Virtual laboratories are increasingly used across a wide range of STEM subjects. In physics, VLs simulate experiments on motion, electricity, and optics, enabling students to manipulate variables like voltage or force and observe real-time changes. In chemistry, they allow safe experimentation with chemical reactions and molecular interactions. Biology labs often include dissections, microscopy, or ecological simulations, while engineering and electronics VLs offer circuit building, robotics programming, and system modeling. These applications provide realistic and interactive learning environments that would otherwise be difficult to create in traditional classrooms. Moreover, in mathematics and computer science, VLs can visualize abstract algorithms, geometric constructions, or data structures. They also support logical thinking through programming and simulation tasks, reinforcing applied problem-solving skills. In the following sections, two virtual labs are presented as case studies.

Case Study 1: Onlabs – A Versatile 3D Virtual Laboratory for Biology and Chemistry

Onlabs is a freely available VR-based educational tool designed to simulate biology and chemistry lab procedures in a 3D environment (Images 1, 2). Developed by the Hellenic Open University, it supports various educational approaches including distance, blended, and flipped classroom models. In Onlabs, learners can conduct experiments such as microscopy and solution preparation across different learning modes: Instruction, Evaluation, and Experimentation. Onlabs employs an action-centric representation, where the impact of each action is predetermined (Paxinou et al., 2020b). The Onlabs simulation mirrors the design and interaction of adventure games, where the user utilizes the mouse to interact with various objects in the virtual lab. The use of a simplistic context-sensitive interface facilitates the incorporation of VR interfaces, as they require a minimal heads-up display. Most inanimate entities in Onlabs can be interacted with by the user, but not all entities are interactive, and not all actions are valid for every entity.

To explore Onlabs effectiveness in communicating experimental skills to novice audiences, experiments were conducted in various educational settings, encompassing secondary education and undergraduate students, and spanning different disciplines such as Biology, Chemistry Physics, Electrical and Computer Engineering, Civil Engineering, Archaeometry and Education. Thus, with Onlabs as the central tool, educational scenarios with interventions designed to foster self-reflection and inquiry for evaluating its educational contribution, were implemented (Sypsas et al., 2021).

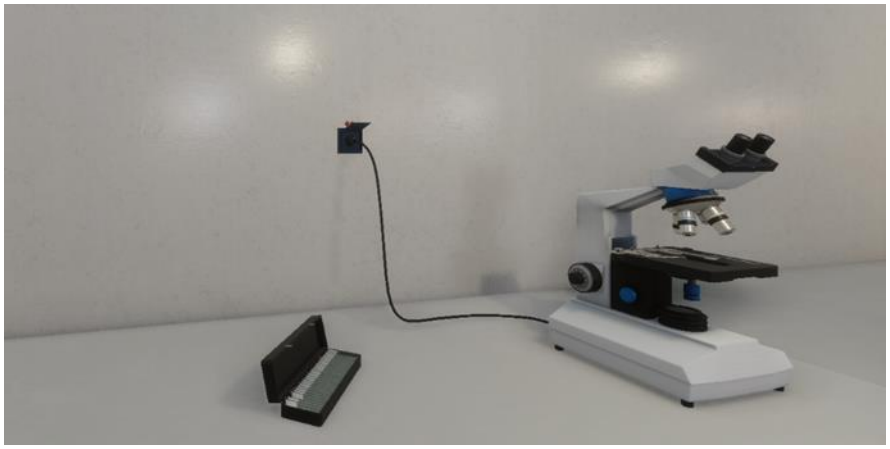
Virtual laboratory of Hellenic Open University (Onlabs)



Learning Outcomes and Insights

Key findings from Onlabs implementation across secondary and higher education include:

- Learners who used Onlabs exhibited greater learning gains compared to those following traditional instruction or watching video demonstrations.
- Students reported high satisfaction, ease of use, and enhanced confidence in performing real lab procedures after virtual training.
- Analytics platforms allowed instructors to track learner interactions, adapting instruction based on data.
- Importantly, the desktop version of Onlabs was found to be more effective than immersive VR in maintaining learner focus and reducing cognitive overload, due to lower extraneous stimuli.

Image2
Onlabs version 4.0

Case Study 2: The SIVRLAB Project

A representative case study of effective VL implementation is the Scientific Investigation Virtual Reality Laboratory (SIVRLAB) developed by Lai et al. (2021). Designed for 9th-grade science students, SIVRLAB immersed learners in a guided, inquiry-based experience where they had to investigate oxidation-reduction reactions and assemble a voltaic cell to help a robot regain energy.

The virtual lab was offered in two versions:
Desktop VR, using mouse and keyboard for interaction, and Immersive VR, using head-mounted displays (HMD) for a fully embodied experience. Students were divided into three groups:
Individual use of immersive VR (HMD),
Individual use of desktop VR,
Observation of another student using immersive VR.

Learning Outcomes and Insights

The study revealed significant insights:

- Desktop VR users scored the highest on post-test knowledge assessments, possibly due to the clarity of instructions and ease of navigation.
- Immersive VR users performed better in follow-up physical lab tasks, suggesting stronger procedural memory and hands-on readiness.
- The observation group showed the least improvement, highlighting the limitations of passive learning in VR contexts.

- In terms of user experience:
- Immersive VR offered higher presence and engagement, but some students struggled with cognitive overload or VR sickness.
- Desktop VR users reported smoother learning and emotional satisfaction, likely due to familiarity with the interface.

These findings emphasize that different levels of immersion impact learning in diverse ways. While immersive VR enhances skill transfer and motivation, desktop VR may be better suited for conceptual understanding and sustained attention.

Challenges in Implementing Virtual Labs

While virtual laboratories offer significant advantages for STEM education, their implementation in real-world classroom settings is not without obstacles. Several practical, pedagogical, and infrastructural challenges must be addressed to ensure their effective and equitable integration into secondary education. These challenges include:

- Tactile limitations: VLs cannot fully replicate the physical manipulation of lab tools.
- Teacher readiness: Effective use of platforms like Onlabs requires professional development in digital pedagogy and instructional design.
- Technological constraints: While VLs are accessible on desktop and web platforms, immersive VR remains cost-prohibitive and cognitively demanding.
- Equity issues: Not all students have access to high-end devices or reliable internet connections. Desktop VLs address this by requiring lower specs and offering browser-based access.

DISCUSSION

Integrating Virtual Labs into STEM Classrooms

The use of virtual laboratories (VLs) in secondary STEM education presents an opportunity to reshape science instruction toward more student-centered, inquiry-driven models. The findings from recent studies, suggest that VLs are not merely substitutes for physical labs but can serve as pedagogical amplifiers, supporting both conceptual and procedural knowledge when implemented thoughtfully. However, effective integration of VLs requires more than technology adoption. Teachers must redesign their instructional strategies to align with inquiry-based learning principles. This includes guiding students in formulating questions, planning experiments, analyzing results, and drawing conclusions, skills that VL platforms can support through embedded tools such as virtual tutors, experiment logs, and scenario-based learning tasks.

The Case for a Blended Learning Approach

One of the most widely endorsed strategies in literature is a blended approach, where virtual and physical laboratories are combined. While VLs enhance accessibility and conceptual clarity, they may fall short in giving students real-world familiarity with lab equipment. By alternating between virtual simulations and hands-on experiments, educators can offer students a comprehensive and balanced learning experience. This hybrid model can be especially useful when resources are limited. For example, VLs can be used for pre-lab preparation or post-lab reflection, allowing students to explore procedures, visualize abstract concepts, and build confidence before engaging with physical materials. Moreover, this approach accommodates diverse learning styles, benefiting both visual and kinesthetic learners.

Equity and Accessibility

To ensure the inclusive adoption of virtual laboratories, equity considerations must be prioritized. Not all schools or students have equal access to high-speed internet, modern hardware, or immersive VR devices. Desktop-based VLs provide a scalable and low-cost alternative that can be deployed in most computer-equipped classrooms. Educators and policymakers should advocate for infrastructure upgrades and promote open-source or low-cost VL platforms to reduce barriers to participation.

Teacher Preparation and Professional Development

The success of VL integration largely depends on the teachers' digital competencies and pedagogical flexibility. Professional development programs must go beyond technical training to include instructional design for digital labs, facilitation of inquiry-based activities, assessment of virtual experiments, and classroom management in hybrid environments. Moreover, collaborative networks among educators can foster the sharing of best practices, co-development of instructional materials, and ongoing peer support. Engaging teachers in the co-creation and evaluation of VL content can also ensure better alignment with curriculum standards and student needs.

Toward Future Classrooms

Looking ahead, the integration of advanced technologies such as artificial intelligence (AI), augmented reality (AR), and collaborative online platforms will further enhance the interactivity, personalization, and social dimensions of virtual labs in secondary STEM education. These innovations can support adaptive learning pathways, real-time feedback, and collaborative experimentation, paving the way for more immersive, globalized, and student-centered STEM education. However, future implementations must remain grounded in pedagogical principles, as technology alone cannot guarantee effective learning, since its value lies in how it is used to support meaningful inquiry, reflection, and skill development.

CONCLUSIONS

Virtual laboratories (VLs) represent a significant advancement in the landscape of secondary STEM education, offering new ways for students to explore, understand, and engage with scientific concepts. By simulating authentic laboratory environments through interactive, technology-driven platforms, VLs facilitate inquiry-based learning and help bridge the gap between theoretical instruction and practical experimentation.

Evidence from research demonstrates that VLs can enhance students' conceptual understanding, motivation, and procedural skills. The type of VL, whether desktop or immersive, can influence learning outcomes differently. Desktop VR environments appear more effective for knowledge acquisition and task focus, while immersive VR strengthens procedural learning and the sense of presence. Both case studies affirm that when implemented with sound pedagogy and teacher support, virtual labs can enhance motivation, deepen understanding, and build procedural competence. As technology evolves—especially in VR/AR, AI, and analytics—virtual labs are likely to become an integral part of secondary STEM education.

Despite these promising outcomes, VLs are not a one-size-fits-all solution. Limitations such as reduced tactile engagement, the need for teacher training, and access inequalities must be addressed. Therefore, a blended approach, integrating virtual and physical labs, emerges as the most pedagogically sound model, maximizing the strengths of each medium while mitigating their shortcomings.

The integration of VLs into secondary STEM education will require sustained efforts in infrastructure, curriculum alignment, and teacher professional development. As emerging technologies such as AI, AR, and collaborative tools become more accessible, virtual laboratories are likely to evolve into even more dynamic, personalized, and collaborative learning environments.

In conclusion, when designed and implemented with careful consideration of both technical and pedagogical factors, virtual laboratories can play a transformative role in preparing students for STEM disciplines. They not only expand access to experimental learning but also cultivate essential 21st-century skills such as critical thinking, problem-solving, and scientific inquiry—skills that are foundational in STEM fields.

EXPLORING THE INNOVATION OF HARVARD'S "OUT OF EDEN LEARN" ONLINE LEARNING PLATFORM: A CASE STUDY IN A PRIMARY EFL CLASSROOM

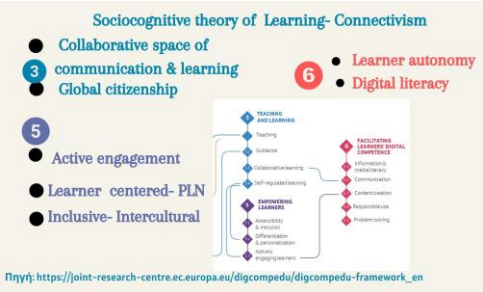
Dermitzaki Kyriaki
English Language Teacher, M.Ed.
4th Primary School of Preveza
Preveza, Greece
e-mail: kdermitz@gmail.com

ABSTRACT

The emergence of new technologies and their infinite applications in all aspects of our lives, have affected the educational systems globally. In the Greek state school context many educators feel that the time has come to embrace new media pedagogies in their everyday lessons, not as a mere technological tool, but as a vehicle to amend their teaching approaches, promoting continuous professional development among fellow teachers and 21st century competences among students through their inspiring collaboration in Communities of Practice and Learning. The present study discusses the design, implementation and evaluation of our engagement in the English language classroom of the 4th Primary School of Preveza with the unique online learning community of "Out Of Eden Learn" (OOEL) of Project Zero in the Graduate School of Education in the University of Harvard. More specifically, the results of our participation in the various learning journeys designed by the Harvard researchers team since our initial "Skills Labs" pilot phase in 2020 on a national level and the international collaborations in the following years, revealed very positive results of students' intrinsic motivation enhancement as well as promotion of multiliteracies, fostering inclusive, digital and critical thinking skills in an interconnected, culturally and linguistically rich learning environment.

Keywords: Online Learning Communities, 21st century competences, Thinking routines, "Out of Eden Learn", Digital learning, Multiliteracies

INTRODUCTION



Teaching and Learning in the 21st century: Theoretical Background

Meeting 21st century requirements is at the heart of every educational reform. However, going beyond theory, there is still considerable debate among educators on successful approaches for teaching, learning, reflecting and evaluating of 21st century competences in the classroom. Despite continuous reshaping of the 21st century skills framework, there is a general consensus that life, soft, thinking and digital skills will aid today's learners navigate their evolving social environment with a successful career thriving as future global citizens (CEDEFOP, 2021). Ergo, adopting a sociocognitive perspective, creativity, communication and collaboration in European and international learning programs, such as the OOEL can promote critical and digital skills, in an increasingly interconnected world.

As the focus of this case study is the enhancement of the above skills in Greek state EFL learning environment in the post-methods era, we will attempt to look at how "OOEL" online learning community can support teachers in accommodating the needs of today's learners. Indeed, according to Vlachos (2010), developing communicative competence, a primary goal in EFL teaching, embraces linguistic, pragmatic, strategic, sociolinguistic and intercultural competences. Furthermore, language teaching and learning should not be considered as a rote learning of vocabulary and grammar, a mere transmission of knowledge, but as emphasized in the updated Common European Framework(Council of Europe, 2020) the co-construction of meaning through interaction, a dynamic process where learners as language users and social agents draw upon their plurilingual and pluricultural repertoires. All the above, coincide with the collaborative, cross-cultural, inquiry-driven curriculum framework offered by Project Zero researchers in the "Open Canopy", formerly known as "Out of Eden Walk" online platform (https://learn.outofedenwalk.com/). To avoid misunderstanding, we opt for the term "Out of Eden Learn" program here since our learning journeys refer to programs from 2020 until 2022. The OOEL changed its name to "Open Canopy" in a new innovative approach by the Harvard team in 2024, referring to pedagogies in online and in-person contexts.

Merging language learning theories with technology in the modern era of "normalization" (Bax, 2003) calls for a novel pedagogic framework entailing many parameters: a) psychological, fostering intrinsic and activity motivation (Papaefthymiou-Lytra, 2014), b) socio-cultural, transformative pedagogies, prioritizing connectivism (Siemens, 2005) testifying to the tectonic shifts of the digital age and AI and c) pedagogical parameters (Kourtis-Kazoullis and Vlachos, 2014). Besides, new learning paradigms call for "cultivating" multiliteracies, incorporating multimodalities facilitating the interpretation of visual, spatial, tactile, gestural, audio and oral modes of meaning in an ever-evolving universe that our learners inhabit (Knobel and Lankshear, 2014). Enhancing and innovating education, the updated European Digital Competence Framework (Redecker, 2017) identifies six different areas of digital competences including the educators' professional, pedagogic competences and the learners' competences. For the purposes of the present study, we will only concentrate on areas 3, 5 and 6, namely the teaching and learning, empowering learners and facilitating learners' digital competences. The diagram below (Diagram 1) attempts to present the efficacy of OOEL online community engagement in promoting our learners' digital competences.

Diagram 1
DigCompEdu Framework & OOEL

Out of Eden Learn Program

"The Open Canopy", formerly known as "Out of Eden Learn", is a free online educational program, an initiative of Project Zero of the Harvard Graduate School of Education, offering young people (aged 3-19) opportunities to interconnect and carry 8-12–week curricula, known as "learning journeys" actively engaging in the same format of activities. Students follow Paul Salopek, a National Geographic explorer and Pulitzer prize-winning journalist in his

colossal foot journey from Ethiopia to South America on the ancient migration routes, get inspired by his stories and videos and start their own explorations looking at the world around them with fresh eyes (Out of Eden Learn, n.d.).

At the heart of the program lie the three original OOEL learning principles: i) "slow-looking": observing the world carefully, listening attentively to others, ii) "exchanging stories", whilst reflecting on people, places and identities and iii) "making connections" between artifacts, experiences and global problems, pondering on the connectivity of their lives with bigger human stories, embracing diversity, seeking common solutions. According to Dawes Duraisingh & Tishman (2024), two more learning principles, supporting the above, have been added in the Open Canopy approach: "learner generated content" and "thoughtful peer-to-peer exchange" enhancing students' sense of wellbeing and belonging, moving from personal to local to global issues.

RESEARCH METHODOLOGY

The present study was based on the hypothesis that the Greek state EFL learning can greatly benefit from the empowerment afforded to us by the pedagogical use of digital technology (Blake, 2013). The novel quest for knowledge, creativity, collaboration, intercultural dialogue and the development of global competences (Boix-Mansilla, 2016) can primarily be sought via innovative, personalized, inclusive and engaging approaches attempting authentic learning encounters with same-age global students in non-formal, community-based learning journeys.

The research questions that guided this mixed methods small-scale case study were the following:

1. To what extent could the OOEL online learning community approach and related strategies enhance 21st century competences among primary students?
2. What is the added benefit for students in participating in the "Open Canopy" (formerly known as "Out Of Eden Learn") online learning journeys interconnected with global peers?
3. What are the gains for the Greek primary EFL teachers in adopting OOEL strategies and pedagogy in their everyday teaching practice?

Turning to the research context, the present study is based on the findings of four learning journeys, commencing with the 2020 "Skills Labs" pilot national phase and continuing with 2021 and 2022 international programs. Convenience sampling was applied and this included 50 4th Primary School of Preveza 5th and 6th grade students, aged 11-12 years old, who participated in the OOEL online learning community explorations. They comprised of 20 6th Grade participants in our initial Greek program and 5th and 6th grade groups of 15 students each that participated in the international programs. Our 5th Graders were indeed so enthusiastic that they took part in two consecutive learning journeys.

Crucial to our teaching, learning and assessing practices, guided by the adaptation of OOEL curriculum and Project Zero principles in our EFL classroom, were our observations and reflections, displayed on our teacher-researcher journals. All learning journeys were part of our regular EFL lesson, as the vehicle of communication and collaboration in the Harvard platform is the English language. Needless to say, we have also integrated in our EFL praxis many Erasmus+, eTwinning and other national projects. However, promoting storytelling and human to human exchange, aiding learners to use thinking routines, contemplative slow looking and dialogue toolkit online and in our classrooms, gives the Project Zero initiative a unique place in the educational landscape and this is the focus of the next section.

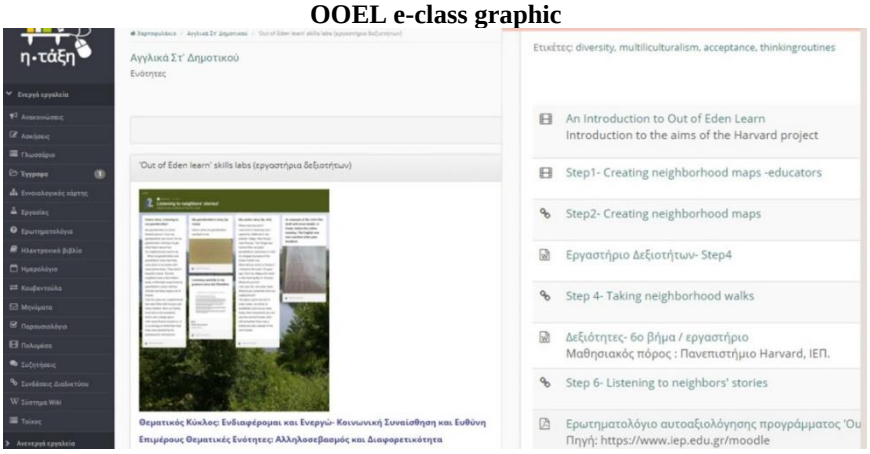
ENHANCING THINKING SKILLS THROUGH OOEL STRATEGIES

Aiding our students ameliorate their thinking skills is a challenge for all teachers who strive to make their students think creatively, critically and deeply, in line with higher order thinking skills discussed in Bloom's revised taxonomy (Krathwohl, 2002). Drawing on Harvard's Project Zero expertise, we can use the research-based approach of visible thinking, by employing thinking routines as sequential steps designed to scaffold and enhance student thinking. According to Dawes Duraisingh and Sachdeva (2021) these are simple structures and protocols inviting learners to think beyond the surface level as part of inquiry-driven innovation. Fostering a culture of thinking can have a great impact on developing 21st century competences as teachers can use a great array of thinking routines framework, documenting student learning and later reflection, as a consequence of deepening cognition (Ritchhart & Perkins, 2008).For the purpose of our learning journeys in 4th Primary School of Preveza, we mostly employed the core thinking routines from the wealth of the routines suggested in Project Zero platform, in an attempt to make competences more visible and transparent ((Ritchhart, 2015).

Similarly, two additional instructional tools supporting high-quality and thoughtful online interaction, as well as offline classroom meaningful practice, are the dialogue toolkit and the three O's. Having connected over 70.000 students in more than 70 countries in a highly successful online, intercultural learning community (Out of Eden Learn. n.d.) has

revealed the difficulty young learners have in online encounters, albeit in a digital education era, with students from very diverse socioeconomic and cultural backgrounds. A dialogue toolkit as sentence prompts or starters has come to the aid of teachers, who can help students slow down and think carefully before writing an answer or an asynchronous comment to a post of a student from their collaborating schools, named their "walking group". These dialogue routines are also embedded as symbols in the comment box (Image 1) and can be integrated across curriculum beyond the online community. They invite students to look more carefully before responding to the multimodal text "noticing" details, "appreciating" using specific examples, "snipping" a phrase and asking a question while "probing" for more details. Then in accordance with the thinking routine, "connect-extend-challenge", students are encouraged to "connect" the post with their own experience, "extend" their thoughts in new directions, gaining new perspective from the online exchange, challenge a "point of view" and "name" aspects of their identity and experiences.

Image 1
The Dialogue Toolkit



Built into many OOEL/ Open Canopy activities are also the three O's, "overgeneralization", "overconfidence", and "othering". These teach a valuable lesson in inclusive practices, as online dialogue can sometimes reveal subtle student behaviours, showing stereotyping of whole groups, assuming our own perspective as universal and overemphasizing differences, ultimately being disrespectful in our online discourse as well as in our everyday regular conversation. The above strategies are at the heart of nurturing global competences, including cognitive development, socioemotional skills and civic learning (Asia Society and OECD, 2018).

ENRICHING OUR PRIMARY EFL CLASSROOM PRACTICES WITH OOEL CORE LEARNING JOURNEY CURRICULA

We will now look more closely at how we attempted to explore the above Project Zero strategies and OOEL pedagogical tools in line with our EFL curriculum in 4th Primary School of Preveza. Our school was among the 217 primary and secondary schools that participated in the implementation of the pilot program "21st century Skills Labs" conducted in 2020/2021 (Eurydice, n.d.). This is an innovative educational module, launched by the Greek Ministry of Education marking a competency-based shift enhancing transversal, soft and digital skills, integral for a rapidly changing world (Institute of Educational Policy, n.d.). Under the thematic pillar of "Social Conscience and Responsibility" an adaptation of the aforementioned OOEL program was proposed as a 7-week "Skills Labs" workshop, exceptionally designed by Harvard's OOEL ambassador and School Co-ordinator Dr Melliou and Dr Retalis at the Department of Digital Systems in the University of Piraeus focusing on seven competencies including the 4 Cs, namely: i) communication, ii) creativity, iii) collaboration, iv) critical thinking , together with v) problem solving, vi) perspective taking and vii) appreciating diversity (Melliou and Retalis, 2024). 4th Primary School was the only primary school in our region Epirus that participated in this OOEL national pilot phase. The research team worked intensively and closely with the teachers and we had many online synchronous meetings with the organisers and Harvard experts discussing and reflecting on the principles of OOEL and competency-based learning.

Image 2
OOEL e-class graphic

Our students embarked on their first uniquely designed learning journey, informed by the alignment between OOEL pilot curriculum and "Skills Labs" framework, amidst COVID-19 pandemic in November 2020. In line with the Greek Ministry of Education requirements, distance learning was employed with additional modifications to the teaching approach and learning content. Ergo, Greek teachers, many of whom lacked Educational Technology Pre-service and In Service Education and Training (Dermitzaki, 2019), were suddenly asked to fulfil the role of distance educator and ultimately succeeded , perceiving the pandemic as a critical point for the elevated role of digital technologies in the Greek primary and secondary schools (Jimoyannis et al. , 2021). In the case of our 2020/2021 Special Leaning Journey for Greek schools, we adopted a blended learning model of i) asynchronous e-class, uploading all resources like Paul Salopek's articles and videos for every activity, called "footstep" in our OOEL learning journey and ii) synchronous Webex meetings, where we discussed the work process, visited the online platform and interacted in real time with the new posts from the other schools (Image 2).

Therefore, the teacher-researcher invited children to follow their "walking party", interacting with children from Greek schools far away from us (Evosmos, Kilkis, Rhodes, Serres, and Anavryta), following the steps assigned for the different weeks. First, the educators were doing the activity and then they asked students to follow the same step reflecting on the difficulties or challenges their students had encountered. The educators uploaded both their own and their students' activities on the Out of Eden Learn platform. To assist distance collaboration, our students uploaded their posts on collaborative Padlets and we answered questionnaires, had brainstorming activities or wrote texts on collaborative Google docs with the links provided in our synchronous sessions and also in our e-class OOEL specially allocated area. In later phases, we also experimented with the efficacy of Webex team escape rooms to cater for the different teams of students, fostering collaboration, communication and interpersonal skills. More specifically, they started by creating neighborhood maps, taking neighbourhood walks, which also included inside homes/balconies careful observation due to pandemic restrictions, and listening to neighbors', modified again to relatives', stories. The seventh week was dedicated to reflection and answering online questionnaires about the student appreciation of this unique experience.

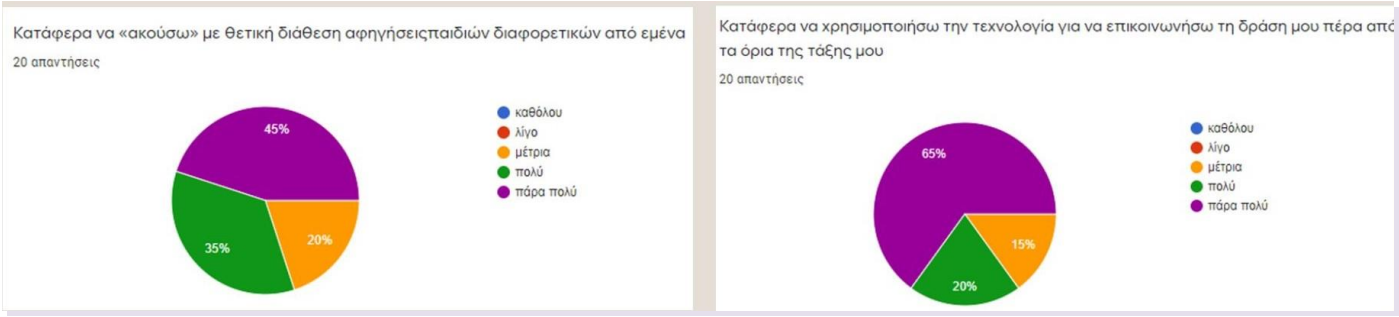
Fortunately, in our next international learning journey launched in December 2021 we did not face strict pandemic restrictions. It was "Core Learning Journey 1: The Present and the Local" and we had a truly multicultural representation, with schools from India and the USA- New Jersey and Ohio. In accordance with OOEL requirements, the educators have to register their class for the particular learning journey, receive a class passcode and for 10-year-old students or older ones, help students register and create student accounts using the class code. Hence, in our international journeys our 5th and 6th Grade students could post on their own and comment on their fellow walkers' posts. Additionally, a flipped classroom approach has had a positive impact on our EFL class for all international and European programs we have participated. In the present case study, resources and generated digital material were uploaded in our e-class under the relevant thematic area of OOEL and all the activities/footsteps were launched in class. In comparison with the aforementioned national program, the core learning journey 1 contained three more steps- the initial "setting off", where the students had to introduce themselves, explain their avatar and reflect on OOEL slowing down stories and the two concluding steps, namely "documenting the everyday" and "looking ahead".

Each "footstep" had three phases. The first phase "get inspired", watching and discussing Paul Salopek's linguistically demanding for primary EFL learners videos or reading his articles, was a valuable part of Media Literacy exploration as well as of revisiting multimodalities (Kress, 2003) and multiliteracies (Kalantzis & Cope, 2008) expanding our meaning making/semiosis in real, authentic English language context. The "act" phase ensued, where students wrote their posts combining visual creativity, displayed in photos, drawings, diagrams, maps with English texts. The third part of each step, namely the "interact" phase was the one our students enjoyed the most, as they were eager to see how many responses they would receive and also respond to other students' posts. Needless to say, we had our dialogue toolkit icon in our classroom notice board to remind students of ways to expand their answers, showing appreciation, respect and elaborating on their thinking processes/routines departing from a dismissive social media "like" mode.

SPECIAL LEARNING JOURNEYS: PLANETARY HEALTH AND STORIES OF HUMAN MIGRATION

In 2022 we delved deeper in the Project Zero pedagogies, launching two extremely interesting, yet far more demanding on our Greek students' cognitive competences, special learning journeys. In spring 2022, we explored the "Introduction to Planetary Health" It was a transition from simpler, everyday issues, representing the personal and the local to global issues inquiring on sustainability, climate action, our responsibility as global citizens and civic engagement topics. Firstly in "Walking with health in mind" students were invited to walk slowly in their neighborhoods, carefully noticing and observing problematic areas that could have an impact on people's health. Secondly, in "Uncovering the big idea of planetary health" after being exposed to various, carefully-selected multimodal resources, they were asked to create a concept web to document graphically the connection between environment impact and health problems. Thirdly,

in "Zooming in, reporting out", students investigated and presented their findings on a topic of planetary health they had a special interest in, thus enhancing intrinsic student motivation and decision making. Finally in the step named "Exploring what we can do", students had to employ higher order thinking skills, seeking alternative choices they could make in their everyday routine concerning planetary health. Ultimately, they had to prepare a resource informing others about these issues and persuading them to adopt similar changes in their everyday habits in a globally responsible interconnected world.



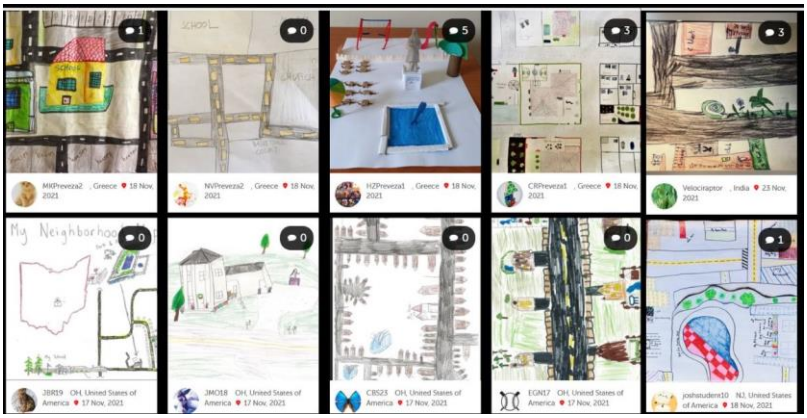
In the following winter "Stories of Human Migration" proposed a curriculum of four steps: i) "Our own stories of migration", with students depicting and documenting on maps personal migration stories and migratory routes of relatives or people within their local community, ii)"Everyday borders", taking thoughtful slow walks in their area, discovering visible and invisible borders, iii) "Migration in the media" , critically comparing the way media authors report migrant stories and finally iv) " Collecting our thoughts on migration" discussing, after thinking deeply and reflectively, how their views on this critical global subject have evolved during this journey.

DISCUSSION OF FINDINGS

This section focuses on the most prominent study results in relation to the three research questions. Our analysis was aided by data collected from the reflective student questionnaires and the non-formal discussions we had in class with the students sharing their thoughts, comments, ideas and reflections. A great contribution to our work process data was also the consultation online meetings we had with OOEL Ambassador, Dr Melliou and the OOEL Principal Investigators, namely Dr Dawes-Duraisingh and Dr Tishman as well as the Project Manager Sarah Sheya during our first learning journey. To aid corroboration of the quantitative findings, we decided to collect and analyse the data of 4th Primary School of Preveza students' posts, comments and creative contributions as part of our qualitative data analysis. All the above were complemented by the teaching journals that documented our observations, thoughts and reflections in ameliorating our teaching practices.

Research Question 1: OOEL and 21st century competences

Image 3
Students' post-questionnaire answers (Greek Learning Journey)



Concerning the first research question, the evidence of the efficacy of the OOEL online exchange and cultural interaction towards the enhancement of 21st century skills is not easily presented and measured in concrete data. We will first look at the answers given by 20 students-the key actors in this innovation- participating in our first online learning journey. They testified to the great impact the OOEL project had on tneir communication and collaboration with peers and on their digital skills. In relation to perspective taking 80% answered they listened to the stories of students from the other schools in an extremely positive (45%) and a very positive (35%) mood. Only 20% answered moderately. Regarding the digital skills enhancement and communication using technology for meaningful and thoughtful exchange of personal and local stories,65% answered they managed to use technology extremely effectively, 20% very effectively and only three students out of the 20 said they could communicate moderately (Image 3). They all agreed that the online platform was "a ray of hope", "a window" opening up to the world in the midst of the lockdown, a unique opportunity for them to discover new places and listen attentively to other students' stories.

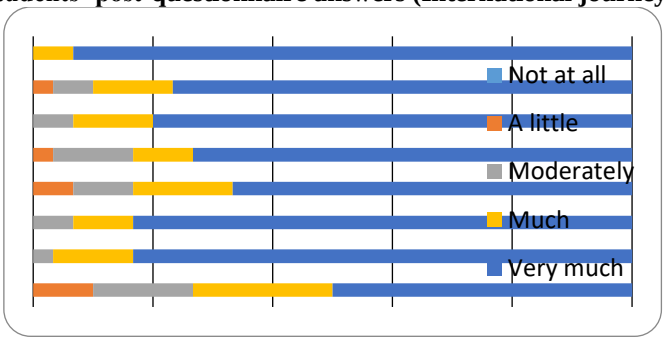
Image 4
Reflective Collaborative Board

Besides the Likert-scale close-ended questions, we opted for more open-ended responses, due to the students' young age and inexperience in answering online questionnaires. Therefore in all learning journeys the students discussed freely about their thoughts, concerns or preferred activities of the OOEL program. Overall, the students responded with great enthusiasm when asked if they considered the OOEL program a rewarding experience. Despite the pandemic restrictions, the majority of 6th grade children said they extremely enjoyed their collaboration with same-age students and regretted not being able to slow walk round their neighborhood and take photos. Moreover, they appreciated discovering new friends and listening to stories from the other children. They were able to use the English language to communicate and were so proud to upload their work on the platform of such a famous University like Harvard. Our young students were asked to discuss and summarise their thoughts on the OOEL project activities work they had carried out and they completed it first in the form of sticky notes, some in Greek and some in English. We then transformed it into the next Jamboard poster (Image 4).

Image 5
Creating neighborhood maps: OOEL posts

Turning to the online learning community observations, the plethora of student digital generated content can inform our study concerning the enhancement of 21st century competences. To this end, some characteristic examples from all learning journeys will be presented here. Firstly, the activity of mapping meaningful geographies was a testament to the creativity competence of children, not only from an artistic point of view, but also as their own unique way of documenting their area, an observational drawing and designing practice, rarely employed in our regular curriculum. Furthermore, every map revealed a story of what the children envisioned as important for them on their everyday route to school, their neighborhood or their town park, setting the tone for a more holistic, experiential exploration of their learning experience connected with their family and community context (Image 5).

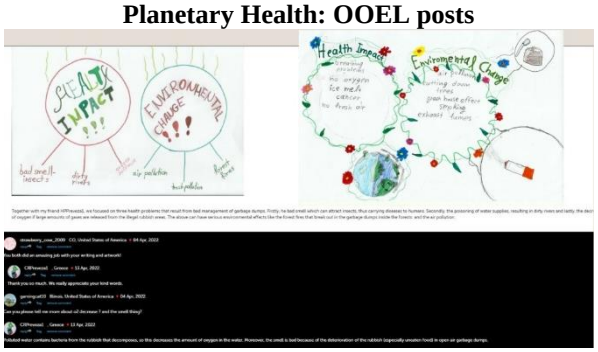
Secondly, the slow walking activity that invigorated all journeys was a novel way for our Primary students towards visible thinking, self-exploration and looking beyond the obvious trying to discern the connections between everyday objects and bigger systems. Their critical thinking and analytical skills were documented in this process.



Revealing thoughtful observation, connecting feelings-emotional learning- to everyday objects, one characteristic post by a 6th Grade student taking an olive grove photo in the COVID-19 pandemic read: "I chose to take this photo because I liked the peace and quiet of the place. It was on the day we went to collect our olives to make our family olive oil. Although we do it every year, this was a special occasion in the midst of the lockdown and I really enjoyed my countryside day out!" This quotation is reminiscent of Tishman's (2018) four themes of slow looking: seeing with fresh eyes and philosophical wellbeing, reminding oneself of what is important in life. The other two, present in many online interactions concerning neighborhood walks are exploring perspective and noticing detail.

Finally, visibility in the OOEL platform was portrayed in every student's activity feed and the 'popularity" of our students' posts attracted a great number of thoughtful comments from students from other schools, thus enhancing self confidence and communication skills, writing and receiving comments using mainly the appreciation and probing dialogue tools.

Research Question 2: Added benefit for students embracing OOEL program



Turning to research question 2, we will utilize the post-survey reflective answers of our students' international journeys (Image 6) combining the data with their actual work posted on the OOEL platform. To quote some of the students' open-ended survey answers, a 12-year-old said: "I liked that we saw pictures from other cities and countries and I enjoyed talking in class about the new things we discovered". They unanimously valued the connection and collaboration with all their classmates and the youth from the other countries, which corresponded with their love for project-based learning in all our EFL Needs Analysis results. More than 90% valued collaborating with other children speaking in English, yet they acknowledged that they needed to improve their dialogue toolkit use, as this was never practiced in their Greek classroom before. 90% of them believed that walking round their neighborhoods slowly made them notice things they had never observed before. Also, thinking about local and global solutions was gradually part of their civic engagement repertoire. Finally, their digital competences had been empowered by their online engagement.

Image 6
Students' post-questionnaire answers (International journeys)

These findings accorded with the number of comments and platform activity our participants demonstrated, revealing a sense of belonging in a special group of this innovative online learning community. As already stated in image 4 above, students could appreciate how different individuals, cultures and educational systems can visualise maps of their areas. As one student marvelled, he loved the great number of different ingenious ways children from India or the USA could use to draw their areas, accompanied by a personal explanatory story. In the activity named "mapping connections to larger forces, stories or systems" (Dawes Duraisingh and Tishman, 2024) in our Planetary Health journey, children could appreciate how urgent solutions were needed for problems of protecting habitats, water resources, destruction of crops, waste landfills and human health problems, interrelated in a global perspective regardless of living in Colorado, Madrid, Toronto, Illinois or Preveza, Greece (Image 7).

Image 7
Planetary Health: OOEL posts

Interviewing people in the Stories of Human Migration curriculum helped our students "cultivate" interpersonal and intrapersonal skills, feeling empathy and listening attentively to others with respect to their history, family story and culture. It was an enlightening experience of dialoguing with an older generation, gaining valuable insights into their different views on social issues, an experience enriched by the interviews of their "fellow walkers" from the other schools and Salopek's slow journalism interviews. Moreover, it had the added benefit of media literacy practice and learning to decipher how supposedly "objective" stories could be biased in a subtle way using images, tone of voice or even headtitles to impress people.

Research Question 3: Gains of EFL teachers in endorsing OOEL program

"*Sir, I am too old to learn*" from Shakespeare's King Lear (Act II, Scene 2) is a quotation that succinctly summarises the frustration experienced by a great number of teachers, facing the challenges of the digital era. Yet, the EFL teachers have always been at the forefront of innovation endorsing the design of technologically-enhanced scenarios/lessons that promote 21st century competences. In the case of the present study, educators joining OOEL online learning Community can greatly benefit from the vast resources the Project Zero provides, but also the immense opportunities of connecting with esteemed experts and teachers from such diverse teaching environments. Consequently, addressing the specific needs and interests of our students before implementing the OOEL program, designing and enacting school-based change, was supported by the collaboration of a thriving community of practice and continuous professional development.

Undoubtedly, the OOEL curricula can be integrated in all school subjects. OOEL-inspired activity frameworks have been designed inter alia for 4th Grade Primary students (Papastamatiou, 2021) and for EFL Junior High school settings (Tsiachti, 2022). These go beyond the scope of this study and the expertise of the teacher-researcher. Focusing on our present study, the alignment between the OOEL and the Unified Curriculum for the teaching of Languages-EPS-XG (Government Gazette, 2016) is crucial. In particular, the EPS-XG prioritizes the social construct of learning, the value of multiliteracies and multimodality, plurilingualism and pluriculturalism, the need for communicative competence in a social setting. Needless to say, all the above assert the efficacy of the OOEL online learning activities towards communicative competences that transverse subjects and go beyond language proficiency of A1 and A2 level that our 5th and 6th Grade students are supposed to reach respectively in our EFL classroom (CEFR, 2020). In the Framework revisited by CEFR experts (2023) action-oriented, plurilingual and intercultural education are again highly valued. Our teaching journals were indeed in accordance with the above, as we documented our students thinking more critically, creating with greater imagination, writing and debating topics while noticing connections between personal, local and global problems. In sum, the teacher had the role of the designer, content and process facilitator, co-ordinator and supporter of the learning process, encouraging teamwork, peer-to-peer teaching and scaffolding as more competent linguistically and digitally students helped their peers in an autonomous learner-centred environment.

In the same vein, our learning journeys curricula were in line with the Council of Europe Reference Framework of Competences for the Democratic Culture (2018), as prioritizing cultural diversity, linguistic, communicative and plurilingual skills, knowledge and critical understanding of self and the world (history, cultures, media, sustainability, environment) are at the heart of the OOEL innovation. According to Melliou and Retalis (2024), the biggest gain asserted by primary teachers of the OOEL integrated with the 'Skills Labs' framework was the tools afforded to us for monitoring the development of competences. On a personal note, however, the biggest gain was that our EFL classroom, even amid lockdown restrictions, was a window for students opening up to the world and welcoming the students and teachers from so many beautiful places, cultures and languages to dialogue with our students.

CONCLUSION

The present study sought to explore the innovation for the teacher and students that embarked on "Out of Eden Learn"/ "Open Canopy" learning journeys, enriching their teaching and learning practices with Harvard's Project Zero strategies and pedagogical tools. Although the discussion was relevant to the EFL primary classroom, it can perhaps offer insights to other educators, who are interested in welcoming a global online learning community of teachers, students and University experts in their school environment with the unique privilege of belonging to a global community that supports teachers and students adopt multidisciplinary inquiry-based approaches, cultivating cultures of thinking embedding multiliteracies and 21st century competences. Regardless of the limitations and weaknesses of our small-scale study with a relatively small number of student-participants, our EFL adoption of OOEL practices recorded very positive findings. The complexity of the new learning constructs and the challenges teachers and students face everyday cannot be easily dismissed. However, the active and enthusiastic engagement of our students was really promising. It enriched our teaching and learning practices and gave us valuable insights in promoting 21st century competences and monitoring students' performance in an inclusive, creative learning environment, with activities coming closer to Koutsogiannis' (2011) missing third circle.

Imagine a classroom where children start their day by listening attentively to stories illustrated by maps, pictures or videos accessed online, sent to them by their "fellow walkers" from schools miles away from their own. Embracing initiatives like the above OOEL online learning program can really transform your classroom like that. Ergo, being educators in interesting and challenging times requires empowering young people to become agents of change, respectful global citizens that accept, appreciate, collaborate and endorse multicultural global learning contexts.

ABSTRACT

The purpose of this work is to demonstrate the usefulness of scientific software in understanding, calculating and deepening the concepts of the physical sciences, through combinatorial and animated visualizations. It is particularly important especially for physical quantities and concepts that are abstract and there is no direct supervision over them (e.g., the field quantities, atomic and wave phenomena). All of the above is done with the using of the MAPLE and MATCAD software. Additionally, a powerful alternative proposal for the study of electrical circuits is given through the TINA simulation software in relation to the classical laboratory and its effectiveness is demonstrated, especially in cases where the laboratory activity cannot be carried out due to endogenous problems.

In the first part of the paper, the characteristic physical quantities of the electrostatic field are created and depicted, such as the intensity, the equipotential curves or surfaces, dynamic lines in two and three dimensions for a single charge, as well as, for a combination of charges.

In the second part of the paper, wave phenomena are presented in the plane and in space, such as the spatiotemporal propagation of a wave of constant amplitude, but also with damping, the spatiotemporal production of a standing wave, the spatiotemporal production and evolution of beats and waves interference.

In the third part of the paper, atomic orbitals are produced and designed. The atomic orbitals s, p, d, f and the hybrid sp^2 are depicted in the plane and in space, as well as, density diagrams and various sections of them in space.

In the last part of the paper, the study of electrical and by extension electronic circuits is presented, through the POSTPROCESSING feature of the electrical and electronic circuit simulation software TINA.

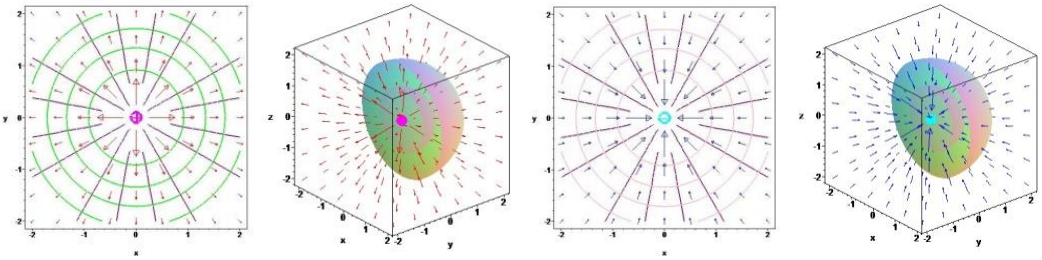
Keywords: Electrostatic Field, Waves, Atomic Orbits, Electrical Circuits.

INTRODUCTION

The great importance of the scientific visualization of physical phenomena was realized by the scientific community very early on. Initially, through the scientific programming languages FORTRAN (Stoimenos et al., 1978), PASCAL, C and then with specialized scientific software programs, such as MATLAB (Samaras & Sahalos, 2004), MATHEMATICA, etc. The visualization explains in a very understandable and comprehensible way natural phenomena that: a) are difficult to perceive through mathematical formalism or verbal description, b) there is no direct supervision of these phenomena, because they cannot be observed and easily perceived by our senses, c) it is difficult or impossible to carry them out in the real time laboratory.

This paper presents a very efficient, easy-to-use and parameterized method using the scientific software MALPE (Maple 9.5, 2004) and MATHCAD (Mathcad 14.0, 2007), for the visualization and study of characteristic quantities of electrostatic fields, wave phenomena and atomic orbitals. It should be emphasized that the three-dimensional visualizations produced, both in the MAPLE environment and in the MATHCAD environment, can be freely rotated horizontally and vertically (angles φ, θ). This capability constitutes an excellent means of supervision and monitoring of the phenomena. Also, the study of electrical circuits is presented through the TINA simulation software (TINA 8, 2008), with which we can study with great precision and in-depth parameters, which, with the classical laboratory method, would be laborious but also, in many cases, intrinsically impossible to do.

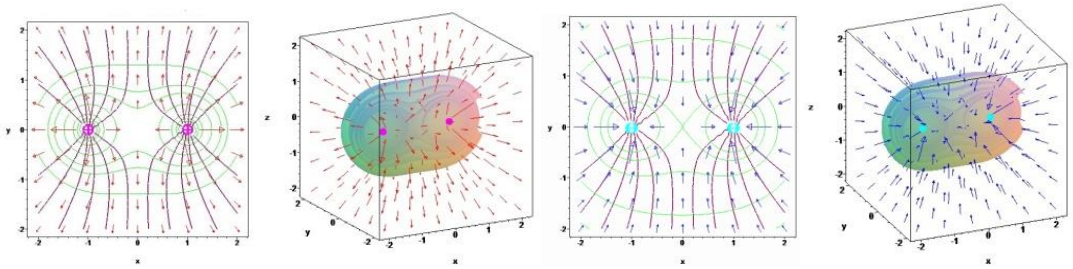
VISUALIZATION OF CHARACTERISTIC ELECTROSTATIC FIELD QUANTITIES



The characteristic quantities of the electrostatic field are its intensity and potential at any point (x,y,z) of the field. These two quantities are given respectively by the following relations (Papadimitraki – Hlihlia, 1980):

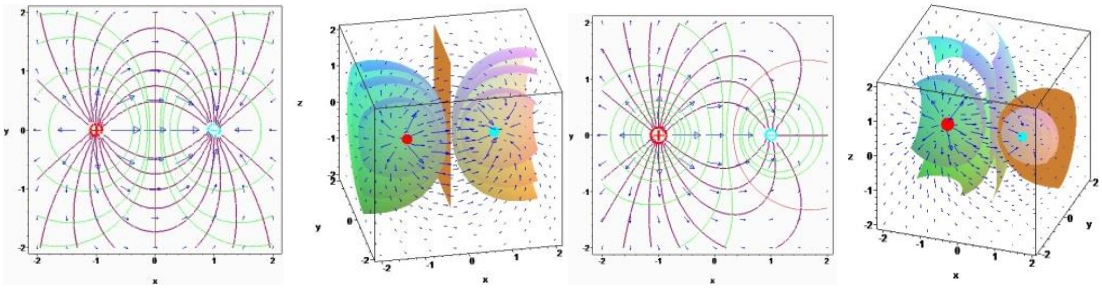
$$\vec{E}_{total}(x,y,z)=\frac{1}{4\cdot\pi\cdot\varepsilon}\cdot\sum_i\frac{Q_i}{r_i^2(x,y,z)}\hat{r}_i \quad , \; V_{total}(x,y,z)=\frac{1}{4\cdot\pi\cdot\varepsilon}\cdot\sum_i\frac{Q_i}{r_i(x,y,z)} \qquad \{A.1\}$$

Where ε is the dielectric constant of the medium, r_i is the distance of the point from the charge Q_i and $\hat{r}_i$ is the unit vector in the direction charge Q_i to point (x,y,z). Based on these equations, the intensity and potential for charges in the plane and in space will be calculated and visualized. Along with these two quantities, the dynamic lines and the equipotential curves or surfaces of the electrostatic field will also be depicted.



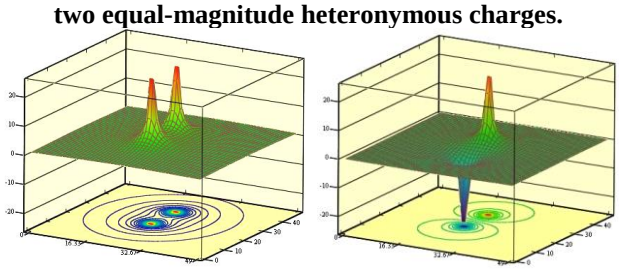
For a point charge + 5μCb and - 5μCb placed at the origin of the axes (Image 1) the vector field of the intensity, the dynamic lines and the equipotential curves in the plane are plotted. Also, in space, the vector field of the intensity and the equipotential surfaces in cross-section around the charge are depicted. The visualization was done with the MAPLE software.

Image 1
2D and 3D visualization of characteristic field quantities for a point charge +5μCb or -5μCb



For two identical equal-sized point charges + 5μCb or - 5μCb placed at the positions (-1,0,0) and (1,0,0) (Image 2) the vector field of the intensity, the dynamic lines and the equipotential curves in the plane are depicted, together with the vector field of the intensity and the equipotential surfaces in cross-section in the space around these charges. The visualization was done with the MAPLE software.

Image 2
2D and 3D visualization of characteristics field quantities for two identical charges +5μCb or -5μCb



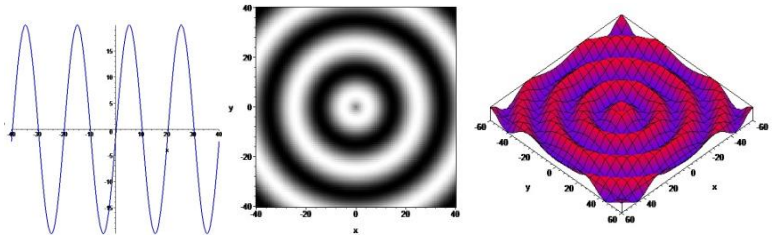
For two heteronymous point charges of equal magnitude + 5μCb, - 5μCb placed at positions (-1,0,0) and (1,0,0) (Image 3) are depicted, on the left, the vector field of the intensity, the dynamic lines and the equipotential curves in the plane and the vector field of the intensity and the equipotential surfaces in cross-section in the space around them. On the right, in the last two illustrations (Image 3), the positive charge is twice the magnitude of the negative one. The equipotential with the brown color in all illustrations is the equipotential $V = 0$ Volt. The visualization was done with the MAPLE software.

Image 3
2D and 3D visualization of characteristic field quantities. On the left, two heteronymous charges +5μCb, -5μCb and on the right, two heteronymous charges +10μCb, -5μCb

With the MATHCAD software, complex visualizations can be created, such as those shown in (Image 4). These diagrams depict the change in potential in the space around the point charges, with simultaneous projection of the equipotential curves on the plane, on the left for two equal homonymous positive point charges and on the right for two equal-magnitude heteronymous point charges. The magnitude of the charges is equal to $(4\pi\varepsilon_o)$Cb and the distance between them is equal to 0.8 m. The study and observation of the change in potential offered by this visualization is extremely educational and important. Because, in addition to calculating the numerical quantities, it also provides the most complete picture of the change in the field potential. Also, the free rotation of the diagram horizontally and vertically (angles φ, θ) within the MATHCAD programming environment allows the panoramic overview of the phenomenon.

Image 4
Composite 2D - 3D visualization of the field potential: a) left for two equal homonymous charges and b) right for two equal-magnitude heteronymous charges.

SPATIOTEMPORAL REPRESENTATION OF WAVE PHENOMENA



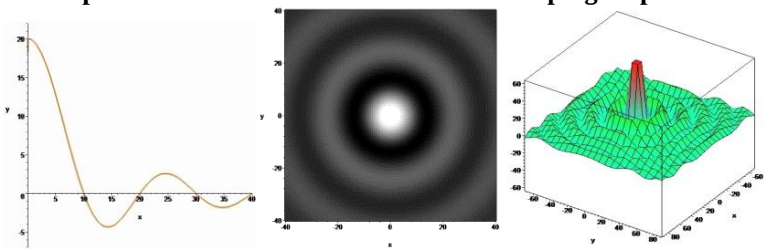
A disturbance propagating in space with a velocity υ is generally a function of the form $y(r,t)=f(r\pm\upsilon t)$ (Oikonomou, 1980), where r is the distance of a given point in space from the source of the disturbance. The minus (-) sign means propagation along the positives of the reference system and the plus (+) sign means propagation along the negatives of the reference system. When it comes to harmonic wave propagation, then the above general equation is written as follows (Allonso & Finn, 1979) & (Ioannou et al., 2019):

$$y(r,t)=Y_m\cdot\sin\left[2\pi\cdot\left(r\mp\upsilon\cdot t\right)\right] \quad \acute{\eta} \quad y(r,t)=Y_m\cdot\sin\left[2\pi\cdot\left(\frac{t}{T}\mp\frac{r}{\lambda}\right)\right] \qquad \{B.1\}$$

Where Y_m is the amplitude of the wave, T is the period and λ is the wavelength. Of course, the basic wave relations also apply: $\upsilon=\lambda f$ and $\omega=2\pi f$, where f is the frequency and ω is the angular frequency.

Based on the above equation, we produce and visualize (Image 5) with the MAPLE software a harmonic wave of constant amplitude, in one, two and three dimensions. The wavelength is λ=20 m and the velocity υ=0.4 m/s. Within the software environment, motion (animation) is generated depending on the choice of the wave propagation direction and thus we can observe the evolution of the phenomenon in space and time. This makes the study very efficient, but also pedagogically extremely effective.

Image 5
1D, 2D and 3D constant amplitude harmonic wave visualization



If the amplitude of the wave is damped by the distance from the source, e.g., it is of the form:

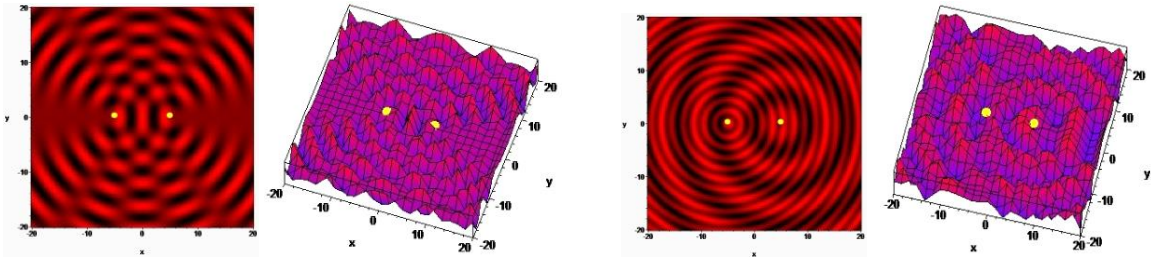
$$y'(r,t)=\frac{Y_m}{r}\cdot\sin\left[2\pi\cdot\left(r\mp\upsilon\cdot t\right)\right] \qquad \{B.2\}$$

then, the previous visualization is shaped like the one shown in (Image 6).

Image 6
1D, 2D and 3D representation of harmonic wave with damping amplitude with distance.

In the case where two generally different waves interfere, then the total disturbance at a point in space, which is at distances r_1 and r_2 from the wave sources, will be given by the relationship:

$$y_{1,2}(t)=Y_{m1}\cdot\sin\left[2\pi\cdot\left(\frac{t}{T_1}-\frac{r_1}{\lambda_1}\right)\right]+Y_{m2}\cdot\sin\left[2\pi\cdot\left(\frac{t}{T_2}-\frac{r_2}{\lambda_2}\right)+\varphi\right] \qquad \{B.3\}$$



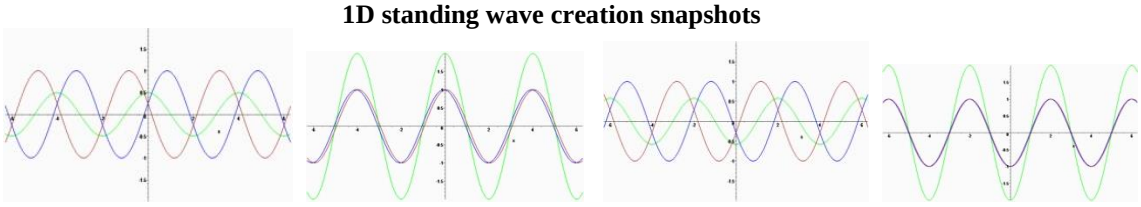
Where φ is the phase difference between the two waves.

If the waves have zero phase difference, the same amplitude, the same period and the same wavelength, then the above relationship {B.3} is simplified to (Oikonomou, 1980) & (Stoimenos et al.,1978):

$$y_{1,2}(t) = Y_m \cdot \sin\left[2\pi \cdot \left(\frac{t}{T} - \frac{r_1}{\lambda}\right)\right] + Y_m \cdot \sin\left[2\pi \cdot \left(\frac{t}{T} - \frac{r_2}{\lambda}\right)\right] = 2Y_m \cdot \cos\left[2\pi \cdot \left(\frac{r_1 - r_2}{2\lambda}\right)\right] \cdot \sin\left[2\pi \cdot \left(\frac{t}{T} - \frac{r_1 + r_2}{2\lambda}\right)\right] \quad \{B.4\}$$

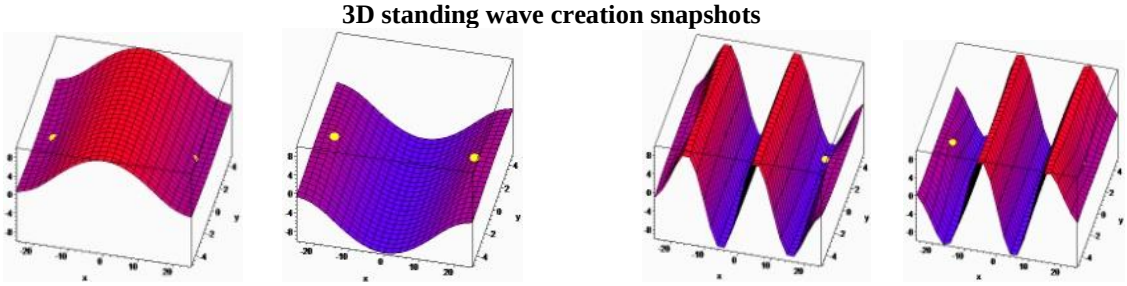
The results of the interference of two waves with propagation velocity υ=0.4 m/s and wavelengths $\lambda_1 = \lambda_2$=4m are presented in the first two figures in (Image 7). The last two figures (Image 7) depict the interference of two waves with υ=0.4 m/s and wavelengths λ_1=2m and λ_2=7m. As mentioned above, within the software environment motion (animation) is produced and thus, we can observe the evolution of the interference phenomenon in space and time.

Image 7
2D and 3D visualization of the interference of two waves



The interference of two waves moving in opposite directions generally leads to the formation of standing waves. The standing wave ratio SWR is an indicator of how strong the standing wave is. This phenomenon is particularly undesirable in electromagnetic wave emission systems. Due to poor or incorrect matching, the traveling wave is reflected by a percentage, resulting in the creation of a counter-propagating wave. The traveling wave interferes with the reflected one, resulting in the creation of a standing wave. For two identical waves propagating in opposite directions, the following will apply (Oikonomou, 1980) & (Ioannou et al., 2019).:

$$y_{sw}(x,t) = Y_m \cdot \sin\left[2\pi \cdot \left(\frac{t}{T} - \frac{x}{\lambda}\right)\right] + Y_m \cdot \sin\left[2\pi \cdot \left(\frac{t}{T} + \frac{x}{\lambda}\right)\right] = 2Y_m \cdot \cos\left(\frac{2\pi}{\lambda} \cdot x\right) \cdot \sin\left(\frac{2\pi}{T} \cdot t\right) \quad \{B.5\}$$



In (Image 8), four snapshots of a standing wave (in green color), resulting from the interference of two identical but oppositely propagating waves, are shown. Within the MAPLE software environment, animation is produced and thus, we can observe the evolution of the standing wave in space and time.

Image 8
1D standing wave creation snapshots

(Image 9) shows snapshots of a standing wave in space, resulting from the interference of two identical, but oppositely propagating waves. In the two figures on the left, the 1st vibration mode is shown. In the next two, the 2nd vibration mode is shown, with a phase difference between the waves equal to π. And here, by generating motion, we can observe the vibration of the standing wave in space and time.

Image 9
3D standing wave creation snapshots

The interference of two waves of the same amplitude and with a small difference in frequencies f_1 and f_2, moving in the same or opposite directions, leads to the formation of beats. Then, for the result of the interference and the creation of beats, the following will apply (Oikonomou, 1980) & (Stoimenos et al., 1978):

$$y_{1,2-BEAT}(t) = 2 \cdot Y_m \cdot \cos\left[2\pi \cdot \left(\frac{f_1 - f_2}{2}\right) \cdot t\right] \cdot \cos\left[2\pi \cdot \left(\frac{f_1 + f_2}{2}\right) \cdot t\right] \quad \text{and} \quad f_1 > f_2 \quad \{B.6\}$$

In (Image 10) two snapshots of beats are shown. The first on the left was created in the MATHCAD environment and the second on the right in the MAPLE environment. For both snapshots we can generate motion and observe the creation of the beat in space and time.

Image 10
Snapshots of beats

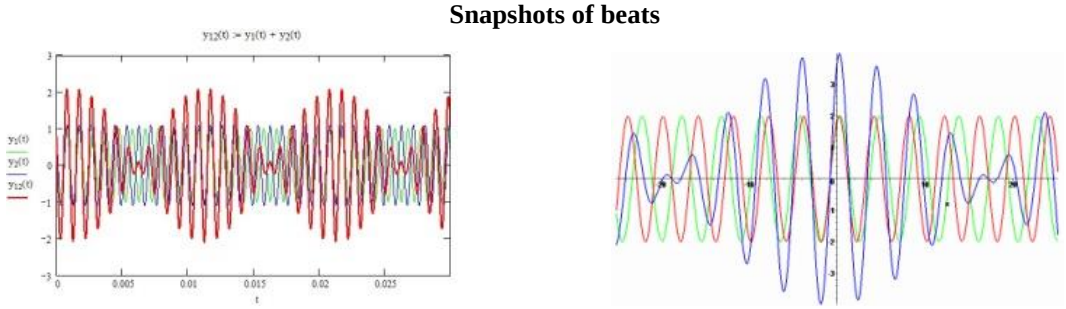


ILLUSTRATION OF ATOMIC ORBITALS

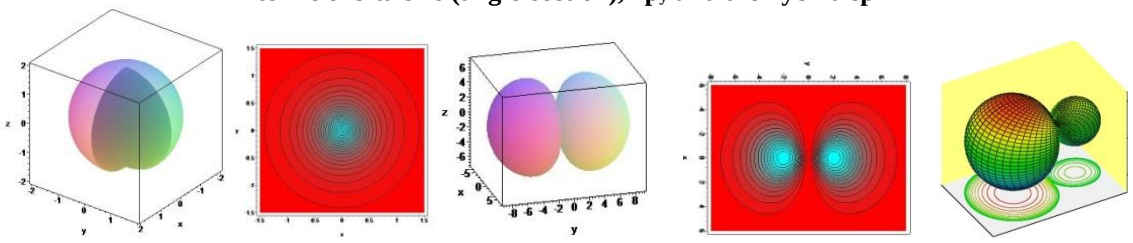
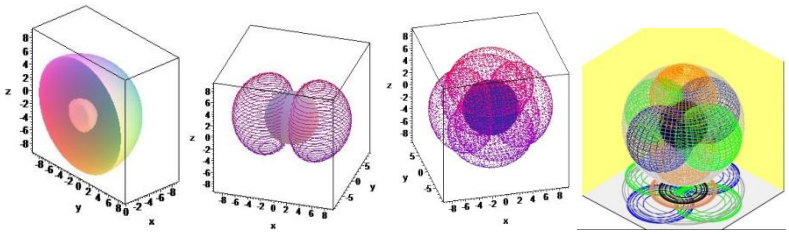


In the microcosm, at the atomic and subatomic level, we know that the orbit of a particle, as we know it from classical mechanics, is meaningless. Similarly, for the electron, its orbit cannot be determined in the sense of classical mechanics. Instead, the concept of the atomic orbital is used. The orbital is a space where the electron can exist with increased probability. Atomic orbitals are acceptable solutions of the Schrödinger equation for the wave function ψ, as given below (Haralampous, 1980) & (Manousakis, 1981):

$$\nabla^2 \cdot \psi + \frac{8 \cdot \pi^2 \cdot m}{h^2} \cdot (E - V) \cdot \psi = 0 \quad \acute{\eta} \quad \mathrm{H}\psi = \mathrm{E} \cdot \psi \qquad \{\Gamma.1\}$$

where H is the Hamilton operator and ψ is the wave function of the electron. The square of the wave function ψ^2 gives us the probability of the electron being present at a certain point in space. Based on the ψ solutions of the Schrödinger equation, we will visualize the orbitals.



In (Image 11) the 1s (in angle-section) and $2p_y$ orbitals are illustrated together with the corresponding density diagrams. In the same Image, at the end, the hybrid orbital sp^2 is also presented, which results from the combination of the s orbital with one of the p_x , p_y , p_z orbitals.

Image 11
Atomic orbitals 1s (angle-section), $2p_y$ and the hybrid sp^2

In (Image 12) a combined depiction of the 1s and 2p orbitals is presented in order to provide, as best as possible, a more comprehensive overview of the relative position of these orbitals in space.

Image 12
Combined representation of 1s & 2s (cross-sections), 1s & $2p_x$, 1s & 2p, 1s & 2s & 2p

In the following figures (Image 13) to (Image 15) the orbitals $3d_z^2$, $4d_z^2$, $4f_z^3$, $3p_z$, $4p_y$, $4d_{x^2-y^2}$, $4f_{y(3x^2-y^2)}$ και $4f_{z(x^2-y^2)}$ are illustrated.

Image 13
Atomic orbital $3d_z^2$

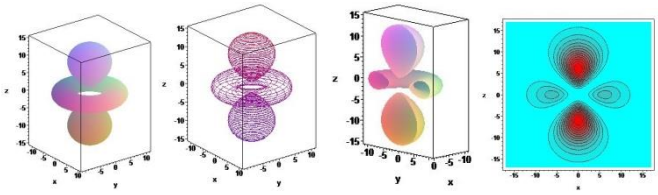


Image 14
Atomic orbitals $4d_z^2$ (the three initials) & $4f_z^3$ (the last three)

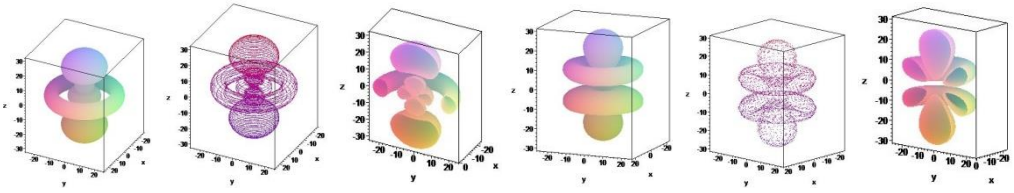

Image 15
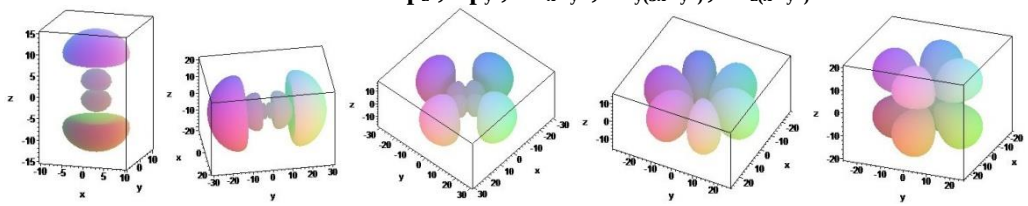
Atomic orbitals $3p_z$, $4p_y$, $4d_{x^2-y^2}$, $4f_{y(3x^2-y^2)}$, $4f_{z(x^2-y^2)}$



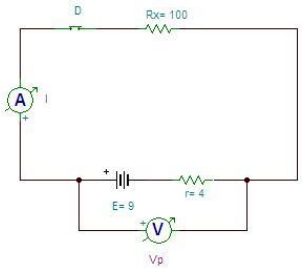


ILLUSTRATION OF FUNCTIONAL CHARACTERISTICS OF ELECTRICAL CIRCUITS

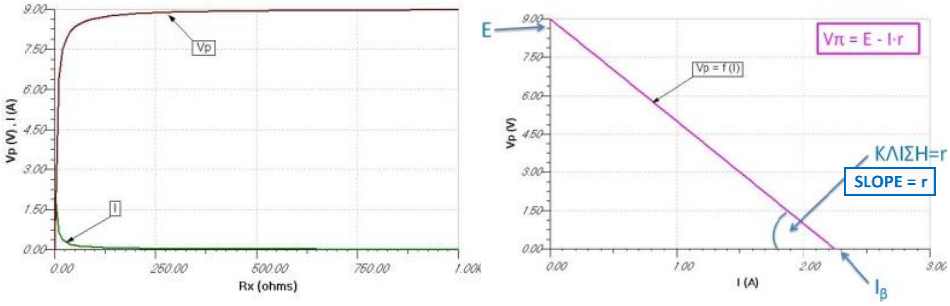
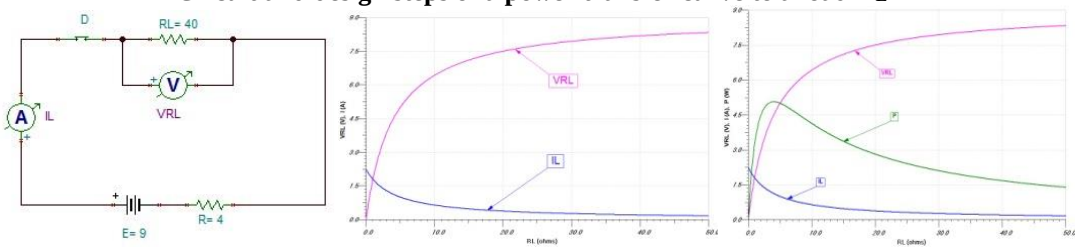
It is known that the laboratory analysis and study of an electrical circuit is subject to endogenous uncertainties, such as random and systematic errors (Zaharoulis, 2000). However, apart from these bugs, there are some other limitations. So, for example, we will mention that we cannot have zero resistance, we cannot short-circuit a voltage source, we cannot have a variety of resistors with any desired value. All of the above, as well as many others, introduce limitations in the study and analysis of electrical circuits in real time. An alternative study proposal, which overcomes all the above problems, is the analysis and study of electrical circuits through scientific simulation software. One such software is TINA (TINA 8, 2008). The full parameterization in many areas of analysis (DC, AC, Transient, etc.), as well as the flexibility in plotting graphs, make it a cognitively and pedagogically useful tool.



With the TINA simulation software, we will study an electrical circuit for calculating the internal resistance of an electrical voltage source, such as the one designed in (Image 16).

Image 16
Electrical circuit for calculating the internal voltage source resistance



Let us assume a source with an electromotive force (EMF) E = 9V and an internal resistance r = 4Ω. The voltmeter Vp measures the polar voltage of the source, and the ammeter I measures the current flowing through the circuit. We vary the resistance Rx and thus obtain a range of current and voltage values, as drawn in (Image 17) on the left. Based on these values and using the POSTPROCESSING procedure, we obtain the characteristic straight line, as it is drawn in (Image 17), on the right. From the characteristic straight line, the electromotive force (EMF) of the source, the short-circuit current, and the internal resistance of the source can be calculated.

Image 17
Voltage and current variation (left). Characteristic straight line (right)

With the same methodology, as above, the power transfer curve to a load can be obtained and the condition for maximum power transfer can be calculated. The electrical circuit and the accompanying diagrams are shown in (Image 18). In the last diagram, the power curve (P) is drawn in green, which, as shown, presents a maximum for R_L=R=4Ω.

Image 18
Circuit and design steps of a power transfer curve to a load R_L

CONCLUSIONS

It has been observed that the majority of school and university textbooks are meager in illustrations concerning abstract quantities, such as field concepts and wave phenomena, but also concepts and quantities of the microcosm. Of course, as printed materials, they lack the movement or temporal evolution of phenomena in real time. (Alexakis et al., 2019) & (Ioannou et al., 2019) & (Liodakis et al., 2020).

The present paper comes to cover this weakness with the use of scientific software. It constitutes a powerful proposal with great cognitive and pedagogical value. By utilizing the possibilities of design, visualization in one, two and three dimensions, motion and parameterized calculations, we are given the opportunity to study in depth, as well as to supervise physical phenomena, which would otherwise be impossible to approach.

EDUCATION AND DIGITAL MEDIA- INSPIRATION FOR THE IONIAN POET THROUGH "KALLIPATEIRA"

Giannouli Sofia
Philologist, PE02 (Secondary Education Teacher)
1st Model Junior High School of Preveza with Lyceum Classes
Preveza, Greece
e-mail: alexandropoulosalekos@yahoo.com

ABSTRACT

This paper examines the application of innovative pedagogical approaches in Ancient Greek language instruction, focusing on the combined use of traditional teaching and digital tools for the analysis of Pausanias' text "Kallipateira" and Lorentzos Mavilis' poem, also titled "Kallipateira."

The aim of this work is to highlight how modern technology can be integrated into the teaching of Ancient Greek, enhancing the learning experience and broadening the possibilities of understanding ancient texts. Specifically, it seeks to present how digital tools and artificial intelligence contribute to the analysis, comprehension, and retention of literature, while simultaneously strengthening students' cognitive skills.

The objective is to explore the synergistic use of traditional teaching methods with contemporary technology to bolster the learning process and underscore the significance of digital technology in modern education. The integration of technological tools, such as artificial intelligence (AI), chatbots, and text analyzers, offers personalized explanations and facilitates the understanding of the historical and literary elements of the works. This approach not only enhances text comprehension but also contributes to the development of critical thinking and the strengthening of students' digital literacy.

The application of Howard Gardner's Theory of Multiple Intelligences through digital tools fostered the development of various types of intelligence, enhancing students' linguistic, logical-mathematical, spatial, social, and intrapersonal intelligences. Specifically, tools like Google Docs strengthened linguistic intelligence, Google Sheets and Excel enhanced logical-mathematical intelligence, while Google Earth contributed to the development of spatial intelligence. Collaborative learning through tools such as Padlet and Trello enhanced social intelligence, promoting students' collaborative skills. Concurrently, reflective tools like Mind Maps and Journals strengthened intrapersonal intelligence, fostering personal reflection and self-awareness. The use of tools such as PowerPoint for presentation, the internet for research, and e-Class for managing and monitoring the learning process strengthened students' digital skills, offering a comprehensive and contemporary approach to learning. This implementation of innovative technologies highlights the importance of digital technology in education, broadening learning opportunities and preparing students for their future in the digital world.

Keywords: Ancient Greek, Kallipateira, Literature, Digital Media.

INTRODUCTION

The continuous evolution of technology undeniably acts as a catalyst for the transformation of the contemporary educational landscape, necessitating the revision and enrichment of traditional teaching methodologies (Prensky, 2001). Within this context, education is called upon to transcend its conventional structures and integrate innovative digital tools capable of cultivating in students skills of paramount importance, such as critical thinking, creativity, and the ability for effective collaboration, within a globalized and constantly evolving socio-economic environment (Anderson, 2016). The systematic integration of technology into the educational process, with a particular emphasis on the utilization of digital media and applications, highlights a pioneering perspective for the upgrading of the teaching of humanities and literature.

The selection of studying Pausanias' ancient text "Kallipateira" in conjunction with Lorentzos Mavilis' homonymous poem presents an exceptionally interesting field for exploring this dynamic educational synergy. The combination of the historical narrative of the ancient Greek world with the poetic interpretation of the 19th century offers a unique opportunity to understand the timeless impact of a historical event on literary creation. The holistic approach to these works, which combines traditional methods of textual interpretive analysis with the integration of modern digital tools, is estimated to qualitatively upgrade the learning experience, encouraging the active participation of students (Vygotsky, 1978), fostering their creativity, and enhancing the development of their critical thinking.

The strategic utilization of digital tools, such as PowerPoint for the dynamic visualization of information, the internet as a source of authentic and diverse information (Leu et al., 2004), and collaborative platforms like e-Class for interaction and co-creation, provides students with the ability to analyze and present the work in ways that are both visually appealing and structured (Mayer, 2009). Additionally, seamless access to external sources is facilitated, and collaboration and the exchange of ideas among students are enhanced, creating a supportive learning environment (Harasim, 2012). Furthermore, the integration of cutting-edge modern technologies, such as Artificial Intelligence (AI) and specialized text analysis platforms, opens new horizons for a personalized approach to learning (Popenici & Kerr, 2017). These technologies facilitate an in depth understanding of textual excerpts, the clarification of complex concepts, and the meaningful connection of theoretical knowledge with practical application. The targeted utilization of these tools provides students with the invaluable opportunity to bridge the knowledge of the past with the possibilities of modern learning tools, enhancing their analytical skills and promoting a multi-layered understanding of the work.

