνούν ούτε διαφωνούν
2,1% διαφωνούν απόλυτα (Εικόνα 2).

Εικόνα 4
Συμβολή του eye tracking στην ανίχνευση και την έγκαιρη διάγνωση δυσκολιών στην ανάγνωση

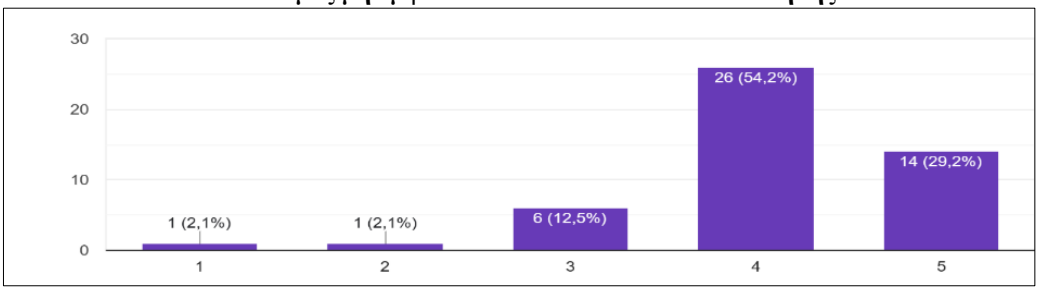


3.Αντικειμενικότητα σε σύγκριση με τις παραδοσιακές μεθόδους

Το eye tracking φαίνεται να προσφέρει περισσότερο αντικειμενικά δεδομένα σε σχέση με τις παραδοσιακές μεθόδους αξιολόγησης:

22,9% συμφωνούν απόλυτα
56,3% συμφωνούν
18,8% ούτε συμφωνούν ούτε διαφωνούν
2,1% διαφωνούν απόλυτα (Εικόνα 3).

Εικόνα 5
Αντικειμενικότητα eye tracking σε σύγκριση με τις παραδοσιακές μεθόδους αξιολόγησης

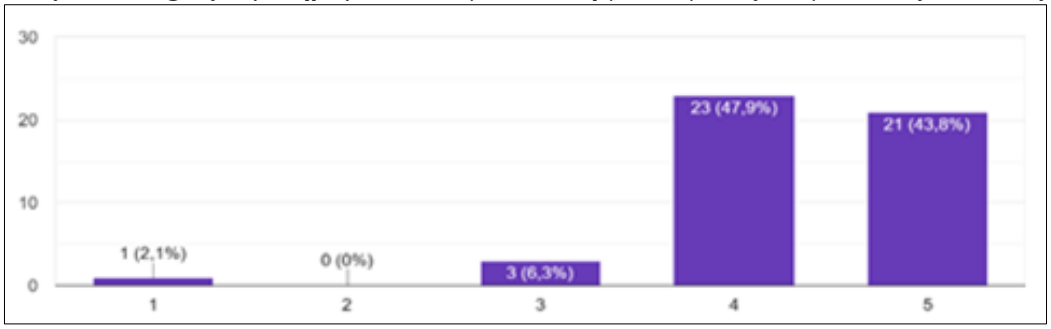


4. Εντοπισμός μη εμφανών δυσκολιών αποκωδικοποίησης

Οι φοιτητές/τριες αναγνώρισαν τη δυνατότητα του eye tracking να αποκαλύπτει δυσκολίες που ενδέχεται να μην εντοπίζονται εύκολα με άλλες μεθόδους:

29,2% συμφωνούν απόλυτα
54,2% συμφωνούν
12,5% ούτε συμφωνούν ούτε διαφωνούν
2,1% διαφωνούν
2,1% διαφωνούν απόλυτα (Εικόνα 4).

Εικόνα 6
Εντοπισμός μη εμφανών δυσκολιών αποκωδικοποίησης

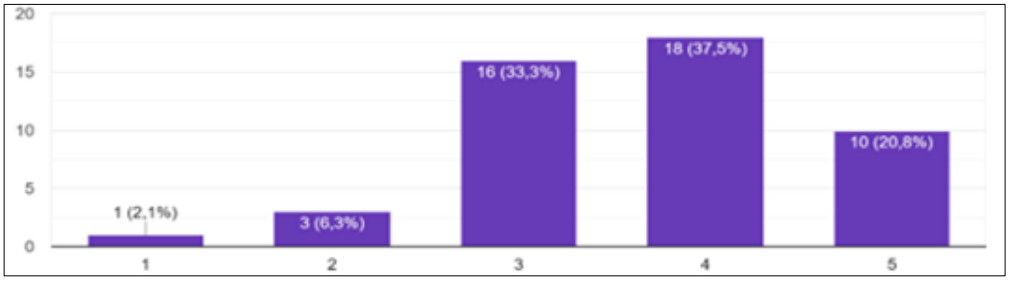


5. Συμπληρωματική χρήση στην αξιολόγηση

Ως προς τη δυνατότητα του eye tracking να λειτουργήσει συμπληρωματικά προς τις κλασικές διαγνωστικές διαδικασίες:

43,8% συμφωνούν απόλυτα
47,9% συμφωνούν
6,3% ούτε συμφωνούν ούτε διαφωνούν
2,1% διαφωνούν απόλυτα (Εικόνα 5).

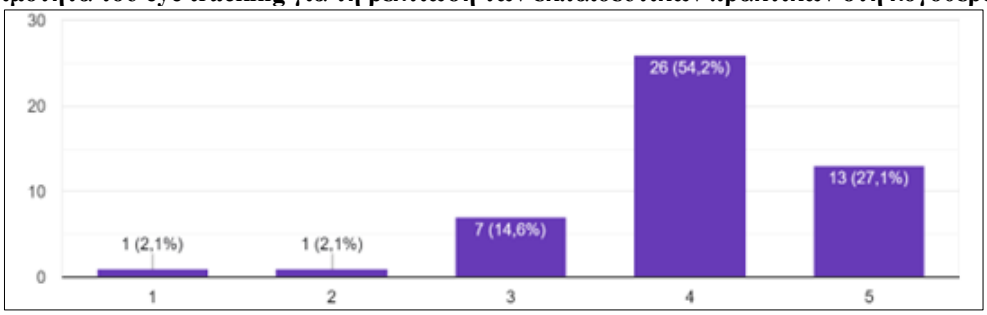
Εικόνα 7
Το eye tracking ως συμπληρωματικό διαγνωστικό εργαλείο για τις αναγνωστικές δυσκολίες



6. Διάκριση μεταξύ δυσλεξίας και άλλων μαθησιακών δυσκολιών

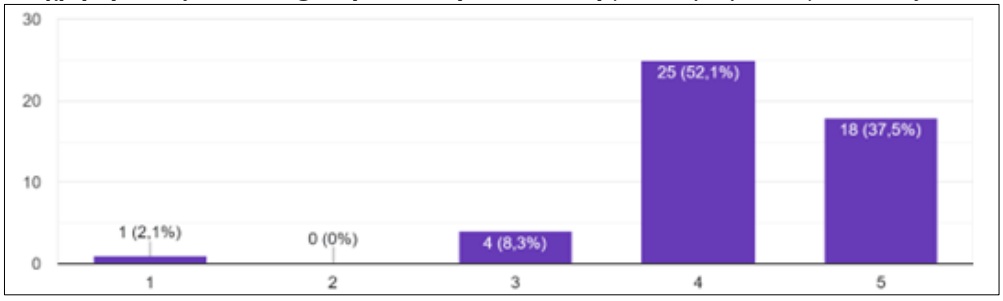
Σχετικά με τη χρησιμότητά του για διαφοροδιάγνωση:

20,8% συμφωνούν απόλυτα



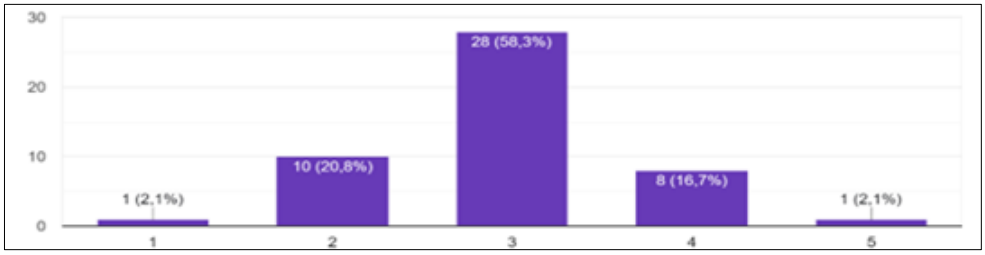
37,5% συμφωνούν
33,3% ούτε συμφωνούν ούτε διαφωνούν
6,3% διαφωνούν
2,1% διαφωνούν απόλυτα (Εικόνα 6).

Εικόνα 8
Η συμβολή του eye tracking στη διαφοροδιάγνωση δυσλεξίας και άλλων μαθησιακών δυσκολιών



7. Βελτίωση εκπαιδευτικών πρακτικών στη λογοθεραπεία
Η πλειοψηφία θεωρεί ότι η τεχνολογία μπορεί να ενισχύσει τις εκπαιδευτικές πρακτικές:
27,1% συμφωνούν απόλυτα
54,2% συμφωνούν
14,6% ούτε συμφωνούν ούτε διαφωνούν
2,1% διαφωνούν
2,1% διαφωνούν απόλυτα (Εικόνα 7).

Εικόνα 9
Χρησιμότητα του eye tracking για τη βελτίωση των εκπαιδευτικών πρακτικών στη λογοθεραπεία

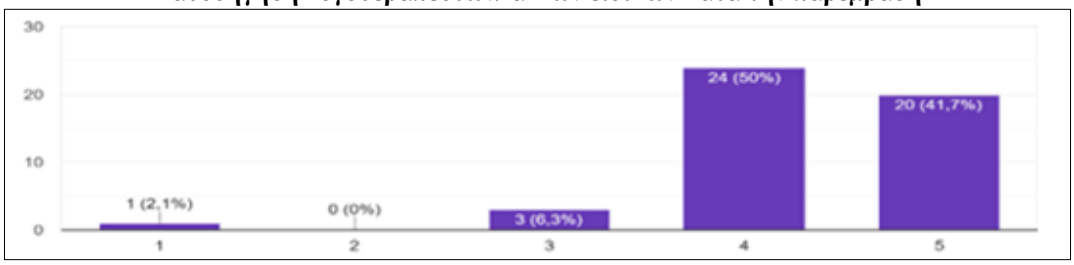


8. Ευρύτερη εφαρμογή στην πράξη
Οι φοιτητές/τριες εξέφρασαν θετική στάση στην ευρύτερη χρήση της τεχνολογίας στην εκπαιδευτική και κλινική πρακτική:
37,5% συμφωνούν απόλυτα
52,1% συμφωνούν
8,3% ούτε συμφωνούν ούτε διαφωνούν
2,1% διαφωνούν απόλυτα (Εικόνα 8).

Εικόνα 10
Ευρεία χρήση του eye tracking στην κλινική εκπαίδευση για άτομα με αναγνωστικές δυσκολίες

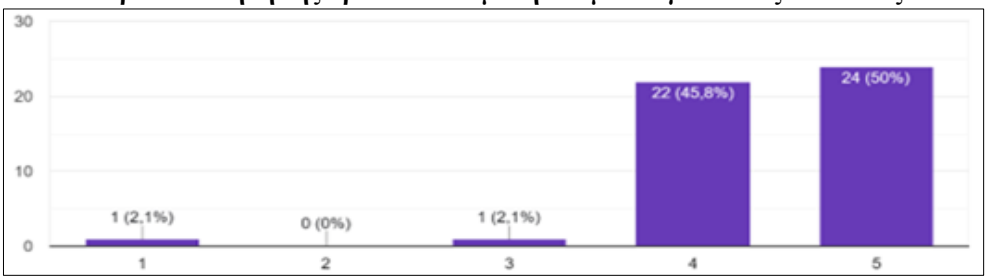
9. Προκλήσεις σχετικές με την εξειδικευμένη εκπαίδευση
Τέλος, οι απόψεις για την προσβασιμότητα στην απαραίτητη εκπαίδευση ποικίλλουν:
2,1% συμφωνούν απόλυτα
16,7% συμφωνούν
58,3% ούτε συμφωνούν ούτε διαφωνούν
20,8% διαφωνούν
2,1% διαφωνούν απόλυτα (Εικόνα 9).

Εικόνα 11
Εξειδικευμένη εκπαίδευση για τη χρήση του eye tracking, που δεν είναι εύκολο να αποκτηθεί



RQ2. Η συμβολή του *eye tracking* στην παρέμβαση για αναγνωστικές δυσκολίες

Η δεύτερη ενότητα της έρευνας εστιάζει στις αντιλήψεις των φοιτητών/τριών σχετικά με το πώς η τεχνολογία της οφθαλμοκίνησης (*eye tracking*) μπορεί να αξιοποιηθεί στην παρέμβαση για την ενίσχυση της αναγνωστικής δεξιότητας παιδιών με δυσκολίες στην ανάγνωση. Οι απαντήσεις των συμμετεχόντων/ουσών καταγράφουν ένα ευρύτερα θετικό κλίμα, το οποίο όμως συνοδεύεται και από προβληματισμούς για την πρακτική εφαρμογή και τις απαιτήσεις της τεχνολογίας.

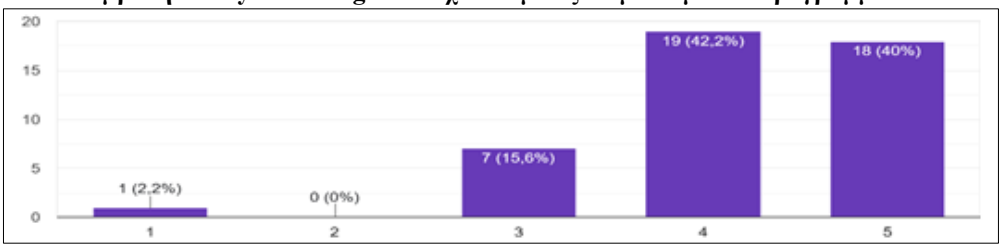


Καθοδήγηση των λογοθεραπευτών/άλλων ειδικών κατά την παρέμβαση
Οι περισσότεροι φοιτητές εκτιμούν ότι τα δεδομένα του *eye tracking* μπορούν να προσφέρουν πολύτιμη καθοδήγηση σε λογοθεραπευτές και άλλους ειδικούς κατά τη διάρκεια της παρέμβασης. Συγκεκριμένα:
41,7% συμφώνησαν απόλυτα,
50% συμφώνησαν
6,3% παρέμειναν ουδέτεροι,
2,1% διαφώνησαν απόλυτα (Εικόνα 10).

Εικόνα 12
Καθοδήγηση λογοθεραπευτών/ άλλων ειδικών κατά την παρέμβαση

Παρακολούθηση της προόδου
Ως προς τη δυνατότητα της τεχνολογίας να βοηθά στην παρακολούθηση της προόδου των μαθητών στην ανάγνωση, οι φοιτητές/τριες φάνηκαν ιδιαίτερα θετικοί:
50% συμφώνησαν απόλυτα,
45,8% συμφώνησαν,
2,1% ήταν ουδέτεροι,
2,1% διαφώνησαν απόλυτα (Εικόνα 11).

Εικόνα 13
Παρακολούθηση της προόδου των μαθητών με αναγνωστικές δυσκολίες

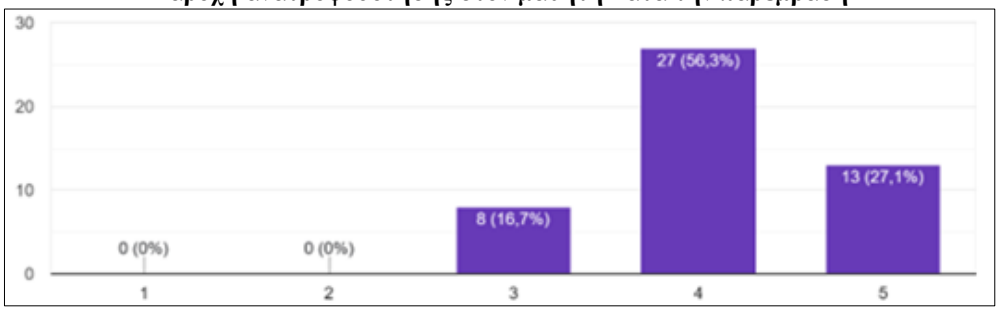


3. Σχεδιασμός εξατομικευμένων προγραμμάτων

Οι συμμετέχοντες/ουσες αναγνώρισαν επίσης την πιθανή συμβολή του *eye tracking* στον σχεδιασμό εξατομικευμένων παρεμβάσεων που ανταποκρίνονται στις ιδιαίτερες ανάγκες κάθε μαθητή:

40% συμφώνησαν απόλυτα,
42,2% συμφώνησαν,
15,6% παρέμειναν ουδέτεροι,
2,2% διαφώνησαν απόλυτα (Εικόνα 12).