Consequently, the conscious synthesis of traditional and contemporary teaching methods emerges as a progressive and promising strategy in the educational process (Collins & Halverson, 2010). This approach transcends the passive assimilation of information and encourages students to develop a dynamic relationship with knowledge, combining theoretical understanding with active creation and meaningful interaction, making learning a more engaging, meaningful, and productive experience.

THE DIGITAL TRANSFORMATION OF THE LEARNING EXPERIENCE

The implementation of the teaching unit focused on the ancient text and the emblematic poem "Kallipateira" marked a radical renewal of traditional teaching (Siemens, 2005). It was based on a conscious and methodical integration of a wide range of modern digital tools, going beyond their simple use as supplementary means. The primary goal was the substantial upgrading of the learning experience, the transition from the passive reception of knowledge to the active participation (Vygotsky, 1978) and creative expression of students. This approach treated technology not as an end in itself, but as a powerful catalyst for cultivating critical thinking, enhancing collaboration (Harasim, 2012), and personalizing learning (Gardner, 2011).

THE DYNAMICS OF POWER POINT: VISUALIZING KNOWLEDGE AND STORYTELLING

One of the central tools utilized with ingenuity was PowerPoint (Mayer, 2009). Students were not limited to simply creating slides with bullet points but used it as a canvas for creating dynamic and visually appealing presentations that narrated stories and analyzed complex concepts. Through the skillful combination of concise yet comprehensive text, high-aesthetic and informative images, and multimedia material such as short but targeted videos, students managed to highlight with clarity and excellent organization the thematic complexity of the poem and the rich historical context of Kallipateira. The strategic use of inventive graphic representations, illuminating flowcharts depicting sequences of events or logical relationships, and enriching illustrative material that brought the era to life, contributed decisively to deepening the understanding of the historical and literary context, offering a holistic and multi-dimensional view of the work. These presentations were not simple reports but the product of personal processing and creative synthesis of information.

THE INTERNET AS A GATEWAY TO KNOWLEDGE AND CRITICAL RESEARCH

The seamless access and critical utilization of the internet played a crucial and irreplaceable role in the entire educational process (Leu et al., 2004). Students did not treat the internet as a simple repository of information but were trained to search for and evaluate the reliability and validity of a multitude of digital sources. This included navigating reputable academic libraries, searching specialized scientific articles with high informational value, and critically viewing educational videos that offered alternative perspectives and interpretations. This free access to diverse sources allowed students to deepen their understanding of the historical and mythological existence of Kallipateira, to discover unknown aspects of her story, and to inextricably link the text and the poem with the broader context of ancient Greek history and culture. The development of the ability to search, cross-reference information from different sources, and conduct in-depth study empowered students to synthesize a comprehensive and multi-dimensional review of the work, based on documented evidence and not superficial information.

THE E-CLASS PLATFORM : A COLLABORATIVE LEARNING AND FEEDBACK ENVIROMENT

Additionally, the strategic utilization of the e-Class educational platform significantly enhanced the collaborative dimension of learning among students (Harasim, 2012). The platform did not simply function as a digital space for storing assignments but as a dynamic environment for interaction and the exchange of ideas. It facilitated the easy posting of produced work, the immediate and meaningful exchange of constructive opinions among students, and mutual evaluation by both instructors and peers. Through this digital environment, students had the opportunity to receive immediate and targeted feedback on their work, identifying their strengths and areas for improvement, and to make the necessary revisions based on suggestions, thus strengthening the dynamic process of continuous learning and reflective thinking. The platform encouraged dialogue, the exchange of different perspectives, and the construction of knowledge through interaction (Vygotsky, 1978).

THE INNOVATION OF ARTIFICIAL INTELLIGENCE: PERSONALIZED ANALYSIS AND IN DEPTH UNDERSTANDING

The integration of Artificial Intelligence (AI) constituted one of the most innovative and groundbreaking elements of the teaching approach for the in-depth analysis of the poem (Popenici & Kerr, 2017). Through the creative use of platforms supported by advanced AI algorithms, such as interactive chatbots that simulated an experienced interlocutor and sophisticated text analysis tools that identified patterns and connections, students received personalized interpretations of complex words and phrases in the poem, tailored to their individual pace of understanding and their specific questions. Furthermore, intelligent AI systems provided useful suggestions for further research and original ideas for interpreting the work, facilitating its full understanding on multiple levels – linguistic, thematic, historical, and symbolic. The strategic integration of technology at this level promoted the development of critical thinking, enhancing students' ability to analyze the subtle conceptual connections and latent semantic nuances of the work, going beyond a superficial reading.

THE THEORY OF MULTIPLE INTELLIGENCE: PERSONALIZATION OF LEARNING AND TALENT DEVELOPMENT

Howard Gardner's Theory of Multiple Intelligence provided a fundamental and flexible pedagogical framework for the implementation of a deeply personalized teaching methodology (Gardner, 2011). Through the inventive and adaptive use of a wide range of digital tools, students had the opportunity to develop and cultivate different types of intelligence, aligned with their particular inclinations, unique learning styles, and personal interests:

- Linguistic Intelligence: The combined use of advanced text processing tools, such as Google Docs with its collaborative writing and commenting features, with interactive AI chatbots that provided immediate feedback on grammar and vocabulary, allowed students to delve into the processing and analytical understanding of the poem, while simultaneously strengthening their linguistic skills in terms of vocabulary, grammar, and syntax.
- Logical-Mathematical Intelligence: The effective utilization of data management and easy-to-read graph creation tools, such as Google Sheets or Excel, allowed students to organize, classify, and quantitatively analyze data related to the history and participation of women in the Olympic Games, thus developing their organizational, analytical, logical, and mathematical abilities. The visualization of data helped in drawing conclusions and understanding historical trends.
- Spatial Intelligence: The creative use of advanced geospatial tools, such as Google Earth for virtual tours of ancient Olympia, and the utilization of detailed three-dimensional digital models representing the ancient stadiums and

temples, allowed students to create vivid virtual representations of ancient Olympia and the Olympic Games, enhancing their geographical and historical understanding of the context of Kallipateira's story.

- Social Intelligence: The widespread use of collaborative digital tools, such as Padlet for collecting ideas and opinions and Trello for organizing group work, provided students with a dynamic and interactive environment for teamwork, free exchange of ideas, and co-creation of comprehensive projects, thus enhancing their social skills, the ability for effective communication, the development of empathy, and harmonious collaboration in achieving common goals (Vygotsky, 1978).
- Intrapersonal Intelligence: The targeted use of thought visualization tools, such as Mind Maps for organizing thoughts and connections, and the creation of digital personal journals where students recorded their thoughts and reactions, encouraged students to reflect deeply on the story of Kallipateira and its connection to modern reality, promoting self-awareness, introspection, and the development of personal interpretations.
- Musical Intelligence: The original utilization of digital music creation and editing tools, such as GarageBand or Soundtrap, gave students the opportunity to compose original musical pieces thematically related to the poetry and atmosphere of the ancient era, expressing emotions and ideas through the language of music, thus enhancing their musical perception, their aesthetic sense, and their creativity.

Through this multi-dimensional and innovative approach, the teaching unit on "Kallipateira" was not limited to the simple transmission of knowledge but was transformed into a dynamic and inspiring learning experience that encouraged active participation, critical thinking, and the development of multiple skills in students. The conscious integration of digital tools, combined with the pedagogical theory of Multiple Intelligences (Gardner, 2011), created an environment where each student had the opportunity to highlight their particular inclinations and acquire knowledge in their own unique way.

CONCLUSIONS: THE TRANSFORMATIVE POWER OF DIGITAL TECHNOLOGY IN EDUCATION

The systematic and methodical application of digital tools and modern technologies in the educational process, with a particular emphasis on the teaching of literary works such as Lorentzos Mavilis' emblematic poem "Kallipateira" and the in-depth study of the ancient Greek language through Pausanias' historical work "Kallipateira," emphatically emerges as a catalytic factor for the substantial and multifaceted improvement of the learning experience and the holistic development of critical skills necessary for students in the 21st century (Anderson, 2016). The harmonious and balanced synergistic use of traditional teaching methods with the unlimited possibilities offered by modern technologies not only enhances the active and meaningful participation of students in the learning process (Vygotsky, 1978) but also significantly broadens their potential for creative expression, authentic discovery of knowledge, and effective collaboration in a constantly changing digital environment (Siemens, 2005), simultaneously offering the invaluable opportunity for a deeply personalized learning journey that respects the individual needs and paces of each student (Gardner, 2011).

Firstly, the flexible and multi-dimensional digital tools, such as PowerPoint for the dynamic visualization of complex concepts and the engaging presentation of information (Mayer, 2009), the vast internet as an inexhaustible source of valid and diverse information (Leu et al., 2004), and the interactive e-Class platform for seamless and effective collaboration between students and teachers (Harasim, 2012), provide students with the necessary infrastructure and means to present their work in a well-structured, logically organized, and particularly engaging manner that captures interest and facilitates understanding. The creative integration of diverse and rich multimedia material, including texts, high-resolution images, illuminating diagrams, interactive maps, and short but concise videos, deeply enhances the understanding of abstract concepts and the historical, social, and cultural context of the literary work and the ancient text. Through the systematic use of these tools, students not only gain a deeper understanding of the subject matter but also develop critical digital skills (Siemens, 2005), acquiring valuable experience in the effective and targeted search for reliable information, the ability to analyze complex data from various sources, and the production of original and high-quality digital content that meets modern communication requirements.

Secondly, the strategic and pedagogically sound utilization of Artificial Intelligence (AI) in the interpretive analysis of literary and ancient texts and in the provision of personalized explanations that take into account the individual needs of students, allows them to understand the subtle conceptual nuances of the work in greater depth, to discover hidden connections, and to substantially enhance their linguistic skills (Popenici & Kerr, 2017). The advanced tools supported by AI algorithms offer analytical and targeted explanations for the linguistic and conceptual challenges that students inevitably face when engaging with the ancient text and the poem, making the learning process more personalized, directly focused on the individual needs and the particular learning paces of each student. Simultaneously, the creative integration of Howard Gardner's Theory of Multiple Intelligence (2011) encourages a deeply differentiated

approach to learning, allowing each student to fully utilize their dominant cognitive abilities and their unique talents through the flexible use of different digital tools that correspond to their personal inclinations and learning styles.

The widespread and systematic integration of digital media into educational practice is not limited to simply enhancing individual learning abilities and deepening the understanding of the cognitive subject but also contributes decisively to the development of students' social and emotional intelligence, skills of vital importance for their successful social integration and harmonious coexistence (Vygotsky, 1978). Through active collaboration in flexible groups, the free and constructive exchange of ideas, and the joint creation of digital products, students develop significant social skills such as effective communication, the ability to listen to and respect different opinions, negotiation, responsibility-taking, and creative problem-solving. Technology, as a powerful tool for enhancing collaboration and interaction, promotes emotional and social development, allowing students to experience learning not as a solitary and competitive process but as a collective, interactive, and supportive experience.

Furthermore, the inventive use of interactive digital tools and engaging educational platforms creates a learning environment that is not only more attractive and interesting but also directly adapted to the needs and preferences of the digitally literate students of the 21st century (Prensky, 2001), who have grown up in a world where technology is an integral part of their daily lives. The possibility of immediate and personalized feedback from the software and the teacher, the easy and quick access to diverse and up-to-date sources of information (Leu et al., 2004), and the ease in organizing, analyzing, and presenting information enhance student autonomy, their initiative, and their active participation throughout the learning process, transforming them from passive recipients of knowledge into active creators and researchers.

Finally, the overall and undeniable result of the conscious and pedagogically designed integration of digital tools into the educational process is the creation of a more dynamic, participatory, engaging, and deeply personalized learning environment that responds to contemporary educational needs and challenges (Siemens, 2005). The harmonious and balanced combination of the timeless value of traditional teaching with the unlimited possibilities offered by modern technology allows students to develop a wide range of skills that are essential for their success not only in their academic journey but also in their personal and professional lives in the demanding 21st century, such as critical and analytical thinking, the ability for effective and creative collaboration (Vygotsky, 1978), flexibility, adaptability, creativity, and digital literacy (Leu et al., 2004). Simultaneously, it promotes the recognition of the continuous and rapid evolution of the digital world and the undeniable importance of the continuous integration of new technologies into educational practice to create a more effective, engaging, and student-centered learning environment (Collins & Halverson, 2010). This paper emphatically underscores the imperative need for continuous research, systematic experimentation, and critical evaluation of the use of new technologies in education to ensure their optimal and pedagogically beneficial utilization for the substantial support of learning and the holistic development of students.

ABSTRACT

This paper provides an in-depth exploration of the video lesson as an essential digital teaching and assessment tool in vocational education. It advocates for the integration of video lessons by VET teachers, emphasizing their potential to enhance existing educational practices.

The paper presents a range of software options for creating video lessons, showcasing their versatility and pedagogical advantages while acknowledging challenges such as potential technical issues and the necessity for adequate training. The development of a video lesson is demonstrated using the Ted Ed platform, which enables educators to create interactive lessons by embedding questions and educational resources directly within the video content.

The study examines two video lessons designed for Vocational High School students: one focused on "Oral Hygiene" and the other on "Automotive Engine Cooling Systems." This methodology allows teachers to evaluate students' progress and engagement while also facilitating self-assessment for the students themselves. Feedback was collected through a questionnaire completed by students after the lessons, providing valuable insights into the effectiveness of this teaching approach and points for improvement. The conclusions underscore the significance of video lessons in vocational education and affirm their efficacy as a teaching tool.

Keywords: Video lesson, TedEd, flipped classroom, Health Education, Thermodynamics, EPAL.

INTRODUCTION

Technological advances have significantly transformed teaching methods. Hattie (2017) suggests that digital technology has fundamentally changed pedagogical practices, improving the interactivity and accessibility of knowledge. Nowadays, the use of video in teaching has become established, following the pace of time in the context of integrating ICT into educational practice (Georganta, 2019). Belt and Lowenthal (2021) highlight the crucial role that the COVID-19 pandemic has played in increasing the use of educational videos. In the same context, Kapandelis and Sofos (2024) remark that following the unprecedented educational conditions caused by the suspension of in-person school operations due to the COVID-19 virus, the use of video as an educational material increased. This trend continued later with the proliferation of interactive systems in schools.

Particularly in Vocational Education, where practical knowledge and visualized learning are crucial, the video course is one of the innovative tools used in the modern educational process, which Bates (2022) mentions as contributing substantially to its understanding and assimilation.

The pedagogical value of video has been recognized without doubt by the entire educational world (Koumi, 2006). Today, most teachers go through the process of viewing a video in class almost daily, which they usually find after searching online repositories (Pattier, 2021), in order to motivate students more effectively (Moreno-Guerrero et al., 2020). Vocational training requires methods that combine theory and practice, with video courses offering opportunities to simulate real-world business scenarios. Also, Kay and Kletskin (2012) found that videos improve students' performance in practical lessons by allowing for repetition and visualization of complex processes.

The purpose of this paper is to present the utilization of video lessons created through the TED-Ed platform in the context of the flipped classroom, with applications to two teaching subjects: "Oral Hygiene" and "Automotive Engine Cooling Systems."

CONCEPTUALIZATIONS - THEORETICAL APPROACH

A video can be defined as the technology used to capture, process, store, transmit, and reproduce still images in series, in the form of an animated image (Spanaka & Tsiapalos, 2012). Digital is the name of a video, for the production of which digital media is used (Bell & Bull, 2010).

Many learning theories offer insight into how instructional videos work as effective teaching and learning tools. Among them, behaviorism suggests that students can acquire new information and skills by observing and reproducing behaviors depicted in educational videos. In addition, cognitive theories place a strong emphasis on the role of the mind in learning, implying that students develop mental models of subjects using information provided in instructional videos (Rasiman et al., 2020). In particular, the theory of Constructivism argues that students can take advantage of opportunities to reflect and discuss the content of the video with others. Finally, Sociocognitive theories highlight the benefits of students' interaction with other viewers and the discovery of new knowledge (Rahman et al., 2024). Several studies have shown that technology can enhance learning (Schmid et al., 2013) and that video, in particular, can be a highly effective educational tool (Stockwell et al., 2015).

Students can benefit significantly from the use of educational videos in teaching, as research highlights that teaching based solely on textbooks and reading may not yield high performance for students (Sablić et al., 2021). Educational videos are valuable tools that help students understand lessons better due to their high acceptance (Acedo & Robles, 2019). They present information in a lively and engaging way, capturing students' attention and making complex ideas easier to grasp. These videos can also stir emotions and reactions (Wong et al., 2023), which improves the overall learning experience (Grammarly, 2025). Carmichael (2018) reports that many students express a preference for video lessons, as they provide an opportunity for high self-activity, and an increasing number of teachers are receiving requests to incorporate digital content into their teaching.

VIDEO LESSONS AS A TEACHING TECHNIQUE

Brame (2016) states that the coexistence of three elements (Cognitive Load - Student Engagement - Active Learning) provides a solid basis for the development and use of video as an effective educational tool and can help teachers maximize its usefulness in the classroom. Video lessons, when designed based on multimedia learning principles (e.g., incorporating close-to-life examples and focusing on substance), reduce cognitive load and enhance learning effectiveness (Mayer, 2020). Denning (1992) focuses on the structured use of video for active learning and proposes a

tripartite approach: pre-activity (e.g., preparation with discussions), activity (creative interaction with video through questions and reflections), and meta-activity (extending learning with experiential activities or discussions).

According to Hansch et al. (2015), video has numerous affordances as a medium for online learning, as shown in the graphic presentation that follows (Image 1).

Image 1
Possibilities of using a video lesson according to Hansch et al (2015)

Conducting Demonstrations	**Use of optics juxtaposition**	**Leverage multimedia presentation**

The educational video, like any technological tool, despite its potential, is not an educational tool if it is not accompanied by the appropriate pedagogical approach and design, so that its content is closely linked to an educational goal (Bell & Bull, 2010). For there to be learning success through the use of an instructional video in teaching, it should be targeted, have the appropriate format for the target group and the content it presents, and, of course, be didactically planned and coordinated with the teaching and learning goals (Sofos, 2021).

Video courses have become a popular teaching medium in education in recent years (Scagnoli et al., 2019). There is a significant amount of research in the literature regarding how video course content and its construction significantly determine learning outcomes (Rickley & Kemp, 2021). The result of this research is the formulation of fundamental principles for creating video courses to ensure their maximum effectiveness (Rickley & Kemp, 2021). Through video lessons, students' contact with new knowledge is removed from the narrow context of the school classroom and transferred to the familiar space of their home. (Triantafyllou & Dimitrakopoulou, 2022).

Important advantages of the video lessons mentioned in the literature are, among others:

A. The ability to cover learning gaps or questions that arise during classroom teaching.
B. The opportunity provided to students to attend classes that they missed due to their forced or non-compulsory absence from school.
C. The assistance provided to pupils with special educational needs who find it difficult either to attend the oral delivery of the course or to study the written texts in school textbooks, thus relieving them of a large part of their difficulties.
D. The ability of students to quickly refer to a specific part of the teaching and repeat it as many times as necessary (Ronchetti, 2010).

SOFTWARE FOR CREATING VIDEO LESSONS

Video search sources (for educational use) are:

Educational Television. Offers streaming and on-demand ERT films, organized by educational level and thematic area.

Phototree. It hosts short video tutorials (up to 10 minutes) for easy integration into teaching and learning.

YouTube. It is the most popular platform for educational materials, with the ability to create channels and playlists.

Alternatively, *TeacherTube* focuses solely on educational content, enabling teachers to share videos with each other.

For the creation of interactive videos and video lessons, teachers can also use the following:

EdPuzzle (https://edpuzzle.com/). Teachers can use videos from YouTube, Khan Academy, or other sources (or upload their own), edit them (including cuts and voiceovers), and insert questions (multiple-choice or open-ended) at specific points. It also supports creating classes and tracking student progress.

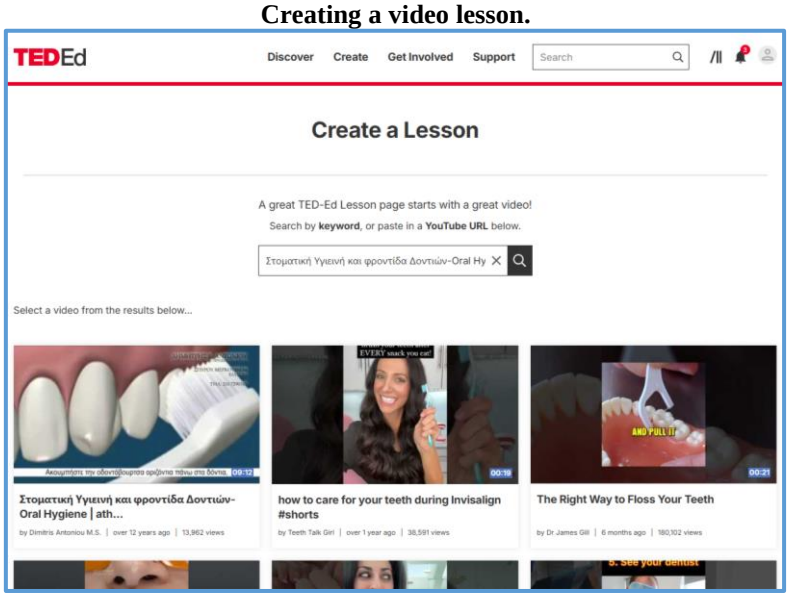
PlayPosit (https://go.playposit.com/) is a platform for designing interactive video lessons ("Bulbs"). Teachers select videos (e.g., YouTube, TED) and add activities (such as questions, discussions, and external links) at specified points in time. It offers functions for creating classes, assigning assignments, and monitoring students.

TED-Ed (https://ed.ted.com/). It allows teachers to create lessons based on YouTube videos, complete with added questions. Students can replay lessons as many times as they want, and the teacher can track their responses and progress.

PART B: IMPLEMENTATION OF A VIDEO COURSE ON THE TED-ED DIGITAL PLATFORM (IMPLEMENTATION STAGES)

Creating a video course on the TED-Ed digital platform requires the following steps:

Step 1: Create an account on the TED-Ed platform.



Step 2: Choose the video for your lesson. You can customize a TED-Ed Lesson or visit video search pages to select a video.

Step 3: Create your course (Image 2.).

3a) If you want to customize one of the TED-Ed video courses, visit any of the course pages you are interested in and use the red "Customize this course" button at the bottom right to copy the course to your account. Keep any of our pre-filled questions and resources that you like, or you can add your own.

3b) If you choose a new video from YouTube, put the URL in the line "Create course. You can then add an introduction to the video, as well as "Think" (multiple-choice and open-ended questions), "Dig Deeper" (additional resources), and discussion sections (guided or open forums).

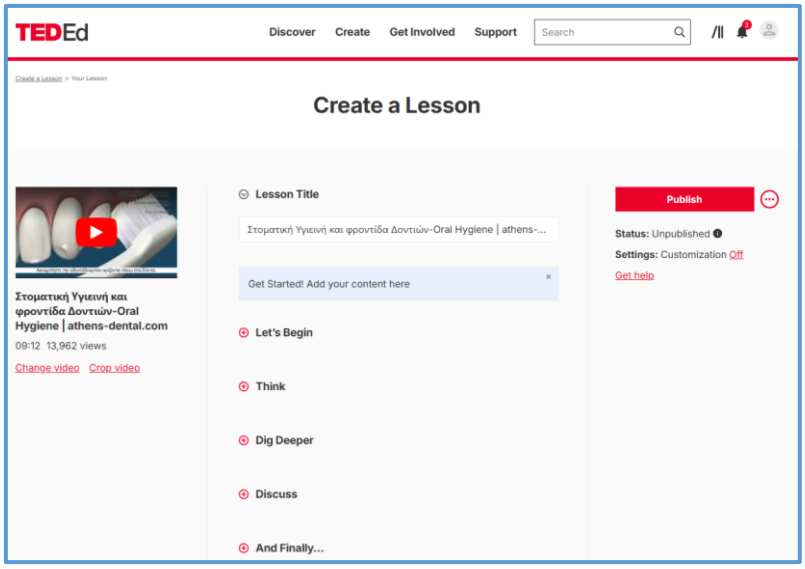


Image 2
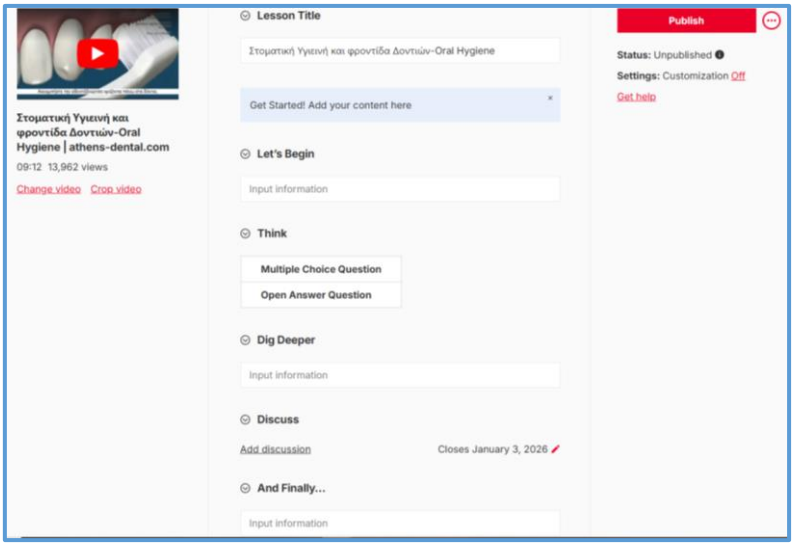
Creating a video lesson.

Step 4: Publish your course (Image 3). After publishing your course, you will receive a unique URL for your course page. Anyone who owns this link will have access to it, so you can share it with your class in any way you choose.

Step 5: Track progress. As students submit assignments on your course page, you will be able to track their progress and see their responses. You can manage the lessons you have created, go back to editing your drafts, or access students' work at any time by going to the course activity page.

Image 3
Publishing the lesson

INDICATIVE EXAMPLES OF VIDEO LESSONS



A. The first video course was developed for the needs of a two-hour teaching of the elective course "Health Education" for students of the first grade in the Day and Evening Vocational Lyceum. It aims at the issue of Oral Hygiene and is aligned with the Curriculum described in Government Gazette 64/22-1-2016 and specifically concerns content axis 3: "Consumption and Health – Nutrition and Eating Habits". The video course was implemented in the context of the implementation of an inverted order, for the design of which the six steps proposed by Dunn (2014) were followed. The "inverted order" model, according to Estes et al. (2014), in correspondence with Denning's (1992) proposal, includes three stages of preparation and implementation: the "Pre-class" stage, the "In-class" stage and, the "Post-class" stage.

1. Design: Initially, the thematic unit to be taught was chosen and the necessary Educational Design followed, recording the Objectives of the teaching, the Teaching Method chosen, as well as the teaching tools that will be used at each stage of teaching. A decisive role in the choice of video as a teaching tool for the implementation of this particular teaching was played by the view of Frencken et al. (2017) that the visualization of techniques in video hygiene improves practical skills. Finally, the activities that will be included in order to fulfill the objectives and achieve the expected Learning Outcomes were selected.

2. Video Selection - Video Lesson Creation: At this point, the three factors that, according to Hansch et al. (2015), ensure the optimal educational outcomes from the use of video as a teaching medium in teaching were seriously considered. Initially, it was carefully studied whether the video is the most appropriate teaching tool to achieve the learning objectives of the specific thematic unit. Then, the strengths of the specific teaching tool were identified and highlighted, in order to achieve a targeted choice of the video. In the event that a suitable video format and content could not be identified, a new one should be created, tailored to meet the specific educational needs, utilizing the appropriate digital tools for this purpose.

After conducting a search, a suitable video was chosen from the website (http://www.youtube.com/). It is a nine-minute and forty-four-second video that focuses on oral hygiene and incorporates all the key elements of the new knowledge that the specific teaching must include, presented in an engaging way that activates the students. Based on the selected video, the video course entitled "Our Oral Hygiene" was created on the TED-Ed platform, following the platform's guidelines and utilizing all relevant sections of a video course. In this phase, the teacher gathered and integrated (Image 4) the educational material to be included in the video lesson, in addition to the video that was placed in the Watch section of the TED-Ed platform. The material used to enrich the Think module was produced by the teacher himself and consisted of seven multiple-choice questions and three short-answer questions. For each question, the teacher set a video-hint, that is, the point in time in the video where the "answer" to the question is, so that in case of an incorrect answer, the student can look for the video-hint and perceive their mistake.

Image 4
The management of the lessons.

It is essential to acknowledge the significant advantage this platform offers teachers in evaluating students' progress and participation during video lessons. Furthermore, students have the opportunity for self-assessment accordingly. The content of the Dig Deeper section on the platform TED-Ed was enriched with material collected by the teacher from reputable online sources. Finally, to complete the Discuss section, the teacher asked the students a judgment question to test their metacognitive abilities, in other words, to recognize what they know and what they do not know (Raptis & Rapti, 2007). Metacognition is a skill that can be taught (Zimmerman, 2002) and offers a double benefit to the students, as they are initially able to self-regulate the new knowledge and then cultivate a positive attitude towards both the new knowledge and the educational system in general (Matsangouras, 2007). In addition, the worksheets were created by the teacher, who would then process them with the groups of students during in-person teaching.

3. Sharing: The link to the video lesson was then sent via email to the students, making it clear to them that the content of the video lesson would be discussed extensively in face-to-face teaching, where relevant educational activities would follow. The students attended the lesson and interacted autonomously. Their work and performance were recorded in a relevant field of the digital platform, which was available to the teacher for feedback and to organize face-to-face teaching.

4. Face-to-face teaching: In the classroom, within the time frame of face-to-face teaching, sufficient time was allocated for the teacher to assess the students' understanding of the new knowledge, address their questions, and thoroughly discuss any disagreements that may have arisen. With the toothbrush, dental floss, and oral model available in the Nursing Laboratory of our school, students practiced the correct way to brush their teeth and use floss. Experiential learning emphasizes the importance of hands-on experience and the connection of school with everyday life. In contrast to passive memorization, it encourages students to search for meaning and to engage fully, mentally and emotionally (Dedouli, 2002).

5. Work in groups: Following the face-to-face session, students were assigned to specific groups to work on a particular topic, adhering to the principles of the group collaborative teaching method. The first group searched for available oral hygiene products on the internet and, based on the knowledge gained by the students from their participation in the video lesson, they evaluated the characteristics of each product. The second group processed the results from the completed questionnaire on the students' oral hygiene, which was included in the final section, and presented them to the class. The third group visited the school's canteen to find packaging of sweets that had a special mark, which stated that the dessert was "tooth-friendly". They presented the results in class, and a discussion followed. Food products that do not harm the teeth and are suitable for the school canteen were then suggested. In this context, collaborative learning can enhance both learning outcomes and students' positive attitudes towards school, classmates, and the lesson. Based on group activities, these approaches foster innovation in teaching, centered on the group rather than the individual student (Dimitriadou & Efstathiou, 2008). At the same time, through teamwork, students develop key competences such as collaboration, structured criticism, and effective planning (Walberg & Paik, 2000).

6. Team interaction and presentation of each team's work through a representative.

B. Following the same approach, a "flipped classroom" course was designed for the course "The Cooling System of the Car" using TED-Ed, adapted for students of the Vocational High School (EPAL), which is part of the Curriculum of the course "Elements of Technical Thermodynamics" for students of the B' Grade EPA.L. of the Mechanical Engineering sector. In their study findings, Akçayır and Akçayır (2018) reveal that the most frequently cited benefit of the flipped classroom is the improvement of students' learning performance, and they point out that video courses are an effective teaching practice for laboratory courses. For this particular course, the use of video is quite common because its curriculum includes subjects from many specialties and laboratories that are not always available.

Video Lesson Design:

STEP 1: Preparation (Before the Lesson) – Use of TED-Ed. The teacher created the course using the TED-Ed platform and selected the video titled "Car engine cooling system" (https://www.youtube.com/watch?v=vRZu3-64yo0) that he later adapted using Adobe Premiere, CapCut, and Audacity programs. After the addition of multiple-choice questions and Discussion/Open-ended questions, such as: "What could be the consequences if the water pump breaks down?", the lesson was shared with the students (via link).

STEP 2: Classroom Activities (Flipped Classroom Application)

Activity 1: Review & Confirmation of Understanding (10 minutes). A short discussion of their answers to TED-Ed (what they struggled with, what surprised them). The teacher used key questions, such as: "Why does the car need a cooling system?" / "Which part of the system do you consider the most vulnerable and why?"

Activity 2: Teamwork – "Diagnostic Approach" (20 minutes). The teacher formed groups of 3 to 4 people, and each team undertook a failure scenario (e.g., overheating, refrigerant leakage) with the task of identifying which component was most likely to be responsible and suggesting remedial steps. By the end of this activity, every group presented the results of their work (2 minutes per group).

Activity 3: Practical Simulation (15 minutes). During activity 3, a demonstration of images and videos of genuine parts of the cooling system (such as the water pump and refrigerator) took place, and students had to match the names with the components and explain their functions.

STEP 3: The tools used for the Assessment of the course were: a) Self-assessment (via a questionnaire at TED-Ed), b) questions in the course flow (e.g., "How would you check the coolant levels?"), and c) Evaluation of the teamwork (grading by rubric: accuracy, collaboration, creativity).

STEP 4: Extension (Optional). The extension of the program is relatively easy. It can include, for example, an Extracurricular Assignment, such as observing and recording a real-life example (e.g., with a photo of the family car's cooling system).

EVALUATION

A team of students from the First Grade, along with another team from the Second Grade of the Mechanical Engineering Department at the 1st EPA.L. of Preveza, participated in the video lessons. At the end of each lesson, a classroom discussion occurred, which resulted in the recording of students' impressions, opinions, and concerns. In addition, the students were asked to evaluate various aspects of the two video lessons by completing a questionnaire compiled by the teachers. From analyzing the responses of 31 students to the relevant questionnaire, it was found that 83.9% of the students found this teaching method very interesting. In contrast, 74.2% described the TED-Ed platform as particularly easy to use.

Regarding the content of the selected video lessons and the assignments incorporated into them, 87.1% of students who responded to the questionnaire reported that they found the content understandable and did not encounter any obstacles or difficulties in their comprehension. A key point of interest is the fact that a significant percentage of students tend to overemphasize the importance of subtitles in the video content, as well as the self-evaluation opportunities that the platform provides to students. In response to a question about proposals for improving the video lesson, the vast majority of students stated that they would not like to see any changes. At the same time, a small percentage would prefer to reduce the duration of the video lessons. The teachers were expecting these replies, which agree with research findings that focus on controlling the duration of the videos. However, there were no other available videos that incorporated the necessary information for the lesson. Regarding the difficulties they faced during the video lesson, 95% of the students reported that they encountered no obstacles. Ultimately, 100% of the students would recommend this teaching method to their peers.

CONCLUSIONS

Video lessons are a crucial tool in modern education, especially for laboratory lessons. They provide flexibility, engagement, and opportunities for personalized learning, making them a valuable tool for educators. Case studies of the courses we presented highlight the effectiveness of TED-Ed as a platform for creating interactive and effective video lessons. Applying it to courses such as Oral Hygiene and Refrigeration Systems has empirically documented benefits. Implementing the video lesson in the context of the flipped classroom enhances the learning experience, offers flexibility in education, and promotes active student participation. It also saves teaching time and enhances practical exercise. The integration of tools like TED-Ed allows for the creation of personalized learning paths and offers a promising approach to modern education.

Video courses are a prime example of how technology is dynamically entering education, even if it is not yet fully integrated. This is true for many digital tools available, which have the potential to support the teaching process significantly. Although skepticism towards them is not unfounded, the teaching experience demonstrates that students accept them positively and can make valuable contributions to the educational process. Even when employed as a supplementary tool, video courses produced satisfactory results. In the future, it is proposed to expand the use of video courses to cover more subjects and to evaluate their effectiveness through empirical research.

ABSTRACT

Distance learning and the examination of higher education courses are challenging tasks for both teachers and students. The qualitative and quantitative characteristics of the information to be communicated make the investigation and use of the most appropriate digital media necessary. In addition, the reduced and sometimes non-existent interaction between teachers and students and the limited, therefore, feedback throughout the educational process require the implementation of innovative teaching procedures. The recent mandatory implementation of all teaching activities in higher education and not only because of the pandemic, has highlighted the weakness of the system of teachers and digital media in order to maintain a level of study equal to that prevailing in the pre-pandemic era. At the same time, however, it was also an opportunity, especially because of the extended duration of distance education, to develop tools and procedures that will be able to offer an increased level of knowledge at any time. Besides, the realization of distance education in secondary education in the event of an extraordinary or unforeseen event has recently been legislated by the Ministry of Education, Religious Affairs and sports as well as the possibility of distance training in higher vocational schools (former Institute of Vocational Training (IVT)). In higher education, distance assessment of students under conditions has been in force for three years, which was recently applied in many universities during the final exams of the fall semester of the academic year 2023-2024. It is therefore possible that distance learning will be repeated in the future and hence it is necessary to look for methods that will deliver the expected result.

This paper describes how the educational process was covered, including the final assessment of students, in the context of a higher education course taught at the Department of Civil Engineering of the University of Thessaly and related to the Highway Engineering. This course is included in the study guides of the Departments of civil and rural and surveying engineering both in Greece and abroad. Both the technical means and the methodology applied throughout the academic semesters are analyzed and statistics on student performance are presented before and during the period of the distance learning process. It is worth noting that within the framework of this course the students developed a particularly demanding semester theme concerning the integrated study of a road project with weekly progress monitoring sessions and strict intermediate progress dates using a design program.

The research showed that during distance learning, the initial interest in developing the semiannual theme was high but fewer students than in other years completed it. In addition, during the first distance examination period, the percentage of successful students was particularly high, which decreased to pre-pandemic levels in the following examination periods.

The project aspires, among other things, to contribute to those fellow teachers who seek an effective process of distance delivery of lessons and conducting examinations using digital media. What has also been shown in the context of the research is that with the available digital media in universities, the levels of knowledge offered both qualitatively and quantitatively during the distance and in-person teaching and examination of this course and others with similar requirements and way of teaching, based on the percentage of students who received a promoted degree, may be similar.

Keywords: Distance teaching, distance evaluation, semester theme, digital media.

INTRODUCTION

The global COVID-19 pandemic caused major disruptions to traditional higher education models, forcing educational institutions into mass adoption of digital tools and distance learning. The technical sciences, with their intense dependence on laboratory activities, design work and collaborative exercises, faced particular difficulties (Rapanta et al., 2020). This study captures the experience of teaching the course "geometric road design" during this period and assesses the impact of digital media on teaching effectiveness, student participation and learning outcomes.

The digital transformation of the educational landscape, although anticipated for years, accelerated dramatically due to the pandemic, revealing both the benefits and weaknesses of virtual teaching (Hodges et al., 2020). This paper aims to contribute to the literature on educational resilience, with a specific focus on applied, software-centric engineering science courses.

COURSE DESCRIPTION: GEOMETRIC DESIGN OF ROAD PROJECTS

The course is part of the Civil Engineering curriculum and focuses on the horizontal and vertical alignment of roads, curve design, cross-section generation, and safety considerations. Students use specialized software such as AutoCAD and Anadelta Tessera (Anadelta Tessera software) to develop complete road design projects, often in collaborative groups.

Before the pandemic, the course followed a traditional format: lectures in physical classrooms, group-based project monitoring conducted in person, and paper-based submissions. Exams were conducted simultaneously for all students, with common questions.

The course involved both theoretical instruction and practical application. Students learned geometric design parameters such as design speed, road width, curve radius, longitudinal and lateral slopes, and applied these to develop road design files using professional software. In addition to acquiring technical knowledge, students were required to justify their choices based on national road design guidelines, which encouraged them to engage in analytical reasoning and apply normative criteria.

TRANSITION TO REMOTE TEACHING: TOOLS AND APPROACHES

During the pandemic, the course was delivered entirely through Microsoft Teams. All lectures, project discussions, and consultations took place online. The use of digital tools expanded to include collaborative feedback mechanisms, shared screen demonstrations, and asynchronous review of submitted work (Dhawan, 2020).

Assignments and final submissions were provided in digital format (PDF), replacing printed documents. Students continued to work in groups but received feedback via recorded sessions or live online meetings. Digital whiteboards, polls, screen annotations, and chat threads enriched interaction, while structured folders hosted on the university's Learning Management System allowed organized access to resources and session recordings.

Weekly lectures were complemented with digital handouts and pre-recorded tutorials explaining software functionality. The instructors also developed a series of annotated design templates that could be reused and adapted by students for various project cases. This modular content delivery encouraged independent study and supported late joiners or those with limited live session availability.

CHALLENGES IN DIGITAL EDUCATION DURING THE PANDEMIC

Several issues emerged during the remote teaching period:

- Absence of immediate feedback: Delays in communication and limitations in visual cues hindered interactive discussions (Kebritchi et al., 2017).
- Exam variability: During remote learning, each student was given individualized exam topics to prevent plagiarism. This increased grading complexity and introduced inconsistencies.
- Material adaptation: Redesigning instructional content to suit digital delivery (e.g., annotated screenshots, video demonstrations) required significant effort (Garrison et al., 2000).
- Technology barriers: Not all students had equal access to high-performance computers capable of running AutoCAD or Tessera, nor reliable internet connections for real-time collaboration.
- Engagement tracking: Unlike classroom environments, it was harder to detect disengagement or confusion during remote sessions, leading to potential learning gaps.

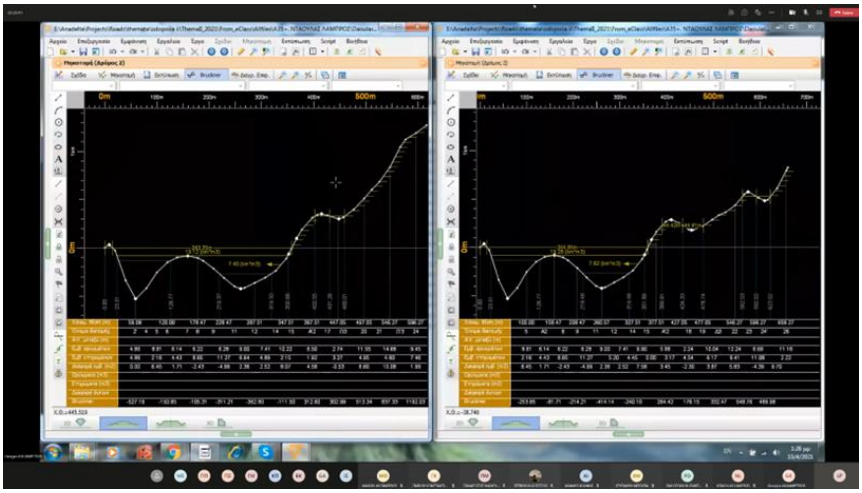
- Collaboration fatigue: Remote group work often lacked the natural rhythm and motivation of in-person teamwork. While messaging platforms facilitated communication, they also led to misinterpretation and lack of initiative among some participants.

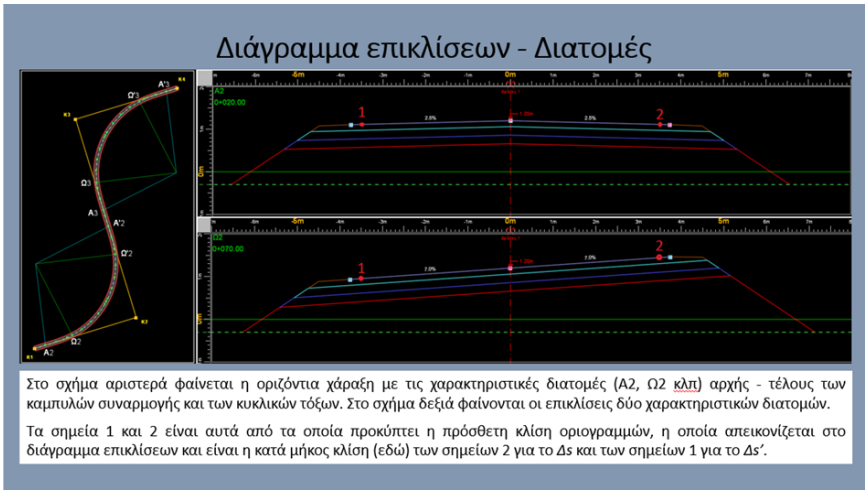
DIGITAL TOOLS IN PRACTICE

The course leveraged technical software to simulate classroom exercises remotely:

- AutoCAD: Used for drafting horizontal and vertical alignments, cross-sections, and superelevation diagrams. The integration with cloud-based platforms allowed students to share files and receive real-time comments.
- Anadelta Tessera: Employed for advanced geometric design, including curve transitions and superelevation analysis. Tessera's interface provided dynamic visualizations, crucial in substituting the absence of hands-on, in-class demonstrations.

Figure 1
Parallel vertical alignment profiles in Anadelta Tessera (screenshot from online course)





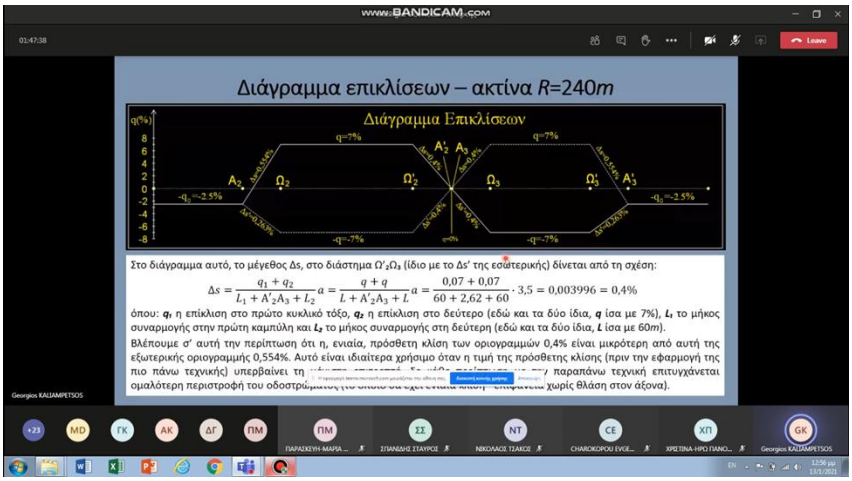


Figure 2
Superelevation and cross-section visualization with annotations (digital screenshot)

These visuals, when shared with the class, contributed to a deeper understanding of the concepts through concrete, visual representation, aiding particularly those who struggled with abstract geometric reasoning. The instructors also employed simulations of vehicle trajectories and turning paths to illustrate real-world constraints of road geometry, thereby enhancing practical awareness. Incorporating these examples digitally allowed students to relate theoretical content to applied traffic engineering principles (Berge, 2005).

Figure 3
MS Teams session showing transition diagram and formula analysis (live lecture screenshot)

STUDENT PARTICIPATION AND PERFORMANCE

Student registration, participation, and performance data were collected over six academic years (2017–2023). Table 1 summarizes the final success rates..

- During early pandemic semesters, completion rates of semester projects remained high, yet the number of students submitting a project declined.
- The highest pass rate (92.11%) occurred in January 2021, shortly after the initial digital transition. This was likely due to individualized exam topics and open-book conditions.
- Over time, performance rates normalized and reflected pre-pandemic levels.

Discrepancies were noted in engagement patterns. While digital convenience attracted consistent attendance at lectures, the quality and depth of student engagement varied. The decline in project completion in later years (e.g., September 2022) signals digital fatigue and possible motivational challenges (Hodges et al., 2020).

The data also revealed a stable long-term performance curve, with no significant learning loss. However, the difficulty in coordinating group submissions remotely might have affected team dynamics and peer accountability.

PEDAGOGICAL INSIGHTS AND OPPORTUNITIES

Several advantages emerged from remote instruction:

- Open corrections: Group feedback sessions were accessible to all students, enhancing peer learning.
- Digital archiving: Students could review past feedback, session recordings, and design examples at any time.
- Flexibility: Students engaged with material on their own time and pace.
- Scaffolding peer learning: Students could learn from others' mistakes and adjust their designs accordingly.
- Enhanced documentation: Each feedback interaction and assignment version created a traceable learning journey.

Remote teaching also offered students new skills. Beyond mastering technical design, they developed remote collaboration habits, improved digital communication, and practiced self-paced project planning. These competencies are increasingly relevant to the modern engineering workplace, which often blends in-person and virtual teamwork (Berge, 2005).

LIMITATIONS AND LESSONS LEARNED

While digital media enabled continuity, it exposed limitations in the scalability of one-on-one feedback, fairness in assessments, and the digital divide among students. Despite these, the teaching experience revealed that remote education can successfully deliver even technically demanding content, provided that proper infrastructure and pedagogical planning are in place (Garrison et al., 2000).

Table 1

Statistics of registration and students' performance before, during and after pandemic

	Before pandemic				
Academic Year	2017-2018		2018-2019		2019-2020
Period	January	September	January	September	January
Registered	156		190		154
For 1st time	**84 (54% of registered)**		**87 (46% of registered)**		**67 (44% of registered)**
Passing grade (%)	15.79%	50.00%	59.55%	75.26%	24.76%
Undertook semester theme	87 (56% of registered)		80 (42% of registered)		63 (41% of registered)
Type monitoring	In person		In person		In person
Completion rate	100%		100%		100%
Final success rate	**36.84%**	**48.08%**	**56.18%**	**76.29%**	**42.86%**

	Distance learning			
Academic Year		2020-2021		2021-2022
Period	September	January	September	January
Registered		118		117
For 1st time		**75 (64% of registered)**		**55 (47% of registered)**

Type monitoring		Distance		Distance
Completion rate		100%		57%
Final success rate	**92.11%**	**43.01%**	**38.20%**	**24.32%**

	In class course		
Academic Year		2022-2023	
Period	September	January	September
Registered		156	
For 1st time		**72 (46% of registered)**	
Passing grade (%)	38.46%	33.91%	40.00%
Undertook semester theme		53 (34% of registered)	
Type monitoring		Distance	
Completion rate		100%	
Final success rate	**59.62%**	**40.00%**	**42.00%**

Key lessons include the importance of planning digital transitions well in advance, training staff in remote instruction methodologies, and equipping students with both devices and digital literacy. The course benefited from consistent software platforms, but even minor technical disruptions (such as MS Teams connectivity issues) affected continuity.

Another important takeaway was the need to balance synchronous and asynchronous modes. While live sessions created immediacy, recorded content allowed flexibility, and students appreciated having both options.

Also, trust-building in virtual settings emerged as a key challenge. While in-person contact fosters spontaneous discussion and mentorship, remote environments require intentional facilitation of group dynamics. Course instructors must actively create opportunities for informal interaction, such as discussion forums or virtual office hours (Rapanta et al., 2020).

CONCLUSION AND FUTURE RECOMMENDATIONS

The forced digital transition during the COVID-19 pandemic provided valuable insights into how engineering education can evolve. While in-person instruction remains critical, particularly for hands-on design and collaboration, a

hybrid model can integrate the best elements of both formats.

Recommendations:

- Invest in faculty training for digital teaching tools.
- Develop standardized platforms for remote exams.
- Encourage open correction models to enhance peer learning.
- Combine synchronous live teaching with asynchronous materials to balance flexibility and immediacy.
- Use student analytics to monitor engagement and adapt instruction accordingly.
- Create hybrid assessment models that combine individualized open-book evaluations with interactive group critiques.
- Expand the use of case-based learning and real-world simulation projects to reinforce applied understanding.

The case of "Geometric Design of Road Projects" serves as a microcosm of the broader transformation in education—where digital media, when integrated thoughtfully, does not replace but amplifies pedagogical potential.

ORGANIZING THE MUSIC LESSON WITH PADLET

Michailidou Matina
Music Science Educator
6th Junior High School of Kozani
Kozani, Greece
email: tiniomi22@gmail.com

ABSTRACT

The integration of digital technologies into teaching practices constitutes an integral part of modern educational reality, offering new possibilities for organizing and enriching the learning process. In this context, the present work focuses on the use of the digital platform Padlet as a tool for managing and enhancing the teaching of Music in secondary education.

Padlet is an interactive online application that allows the creation of collaborative digital boards, where teachers and students can post multimedia content such as texts, images, videos, and audio files. The flexibility of this tool makes it particularly suitable for the Music course, as it enables the creation of collective projects, the posting of student recordings, the exploration of musical genres, and collaboration in compositional and analytical musical tasks.

Specifically, this work presents best practices for utilizing Padlet in Music teaching, with an emphasis on the creation of interactive activities (interactive maps of musical genres, posting of recordings and exchange of opinions, collaborative music composition, research projects on composers and musical movements, creation of interactive quizzes and games, analysis of musical works and listening with comments, digital portfolios of music assignments, creation of an electronic classroom), all of which enhance the learning experience.

The prerequisites for creating a Padlet by the teacher involve setting up an account on the platform through registration with an email or via a Google/Microsoft account, selecting the appropriate plan (free or premium version), connecting with students (access via invitation code, link, or integration into a learning management system, e.g., Google Classroom, Microsoft Teams), setting privacy and collaboration preferences (public, password-protected, private), and adapting the layout (various formats such as grid, timeline, map) to fit the needs of the lesson.

The use of Padlet in the Music classroom provides a dynamic and collaborative approach to learning, enhancing student engagement and fostering creativity and critical thinking. Moreover, the use of multimedia content allows the adaptation of instruction to different learning styles, facilitating differentiation and personalization of the educational process.

This work will present the Padlets that have been created in recent years for the needs of the Music course in all three grades of Junior High School. Each academic year, every class has its own Padlet, where data related to the annual project and weekly teaching content is posted.

Padlet is a particularly useful digital tool for organizing the Music course, allowing the development of a more participatory and creative educational experience. Through the presentation of these best practices, the importance of integrating digital technologies into teaching practices is highlighted, contributing to the shaping of a modern and effective learning environment.

Keywords: teaching, Music lesson, digital tools, Padlet

INTRODUCTION

The integration of digital technologies in teaching has become an inseparable part of contemporary educational reality. The experience of distance education during the COVID-19 pandemic highlighted the need for tools that promote collaboration, interaction, and active student participation. Within this framework, teachers sought solutions through Web 2.0 applications, which allow users themselves to create and share content (Redecker et al., 2009:7).

My personal encounter with Padlet occurred in 2020, when during the lockdown a student of mine used it to organize her teaching practice with one of my classes. The experience was so positive that since then I have been using it in all secondary education classes where I teach. Its systematic use has revealed multiple advantages, mainly regarding material organization, the possibility of sharing multimedia resources, and the active involvement of students. At the same time, I observed that in certain schools, such as in Kozani where I currently serve, knowledge of this tool remains limited, making the presentation of good practices even more relevant.

DIGITAL TEACHING AND EDUCATIONAL PRACTICE

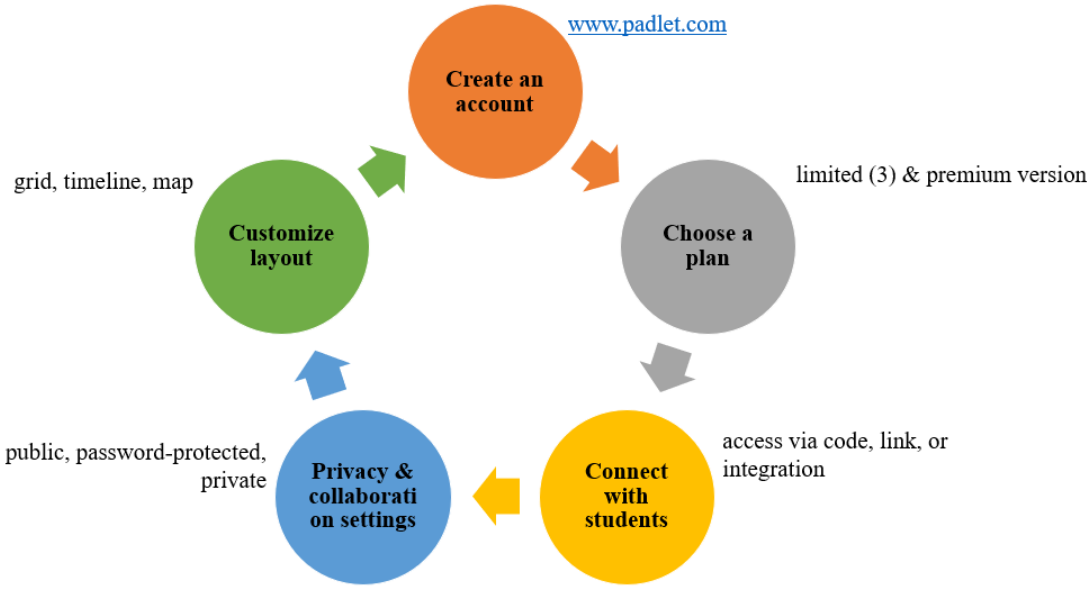
The integration of digital technologies into teaching practice has transformed the way students approach knowledge and how teachers organize their instruction. International research confirms that the incorporation of digital tools enriches the learning process, enhancing 21st-century skills such as collaboration, creativity, critical thinking, and problem-solving (Mahmud, 2023:5). In the same vein, Gall (2017:12-14) analyzes the trends and challenges of technology in music education in England and across Europe, emphasizing the importance of adapting teaching practices to digital innovations.

The theoretical foundation for understanding the contribution of digital technologies is drawn from contemporary pedagogical learning theories. Vygotsky's (1978) sociocultural approach emphasizes learning through interaction and collaboration with others—an idea that finds application in tools such as Padlet, where students collectively create knowledge environments. Bruner (1996:21-23) stresses the importance of scaffolding, namely guidance provided by the teacher, which can be implemented in digital environments through feedback and modeling. As early as 1999, Hennessy and Murphy highlighted the potential of collaborative learning through the use of technological tools, something that today finds concrete application in digital platforms such as Padlet (Hennessy & Murphy, 1999:10-12). In parallel, Tomlinson's (2014:45-46) theory of differentiated instruction underlines that digital tools enable the adaptation of teaching to different learning styles—something particularly crucial in music education, as students respond differently to auditory, visual, and textual stimuli.

In practice, the use of Padlet incorporates elements of formal, non-formal, and informal learning. Within the school framework, it functions as a tool of formal education, since it is embedded in the curriculum and linked to teaching objectives. However, it also promotes forms of non-formal learning, when used for projects, research, or collaborative activities outside the regular teaching period. At the same time, it supports informal learning, since students can explore Padlet content in their free time, discover new information, and enrich their musical experience beyond classroom requirements.

According to Dunbar (2017:28), the use of Padlet in music lessons led to a significant increase in students' interaction with musical concepts. Waltemeyer, Hembree and Hammond (2021:94–95) describe it as a "multipurpose Web 2.0 tool" that strengthens students' active engagement in a variety of learning environments. Fisher (2017:165-166) further emphasizes that Padlet can increase student collaboration and engagement, particularly through the opportunity to share ideas in real time, creating a more democratic learning environment. In the Greek educational context, its use during the period of distance education (Gyftoula & Mitsikopoulou, 2021:52; Komis et al., 2021:118) highlighted its potential as a tool for collaboration and digital material storage, confirming the importance of integrating it both in teaching practice and in face-to-face instruction.

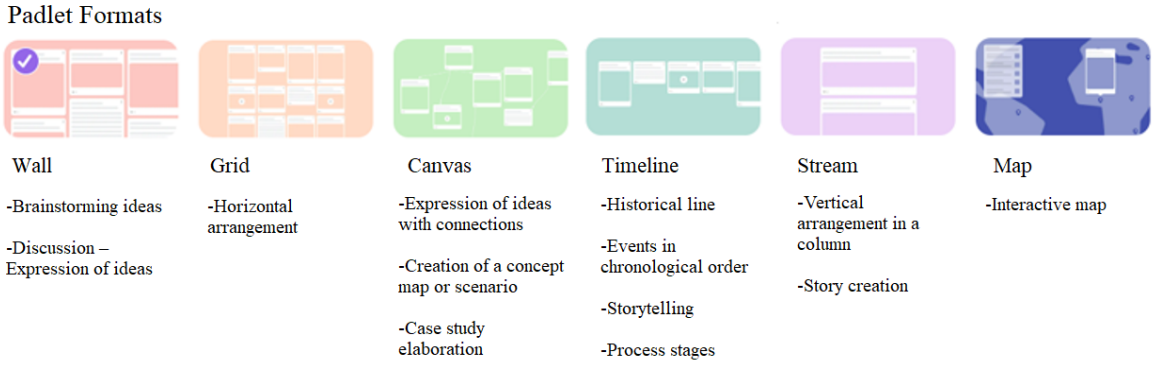
WHAT IS PADLET?



Padlet is an interactive Web 2.0 application that allows users to create collaborative digital noticeboards. On these boards, multimedia content can be posted, such as texts, images, videos, audio files, and hyperlinks. Its ease of use and flexibility in presentation formats make it particularly friendly for teachers and attractive to students (Waltemeyer et al., 2021:93). Fisher (2017:166) emphasizes that the platform fosters active participation, as all students have an equal opportunity to contribute and have their voices heard in a collective framework.

In international literature, Padlet is described as a "multipurpose tool" adaptable to different learning environments, enhancing interaction and student participation. In music education specifically, its use has been shown to increase student engagement with musical concepts and activities (Dunbar, 2017:26-29). Its multimodal nature (combining image, text, sound, and video) allows the creation of learning experiences that address different learning styles (Tomlinson, 2014:45).

In the Greek context, Padlet emerged as one of the most popular choices during the pandemic. According to Gyftoula and Mitsikopoulou (2021:52), it was used in foreign language education to implement innovative practices, while Komis et al. (2021:118) document its use as a tool for collaborative writing and project organization by teachers of various subjects.



CONDITIONS FOR CREATING AND USING PADLET

Image 1
Prerequisites for Creating a Padlet

Creating a Padlet requires the teacher to register on the platform at www.padlet.com, either with an email or via a Google/Microsoft account. The teacher can choose between a free basic plan (with a limited number of boards) and subscription options that offer extended functionalities, better suited for schools or educational institutions (Waltemeyer et al., 2021:97).

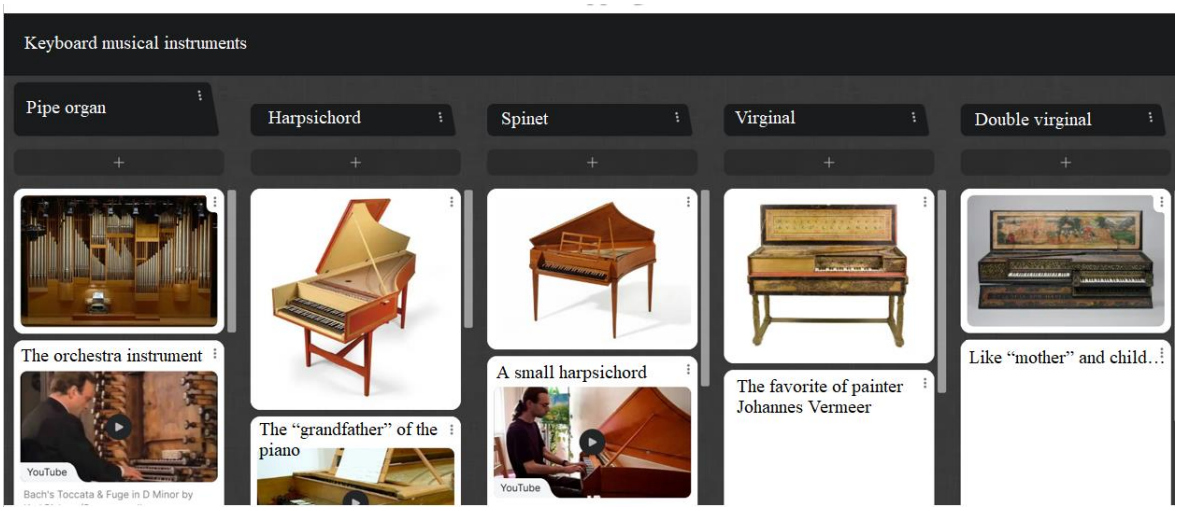
Image 2
Padlet Formats

Students can access Padlet in three main ways: via a link, invitation code, or integration into the school's learning management system (e.g., Google Classroom, Microsoft Teams). Equally important are the privacy and collaboration settings: the teacher can determine whether the Padlet will be public, private, or password-protected, and who will be able to edit the content (Mahmud, 2023:7). (Image 1)

Adaptability of structure is also crucial: Padlet offers different layout formats (e.g., wall, grid, timeline, map, canvas), which serve different pedagogical purposes. For instance, the "Map" layout has been used to visualize geographic data in music history projects, while the "Timeline" format helps organize biographical data of composers in correct chronological order. (Image 2)

WHY PADLET IN THE MUSIC LESSON?

Music education in secondary schools is characterized by limited teaching time and the need for active student involvement within short timeframes. In this context, Padlet provides a highly flexible environment that facilitates lesson organization and extends the learning experience beyond classroom hours.



One of Padlet's most significant advantages is its ability to foster collaboration and creativity. Students can create collective digital collections of musical ideas, scores, recordings, or research material. Through this process they develop collaborative learning skills, while also cultivating the sense of "authorship" of musical knowledge as a collective product (Vygotsky, 1978:34; Bruner, 1996:41). Interaction is enriched through commenting and real-time feedback, strengthening students' active engagement (Mahmud, 2023:8).

Furthermore, Padlet supports differentiated learning. Since it accepts multimodal content (audio, images, video, text), students can express themselves in different ways according to their interests and learning styles (Tomlinson, 2014:46).

In music lessons, Padlet can be used in various activities: creating interactive maps of musical genres, posting recordings and exchanging comments, collaborative composition, research projects on composers and movements, interactive quizzes and games, as well as digital portfolios. According to Dunbar (2017:28), its use enhances student commitment to music learning. The research by Komis et al. (2021:118) in Greece confirms that the tool was widely used for project implementation during the pandemic. Likewise, Gyftoula and Mitsikopoulou (2021:52) report its use by foreign language teachers, highlighting its broad acceptance in the Greek educational community.

Beyond these applications, Padlet can also support the analysis of musical works and guided listening activities, where students are encouraged to add comments and reflections on specific excerpts. In addition, when systematically applied across the curriculum, Padlet functions as a digital classroom, centralizing weekly teaching materials, collaborative projects, and student portfolios in one shared online environment.

Image 3
Wall

PADLET FORMATS AND EXAMPLES IN MUSIC

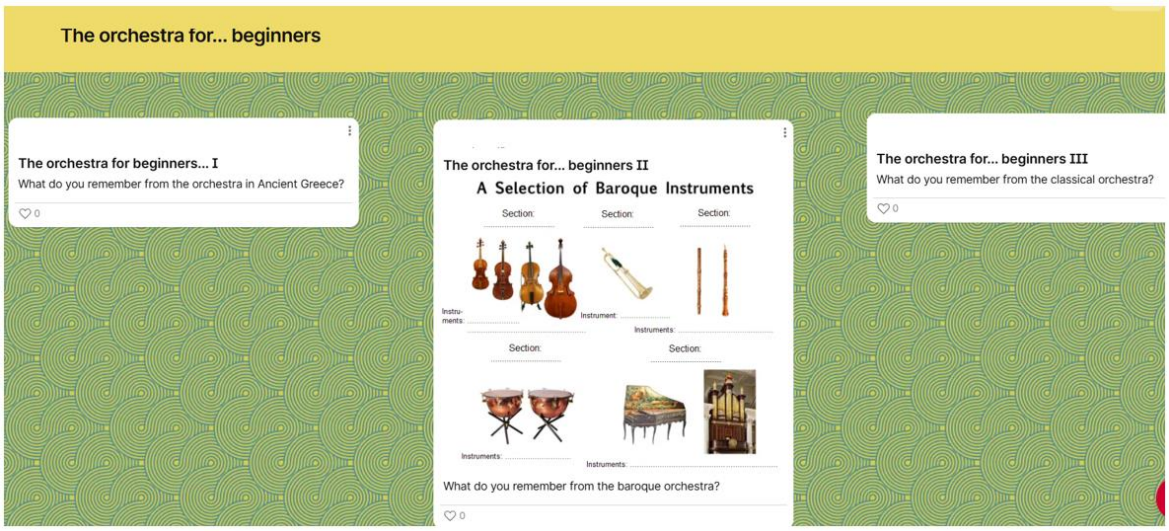
The Padlet platform offers multiple layout formats that can be creatively used in music teaching:

- **Wall:** posting material in columns (e.g., musical instruments with images and sounds). (Image 3)
- **Timeline:** studying composers in chronological order (e.g., J. S. Bach). (Image 4)
- **Map:** geographic visualization (e.g., various places in the songs of Mikis Theodorakis). (Image 5)
- **Canvas:** free arrangement of information (e.g., Various Worksheets). (Image 6)
- **Stream / Grid:** organizing projects. (Image 7)
- **Portfolios:** each student collects their assignments in a personal Padlet.

Image 4
Timeline

Image 5
Map

Image 6
Canvas



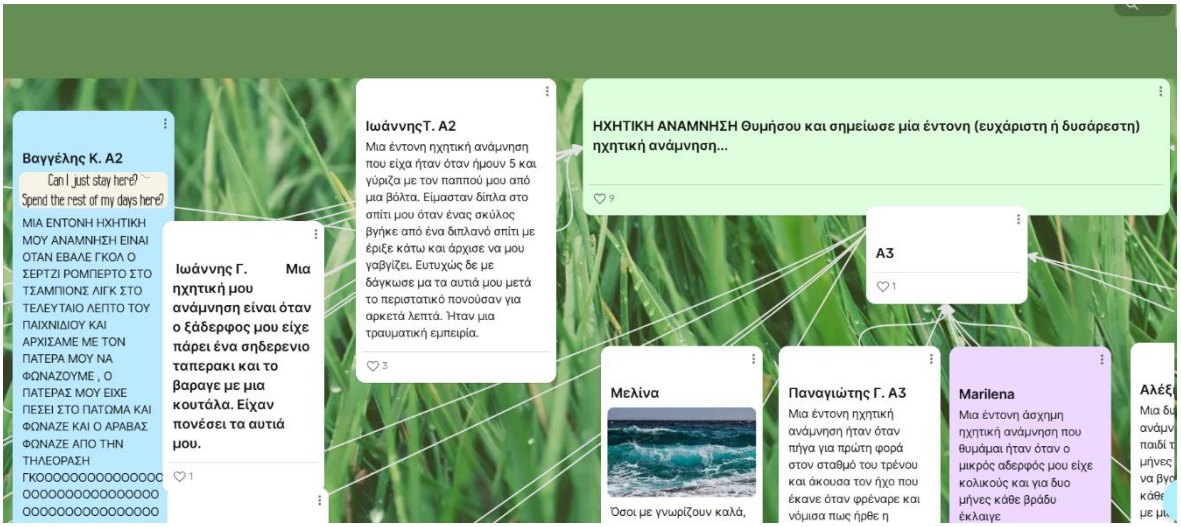


Image 7
Stream / Grid

Βαγγέλης Κ. Α2
Can I just stay here?
Spend the rest of my days here?
ΜΙΑ ΕΝΤΟΝΗ ΗΧΗΤΙΚΗ ΜΟΥ ΑΝΑΜΝΗΣΗ ΕΙΝΑΙ ΟΤΑΝ ΕΒΑΛΕ ΓΚΟΛ Ο ΣΕΡΤΖΙ ΡΟΜΠΕΡΤΟ ΣΤΟ ΤΣΑΜΠΙΟΝΣ ΛΙΓΚ ΣΤΟ ΤΕΛΕΥΤΑΙΟ ΛΕΠΤΟ ΤΟΥ ΠΑΙΧΝΙΔΙΟΥ ΚΑΙ ΑΡΧΙΣΑΜΕ ΜΕ ΤΟΝ ΠΑΤΕΡΑ ΜΟΥ ΝΑ ΦΩΝΑΖΟΥΜΕ , Ο ΠΑΤΕΡΑΣ ΜΟΥ ΕΙΧΕ ΠΕΣΕΙ ΣΤΟ ΠΑΤΩΜΑ ΚΑΙ ΦΩΝΑΖΕ ΚΑΙ Ο ΑΡΑΒΑΣ ΦΩΝΑΖΕ ΑΠΟ ΤΗΝ ΤΗΛΕΟΡΑΣΗ ΓΚΟΟΟ

Different Padlet formats (Wall, Timeline, Map, Canvas) proved flexible for information visualization and for supporting music teaching. The examples presented (projects, maps, portfolios, collaborative compositions) confirm that the tool can be creatively integrated into school practice.

Nevertheless, challenges remain, such as the limited number of free Padlets and the digital divide that hinders equal student participation (Komis et al., 2021:118).

Overall, Padlet represents a particularly valuable digital tool for the music classroom, provided it is combined with pedagogical guidance and careful planning. Experience shows that its integration into teaching not only enriches the learning process, but also contributes to shaping a more participatory, modern, and creative learning environment (Fisher, 2017:165; Waltemeyer et al., 2021:94).

ABSTRACT

Teaching of foreign languages has been significantly transformed by the Common European Framework of Reference for Languages (CEFR), which is an international guideline that categorizes language proficiency into three main levels: A (basic user), B (independent user), and C (proficient user). It also defines learning outcomes as can- do-statements at the end of a learning process. Consequently foreign language educators can structure their teaching focusing on the learning objectives, learning strategies and assessment, which are defined by descriptors of communicative activities at each proficiency level. According to Common European Framework of Reference for Languages, which prioritizes learning outcomes approach and diverse methodological strategies, foreign language teachers have the flexibility to continually update and enrich course content focusing on applied communication and on the individual learner's interests, needs and achievements.

Therefore, in the last few years integrating digital literacy into everyday communicative and linguistic activities has become essential. The updated CEFR (2020) includes learning outcomes related to digital competencies. Given that digital tools also shape and transform students' social and educational environment, it is important for teaching to explore key questions such as: How does the integration of digital tools support the alignment of digital activities with learning objectives and the development of personalized learning in foreign language education? How can digital tools, (for example educational platforms or interactive games) can promote metacognitive skills like self-regulated learning or self-assessment? How can language teachers use these tools to support effectively differentiated instruction or blended and distance learning? In what ways can digital literacy increase student interaction, collaborative learning in foreign language teaching?

The presentation will conclude with concrete examples showcasing their implementation of digital tools in German language teaching to 5th-grade students at Level A (Beginners).

Keywords: German language, primary school, digital literacy, communicative language activities, digital competencies, differentiated instruction.

INTRODUCTION

The specificity of foreign language teaching is also highlighted to a significant extent by the Common European Framework of Reference for Languages [CEFR], which is a common international standard for describing the linguistic and communicative competences and skills of users by level of language proficiency for all languages [level A: basic user - level B: independent user - level C: proficient user].

According to the CEFR, in the process of organising the language syllabus, the foreign language teacher is asked to focus on the achievement of the Expected Learning Outcomes, which are identified through the descriptors of the communicative activities per level. In the breadth of this Framework, which emphasises the learning outcomes through the use of a variety of methodological approaches, it is possible for the content of the course to be systematically enriched and updated by the foreign language teachers, so that it can best respond to the interests and aptitudes of the students. As digital tools do not simply complement teaching, but rather shape the everyday, social and learning environment of students, it is clear that the association of digital literacy practices with everyday communicative language actions and activities is now inevitable.

At this point it is important to underline that already in the updated version of CEFR [2020], Expected Learning Outcomes have been included, which are related to students' digital skills, even for level A1- [7]. Consequently, the correlation between students' digital literacy and the desired communicative language actions in the foreign language course has been taken into account in the design and development of the Curriculum for Foreign Languages (2021). However, there is no similar reference to descriptors for digital skills in the curriculum for foreign languages in Primary and Gymnasium [2016][8], which is valid for primary and secondary schools. This curriculum specifies the general and individual indicators of communicative competence up to the B2 language proficiency level, i.e. the independent user level[9].

Consequently, a particular research interest arises effortlessly, regarding the introduction of the new descriptors for online communication at the PreA1 level, their inclusion and their use in the foreign language course. According to these new descriptors, as stated, for Pre A1 level, students should be able, in terms of online conversation, to :

- - post simple online greetings, using basic standard expressions and other symbols typical of online communication (emoticons)
- - post short and simple comments about themselves (e.g. their nationality, family situation, profession/employment, etc.), provided that they can select them from a list of options and/or search for them using an online translation tool,

  and, as regards targeted online transactions, to be able to:
- choose a product, its colour or size in an online transaction/purchase or complete an application with the help of visualised information[10].

It is important to mention at this point the addition to the curriculum of 2020 of some other descriptors for the Mediation[11], and in particular, the 'Individual Descriptor' for online communication at PreA1 level, where it is noted that, learners should be able to:

- *create an everyday social online contact, using the simplest everyday expressions of greetings and goodbyes[12].*

Given that at the PreA1 level the user should be able to use and process information related to time, place and numbers[13], we chose in our survey to combine the dynamics of the new descriptors for online communication with

descriptors for the development of language and communication skills of students at this level; mainly because in this group of primary school students, there is a high degree of familiarity and comfort in using descriptors for online communication. Moreover, as will be shown below and through the answers to the questionnaire exploring the preferences and possible difficulties of the pupils, it is clear that they have a wide acceptance and positive attitude towards the integration of digital media and activities in their learning path.

SURVEY IDENTITY

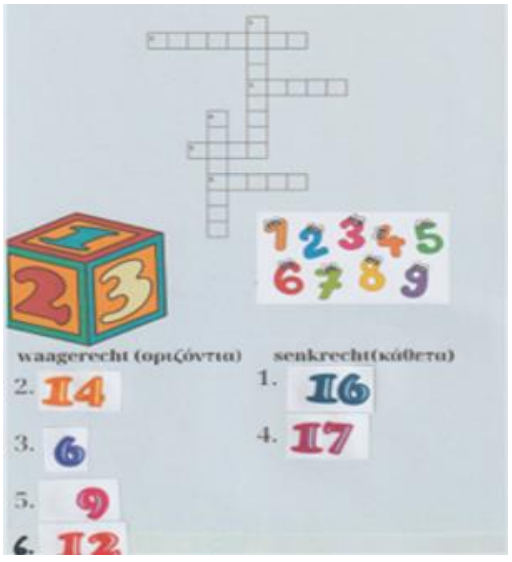
The survey was carried out from 10-13 March 2025 on 51 students of primary school, aged 10 years, who are taught German as a second foreign for two hours per week, according to the class schedule. The sample consists of students attending three different schools: two schools located in the centre of Chalkida (urban area) and one school located in a peripheral, rural area, in the village of Agios Nikolaos-Bourtzi. Since the beginning of the school year the students have attended the German language course for about 30 hours and are at the beginners' level A1-(CEFR, Pre-A1).

Based on the descriptor for language communicative activities of the module Communicating specific information for level A1-, three activities were created. As this descriptor states, pupils should be able to communicate (in the target language) very basic information (e.g. numbers and values) from short, simple, illustrated texts (CEFR 95).

The first activity in printed form is a Crossword (1a) and a Word Search Puzzle (1b) . The second activity is digital, created with the toll “wordwall” and is an Anagram activity. Both activities were used in the consolidation phase (i.e. for testing and language awareness). The crossword was assigned in paper format to students in pairs, who most often process the A1- level activities to a satisfactory degree, as it is a more demanding activity, since it promotes deeper understanding of concepts, processing and relating information, as well as strengthening working memory.

Activity 1a: Crossword

Read the text carefully and identify numbers from 0 to 20. Then write down the numbers you found and work with your classmate to complete the crossword.
Mein Geburtstag 🎂



Hallo! Ich heiße Anna und ich bin **neun** Jahre alt. Ich habe am **siebzehn**ten April Geburtstag.

Zu meinem Geburtstag lade ich **sechzehn** Freunde ein. Wir spielen im Garten und essen **zwölf** Schokokekse.