Εικόνα 14
Συμβολή του eye tracking στον σχεδιασμό εξατομικευμένων προγραμμάτων

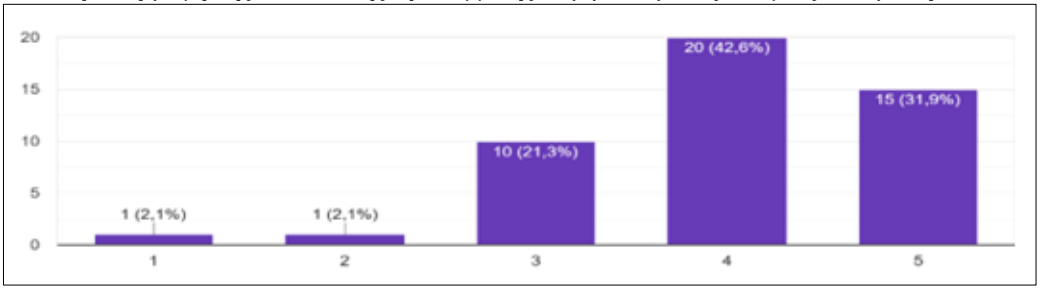


4. Ανατροφοδότηση προς τον μαθητή

Αναφορικά με τη χρήση των δεδομένων του *eye tracking* για την παροχή άμεσης ανατροφοδότησης προς τον ίδιο τον μαθητή κατά τη διάρκεια της παρέμβασης:

27,1% συμφώνησαν απόλυτα,
56,3% συμφώνησαν,
16,7% παρέμειναν ουδέτεροι (Εικόνα 13).

Εικόνα 15.
Παροχή ανατροφοδότησης στον μαθητή κατά την παρέμβαση



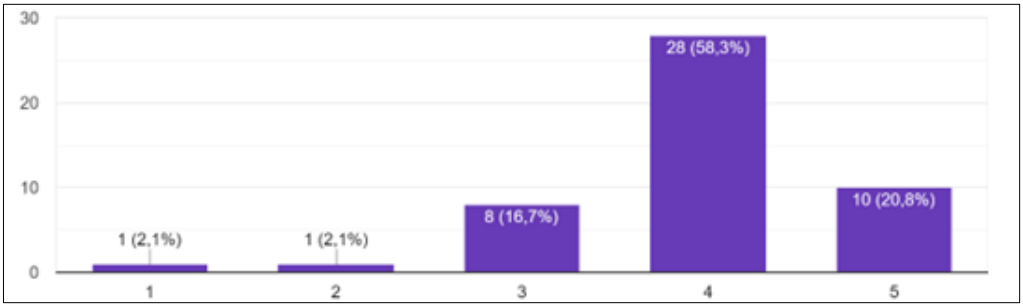
5. Προσαρμογή διδακτικής προσέγγισης

Η δυνατότητα που παρέχει στους/στις εκπαιδευτικούς να προσαρμόζουν την προσέγγισή τους με βάση τις ανάγκες των μαθητών θεωρείται επίσης σημαντική:

31,9% συμφώνησαν απόλυτα,
42,6% συμφώνησαν,
21,3% ήταν ουδέτεροι,

2,1% διαφώνησαν,
2,1% διαφώνησαν απόλυτα (Εικόνα 14).

Εικόνα 16.
Προσαρμογή της διδακτικής προσέγγισης σύμφωνα με τις ανάγκες των μαθητών



6. Ενίσχυση της συνεργασίας με τους γονείς

Τέλος, οι φοιτητές αξιολόγησαν και τον ρόλο της τεχνολογίας στην ενίσχυση της συνεργασίας μεταξύ θεραπευτών, άλλων ειδικών και γονέων:

20,8% συμφώνησαν απόλυτα,
58,3% συμφώνησαν,
16,7% ούτε συμφώνησαν ούτε διαφώνησαν,
2,1% διαφώνησαν,
2,1% διαφώνησαν απόλυτα (Εικόνα 15).

Εικόνα 17
Ενίσχυση της συνεργασίας μεταξύ λογοθεραπευτών/ άλλων ειδικών και γονέων

RQ3. Πλεονεκτήματα και παράγοντες που δυσχεραίνουν τη χρήση του eye tracking

Στο τρίτο και τελευταίο μέρος της έρευνας, οι φοιτητές/τριες κλήθηκαν να προβούν στην κριτική αποτίμηση της χρησιμότητας της τεχνολογίας eye tracking, εστιάζοντας τόσο στα πλεονεκτήματα όσο και στους περιορισμούς της. Μεταξύ των θετικών στοιχείων, πολλοί φοιτητές/τριες ανέφεραν τη δυνατότητα της τεχνολογίας να συμβάλει στην ανίχνευση νευροεκφυλιστικών παθήσεων, όπως η νόσος Alzheimer, καθώς και στη νευρολογική αποκατάσταση ύστερα από εγκεφαλικά επεισόδια ή τραυματισμούς, αξιοποιώντας την αντικειμενική παρακολούθηση της προόδου του ασθενούς (Reddy et al., 2020). Επιπλέον, επισημάνθηκε η συμβολή του eye tracking στη διάγνωση διαταραχών προσοχής καθώς και στη διάγνωση και παρέμβαση σε Μαθησιακές Δυσκολίες (Lee et al., 2023; Donmez, 2023; Bucci, 2021; Dostálová et al., 2024). Έμφαση δόθηκε επίσης στην αξιοποίηση της τεχνολογίας για τη βελτίωση των επιδόσεων αθλητών, μέσα από την καταγραφή της προσοχής και του χρόνου αντίδρασης. Οι φοιτητές ανέφεραν πως η παροχή άμεσων, μετρήσιμων και ακριβών δεδομένων αποτελεί έναν επιπλέον λόγο που η τεχνολογία αυτή αποκτά αυξανόμενο ερευνητικό και κλινικό ενδιαφέρον. Παρά τα παραπάνω οφέλη, οι φοιτητές/τριες αναγνώρισαν και σοβαρές προκλήσεις που θα μπορούσαν να περιορίσουν την εφαρμογή του eye tracking στην πράξη. Πιο συχνά αναφέρθηκε το υψηλό κόστος του εξοπλισμού και των λογισμικών, καθώς και η απαίτηση για εξειδικευμένη εκπαίδευση, ιδιαίτερα όσον αφορά την ορθή ανάλυση και ερμηνεία των δεδομένων.

ΣΥΖΗΤΗΣΗ

Η παρούσα μελέτη διερεύνησε τις αντιλήψεις προπτυχιακών φοιτητών/τριών του Τμήματος Λογοθεραπείας του Πανεπιστημίου Ιωαννίνων σχετικά με τη χρήση της τεχνολογίας οφθαλμοκίνησης στη διάγνωση και παρέμβαση σε

αναγνωστικές δυσκολίες. Η συλλογή των δεδομένων πραγματοποιήθηκε μέσω ανώνυμου, διαδικτυακού ερωτηματολογίου, το οποίο συμπληρώθηκε από 49 φοιτητές/τριες που συμμετείχαν εθελοντικά. Τα ευρήματα καταδεικνύουν τη θετική στάση των φοιτητών απέναντι στην τεχνολογία *eye tracking*. Ειδικότερα εννέα στους δέκα συμμετέχοντες θεωρούν ότι η τεχνολογία αυτή συμβάλλει ουσιαστικά στην κατανόηση του τρόπου με τον οποίο η οπτική εστίαση επηρεάζει την αναγνωστική απόδοση, καθώς και στην έγκαιρη και πιο αντικειμενική διάγνωση αναγνωστικών δυσκολιών. Επιπλέον, η πλειονότητα συμφωνεί ότι το *eye tracking* μπορεί να λειτουργήσει συμπληρωματικά με τις παραδοσιακές μεθόδους αξιολόγησης (Toki, 2024), ενώ θεωρεί ιδιαίτερα χρήσιμη την παροχή δεδομένων που μπορούν να καθοδηγήσουν την παρέμβαση και να υποστηρίξουν την παρακολούθηση της αναγνωστικής προόδου των μαθητών/τριών. Ωστόσο, παρά την ευνοϊκή αποδοχή, επισημάνθηκαν και παράγοντες που ενδέχεται να αναστείλουν την ευρεία εφαρμογή του *eye tracking* στην πράξη. Το κόστος απόκτησης και συντήρησης του εξοπλισμού, όπως και η ανάγκη για εξειδικευμένη κατάρτιση των επαγγελματιών, αποτελούν παράγοντες αναστολής της ευρείας εφαρμογής σύμφωνα με τις απαντήσεις των φοιτητών/τριών.

Επιπλέον, η τεχνολογία eye-tracking δεν λειτουργεί μόνο ως εργαλείο συλλογής δεδομένων, αλλά και ως μέσο ενίσχυσης της ενσυναίσθησης και της εξατομίκευσης στην κλινική πράξη. Η δυνατότητα παρακολούθησης της πορείας του βλέμματος παρέχει στους επαγγελματίες της λογοθεραπείας μια διακριτική και μη παρεμβατική εικόνα της γνωστικής διαδικασίας του παιδιού, ενισχύοντας έτσι τη θεραπευτική σχέση και περιορίζοντας το άγχος αξιολόγησης (Park et al., 2024). Επίσης, τα δεδομένα αυτά μπορούν να λειτουργήσουν ως βάση για την ανάπτυξη εξατομικευμένων στρατηγικών παρέμβασης, προσαρμοσμένων στις μοναδικές οπτικο-γνωστικές ανάγκες του εκάστοτε μαθητή (Chytry, et al., 2022). Η εν λόγω τεχνολογία έχει ήδη αρχίσει να χρησιμοποιείται σε διεπιστημονικά μοντέλα παρέμβασης, διευκολύνοντας τη συνεργασία μεταξύ λογοθεραπευτών, ψυχολόγων και ειδικών παιδαγωγών μέσα από κοινή γλώσσα ανάλυσης των δυσκολιών (Chan, et al., 2022). Αυτή η συνεργατική προσέγγιση μπορεί να ενισχύσει τη συνοχή της θεραπευτικής πορείας και να εδραιώσει πρακτικές που σέβονται τον άνθρωπο ως ολότητα, πέρα από τη διαταραχή του. Έτσι, η τεχνολογία δεν έρχεται να αντικαταστήσει την ανθρώπινη διάσταση της λογοθεραπείας, αλλά να την ενδυναμώσει, προάγοντας μία πιο βιωματική και ουσιαστική μαθησιακή εμπειρία (Chan, et al., 2022; Chytry, et al., 2022). Τα ευρήματα της παρούσας μελέτης συνάδουν με τη θεωρητική προσέγγιση της οπτικής επεξεργασίας ως βασικού πυλώνα της αναγνωστικής ανάπτυξης, ενισχύοντας την ανάγκη ενσωμάτωσης τεχνολογιών αιχμής στη διδακτική πράξη αλλά και την ανάγκη για περαιτέρω έρευνα, πιλοτικές εφαρμογές και ανάπτυξη εκπαιδευτικών εργαλείων για την κατάλληλη αξιοποίησή τους.

ΣΥΜΠΕΡΑΣΜΑΤΑ

Συνοψίζοντας, η μελέτη ανέδειξε την ευνοϊκή στάση των μελλοντικών λογοθεραπευτών απέναντι στην αξιοποίηση της τεχνολογίας eye-tracking, επιβεβαιώνοντας τις δυνατότητες της τόσο σε επίπεδο διάγνωσης όσο και σε παρέμβασης. Μελλοντικές έρευνες καλούνται να διερευνήσουν πιλοτικές εφαρμογές στο πεδίο σε μεγαλύτερα δείγματα και να αναπτύξουν στοχευμένα προγράμματα κατάρτισης.

Expanted Table of Contencts/ Ανεπτυγμένος Πίνακας Περιεχομένων

Conference Abstracts 1

TA1: Research on the development, implementation, and use of contemporary technologies in the modern school, education, and learning. 3

INNOVATIVE APPROACHES TO TEACHING: THE CONTRIBUTION OF AUGMENTED AND VIRTUAL REALITY TO LEARNING ENGLISH THROUGH PHYSICAL ACTIVITY 5

STOP MOTION: A DESIGN-BASED TOOL FOR EDUCATIONAL MATERIAL DEVELOPMENT 6

THE FUTURE OF DISTANCE LEARNING FROM THE PERSPECTIVE OF SECONDARY SCHOOL STUDENTS IN THE PREFECTURES OF ATTICA AND CYCLADES 7

FACTORS AFFECTING STUDENTS' PARTICIPATION IN DISTANCE LEARNING DURING THE PANDEMIC 8

KNOWLEDGE OF PHYSICAL EDUCATION TEACHERS IN PRIMARY AND SECONDARY EDUCATION 9

VIVLIOTHINKY: A COLLABORATIVE LEARNING PROJECT FOR THE DEVELOPMENT OF SOCIAL AND DIGITAL SKILLS BASED ON THE E-GRAFIS SERVICE OF THE PANHELLENIC SCHOOL NETWORK 10

TEACHING QUANTUM THEORY IN SECONDARY EDUCATION: THE DOUBLE-SLIT EXPERIMENT AND THE DEVELOPMENT OF AN ICT-BASED EDUCATIONAL SCENARIO FOR 9TH GRADE STUDENTS 11

SCIENCE TEACHERS' ATTITUDES AND BELIEFS TOWARDS THE USE OF AI TOOLS IN EDUCATION 12

EDUCATIONAL ACTIVITIES AND INNOVATION: THE SAFFRON OF KOZANI AND BEE-BOT AS TEACHING TOOLS 13

EXPLORING THE DYNAMICS OF FRIENDSHIP NETWORKS USING ARTIFICIAL INTELLIGENCE ALGORITHMS: A STUDY IN A SPECIAL EDUCATION SCHOOL 14

INVESTIGATION OF PRIMARY SCHOOL STUDENTS' KNOWLEDGE ABOUT ARTIFICIAL INTELLIGENCE IN EDUCATION 15

TA2: The pedagogical integration of digital media into teaching practice (Learning Theories, Curricula, and Digital Media). 17

THE IMPACT OF DIGITAL TECHNOLOGIES IN THE TEACHING OF PHYSICAL EDUCATION: IMPACT ANALYSIS AND PERFORMANCE ASSESSMENT OF STUDENTS AND TEACHERS 19

TEACHING THE COMPLETE LITERARY WORK "HONOR AND MONEY" BY K. THEOTOKIS USING I.C.T. 20

ASIA MINOR CATASTROPHE AND ASIA MINOR MONUMENTS: AN EDUCATIONAL INITIATIVE USING DIGITAL TOOLS 21

MUSIQUE CONCRÈTE AS AN INSTRUMENT FOR DIGITAL STORYTELLING: AN ELECTROACOUSTIC COMPOSITION WORKSHOP WITHIN THE FRAMEWORK OF THE MUSIC ENSEMBLES COURSE 22

RECONNECTING STUDENTS: ENSURING EMOTIONAL GROWTH IN A DIGITALLY DRIVEN EDUCATIONAL SYSTEM 23

THE ROLE OF TEACHERS IN THE EFFECTIVE IMPLEMENTATION OF DIFFERENTIATED I NSTRUCTION THROUGH THE UTILIZATION OF NEW TECHNOLOGIES 24

LEVERAGING MULTILITERACIES AND CREATIVE WRITING IN THE STORYTELLING TEACHING 25

TRANSFORMING PHYSICS TEACHING: THE ROLE OF CRITICAL PEDAGOGY AND ICTS 26

IMPACTFUL TECHNOLOGIES IN ACCOUNTING AND AUDITING: A BESTOWED EDUCATIONAL BURDEN 27

THE TRANSITION OF TECHNOLOGY AND THE ROLE OF “NEW ORALITY” IN THE EDUCATIONAL PROCESS OF THE APPLIED ARTS 28

THE NECESSITY OF THE PEDAGOGICAL INTEGRATION OF DIGITAL MEDIA IN TEACHING PRACTICE 29

FROM THEORETICAL APPROACH TO DIGITAL LEARNING 30

TA3: Utilization and evaluation of digital and technological media. 31

DIGITAL TRANSFORMATION AT THE MUSIC SCHOOL OF AMFISSA "ELENI KARAINDROU": EXPERIENCES, CHALLENGES, AND PROSPECTS FROM THE IMPLEMENTATION OF INNOVATIVE DIGITAL TOOLS IN EDUCATIONAL PRACTICE 33

THE BENEFITS OF DISTANCE LEARNING FROM THE PERSPECTIVE OF SECONDARY SCHOOL STUDENTS IN THE PREFECTURES OF ATTICA AND CYCLADES 34

THE FLORENTINE RENAISSANCE AND THE GREEK SCHOLARS: A CONNECTION THROUGH DIGITAL MEDIA 35

EVALUATION OF AN EDUCATIONAL APPLICATION FOR ANDROID MOBILE DEVICES, FOR UNDERSTANDING 5TH GRADE PHYSICS CONCEPTS USING VOICE ASSISTANT 36

RICHARD MAYER’S MULTIMEDIA LEARNING AND THE CREATION OF EDUCATIONAL VIDEO IN CONTEMPORARY TEACHING MODELS 37

RESEARCH CONCLUSIONS ON THE USE OF SOCIAL NETWORKING SITES BY ADOLESCENTS 38

THE UTILIZATION OF NEW TECHNOLOGIES IN TEACHING: A STUDY IN HIGHER EDUCATION 39

MODEL FOR MONITORING DIETARY INTAKE, LIFESTYLE, AND PHYSICAL ACTIVITY OF PATIENTS USING INFORMATION AND COMMUNICATION TECHNOLOGIES 40

RESEARCH ON THE UTILIZATION OF INFORMATION AND COMMUNICATION TECHNOLOGIES BY SECONDARY EDUCATION TEACHERS IN THE PREFECTURE OF IOANNINA 41

THE APPLICATION OF SENTIMENT ANALYSIS IN HISTORY SCHOOL TEXTBOOKS: THE CASE OF ASIA MINOR 42

DEVELOPING ORIGINAL TEACHING MATERIAL FOR GERMAN AS A FOREIGN LANGUAGE USING ARTIFICIAL INTELLIGENCE SOFTWARE AND DIGITAL TOOLS 43

ADOLESCENTS’ PERSPECTIVES ON ELECTRONIC GAMES 44

TA4: The digital divide and emerging inequalities. 45

THE DIGITAL DIVIDE IN PRIMARY EDUCATION IN GREECE: CHALLENGES, EMERGING INEQUALITIES, AND INCLUSIVE PRACTICES 47

DIGITAL TRANSFORMATION IN EDUCATION: OPPORTUNITIES, CHALLENGES, AND EMERGING INEQUALITIES IN THE AGE OF ARTIFICIAL INTELLIGENCE 48

DIGITAL INEQUALITIES IN THE 21ST CENTURY 49

TA5: Digital and visual literacy. 51

SCHOOL LIBRARY AS A LEARNING HUB: ACTION PLAN FOR DIGITAL UPGRADING 53

VISUALIZING LEARNING: DESIGN PRINCIPLES, IMPLEMENTATION, AND BENEFITS OF INFOGRAPHICS IN THE EDUCATIONAL LEARNING PROCESS 54

THE IMPLEMENTATION OF MULTIMODALITY IN LANGUAGE TEACHING: A SYSTEMATIC LITERATURE REVIEW 55

MULTILITERACIES IN SCHOOL EDUCATION: UTILIZING DIGITAL CONCEPT MAPPING ENVIRONMENTS 56

TA6: Digital ethics. 57

ARTIFICIAL INTELLIGENCE AND ETHICS: CHALLENGES AND SOLUTIONS 59

TA7: Digital citizenship. 61

ACTIVE CITIZENSHIP AND THE DIGITAL WORLD THE ROLE OF EDUCATION IN SHAPING ACTIVE STUDENT-CITIZENS IN THE DIGITAL PUBLIC SPACE 63

SCIENCE AND THE DIGITAL CITIZEN: AN EDUCATIONAL SCENARIO APPLIED TO CHEMISTRY 64

TA8: Inclusive digital education. 65

DIGITAL AUDIO TOOLS IN MATHEMATICS EDUCATION FOR STUDENTS WITH VISUAL IMPAIRMENTS: AN ANALYSIS OF APPLICATIONS AND A CASE STUDY 67

DIGITAL HIVES ON E-ME FOR TEACHING GREEK TO REFUGEE CHILDREN: ENHANCING INCLUSIVE EDUCATION THROUGH CONNECTIVISM AND GAMIFICATION 68

SEARCHING FOR THE SCHOOL FOR ALL: POLESEMY, STAGES OF REALIZATION AND MATERIAL/DIGITAL DESIGN 69

TEACHING GREEK IN THE INTERCULTURAL CLASSROOM USING THE DIGITAL LANGUAGE LEARNING TOOL "AKELIUS LANGUAGES" 70

INCLUSIVE EDUCATION WITH DIGITAL MEDIA FOR STUDENTS WITH ASD: A FOCUS ON THE TEACCH PROGRAM 71

IMPLEMENTATION OF WEBQUESTS ALIGNED WITH THE PRINCIPLES OF INCLUSIVE DIGITAL EDUCATION WITHIN THE FRAMEWORK OF THE ERASMUS+ KA210 PROJECT “MEDITERRANEAN DIET FOR OVERALL HEALTH” 72

INCLUSIVE DIGITAL EDUCATION AND CULTURAL HERITAGE: AN INNOVATIVE APPROACH TO MUSEUM EDUCATION IN CORRECTIONAL FACILITIES 73

TA9: The sustainable digital school 75

THE SUSTAINABLE DIGITAL SCHOOL: A MODEL OF EDUCATION FOR THE 21ST CENTURY 77

EDUCATION AND ENTERPRENEURSHIP IN THE AGE OF DIGITAL TRANSFORMATION 78

THE GREEN, DIGITAL NEIGHBORHOOD OF KINDERGARTEN 79

TA10: Best practices in the pedagogical use of digital technologies. 81

A NEW APPROACH TO TEACHING NEW TECHNOLOGIES BASED ON FI AND FD COGNITIVE STYLES 83

THE USE OF THE INTERNET IN LANGUAGE EDUCATION IN THE 3RD GRADE OF THE GREEK SENIOR HIGH SCHOOL (LYCEUM) 84

ARCHITECTURAL DESIGN AND DEVELOPMENT OF BRAILLE TRANSCRIPTION AND LEARNING SOFTWARE 85

“INTERNATIONAL JOINT CLASSES”: A CASE STUDY ON THE INTEGRATION OF DIGITAL TECHNOLOGIES IN AN INTERNATIONAL SCHOOL COLLABORATION 86

DECIDING BASED ON DATA: AN INNOVATIVE INSTRUCTIONAL SCENARIO USING THE PROJECT METHOD IN A SECOND CHANCE SCHOOL 87

THE FOREST …MY LIFE: EXPERIENTIAL LEARNING WITH DIGITAL TOOLS 88

INTEGRATING ARTIFICIAL INTELLIGENCE IN EDUCATION: TEACHING TELEWORKING AND REMOTE COMMUNICATION IN A΄ CLASS OF LYCEUM 89

THE (INSTEAD OF A BLACKBOARD) ELECTRONIC COMPUTER, A KEY, FOR THE IMPLEMENTATION OF THE (IN-CLASS) COURSE, BY THE STUDENTS THEIR OWN 90

MISINTERPRETATION OF MESSAGE, DUE TO CERN, DUE TO CATARACTIVE PROJECTION OF IMAGES, ON THE COMPUTER SCREEN 92

INNOVATIVE TEACHING APPROACHES: ENHANCING INDEPENDENT LEARNING THROUGH ARTIFICIAL INTELLIGENCE AND MUSIC 94

ART AND DIGITAL MEDIA IN EDUCATION: A CASE STUDY AT THE EVENING VOCATIONAL HIGH SCHOOL OF PREVEZA 95

DIGITAL TOOLS FOR EFFECTIVE TEACHING PRACTICE 96

THE ADVANTAGES OF ELECTRONIC BOOKS IN HISTORY TEACHING: A CASE STUDY FOR THE 3RD GRADE OF SECONDARY SCHOOL 97

EXPLORING THE WORLD WITH GEOGRAPHIC INFORMATION SYSTEMS (GIS): GEOGRAPHY IN PRACTICE 98

THE USE OF PODCASTS IN LITERATURE COURSES – A QUALITATIVE APPROACH 99

BEST PRACTICES FOR INTEGRATING DIGITAL TECHNOLOGIES IN TEACHING: A HOLISTIC APPROACH 100

“UTILIZATION OF SOIL MOISTURE SENSORS IN EDUCATIONAL PRACTICE THROUGH DIGITAL MEDIA” 101

eTwinning: BUILDING A STRONG COMMUNITY OF INNOVATIVE TEACHERS 102

THE USE OF DIGITAL TOOLS IN THE ASSEEEMENT OF THE HUMAN RIGHTS CLIMATE IN THE SCHOOL ENVIROMENT 103

PRESENTATION OF BEST PRACTICES IN THE USE OF DIGITAL TECHNOLOGIES IN TEACHING PRACTICE AND IMPLEMENTATION OF DIFFERENTIATED TEACHING AND ASSESSMENT ACTIVITIES WITH DIGITAL TOOLS, ACCORDING TO THE NEW 2023 CURRICULUM FOR THE FRENCH LANGUAGE 104

THE USE OF ARTIFICIAL INTELLIGENCE (AI) INTERFACES AS A TOOL TO ENHANCE EXPERIENTIAL LEARNING IN KINDERGARTEN 105

THE USE OF DIGITAL TECHNOLOGIES IN CHEMISTRY TEACHING: A STUDY OF ELECTRICAL CONDUCTIVITY OF SOLUTIONS THROUGH PhET COLORADO INTERACTIVE SIMULATION 106

INTERDISCIPLINARY APPROACH IN ENVIRONMENTAL EDUCATION: ENVIRONMENTAL ENGINEERING, CREATIVE WRITING, ARTIFICIAL INTELLIGENCE, AND DIGITAL MEDIA. 107

PEDAGOGICAL USE OF DIGITAL AND TECHNOLOGICAL MEDIA IN THE TEACHING OF ENGLISH: A THEORETICAL AND PRACTICAL APPROACH 108

“GUYS, LET’S GO TO THE CHURCH!” A GOOD PRACTICE IN THE RELIGIOUS STUDIES LESSON USING MULTIMEDIA MATERIAL 109

TA11: Dynamic learning environments and digital educational tools 111

THE ESEP PLATFORM (EUROPEAN SCHOOL EDUCATION PLATFORM) AS A MEANS OF DEVELOPING DIGITAL SKILLS FOR EDUCATORS & STUDENTS – ETWINNING & ERASMUS+ 113

DRAGGING AS A DYNAMIC MODELING OF THE TRADITIONAL, STATIC EUCLIDEAN ENVIRONMENT IN DYNAMIC GEOMETRY ENVIRONMENTS 114

MAPPING CULTURE AND ENVIRONMENT: A DIGITAL EDUCATIONAL ODYSSEY 115

REINTERPRETATION OF VAN HIELE LEVELS OF GEOMETRIC THINKING UNDER THE ADVOCACY OF THE ADVANTAGES OF DYNAMIC GEOMETRY ENVIRONMENTS 116

TA12: The Internet of Things and education. 117

THE INTERNET OF THINGS IN EDUCATION: TECHNOLOGICAL APPLICATIONS, PEDAGOGICAL PERSPECTIVES AND ADOPTION CHALLENGES 119

TA13: The use of Artificial Intelligence in education 121

TEACHING THE AGE OF THE EARTH USING CHATGPT 123

ARTIFICIAL INTELLIGENCE AND HYBRID TEACHING TOWARDS REVOLUTIONIZING TERTIARY EDUCATION 124

FOSTERING PROBLEM-SOLVING IN STEM: A HANDS-ON AI-DRIVEN GAS DETECTOR PROJECT 125

CREATIVE STUDENTS OR CREATIVE CHATGPT? SECONDARY EDUCATION STUDENTS' PERCEPTIONS OF THE IMPACT OF GENERATIVE ARTIFICIAL INTELLIGENCE ON CREATIVE THINKING. 126

FOSTERING THE SOFT SKILL OF CRITICAL THINKING THROUGH AI IN PRIMARY EDUCATION 127

e- TWINNING PROGRAM: “PHOTO MAGIC, FROM OLD PHOTOS TO AI” 128

THE INTEGRATION OF ARTIFICIAL INTELLIGENCE IN EDUCATION: ADVANTAGES AND DISADVANTAGES 129

ARTIFICIAL INTELLIGENCE IN PRIMARY EDUCATION
CASE STUDY: WRITTEN EXPRESSION IN THE 6TH GRADE 130

ARTIFICIAL INTELLIGENCE IN THE FIGHT AGAINST SCHOOL BULLYING 131

UTILIZATION OF ARTIFICIAL INTELLIGENCE IN EDUCATION SYSTEM IN CYPRUS: GLOBAL TRENDS AND LOCAL INITIATIVES 132

ARTIFICIAL INTELLIGENCE IN EDUCATION: A BIBLIOMETRIC ANALYSIS OF RESEARCH TRENDS AND FUTURE DIRECTIONS - FIRST EVIDENCE 133

PERCEPTIONS OF FUTURE EDUCATORS REGARDING THE UTILIZATION OF ARTIFICIAL INTELLIGENCE IN EDUCATION 134

COUNSELING GUIDANCE AND DIGITAL MEDIA: A SYSTEMATIC LITERATURE REVIEW (1998–2025) 135

THE USE OF ARTIFICIAL INTELLIGENCE IN THE EDUCATION OF STUDENTS WITH LEARNING DISABILITIES – A SYSTEMATIC REVIEW 136

ARTIFICIAL INTELLIGENCE IN EDUCATION POSSIBLE OBSTACLES AND RISKS 137

SEARCH vs PROMPT: NEW APPROACHES TO EDUCATION INCLUDING ARTIFICIAL INTELLIGENCE 138

ARTIFICIAL INTELLIGENCE TO AUTOMATICALLY ASSESS STUDENT PERFORMANCE: THE CASE OF AISE PROJECT 139

AI-ASSISTED TASK ADAPTATION/CREATION (AIATAC): A FRAMEWORK FOR INTEGRATING ARTIFICIAL INTELLIGENCE IN THE TEACHING OF ENGLISH AS A FOREIGN LANGUAGE 140

TA14: Pedagogical applications of educational robotics 143

COMPARATIVE USABILITY EVALUATION OF MECHATRONIC SYSTEMS 145

Wedosave: FORGOTTENBABYSYNDROME – ROBOTIC LIFE PROTECTION SYSTEM AGAINST FORGOTTEN BABY SYNDROME 146

INTEGRATING ALGORITHMIC THINKING AND PROGRAMMING INTO SECONDARY EDUCATION THROUGH EDUCATIONAL ROBOTICS: A CASE STUDY BASED ON THE NEW GREEK CURRICULUM OF IEP 147

CROCUS CULTIVATION ALGORITHM – EXPLORING NATURE'S STEPS THROUGH PROGRAMMING 148

TA15: Gamification in education 149

STUDY OF THE EFFECTIVENESS OF INNOVATIVE TEACHING INTERVENTIONS FOR LEARNING THE BOHR ATOMIC MODEL AND THE PERIODIC TABLE 151

LEARNING ABOUT THE MACEDONIAN STRUGGLE 152

DESIGN AND DEVELOPMENT OF A VIRTUAL REALITY EDUCATIONAL APPLICATION FOR THE TEACHING OF "DE STIJL" DESIGN MOVEMENENT 153

WHEN HISTORY BECOMES A GAME: UTILIZING ARTIFICIAL INTELLIGENCE AND GAMIFICATION IN HISTORY TEACHING. 154

GAMIFICATION AND DIGITAL STORYTELLING AS TOOLS FOR DEVELOPING SCREENING ACTIVITIES FOR PRAGMATIC DEFICITS IN CHILDREN 155

GAMIFICATION IN SECONDARY EDUCATION: BENEFITS, IMPLEMENTATION AND CHALLENGES 156

THE USE OF DIGITAL GAMES FOR TEACHING READING IN MULTILINGUAL GREEK PRIMARY SCHOOL CLASSROOMS: THE CASE OF D_READ-NARRATE 157