Mein Bruder Max ist **vierzehn** Jahre alt. Er isst **sechs** Kekse und trinkt Limonade.

Am Abend bekommen wir **vierzehn** Luftballons!

Image 1
Crossword

Activity 1b- Word Search Puzzle

Read the text carefully and identify numbers from 0 to 20. Then write down the numbers you found and work with your classmate to find the "magic" number that is not in the text.

Mein Tag ○

Hallo! Ich heiße Tom.

Ich bin **acht** Jahre alt.

Mein kleiner Bruder ist **ein** Jahr alt.

Ich stehe um **sieben** Uhr auf.

In meiner Klasse sind **zwanzig** Kinder.

Am Nachmittag spiele ich **drei** Spiele im Garten.

Image 2
Word Search Puzzle

The activity of Word Search Puzzle can support differentiated instruction and , because of that, the activity was assigned to students with language learning difficulties, as well as to students diagnosed with dyslexia by the Centre for Interdisciplinary Assessment and Counselling Support in Evia (KEDASY). The choice of this activity was aimed at increasing their confidence and improving their ability to process basic linguistic information in the foreign language. During the observation of the activity it was found that students with dyslexia completed the exercise in a shorter time than other similar activities. This may be an interesting point for further investigation in the next phase of the research.

Activity 2: Anagram Activity (digital format)

Students were then individually assigned a digital Anagram activity (Activity 2), which contained numbers from 0 to 20. In this activity, which was chosen as a differentiated instuction tool that combines the enhancement of cognitive skills with the promotion of positive learning experiences, students are asked to place the letters in the correct order to form the number word correctly. Students were given immediate feedback through the digital environment, whether they had answered correctly or incorrectly. It should be noted that, in this activity, students could repeat their attempts until they find the correct answer . Thus, even the dyslexic students successfully completed the digital activity in the allotted time, which significantly boosted their self-esteem at that time, as reflected in their reactions after the end of the lesson.

Anagram Activity

You and your online friend create and exchange online quizzes and practice games, because you're both learning

German. Today your friend sent you a number anagram activity. Can you place the letters in their right order to form the word?

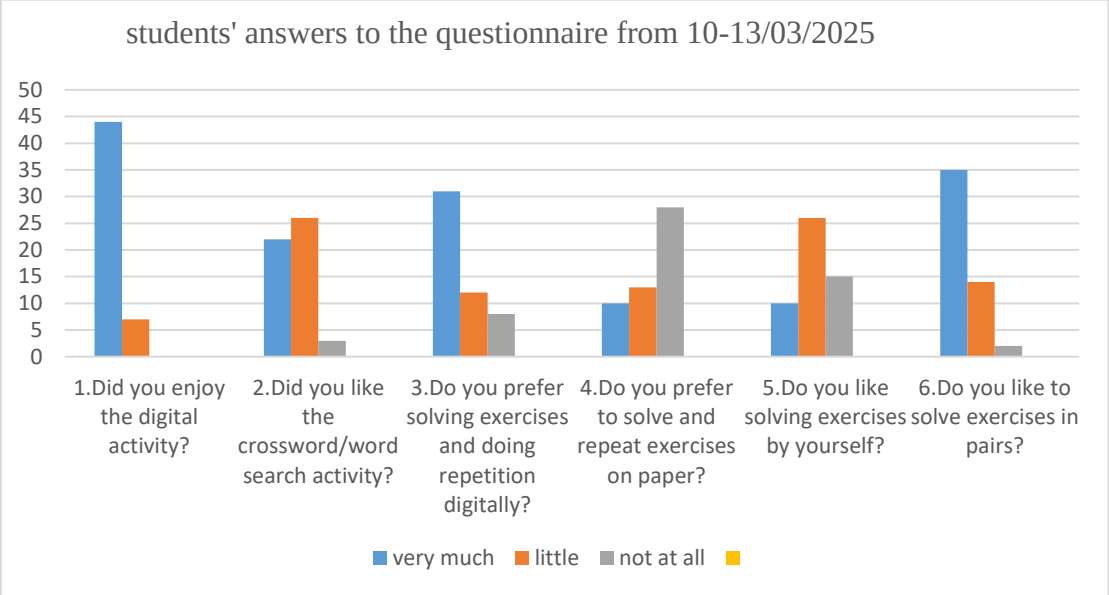
Image 3
Anagram Activity
Completion of the first phase of the survey through a questionnaire - Presentation of results

After completing the activities, the students answered a questionnaire with 6 closed-ended questions and one open-ended question.

Image 4
The questionnaire

Draw an "X" on your answer

QUESTIONS	much	little	never
Did you enjoy the digital exercise?			
Did you like the crossword/word search activity?			
Do you prefer solving exercises and doing repetition digitally?			
Do you prefer to solve and repeat exercises on paper?			
Do you like solving exercises by yourself?			
Do you like to solve exercises in pairs?			



PRESENTATION OF RESULTS

From the analysis of the responses we collected, interesting findings emerge concerning the students' preferences regarding how they review the language material and whether they prefer to work individually or in pairs.

Although the majority of the students particularly liked the word search/crossword activities (printed-form activities), in response to the question *"Do you prefer solving exercises and revision digitally?"*, most of them answered positively, stating that they liked it *"a lot"*. This indicates a positive attitude towards the integration of digital activities in the teaching of the foreign language.

This preference is further confirmed by their answers to the question *"Do you prefer solving exercises and reviewing on paper?"*, where the majority stated *"not at all"*, highlighting a clear tendency towards the use of digital media.

Image 5
Students' answers

Regarding working alone, in response to the question *"Do you like solving exercises by yourself?"*, most students answered *"a little"*, while 15 students stated *"not at all"*. This shows a limited preference for working individually.

In contrast, the question *"Do you like solving exercises in pairs?"* revealed a strong preference for collaborative work, as most students answered *"very much"*.

The final open-ended question allowed students to freely express their opinion about the German course. The analysis showed a unanimously positive attitude, as 100% of the responses were positive. Students also expressed a strong interest in digital and collaborative activities.

CONCLUSIONS

Based on the survey results, several key conclusions can be drawn regarding students' preferences and attitudes toward language learning activities. Firstly, students demonstrate a clear preference for digital revision methods, with most expressing a strong positive attitude towards using digital tools for exercises and review tasks. This trend underscores the growing importance of integrating digital media into foreign language instruction to enhance student engagement and motivation.

Secondly, there is a marked disfavor towards traditional paper-based activities, indicating a shift in student preferences towards digital formats. This suggests that digital activities are perceived as more appealing and effective by the students.

Thirdly, the data reveal a limited inclination for individual work, with students favoring collaborative learning environments. The strong preference for pairing and group work highlights the importance of incorporating cooperative strategies into language teaching to align with students' learning preferences.

Finally, the overwhelmingly positive feedback regarding the German course and the students' enthusiasm for digital and collaborative activities suggest that innovative, student-centered approaches are highly effective. Overall, these

findings support the continued integration of digital tools and collaborative learning strategies to foster greater engagement, interaction, and active participation in foreign language learning contexts.

email: rosidoudimitra@gmail.com

ABSTRACT

In recent years, there has been a growing scholarly interest in examining both educators' and students' attitudes toward Classical Studies, as well as the impact of using technological tools—such as educational applications, digital educational games, software, and other platforms—in the teaching of philological subjects. This interest arises from the observation that students often show low motivation for learning Ancient Greek language and literature. It has long been acknowledged—over the past five decades—that the integration of *Information and Communication Technologies* (ICT) into educational systems offers multiple benefits, but also presents notable challenges.

The theoretical framework of this study is based on the view that the engaging environment of digital games and the flexible learning environment enabled by successful ICT integration can serve as sources of learning motivation.

This paper focuses on the potential use of digital media in teaching the Ancient Greek language, aiming to familiarize students with both the language and the culture through the study of Ancient Greek inscriptions. Without such inscriptions, our understanding of ancient Greek civilization would be incomplete and potentially distorted, as literary and historical texts alone cannot fully capture the complexity of the ancient Greek world.

Inscriptions, as primary and direct sources, provide invaluable information and are often preserved in better condition than other written records due to the durability of the materials on which they were inscribed. Ancient Greek epigraphy, more specifically, concerns the study of inscriptions written in the Greek language and alphabet on hard materials such as stone, marble, pottery, wood, bone, or metal.

The aim of this study is to demonstrate how digital tools can facilitate access to and interpretation of inscriptions, thereby enhancing students' engagement with the Ancient Greek language and deepening their connection to the ancient world.

The methodology follows a multidimensional approach, combining theoretical research with practical application. Initially, a literature review was conducted on the teaching of Ancient Greek and the use of digital media. Subsequently, an educational program was designed and implemented, focusing on the development of digital learning objects—such as the *Phrasikleia*—which can be adapted for use at all levels of education, including university students of Philology. These activities are carried out within the framework of the DiGIA research project, based in the Department of Philology at Aristotle University of Thessaloniki.

Through interactive engagement, students develop critical thinking and linguistic skills, while gaining a deeper appreciation of the historical and cultural significance of inscriptions. At the same time, direct contact with authentic epigraphic material opens up new pedagogical possibilities, making the study of Ancient Greek more accessible and engaging.

Keywords: Ancient Greek epigraphy, Ancient Greek language, digital learning object

INTRODUCTION

In an era where technology, through the advanced capabilities of diverse digital media and tools, heralds a new chapter in the field of education, it becomes imperative to explore how such innovations may enhance the learning experience—particularly in subjects where educators face significant challenges in sustaining student engagement. The objective of this study is to illuminate how digital platforms and educational applications can redefine the study of Ancient Greek, rendering the language more accessible and appealing to contemporary learners.

THE CHALLENGE: DECLINING STUDENT MOTIVATION IN LEARNING ANCIENT GREEK

More specifically, it has been well-documented over the years by philologists and educators that a persistent and growing concern surrounds the markedly low levels of student motivation in relation to Ancient Greek instruction. The majority of secondary education students—both in middle and high school—tend to perceive the subject as uninteresting and overwhelmingly difficult. From the very beginning, learners often struggle to comprehend the original texts and to master the complex grammatical and syntactical phenomena. Moreover, a prevailing reason for their aversion lies in the perception that the language lacks practical utility, given that it is no longer spoken by any living community.

In contrast to modern foreign languages, which students are typically exposed to from an early age and gradually acquire with fluency, Ancient Greek is frequently dismissed as arcane and irrelevant. It is often considered inaccessible, and its perceived disconnect from contemporary life exacerbates the sense of detachment. However, Ancient Greek should not be understood merely as a linguistic system; it serves as a vital key to unlocking the intellectual and cultural legacy of a civilization that laid the groundwork for democracy, philosophy, rhetoric, and literature—pillars of thought and civic life that remain strikingly relevant today. Reorienting pedagogical approaches to highlight this relevance may prove essential in reinstating the value of the subject in the eyes of learners.

At the same time, students' resistance to the subject can, to some extent, be understood when one considers the characteristics of the present age. Concepts such as artificial intelligence and robotics have become defining features of contemporary society, ushering in what is widely recognized as a digital revolution. This transformation may not always be immediately perceptible in its entirety, yet its effects are undeniable: cinema has increasingly been supplanted by streaming platforms such as Netflix, and even the act of hailing a taxi is now mediated by mobile applications like Uber. Against this backdrop of rapid technological evolution and shifting modes of communication, traditional educational practices must also evolve in order to remain effective and relevant.

RETHINKING EDUCATION IN THE DIGITAL ERA: THE COGNITIVE PROFILE OF TODAY'S LEARNERS

In the current context, where the World Wide Web, Artificial Intelligence, and digital media more broadly have become deeply embedded in our daily lives—transforming the ways we communicate, learn, and think—it is crucial to reflect on how these developments are reshaping not only educational practices but also the cognitive and behavioral profiles of learners. Simultaneously, dominant societal values such as minimal effort, instant gratification, image-centric communication, and a utilitarian view of knowledge—often equated with measurable financial benefit—are reinforced through pervasive use of digital platforms and social media. These cultural trends tend to marginalize the cultivation of critical thinking, reflective inquiry, and imagination.

As a result, traditional tools of learning, such as printed encyclopedias, radio programs, and paper dictionaries, seem increasingly alien to the new generation of learners. These instruments of knowledge transmission no longer resonate with today's so-called *digital natives*, a term coined by Marc Prensky (2001:1–2) to describe individuals born and raised in a digital environment. Constantly exposed to the stimuli of digital technologies, these learners exhibit cognitive patterns distinct from previous generations—whom Prensky identifies as *digital immigrants*.

More specifically, one of the most salient characteristics of digital natives is their aptitude for multitasking: they are capable of simultaneously listening to music, studying, responding to mobile notifications, and engaging in background conversations—all with surprising effectiveness. Furthermore, they process large volumes of information at high speed, often preferring dynamic and image-based content. Their familiarity with online communication, electronic gaming, and immersive digital environments—where they assume personalized virtual identities (avatars)—reinforces a mode of learning grounded in interactivity and simulation (Krystalli, 2010).

It is thus evident that today's learners differ significantly from earlier generations who were not socialized in such media-rich environments. Nevertheless, it is precisely these digital immigrants—parents, educators, and academic instructors—who now assume the critical pedagogical role of guiding and mentoring younger generations. For this reason,

it is imperative that educators become thoroughly acquainted with the cognitive profiles and learning styles of their students if they are to communicate knowledge effectively and meaningfully.

This leads us to the central question: How can we rekindle students' interest in this rich cultural and linguistic heritage that Ancient Greek represents?

A foundational step in this direction is the integration of *Information and Communication Technologies* (ICT) into educational practice. Although not a novel proposition, the importance of this integration has been underscored repeatedly over the past five decades through extensive research that confirms the potential of digital tools to enhance learning. *ICT* enables the development of interactive, flexible, and learner-centered approaches, which can be particularly valuable in subjects that learners may initially find challenging or alienating.

From educational games to digital platforms and augmented reality applications, technology can transform the learning process from a passive transmission of knowledge into an active, experiential, and participatory engagement—a pedagogical goal of considerable importance in modern classrooms. However, it must be emphasized that the mere use of technology is not a panacea. Its implementation must be thoughtful, purposeful, and pedagogically sound. Digital tools should be employed only where they offer meaningful advantages over traditional methods—where the task cannot be accomplished just as effectively with pencil and paper.

ANCIENT GREEK LANGUAGE AND *ICT*

In recent years, there has been considerable research interest in educators' and students' attitudes (Poimenidou, 2011) and in the impact of digital tools—educational apps, games, and software—on philological subjects, particularly Ancient Greek, where students often lack intrinsic motivation (Chanquoy et al., 2007; Viau, 2009; Kelpanidis, 2009). While the integration of ICT in education has long been recognized for its benefits (Bikos, 2012), it also introduces significant challenges. Nevertheless, the engaging and flexible environments offered by educational technologies can enhance motivation and support personalized learning, allowing students to progress at their own pace, engage in self-assessment, and receive immediate feedback.

Digital platforms (e.g., MOOCs, collaborative tools like Google Docs or Teams, and content-sharing networks like Edmodo or Wikispaces) foster learner autonomy, interaction, and the development of 21st-century digital skills (Tzimogiannis, 2017; Arvanitis & Pangiotidis, 2009). These tools also expand access to educational content while reducing costs (Giannou, 2014), enabling multimodal, gamified, and culturally enriched learning experiences beyond rote translation or syntax analysis (Blakely, 2020).

In the context of Ancient Greek instruction, ICT tools like *Perseus Digital Library* and *Thesaurus Linguae Graecae* (*TLG*) offer extensive digital corpora and facilitate deeper textual engagement. Platforms such as *MicroWorlds Pro* further promote inquiry-based, interdisciplinary learning through programmable educational microenvironments (Papert, 1980).

However, several obstacles persist: educators may lack technical fluency (Koutsogiannis, 2001), infrastructures may be insufficient, and subscription costs can hinder adoption. Additionally, parents may express concerns about data privacy or excessive screen time. Effective integration of ICT thus demands careful pedagogical planning, alignment with curricula, and sensitivity to learners' needs and learning styles.

In conclusion, while ICT is not a panacea, its thoughtful, well-organized use can meaningfully enrich classical language education when accompanied by strategic planning, collaboration, and appropriate training.

DIGITAL GAMES IN LANGUAGE LEARNING

A brief reference to the role and significance of digital games in language education is warranted, especially given that some proposed activities incorporate game-based elements.

Games have been an integral part of human life since antiquity. Today, gamification—the integration of game-like elements into non-game contexts—has permeated many sectors, particularly education. In this context, digital educational games offer rich visual and auditory stimuli, virtual rewards (badges), customizable avatars, and interactive features. Beyond their aesthetic appeal and creation of an engaging learning atmosphere, such tools often provide opportunities for self-assessment and immediate feedback, both of which enhance learner autonomy—a core factor in intrinsic motivation (Ryan & Deci, 2000).

Game rules are foundational to the structure of gameplay, delineating the framework within which users operate (Krystalli, 2011). Whether digital or analog, collaborative or individual, games can be effectively employed in language teaching not merely as leisure-time activities, but also as tools for evaluation, review, or introduction of new material. They encourage spontaneous use of the target language in a low-risk, discovery-based environment that promotes collaboration and minimizes the consequences of errors. Language autonomy and long-term retention of knowledge are key benefits of integrating games into instruction (Godwin-Jones, 2014).

Notably, the creation of immersive virtual worlds and personalized avatars fosters learner engagement, even among shy or hesitant students, by creating a psychologically safe space where mistakes bear no real-life consequences (Krystalli, 2011; Malone, 1980). Conflict and challenge within games—often arising through competition—further boost motivation (Krystalli, 2011).

The judicious selection of games in language instruction can therefore sustain learners' attention, enhance motivation, and reinforce previously taught material in a more stimulating format than traditional instruction (Langran & Purcell, 1994). Research indicates that such engagement may also cultivate intrinsic motivation—essential for long-term language acquisition (Papanastasiou, Drigas & Skianis, 2017).

To those skeptical about the relevance of digital games in higher education, the study by Krystalli and Arvanitis (2018) offers compelling insights. Their research, conducted with students from the Department of French Language and Literature at Aristotle University of Thessaloniki, explored perceptions of serious games in tertiary education. While limited in scale and not representative of national trends, the study underscores a broader international shift: many foreign universities have already incorporated educational games into curricula, reporting positive pedagogical outcomes.

EPIGRAPHIC EVIDENCE AND ITS PEDAGOGICAL VALUE IN THE TEACHING OF ANCIENT GREEK

In the teaching of Ancient Greek, it is crucial not only to employ innovative methodologies but also to select appropriate materials that reflect the nature of the language and culture. Among the most valuable and authentic resources available for the study of Ancient Greek are inscriptions—epigraphic texts etched into various materials by the ancient Greeks themselves.

Inscriptions constitute the only direct, non-literary textual evidence preserved from antiquity. Whether composed in prose or verse, these texts span a wide range of domains—religion, politics, economy, law, and beyond—depending on their content and function. Archaeological findings attest to their diverse uses in ancient Greek society, which explains the remarkable plurality of their forms and themes (Oikonomaki – Tzifopoulos, 2015).

The study of inscriptions, particularly in relation to the dialects and regional alphabets used across the Greek world, offers critical insight into the evolution of the Greek language over time. Because inscriptions often reflect colloquial or semi-formal language use, they allow scholars to observe linguistic shifts and variations with a high degree of accuracy. Unlike literary texts, epigraphic materials often mirror the speech and concerns of ordinary individuals, rendering them invaluable in reconstructing the linguistic and sociocultural landscape of the ancient world.

In this regard, an inscription may be likened to a modern person's handwritten note in a book—a personal mark of identity, intent, or memory. It constitutes a form of expression, conveying individual thoughts, intentions, and desires in tangible and enduring form. Moreover, because inscriptions are often tied to specific objects or settings—such as a dedicatory text on a symposium vessel—they serve not only linguistic purposes but also function as entry points into the broader cultural practices of antiquity.

The educational use of inscriptions is further enhanced by their potential to create interdisciplinary connections. Students are not only exposed to Ancient Greek in its original and often dialectal forms, but are also prompted to explore the historical and cultural contexts in which these texts were produced. For example, a brief inscribed phrase on a drinking cup may lead to an exploration of the symposium, a central institution in classical Greek social life.

Additionally, inscriptions offer pedagogical opportunities for experiential learning. Students can relate more easily to ancient inscriptions when they are reminded of the inscriptions present in contemporary life—on public buildings, gravestones, or even household objects. This diachronic connection helps bridge the perceived distance between antiquity and the present. Engaging directly with inscribed artifacts, or even tactile replicas, provides a sensory, immersive experience that enhances comprehension and retention through embodied learning.

But what, precisely, is an inscription? In concise terms, it is a text incised with a sharp instrument—or more rarely painted—onto a durable surface such as stone, metal, clay, wood, bone, and, in rarer and less well-preserved cases, leather, fabric, or leaves. In a visual presentation, one could showcase representative examples of Greek inscriptions across these materials to illustrate their variety and scope.

One challenge, however, is that many inscriptions today are housed in museums and often fail to capture the attention of students when presented statically. A solution to this is to emphasize the continuity of inscriptional culture into the present day. By initiating lessons with modern inscriptions found in everyday contexts—such as signs, memorial plaques, or engraved household items—educators can stimulate curiosity and draw parallels between ancient and modern inscriptional practices.

Moreover, school textbooks have long included images of inscriptions as visual prompts for classroom activities. These can now be augmented using augmented reality (AR) technologies, such as the Web-AR Studio platform, to provide additional information, multimedia content, and interactive assessments. This integration of technology allows for the design of rich linguistic and cultural learning experiences.

In this terms, there can be little doubt that our current understanding of ancient Greek civilization would be incomplete—and, in some respects, distorted—without epigraphy. If our only sources were literary or historical texts, our knowledge would be largely confined to Athens, Sparta, and a few other well-documented poleis. Many Greek cities and colonies, for which no extensive literary corpus survives, are known to us primarily through epigraphic evidence. The value of inscriptions as primary historical sources is immense: they are direct testimonies of the past, and their durability has often ensured their preservation in better condition than manuscripts or papyri.

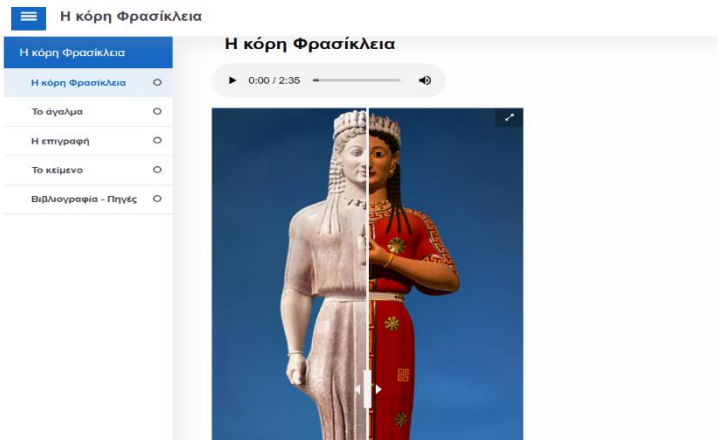
Through inscriptions, we gain access to a wide array of documents—laws, decrees, treaties, official lists, sacred texts, and more—that reveal vital aspects of civic life, religious practice, and economic organization. As such, they serve as fundamental sources for reconstructing the political, social, and cultural fabric of the ancient Greek world. They also provide an irreplaceable corpus for the study of ancient alphabets and dialectal variation, enabling researchers to trace linguistic developments with precision.

Finally, the widespread nature of epigraphic practice in antiquity means that inscriptions illuminate both public and private dimensions of life in the ancient world. From monumental state decrees to humble personal dedications, inscriptions form a multifaceted and dynamic archive—one that deserves a central place in both research and pedagogy in the field of Ancient Greek language and culture.

THE DiGIA PROJECT: DIGITAL EPIGRAPHY AND EDUCATION IN ANCIENT GREEK INSCRIPTIONS

Principal Investigator: Ioannis Z. Tzifopoulos

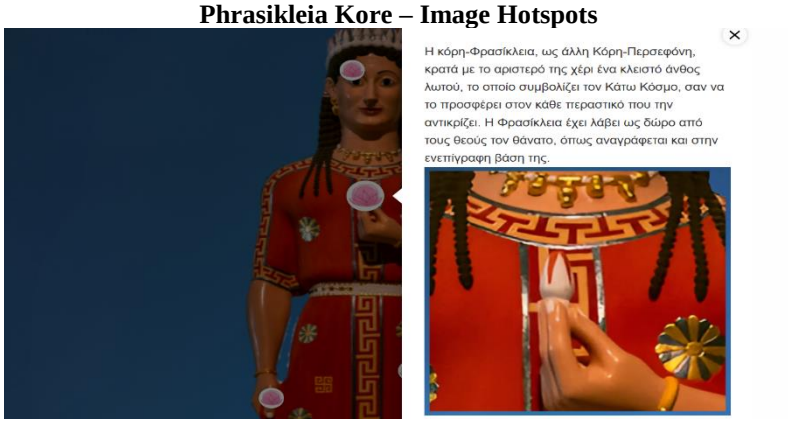
The Digital Greek Inscriptions & Alphabets (DiGIA) project is an ambitious digital humanities initiative developed by the Epigraphy and Papyrology Laboratory (EREP) within the Department of Philology at Aristotle University of Thessaloniki (AUTH). Its goal is to harness digital technologies to preserve, study, and teach the epigraphic heritage of ancient Greece. By digitizing inscriptions, documenting regional scripts, and designing educational resources, DiGIA brings the distant world of ancient Greek writing into classrooms, research labs, and public spaces in fresh and meaningful ways.



Main Objectives of DiGIA: Digitizing, Documenting, and Teaching Ancient Greek Inscriptions

DiGIA aims to preserve, study, and promote ancient Greek inscriptions through digital technology. Its primary goal is the digitization of key epigraphic collections, including squeezes from Aristotle University of Thessaloniki, artifacts from Makrygialos, and inscriptions from eastern Crete. High-resolution images and 3D models ensure the long-term preservation and wider accessibility of these invaluable sources. Secondly, DiGIA documents regional variants of the ancient Greek alphabet, particularly Cretan scripts, predating the standardized Ionic alphabet. The project creates digital typefaces that faithfully reproduce these letterforms, aiding transcription, analysis, and reconstruction. Finally, DiGIA develops educational tools to engage diverse audiences. These include augmented reality apps, interactive databases, and tailored lesson plans that bring inscriptions to life, fostering linguistic and cultural learning from school to university levels. Through these integrated efforts, DiGIA advances epigraphic scholarship and enhances the teaching and appreciation of ancient Greek language and culture in the digital era.

Phrasikleia Kore



On the project's website (https://digia.lit.auth.gr/), a dedicated section has been developed for the integration of epigraphy into educational contexts, where digital learning objects are being progressively uploaded. Particular emphasis is placed on our inaugural digital object, which centers around the inscription of the Kore Phrasekleia (Image 1).

Image 1
Phrasikleia Kore – Image Juxtaposition

A variety of digital tools and object types were employed to enhance the learning experience, especially in the easy-to-use environment of the platform e-me. 4all. eu. Notably, "Image Hotspots" (Image 2) was used in order to mark and define key vocabulary directly on the inscription image, enabling learners to engage visually and linguistically with the ancient text. This object was developed as an interactive resource, and in the process, artificial intelligence technologies were also leveraged. Specifically, the "Dupdub AI Tools" application was used to create an interactive video, where the statue is speaking, enriching the multimodal dimension of the learning activity.

Image 2
Phrasikleia Kore – Image Hotspots

Furthermore, for the lexical component of the activity—focusing on vocabulary acquisition in Ancient Greek—the platform *Wordwall* was incorporated. It is a digital tool for creating educational activities, which include color, sound, images, movement. Furthermore, there is an element of competition and gamification, ensuring the active participation of all learners, who receive immediate feedback. This facilitated the development of gamified exercises and word-based activities that support learners in internalizing linguistic elements found in the epigraphic material.

Through this multidimensional approach, the educational use of epigraphy becomes not only more accessible but also engaging and pedagogically meaningful, bridging the gap between ancient texts and contemporary digital literacy.

CONCLUSIONS

Initial results show that students exposed to digital epigraphy tools show increased interest and better understanding of Ancient Greek. The interactivity of digital platforms improves comprehension, while the visualization of epigraphs within their historical context enhances appreciation for ancient texts.

In conclusion, the use of digital tools in teaching Ancient Greek is a promising field. With the help of technology, we can bridge the gap between the ancient world and modern education, keeping students' interest in the language and culture alive.

The finding of a positive effect on students' motivation and school performance will hopefully lead to the development of corresponding educational interventions both for the teaching of the specific subject of language teaching and for philological courses that teach ancient Greek culture or even for the organization of interactive educational tours to museums and archaeological sites – with appropriate modifications to give more emphasis to the cultural part of the application. Epigraphy, combined with digital innovation, can be a powerful tool in the preservation and dissemination of ancient Greek heritage.

Principal of the 3rd General Lyceum of Trikala "Odysseas Elytis"
Trikala, Greece
email: sarkatzikiki@gmail.com

ABSTRACT

The paper addresses the integration of digital tools in education and how they influence teaching and learning. The introduction highlights the use of digital tools such as educational platforms (e.g. Google Classroom), interactive courses (e.g. Kahoot!), educational videos (e.g. YouTube), and collaboration tools (e.g. Microsoft Teams). These tools enhance learning, facilitate communication and collaboration, and enable personalized learning experiences for each student.

In the literature review, the paper analyzes the role of Information Technology and ICT in education. It refers to the need for students to acquire basic knowledge about technology and ICT, while at the same time developing critical thinking and social behavior skills. Despite students' familiarity with digital technologies, research data shows that students do not fully utilize the potential of ICT in the learning process. Therefore, education must incorporate activities that enhance critical thinking and problem-solving skills.

The paper also examines the learning theories that influence the integration of ICT in the educational process, such as behaviorism and constructivism.. It also presents the evolution of the integration of ICT in education, from the use of mass media to their full integration into the educational process.

A significant part of the paper concerns Mobile Learning (m-learning), which uses portable devices such as mobile phones and tablets to support learning, while highlighting the importance of collaboration, critical thinking and lifelong learning. It is characterized by interactive elements, personal adaptation and immediate feedback, enhancing the effectiveness and interaction in the learning process. Finally, the paper refers to the use of Artificial Intelligence (AI) in education, which offers personalized learning experiences and supports the educational process with the help of algorithms and neural networks.

Overall, the integration of digital tools and ICT in education offers many possibilities for improving teaching and learning, but requires a careful approach to their effective utilization.

Keywords: Digital Tools, Artificial Intelligence, Mobile Learning, education, ICT

INTRODUCTION

In the context of the digital revolution, education has inevitably been influenced by rapid technological advancements. The integration of digital tools into the educational process now constitutes a fundamental element of contemporary pedagogy, as it enhances interactivity, accessibility, and the personalization of learning experiences. From interactive platforms to applications of artificial intelligence, these tools provide innovative opportunities for both educators and learners, reshaping traditional models of knowledge transmission and fostering more dynamic, engaging, and student-centered learning environments.

Key domains in which digital tools have been effectively implemented include: a) **Educational Platforms**, such as Google Classroom, Moodle, and Blackboard, which support the systematic organization of course content, facilitate the dissemination of educational materials, and enable the monitoring of student progress, b) **Interactive Learning Tools**, including applications like Kahoot! and Nearpod, which offer gamified quizzes and activities designed to actively engage students and promote participatory learning. c) **Educational Video Resources**, such as YouTube and Khan Academy, which provide extensive multimedia content across various subject areas, thereby supporting independent and differentiated learning pathways, d) **Collaborative Tools**, such as Microsoft Teams and Slack, which enhance communication and collaboration among students and teachers, enabling real-time interaction and the co-construction of knowledge, e) **Personalized Learning Systems**, which employ data analytics and algorithm-driven approaches to tailor educational content and pace to individual learner profiles, f) **Note-taking and Organizational Applications**, including Evernote and OneNote, which assist students in structuring, storing, and accessing their notes across different devices and learning contexts, g) **Virtual and Augmented Reality Technologies (VR/AR)**, which create immersive learning experiences that transcend the limitations of traditional classrooms—such as virtual explorations of historical sites or the three-dimensional visualization of complex scientific concepts, h) **Digital Assessment and Feedback Tools**, which streamline formative and summative evaluation through online quizzes and exams, while also providing immediate and constructive feedback to support continuous learner development.

LITERATURE REVIEW

Informatics, ICT, and Education

Informatics and Information and Communication Technologies (ICT) in schools serve a dual role: a) as subjects of instruction and b) as means of instruction. One of the primary objectives of teaching Informatics in compulsory education—according to the Cross-Thematic Curriculum Framework for Informatics (CTCFI) and the Detailed Curriculum for Informatics—is to provide students with an initial yet structured and comprehensive understanding of basic hardware and software concepts. This aim is pursued within the broader framework of technological literacy, enabling students to recognize the role of ICT while also developing critical thinking skills, ethical awareness, social behavior, and a willingness for engagement and creativity—both individually and collaboratively as members of a group.

The diverse tools offered by ICT (e.g., educational software, online learning platforms) have long been fundamental resources in the teaching of various subjects. Both formal and informal education are being transformed in multiple ways through ICT, while learning is enriched and reinforced both within and beyond the school environment (Hollman, Hollman, Shimerdla, Bice & Adkins, 2019).

Contemporary students are often referred to as "digital natives" (Prensky, 2001). However, research conducted both internationally and within the Greek educational context (Sybrahmanyam et al., 2001; Jackson et al., 2006; Vekiri & Chronaki, 2009) reveals that, although students are typically familiar with digital tools even before being introduced to them in school, they tend to use only a limited range of ICT capabilities. As a result, they often lack the skills necessary for effective use of Informatics tools in problem-solving, in the educational application of digital resources, and in critically evaluating information (European Commission, 2008, 2012; Mossberger et al., 2003).

A key issue that emerges, therefore, is the need for students to engage in activities that: a) develop their ability to use Informatics tools for solving real-world, authentic problems, b) encourage them to apply digital technologies for learning purposes and c) foster their critical thinking skills.

Learning Theories and ICT in the Educational Process

The integration of Information and Communication Technologies (ICT) into the educational process has been guided by various theories of human knowledge and learning. The behaviorist approach, which emphasizes the transmission of information from teacher to student and the modification of student behavior, inspired the development

of "closed-type" educational software. Such tools typically feature guided instruction and drill-and-practice activities (Panagiotakopoulos, Pierrakeas & Pintelas, 2003; Komis, 2004).

Constructivism, on the other hand, is a learning theory that has significantly influenced the design of ICT-based learning environments. According to this theory, learning is an active process whereby students construct, test, and reorganize their cognitive representations through experimentation and interaction with others (e.g., peers). In this context, the teacher assumes the role of a facilitator who supports students' exploratory and collaborative learning. Constructivist perspectives have led to the development of "open-ended" digital environments (e.g., tools for experimentation, creativity, and collaboration) (Bressler, Oltman & Vallera, 2018).

Many contemporary digital learning environments combine elements from both behaviorist and constructivist approaches, depending on the intended learning goals—e.g., using drill-and-practice activities for consolidating knowledge and open-ended exploratory tasks for conceptual understanding.

According to Komis (2005), the integration of ICT into education has gone through four phases, which can still be identified in varying degrees across educational systems that have adopted ICT in practice:

- **Phase One** (pre-1970): ICT integration involved the use of media such as television, radio, and video, primarily to support curriculum goals.
- **Phase Two**: Informatics was introduced as a standalone subject in the curriculum, emphasizing programming, particularly in secondary education.
- **Phase Three**: The appearance of personal computers in schools marked a shift where Informatics began to function both as an academic subject and as a tool for supporting other disciplines.
- **Phase Four**: ICT became broadly integrated into the educational process. Computers were used as teaching and learning tools across the curriculum, and efforts were made to embed ICT into everyday school practices and across subject areas (Papadopoulou & Kotridis, 2010).

The models used to guide ICT integration in education include the **technocratic**, **holistic (integrated)**, and **pragmatic** models (Komis, 2005):

1. **Technocratic Model**: This model emphasizes technical knowledge and skills, treating Informatics as an autonomous academic discipline. Its focus is on digital literacy, particularly programming and computer architecture. It is often described as a "vertical" model (Makrakis, 2000).
2. **Holistic or Integrated Model**:In this model, ICT is viewed as a learning tool and is considered essential for interdisciplinary approaches to knowledge. ICT is embedded into existing curriculum subjects and supports the integration of learning across domains.
3. **Pragmatic Model**:The pragmatic model represents a synthesis of the two previous models, combining technical training with interdisciplinary application.

LEARNING THROUGH MOBILE DEVICES – M-LEARNING

Informatics and ICT provide tools that can support students in approaching and understanding concepts included in school curricula. A characteristic example is that of Physical Education, where concepts relate to physical activity, exercise, human movement, sport, health, and quality of life (Antoniou, 2015). In Physical Education, students learn through multiple sensory channels: visual, auditory, and kinesthetic. The integration of these different modes of information reception enhances learning potential (Mohnsen, 2014). Text, digital images, videos, animations, and diagrams—used independently or combined within a multimedia application—can serve as motivational tools in Physical Education, increasing student engagement and satisfaction, while also facilitating the comprehension of concepts, processes, and skills embedded in the subject matter (Medina, 1992; Wilkinson, Pennington & Padfield, 2000; Antoniou et al., 2003; Antoniou et al., 2006).

Today, **mobile learning** (also known as *m-learning*) has attracted the interest of educational companies and researchers worldwide. This form of learning is increasingly gaining momentum, leading to the development of educational content and systems specifically designed for mobile learning contexts (Edwards et al., 2002; Biström, 2005). M-learning offers learning opportunities to individuals and groups who are mobile or at a distance, with the only required equipment being a smartphone or tablet (Pifarré, 2019). Critical components of the educational process include **collaborative interactions** and **critical thinking**. When students develop critical thinking skills, they engage more deeply with concepts, become more objective, and interpret situations with a logical and analytical perspective (Connerly, 2006). Mobile technologies offer students tools for direct, seamless interaction, promoting cooperation, idea-sharing, and the development of critical perspectives—processes that, as noted by Lonsdale, Baber, and Sharples (2003), foster the **constructive generation of new knowledge**.

Essentially, m-learning extends education beyond the classroom into **informal learning environments**, whether physical or virtual (O'Malley et al., 2005). Studies by Swank, Hooft, Kratcoski, and Hunger (2005) indicate that students using mobile technological tools collaborate more effectively and demonstrate higher levels of engagement. This leads to a redefinition of learning as **collaborative, creative, personal**, and ultimately **lifelong** (Amanatidis, 2010; Sypsas & Tsoumanis, 2014). Appropriately designed m-learning environments may also contribute to students' understanding of the value of lifelong physical activity, both within and beyond the school context.

As mobile learning gradually found its place within formal education systems, the need arose to define it and establish a **theoretical foundation**. Early definitions tended to focus on the technologies involved, as these were seen as the central element of mobile learning (Kukulska-Hulme et al., 2009; Traxler, 2009; Winters, 2007). Traxler (2009, p. 13), for instance, defined mobile learning as "learning that is delivered or supported exclusively or primarily through portable devices and mobile technologies, such as personal digital assistants (PDAs), smartphones, or laptops."

Wang et al. (2009, p. 93) offer a broader definition: mobile learning "refers to the provision of education to learners anytime and anywhere, through the use of wireless internet and mobile devices, including mobile phones, PDAs, smartphones, and digital audio players."

What fundamentally defines mobile learning is **mobility**, which has been thoroughly explored by researchers. According to Kukulska-Hulme et al. (2009), mobility can be categorized into three types: **spatial**, **temporal**, and **contextual**. Sharples et al. (2009) and Kakihara & Sørensen (2002) extend this further by identifying **five dimensions of mobility**, including:

Mobility in Physical Space: Students learn, explore, and interact with peers and learning materials as they move between locations. Their learning is no longer dependent on a fixed physical environment. Using mobile devices, students can focus on their learning activity while becoming immersed in it, independent of their surrounding space.
Thematic Mobility: Students shift their focus between different subjects based on their interests and obligations.
Social Mobility: Within the context of both formal and informal learning, students interact across various social groups.
Temporal Mobility: Learning transitions between formal and informal learning contexts.
Technological Mobility: For researchers, the focus of mobile learning is not on the devices themselves. Learning activities can be accessed through a wide range of devices. When all the above forms of mobility are combined, the core essence of mobile learning is achieved, according to Kukulska-Hulme et al. (2009).
Mobile learning (m-learning) is based on mobile device technologies such as smartphones and tablets, which enhance the learning experience by offering flexibility, immediate access to information, and opportunities for interactive and personalized education. Examples include:
Apps: A variety of educational apps for mobile devices allow students to learn in engaging and interactive ways.
E-learning: E-learning platforms can also function through mobile devices, enabling students to attend online classes, take quizzes, and interact with learning content from their phones.
Automation and notifications: Some m-learning apps include notifications and reminders, helping students keep track of deadlines and manage their time effectively.
Social learning: Through social networks and collaborative tools, students can engage with peers, share ideas, and exchange learning materials. M-learning incorporates these tools to support the social dimension of learning.

There are numerous mobile learning applications, such as:

- **Photomath**, which allows students to scan and solve math problems using their mobile devices;
- **Duolingo** and **Babbel**, for learning foreign languages using quizzes, videos, and audio;
- **Memrise** and **Anki**, for vocabulary and phrase practice in various languages;
- **Khan Academy** and **PhET Interactive Simulations**, where students can use simulation tools to experiment with physical phenomena (e.g., energy, motion, chemical reactions) and observe real-time changes in parameters;
- **GeoGebra**, which helps students create graphical representations to better understand mathematical concepts;
- **Google Earth**, allowing students to explore historical and geographical locations and gain a deeper understanding of global relations and events.

Mobile learning constitutes a significant field of educational innovation, leveraging portable technologies to enhance the learning process through flexibility, immediacy of access to knowledge, and the capacity for adaptation to individual learner needs. The use of mobile devices contributes to the promotion of lifelong learning, the development of

self-regulation and autonomy skills, and the creation of learning environments that transcend traditional spatial and temporal boundaries. As such, m-learning emerges as a critical tool for modernizing educational practice and aligning it with the demands of the digital age.

Effective teacher preparation for mobile learning should include both pedagogical strategies tailored to mobile contexts and basic technical training to enhance teachers' confidence. Educators should be given opportunities to engage with mobile technologies for their own professional development, as well as for designing instructional materials and exchanging resources and real-world examples[14]. Informal support networks and peer collaborations can be particularly valuable, especially in remote areas where access to technical support may be limited. These networks also play a key role in helping teachers stay informed about the fast-paced changes in both technology and teaching practices.

In practice, the use of mobile phones is restricted in many educational institutions, prompting some educators to incorporate them into their teaching practices covertly. To ensure effective and appropriate use, institutions must implement clear policies. Moreover, students who are primarily familiar with using mobile devices for social interaction require structured guidance on how to engage with these tools for academic purposes. Equally important is the integration of mobile learning with institutional learning management systems or virtual learning environments to support cohesive and efficient instruction. Mobile technologies are likely to remain valuable tools for achieving specific educational objectives, such as enhancing literacy and numeracy, and for addressing emerging global challenges. Looking ahead, mobile learning is expected to evolve through the integration of context-aware technologies, which can adapt to learners' locations, behaviors, and preferences in order to deliver relevant educational resources in the most effective settings.

LEARNING THROUGH ARTIFICIAL INTELLIGENCE (AI)

Artificial Intelligence (AI) is one of the most dynamically evolving technological fields with direct applications in education, bringing about radical changes in both teaching methods and the learning experience. Through the use of intelligent algorithms and machine learning techniques, adaptive educational systems are being developed that can analyze student performance in real time and dynamically adjust educational content to meet their needs (Holmes et al., 2019). At the same time, AI is widely used on platforms such as Duolingo, Khan Academy, and Squirrel AI, providing personalized learning experiences and recommendations based on data analytics (Chen et al., 2020).

Artificial intelligence (AI) has swiftly transitioned from a speculative idea to a foundational element of everyday life, with significant implications for the field of education. As of 2024, AI technologies are reshaping the educational landscape by enabling highly personalized learning experiences, streamlining administrative processes, and contributing to improved student outcomes. Applications such as intelligent tutoring systems and AI-supported classroom management demonstrate the extensive and transformative potential of these tools. Educators and school leaders now have the ability to utilize AI for analyzing large datasets, yielding insights that inform strategic planning and instructional decision-making. Furthermore, AI is helping to eliminate barriers to learning by offering adaptive tools that cater to diverse student needs and learning preferences. As AI technology continues to advance, its capacity to enhance educational practices and promote more individualized, effective learning environments is expected to expand even further.

AI also contributes to the automation of repetitive administrative tasks (such as test evaluations, managing learning profiles, and tracking progress), allowing educators to focus more on the creative and supportive aspects of teaching (Luckin et al., 2016). Additionally, technologies such as emotion recognition and facial recognition are being experimentally used to capture students' emotional states and improve their interaction with the learning environment (Zawacki-Richter et al., 2019).

Learning through Artificial Intelligence (AI) is a rapidly developing field that combines the theory of machine learning, statistics, and computational sciences. Its key concepts include:

- **Machine Learning:** A subcategory of AI focused on the development of algorithms that enable computers to "learn" from data. By analyzing large volumes of data, machine learning algorithms identify patterns and make data-driven predictions or decisions. This process allows AI systems to adapt to new information and improve performance over time. There are several types of machine learning, including supervised learning, where the model is trained on labeled data; unsupervised learning, where it explores unlabeled data to discover hidden patterns; and reinforcement learning, where an agent learns optimal behaviors through trial and error within a dynamic environment. Machine learning powers many AI applications today, from speech recognition and image

[14] https://www.open.edu/openlearncreate/course/index.php?categoryid=568

classification to recommendation systems and autonomous vehicles, making it a key driver of innovation in the AI field.

- **Networks**: Models inspired by the structure of the human brain, widely used for pattern recognition and natural language processing. In the context of **Artificial Intelligence (AI), networks** generally refer to **neural networks**. Neural networks consist of interconnected layers of nodes (or neurons) that work together to process and learn from data. The most common type of neural network used in AI is the **artificial neural network (ANN),** which is the foundation for deep learning models.
- **Supervised and Unsupervised Learning:** Supervised and unsupervised learning are two key approaches in Artificial Intelligence. Supervised learning involves training a model on labeled data, meaning the input comes with the correct output, allowing the model to learn and make predictions, such as identifying spam emails or recognizing images. In contrast, unsupervised learning deals with unlabeled data, where the model explores the data to uncover hidden patterns or groupings without predefined outcomes. This approach is often used for tasks like customer segmentation or anomaly detection. Both methods are fundamental in enabling AI systems to learn from data and make intelligent decisions.
- **Reinforcement Learning:** Is a type of machine learning in AI where an agent learns to make decisions by interacting with an environment. The agent takes actions, receives feedback in the form of rewards or penalties, and uses this feedback to improve its future behavior. Unlike supervised learning, reinforcement learning does not rely on labeled input/output pairs—instead, it focuses on learning a policy that maximizes cumulative reward over time. It is widely used in areas such as robotics, game playing (e.g., AlphaGo), and autonomous vehicles, where the AI must learn optimal strategies through trial and error in dynamic settings.

AI can offer personalized learning experiences, support educators, and improve the learning process. Key aspects of AI application in education include:

- **Personalized Learning**: AI systems can analyze each student's learning habits, pace, and interests, dynamically adjusting the content and teaching methodology. Platforms such as Knewton and Squirrel AI use performance data to dynamically shape personalized learning pathways (Chen et al., 2020).
- **Adaptive Learning Systems:** These systems use algorithms to adjust activities and questions to meet the needs of each student. Examples include Smart Sparrow and ALEKS, which focus on continuous assessment and real-time adaptation of educational content (Holmes et al., 2019).
- **AI Tutors & Chatbots**:Applications such as Duolingo, using AI, offer support for questions, reinforce learning through spaced repetition, and guide students with immediate feedback. Chatbots are already being used in university settings for student support (e.g., Jill Watson at Georgia Tech).
- **Automated Assessment & Feedback**: Systems for grading essays or complex responses rely on natural language processing (NLP) and are used in platforms like Gradescope. Immediate feedback supports continuous learning and self-improvement (Zawacki-Richter et al., 2019).
- **Learning Analytics**: AI collects and analyzes data from educational activities to identify patterns of success or difficulties, suggesting interventions at an individual or school-wide level. This enhances the decision-making process for educators and school administrations regarding student support.
- **Development of Soft Skills through Simulations & Game-Based Learning** :The use of AI in interactive learning environments (e.g., educational serious games) enhances skills such as problem-solving, collaboration, and decision-making. AI-based simulations are widely used in fields such as medicine, pilot training, and business education.
- **Support for Students with Learning Disabilities**: AI significantly contributes to inclusion with applications that convert text to speech, speech to text, or enhance communication for individuals with autism or mobility issues.

However, the integration of AI in education is not without concerns. Ethical and legal issues such as privacy, data management, algorithmic transparency, and the prevention of algorithmic bias are key challenges that must be addressed in order for AI to be used responsibly and fairly (Williamson & Eynon, 2020).

CONCLUSIONS AND RECOMMENDATIONS

This paper highlights the significance and potential of digital tools in education, emphasizing the multiple benefits they offer to both students and teachers. Their integration enhances the learning process by enabling students to develop skills such as critical thinking and collaboration, while also allowing for the personalization of the learning experience. However, challenges remain, as a strong educational strategy is required to ensure that technology supports — rather than replaces — meaningful learning.

Tools such as educational platforms, collaboration applications, and the use of virtual and augmented reality have created new opportunities for learning, offering experiences that transcend the traditional classroom. Digital technologies support learning through collaboration, encouraging interaction among students and fostering critical thinking. This leads to the creation of new knowledge and the development of personal skills. Mobile learning expands the learning process beyond the classroom, enabling students to interact and learn anytime and anywhere. This supports lifelong learning and the personalization of educational experiences. The application of Artificial Intelligence in education offers the prospect of individualized learning tailored to each student's needs, through data analysis and the use of advanced algorithms.

Nevertheless, it is essential for educators to be trained in the use of digital tools and Artificial Intelligence in order to effectively integrate these technologies into their teaching. The promotion of digital tools that foster collaboration between students and teachers should be prioritized. Collaboration platforms such as Microsoft Teams and Zoom can provide opportunities for group work and discussions. Additionally, the use of tools and algorithms that adapt learning to the individual needs of students contributes to more effectively addressing differences in learning pace and capacity.

The creation of mobile learning environments (M-Learning) encourages learning through mobile devices, giving students the ability to learn anytime and anywhere. Educators should stay informed about developments in Artificial Intelligence and how it can be used to enhance the educational process and offer customized learning. The effective integration of digital tools into education can transform teaching and learning, provided it is combined with strategic planning and appropriate teacher training.The benefits of using digital tools are significant for both educators and students.

From the educators' perspective, the use of digital tools can enhance teaching by adapting instructional materials to students' needs, enabling a more personalized and learner-centered approach. Formative assessment, incorporating real-time feedback, supports the monitoring and evaluation of student progress and facilitates the integration of experiential learning, which combines theory with practice.

From the students' perspective, digital tools provide a more interactive and flexible learning experience. The fast and effective assimilation of knowledge is supported through the use of multimedia and digital content, while the development of critical thinking is enhanced through tools that enable analysis, comparison, and critical evaluation of information. Furthermore, interaction between students and teachers becomes more direct and effective, promoting collaboration and active participation in the educational process.

This convergence of technology and education creates a more dynamic and advanced learning environment that benefits both educators and learners.

ABSTRACT

The increasing use of educational videos in teaching creates new challenges and opportunities for improving the learning process. Automated summaries of educational videos, based on machine learning algorithms, offer an innovative tool that can be utilized for enhancing comprehension, student self-assessment, and feedback from educators. This work explores the ways in which automated summarization of educational videos can contribute to the more effective organization of the educational process.

The integration of educational videos in teaching may have helped educators; however, their comprehension can be demanding at times, particularly when the content is technical or of long duration. Automated summarization of a video can provide students with a brief and comprehensive presentation of its main points, facilitating information absorption and reducing cognitive load. Additionally, students can use the summaries for previewing content before viewing or for quick review after video completion, thus enhancing comprehension and memorization of basic concepts. We must not forget that students live in an era of rapid technological development and in the age of "speed" where they are bombarded daily with dozens of brief pieces of information in text format (Twitter) and video (shorts, TikTok). A relatively short summary of an educational video, beyond its educational nature, appears to better match the information pattern that students receive daily, making it more accessible and attractive compared to a long-duration video.

The main benefits for students include quick material review as well as better understanding of key points. Comparing an automated summary with the summary that students have created on the same topic can help them identify any oversights, misunderstandings, or gaps in their comprehension. This process enhances their metacognitive skills and helps them become more autonomous in their learning. They can also utilize summaries to quickly review the basic points of a chapter before examinations.

From the educators' perspective, automated summaries can be utilized as a feedback tool or for personalizing instruction. Educators can review the generated summaries to identify which video points challenge students and adjust their teaching approach accordingly. Furthermore, the ability to generate summaries at different levels of detail allows for differentiated instruction, responding to the needs of students with different levels of comprehension, different readiness levels, different interests, and generally different learning profiles. Another important application concerns accessibility. Automated summaries can support students with learning difficulties or those who prefer written information over auditory information, especially when the video is in a foreign language and subtitles can be incorporated into the summary. By providing a concise version of educational content, students can better understand key points, even if they struggle with direct processing of spoken language. Additionally, both students and educators can quickly identify the most important points of a video, save time, and improve the learning experience. For summary extraction, software (Chasanis et al., 2014) was used on educational videos from the Electrical Engineering Department and the Health Department, and overall student acceptance exceeded 80%.

In conclusion, automated generation of educational video summaries constitutes a powerful tool that can enhance the educational process on multiple levels. It helps students organize knowledge, self-assess, and improve their skills, while simultaneously offering educators useful means of feedback and instructional differentiation. The integration of these tools in modern education can lead to a more flexible, effective, and accessible learning environment.

Keywords: video summarization, educational video, self-assessment

INTRODUCTION

The proliferation of digital content in educational settings has fundamentally transformed the landscape of knowledge dissemination and acquisition. Educational videos, in particular, have emerged as a cornerstone of modern pedagogical practice, offering dynamic and engaging alternatives to traditional instructional methods. However, the exponential growth in video-based educational content has introduced significant challenges related to content navigation, information extraction, and cognitive processing efficiency.

Educational videos have become an important part of higher education, providing an important content-delivery tool in many flipped, blended, and online classes. Yet, the consumption of lengthy educational videos often presents cognitive burdens that can impede effective learning, particularly when content is technically complex or spans extended durations. This challenge is compounded by the contemporary media consumption patterns of digital natives, who are increasingly accustomed to concise, rapidly digestible content formats.

The advent of artificial intelligence and machine learning technologies has opened new possibilities for addressing these pedagogical challenges through automated content processing and summarization. This powerful tool, driven by advancements in artificial intelligence (AI) and machine learning technologies, leverages AI video summarization to parse through hours of video data, distilling it into short, actionable text that captures the essence and key points of the original material.

This research investigates the application of automated video summarization techniques specifically within educational contexts, examining how machine learning algorithms can be leveraged to create concise, pedagogically relevant content abstracts that enhance learning outcomes while reducing cognitive load. Our study addresses the gap between technological capability and educational application, providing empirical evidence for the effectiveness of automated summarization in supporting both student learning and instructional design.

The primary objectives of this research are threefold: (1) to establish a comprehensive framework for implementing automated video summarization in educational settings, (2) to evaluate the pedagogical effectiveness of generated summaries through empirical student assessment, and (3) to demonstrate the potential for these technologies to support differentiated instruction and accessibility initiatives.

RELATED WORK

Automatic video summarization is a subfield of artificial intelligence aimed at reducing the length of video content while preserving essential information. Two main approaches exist:

- Frame-based summarization: In this approach, keyframes or scenes are selected to represent the original video. In (Chasanis et al., 2009), the authors propose a methodology where the number of key-frames is estimated using elements of the spectral graph theory. Next, the frame sequence is clustered into groups using an improved spectral clustering algorithm.

Image 1
Example of Video Summarization Using Keyframes

- Semantic summarization: A narrative summary is constructed by employing features extracted from speech, text, and visuals. In (Ioannidis et al., 2014), a key-frame extraction algorithm based on different image descriptors is proposed.

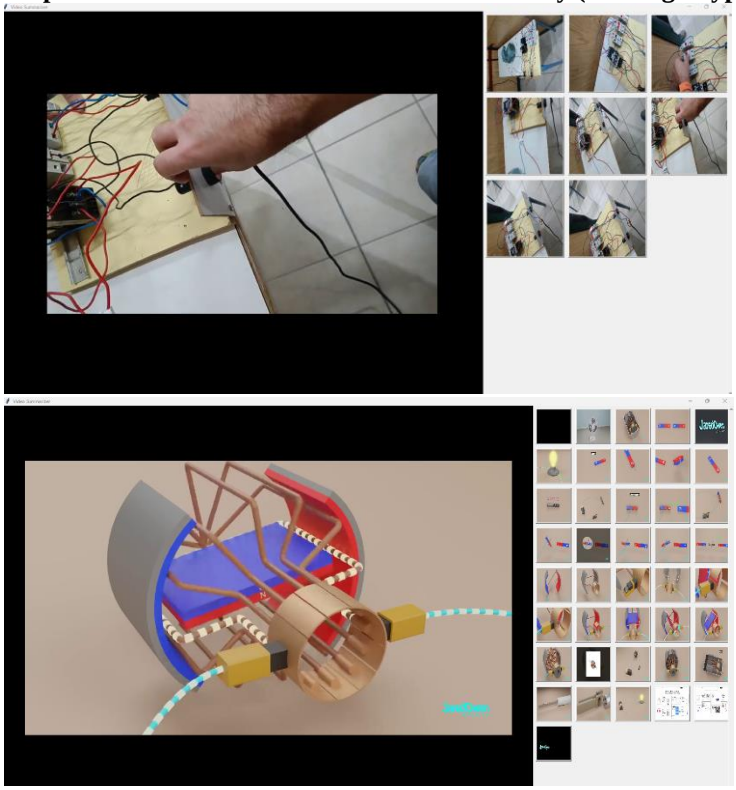
In (Thompson et al., 2023), a detailed analysis and investigation of algorithms using deep learning techniques is presented in (Wilson et al., 2024). A similar survey is supported in (Apostolidis et al., 2021).

There are several other types of video summaries, such as montage, where the whole summary is depicted in a single frame composed of keyframes providing instant access to a specific part of the video by clicking the corresponding keyframe.

Image 2
Example of a Video Summary (Montage Type)

APPLICATION TO EDUCATIONAL VIDEOS

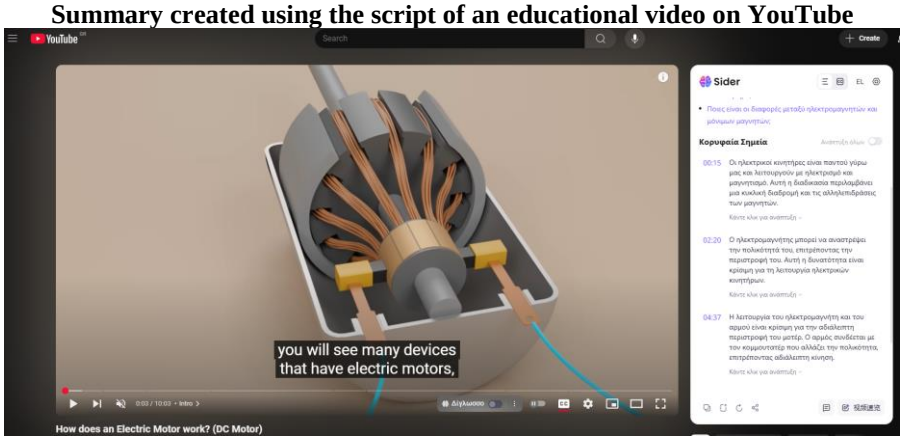
In educational contexts, video summaries are used to extract learning objectives, highlight essential points, and support instructional goals. Tools that utilize subtitles or transcripts enable the generation of summaries in multiple formats: bullet points, reports, and question sets. Summarized videos facilitate understanding through both visual and textual representation, making complex content more accessible and adaptable to different learning styles. Automatic video summarization is gaining ground in educational settings, particularly for simplifying long lectures and enhancing student engagement. Several proposed tools analyze video content, speech, visuals, and text to extract key segments or generate concise textual summaries, which have proven effective in several areas.



A variety of AI tools are proposed over the internet to convert lecture videos into rich text and keyframes, aiding note-taking and reducing cognitive load by syncing audio, transcripts, and visuals. Students often choose these summaries, when reading especially when under time pressure (Vimalaksha et al., 2018). AI-powered summarizers adapt content to individual needs, adjusting summary length and complexity for different proficiency levels or learning styles. Another category of AI video summarizers, such as Pixcile's AI Video Summarization, generates quizzes and flashcards from summaries, leveraging the "testing effect" to improve memory retention.

Moreover, educational platforms and institutions benefit by automatically summarizing hundreds of lecture videos, saving hours of manual effort. These tools integrate into Learning Management Systems, ensuring easy access for all students.

In summary, from a summary of an educational video we expect:



- Extraction of learning objectives: to assist students in comprehending the basic aspects of the original video
- Emphasis on key points: focus on the most important information
- Adaptation to teaching method
    - Selecting relevant material: The teacher employs the parts of the video that are needed
    - Taking into account the difficulty level: different levels of summary can be extracted

Image 3
Examples of Educational Videos and their summary (Montage Type)

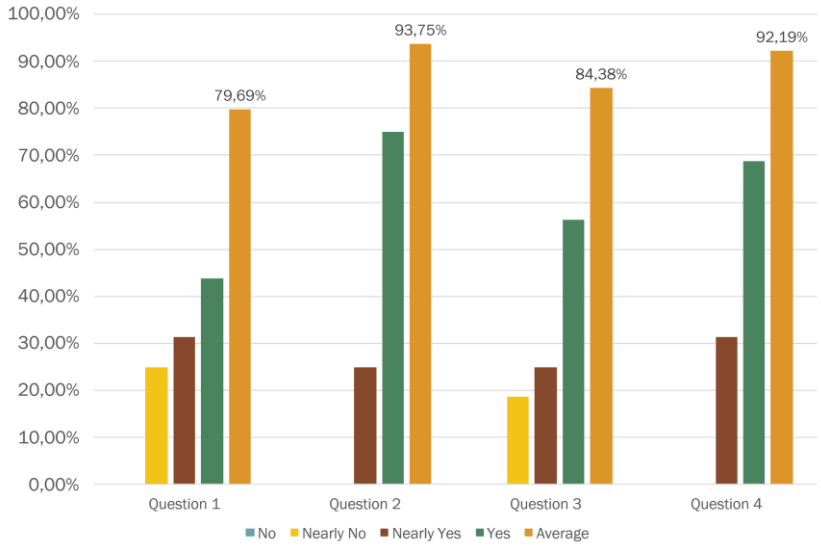
As already mentioned, a variety of AI tools and applications available online can extract summaries not only from video content but also from video scripts. Moreover, alternative summaries can be created in various formats, including reports, questions, and bullet points. On the other hand, students can comprehend these summaries either by listening to or watching the summary, or by reading the alternative exported formats. In Image 4, we provide a summary created using a random AI tool on YouTube.

Image 4
Summary created using the script of an educational video on YouTube

INTEGRATION IN THE TEACHING PROCESS

From the educators' perspective, automated video summaries serve as powerful tools for enhancing teaching effectiveness and personalization. These AI-generated summaries function as feedback mechanisms that allow teachers to identify which parts of educational videos pose difficulties for students, enabling them to adapt their instructional approaches accordingly. The ability to produce summaries with varying levels of detail provides educators with the flexibility to differentiate their teaching methods to meet diverse student needs.

The implementation of automated summarization technology supports comprehensive educational differentiation by accommodating students with different levels of comprehension, varying degrees of readiness, diverse interests, and generally different learning profiles. This capability allows educators to customize their instruction more precisely, ensuring that educational content is accessible and engaging for all learners regardless of their individual learning characteristics. By leveraging these automated tools, teachers can create more inclusive and effective learning environments that respond to the unique needs of each student in their classroom.



Another significant application of automated video summarization concerns accessibility in educational settings. These AI-generated summaries can provide crucial support for students with learning difficulties who may struggle with traditional video-based instruction formats. The technology offers alternative pathways for information processing, allowing educators to accommodate diverse learning needs and preferences within their classrooms.

Furthermore, automated summaries serve students who prefer written information over auditory input, particularly when dealing with foreign language videos. The integration of subtitles within the summary format creates an additional layer of accessibility, enabling students to engage with educational content regardless of language barriers or auditory processing preferences. This comprehensive approach to accessibility ensures that video-based learning materials can reach and effectively serve a broader range of students with varying abilities and learning styles.

From the students' perspective, automated video summarization technology offers numerous practical advantages that enhance their learning experience and academic performance. Students can quickly identify the most important points within educational videos, significantly saving time while improving their overall learning efficiency. This rapid content identification allows learners to focus their attention and energy on the most crucial concepts, making their study sessions more productive and targeted.

Additionally, students can leverage these automated summaries to create conceptual maps, quickly fill knowledge gaps in their understanding, and develop comprehensive study guides tailored to their specific needs. The technology also supports self-assessment practices, enabling students to evaluate their comprehension and identify areas requiring additional attention. These diverse applications empower learners to take greater control of their educational journey, promoting independent learning skills while providing them with versatile tools to enhance their academic success across various subjects and learning contexts.

Image 5
Evaluation Results on Educational Videos Summaries

EXPERIMENTS

A study was conducted at the Evening Vocational High School of Preveza. Four educational videos and their automated summaries were given to students. They answered questions regarding the accuracy, helpfulness, and

redundancy of the summaries, as well as the necessity of accompanying text. Responses were rated on a scale from 1 (No) to 4 (Yes). The summarization tool used was based on the platform proposed by Chasanis et al. (CVMP 2014), which achieved around 90% in summary adequacy.

In Image 5 we present the results where it is seen that:
- 79.69% of the students found the summaries covered key aspects of the original videos.
- 93.75% of the students indicated that no repetitive information was presented in the summaries.
- 84.38% of the students reported improved comprehension of the main aspects of the video after watching the summaries.
- 92.19% of the students preferred summaries with accompanying text.

DISCUSSION

Students today are immersed in fast, compact information formats such as social media and short videos. Automated summaries align with this trend, making educational content more approachable and engaging. The automated generation of educational video summaries represents a transformative technological advancement that can significantly revolutionize the learning experience across various educational contexts and levels. This innovative approach empowers students by providing them with sophisticated tools to:

Systematically organize and structure their acquired knowledge, creating coherent mental frameworks that facilitate deeper understanding and long-term retention.

Engage in meaningful self-assessment through reflective analysis of their comprehension gaps and learning progress, fostering metacognitive awareness.

Continuously refine and develop their academic skills through targeted practice and personalized feedback mechanisms.

Beyond these core advantages, automated video summarization technology offers several supplementary benefits. *Time efficiency* allows students to quickly grasp key concepts without watching entire lengthy videos, making their study sessions more productive and focused. Accessibility ensures that learners with different learning styles can benefit from condensed, text-based summaries that accommodate various preferences and abilities. *Review facilitation* transforms summaries into excellent study aids for exam preparation and knowledge consolidation, providing students with structured reference materials.

Furthermore, *personalized learning* capabilities enable AI systems to tailor summaries to individual learning needs and comprehension levels, ensuring that each student receives content appropriate to their academic requirements. Finally, *enhanced engagement* through interactive summaries can maintain student interest and motivation throughout the learning process, creating more dynamic and compelling educational experiences that encourage continued participation and deeper understanding of the subject matter. As it concerns teachers, video summarization of educational videos provides them with a sophisticated and invaluable resource for delivering comprehensive pedagogical feedback and implementing targeted instructional differentiation strategies that cater to diverse learning needs and styles.

The strategic integration of automated video summarization tools into contemporary educational frameworks has the potential to create transformative learning ecosystems. Video summarization technology provides transformative educational benefits through multiple dimensions of improvement. *Enhanced flexibility* adapts to individual student pacing, learning preferences, and scheduling constraints, allowing for personalized educational pathways that accommodate each learner's unique circumstances and academic journey. This adaptability ensures that students can engage with educational content at their own pace while maintaining their individual learning rhythms and personal schedules.

The technology also delivers *optimized effectiveness* through data-driven insights that enable educators to identify knowledge gaps, track progress, and adjust instructional methods in real-time, creating more responsive and targeted teaching approaches. Additionally, *universal accessibility* breaks down barriers for students with diverse abilities, language backgrounds, and technological access levels, ensuring that high-quality educational content reaches all learners regardless of their individual circumstances or limitations. These combined benefits create a more inclusive, efficient, and personalized educational environment that serves the needs of diverse student populations.

The implementation of these tools creates a ripple effect of benefits throughout the educational system, transforming multiple levels of the academic environment. For educators, the technology offers significant professional advantages including professional development opportunities as teachers gain access to advanced analytical tools that enhance their pedagogical expertise and instructional capabilities. Workload optimization becomes possible through automated processes that reduce time spent on routine tasks, allowing educators to focus on high-value instructional activities that directly impact student learning. Additionally, evidence-based teaching emerges as data from summaries provides concrete evidence for instructional decision-making, enabling more informed and effective pedagogical choices.

For educational institutions, the benefits extend to organizational and strategic levels through multiple key areas. Scalable learning solutions become achievable as technology enables consistent quality education delivery across large student populations without compromising educational standards. Cost-effective resource utilization maximizes the value of existing educational content through intelligent repurposing, ensuring optimal return on educational investments. Finally, innovation leadership positions educational institutions at the forefront of technological advancement in learning, enhancing their reputation and competitive advantage in the evolving educational landscape while demonstrating commitment to cutting-edge pedagogical approaches.

FUTURE WORK

In future work, we plan to employ a multimodal video summarization tool in order to provide summaries based on video, audio, and text. Moreover, we plan to explore the unique characteristics of educational videos that come from different subject areas and adapt the style of their summaries, with the ultimate goal of developing adaptive summarization methodologies that are precisely tailored to the unique stylistic and instructional requirements of each subject domain.

ABSTRACT

The organizational and administrative reconstruction of the modern Greek school unit has as its main objective the smooth and efficient operation of the unit, in its internal context of operation, but also in the wider social fabric that exists and evolves. The use of Information and Communication Technologies (ICT) is a recurring reality and can offer, through practical and modern technological tools, more efficient and effective performance of human resources. Without affecting what type of organization it will be, i.e. whether it serves a school or a company, an efficient and reliable management information system, (MIS) is always a great investment for the organization. Its evaluation at regular intervals to judge the return on this investment is necessary.

An essential role of Educational Information Systems is to reduce, in the phase of planning individual measures of educational policy, the lack of certainty by providing information that can be used to make the right decisions in the right way. In other words, the benefits implied by the use of educational information systems are linked to the increase in the efficiency and effectiveness of the administration and educational staff of any school organization. Efficiency is related to the ability to make decisions correctly. Effectiveness refers to the ability to make the right decisions. Therefore, making the right decision does not mean making the right decision.

Educational Information Systems do not directly provide standardized decisions to users, nor do they suggest a pre-designed way of making decisions that ensures success. They serve the persons involved with educational issues in the decision making process by providing a range of selected information that are the outputs of processing appropriate data entered into the computer. Therefore, the person who will be considered to make some important decisions, from the field of education, will rely not only on the information provided by the information system, but also on his/her experience, judgment and intuition. Finally, one issue to be considered is the functionality of the existing information system and the need to rebuild or expand it.

The aim of this paper is to present the potential of information systems to provide a productive and efficient way to serve the needs of school structures. They are a useful tool in the hands of the administration, as they are able to know at any time the programming that has been carried out as well as all the important information related to it.

Keywords: Information technology, Digital reconstruction, Educational information systems.

INTRODUCTION

In the modern social reality of technological prevalence, information that has no borders and constant redefinition, education could not remain a laggard and an uninvolved observer, but must harmonize and integrate Information and Communication Technologies in its daily practice. The adoption of ICT is considered to be multidimensional and diverse, and Hooper & Rieber (1995) distinguish four stages of the introduction of ICT into the educational process, one of which is the administrative use. Regarding the introduction of ICTs in educational administration, they are involved in the task of efficient organization and processing of administrative information. The educational system produces a huge amount of digital information and in order to carry out its processing, the use of ICT is considered necessary, (Makri, A., Vlachopoulos, D. 201).

The simplification and flexibility of daily administrative activities, the possibility of accessing a large volume of information, the reduction of processing time, the modernization of educational administration and the realization of communication are considered necessary. The use of modern technology tools is a one-way street that helps the school to meet the requirements of competitiveness in the European area, as new integrated e-government systems have entered the education administration.

ICTs are considered powerful tools that make schools an essential lever of society, leading it to continuous progress. By ICT we mean the methods, applications and products of modern science that relate to the collection, electronic encoding, processing, classification, selective retrieval, dissemination - disclosure and study of any information in any form, namely text, number, graph, audio, image, video (Papastamatiou, 2008). The term ICT in Education Administration means the use of computer applications and systems to ensure the best conditions for the processes of communication and learning (Nolan & Tatnall, 1995).

LITERATURE REVIEW

In social terminology, an organization is a group of people with one or more common goals that they wish to realize through specific principles and institutions. Organizations that aim to realize profits by carrying out business activity are called business organizations or simply firms. They are open systems that receive inputs, transform them into outputs, distribute them to the environment and collect information from it. The internal world of an organisation or enterprise includes capital, lab our, natural resources, research and technology, work teams and finally management staff. The external world includes the technological development, the economic dimension, the cultural social dimension and the political and legal environment.

For an organization to be considered successful, it should aim to excel in its operations management, which involves improving the systems and techniques it follows to produce products and services, design and operate. Information systems designed to handle operations management processes must follow certain standards of compliance to regulations set by the state as well as its other regulatory authorities. These standards are different from country to country and are subject to modification with the passage of time.

Secondary and tertiary education make use of information systems for their computerization, with tasks such as the electronic recording of pupils' and students' files, the scheduling of courses at the level of quarters or semesters, the assignment of courses by teaching staff and the management of individual files of teaching and administrative staff. The rapid dissemination and contribution of ICT for improving administrative work are now considered undeniable, as they are a key component of successful educational management, while the tendency of some to reject their potential is tantamount to denying reality.

ICT is a very efficient tool for the management of information data, contributing to the effective secretarial support of the school through the use of various software programs. They facilitate the everyday life of the administration staff, achieving speed in information retrieval, the possibility of storing and reproducing information data, as well as facilitating and enriching the teaching of the course. At the same time they contribute to the facilitation of repetitive tasks, the simplification of teaching and administrative tasks, the saving of time and money and operate with respect to the environment, as revealed by the research of Dimakopoulos et al. (2011).

The point on which almost all researchers agree is the speed, accuracy and enhancement of two-way communication networks between all the "shareholders" of the educational process (Charalampous, 2008; Nakos, 2009; Makewa et al., 2013). The online information platform serves to inform parents-guardians about the student's assessment in each subject, his/her exam scores, the dates and frequency of exams, the average grade point average, the number of written exams, etc. (Baltogiannis et al., 2012). Nevertheless, we should keep in mind that the Greek educational system

is governed by a strong centralization and formalistic structures and in order to achieve the electronic 'digital' transition, a new mindset of human resources and a change in the institutional framework are required.

More specifically, a set of coordinated actions are considered necessary, such as the strengthening of the logistical infrastructure and the available financial resources with network and computer equipment, the development of appropriate educational software, the creation of technical support structures at national and local level, the finding of mechanisms for the maintenance and repair of existing technological equipment, the change in the perception of the usefulness of ICT and the continuous training of principals and all educational staff in the integration and use of ICT in education.

THE EDUCATIONAL INFORMATION SYSTEMS

In practice, they are the type of information systems that aim to produce information that is necessary for the management and the officials of educational organizations, in order to make the appropriate decisions at the most appropriate time and to optimize the overall performance of the educational work (teaching and administrative) at both strategic and operational level. (Stachteas H., 2009).

Essentially, these systems are tools for both the better management of educational work at the school unit level and for the implementation of effective management in education. In order to be beneficial, such a tool must be available directly to those who need it, it must respond to the needs of most users in the educational field to the maximum extent possible and it must be easy to use. The degree and acceptance of the use of information systems in education does not coincide with the degree of use of similar systems in other areas. Nevertheless, in the information society it has become an accepted fact that the importance of organized, regular gathering of information has become commonplace, management and analysis of educational data in order to create usable information for didactic and administrative applications.

As in every era, the organization and use of information is a strategic potential condition for policy-making at all levels and gives a competitive advantage to those who have it at their disposal, at the right time and in a reliable manner.

Especially nowadays, when the diversity of issues has increased so much and the lack of rapid and reliable information makes them unmanageable. In our education system, the tedious storage and formulation of the huge amount of information generated at local (school unit) and regional level (education directorate, education district) and its transfer to the central administration (ministry), can only be the point from which to start formulating strategic educational policy in order to achieve:

- Reasonable allocation of human resources and other
- Supporting unequal variables of the education system
- Upgrading the education services offered
- Existence of an act of evaluation of the educational work
- Improvement of response time and satisfaction of requests
- Serving the educational needs of society

It has been observed in school units, the educational staff responsible for the daily life of the school, that their power of intervention is minimal and they are almost always called upon to implement decisions coming from the central management bodies. As a result, a large proportion of school actors maintain a neutral attitude, where in practice, principals and teachers' associations are unable to deal satisfactorily with the needs of the educational process that constantly arise. Undoubtedly, today there are many teachers with will, faith and vision, and in their daily work they try to achieve more substantial results, but they are not the average of their colleagues.

THE OFFER OF THE INFORMATION SYSTEMS IN SECONDARY EDUCATION

Like all organizations in the wider public and private sector, educational institutions need a management information system or an internal business planning system in order to operate smoothly and efficiently. From handwritten work, where every administrative action and procedure is formulated and handled by traditional methods, inevitably with the use of computers we are heading towards the method of electronic or even digital processing. Where Information and Communication Technologies (ICT) enable the adoption of advanced technologies for the creation, organization and circulation of public information.

"Organization" is considered to be the appropriate constitution of various individual factors and their appropriate combination with the main aim of achieving a predetermined objective in the best possible way. The world of information

requires digital systems called in the literature 'Integrated Management Information Systems' or 'Management Information Systems'.

In today's ever-changing and extremely competitive environment, it is also referred to as "Business Intelligence". In particular, it is a set of technologies, techniques and practices for collecting, processing, analyzing and presenting data to provide instant access to large packages of reliable information for decision-making. Without affecting what type of organization it will be, i.e. whether it serves a school or a company, an efficient and reliable management information system is always a great investment for the organization. Its evaluation at regular intervals in order to judge the efficiency of this investment is necessary. Finally, one issue to be considered is the functionality of the existing information system and the need to rebuild or expand it.

ICTs effectively assist the electronic services that take place with the entry of information systems in school units and concern practical issues such as (Dagdilelis, 2005; Charalampous, 2008; Bakas, 2009; Nakos, 2009) the more efficient secretarial support and computerization of the school by keeping the electronic protocol, in which acts are recorded, e.g. e.g. the issuance, notification and receipt of all kinds of documents, to which the interested party will be able to have direct access with the appropriate online transaction form and receive information on the progress of his/her case. In addition, through the use of information systems, student information forms are issued for enrolment, attendance checks, recording and printing of student grades, absences, planning of administrative programmers and preparation of timetables.

Seamless electronic communication - correspondence and electronic transactions. Such as two-way communication with the student, with parents/guardians (via email), with school staff and with colleagues in other parts of the world. Furthermore, with local and educational institutions, participation in online communities, writing and sending messages, and information about events via the school's website. In addition, electronic information on legislation, on the syllabus and examinations per subject and on urgent incoming documents, direct access to the services of the Ministry of Education via the national school network and navigation on various network sites. Finally, the creation and management of a base for the operation of libraries and access to digital educational material.

CONCLUSION

ICT can be applied to the handling of a significant number of organizational tasks, if it is possible for managers to store information on the personal data of school staff in order to maintain the confidentiality of the information. They also contribute to the distribution of documents during seminars using PowerPoint, to the preparation of lesson plans, to the preparation of reports on various issues of the school's work cycle, to the purchase of products-services for the school online via the Internet, to the provision of the possibility of real-time staff training (through videoconferencing). In general, the use of ICT contributes to the detailed mapping of the school unit, aiming at simplifying the educational administrative activity and diversifying the communication of the educational community with the external environment, affecting all aspects of it.

THE CONTRIBUTION OF INFORMATION SYSTEMS IN EDUCATION: EVALUATING THE EFFECTIVENESS OF MYSCHOOL

Kotzamouratoglou Georgios
Secondary Education Teacher, Educator in Electrical Engineering and Economics
1st Vocational Training Center of Preveza, Secondary Education Directorate of Preveza
Preveza, Greece
email: kotzamou@sch.gr

ABSTRACT

The digital era and the integration of information systems in organizations have led to significant changes in the management of educational structures, with information systems playing a crucial role in educational administration. This paper evaluates the contribution of Myschool information system to Greek education, its effectiveness, advantages and disadvantages, as well as proposals for its improvement, based on a literature review.

Myschool is an integrated system that allows the centralized management of information regarding infrastructure, students, teachers, and school unit processes. Its implementation has significantly improved educational administration by reducing bureaucracy, increasing transparency, and facilitating decision-making. The key benefits of using Myschool include the effective management of student records, the reduction of workload, and instant access to attendance, grading, and monitoring data. Digitalization has accelerated data processing and storage, providing a comprehensive overview of the educational status of each school unit. Additionally, Myschool enhances communication between teachers, parents, and administrative staff, offering continuous updates on student progress.

Despite its advantages, there are issues regarding the need for further simplification, facilitation, and automation of tasks within Myschool platform. Many teachers and administrative staff struggle to use it effectively due to a lack of training. This highlights the need for interface and functionality improvements to make it more user-friendly. The lack of guidance and training results in reduced efficiency and limited use of the system's capabilities. Further automation in data entry and updating processes would help reduce the workload for educators and administrators. The ability to extract data in a specific format from other programs (e.g., Excel, timetable software) would facilitate the faster input of large data volumes (such as laboratory equipment) or the easier entry of school timetables generated by other software. Ideally, Myschool should also include a timetable generation feature. Additionally, functionalities such as recording meeting minutes or automatically identifying teacher shortages and surpluses would assist in better planning for the upcoming academic year.

Furthermore, integration with other government platforms could streamline tasks, reducing the need for multiple data entries and enabling instant data validation. The system appears to be less capable in data analysis compared to international systems. A comparison of Myschool with systems such as SIMS (UK) and PowerSchool (USA), along with the examination of existing studies, revealed that the Greek system lags in data analysis and adaptability to school needs.

To enhance Myschool, proposed improvements include the addition of data analysis tools, integration with other platforms, and the development of a more user-friendly environment. Continuous user training, strengthening security mechanisms, and enabling data retrieval from other applications, are also crucial for optimizing the system's usage. Additionally, differentiated access for teachers, students, and parents could further enhance Myschool's role.

In conclusion, Myschool has played a significant role in modernizing Greek education by providing new tools for managing and analyzing educational data. However, for it to offer even more benefits, continuous system development, user-oriented adaptation, ongoing training, and improved data security and accessibility are essential. The future development of Myschool can significantly contribute to improving the effectiveness and quality of educational administration in Greece and enhancing teaching processes.

Keywords: Information systems, educational administration, Myschool, Digital data management.

INTRODUCTION

Information systems have become a key part of modern education, facilitating the management of schools and the organization of educational work. The continuous development of technology has led to significant changes in the way educational organizations are managed, offering new possibilities for automating, storing, managing and analyzing data. These possibilities not only improve the efficiency of educational processes but also enhance decision-making at the level of educational administration (Runhaar, 2016; Hua & Herstein, 2003). Its implementation also allows policymakers to identify problems in real time and make informed decisions. In addition, it facilitates the monitoring of educational indicators, human resource management and the improvement of resource allocation (Hua & Herstein, 2003).

Digital data management makes it easier to access critical information, reduces the administrative burden and contributes to the better organization of school units (UNESCO, 2003). Furthermore, the use of information systems enhances the transparency, accuracy and reliability of data, as the margins for errors and delays are reduced (Boddy, Boonstra & Kenned, 2010). Particularly in an educational system such as the Greek one, where the need for modernization and more efficient management is imperative, the integration of such systems can contribute decisively to the effectiveness of the educational process.

The Greek Ministry of Education began using information systems since 1994, mainly concerning Secondary Education. Since the beginning of 2014, we have had a universal implementation of Myschool in all school units and structures of the Ministry of Education. Myschool is an information system that allows the centralized management of all data related to school units, students, teachers and administrative staff. Through this system, schools can easily manage student registration, attendance monitoring, performance recording, as well as various administrative procedures, such as managing teaching staff, issuing documents and reports, and communicating with educational authorities (Stachteas, 2009). It should be noted that in Greece, MySchool was introduced mainly for the management of schools and student data and is not a comprehensive information system with human resources management capabilities, although some of its functions could be used for this purpose (Dragou, 2020).

The present paper aims to evaluate the effectiveness of the Myschool information system through the analysis of research works that have studied the impact of the system on the operation of school units, the benefits it offers, the challenges it still faces, as well as suggestions for its improvement according to the opinions of its users.

LITERATURE REVIEW

A review of the relevant literature and empirical research carried out in the last eight years in Greece was carried out, mainly selecting theses based on qualitative or quantitative research. The review of the relevant literature highlights the importance of information systems in educational administration, as well as the challenges arising from their integration into the daily operation of school units. The research papers examined provide valuable data for the implementation of Myschool in Greek education, highlighting both the advantages and the difficulties associated with its use. More specifically, we observe:

General Benefits of Using Myschool

The use of information systems in education administration has become an integral part of the effective functioning of school units (Koutouzis, 2008). According to relevant studies, Myschool has significantly contributed to the improvement of student record management, allowing for the quick, accurate, and secure updating of attendance, performance, and absence records. The digitization of these processes not only facilitates the collection and storage of data but also provides access to students' historical records, enabling educators and administrators to monitor their progress over the long term. It has also been observed that principals of secondary schools consider the use of Myschool to be more efficient compared to those in primary education (Dragou, 2020). A key prerequisite is that those responsible for the system’s operation input the necessary information promptly and accurately to ensure the system’s effectiveness (Zacharopoulos, 2019).

Another important advantage of using Myschool is the reduction of bureaucracy. The automation of various administrative tasks—such as issuing attendance certificates, recording absences, generating performance reports, and issuing diplomas—saves valuable time for teachers and administrative staff (Zacharopoulos, 2019; Dragou, 2020). This allows them to focus more on improving the quality of teaching and the educational process, rather than spending time on time-consuming handwritten entries and document management (Bisaso, Kereteletswe, Selwood & Visscher, 2008).

Moreover, Myschool serves as a tool to support educational policy, as it enables centralized data management at the national level. Through the system, the Ministry of Education can monitor student distribution, class sizes, teaching staff needs, and general trends in the education system. This allows for more informed decision-making regarding resource allocation, the design of new policies, and the improvement of the quality of education provided.

Improvement of Communication and Administration

Research shows that Myschool significantly facilitates communication between school principals, teachers, parents, and central administration. Through the system, principals can access real-time data about the school's status, student attendance, performance, and teachers' needs.

Through the eParents platform, which draws data from Myschool, parents can receive more immediate and reliable updates regarding their children's absences (the application is currently in pilot phase). As of now, Myschool allows class teachers or school administration to notify guardians via email. This contributes to improving cooperation between school and family, as parents can identify attendance or performance issues early on and take the necessary actions in collaboration with teachers. Literature reviews show that educators and educational staff are divided on the issue of whether parents should have direct access to updates through Myschool (Liapis, 2021).

Support of the Educational Process

The digitization of educational data through Myschool has brought significant benefits to the organization of teaching. Teachers can access information related to student attendance and performance, allowing them to plan more personalized teaching interventions. For example, they can identify students facing learning difficulties or frequent absences and collaborate with parents and appropriate support services to prevent school failure or dropout. Currently, this is only possible with the assistance of the school principal, as only they have access to all student data. Providing tiered access to more information within Myschool for teachers could be additionally helpful. It is therefore evident that the management of Myschool is primarily linked to administration and education officials.

At the same time, Myschool enables the extraction of statistical data and reports on student performance, which facilitates data-driven decision-making by both educators and administrators. The analysis of this data can be used to improve curricula, identify educational inequalities, and create targeted policies to support students in disadvantaged positions (Carter, 2005).

Enhancing Data Security and Information Management

The existence of a centralized, integrated information system such as Myschool enhances data security and protection. Unlike older methods of storing physical files, which carried the risk of data loss or tampering, Myschool ensures that information is secure, manageable, and accessible only to authorized users.

Myschool compliance with the General Data Protection Regulation (GDPR) guarantees the safe storage and management of personal data belonging to students, teachers, and parents. In addition, the use of encryption and security protocols reduces the risk of unauthorized access or data breaches.

However, despite its enhanced security capabilities, research shows that the human factor remains critical. Inadequate user training can lead to errors in data entry and management (Papadimitriou, 2024), while the lack of regular

security updates can make the system vulnerable to cyberattacks. Therefore, continuous user training and the implementation of additional security measures—such as multi-factor authentication and regular password updates—are recommended (Varelogiannis & Varsos, 2022).

Challenges and Limitations of Myschool

Despite the system's significant advantages, literature highlights certain obstacles and challenges affecting its effective use. One of the main challenges is the need for user training. Studies have shown that teachers and administrative staff often struggle to fully utilize Myschool capabilities, especially in the absence of adequate technical support or appropriate training (Katsoulas, 2020).

Research also shows that the acceptance of Myschool varies among users. Younger teachers, who are more familiar with digital technologies, tend to be more positive towards using the system, whereas older teachers face greater difficulties adapting to it. This highlights the need for ongoing training and user support to ensure the system is fully utilized at all levels of the educational community. School principals generally believe that the application is well-adapted to user needs, that it adequately meets school IT management requirements, and that the central support service of Myschool responds efficiently to problems and user queries, inspiring general trust (Dragou, 2020).

Furthermore, some studies identify shortcomings in Myschool adaptability to the needs of different schools. Although the system provides core management functions, it lacks features for customization and adaptation to the unique requirements of each school (Liapis, 2021). Nonetheless, the information system is generally considered to be fairly to highly user-friendly, although there is a lack of willingness among teachers to operate it (Zacharopoulos, 2019).

Compared to other international educational management systems—such as SIMS (School Information Management System) in the United Kingdom and PowerSchool in the United States—Myschool appears to have more limited data analysis capabilities and a lower level of customization. However, it is worth noting that in schools across Greece, the Myschool system is provided and supported free of charge, unlike the systems, which are private and come at a high cost.

Issues of Data Security and Privacy

A particularly critical issue highlighted in the literature is data security and privacy protection. With the growing use of information systems in education, the management of personal data of students, educators, and parents becomes of paramount importance. The literature warns about the risks of cyberattacks, as educational information systems are potential targets for malicious attacks due to the large volume of sensitive data they contain (Rainer & Ceyielski, 2012).

In this context, researchers recommend strengthening security mechanisms through ongoing system upgrades, implementation of stricter access protocols, and user training in best practices for cybersecurity (Papadimitriou, 2024). In the Greek educational landscape, the implementation of the General Data Protection Regulation (GDPR) has imposed stricter standards for managing educational data.

Research also shows that the Myschool application performs well in terms of user trust. In particular, the majority of school principals, who are the system's primary users, agree that the identification process requires only the necessary data, the login process is secure, and personal data is used solely for its intended purpose. However, they also seem uncertain about whether the personal data entered the system is stored securely (Dragou, 2020).

PERSPECTIVES AND FUTURE IMPROVEMENTS

We were unable to locate any literature comparing the Greek school information management system Myschool with international systems, such as SIMS in the United Kingdom and PowerSchool in the United States. However, there are studies and articles that examine the features and functions of these systems individually, allowing for indirect comparisons. Myschool, as a state-controlled system, focuses on compliance with national educational policies and

procedures. In contrast, SIMS and PowerSchool, as commercial products, offer broader customization capabilities, integration with other systems, and advanced data analysis functions. Enhancing Myschool with analytical dashboards (tools used to analyze and visualize data) and predictive analytics systems, which enable automatic predictions, anomaly detection, and reporting automation, could provide even greater value to users (Picciano, 2012).

Myschool could be connected to other educational information systems, such as e-learning platforms, digital libraries and equipment management software, to offer a more integrated experience to users. School principals believe that it would be very useful for Myschool to be upgraded to include functions for planning such as teacher job vacancies, declaration of needs for the next school year, as well as the ability to create a digital textbook, record practices, etc. (Dragou, 2020).

Some research records that the system interface is not always user-friendly, especially for teachers who are not very familiar with technology (Katsoulas, 2020). The adoption of more modern UI/UX design practices could make the system more accessible and user-friendly (Garrett, 2010). Modern UI/UX design is based on principles that aim to improve the functionality, aesthetics and usability of digital products. They include user research, which allows for design based on real needs, and micro-interactions enhance usability, while data-driven design optimizes interfaces through analytics. It also contributes to strengthening the user's connection with the product, adding elements that provoke positive reactions. Through these practices, modern UI/UX approaches shape more efficient and engaging user experiences, since the goal of UX design is to create easily manageable, effective and enjoyable experiences for the user. Picciano (2021) emphasizes that in the future there should be an evolution towards CLOUD-BASED SYSTEMS and artificial intelligence (AI) for automated data analysis, as well as strategic use of data for personalized learning and policy management.

Also, the continuous provision of technical assistance and training to users is crucial for maximizing the effectiveness of the system (Selwyn, 2011). The creation of interactive user guides, online courses and the improvement of the helpdesk could facilitate the adaptation of educators to new technological requirements.

CONCLUSION

The analysis of the literature and research data highlights the significant contribution of information systems to educational administration, with Myschool being one of the most characteristic examples of this technological development in Greek education. This system has improved the organization and operation of school units, reducing bureaucracy, facilitating communication between the bodies involved and providing timely and valid information regarding student data, as well as school administrative tasks.

The use of Myschool has also brought multiple benefits both at the level of school units and at the level of central administration. Initially, it contributes to the reduction of bureaucracy, as many procedures are now carried out electronically, saving time and human resources. At the same time, the central management of data ensures the accuracy and transparency of information, facilitating decision-making by the responsible bodies. It enhances communication between teachers, parents and administration, promoting transparency and cooperation. It helps to better support students, enabling teachers to monitor their progress and identify learning difficulties or cases of school dropout in a timely manner.

In addition, the system provides the ability to export statistical data, which allows education administrators to have a clear picture of the operation of school units and to proceed with documented interventions where necessary, thus helping to manage resources more efficiently and optimize educational policies through data analysis at the national level (Picciano, 2012).

However, despite its multiple benefits, the implementation of Myschool has also brought to the surface some challenges. One of these is the need for user training, as many teachers and administrators faced difficulties in transitioning from traditional management methods to digital tools (Selwyn, 2011). The lack of technical support and training often leads to reduced effectiveness and limited use of the system's capabilities. Further automation is considered important and will help to further reduce the workload of educational and administrative staff. Interconnection with other

state platforms can also significantly facilitate users' tasks, eliminating the need for multiple data entries and direct data cross-referencing. The system appears to lag in data analysis compared to international systems. From the comparison of the capabilities of Myschool with international educational information systems, such as SIMS (United Kingdom) and PowerSchool (USA), as well as from the review of relevant studies that have been carried out, it was found that the Greek system lags in terms of data analysis capabilities and adaptation to the needs of various school units.

In summary, we would say that Myschool is an important innovation for Greek education that enhances transparency, efficiency and quality of educational administration. With appropriate support and adaptation to technological developments, Myschool can continue to play a central role in the modernization and digital upgrading of Greek education, contributing to a more efficient, organized and quality educational system.

Preveza, Greece
email: iliasde66@gmail.com

ABSTRACT

This research focuses on the use of the MySchool platform by teachers and analyses their views on its functionality, its impact on school administration and the problems they face when using it. The aim is to investigate teachers' use of the platform, evaluate its functionality, and identify the problems and needs that arise during its use. It aims to understand how teachers perceive the contribution of the platform to the educational and administrative process of the school, to highlight differences in views between new and experienced teachers, as well as principals, and to suggest strategies for enhancing functionality and resolving the technical issues they face.

The research, which was carried out at a national level, is part of my thesis in the framework of the postgraduate program "Business and Organization Management" of the Department of Accounting and Finance of the University of Ioannina. The research is based on a sample of 143 teachers, of which 75 are women and 68 are men. The majority of the participants are aged 36-50 years old, hold a postgraduate degree, work in secondary schools and have not been trained in the Myschool information system and have no experience of using other information systems.

The results show that teachers' views on the MySchool platform are generally positive, with most of them finding it easy to use and the experience positive. However, variations in the evaluation of the platform are identified, mainly focusing on technical problems, such as difficulty in compatibility with other systems. Despite these difficulties, teachers acknowledge that MySchool contributes significantly to school data management and administrative tasks, although the survey shows that it has not significantly reduced their administrative burden.

Teachers express the need for new features on the platform, such as the possibility to request certificates online and receive real-time notifications, which would greatly facilitate their daily work.

The research concludes that there is a need for technical improvements to the platform and its integration with other digital applications and systems in order to enhance its overall functionality and better serve the needs of teachers and the school community. Suggestions for improving MySchool include developing new tools and optimising existing ones to enhance the efficiency and usability of the platform in the educational process.

Keywords: myschool, research, functionality, user perceptions.

THE MYSCHOOL PLATFORM

MySchool (https://myschool.sch.gr/) is an online platform developed by the Greek Ministry of Education, designed to unify and streamline the management of educational data in all public schools in Greece. The system represents an important step towards the modernization of public administration in education, with the aim of providing a centralized and efficient method of managing and accessing information related to schools, staff and students. The main function of MySchool is to serve as a comprehensive database containing detailed records for each school unit, including information on staff and students of the school. One of the primary goals of MySchool is to address the basic needs of information storage, data management, and communication within the education system. In conclusion, MySchool represents a significant advance in the management of educational data in Greece. By integrating various information systems into a unified platform, it addresses many of the challenges previously faced in the management of educational institutions (Aldarbesti & Saxena, 2014). The system's ability to store, manage and analyze vast amounts of data securely and efficiently makes it an invaluable tool for the Ministry of Education and school administrators. The MySchool platform has established itself as the official digital tool widely used in all public schools, enabling teachers and administrators to efficiently manage a variety of administrative processes (Stahteas, 2009; Kyriopoulos, 2025).

PURPOSE OF THE WORK

The purpose of this paper and the accompanying survey is to investigate teachers' perceptions on how they perceive the functionality and the overall contribution of the MySchool platform to the school's operation, with emphasis on its functionality, its contribution to the smooth management of school work, the functions they consider necessary and the problems they encounter when using it. Through the analysis of these parameters, the paper seeks to reveal the main points that affect the users' experience, highlighting the needs of teachers and the challenges they face in their daily work. Furthermore, the findings of this study are expected to provide guiding ideas for improving the platform to more effectively meet the requirements of teachers and enhance the overall efficiency of Greek school institutions, supporting education with more reliable and functional tools.

RESEARCH METHODOLOGY

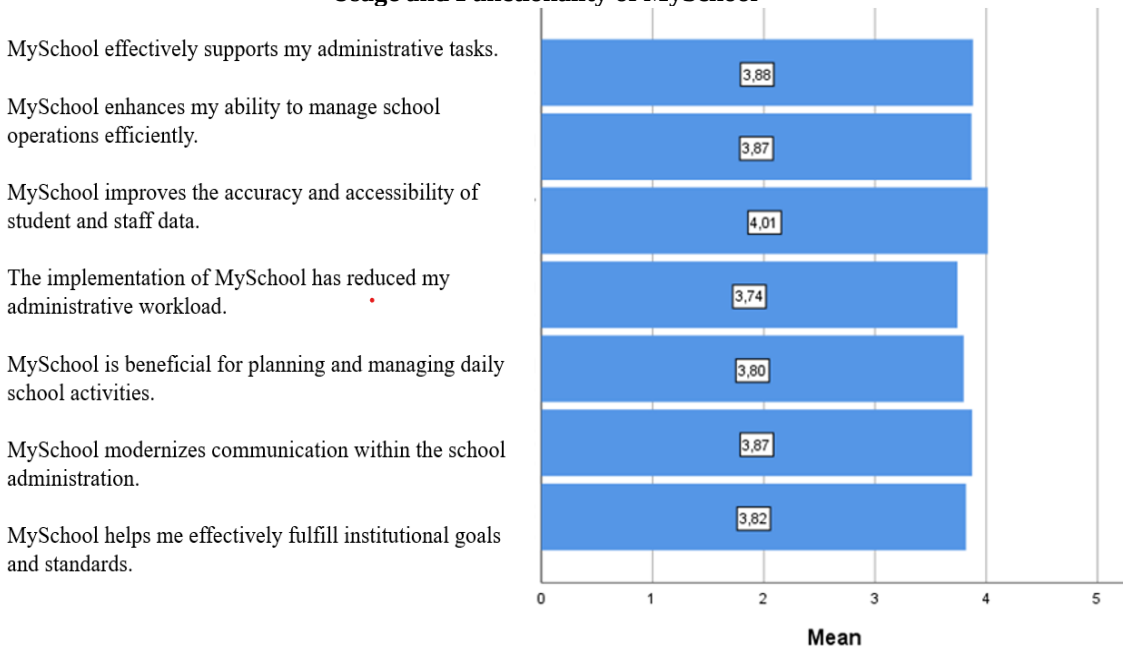
This section describes the methodology used to investigate teachers' perceptions of the MySchool platform in terms of its functionality, its contribution to school operations, its desired features and the problems they face (El-Ebiary et al., 2016). The research follows a quantitative design, using a structured questionnaire based on the frameworks established by Pitsiavas and Vlahopoulos (2015) and Kalogeratos, Anastasopoulou and Pierrakeas (2024).

The questionnaire aimed to measure the following key areas: (1) the use and functionality of MySchool, (2) its contribution to school operations, (3) the desired features of MySchool, and (4) the problems encountered in using MySchool. Seven statement questions were included in each of these sections, which were answered on a Likert scale from 1 (strongly disagree) to 5 (strongly agree), providing a comprehensive evaluation of the impact of the platform.

The sample consisted of teachers from different educational levels and roles within schools, including principals, vice-principals and ordinary teachers. Participants were selected through a convenience sampling method, ensuring a broad representation of views.

Data were collected through an online survey distributed to participants. The collection period lasted for one month, during which time responses were collected and stored securely. The online format facilitated a broader approach, allowing a diverse group of teachers to participate. A total of 143 respondents replied and a further 7 out of a total of 150 did not provide complete responses and so were not ultimately counted in the sample. It should be noted that the questionnaire took no more than 15 minutes to complete.

THE RESULTS OF THE INVESTIGATION



When examining the views of the sample teachers on the use and functionality of the MySchool platform, the responses were analysed to determine the mean score and standard deviation for each statement, revealing information about teachers' overall satisfaction and perceived ease of use of the platform. The responses are presented in chart (chart 1).

The statement that received the highest mean score was "Using MySchool for daily administrative tasks is easy", with a mean of 4.15 and a standard deviation of 0.664. This indicates that the majority of participants find the platform simple and accessible for managing routine administrative responsibilities, with relatively little variability in their

responses. The high mean and low standard deviation suggest a strong consensus among teachers that MySchool is user-friendly for these tasks.

Next, the statement "MySchool's overall user experience is positive" also scored highly, with a mean of 4.09 and a standard deviation of 0.660. This reflects an overall satisfaction with the platform, with most participants agreeing or strongly agreeing that their experience with MySchool was positive. The small standard deviation again indicates that there is little disagreement between respondents on this point, further reinforcing the perception that MySchool offers a favourable user experience.

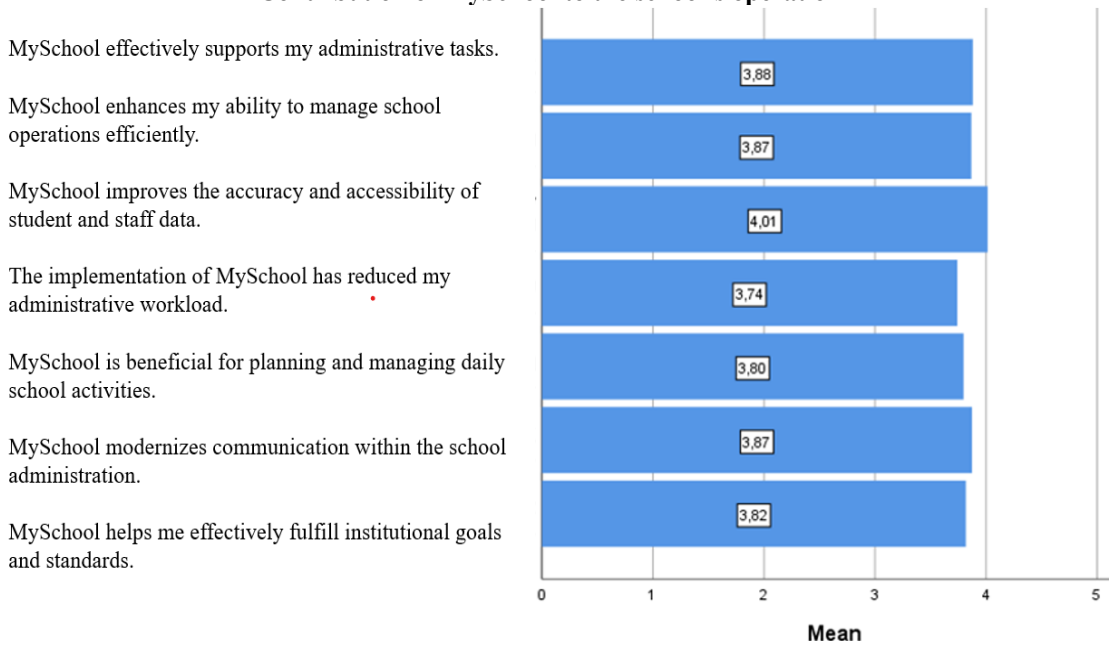
Chart 1
Usage and Functionality of MySchool

This is followed by the statement "The MySchool platform is easy to use and simple to navigate", which had a mean score of 4.09 and a slightly higher standard deviation of 0.777. Although the mean score remains high, the increased standard deviation suggests that while most participants find the platform easy to navigate, there is some variability in how strongly they feel about this aspect. However, it is clear that a significant majority view the MySchool interface as intuitive.

Regarding the ability of the platform to meet users' expectations, the statement "MySchool meets my expectations in terms of ease of use" received a mean score of 3.99 and a standard deviation of 0.769. This result suggests that while most teachers believe that MySchool generally meets their expectations in terms of usability, there is a slightly wider range of opinion on this topic compared to the top ranked statements. Some users may have experienced minor difficulties or feel that the platform could be improved in certain areas.

The statement "I am satisfied with the speed of performance and reliability of MySchool" received a mean of 3.90 and a standard deviation of 0.785, indicating that teachers generally perceive that the platform performs well, although there is slightly more variability in their satisfaction with its speed and reliability. While the majority are satisfied with MySchool's performance, a notable minority may have experienced occasional delays or reliability issues.

Regarding the integration of MySchool with other digital tools used in the school environment, the statement "MySchool integrates well with other digital tools used in my school" received a mean score of 3.80, with a standard deviation of 0.824. This reflects a moderate level of agreement, with a larger difference in responses. While many teachers acknowledge that MySchool works well with other tools, some participants may have experienced difficulties in this regard, suggesting room for improvement in the platform's compatibility with other systems.



Finally, the statement "I do not often encounter errors or problems when using MySchool" had a mean score of 3.95 and a standard deviation of 0.834. Although the mean indicates a generally positive outlook on the reliability of the platform, the relatively higher standard deviation suggests a notable degree of variability in user experiences. Some

teachers may have experienced occasional technical issues, leading to a less consistent perception of MySchool's error-free performance.

Overall, teachers in this sample generally perceive MySchool as a user-friendly and reliable platform that meets their expectations for day-to-day administrative tasks. However, there is some variability in their experiences, particularly in terms of integration with other tools and the frequency of technical issues. Overall, the responses reflect a high level of satisfaction with the functionality of the platform, albeit with some areas for potential improvement.

Afterwards, teachers gave their views on the contribution of MySchool to the functioning of their schools. The responses are presented in chart (chart 2). The statement that received the highest mean score was "MySchool improves the accuracy and accessibility of student and staff data," with a mean of 4.01 and a standard deviation of 0.661. This suggests that the majority of teachers agree that MySchool significantly contributes to improving the accuracy and ease of access to important school data. The relatively low standard deviation suggests a strong consensus among the participants, indicating that most of them perceive the platform as highly effective in this area.

Chart 2
Contribution of MySchool to the school's operation

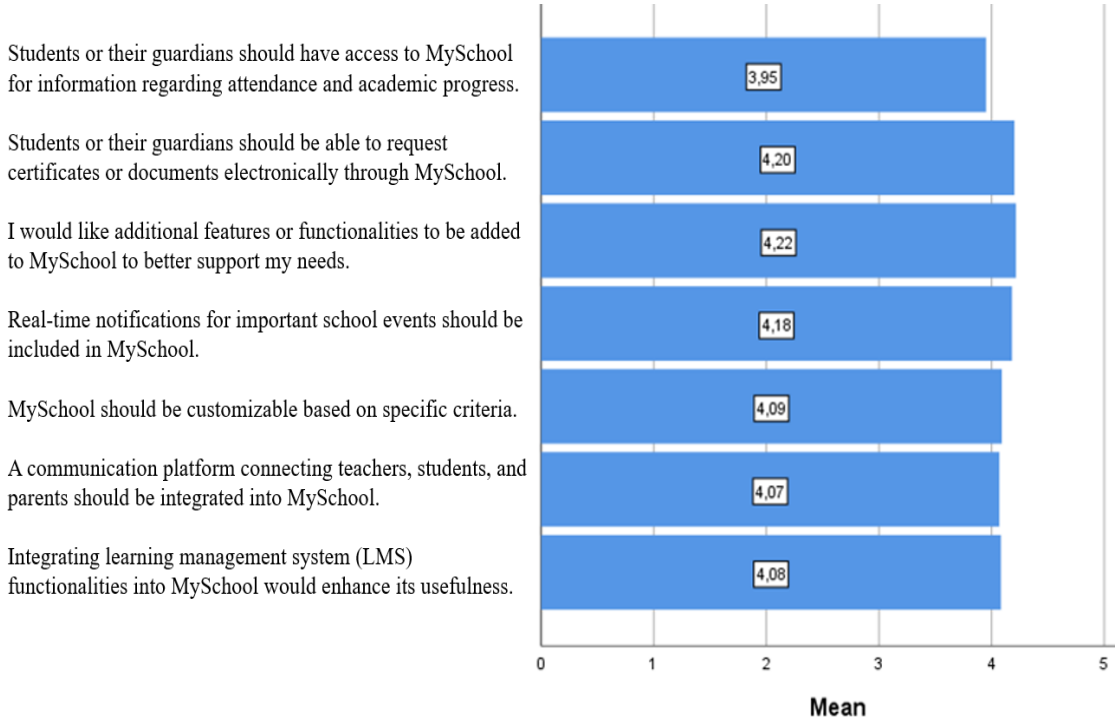
This is followed by two statements - "MySchool effectively supports my administrative tasks" and "MySchool enhances my ability to effectively manage school operations" - which scored similarly high levels of agreement. The former had a mean of 3.88 with a standard deviation of 0.707, while the latter had a mean of 3.87 and a standard deviation of 0.704. These results suggest that teachers generally find MySchool a valuable tool for streamlining administrative tasks and managing the wider operational functions of the school The narrow range of responses, as indicated by the low standard deviations, suggests that these views are widely shared among the sample.

The statement "MySchool streamlines communication within the school administration" also received a favourable rating, with a mean of 3.87 and a slightly higher standard deviation of 0.768. Although the mean score is comparable to other positive ratings, the somewhat higher standard deviation suggests that there is a bit more variability in how strongly respondents feel about this particular benefit. While many teachers appreciate the role of MySchool in facilitating communication, a minority may perceive less impact in this regard.

Regarding the role of the platform in helping teachers to meet institutional goals and standards, the statement "MySchool helps me to effectively meet institutional goals and standards" was rated with a mean of 3.82 with a standard deviation of 0.738. This reflects a generally positive attitude towards the platform's ability to support teachers in meeting formal objectives, although the slightly wider spread of responses suggests some variation in teachers' experiences.

The statement "MySchool is beneficial in planning and managing daily school activities" received a mean of 3.80 and a standard deviation of 0.827. While many participants agree that the platform plays a useful role in organising

the day-to-day operations of the school, the larger standard deviation indicates a wider range of opinions. Some teachers may find the platform more useful in this area than others, suggesting that the effectiveness of MySchool in day-to-day planning may depend on specific contexts or individual preferences.



The statement with the lowest mean score was "MySchool app has reduced my administrative workload", which had a mean of 3.74 and a standard deviation of 0.811. While still generally positive, this lower score and higher standard deviation suggest that while many teachers believe that MySchool has helped alleviate some administrative burdens, there is a more pronounced variation in experiences. Some may believe that the platform has not significantly reduced their workload, or perhaps that the transition to digital systems has introduced new challenges that offset these potential gains.

Overall, teachers in the sample generally consider MySchool as a tool that improves the accuracy of data management and supports their administrative tasks. However, opinions are slightly more diverse in terms of its impact on communication, reducing workload and managing day-to-day school activities. Responses reveal a generally favourable impression of the platform's contribution to school operations, with some areas where perceptions of effectiveness are more varied.

In the next section of the questionnaire, teachers gave their views on the desirable features they would like to see incorporated into the MySchool platform. The responses are presented in chart (chart 3) .

The statement that received the highest average score was "I would like additional features or functionality added to MySchool to better support my needs", with a mean of 4.22 and a standard deviation of 0.761. This indicates a strong desire among educators for improvements to the platform, with most participants agreeing that additional features could improve their experience. The relatively low standard deviation suggests that this view is common, with little variation in responses.

Chart 3
Desirable characteristics

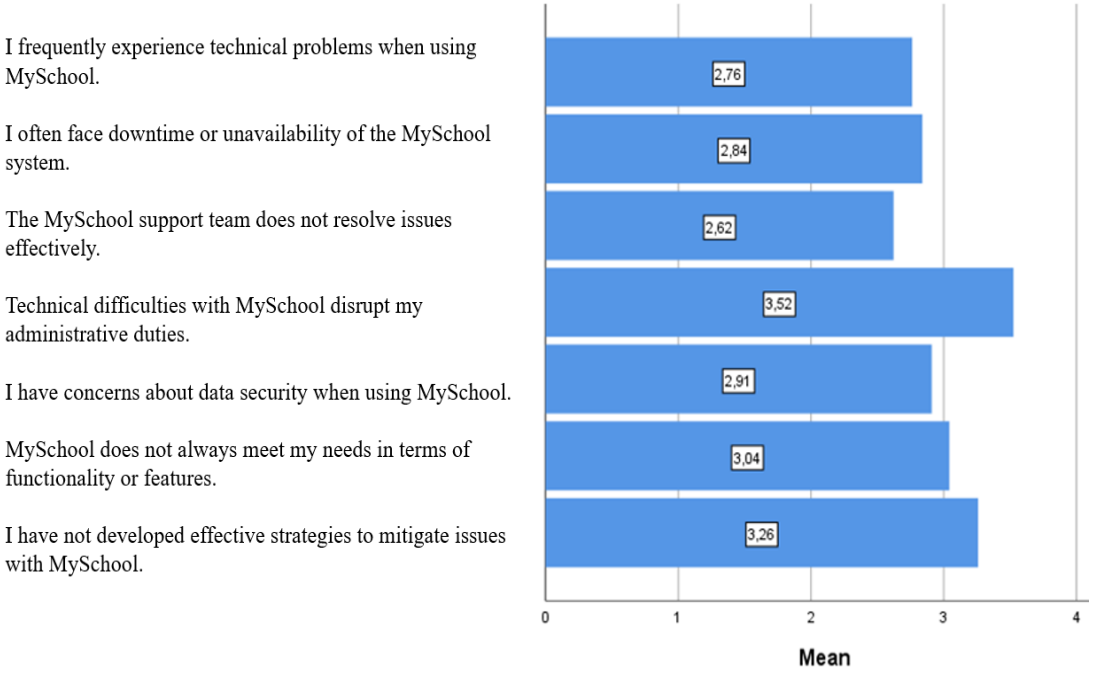
The second highest mean was for the statement, "Students or their guardians should be able to request certificates or documents electronically through MySchool," which had a mean of 4.20 and a standard deviation of 0.877. This high mean score suggests that teachers strongly support the idea of adding this capability, reflecting a clear demand for more efficient paperless administrative processes. The somewhat higher standard deviation suggests that while the majority of participants agree, there is slightly more variability in how strongly they feel about this issue.

Next, the statement "Real-time notifications of important school events should be included in MySchool" received a mean score of 4.18 and a standard deviation of 0.819. This result highlights the significant interest in improving

communication through real-time updates, with most teachers agreeing on the usefulness of this feature. The standard deviation indicator leads to an estimate of a moderate level of consensus, although some participants may place slightly less importance on real-time notifications.

Another well-supported statement was "MySchool should be adaptable to specific criteria", which scored a mean score of 4.09 and a standard deviation of 0.777. This suggests that teachers are interested in having the ability to customize the platform to their specific needs or the unique requirements of their schools. The low standard deviation indicates that this preference is consistent across the sample, with broad agreement on the importance of customization.

Similarly, the statement " A communication platform connecting teachers, students and parents should be integrated into MySchool" had a mean of 4.07 and a higher standard deviation of 0.909. While many teachers agree that improved communication features would be beneficial, the higher standard deviation suggests that there is more variation in how strongly participants feel about this integration. Some may prioritise this less than others or may believe that current methods of communication are sufficient.



The statement "Integrating learning management system (LMS) functionality into MySchool would enhance its usefulness" received a mean score of 4.08 and a standard deviation of 0.800. This reflects strong support for the idea of integrating LMS functionality into MySchool, which would enhance its usefulness in managing and delivering educational content. The moderate standard deviation suggests that most participants agree, although there is some variation for this feature.

Finally, one communication platform's statement "Students or their guardians should have access to MySchool for information about attendance and academic progress" had a mean of 3.95 and the highest standard deviation of 1.115. While this still suggests general support for the idea, the higher standard deviation suggests a wider range of views. Some teachers may be concerned about the implications of providing this level of access to students and their families, leading to a wider spread of responses.

Overall, teachers in the sample expressed a strong interest in expanding the functionality of MySchool to include additional features such as electronic document requests, real-time notifications, and customization options. While there is broad support for these potential enhancements, opinions differ on student and caregiver access and integration of communication platforms, reflecting different priorities and perspectives on the ideal direction for platform development.

In the last section of the questionnaire, the teachers expressed their views on the problems they encounter when using and operating the MySchool platform, rating their experiences. The results are presented in chart(chart 4).

Chart 4
Problems encountered during the use and operation of MySchool

The statement that received the highest mean score was "Technical difficulties with MySchool disrupt my administrative tasks", with a mean of 3.52 and a standard deviation of 0.749. This suggests that many teachers believe that the technical issues they experience with the platform have a tangible impact on their ability to perform administrative tasks effectively. The moderate standard deviation suggests that while this is a common experience, there is some variability as not all teachers may be equally affected by these disruptions.

Next, the statement "I have not developed effective strategies to mitigate problems with MySchool" was rated with a mean of 3.26 and a standard deviation of 0.709. This result reflects a sense of frustration in many users, who may feel inadequate to handle technical issues that arise when using the platform. The relatively low standard deviation suggests that this feeling is consistent across the sample, with most teachers experiencing similar challenges in finding solutions to the problems they encounter.

The statement "MySchool does not always meet my needs in terms of functionality or features" received a mean score of 3.04 and a standard deviation of 0.711. This indicates a moderate level of dissatisfaction with the platform's ability to fully support teachers' professional needs. While some respondents may find MySchool adequate for their tasks, others believe it lacks certain capabilities. The consistency of responses, as suggested by the standard deviation, indicates a shared experience of the platform's limitations.

Concerns about data security when using MySchool were highlighted in the statement "I have concerns about data security when using MySchool", which had a mean score of 2.91 and a standard deviation of 0.768. Although this mean score is lower than the previous statements, it still indicates that some teachers have concerns about the security of sensitive information being passed through the platform. The moderate standard deviation indicates that these concerns are not common, but are quite significant for a notable portion of respondents.

Regarding system outages, the statement "I often experience outages or unavailability of the MySchool system" received a mean score of 2.84 with a standard deviation of 0.861. This suggests that while system outages are not a consistent problem, they occur frequently enough to be a source of frustration for some teachers. The relatively high standard deviation indicates a wider range of experiences, with some users experiencing this problem more frequently than others.

Similarly, the statement "I often encounter technical problems when using MySchool" was given a mean score of 2.76 with a standard deviation of 0.855. This reflects that while technical problems exist, they are not addressed in all areas. The range of responses suggests that the severity or frequency of these issues varies, with some teachers experiencing more difficulties than others.

The lowest mean score was for the statement "MySchool support team does not solve problems effectively", which had a mean of 2.62 and a standard deviation of 0.739. This indicates that, on average, teachers do not strongly believe that the support team is ineffective. However, there is some dissatisfaction, as evidenced by the moderate standard deviation, which suggests that while many respondents feel that the support group is quite effective, others have had less positive experiences with problem solving.

Overall, while technical problems with MySchool do not dominate the teachers' experience, they do create disruptions in administrative tasks, as reflected in the highest scoring concerns. In addition, there is a general sense that the platform could better meet user needs in terms of functionality, and some teachers have concerns about data security and system reliability. Overall, while the support team is not widely criticised, there is room for improvement in the technical reliability of the platform and user support.

CONCLUSION

Presenting the conclusions that emerged from the survey, analyzing teachers' views on the functionality and contribution of the MySchool platform to school operations, as well as their views on desirable features and problems they face, we observe that overall, the sample teachers viewed MySchool positively, especially in terms of its ease of use for daily administrative tasks. Most respondents agreed that the platform was user-friendly, with minimal technical difficulties. Teachers appreciated the way MySchool simplified routine tasks such as data entry and access to student and staff records, which improved the accuracy and accessibility of information. These perceptions were reflected in the consistently high mean scores among statements related to ease of use, reliability, and user experience of the platform. While most teachers found the platform functional, there were some differences in their experiences. A significant portion of respondents agreed that MySchool met their expectations for ease of use, but a smaller group expressed concerns about

its integration with other digital tools used in the school environment. Some teachers noted occasional technical issues that interrupted their work, although these problems were not widespread enough to significantly impact overall satisfaction. The speed performance and reliability of MySchool were generally viewed positively, but with some variability, suggesting that a minority of teachers experienced delays or technical issues that hindered their experience.

Regarding the contribution of MySchool to the school's operation, teachers generally agreed that the platform played an important role in supporting their administrative tasks. MySchool was perceived to enhance the efficiency of managing school operations, improve communication within the school administration and support teachers in meeting institutional goals. However, there was a notable degree of variability in opinions about specific aspects of the platform's functionality. For example, some teachers felt that while MySchool helped with planning and day-to-day management of the school, it had not significantly reduced their administrative workload. This suggests that the transition to digital systems may have introduced new challenges for some teachers, despite the overall benefits of the platform. Teachers also expressed a strong interest in expanding the functionality of MySchool. The greatest demand was for additional functionality that would better support their needs, such as the ability for students and guardians to request documents electronically and real-time notifications of important school events. There was also significant support for making the platform customizable to specific criteria and for incorporating communication tools to connect teachers, students and parents. However, views differed more on the level of access that should be provided to pupils and carers, particularly in relation to attendance and academic progress. This reflects different priorities among teachers about the direction of future improvements to MySchool.

In terms of problems encountered, the most common issues were technical difficulties that interrupted administrative tasks. Some teachers felt that they did not have effective strategies to mitigate these problems, while others were concerned about the security of the platform in handling sensitive data. System failures and technical errors were reported as recurring problems by a smaller group of respondents, although these issues were not prevalent across the sample. Despite these concerns, the majority of teachers did not strongly criticize the support team for resolving technical issues, indicating that while problems exist, they are not considered insurmountable.

ABSTRACT

The paper focuses on the study and analysis of Management Information Systems in the field of education, with particular emphasis on the MySchool system in Greece. Its aim is to examine the role of these systems in the effective management and storage of school data and their contribution to the digital transformation of the educational system. The paper highlights the importance of Management Information Systems, such as Student Information System, Learning Management System, Decision Support System, etc., in enhancing administrative and academic processes, supporting strategic decision making and achieving greater transparency and efficiency in educational institutions.

The methodology used includes a review of the literature on Management Information Systems in education, the analysis of the Greek MySchool system, as well as the reference to international studies and examples from other countries. There, the challenges associated with the implementation of these systems, such as resistance to change, lack of qualified staff and technological limitations are evaluated.

The findings of the study show that Management Information Systems, such as MySchool, contribute significantly to the better management of student and school data, as well as to the facilitation of administrative processes. At the same time, the integration of scattered systems into a single platform enhances transparency and efficiency, allowing for continuous monitoring of learning performance, teacher evaluation and improved strategic decision-making. During the COVID-19 pandemic, MySchool helped support electronic communication, demonstrating the necessity of digital technology in education.

Overall, the paper highlights the importance of Management Information Systems in the educational process, recognizing their advantages in the development of educational systems and strategic decision making, while highlighting the challenges associated with their implementation. The success of these systems depends on their appropriate support, training and adaptation to the current needs of education.

Keywords: Digital transformation, Management Information Systems, MySchool, education.

MANAGEMENT INFORMATION SYSTEMS IN EDUCATION

Management Information Systems (MIS) in education refers to the organized approach through which educational institutions manage the vast array of data and information necessary for effective operations. MIS include a broad set of tools and processes designed to collect, store, process and disseminate information within an organization, specifically tailored to support decision making, coordination, control, analysis and visualization within educational contexts. The role of MIS in education is multifaceted, covering both administrative and academic needs by providing a structured means of managing the flow of information and ensuring that critical data is accessible to those who need it for informed decision making.

At the core of an educational MIS are several key elements, each of which plays a critical role in the overall functionality of the system. The first element is data collection, which involves gathering information from various sources within the institution, such as student enrollment records, attendance logs, academic performance data, and financial information (Laudon & Laudon, 2018). This data is often collected through various data entry mechanisms, including manual entry, automated data collection, and integration with other digital systems. The second element is data storage, where the collected information is securely housed in databases, ensuring that it is maintained in a structured format that allows for easy retrieval and management (Stair & Reynolds, 2020).

After data collection and storage, the next critical element is data analysis, where the stored data is processed to create meaningful insights. This process often involves the use of analytical tools and software that can identify trends, patterns, and anomalies in the data, providing educational administrators with the information they need to make informed decisions (O'Brien & Marakas, 2011). The final element is reporting, which refers to the creation of various reports and tool tables that summarize the analyzed data in a user-friendly format. These reports are essential for communicating key findings to stakeholders such as school administrators, teachers, students, and even parents (McLeod & Schell, 2009). The ability of an MIS to generate timely and accurate reports is one of its most important strengths, as it ensures that decision makers are always equipped with the latest information.

The applications of MIS in education are broad, covering both administrative and academic processes. One of the most common applications is the Student Information System (SIS), which manages data about students, including personal information, enrollment status, grades, attendance records, and disciplinary actions (Rainer et al., 2017). SIS is a vital tool for school administrators as it provides a centralized platform where all student-related information can be managed efficiently. Another important application is the Learning Management System (LMS), which supports the delivery and management of educational content (Watson & Watson, 2007). An LMS allows teachers to create and distribute course materials, track student progress, manage assessments, and facilitate communication between students and teachers, all within a digital environment.

Decision Support Systems (DSS) represent another critical application of MIS in education, particularly in enhancing the strategic decision-making processes of educational leaders. A DSS typically integrates data from various sources within the institution and applies analytical models to assist in making complex decisions such as resource allocation, policy development, and long-term planning (Turban et al., 2015). These systems are particularly valuable in large educational institutions where decisions need to be made quickly and with a high degree of accuracy, often under conditions of uncertainty.

The impact of MIS on education management is profound, particularly in terms of improving the efficiency and effectiveness of operations. One of the most important impacts is the strengthening of decision-making processes. By providing real-time access to accurate and comprehensive data, MIS allows educational leaders to make more informed decisions based on concrete evidence rather than intuition or incomplete information (Laudon & Laudon, 2018). This data-driven approach to decision making can lead to better outcomes, such as improved student achievement, more efficient use of resources, and enhanced organizational accountability.

The MIS also contributes to a better allocation of resources within educational institutions. By analyzing data related to student enrollment, course demand, and faculty workload, MIS can help administrators identify areas where resources are under- or over-utilized, allowing for more strategic allocation of funding, staff, and materials (O'Brien & Marakas, 2011). In addition, MIS supports the automation of routine administrative tasks such as scheduling, payroll processing, and inventory management, freeing up time and resources that can be redirected to more critical instructional activities (Stair & Reynolds, 2020).

From the above, it can be seen that Management Information Systems play a critical role in the modern educational landscape by providing the tools and processes necessary for effective data management and decision support at all levels of the institution. MIS components, including data collection, storage, analysis, and reporting, are integral to

its functionality and effectiveness. Through various applications such as SIS, LMS and DSS, MIS enhances both administrative and academic processes, leading to improved efficiency, resource allocation and overall educational outcomes.

RESEARCH ON MANAGEMENT INFORMATION SYSTEMS IN EDUCATION

The literature on digital transformation in education emphasises the importance of integrating advanced technologies into education systems, while addressing both technological and human factors to ensure meaningful and sustainable change. Based on this foundation, the role of Management Information Systems (MIS) in educational institutions becomes critical as these systems facilitate effective information management, enhance decision-making processes and support the overall management of schools and universities. As educational institutions increasingly adopt digital strategies, effective MIS implementation is vital to maintain competitiveness, improve administrative efficiency, and support educational outcomes. This section of the literature review delves into the implementation and impact of MIS in different educational contexts, exploring how these systems contribute to the broader goals of educational digitization and the specific challenges they face in different institutional settings.

Initially, Verma (2022) explores the role of Management Information Systems (MIS) in the education sector, highlighting their critical impact on institutional management and decision-making processes. The study highlights the importance of integrating MIS with Information and Communication Technology (ICT) to improve the administrative and operational effectiveness of educational institutions. He argues that while the implementation of ICT is widely recognized as essential, the real value of MIS extends beyond the mere installation of computer systems and software. Effective MIS integration requires not only the acquisition of appropriate technology but also the readiness of educational managers to adopt these systems and the availability of skilled ICT professionals to support them. The research highlights that MIS plays a key role in streamlining data flow, improving communication and making informed decisions. Despite its potential, the study also identifies challenges such as resistance to change and lack of trained staff, which can hinder the successful deployment of MIS in educational environments. Verma (2022) concludes that in order to fully realize the benefits of MIS, an integrated approach that includes proper training, support and administrative commitment is necessary.

Aldarbesti and Saxena (2014) explore the interconnection of data, information and decision making in the context of Management Information Systems in the education sector. The authors elaborate on how data, when processed into information, becomes the foundation for effective decision making, thus highlighting the importance of MIS in educational management. The research highlights the rapid growth and evolving trends in MIS, particularly in the context of Education Management Information Systems (EMIS), which are vital for formulating strategies, policies and plans aimed at improving educational outcomes. Through case studies of EMIS implementations in Nigeria and Zambia, the authors provide insights into the challenges and successes associated with these systems, offering valuable lessons for other educational contexts. The study advocates for the adoption of a well-structured EMIS to ensure that educational institutions have access to accurate and timely information, which is essential for effective management and policy making. Aldarbesti and Saxena (2014) stress that a strong EMIS can contribute significantly to the overall efficiency and effectiveness of the education sector, particularly in developing countries.

El-Ebiary et al. (2016) investigated the effectiveness of Management Information Systems (MIS) implementation in educational organizations, specifically in Al-Madinah International University in Malaysia. The study explores the benefits and challenges associated with the current MIS in use, using non-random sampling methods and descriptive statistics to analyze survey data from system users. Findings suggest that MIS implementation has been generally successful, with users reporting improved productivity, improved task performance, and a reduction in administrative errors. The system also appears to facilitate better decision-making processes. However, the study also reveals some dissatisfaction among content management officials about the usefulness of the system, indicating areas for improvement. The authors recommend increasing awareness and providing further training on MIS to create a more conducive environment for successful implementation. This study highlights the importance of continuous evaluation and development of MIS to meet the evolving needs of educational institutions and their stakeholders.

Baiden et al. (2023) examine the impact of Management Information Systems (MIS) on productivity in tertiary institutions, focusing on colleges in Ghana. The study highlights the rapid growth of information technology in educational management and its positive impact on school administration such as improved access to information, more efficient use of resources and better time management. Despite these benefits, the study identifies significant challenges that hinder the effective implementation of MIS, such as high costs, lack of competent IT staff, inadequate computer systems and technology-related fears among users. The study uses stratified and purposive sampling techniques, using questionnaires and observation schedules to collect data, which are then analysed using SPSS software. SPSS (Statistical

Package for the Social Sciences) is a statistical analysis software widely used in research for data analysis. It provides tools for managing large data sets, conducting complex statistical analyses and creating graphs and reports. It is used in social sciences, education, medicine and business, facilitating the analysis of trends, correlations and other statistical models accurately and easily. The results highlight the importance of addressing these limitations to enhance the effectiveness of MIS in improving educational management. The authors suggest that overcoming these challenges will require targeted investments in technological infrastructure and training, as well as a cultural shift towards the adoption of digital tools in the educational environment.

Rahmatian (1999) advocates the integration of systems thinking in Management Information Systems (MIS) education, arguing that a systems approach is necessary for effective teaching and understanding of MIS. The paper reviews the historical development of MIS education and emphasizes the importance of maintaining its systems thinking. Rahmatian (1999) argues that systems thinking should not be just a nominal part of the curriculum, but should fundamentally shape the way MIS is taught and understood. The author argues that this approach will better prepare students to manage complex information systems in a way that takes account of wider organisational and environmental contexts. By integrating systems thinking into MIS education, educators can ensure that students develop a holistic understanding of how information systems work in larger organizational systems. This perspective is critical to cultivating the next generation of MIS professionals who can navigate and manage the complexities of modern information environments.

Prasetyo et al. (2023) explore the application of Management Information Systems (MIS) in the online learning process in Madrasahs, highlighting the critical role of MIS in facilitating educational services and improving the learning environment. The study uses a descriptive qualitative approach, collecting data through observations, interviews and documentation to analyse how MIS supports online learning. The findings reveal that MIS, particularly the Educational Management Information System (EMIS), plays an important role in integrating online and offline learning by providing basic technological infrastructure such as learning facilities equipped with computers and internet access. The implementation of MIS in Madrasahs is structured around three key stages: planning, implementation and evaluation of learning. The planning stage includes the development of curricula, lesson plans and learning tools, while the implementation stage includes preliminary activities, core teaching activities and integration exercises. The assessment stage evaluates student outcomes through a variety of methods, including written and oral examinations, assignments and practical assessments. The study highlights the need for continuous efforts to improve the management of online learning to achieve optimal outcomes for students, suggesting that the integration of MIS in Madrasahs can significantly enhance the effectiveness and efficiency of the educational process.

Ajobiewe (2020) examines the role of Management Information Systems (MIS) in school administration, emphasizing their importance in improving efficiency and communication within educational institutions. The study argues that the increasing complexity and demands of modern educational environments necessitate the adoption of robust MIS to address the growing information needs of schools. The study highlights that MIS provides critical support for decision-making processes by ensuring that accurate, timely and comprehensive information is available to administrators. This, in turn, enhances schools' overall performance by improving resource utilisation, reducing workload and enabling better time management. The research also examines the impact of MIS on various administrative functions, including accessibility to information, quality of reporting, and overall effectiveness of school management. The study concludes that successful implementation of MIS in educational institutions is essential to address the challenges of modern school management, particularly in terms of supporting effective communication and decision-making processes. The work of Ajobiewe (2020) highlights the need for educational institutions to invest and fully utilize MIS to improve both administrative and academic outcomes.

Finally, Baharun (2019) also explores the importance of Management Information Systems (MIS) in enhancing the competitiveness of higher education institutions, particularly through the prism of electronic public relations. Focusing on Nurul Jadid University in East Java, Indonesia, the study uses a qualitative case study approach to examine how MIS can improve institutional competitiveness in the increasingly competitive educational landscape. The findings show that MIS plays a critical role in facilitating effective communication between the university and its stakeholders. This is achieved through the use of various digital media and communication techniques that enhance the public image of the institution and attract prospective students. In addition, the study highlights that MIS contributes to cost savings, improves operational efficiency and promotes greater community engagement. By streamlining communication processes and enhancing the institution's ability to reach and interact with its audience, MIS helps Nurul Jadid University maintain a competitive advantage in the higher education sector. Baharun's (2019) research highlights the strategic importance of integrating MIS with electronic public relations efforts to enhance the overall competitiveness of educational institutions.

From the above research it is clear that the exploration of Management Information Systems within educational institutions highlights their important role in improving administrative processes, enhancing decision making and supporting the digital transformation of education. MIS serves as a critical tool for educational institutions to manage information effectively, streamline operations, and maintain competitiveness in an increasingly digital landscape. However, successful implementation of MIS requires careful consideration of institutional needs, adequate training, and ongoing support to address challenges such as resistance to change and technological limitations. Overall, integrating MIS into education systems offers significant benefits, but its effectiveness depends on careful planning, execution, and continuous improvement efforts.

THE CASE OF MYSCHOOL

MySchool is an online platform developed by the Greek Ministry of Education, designed to unify and streamline the management of educational data in all public schools in Greece. The system represents an important step towards the modernization of public administration in education, aiming to provide a centralized and efficient method of managing and accessing information related to schools, staff and students (https://myschool.sch.gr/).

The main function of MySchool is to serve as a comprehensive database containing detailed records for each school unit, including information on school staff, student enrollment, course schedules and overall academic performance. Schools are required to update the system regularly, particularly with respect to teacher enrollment, assigned duties, schedules, and overall classroom structure. In addition, the system stores data on student attendance and academic records, allowing real-time monitoring and management of student progress (https://myschool.sch.gr/).

One of the primary goals of Myschool is to address the basic needs of information storage, data management and communication within the educational system. Prior to the implementation of MySchool, several electronic systems existed, but often operated in isolation, leading to inefficiencies and lack of coordination. MySchool aims to unify these disparate systems into a single, coherent platform, thereby enhancing data security and allowing large volumes of information to be managed more reliably (https://myschool.sch.gr/).

MySchool provides the Ministry of Education with a powerful governance tool, enabling the central administration to have an accurate and up-to-date overview of the education landscape at any time. This feature is vital for informed decision making as it allows policy makers to understand the current state of schools across the country, identify trends and anticipate future needs. In addition, the system functions as a statistical tool, providing valuable insights that can be used to design and implement major upgrades to the Greek education system (https://myschool.sch.gr/).

In practice, MySchool supports various administrative processes within schools. For example, it facilitates the accurate recording and tracking of student absences, which is a critical aspect of student management. Schools can enter and update absence records in real-time, ensuring that this data is always up-to-date and accessible. This functionality not only helps schools maintain discipline, but also allows for early intervention in cases where students are systematically absent (https://myschool.sch.gr/).

In addition, MySchool plays a vital role in ensuring transparency and accountability within the education system. By aggregating data, the platform allows for greater oversight and ensures that information is consistent and easily accessible to those who need it. This transparency extends to the Ministry, school principals, and potentially parents, who may have access to relevant information about their children's school and academic progress (https://myschool.sch.gr/).

MySchool is also part of Greece's broader efforts to align its public administration with European digital governance standards. The platform embodies the principles of e-government, where the use of technology enhances the efficiency, transparency and accessibility of government services. In the context of education, MySchool is a step towards creating a more responsive and data-driven education system that can better serve the needs of students, teachers and administrators (https://myschool.sch.gr/).

In conclusion, MySchool represents a significant advance in the management of educational data in Greece. By integrating various information systems into a unified platform, it addresses many of the challenges previously faced in the management of educational institutions. The system's ability to store, manage and analyze vast amounts of data securely and efficiently makes it an invaluable tool for the Ministry of Education and school administrators.

STUDIES ON MYSCHOOL

Investigation of the acceptance and implementation of Education Management Information Systems (EMIS) within educational settings has revealed critical factors that influence their effectiveness, such as system usability, institutional support and alignment with organizational needs. As educational institutions increasingly adopt these systems to improve administrative efficiency and decision-making, understanding how these technologies are perceived and used by various stakeholders becomes essential. This understanding provides the basis for broader discussions about the role of digital tools such as the MySchool system, which further extend the capabilities of EMIS by integrating them into the everyday practices of educational institutions. As these tools become prominent, it becomes vital to critically evaluate their impact on educational practices, particularly how they shape the experiences of teachers, students and parents, and how they align with broader educational goals.

Firstly, regarding Greece, Kalogeratos, Anastasopoulou and Pierrakeas (2024) investigate the key role of the MySchool Information System in the digital transformation of Greek public schools, with a case study focusing on the region of Achaia. The study highlights how the system has contributed to the transformation of public education units into digital learning organisations, supporting the administrative responsibilities of school principals. The survey, which involved gathering views from primary school principals, highlights the effectiveness of the system in meeting current requirements, but also highlights areas where further development is needed. The findings suggest that while MySchool is a valuable tool for school management, it needs to be improved to keep pace with the growing demands of the education sector, particularly in the context of the ongoing digital revolution.

Sofos & Chroni (2021) document the experiences of two primary schools in Corinthia during the COVID-19 pandemic, focusing on the organisation and implementation of distance education. The study highlights the critical role of school leadership in maintaining communication, cohesion and guidance within the school community amidst the challenges posed by the sudden shift to distance education. The research concludes that the adoption of distance education has opened up new organizational and pedagogical possibilities that should be further explored even after schools are reopened. The study stresses that the integration of digital tools in education should not be limited to technological aspects, but should also include the pedagogical opportunities they offer. To achieve this, a shift from outdated school practices is necessary, with school leaders playing a central role in fostering a collaborative culture that supports co-teaching and effective learning through distance education.

Kessopoulou and Tsibidaki (2021) investigate the electronic communication between school and family during the COVID-19 pandemic, focusing on secondary education in Greece. The study, based on a quantitative survey with a sample of 62 school principals, analyses the changes in communication caused by the pandemic. The findings show that the pandemic led to significant changes, with the adoption of a variety of electronic means of communication. The themes of school-to-family discussions were reshaped, with distance learning taking centre stage. The research reveals that the family and pupils positively adopted the new form of communication, while the urbanity of the area influenced the means and practices of communication. Overall, the research shows that the pandemic has changed the way schools and families communicate, with electronic communication becoming an important factor in the new educational reality.

Finally, Kluvatos (2021) examines the impact of the coronavirus pandemic on distance education and the wider use of information and communication technologies (ICT) in schools. The study says that the pandemic caused an abrupt change in digital learning and communication, forcing schools to adapt quickly to the new conditions. It examines the pre-existing situation in terms of the technological infrastructure of schools, the expertise of teachers and the innovative practices developed during the first wave of the pandemic. The research predicts that the changes resulting from the pandemic will have a long-term impact on future education, leading to an educational environment that is more digitally empowered and continues to evolve.

Savin and Dumitriu (2021) propose the integration of a mobile learning app, MySchool, with the Moodle e-learning platform to improve the effectiveness of training, particularly in pre-university education. The study identifies key shortcomings in existing e-learning platforms, particularly in their design and the structure of training models. By adding a mobile learning component, the authors argue that the MySchool application can address these shortcomings, offering students greater flexibility and accessibility in their learning process. The research outlines the design of the proposed system using the ALDIE software design model and rapid prototyping, establishing functional and non-functional requirements for the application. The authors also discuss the benefits and challenges of mobile learning, concluding that the MySchool application could significantly improve student engagement and learning outcomes when integrated with existing e-learning platforms such as Moodle.

The study by Pitsiava and Vlahopoulos (2015) investigates the role of Information and Communication Technologies (ICT) and the then new Information System "MySchool" in the administrative processes of primary schools, focusing on the perceptions of school principals in the region of Imathia. The survey, conducted through a mixed-methods approach involving questionnaires and semi-structured interviews, reveals that principals are strong supporters of the use of ICT in school administration, as they recognise the significant contribution of the MySchool system in enhancing educational and administrative processes in schools. While the system is perceived positively, particularly in terms of student and staff data management, the study suggests that its current role is somewhat limited, focusing mainly on monitoring and managing educational resources. The research highlights the potential for Myschool to further improve education management, provided it evolves to meet more comprehensive management needs in schools.

The studies reviewed in this section highlight the potential for transforming digital tools such as MySchool into educational environments, underlining their ability to streamline administrative processes and improve communication between schools and stakeholders. However, these technologies also raise significant concerns about the abstraction and quantification of educational practices, which may lead to a limited focus on performance metrics at the expense of more holistic educational goals. Findings suggest that while such systems offer substantial benefits in terms of efficiency and transparency, there is a critical need for ongoing evaluation to ensure that they support, rather than undermine, broader educational goals. Ultimately, successful integration of these systems requires a balanced approach that takes into account both the technical capabilities and the educational values they are intended to serve.

ABSTRACT

This qualitative study evaluates OPSYD (Integrated Information System for Primary and Secondary Education), an e-Government system integral to the management of personnel in Greek Primary and Secondary Education. OPSYD, classified as a human resources management information system, enables two-way interaction between educators and regional Education Directorates, allowing electronic application submissions, document uploads, and formal requests. The research, conducted between February and June 2024 through structured interviews in the regions of Epirus and Peloponnese, involved 15 non-permanent teaching staff and 7 administrative personnel from regional education directorates. The interviews aimed to document user interactions, identify difficulties, and gather suggestions for improving administrative processes.

Key findings reveal that the primary concerns are not technical issues with OPSYD itself, but rather challenges stemming from administrative procedures and their implementation, particularly the fragmentation across multiple information systems. This user group advocates for a single information system or automatic data transfer between systems and suggests allowing file updates at any time, not solely during open calls. Administrative personnel reported significant time waste due to repetitive data entry across different systems like MySchool, eDataCenter, and the Human Resource Register, none of which interoperate for automatic data synchronization.

The study concludes that designing and implementing interoperability solutions between existing information systems is imperative to enable mass data input and automated synchronization, thereby reducing processing times and allowing staff to focus on substantive tasks. It also proposes enhancing communication capabilities to facilitate timely error correction for applicants. Recommendations include decoupling document updates in OPSYD from call announcements, allowing continuous submission, and integrating AI-supported chatbots, supervised by human experts, to provide guidance to applicants. Furthermore, incorporating specialized knowledge for assigning educational specialties into the eDiplomas system would ensure automatic and accurate updating of educational specialties directly from universities.

Keywords: OPSYD, e-Government, Human Resources Management, Education Management, Administrative Procedures, Interoperability

INTRODUCTION

The online portal of OPSYD (Integrated Information System for Primary and Secondary Education) is a comprehensive information system for the electronic submission of applications, as well as for the management of personnel in Primary and Secondary Education across the Greek territory. As such, it is classified as an e-Government system.

There are many definitions of e-Government, which vary depending on the perspective of the authors (technological introduction, organizational changes) (Tambouris, E & Tarabanis, K., 2024). This study focuses on the definitions provided by the OECD (Organisation for Economic Co-operation and Development) and the European Union. Specifically, the OECD defines e-Government as "the use of information and communication technologies, particularly the internet, as a tool to achieve better governance" (OECD E-government Task Force, 2023). The European Union defines e-Government as: "the use of information and communication technologies (ICT) in public administrations, combined with organizational changes and new staff skills, aimed at improving public services and strengthening democratic processes and public policy support mechanisms" (European Commission, 2003).

The main characteristics of e-Government, as defined in the Greek Act no. 4727/2020 (Government Gazette 184/A'/23-09-2020), are:

a) the principle of legality (protection of personal data),
b) the principle of transparency,
c) the principle of equality and accessibility,
d) the principle of good administration (efficiency), and
e) the principle of integrity, security, and confidentiality.

However, it is important to emphasize that e-Government is not simply the digitization of bureaucratic procedures but rather a transformation in the operational mindset of government services through technology (Giannoukakou, 2011).

Through the use of technology and various digital tools and platforms, the Greek public sector has become more accessible—both to citizens and to society and the state. The institutional framework for the provision of e-Government services is structured across five levels (Lakazidou, 2021):

- Level 1: Information Services
- Level 2: One-way Communication Services
- Level 3: Two-way Interaction Services
- Level 4: Transactional Services
- Level 5: Personalized Services

OPSYD is a comprehensive information system, which, based on its features and functionalities, can be categorized as a human resources management information system, specifically for Primary and Secondary Education. It belongs to the third level of e-Government service classification—two-way interaction—as educators can interact with the regional Education Directorates, which in turn interact with the Ministry of Education. In other words, beyond simply receiving information, users are able to fill out electronic applications, submit documents, and make formal requests. It is clarified that communication with the Education Directorates is not supported in real-time, e.g., through a dialog system (Chatbot).

The purpose of this study is to evaluate the OPSYD information system as an e-Government system for the Administration of Primary and Secondary Education. It is based on qualitative research conducted between February 2024 and June 2024.

KEY FEATURES

Users of the OPSYD platform initially have the ability to access information about upcoming ranking procedures based on criteria, current open calls for teacher recruitment, the declaration of preferred school placement areas, and more. This information is provided on the system's homepage in the form of announcements, along with user manuals in electronic documents (PDF) and relevant instructional videos.

Beyond the provision of basic information, OPSYD allows users who are educators to electronically submit their applications for recruitment to school units, transfers, or placements by completing the available online forms (O.P.S.Y.D., 2023). At the same time, users from the Education Directorates are required to review and validate the submitted

applications electronically and to enter data concerning the teachers' prior service, based either on the documents submitted by the teachers themselves or from the Directorate's own records (O.P.S.Y.D., 2016).

More specifically, OPSYD serves three types of users: substitute/hourly-paid teachers or members of the Special Educational Personnel (E.E.P.)/Special Support Staff (E.V.P.), permanent teachers, and the administrative personnel of the Ministry of Education. Access to the system is possible either directly at https://opsyd.sch.gr/ , or via the MySchool platform or the gov.gr portal (O.P.S.Y.D., 2022). Logging into the OPSYD portal requires user credentials, after the user has registered and been authenticated through the General Secretariat for Information Systems (GSIS).

With regard to the submission of applications and the updating of personal data by educators, OPSYD is active for a specific period—namely, when there is an open call issued by the Ministry of Education for inclusion in ranking lists or for appointment from existing lists. For inclusion in ranking lists, the process of entering or modifying personal data occurs every three years, and the updated data validated by the Education Directorates and the Ministry is "transferred" to ASEP (Supreme Council for Civil Personnel Selection), provided the applicant has also submitted the relevant application through ASEP's information system.

Applications by educators already on the ranking lists for recruitment are submitted during specific timeframes announced by the Ministry during the academic year, with the majority taking place in July and August each year. Permanent teachers submit transfer applications during designated periods based on ministerial decisions, typically in October and November of each school year.

Until February 2025, the OPSYD online portal operated as an independent information system, as there was no interoperability with any other e-Government information system—except for the initial verification of registered users' personal data via GSIS. Since then, OPSYD has been linked with AADE (Independent Authority for Public Revenue) to check whether newly appointed educators have any commercial activity, using their tax identification number (AFM).

ADMINISTRATIVE APPROACHES AND INFORMATION SYSTEMS IN OTHER COUNTRIES

Significant differences can be observed in the organization of educational systems across European Union countries. In most countries, the administration of education is decentralized, managed either by the governments of federal states or by equivalent local authorities (second-level municipalities), and in some cases, even first-level municipalities (e.g., Austria, Belgium, Germany, Spain). In contrast, in countries such as France, Greece, Cyprus, and Portugal, education is centrally organized and administered by state bodies (e.g., Ministry of Education). In Portugal, Higher Education is under the jurisdiction of a separate ministry, whereas Primary and Secondary Education fall under the Ministry of Education. These variations in educational governance influence teacher recruitment procedures and lead to the development of distinct information systems in each country.

In France (European Commission Eurydice, 2023[b]), prospective teachers must complete a two-year postgraduate program in pedagogy and teaching. Upon completion, they must pass certification exams (separate certifications for primary and secondary education). Successful candidates are initially hired as probationary teachers and later appointed permanently. This certification also qualifies them for employment in private schools. Those without certification may be hired for short periods and limited hours, mainly to substitute for permanent teachers on leave. These local-level hirings follow special procedures.

In Cyprus (European Commission Eurydice, 2023[a]), the Education Service Commission (ESC) (E.E.Y. Cyprus, n.d.[a]) is responsible for teacher appointments, placements, confirmation of appointments, ranking, tenure, promotions, transfers, secondments, granting of services, retirements, and the exercise of disciplinary control—including dismissal or release from duties. Teacher recruitment is based on ranking lists. Until 2027, two such lists are in use: one for first-time appointees and one for those previously employed on a contract basis. Applications to be included in the lists may be submitted at any time but are assessed for ranking either at the end of each year—with the appointment list announced in early February—or on August 31st—with the eligibility list published in September. These lists remain valid from January through December of the following year.

Applications are submitted electronically through the ESC's website after user registration (E.E.Y. Cyprus, n.d.[b]). The platform uses electronic forms equipped with automated checks to ensure accurate data entry by applicants. Appointments for permanent positions, contractual placements (similar to substitute teachers in Greece), or temporary replacements are made based on ranking order within the lists. Applications must be submitted within 15 days of the public notice published on the Commission's website.

In Portugal, teacher recruitment begins with the publication of a national public notice, followed by the submission of electronic applications. The process resembles that of Greece (European Commission Eurydice, 2024), but participation is limited to individuals holding a certificate of pedagogical competence, as is also the case in France. Additionally, previous teaching performance evaluations are taken into account during candidate ranking. Since February 2024, SIGRHE—a nationwide online portal managed by the Ministry of Education (DGAE)—has been used for Human Resource Management (DGAE - Ministry of Education - Portugal, 2024). The platform was developed using the OpenERP (Odoo) tool (Odoo, n.d.).

In general, from the cases examined, it is evident that legislation, the structure of the educational system, and the institutional culture of the bodies responsible for teacher career management have resulted in different approaches and have shaped highly specific needs and solutions in each country.

EVALUATION METHODOLOGY

This paper is a qualitative study based on the analysis of data collected through structured interviews with users of the OPSYD system in the regions of Epirus and the Peloponnese, during the period from February 2024 to May 2024.

The purpose of the interviews was to document the ways users interact with the OPSYD system, the difficulties encountered by each user group (teachers and administrative staff), and to highlight suggestions for improving the processes followed in daily administrative practice. The interviews were structured in a way that allows for an assessment of the information system as a system of governance, following the structure below:

- Identification of OPSYD services used by the participant
- Issues encountered while using the application
- Issues related to administrative organization and procedures
- Suggestions for improvements/solutions to the problems
- Suggestions for changes to administrative processes

A total of 15 interviews were conducted with non-permanent teaching staff and 7 interviews with administrative staff from regional education directorates. The interviews were conducted by the members of the writing team. They were held in person, as one-on-one discussions with each participant, based on the interview structure described above. For each participant, the responses were recorded and categorized according to the structured interview format. The interviews with administrative staff were conducted at their workplace.

After all interviews were completed, the responses were processed in order to identify common problems and proposed improvements, which are presented in the following section.

EVALUATION FINDINGS

The main findings of the qualitative research conducted are presented separately for the two categories of users who participated in the study: non-permanent teaching staff and administrative personnel of Regional Education Directorates.

Non-Permanent Teaching Staff:

The main concern of non-permanent teaching staff relates to the process followed for submitting applications for inclusion in ranking lists. The obligation to submit an application to ASEP (Greek Supreme Council for Civil Personnel Selection) and subsequently requests for data updates in the OPSYD platform causes confusion and stress among candidates. As a result, many turn to third-party "specialists" to submit the relevant applications on their behalf.

Compared to the older process, where candidates had to submit physically their supporting documents to the local Directorate of Education for review, they consider that there has been significant improvement as the new process reduces waiting times. However, the personal contact with employees previously allowed better identification and guidance for submitting the correct supporting documents.

Moreover, a major issue raised was the lack of two-way communication in cases where a document was rejected, or the inability to correct it. The problem lies in the fact that, although Education Directorates could provide justifications for the rejection of a request, these justifications were not visible to the applicant teacher. Even if visible, corrections could not be made once the application submission deadline had passed.

Finally, since most non-permanent teachers have already uploaded their documents to the ASEP platform for participation in hiring processes of other ministries (beyond the Ministry of Education), they believe there is no reason to repeat the process on the OPSYD platform and re-enter all their information.

Improvement proposals concern both the use of the application and the enhancement of the processes. Regarding the process, non-permanent teachers suggest the use of a single information system or the ability to automatically transfer data from one system to another. They also emphasize that updates to a teacher's file should be allowed at any time, not only when a call for ranking list submissions is open. In terms of application usage, they suggest that the comments from the Education Directorate about any issues with the documents should be visible, and corrections should be allowed.

Administrative Personnel of Regional Education Directorates:

The main concern expressed by Directorate employees is the repeated entry of the same personal data into different information systems used to handle administrative procedures. Specifically:

Myschool (https://myschool.sch.gr/) is used for the daily management of schools and records data for both permanent and non-permanent teachers. *eDataCenter* (https://edcportal.minedu.gov.gr) holds data about permanent teachers and is used for their transfers.OPSYD contains similar data and is used for teacher secondments. The *Human Resource Register of the Hellenic Public Sector* (https://hr.apografi.gov.gr/login) holds part of this information and is used for administrative changes such as transfers, secondments, and evaluations. These systems do not allow for the automatic update of shared data (e.g., identification info, family status, placements), leading to wasted time on repetitive procedures. This is especially burdensome given the ongoing staff shortages since 2010, resulting in excessive workloads—particularly in the HR and Financial departments.

In addition, with regard to processing applications of non-permanent teachers for inclusion in ranking lists, employees find it very difficult to identify the correct degree titles—especially after the merger or upgrade of former Technological Educational Institutes (TEIs) into Universities. They struggle to understand the certifications issued by the new institutions. It is important to clarify that students who studied at former TEIs, which have now merged into new university institutions, follow the curricula of the original TEIs and receive degrees reflecting the name of the department at the time of their admission, even if the current name of the issuing institution differs.

Many also point out the difficulty of verifying the correct level of foreign language proficiency, especially in German, noting the need for constant communication with the relevant departments of the Ministry of Education. They also emphasize that the time available to review user applications is very limited. These procedures take place in June and July, during which multiple critical administrative changes happen simultaneously (e.g., dismissals of non-permanent teachers, hiring of permanent ones, secondments, transfers, and placements of permanent staff).

Regarding the use of the OPSYD system itself, no major issues were recorded, as most administrative staff focused more on the procedures and how these are integrated into their annual operational planning.