Virtual AlgoLab: VR GAME DEVELOPMENT FOR DATA STRUCTURES AND ALGORITHMS 158

TA16: Virtual, augmented, and mixed reality in education 159

VIRTUAL LABORATORIES IN STEM SECONDARY EDUCATION 161

TA17: Online educational environments for enhancing blended and distance learning 163

PREPARING DISTANCE EXAMINATIONS IN THE ERA OF ARTIFICIAL INTELLIGENCE.
A CASE STUDY: THE HOU MASTER'S PROGRAMME EDUCATION & TECHNOLOGIES
IN DISTANCE TEACHING AND LEARNING SYSTEMS – EDUCATIONAL SCIENCES (ETA) 165

DIGITAL MEDIA AND SPECIFIC LEARNING DISABILITIES (SLDS): OPPORTUNITIES, CHALLENGES,
AND PROSPECTS FOR EQUITABLE EDUCATION 166

TA18: Social networks and education 167

SOCIAL NETWORK AND EDUCATION 169

TA19: Online learning communities 171

EXPLORING THE INNOVATION OF HARVARD'S "OUT OF EDEN LEARN" ONLINE LEARNING
PLATFORM: A CASE STUDY IN A PRIMARY EFL CLASSROOM 173

TA20: Second-generation e-learning (Learning 2.0) 175

TA21: Mobile learning (Mobile Learning, BYOD) 175

TA22: Open educational resources 175

TA23: Free and open-source software for education 177

TEXT ANALYSIS WITH OPEN SOURCE SOFTWARE TOOLS IN EDUCATIONAL COUNSELING:
A STUDY OF STUDENT-COUNSELOR CONFERENCES 179

TA24: Teaching and digital media 181

VISUALIZATION OF PHYSICAL QUANTITIES OF ELECTROSTATIC FIELD, SPATIOTEMPORAL
VARIATIONS OF WAVES, ATOMIC ORBITALS, AND DETERMINATION OF FUNCTIONAL
CHARACTERISTICS OF CIRCUITS THROUGH SOFTWARE 183

EDUCATION AND DIGITAL MEDIA- INSPIRATION FOR THE IONIAN POET THROUGH
"KALLIPATEIRA" 184

TEACHING HISTORY USING DIGITAL MEDIA: PRESENTATION OF A TEACHING PLAN 185

THE VIDEO COURSE AS A MEANS OF TEACHING AND ASSESSMENT IN VOCATIONAL EDUCATION.
DESIGN AND IMPLEMENTATION OF A VIDEO COURSE IN VOCATIONAL HIGH SCHOOL COURSES 186

THE INFLUENCE OF CHARLES BAUDELAIRE ON THE POEMS: "ITHACA" BY C.P. CAVAFY AND
"JOURNEY TO KYTHERA" BY KOSTAS OURANIS THROUGH DIGITAL STORYTELLING 187

THE APPLICATION OF DIGITAL MEANS FOR DISTANCE TEACHING OF TECHNICAL SUBJECTS:
APPLICATION STUDY FOR ROAD DESIGN COURSE 188

ORGANIZING THE MUSIC LESSON WITH PADLET 189

SOPHOCLES' ANTIGONE IN PRESCHOOL EDUCATION: DIGITAL TOOLS AND PEDAGOGICAL
APPROACHES. 190

THE CORRELATION BETWEEN DIGITAL LITERACY AND COMMUNICATIVE LANGUAGE ACTIONS IN FOREIGN LANGUAGE LEARNING. GERMAN LANGUAGE: EXAMPLES FROM TEACHING PRACTICE WITH PRIMARY SCHOOL STUDENTS 191

DIGITAL PATHWAYS TO ANTIQUITY: TEACHING ANCIENT GREEK THROUGH EPIGRAPHY AND EDUCATIONAL TECHNOLOGY 192

USE OF DIGITAL TOOLS IN EDUCATION 193

THE UTILIZATION OF AUTOMATED EDUCATIONAL VIDEO SUMMARIES IN THE EDUCATIONAL PROCESS 194

TA25: Digital storytelling in teaching practice 195

THE CONTRIBUTION OF DIGITAL STORYTELLING TO LITERATURE IN SECONDARY EDUCATION: THE CASE OF THE PLATONIC ALLEGORY OF THE CAVE 197

DIGITAL STORYTELLING AS A CRUCIAL PEDAGOGICAL FRAMEWORK FOR ENHANCING THE FUNCTIONAL MANAGEMENT OF FRIENDLY RELATIONSHIPS IN STUDENTS FROM A SPECIAL PRIMARY SCHOOL 198

DIGITAL STORYTELLING AS A TOOL FOR CULTIVATING CRITICAL THINKING IN STUDENTS 199

DIGITAL STORYTELLING IN EARLY CHILDHOOD EDUCATION AND SPECIAL EDUCATION. CHILDREN CREATE DIGITAL STORIES 200

TA26: Educational assessment using digital media and tools 201

THE USE OF EYE-TRACKING TECHNOLOGY FOR THE ASSESSMENT OF PRAGMATIC SKILLS IN CHILDREN: A SYSTEMATIC REVIEW 203

TA27: Educational administration and digital technologies 205

T.P.E. AS A TOOL FOR MANAGING AND IMPROVING PERFORMANCE IN EDUCATION 207

THE CONTRIBUTION OF INFORMATION SYSTEMS IN EDUCATION: EVALUATING THE EFFECTIVENESS OF MYSCHOOL 208

EVALUATION OF THE MYSCHOOL PLATFORM: TEACHERS’ VIEWS, PROBLEMS AND IMPROVEMENT STRATEGIES 209

DIGITAL TRANSFORMATION AND EDUCATION: THE CONTRIBUTION OF MANAGEMENT INFORMATION SYSTEMS MYSCHOOL 210

QUALITATIVE EVALUATION OF OPSYD AS AN EGOV SYSTEM FOR EDUCATION MANAGEMENT 211

REPORT ON THE FIRST SIX-MONTH EXPERIENCE FROM THE IMPLEMENTATION OF THE TEACHERS' ASSOCIATION DIGITAL BOOK OF ACTIONS IN SCHOOL UNITS: FROM THE CONSOLIDATED ADMINISTRATIVE RELATIONSHIPS OF TEACHERS TO THE CONSOLIDATION OF THE DIGITAL BUREAUCRACY 212

EDUCATIONAL LEADERSHIP IN THE DIGITAL ERA: CHALLENGES, INNOVATIONS, AND TRANSFORMATIVE PRACTICES 213

EDUCATIONAL DIGITIZATION: CHALLENGES, OPPORTUNITIES, AND ITS IMPORTANCE FOR MODERNIZATION AND EQUALITY IN THE EDUCATIONAL PROCESS 214

THEORETICAL APPROACHES TO THE PERCEPTION OF INFORMATION SYSTEMS USERS EDUCATION MANAGEMENT 215

"THE ATTITUDES AND PERCEPTIONS OF PRIMARY AND SECONDARY EDUCATION EXECUTIVES IN THE GREEK EDUCATION SYSTEM, ON THE ADMINISTRATION OF EDUCATION AND THE INNOVATIONS THAT ARE IMPLEMENTED" 216

DIGITAL MEDIA AND MANAGEMENT OF EDUCATIONAL UNITS 217

TA28: Teachers' professional development through the use of new technologies 218

SELF-TRAINING OF TEACHERS USING E-LEARNING-LAMAP IN THE FRENCH EDUCATION SYSTEM 220

THE GENDER DIMENSION IN THE UTILIZATION AND USE OF DIGITAL TECHNOLOGY (BY TEACHERS, MALE AND FEMALE) IN SECONDARY EDUCATION 221

THE PROFESSIONAL AND SCIENTIFIC DEVELOPMENT OF TEACHERS AS A CRITICAL DIMENSION AND PROSPECT OF ARTIFICIAL INTELLIGENCE CAPABILITIES 222

DIGITAL PROFESSIONAL DEVELOPMENT & EDUCATION: THE TEACHER IN THE TECHNOLOGICAL AGE 223

PERCEPTIONS AND ATTITUDES OF PRESERVICE SPEECH THERAPISTS TOWARD EYE-TRACKING TECHNOLOGY IN THE DIAGNOSIS AND SUPPORT OF READING SKILLS 224

Conference Full Papers 225

TA1: Research on the development, implementation, and use of contemporary technologies in the modern school, education, and learning 227

INNOVATIVE APPROACHES TO TEACHING: THE CONTRIBUTION OF AUGMENTED AND VIRTUAL REALITY TO LEARNING ENGLISH THROUGH PHYSICAL ACTIVITY 229

TEACHING QUANTUM THEORY IN SECONDARY EDUCATION: THE DOUBLE-SLIT EXPERIMENT AND THE DEVELOPMENT OF AN ICT-BASED EDUCATIONAL SCENARIO FOR 9TH GRADE STUDENTS 239

TA2: The pedagogical integration of digital media into teaching practice (Learning Theories, Curricula, and Digital Media) 247

THE IMPACT OF DIGITAL TECHNOLOGIES IN THE TEACHING OF PHYSICAL EDUCATION: IMPACT ANALYSIS AND PERFORMANCE ASSESSMENT OF STUDENTS AND TEACHERS 249

ASIA MINOR CATASTROPHE AND ASIA MINOR MONUMENTS: AN EDUCATIONAL INITIATIVE USING DIGITAL TOOLS 258

MUSIQUE CONCRÈTE AS AN INSTRUMENT FOR DIGITAL STORYTELLING: AN ELECTROACOUSTIC COMPOSITION WORKSHOP WITHIN THE FRAMEWORK OF THE MUSIC ENSEMBLES COURSE 264

RECONNECTING STUDENTS: ENSURING EMOTIONAL GROWTH IN A DIGITALLY DRIVEN EDUCATIONAL SYSTEM 273

LEVERAGING MULTILITERACIES AND CREATIVE WRITING IN THE STORYTELLING TEACHING 279

TRANSFORMING PHYSICS TEACHING: THE ROLE OF CRITICAL PEDAGOGY AND ICTS 290

THE TRANSITION OF TECHNOLOGY AND THE ROLE OF “NEW ORALITY” IN THE EDUCATIONAL PROCESS OF THE APPLIED ARTS 300

THE NECESSITY OF THE PEDAGOGICAL INTEGRATION OF DIGITAL MEDIA IN TEACHING PRACTICE 309

FROM THEORETICAL APPROACH TO DIGITAL LEARNING 315

TA3: Utilization and evaluation of digital and technological media 319

DIGITAL TRANSFORMATION AT THE MUSIC SCHOOL OF AMFISSA "ELENI KARAINDROU": EXPERIENCES, CHALLENGES, AND PROSPECTS FROM THE IMPLEMENTATION OF INNOVATIVE DIGITAL TOOLS IN EDUCATIONAL PRACTICE 321

THE FLORENTINE RENAISSANCE AND THE GREEK SCHOLARS: A CONNECTION THROUGH DIGITAL MEDIA 329

RICHARD MAYER’S MULTIMEDIA LEARNING AND THE CREATION OF EDUCATIONAL VIDEO IN CONTEMPORARY TEACHING MODELS 335

MODEL FOR MONITORING DIETARY INTAKE, LIFESTYLE, AND PHYSICAL ACTIVITY OF PATIENTS USING INFORMATION AND COMMUNICATION TECHNOLOGIES 344

THE APPLICATION OF SENTIMENT ANALYSIS IN HISTORY SCHOOL TEXTBOOKS: THE CASE OF ASIA MINOR 351

DEVELOPING ORIGINAL TEACHING MATERIAL FOR GERMAN AS A FOREIGN LANGUAGE USING ARTIFICIAL INTELLIGENCE SOFTWARE AND DIGITAL TOOLS 358

ADOLESCENTS’ PERSPECTIVES ON ELECTRONIC GAMES 367

TA4: The digital divide and emerging inequalities 373

TA5: Digital and visual literacy 375

SCHOOL LIBRARY AS A LEARNING HUB: ACTION PLAN FOR DIGITAL UPGRADING 377

VISUALIZING LEARNING: DESIGN PRINCIPLES, IMPLEMENTATION, AND BENEFITS OF INFOGRAPHICS IN THE EDUCATIONAL LEARNING PROCESS 383

TA6: Digital ethics 393

TA7: Digital citizenship 395

SCIENCE AND THE DIGITAL CITIZEN: AN EDUCATIONAL SCENARIO APPLIED TO CHEMISTRY 397

TA8: Inclusive digital education 405

DIGITAL HIVES ON E-ME FOR TEACHING GREEK TO REFUGEE CHILDREN: ENHANCING INCLUSIVE EDUCATION THROUGH CONNECTIVISM AND GAMIFICATION 407

TEACHING GREEK IN THE INTERCULTURAL CLASSROOM USING THE DIGITAL LANGUAGE LEARNING TOOL "AKELIUS LANGUAGES" 413

IMPLEMENTATION OF WEBQUESTS ALIGNED WITH THE PRINCIPLES OF INCLUSIVE DIGITAL EDUCATION WITHIN THE FRAMEWORK OF THE ERASMUS+ KA210 PROJECT “MEDITERRANEAN DIET FOR OVERALL HEALTH” 420

TA9: The sustainable digital school 429

TA10: Best practices in the pedagogical use of digital technologies 431

A NEW APPROACH TO TEACHING NEW TECHNOLOGIES BASED ON FI AND FD COGNITIVE STYLES 433

THE USE OF THE INTERNET IN LANGUAGE EDUCATION IN THE 3RD GRADE OF THE GREEK SENIOR HIGH SCHOOL (LYCEUM) 439

DECIDING BASED ON DATA: AN INNOVATIVE INSTRUCTIONAL SCENARIO USING THE PROJECT METHOD IN A SECOND CHANCE SCHOOL 445

INNOVATIVE TEACHING APPROACHES: ENHANCING INDEPENDENT LEARNING THROUGH ARTIFICIAL INTELLIGENCE AND MUSIC 453

ART AND DIGITAL MEDIA IN EDUCATION: A CASE STUDY AT THE EVENING VOCATIONAL HIGH SCHOOL OF PREVEZA 459

THE USE OF PODCASTS IN LITERATURE COURSES – A QUALITATIVE APPROACH 466

BEST PRACTICES FOR INTEGRATING DIGITAL TECHNOLOGIES IN TEACHING: A HOLISTIC APPROACH 473

eTwinning: BUILDING A STRONG COMMUNITY OF INNOVATIVE TEACHERS 481

THE USE OF DIGITAL TOOLS IN THE ASSEEEMENT OF THE HUMAN RIGHTS CLIMATE IN THE SCHOOL ENVIROMENT 492

TA11: Dynamic learning environments and digital educational tools 499

THE ESEP PLATFORM (EUROPEAN SCHOOL EDUCATION PLATFORM) AS A MEANS OF DEVELOPING DIGITAL SKILLS FOR EDUCATORS & STUDENTS – ETWINNING & ERASMUS+ 501

MAPPING CULTURE AND ENVIRONMENT: A DIGITAL EDUCATIONAL ODYSSEY 510

TA12: The Internet of Things and education. 521

THE INTERNET OF THINGS IN EDUCATION: TECHNOLOGICAL APPLICATIONS, PEDAGOGICAL PERSPECTIVES AND ADOPTION CHALLENGES 523

TA13: The use of Artificial Intelligence in education 531

TEACHING THE AGE OF THE EARTH USING CHATGPT 533

ARTIFICIAL INTELLIGENCE AND HYBRID TEACHING TOWARDS REVOLUTIONIZING TERTIARY EDUCATION 543

CREATIVE STUDENTS OR CREATIVE CHATGPT? SECONDARY EDUCATION STUDENTS' PERCEPTIONS OF THE IMPACT OF GENERATIVE ARTIFICIAL INTELLIGENCE ON CREATIVE THINKING. 552

THE INTEGRATION OF ARTIFICIAL INTELLIGENCE IN EDUCATION: ADVANTAGES AND DISADVANTAGES 561

UTILIZATION OF ARTIFICIAL INTELLIGENCE IN EDUCATION SYSTEM IN CYPRUS: GLOBAL TRENDS AND LOCAL INITIATIVES 569

PERCEPTIONS OF FUTURE EDUCATORS REGARDING THE UTILIZATION OF ARTIFICIAL INTELLIGENCE IN EDUCATION 579

COUNSELING GUIDANCE AND DIGITAL MEDIA: A SYSTEMATIC LITERATURE REVIEW (1998–2025) 587

ARTIFICIAL INTELLIGENCE IN EDUCATION POSSIBLE OBSTACLES AND RISKS 597

ARTIFICIAL INTELLIGENCE TO AUTOMATICALLY ASSESS STUDENT PERFORMANCE: THE CASE OF AISE PROJECT 603

AI-ASSISTED TASK ADAPTATION/CREATION (AIATAC): A FRAMEWORK FOR INTEGRATING ARTIFICIAL INTELLIGENCE IN THE TEACHING OF ENGLISH AS A FOREIGN LANGUAGE 612

TA14: Pedagogical applications of educational robotics 617

COMPARATIVE USABILITY EVALUATION OF MECHATRONIC SYSTEMS 619

INTEGRATING ALGORITHMIC THINKING AND PROGRAMMING INTO SECONDARY EDUCATION THROUGH EDUCATIONAL ROBOTICS: A CASE STUDY BASED ON THE NEW GREEK CURRICULUM OF IEP 627

CROCUS CULTIVATION ALGORITHM – EXPLORING NATURE'S STEPS THROUGH PROGRAMMING 638

TA15: Gamification in education 643

GAMIFICATION AND DIGITAL STORYTELLING AS TOOLS FOR DEVELOPING SCREENING ACTIVITIES FOR PRAGMATIC DEFICITS IN CHILDREN 645

GAMIFICATION IN SECONDARY EDUCATION: BENEFITS, IMPLEMENTATION AND CHALLENGES 653

TA16: Virtual, augmented, and mixed reality in education 663

VIRTUAL LABORATORIES IN STEM SECONDARY EDUCATION 665

TA17: Online educational environments for enhancing blended and distance learning 673

TA18: Social networks and education 675

TA19: Online learning communities 677

EXPLORING THE INNOVATION OF HARVARD'S "OUT OF EDEN LEARN" ONLINE LEARNING PLATFORM: A CASE STUDY IN A PRIMARY EFL CLASSROOM 679

TA20: Second-generation e-learning (Learning 2.0) 691

TA21: Mobile learning (Mobile Learning, BYOD) 693

TA22: Open educational resources 695

TA23: Free and open-source software for education 697

TA24: Teaching and digital media 699

VISUALIZATION OF PHYSICAL QUANTITIES OF ELECTROSTATIC FIELD, SPATIOTEMPORAL VARIATIONS OF WAVES, ATOMIC ORBITALS, AND DETERMINATION OF FUNCTIONAL CHARACTERISTICS OF CIRCUITS THROUGH SOFTWARE 701

EDUCATION AND DIGITAL MEDIA- INSPIRATION FOR THE IONIAN POET THROUGH "KALLIPATEIRA" 710

THE VIDEO COURSE AS A MEANS OF TEACHING AND ASSESSMENT IN VOCATIONAL EDUCATION. DESIGN AND IMPLEMENTATION OF A VIDEO COURSE IN VOCATIONAL HIGH SCHOOL COURSES 715

THE APPLICATION OF DIGITAL MEANS FOR DISTANCE TEACHING OF TECHNICAL SUBJECTS: APPLICATION STUDY FOR ROAD DESIGN COURSE 725

ORGANIZING THE MUSIC LESSON WITH PADLET 731

THE CORRELATION BETWEEN DIGITAL LITERACY AND COMMUNICATIVE LANGUAGE ACTIONS IN FOREIGN LANGUAGE LEARNING. GERMAN LANGUAGE: EXAMPLES FROM TEACHING PRACTICE WITH PRIMARY SCHOOL STUDENTS 739

DIGITAL PATHWAYS TO ANTIQUITY: TEACHING ANCIENT GREEK THROUGH EPIGRAPHY AND EDUCATIONAL TECHNOLOGY 746

USE OF DIGITAL TOOLS IN EDUCATION 753

THE UTILIZATION OF AUTOMATED EDUCATIONAL VIDEO SUMMARIES IN THE EDUCATIONAL PROCESS 761

TA25: Digital storytelling in teaching practice 769

TA26: Educational assessment using digital media and tools 771

TA27: Educational administration and digital technologies. 773

T.P.E. AS A TOOL FOR MANAGING AND IMPROVING PERFORMANCE IN EDUCATION 775

THE CONTRIBUTION OF INFORMATION SYSTEMS IN EDUCATION: EVALUATING THE EFFECTIVENESS OF MYSCHOOL 780

EVALUATION OF THE MYSCHOOL PLATFORM: TEACHERS' VIEWS, PROBLEMS AND IMPROVEMENT STRATEGIES 787

DIGITAL TRANSFORMATION AND EDUCATION: THE CONTRIBUTION OF MANAGEMENT INFORMATION SYSTEMS MYSCHOOL 795

QUALITATIVE EVALUATION OF OPSYD AS AN EGOV SYSTEM FOR EDUCATION MANAGEMENT 802

EDUCATIONAL DIGITIZATION: CHALLENGES, OPPORTUNITIES, AND ITS IMPORTANCE FOR MODERNIZATION AND EQUALITY IN THE EDUCATIONAL PROCESS 810

THEORETICAL APPROACHES TO THE PERCEPTION OF INFORMATION SYSTEMS USERS EDUCATION MANAGEMENT 817

THE ATTITUDES AND PERCEPTIONS OF PRIMARY AND SECONDARY EDUCATION EXECUTIVES IN THE GREEK EDUCATION SYSTEM, ON THE ADMINISTRATION OF EDUCATION AND THE INNOVATIONS THAT ARE IMPLEMENTED 824

TA28: Teachers' professional development through the use of new technologies. 831

THE GENDER DIMENSION IN THE UTILIZATION AND USE OF DIGITAL TECHNOLOGY (BY TEACHERS, MALE AND FEMALE) IN SECONDARY EDUCATION 833

ΘΠ1: Έρευνα για την ανάπτυξη, εφαρμογή και χρήση σύγχρονων τεχνολογιών στο σύγχρονο σχολείο, στην εκπαίδευση και τη μάθηση 841

ΚΑΙΝΟΤΟΜΕΣ ΠΡΟΣΕΓΓΙΣΕΙΣ ΣΤΗ ΔΙΔΑΣΚΑΛΙΑ: Η ΣΥΜΒΟΛΗ ΤΗΣ ΕΠΑΥΞΗΜΕΝΗΣ ΚΑΙ ΕΙΚΟΝΙΚΗΣ ΠΡΑΓΜΑΤΙΚΟΤΗΤΑΣ ΣΤΗΝ ΕΚΜΑΘΗΣΗ ΤΗΣ ΑΓΓΛΙΚΗΣ ΓΛΩΣΣΑΣ ΜΕΣΩ ΦΥΣΙΚΗΣ ΔΡΑΣΤΗΡΙΟΤΗΤΑΣ 843

STOP MOTION: ΕΝΑ ΣΧΕΔΙΑΣΤΙΚΟ ΕΡΓΑΛΕΙΟ ΓΙΑ ΤΗΝ ΠΑΡΑΓΩΓΗ ΕΚΠΑΙΔΕΥΤΙΚΟΥ ΥΛΙΚΟΥ 844

ΤΟ ΜΕΛΛΟΝ ΤΗΣ ΕΞ ΑΠΟΣΤΑΣΕΩΣ ΕΚΠΑΙΔΕΥΣΗΣ ΜΕΣΑ ΑΠΟ ΤΟ ΠΡΙΣΜΑ ΜΑΘΗΤΩΝ ΔΕΥΤΕΡΟΒΑΘΜΙΑΣ ΕΚΠΑΙΔΕΥΣΗΣ ΤΩΝ ΝΟΜΩΝ ΑΤΤΙΚΗΣ ΚΑΙ ΚΥΚΛΑΔΩΝ 845

ΠΑΡΑΓΟΝΤΕΣ ΠΟΥ ΕΠΗΡΕΑΣΑΝ ΤΗ ΣΥΜΜΕΤΟΧΗ ΤΩΝ ΜΑΘΗΤΩΝ ΣΤΗΝ ΕΞ ΑΠΟΣΤΑΣΕΩΣ ΔΙΔΑΣΚΑΛΙΑ ΚΑΤΑ ΤΗΝ ΠΑΝΔΗΜΙΑ 846

ΤΕΧΝΗΤΗ ΝΟΗΜΟΣΥΝΗ ΚΑΙ ΦΥΣΙΚΗ ΑΓΩΓΗ. ΔΙΕΡΕΥΝΗΣΗ ΓΝΩΣΕΩΝ ΤΩΝ ΚΑΘΗΓΗΤΩΝ Φ.Α ΠΡΩΤΟΒΑΘΜΙΑΣ ΚΑΙ ΔΕΥΤΕΡΟΒΑΘΜΙΑΣ ΕΚΠΑΙΔΕΥΣΗΣ 847

VIVLIOTHINKY: ΕΝΑ PROJECT ΣΥΝΕΡΓΑΤΙΚΗΣ ΜΑΘΗΣΗΣ ΓΙΑ ΤΗΝ ΑΝΑΠΤΥΞΗ ΤΩΝ ΚΟΙΝΩΝΙΚΩΝ ΚΑΙ ΨΗΦΙΑΚΩΝ ΔΕΞΙΟΤΗΤΩΝ ΒΑΣΙΣΜΕΝΟ ΣΤΗΝ ΥΠΗΡΕΣΙΑ E-GRAFIS ΤΟΥ ΠΣΔ 848

ΔΙΔΑΣΚΑΛΙΑ ΤΗΣ ΚΒΑΝΤΙΚΉΣ ΘΕΩΡΙΑΣ ΣΤΗ ΔΕΥΤΕΡΟΒΑΘΜΙΑ ΕΚΠΑΙΔΕΥΣΗ: ΤΟ ΠΕΊΡΑΜΑ ΤΗΣ ΔΙΠΛΗΣ ΣΧΙΣΜΗΣ ΚΑΙ Η ΔΗΜΙΟΥΡΓΙΑ ΕΚΠΑΙΔΕΥΤΙΚΟΥ ΣΕΝΑΡΙΟΥ ΓΙΑ ΜΑΘΗΤΈΣ-ΜΑΘΗΤΡΙΕΣ ΤΗΣ Γ' ΓΥΜΝΑΣΙΟΥ ΜΕ ΧΡΗΣΗ ΤΠΕ 849

ΣΤΑΣΕΙΣ ΚΑΙ ΠΕΠΟΙΘΗΣΕΙΣ ΕΚΠΑΙΔΕΥΤΙΚΩΝ ΓΙΑ ΤΗ ΧΡΗΣΗ ΕΡΓΑΛΕΙΩΝ ΤΕΧΝΗΤΗΣ ΝΟΗΜΟΣΥΝΗΣ ΣΤΗΝ ΕΚΠΑΙΔΕΥΣΗ 850

ΕΚΠΑΙΔΕΥΤΙΚΕΣ ΔΡΑΣΕΙΣ ΚΑΙ ΚΑΙΝΟΤΟΜΙΑ: Ο ΚΡΟΚΟΣ ΚΟΖΑΝΗΣ ΚΑΙ ΤΟ BEEBOT ΩΣ ΔΙΔΑΚΤΙΚΑ ΕΡΓΑΛΕΙΑ 851

ΕΞΕΡΕΥΝΗΣΗ ΤΗΣ ΔΥΝΑΜΙΚΗΣ ΤΩΝ ΔΙΚΤΥΩΝ ΦΙΛΙΑΣ ΑΞΙΟΠΟΙΩΝΤΑΣ ΑΛΓΟΡΙΘΜΟΥΣ ΤΕΧΝΗΤΗΣ ΝΟΗΜΟΣΥΝΗΣ: ΜΙΑ ΜΕΛΕΤΗ ΣΕ ΕΙΔΙΚΟ ΣΧΟΛΕΙΟ 852

ΔΙΕΡΕΥΝΗΣΗ ΓΝΩΣΕΩΝ ΜΑΘΗΤΩΝ ΔΗΜΟΤΙΚΩΝ ΣΧΟΛΕΙΩΝ ΓΙΑ ΤΗΝ ΤΕΧΝΗΤΗ ΝΟΗΜΟΣΥΝΗ ΣΤΗΝ ΕΚΠΑΙΔΕΥΣΗ 853

ΘΠ2: Η παιδαγωγική ενσωμάτωση των Ψηφιακών Μέσων στη διδακτική πράξη (Θεωρίες Μάθησης, Προγράμματα Σπουδών και Ψηφιακά Μέσα) 855

Η ΕΠΙΔΡΑΣΗ ΤΩΝ ΨΗΦΙΑΚΩΝ ΤΕΧΝΟΛΟΓΙΩΝ ΣΤΗ ΔΙΔΑΣΚΑΛΙΑ ΤΗΣ ΦΥΣΙΚΗΣ ΑΓΩΓΗΣ: ΑΝΑΛΥΣΗ ΕΠΙΠΤΩΣΕΩΝ ΚΑΙ ΑΞΙΟΛΟΓΗΣΗ ΑΠΟΔΟΣΗΣ ΜΑΘΗΤΩΝ ΚΑΙ ΕΚΠΑΙΔΕΥΤΙΚΩΝ 857

ΔΙΔΑΣΚΑΛΙΑ ΟΛΟΚΛΗΡΟΥ ΤΟΥ ΛΟΓΟΤΕΧΝΙΚΟΥ ΕΡΓΟΥ ΤΟΥ Κ. ΘΕΟΤΟΚΗ «Η ΤΙΜΗ ΚΑΙ ΤΟ ΧΡΗΜΑ» ΜΕ ΤΗ ΧΡΗΣΗ Τ.Π.Ε. 858

ΜΙΚΡΑΣΙΑΤΙΚΗ ΚΑΤΑΣΤΡΟΦΗ ΚΑΙ ΜΙΚΡΑΣΙΑΤΙΚΑ ΜΝΗΜΕΙΑ: ΕΚΠΑΙΔΕΥΤΙΚΗ ΠΡΩΤΟΒΟΥΛΙΑ ΜΕ ΧΡΗΣΗ ΨΗΦΙΑΚΩΝ ΕΡΓΑΛΕΙΩΝ 859

Η MUSIQUE CONCRETE ΩΣ ΕΡΓΑΛΕΙΟ ΨΗΦΙΑΚΗΣ ΑΦΗΓΗΣΗΣ: ΕΝΑ ΕΡΓΑΣΤΗΡΙΟ ΗΛΕΚΤΡΟΑΚΟΥΣΤΙΚΗΣ ΜΟΥΣΙΚΗΣ ΣΥΝΘΕΣΗΣ ΣΤΟ ΜΑΘΗΜΑ ΤΩΝ ΜΟΥΣΙΚΩΝ ΣΥΝΟΛΩΝ 860

ΕΠΑΝΑΣΥΝΔΕΟΥΜΕ ΤΟΥΣ ΜΑΘΗΤΕΣ ΜΑΣ ΔΙΑΣΦΑΛΙΖΟΝΤΑΣ ΤΗ ΣΥΝΑΙΣΘΗΜΑΤΙΚΗ ΑΝΑΠΤΥΞΗ ΤΟΥΣ ΣΕ ΕΝΑ ΨΗΦΙΑΚΑ ΚΑΘΟΔΗΓΟΥΜΕΝΟ ΕΚΠΑΙΔΕΥΤΙΚΟ ΣΥΣΤΗΜΑ 861

Ο ΡΟΛΟΣ ΤΩΝ ΕΚΠΑΙΔΕΥΤΙΚΩΝ ΣΤΗΝ ΑΠΟΤΕΛΕΣΜΑΤΙΚΗ ΕΦΑΡΜΟΓΗ ΤΗΣ ΔΙΑΦΟΡΟΠΟΙΗΜΕΝΗΣ ΔΙΔΑΣΚΑΛΙΑΣ ΜΕ ΤΗΝ ΑΞΙΟΠΟΙΗΣΗ ΤΩΝ ΝΕΩΝ ΤΕΧΝΟΛΟΓΙΩΝ 862