DISCUSSION

By analyzing the collected observations, it becomes evident that concerns regarding the use of OPSYD focus primarily on the design and implementation of the procedures for the submission and verification of supporting documents. The main issue is not the use of the information system itself, but rather how it is utilized—particularly the multitude of different information systems handling identical or similar personal data that individuals must manage in both their personal and professional lives.

Specifically, OPSYD is used by non-permanent teachers to submit their supporting documents for inclusion in appointment ranking lists. They are required to submit to OPSYD data that, in most cases, has already been stored in ASEP, the competent authority for the final ranking process. It is understood that the current legislation governing the evaluation of supporting documents for teachers and their classification into teaching specialties is far more complex than that for other positions in the public sector. This means that a potential full transfer of this responsibility to ASEP would burden its procedures with delays. Nonetheless, it is possible to explore, design, and implement interoperability solutions between the two systems, allowing the utilization of already verified documents.

Furthermore, as evident from the research observations, various personal data are used across numerous information systems in daily administrative practice (e.g., MySchool, eDataCenter, Human Resources Registry, eDiplomas[15]) and possibly other locally developed systems within individual services.

In our opinion, it is imperative—not necessarily to unify these systems—but to ensure the capability for mass data input and automated synchronization between systems. This should include automatic detection of the data that require human intervention and correction (e.g., differences in the point calculation for hiring, transfers, or secondments). We believe that implementing such technical interoperability solutions would positively impact administrative procedures in terms of processing time and allow focus on substantial administrative tasks beyond the repeated input of identical data into separate management systems.

Another important finding from the research is that emphasis should shift toward integrated communication and interaction capabilities so that any errors can be corrected in a timely manner, preventing the exclusion of teachers from hiring processes due to mistakes that are rectifiable. The purpose of Public Administration is not to punish the citizen, but to assist them in fulfilling the required procedures as defined by legislation. To this end, we suggest the incorporation of AI supported chatbots to provide necessary guidance to the teacher applicants, given they are supervised by human administrative experts, that can identify their performance and take measures when needed.

In our view, the process of updating recruitment-related documents in OPSYD should be decoupled from the announcement of calls for inclusion in ranking lists. This way, teachers could upload their documents as soon as they obtain them, while the verification process could be scheduled at fixed intervals during the school year to avoid additional workload. Meanwhile, hirings would proceed based on the valid ranking lists, which are updated every three years.

CONCLUSION

The evaluation of OPSYD as an electronic governance system in Education showed that the problems we identified are not technical issues, but mainly problems in administrative procedures and their implementation. We observe that the information systems used by education administrative services are legacy systems designed or adapted to address different needs of administrative changes (hirings, secondments, transfers) and now contain a large amount of data on both permanent and potential teaching staff of primary and secondary education. The design and implementation of interoperability solutions between the available systems is imperative. In our opinion, implementing new unified systems that integrate all processes is time-consuming and only temporarily solves the problems, since new legislation will create the need for new systems to address any new processes that arise as needs of the time. Interoperability must be required for every new information system that emerges in the future, and in a specific and structured way that addresses the different methods of storing information between various systems, addressing the Principle of once-only Design, as described in the Greek Bible of Digital Transformation (Hellenic Republic Government, 2020). Similarly, for every old and still in-use system, interoperability must be ensured with each of the existing information systems.

Emphasis should also be given to exploring the incorporation of AI assistants (e.g. chatbots) into the communication between public administration and citizens (applicant teacher). Human like dialogues coupled with knowledge acquired from manuals, guidance documents, call texts and human expertise should be implemented, tested and incorporated in everyday administrative practice, to provide quick and quality support when needed.

Finally, to address the problems of specialized knowledge required for assigning educational branches to graduates, we propose to incorporate this knowledge into the eDiplomas information system, to which all universities in the country have either been integrated or are expected to be integrated for the degrees they issue. In this way, we ensure the updating of educational specialties en masse and automatically, directly from the institutions issuing the degrees, which does not impose any additional burden on them but guarantees the proper treatment of prospective teachers even against future, currently unknown, changes.

email: iliasde66@gmail.com

ABSTRACT

This paper examines digitisation in education, focusing on understanding its basic concepts, its historical development, global trends, its importance and its application in public education, as reflected in the relevant literature. It aims to provide a comprehensive overview of the various dimensions of digitisation in education, as well as the challenges and opportunities arising from the use of technologies in educational processes. In addition, it aims to highlight the importance of digitisation for modernising education and enhancing students' skills, while examining its impact on equity and accessibility in education.

First, the paper examines the definition and scope of digitisation in education. Some of the main features of digitisation include the integration of digital tools and resources, such as e-platforms, digital textbooks and online learning platforms, which enable teaching and learning in a variety of environments and formats. Digitisation extends to many areas, such as the storage and distribution of materials, the interaction between students and teachers and the possibility of customised learning pathways for students.

The process of digitisation started with the introduction of computers in classrooms and gradually evolved with the use of online tools and platforms. Today, digitisation is promoting the development of new pedagogical models that combine interactivity and personalisation of learning, allowing students to interact with the teaching material and actively participate in the educational process. Through these tools, it is possible to better organise and monitor the educational process and to ensure the proper functioning of schools.

A key element of the work is the analysis of digitisation in education, which strengthens students' digital literacy skills, preparing them for the demands of the 21st century and the modern labour market. The development of skills such as critical thinking, creativity and problem-solving is becoming imperative to ensure the smooth integration of students into the information and technology society. In addition, digitisation offers the possibility of effective management of the educational environment, both at administrative and pedagogical level, making educational processes more efficient, flexible and adapted to modern needs.

This paper then focuses on enhancing equity in education by ensuring that educational resources are accessible to all students, regardless of socio-economic status or geographical location. The COVID-19 pandemic has accelerated this process, making digital solutions essential to ensure uninterrupted education in challenging circumstances. The increased reliance on digital technologies during the pandemic highlighted their fundamental importance for the adaptation and effectiveness of the education system in emergency situations. Today, digitalisation is recognised as a critical element for the modernisation and evolution of education, contributing to the transformation of the educational process in the era of digital transformation.

Keywords: Digitization, education, modernization.

THE THEORETICAL BACKGROUND

DIGITISATION IN EDUCATION: DEFINITIONS AND CONCEPTS

DEFINITION AND SCOPE

Digitalisation in public education refers to the overall transformation of educational systems, processes and practices through the integration of digital technologies. This transformation involves moving from traditional, often paper-based, teaching and management methods to the use of digital platforms that enable more interactive, effective and accessible learning experiences. In the context of public education, digitisation includes the adoption of tools such as online learning management systems, digital textbooks, virtual classrooms and data-driven decision-making processes. These technologies facilitate the delivery of content as well as the management of educational functions, enhancing the overall educational environment (Selwyn, 2011).

The scope of digitisation in education extends beyond the mere digital reproduction of existing practices, as it involves a rethinking of pedagogy, curriculum design and the roles of teachers and students. Digitisation is characterised by the integration of interactive technologies that enable personalised learning experiences, real-time feedback and the development of digital literacy skills that are essential in the 21st century. This digital transformation is not limited to the classroom, but also includes the administration of educational institutions, where digital tools streamline functions such as enrollment, attendance tracking, and communication with parents and the community (Selwyn, 2011).

THE HISTORICAL CONTEXT OF DIGITISATION

The historical context of digitisation in education reflects a gradual evolution that started with the introduction of computers in schools in the second part of the 20th century, initially in developed countries. Early milestones include the use of computers for administrative tasks and the introduction of computer science courses in schools (Papert, 1980). The 1990s saw an increase in the use of the internet, which brought about significant changes in educational practices, including the use of email for communication and the emergence of online resources. The early 2000s marked the beginning of a more profound change as e-learning platforms and online courses became more prevalent, leading to the development of Massive Open Online Courses (MOOCs) and other online educational resources (Selwyn, 2011).

One of the key milestones in the evolution of digitisation in education was the introduction of the 1:1 computing initiative, where schools began to provide individual devices to students, such as laptops or tablets, to facilitate digital learning (Bebell & O'Dwyer, 2010). This initiative highlighted the growing recognition of the potential of digital tools to improve learning outcomes. In recent years, the rise of mobile and cloud computing technologies has further accelerated the digitisation process, making educational resources more accessible and enabling new forms of collaborative learning (Johnson et al., 2016).

GLOBAL TRENDS IN THE DIGITISATION OF EDUCATION

Global trends in the digitisation of education reveal an area where the pace and success of digitisation efforts vary significantly between regions and countries. In developed countries, such as the United States, the United Kingdom and several European countries, digitization in education has advanced rapidly, driven by significant investments in technology infrastructure and professional development for teachers (OECD, 2015). These countries have experienced widespread adoption of digital learning platforms, online assessments and data analytics to support personalized learning and improve educational outcomes.

In contrast, many developing countries face significant challenges in their digitisation efforts, including limited access to technology, inadequate infrastructure and a lack of trained teachers (UNESCO, 2020). However, there are notable examples of successful digitization initiatives in these areas, often supported by international organizations and private sector partnerships. For example, countries such as India and Brazil have implemented large-scale digital literacy programmes to increase access to quality education for underserved populations (Warschauer & Ames, 2010). Furthermore, the COVID-19 pandemic has served as a catalyst for digitization across the world, forcing even the most resource-constrained regions to adopt digital solutions for continuous education delivery (Hodges et al., 2020).

THE IMPORTANCE OF DIGITISATION

The importance of digitisation in public education is multifaceted, with significant implications for educational outcomes, accessibility and equity. Digitalisation has the potential to improve learning by providing students with access to a huge range of resources and tools that can be tailored to individual learning needs. Digital platforms enable

personalised learning experiences that cater for different learning styles and paces, thus improving student engagement and achievement (Means et al., 2010). In addition, digitization supports the development of assessment practices by providing real-time feedback, allowing teachers to make data-driven decisions that can directly address learning gaps.

Accessibility is another crucial aspect of digitisation, as digital tools can break down geographical and physical barriers to education. Online learning platforms allow students in remote or underserved areas to access high-quality educational content and connect with teachers and peers worldwide (Anderson & Simpson, 2012). This increased accessibility is particularly important for marginalized groups, including students with disabilities, who can benefit from assistive technologies and other digital tools designed to support different learning needs.

In addition, digitisation plays a crucial role in promoting equality in education. By providing equal access to digital resources and opportunities for all students, regardless of their socio-economic background, digitisation can help level the playing field and reduce educational inequalities (Selwyn, 2014). However, this potential depends on addressing the digital divide by ensuring that all students have access to the necessary devices, internet connectivity and support to fully participate in the digital learning environment.

THE DIGITISATION OF PUBLIC EDUCATION IN THE RELEVANT LITERATURE

The literature on the digital transformation of education presents a multifaceted exploration of how digitisation is reshaping education systems worldwide. Scholars have examined various aspects of this transformation, including the role of digital assets, digital labour and digital capacity in facilitating overall change within educational institutions. The transition from traditional to digital learning environments has been accelerated by global challenges, such as the COVID-19 pandemic, causing a reassessment of educational strategies and practices. The body of research presented below highlights the complexities involved in integrating digital technologies into education, emphasising the need for strategic planning, inclusive digital practices and a deeper understanding of the pedagogical implications of digitisation. The studies carried out analysing the implications and opportunities associated with digital transformation contribute to a broader debate on how education systems can evolve to meet the demands of the digital age.

Initially, Qayyum (2023) proposes an index of digitization of education that includes four critical variables: digital data, digital usage, digital work and digital outcomes. This index serves as a tool to assess the extent of digital transformation in education systems worldwide. While considerable research has focused on digital use - applying specific digital technologies to educational environments - Qayyum (2023) argues that countries with significant digital assets and a strong commitment to digital work are better positioned to transform their education systems overall. The COVID-19 pandemic highlighted the importance of these factors, as they played a key role in maintaining continuity of education during crises. It also highlights that, moving forward, researchers and practitioners need to prioritise digital access and work over simply expanding digital use. He suggests that future research should focus on indicators of digitization of education by country, best practices for addressing the challenges of digital work, and the impact of digitization on existing open and distance learning institutions. Ultimately, it argues that the critical question is not whether education systems should digitise, but rather what specific problems digitisation can solve in a given context. This perspective prompts a reassessment of how to approach digital transformation and highlights the need for continued research in this evolving field.

In the context of higher education in Thailand, Romprasert and Monjagapate (2020) explore the challenges and prospects of digitisation of university systems, particularly in autonomous institutions. Despite being independently organized, many Thai universities still operate under inefficient, bureaucratic frameworks, relying heavily on form-based documents. The authors argue that redesigning these systems to incorporate digital technologies is necessary but fraught with challenges, including significant costs and the need for specialized training and expertise. Although foundational technologies have been implemented, the transition to fully digitised education - where online learning and distance learners are the norm - remains incomplete. The authors criticise the slow adoption of active learning methods, which the Thai government has repeatedly stressed as necessary but not fully implemented. To address these shortcomings, Romprasert and Monjagapate (2020) recommend the adoption of digital instruments and a comprehensive redesign of university systems. They argue that these changes are necessary to meet current market demands for labour and to enhance the overall efficiency and effectiveness of educational institutions. The authors also highlight the importance of ongoing support and training for educators to ensure the successful implementation of these digital initiatives. Their work highlights the complexity of digitising education systems, particularly in contexts where traditional practices are deeply entrenched.

Shakhina et al. (2022) focus on the broader challenges of digitisation in the educational environment, emphasising the role of digital literacy as a cornerstone of this transformation. The authors argue that successful

digitization of education depends not only on the availability of digital technologies but also on the digital literacy of teachers. Digital literacy, as defined by Shakhina et al. (2022), includes a set of knowledge and skills necessary for the safe and effective use of digital technologies and Internet resources. The authors distinguish between digital literacy and digital competence, noting that the former includes elements of motivation and responsibility, which are crucial for the effective integration of digital tools in the educational process. The study identifies different levels of digital literacy - basic, advanced and proficient - each of which is characterised by different skills and competences. The authors also discuss the role of digital marketing in managing the digitisation of educational institutions, highlighting the importance of creating new digital communities, monitoring changes in the institution's image and developing customised marketing materials. Shakhina et al. (2022) conclude that the digital transformation of education is not only about adopting new technologies, but also about promoting a culture of digital literacy and competence among teachers and students. Their work highlights the complexity of digitising education systems, particularly in contexts where traditional practices are deeply entrenched.

Strokov (2020) provides a comprehensive analysis of the digitization process in contemporary education, emphasizing its relevance in the post-industrial era where the effectiveness of education directly affects the readiness of society to face various challenges. The author argues that as modern technologies increasingly affect education, they simultaneously require a reassessment of existing educational practices and their wider societal implications. Strokov (2020) identifies several critical problems associated with digitalisation, including the risk of dehumanising educational and social relations, the potential deepening of spiritual culture crises and the rise of pragmatism and individualism driven by personal comfort and consumption. Despite these challenges, the author outlines promising prospects for the future of digitization in education. These include equipping educational institutions with high-quality software, integrating information and web-based technologies, and adapting to new organisational structures. Strokov (2020) concludes that for digitization to succeed, it must be harmoniously integrated with the best traditions of domestic education while addressing the evolving socio-cultural needs of modern society. This dual approach, the author suggests, will not only modernise education but also contribute to the wider socio-economic and cultural development of society.

In another important study, Ronzhina et al. (2021) explore the impact of global digital transformations on the education sector, particularly in the context of the digital economy and society. The research focuses on assessing the quality of digitisation in Russian higher education through a questionnaire survey involving students and teachers at the Russian State Vocational Pedagogical University. The study reveals a generally low penetration of digital technologies in Russian higher education, as indicated by the participants' ratings. However, the contribution of digitisation to academic performance was moderately positive, although there were significant differences between students and teachers on the role of digital environments in education. Students found the digital environment more convenient compared to professors, highlighting a generational gap in the acceptance and use of digital tools. This research highlights the importance of further developing digital education strategies that align with both student expectations and pedagogical goals. The authors suggest that the insights gained from this study could contribute to reforms in the education system, thus accelerating and enhancing the digitization process in Russian universities.

Zizikova, Nikolaev and Levchenko (2023) delve into the need for a qualitative transformation of educational content through digitisation. The authors emphasize that digital technologies have become an integral part of educational processes at various levels of education, from preschool to higher education. Drawing on both domestic and international sources, the study presents examples of the use of digital resources and its impact on educational outcomes. A key focus of the research is the dual role of education not only in transmitting knowledge and skills but also in shaping responsible individuals. The study highlights the benefits of digitisation, such as improved access to information and enhanced learning opportunities. However, it also highlights important disadvantages, including the potential for digital tools to exacerbate inequalities and undermine traditional educational values. The authors call for a careful and strategic approach to integrating digital technologies into education, one that takes into account existing experiences and aligns with the long-term goals of educating the younger generation. They argue that while digitisation offers many opportunities, its implementation needs to be carefully managed to ensure that it supports rather than detracts from the educational mission.

Godin and Terekhova (2021) explore the multifaceted impact of information and communication technologies (ICT) on educational institutions, proposing a framework for understanding digital transformation in education. They argue that ICT integration affects educational institutions in four main dimensions: pedagogy, technology, organisation and economics. To analyse these impacts, the authors introduce four models that collectively describe the potential transformations caused by technology in education. These include a value chain model, which outlines the primary and secondary activities of educational institutions, and a quality chain diagram, which maps the sequence of activities within these institutions. In addition, they propose a model of a routine loop for teachers, which captures the daily activities of teachers in relation to software and communication technologies. Finally, the event chain process model details the interactions between students, teachers and educational materials, highlighting the role of ICT in these interactions. This

integrated modelling approach provides a powerful tool for examining the ongoing digital transformation in education, offering insights into how technological developments can be harnessed to enhance educational practices. By integrating these models, the study sheds light on the complexities of digitization and its potential to substantially reshape educational institutions.

Tække and Paulsen (2017) propose a theory of digitalisation in education based on an empirical study that describes how classroom teaching evolves in response to the pervasive influence of digital media. They introduce the concept of the 'three waves' of digitisation, describing a dialectical process of change within educational contexts. In the first wave, the traditional, closed classroom is disrupted as students gain access to the Internet, leading to challenges in maintaining focus and structure in teaching. Teachers often find themselves unprepared to manage these new dynamics, resulting in a period of adjustment. The second wave sees a re-evaluation of the teaching environment as social media and other digital tools are integrated into teaching practices, helping to restore focus and use more interactive learning experiences. In this phase, the Internet begins to enhance rather than disrupt the educational process. The third wave represents the maturation of digitisation in education, where teachers and students engage in meaningful interactions with external experts, researchers and other third parties, enriching the educational experience. This final stage marks a significant change in the way education is delivered, with digital media enabling a more open, connected and dynamic learning environment. Tække and Paulsen's (2017) theory provides a valuable framework for understanding the stages of digital transformation in education and highlights the potential of digital tools to fundamentally change traditional pedagogical models.

Pettersson (2021) examines the concept of digitisation in education through the prism of cultural-historical activity theory and learning levels, arguing that digitisation is not just about the application of technology but involves integrated organisational and pedagogical changes. The study focuses on two schools with extensive digitization processes, analyzing how these institutions perceive and implement digital practices. Pettersson (2021) finds that the way schools understand and define digitisation significantly affects their planning, budgeting, professional development and overall organisational strategy. The study highlights the importance of clear discussions about what digitisation entails, as different interpretations can lead to a variety of approaches and outcomes. For example, if digitisation is perceived primarily as a technological upgrade, schools may focus more on acquiring hardware and software, possibly neglecting necessary pedagogical adaptations. In contrast, a broader understanding of digitisation that includes pedagogical innovation and organisational restructuring may lead to more holistic and effective educational transformations. Pettersson's (2021) research highlights the need for schools to engage in deep, thoughtful conversations about the meaning and implications of digitisation to ensure that the process leads to meaningful and sustainable educational improvements.

Alnagrat et al. (2022) explore the impact of digitisation strategies in higher education, particularly in response to the unprecedented challenges posed by the COVID-19 pandemic. The authors discuss how the rapid shift towards online learning and virtual education has forced institutions, educators and students to seek flexible solutions to mitigate disruptions. Through a comprehensive review of the academic literature, the study identifies the key processes, issues, and implications associated with this rapid digital transformation. The findings suggest that digitisation strategies were crucial to enable higher education institutions (HEIs) to adapt to the challenges of the pandemic. The authors highlight the emergence of new learning opportunities through technologies such as virtual reality, which has become increasingly important in the digital learning landscape. The study highlights the need for HEIs to develop strong digital learning strategies that are practically focused and inclusive. This approach not only supports the continuity of education during crises, but also promotes the long-term sustainability of education systems. The research highlights the importance of strategic planning and policy development to ensure effective integration of digital learning technologies in higher education, paving the way for future developments in the field.

Vivitsou (2019) offers a critical examination of the metaphor of digitisation within educational discourse, exploring how this concept has evolved in response to the socio-economic changes of the twenty-first century. The study argues that digitisation has become a dominant narrative in education, often constructed as an essential and inevitable process to be embraced to address contemporary challenges. However, he argues that this narrative has been imbued with a sense in which digitisation is portrayed as a panacea that transcends its practical applications. Through a thematic and discourse analysis of policy and educational research documents, the study reveals how digitisation is framed in abstract and sometimes vague terms that can obscure the real implications and challenges of integrating technology into education. It also highlights how these narratives often blur the boundaries between technological and educational domains, leading to a discourse that can be both empowering and problematic. The study calls for a more in-depth understanding of digitisation, one that critically examines its underlying assumptions and addresses the complex realities of applying digital technologies in educational settings. In this way, educators and policymakers can better navigate the potential benefits and pitfalls of digitisation.

Rosak-Szyrocka (2024) explores the evolving landscape of higher education in the context of digitisation, focusing on the transition from University 4.0 (University 4.0) to the anticipated University 5.0 (University 5.0). The study uses a comprehensive analysis of research articles published between 2019 and 2023 to map current trends and future directions of digitisation in higher education. The findings reveal that digitisation is not just a technological change, but an interdisciplinary phenomenon that intersects with areas such as technology, education and management. The analysis highlights the strong links between digitisation and concepts such as online learning, digital transformation and sustainable development. The study suggests that the next evolution, University 5.0, will be characterised by a fully integrated digital environment that not only enhances educational processes but also aligns with sustainable development goals. Furthermore, Rosak-Szyrocka (2024) stresses the importance of developing soft skills, particularly emotional intelligence, among educators to effectively navigate this digital future. The study concludes that as universities continue to evolve, they must focus on creating a balance between technological advances and the human elements of education to promote a more holistic and sustainable educational environment.

Siljebo (2020) addresses the critical need for theoretically robust definitions of digitisation and digital transformation within educational research, particularly within schools. The author argues that while digitisation is often seen as a prerequisite for digital transformation, it does not necessarily enable such transformation. The study argues that both digitisation and digital transformation need to be fundamentally grounded in concepts of human learning and development to make sense in the educational context. This theoretical framework was empirically tested through a survey of seventeen Swedish school principals, which provided support for the proposed definitions and their practical application in the school environment. The findings suggest that leaders' perceptions align with the theoretical perspective, indicating that digitalisation, when understood in relation to learning and development, offers a solid basis for guiding digital transformation in schools. However, the study also acknowledges its limitations, particularly the small sample size, and calls for further research to refine and extend these definitions, especially in the context of distance learning in rural schools. Siljebo's (2020) work makes an important contribution to educational theory by offering an understanding of digitisation and its role in promoting educational transformation.

Finally, Mišianiková et al. (2021) explore the digital transformation of primary and secondary schools in Slovakia, focusing on the use of the SELFIE survey as a tool for training school principals. The authors stress the importance of a well-structured and systematically managed digital transformation process that is aligned with the evolving needs of the digital age. Their study highlights the critical role of school leaders and digital coordinators in leading this transformation, ensuring that schools not only adopt digital technologies but also integrate them meaningfully into the educational environment. The SELFIE tool was used to assess the current state of digitisation across various dimensions, including perspectives from leaders, teachers and students. The results of this assessment provided the basis for schools to develop customized action plans to achieve comprehensive digital transformation over a four-year period. The study highlights the importance of long-term support for school leaders as they navigate the complexities of digital transformation, suggesting that this support is essential for successful implementation at the national level. Mišianiková et al. (2021) contribute to the debate on digitisation in education by showing how structured assessments and leadership training can lead to effective transformation in schools.

CONCLUSIONS

This paper examines educational digitization as a complex and multidimensional transformation that significantly influences the operation of educational systems, pedagogical practices, and equity in access to knowledge. Through the analysis of theoretical concepts and a comprehensive review of the relevant literature, it highlights the key parameters, challenges, opportunities, and the importance of digitization for modernization and social justice in the educational process.

Digitization is defined not merely as a technological upgrade, but as a profound organizational and pedagogical change that redefines the roles of teachers and students, impacts curriculum design, and introduces new forms of learning and assessment. The historical overview demonstrates the gradual integration of technologies, from the first computers to the establishment of digital learning environments, with the global pandemic acting as a catalyst that accelerated developments and exposed the need for flexibility and resilience in education systems.

Challenges identified in the literature include implementation difficulties in countries with limited infrastructure, the need for professional development, inequalities in access to technology, and the risk of depersonalizing the educational relationship. Nevertheless, the opportunities offered are equally important: personalized learning, data-driven teaching improvements, elimination of geographical barriers, and the promotion of educational equity, especially for socially vulnerable groups. Digital competence and literacy are highlighted as critical success factors, along with the necessity for strategic planning, clear conceptual understanding of digitization, and strong leadership within educational institutions.

In conclusion, this study argues that digitization is not merely a technological advancement, but a fundamental pillar for modernizing education systems. When implemented with pedagogical soundness and social sensitivity, digitization can contribute significantly to the creation of a fairer, more flexible, and more effective education system.

ABSTRACT

This paper aims to analyze the theoretical approaches related to the acceptance and adoption of new technologies in the field of education, with particular reference to Educational Management Information Systems (EMIS). Its main purpose is to investigate the parameters that influence the use of these systems by their users, such as teachers, school principals, and other educational stakeholders, as well as to analyze the theoretical concepts related to their usage, through the Technology Acceptance Model (TAM), the Unified Theory of Acceptance and Use of Technology (UTAUT), and Rogers' Diffusion of Innovations Theory.

The objective of the study is to understand the factors that affect the acceptance of Educational Management Information Systems by their users, and to explore the strategies required to enhance the effectiveness of these systems in the educational sector. The paper focuses on examining the implementation of EMIS in various educational environments, analyzing the challenges and difficulties users face, and the potential impacts these challenges may have on the adoption and effectiveness of such systems.

The methodology followed aims to investigate theoretical approaches and evaluate their application at a practical level. Additionally, the study seeks to identify the barriers users encounter during the implementation of EMIS and to analyze strategies that could strengthen their adoption. Central to the discussion is the need for effective user support and training, as well as the improvement of infrastructure necessary for their successful implementation.

The study focuses on analyzing parameters associated with the positive or negative impact of user perceptions regarding the usability and usefulness of Educational Management Information Systems. It also examines the importance of social influence and facilitating conditions in the acceptance of these technologies.

This research presents important findings and proposals for improving EMIS in order to enhance efficiency and equity in education through the use of new technologies.

Keywords: Educational Management Information Systems, Methodology, Users

THEORETICAL APPROACHES TO THE PERCEPTION OF USERS

Theoretical frameworks for user perception and technology adoption are essential for understanding how individuals and organisations adopt new technologies, particularly in the context of education. These frameworks provide insights into the factors that influence the acceptance, use and diffusion of digital tools, including Management Information Systems (MIS) in educational environments. Among the most important models are the Technology Acceptance Model (TAM), the Unified Theory of Acceptance and Use of Technology (UTAUT) and Rogers' Diffusion of Innovations Theory (Rogers' Diffusion of Innovations Theory). Each offers a unique perspective on the process by which users adopt and integrate new technologies into their routines.

The technology acceptance model (TAM), developed by Davis (1989), is one of the most widely recognized models in the field of information systems. TAM argues that two main factors determine user acceptance of technology: perceived ease of use and perceived usefulness. Perceived ease of use refers to the extent to which a user believes that using a particular technology will be effortless, while perceived usefulness relates to the extent to which a user believes that the technology will improve their work performance. These factors influence a user's attitude towards the use of the technology, which in turn influences the user's intention to use the technology, ultimately leading to the actual adoption of the technology. TAM has been extensively validated in various contexts, including education, where it has been used to predict the acceptance of learning management systems, educational software and other digital tools (Venkatesh & Davis, 2000).

Based on TAM, the Unified Theory of Technology Acceptance and Use (UTAUT) was developed by Venkatesh et al. (2003) to provide a more comprehensive understanding of technology adoption. The UTAUT incorporates additional factors such as social influence, facilitating conditions and user demographics. Social influence refers to the extent to which individuals perceive that "significant others" believe they should use the new technology. Enabling conditions include the resources and support available to users that can facilitate the adoption process. UTAUT also considers gender, age, experience and willingness to use as moderators that can influence the impact of these factors on technology adoption. In educational settings, the UTAUT has been particularly useful in understanding the adoption of complex systems such as MIS, where social dynamics and organizational support play a critical role in successful implementation (Venkatesh et al., 2012).

Rogers' (2003) Diffusion of Innovation Theory offers a broader sociological perspective on how new ideas and technologies spread in a society or organisation. Rogers (2003) identifies five key stages in the adoption process: knowledge, persuasion, decision, implementation and confirmation. The theory also highlights the role of individual characteristics (such as innovation) and social systems in the diffusion process. Rogers (2003) categorizes adopters into five groups-innovators, early adopters, early majority, late majority, and late adopters-each of which adopts new technologies at different rates. In the context of education, this theory helps explain how digital tools and MIS can be adopted more quickly by some groups within an institution, while others may resist or delay adoption. Understanding these dynamics is crucial for designing interventions that can facilitate wider acceptance and integration of new technologies into educational environments (Rogers, 2003).

The perception of users in education is deeply influenced by these theoretical frameworks, which collectively emphasise the importance of both individual and contextual factors in technology adoption. In educational settings, perceived ease of use and usefulness (as described in TAM) are critical in determining whether teachers, students, and administrators will adopt new digital tools. For example, if an MIS is perceived as too complex or not particularly beneficial for enhancing educational outcomes, it is unlikely to be widely adopted, regardless of its potential capabilities (Davis, 1989). Furthermore, the role of social influence and enabling conditions (as emphasized in UTAUT) cannot be underestimated in educational institutions, where decisions to adopt technology are often influenced by colleagues, leadership and the availability of adequate training and resources (Venkatesh et al, 2003).

The application of Rogers' Diffusion of Innovation Theory to education further illustrates the challenges and opportunities associated with the introduction of new technologies. Teachers and administrators categorized as innovators or early adopters are often more willing to experiment and support new tools such as MIS, paving the way for wider acceptance within the educational institution. However, for widespread adoption to occur, it is necessary to address the concerns of the early and late majority, who may require additional support and evidence of the technology's effectiveness before committing to its use (Rogers, 2003). This diffusion process is particularly important in large educational organisations, where successful integration of technology often depends on the ability to manage change across diverse groups with different levels of technological competence and openness to innovation.

USERS' PERCEPTIONS OF EDUCATION MANAGEMENT INFORMATION SYSTEMS IN THE MODERN LITERATURE

An exploration of Education Management Information Systems (EMIS) reveals their critical importance in enhancing administrative efficiency and decision making within educational institutions. Based on the general understanding of EMIS as a tool to streamline operations and support educational management, the following studies delve into the perceptions of EMIS users in various educational contexts. These studies highlight the varying degrees of success, challenges and opportunities associated with EMIS implementation, providing an understanding of how these systems can be optimized to meet the specific needs of different educational environments.

Alshamsi et al. (2023) investigate the factors that influence the intention to use educational management information systems (EMIS) in private universities in the United Arab Emirates. The study uses a quantitative approach, using the Technology Acceptance Model (TAM), Task Technology Fit (TTF) and DeLone and McLean (D&M) models, alongside trust as a new variable, to examine the relationships that influence executive decisions to adopt EMIS. Data were collected using a structured questionnaire and analyzed using IBM SPSS and Partial Least Squares (PLS) software. The results provide valuable insights into how usability, work technology, and trust significantly influence the intention to use EMIS. The findings highlight the need for private universities to focus on these key factors to ensure successful EMIS implementation. The study suggests that understanding these influences can help senior managers make informed decisions about EMIS adoption and integration, thereby improving the effectiveness of information management within their institutions.

Jallow and Sanner (2023) explore the role of EMIS in improving equity in education, focusing on a case study from The Gambia. The study examines how the Ministry of Basic and Secondary Education (MoBSE) in The Gambia uses EMIS, supported by digital technologies, to monitor and address inequitable distribution of educational resources. The case study methodology includes interviews, observations and thematic content analysis to explore the challenges and opportunities associated with implementing EMIS at the regional level. The findings reveal that challenges in the delivery of education services are primarily due to organizational, institutional, capacity, infrastructure and resource constraints. However, the most significant challenge identified is the lack of access and capacity to use data-an information challenge that EMIS aims to address. The study concludes that overcoming these information challenges is necessary to improve the efficiency, effectiveness and equity of education service delivery. The research provides valuable insights into how digital technologies, through EMIS, can improve education management and promote equitable resource allocation.

Wamutoro et al. (2022) investigated the effectiveness of Education Management Information Systems (EMIS) in managing student information in public secondary schools in Uasin Gishu County, Kenya. The study highlights the growing need for EMIS as manual systems are proving increasingly cumbersome, affecting overall management effectiveness in schools. Using a mixed-methods research design, the study collected data from 302 respondents, including school principals, vice-principals, heads of departments and directors of education. The findings reveal that EMIS significantly enhances the management of public secondary schools, with a notable impact on student information management. Regression analysis shows a strong positive relationship between EMIS effectiveness and improved school management practices, particularly in communication and instructional strategies. The study concludes that continuous improvement and investment in EMIS is vital to maintain its effectiveness, recommending that schools focus on better implementation practices to maximize the benefits of EMIS in student records management and overall school administration.

Chowdhary (2022) evaluates the effectiveness of Education Management Information Systems (EMIS) in non-government colleges in Bangladesh, focusing on the perceptions of college principals. The study uses a descriptive survey design with a quantitative approach, using structured questionnaires to collect data from a sample of 92 principals. The findings reveal that while system quality (SQ) and system use (SU) are perceived neutrally, there is a positive trend in their evaluation. Furthermore, information quality (IQ), user satisfaction (US) and perceived net benefits (PNB) were rated moderately good or good, suggesting that EMIS is generally perceived as beneficial but with room for improvement. The study suggests that the insights gained could be valuable for policy makers and educational administrators in terms of upgrading EMIS and making informed decisions to improve the effectiveness of the system. Chowdhary's (2022) research highlights the importance of continuous evaluation and improvement of EMIS to meet the evolving needs of educational institutions and ensure optimal performance.

Stamenkov and Zhaku-Hani (2021) investigate the perceived benefits and use of Education Management Information Systems (EMIS) after adoption in a mandatory context, focusing on public primary schools in North

Macedonia. The study integrates the Technology Acceptance Model (TAM) and the Technology-Organization-Environment (TOE) framework to develop a conceptual model that examines how different factors influence EMIS use after adoption. Using PLS-SEM for data analysis, the study finds that perceived ease of use, perceived usefulness, compatibility, complexity, and government support indirectly influence post-adoption use. However, technological knowledge and external ICT support are the only factors that directly influence how EMIS is used after adoption. The research highlights that in mandatory settings, the perceived benefits of EMIS use become crucial as they determine the extent to which individuals continue to engage with the system. The study contributes to the literature by identifying key factors influencing continued EMIS use, highlighting the importance of perceived benefits as a mediator in this process.

Ali et al. (2021) provide a comprehensive analysis of the applicability of Education Management Information Systems (EMIS) in secondary education, focusing on the perceptions of principals using the Technology, Organization, and Environment (TOE) framework. The study involved a large-scale survey of secondary school principals to assess how effectively EMIS fulfills its objectives in school management. The results indicate that principals perceive EMIS as extremely useful for improving administrative performance, particularly in terms of data management and decision-making processes. However, the study also highlights the need for additional resources, both human and financial, to fully realize the potential of EMIS in these schools. The findings suggest that while EMIS has a significant impact on improving the efficiency and effectiveness of school management, its successful implementation depends on the availability of appropriate support from top and middle management. The study highlights the importance of providing the necessary infrastructure and training to ensure that EMIS can be used effectively in secondary education.

Danso et al. (2021) conducted a study to validate the DeLone and McLean Information Systems (IS) success model in the context of Education Management Information Systems (EMIS). The research focuses on how the quality of the system, information and service affects the overall success of EMIS, particularly in terms of usage, user satisfaction and net benefits. Using purposive sampling and a structured questionnaire, the study collects data from 100 EMIS users. The findings show that system quality, information quality and usage have a significant positive impact on the net benefits of EMIS, reflecting the effectiveness of the system in achieving the intended outcomes. However, service quality was found to contribute insignificantly to user satisfaction, suggesting that other factors may play a more critical role in influencing satisfaction levels. This study highlights the importance of maintaining high standards in system and information quality to ensure successful adoption and continued use of EMIS in educational environments, ultimately leading to improved institutional performance.

Saad and Daud (2020) investigate the acceptance of a web-based Education Management Information System (EMIS), with particular focus on the Data and Information (DI) domains in Malaysia, focusing on factors such as usability, ease of use and user satisfaction. The study employs a quantitative approach, using Pearson's correlation and linear regression to analyse survey data from 120 DI teachers. The findings reveal that usability and ease of use are critical determinants of user satisfaction, which in turn affects the overall acceptance of online EMIS. The study also identifies significant demographic differences in attitudes towards EMIS, with teachers aged between 31 and 40 years and those with a high frequency of use reporting higher levels of satisfaction. These results highlight the importance of designing EMIS with a user-friendly interface and providing sufficient training to ensure that teachers can use the system effectively. The study concludes that by focusing on these key factors, educational institutions can enhance the adoption and effectiveness of EMIS in managing school data and information.

Nkata and Dida (2019) explore the implementation of an Education Management Information System (EMIS) in Tanzanian secondary schools, focusing on its potential to improve the quality of education for sustainable development. The study identifies significant limitations in the existing manual systems used to collect, store and disseminate education information, which prevent timely and accurate data management. The study highlights that inadequate parental involvement in monitoring students' academic progress, often due to manual system limitations, leads to suboptimal student performance. To address this issue, the study developed and implemented a centralized EMIS to improve parental involvement, allowing for more effective monitoring and tracking of student progress. The findings suggest that the implementation of such a system could significantly improve educational outcomes by enhancing better communication between parents and schools, ultimately contributing to the overall improvement in the quality of education in Tanzania.

Cuartero and Role (2018) investigate the implementation and effectiveness of Education Management Information Systems (EMIS) in public elementary schools in Surigao Del Sur, Philippines. The study employed a descriptive survey method using a questionnaire to collect data from nine selected public elementary schools in three clusters in Surigao Del Sur Division. The findings revealed that the Student Management Information Systems (MIS) module was the most effectively implemented, receiving the highest mean score among the eight EMIS modules evaluated. In contrast, the Finance MIS module was found to be the least effectively implemented, indicating the need for

further improvement in the design, implementation and evaluation processes. The study concluded that while EMIS is generally well implemented in public primary schools in the district, there is a particular need to strengthen the Finance MIS module. The researchers recommend sharing best practices among schools to create a more sustainable and effective EMIS, particularly in the financial management aspects.

Damin et al. (2015) investigated the use of Education Management Information Systems (EMIS) in Iraq, focusing on factors influencing the adoption and effectiveness of these systems. The study highlights that EMIS can provide education leaders and decision makers with comprehensive, integrated and timely data, which is vital for effective planning, monitoring and decision making. However, the study identifies significant challenges to EMIS adoption in Iraq's education sector, including issues related to ease of use, utility, cultural attitudes, management policies, and security concerns. The study uses mixed research methods to explore these challenges and proposes a model for addressing them, highlighting the need for a more strategic approach to EMIS implementation. The findings suggest that improving the usability and accessibility of EMIS, along with addressing cultural and political barriers, could enhance the adoption and impact of these systems in supporting educational management in Iraq.

Aheto and Fletcher (2012) examine the awareness and use of Education Management Information Systems (EMIS) among educational institutions in the Greater Accra Region in Ghana. The descriptive research design used in the study reveals that while EMIS offices are present in district and local education offices, there is varying awareness and use among stakeholders such as teachers, parents and education NGOs. The study finds that EMIS key targets, particularly the Annual School Census, are identified as vital sources of information for educational planning and management. However, the lack of a dedicated EMIS website and limited information for some user groups, particularly parents, prevent full use of the system. The study recommends the development of a dedicated EMIS website to improve accessibility and use by all stakeholders. By improving user awareness and providing reliable access to educational data, the study suggests that EMIS can better serve its intended purpose of supporting educational decision-making and policy development.

Magaña et al. (2012) present the development and implementation of an Education Management Information System (EMIS) designed to support institutional planning at the University of Colima, Mexico. The system, called e-Planea, was created to systematize and streamline the process of creating annual reports for different university departments and faculties. By automating the report creation process, EMIS significantly reduced the time and effort required by department heads and planning consultants, improving overall efficiency. Usability testing of the system revealed high user satisfaction, indicating that the platform effectively met the needs of its users and enhanced institutional management. The study highlights the importance of integrating user-friendly EMIS platforms in higher education institutions to facilitate better planning and decision-making processes. The success of e-Planea at the University of Colima demonstrates how a well-designed EMIS can contribute to effective management of educational institutions by providing timely and relevant information to administrators.

Also, Santana-Mancilla et al. (2013) present a detailed usability study of the Education Management Information System (EMIS) e-planea at the University of Colima in Mexico. The study specifically evaluated the usability of three key modules within the platform: Annual Reports, Undergraduate Statistics and High School Statistics. The study was conducted in two phases: the first phase included a heuristic evaluation, while the second phase used the System Usability Scale (SUS) and the Technology Acceptance Model (TAM) to measure user satisfaction. The findings of this study showed that users were very satisfied with the platform, as evidenced by the positive scores on the SUS and TAM assessments. The study highlights the importance of rigorous usability testing in developing and improving EMIS platforms to ensure that they effectively meet user needs. The high user satisfaction reported in this study suggests that e-planea is a valuable tool for institutional data management that can enhance decision-making processes in the university.

Dospinescu et al. (2011) examine the perceptions of students from the financial sector about new learning methods in the knowledge society, with a particular focus on e-learning. The research was conducted among students of the Faculty of Economics and Business Administration at the University "Alexandru Ioan Cuza" in Iasi, Romania. The study aimed to identify students' acceptance and perceived usefulness of e-learning methods, as well as their preferences for different types of teaching-learning processes, including traditional methods, e-learning and blended methods. The findings reveal significant discrepancies between theoretical expectations of e-learning and students' practical acceptance and use of e-learning. One of the main barriers identified is students' reluctance to adopt new learning methods, which the authors attribute to resistance to change and lack of information about the advantages of e-learning. The study suggests that extending the research to other universities could provide a more comprehensive understanding of the impact of e-learning nationally, potentially leading to more effective implementation strategies across the country.

The studies reviewed highlight the multifaceted role of EMIS in educational institutions, emphasising the importance of usability, proper implementation and continuous evaluation to maximise their effectiveness. While EMIS has been shown to significantly enhance administrative functions and decision-making processes, the success of these systems depends largely on factors such as user satisfaction, institutional support and the quality of the system itself. The findings suggest that continuous improvements in system design, coupled with adequate training and resource allocation, are necessary to maintain the benefits of EMIS. In addition, a tailored approach that takes into account the specific needs and challenges of each educational setting is vital to ensure that EMIS can effectively support institutional goals and contribute to the overall quality of education.

CONCLUSIONS

This study highlighted the importance of theoretical approaches in understanding the acceptance and use of Educational Management Information Systems (EMIS) by their users, including teachers, school principals, and other educational administrators. Through the analysis of the Technology Acceptance Model (TAM), the Unified Theory of Acceptance and Use of Technology (UTAUT), and Rogers' Diffusion of Innovations Theory, it becomes evident that users' perceptions of usefulness and ease of use, along with social influence and facilitating conditions, are crucial factors for the successful adoption and implementation of such systems.

The review of contemporary literature revealed that while EMIS offer multiple benefits for educational administration—such as improved data management, decision-making support, and enhanced efficiency—their effectiveness depends on key factors. These include system usability, the quality of the information provided, the level of user training and support, and the availability of adequate technical and financial infrastructure. Furthermore, the research emphasized the need for continuous evaluation and adaptation of EMIS to meet the evolving needs of educational institutions.

Special emphasis was placed on the sociocultural and organizational factors that influence the diffusion of innovative technologies in education. The studies indicated that successful adoption requires strong leadership support, active user involvement, and the cultivation of digital literacy. In addition, the differentiation between early and late adopters shows that EMIS implementation cannot be uniform, but must be tailored to the level of technological maturity and acceptance within each educational context.

In conclusion, the successful adoption of EMIS is not merely a technical challenge but primarily an educational and organizational one. Understanding the theoretical models of technology acceptance, combined with empirical evidence from diverse educational systems worldwide, provides a valuable framework for designing strategies that enhance the functionality and impact of EMIS. Ultimately, this contributes to the improvement of quality and equity in education through the effective integration of new technologies.

THE ATTITUDES AND PERCEPTIONS OF PRIMARY AND SECONDARY EDUCATION EXECUTIVES IN THE GREEK EDUCATION SYSTEM, ON THE ADMINISTRATION OF EDUCATION AND THE INNOVATIONS THAT ARE IMPLEMENTED

Paschodimas Georgios
Secondary Education Teacher, PE11 Physical Education
Preveza, Greece
email: g.paschodimas@yahoo.gr

ABSTRACT

This research was carried out for the needs of writing the teacher's Thesis in the context of completing the Postgraduate Program entitled "Administration & Organization of Educational Units" at the International Hellenic University, which was completed in June 2024.

The study presents important findings regarding: the profile, perceptions of educational executives on educational administration, the needs and challenges they face, as well as the priorities for improving the educational system.

For the needs of publishing research data at the 1st International Scientific Conference of Preveza entitled: "Digital Media in Modern Educational Reality, Positions, Contrasts, Challenges and Prospects", results of the study that deal with the evaluation of the use of digital media as innovative practices in educational administration, with the aim of upgrading administrative procedures and improving communication within the educational organizationwere sought.

This study explored, among other things, how digital transition can contribute to reducing bureaucracy, saving time and resources, as well as enhancing transparency and collective decision-making. A quantitative methodology was used to carry out the research, collecting data through structured questionnaires distributed to teachers and administrators from various levels of the education system. The sample was selected purposively to ensure the representativeness of the population and to capture different perspectives on the use of digital media in daily administrative practice. The data analysis was carried out using statistical methods, allowing conclusions to be drawn about the effects and challenges that accompany the integration of digital technology.

Keywords: digital media, educational administration, innovation, digital transition, vocational training.

INTRODUCTION

The administration of education in the Greek education system consists of various bodies, levels and entities that collaborate to plan, organize, implement and monitor the educational process. The main bodies of education administration in Greece are the following: The Ministry of Education and Religious Affairs (central level): The ministry is responsible for establishing educational policies and programs, managing resources and providing general guidance to the education system. The Regional Directorates of Education (regional level): The regional directorates are responsible for implementing educational policies and programs at the regional level. They coordinate the actions of schools and provide support to the Directors of Education. The Directorates of Education (prefecture level): The Directorates of Education are responsible for implementing educational policies and programs at the level of the Regional Unit (Prefecture). They coordinate the actions of schools and provide support to the directors of school units. The Principal at the school level: Principals are responsible for the administration and organization of schools. They provide guidance and support to the teaching staff, manage the school's resources and ensure the smooth functioning of the educational process. Principals are supported by: The Deputy Principal, the Teachers' Association, the School Committee, the Municipal Education Committee and the Parents' and Guardians' Associations.

At the local level, recent reforms redefine the role of education institutions, giving the school unit greater autonomy as well as the ability to plan, organize and evaluate its work (European Commission-Eurydice, 2023).

FORMULATION OF THE PROBLEM

Educational administration in the Greek educational system involves the coordination, organization and implementation of policies and programs concerning the education sector. The responsibilities of educational administration cover issues such as school management, training of educational staff, evaluation of the educational process and development of policies to improve the quality of education. (Katsaros 2008).

Regarding the innovationsapplied during its implementation, boththe political leadership and the executives participating in the design of its policies have shown interest and efforts to introduce innovations aimed at improving the administration of education,

Some innovations used to date in educational administration were the following:

- Digital governance with the introduction of technological tools for more flexible and efficient administration. Educational assessment for the fairer and more comprehensive evaluation of students, teachers and processes. Open schools and administration structures that promote cooperation between teachers, students, parents and the local community. Education for sustainability, incorporating environmental and administrative sustainability practices. Decentralization and autonomy. Although it remains limited, as most decisions are made centrally. Continuous training of executives, through institutionalized bodies and university programs. Support of administrative bodies, with specialized personnel: and possible restructuring of the administrative organization chart, (Dagdilelis, 2005), (Karachaliou, 2022), (EuropeanCommission - Eurydice , 2023), (Tintoreandal , 2022)
- Efforts to introduce innovations continue to evolve, as education adapts to the needs of modern society and technology, and in this context, this study aspires to contribute with its findings both to the evaluation of existing innovations and good administrative practices, but also to highlight the need for new ones, which will strengthen and empower both educational institutions and those who administer them.

REVIEW OF RELEVANT STUDIES

The literature review helps the reader understand the context of the research and recognize the value of adding their own contribution to the field being investigated (Creswell, 2008).

In order to better study the problem and seek data on the innovations implemented in educational administration, to evaluate them, and to highlight new ones, relevant research in Greece and abroad was selected.

From Greece were selected

The research by **M. Lazarou, P. Papageorgaki, G. Fouzas** entitled "The introduction and implementation of technological innovations as a factor of administrative efficiency in education" Lazarou M, Papageorgaki P, Fouzas G (2017), which was carried out on a sample of two hundred and sixty (260) active teachers (permanent and substitute) of the Primary Education Directorate of Corinth, who served in the prefecture during the five-year period 2010-2015 (continuously or in parts). Another research implemented in Greece by **M. Kazakou** and **G. Koutromanos** is entitled "E-

Governance in the administration of education: Investigation of the factors that influence the intention to use it by education executives" Kazakou M., Koutromanos G., (2016). The survey was conducted from November 12, 2014 to December 24, 2014 at the Central Office (CO) of the Ministry of Education, Research and Religious Affairs, which houses the General Secretariat of the Ministry of Education, Research and Religious Affairs and the General Secretariat of Religious Affairs. 88 Heads of General Directorates, Directorates and Departments of the above General Secretariats participated . In the survey entitled: "Attitudes and perceptions of primary education teachers on issues related to sustainable development and the sustainability of the school unit" conducted by **Vasiliki Karachaliou,** the views of primary education teachers on Sustainability and the Sustainable School were investigated. Some of the research questions of the survey had to do with innovations in school administration, Karachaliou, (2022).

From abroad were selected

The research entitled:"The Relationship between School Administrators' Agile Leadership and their Innovation Management Competencies" was doneinTurkey by**Gökçe Özdemir** ., G. Özdemir, (2023). The purpose of this research was to determine the relationship between school principals' flexibility, leadership and innovation management capabilities according to teachers' perceptions. The research was conducted with the scanning model, which is one of the descriptive research methods. The population of the research was primary school teachers working in the Şahinbey district of Gaziantep.

A comparative study conducted by **Tintoré et al. (2022)** in Spain, titled "Management model, leadership and autonomy in Portuguese and Spanish public schools: A comparative analysis," examined the educational systems of Portugal and Spain. The research focused on key variables related to the management model, including the general organization of education, the characteristics of the teaching profession (encompassing the recruitment and selection processes for teachers and principals), and the level of school autonomy and the nature of administration and leadership. The study's findings revealed a structural proximity in school governance in both countries, which adhere to a management model that is simultaneously centralized and participatory. The researchers concluded that the policies implemented by Portugal to improve education – such as the extension of compulsory education, legislative stability, and the re-evaluation of schools' internal organization – have been successful and can serve as a model for Spain. It was also emphasized that both countries could benefit from empowering principals to emerge as leaders for learning and from enhancing school autonomy to foster necessary changes in education.

A large survey of educational institutions in the countries of the European Union was carried out by the **European Commission, EACEA, Eurydice, 2013.** Entitled "Key Figures for Teachers and School Leaders in Europe", EACEA, Eurydice, (2013). In terms of the correlation of this report with the present study, the results regarding the sixth thematic chapter referring to the Levels of Autonomy and Responsibilities of Teachers and School Leaders are of interest.

PURPOSE OF THE STUDY AND RESEARCH QUESTIONS.

The purpose of the thesis is to investigate, analyze and understand the opinions, beliefs and perceptions of Primary and Secondary Education executives regarding the way education is administered and how they are influenced by the innovations it implements.

Specifically, the main objectives of the work could be: Understanding the specific views and beliefs of teachers regarding educational administration and administration innovations. Highlighting the challenges and obstacles that teachers face in implementing innovations in educational administration. Assessing the political, institutional and economic context that influences teachers' perceptions and attitudes. Exploring how teachers' perceptions and attitudes influence educational policy and the quality of education.

Deepening and understanding the way teachers perceive educational administration and how they react to innovations introduced in this field can provide useful indications for improving educational policy and promoting innovations in educational administration.

Having previously formulated the objectives of the thesis and in order for them to be better understood, the following research questions were formulated:

1. What are the attitudes and perceptions of primary and secondary education executives regarding the importance of educational administration?
2. Are there differences in perceptions and attitudes between primary and secondary education executives regarding educational administration and innovations?

3. How do education executives perceive innovations in the field of administration and what are their views on the need for innovation in this area?
4. How do primary and secondary education executives perceive the influence of educational administration on student learning and education?
5. What are the key challenges and constraints that education executives face when trying to implement innovations in educational administration?
6. What are the institutional and political frameworks that influence communication and collaboration between executives when they are called upon to implement innovative policies in educational administration?

METHODOLOGY

The sample selection process in a quantitative study is critical to the reliability and specificity of the results. The steps followed to select a representative sample were clearly defined by the purpose of the study and the research questions formulated. This helped in understanding the population-group that was decided to be examined.since the population of a study consists of those who have characteristics that are of interest to our research (Creswell, 2008).

In the effort to select the appropriate sample population, the crucial question of the size of the population serving this research was raised. It was judged that this research could be served by a population of one hundred and thirty-two (132) education executives who would be selected using the purposive sampling method and who meet the conditions to serve the purpose of the research (Creswell, 2008).

Of these, 80 will be secondary education executives and 52 primary education & preschool education executives, 80 will be men and 52 women, while an effort will be made to select 50-50 new and old executives, from a list of executives per Education Directorate. Initially, the electronic questionnaire was sent to all primary & secondary education school units in the Greek territory and from the responses, 132 responses that met the demographic characteristics (region of education, level of education, gender and relevant experience in administration) were deliberately checked so that the sample would be more representative of the entire population of education executives in the Greek territory.

RESULTS & ANALYSIS

Table 3
Distribution of gender, age, years of experience in education and as an education executive

		N	%
Sex	Man	53	40.2
	Woman	79	59.8
Age	21-30	4	3.0
	31-40	13	9.8
	41-50	39	29.5
	51-60	64	48.5
	Over 61	12	9.1
Years of Experience in Education	1-10	19	14.4
	11-20	35	26.5
	21-30	54	40.9
	Over 31	24	18.2
Years of Experience as an Executive in Education	1-5	67	50.8
	6-10	25	18.9
	11-15	22	16.7
	16-20	11	8.3
	Over 21	7	5.3

Mean values and standard deviations were used to describe the dimensions and the remaining quantitative variables, while for categorical measurements such as gender, populations and percentages were used. The effect of education level and total years of experience in education on the dimensions was evaluated using the analysis of variance criterion, followed by multiple comparisons tests with the Bonferroni criterion. The analysis was performed with SPSS v28.0 software and the significance level was set equal to 0.05 in all cases.

Demographics and key figures

Table 1 describes the distribution of gender, age, years of experience and years of experience working as an education executive in the sample. Initially, there is a distribution of the 132 participants by gender, with men constituting 40.2% (N=53) and women 59.8% (N=79) of the sample.

Table 2 presents the distribution of participants' responses to questions concerning their attitudes and perceptions regarding innovations in educational administration. Analyzing the responses, it is found that, to the question "I appreciate the innovations applied in educational administration." 49.2% of the sample agree, 34.1% fully agree, while 16.7% responded in a neutral manner. Regarding whether innovative practices are applied in the administrative procedures of the participants' educational organizations, 35.6% held a neutral position, 30.3% agree, 17.4% disagree, 14.4% fully agree, while only 2.3% completely disagree with this view. Additionally, 40.2% agree that innovative practices have an impact on the effectiveness and quality of the educational process, 28.8% responded neutrally, 26.5% fully agree, 3.8% disagree, while 0.8% completely disagree. To the question "Are you informed about the technological innovations that are incorporated into educational administration?", 47.7% of the sample agree, 24.2% responded neutrally, 17.4% fully agree, 8.3% disagree, while only 2.3% completely disagree. Regarding whether administrators are willing to adopt innovative ideas, 37.9% of the sample responded in a neutral way, 35.6% agreed, 13.6% disagreed, 11.4% completely agreed, while 1.5% completely disagreed. Finally, 43.2% of the sample agreed with the view that participation in the decision-making process enhances innovation in educational administration, 37.1% completely agreed, 15.95 responded in a neutral way, 3.0% disagreed, while only 0.8% completely disagreed.

Table 2
Distribution of the sample's responses to questions concerning attitudes and perceptions regarding innovations in management

	I Completely agree.		Agree		Neutral		Disagree		I Completely disagree.	
	N	%	N	%	N	%	N	%	N	%
8. I appreciate the innovations implemented in educational administration.	45	34.1	65	49.2	22	16.7	0	0.0	0	0.0
9. Are innovative practices applied in the administrative processes of your educational organizations?	19	14.4	40	30.3	47	35.6	23	17.4	3	2.3
10. Do innovative practices have an impact on the effectiveness and quality of the educational process?	35	26.5	53	40.2	38	28.8	5	3.8	1	0.8
11. Are you up to date on technological innovations being incorporated into educational administration?	23	17.4	63	47.7	32	24.2	11	8.3	3	2.3
12. Are management willing to adopt innovative ideas and practices?	15	11.4	47	35.6	50	37.9	18	13.6	2	1.5
13. In your opinion, is participation in the decision-making process a process that enhances innovation in educational administration?	49	37.1	57	43.2	21	15.9	4	3.0	1	0.8

Table 3 presents the distribution of participants' responses to a question regarding the challenges facing education administration in relation to preparing for technological change. More specifically, 30.3% of the sample believe that the administration faces no challenge, 46.2% believe that it faces a slight challenge, 17.4% took a neutral stance, 4.5% believe that it faces a significant challenge, 4.5% believe that it faces a significant challenge, while only 1.5% believe that it faces a very significant challenge in terms of preparing for technological change.

Table 3
Distribution of responses to a question concerning management challenges in relation to technological development

		N	%
24. In your opinion, does education administration face challenges in relation to preparing for technological development?	No challenge at all	40	30.3
	Light challenge	61	46.2
	Neutral	23	17.4
	A significant challenge	6	4.5
	Very important challenge	2	1.5

DISCUSSION & CONCLUSIONS-ANALYSIS OF THE FINDINGS IN RELATION TO THE LITERATURE

Comparative Analysis with Research in Greece:

Perception of Innovations and Collaboration: Teachers are distinguished as positively disposed towards innovations, with particular emphasis on technological development and collaboration at various levels of the education system, despite the fact that lack of funding constitutes a significant challenge.

Effect of Experience and Educational Level: no statistically significant differences were found between educational levels regarding the various dimensions (management, innovation, etc.). On the contrary, differences in perceptions appear with respect to years of experience, with the sample with 21–30 years of experience showing higher values in various dimensions (management, innovation, relevance) compared to those with more experience.

These findings offer valuable insights into the needs and challenges faced by the educational organization and can form the basis for targeted policies and programs that will improve administrative processes, enhance innovation, and promote effective collaboration in the field of education.

The analysis of the findings and the comparison with other studies show that the teachers participating in the study are mainly women in the age group of 51–60 years, with significant experience and a high educational level (postgraduate). They agree on the positive impact of administration on the quality of educational services, but recognize the need for further support in their professional development. The study highlights the importance of innovations and technological development in improving administrative efficiency, reducing bureaucracy and costs. These conclusions are consistent with the research of Lazarus, Kazakos & Koutromanos and international studies, which highlight the need for structural changes. The statistical findings show that perceptions of administration, innovation, relevance and challenges differ significantly depending on years of experience, while opinions regarding collaborations remain uniform. This highlights the impact of experience on teachers' practices and perceptions.

Comparative Analysis with International Research:

Comparison with research from abroad (e.g. by Gökçe Özdemir and Tintoré et al.) confirms the importance of flexible leadership and collective management, while common problems such as lack of funding and excessive bureaucracy are observed. Özdemir's study on the Turkish education system highlights the importance of flexible leadership in managing innovation and creating an organizational culture that enhances the effectiveness of school units. Tintoré et al.'s research on Portugal and Spain highlights the need to increase school autonomy and reduce bureaucracy, while the European Commission's report (Eurydice, 2013) demonstrates the complexity of the tasks of school heads, the importance of professional experience and the diversity in leadership and management structures in Europe.

Overall, research confirms the importance of structural changes, technology, leadership, and autonomy in improving education and its administration.

The main findings of the paper reveal a complex, yet coherent portrait of teaching staff and their perceptions of management and innovation in education, providing a deeper virtual vision of the needs and challenges in the field of educational management and indicate that improvement proposals should take into account both the educational level and the experience of staff, aiming to develop policies that promote innovation, flexible leadership and collaboration at all levels of the education system. These findings show that the digital transition can act as a catalyst for innovation in the

field of educational management, while at the same time highlighting the need for continuous support and professional development of executives in this field.

Suggestions for study and further research

The paper also provides valuable information for formulating strategies that will lead to a more efficient, transparent and innovative educational environment, while also suggesting further research to identify and address the factors that limit the effective use of digital media as well as modern innovative practices in educational administration such as the use of artificial intelligence (AI).

THE GENDER DIMENSION IN THE UTILIZATION AND USE OF DIGITAL TECHNOLOGY (BY TEACHERS, MALE AND FEMALE) IN SECONDARY EDUCATION

Efstathiadou Anna
Teacher PE02 Philology
1st Ptolemaida High School
Kozani, Greece
email: annitaefkoz@gmail.com

ABSTRACT

Since the 1980s, a decade in which New Technologies gradually made their presence apparent in many areas of human activity - in work, in education, in science, in politics - until today, gender differences have been observed in the access, use and exploitation of Information Technologies. The qualitative improvement of educational systems, the equal provision of digital skills, the reshaping of the educational system through digital transformation is a goal of strategic importance for the European Union and, of course, for Greece.

Modern research shows that gender, as a social construct, continues to be a significant factor of inequality in the field of digital technology. This is because stereotypical perceptions regarding the relationship between gender and new technologies reflect the widespread view that digital skills are a male field of action rather than a subject of women's occupation and specialization. Teachers themselves, both men and women, consider their students to be more capable than their female students in using and exploiting the potential of digital technology. Female teachers have lower expectations and limited confidence in their ability to integrate and use digital technology in everyday teaching practice.

This paper attempts a bibliographic overview of gender differences regarding the degree of utilization and use of digital technology by secondary education teachers in the educational process during the last two decades, especially, with the complete "penetration" and prevalence of ICT in all areas of human activity and expression, especially after the pandemic period. The COVID-19 epidemic crisis had serious consequences for education and training and created new data in the educational reality.

Specifically, gender differences are examined in terms of the attitudes and perceptions of female teachers towards the ever-increasing use of technology in education, the understanding of the urgent need to acquire digital skills for more effective adaptation to modern educational data, the digital skills possessed by female teachers compared to their male colleagues, their knowledge of digital tools (software, platforms, applications), and the degree of utilization of a wide range of digital technologies in the learning process and any changes that have occurred over the decades.

Keywords: gender differences, digital technology, teachers in secondary education, digital skills, digital literacy

INTRODUCTION

The widespread use of digital technologies, specifically over the past decade has transformed many aspects of work, education and, generally, everyday life. Educational systems, as part of the digital transformation, are globally faced with the challenge of the ever-increasing need for the use of ICT. Teachers are expected to be appropriately trained so that they can use digital technology skillfully, equitably and effectively and to adapt their teaching practice in such a way as to teach their students the knowledge and skills required for high-quality and inclusive education and training (European Commission, 2020).

The Covid-19 crisis has created a new educational reality and accelerated the need to provide education and training using digital technologies. Digital literacy, that is the acquisition of skills by teachers to successfully handle, process, organize, understand, evaluate and analyze information through the use of digital tools with the aim of safely sharing digital content with students, is of universal importance for the educational process (Polydora, et al., 2023, Network for Reform in Greece and Europe, 2024) and its integration into the school curriculum is considered necessary from the earliest stages of education (Kaur & Sharma, 2023).

However, technology has not been accepted in the same way and to the same extent by all teachers. Although Greek teachers, male and female, recognize the usefulness of ICT in teaching practice, a large number of teachers exhibit phenomena of technological illiteracy and attempt to avoid its use.A significant number of teachers believe that the use of ICT contributes positively to the educational process, while others believe that their without consideration, unplanned and excessive use in education creates problems. Teachers' attitude towards the systematic use of digital technology in the teaching process is also largely influenced by their gender.

Gender differences in the attitudes and perceptions of female teachers towards the ever-increasing use of technology in education, the degree of understanding the need to acquire digital skills in order to adapt modern educational data more effectively, the digital skills possessed by female teachers compared to their male colleagues, their knowledge of digital tools (software, platforms, applications), the degree of utilization of a wide range of digital technologies in the learning process and any changes that have occurred over the decades is the subject of interest in this paper**.**

GENDER DIGITAL DIVIDE

The use of New Technologies shows differences between the two genders (Bodilas, 2013). Research that has been carried out internationally over the last decades on gender and ICTs, focuses mainly on what is called the "gender digital divide" or "gender gap" (Andreou, Riga & Papagiannis, 2014).

According to modern research data, the digital world reflects the gender imbalance in the physical world and despite many and ongoing interventions – socio-political, legislative, economical – over the decades, no increase in female participation in STEM (Science, Technology, Engineering, Mathematics) fields has been noted neither in the field ofInformation and Communication Technologies, in which women still constitute an *invisible* minority (Kamberidou, 2019)[16].

Compared to men and boys, women and girls accept and use digital technology at a significantly lower rate. Computer use, digital skills, and self-perception related to digital technologies are subject to gender differences. These differences can affect classroom interactions and learning processes (Kaur & Sharma, 2023). Teachers spend a lot of time with their students every day, they are considered to be holders of power and knowledge, people with authority, with prestige, and, therefore, often have an influence on the students' way of thinking. During this interaction, they may reproduce their own stereotypical and entrenched gender biases regarding technology and its use in educational practice, thereby influencing students' opinions, attitudes, and behaviors (Bussey & Bandura, 1999).

These stereotypical beliefs of male and female teachers also reflect their expectations for the professional future of their male and female students depending on their gender. Citizens themselves, who were brought up in societies with a specific gender role orientation, have internalized perceptions and stereotypes that influence their way of thinking and behaving. Thus, while they consider themselves free from prejudices and stereotypes, they treat their students differently, depending on their gender. But students notice, perceive the difference and tend to adopt a similar attitude and mentality towards their classmates, having their teachers as role models (Efstathiadou, 2023).

[16] Increasing the number of women in science, technology, engineering and mathematics (STEM) fields is very important as it can contribute to the improvement in all sectors of activity - education, economy, society, culture (Barbucci, 2018).

Considering studies of perceptions of gender and new technologies, it emerges that stereotypes do not only concern girls' abilities in IT, but also the compatibility or non-compatibility of the cognitive subject with the feminine nature and the interests of women. The prevailing view is that studies and professions related to IT and Computer Science do not suit the female temperament and, thus, the stereotypical perceptions of the teachers about the incompatibility of the female identity with Informatics can negatively affect the perceptions of female students regarding engagement with Informatics and new technologies (Vekyri & Shoretsanitou, 2020).

For this reason one of the European Commission's actions to support a high performance digital education system in the context of strategic planning for inclusive accessibility and participation in the development of European digital educational content is to encourage women to engage in STEM (science, technology, engineering and mathematics) fields , in order to make them more attractive to women and to increase their participation and career development, while combating gender stereotypes (European Commission, 2020).

The gender digital divide is not just a technological issue: it is an economic, social and cultural issue, which must be addressed with multi-level and holistic policies in order to address gender inequality at its deepest social and cultural roots (Barbucci, 2018)

GENDER DIFFERENCES IN THE USE OF DIGITAL TECHNOLOGY IN THE EDUCATIONAL PROCESS - RESEARCH FINDINGS

Steiner & Mendelovitch (2017), argue that teachers perceive digital technologies as a means of stimulating learning. It is a tool for building relationships and connecting them with students. Children find technology attractive and interesting. Digital tools help teachers diversify their teaching and are perceived by them as a welcome change compared to traditional teaching methods. A significant number of educators believe that the use of digital technologies enhances critical thinking and activates learning.

Although teachers are encouraged to integrate digital technology into teaching, there is evidence that their readiness to do so has a decisive influence on the effectiveness of integrating digital tools into the teaching process in the classroom. Despite the fact that most people recognize the great utility of I.C.T.'s and have positive attitudes towards related trainings, but maintain a critical and cautious attitude towards the use of ICT. in teaching (Tassi, 2014). Inhibiting factors for the integration of ICT in teaching practice are the limited skills of using ICT, the lack of experience and their attitudes towards them. In some member states of the European Union, the vast majority of teachers and trainees had, before the outbreak of the pandemic, little or no experience at all with online teaching and learning and the different pedagogical methods required for this way of teaching (European Commission, 2020).

There are differences between men and women regarding how they judge their computer skills and their self-efficacy when dealing with ICT. Women tend to have a lower degree of confidence than men in using digital technology effectively at all levels, starting with basic use (Kaur & Sharma, 2023; Vekyri & Schoretsanitou, 2020).

Gender differences, in relation to their computer use experience, sense of competence, self-efficacy and self-concept have an impact on male and female students' performance, when learning materials are taught using digital technology and can influence classroom interactions as well as learning processes. According to Russell and Bradley (1997) stress and a lack of confidence or ability to use digital tools often mean that teachers revert to conventional learning techniques.

Teachers themselves, both men and women, consider their male students more capable than their female students in using and exploiting the possibilities of digital technology (Vekyri & Shoretsanitou, 2020). Female teachers have lower expectations and limited confidence in their ability to integrate and use digital technology in everyday teaching practice (Gebhardt et al., 2019) and less positive views on the value and usefulness of the educational use of new technologies compared to their male colleagues[17].

The analysis of correlations between stereotypical views and other characteristics of teachers, such as years of teaching experience, self-efficacy, views on the value of integrating ICT in teaching practice, showed that in women

[17] As studies have shown (Law et al. 2008) teachers who are confident are more likely to use/adopt ICT as part of their daily teaching practice than teachers with less confidence. Therefore, confident female teachers are more likely to use ICT than their less confident colleagues, and confident female teachers may play an important role in ICT uptake by both male and female students as tools used equally by both male and female teachers.

acceptance of stereotypes is negatively related to years of teaching experience. These findings suggest that younger female teachers may present a more positive role model for girls as they appear to challenge stereotypes and have more confidence in their abilities to use new technologies in the classroom (Vekyri & Shoretsanitou, 2020).

Data of the most recent analyses, shows that over the years any differences in the use, experience, positive or negative attitude towards digital technology are small between male and female teachers although there are differences between countries. On average, 70% of male teachers and 77% of female teachers said they used ICT to support classroom teaching. There were slight differences in some countries in the emphasis placed on teaching students ICT-based skills

The negative correlation between stereotypical views and teaching experience among female teachers suggests that views on gender and technology have more to do with changes in value systems and sociocultural perceptions, as these have been shaped in recent decades, and less with teachers' attitudes towards technology

Teachers should realize that their own contribution to the formation of their students' perceptions and interests is crucial to the development of educational practices that can positively influence their choices.

CONCLUSION

Teachers' beliefs and attitudes towards information and communication technologies (ICT) in teaching and learning are crucial for their successful implementation in the classroom. While teachers are encouraged to integrate ICT into their teaching, the effectiveness of this integration depends largely on their readiness to do so, something that is directly correlated with their confidence and knowledge in the use of ICT, as well as with their beliefs about the value of ICT in education (Gebhardt et al., 2019)[18]

Female teachers who use technology effectively provide a role model for young women in school, although previous studies have shown that female teachers are less likely to use computers in their personal lives than their male counterparts. When female students are exposed to strong female role models such as female teachers, their interest and ambition grow. Gender equality in STEM education promotes education, digital literacy and digital skills (Gebhardt et al., 2019)

Girls have the right to high-quality education, which covers all levels and closes the gender gap in their later professional development. Classrooms and learning environments, whether physical or virtual, must be free of negative stereotypes, especially those related to gender issues. Every child, regardless of gender, needs to be inspired to learn and succeed in subjects or career paths it chooses (Kaur & Sharma, 2023).

Gender dimension in teachers' relationships with ICT is constantly changing and is shaped by different socio-cultural contexts in various time periods (Tassi, 2014). Equal access and utilization of ICT by both genders in learning subjects of all specialties requires changing social stereotypes that consider technology a male affair, the gradual familiarization with ICT with the aim of getting rid of the fear of using computers, the readjustment of school curricula by enhancing interactive teaching and the training of teachers in the use of technologies and more modern tools but also in the way of combining pedagogical methodology with educational software (Syropoulos, & Lefkos, 2023). Support at the administrative and institutional level contributes decisively to achieving this goal.

Equal access and utilization of ICT by both genders in learning subjects of all specialties requires changing social stereotypes that consider technology a male affair, gradual familiarization with ICT with the aim of eliminating the fear of using computers, the readjustment of school curricula by enhancing interactive teaching and the training of teachers in the use of technologies and more modern tools but also in the way of combining pedagogical methodology with educational software (Syropoulos, & Lefkos, 2023). Support at αν administrative and institutional level contributes decisively to achieving this goal.

Educational policies that encourage digital teaching and learning and respond to gender needs, invest in teacher training in digital pedagogy by eliminating gender biases and stereotypes from curricula. Digital books and educational materials that offer opportunities for learning both inside and outside the classroom, without exclusion, without discrimination can form the basis for bridging the gender digital divide (UNICEF, 2021).

[18] Most studies reporting on teachers' ICT skills have been based on self-report data. Three ICT skills factors have been identified: basic digital skills, advanced technical skills and professional ICT skills (Kaarakainen et al. 2018).

As stated in the Digital Education Action Plan 2021-2027, redefining education and training for the digital age: Digital technology, when used skillfully, equitably and effectively by educators, can fully support the agenda of high-quality and inclusive education and training for all learners. It can facilitate more personalized and flexible student-centered learning, across all phases and stages of education and training. Technology can be a powerful and engaging tool for collaborative and creative learning (European Commission 2020).

ΠΕΡΙΛΗΨΗ

Η παρούσα έρευνα διερευνά την εφαρμογή της Επαυξημένης (Augmented Reality, AR) και Εικονικής Πραγματικότητας (Virtual Reality, VR) στη διδασκαλία της Αγγλικής γλώσσας μέσω φυσικής δραστηριότητας σε γυμνάσια και λύκεια της Δυτικής Ελλάδας.

Με δείγμα 65 μαθητών/τριών και 15 εκπαιδευτικών, αξιολογήθηκε η επίδραση των ψηφιακών τεχνολογιών στη βελτίωση των γλωσσικών δεξιοτήτων και στην ενίσχυση της κινητικής εμπλοκής. Το πρόγραμμα, που βασίστηκε στις αρχές της ενεργητικής μάθησης, περιελάμβανε διαδραστικά σενάρια όπου οι μαθητές εξασκούσαν γλωσσικές δεξιότητες μέσω σωματικών και συνεργατικών δραστηριοτήτων.

Τα αποτελέσματα ανέδειξαν σημαντική βελτίωση στη συμμετοχή, στη γλωσσική πρόοδο (λεξιλόγιο, προφορά) και στη μνήμη μέσω κίνησης. Επιπλέον, παρατηρήθηκε ενίσχυση της κοινωνικής αλληλεπίδρασης και της συνεργασίας. Παρά τα θετικά αποτελέσματα, καταγράφηκαν και ορισμένες προκλήσεις, όπως το υψηλό κόστος του απαιτούμενου εξοπλισμού και η ανάγκη κατάρτισης των εκπαιδευτικών στη χρήση των τεχνολογιών αυτών.

Συνεπώς, ο συνδυασμός της AR και VR με φυσική δραστηριότητα αναδεικνύεται ως καινοτόμα εκπαιδευτική πρακτική, με δυνατότητα εφαρμογής σε ευρύτερα εκπαιδευτικά πλαίσια.

Λέξεις-κλειδιά: Ψηφιακά μέσα, AR, VR, αγγλική γλώσσα, φυσική δραστηριότητα

ΠΕΡΙΛΗΨΗ

Η παρούσα εργασία ερευνά την εφαρμογή της τεχνικής Stop Motion ως εργαλείο για τη δημιουργία εκπαιδευτικού υλικού, παρουσιάζοντας τη συμβολή του στην ενεργητική μάθηση και στην ανάπτυξη γνωστικών, κοινωνικών και τεχνικών δεξιοτήτων. Το Stop Motion ενδείκνυται για παιδαγωγικές εφαρμογές, που προάγουν τη βιωματική και δημιουργική μάθηση, ενισχύοντας την προσωπική έκφραση, τη συνεργασία και την αφηγηματική ικανότητα των μαθητών. Μέσω της χρήσης φυσικών υλικών εργαλείων και τεχνολογικών μέσων, οι μαθητές αποκτούν εμπειρική επαφή με τη μάθηση, αναλαμβάνουν ρόλους δημιουργών και αφηγητών, και μαθαίνουν πώς να οργανώνουν και να υλοποιούν σύνθετα έργα με παιδαγωγικό περιεχόμενο.

Η εργασία εξετάζει τόσο τη θεωρητική θεμελίωση της μεθόδου, όσο και την εφαρμογή της. Επιπλέον, παρουσιάζονται τα οφέλη και οι προκλήσεις που σχετίζονται με την ενσωμάτωση του Stop Motion στην τάξη, καθώς και προτάσεις για την αποτελεσματική αξιοποίησή του από τους εκπαιδευτικούς. Τέλος, τονίζεται η διαθεματική και συμπεριληπτική δυναμική της τεχνικής, που επιτρέπει την προσαρμογή της στις ανάγκες των μαθητών, προάγοντας την παιδαγωγική καινοτομία και την ενεργή συμμετοχή όλων. Η προσέγγιση αυτή αντανακλά τις σύγχρονες διδακτικές προσεγγίσεις, όπου ο μαθητής τοποθετείται στο επίκεντρο της μαθησιακής διαδικασίας και η τεχνολογία λειτουργεί υποστηρικτικά προς την ανάπτυξη της δημιουργικότητας και της συνεργατικής κουλτούρας.

Λέξεις – κλειδιά: stop motion, εκπαιδευτικό υλικό, ψηφιακή αφήγηση, βιωματική μάθηση, δημιουργικότητα, συνεργατική μάθηση, τεχνολογία στην εκπαίδευση, πρωτοτυποποίηση, project-based learning (PBL), συμπερίληψη, συναισθηματική ενδυνάμωση

ΠΕΡΙΛΗΨΗ

Σε περιόδους κρίσεων επέρχονται ριζικές αλλαγές της κοινωνίας. Στην Ελλάδα ο Covid-19 παρουσιάστηκε τον 02/2020 με το κλείσιμο των σχολείων και την εφαρμογή της εξ αποστάσεως εκπαίδευσης.