ΔΙΔΑΚΤΙΚΗ ΠΡΟΤΑΣΗ ΑΞΙΟΠΟΙΗΣΗΣ ΤΩΝ ΠΟΛΥΓΡΑΜΜΑΤΙΣΜΩΝ ΚΑΙ ΤΗΣ ΔΗΜΙΟΥΡΓΙΚΗΣ ΓΡΑΦΗΣ ΣΤΗ ΔΙΔΑΣΚΑΛΙΑ ΤΗΣ ΑΦΗΓΗΣΗΣ 863

ΜΕΤΑΣΧΗΜΑΤΙΖΟΝΤΑΣ ΤΗ ΔΙΔΑΣΚΑΛΙΑ ΤΗΣ ΦΥΣΙΚΗΣ: Ο ΡΟΛΟΣ ΤΗΣ ΚΡΙΤΙΚΗΣ ΠΑΙΔΑΓΩΓΙΚΗΣ ΚΑΙ ΤΩΝ ΤΠΕ 864

ΕΠΙΔΡΑΣΤΙΚΕΣ ΤΕΧΝΟΛΟΓΙΕΣ ΣΤΗ ΛΟΓΙΣΤΙΚΗ ΚΑΙ ΕΛΕΓΚΤΙΚΗ: ΕΝΑ ΜΕΤΑΚΥΛΙΟΜΕΝΟ ΕΚΠΑΙΔΕΥΤΙΚΟ ΒΑΡΟΣ 865

Η ΜΕΤΑΒΑΣΗ ΤΗΣ ΤΕΧΝΟΛΟΓΙΑΣ ΚΑΙ Ο ΡΟΛΟΣ ΤΗΣ «ΝΕΑΣ ΠΡΟΦΟΡΙΚΟΤΗΤΑΣ» ΣΤΗΝ ΕΚΠΑΙΔΕΥΤΙΚΗ ΔΙΑΔΙΚΑΣΙΑ ΤΩΝ ΕΦΑΡΜΟΣΜΕΝΩΝ ΤΕΧΝΩΝ 866

Η ΑΝΑΓΚΑΙΟΤΗΤΑ ΤΗΣ ΠΑΙΔΑΓΩΓΙΚΗΣ ΕΝΣΩΜΑΤΩΣΗΣ ΤΩΝ ΨΗΦΙΑΚΩΝ ΜΕΣΩΝ ΣΤΗ ΔΙΔΑΚΤΙΚΗ ΠΡΑΞΗ 867

ΑΠΟ ΤΗ ΘΕΩΡΗΤΙΚΗ ΠΡΟΣΕΓΓΙΣΗ ΣΤΗΝ ΨΗΦΙΑΚΗ ΜΑΘΗΣΗ 868

ΘΠ3: Αξιοποίηση και Αξιολόγηση των Ψηφιακών και Τεχνολογικών Μέσων 869

ΨΗΦΙΑΚΟΣ ΜΕΤΑΣΧΗΜΑΤΙΣΜΟΣ ΣΤΟ ΜΟΥΣΙΚΟ ΣΧΟΛΕΙΟ ΑΜΦΙΣΣΑΣ «ΕΛΕΝΗ ΚΑΡΑΪΝΔΡΟΥ»: ΕΜΠΕΙΡΙΕΣ, ΠΡΟΚΛΗΣΕΙΣ ΚΑΙ ΠΡΟΟΠΤΙΚΕΣ ΑΠΟ ΤΗΝ ΕΦΑΡΜΟΓΗ ΚΑΙΝΟΤΟΜΩΝ ΨΗΦΙΑΚΩΝ ΕΡΓΑΛΕΙΩΝ ΣΤΗΝ ΕΚΠΑΙΔΕΥΤΙΚΗ ΠΡΑΞΗ 871

ΤΑ ΟΦΕΛΗ ΤΗΣ ΕΞ ΑΠΟΣΤΑΣΕΩΣ ΕΚΠΑΙΔΕΥΣΗΣ ΜΕΣΑ ΑΠΟ ΤΟ ΠΡΙΣΜΑ ΜΑΘΗΤΩΝ ΔΕΥΤΕΡΟΒΑΘΜΙΑΣ ΕΚΠΑΙΔΕΥΣΗΣ ΤΩΝ ΝΟΜΩΝ ΑΤΤΙΚΗΣ ΚΑΙ ΚΥΚΛΑΔΩΝ 872

ΔΗΜΙΟΥΡΓΙΑ ΠΟΛΙΤΙΣΤΙΚΟΥ ΠΡΟΓΡΑΜΜΑΤΟΣ ΜΕ ΤΗ ΒΟΗΘΕΙΑ ΨΗΦΙΑΚΩΝ ΜΕΣΩΝ 873

ΑΞΙΟΛΟΓΗΣΗ ΜΙΑΣ ΕΚΠΑΙΔΕΥΤΙΚΗΣ ΕΦΑΡΜΟΓΗΣ ΓΙΑ ΚΙΝΗΤΕΣ ΣΥΣΚΕΥΕΣ ANDROID, ΓΙΑ ΤΗΝ ΚΑΤΑΝΟΗΣΗ ΕΝΝΟΙΩΝ ΤΗΣ ΦΥΣΙΚΗΣ Ε' ΔΗΜΟΤΙΚΟΥ ΜΕ ΑΞΙΟΠΟΙΗΣΗ VOICE ASSISTANT 874

Η ΠΟΛΥΜΕΣΙΚΗ ΜΑΘΗΣΗ ΤΟΥ RICHARD MAYER ΚΑΙ Η ΔΗΜΙΟΥΡΓΙΑ ΕΚΠΑΙΔΕΥΤΙΚΟΥ ΒΙΝΤΕΟ ΣΤΑ ΣΥΓΧΡΟΝΑ ΜΟΝΤΕΛΑ ΔΙΔΑΣΚΑΛΙΑΣ 875

ΣΥΜΕΡΑΣΜΑΤΑ ΕΡΕΥΝΑΣ ΓΙΑ ΤΗ ΧΡΗΣΗ ΤΩΝ ΜΕΣΩΝ ΚΟΙΝΩΝΙΚΗΣ ΔΙΚΤΥΩΣΗΣ ΑΠΟ ΕΦΗΒΟΥΣ 876

Η ΑΞΙΟΠΟΙΗΣΗ ΤΩΝ ΝΕΩΝ ΤΕΧΝΟΛΟΓΙΩΝ ΣΤΗ ΔΙΔΑΚΤΙΚΗ ΠΡΑΞΗ: ΜΕΛΕΤΗ ΣΤΗΝ ΤΡΙΤΟΒΑΘΜΙΑ ΕΚΠΑΙΔΕΥΣΗ 877

ΜΟΝΤΕΛΟ ΠΑΡΑΚΟΛΟΥΘΗΣΗΣ ΤΗΣ ΔΙΑΤΡΟΦΙΚΗΣ ΠΡΟΣΛΗΨΗΣ, ΤΟΥ ΤΡΟΠΟΥ ΖΩΗΣ ΚΑΙ ΤΗΣ ΦΥΣΙΚΗΣ ΔΡΑΣΤΗΡΙΟΤΗΤΑΣ ΑΣΘΕΝΩΝ ΜΕ ΤΗ ΧΡΗΣΗ ΤΕΧΝΟΛΟΓΙΩΝ ΠΛΗΡΟΦΟΡΙΚΗΣ ΚΑΙ ΕΠΙΚΟΙΝΩΝΙΩΝ 878

ΕΡΕΥΝΑ ΓΙΑ ΤΗΝ ΑΞΙΟΠΟΙΗΣΗ ΤΩΝ ΤΕΧΝΟΛΟΓΙΩΝ ΠΛΗΡΟΦΟΡΙΑΣ ΚΑΙ ΕΠΙΚΟΙΝΩΝΙΩΝ ΑΠΟ ΤΟΥΣ ΕΚΠΑΙΔΕΥΤΙΚΟΥΣ ΤΗΣ ΔΕΥΤΕΡΟΒΑΘΜΙΑΣ ΕΚΠΑΙΔΕΥΣΗΣ ΤΟΥ ΝΟΜΟΥ ΙΩΑΝΝΙΝΩΝ 879

ΕΦΑΡΜΟΓΗ ΤΗΣ ΑΝΑΛΥΣΗΣ ΣΥΝΑΙΣΘΗΜΑΤΟΣ ΣΤΑ ΣΧΟΛΙΚΑ ΕΓΧΕΙΡΙΔΙΑ ΙΣΤΟΡΙΑΣ: Η ΠΕΡΙΠΤΩΣΗ ΤΗΣ ΜΙΚΡΑΣ ΑΣΙΑΣ 880

ΑΝΑΠΤΥΞΗ ΠΡΩΤΟΤΥΠΟΥ ΔΙΔΑΚΤΙΚΟΥ ΥΛΙΚΟΥ ΓΙΑ ΤΗ ΓΕΡΜΑΝΙΚΗ ΩΣ ΞΕΝΗ ΓΛΩΣΣΑ ΜΕ ΧΡΗΣΗ ΛΟΓΙΣΜΙΚΟΥ ΤΕΧΝΗΤΗΣ ΝΟΗΜΟΣΥΝΗΣ ΚΑΙ ΨΗΦΙΑΚΩΝ ΕΡΓΑΛΕΙΩΝ 881

ΤΑ ΗΛΕΚΤΡΟΝΙΚΑ ΠΑΙΧΝΙΔΙΑ ΜΕΣΑ ΑΠΟ ΤΟ ΒΛΕΜΜΑ ΤΩΝ ΕΦΗΒΩΝ 882

ΘΠ4: Ψηφιακό χάσμα και νέες ανισότητες 883

ΤΟ ΨΗΦΙΑΚΟ ΧΑΣΜΑ ΣΤΗΝ ΠΡΩΤΟΒΑΘΜΙΑ ΕΚΠΑΙΔΕΥΣΗ ΣΤΗΝ ΕΛΛΑΔΑ: ΠΡΟΚΛΗΣΕΙΣ, ΝΕΕΣ ΑΝΙΣΟΤΗΤΕΣ ΚΑΙ ΠΡΑΚΤΙΚΕΣ ΧΩΡΙΣ ΑΠΟΚΛΕΙΣΜΟΥΣ 884

ΨΗΦΙΑΚΟΣ ΜΕΤΑΣΧΗΜΑΤΙΣΜΟΣ ΣΤΗΝ ΕΚΠΑΙΔΕΥΣΗ: ΕΥΚΑΙΡΙΕΣ, ΠΡΟΚΛΗΣΕΙΣ ΚΑΙ ΑΝΑΔΥΟΜΕΝΕΣ ΑΝΙΣΟΤΗΤΕΣ ΣΤΗΝ ΕΠΟΧΗ ΤΗΣ ΤΕΧΝΗΤΗΣ ΝΟΗΜΟΣΥΝΗΣ 885

ΕΡΕΥΝΑ ΓΙΑ ΤΗΝ ΑΞΙΟΠΟΙΗΣΗ ΤΩΝ ΤΕΧΝΟΛΟΓΙΩΝ ΠΛΗΡΟΦΟΡΙΑΣ ΚΑΙ ΕΠΙΚΟΙΝΩΝΙΩΝ ΑΠΟ ΤΟΥΣ ΕΚΠΑΙΔΕΥΤΙΚΟΥΣ ΤΗΣ ΔΕΥΤΕΡΟΒΑΘΜΙΑΣ ΕΚΠΑΙΔΕΥΣΗΣ ΤΟΥ ΝΟΜΟΥ ΙΩΑΝΝΙΝΩΝ 1224

ΘΠ4: Ψηφιακό χάσμα και νέες ανισότητες 1231

ΤΟ ΨΗΦΙΑΚΟ ΧΑΣΜΑ ΣΤΗΝ ΠΡΩΤΟΒΑΘΜΙΑ ΕΚΠΑΙΔΕΥΣΗ ΣΤΗΝ ΕΛΛΑΔΑ: ΠΡΟΚΛΗΣΕΙΣ, ΝΕΕΣ ΑΝΙΣΟΤΗΤΕΣ ΚΑΙ ΠΡΑΚΤΙΚΕΣ ΧΩΡΙΣ ΑΠΟΚΛΕΙΣΜΟΥΣ 1233

ΨΗΦΙΑΚΟΣ ΜΕΤΑΣΧΗΜΑΤΙΣΜΟΣ ΣΤΗΝ ΕΚΠΑΙΔΕΥΣΗ: ΕΥΚΑΙΡΙΕΣ, ΠΡΟΚΛΗΣΕΙΣ ΚΑΙ ΑΝΑΔΥΟΜΕΝΕΣ ΑΝΙΣΟΤΗΤΕΣ ΣΤΗΝ ΕΠΟΧΗ ΤΗΣ ΤΕΧΝΗΤΗΣ ΝΟΗΜΟΣΥΝΗΣ 1240

ΨΗΦΙΑΚΕΣ ΑΝΙΣΟΤΗΤΕΣ ΜΕ ΤΗΝ ΕΛΕΥΣΗ ΤΟΥ 21ΟΥ ΑΙΩΝΑ 1249

ΘΠ5: Ψηφιακός-Οπτικός Γραμματισμός 1259

Η ΕΦΑΡΜΟΓΗ ΤΗΣ ΠΟΛΥΤΡΟΠΙΚΟΤΗΤΑΣ ΣΤΟ ΠΛΑΙΣΙΟ ΤΗΣ ΔΙΔΑΣΚΑΛΙΑΣ ΤΟΥ ΓΛΩΣΣΙΚΟΥ ΜΑΘΗΜΑΤΟΣ: ΜΙΑ ΣΥΣΤΗΜΑΤΙΚΗ ΑΝΑΣΚΟΠΗΣΗ ΤΗΣ ΒΙΒΛΙΟΓΡΑΦΙΑΣ 1261

ΠΟΛΥΓΡΑΜΜΑΤΙΣΜΟΙ ΣΤΗ ΣΧΟΛΙΚΗ ΕΚΠΑΙΔΕΥΣΗ: ΑΞΙΟΠΟΙΩΝΤΑΣ ΨΗΦΙΑΚΑ ΠΕΡΙΒΑΛΛΟΝΤΑ ΕΝΝΟΙΟΛΟΓΙΚΗΣ ΧΑΡΤΟΓΡΑΦΗΣΗΣ 1271

ΘΠ6: Ψηφιακή Ηθική 1279

ΤΕΧΝΗΤΗ ΝΟΗΜΟΣΥΝΗ ΚΑΙ ΗΘΙΚΗ: ΠΡΟΚΛΗΣΕΙΣ ΚΑΙ ΛΥΣΕΙΣ 1281

ΘΠ7: Ψηφιακή πολιτειότητα (Digital Citizenship) 1291

ΕΝΕΡΓΟΣ ΠΟΛΙΤΕΙΟΤΗΤΑ ΚΑΙ ΨΗΦΙΑΚΟΣ ΚΟΣΜΟΣ Ο ΡΟΛΟΣ ΤΗΣ ΕΚΠΑΙΔΕΥΣΗΣ ΣΤΗ ΔΙΑΜΟΡΦΩΣΗ ΕΝΕΡΓΩΝ ΜΑΘΗΤΩΝ-ΠΟΛΙΤΩΝ ΣΤΟΝ ΨΗΦΙΑΚΟ ΔΗΜΟΣΙΟ ΧΩΡΟ 1293

ΘΠ8: Συμπεριληπτική ψηφιακή εκπαίδευση 1301

ΗΧΗΤΙΚΑ ΨΗΦΙΑΚΑ ΕΡΓΑΛΕΙΑ ΣΤΗ ΔΙΔΑΣΚΑΛΙΑ ΜΑΘΗΜΑΤΙΚΩΝ ΓΙΑ ΜΑΘΗΤΕΣ ΜΕ ΟΠΤΙΚΗ ΑΝΑΠΗΡΙΑ: ΑΝΑΛΥΣΗ ΕΦΑΡΜΟΓΩΝ ΚΑΙ ΜΙΑ ΜΕΛΕΤΗ ΠΕΡΙΠΤΩΣΗΣ. 1303

ΑΝΑΖΗΤΩΝΤΑΣ ΤΟ ΣΧΟΛΕΙΟ ΓΙΑ ΟΛΟΥΣ: ΠΟΛΥΣΗΜΙΑ, ΣΤΑΔΙΑ ΠΡΑΓΜΑΤΩΣΗΣ ΚΑΙ ΥΛΙΚΟΣ/ΨΗΦΙΑΚΟΣ ΣΧΕΔΙΑΣΜΟΣ 1312

ΣΥΜΠΕΡΙΛΗΠΤΙΚΗ ΕΚΠΑΙΔΕΥΣΗ ΜΕ ΨΗΦΙΑΚΑ ΜΕΣΑ ΓΙΑ ΜΑΘΗΤΕΣ ΜΕ ΔΑΦ ΜΕ ΒΑΣΙΚΗ ΑΝΑΦΟΡΑ ΤΟ ΠΡΟΓΡΑΜΜΑ TEACCH. 1322

ΣΥΜΠΕΡΙΛΗΠΤΙΚΗ ΨΗΦΙΑΚΗ ΕΚΠΑΙΔΕΥΣΗ ΚΑΙ ΠΟΛΙΤΙΣΤΙΚΗ ΚΛΗΡΟΝΟΜΙΑ: ΜΙΑ ΚΑΙΝΟΤΟΜΟΣ ΠΡΟΣΕΓΓΙΣΗ ΓΙΑ ΤΗ ΜΟΥΣΕΙΑΚΗ ΕΚΠΑΙΔΕΥΣΗ ΣΕ ΣΩΦΡΟΝΙΣΤΙΚΑ ΚΑΤΑΣΤΗΜΑΤΑ 1333

ΘΠ9: Αειφόρο ψηφιακό σχολείο 1339

ΤΟ ΑΕΙΦΟΡΟ ΨΗΦΙΑΚΟ ΣΧΟΛΕΙΟ: ΕΝΑ ΜΟΝΤΕΛΟ ΕΚΠΑΙΔΕΥΣΗΣ ΓΙΑ ΤΟΝ 21Ο ΑΙΩΝΑ 1340

ΕΚΠΑΙΔΕΥΣΗ ΚΑΙ ΕΠΙΧΕΙΡΗΜΑΤΙΚΟΤΗΤΑ ΣΤΗΝ ΕΠΟΧΗ ΤΗΣ ΨΗΦΙΑΚΗΣ ΔΙΑΚΥΒΕΡΝΗΣΗΣ 1352

Η ΠΡΑΣΙΝΗ, ΨΗΦΙΑΚΗ ΓΕΙΤΟΝΙΑ ΤΟΥ ΝΗΠΙΑΓΩΓΕΙΟΥ 1360

ΘΠ10: Καλές πρακτικές αξιοποίησης ψηφιακών τεχνολογιών στη διδακτική πράξη 1367

ΑΡΧΙΤΕΚΤΟΝΙΚΗ ΣΧΕΔΙΑΣΗ ΚΑΙ ΑΝΑΠΤΥΞΗ ΛΟΓΙΣΜΙΚΟΥ ΜΕΤΑΓΡΑΦΗΣ ΚΑΙ ΕΚΜΑΘΗΣΗΣ ΤΟΥ ΚΩΔΙΚΑ BRAILLE 1369

“INTERNATIONAL JOINT CLASSES”: ΄ΕΝΑ ΠΑΡΑΔΕΙΓΜΑ ΑΞΙΟΠΟΙΗΣΗΣ ΨΗΦΙΑΚΩΝ ΤΕΧΝΟΛΟΓΙΩΝ ΣΕ ΔΙΕΘΝΕΣ ΠΡΟΓΡΑΜΜΑ ΣΧΟΛΕΙΩΝ 1381

ΤΟ ΔΑΣΟΣ …Η ΖΩΗ ΜΟΥ: ΒΙΩΜΑΤΙΚΗ ΜΑΘΗΣΗ ΜΕ ΨΗΦΙΑΚΑ ΕΡΓΑΛΕΙΑ 1388

ΕΝΣΩΜΑΤΩΣΗ ΤΗΣ ΤΕΧΝΗΤΗΣ ΝΟΗΜΟΣΥΝΗΣ ΣΤΗΝ ΕΚΠΑΙΔΕΥΣΗ: ΔΙΔΑΣΚΟΝΤΑΣ ΣΤΗΝ Α' ΛΥΚΕΙΟΥ ΤΗΝ ΤΗΛΕΡΓΑΣΙΑ ΚΑΙ ΤΗΝ ΕΠΙΚΟΙΝΩΝΙΑ ΑΠΟ ΑΠΟΣΤΑΣΗ 1394

Ο (ΑΝΤΙ ΠΙΝΑΚΑ) ΗΛΕΚΤΡΟΝΙΚΟΣ ΥΠΟΛΟΓΙΣΤΗΣ, ΚΛΕΙΔΙ, ΓΙΑ ΤΗΝ ΕΦΑΡΜΟΓΗ ΤΟΥ (ΕΝ ΚΥΛΚΛΩ) ΜΑΘΗΜΑΤΟΣ, ΑΠΟ ΤΟΥΣ ΙΔΙΟΥΣ ΤΟΥΣ ΜΑΘΗΤΕΣ 1404

ΛΑΝΘΑΣΜΕΝΗ ΕΡΜΗΝΕΙΑ ΜΗΝΥΜΑΤΟΣ, ΛΟΓΩ ΕΓΚΕΦΑΛΙΚΗΣ ΣΥΓΧΥΣΗΣ, ΑΠΟ ΚΑΤΑΙΓΙΣΤΙΚΗ ΠΡΟΒΟΛΗ ΕΙΚΟΝΩΝ, ΣΤΗΝ ΟΘΟΝΗ ΤΟΥ ΥΠΟΛΟΓΙΣΤΗ 1414

ΨΗΦΙΑΚΑ ΕΡΓΑΛΕΙΑ ΓΙΑ ΑΞΙΟΠΟΙΗΣΗ ΣΤΗ ΔΙΔΑΚΤΙΚΗ ΠΡΑΞΗ 1424

ΑΞΙΟΠΟΙΩΝΤΑΣ ΤΙΣ ΔΥΝΑΤΟΤΗΤΕΣ ΤΟΥ ΗΛΕΚΤΡΟΝΙΚΟΥ ΒΙΒΛΙΟΥ ΣΤΗ ΔΙΔΑΣΚΑΛΙΑ ΤΗΣ ΙΣΤΟΡΙΑΣ: ΜΙΑ ΜΕΛΕΤΗ ΠΕΡΙΠΤΩΣΗΣ ΓΙΑ ΤΗΝ Γ΄ ΓΥΜΝΑΣΙΟΥ 1430

ΕΞΕΡΕΥΝΩΝΤΑΣ ΤΟΝ ΚΟΣΜΟ ΜΕ ΓΕΩΓΡΑΦΙΚΑ ΠΛΗΡΟΦΟΡΙΑΚΑ ΣΥΣΤΗΜΑΤΑ (GIS): Η ΓΕΩΓΡΑΦΙΑ ΣΤΗΝ ΠΡΑΞΗ 1437

ΑΞΙΟΠΟΙΗΣΗ ΑΙΣΘΗΤΗΡΩΝ ΥΓΡΑΣΙΑΣ ΕΔΑΦΟΥΣ ΣΤΗΝ ΕΚΠΑΙΔΕΥΤΙΚΗ ΠΡΑΞΗ ΜΕ ΧΡΗΣΗ ΨΗΦΙΑΚΩΝ ΜΕΣΩΝ 1445

ΠΑΡΟΥΣΙΑΣΗ ΚΑΛΩΝ ΠΡΑΚΤΙΚΩΝ ΑΞΙΟΠΟΙΗΣΗΣ ΨΗΦΙΑΚΩΝ ΤΕΧΝΟΛΟΓΙΩΝ ΣΤΗ ΔΙΔΑΚΤΙΚΗ ΠΡΑΞΗ ΚΑΙ ΕΦΑΡΜΟΓΗ ΔΡΑΣΤΗΡΙΟΤΗΤΩΝ ΔΙΑΦΟΡΟΠΟΙΗΜΕΝΗΣ ΔΙΔΑΣΚΑΛΙΑΣ ΚΑΙ ΑΞΙΟΛΟΓΗΣΗΣ ΜΕ ΨΗΦΙΑΚΑ ΕΡΓΑΛΕΙΑ, ΣΥΜΦΩΝΑ ΜΕ ΤΟ ΝΕΟ ΠΡΟΓΡΑΜΜΑ ΣΠΟΥΔΩΝ ΤΟΥ 2023 ΓΙΑ ΤΟ ΜΑΘΗΜΑ ΤΩΝ ΓΑΛΛΙΚΩΝ 1452

Η ΑΞΙΟΠΟΙΗΣΗ ΔΙΕΠΑΦΩΝ ΤΕΧΝΗΤΗΣ ΝΟΗΜΟΣΥΝΗΣ (ΑΙ) ΩΣ ΕΡΓΑΛΕΙΟΥ ΕΝΙΣΧΥΣΗΣ ΤΗΣ ΒΙΩΜΑΤΙΚΗΣ ΜΑΘΗΣΗΣ ΣΤΟ ΝΗΠΙΑΓΩΓΕΙΟ 1463

Η ΑΞΙΟΠΟΙΗΣΗ ΨΗΦΙΑΚΩΝ ΤΕΧΝΟΛΟΓΙΩΝ ΣΤΗ ΔΙΔΑΣΚΑΛΙΑ ΤΗΣ ΧΗΜΕΙΑΣ: ΜΕΛΕΤΗ ΤΗΣ ΗΛΕΚΤΡΙΚΗΣ ΑΓΩΓΙΜΟΤΗΤΑΣ ΔΙΑΛΥΜΑΤΩΝ ΜΕΣΩ ΔΙΑΔΡΑΣΤΙΚΗΣ ΠΡΟΣΟΜΟΙΩΣΗΣ ΤΟΥ PHET COLORADO 1469

ΔΙΑΘΕΜΑΤΙΚΗ ΠΡΟΣΕΓΓΙΣΗ ΣΤΗΝ ΠΕΡΙΒΑΛΛΟΝΤΙΚΗ ΕΚΠΑΙΔΕΥΣΗ: ΠΕΡΙΒΑΛΛΟΝΤΙΚΗ ΜΗΧΑΝΙΚΗ, ΔΗΜΙΟΥΡΓΙΚΗ ΓΡΑΦΗ, ΤΕΧΝΗΤΗ ΝΟΗΜΟΣΥΝΗ ΚΑΙ ΨΗΦΙΑΚΑ ΜΕΣΑ 1479

ΠΑΙΔΑΓΩΓΙΚΗ ΑΞΙΟΠΟΙΗΣΗ ΨΗΦΙΑΚΩΝ ΚΑΙ ΤΕΧΝΟΛΟΓΙΚΩΝ ΜΕΣΩΝ ΣΤΗ ΔΙΔΑΣΚΑΛΙΑ ΤΗΣ ΑΓΓΛΙΚΗΣ ΓΛΩΣΣΑΣ: ΘΕΩΡΗΤΙΚΗ ΚΑΙ ΠΡΑΚΤΙΚΗ ΠΡΟΣΕΓΓΙΣΗ 1486

«ΠΑΜΕ ΠΑΙΔΙΑ ΣΤΗΝ ΕΚΚΛΗΣΙΑ!». ΜΙΑ ΚΑΛΗ ΠΡΑΚΤΙΚΗ ΣΤΟ ΜΑΘΗΜΑ ΤΩΝ ΘΡΗΣΚΕΥΤΙΚΩΝ ΜΕ ΑΞΙΟΠΟΙΗΣΗ ΠΟΛΥΜΕΣΙΚΟΥ ΥΛΙΚΟΥ 1494

ΘΠ11: Δυναμικά περιβάλλοντα μάθησης και Ψηφιακά Εκπαιδευτικά Εργαλεία 1503

ΤΟ ΣΥΡΣΙΜΟ, ΩΣ ΜΙΑ ΔΥΝΑΜΙΚΗ ΜΟΝΤΕΛΟΠΟΙΗΣΗ ΤΟΥ ΠΑΡΑΔΟΣΙΑΚΟΥ, ΣΤΑΤΙΚΟΥ ΕΥΚΛΕΙΔΕΙΟΥ ΠΕΡΙΒΑΛΛΟΝΤΟΣ, ΣΕ ΔΥΝΑΜΙΚΑ ΠΕΡΙΒΑΛΛΟΝΤΑ ΓΕΩΜΕΤΡΙΑΣ 1505

ΕΠΑΝΕΡΜΗΝΕΙΑ ΤΩΝ ΕΠΙΠΕΔΩΝ ΓΕΩΜΕΤΡΙΚΗΣ ΣΚΕΨΗΣ ΤΩΝ VAN HIELE ΥΠΟ ΤΗ ΣΥΝΗΓΟΡΙΑ ΤΩΝ ΠΛΕΟΝΕΚΤΗΜΑΤΩΝ ΤΩΝ ΔΥΝΑΜΙΚΩΝ ΠΕΡΙΒΑΛΛΟΝΤΩΝ ΓΕΩΜΕΤΡΙΑΣ 1516

ΘΠ12: Διαδίκτυο των πραγμάτων και εκπαίδευση 1529

ΘΠ13: Αξιοποίηση της Τεχνητής Νοημοσύνης στην Εκπαίδευση 1531

ΠΡΟΩΘΗΣΗ ΤΗΣ ΕΠΙΛΥΣΗΣ ΠΡΟΒΛΗΜΑΤΩΝ ΣΤΗΝ ΕΚΠΑΙΔΕΥΣΗ STEM: ΑΝΙΧΝΕΥΤΗΣ ΑΕΡΙΩΝ ΜΕ ΕΝΣΩΜΑΤΩΜΕΝΗ ΤΕΧΝΗΤΗ ΝΟΗΜΟΣΥΝΗ 1533

ΚΑΛΛΙΕΡΓΕΙΑ ΤΗΣ ΗΠΙΑΣ ΔΕΞΙΟΤΗΤΑΣ ΤΗΣ ΚΡΙΤΙΚΗΣ ΣΚΕΨΗΣ ΜΕΣΩ ΤΝ ΣΤΟ ΔΗΜΟΤΙΚΟ ΣΧΟΛΕΙΟ 1542

E- TWINNING PROGRAM: “PHOTO MAGIC, FROM OLD PHOTOS TO AI” 1550

ΤΕΧΝΗΤΗ ΝΟΗΜΟΣΥΝΗ ΣΤΗΝ ΠΡΩΤΟΒΑΘΜΙΑ ΕΚΠΑΙΔΕΥΣΗ ΜΕΛΕΤΗ ΠΕΡΙΠΤΩΣΗΣ: ΠΑΡΑΓΩΓΗ ΓΡΑΠΤΟΥ ΛΟΓΟΥ ΣΤΗΝ ΣΤ’ ΤΑΞΗ 1560

Η ΤΕΧΝΗΤΗ ΝΟΗΜΟΣΥΝΗ ΣΤΗΝ ΥΠΗΡΕΣΙΑ ΑΝΤΙΜΕΤΩΠΙΣΗΣ ΤΟΥ ΣΧΟΛΙΚΟΥ ΕΚΦΟΒΙΣΜΟΥ 1569

ΤΕΧΝΗΤΗ ΝΟΗΜΟΣΥΝΗ ΣΤΗΝ ΕΚΠΑΙΔΕΥΣΗ: ΜΙΑ ΒΙΒΛΙΟΜΕΤΡΙΚΗ ΑΝΑΛΥΣΗ ΤΩΝ ΤΑΣΕΩΝ ΚΑΙ ΤΩΝ ΜΕΛΛΟΝΤΙΚΩΝ ΚΑΤΕΥΘΥΝΣΕΩΝ ΤΗΣ ΕΡΕΥΝΑΣ- ΠΡΩΤΑ ΕΥΡΗΜΑΤΑ 1579

Η ΧΡΗΣΗ ΤΗΣ ΤΕΧΝΗΤΗΣ ΝΟΗΜΟΣΥΝΗΣ ΣΕ ΜΑΘΗΤΕΣ ΜΕ ΜΑΘΗΣΙΑΚΕΣ ΔΥΣΚΟΛΙΕΣ – ΣΥΣΤΗΜΑΤΙΚΗ ΑΝΑΣΚΟΠΗΣΗ 1584

SEARCH vs PROMPT: ΝΕΕΣ ΠΡΟΣΕΓΓΙΣΕΙΣ ΣΤΗΝ ΕΚΠΑΙΔΕΥΣΗ ΜΕ ΤΕΧΝΗΤΗ ΝΟΗΜΟΣΥΝΗ 1594

ΘΠ14: Διδακτική Αξιοποίηση της Εκπαιδευτικής Ρομποτικής 1605

Wedosave: FORGOTTENBABYSYNDROME ΡΟΜΠΟΤΙΚΟ ΣΥΣΤΗΜΑ ΠΡΟΣΤΑΣΙΑΣ ΤΗΣ ΖΩΗΣ ΑΠΟ ΤΟ ΣΥΝΔΡΟΜΟ ΞΕΧΑΣΜΕΝΟΥ ΠΑΙΔΙΟΥ. 1607

ΘΠ15: Παιχνιδοποίηση (Gamification) στην Εκπαίδευση 1615

ΜΕΛΕΤΗ ΤΗΣ ΑΠΟΤΕΛΕΣΜΑΤΙΚΟΤΗΤΑΣ ΚΑΙΝΟΤΟΜΩΝ ΔΙΔΑΚΤΙΚΩΝ ΠΑΡΕΜΒΑΣΕΩΝ ΓΙΑ ΤΗ ΜΑΘΗΣΗ ΤΟΥ ΑΤΟΜΙΚΟΥ ΠΡΟΤΥΠΟΥ BOHR ΚΑΙ ΤΟΥ ΠΕΡΙΟΔΙΚΟΥ ΠΙΝΑΚΑ 1617