Μέσω της έρευνας διερευνήθηκε το μέλλον της ΕξΑΕ, μέσα από το πρίσμα των μαθητών δευτεροβάθμιας εκπαίδευσης. Εφαρμόστηκε μικτή δειγματοληψία (Στρωματοποιημένη και κατά Συστάδες). Συμμετείχαν 462 μαθητές Γυμνασίων και Λυκείων των νομών Αττικής και Κυκλάδων. Η έρευνα διεξήχθη τον 05/2020. Τα δεδομένα συλλέχθηκαν στο LimeSyrvey, αναλύθηκαν με SPSS (25), ακαδημαϊκή άδεια. Πραγματοποιήθηκε έλεγχος αξιοπιστίας του ερωτηματολογίου με τον δείκτη Cronbach's alpha, περιγραφική στατιστική, παραγοντική ανάλυση και η δοκιμασία Chi-square.

Η ανάλυση Chi-square έδειξε ότι το 76,2% των μαθητών δεν επιθυμούσε μελλοντικά την εφαρμογή της ΕξΑΕ, ενώ μόλις το 13% τη θεωρούσε σημαντική ως μορφή εκπαίδευσης και επιθυμούσε τη μελλοντική εφαρμογή της.

Εν κατακλείδι, η ΕξΑΕ δεν οργανώθηκε με μεθοδικότητα βάσει παιδαγωγικών μεθόδων και τεχνικών με αποτέλεσμα να μη γίνει αποδεκτή από την εκπαιδευτική κοινότητα. Οι απόψεις των μαθητών Γυμνασίων και Λυκείων (ΓΕΛ - ΕΠΑΛ) επηρεάστηκαν αρνητικά με αποτέλεσμα να μην επιθυμούν μια ενδεχόμενη μελλοντική εφαρμογή της, δεδομένης της μη εφαρμογής των αρχών που διέπουν την ΕξΑΕ.

ΠΕΡΙΛΗΨΗ

Η εργασία αυτή ερευνά την εμπειρία των μαθητών Λυκείου από την εξ αποστάσεως εκπαίδευση κατά την πανδημία, εξετάζοντας τους παράγοντες που επηρέασαν την ανταπόκρισή τους. Στόχος ήταν να διερευνηθεί το ενδιαφέρον των μαθητών και οι τεχνολογικοί και παιδαγωγικοί παράγοντες που επηρέασαν τη συμμετοχή τους, να αναλυθούν οι αντιλήψεις τους σχετικά με την υποστήριξη, την αλληλεπίδραση, το εκπαιδευτικό υλικό και την ποιότητα των συστημάτων διαχείρισης μάθησης και τον ρόλο της οικογένειας. Η έρευνα πραγματοποιήθηκε τον Οκτώβριο του 2020 σε 100 μαθητές Α' και Β' Λυκείου από τα Ιωάννινα, με τη χρήση ψηφιακού ερωτηματολογίου 12 ερωτήσεων κλειστού τύπου και πολλαπλής επιλογής. Τα αποτελέσματα έδειξαν ότι η εξάρτηση από την τεχνολογία δημιούργησε προβλήματα (εξοπλισμός, σύνδεση), επηρεάζοντας αρνητικά τη συμμετοχή των μαθητών, ενώ οι εκπαιδευτικοί χρειάστηκε να αναπτύξουν νέους ρόλους. Οι μαθητές αντιμετώπισαν τεχνικά προβλήματα που επιλύθηκαν σχετικά γρήγορα, αλλά η κουλτούρα της συμβατικής εκπαίδευσης δυσκόλεψε την προσαρμογή στην εξ αποστάσεως εκπαίδευση. Εξέφρασαν αρνητικές αντιλήψεις για την επικοινωνία και την υποστήριξη από τους εκπαιδευτικούς, καθώς και για την ποιότητα του εκπαιδευτικού υλικού, ενώ η οικογένεια διαδραμάτισε σημαντικό ρόλο στην υποστήριξή τους.

Λέξεις - κλειδιά: εξ αποστάσεως διδασκαλία, πανδημία, υποστήριξη, αλληλεπίδραση

ΠΕΡΙΛΗΨΗ

Η συγκεκριμένη εργασία εξετάζει την εφαρμογή της Τεχνητής Νοημοσύνης (ΤΝ) στον τομέα της Φυσικής Αγωγής, με έμφαση στις γνώσεις των εκπαιδευτικών. Η χρήση της ΤΝ στην εκπαίδευση έχει επεκταθεί ραγδαία τα τελευταία χρόνια, με ιδιαίτερες δυνατότητες για την προσαρμογή και ενίσχυση της εκπαιδευτικής εμπειρίας. Στη Φυσική Αγωγή, ωστόσο, η υιοθέτηση της παραμένει περιορισμένη, κυρίως λόγω έλλειψης γνώσης και επιμόρφωσης. Η έρευνα αυτή στοχεύει στη διερεύνηση του βαθμού κατανόησης και αποδοχής της από τους εκπαιδευτικούς, εστιάζοντας στις προοπτικές ενσωμάτωσής της στη διδασκαλία.

Η μεθοδολογία της έρευνας ακολούθησε ποσοτική ερευνητική προσέγγιση και περιλάμβανε τη συλλογή δεδομένων μέσω ηλεκτρονικών ερωτηματολογίων, τα οποία διανεμήθηκαν σε καθηγητές Φυσικής Αγωγής από όλη την Ελλάδα. Το δείγμα περιλάμβανε 250 συμμετέχοντες, οι οποίοι εργάζονται τόσο στην πρωτοβάθμια όσο και στη δευτεροβάθμια εκπαίδευση. Η ανάλυση των δεδομένων πραγματοποιήθηκε με τη χρήση περιγραφικών και επαγωγικών στατιστικών τεχνικών, μέσω του λογισμικού SPSS.

Η έρευνα ανέδειξε ότι οι γνώσεις των εκπαιδευτικών σχετικά με την ΤΝ είναι γενικά περιορισμένες. Το 23,6% δήλωσε ότι δεν είναι καθόλου εξοικειωμένο ενώ το 37,2% ανέφερε χαμηλό επίπεδο εξοικείωσης. Μόνο το 32,4% δήλωσε μέτρια εξοικείωση, ενώ τα ποσοστά των εκπαιδευτικών που αισθάνονται υψηλό επίπεδο εξοικείωσης είναι πολύ χαμηλά (Πολύ: 6,0%, Πάρα πολύ: 0,8%).Η εξοικείωση με τις βασικές αρχές, όπως η λειτουργία και οι τύποι της είναι επίσης περιορισμένη, με ορισμένους να αναγνωρίζουν μόνο τις πιο διαδεδομένες εφαρμογές της τεχνολογίας. Βρέθηκε θετική συσχέτιση μεταξύ της επιμόρφωσης στις ΤΠΕ και της επιμόρφωσης στην ΤΝ ($\rho=0.176, p=0.005$). Οι εκπαιδευτικοί που έχουν λάβει επιμόρφωση στις ΤΠΕ είναι πιο πιθανό να έχουν εμπειρία ή ενδιαφέρον και για επιμόρφωση στην ΤΝ. Αυτό υποδεικνύει ότι η προηγούμενη εκπαίδευση στις τεχνολογίες γενικά αυξάνει το ενδιαφέρον για πιο εξειδικευμένους τομείς. Σχετικά με την εμπειρία τους στη χρήση της, οι περισσότεροι εκπαιδευτικοί δήλωσαν ότι δεν έχουν χρησιμοποιήσει την τεχνολογία αυτή είτε στο εκπαιδευτικό πλαίσιο είτε σε άλλους τομείς.

Τα αποτελέσματα της έρευνας ανέδειξαν έντονη την ανάγκη για επιμόρφωση των εκπαιδευτικών Φυσικής Αγωγής στον τομέα της Τεχνητής Νοημοσύνης, ενώ οι συμμετέχοντες αναγνώρισαν τη σημασία και τη χρησιμότητα τέτοιων πρωτοβουλιών για την εκπαιδευτική διαδικασία. Παρά τη σχετική έλλειψη εξοικείωσης που αναδείχθηκε στα αποτελέσματα η πλειονότητα των συμμετεχόντων αξιολόγησε την επιμόρφωση ως πολύ χρήσιμη, εύρημα που υπογραμμίζει την ανάγκη για επαγγελματική ανάπτυξη στον τομέα αυτό.

Λέξεις - κλειδιά: Τεχνητή νοημοσύνη, Φυσική Αγωγή, Γνώσεις, Εκπαίδευση.

VIVLIOTHINKY: ΕΝΑ PROJECT ΣΥΝΕΡΓΑΤΙΚΗΣ ΜΑΘΗΣΗΣ ΓΙΑ ΤΗΝ ΑΝΑΠΤΥΞΗ ΤΩΝ ΚΟΙΝΩΝΙΚΩΝ ΚΑΙ ΨΗΦΙΑΚΩΝ ΔΕΞΙΟΤΗΤΩΝ ΒΑΣΙΣΜΕΝΟ ΣΤΗΝ ΥΠΗΡΕΣΙΑ E-GRAFIS ΤΟΥ ΠΣΔ

ΠΕΡΙΛΗΨΗ

Τα νέα Προγράμματα Σπουδών έχουν ως αφετηρία τα μαθησιακά αποτελέσματα, δηλαδή όλα όσα χρειάζεται να γνωρίζουν, να κατανοούν και να μπορούν να εφαρμόσουν οι μαθητές και οι μαθήτριες μετά την ολοκλήρωση κάθε μαθησιακής διαδικασίας μετακινώντας το κέντρο βάρους της έμφασης από το γνωστικό αντικείμενο, τους/τις διδάσκοντες/ουσες και τη διδακτική διαδικασία προς τους/τις μαθητές/τριες και τα προσδοκώμενα αποτελέσματα μάθησης. Στον πυρήνα της διδακτικής μεθοδολογίας βρίσκονται η δημιουργία περιβαλλόντων καθοδηγούμενης μάθησης, η αυτενέργεια, η συνεργατική δράση σε ομάδες, η διερευνητική μάθηση, η βιωματική προσέγγιση, η συνεργατική επίλυση προβλήματος, η επικοινωνιακή προσέγγιση, και η μετασχηματιστική λογική.

Το παρόν διδακτικό σενάριο, έχει ως θέμα την «ψηφιακή» οργάνωση της σχολικής βιβλιοθήκης και εφαρμόσθηκε στα πλαίσια πολιτιστικού προγράμματος με τη συμμετοχή μαθητών και μαθητριών ενός Ημερήσιου Γυμνασίου της Αττικής ενισχύοντας τη συνεργατική μάθηση με τη βοήθεια των ΤΠΕ και επιτυγχάνοντας γνωστικούς διδακτικούς στόχους σχετικούς με τα υπολογιστικά φύλλα, τα συνεργατικά έγγραφα και τις ιστοεξερευνήσεις. Η υλοποίησή του βασίστηκε στη χρήση της υπηρεσίας e-grafis που παρέχεται από το Πανελλήνιο Σχολικό Δίκτυο και έχει ως απαραίτητη προϋπόθεση τη δημιουργία και χρήση Μαθητικών Λογαριασμών για όλους/ες τους/τις συμμετέχοντες/ουσες. Ο σχεδιασμός του σεναρίου περιλαμβάνει τέσσερις φάσεις υλοποίησης, γνωστικούς και ψυχοσυναισθηματικούς στόχους, ανατροφοδότηση πριν από κάθε νέα φάση, αξιολόγηση στο τέλος και αναστοχασμό των πεπραγμένων.

Για το σχεδιασμό και την υλοποίηση του εκπαιδευτικού σεναρίου εφαρμόσθηκε η μέθοδος project και οι στρατηγικές διδασκαλίας που ακολουθήθηκαν ήταν η άμεση διδασκαλία και η ανακαλυπτική μάθηση. Κατά την εφαρμογή του σεναρίου παρατηρήθηκε ότι η συνεργατική μάθηση με τη βοήθεια των υπολογιστών προωθεί την καλλιέργεια κοινωνικών δεξιοτήτων όπως η επικοινωνία και η συνεργασία και την καλλιέργεια ψηφιακών δεξιοτήτων με κυριότερη τη διαχείριση συνεργατικών περιβαλλόντων υλοποίησης δραστηριοτήτων. Παράλληλα διαπιστώθηκε ότι η αξιοποίηση των Ψηφιακών Μέσων σε πολιτιστικά προγράμματα ή στα εργαστήρια δεξιοτήτων μπορεί να ενισχύσει τη δυναμική της διδασκαλίας, να τονώσει το ενδιαφέρον των μαθητών, να βελτιώσει το μαθησιακό κλίμα και να ενισχύσει την αποτελεσματικότητα της εκπαιδευτικής διαδικασίας. Το θέμα του project και η καθοδήγηση από τον/την εκπαιδευτικό αναφέρθηκαν ως οι κυριότεροι θετικοί παράγοντες ενώ η ώρα διεξαγωγής ως ο σημαντικότερος αρνητικός παράγοντας. Τέλος, η διαφορετική ταχύτητα με την οποία εργάζονται τα μέλη μιας ομάδας αναφέρθηκε ως το σημαντικότερο πρόβλημα της συνεργατικής δράσης.

Λέξεις κλειδιά: συνεργατική μάθηση, e-grafis, ιστοεξερεύνηση, ΤΠΕ, εκπαιδευτικό σενάριο, πρόγραμμα σπουδών, πολιτιστικό πρόγραμμα

ΔΙΔΑΣΚΑΛΙΑ ΤΗΣ ΚΒΑΝΤΙΚΉΣ ΘΕΩΡΙΑΣ ΣΤΗ ΔΕΥΤΕΡΟΒΑΘΜΙΑ ΕΚΠΑΙΔΕΥΣΗ: ΤΟ ΠΕΊΡΑΜΑ ΤΗΣ ΔΙΠΛΗΣ ΣΧΙΣΜΗΣ ΚΑΙ Η ΔΗΜΙΟΥΡΓΊΑ ΕΚΠΑΙΔΕΥΤΙΚΟΥ ΣΕΝΑΡΙΟΥ ΓΙΑ ΜΑΘΗΤΕΣ-ΜΑΘΗΤΡΙΕΣ ΤΗΣ Γ' ΓΥΜΝΑΣΙΟΥ ΜΕ ΧΡΗΣΗ ΤΠΕ

Μαγαλιού Μαρία

email: mvpmag@gmail.com

ΠΕΡΙΛΗΨΗ

Η κβαντική φυσική, παρά την αντιλαμβανόμενη πολυπλοκότητά της, αποτελεί το θεμέλιο πολλών σύγχρονων τεχνολογιών που διαμορφώνουν την καθημερινή μας ζωή. Από τους υπολογιστές που χρησιμοποιούμε έως την ιατρική διαγνωστική απεικόνιση, η κβαντική θεωρία είναι αναπόσπαστο μέρος της σύγχρονης πραγματικότητας. Ωστόσο, στην Ελλάδα, η διδασκαλία της στη Δευτεροβάθμια Εκπαίδευση περιορίζεται κυρίως σε μαθητές που προετοιμάζονται για τις πανεπιστημιακές εισαγωγικές εξετάσεις, αποκλείοντας έτσι ένα σημαντικό μέρος του μαθητικού πληθυσμού από την επαφή με αυτές τις συναρπαστικές έννοιες. Η κβαντική θεωρία εγείρει βαθιά ερωτήματα σχετικά με τη φύση της πραγματικότητας, τη γνώση και τον ρόλο του παρατηρητή. Το πείραμα της διπλής σχισμής, ένα εμβληματικό φαινόμενο που αναδεικνύει θεμελιώδεις κβαντικές έννοιες και φιλοσοφικές προεκτάσεις, απουσιάζει χαρακτηριστικά από το ελληνικό αναλυτικό πρόγραμμα της Δευτεροβάθμιας Εκπαίδευσης. Παρ' όλα αυτά, η διδασκαλία του μπορεί να αποτελέσει ένα ισχυρό εργαλείο όχι μόνο για την καλλιέργεια της επιστημονικής κατανόησης, αλλά και για την ανάπτυξη της κριτικής σκέψης.

Η παρούσα εργασία προτείνει ένα διδακτικό σενάριο για μαθητές της Γ΄ Γυμνασίου (9η τάξη στο ελληνικό εκπαιδευτικό σύστημα), το οποίο αξιοποιεί τις Τεχνολογίες Πληροφορίας και Επικοινωνιών (ΤΠΕ), και συγκεκριμένα εκπαιδευτικά βίντεο και προσομοιώσεις PhET Colorado («Wave Interference», «Quantum Wave Interference»), με στόχο την εισαγωγή στο πείραμα της διπλής σχισμής. Το σενάριο αποσκοπεί στην προώθηση της ενεργού συμμετοχής των μαθητών, στην ανάπτυξη δεξιοτήτων κριτικής σκέψης και στη σύνδεση της επιστημονικής γνώσης με ευρύτερα φιλοσοφικά και κοινωνικά ερωτήματα.

Το βασικό ερευνητικό ερώτημα που διερευνάται είναι: πώς μπορεί ένα διδακτικό σενάριο που αξιοποιεί τις ΤΠΕ να ενισχύσει τη διδασκαλία του πειράματος της διπλής σχισμής στη Δευτεροβάθμια Εκπαίδευση και πώς αντιλαμβάνονται και αποδέχονται οι μαθητές τη διδασκαλία κβαντικών θεμάτων μέσω αυτών των εργαλείων; Ειδικότερα, η έρευνα εστιάζει στην αξιολόγηση της αποτελεσματικότητας των ΤΠΕ στη διδασκαλία κβαντικών εννοιών, όπως η δυαδικότητα κύματος-σωματιδίου, και στο πώς οι τεχνολογίες αυτές βοηθούν τους μαθητές να αποκτήσουν μια πιο προσιτή και ουσιαστική κατανόηση του πειράματος της διπλής σχισμής.

Τα προκαταρκτικά ευρήματα από την πιλοτική εφαρμογή του σεναρίου σε μαθητές της Γ΄ Γυμνασίου δείχνουν ότι η εισαγωγή βασικών κβαντικών εννοιών σε αυτή την ηλικία είναι εφικτή. Η ενσωμάτωση των ΤΠΕ φάνηκε να αυξάνει σημαντικά το ενδιαφέρον των μαθητών, να ενισχύει τη συμμετοχή τους και να συμβάλλει στην ανάπτυξη βαθύτερης κατανόησης των κβαντικών φαινομένων, και ιδιαίτερα της δυαδικότητας κύματος-σωματιδίου όπως αυτή εκδηλώνεται στο πείραμα της διπλής σχισμής. Αν και τα αρχικά αυτά αποτελέσματα είναι ενθαρρυντικά, απαιτείται περαιτέρω έρευνα σε μεγαλύτερη κλίμακα, προκειμένου να αξιολογηθεί πλήρως η αποτελεσματικότητα των ΤΠΕ και να διερευνηθούν οι παράγοντες που επηρεάζουν την αποδοχή και την κατανόηση αυτών των αφηρημένων επιστημονικών πεδίων από τους μαθητές.

Λέξεις – κλειδιά: Κβαντική φυσική, Διδακτικό σενάριο, Πείραμα διπλής σχισμήςΤεχνολογίες Πληροφορίας και Επικοινωνιών (ΤΠΕ), Κριτική σκέψη

ΠΕΡΙΛΗΨΗ

Όσο η εξέλιξη των εργαλείων που βασίζονται στην Τεχνητή Νοημοσύνη (Τ.Ν.) προχωρά και η χρήση τους στη διδασκαλία των Φυσικών Επιστημών διευρύνεται, καθίσταται φανερό ότι δημιουργεί πολλές ευκαιρίες βελτίωσης της διδασκαλίας και συνακολούθως των μαθησιακών αποτελεσμάτων. Επιπλέον, η μελέτη των πεποιθήσεων και των στάσεων των εκπαιδευτικών στην ενσωμάτωση της Τ.Ν. στην εκπαιδευτική διαδικασία αναδεικνύεται ως ένα σημαντικό ζήτημα. Τα αποτελέσματα πολλών μελετών στη διδασκαλία των Φυσικών Επιστημών (Φ.Ε.) αναφέρουν τους ποικίλους και επικείμενους ρόλους της τεχνητής νοημοσύνης στην εκπαίδευση. Παρόλα αυτά, οι εκπαιδευτικοί Φ.Ε., αντιμετωπίζουν, την τελευταία δεκαετία, μια ιδιαίτερα μεγάλη πρόκληση, τη χρήση της Τ.Ν. στη σχολική τάξη χωρίς όμως να έχει υπάρξει ένας σημαντικός κεντρικός σχεδιασμός που να τους υποστηρίζει.

Η παρούσα μελέτη ερευνά τις στάσεις και πεποιθήσεις 40 εκπαιδευτικών Φ.Ε. Δευτεροβάθμιας εκπαίδευσης, της Θεσσαλίας και της Ηπείρου, απέναντι στην ενσωμάτωση των υπαρχόντων εργαλείων Τ.Ν., στην τάξη τους. Ειδικότερα, η έρευνα αυτή μελετά τις απόψεις των εκπαιδευτικών σχετικά με τα εργαλεία Τ.Ν., όπως το Gemini, το πρόγραμμα για την περίληψη αρχείων pdf με τεχνητή νοημοσύνη, το Gamma.app, τα οποία κατέχουν δυναμικό ρόλο στη βελτίωση παιδαγωγικών πρακτικών. Για τη συλλογή των δεδομένων της έρευνας σχετικά με την αξιολόγηση των στάσεων και πεποιθήσεων των εκπαιδευτικών, σχεδιάστηκε και διανεμήθηκε σε αυτούς ένα ερωτηματολόγιο 19 ερωτήσεων κλειστού τύπου και οι απαντήσεις δόθηκαν στην τετραβάθμια κλίμακα Likert.

Από τα αποτελέσματα των απαντήσεων προκύπτει ότι οι εκπαιδευτικοί παρόλο που στην πλειονότητά τους είναι εξοικειωμένοι με τη χρήση των ηλεκτρονικών υπολογιστών και στη χρήση των διαδραστικών πινάκων στη καθημερινή τους διδασκαλία, αισθάνονται σε μεγάλο βαθμό επιφυλακτικοί απέναντι στη χρήση των εργαλείων της Τ.Ν. και επιπλέον δηλώνουν ότι έχουν ελλιπή γνώση αυτών καθώς και ότι πιστεύουν ότι είναι ανέτοιμοι να προχωρήσουν στη χρήση αυτών των εργαλείων αποτελεσματικά στη σχολική τάξη, Τα αποτελέσματα καταδεικνύουν την ανάγκη δημιουργίας επιμορφωτικών σεμιναρίων για την αποτελεσματική γνωστική υποστήριξη των εκπαιδευτικών.

Λέξεις – κλειδιά: εκπαιδευτικοί, ερωτηματολόγιο, τεχνητή νοημοσύνη

ΕΚΠΑΙΔΕΥΤΙΚΕΣ ΔΡΑΣΕΙΣ ΚΑΙ ΚΑΙΝΟΤΟΜΙΑ: Ο ΚΡΟΚΟΣ ΚΟΖΑΝΗΣ ΚΑΙ ΤΟ BEEBOT ΩΣ ΔΙΔΑΚΤΙΚΑ ΕΡΓΑΛΕΙΑ

Τσίρου Αντιγόνη
Εκπαιδευτικός Πληροφορικής, MSc
Διεύθυνση Πρωτοβάθμιας Εκπαίδευσης Κοζάνης, Υπουργείο Παιδείας και Θρησκευμάτων
Κοζάνη, Ελλάδα
e-mail: tsirouant@gmail.com

ΠΕΡΙΛΗΨΗ

Η παρούσα έρευνα διερευνά την αποτελεσματικότητα της δράσης «Κρόκος Κοζάνης» σε συνδυασμό με τη χρήση του ρομπότ Bee-Bot σε μεικτές ομάδες της πρωτοβάθμιας εκπαίδευσης στην περιοχή της Κοζάνης. Η εργασία εστιάζει στη σύνδεση του τοπικού πολιτισμού, των παραδόσεων και της οικονομικής σημασίας του κρόκου με την εκπαιδευτική διαδικασία, ενώ παράλληλα αξιοποιεί την καινοτόμο τεχνολογία της ρομποτικής για την ενίσχυση της ομαδικής μάθησης και των δεξιοτήτων προγραμματισμού.

Στο πλαίσιο της έρευνας, δημιουργήθηκε ένα ηλεκτρονικό ερωτηματολόγιο (Google Forms), το οποίο διανεμήθηκε σε 32 εκπαιδευτικούς μετά την ολοκλήρωση εκπαιδευτικών δράσεων για τον Κρόκο Κοζάνης. Οι εκπαιδευτικοί απάντησαν ανώνυμα, ενώ τα δεδομένα συλλέχθηκαν και επεξεργάστηκαν αυτόματα, επιτρέποντας μια συστηματική ανάλυση των απόψεων τους για τη σύνδεση του διδακτικού θέματος με την πραγματική ζωή και τη χρήση του ρομπότ Bee-Bot στην τάξη.

Η μεθοδολογία περιλάμβανε την καταγραφή δημογραφικών στοιχείων (φύλο, ηλικία, μορφωτικό επίπεδο, χρόνια υπηρεσίας), που υποδεικνύουν ένα δείγμα έμπειρων εκπαιδευτικών με κυρίαρχη παρουσία γυναικών και σημαντική επαγγελματική προϋπηρεσία. Τα αποτελέσματα της έρευνας αποκαλύπτουν ότι οι εκπαιδευτικοί θεωρούν το θέμα του Κρόκου άρρηκτα συνδεδεμένο με την καθημερινή ζωή των μαθητών, επισημαίνοντας την αξία του για την τοπική κουλτούρα, τα έθιμα και την οικονομία της περιοχής.

Παράλληλα, η χρήση του ρομπότ Bee-Bot ενίσχυσε την ομαδοσυνεργατική μάθηση, προωθώντας την αμοιβαία αλληλεπίδραση, την κριτική και δημιουργική σκέψη, καθώς και την πρακτική εξοικείωση με βασικές αρχές προγραμματιστικής σκέψης. Οι εκπαιδευτικοί παρατήρησαν ιδιαίτερα οφέλη όσον αφορά τη συμμετοχή όλων των μαθητών, συμπεριλαμβανομένων των «αδύναμων», και την ενίσχυση των κοινωνικο-συναισθηματικών δεξιοτήτων.

Τα συνολικά συμπεράσματα επιβεβαιώνουν τη θετική διάθεση για την ενσωμάτωση καινοτόμων πρακτικών στη διδασκαλία, επισημαίνοντας την ανάγκη για περαιτέρω επιμόρφωση στη χρήση ρομποτικών εργαλείων. Η παρούσα περίληψη προσφέρει μια συνοπτική εικόνα της έρευνας, προσκαλώντας τον αναγνώστη να ανακαλύψει σε βάθος τις λεπτομέρειες της μεθοδολογίας και των ευρημάτων, τα οποία συμβάλλουν στη βελτίωση της εκπαιδευτικής πρακτικής.

Η μελέτη αυτή παρουσιάζει όχι μόνο την άμεση επίδραση των καινοτόμων μεθόδων στη μάθηση, αλλά και τις προοπτικές για μελλοντικές εφαρμογές που μπορούν να ενισχύσουν την ποιότητα της εκπαιδευτικής διαδικασίας.

Λέξεις-κλειδιά: Κρόκος Κοζάνης, Bee-Bot , διαφοροποιημένη διδασκαλία, ομαδική συνεργασία, ρομποτική, βιωματική μάθηση.

ΕΞΕΡΕΥΝΗΣΗ ΤΗΣ ΔΥΝΑΜΙΚΗΣ ΤΩΝ ΔΙΚΤΥΩΝ ΦΙΛΙΑΣ ΑΞΙΟΠΟΙΩΝΤΑΣ ΑΛΓΟΡΙΘΜΟΥΣ ΤΕΧΝΗΤΗΣ ΝΟΗΜΟΣΥΝΗΣ: ΜΙΑ ΜΕΛΕΤΗ ΣΕ ΕΙΔΙΚΟ ΣΧΟΛΕΙΟ

ΠΕΡΙΛΗΨΗ

Η φιλία αποτελεί βασική συνθήκη για την υγιή ανάπτυξη των ατομικών και κοινωνικών σχέσεων, ιδίως κατά την ευαίσθητη περίοδο της εφηβείας. Ενώ κατά βάση η φιλία θεωρείται αμοιβαία και αμφίδρομη, συχνά στο πλαίσιο της ειδικής αγωγής, η διάκριση μεταξύ φιλίας, συνοδείας και φροντίδας συχνά συγχέεται. Αυτή η ασάφεια μπορεί να οδηγήσει σε φιλίες που στερούνται αμοιβαίας δυναμικής η οποία παρατηρείται στα τυπικά σχολεία, δημιουργώντας αισθήματα απογοήτευσης, απομόνωσης και κοινωνικής περιθωριοποίησης.

Η παρούσα εργασία επιχειρεί να αναδείξει τη δυναμική των σχέσεων φιλίας σε ένα μικρό σχολείο ειδικής αγωγής δευτεροβάθμιας εκπαίδευσης, χρησιμοποιώντας την ανάλυση κατευθυνόμενων δικτύων. Μέσω της ανάλυσης κοινωνικών δικτύων, υπολογίζονται μετρικές, μερικές εκ των οποίων βασίζονται σε αλγόριθμους τεχνητής νοημοσύνης, ώστε να αναδειχθούν σημαντικοί ρόλοι και δομικές ιδιαιτερότητες του δικτύου φιλίας των μαθητών. Αυτές οι μετρικές, αποκαλύπτουν κρυφά μοτίβα και δυναμικές που δεν είναι άμεσα ορατές, προσφέροντας πολύτιμες πληροφορίες για την κατανόηση των κοινωνικών αλληλεπιδράσεων τους.

Στόχος της έρευνας είναι να παράσχει στους εκπαιδευτικούς και τους ειδικούς επαγγελματίες ένα εργαλείο για την ενίσχυση των κοινωνικών σχέσεων, την καταπολέμηση της απομόνωσης και την πρόληψη του εκφοβισμού. Στην ανάλυση χρησιμοποιήθηκαν ανωνυμοποιημένα δεδομένα από 22 ενεργούς μαθητές, με κάθε μαθητή να συνδέεται με 3 έως 5 φίλους.

Λέξεις – κλειδιά: Ειδική Αγωγή, Φιλία, Κοινωνικά Δίκτυα, Ανάλυση Συνδέσεων

ΠΕΡΙΛΗΨΗ

Σκοπός της εργασίας είναι να διερευνήσει τις γνώσεις των μαθητών Δημοτικού για τη χρήση της τεχνητής νοημοσύνης στην εκπαίδευση. Για το σκοπό αυτό πραγματοποιήθηκε μια ποσοτική έρευνα σε δείγμα 321 μαθητών Δημοτικού που πηγαίνουν στις τάξεις Δ, Ε και ΣΤ στο Νομό Ζακύνθου. Η συλλογή των δεδομένων έγινε με διανομή έντυπου ερωτηματολογίου στους μαθητές. Τα αποτελέσματα της έρευνας έδειξαν πως η πλειοψηφία των μαθητών γνώριζαν την έννοια της τεχνητής νοημοσύνης (78.5%) και είχαν χρησιμοποιήσει οι ίδιοι ή οι γονείς τους τεχνητή νοημοσύνη (59.7%). Από την ανάλυση των δεδομένων προέκυψε πως οι μαθητές τείνουν να συμφωνήσουν με το ότι η Τεχνητή Νοημοσύνη μπορεί να δημιουργήσει εκπαιδευτικά παιχνίδια που κάνουν τη μάθηση πιο διασκεδαστική, μπορεί να χρησιμοποιηθεί για να δημιουργήσει εκπαιδευτικά παιχνίδια, μπορεί να βοηθήσει τους μαθητές να μάθουν νέες γλώσσες με πιο εύκολο τρόπο και μπορεί να βοηθήσει στην επίλυση μαθηματικών προβλημάτων με εξηγήσεις βήμα-βήμα. Γενικά, οι μαθητές έχουν ένα μέτριο προς υψηλό επίπεδο γνώσεων σε ζητήματα τεχνητής νοημοσύνης, μια ουδέτερη στάση απέναντι στην τεχνητή νοημοσύνη και σε μέτριο βαθμό αναγνωρίζουν τα οφέλη της τεχνητής νοημοσύνης σε διάφορους τομείς της καθημερινότητας. Τέλος, τα ευρήματα έδειξαν πως η αύξηση των γνώσεων των μαθητών και η διαμόρφωση μιας θετικότερης αντίληψης για την τεχνητή νοημοσύνη επηρεάζει θετικά τη στάση των μαθητών για τη χρήση τεχνητής νοημοσύνης στην εκπαιδευτική διαδικασία.

ΠΕΡΙΛΗΨΗ

Η παρούσα ερευνητική μελέτη διερευνά την επίδραση της ενσωμάτωσης ψηφιακών τεχνολογιών στη διδασκαλία της Φυσικής Αγωγής στη Δευτεροβάθμια Εκπαίδευση, με ιδιαίτερη έμφαση στη χρήση παιγνιωδών εφαρμογών (gamification), εικονικής πραγματικότητας (Virtual Reality, VR) και επαυξημένης πραγματικότητας (Augmented Reality, AR).

Μέσω της συλλογής ποιοτικών και ποσοτικών δεδομένων από 15 εκπαιδευτικούς και 60 μαθητές/τριες σε σχολικές μονάδες της Περιφερειακής Διεύθυνσης Εκπαίδευσης Δυτικής Ελλάδας, η έρευνα αποσκοπεί στην αξιολόγηση της συμβολής των εν λόγω τεχνολογιών στην ενίσχυση της μαθητικής συμμετοχής, κινητοποίησης και βελτίωσης των κινητικών δεξιοτήτων.

Τα ευρήματα καταδεικνύουν ότι η αξιοποίηση ψηφιακών εργαλείων ενισχύει το ενδιαφέρον και τη δραστηριοποίηση των μαθητών, ιδίως εκείνων που εμφάνιζαν περιορισμένη εμπλοκή στο παραδοσιακό διδακτικό πλαίσιο. Ωστόσο, αναδεικνύονται κρίσιμες προκλήσεις, κυρίως ως προς την επαρκή επιμόρφωση και την τεχνική υποστήριξη των εκπαιδευτικών.

Η μελέτη καταλήγει σε προτάσεις για την παιδαγωγικά τεκμηριωμένη ενσωμάτωση της τεχνολογίας στη Φυσική Αγωγή, συμβάλλοντας τόσο στη βελτίωση της ποιότητας της διδασκαλίας όσο και στην προώθηση της εκπαιδευτικής ισότητας.

Λέξεις – κλειδιά: Ψηφιακές τεχνολογίες, Φυσική Αγωγή, Gamification, εικονική πραγματικότητα (VR), εκπαιδευτικά Αποτελέσματα

ΔΙΔΑΣΚΑΛΙΑ ΟΛΟΚΛΗΡΟΥ ΤΟΥ ΛΟΓΟΤΕΧΝΙΚΟΥ ΕΡΓΟΥ ΤΟΥ Κ. ΘΕΟΤΟΚΗ «Η ΤΙΜΗ ΚΑΙ ΤΟ ΧΡΗΜΑ» ΜΕ ΤΗ ΧΡΗΣΗ Τ.Π.Ε.

ΠΕΡΙΛΗΨΗ

Η εισήγηση αυτή αναδεικνύει την αξιοποίηση των Τ.Π.Ε. στη διδασκαλία της λογοτεχνίας στη Β΄ Λυκείου, συγκεκριμένα στο έργο «Η τιμή και το χρήμα» του Κ. Θεοτόκη. Η χρήση ψηφιακών μέσων -το διαδίκτυο, ο διαδραστικός πίνακας, η e-τάξη, το οπτικοακουστικό υλικό (ebook, ταινία) και η τεχνητή νοημοσύνη (γλωσσικά μοντέλα)- συνεισφέρει στην επίτευξη των διδακτικών στόχων μέσω καινοτόμων μεθόδων.

Εισαγωγικά, παρουσιάζονται τα προγράμματα σπουδών των ετών 2011, 2021, 2023-2024 που στοχεύουν στον κριτικό και ψηφιακό γραμματισμό. Στη συνέχεια, καταγράφονται ο θετικός ρόλος των Τ.Π.Ε. στην εκπαίδευση και ειδικότερα στη διδασκαλία της λογοτεχνίας αλλά και οι προκλήσεις.

Στο κύριο μέρος της εισήγησης αναλύεται η διδακτική πρόταση ολόκληρης της νουβέλας του Κ. Θεοτόκη μέσω της πλατφόρμας e-τάξη. Περιγράφονται το μοντέλο διδασκαλίας, οι μέθοδοι, η πορεία διδασκαλίας, τα βοηθητικά μέσα και δειγματικά παρουσιάζονται σε φύλλα εργασίας ερωτήσεις κατανόησης, σχολιασμού απόψεων, αφηγηματολογίας, διακειμενικότητας, οπτικοποίησης παραγράφων, αλλαγής αφηγηματικών τρόπων ή οπτικής γωνίας αλλά και παραγωγής λόγου με τη βοήθεια της Τ.Ν.

Στο τέλος της εισήγησης, συνάγονται τα συμπεράσματα από την αλληλεπιδραστική σχέση των Τ.Π.Ε. με τη διδακτική της λογοτεχνίας.

Λέξεις – κλειδιά: λογοτεχνία, μεικτό μοντέλο διδασκαλίας, χρήση Τ.Π.Ε., τεχνητή νοημοσύνη (Τ.Ν.), ψηφιακός γραμματισμός, νέα προγράμματα σπουδών.

ΜΙΚΡΑΣΙΑΤΙΚΗ ΚΑΤΑΣΤΡΟΦΗ ΚΑΙ ΜΙΚΡΑΣΙΑΤΙΚΑ ΜΝΗΜΕΙΑ: ΕΚΠΑΙΔΕΥΤΙΚΗ ΠΡΩΤΟΒΟΥΛΙΑ ΜΕ ΧΡΗΣΗ ΨΗΦΙΑΚΩΝ ΕΡΓΑΛΕΙΩΝ

Πρέβεζα, Ελλάδα
e-mail: alexandropoulosalekos@yahoo.com

ΠΕΡΙΛΗΨΗ

Η παρούσα εργασία εξετάζει την εκπαιδευτική πρωτοβουλία του μαθητικού ομίλου Ιστορίας με τίτλο «Μικρασιατική Καταστροφή και Μικρασιατικά Μνημεία», η οποία υλοποιήθηκε στο 1ο Πρότυπο Γυμνάσιο Πρέβεζας κατά το σχολικό έτος 2022-2023. Σκοπός της πρωτοβουλίας ήταν η συνδυασμένη εμβάθυνση στην ιστορική γνώση και μνήμη της Μικρασιατικής Καταστροφής, μέσω της ενσωμάτωσης καινοτόμων ψηφιακών εργαλείων στην εκπαιδευτική διαδικασία. Η εργασία αναλύει πώς η χρήση της τεχνολογίας ενίσχυσε την κατανόηση των ιστορικών γεγονότων, επιτρέποντας στους μαθητές να προσεγγίσουν και να παρουσιάσουν την ιστορία με σύγχρονο και διαδραστικό τρόπο.

Η μεθοδολογία που ακολουθήθηκε περιλάμβανε τη χρήση ψηφιακών πλατφορμών για την αναζήτηση, ανάλυση και επεξεργασία ιστορικών πηγών, όπως επίσης και την εκπόνηση εργασιών και δημιουργία παρουσιάσεων μέσω λογισμικών παρουσίασης (π.χ. PowerPoint). Παράλληλα, χρησιμοποιήθηκαν ψηφιακά εργαλεία για τη συγκέντρωση φωτογραφικού υλικού, τη δημιουργία ψηφιακών αφισών και την οργάνωση ψηφιακών εκδηλώσεων. Ένα σημαντικό στάδιο του προγράμματος ήταν η δημιουργία ενός τραγουδιού, το οποίο μελοποιήθηκε με τη χρήση μουσικών λογισμικών παραγωγής (όπως το GarageBand και το FL Studio), καθώς και η δημιουργία ψηφιακού ραδιοφωνικού προγράμματος, όπου οι μαθητές παρουσίασαν ιστορικά δεδομένα μέσω ενός σύγχρονου μέσου επικοινωνίας.

Τα κύρια ευρήματα της εργασίας υποδεικνύουν τη θετική επίδραση της χρήσης ψηφιακών εργαλείων στην ενίσχυση της συνεργασίας και της δημιουργικότητας των μαθητών. Η αξιοποίηση των τεχνολογικών εργαλείων επέτρεψε στους μαθητές να συμμετέχουν ενεργά σε όλες τις φάσεις του έργου, ενισχύοντας την κριτική σκέψη και την ικανότητά τους να παράγουν ψηφιακό περιεχόμενο. Ιδιαίτερα, η δημιουργία του τραγουδιού και του ψηφιακού ραδιοφωνικού προγράμματος αποτέλεσε μια κορυφαία στιγμή της μαθησιακής διαδικασίας, καθώς συνδύασε τη μουσική και την ιστορική μνήμη με την τεχνολογία, προσφέροντας στους μαθητές τη δυνατότητα να εκφραστούν δημιουργικά.

Τα αποτελέσματα καταδεικνύουν ότι η συνδυασμένη χρήση παραδοσιακών μεθόδων διδασκαλίας και ψηφιακών εργαλείων ενισχύει την εκπαιδευτική διαδικασία, προσφέροντας στους μαθητές πολύτιμες δεξιότητες για τη σύγχρονη εποχή. Οι μαθητές ανέπτυξαν τις δεξιότητές τους στην κριτική σκέψη, την έκφραση και τη συνεργασία σε ψηφιακό περιβάλλον, αποκτώντας εμπειρίες που ενισχύουν την ικανότητά τους να προσεγγίζουν ιστορικά θέματα με δημιουργικό και σύγχρονο τρόπο.

Λέξεις – κλειδιά: Μικρασιατική Καταστροφή, ιστορική μνήμη, ψηφιακά εργαλεία.

Η MUSIQUE CONCRETE ΩΣ ΕΡΓΑΛΕΙΟ ΨΗΦΙΑΚΗΣ ΑΦΗΓΗΣΗΣ: ΕΝΑ ΕΡΓΑΣΤΗΡΙΟ ΗΛΕΚΤΡΟΑΚΟΥΣΤΙΚΗΣ ΜΟΥΣΙΚΗΣ ΣΥΝΘΕΣΗΣ ΣΤΟ ΜΑΘΗΜΑ ΤΩΝ ΜΟΥΣΙΚΩΝ ΣΥΝΟΛΩΝ

Δημητρακόπουλος Αριστοτέλης
Υποψήφιος Διδάκτωρ Ιονίου Πανεπιστημίου, Εκπαιδευτικός Μουσικής Επιστήμης, Συνθέτης
Μουσικό Σχολείο Πρέβεζας

ΠΕΡΙΛΗΨΗ

Το παρόν επιστημονικό άρθρο διερευνά την ενσωμάτωση της *Musique Concrète (Συγκεκριμένη Μουσική)* στην εκπαιδευτική μεθοδολογία της Ψηφιακής Αφήγησης *(digital storytelling)*, εξετάζοντας τις προοπτικές σύνδεσης του ηχητικού (προ)σχεδιασμού με την αφηγηματική πρακτική. Ως μια μορφή πειραματικής μουσικής δημιουργίας του 20ου αιώνα, με θεμελιώδη εργαλεία την ψηφιακή επεξεργασία, τροποποίηση και αναδιάταξη προ-ηχογραφημένων ήχων περιβάλλοντος, η *Musique Concrète* διευρύνει τα όρια της «παραδοσιακής» σύνθεσης και αψηφά τους αυστηρούς μουσικούς κανόνες και τεχνοτροπίες, σχηματίζοντας πολύμορφα ηχοτοπία. Παράλληλα, η έννοια της Ψηφιακής Αφήγησης εξετάζεται ως ένα εκπαιδευτικό εργαλείο, που συνδυάζει την αξιοποίηση των τεχνολογικών μέσων στην εκπαιδευτική διαδικασία με τη διερευνητική μάθηση και τον αναστοχασμό, για τηδιατύπωση μιας δομημένης και ενδιαφέρουσας ιστορίας.

Με την σύσταση ενός εργαστηρίου σύνθεσης, εντός του μαθήματος των «Μουσικών Συνόλων», διερευνώνται οι τρόποι με τους οποίους οι μαθητές μπορούν να αναπτύξουν τις αφηγηματικές τους ικανότητες, όχι με «πρώτες ύλες» τον λόγο και τα οπτικά μέσα, αλλά αξιοποιώντας τον ηχητικό σχεδιασμό και τη δημιουργία πρωτότυπων συνθέσεων, στα πρότυπα της Musique Concrète.

Για την ανάπτυξη των στόχων της έρευνας, επιστρατεύεται, εκτός των άλλων, ο μεθοδολογικός άξονας της αυτοεθνογραφίας, μέσω της οποίας ο εκπαιδευτικός προγραμματίζει και τροποποιεί το πλάνο μαθήματός του, ισορροπώντας μεταξύ της διδακτικής των τεχνικών μέσων και της φιλοσοφίας της σύνθεσης και μουσικής ρητορικής. Για την ψηφιακή ηχητική επεξεργασία χρησιμοποιείται το ελεύθερο λογισμικό *(DAW) Audacity* και για την αρχειοθέτηση/καταλογοποίηση των συνθέσεων των μαθητών χρησιμοποιείται η διαδικτυακή πλατφόρμα *(streaming service) Soundcloud*.

Το ερευνητικό εγχείρημα επικεντρώνεται στον τρόπο με τον οποίο η διδασκαλία της Musique Concrète σε μαθητές από Γ' Γυμνασίου έως Β' Λυκείου, μπορεί να διεγείρει τη φαντασία, να προωθήσει τη συνεργατική εργασία και να εμβαθύνει την κατανόηση των μαθητών για το ρόλο του ήχου ως μοναδικό υλικό αφήγησης ιστοριών. Τα επιδιωκόμενα αποτελέσματα της εφαρμογής του εργαστηρίου συνοψίζονται στην ανάδειξη της δυναμικής σύνδεσης του ήχου με την αφήγηση στον ψηφιακό κόσμο, εστιάζοντας στη δημιουργία ηχητικών αφηγήσεων που ενισχύουν τη συναισθηματική και νοηματική διάσταση της ιστορίας.

Θεμελιώδη στόχο, αλλά και αποτέλεσμα της εφαρμογής του εργαστηρίου, αποτελεί η σύνθεση πρωτότυπης μουσικής από τους ίδιους τους μαθητές. Το παραπάνω, αφενός, συνιστά την αρχική δημιουργία ενός *portfolio* για μελλοντική χρήση των μαθητών και, αφετέρου, συγκεράζει την αφήγηση με τον ηχητικό σχεδιασμό ως ένα πρώιμο στάδιο της διαδικασίας του *sonification (μετατροπή δεδομένων σε ήχο)*. Επιπρόσθετα, η χρήση του ελεύθερου λογισμικού *(DAW) Audacity* από τους μαθητές, για τον ηχητικό σχεδιασμό, ενισχύει την τεχνολογική τους επάρκεια και προάγει τη χρήση ψηφιακών εργαλείων στην εκπαιδευτική διαδικασία.

Τα ευρήματα της εφαρμογής του εργαστηρίου σύνθεσης στο πλαίσιο του μαθήματος των «Μουσικών Συνόλων» και η δημοσίευση του συγκροτημένου πλάνου μαθήματος, συμβάλλουν, προωθούν και ανοίγουν δρόμους στην έρευνα της μουσικής εκπαίδευσης, εντάσσοντας τη συνθετική διαδικασία σε σχολικό πλαίσιο. Συνεπώς, το ερευνητικό εγχείρημα προτείνει μια επέκταση του προγράμματος σπουδών των «Μουσικών Συνόλων», η οποία εκτός του ότι ενισχύει τους εκπαιδευτικούς στόχους της καλλιτεχνικής έκφρασης και δημιουργίας, παρουσιάζει την σύνθεση -αυτή καθ' αυτήν- ως εκπαιδευτική μεθοδολογία που ενθαρρύνει τη δημιουργικότητα, τον ψηφιακό γραμματισμό και την τεχνική επάρκεια.

Λέξεις – κλειδιά: ψηφιακή αφήγηση, ηλεκτροακουστική σύνθεση, μουσική εκπαίδευση, ψηφιακός γραμματισμός

ΕΠΑΝΑΣΥΝΔΕΟΥΜΕ ΤΟΥΣ ΜΑΘΗΤΕΣ ΜΑΣ ΔΙΑΣΦΑΛΙΖΟΝΤΑΣ ΤΗ ΣΥΝΑΙΣΘΗΜΑΤΙΚΗ ΑΝΑΠΤΥΞΗ ΤΟΥΣ ΣΕ ΕΝΑ ΨΗΦΙΑΚΑ ΚΑΘΟΔΗΓΟΥΜΕΝΟ ΕΚΠΑΙΔΕΥΤΙΚΟ ΣΥΣΤΗΜΑ

ΠΕΡΙΛΗΨΗ

Στο σύγχρονο εκπαιδευτικό περιβάλλον, οι μαθητές βασίζονται σε μεγάλο βαθμό στις τεχνολογίες των μέσων για τη μάθηση και την επικοινωνία και τείνουν συχνά να προτιμούν την επικοινωνία μέσω υπολογιστή από τη δια ζώσης αλληλεπίδραση. Παρότι οι ψηφιακές τεχνολογίες προσφέρουν πολυάριθμα πλεονεκτήματα, μια τέτοια μετατόπιση μπορεί να παρεμποδίσει την ανάπτυξη βασικών κοινωνικών δεξιοτήτων, όπως η δημιουργία φιλικών σχέσεων, η ομαδική εργασία και η αντιμετώπιση πραγματικών κοινωνικών ζητημάτων που απαιτούν συναισθηματική ωριμότητα και ενσυναίσθηση. Η παρούσα εισήγηση διερευνά τις πιθανές μακροπρόθεσμες επιπτώσεις της υπερβολικής εξάρτησης από την ψηφιακή τεχνολογία στην ικανότητα των μαθητών να εμπλέκονται σε προσωπική και διαπροσωπική επικοινωνία. Εξετάζεται το δίλημμα που αντιμετωπίζουν οι εκπαιδευτικοί στην προσπάθειά τους να ισορροπήσουν την ψηφιακή μάθηση με ευκαιρίες ανάπτυξης ουσιαστικών «ήπιων δεξιοτήτων» (soft skills) μέσα στην τάξη. Παράλληλα, παρουσιάζονται τρόποι ενσωμάτωσης τόσο της ψηφιακής όσο και της δια ζώσης αλληλεπίδρασης, με στόχο τη διαμόρφωση ισορροπημένων μαθητών που διαθέτουν τη συναισθηματική νοημοσύνη (Emotional Intelligence – EI) που απαιτείται για την αντιμετώπιση σύνθετων κοινωνικών καταστάσεων.

Βασισμένη σε μελέτες περίπτωσης, έρευνες και σενάρια από την καθημερινή εκπαιδευτική πράξη, η εισήγηση προσφέρει χρήσιμες προτάσεις για την προώθηση μιας ισορροπημένης προσέγγισης στη χρήση των ψηφιακών μέσων στην εκπαίδευση. Παιδαγωγικές προσεγγίσεις όπως το Μοντεσσοριανό σχολείο με περιορισμένο χρόνο οθόνης, η ανεστραμμένη τάξη (flipped classroom) με δια ζώσης συζήτηση, οι ώρες μελέτης χωρίς τεχνολογία, ο συνδυασμός ψηφιακής και έντυπης ανάγνωσης, οι ζώνες συνειδητών διαλειμμάτων (mindful break zones) και οι προκλήσεις ψηφιακής αποτοξίνωσης (digital detox challenges) αποτελούν ενδεικτικά παραδείγματα σύγχρονων πρακτικών που ενσωματώνουν την τεχνολογία, δίνοντας παράλληλα προτεραιότητα στην ανθρώπινη αλληλεπίδραση. Μέσα από τη συστηματική αναγνώριση και επιβεβαίωση των συναισθημάτων και της λογικής σκέψης των μαθητών, ενισχύεται η αυτοπεποίθηση, η δημιουργικότητα και η ανθεκτικότητά τους, οδηγώντας σε μια πιο υποστηρικτική και συμμετοχική τάξη σε σύγκριση με μια αποκλειστικά ψηφιακά βασισμένη μαθησιακή εμπειρία. Όπως επισημαίνει ο Paulo Freire: «Η εκπαίδευση πρέπει να ξεκινά με την επίλυση της αντίφασης δασκάλου–μαθητή, συμφιλιώνοντας τους δύο πόλους, έτσι ώστε και οι δύο να είναι ταυτόχρονα δάσκαλοι και μαθητές». Η θέση αυτή ενισχύει τη διαδραστική μάθηση, στην οποία η τεχνολογία οφείλει να λειτουργεί ενισχυτικά και όχι να αντικαθιστά την ανθρώπινη επαφή και την ανάπτυξη κοινωνικών δεξιοτήτων.

Ακόμη κι αν η τεχνολογία μπορεί να προσομοιώσει πραγματικά σενάρια, η επικοινωνία, η ομαδική εργασία, η ενσυναίσθηση αναπτύσσονται ουσιαστικότερα μέσα από την ανθρώπινη αλληλεπίδραση. Η παγκόσμια επάρκεια (global competency) υπερβαίνει κατά πολύ τη γλωσσική ευχέρεια. Η ουσιαστική συναισθηματική νοημοσύνη καλλιεργείται μέσα από πραγματικούς διαλόγους, συγκρούσεις και ενεργητική ακρόαση — στοιχεία που δεν μπορούν να προσφερθούν από ένα και μόνο τεχνολογικό εργαλείο. Η διδασκαλία και η μάθηση απαιτούν κοινωνικές υποχωρήσεις, διαπραγμάτευση και συλλογική λήψη αποφάσεων, διαδικασίες που λειτουργούν αποτελεσματικότερα σε πραγματικά περιβάλλοντα. Συνεπώς, η τεχνολογία χρειάζεται να υποστηρίζει —και όχι να αντικαθιστά— τις ανθρώπινες συνδέσεις που καθιστούν τη μάθηση πραγματικά ελκυστική και ουσιαστική.

Λέξεις-κλειδιά: συναισθηματική νοημοσύνη, πραγματικά σενάρια ζωής, ανθρώπινη αλληλεπίδραση, ήπιες δεξιότητες, ισορροπημένη διδακτική προσέγγιση

Ο ΡΟΛΟΣ ΤΩΝ ΕΚΠΑΙΔΕΥΤΙΚΩΝ ΣΤΗΝ ΑΠΟΤΕΛΕΣΜΑΤΙΚΗ ΕΦΑΡΜΟΓΗ ΤΗΣ ΔΙΑΦΟΡΟΠΟΙΗΜΕΝΗΣ ΔΙΔΑΣΚΑΛΙΑΣ ΜΕ ΤΗΝ ΑΞΙΟΠΟΙΗΣΗ ΤΩΝ ΝΕΩΝ ΤΕΧΝΟΛΟΓΙΩΝ

ΠΕΡΙΛΗΨΗ

Οι σύγχρονες θεωρίες μάθησης αναγνωρίζουν την ανάγκη για μια συμπεριληπτική εκπαιδευτική διαδικασία η οποία θα σέβεται και θα λαμβάνει υπόψη της τη διαφορετικότητα των μαθητών, σε ένα πλαίσιο διαφοροποιημένης διδασκαλίας, η οποία είναι η μεθοδολογία που βασίζεται στην υπόθεση ότι η διδακτική πράξη χρειάζεται να διαφοροποιείται και να προσαρμόζεται ανάλογα με τις εμπειρίες, τις ανάγκες, τη διαφορετικότητα του μαθητικού πληθυσμού και τα ιδιαίτερα χαρακτηριστικά της κάθε τάξης. Οι παράμετροι που διαφοροποιούνται αφορούν το περιβάλλον της μάθησης, το περιεχόμενο και τη διαδικασία της μάθησης, και το αποτέλεσμα της μάθησης.

Μια τέτοια μαθησιακή διαδικασία, η οποία αξιοποιεί με παιδαγωγικά ορθούς τρόπους τις θεωρητικές παραδοχές του οικοδομισμού και τις νέες τεχνολογίες, απαιτεί από τους εκπαιδευτικούς να αποστασιοποιηθούν από το παραδοσιακό και συντηρητικό δασκαλοκεντρικό μοντέλο διδασκαλίας, που συχνά χαρακτηρίζεται και από μια επιφυλακτική στάση έναντι στην καινοτομία στη διδασκαλία και την εκπαίδευση γενικότερα. Στο πλαίσιο του παραπάνω προβληματισμού, στην εργασία αυτή εξετάζουμε τον ρόλο του εκπαιδευτικού στη διαφοροποιημένη διδασκαλία, δηλαδή, τον τρόπο με τον οποίο θα πρέπει να σκέφτεται και να ενεργεί πριν, κατά τη διάρκεια, αλλά και μετά από την πραγματοποίηση της διδασκαλίας, όταν αναστοχάζεται και «αφουγκράζεται» την τάξη έτσι ώστε να συμβάλλει στην επιτυχή της εφαρμογή. Περιγράφουμε τα χαρακτηριστικά που χρειάζεται να έχουν οι εκπαιδευτικοί που επιθυμούν να εγκαταλείψουν την παραδοσιακή δασκαλοκεντρική προσέγγιση στη διδασκαλία της αγγλικής γλώσσας και να υιοθετήσουν μια προσέγγιση που θέτει στο επίκεντρο τους μαθητές τους, τα ενδιαφέροντα, τα μαθησιακά τους στυλ και τις ανάγκες τους και αξιοποιεί τις νέες τεχνολογίες.

Στη συζήτηση αυτή αποφεύγουμε «μηχανιστικές» προσεγγίσεις από την ελληνική και την ξενόγλωσση βιβλιογραφία που εστιάζονται σε «ρόλους» του εκπαιδευτικού, επειδή μια τέτοια «ανελαστική» θεώρηση δεν συνάδει με τον χαρακτήρα της διαφοροποιημένης διδασκαλίας, η οποία είναι μεν μια οργανωμένη και συστηματική διαδικασία, αλλά δεν μπορεί να βάλει τον εκπαιδευτικό σε συγκεκριμένα «καλούπια». Κατά συνέπεια, στη συγκεκριμένη εργασία, η έννοια της φράσης «ρόλος» του εκπαιδευτικού αναφέρεται στα χαρακτηριστικά που είναι χρήσιμο να έχουν οι εκπαιδευτικοί που επιχειρούν να εφαρμόσουν στην πράξη τα πορίσματα ερευνών σχετικά με τη διαφοροποιημένη διδασκαλία και την αξιοποίηση των νέων τεχνολογιών.

Επειδή η εφαρμογή της διαφοροποιημένης διδασκαλία προϋποθέτει την αποδοχή μιας γενικότερης φιλοσοφίας προσέγγισης της μαθησιακής διαδικασίας, οι εκπαιδευτικοί χρειάζεται να αποδέχονται αυτή τη φιλοσοφία και τον τρόπο σκέψης για τη διδακτική πράξη, να είναι πρόθυμοι να κινηθούν έξω από τη «ζώνη άνεσής» τους και να δοκιμάσουν νέες ιδέες και πρακτικές. Είναι σημαντικό να απομακρυνθούν από την αντίληψη που έχουν για τους εαυτούς τους ως αυτοί που διαθέτουν και μοιράζουν τη γνώση και να κινηθούν προς μια θεώρηση του ρόλου τους που βρίσκεται εγγύτερα σε αυτό του «ενορχηστρωτή μαθησιακών ευκαιριών», αναλαμβάνοντας τον ρόλο του μέντορα. Επίσης, είναι απαραίτητο να παρακολουθούν και να παρατηρούν συστηματικά τους μαθητές τους κατά τη διάρκεια της ατομικής ή της ομαδικής τους εργασίας, να διαπιστώνουν τις δυσκολίες των μαθητών από πρώτο χέρι τη στιγμή που παρουσιάζονται και να παρέχουν υποστήριξη. Τέλος, με στόχο την επαγγελματική τους ανάπτυξη, είναι απαραίτητη η γνώση των θεωρητικών αρχών της διαφοροποιημένης διδασκαλίας, καθώς η γνώση αυτή θα τους βοηθήσει να εντοπίσουν τα χαρακτηριστικά που χρειάζεται να έχουν οι εκπαιδευτικοί που επιχειρούν να εφαρμόσουν τη διαφοροποίηση στη διδασκαλία μέσω των νέων τεχνολογιών σε πρακτικό επίπεδο. Παράλληλα, η αναστοχαστική και κριτική μελέτη της βασικής βιβλιογραφίας θα τους ενισχύσει στην προσπάθειά τους να εφαρμόσουν στο ελληνικό σχολείο τα πορίσματα ερευνών που έχουν πραγματοποιηθεί σε διαφορετικά εκπαιδευτικά συστήματα με τα δικά τους χαρακτηριστικά και ιδιαιτερότητες.

Λέξεις – κλειδιά: διαφοροποιημένη διδασκαλία, νέες τεχνολογίες, ρόλος εκπαιδευτικών

ΔΙΔΑΚΤΙΚΗ ΠΡΟΤΑΣΗ ΑΞΙΟΠΟΙΗΣΗΣ ΤΩΝ ΠΟΛΥΓΡΑΜΜΑΤΙΣΜΩΝ ΚΑΙ ΤΗΣ ΔΗΜΙΟΥΡΓΙΚΗΣ ΓΡΑΦΗΣ ΣΤΗ ΔΙΔΑΣΚΑΛΙΑ ΤΗΣ ΑΦΗΓΗΣΗΣ

ΠΕΡΙΛΗΨΗ

Το παρόν άρθρο πραγματεύεται ζητήματα που κατέχουν σημαντική θέση στα νέα Προγράμματα Σπουδών και αφορά αφενός στη διατύπωση μιας εναλλακτικής διδακτικής πρότασης για τη διδασκαλία της αφήγησης, μέσα από την αξιοποίηση των πολυγραμματισμών και της δημιουργικής γραφής, αφετέρου στη διερεύνηση των αποτελεσμάτων από την εφαρμογή της. Το διδακτικό σενάριο σχεδιάστηκε στο μάθημα της Νεοελληνικής Γλώσσας Α΄ Γυμνασίου από τη φιλόλογο και μέλος ΕΔΙΠ του Τ.Επ.Ε.Κ.Ε. Πανεπιστημίου Πατρών, κ. Ευφροσύνη Κωσταρά, και τη φιλόλογο εκπαιδευτικό της Δευτεροβάθμιας Εκπαίδευσης Αχαΐας, κ. Θεοδώρα Κρικέτου, και υλοποιήθηκε, κατά το σχολικό έτος 2024-2025, στο πλαίσιο δειγματικής διδασκαλίας, σε μαθητές/-τριες αστικού Γυμνασίου της Πάτρας. Μετά την ολοκλήρωση της διδασκαλίας, χορηγήθηκαν ερωτηματολόγια στους/στις μαθητές/-τριες και στους/στις παρατηρητές/-τριες εκπαιδευτικούς για τη διερεύνηση α) της αξιοποίησης των πολυγραμματισμών και της δημιουργικής γραφής στη διδασκαλία της αφήγησης και β) της συμβολής των πολυτροπικών κειμένων στην ανάπτυξη δεξιοτήτων δημιουργικής γραφής.

Αρχικά, παρουσιάζονται βασικά θεωρητικά στοιχεία των πολυγραμματισμών και της συμβολής της δημιουργικής γραφής στην ανάπτυξη γλωσσικών και επικοινωνιακών δεξιοτήτων των μαθητών/-τριών, καθώς και στην ενίσχυση της δημιουργικότητάς τους. Στη συνέχεια, παρουσιάζεται η εφαρμογή της διδακτικής πρότασης, βασική στόχευση της οποίας είναι η ανακάλυψη και κατανόηση από τους/τις μαθητές/-τριες της υπερδομής της αφήγησης, μέσω της αξιοποίησης ενός πολυτροπικού κειμένου (βίντεο), και η συνεργατική παραγωγή δικού τους αφηγηματικού γραπτού κειμένου σε συγκεκριμένο επικοινωνιακό πλαίσιο. Η διδακτική πρόταση περιλαμβάνει δραστηριότητες αποκωδικοποίησης των σημειωτικών τρόπων πολυτροπικών κειμένων (εικόνα, ήχος κ.ά.), με στόχο την ανάπτυξη του οπτικού και του κριτικού γραμματισμού, καθώς και την καλλιέργεια δεξιοτήτων παραγωγής συνεργατικού αφηγηματικού κειμένου. Μεθοδολογικά αξιοποιείται η ομαδοσυνεργατική διδασκαλία και η διερευνητική-ανακαλυπτική μάθηση, με εφαρμογή των τεχνικών διαλογικής συζήτησης στην ολομέλεια και στις ομάδες των μαθητών/-τριών.

Τέλος, παρατίθενται και συζητούνται τα συμπεράσματα της αποδελτίωσης των ερωτηματολογίων που χορηγήθηκαν σε μαθητές/-τριες και εκπαιδευτικούς, δομημένα σε τρεις βασικούς άξονες. Ο πρώτος άξονας αφορά στην εφαρμογή των πολυγραμματισμών, ο δεύτερος στην αξιοποίηση της δημιουργικής γραφής και ο τρίτος στα αποτελέσματα της μετάβασης από την επεξεργασία του πολυτροπικού κειμένου στη δημιουργική γραφή. Με βάση τα ευρήματα, οι μαθητές/-τριες κατανόησαν σε σημαντικό βαθμό την υπερδομή της αφήγησης μέσα από την αξιοποίηση και ενός μη γραπτού κειμένου (βίντεο) και εξοικειώθηκαν και με άλλους σημειωτικούς τρόπους (εικόνα και ήχος), οι οποίοι μπορούν να μεταφέρουν μηνύματα και να παρουσιάσουν την εξέλιξη μιας ιστορίας. Επιπλέον, η συνεργατική παραγωγή λόγου σε ομάδες τούς/τις βοήθησε να σκεφτούν περισσότερες ιδέες και να εκφράσουν συναισθήματα με πιο ελεύθερο τρόπο. Διαπιστώθηκε, τέλος, ότι τα πολυτροπικά στοιχεία του βίντεο βοήθησαν στη δημιουργία των δικών τους ιστοριών, καθώς η χρήση εικόνων συνέβαλε στη διαμόρφωση του ύφους και της ατμόσφαιρας, ενώ η μουσική και τα ηχητικά εφέ τούς/τις ενέπνευσαν ιδέες για τη συναισθηματική εξέλιξη των χαρακτήρων των ιστοριών τους.

Λέξεις – κλειδιά: πολυγραμματισμοί, πολυτροπικά κείμενα, δημιουργική γραφή, δημιουργική αφήγηση

ΜΕΤΑΣΧΗΜΑΤΙΖΟΝΤΑΣ ΤΗ ΔΙΔΑΣΚΑΛΙΑ ΤΗΣ ΦΥΣΙΚΗΣ: Ο ΡΟΛΟΣ ΤΗΣ ΚΡΙΤΙΚΗΣ ΠΑΙΔΑΓΩΓΙΚΗΣ ΚΑΙ ΤΩΝ ΤΠΕ

Μαγαλιού Μαρία
Εκπαιδευτικός ΠΕ04.01 (φυσικός) –Υποψήφια Διδάκτορας,
Παιδαγωγικό Τμήμα Δημοτικής Εκπαίδευσης,
Εθνικό και Καποδιστριακό Πανεπιστήμιο Αθηνών

ΠΕΡΙΛΗΨΗ

Η σύγχρονη διδασκαλία της φυσικής αντιμετωπίζει την πρόκληση όχι μόνο της μετάδοσης της γνώσης, αλλά και της καλλιέργειας του Κριτικού Επιστημονικού Γραμματισμού, ο οποίος περιλαμβάνει την ανάπτυξη της κριτικής σκέψης και τη σύνδεση της επιστήμης με κοινωνικά ζητήματα. Η παρούσα εργασία εξετάζει πώς η Κριτική Παιδαγωγική, σε συνδυασμό με τις Τεχνολογίες Πληροφορίας και Επικοινωνιών (ΤΠΕ), μπορούν να συμβάλουν στην επίτευξη αυτού του κρίσιμου στόχου. Ενώ οι ΤΠΕ προσφέρουν σημαντικές δυνατότητες για να καταστήσουν τη διδασκαλία της φυσικής πιο διαδραστική και αποτελεσματική, η επιτυχής ενσωμάτωσή τους παρεμποδίζεται από σημαντικές προκλήσεις. Η Κριτική Παιδαγωγική, με ρίζες στο έργο του Freire, παρέχει το θεμελιώδες πλαίσιο για την προώθηση του διαλόγου, του προβληματισμού και της σύνδεσης της φυσικής με κοινωνικές και τεχνολογικές εξελίξεις, βασικά συστατικά του Κριτικού Επιστημονικού Γραμματισμού, καθιστώντας το αντικείμενο πιο προσιτό και επίκαιρο. Οι ΤΠΕ συμπληρώνουν αυτή την προσέγγιση προσφέροντας διαδραστικά περιβάλλοντα, προσομοιώσεις και ευκαιρίες για συνεργατική μάθηση, ενισχύοντας έτσι την κατανόηση, ιδιαίτερα των αφηρημένων εννοιών, εντός αυτού του κριτικού πλαισίου. Η εργασία προσδιορίζει τις βασικές δυσκολίες στην ενσωμάτωση των ΤΠΕ όσον αφορά τους εκπαιδευτικούς, τους μαθητές, τις υποδομές και την παιδαγωγική. Η ανασκόπηση της βιβλιογραφίας υποδηλώνει ότι η συνδυασμένη εφαρμογή της Κριτικής Παιδαγωγικής και των ΤΠΕ προσφέρει μια ισχυρή συνέργεια που μπορεί να μεταμορφώσει τη διδασκαλία της φυσικής σε μια ενεργή, διαδραστική και κοινωνικά προσανατολισμένη διαδικασία, μετριάζοντας ενδεχομένως ορισμένες από αυτές τις εντοπισμένες προκλήσεις και προωθώντας τον Κριτικό Επιστημονικό Γραμματισμό. Οι μαθητές αναπτύσσουν κριτική σκέψη, δομούν ενεργά τη γνώση και κατανοούν τη φυσική ως μια ζωντανή επιστήμη συνδεδεμένη με την κοινωνία, διαμορφώνοντας έτσι υπεύθυνους, ενεργούς πολίτες εφοδιασμένους με Κριτικό Επιστημονικό Γραμματισμό.

Λέξεις – κλειδιά: Κβαντική φυσική, Διδακτικό σενάριο, Πείραμα διπλής σχισμήςΤεχνολογίες Πληροφορίας και Επικοινωνιών (ΤΠΕ), Κριτική σκέψη

ΠΕΡΙΛΗΨΗ

Η ανατρεπτική δυναμική των νέων τεχνολογιών αποτελεί πλέον καθημερινό γεγονός που επιδρά τόσο στις επαγγελματικές όσο και στις ακαδημαϊκές επιδιώξεις του ατόμου, από το επίπεδο της πρωτοβάθμιας εκπαίδευσης μέχρι και το ανώτερο επίπεδο γνώσης. Το παρόν πόνημα διερευνά αυτές τις νέες τεχνολογίες που διαφαίνεται να διαταράσσουν σε μεγάλο βαθμό τις ισορροπίες κατάκτησης της επιστημονικής γνώσης, όπως big data analytics (BDA), robotic process automation (RPA), artificial intelligence (AI), Internal of Things (IoT) and distributed ledger technologies (DLT). Αυτή η ανατρεπτική δυναμική διερευνάται από τα στοιχεία ακαδημαϊκών φορέων του τομέα λογιστικής και ελεγκτικής, καθώς οι εν δυνάμει απόφοιτοι εκτίθενται από την έναρξη της επαγγελματικής τους δραστηριοποίησης σε σωρεία τεχνολογικών μεταβολών, μειονεκτούν στην αγορά εργασίας άνευ της κατάλληλης ακαδημαϊκής προετοιμασίας και δυσχεραίνονται στην υιοθέτηση τεχνολογικών εργαλείων κατά τις συνήθεις εργασιακές τους πρακτικές.

Μέσω της παρούσας βιβλιογραφικής ανασκόπησης επιχειρείται η ευαισθητοποίηση των φορέων γνώσης στην υιοθέτηση στο μέγιστο βαθμό όλων των νέων τεχνολογιών κατά την μετάδοση της γνώσης ανεξαρτήτως πεδίου. Τα αποτελέσματα καταδεικνύουν ότι καθώς οι νέες τεχνολογίες αυξάνουν τις εργασιακές απαιτήσεις χρήσης τους από τον επαγγελματία του τομέα λογιστικής και χρηματοοικονομικής ελεγκτικής, μετακυλίεται στην τριτοβάθμια εκπαίδευση η ευθύνη της αρτιότερης προετοιμασίας των εν δυνάμει φοιτητών. Συναφώς, καταδεικνύεται το γεγονός ότι τα ακαδημαϊκά ιδρύματα αρχίζουν σταδιακά να αναγνωρίζουν την απαίτηση για ενσωμάτωση και εφαρμοστική χρήση των υπόψη τεχνολογιών με διαφορετικές μεθόδους προσέγγισης και βαθμό υιοθέτησης. Επίσης, αναδεικνύονται οι τομείς βελτίωσης και οι τάσεις απόκλισης από την τεχνολογική εξέλιξη, συνεκτιμώντας την προδιάθεση για διατήρηση της ακαδημαϊκής ισορροπίας, ενώ επισημαίνεται ο αντίκτυπος της μονοδιάστα της χρήσης των παλαιότερων, κατά τη διδασκαλία των νεότερων τεχνολογιών. Συνακολούθως, η πίεση για επικαιροποίηση της κατάρτισης επί των αναδυόμενων τεχνολογιών μετακυλίεται στην πρότερη βαθμίδα εκπαίδευσης, ως εφαλτήριο του δομημένου εγκλιματισμού σε μία διαρκή εξέλιξη. Τέλος, τα αποτελέσματα της παρούσας αναδεικνύουν την ανάγκη για επικαιροποίηση των οριζόντιων (ήπιων) δεξιοτήτων ως εργαλείο διαχείρισης των αναδυόμενων τεχνολογιών και μίας ολιστικής βελτίωσης της ακαδημαϊκής και επαγγελματικής απόδοσης των αποφοίτων.

Ολοκληρώνοντας, η παρούσα αναδεικνύει θέματα μελλοντικής έρευνας αναφορικά με τα αντικείμενα και τους τομείς ενσωμάτωσης στην Τριτοβάθμια Εκπαίδευση, καθώς και τις σχετικές εκπαιδευτικές πρακτικές.

Λέξεις – κλειδιά: Λογιστική, Ελεγκτική, Εκπαίδευση, Αναδυόμενες Τεχνολογίες.

Η ΜΕΤΑΒΑΣΗ ΤΗΣ ΤΕΧΝΟΛΟΓΙΑΣ ΚΑΙ Ο ΡΟΛΟΣ ΤΗΣ «ΝΕΑΣ ΠΡΟΦΟΡΙΚΟΤΗΤΑΣ» ΣΤΗΝ ΕΚΠΑΙΔΕΥΤΙΚΗ ΔΙΑΔΙΚΑΣΙΑ ΤΩΝ ΕΦΑΡΜΟΣΜΕΝΩΝ ΤΕΧΝΩΝ

ΠΕΡΙΛΗΨΗ

Η διερεύνηση της συνδυαστικής χρήσης της αναλογικής και της ψηφιακής τεχνολογίας στην εκπαίδευση και ειδικότερα στη διδασκαλία της φωτογραφικής πράξης αποτελεί τη βασική συνιστώσα αυτού του άρθρου. Τα ερευνητικά ερωτήματα επικεντρώνονται στη σχέση τεχνολογίας και φωτογραφικού έργου, στη μετάβαση από την αναλογική φωτογραφική τεχνολογία στην ψηφιακή και στην κατανόηση και χρήση των μέσων στην εκπαιδευτική διαδικασία. Σύμφωνα με τον Bolz, η σημασία ενός μέσου γίνεται κατανοητή μόνο μέσα από τη διάδρασή του με άλλα μέσα - σύγχρονα αλλά και παρωχημένα - και ότι τα παλαιότερα μέσα χρησιμεύουν ως μεταφορικά βοηθήματα προσανατολισμού στη ψηφιακή περιοχή (Bolz, 2008). Με βάση αυτή τη θεώρηση σχεδιάστηκε μία βιωματική δράση ως εκπαιδευτική πρακτική για τη φωτογραφία, η οποία αποτελεί τη μελέτη περίπτωσης του άρθρου. Η μεθοδολογία της δράσης συνδυάζει χαρακτηριστικά της μετασχηματίζουσας και της παράπλευρης μάθησης και στοιχεία από μελετητές του οπτικού πολιτισμού όπως η Gillian Rose. Στα πλαίσια της εποχής που διανύουμε, της «νέας προφορικότητας», όπως αναφέρει ο Ong (2015), η οποία συνδέει τις νέες τεχνολογίες με την εκπαίδευση και το ρόλο των ψηφιακών εικόνων, επιχειρείται η διασταύρωση και η αξιοποίηση θεωρητικών θέσεων και βιωματικής δράσης με στόχο την εξαγωγή συμπερασμάτων για τον σύγχρονο οπτικό πολιτισμό. Η αλληλεπίδραση των όρων και των κριτικών θεωριών αναδεικνύει τόσο τις επιρροές των παρωχημένων μέσων στο καλλιτεχνικό έργο όσο και τη δυναμική της μετάβασης στις νέες τεχνολογίες. Η δράση συνοδεύτηκε από ένα ερωτηματολόγιο του οποίου τα ευρήματα προσφέρουν χρήσιμες παρατηρήσεις για την εκπαιδευτική πρακτική και τις εφαρμογές της. Οι χρήστες στους οποίους απευθύνθηκε ήταν κυρίως σπουδαστές φωτογραφίας και αξιολογήθηκε θετικά από την πλειοψηφία, αποδεικνύοντας ότι ο ρόλος της εκπαίδευσης μέσα από βιωματικές ενέργειες έχει τη δυνατότητα να τροποποιήσει την συμπεριφορά την χρηστών ενός μέσου. Παράλληλα έδειξε την κατανόηση και τη διάκριση των συμμετεχόντων σε σχέση με διαφορετικές πρακτικές που ταυτοποιούν τα σύγχρονα μέσα. Συνολικά, αναδείχτηκε η παιγνιώδης διάσταση του μέσου και η συνδυαστική χρήση αναλογικής και ψηφιακής τεχνολογίας ως ένα αξιοποιήσιμο εκπαιδευτικό εργαλείο.