ΜΑΘΑΙΝΩ ΤΟΝ ΜΑΚΕΔΟΝΙΚΟ ΑΓΩΝΑ 1626

ΣΧΕΔΙΑΣΜΟΣ ΚΑΙ ΑΝΑΠΤΥΞΗ ΕΚΠΑΙΔΕΥΤΙΚΗΣ ΕΦΑΡΜΟΓΗΣ ΕΙΚΟΝΙΚΗΣ ΠΡΑΓΜΑΤΙΚΟΤΗΤΑΣ ΓΙΑ ΤΗΝ ΔΙΔΑΣΚΑΛΙΑ ΤΟΥ ΚΑΛΛΙΤΕΧΝΙΚΟΥ ΚΙΝΗΜΑΤΟΣ “DE STIJL” 1631

ΟΤΑΝ Η ΙΣΤΟΡΙΑ ΓΙΝΕΤΑΙ ΠΑΙΧΝΙΔΙ: ΑΞΙΟΠΟΙΩΝΤΑΣ ΤΗΝ ΤΕΧΝΗΤΗ ΝΟΗΜΟΣΥΝΗ ΚΑΙ ΤΗΝ ΠΑΙΧΝΙΔΟΠΟΙΗΣΗ ΣΤΟ ΜΑΘΗΜΑ ΤΗΣ ΙΣΤΟΡΙΑΣ 1640

Η ΧΡΗΣΗ ΨΗΦΙΑΚΩΝ ΠΑΙΧΝΙΔΙΩΝ ΓΙΑ ΤΗ ΔΙΔΑΣΚΑΛΙΑ ΤΗΣ ΑΝΑΓΝΩΣΗΣ ΣΕ ΠΟΛΥΓΛΩΣΣΕΣ ΤΑΞΕΙΣ ΕΛΛΗΝΙΚΟΥ ΔΗΜΟΤΙΚΟΥ ΣΧΟΛΕΙΟΥ: Η ΠΕΡΙΠΤΩΣΗ ΤΟΥ D_READ-NARRATE 1648

VIRTUAL ALGOLAB: ΑΝΑΠΤΥΞΗ VR ΠΑΙΧΝΙΔΙΟΥ ΓΙΑ ΔΟΜΕΣ ΔΕΔΟΜΕΝΩΝ ΚΑΙ ΑΛΓΟΡΙΘΜΟΥΣ 1657

ΘΠ16: Εικονική, Επαυξημένη και Μικτή Πραγματικότητα στην Εκπαίδευση 1667

ΘΠ17: Διαδικτυακά εκπαιδευτικά περιβάλλοντα για την ενίσχυση της μικτής και της εξ αποστάσεως εκπαίδευσης 1669

ΠΡΟΕΤΟΙΜΑΖΟΝΤΑΣ ΕΞ ΑΠΟΣΤΑΣΕΩΣ ΕΞΕΤΑΣΕΙΣ ΤΗΝ ΕΠΟΧΗ ΤΗΣ ΤΕΧΝΗΤΗΣ ΝΟΗΜΟΣΥΝΗΣ. ΜΕΛΕΤΗ ΠΕΡΙΠΤΩΣΗΣ: ΠΡΟΓΡΑΜΜΑ ΜΕΤΑΠΤΥΧΙΑΚΩΝ ΣΠΟΥΔΩΝ ΕΚΠΑΙΔΕΥΣΗ & ΤΕΧΝΟΛΟΓΙΕΣ ΣΕ ΣΥΣΤΗΜΑΤΑ ΕΞ ΑΠΟΣΤΑΣΕΩΣ ΔΙΔΑΣΚΑΛΙΑΣ ΚΑΙ ΜΑΘΗΣΗΣ-ΕΠΙΣΤΗΜΕΣ ΤΗΣ ΑΓΩΓΗΣ (ΕΤΑ-ΕΑΠ) 1671

ΨΗΦΙΑΚΑ ΜΕΣΑ ΚΑΙ ΕΙΔΙΚΕΣ ΜΑΘΗΣΙΑΚΕΣ ΔΥΣΚΟΛΙΕΣ (ΕΜΔ): ΕΥΚΑΙΡΙΕΣ, ΠΡΟΚΛΗΣΕΙΣ ΚΑΙ ΠΡΟΟΠΤΙΚΕΣ ΓΙΑ ΜΙΑ ΙΣΟΤΙΜΗ ΕΚΠΑΙΔΕΥΣΗ 1680

ΘΠ18: Κοινωνικά δίκτυα και εκπαίδευση 1689

ΚΟΙΝΩΝΙΚΑ ΔΙΚΤΥΑ ΚΑΙ ΕΚΠΑΙΔΕΥΣΗ 1691

ΘΠ19: Διαδικτυακές Κοινότητες Μάθησης 1701

ΘΠ20: Ηλεκτρονική Μάθηση Δεύτερης Γενιάς (Learning 2.0) 1703

ΘΠ21: Κινητή Μάθηση (Mobile learning, BYOD) 1705

ΘΠ22: Ανοικτοί εκπαιδευτικοί πόροι 1707

ΘΠ23: Ελεύθερος και ανοικτός κώδικας λογισμικού για την εκπαίδευση 1709

ΑΝΑΛΥΣΗ ΚΕΙΜΕΝΩΝ ΜΕ ΕΡΓΑΛΕΙΑ ΑΝΟΙΚΤΟΥ ΛΟΓΙΣΜΙΚΟΥ ΣΤΗΝ ΕΚΠΑΙΔΕΥΤΙΚΗ ΣΥΜΒΟΥΛΕΥΤΙΚΗ: ΜΕΛΕΤΗ ΣΥΝΕΔΡΙΩΝ ΜΑΘΗΤΩΝ-ΣΥΜΒΟΥΛΩΝ 1711

ΘΠ24: Διδασκαλία και ψηφιακά μέσα 1719

ΔΙΔΑΣΚΑΛΙΑ ΤΟΥ ΜΑΘΗΜΑΤΟΣ ΤΗΣ ΙΣΤΟΡΙΑΣ ΜΕ ΤΗ ΧΡΗΣΗ ΨΗΦΙΑΚΩΝ ΜΕΣΩΝ: ΠΑΡΟΥΣΙΑΣΗ ΣΧΕΔΙΟΥ ΔΙΔΑΣΚΑΛΙΑΣ 1721

Η ΕΠΙΔΡΑΣΗ ΤΟΥ CHARLES BAUDELAIRE ΣΤΑ ΠΟΙΗΜΑΤΑ : «ΙΘΑΚΗ» ΤΟΥ Κ.Π. ΚΑΒΑΦΗ ΚΑΙ «ΤΑΞΙΔΙ ΣΤΑ ΚΥΘΗΡΑ» ΤΟΥ ΚΩΣΤΑ ΟΥΡΑΝΗ ΜΕΣΩ ΤΗΣ ΨΗΦΙΑΚΗΣ ΑΦΗΓΗΣΗΣ 1728

Η ΣΟΦΟΚΛΕΙΑ ΑΝΤΙΓΟΝΗ ΣΤΗΝ ΠΡΟΣΧΟΛΙΚΗ ΕΚΠΑΙΔΕΥΣΗ: ΨΗΦΙΑΚΑ ΕΡΓΑΛΕΙΑ ΚΑΙ ΠΑΙΔΑΓΩΓΙΚΕΣ ΠΡΟΣΕΓΓΙΣΕΙΣ. 1732

ΘΠ25: Η ψηφιακή αφήγηση στη διδακτική πράξη 1739

Η ΣΥΜΒΟΛΗ ΤΗΣ ΨΗΦΙΑΚΗΣ ΑΦΗΓΗΣΗΣ ΣΤΗΝ ΛΟΓΟΤΕΧΝΙΑ ΣΤΗΝ ΔΕΥΤΕΡΟΒΑΘΜΙΑ ΕΚΠΑΙΔΕΥΣΗ: Η ΠΕΡΙΠΤΩΣΗ ΤΗΣ ΠΛΑΤΩΝΙΚΗΣ ΑΛΛΗΓΟΡΙΑΣ ΤΟΥ ΣΠΗΛΑΙΟΥ 1741

Η ΨΗΦΙΑΚΗ ΑΦΗΓΗΣΗ ΩΣ ΚΡΙΣΙΜΟ ΠΑΙΔΑΓΩΓΙΚΟ ΠΛΑΙΣΙΟ ΑΝΑΔΕΙΞΗΣ ΤΗΣ ΛΕΙΤΟΥΡΓΙΚΗΣ ΔΙΑΧΕΙΡΙΣΗΣ ΦΙΛΙΚΩΝ ΣΧΕΣΕΩΝ ΣΕ ΜΑΘΗΤΕΣ ΕΙΔΙΚΟΥ ΔΗΜΟΤΙΚΟΥ ΣΧΟΛΕΙΟΥ 1747

Η ΨΗΦΙΑΚΗ ΑΦΗΓΗΣΗ ΩΣ ΕΡΓΑΛΕΙΟ ΚΑΛΛΙΕΡΓΕΙΑΣ ΚΡΙΤΙΚΗΣ ΣΚΕΨΗΣ ΣΤΟΥΣ ΜΑΘΗΤΕΣ 1758

Η ΨΗΦΙΑΚΗ ΑΦΗΓΗΣΗ ΣΤΗΝ ΠΡΟΣΧΟΛΙΚΗ ΕΚΠΑΙΔΕΥΣΗ ΚΑΙ ΤΗΝ ΕΙΔΙΚΗ ΑΓΩΓΗ. ΤΑ ΠΑΙΔΙΑ ΔΗΜΙΟΥΡΓΟΥΝ ΨΗΦΙΑΚΕΣ ΙΣΤΟΡΙΕΣ. 1769

ΘΠ26: Εκπαιδευτική αξιολόγηση με τη χρήση ψηφιακών μέσων και εργαλείων 1779

Η ΧΡΗΣΗ ΤΕΧΝΟΛΟΓΙΑΣ EYE-TRACKING ΓΙΑ ΤΗΝ ΑΞΙΟΛΟΓΗΣΗ ΠΡΑΓΜΑΤΟΛΟΓΙΚΩΝ ΔΕΞΙΟΤΗΤΩΝ ΣΕ ΠΑΙΔΙΑ: ΣΥΣΤΗΜΑΤΙΚΗ ΑΝΑΣΚΟΠΗΣΗ 1781

ΘΠ27: Διοίκηση Εκπαίδευσης και ψηφιακές τεχνολογίες 1791

ΑΠΟΛΟΓΙΣΜΟΣ ΤΗΣ ΠΡΩΤΗΣ ΕΞΑΜΗΝΗΣ ΕΜΠΕΙΡΙΑΣ ΑΠΟ ΤΗΝ ΕΦΑΡΜΟΓΗ ΤΟΥ ΨΗΦΙΑΚΟΥ ΒΙΒΛΙΟΥ ΠΡΑΞΕΩΝ ΣΥΛΛΟΓΟΥ ΔΙΔΑΣΚΟΝΤΩΝ ΣΤΙΣ ΣΧΟΛΙΚΕΣ ΜΟΝΑΔΕΣ: ΑΠΟ ΤΙΣ ΠΑΓΙΩΜΕΝΕΣ ΔΙΟΙΚΗΤΙΚΕΣ ΣΧΕΣΕΙΣ ΤΩΝ ΕΚΠΑΙΔΕΥΤΙΚΩΝ, ΣΤΗΝ ΕΜΠΕΔΩΣΗ ΤΗΣ ΨΗΦΙΑΚΗΣ ΓΡΑΦΕΙΟΚΡΑΤΙΑΣ 1793

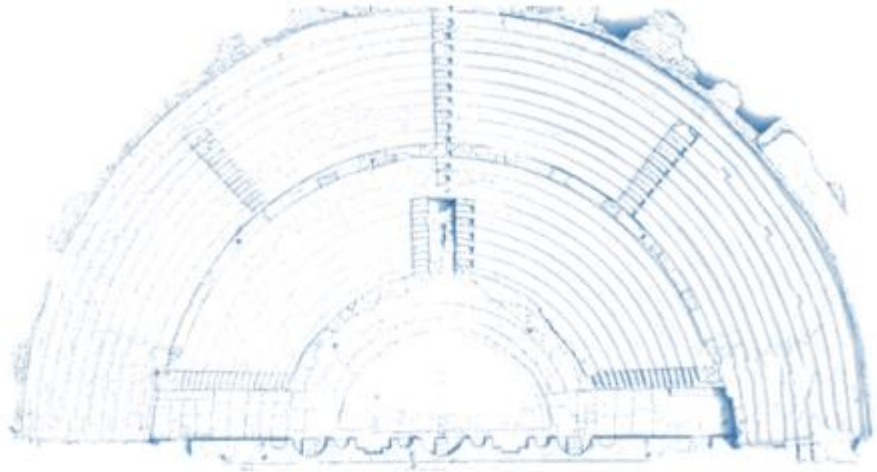
ΕΚΠΑΙΔΕΥΤΙΚΗ ΗΓΕΣΙΑ ΣΤΗΝ ΨΗΦΙΑΚΗ ΕΠΟΧΗ: ΠΡΟΚΛΗΣΕΙΣ, ΚΑΙΝΟΤΟΜΙΕΣ ΚΑΙ ΜΕΤΑΣΧΗΜΑΤΙΣΤΙΚΕΣ ΠΡΑΚΤΙΚΕΣ 1803

ΨΗΦΙΑΚΑ ΜΕΣΑ ΚΑΙ ΔΙΟΙΚΗΣΗ ΕΚΠΑΙΔΕΥΤΙΚΩΝ ΜΟΝΑΔΩΝ 1812

ΘΠ28: Επαγγελματική ανάπτυξη εκπαιδευτικών με την αξιοποίηση νέων τεχνολογιών 1821

ΑΥΤΟΕΠΙΜΟΡΦΩΣΗ ΕΚΠΑΙΔΕΥΤΙΚΩΝ ΜΕ ΑΞΙΟΠΟΙΗΣΗ ΤΟΥ E- LEARNING - LAMAP ΣΤΟ ΓΑΛΛΙΚΟ ΕΚΠΑΙΔΕΥΤΙΚΟ ΣΥΣΤΗΜΑ 1823

Η ΕΠΑΓΓΕΛΜΑΤΙΚΗ ΚΑΙ ΕΠΙΣΤΗΜΟΝΙΚΗ ΑΝΑΒΑΘΜΙΣΗ ΤΩΝ ΕΚΠΑΙΔΕΥΤΙΚΩΝ ΩΣ ΚΡΙΣΙΜΗ ΔΙΑΣΤΑΣΗ ΚΑΙ ΠΡΟΟΠΤΙΚΗ ΤΩΝ ΔΥΝΑΤΟΤΗΤΩΝ ΤΗΣ ΤΕΧΝΗΤΗΣ ΝΟΗΜΟΣΥΝΗΣ 1831



ΨΗΦΙΑΚΗ ΕΠΙΜΟΡΦΩΣΗ & ΕΚΠΑΙΔΕΥΣΗ: Ο ΕΚΠΑΙΔΕΥΤΙΚΟΣ ΣΤΗΝ ΕΠΟΧΗ ΤΗΣ ΤΕΧΝΟΛΟΓΙΑΣ 1842

ΑΝΤΙΛΗΨΕΙΣ ΚΑΙ ΑΠΟΨΕΙΣ ΕΝ ΔΥΝΑΜΕΙ ΛΟΓΟΘΕΡΑΠΕΥΤΩΝ ΓΙΑ ΤΗΝ ΧΡΗΣΗ ΤΗΣ ΤΕΧΝΟΛΟΓΙΑΣ ΤΗΣ ΟΦΘΑΛΜΟΚΙΝΗΣΗΣ ΣΤΙΣ ΔΕΞΙΟΤΗΤΕΣ ΑΝΑΓΝΩΣΗΣ 1848