Λέξεις – κλειδιά: νέα προφορικότητα, ψηφιακή φωτογραφία, camera obscura, εκπαίδευση, βιωματική δράση

Η ΑΝΑΓΚΑΙΟΤΗΤΑ ΤΗΣ ΠΑΙΔΑΓΩΓΙΚΗΣ ΕΝΣΩΜΑΤΩΣΗΣ ΤΩΝ ΨΗΦΙΑΚΩΝ ΜΕΣΩΝ ΣΤΗ ΔΙΔΑΚΤΙΚΗ ΠΡΑΞΗ

e-mail: isiguna@yahoo.gr

ΠΕΡΙΛΗΨΗ

Η εργασία εξετάζει τη μάθηση ως μια ενεργητική και δυναμική διαδικασία, όπου οι μαθητές αποκτούν γνώσεις μέσω της προσωπικής εμπλοκής και της αλληλεπίδρασης με το περιβάλλον και τα εργαλεία που υποστηρίζουν τη σκέψη και την επικοινωνία. Παρουσιάζονται βασικές θεωρητικές προσεγγίσεις όπως ο εποικοδομισμός, που τονίζει τη σημασία των εμπειριών και της κοινωνικής αλληλεπίδρασης στη μάθηση, και η θεωρία της δραστηριότητας, που προσεγγίζει τη μάθηση ως συλλογική διαδικασία επηρεαζόμενη από κοινωνικές και πολιτισμικές δομές. Ιδιαίτερη έμφαση δίνεται στον οπτικό γραμματισμό, καθώς οι εικόνες κατέχουν κεντρικό ρόλο στη σύγχρονη επικοινωνία, απαιτώντας από τους μαθητές δεξιότητες ανάλυσης και δημιουργίας οπτικού περιεχομένου. Επιπλέον, η εργασία αναδεικνύει τον μετασχηματιστικό ρόλο της τεχνολογίας στη μαθησιακή διαδικασία, με την ενσωμάτωση εργαλείων του Web 2.0 και την αξιοποίηση της ψηφιακής ταξινομίας του Bloom για την ανάπτυξη ανώτερων δεξιοτήτων σκέψης. Τέλος, τονίζεται η σημασία της παιδαγωγικής αξιοποίησης των ψηφιακών μέσων και της επιμόρφωσης των εκπαιδευτικών, ώστε να παρέχονται μαθησιακές εμπειρίες προσαρμοσμένες στις ανάγκες και τις απαιτήσεις του 21ου αιώνα.

Λέξεις – κλειδιά: ψηφιακά μέσα, παιδαγωγικές θεωρίες, μάθηση.

ΠΕΡΙΛΗΨΗ

Η παιδαγωγική ενσωμάτωση των ψηφιακών μέσων στη διδακτική πράξη αναφέρεται στη χρήση των τεχνολογιών και των ψηφιακών εργαλείων για την υποστήριξη και ενίσχυση της διδασκαλίας και της μάθησης. Η χρήση αυτών των μέσων μπορεί να προσφέρει νέες δυνατότητες για τους εκπαιδευτικούς και τους μαθητές, κάνοντάς τους να αλληλεπιδρούν με το περιεχόμενο της διδασκαλίας με καινοτόμους τρόπους.

Τα σύγχρονα προγράμματα σπουδών βασιζόμενα σε νέες θεωρίες μάθησης ενσωματώνουν ολοένα και περισσότερα ψηφιακά μέσα στη διδασκαλία τόσο των Θετικών όσο και των Θεωρητικών μαθημάτων.

Ιδιαίτερα σε απομακρυσμένα σχολεία ορεινών περιοχών όπως το Γενικό Λύκειο Π. Διασέλλου Άρτας, παρότι είναι τεχνολογικά εξοπλισμένο (διαδραστικές οθόνες αφής, ανεξάρτητο εργαστήριο Πληροφορικής) η συνδεσιμότητα είναι χαμηλή έως ανύπαρκτη.

Παρόλα αυτά ως εκπαιδευτικοί καθημερινά προσπαθούμε να ενσωματώνουμε στη διδασκαλία μας όσο περισσότερα ψηφιακά εργαλεία μπορούμε προκείμενου η μάθηση να γίνεται ενδιαφέρουσα με την εμπλοκή των μαθητών στην όλη εκπαιδευτική διαδικασία, προσανατολισμένη προς το πλαίσιο που ορίζει ο ΟΗΕ (Στόχος 4: Ποιοτική Εκπαίδευση).

Ενδεικτικά ψηφιακά εργαλεία που χρησιμοποιούμε είναι τα ακόλουθα: Mentimeter, Mozabook, Storybird, Google Forms, Canva, Kahoot. Οι μαθητές ερχόμενοι σε επαφή με τα παραπάνω μέσα ενισχύουν την ενεργό συμμετοχή τους με ευχάριστο τρόπο, δουλεύουν ομαδοσυνεργατικά, κατακτούν την νέα γνώση ολόπλευρα και είναι σε θέση να χρησιμοποιήσουν τη νέα γνώση και σε άλλα περιβάλλοντα μάθησης. Με αυτό τον τρόπο η εκπαίδευση γίνεται ποιοτικότερη τόσο για τους μαθητές όσο και για τους εκπαιδευτικούς. Εν κατακλείδι σε ένα συνεχώς μεταβαλλόμενο κόσμο η εκπαίδευση καλείται να ανταποκριθεί στο ρόλο της, πόσο μάλλον ένα σχολείο σε ημιορεινή περιοχή που καλείται να καλύψει τόσο τα μαθησιακά όσο και τεχνολογικά κενά της νέας γενιάς μαθητών. Το όλο εγχείρημα αποτελεί μια ισχυρή στρατηγική για τη συνεχιζόμενη εκπαίδευση, αλλά απαιτεί μια συντονισμένη προσέγγιση για την υπέρβαση των προκλήσεων και την αξιοποίηση των δυνατοτήτων της.

Λέξεις - κλειδιά: ψηφιακά εργαλεία, θεωρίες μάθησης, ποιοτική μάθηση, Θετικές Επιστήμες, Θεωρητικές Επιστήμες

ΘΠ3: Αξιοποίηση και Αξιολόγηση των Ψηφιακών και Τεχνολογικών Μέσων

ΠΕΡΙΛΗΨΗ

Η παρούσα εργασία παρουσιάζει την εμπειρία από την εφαρμογή του Σχεδίου Δράσης με τίτλο «Η Μουσική Τεχνολογία στην Εκπαιδευτική Διαδικασία: Ανακαλύπτοντας την Παραγωγικότητα μέσω της Ηχογράφησης», το οποίο εφαρμόστηκε στο Μουσικό Σχολείο Άμφισσας κατά το σχολικό έτος 2024-2025, στο πλαίσιο της Εσωτερικής Αξιολόγησης Σχολικής Μονάδας του Ινστιτούτου Εκπαιδευτικής Πολιτικής (ΙΕΠ). Ο κύριος στόχος του Σχεδίου Δράσης ήταν η ενίσχυση της μουσικής εκπαίδευσης των μαθητών μέσω της καινοτόμου χρήσης της μουσικής τεχνολογίας και της ηχογράφησης, με την υποστήριξη του προγράμματος ΕΣΠΑ «Αναβάθμιση της Μουσικής Εκπαίδευσης στα Μουσικά Σχολεία» (2023-2026). Οι ειδικοί στόχοι περιλάμβαναν την ανάπτυξη των τεχνικών δεξιοτήτων των μαθητών στην ηχογράφηση και την επεξεργασία ήχου, την καλλιέργεια της δημιουργικότητας μέσω της παραγωγής μουσικών έργων και την κατανόηση της σημασίας της τεχνολογίας στον επαγγελματικό χώρο της μουσικής. Η υλοποίηση περιλάμβανε οργανωμένα εργαστήρια ηχογράφησης και μουσικής παραγωγής, αξιοποιώντας σύγχρονο εξοπλισμό και ψηφιακό λογισμικό (Cubase, Audacity, Dorico, MuseScore). Το πρόγραμμα εφαρμόστηκε σταδιακά, με τους μαθητές να δημιουργούν ομαδικά μουσικά έργα και να αναλαμβάνουν ενεργό ρόλο σε όλα τα στάδια της παραγωγής. Η μεθοδολογία αξιολόγησης εστίασε κυρίως σε ποιοτική προσέγγιση (συνεντεύξεις, παρατήρηση, ανάλυση έργων). Το Σχέδιο Δράσης συνέβαλε άμεσα στην αποτελεσματικότερη υλοποίηση πολιτιστικών προγραμμάτων. Οι βασικές προκλήσεις αφορούσαν τη διαχείριση πόρων, τη διασφάλιση της συμμετοχής των μαθητών και την υποστήριξη των εκπαιδευτικών. Η εργασία καταλήγει αναδεικνύοντας τις προοπτικές για τη βιώσιμη χρήση των ψηφιακών τεχνολογιών στα Μουσικά Σχολεία βάσει των ευρημάτων της ολοκληρωμένης αυτής μελέτης.

Λέξεις-κλειδιά: Ψηφιακές Τεχνολογίες, Μουσική Εκπαίδευση, Δημιουργικότητα, Πολιτιστικά Προγράμματα, Ελληνικό Μουσικό Σχολείο

ΠΕΡΙΛΗΨΗ

Ο COVID-19 πρωτοεμφανίστηκε στην Κίνα το Δεκέμβριο του 2019. Μετά την ανακήρυξή του ως παγκόσμια πανδημία τον Μάρτιο του 2020, πολλές χώρες της Ε.Ε. έκλεισαν τα εκπαιδευτικά ιδρύματα. Στην Ελλάδα η SARS-CoV-2 παρουσιάστηκε το Φεβρουάριο του 2020. Μετά το ένατο κρούσμα, ανακοινώθηκε το κλείσιμο εκπαιδευτικών ιδρυμάτων, συγκεκριμένων νομών για 48 ώρες στις 5-6 Μαρτίου. Παρά τα αναρίθμητα αρνητικά της πανδημίας, πάρθηκαν αποφάσεις και οργανώθηκε η ψηφιακή εξέλιξη της χώρας. Το κλείσιμο των σχολείων πυροδότησε την προσπάθεια για εφαρμογή της ΕξΑΕ.

Μέσω της έρευνας διερευνήθηκαν τα οφέλη της ΕξΑΕ, μέσα από το πρίσμα των μαθητών δευτεροβάθμιας εκπαίδευσης. Εφαρμόστηκε μικτή δειγματοληψία (Στρωματοποιημένη και κατά Συστάδες). Συμμετείχαν 462 μαθητές Γυμνασίων και Λυκείων των νομών Αττικής και Κυκλάδων. Η έρευνα διεξήχθη τον 05/2020. Τα δεδομένα συλλέχθηκαν στο LimeSyrvey, αναλύθηκαν με SPSS (25). Πραγματοποιήθηκε έλεγχος αξιοπιστίας του ερωτηματολογίου με το δείκτη Cronbach’s Alpha, περιγραφική στατιστική, παραγοντική ανάλυση και η δοκιμασία Chi-square.

Το 78,1% των μαθητών ωφελήθηκαν λίγο από την ΕξΑΕ, έναντι του 6,9% των μαθητών που ωφελήθηκαν πολύ από την εφαρμογή της.

Η ΕξΑΕ στήριξε μέσω της πανδημίας το Ελληνικό εκπαιδευτικό σύστημα, σε κάθε βαθμίδα εκπαίδευσης, ωστόσο οι μαθητές Γυμνασίων και Λυκείων, κατά πλειοψηφία, δήλωσαν πως δεν ωφελήθηκαν από αυτή τη μορφή εκπαίδευσης, καθώς δεν ικανοποιήθηκαν οι αρχικές τους προσδοκίες και δεν απέκτησαν τις θεωρητικές γνώσεις που ήλπιζαν ότι θα αποκτήσουν.

Η σύγκριση των ευρημάτων με αντίστοιχα από τη διεθνή βιβλιογραφία αποκαλύπτει κοινά προβλήματα, προκλήσεις αλλά και διαφορές που σχετίζονται με τις ιδιαιτερότητες του εκάστοτε εκπαιδευτικού συστήματος, το επίπεδο τεχνολογικής υποδομής της κάθε χώρας, με τους ιδιαίτερους πολιτισμικούς και οικονομικούς παράγοντες της.

Λέξεις - κλειδιά: Εξ Αποστάσεως Εκπαίδευση, Τηλεκπαίδευση, Τεχνολογίες Πληροφοριών και Επικοινωνιών, Σύγχρονη, Ασύγχρονη. Συντομογραφίες: Απλή Τυχαία Δειγματοληψία (ΑΤΔ), Εξ Αποστάσεως Εκπαίδευση (ΕξΑΕ), Τεχνολογίες Πληροφοριών και Επικοινωνιών (ΤΠΕ)

ΠΕΡΙΛΗΨΗ

Η παρούσα εργασία εξετάζει την επίδραση των Ελλήνων λογίων της Βυζαντινής και Μεταβυζαντινής περιόδου, όπως οι Χαλκοκονδύλης, Χρυσολωράς και Λάσκαρις, στη Φλωρεντινή Αναγέννηση, χρησιμοποιώντας ψηφιακά μέσα και τεχνολογίες πληροφορικής και επικοινωνιών. Στόχος ήταν να αναδειχθεί η καθοριστική συμβολή αυτών των σημαντικών προσωπικοτήτων στη διαμόρφωση του πνευματικού τοπίου της Αναγέννησης και να εξεταστεί πώς η μετάδοση της ελληνικής φιλοσοφίας και των αρχαίων ελληνικών κειμένων επηρέασε την ανάπτυξη της δυτικής σκέψης και τέχνης. Για την υλοποίηση της εργασίας χρησιμοποιήθηκαν ως πηγές ψηφιακά σχολικά βιβλία και επιστημονικά άρθρα. Επιπλέον για την παρουσίαση χρησιμοποιήθηκαν σύγχρονα ψηφιακά εργαλεία, όπως το PowerPoint, εικόνες, βίντεο και ηχογραφήσεις, προκειμένου να δημιουργηθεί μια πολυδιάστατη παρουσίαση, η οποία να προσφέρει μία ολοκληρωμένη κατανόηση του θέματος.

Οι μαθητές/τριες, με την καθοδήγηση των εκπαιδευτικών τους, χρησιμοποίησαν τα ψηφιακά εργαλεία για να δημιουργήσουν μια παρουσίαση που ανέδειξε τις σχέσεις μεταξύ της ελληνικής κλασικής κληρονομιάς και των καλλιτεχνικών και φιλοσοφικών εξελίξεων της Αναγέννησης. Παράλληλα, προχώρησαν στη μελοποίηση ενός ποιήματος που δημιούργησαν οι ίδιοι, εμβαθύνοντας έτσι στην καλλιτεχνική και πολιτιστική διάσταση του θέματος, συνδυάζοντας τα κείμενα με τη μουσική. Αυτή η διαδικασία βοήθησε τους μαθητές/τριες να κατανοήσουν πώς οι Έλληνες λόγιοι, με την αναβίωση των αρχαίων ελληνικών κειμένων, επηρέασαν τους Ιταλούς αναγεννησιακούς διανοούμενους και καλλιτέχνες, δημιουργώντας με αυτόν τον τρόπο έναν πολιτιστικό διάλογο που καθόρισε την πορεία του Δυτικού πολιτισμού.

Η εργασία των μαθητών/τριών παρουσιάστηκε σε διεθνές μαθητικό συνέδριο, στο οποίο συνδυάστηκε η χρήση ψηφιακών μέσων με την προσωπική παρουσίαση από τους μαθητές/τριες. Η πλατφόρμα PowerPoint αποτέλεσε το βασικό εργαλείο παρουσίασης και παράλληλα υπήρξε αλληλεπίδραση των μαθητών/τριών με το κοινό, αναλύοντας τα αποτελέσματα της εργασίας τους. Η δια ζώσης παρουσίαση επέτρεψε στους μαθητές/τριες αναπτύξουν με μεγαλύτερη σαφήνεια τις πτυχές της εργασίας τους και να ενισχύσουν την επικοινωνία με τους συμμετέχοντες.

Τα αποτελέσματα της εργασίας μας ήταν εξαιρετικά θετικά. Οι μαθητές/τριες απέκτησαν βαθιά κατανόηση της Φλωρεντινής Αναγέννησης και της συνεισφοράς των Ελλήνων λογίων στην πνευματική και πολιτιστική άνθηση της εποχής. Επιπλέον, ανέπτυξαν τις ψηφιακές τους δεξιότητες, καλλιεργώντας παράλληλα την ικανότητά τους να δημιουργούν πολυδιάστατες παρουσιάσεις. Η χρήση μουσικής και βίντεο συνέβαλε σημαντικά στην ενίσχυση της μαθησιακής διαδικασίας, δημιουργώντας μια πιο δυναμική και εντυπωσιακή εκπαιδευτική εμπειρία. Ο συνδυασμός της θεωρητικής ανάλυσης με τη σύγχρονη τεχνολογία προσέφερε στους μαθητές/τριες την ευκαιρία να αναπτύξουν μια διαπολιτισμική προσέγγιση του θέματος, ενισχύοντας τη δημιουργικότητά τους και τις επικοινωνιακές τους δεξιότητες.

Λέξεις – κλειδιά: Φλωρεντία, Αναγέννηση, Βυζαντινοί Λόγιοι, ψηφιακά και τεχνολογικά μέσα.

ΠΕΡΙΛΗΨΗ

Η παρούσα μελέτη διερευνά τη χρήση της μάθησης μέσω κινητών συσκευών στη διδασκαλία της Φυσικής στο δημοτικό σχολείο, με ιδιαίτερη έμφαση στην έννοια της Θερμότητας. Το θεωρητικό πλαίσιο βασίζεται σε πολλές θεωρίες μάθησης, όπως η θεωρία της συμπεριφορικής μάθησης, η θεωρία της ανακαλυπτικής μάθησης, ο κονστρουκτιβισμός και ο κοινωνικός κονστρουκτιβισμός, για να παράσχει μια ολιστική εξήγηση της επιστημονικής μάθησης των μαθητών. Η έρευνα διερευνά επίσης την παρούσα κατάσταση της επιστημονικής εκπαίδευσης στην Ελλάδα, δίνοντας έμφαση στις προοπτικές και τις προκλήσεις των μαθητών στην κατανόηση της έννοιας της θερμότητας. Εξετάζει τα κίνητρα, τα οφέλη και τα μειονεκτήματα της μάθησης μέσω κινητών συσκευών, αναλύοντας τις έννοιες του σχεδιασμού της κινητής μάθησης και τη διαδικασία παραγωγής εκπαιδευτικών εφαρμογών.

Η μελέτη χρησιμοποιεί έναν συνδυασμό ερευνητικών προσεγγίσεων ευχρηστίας και αποτελεσματικότητας, χρησιμοποιώντας μια μεικτή μεθοδολογική προσέγγιση. Η μελέτη ευχρηστίας εξετάζει το μέγεθος της ευκολίας και της εμπλοκής της εκπαιδευτικής εφαρμογής, ενώ η έρευνα αποτελεσματικότητας μετρά την επίδραση της εφαρμογής στην κατανόηση της Θερμότητας από τους μαθητές. Η προσέγγιση της μελέτης περίπτωσης χρησιμοποιείται για την παροχή πολύτιμων πληροφοριών σχετικά με τις μαθησιακές εμπειρίες και τα αποτελέσματα των μαθητών. Το δείγμα αποτελείται από μαθητές δημοτικού σχολείου, ενώ τα δεδομένα συλλέγονται με τεστ πριν και μετά την εφαρμογή, ερωτηματολόγια και παρατηρήσεις.

Τα ευρήματα δείχνουν ότι η χρήση εφαρμογών κινητής μάθησης μπορεί να βελτιώσει σημαντικά τη συμμετοχή των μαθητών και την κατανόηση των ιδεών της φυσικής. Η αξιολόγηση της ευχρηστίας αποκαλύπτει σημαντικά επίπεδα ευχαρίστησης και απλότητας της χρήσης, ενώ η αξιολόγηση της αποτελεσματικότητας καταδεικνύει σημαντικές βελτιώσεις στη συγκράτηση πληροφοριών και στις ικανότητες εφαρμογής των μαθητών. Η έρευνα συνεχίζεται με τη συζήτηση των αναμενόμενων πλεονεκτημάτων της μάθησης μέσω κινητών συσκευών, προσφέροντας τεκμηριωμένες προτάσεις προς τους εκπαιδευτικούς και τους υπεύθυνους χάραξης πολιτικής για τη διευκόλυνση της χρήσης της τεχνολογίας στην επιστημονική εκπαίδευση.

Λέξεις – κλειδιά: voice assistant, Android, ευχρηστία, αποτελεσματικότητα, εφαρμογή,Η Μάθηση μέσω Κινητών Συσκευών (M-Learning) στη Διδασκαλία της Φυσικής στο Δημοτικό Σχολείο

Η ΠΟΛΥΜΕΣΙΚΗ ΜΑΘΗΣΗ ΤΟΥ RICHARD MAYER ΚΑΙ Η ΔΗΜΙΟΥΡΓΙΑ ΕΚΠΑΙΔΕΥΤΙΚΟΥ ΒΙΝΤΕΟ ΣΤΑ ΣΥΓΧΡΟΝΑ ΜΟΝΤΕΛΑ ΔΙΔΑΣΚΑΛΙΑΣ

Ζαχαριάδη Βασιλική

ΠΕΡΙΛΗΨΗ

Η ραγδαία ανάπτυξη της τεχνολογίας έχει καταστήσει το εκπαιδευτικό βίντεο βασικό εργαλείο στη διδασκαλία, ενισχύοντας τη μάθηση με διάφορα ερεθίσματα. Σύμφωνα με τη Θεωρία της Πολυμεσικής Μάθησης του Richard Mayer, η μάθηση είναι πιο αποτελεσματική όταν οι πληροφορίες παρουσιάζονται με οπτικοακουστικό τρόπο, αξιοποιώντας τόσο το οπτικό κανάλι (εικόνες, βίντεο, διαγράμματα) όσο και το ακουστικό κανάλι (ομιλία, ήχοι, μουσική). Η θεωρία αυτή βασίζεται σε τρεις θεμελιώδεις αρχές: τη διπλή επεξεργασία της πληροφορίας, τον περιορισμό της χωρητικότητας της μνήμης εργασίας και την ενεργή επεξεργασία του γνωστικού φορτίου.

Το εκπαιδευτικό βίντεο ενσωματώνεται δυναμικά σε όλα τα σύγχρονα μοντέλα μάθησης, ενισχύοντας την κατανόηση και την αφομοίωση της γνώσης. Στο ανεστραμμένο μοντέλο τάξης (Flipped Classroom), οι μαθητές μελετούν εκπαιδευτικά βίντεο πριν από το μάθημα, επιτρέποντας τον εμπλουτισμό της διά ζώσης διδασκαλίας με συνεργατικές και βιωματικές δραστηριότητες. Στο μεικτό μοντέλο μάθησης (Blended Learning), τα βίντεο λειτουργούν ως γέφυρα μεταξύ παραδοσιακής και διαδικτυακής μάθησης, προσφέροντας ευελιξία και εξατομίκευση.

Επιπλέον, το εκπαιδευτικό βίντεο αποτελεί κεντρικό εργαλείο στη διαφοροποιημένη διδασκαλία (Differentiated Instruction), καθώς μπορεί να προσαρμοστεί σε διαφορετικά επίπεδα δυσκολίας, μαθησιακές προτιμήσεις και ρυθμούς. Στη συμπεριληπτική εκπαίδευση (Inclusive Education), τα πολυμεσικά στοιχεία διευκολύνουν την πρόσβαση των μαθητών με μαθησιακές δυσκολίες, με τη χρήση υπότιτλων, αφήγησης και διαδραστικών εργαλείων. Τα εκπαιδευτικά βίντεο βοηθούν στην αύξηση της κατανόησης και στην επιτυχημένη οργάνωση του μαθήματος. Αντίστοιχα, στη διαβαθμισμένη διδασκαλία (Tiered Instruction), οι εκπαιδευτικοί δημιουργούν πολλαπλές εκδοχές του ίδιου βίντεο, προσαρμοσμένες στις δυνατότητες των μαθητών.

Η αποτελεσματική δημιουργία εκπαιδευτικών βίντεο απαιτεί την εφαρμογή αρχών της θεωρίας του Mayer, χώρου και χρόνου μεταξύ κειμένου και εικόνας, την εξάλειψη περιττών πληροφοριών (ελαχιστοποίηση γνωστικού φορτίου) και την ενεργή συμμετοχή των μαθητών μέσω ερωτήσεων και διαδραστικών στοιχείων.

Συμπερασματικά, η χρήση του εκπαιδευτικού βίντεο, βασισμένη στις αρχές της πολυμεσικής μάθησης, μπορεί να μεταμορφώσει τη διαδικασία της διδασκαλίας, καθιστώντας την περισσότερο προσαρμοσμένη, πιο εξατομικευμένη, διαδραστική και αποτελεσματική, ενισχύοντας την κατανόηση και τη συμμετοχή των μαθητών στην σύγχρονη τάξη.

Λέξεις κλειδιά: Πολυμεσική μάθηση, εκπαιδευτικό βίντεο

ΣΥΜΕΡΑΣΜΑΤΑ ΕΡΕΥΝΑΣ ΓΙΑ ΤΗ ΧΡΗΣΗ ΤΩΝ ΜΕΣΩΝ ΚΟΙΝΩΝΙΚΗΣ ΔΙΚΤΥΩΣΗΣ ΑΠΟ ΕΦΗΒΟΥΣ

Κατσαρός Κωνσταντίνος
Σύμβουλος Εκπαίδευσης Πληροφορικής ΠΕ86
Διεύθυνσης Δευτεροβάθμιας Εκπαίδευσης Αιτωλοακαρνανίας
e-mail: katsaros74@sch.gr

ΠΕΡΙΛΗΨΗ

Η παρούσα μελέτη διερευνά τη χρήση των μέσων κοινωνικής δικτύωσης από μαθητές Δευτεροβάθμιας Εκπαίδευσης, εστιάζοντας στις συνήθειες, στους κινδύνους που μπορεί να προκύψουν από τη χρήση των μέσων αλλά και στους πιθανούς τρόπους αντιμετώπισής τους.

Για τη συλλογή των δεδομένων χρησιμοποιήθηκε ερωτηματολόγιο που διανεμήθηκε και συμπληρώθηκε από 80 μαθητές Β Λυκείου (32 αγόρια και 48 κορίτσια), ηλικίας 16-17 ετών, προερχόμενους από ένα αστικό σχολείο της Λευκάδας. Το ερωτηματολόγιο δημιουργήθηκε με στόχο να αποτυπωθούν οι συνήθειες, η συχνότητα αλλά και ο τρόπος χρήσης των κοινωνικών δικτύων, να εντοπιστούν πιθανοί κίνδυνοι (όπως διαδικτυακός εκφοβισμός, παραβίαση προσωπικών δεδομένων, εθισμός) και να εξεταστεί αν υπάρχουν διαφορές στην επίδραση αυτών των κινδύνων ανάλογα με το φύλο των μαθητών.

Τα ευρήματα επιβεβαιώνουν την εφαρμογή της θεωρίας του ψηφιακού εθισμού (Young, 1998) όσον αφορά την υπερβολική χρήση, της κοινωνικής μάθησης (Bandura, 1977) στις επιλογές πλατφορμών και συμπεριφορών, και της αντίληψης του κινδύνου (Slovic, 1987) στις διαφορές φύλου.

Σύμφωνα με τα αποτελέσματα, η πλειονότητα των μαθητών χρησιμοποιεί τα μέσα κοινωνικής δικτύωσης σε καθημερινή βάση, κυρίως στην επικοινωνία με φίλους - συγγενείς και στην ψυχαγωγία και λιγότερο στην ενημέρωση. Δημοφιλέστερες πλατφόρμες αναδεικνύονται το Instagram, το TikTok και το Snapchat ενώ λιγότερο δημοφιλής είναι η πλατφόρμα του Facebook και του X.

Είναι σημαντικό όμως να τονιστεί ότι ένα σημαντικό ποσοστό μαθητών ανέφερε ότι έχει έρθει αντιμέτωπο με κινδύνους ή έχει γνώση ότι άτομα του άμεσου περιβάλλοντός του έχουν αντιμετωπίσει καταστάσεις που τους έκαναν να αισθανθούν άβολα. Η επεξεργασία των ερωτηματολογίων ανέδειξε ότι οι μαθήτριες βιώνουν πιο συχνά περιστατικά που τις κάνουν να νοιώθουν άβολα αλλά από την άλλη αυτό τις ωθεί να ανησυχούν περισσότερο για την ασφάλεια των προσωπικών τους δεδομένων και τις κάνει επιφυλακτικότερες έναντι των μαθητών στην αντιμετώπιση και διαχείριση διαδικτυακών κινδύνων. Αντίθετα, τα αγόρια εμφανίζονται πιο επιρρεπή σε θέματα πρόληψης κινδύνων.

Η έρευνα αναδεικνύει επίσης ότι οι περισσότεροι μαθητές έχουν διδαχθεί και γνωρίζουν βασικούς τρόπους προστασίας (όπως διαχείριση κωδικών, ρυθμίσεις απορρήτου, αποκλεισμός ανεπιθύμητων χρηστών, αναζήτηση σε σχετικές ιστοσελίδες), όμως είτε από αμέλεια είτε από άλλους λόγους δεν εφαρμόζουν πάντα τους απαιτούμενους κανόνες για την ατομική τους ασφάλεια.

Η εκπαίδευση σε θέματα ψηφιακής ασφάλειας και η προώθηση ενός υγιούς διαδικτυακού περιβάλλοντος κρίνονται απαραίτητες, τόσο από τους εκπαιδευτικούς όσο και από τους γονείς. Έμφαση πρέπει να δοθεί επίσης στη διερεύνηση των αιτιών της διαφοράς που παρατηρήθηκε να υπάρχει ανάλογα με το φύλο των μαθητών.

Λέξεις – κλειδιά: διαδίκτυο, μέσα κοινωνικής δικτύωσης, εκφοβισμός, ασφάλεια

ΠΕΡΙΛΗΨΗ

Εισαγωγή: Η αξιοποίηση των νέων τεχνολογιών στη διδακτική πράξη έχει αναδιαμορφώσει την εκπαίδευση, προσφέροντας καινοτόμα εργαλεία που ενισχύουν τη μαθησιακή εμπειρία. Οι Τεχνολογίες της Πληροφορίας και της Επικοινωνίας (ΤΠΕ) επιτρέπουν την αλληλεπίδραση, τη συνεργασία και την πρόσβαση σε εκπαιδευτικούς. Παράλληλα, προάγουν την εξατομικευμένη μάθηση και τη δημιουργικότητα, ενώ υποστηρίζουν τους εκπαιδευτικούς στην οργάνωση και παρουσίαση της γνώσης. Ωστόσο, η αποτελεσματική ενσωμάτωσή τους απαιτεί κατάλληλη εκπαίδευση, τεχνική υποστήριξη και στρατηγική προσέγγιση, ώστε να αξιοποιηθούν πλήρως οι δυνατότητές τους.

Σκοπός: Η εργασία εξετάζει τη χρήση των ΤΠΕ στην τριτοβάθμια εκπαίδευση, αναλύοντας τα οφέλη, τις προκλήσεις και το βαθμό ενσωμάτωσής τους από τους καθηγητές τριτοβάθμιας εκπαίδευσης. Παράλληλα, διερευνά τις αντιλήψεις των εκπαιδευτικών σχετικά με τη χρησιμότητα, τις προκλήσεις και τις επιπτώσεις των ΤΠΕ στη διδασκαλία και τη μάθηση.

Μέθοδος: Η μελέτη πραγματοποιήθηκε με συμπλήρωση ερωτηματολογίου από 62 καθηγητές πανεπιστημίου σχετικά με την ενσωμάτωση των ΤΠΕ στην εκπαιδευτική διαδικασία.

Αποτελέσματα: Η πλειονότητα των καθηγητών (96,8%) έχει ενσωματώσει τις ΤΠΕ στις διδακτικές πρακτικές, με θετικές αντιλήψεις για τη χρησιμότητα, το ενδιαφέρον και την ασφάλεια των τεχνολογιών αυτών. Ωστόσο, αναδείχθηκαν εμπόδια, όπως η έλλειψη τεχνικής υποστήριξης, η ανεπάρκεια κατάλληλου λογισμικού και οι περιορισμοί χρόνου, ειδικά σε συγκεκριμένες ηλικιακές ομάδες. Παρά τη συχνή χρήση βασικών εργαλείων, όπως το διαδίκτυο και οι εφαρμογές γραφείου, πιο εξειδικευμένα εργαλεία, όπως οι διαδραστικοί πίνακες και τα λογισμικά ψηφιακών τεστ, παραμένουν ανεκμετάλλευτα. Επιπλέον, καταγράφηκε ισχυρή επιθυμία για περαιτέρω επιμόρφωση, εστιάζοντας σε προχωρημένες δεξιότητες υπολογιστών, ασφάλεια στο διαδίκτυο και αξιοποίηση εργαλείων Web 2.0.

Συμπεράσματα: Η μελέτη υπογραμμίζει τη σημαντική συμβολή των ΤΠΕ στη βελτίωση της εκπαιδευτικής διαδικασίας, ενώ ταυτόχρονα αναδεικνύει τα εμπόδια που περιορίζουν την πλήρη αξιοποίησή τους. Απαιτείται πρόσθετη υποστήριξη και στοχευμένη επιμόρφωση για την ενίσχυση των δεξιοτήτων τους. Ο σχεδιασμός προγραμμάτων κατάρτισης και η προσαρμογή εκπαιδευτικών πολιτικών στις ανάγκες των καθηγητών κρίνονται αναγκαία για τη βέλτιστη ενσωμάτωση των ΤΠΕ και τη βελτίωση της συνολικής εκπαιδευτικής εμπειρίας.

Λέξεις– κλειδιά: ΤΠΕ, Διδακτική Πράξη, Επιμόρφωση, Εμπόδια και προκλήσεις.

ΜΟΝΤΕΛΟ ΠΑΡΑΚΟΛΟΥΘΗΣΗΣ ΤΗΣ ΔΙΑΤΡΟΦΙΚΗΣ ΠΡΟΣΛΗΨΗΣ, ΤΟΥ ΤΡΟΠΟΥ ΖΩΗΣ ΚΑΙ ΤΗΣ ΦΥΣΙΚΗΣ ΔΡΑΣΤΗΡΙΟΤΗΤΑΣ ΑΣΘΕΝΩΝ ΜΕ ΤΗ ΧΡΗΣΗ ΤΕΧΝΟΛΟΓΙΩΝ ΠΛΗΡΟΦΟΡΙΚΗΣ ΚΑΙ ΕΠΙΚΟΙΝΩΝΙΩΝ

ΠΕΡΙΛΗΨΗ

Η παρούσα μελέτη εξετάζει τη χρήση των τεχνολογιών πληροφορικής και επικοινωνιών (ΤΠΕ) στην καθημερινή πρακτική των εκπαιδευτικών διατροφής-διατροφολογίας και φυσικής αγωγής, με έμφαση στην παρακολούθηση της διατροφικής πρόσληψης και της φυσικής δραστηριότητας των ατόμων. Η βιβλιογραφία υποδεικνύει ότι οι εφαρμογές κινητών τηλεφώνων, ειδικά όταν συνδυάζονται με φορητές συσκευές (wearables), αποτελούν αποτελεσματικά εργαλεία για την προώθηση υγιεινών διατροφικών συνηθειών και την ενίσχυση της συμμόρφωσης των ατόμων. Στο πλαίσιο της μελέτης, επιλέχθηκε η πλέον κατάλληλη εφαρμογή από τριάντα διαθέσιμες στα καταστήματα PlayStore και AppStore, η οποία αξιοποιήθηκε σε πειραματική διαδικασία με δύο ασθενείς, προκειμένου να αξιολογηθεί η πρακτική της χρησιμότητα και η συμβολή της στη διαχείριση της υγείας. Τα αποτελέσματα αναδεικνύουν την αποτελεσματικότητα των εργαλείων m-Health για την παρακολούθηση και την καθοδήγηση των ατόμων, ενώ παράλληλα υπογραμμίζουν την ανάγκη για περαιτέρω έρευνα με διαφοροποιημένα δείγματα, προκειμένου να διερευνηθούν τα μακροπρόθεσμα οφέλη και οι πιθανοί κίνδυνοι της εφαρμογής αυτών των τεχνολογιών. Συνολικά, οι ΤΠΕ προσφέρουν σημαντικές δυνατότητες τόσο για τους επαγγελματίες υγείας όσο και για τους ασθενείς, ενισχύοντας την εξατομικευμένη παρακολούθηση και υποστήριξη της υγείας.

Λέξεις κλειδιά: ΤΠΕ, m-health, εφαρμογές διατροφής, εφαρμογές σωματικής άσκησης

ΠΕΡΙΛΗΨΗ

Ο σκοπός της παρούσας εργασίας ήταν η διερεύνηση της αξιοποίησης των Τεχνολογιών Πληροφορίας και Επικοινωνιών από τους εκπαιδευτικούς που υπηρετούν στις σχολικές μονάδες της δευτεροβάθμιας εκπαίδευσης του Νομού Ιωαννίνων. Μέσα από τη συμμετοχή 139 εκπαιδευτικών διαφόρων ειδικοτήτων στη διαδικτυακή συμπλήρωση σχετικού ερωτηματολογίου εξετάστηκαν ζητήματα όπως: η διαθεσιμότητα και ο τρόπος πρόσβασης στον υλικοτεχνικό εξοπλισμό, το ποσοστό χρήσης των διαθέσιμων Τ.Π.Ε., ο τύπος δραστηριοτήτων στις οποίες αξιοποιούνται οι Τ.Π.Ε., το είδος μαθησιακού και διδακτικού υλικού που χρησιμοποιείται από τους εκπαιδευτικούς, βασικοί παράγοντες που επηρεάζουν αρνητικά τη χρήση των Τ.Π.Ε., η συμμετοχή των εκπαιδευτικών σε επιμορφωτικές δράσεις για τις Τ.Π.Ε. στη διδασκαλία, καθώς και οι απόψεις και στάσεις των εκπαιδευτικών σχετικά με τις Τ.Π.Ε. κατά τη διδασκαλία και γενικότερα στα πλαίσια της σχολικής μονάδας. Η συλλογή των δεδομένων του ερωτηματολογίου διεξήχθη κατά το προτελευταίο δίμηνο του έτους 2018. Πολλά από τα αποτελέσματα της έρευνας συμφωνούν με τα αντίστοιχα της τελευταίας έρευνας του ευρωπαϊκού δικτύου European Schoolnet. Μεταξύ των σημαντικότερων συμπερασμάτων της έρευνας συγκαταλέγονται τα εξής: υφίσταται ανεπάρκεια κατάλληλου υλικοτεχνικού εξοπλισμού για τη χρήση Τ.Π.Ε. που αποτελεί και τον πιο αρνητικό παράγοντα χρήσης τους στη διδασκαλία και τη μάθηση, υπάρχει μεγαλύτερη τάση αξιοποίησης των Τ.Π.Ε., οι εκπαιδευτικοί Θεωρητικών Σπουδών δημιουργούν συχνότερα δικό τους ψηφιακό υλικό λόγω πιθανής ανεπάρκειας έτοιμου αντίστοιχου υλικού και συμβουλεύονται περισσότερο το υλικό από το σχολικό δίκτυο και τις σχολικές βάσεις δεδομένων ενώ συνάμα επιμορφώνονται περισσότερο σε προσωπικό επίπεδο για τις Τ.Π.Ε. στον ελεύθερο χρόνο τους για να μπορέσουν να ανταπεξέλθουν στις σύγχρονες απαιτήσεις, η επιμόρφωση στις Τ.Π.Ε. από προσωπικό του σχολείου είναι πολύ σπάνια, αναδεικνύεται ο σημαντικός ρόλος της επιμόρφωσης λόγω συχνής εμπλοκής των εκπαιδευτικών με τα πεδία στα οποία επιμορφώθηκαν, η σημαντικότερη θετική συνεισφορά της χρήσης των Τ.Π.Ε. είναι η ενίσχυση της συνεργασίας των μαθητών, ενώ απαιτούνται ριζικές αλλαγές στα σχολεία για την πλήρη εκμετάλλευση των Τ.Π.Ε. στη διδασκαλία και τη μάθηση.

Λέξεις-κλειδιά: Τεχνολογίες Πληροφορίας και Επικοινωνιών (Τ.Π.Ε.), Χρήση και Αξιοποίηση των Τ.Π.Ε. στη Διδασκαλία, Δευτεροβάθμια Εκπαίδευση, Απόψεις, Στάσεις, Επιμόρφωση.

ΕΦΑΡΜΟΓΗ ΤΗΣ ΑΝΑΛΥΣΗΣ ΣΥΝΑΙΣΘΗΜΑΤΟΣ ΣΤΑ ΣΧΟΛΙΚΑ ΕΓΧΕΙΡΙΔΙΑ ΙΣΤΟΡΙΑΣ: Η ΠΕΡΙΠΤΩΣΗ ΤΗΣ ΜΙΚΡΑΣ ΑΣΙΑΣ

ΠΕΡΙΛΗΨΗ

Η παρούσα μελέτη διερευνά το συναισθηματικό υπόβαθρο της Μικρασιατικής Καταστροφής (1922), όπως αυτό αναπαρίσταται στα επίσημα ελληνικά σχολικά εγχειρίδια ιστορίας της δευτεροβάθμιας εκπαίδευσης, μέσω λεξικογραφικής ανάλυσης συναισθημάτων. Συγκροτήθηκε ένα σώμα κειμένων που περιλαμβάνει όλα τα αποσπάσματα των σχολικών εγχειριδίων με ρητές αναφορές στη Μικρά Ασία, βάσει του οποίου επιλέχθηκαν χειροκίνητα ενότητες που αντανακλούν τόσο τις πολιτικές όσο και τις κοινωνικοπολιτισμικές διαστάσεις του γεγονότος. Η προεπεξεργασία του υλικού πραγματοποιήθηκε στην πλατφόρμα R, περιλαμβάνοντας τη μετατροπή των κειμένων σε πεζά, την αποσύνθεση σε γλωσσικά στοιχεία (tokenization) και την αφαίρεση κοινών λέξεων (stop words). Μέσω της χρήσης ενός Ελληνικού λεξικού συναισθημάτων, αποδόθηκαν τιμές πολικότητας σε μεμονωμένα γλωσσικά στοιχεία. Οι αθροιστικές, μη επεξεργασμένες τιμές συναισθηματικής φόρτισης κανονικοποιήθηκαν σε συνάρτηση με το μήκος κάθε αποσπάσματος, προκειμένου να καταστεί εφικτή η συγκριτική ανάλυση μεταξύ διαφορετικών αφηγηματικών ενοτήτων. Τα ευρήματα καταδεικνύουν ότι οι αφηγήσεις των σχολικών εγχειριδίων διατηρούν έναν ουδέτερο συναισθηματικό τόνο (84,2% των επισημάνσεων), γεγονός που υποδηλώνει μια παιδαγωγική προσέγγιση επικεντρωμένη στην αντικειμενικότητα και την τεκμηριωμένη παρουσίαση των γεγονότων. Τα αρνητικά συναισθήματα αντιστοιχούν στο 14,1% των επισημάνσεων και εντοπίζονται κυρίως σε αποσπάσματα που περιγράφουν συγκρούσεις, εκτοπισμούς και απώλειες, υπογραμμίζοντας τον τραυματικό χαρακτήρα της ιστορικής εμπειρίας. Αντιθέτως, οι θετικά φορτισμένες αναφορές είναι ελάχιστες (1,6%) και περιορίζονται σε σύντομες μνείες κοινοτικής αλληλεγγύης ή προσπαθειών ανασυγκρότησης. Η λεξικογραφική ανάλυση αναδεικνύει, επιπλέον, τη συχνή χρήση όρων όπως *ελλάδα*, *αθήνα* και της αντωνυμίας *μάς*, οι οποίοι συγκροτούν μια συλλογική εθνική προοπτική, ενώ η παρουσία χρονικών δεικτών όπως *αιώνα* και *χρόνια* ενισχύει τη χρονολογική οργάνωση της αφήγησης. Εν γένει, τα ευρήματα καταδεικνύουν ότι τα ελληνικά ιστορικά σχολικά εγχειρίδια διατηρούν έναν κατά βάση ουδέτερο, επιστημονικά προσανατολισμένο αφηγηματικό τόνο, με αισθητά μεγαλύτερη συναισθηματική ένταση σε σημεία που αναφέρονται σε τραυματικά γεγονότα και ελάχιστες αναφορές θετικής συναισθηματικής χροιάς. Η παρούσα ανάλυση υπογραμμίζει, εν τέλει, τη χρησιμότητα των υπολογιστικών μεθόδων για την εμπειρική αποτύπωση των συναισθηματικών διαστάσεων εντός των εκπαιδευτικών αφηγήσεων και συμβάλλει στη θεμελίωση πολιτισμικά ευαίσθητων, θεματικά εξειδικευμένων μοντέλων συναισθηματικής ανάλυσης στο πεδίο της ιστορικής έρευνας.

Λέξεις-κλειδιά: Ανάλυση Συναισθημάτων, Μικρά Ασία, Επεξεργασία Φυσικής Γλώσσας, Ιστορία.

ΑΝΑΠΤΥΞΗ ΠΡΩΤΟΤΥΠΟΥ ΔΙΔΑΚΤΙΚΟΥ ΥΛΙΚΟΥ ΓΙΑ ΤΗ ΓΕΡΜΑΝΙΚΗ ΩΣ ΞΕΝΗ ΓΛΩΣΣΑ ΜΕ ΧΡΗΣΗ ΛΟΓΙΣΜΙΚΟΥ ΤΕΧΝΗΤΗΣ ΝΟΗΜΟΣΥΝΗΣ ΚΑΙ ΨΗΦΙΑΚΩΝ ΕΡΓΑΛΕΙΩΝ

Δρ. Ριζοπούλου Αικατερίνη
Αναπληρώτρια Καθηγήτρια Γερμανικής Γλώσσας
Διεύθυνση Δευτεροβάθμιας Εκπαίδευσης Α΄ Αθήνας
Αθήνα, Ελλάδα
e-mail: krizopoulou@gmail.com

ΠΕΡΙΛΗΨΗ

Τα σχολικά διδακτικά εγχειρίδια για τη διδασκαλία και εκμάθηση της Γερμανικής γλώσσας στη δευτεροβάθμια εκπαίδευση δεν συνοδεύονται από ακουστικό υλικό. Αυτό αποτελεί ένα ιδιαίτερο πρόβλημα, ιδίως στην Α΄ Γυμνασίου, όπου το επίπεδο γλωσσομάθειας ορίζεται ως A1- (μείον A1), δηλαδή κάτω από το πρώτο επίπεδο στοιχειώδους γνώσης της γλώσσας, όπως αυτό περιγράφεται στο Κοινό Ευρωπαϊκό Πλαίσιο Αναφοράς για τις Γλώσσας (ΚΕΠΑ).

Αν και τα τελευταία χρόνια έχουν γίνει κάποιες προσπάθειες δημιουργίας ακουστικού υλικού από το ΙΕΠ ή από συναδέλφους/ισσες για τη Γερμανική ως Ξένη Γλώσσα στη δευτεροβάθμια εκπαίδευση και αυτό το ακουστικό υλικό διατίθενται ψηφιακά στο «Φωτόδεντρο» του Εθνικού Συσσωρευτή Εκπαιδευτικού Περιεχομένου, το πλήθος των ακουστικών κειμένων που αφορούν στο πολύ αρχικό επίπεδο γλωσσομάθειας της Α΄ Γυμνασίου είναι εξαιρετικά περιορισμένο, ενώ σε αρκετές περιπτώσεις το προσφερόμενο υλικό είτε ξεπερνάει κατά πολύ το προς κατάκτηση γλωσσικό επίπεδο είτε δεν ανταποκρίνεται στη θεματολογία του σχολικού διδακτικού εγχειριδίου.

Η ανεύρεση ή η προσαρμογή τόσο γερμανόφωνων ακουστικών κειμένων, όσο και κατάλληλων ακουστικών ασκήσεων για την ανάπτυξη κατανόησης προφορικού λόγου των μαθητών/τριών στα Γερμανικά αποδεικνύεται στην πράξη ένα δύσκολο εγχείρημα για τους εκπαιδευτικούς της Γερμανικής γλώσσας. Κι αν και με δυσκολία μπορούν να βρεθούν κάποια κείμενα ακουστικής κατανόησης, με μεγάλη δυσκολία μπορούν να βρεθούν ασκήσεις καλλιέργειας της ακουστικής ικανότητας των μαθητών/τριών στο πολύ αρχικό επίπεδο γλωσσομάθειας.

Η παρούσα εργασία εξετάζει, κατά πόσον οι πρόσφατες εξελίξεις στο χώρο της τεχνητής νοημοσύνης με την ανάπτυξη λογισμικού για παραγωγή text-to-speech και voice-transformation μπορεί να καλύψει αυτό το κενό για τη διδασκαλία / εκμάθηση της Γερμανικής ως ξένης γλώσσας. Έρευνες της τελευταίας δεκαετίας δείχνουν ότι διάφορα λογισμικά text-to-speech μπορούν να βοηθήσουν στην κατανόηση και εκμάθηση του λεξιλογίου και να συμβάλουν στη βελτίωση της αναγνωστικής ικανότητας των μαθητών/τριών, λειτουργώντας πρακτικά ως «αναγνώστες» μεμονωμένων λέξεων, εκφράσεων ή ακόμα και ολόκληρων κειμένων. Επίσης, έχει εμπειρικά καταδειχθεί ότι οι ξενόγλωσσοι μαθητές/τριες κυρίως της Αγγλικής γλώσσας σε αρχάριο επίπεδο δεν ενοχλούνται από την τυχόν μη-φυσική προσωδία του ακουστικού κειμένου που αναπαράγουν τα λογισμικά αυτά.

Τίθεται όμως το ερώτημα, αν με την Τεχνητή Νοημοσύνη μπορεί η ανάπτυξη της κατανόησης προφορικού λόγου στην ξένη γλώσσα να πάει ένα βήμα πέρα από την φωνητική αναπαραγωγή μεμονωμένων γραπτών λέξεων / προτάσεων. Πιο συγκεκριμένα, στην παρούσα εργασία μελετάται, αν με αντίστοιχο λογισμικό (εδώ: Murf ai) δύναται να δημιουργηθεί όσο το δυνατόν «αυθεντικό» ακουστικό υλικό για τη Γερμανική γλώσσα με όσο το δυνατόν πιο ανθρώπινα χαρακτηριστικά, ποια είναι τα υπέρ και τα κατά του όσον αφορά τη Γερμανική γλώσσα και πώς το δημιουργηθέν υλικό εμπλουτιζόμενο και από περαιτέρω ηχητικά αρχεία (όπως από βιβλιοθήκες ήχων) μπορεί να επεξεργαστεί με προγράμματα μίξης και επεξεργασίας ήχου (εδώ: audacity) και να γίνει διαθέσιμο προς χρήση (είτε ως αρχείο ήχου στην ηλεκτρονική τάξη, e-class, είτε ως ηχητικό αρχείο που συνοδεύει βίντεο δημιουργημένο από ολιστικές πλατφόρμες δημιουργίας ψηφιακών και έντυπων μέσων (εδώ: canva) είτε ως ηχητικό αρχείο που ανεβαίνει σε άλλο λογισμικό παιγνιοποίησης, εδώ: genial.ly).

Ως γενικό συμπέρασμα που μπορεί να διεξαχθεί είναι ότι οι μέχρι στιγμής εξελίξεις στο χώρο της τεχνητής νοημοσύνης καθιστούν δυνατή σε ικανοποιητικό βαθμό την αυτόνομη δημιουργία αρκετά ρεαλιστικού και προσαρμοσμένου στο γλωσσικό / μαθησιακό προφίλ της εκάστοτε τάξης ακουστικού υλικού για την ανάπτυξη / βελτίωση της ακουστικής δεξιότητας στο μάθημα της ξένης γλώσσας.

Λέξεις – κλειδιά: Γερμανικά ως ξένη γλώσσα, δευτεροβάθμια εκπαίδευση, ακουστική κατανόηση, κατανόηση προφορικού λόγου, text-to-speech, ξένες γλώσσες, τεχνητή νοημοσύνη, λογισμικά.

ΠΕΡΙΛΗΨΗ

«Υπάρχουν κάποια παιχνίδια που σου διδάσκουν πώς να γίνεις καλύτερος άνθρωπος». Αυτή ήταν η δήλωση μιας δεκατριάχρονης στο πλαίσιο μιας έρευνας που πραγματοποιήθηκε μεταξύ 2021 και 2022, η οποία είχε ως βασικό σκοπό τη διερεύνηση των πολιτισμικών και κοινωνικοπολιτικών διαστάσεων της ενασχόλησης με τα ηλεκτρονικά παιχνίδια στο πλαίσιο της εφηβικής κουλτούρας.[1] Ένας από τους ερευνητικούς στόχους της μελέτης ήταν να αναζητηθούν οι απόψεις των εφήβων για την αξία των ηλεκτρονικών παιχνιδιών, ενώ επιπλέον, ένα από τα ερωτήματα που αναδείχθηκαν από την έρευνα ήταν αν και σε τι βαθμό τα ηλεκτρονικά παιχνίδια διαμορφώνουν μοντέλα δράσης και σκέψης στους νέους ανθρώπους.

Η έρευνα, στην οποία συμμετείχαν έφηβοι 12-17 ετών από την Περιφέρεια της Θεσσαλίας, χωρίστηκε σε δύο μέρη. Στο πρώτο στάδιο συγκεντρώθηκαν 485 ερωτηματολόγια από σχολεία της Δευτεροβάθμιας Εκπαίδευσης στην Περιφέρεια της Θεσσαλίας, τα οποία αναλύθηκαν μέσω του SPSS. Στο δεύτερο στάδιο πραγματοποιήθηκαν 42 ημιδομημένες συνεντεύξεις, για τις οποίες πραγματοποιήθηκε θεματική ανάλυση.

Σύμφωνα με τα αποτελέσματα της έρευνας, τα ηλεκτρονικά παιχνίδια αποτελούν μια σύγχρονη μορφή διασκέδασης για τα παιδιά, ένα μέρος συναναστροφής με φίλους, ένα σκηνικό αγχολυτικό, έναν τόπο μάθησης και ευαισθητοποίησης για διάφορα κοινωνικοπολιτικά ζητήματα, έναν τρόπο αυτοβελτίωσης. Επιπρόσθετα, για ένα μέρος των εφήβων τα ηλεκτρονικά παιχνίδια αξιολογήθηκαν ως καλλιτεχνικά δημιουργήματα ίδιας αξίας με μια ταινία, ένα μουσικό κομμάτι ή ακόμα και με ένα έργο ζωγραφικής. Κατά τη γνώμη τους, ένα βιντεοπαιχνίδι έχει αξία για διάφορους λόγους, όπως είναι οι αισθητικές του ιδιότητες (τα γραφικά, το σενάριο, η μουσική), η εντατική εργασία που προϋποθέτει η δημιουργία του, η δυνατότητά του να καλύπτει διάφορες ανάγκες (διασκέδαση, χαλάρωση, μάθηση, προσκλήσεις, δημιουργικότητα, κοινωνική αλληλεπίδραση κ.α.), η σχέση του με την πραγματικότητα και η διδαχή μαθημάτων ζωής, όπως είναι τα μαθήματα επιβίωσης. Το στοιχείο της ‘επιβίωσης’ γοητεύει τους έφηβους, και ένας λόγος της έλξης αυτής έγκειται στην ευκαιρία που τους δίνεται να δημιουργήσουν μια κοινωνία από την αρχή.

Η McGonigal (2010), σχεδιάστρια ηλεκτρονικών παιχνιδιών, υποστηρίζει ότι το ηλεκτρονικό παιχνίδι είναι μια εφευρετική πλατφόρμα για να αλλάξει ο κόσμος και ότι εντός του παιχνιδιού το παιδί γίνεται η καλύτερη εκδοχή του εαυτού του, αναπτύσσοντας έναν κοινωνικό ιστό, δομώντας αυτοπεποίθηση και κάνοντας δραστηριότητες με νόημα, οι οποίες το γεμίζουν ευχαρίστηση. Πράγματι, οι παραπάνω σκέψεις ενισχύονται από τα αποτελέσματα της έρευνάς μας. Ο κόσμος των βιντεοπαιχνιδιών αποτελεί έναν δεύτερο παράλληλο κόσμο, όπου ο έφηβος, μέλος μιας ομάδας, επιλύει προβλήματα, δημιουργεί ή/και προσπαθεί να βελτιώσει πράγματα και καταστάσεις – κάτι που δίνει νόημα στις πράξεις του –, και βιώνει, συνειδητά ή μη, διάφορες κοινωνικοπολιτικές εμπειρίες που τον ενθαρρύνουν να αλλάξει τα πράγματα προς το καλύτερο.

Λέξεις-κλειδιά: ηλεκτρονικά παιχνίδια, έφηβοι, αξία, αναπαραστάσεις.

[1] Η έρευνα πραγματοποιήθηκε στο πλαίσιο της Διδακτορικής μου Διατριβής στο Τμήμα Εικαστικών Τεχνών και Επιστημών της Τέχνης στο Πανεπιστήμιο Ιωαννίνων με καθηγητή-επιβλέποντα τον κ. Χρ. Δερμεντζόπουλο.

ΘΠ4: Ψηφιακό χάσμα και νέες ανισότητες

ΤΟ ΨΗΦΙΑΚΟ ΧΑΣΜΑ ΣΤΗΝ ΠΡΩΤΟΒΑΘΜΙΑ ΕΚΠΑΙΔΕΥΣΗ ΣΤΗΝ ΕΛΛΑΔΑ: ΠΡΟΚΛΗΣΕΙΣ, ΝΕΕΣ ΑΝΙΣΟΤΗΤΕΣ ΚΑΙ ΠΡΑΚΤΙΚΕΣ ΧΩΡΙΣ ΑΠΟΚΛΕΙΣΜΟΥΣ

ΠΕΡΙΛΗΨΗ

Η ψηφιοποίηση της εκπαίδευσης έχει αναδείξει ανισότητες στην πρόσβαση στην τεχνολογία, τον ψηφιακό γραμματισμό και τις εκπαιδευτικές υποδομές, ιδιαίτερα στην πρωτοβάθμια εκπαίδευση. Η παρούσα μελέτη διερευνά το ψηφιακό χάσμα στα ελληνικά δημοτικά σχολεία μέσα από βιβλιογραφική ανάλυση, εστιάζοντας στις προκλήσεις, τις νέες ανισότητες και τις συμπεριληπτικές πρακτικές που εφαρμόζονται για την άμβλυνσή του.

Η επισκόπηση της βιβλιογραφίας καταδεικνύει ότι η πρόσβαση στις Τεχνολογίες Πληροφορίας και Επικοινωνιών (ΤΠΕ) στα δημοτικά σχολεία της Ελλάδας είναι άνισα κατανεμημένη. Στα αστικά κέντρα, οι σχολικές μονάδες διαθέτουν περισσότερες τεχνολογικές υποδομές, ενώ τα αγροτικά σχολεία αντιμετωπίζουν σοβαρές ελλείψεις σε εξοπλισμό και συνδεσιμότητα. Ταυτόχρονα, οι μαθητές από οικογένειες χαμηλού εισοδήματος συχνά στερούνται πρόσβασης σε ηλεκτρονικές συσκευές και σταθερή σύνδεση στο διαδίκτυο, γεγονός που τους αποκλείει από σύγχρονες μαθησιακές πρακτικές.

Πέρα από την απλή πρόσβαση, η μελέτη αναδεικνύει την έννοια της "δευτερογενούς ψηφιακής ανισότητας", η οποία αφορά τις διαφορές στις δεξιότητες χρήσης της τεχνολογίας. Οι μαθητές από εύπορες οικογένειες τείνουν να αναπτύσσουν υψηλότερα επίπεδα ψηφιακού γραμματισμού, ενώ οι μαθητές από μειονεκτούντα περιβάλλοντα συχνά περιορίζονται σε στοιχειώδεις δεξιότητες, γεγονός που έχει μακροπρόθεσμες συνέπειες στην εκπαιδευτική και επαγγελματική τους πορεία.

Επιπλέον, η επιμόρφωση των εκπαιδευτικών στις ΤΠΕ παραμένει αποσπασματική και άνισα κατανεμημένη, επηρεάζοντας την αποτελεσματική ενσωμάτωση των τεχνολογικών εργαλείων στη διδασκαλία. Η έλλειψη συνεκτικής εκπαιδευτικής πολιτικής και η περιορισμένη κρατική χρηματοδότηση έχουν ως αποτέλεσμα τη χαμηλή υιοθέτηση των ΤΠΕ στην καθημερινή διδακτική πρακτική. Παρότι έχουν εφαρμοστεί προγράμματα ψηφιακής εκπαίδευσης, η εφαρμογή τους είναι συχνά αποσπασματική, με πολλά σχολεία να βασίζονται σε εξωτερικές χρηματοδοτήσεις και ιδιωτικές πρωτοβουλίες.

Για την αντιμετώπιση αυτών των προκλήσεων, αναπτύσσονται συμπεριληπτικές πρακτικές στην ελληνική πρωτοβάθμια εκπαίδευση. Τα προγράμματα επιμόρφωσης εκπαιδευτικών εστιάζουν στην ανάπτυξη ψηφιακών δεξιοτήτων, επιτρέποντας τη δημιουργία διαδραστικών και συμπεριληπτικών μαθησιακών εμπειριών. Οι σχολικές πρωτοβουλίες ψηφιακού γραμματισμού, όπως εργαστήρια κωδικοποίησης και διαδραστικά προγράμματα, συμβάλλουν στην ισότιμη πρόσβαση στην τεχνολογία. Παράλληλα, οι κοινοτικές συνεργασίες με ιδιωτικούς φορείς παρέχουν τεχνολογικό εξοπλισμό και οικονομική υποστήριξη στα σχολεία. Παρά τις θετικές πρωτοβουλίες, εξακολουθούν να υπάρχουν εμπόδια. Η απουσία ολοκληρωμένης εθνικής στρατηγικής για την ψηφιακή εκπαίδευση και η εξάρτηση από εξωτερικές χρηματοδοτήσεις εγείρουν ανησυχίες για τη βιωσιμότητα των δράσεων. Αν και οι ΤΠΕ μπορούν να βελτιώσουν τη διδασκαλία και τη μαθησιακή διαδικασία, η ελλιπής ή λανθασμένη ενσωμάτωσή τους μπορεί να διευρύνει περαιτέρω τις ανισότητες μεταξύ των μαθητών.

Συμπερασματικά, η μελέτη υπογραμμίζει την επείγουσα ανάγκη για συνολικές στρατηγικές γεφύρωσης του ψηφιακού χάσματος. Η άνιση πρόσβαση στην τεχνολογία, οι διαφοροποιήσεις στον ψηφιακό γραμματισμό και η ελλιπής υποστήριξη των εκπαιδευτικών διατηρούν τις εκπαιδευτικές ανισότητες. Ωστόσο, οι συμπεριληπτικές πρακτικές, όπως η στοχευμένη επιμόρφωση εκπαιδευτικών και τα σχολικά προγράμματα ψηφιακού γραμματισμού, μπορούν να προωθήσουν ένα πιο ισότιμο ψηφιακό μαθησιακό περιβάλλον. Για να επιτευχθεί πραγματική ψηφιακή ένταξη, απαιτείται μια συνεργατική προσέγγιση που να περιλαμβάνει εκπαιδευτικούς, πολιτικούς φορείς και την ευρύτερη κοινότητα.

Λέξεις – κλειδιά: Ψηφιακό Χάσμα, Πρωτοβάθμια Εκπαίδευση, Εκπαιδευτική Ανισότητα, Ψηφιακός Γραμματισμός, Πρόσβαση στις ΤΠΕ, Συμπεριληπτική Εκπαίδευση

ΨΗΦΙΑΚΟΣ ΜΕΤΑΣΧΗΜΑΤΙΣΜΟΣ ΣΤΗΝ ΕΚΠΑΙΔΕΥΣΗ: ΕΥΚΑΙΡΙΕΣ, ΠΡΟΚΛΗΣΕΙΣ ΚΑΙ ΑΝΑΔΥΟΜΕΝΕΣ ΑΝΙΣΟΤΗΤΕΣ ΣΤΗΝ ΕΠΟΧΗ ΤΗΣ ΤΕΧΝΗΤΗΣ ΝΟΗΜΟΣΥΝΗΣ

ΠΕΡΙΛΗΨΗ

Την τελευταία δεκαετία, η εκπαίδευση παγκοσμίως τείνει να μεταμορφωθεί ριζικά λόγω της ταχείας εξέλιξης των ψηφιακών τεχνολογιών. Ο ψηφιακός μετασχηματισμός δεν περιορίζεται στην υποστήριξη των παραδοσιακών διδακτικών μεθόδων, αλλά αναδιαμορφώνει ουσιαστικά τον τρόπο με τον οποίο αποκτάται, διαμοιράζεται και βιώνεται η γνώση, καθώς και η οργάνωση και διοίκηση των εκπαιδευτικών οργανισμών. Η ενσωμάτωση καινοτομιών, όπως η τεχνητή νοημοσύνη, η μηχανική μάθηση, τα MOOCs και οι εικονικές τάξεις, έχει ανοίξει νέους δρόμους στη μάθηση, προσφέροντας μεγαλύτερη προσβασιμότητα, εξατομίκευση και επεκτασιμότητα. Ωστόσο, αυτή η εξέλιξη συνοδεύεται από σοβαρές προκλήσεις. Παρά τις ευκαιρίες, ο ψηφιακός μετασχηματισμός μπορεί να εντείνει τις υφιστάμενες κοινωνικές και οικονομικές ανισότητες, δημιουργώντας ένα νέο «ψηφιακό χάσμα». Η άνιση πρόσβαση σε ψηφιακά εργαλεία, υποδομές και οι δεξιότητες, ιδίως σε ευάλωτες κοινωνικές ομάδες ή απομακρυσμένες κοινότητες, αποτελεί βασικό εμπόδιο για την ισότιμη εκπαίδευση. Η εργασία αυτή αναλύει τον διττό χαρακτήρα του ψηφιακού μετασχηματισμού και τονίζει την ανάγκη για συμμετοχικές, δίκαιες και συμπεριληπτικές πολιτικές. Υιοθετεί τη μεθοδολογία της βιβλιογραφικής ανασκόπησης και μελέτης κειμένων πολιτικής. Αναλύει τις βασικές προκλήσεις κατά το ψηφιακό μετασχηματισμό της εκπαίδευσης και στην τελευταία ενότητα προτείνει συγκεκριμένες στρατηγικές – όπως η επένδυση σε τεχνολογικές υποδομές και η ενίσχυση των ψηφιακών δεξιοτήτων μαθητών, εκπαιδευτικών και πολιτών – ώστε η τεχνολογία να συμβάλλει ουσιαστικά στη μείωση των εκπαιδευτικών ανισοτήτων.

Λέξεις κλειδιά: ψηφιακός μετασχηματισμός, πρωτοβάθμια και δευτεροβάθμια εκπαίδευση, ψηφιακό χάσμα, ψηφιακές ανισότητες.

ΨΗΦΙΑΚΕΣ ΑΝΙΣΟΤΗΤΕΣ ΜΕ ΤΗΝ ΕΛΕΥΣΗ ΤΟΥ 21ΟΥ ΑΙΩΝΑ

ΠΕΡΙΛΗΨΗ

Η παρούσα εργασία εστιάζεται στο ψηφιακό χάσμα (ψηφιακός αναλφαβητισμός) και τις ανισότητες που προκύπτουν και αφορά στη θεμελιώδη γνώση που σχετίζεται με τη χρήση του διαδικτύου, τη χρήση ψηφιακών εργαλείων (επεξεργασία κειμένων, αποστολή ηλεκτρονικής αλληλογραφίας κ.λπ.). Σε ένα σύγχρονο περιβάλλον υπέρ-πληροφόρησης και τεχνολογικής επανάστασης με την έλευση του 21ου αιώνα το να μην είναι σε θέση ένα άτομο να χρησιμοποιεί σωστά μια ψηφιακή συσκευή (κινητό) ή να μην μπορεί να χρησιμοποιήσει ένα ηλεκτρονικό υπολογιστή στη καθημερινότητα ακούγεται απίθανο και έρχεται σε σύγκρουση με την κοινή λογική.

Ο ψηφιακός αναλφαβητισμός είναι η αδυναμία του ατόμου να χρησιμοποιήσει την ψηφιακή τεχνολογία και τις δυνατότητες που προσφέρει μέσω των εφαρμογών της στην καθημερινότητα (εργασία, εκπαίδευση, επικοινωνία, γεγονότα που επηρεάζουν και διαμορφώνουν τη ζωή). Η αδυναμία της γνώσης των ψηφιακών τεχνολογιών και δυνατοτήτων επιφέρει σοβαρές συνέπειες σε κοινωνικό και οικονομικό επίπεδο (εκπαίδευση, εργασία, κοινωνική συμμετοχή). Αυτό ως συνέπεια έχει πρακτικό και κοινωνικό αντίκτυπο στο ψηφιακό αναλφάβητο άτομο με τη δημιουργία ανισότητας και μη ίσης αντιμετώπισης σε διάφορες πτυχές της καθημερινότητας του.

Η εργασία μας εστιάζεται στην έρευνα που υλοποιήθηκε στο σχολείο μας (2ο Πειραματικό Λύκειο Λευκάδας «Άγγελος Σικελιανός») κατά την τρέχουσα σχολική χρονιά (2024-2025) στα πλαίσια των δράσεων του ενεργού πολίτη (δράσεις ενίσχυσης της Ενεργού Πολιτειότητας του Ινστιτούτου Εκπαιδευτικής Πολιτικής – ΙΕΠ). Ο σκοπός της δράσης ήταν οι μαθητές/τριες που έχουν αναπτύξει τεχνολογικές δεξιότητες (ως ένα βαθμό) να βοηθήσουν και άλλα άτομα (γονείς, παπούδες , συγγενείς κ.λπ.) να αποκτήσουν βασικές ψηφιακές δεξιότητες (επικοινωνία με τους οικείους του, με δημόσιες υπηρεσίες και τράπεζες), οι οποίες να είναι χρήσιμες για τη ζωή τους. Επίσης οι μαθητές/τριες μέσα από τη διαδικασία της έρευνας να αντιληφθούν και οι ίδιοι / ίδιες τις μορφές, τις αιτίες και τους τρόπους μείωσης των ψηφιακών ανισοτήτων που υπάρχουν (πρόσβαση, επιρροή και δημιουργία σε περιεχόμενο και συμμετοχή, εκπαίδευση , βελτίωση υποδομών, τεχνολογικές πολιτικές).

Η μεθοδολογία της έρευνας στηρίχθηκε στα στάδια της επιλογής συμμετεχόντων από διάφορες κοινωνικές ομάδες (ηλικία, φύλο, περιοχές, οικονομικό επίπεδο, εκπαίδευση) με τη χρήση ερωτηματολογίων (διαδικτυακά ή δια ζώσης) με κλειστές ερωτήσεις, προσωπικών συναντήσεων και ανάλυση των ποσοτικών δεδομένων, καθώς και τη μελέτη δεδομένων από διάφορους οργανισμούς (Unesco, Eurostat) και δημοσίων βάσεων πληροφοριών και τη σύγκριση τους με τη έρευνα των μαθητών. Οι μαθητές/τριες συμμετείχαν σε όλες τις φάσεις υλοποίησης της εργασίας, τον καθορισμό των στόχων της δράσης μέσω της καταγραφής και ανάλυσης της υπάρχουσας κατάστασης, τη συλλογή-ανάλυση των δεδομένων, τη συμμετοχή με εμπλεκόμενους φορείς (δημόσιων αρχών και ιδιωτικού τομέα) και της ευαισθητοποίησης. Τέλος, οι μαθητές / μαθήτριες, στηριζόμενοι στα αποτελέσματα της ανάλυσης των δεδομένων για τη βελτίωση του ψηφιακού γραμματισμού και τη μείωση του ψηφιακού χάσματος διατύπωσαν και κατέγραψαν τις δικές τους προτάσεις.

Η έρευνα υπογραμμίζει τη σημασία της ανάπτυξης ψηφιακών δεξιοτήτων στους μαθητές, καθώς η τεχνολογία αποτελεί πλέον βασικό εργαλείο μάθησης και εξέλιξης. Μπορεί να εξασφαλίσει μια πιο δίκαιη κοινωνία, όπου όλα τα άτομα θα έχουν τα εργαλεία που χρειάζονται για να επιτύχουν σε έναν ψηφιακό κόσμο. Η μείωση των ψηφιακών ανισοτήτων αλλά και ταυτόχρονα η ενίσχυση της ισότιμης πρόσβασης σε ψηφιακές τεχνολογίες και ψηφιακές ευκαιρίες ενισχύει τη κοινωνική συνοχή και καινοτομία σε όλες τις κοινωνικές ομάδες.

Λέξεις–κλειδιά: Ψηφιακός γραμματισμός – αναλφαβητισμός, ψηφιακό χάσμα, ανισότητες στη χρήση της τεχνολογίας, e-skills.

ΘΠ5: Ψηφιακός-Οπτικός Γραμματισμός

Η ΣΧΟΛΙΚΗ ΒΙΒΛΙΟΘΗΚΗ ΩΣ ΚΟΜΒΟΣ ΜΑΘΗΣΗΣ: ΣΧΕΔΙΟ ΔΡΑΣΗΣ ΓΙΑ ΨΗΦΙΑΚΗ ΑΝΑΒΑΘΜΙΣΗ

ΠΕΡΙΛΗΨΗ

Η παρούσα εργασία παρουσιάζει αναλυτικά την υλοποίηση ενός ολοκληρωμένου σχεδίου δράσης για τον εκσυγχρονισμό της σχολικής βιβλιοθήκης, με στόχο την ενίσχυση της μάθησης, της δημιουργικότητας και του ψηφιακού αλλά και παραδοσιακού γραμματισμού ανάγνωσης. Η πρωτοβουλία δεν περιορίστηκε στην ανακαίνιση του φυσικού χώρου, αλλά εστίασε στη δημιουργία ενός πολυσύνθετου και λειτουργικού περιβάλλοντος μάθησης, όπου συνδυάζονται ψηφιακές και παραδοσιακές υποδομές, προηγμένα ψηφιακά εργαλεία και συνεργατικές παιδαγωγικές πρακτικές. Η δράση υλοποιήθηκε με ενεργή συμμετοχή μαθητών, εκπαιδευτικών και εξωτερικών φορέων, με στόχο τη μετατροπή της βιβλιοθήκης σε έναν δυναμικό κόμβο γνώσης, καινοτομίας και κοινωνικής αλληλεπίδρασης.

Τα κύρια αποτελέσματα περιλαμβάνουν την ανάπτυξη πρωτότυπου εκπαιδευτικού και οπτικοακουστικού υλικού, τη δημιουργία διαδραστικών προγραμμάτων φιλαναγνωσίας, τη σύναψη συνεργασιών με πολιτιστικούς και ακαδημαϊκούς φορείς, καθώς και την ενσωμάτωση της βιβλιοθήκης σε εθνικά και διεθνή δίκτυα ανταλλαγής καλών πρακτικών. Η αξιολόγηση πραγματοποιήθηκε μέσω συνδυασμού ποσοτικών και ποιοτικών κριτηρίων, όπως η συμμετοχή της σχολικής κοινότητας, η ποιότητα συνεργασίας, η ολοκλήρωση δραστηριοτήτων, η επισκεψιμότητα ψηφιακών πόρων και η ικανοποίηση των χρηστών. Τα αποτελέσματα ανέδειξαν τη δυναμική των σχολικών βιβλιοθηκών ως πολυδιάστατων χώρων μάθησης, ικανοποιώντας τις απαιτήσεις του 21ου αιώνα, ενισχύοντας τον ψηφιακό γραμματισμό και λειτουργώντας ως κόμβοι κοινωνικής συμμετοχής και καινοτομίας.

Λέξεις-κλειδιά: Ψηφιακός γραμματισμός, Πληροφοριακή παιδεία, Εκπαιδευτικά ψηφιακά εργαλεία, Υβριδικές βιβλιοθήκες, Διάχυση γνώσης, Τεχνολογική καινοτομία, Βιωσιμότητα πρακτικών

ΟΠΤΙΚΟΠΟΙΩΝΤΑΣ ΤΗ ΜΑΘΗΣΗ: ΣΧΕΔΙΑΣΤΙΚΕΣ ΑΡΧΕΣ, ΕΦΑΡΜΟΓΗ ΚΑΙ ΟΦΕΛΗ ΤΩΝ INFOGRAPHICS ΣΤΗΝ ΕΚΠΑΙΔΕΥΤΙΚΗ ΜΑΘΗΣΙΑΚΗ ΔΙΑΔΙΚΑΣΙΑ

Ιωάννης Ν. Δημητρακόπουλος
MSc, Εκπαιδευτικός, κλάδου ΠΕ82
ΔΔΕ Πρέβεζας – 2ο Γυμνάσιο Πρέβεζας

ΠΕΡΙΛΗΨΗ

Το παρόν επιστημονικό άρθρο διερευνά τη συμβολή των Infographics (Πληροφοριακών Γραφημάτων) στη μαθησιακή διαδικασία, εξετάζοντας τις σχεδιαστικές αρχές, τις παιδαγωγικές εφαρμογές και τις επιπτώσεις τους στη γνωστική ανάπτυξη των μαθητών. Τα Πληροφοριακά Γραφήματα συνδυάζουν οπτικά και γλωσσικά στοιχεία, προσφέροντας έναν αποδοτικό τρόπο οργάνωσης και παρουσίασης σύνθετων πληροφοριών. Τα τελευταία χρόνια, η χρήση τους έχει αυξηθεί σημαντικά, καθώς αποδεικνύονται ιδιαίτερα αποτελεσματικά στη διευκόλυνση της κατανόησης και αφομοίωσης τόσο βασικών όσο και πολύπλοκων εννοιών, μέσα από τη δομημένη οπτική αναπαράσταση δεδομένων. Σύμφωνα με τη βιβλιογραφία, η γνωστική θεωρία μάθησης με την ενσωμάτωση πολλαπλών καναλιών πληροφόρησης ενισχύει τη μνημονική ανάκληση και προάγει τη βαθύτερη κατανόηση των εννοιών.

Ακολουθώντας ως κύριο μεθοδολογικό άξονα την βιβλιογραφική έρευνα, αναλύεται η αξιοποίησή τους στην εκπαίδευση, καθώς και οι προκλήσεις που προκύπτουν από τη χρήση τους. Μέσω της συστηματικής ανάλυσης ερευνητικών δεδομένων και θεωρητικών προσεγγίσεων, αναδεικνύεται η συμβολή τους στη μαθησιακή διαδικασία. Παράλληλα, καταγράφονται πιθανές δυσκολίες που προκύπτουν από τη χρήση τους, επισημαίνοντας ότι ο υπερβολικά μεγάλος όγκος πληροφοριών χωρίς την απαραίτητη καθοδήγηση ενδέχεται να προκαλέσουν γνωστική επιβάρυνση, επηρεάζοντας αρνητικά την επεξεργασία και την αφομοίωση της πληροφορίας.

Ιδιαίτερη έμφαση στη δημοσίευση δίνεται στη χρήση των Infographics στο διεπιστημονικό φάσμα (φυσικές επιστήμες, γλωσσική εκπαίδευση, κοινωνικές επιστήμες κ.ά.), καθώς και στη σημασία τους ως εργαλείου ανάπτυξης, δημιουργίας και εφαρμογής, μέσω της χρήσης εξειδικευμένων μεθοδολογικών εργαλείων, όπως οι πλατφόρμες Napkin και Venngage. Οι μελέτες περίπτωσης που δημιουργούνται παρέχουν συγκεκριμένα και μετρήσιμα δεδομένα σχετικά με τον τρόπο με τον οποίο τα οπτικά γραφήματα μπορούν να υποστηρίξουν τη διδασκαλία, να ενισχύσουν την κατανόηση των εννοιών και να βελτιώσουν τη μαθησιακή εμπειρία.

Άμεσος στόχος της έρευνας είναι η ανάδειξη της εκπαιδευτικής σημασίας των Infographics σε άτυπα και τυπικά εκπαιδευτικά περιβάλλοντα. Η δυνατότητά τους να μετατρέπουν σύνθετες πληροφορίες σε κατανοητά οπτικά σχήματα ενισχύει τη γνωστική εμπλοκή, τη συμπεριληπτική μάθηση, τον αναστοχασμό μέσω του οπτικού και ψηφιακού γραμματισμού. Η συμμετοχή των μαθητών στη δημιουργία τους ενισχύει δεξιότητες όπως η ανάλυση δεδομένων, η επικοινωνία και η συνεργασία.

Η εργασία αφενός απευθύνεται σε όλη την εκπαιδευτική κοινότητα και αφετέρου προκαλεί τον εκπαιδευτικό να αναπτύξει την φαντασία και τη δημιουργικότητα, με στόχο μια σύγχρονη, δομημένη και τεχνολογικά ενημερωμένη πρακτική.

Λέξεις κλειδιά: Infographics, Ψηφιακός και Οπτικός Γραμματισμός, Γραφήματα, Μάθηση

Η ΕΦΑΡΜΟΓΗ ΤΗΣ ΠΟΛΥΤΡΟΠΙΚΟΤΗΤΑΣ ΣΤΟ ΠΛΑΙΣΙΟ ΤΗΣ ΔΙΔΑΣΚΑΛΙΑΣ ΤΟΥ ΓΛΩΣΣΙΚΟΥ ΜΑΘΗΜΑΤΟΣ: ΜΙΑ ΣΥΣΤΗΜΑΤΙΚΗ ΑΝΑΣΚΟΠΗΣΗ ΤΗΣ ΒΙΒΛΙΟΓΡΑΦΙΑΣ

ΠΕΡΙΛΗΨΗ

Η πολυτροπικότητα θεωρείται μια καινοτόμος προσέγγιση στον τομέα της εκπαίδευσης, καθώς ενσωματώνει ποικιλία σημειωτικών πόρων, με στόχο να ενισχυθεί η μάθηση και η κατανόηση. Η πολυτροπικότητα παρέχει μια πιο ολοκληρωμένη προσέγγιση στη μάθηση, καθώς επιτρέπει στη μαθητική κοινότητα να αλληλεπιδρά με το εκπαιδευτικό υλικό, μέσα από πολλούς και διαφορετικούς τρόπους. Αυτή η μαθησιακή προσέγγιση δεν περιορίζεται μόνο στο γραπτό κείμενο, αλλά επεκτείνεται σε άλλες μορφές αναπαράστασης όπως είναι οι εικόνες και η ψηφιακή τεχνολογία, που αποτελούν αναπόσπαστο κομμάτι του σύγχρονου κόσμου. Μέσω της πολυτροπικότητας οι μαθητές και οι μαθήτριες μπορούν να αναπτύξουν μια βαθύτερη κατανόηση των εννοιών και να βελτιώσουν τις γλωσσικές δεξιότητές τους, ενώ ταυτοχρόνως να καλλιεργήσουν την κριτική σκέψη και τη δημιουργικότητά τους. Σκοπός της παρούσας μελέτης είναι η διερεύνηση της εφαρμογής της πολυτροπικότητας στο μάθημα της γλώσσας στην πρωτοβάθμια εκπαίδευση, μέσα από την ανάπτυξη των επιπτώσεων που επιφέρει στη μαθητική και εκπαιδευτική κοινότητα. Η έρευνα στηρίζεται σε βιβλιογραφική ανασκόπηση, η οποία πραγματοποιήθηκε μέσω της αναζήτησης πρωτογενών πηγών. Το σύνολο των επιλεγμένων πηγών που χρησιμοποιήθηκαν ήταν 33 έρευνες ποιοτικές, ποσοτικές και μικτές. Επιπροσθέτως οι έρευνες έπρεπε να είναι γραμμένες είτε στην ελληνική, είτε στην αγγλική γλώσσα και να έχουν δημοσιευθεί από το 2000 έως το 2025, ενώ οι λέξεις κλειδιά που χρησιμοποιήθηκαν στις μηχανές αναζήτησης έπρεπε να συνδέονται με τον τίτλο ή και το περιεχόμενο της έρευνας. Όσον αφορά τα κριτήρια αποκλεισμού των ερευνών, αποκλείστηκαν όσες πρωτογενείς έρευνες δεν ήταν σχετικές με το ερευνητικό θέμα, δεν είχαν σαφώς καθορισμένο ερευνητικό δείγμα, το δείγμα ήταν περιορισμένο και δεν περιλάμβαναν ποσοτικά ή ποιοτικά δεδομένα. Τα ευρήματα της έρευνας αναδεικνύουν τη θετική επίδραση της πολυτροπικότητας στη διδασκαλία της γλώσσας στην πρωτοβάθμια εκπαίδευση. Η χρήση πολυτροπικών κειμένων και διαδραστικών εργαλείων συμβάλλει σημαντικά στη βελτίωση της αναγνωστικής ικανότητας των μαθητών/-τριών, καθώς επιτρέπει την παρουσίαση πληροφοριών μέσα από διαφορετικούς τρόπους, ενισχύοντας την κατανόηση, την απομνημόνευση και τη διατήρηση της γνώσης. Οι μαθητές και οι μαθήτριες που εκτίθενται σε πολυτροπικά μέσα δείχνουν μεγαλύτερη εμπλοκή και ενδιαφέρον στη γλωσσική διδασκαλία, ενώ παράλληλα αναπτύσσουν την κριτική τους σκέψη μέσα από τη σύνθεση και την ανάλυση των πληροφοριών. Επίσης, η ενσωμάτωση πολυτροπικών στοιχείων στα σχολικά βιβλία, όπως εικόνες, διαδραστικές ιστορίες και εκπαιδευτικά λογισμικά, έχει διαπιστωθεί ότι ενισχύει τη σχέση των μαθητών/-τριών με τα γλωσσικά κείμενα, καθιστώντας τη μάθηση πιο ελκυστική, προσβάσιμη και αποτελεσματική. Παράλληλα, η έρευνα κατέδειξε ότι η εφαρμογή της πολυτροπικότητας παρουσιάζει προκλήσεις. Πολλοί εκπαιδευτικοί δε διαθέτουν την απαραίτητη κατάρτιση στη χρήση πολυτροπικών εργαλείων και λογισμικών, γεγονός που περιορίζει την αποτελεσματική τους εφαρμογή στην τάξη. Επίσης, η έλλειψη υποδομών, η αδυναμία πρόσβασης σε σύγχρονα τεχνολογικά μέσα και ο περιορισμένος χρόνος διδασκαλίας συχνά καθιστούν δύσκολη την ενσωμάτωση πολυτροπικών δραστηριοτήτων. Παρόλα αυτά, η συνεχής τεχνολογική εξέλιξη και οι νέες εκπαιδευτικές πολιτικές δείχνουν ότι η πολυτροπικότητα κερδίζει έδαφος και αναμένεται να διαδραματίσει σημαντικό ρόλο στη μελλοντική διδασκαλία της γλώσσας. Η ανάπτυξη στοχευμένων επιμορφωτικών προγραμμάτων για τους/τις εκπαιδευτικούς, η ενσωμάτωση πολυτροπικών μεθόδων στη διδακτική πράξη και η βελτίωση των πολυτροπικών λογισμικών, θεωρούνται καίρια βήματα για την αποτελεσματική εφαρμογή αυτής της προσέγγισης στην πρωτοβάθμια εκπαίδευση.

Λέξεις κλειδιά: Πολυτροπικότητα, γλωσσική διδασκαλία, πρωτοβάθμια εκπαίδευση.

ΠΟΛΥΓΡΑΜΜΑΤΙΣΜΟΙ ΣΤΗ ΣΧΟΛΙΚΗ ΕΚΠΑΙΔΕΥΣΗ: ΑΞΙΟΠΟΙΩΝΤΑΣ ΨΗΦΙΑΚΑ ΠΕΡΙΒΑΛΛΟΝΤΑ ΕΝΝΟΙΟΛΟΓΙΚΗΣ ΧΑΡΤΟΓΡΑΦΗΣΗΣ

ΠΕΡΙΛΗΨΗ

Αντικείμενο της παρούσας μελέτης είναι η πραγμάτευση διαγραμματικών αναπαραστάσεων της γνώσης και ειδικότερα της εννοιολογικής χαρτογράφησης. Στην ψηφιακή εποχή τα περιβάλλοντα μάθησης μετασχηματίζονται προκειμένου να ανταποκριθούν στις νέες προκλήσεις. Η διαδικασία μάθησης αποδεσμεύεται από χωροχρονικούς περιορισμούς και εξελίσσεται διαρκώς με απώτερο στόχο την αναβάθμιση της μαθησιακής εμπειρίας. Αδιαμφισβήτητα, η διάδραση συνιστά κεντρικό ζήτημα αλλά και ζητούμενο συγχρόνως. Στο πλαίσιο αυτό, η έννοια των πολυγραμματισμών αποκτά νέες διαστάσεις και προοπτικές. Ξεκινώντας από την αξιοποίηση της εννοιολογικής χαρτογράφησης στη διδασκαλία και τη μάθηση θα παρουσιαστούν συνοπτικά τα οφέλη αυτής της προσέγγισης. Η εννοιολογική χαρτογράφηση αξιοποιείται σε διάφορα γνωστικά αντικείμενα. Το πεδίο εφαρμογής αντλείται από το μάθημα της Κοινωνικής και Πολιτικής Αγωγής, το οποίο περιλαμβάνει μεγάλο εύρος θεμάτων και εννοιών. Έμφαση δίνεται στην προώθηση της νοηματοδοτούμενης μάθησης. Επίσης, αναλύονται οι δυνατότητες αξιοποίησης της εννοιολογικής χαρτογράφησης για την επεξεργασία και σύνθεση πληροφοριών, την ανάπτυξη ιδεών και εννοιών, την κατάκτηση νέας γνώσης, την ανάπτυξη κριτικής σκέψης και δημιουργικότητας. Ιδιαίτερα σημαντικό είναι πως η εννοιολογική χαρτογράφηση προσφέρει τη δυνατότητα οπτικοποίησης σχέσεων μεταξύ εννοιών, γεγονός που συμβάλλει στην εις βάθος κατανόηση του υπό μελέτη θέματος. Ως επακόλουθο, αναδεικνύεται η εννοιολογική χαρτογράφηση, ως εκπαιδευτική στρατηγική που μπορεί να αναδείξει καινοτόμους εκπαιδευτικούς σχεδιασμούς σε ψηφιακά περιβάλλοντα μάθησης.

Λέξεις – κλειδιά: πολυγραμματισμοί, πολυτροπικότητα, εννοιολογική χαρτογράφηση, ψηφιακά μέσα.

ΘΠ6: Ψηφιακή Ηθική

ΤΕΧΝΗΤΗ ΝΟΗΜΟΣΥΝΗ ΚΑΙ ΗΘΙΚΗ: ΠΡΟΚΛΗΣΕΙΣ ΚΑΙ ΛΥΣΕΙΣ

Σαμωνάς Κωνσταντίνος
Εκπαιδευτικός ΠΕ02
ΔΔΕ Πρέβεζας, Γυμνάσιο Λούρου
Πρέβεζα, Ελλάδα
e-mail: samkon@sch.gr

ΠΕΡΙΛΗΨΗ

Το παρόν άρθρο εστιάζει στη θεματική της Ψηφιακής Ηθικής και ιδιαίτερα στον τομέα της Ηθικής στην Τεχνητή Νοημοσύνη (ΤΝ) και τις προκλήσεις που ανακύπτουν από την εισαγωγή της στην εκπαίδευση. Αρχικά γίνεται μια παρουσίαση των όρων ΤΝ. Έπειτα παρουσιάζονται οι τρόποι που η ΤΝ έχει εισχωρήσει στην εκπαίδευση και τα θετικά που μπορεί να επιφέρει σε ζητήματα διοίκησης και διαχείρισης, στη διδασκαλία και στη μάθηση, όπως η προσωποποιημένη μάθηση, η δημιουργία ποιοτικού παιδαγωγικού περιεχομένου με δυνατότητα προσαρμογής στις ανάγκες των μαθητών/τριών, η έγκυρη και έγκαιρη αξιολόγηση και ανατροφοδότηση, προβλέψεις και παρεμβάσεις για μαθητές/τριες που δυσκολεύονται. Στη συνέχεια αναδεικνύονται τα πιο σημαντικά προβλήματα σχετικά με την εισαγωγή και τη χρήση της ΤΝ στην εκπαίδευση, όπως η ιδιωτικότητα, η προστασία των δεδομένων, η μεροληψία και η αδιαφάνεια των αλγορίθμων, το ψηφιακό χάσμα, ο πλαγιαρισμός και γενικότερα οι κίνδυνοι για την ακαδημαϊκή ακεραιότητα. Έπειτα, αφού παρουσιαστούν το πλαίσιο των ηθικών σχολών της δεοντολογίας, του ωφελιμισμού και των αρετών, γίνεται διερεύνηση των υφιστάμενων κανόνων δεοντολογίας με έμφαση σε εκείνους των διεθνών και διακρατικών θεσμών της UNICEF, του ΟΑΣΑ και της Ευρωπαϊκής Ένωσης, αλλά και του νομικού πλαισίου που έχει αναπτυχθεί στην Ευρωπαϊκή Ένωση (ΕΕ) -ΓΚΠΔ και Κανονισμός σχετικά με την ΤΝ-, που αναδεικνύει ότι οι κώδικες δεοντολογίας αδυνατούν να επιφέρουν τα επιδιωκόμενα αποτελέσματα για διάφορες αιτίες, όπως ο ανταγωνισμός μεταξύ εταιρειών ή κρατών και η εξάρτηση της επιστημονικής προόδου από τη χρηματοδότηση επενδυτών με πιθανόν ιδιοτελείς σκοπούς, και ότι απαιτείται η ενίσχυση της θεσμικής θωράκισης. Τέλος, γίνεται αναφορά στον ρόλο του σχολείου για την καλλιέργεια όχι μόνο γνώσεων και δεξιοτήτων που είναι απαραίτητες για τη δημιουργική αξιοποίηση της ΤΝ αλλά και την ηθική συνείδηση κατά την εφαρμογή της από τους/τις μαθητές/τριες ως ενήλικες, ώστε να περιοριστούν αρνητικές πρακτικές και αποτελέσματα που θα βλάψουν την κοινωνία, και η ανάγκη για επιμόρφωση των εκπαιδευτικών στα αντίστοιχα θέματα, ώστε να αποτελέσουν πρότυπα για τους/τις μαθητές/τριες.

Λέξεις – κλειδιά: Τεχνητή Νοημοσύνη, Ηθική, Εκπαίδευση

ΘΠ7: Ψηφιακή πολιτειότητα (Digital Citizenship)

ΠΕΡΙΛΗΨΗ

Η παρούσα μελέτη εξετάζει την έννοια της ενεργού πολιτειότητας στο σύγχρονο ψηφιακό κόσμο, εστιάζοντας στον καθοριστικό ρόλο της εκπαίδευσης στη διαμόρφωση ενεργών, υπεύθυνων και κριτικά σκεπτόμενων μαθητών-πολιτών. Μέσα από θεωρητική και εννοιολογική ανάλυση, διερευνώνται οι μετασχηματισμοί της ιδιότητας του πολίτη υπό το πρίσμα της ψηφιοποίησης, της παγκοσμιοποίησης και της πολυπολιτισμικότητας, καθώς και η ανάδυση της ψηφιακής πολιτειότητας ως βασικής διάστασης της σύγχρονης δημοκρατικής συμμετοχής. Ιδιαίτερη έμφαση δίνεται στη σύνδεση της ψηφιακής πολιτειότητας με την ψηφιακή νοημοσύνη, η οποία περιλαμβάνει γνωστικές, κοινωνικές, συναισθηματικές και ηθικές δεξιότητες απαραίτητες για την ασφαλή και υπεύθυνη συμμετοχή στον ψηφιακό δημόσιο χώρο. Η μελέτη δείχνει ότι η εκπαίδευση οφείλει να υπερβεί την απλή καλλιέργεια τεχνικών δεξιοτήτων και να υιοθετήσει μια ολιστική προσέγγιση, που ενισχύει την κριτική σκέψη, την ψηφιακή ηθική και την ενεργό συμμετοχή. Συμπερασματικά, η εκπαίδευση για την ψηφιακή πολιτειότητα αποτελεί βασική προϋπόθεση για την ενδυνάμωση της δημοκρατίας και την οικοδόμηση μιας συμπεριληπτικής και υπεύθυνης ψηφιακής κοινωνίας.

Λέξεις-κλειδιά: ενεργός πολιτειότητα, ψηφιακός πολίτης, ψηφιακή νοημοσύνη εκπαίδευση ψηφιακού πολίτη.

ΕΠΙΣΤΗΜΗ ΚΑΙ ΨΗΦΙΑΚΟΣ ΠΟΛΙΤΗΣ: ΈΝΑ ΔΙΔΑΚΤΙΚΟ ΣΕΝΑΡΙΟ ΜΕ ΕΦΑΡΜΟΓΗ ΣΤΗ ΧΗΜΕΙΑ

Μαλάμου Κωνσταντίνα

ΠΕΡΙΛΗΨΗ

Η παρούσα εργασία έχει ως θέμα της ένα διδακτικό σενάριο στη Χημεία, με στόχο την κινητοποίηση και τον προβληματισμό των μαθητών πάνω σε θέματα ψευδοεπιστήμης ή παραπλάνησης του κοινού σε επιστημονικά θέματα σε έναν ψηφιακό κόσμο γεμάτο υπερπληροφόρηση, προκλήσεις και παραπλανήσεις. Βασισμένο στην ανακαλυπτική-διερευνητική και ομαδοσυνεργατική μέθοδο, χρησιμοποιώντας σύγχρονα ψηφιακά εργαλεία, το διδακτικό σενάριο έχει ως κύριο στόχο, την εκπαίδευση ενεργών και προβληματιζόμενων μαθητών-ψηφιακών πολιτών σε θέματα επιστήμης και επιστημονικής παραπλάνησης. Το παρόν διδακτικό σενάριο μπορεί να αποτελέσει οδηγό ώστε να προσαρμοστεί και σε άλλες Φυσικές Επιστήμες όπως τη Βιολογία και τη Φυσική, εξυπηρετώντας αντίστοιχους διδακτικούς στόχους για τους μαθητές της Γ Γυμνασίου και τάξεις Λυκείου.

Λέξεις κλειδιά: επιστήμη, επιστημονική παραπλάνηση, φυσικές επιστήμες, ψευδοεπιστήμη, ψηφιακός πολίτης

ΘΠ8: Συμπεριληπτική ψηφιακή εκπαίδευση

ΗΧΗΤΙΚΑ ΨΗΦΙΑΚΑ ΕΡΓΑΛΕΙΑ ΣΤΗ ΔΙΔΑΣΚΑΛΙΑ ΜΑΘΗΜΑΤΙΚΩΝ ΓΙΑ ΜΑΘΗΤΕΣ ΜΕ ΟΠΤΙΚΗ ΑΝΑΠΗΡΙΑ: ΑΝΑΛΥΣΗ ΕΦΑΡΜΟΓΩΝ ΚΑΙ ΜΙΑ ΜΕΛΕΤΗ ΠΕΡΙΠΤΩΣΗΣ.

ΠΕΡΙΛΗΨΗ

Η εκπαίδευση των μαθητών που αντιμετωπίζουν προβλήματα όρασης αποτελεί έναν περίπλοκο και δυναμικά εξελισσόμενο τομέα, όπου απαιτούνται εξειδικευμένες προσεγγίσεις για να εξασφαλιστεί η αποτελεσματική μάθηση, η ένταξη και η ενδυνάμωση. Οι προσπάθειες για την ενσωμάτωση των μαθητών με οπτική αναπηρία στα κανονικά εκπαιδευτικά περιβάλλοντα έχουν αποκτήσει δυναμικό ώθησης. Η έρευνα υπογραμμίζει τη σημασία της προσβασιμότητας τόσο στο φυσικό όσο και στο ψηφιακό περιβάλλον. Η πολυτροπικότητα στη μάθηση αναφέρεται στο γεγονός ότι οι μαθητές επεξεργάζονται τη γνώση μέσα από διαφορετικά αισθητηριακά κανάλια. Στην περίπτωση των μαθητών με οπτική αναπηρία, το ακουστικό κανάλι αποκτά πρωταγωνιστικό ρόλο, καθώς λειτουργεί ως κύριο μέσο πρόσληψης και οργάνωσης της πληροφορίας. Επιπλέον, σύμφωνα με τον κονστρουκτιβισμό, η μάθηση δεν είναι μια παθητική διαδικασία αλλά ένα ενεργό χτίσιμο γνώσεων μέσα από αλληλεπίδραση με το περιβάλλον. Τα ψηφιακά εργαλεία ήχου δίνουν τη δυνατότητα στους μαθητές με οπτική αναπηρία να αλληλεπιδρούν με το εκπαιδευτικό υλικό, να διερευνούν έννοιες και να κατασκευάζουν τη γνώση μέσα από την ακουστική και αισθητηριακή εμπειρία. Η αξιοποίηση των ψηφιακών τεχνολογιών στη διδασκαλία μαθητών με οπτική αναπηρία έχει σημαντική συμβολή στη βελτίωση της πρόσβασής τους στη γνώση. Τα εργαλεία που βασίζονται στον ήχο, επιτρέπουν την κατανόηση μαθηματικών και άλλων επιστημονικών εννοιών μέσω ακουστικών πληροφοριών. Τα λογισμικά μετατροπής κειμένου σε ομιλία (TTS), οι ηχητικές ετικέτες και οι διαδραστικές εφαρμογές με ηχητική καθοδήγηση ενισχύουν την αυτονομία των μαθητών, ενώ τα ηχητικά διαγράμματα και οι περιγραφικές αφηγήσεις διευκολύνουν την πρόσληψη σύνθετων πληροφοριών. Επιπλέον, οι τεχνολογίες αφής σε συνδυασμό με ηχητική ανάδραση παρέχουν πολυαισθητηριακή υποστήριξη, διευκολύνοντας τη μαθησιακή διαδικασία. Η χρήση αυτών των εργαλείων προάγει τη συμπεριληπτική εκπαίδευση, επιτρέποντας την ενεργό συμμετοχή των μαθητών με οπτική αναπηρία στην τάξη και ενισχύοντας τη μαθησιακή τους εμπειρία.

Στην παρούσα εργασία, εξετάζονται σύγχρονα ηχητικά εργαλεία που ενισχύουν τη μαθησιακή διαδικασία, με έμφαση στη διδασκαλία μαθηματικών και επιστημονικών εννοιών. Παρουσιάζονται εργαλεία που κυκλοφορούν και γίνεται ιδιαιτερη αναφορά σε αυτά που μπορούν να έχουν οι μαθητές αλλά και οι εκπαιδευτικοί δωρεάν. Για την πρακτική διερεύνηση της αποτελεσματικότητας αυτών των εργαλείων πραγματοποιήθηκε και παρουσιάζεται μια μελέτη περίπτωσης. Ο μαθητής της Γ γυμνασίου Φ.Δ. με μερική απώλεια όρασης συμμετείχε σε ένα πρόγραμμα ενισχυμένης μαθηματικής διδασκαλίας με τη χρήση ψηφιακών εργαλείων. Η εκπαιδευτική προσέγγιση περιλαμβάνει τη χρήση του λογισμικού NVDA για την ανάγνωση μαθηματικών συμβόλων, Desmos για την ηχητική ανατροφοδότηση για γραφήματα συναρτήσεων, διαδραστικών εφαρμογών αφής για την κατανόηση γεωμετρικών σχημάτων και την ενσωμάτωση ηχητικών περιγραφών σε διαδραστικά μαθησιακά περιβάλλοντα. Τα αποτελέσματα καταδεικνύουν τη βελτίωση της κατανόησης και της συμμετοχής του μαθητή, υπογραμμίζοντας τη σημασία της ενσωμάτωσης τεχνολογιών προσαρμοσμένης μάθησης.

Λέξεις – κλειδιά: ειδική αγωγή, ηχητικά ψηφιακά μέσα, μελέτη περίπτωσης, οπτική αναπηρία

ΨΗΦΙΑΚΕΣ ΚΥΨΕΛΕΣ ΣΤΗΝ e-me ΓΙΑ ΤΗΝ ΕΚΜΑΘΗΣΗ ΕΛΛΗΝΙΚΩΝ ΑΠΟ ΠΑΙΔΙΑ ΠΡΟΣΦΥΓΕΣ: ΕΝΙΣΧΥΟΝΤΑΣ ΤΗΝ ΣΥΜΠΕΡΙΛΗΠΤΙΚΗ ΕΚΠΑΙΔΕΥΣΗ ΜΕΣΩ ΤΗΣ ΣΥΝΔΕΣΙΜΟΤΗΤΑΣ ΚΑΙ ΤΗΣ ΠΑΙΧΝΙΔΟΠΟΙΗΣΗΣ

ΠΕΡΙΛΗΨΗ

Η ένταξη των παιδιών προσφύγων στο ελληνικό εκπαιδευτικό σύστημα απαιτεί ευέλικτες και καινοτόμες παιδαγωγικές προσεγγίσεις που αξιοποιούν ψηφιακά εργαλεία και διαδραστικές μορφές μάθησης. Παρότι η δια ζώσης διδασκαλία παραμένει ο βασικός στόχος, οι συχνές απουσίες των μαθητών, λόγω κοινωνικών και οικογενειακών παραγόντων, δημιουργούν σημαντικά μαθησιακά κενά. Για την αντιμετώπιση αυτών των προκλήσεων και με αξιοποίηση των ψηφιακών δυνατοτήτων του Πανελλήνιου Σχολικού Δικτύου, δημιουργήθηκε μια ψηφιακή Κυψέλη στην πλατφόρμα e-me, βασισμένη στις θεωρίες της Συνδεσιμότητας (Connectivism) και της Παιχνιδοποίησης (Gamification), με στόχο την ενίσχυση της συμπεριληπτικής εκπαίδευσης.

Στην Κυψέλη της e-me, οι μαθητές πρόσφυγες έχουν τη δυνατότητα συνεχούς πρόσβασης σε εκπαιδευτικό υλικό, συμμετοχής σε διαδραστικές δραστηριότητες, επικοινωνίας με τους εκπαιδευτικούς τους και συνεργασίας με τους συμμαθητές τους. Παράλληλα, η πλατφόρμα διευκολύνει τη συμμετοχή των γονέων στη μαθησιακή διαδικασία, διαμορφώνοντας ένα ψηφιακό εκπαιδευτικό οικοσύστημα που υπερβαίνει τα όρια της φυσικής σχολικής τάξης. Η παιχνιδοποίηση υλοποιείται μέσω διαδραστικών κουίζ, παιχνιδιών και προκλήσεων, τα οποία ενισχύουν τη μαθητική εμπλοκή και το κίνητρο για μάθηση. Οι δραστηριότητες αυτές, προσαρμοσμένες στις γλωσσικές ανάγκες των παιδιών προσφύγων, καθιστούν την εκμάθηση της ελληνικής γλώσσας πιο ελκυστική και προσιτή.

Μέσα από διαδραστικές ασκήσεις λεξιλογίου και γραμματικής, προσαρμοσμένες στα επίπεδα γλωσσομάθειας των μαθητών, οπτικοακουστικό υλικό, διαθέσιμα ψηφιακά λεξικά σε γλώσσες όπως τα φαρσί και τα αραβικά, καθώς και δραστηριότητες παιχνιδοποίησης, η πλατφόρμα λειτουργεί ως εργαλείο επικοινωνίας και αλληλεπίδρασης μεταξύ μαθητών, εκπαιδευτικών και γονέων. Επιπλέον, δύναται να αξιοποιηθεί και ως εργαλείο εκμάθησης της ελληνικής γλώσσας για τους γονείς των μαθητών προσφύγων.

Τα αρχικά αποτελέσματα καταδεικνύουν αυξημένη μαθητική εμπλοκή, καθώς το ψηφιακό και παιχνιδοποιημένο περιβάλλον καθιστά τη μαθησιακή διαδικασία πιο ελκυστική. Παράλληλα, παρατηρείται βελτίωση της γλωσσικής ανάπτυξης των μαθητών, χάρη στην πολυτροπική προσέγγιση και την πρόσβαση σε εξατομικευμένο εκπαιδευτικό υλικό, καθώς και ενίσχυση της έκθεσής τους στην ελληνική γλώσσα εκτός σχολικού πλαισίου.

Η παρούσα εισήγηση αναδεικνύει τον τρόπο με τον οποίο η πλατφόρμα e-me, μέσω της δημιουργίας εξειδικευμένων Κυψελών, μπορεί να λειτουργήσει ως δυναμικό εργαλείο ψηφιακής και συμπεριληπτικής εκπαίδευσης. Ο συνδυασμός της Συνδεσιμότητας και της Παιχνιδοποίησης συμβάλλει στη διαμόρφωση ενός συμμετοχικού, διαδραστικού και ελκυστικού μαθησιακού περιβάλλοντος, ενισχύοντας τη γλωσσική και κοινωνική ένταξη των παιδιών προσφύγων και καθιστώντας τη μάθηση πιο ευέλικτη, προσβάσιμη και αποτελεσματική.

Λέξεις-κλειδιά: συμπεριληπτική εκπαίδευση, εκμάθηση ελληνικής γλώσσας, παιδιά πρόσφυγες, Τάξεις Υποδοχής, ψηφιακά εργαλεία, e-me, συνδεσιμότητα, παιχνιδοποίηση

ΑΝΑΖΗΤΩΝΤΑΣ ΤΟ ΣΧΟΛΕΙΟ ΓΙΑ ΟΛΟΥΣ: ΠΟΛΥΣΗΜΙΑ, ΣΤΑΔΙΑ ΠΡΑΓΜΑΤΩΣΗΣ ΚΑΙ ΥΛΙΚΟΣ/ΨΗΦΙΑΚΟΣ ΣΧΕΔΙΑΣΜΟΣ

ΠΕΡΙΛΗΨΗ

Στην ελληνική εκπαιδευτική πραγματικότητα, η μετάβαση στο νέο υπόδειγμα του σχολείου για όλους/ες τους/τις μαθητές/τριες, συχνά, εμφανίζεται να παρεμποδίζεται από ζητήματα ορολογίας. Ως κεντρικό σημείο εστίασης των εμποδίων αυτών καταγράφεται η αδιαφοροποίητη απόδοση στην ελληνική γλώσσα του όρου «inclusion». Ο όρος «inclusion», ο οποίος αποτελεί κεντρική έννοια του νέου υποδείγματος, στην ελληνική βιβλιογραφία αποδίδεται αδιαφοροποίητα με όρους όπως: ενσωμάτωση, ένταξη, συμπερίληψη, συνεκπαίδευση, κ.τ.ό., συνθήκη που καθιστά δυσχερή την επικοινωνία για σχετικά ζητήματα και, συχνά, οδηγεί σε αδιέξοδο τους/τις επαγγελματίες και τους/τις ερευνητές/τριες του πεδίου. Συνεκτιμώντας τις ραγδαίες εξελίξεις που σχετίζονται με τη δυνατότητα πρόσβασης στο διαδίκτυο μέσω σταθερών/κινητών συσκευών και την εμφάνιση και εξάπλωση της Τεχνητής Νοημοσύνης (ΤΝ) στην κοινωνία, την εργασία και την εκπαίδευση, η εκπαιδευτική κοινότητα επιδεικνύει αυξημένο ενδιαφέρον για τις Τεχνολογίες Πληροφορίας και Επικοινωνιών (ΤΠΕ) στο σχολικό/διδακτικό πλαίσιο. Λαμβάνοντας υπόψη: (α) τη συστηματική κατάταξη της χώρας μας κάτω από τον διεθνή μέσο όρο των χωρών που συμμετέχουν στο Πρόγραμμα Διεθνούς Αξιολόγησης Μαθητών (PISA), (β) το ψηφιακό χάσμα και (γ) την τάση ενίσχυσης της αξιοποίησης των πληροφοριών, των υπηρεσιών, της ψυχαγωγίας και της κοινωνικής αλληλεπίδρασης που προσφέρουν οι ΤΠΕ και η ΤΝ, εξετάζονται τα αναγκαία προαπαιτούμενα υλοποίησης του υλικού και του ψηφιακού σχεδιασμού στο σχολείο για όλους/ες τους/τις μαθητές/τριες, με έμφαση στη νοηματοδότηση του όρου «inclusion». Τα αποτελέσματα της βιβλιογραφικής μας έρευνας παρουσιάζονται συνθετικά και σχολιάζονται κριτικά. Η εργασία ολοκληρώνεται με συζήτηση και σχετικές προτάσεις. Η διασάφηση της πολυσημίας του όρου «inclusion» προτείνεται να πραγματοποιείται μέσα από μια προσέγγιση τεσσάρων επιπέδων/σταδίων, τα οποία προσδιορίζουν ολιστικά και περιγράφουν αναλυτικά το σχολείο για όλους/ες τους/τις μαθητές/τριες, τόσο στην υλική όσο και στην υποστηριζόμενη ψηφιακά εκδοχή του. Στην πορεία προς το 2030, η νέα πραγματικότητα καθιστά επείγουσα την προτεραιοποίηση της μετάβασης προς την εκπαίδευση για όλους/ες τους/τις μαθητές/τριες, με τη διασφάλιση επαρκών εγγυήσεων/πόρων, προκειμένου… κανείς/καμία μαθητής/τρια να μην αφεθεί πίσω. Μέσα από την προσπάθεια σχεδίασης και υλοποίησης του νέου υποδείγματος, διεκδικούνται εγγυήσεις ενσωμάτωσης στις κατευθυντήριες γραμμές των εθνικών προγραμμάτων σπουδών και στα προγράμματα κατάρτισης εκπαιδευτικών, νέων θεσμών εκπαίδευσης όπως ο θεσμός του Center for Applied Special Technology (CAST) των ΗΠΑ, οι οποίοι με κεντρική σχεδίαση και πειραματική υλοποίηση, θα έχουν τη δυνατότητα να υποστηρίζουν τη μετάβαση προς το νέο υπόδειγμα με επιλογές εύλογης χρήσης της τεχνολογίας, διαμορφωτικής/τελικής αξιολόγησης των αναγκαίων υπηρεσιών και, απαραιτήτως, αναστοχασμού προς βελτίωση του νέου αναθεωρημένου υποδείγματος.

Λέξεις – κλειδιά: Ειδική/Ενταξιακή Εκπαίδευση, inclusion, Τεχνολογίες Πληροφορίας και Επικοινωνιών, Ψηφιακό χάσμα, Τεχνητή Νοημοσύνη, CAST, PISA.

ΔΙΔΑΣΚΑΛΙΑ ΤΩΝ ΕΛΛΗΝΙΚΩΝ ΣΤΗ ΔΙΑΠΟΛΙΤΙΣΜΙΚΗ ΣΧΟΛΙΚΗ ΤΑΞΗ ΜΕ ΤΗ ΧΡΗΣΗ ΤΟΥ ΨΗΦΙΑΚΟΥ ΕΡΓΑΛΕΙΟΥ ΕΚΜΑΘΗΣΗΣ ΓΛΩΣΣΩΝ «AKELIUS LANGUAGES»

e-mail: sk8720@windowslive.com

ΠΕΡΙΛΗΨΗ

Το μη κερδοσκοπικό ίδρυμα Akelius δημιουργήθηκε το 2007 από τον Roger Akelius, Σουηδό επιχειρηματία που ασχολήθηκε με τα μαθηματικά, τον προγραμματισμό και τη μηχανολογία. Πέρα από τη φιλανθρωπική του δράση, βοηθώντας παιδιά σε ανάγκη και παρέχοντας ιατροφαρμακευτική περίθαλψη σε προσφυγικό πληθυσμό, το ίδρυμα προσπαθεί να συμβάλει και στην εκπαίδευση, μέσω της ηλεκτρονικής πλατφόρμας «Akelius languages», η οποία ξεκίνησε τη λειτουργία της το 2018. Η ανάπτυξη της πλατφόρμας γίνεται από εξήντα προγραμματιστές σε Βερολίνο και Λευκωσία και αποτελεί μια ηλεκτρονική εφαρμογή που παρέχει μια αποτελεσματική μέθοδο εκμάθησης ξένων γλωσσών, εστιάζοντας στην κατανόηση προφορικού και γραπτού λόγου. Η πλατφόρμα αναπτύχθηκε από το ίδρυμα Akelius και τη UNICEF, με στόχο την παροχή υποστήριξης στη διδασκαλία της ελληνικής γλώσσας σε παιδιά με προσφυγικό / μεταναστευτικό υπόβαθρο, μέσα από τη χρήση ψηφιακών εργαλείων. Δίνεται έτσι η δυνατότητα στους μαθητές 6-18 ετών να κατανοήσουν τα ελληνικά πιο γρήγορα και διασκεδαστικά και να αποκτήσουν αυτοπεποίθηση, προσαρμοζόμενοι πιο ομαλά στο σχολικό περιβάλλον. Μέχρι στιγμής η πλατφόρμα είναι διαθέσιμη στα αγγλικά, τα γαλλικά, τα γερμανικά, τα ελληνικά, τα ιταλικά, τα πορτογαλικά, τα ρωσικά, τα ισπανικά και τα σουηδικά, ενώ χρησιμοποιείται σε δώδεκα χώρες, Αλβανία, Ελλάδα, Ιταλία, Πολωνία, Μεξικό, Μπουτάν, Βοσνία/ Ερζεγοβίνη, Λίβανο, Καζακστάν, Μαυριτανία, Πράσινο Ακρωτήρι και Σάο Τομέ/ Πρίνσιπε. Περιλαμβάνει γλωσσικές δραστηριότητες και κουίζ, τραγούδια, παιγνιώδεις δραστηριότητες όπως σταυρόλεξο, κρεμάλα και μπίνγκο, θεωρία για διάφορα γραμματικά φαινόμενα, ενώ, καθώς βρίσκεται ακόμα σε διαδικασία ανάπτυξης, σταδιακά εμπλουτίζεται με δραστηριότητες μαθηματικών, εικαστικών και ιστορίας.

Σύμφωνα με στοιχεία της UNICEF, χρησιμοποιείται ήδη από περισσότερα από 10.500 παιδιά πρόσφυγες στην Ελλάδα. Έως σήμερα, περίπου 1.600 δάσκαλοι σε δημόσια σχολεία και σε κέντρα μη τυπικής εκπαίδευσης έχουν εκπαιδευτεί στη χρήση της πλατφόρμας. Ειδικότερα στα ελληνικά δημόσια σχολεία έχει ενταχθεί σε τάξεις υποδοχής (ΖΕΠ) αλλά και σε γενικές τάξεις, πρωτοβάθμιας και δευτεροβάθμιας εκπαίδευσης, όταν ο μαθητικός πληθυσμός αποτελείται κυρίως από μαθητές και μαθήτριες με μεταναστευτικό και προσφυγικό υπόβαθρο. Ο τρόπος με τον οποίο οι δραστηριότητες της πλατφόρμας θα συνδυαστούν με τη διδασκαλία, γίνεται με ευθύνη του εκπαιδευτικού, καθώς δεν υπάρχουν έτοιμα σχέδια μαθήματος. Ο σχεδιασμός του μαθήματος επαφίεται στην ευελιξία και τη δημιουργικότητα του εκπαιδευτικού. Οι μαθητές μπαίνουν στην πλατφόρμα χρησιμοποιώντας το προσωπικό τους τάμπλετ και ακουστικά, και ασχολούνται με τη δραστηριότητα που τους ανατίθεται, ανάλογα με το περιεχόμενο του μαθήματος της ημέρας. Ο υλικοτεχνικός εξοπλισμός παραχωρείται από το πρόγραμμα Akelius και φυλάσσεται στην εκάστοτε τάξη, όπως επίσης υπάρχει πρόβλεψη για σύνδεση στο διαδίκτυο και για έντυπο διδακτικό υλικό. Η χρήση της εφαρμογής Akelius είναι δωρεάν, δεν υπάρχει συνδρομή ούτε διαφημιστικά μηνύματα. Η πλατφόρμα λειτουργεί τόσο offline όσο και online, όμως είναι προτιμότερη η σύνδεση στο διαδίκτυο, καθώς οι μαθητές μπορούν να δημιουργήσουν τον προσωπικό τους λογαριασμό και να παρακολουθούν την πρόοδό τους.

Τα οφέλη από τη χρήση μιας τέτοιας πλατφόρμας είναι πολλαπλά, καθώς το μάθημα αποκτά διαδραστικό χαρακτήρα αλλά και εξατομικεύεται, καθώς οι μαθητές προχωρούν με τον προσωπικό τους ρυθμό, ενώ ο εκπαιδευτικός μπορεί να δώσει περισσότερη προσοχή επιλεκτικά σε συγκεκριμένους μαθητές. Ως προς τα μαθησιακά αποτελέσματα, έρευνες που έχουν γίνει από τη UNICEF σε Akelius τάξεις συγκριτικά με τάξεις με ίδιο μαθητικό πληθυσμό, αλλά χωρίς τη χρήση της πλατφόρμας, αποδεικνύουν ότι σημειώθηκε πρόοδος κατά 8% στην ακουστική κατανόηση, 9% στην ικανότητα ανάγνωσης, 25% στην προφορική έκφραση και 34% στον γραπτό λόγο. Ποιοτικές έρευνες έχουν δείξει ότι με τη χρήση της πλατφόρμας, οι μαθητές απέκτησαν αυτοπεποίθηση, κίνητρο για μάθηση, συνεργατικότητα και συνέπεια ως προς την παρουσία τους στο σχολείο. Ταυτόχρονα, υπάρχουν οφέλη και για τους εκπαιδευτικούς, σε μια εποχή που πλέον απαιτείται η χρήση ψηφιακών μέσων και νέων τεχνολογιών στη διδασκαλία. Αυτού του τύπου η μεικτή διδασκαλία αναπτύσσει τις ψηφιακές δεξιότητες των εκπαιδευτικών, συμβάλλοντας σε ένα πιο οργανωμένο και δομημένο μάθημα. Προσωπικά έχω ενταχθεί στο πρόγραμμα και χρησιμοποιώ την πλατφόρμα Akelius στη διδασκαλία της τάξης μου κατά τα σχολικά έτη 2023-2024 (Α΄ τάξη δημοτικού) και 2024-2025 (Β΄ τάξη) με μαθητές εξολοκλήρου αλλόγλωσσους. Το σχολείο βρίσκεται στο κέντρο της Αθήνας και ο μαθητικός πληθυσμός είναι σε μεγάλο ποσοστό προσφυγικός /

μεταναστευτικός. Το σχολείο αυτό, μαζί με το Γυμνάσιο διαπολιτισμικής εκπαίδευσης Αθηνών, είναι τα μοναδικά σχολεία στην Ελλάδα που κατά τη σχολική χρονιά 2023-2024 εφάρμοσαν πιλοτικά το πρόγραμμα online για πρώτη φορά.

Λέξεις – κλειδιά: ηλεκτρονική πλατφόρμα Akelius languages, διδασκαλία των ελληνικών, μαθητές με προσφυγικό / μεταναστευτικό υπόβαθρο

ΠΕΡΙΛΗΨΗ

Η παρούσα εργασία εξετάζει τη Συμπεριληπτική Εκπαίδευση μαθητών με Διαταραχή Αυτιστικού Φάσματος (ΔΑΦ) μέσω της αξιοποίησης ψηφιακών μέσων, με βασικό άξονα το εκπαιδευτικό πρόγραμμα TEACCH. Στόχος είναι η διερεύνηση των προκλήσεων που αντιμετωπίζουν οι μαθητές με ΔΑΦ στο εκπαιδευτικό σύστημα και η αξιολόγηση της συμβολής των ψηφιακών εργαλείων στη βελτίωση της μαθησιακής τους εμπειρίας.

Η μεθοδολογία που ακολουθήθηκε βασίστηκε στη βιβλιογραφική ανασκόπηση και στη συλλογή ποιοτικών δεδομένων μέσω συζητήσεων με ειδικούς στον τομέα της εκπαίδευσης ατόμων με ΔΑΦ. Εξετάστηκαν οι θεμελιώδεις δυσκολίες των μαθητών, η δομή και η εφαρμογή του προγράμματος TEACCH, καθώς και η συμβολή των ψηφιακών τεχνολογιών στη διδασκαλία.

Τα αποτελέσματα της έρευνας αναδεικνύουν ότι η χρήση δομημένων εκπαιδευτικών προσεγγίσεων, όπως το TEACCH, σε συνδυασμό με ψηφιακά εργαλεία, διευκολύνει τη μαθησιακή διαδικασία και ενισχύει την κοινωνική ένταξη των μαθητών με ΔΑΦ. Συγκεκριμένα, η εφαρμογή αυτών των μεθόδων στη διδασκαλία της Ρομποτικής και των Φυσικών Επιστημών δείχνει ότι η οπτικοποίηση και η σαφής δομή των δραστηριοτήτων συμβάλλουν στη βελτίωση της κατανόησης και της αυτονομίας των μαθητών.

Η έρευνα υπογραμμίζει τη σημασία των δομημένων προσεγγίσεων στην εκπαίδευση μαθητών με ΔΑΦ, καθώς διευκολύνουν την επικοινωνία, την κοινωνική αλληλεπίδραση και τη συμπεριφορά τους. Η τεχνολογία συμβάλλει στην εξατομικευμένη μάθηση και την κοινωνική ένταξη, με τους εκπαιδευτικούς να παίζουν καθοριστικό ρόλο στην εφαρμογή προγραμμάτων όπως το TEACCH και τα ψηφιακά εργαλεία.

Στις Φυσικές Επιστήμες, οι μαθητές με ΔΑΦ επωφελούνται από σαφείς, οπτικοποιημένες οδηγίες σε πειράματα και εργαστηριακές ασκήσεις, ενώ στη Ρομποτική, η χρήση οπτικών διαγραμμάτων διευκολύνει τη συναρμολόγηση και τον προγραμματισμό. Η συνέπεια στη χρήση οπτικών εργαλείων στις δύο θεματικές ενότητες ενισχύει τη μαθησιακή εμπειρία και διευκολύνει τη γενίκευση της γνώσης.

Συμπερασματικά, η ενσωμάτωση του προγράμματος TEACCH με τις δυνατότητες που παρέχουν τα ψηφιακά μέσα αποτελεί μια αποτελεσματική προσέγγιση για την ενίσχυση της εκπαιδευτικής εμπειρίας των μαθητών με ΔΑΦ. Η τεχνολογία επιτρέπει την εξατομίκευση της διδασκαλίας, προάγει τη συνεργασία των εμπλεκόμενων φορέων (εκπαιδευτικών, γονέων, ειδικών) και διευκολύνει τη μετάβαση των μαθητών σε διαφορετικά γνωστικά αντικείμενα. Μάλιστα, δίνεται η δυνατότητα στα παιδιά με ΔΑΦ να συμμετέχουν ενεργά και να κατανοούν πολύπλοκες έννοιες μέσα από μια δομημένη ψηφιακή ή δια ζώσης προσέγγιση, ενώ παράλληλα το πρόγραμμα TEACCH συμπληρώνεται και εμπλουτίζεται εντός της τάξης, και επεκτείνεται στη συνολική καθημερινή ζωή του παιδιού μέσω του EarlyBird και Cygnet.

ΠΕΡΙΛΗΨΗ

Η παρούσα εισήγηση στοχεύει στην ανάδειξη της χρησιμότητας της Ιστοεξερεύνησης (webquest), ως μιας μορφής μαθήματος διερευνητικού τύπου σύμφωνου με τις Αρχές της Συμπεριληπτικής Ψηφιακής Εκπαίδευσης. Η διερεύνηση και χρήση της εν λόγω μεθόδου πραγματοποιήθηκε κατά την υλοποίηση του έργου Erasmus+ ΚΑ210 "Mediterranean Diet for Overall Health" (MedDiet4Health). Το έργο αποτελεί ένα εγκεκριμένο σχέδιο δράσης Erasmus+ ΚΑ210 μεταξύ δύο επαγγελματικών λυκείων -Ελλάδα (τομέας Γεωπονίας, Τροφίμων και Περιβάλλοντος), ενός γενικού λυκείου - Σλοβακία και μιας ΜΚΟ - Τουρκία.

Το έργο είχε διάρκεια 18 μηνών και στόχευε στη δημιουργία ενός ψηφιακού μαθήματος τριών ενοτήτων, που ενσωματώνει τη Μεσογειακή Διατροφή στην καθημερινή διδακτική πρακτική. Το μάθημα υποστηρίζει τους Στόχους Βιώσιμης Ανάπτυξης, εστιάζοντας ιδιαίτερα στον υποστόχο 4.7 και στους στόχους 2, 12, 14, 15, 17, συνεισφέροντας στην καλλιέργεια των γνώσεων και των δεξιοτήτων μαθητών/τριών, για την προώθηση της βιώσιμης ανάπτυξης/βιώσιμου τρόπου ζωής, της αναγνώρισης της πολιτιστικής ποικιλομορφίας και της συμβολής του πολιτισμού στη βιώσιμη ανάπτυξη.

Στο πλαίσιο αυτό, αναπτύχθηκαν, εφαρμόστηκαν πιλοτικά και επανασχεδιάστηκαν 60 WebQuests ευθυγραμμισμένα με τις αρχές της συμπεριληπτικής ψηφιακής εκπαίδευσης που εξερευνούν τη μεσογειακή διατροφή ως στοιχείο πολιτιστικής κληρονομιάς αλλά και τη σημασία της ως ένα αειφόρο και υγιεινό διατροφικό μοντέλο, προωθώντας την προσήλωση σε αυτή. Επίσης, σχεδιάστηκαν 20 επιπλέον για τον εορτασμό ημερών ευαισθητοποίησης σχετικών με τα προς ανάπτυξη θέματα.

Η εισήγηση περιλαμβάνει την ανάπτυξη του θεωρητικού πλαισίου, των σταδίων δημιουργίας και ανάπτυξης, υλοποίησης καθώς και των εργαλείων αξιολόγησης.

Ακολούθως, γίνεται αναφορά και κριτική προσέγγιση στις διδασκαλίες που υλοποιήθηκαν κατά την υλοποίηση του προγράμματος και παρουσιάζονται τα αποτελέσματα.

ΠΕΡΙΛΗΨΗ

Η συμπεριληπτική ψηφιακή εκπαίδευση αποτελεί βασικό άξονα των σύγχρονων εκπαιδευτικών πρακτικών, καθώς στοχεύει στη διασφάλιση ισότιμης πρόσβασης στη γνώση για όλους, ανεξαρτήτως κοινωνικών ή γεωγραφικών περιορισμών (Ainscow, 2020). Στο πλαίσιο αυτό, η αξιοποίηση ψηφιακών μέσων για τη διδασκαλία σε ευάλωτες κοινωνικές ομάδες, όπως οι έγκλειστοι σε Σωφρονιστικά Καταστήματα, λαμβάνει ιδιαίτερη σημασία. Το ερευνητικό πρόγραμμα "*Museum Tours for Inmates -the ancient Greek encounters*" (*MuTourIn*), για την υλοποίηση του οποίου έχει ληφθεί Υποτροφία από το Κέντρο Ελληνικών Σπουδών του Πανεπιστημίου του Harvard, αποτέλεσε μια καινοτόμο πρωτοβουλία που αξιοποίησε την πολιτιστική κληρονομιά και την ψηφιακή τεχνολογία για την εκπαίδευση και την κοινωνική ενσωμάτωση των εγκλείστων.

Το *MuTourIn* αποτελεί συνέχεια και εξέλιξη του επιτυχημένου προγράμματος «*Μουσειακοί Ψίθυροι στο Πανοπτικόν*», το οποίο αξιοποίησε ψηφιακές πλατφόρμες για την παροχή ψηφιακών ξεναγήσεων σε μουσεία από όλο τον κόσμο. Το νέο αυτό εγχείρημα, εστίασε στη διασύνδεση της αρχαίας ελληνικής πολιτιστικής κληρονομιάς με την εκπαίδευση των εγκλείστων. Μέσα από τον συνδυασμό ψηφιακών ξεναγήσεων και διαδραστικών συζητήσεων, το MuTourIn επιδίωξε να προάγει τη γνωστική ανάπτυξη, την πολιτισμική κατανόηση και την ενίσχυση δεξιοτήτων του 21ου αιώνα, όπως η κριτική σκέψη και η επικοινωνία (Kidd, 2019). Η πρωτοβουλία αυτή ανέδειξε τον ρόλο της ψηφιακής πολιτιστικής κληρονομιάς ως εργαλείου εκπαίδευσης και κοινωνικής ενσωμάτωσης, γεφυρώνοντας το χάσμα ανάμεσα στους έγκλειστους και τον ευρύτερο πολιτιστικό και ακαδημαϊκό χώρο και βελτίωσε την πρόσβαση στην εκπαίδευση, ενισχύοντας δεξιότητες όπως η συνεργασία και η πολιτισμική κατανόηση. Ακολούθως, η ενσωμάτωση της πολιτιστικής κληρονομιάς στην εκπαίδευση των εγκλείστων προσέφερε πολλαπλά οφέλη, καθώς ενίσχυσε τη δια βίου μάθηση και δημιούργησε γέφυρες επικοινωνίας μεταξύ των μουσείων και των Σχολείων Δεύτερης Ευκαιρίας των Σωφρονιστικών Καταστημάτων (Lupo et al., 2023). Παρόλο που σχετικές έρευνες υπογραμμίζουν τη θετική επίδραση της τέχνης και της εκπαίδευσης στη διαδικασία κοινωνικής επανένταξης, η σύνδεση μουσείων, κλασικών σπουδών και σωφρονιστικών περιβαλλόντων παραμένει ένας σχετικά ανεξερεύνητος τομέας (McGregor, 2020).

Οι προκλήσεις που προέκυψαν αφορούν στην τεχνολογική υποδομή, τις παιδαγωγικές προσεγγίσεις και την ανάγκη θεσμικής υποστήριξης για τη βιώσιμη ανάπτυξη τέτοιων πρωτοβουλιών. Ωστόσο, το *MuTourIn* μέσω των ποιοτικών δεδομένων που εξήχθησαν από συνεντεύξεις εγκλείστων σε 7 από τα 12 Σχολεία -τα οποία η ερευνήτρια επισκέφθηκε δια ζώσης, ενώ στην τελευταία ξενάγηση διασυνδέθηκαν και τα 12 σχολεία- που λειτουργούν σε Σωφρονιστικά Καταστήματα στη χώρα μας και παρακολούθησαν τις εν λόγω μουσειακές ψηφιακές ξεναγήσεις, παρέχει πολύτιμα δεδομένα που μπορούν να αξιοποιηθούν για τη διαμόρφωση βιώσιμων στρατηγικών, συνδυάζοντας την ψηφιακή πολιτιστική κληρονομιά με την κοινωνική ένταξη.

Συνοψίζοντας, η χρήση ψηφιακών ξεναγήσεων και η αξιοποίηση της πολιτιστικής κληρονομιάς ως εκπαιδευτικού εργαλείου διαμορφώνουν νέες προοπτικές για τη συμπεριληπτική εκπαίδευση. Το *MuTourIn* απέδειξε πως η τεχνολογία μπορεί να λειτουργήσει ως γέφυρα ανάμεσα σε διαφορετικές κοινωνικές ομάδες, προωθώντας την εκπαίδευση και τον κοινωνικό μετασχηματισμό μέσα από την αλληλεπίδραση με τον πολιτισμό.

Λέξεις – κλειδιά: Συμπεριληπτική εκπαίδευση, πολιτιστική κληρονομιά, μουσειακές ψηφιακές ξεναγήσεις, Σωφρονιστικά Καταστήματα

ΠΕΡΙΛΗΨΗ

Η ψηφιοποίηση της εκπαίδευσης και η ανάγκη για αειφορία αποτελούν δύο κρίσιμους πυλώνες για την ανάπτυξη ενός σύγχρονου εκπαιδευτικού μοντέλου. Το παρόν άρθρο προτείνει το μοντέλο του «Αειφόρου Ψηφιακού Σχολείου», το οποίο συνδυάζει την τεχνολογία με αρχές αειφορίας για την προώθηση μιας ολιστικής, συμπεριληπτικής και περιβαλλοντικά υπεύθυνης εκπαίδευσης. Μέσα από τη θεωρητική ανάλυση και την παρουσίαση πρακτικών εφαρμογών, το άρθρο διερευνά πώς η ενσωμάτωση ψηφιακών εργαλείων, η εκπαίδευση για την κλιματική αλλαγή και η συμμετοχική μάθηση μπορούν να δημιουργήσουν ένα βιώσιμο εκπαιδευτικό περιβάλλον για τον 21ο αιώνα.

Λέξεις – κλειδιά: Αειφορία, ψηφιακή εκπαίδευση, αειφόρο σχολείο, τεχνολογία στην εκπαίδευση, 21ος αιώνας.

ΠΕΡΙΛΗΨΗ

Οι τεχνολογικές εξελίξεις στο πεδίο της επιχειρηματικότητας είναι ραγδαίες ως αποτέλεσμα του ψηφιακού μετασχηματισμού της οικονομίας. Οι σύγχρονες σχολικές μονάδες καλούνται να αναπροσαρμόσουν τις διδακτικές και εν γένει εκπαιδευτικές στρατηγικές τους στα πλαίσια λειτουργίας του αειφόρου σχολείου. Επιπρόσθετα το επιχειρείν αποτελεί ουσιώδη και απαραίτητη δεξιότητα για τους αυριανούς πολίτες και ωφελεί τόσο την προσωπική τους όσο και την επαγγελματική τους εξέλιξη. Η εκπαίδευση σε θέματα επιχειρηματικότητας παίζει καίριο ρόλο στην ανταγωνιστικότητα μιας χώρας και στη διαρκή ανάπτυξη της οικονομίας και της ανταγωνιστικότητας της. Η προώθηση της επιχειρηματικότητας στην εκπαίδευση ενθαρρύνει και καθοδηγεί τους μαθητές/τριες στο να αναπτύξουν επιχειρηματικό πνεύμα και να διαμορφώνουν καινοτόμες λύσεις. Η βασική ιδέα είναι η κατανόηση βασικών οικονομικών εννοιών από πλευράς των μαθητών/τριών όπως για παράδειγμα η διαχείριση χρημάτων που εντάσσεται στα πλαίσια του οικονομικού εγγραματισμού και επιχειρηματικότητας και η απόκτηση δεξιοτήτων για την δημιουργία της δικής τους ψηφιακής επιχείρησης. Η φιλοσοφία ενός οργανισμού μάθησης όπως και το σχολείο είναι να μαθαίνουμε πώς να μαθαίνουμε. Οι μαθητές/τριες εκπαιδεύονται να εργάζονται σε ομάδες, να καταθέτουν ιδέες και προτάσεις με βάση τα ενδιαφέροντα τους και να συλλαμβάνουν επιχειρηματικές ιδέες τις οποίες μέσω της συνεργασίας και της ομαδοσυνεργατικότητας μέσω χάραξης και προσομοίωσης ενός απλού και πρότυπου επιχειρηματικού σχεδίου που θα οδηγήσει στην υλοποίηση της αρχικής τους ιδέας με την χρήση σύγχρονων καινοτόμων ψηφιακών εργαλείων. Σκοπός της παρούσας έρευνας είναι η βιβλιογραφική ανασκόπηση και η δευτερογενή ανάλυση δεδομένων, βιβλιογραφίας, μέσω της επεξεργασίας υφιστάμενων ερευνών και στατιστικών που σχετίζονται με τις εξελίξεις της εφαρμογής της επιχειρηματικότητας στην εκπαίδευση στα πλαίσια της ψηφιακής διακυβέρνησης και η καταγραφή καλών πρακτικών στην θεματική Δημιουργώ και Καινοτομώ-Δημιουργική σκέψη και πρωτοβουλία, στον τομέα της επιχειρηματικότητας, τόσο σε εγχώριο όσο και σε Διεθνές επίπεδο. Το ερευνητικό κείμενο αποσκοπεί στην ανάδειξη των προκλήσεων που προκύπτουν για τα σχολεία στην εποχή της ψηφιακής διακυβέρνησης στον τομέα της επιχειρηματικότητας και της εφαρμογής της ενεργούς πολιτειότητας μέσα από δράσεις ενίσχυσης της σε συνδυασμό με τα εργαστήρια δεξιοτήτων.

Λέξεις-κλειδιά: επιχειρηματικότητα, εκπαίδευση, δημιουργική σκέψη, ψηφιακά περιβάλλοντα

Η ΠΡΑΣΙΝΗ, ΨΗΦΙΑΚΗ ΓΕΙΤΟΝΙΑ ΤΟΥ ΝΗΠΙΑΓΩΓΕΙΟΥ

Τσιγγερλιώτη Άννα
Νηπιαγωγός

33ο Νηπιαγωγείο Ευόσμου
e-mail: atsiggerlioti@gmail.com

ΠΕΡΙΛΗΨΗ

Η παρούσα εργασία αφορά την συμμετοχή του 33ου Νηπιαγωγείου Ευόσμου στο Εκπαιδευτικό Πρόγραμμα ηλεκτρονικής μάθησης «Πράσινες γειτονιές» το οποίο υλοποιήθηκε από τη Διεύθυνση Πρωτοβάθμιας Εκπαίδευσης Δυτικής Θεσσαλονίκης, δια της Υπευθύνου Περιβαλλοντικής Εκπαίδευσης σε συνεργασία με το NOUS, Ινστιτούτο Ψηφιακής Μάθησης και Επικοινωνίας. Σκοπός του εκπαιδευτικού προγράμματος είναι η ευαισθητοποίηση των μαθητών/τριών σε θέματα που αφορούν στην ανάγκη διατήρησης και προστασίας του πράσινου στο άμεσο περιβάλλον τους, τη γειτονιά τους και η ανάπτυξη της συμμετοχής σε ενέργειες, που αποσκοπούν στη βελτίωση του περιβάλλοντος και την αναβάθμιση της ποιότητας ζωής τους. Παρουσιάζονται τα βήματα που ακολουθήθηκαν για την υλοποίηση του προγράμματος αξιοποιώντας ψηφιακά εργαλεία όπως το Google earth και το Google Lens, για την δημιουργία ενός ψηφιακού συνεργατικού χάρτη όπου απεικονίζεται από τους μαθητές/τριες η γειτονιά του σχολείου όπως θα ήθελαν να είναι αναφορικά με το πράσινο. Οι μαθητές/τριες μέσω της διερευνητικής μάθησης και της συμμετοχής σε παιγνιώδες δραστηριότητες ενθαρρύνονται να αναπτύξουν πρωτοβουλία, υπευθυνότητα και δράση για το περιβάλλον του σχολείου. Έχοντας συλλέξει τεκμήρια από την μελέτη στο πεδίο, τα παιδιά ευαισθητοποιούνται και λαμβάνουν αποφάσεις για τις ευρύτερες συνθήκες στην γειτονιά τους.

Δίνεται έμφαση στις δυνατότητες που μπορεί να παρέχει το ψηφιακό μέσο για τον εμπλουτισμό της μαθησιακής εμπειρίας, της επικοινωνίας μεταξύ των μαθητών/τριών ενώ παράλληλα διατυπώνεται η ανάγκη για μια κριτική τοποθέτηση απέναντι στα χαρακτηριστικά της αξιοποίησής του. Τα παιδιά εξοικειώνονται με την χρήση ψηφιακών εργαλείων και μέσων, επικοινωνούν τις ιδέες του με άλλα σχολεία και μοιράζονται πραγματικές εμπειρίες. Παράλληλα προάγεται η μαθησιακή εμπειρία και υποστηρίζεται η ολόπλευρη ανάπτυξη των παιδιών καθώς παρέχονται ευκαιρίες ώστε να αναπτύξουν ψηφιακές δεξιότητες και στάσεις για την χρήση της τεχνολογίας.

Το πρόγραμμα υλοποιήθηκε στο πλαίσιο μετασχηματισμού του νηπιαγωγείου σε αειφόρο σχολείο, υιοθετώντας μια ολιστική προσέγγιση σε πρακτικές σύμφωνες με τις αξίες της αειφορίας σε παιδαγωγικό, κοινωνικό και περιβαλλοντικό πεδίο.

Λέξεις – κλειδιά: ψηφιακός χάρτης, αειφόρο σχολείο, νηπιαγωγείο

ΘΠ10: Καλές πρακτικές αξιοποίησης ψηφιακών τεχνολογιών στη διδακτική πράξη

ΜΙΑ ΝΕΑ ΠΡΟΣΕΓΓΙΣΗ ΔΙΔΑΣΚΑΛΙΑΣ ΤΩΝ ΝΕΩΝ ΤΕΧΝΟΛΟΓΙΩΝ ΒΑΣΙΣΜΕΝΗ ΣΤΑ ΓΝΩΣΤΙΚΑ ΣΤΥΛ FI ΚΑΙ FD

ΠΕΡΙΛΗΨΗ

Η παρούσα πρόταση αποσκοπεί στην ανάδειξη μιας νέας προσέγγισης για την αποτελεσματική διδασκαλία της Ρομποτικής και των Νέων Τεχνολογιών. Για τη διασφάλιση μιας επιτυχημένης διαδικασίας, προτείνεται η διάγνωση των στυλ μάθησης των μαθητευομένων και στη συνέχεια η παροχή διαφοροποιημένης διδασκαλίας που θα επιτύχει την προβλεπόμενη ένταξη και θα μεγιστοποιήσει τα μαθησιακά αποτελέσματα. Για το λόγο αυτό, θα χρησιμοποιηθεί η πιο γνωστή διπολική αντίθεση σχετικά με τα γνωστικά στυλ μάθησης, αυτή που προτάθηκε από τον Witkin και τους συνεργάτες του (1977) και διακρίνει τους μαθητευόμενους σε δύο διπολικές κατηγορίες, δηλαδή εκείνους που μαθαίνουν χωρίς να εξαρτώνται από το περιβάλλον τους (Μαθητευόμενοι Ανεξάρτητοι από το Πεδίο = FI) και εκείνους που καθιστούν τη μάθηση άμεσα εξαρτημένη από το περιβάλλον τους (Μαθητευόμενοι Εξαρτημένοι από το Πεδίο = FD).

Η έρευνα του Witkin και των συνεργατών του οδήγησε στη δημιουργία ενός διαγνωστικού εργαλείου, του Group Embedded Figures Test (GEFT - Ομαδικό Τεστ Ενσωματωμένων Σχημάτων), το οποίο μετρά την παρουσία των διπολικών χαρακτηριστικών FI/FD στους μαθητευόμενους, και ορίζει ποιοι από αυτούς τείνουν προς την πρώτη και ποιοι προς τη δεύτερη κατηγορία. Σχετικές έρευνες έχουν δείξει ότι οι μαθητευόμενοι FI προτιμούν να μαθαίνουν καλύτερα αξιοποιώντας παραδοσιακά μέσα σε σύγκριση με μαθητευόμενους που ανήκουν στην κατηγορία FD. Οι τελευταίοι επηρεάζονται περισσότερο από το κοινωνικό τους περιβάλλον παρά από τα προσωπικά τους κίνητρα, καθώς και από τον έπαινο και την κριτική σε σύγκριση με τους FI, οι οποίοι είναι πιο παραγωγικοί και εγωκεντρικοί, λύνουν προβλήματα μέσω διαίσθησης και αξιοποιούν στρατηγικές ελέγχου τύπου «σωστό-λάθος».

Το διαφορετικό Γνωστικό Στυλ Μάθησης που διαθέτει κάθε μαθητής αποτελεί μέρος της θεμελιώδους υπόθεσης ότι κάθε παιδί είναι μοναδικό, που σημαίνει με απλά λόγια, διάφορες διαφορές στη γνωστική και κοινωνική ανάπτυξη μεταξύ των παιδιών. Δεδομένου ότι αυτά τα χαρακτηριστικά επηρεάζουν τη μάθηση, ο τομέας της Διαφοροποιημένης Διδασκαλίας θεωρείται μία από τις πιο κατάλληλες εκπαιδευτικές προσεγγίσεις για τη διαχείριση όλων των μορφών διαφορετικότητας στη σύγχρονη τάξη, η οποία αποσκοπεί στην προσφορά μάθησης για κάθε παιδί ξεχωριστά, λαμβάνοντας υπόψη τις ιδιαιτερότητές του στην κατασκευή της γνώσης και της διδασκαλίας. Επομένως, η Διαφοροποιημένη Διδασκαλία είναι μια σύγχρονη, παιδοκεντρική και πολλά υποσχόμενη προσέγγιση που περιλαμβάνει πολλές καινοτόμες προσεγγίσεις και συγχρόνως μια πρόκληση για ερευνητές και εκπαιδευτικούς.

Η διδασκαλία των νέων τεχνολογιών από την άλλη πλευρά είναι απαραίτητη για την προετοιμασία των μαθητών για το μέλλον, την ανάπτυξη των δεξιοτήτων τους και τη δημιουργία μιας ψηφιακά μορφωμένης και καινοτόμου κοινωνίας. Ζώντας σε μια ψηφιακή εποχή, όπου η τεχνολογία διαπερνά κάθε πτυχή της ζωής, οι μαθητές χρειάζονται ψηφιακές δεξιότητες για να επιτύχουν στην εκπαίδευση, την εργασία και την κοινωνία και να εξοπλιστούν με τις απαραίτητες γνώσεις και δεξιότητες για να ανταποκριθούν στις απαιτήσεις του 21ου αιώνα. Εξάλλου, οι νέες τεχνολογίες προσφέρουν εργαλεία και πλατφόρμες που ενθαρρύνουν την κριτική σκέψη, την ανάλυση και την επίλυση προβλημάτων ώστε οι μαθητές να μαθαίνουν να αξιολογούν πληροφορίες, να λαμβάνουν αποφάσεις και να δημιουργούν καινοτόμες λύσεις. Τέλος, η διδασκαλία των νέων τεχνολογιών βοηθά τους μαθητές να αναπτύξουν ψηφιακό γραμματισμό, δηλαδή την ικανότητα να χρησιμοποιούν την τεχνολογία υπεύθυνα, με ασφάλεια και ηθικά και να προστατεύουν το απόρρητό τους, να αναγνωρίζουν την παραπληροφόρηση και να αποφεύγουν τους κινδύνους του διαδικτύου. Συνοψίζοντας, η παρούσα πρόταση αναλύει τα συστατικά στοιχεία δύο στυλ μάθησης, εκείνων που μαθαίνουν εξαρτώμενα από το περιβάλλον τους και εκείνων που μαθαίνουν ανεξάρτητα. Στη συνέχεια, εξηγείται η μέθοδος σχεδιασμού δραστηριοτήτων βασισμένη στη διαφοροποιημένη διδασκαλία ώστε η μαθησιακή διαδικασία να είναι αποτελεσματική.

Λέξεις-κλειδιά: Μαθητευόμενοι Ανεξάρτητοι από το Πεδίο, Μαθητευόμενοι Εξαρτημένοι από το Πεδίο, Γνωστικό Στυλ Μάθησης

Η ΑΞΙΟΠΟΙΗΣΗ ΤΟΥ ΔΙΑΔΙΚΤΥΟΥ ΣΤΗ ΓΛΩΣΣΙΚΗ ΔΙΔΑΣΚΑΛΙΑ ΣΤΗ Γ΄ΛΥΚΕΙΟΥ

ΠΕΡΙΛΗΨΗ

Η παρούσα εργασία παρουσιάζει μια διδακτική πρόταση που σχεδιάστηκε στο πλαίσιο του μαθήματος της γλωσσικής διδασκαλίας σε μαθητές της Γ Λυκείου με θέμα την Έμφυλη Βία και λαμβάνοντας υπόψη τις επιταγές του νέου Αναλυτικού προγράμματος για τη γλωσσική διδασκαλία στο Λύκειο. Το εγχείρημα βασίζεται στην αξιοποίηση των ΤΠΕ στη γλωσσική διδασκαλία και υλοποιείται μέσα από μια δομημένη στο πρότυπο που προτείνει ο Dodge (1995) ιστοεξερεύνηση. Σκοπός της ιστοεξερεύνησης είναι να εκτεθούν οι μαθητές σε αυθεντικό γλωσσικό υλικό και να επεξεργαστούν συνεργατικά και δημιουργικά ένα θέμα που τους είναι οικείο και εγείρει το ενδιαφέρον τους. Πιο συγκεκριμένα σε πρώτο στάδιο παρουσιάζεται μια θεωρητική εισαγωγή για την αξιοποίηση του διαδικτύου στο μάθημα, έπεται μια σύντομη διευκρίνιση του όρου «ιστοεξερεύνση». Σε τρίτο στάδιο παρουσιάζονται τα έξι στάδια της συγκεκριμένης διδακτικής πρότασης.

Stockholm University
Stockholm, Sweden
email: kalligeli01@gmail.com

ΠΕΡΙΛΗΨΗ

Η παρούσα εργασία πραγματεύεται την αρχιτεκτονική σχεδίαση και ανάπτυξη ενός λογισμικού μεταγραφής και εκμάθησης του κώδικα Braille, με στόχο την ενίσχυση της προσβασιμότητας για άτομα με αναπηρία όρασης. Το λογισμικό υποστηρίζει τη μεταγραφή ελληνικών και αγγλικών κειμένων σε Braille και ταυτόχρονα προσφέρει ένα εύχρηστο περιβάλλον εκμάθησης του κώδικα. Η μεθοδολογία βασίζεται στην Επίπεδη Αρχιτεκτονική, η οποία περιλαμβάνει: (α) το Επίπεδο Χρήστη, όπου ο χρήστης εισάγει το κείμενο, (β) το Επίπεδο Λογικής Επιχειρήσεων, όπου υλοποιούνται οι αλγόριθμοι αναγνώρισης γλώσσας και μεταγραφής, (γ) το Επίπεδο Δεδομένων, με τη χρήση πινάκων αντιστοίχισης χαρακτήρων. Κύρια ευρήματα της εργασίας αποτελούν η ανάπτυξη ενός ακριβούς και αποδοτικού εργαλείου μεταγραφής, η φιλικότητα της διεπαφής προς τους χρήστες, καθώς και η δυνατότητα μελλοντικής επεκτασιμότητας. Το τελικό προϊόν συμβάλλει ουσιαστικά στην εκπαιδευτική και κοινωνική ένταξη ατόμων με προβλήματα όρασης, προσφέροντας ένα σύγχρονο εργαλείο καθημερινής χρήσης.

Οι αλγόριθμοι εκμάθησης και μεταγραφής περιλαμβάνουν έλεγχο εγκυρότητας χαρακτήρων, αναγνώριση γλώσσας, διαχείριση ειδικών συμβόλων, και ακριβή αντιστοίχιση σε Braille. Η διεπαφή είναι σχεδιασμένη με βάση τις αρχές προσβασιμότητας και καθολικής σχεδίασης για απρόσκοπτη χρήση από άτομα με οπτική αναπηρία.

Η αξιολόγηση του συστήματος κατέδειξε υψηλή ακρίβεια μεταγραφής, γρήγορη απόκριση και θετικά σχόλια από χρήστες και εκπαιδευτικούς, ενώ προτείνονται μελλοντικές επεκτάσεις όπως η υποστήριξη μαθηματικού Braille, η ενσωμάτωση φωνητικής εξόδου και διασύνδεση με συσκευές Braille display.

Η εργασία συμβάλλει σημαντικά στην προώθηση της εκπαιδευτικής ισότητας και της κοινωνικής ένταξης μέσω καινοτόμων τεχνολογιών προσβασιμότητας.

Λέξεις – κλειδιά: Αρχιτεκτονική Λογισμικού, Κώδικας Braille, Προσβασιμότητα, Μεταγραφή Κειμένου, Εκμάθηση Υποβοηθούμενη από Υπολογιστή, Επίπεδη Αρχιτεκτονική.

"INTERNATIONAL JOINT CLASSES": ΈΝΑ ΠΑΡΑΔΕΙΓΜΑ ΑΞΙΟΠΟΙΗΣΗΣ ΨΗΦΙΑΚΩΝ ΤΕΧΝΟΛΟΓΙΩΝ ΣΕ ΔΙΕΘΝΕΣ ΠΡΟΓΡΑΜΜΑ ΣΧΟΛΕΙΩΝ

Αντωνίου Αικατερίνη
Εκπαιδευτικός Νοσηλευτικής και Γεωπονίας και Διευθύντρια Γυμνασίου Νεοχωρίου

e-mail: elgriva@yahoo.gr

ΠΕΡΙΛΗΨΗ

Μια καλή πρακτική αξιοποίησης ψηφιακών τεχνολογιών θα παρουσιάσουμε μέσα από τη παρούσα εργασία, όπως αυτή υλοποιήθηκε στο πλαίσιο του προγράμματος με τίτλο "International Joint Classes" που διοργάνωσε το Μητροπολιτικό Γραφείο Εκπαίδευσης της Δημοκρατίας της Κορέας αξιοποιώντας τις τεχνολογίες επικοινωνίας και της εξ' αποστάσεως εκπαίδευσης με στόχο την καλύτερη κατανόηση της πολιτιστικής διαφορετικότητας και την ανάπτυξη δεξιοτήτων επικοινωνίας. Το διακρατικό, διασχολικό και συνεργατικό έργο μεταξύ τριών σχολείων (του Ημερήσιου Γυμνασίου και ΓΕΛ Νεοχωρίου Άρτας από Ελλάδα και του Yang Chung Middle School στη Σεούλ από Νότια Κορέα) ήταν μια πρωτοβουλία του πρώτου σχολείου και είχε διάρκεια από Μάιο έως Δεκέμβριο 2024. Το θέμα των εργασιών ορίστηκε «Ο Β΄ Παγκόσμιος Πόλεμος και οι επιπτώσεις του στους δύο λαούς». Υλοποιήθηκαν εξ αποστάσεως σύγχρονες διαδικτυακές συναντήσεις αλλά και ασύγχρονες εξ αποστάσεως διδακτικές ώρες αξιοποίησης του παραγόμενου υλικού.

Στο πρώτο μέρος της εργασίας παρουσιάζεται η σημασία των σύγχρονων ψηφιακών εργαλείων στην εκπαίδευση και στη διδασκαλία. Η ραγδαία ανάπτυξη των ψηφιακών και τεχνολογικών μέσων έχει επιφέρει σημαντικές αλλαγές στη μαθησιακή διαδικασία, δημιουργώντας νέες ευκαιρίες και προκλήσεις για την εκπαιδευτική κοινότητα. Ως εκ τούτου κρίνεται απαραίτητη η αξιοποίηση και η αξιολόγηση αυτών των μέσων στη σύγχρονη εκπαιδευτική πραγματικότητα, εξετάζοντας τη δυναμική και τη συμβολή των ψηφιακών εργαλείων στη βελτίωση της διδακτικής πρακτικής. Στο δεύτερο μέρος της εργασίας θα παρουσιάσουμε τις εργασίες του σχολείου μας και τα ψηφιακά εργαλεία που χρησιμοποιήθηκαν στο πλαίσιο του παραπάνω προγράμματος. Με τη βοήθεια των εργαλείων αυτών δημιουργήθηκε μια δυναμική διαδικτυακή κοινότητα μάθησης, συνεργασίας και αλληλεπίδρασης με ανταλλαγή πληροφοριών, ιστορικών πηγών και απόψεων για τα γεγονότα του Β' Παγκόσμιου Πολέμου. Να σημειωθεί ότι η γλώσσα όλων των εργασιών είναι τα αγγλικά. Τα βασικά ψηφιακά εργαλεία που αξιοποιήθηκαν ενισχύοντας έτσι τη διαδραστικότητα και την πολυτροπική προσέγγιση της μάθησης είναι:

- Padlet. Μια εύχρηστη διαδραστική πλατφόρμα συνεργατικής μάθησης. Πρόκειται για έναν διαδικτυακό εικονικό τοίχο, έναν πίνακα καρφιτσών στον οποίο μπορεί να αναρτηθεί το περιεχόμενο, τα πολυμέσα (έγγραφα, εικόνες, βίντεο, ηχητικά, κτλ) με πρόσβαση των μελών ανά πάσα στιγμή. Επιλέχθηκε ως κοινή πλατφόρμα ανάρτησης των ομαδικών εργασιών των μαθητών/μαθητριών από τα τρία σχολεία.
- Veed. Ένα απλό πρόγραμμα επεξεργασίας βίντεο. Επιλέχθηκε από την ομάδα εργασία για να μετατρέψουν ένα αρχείο ppt σε βίντεο με θέμα την παρουσίαση των μελών της ομάδας και του τόπου τους.
- Canva. Μια πλατφόρμα σχεδίασης που μας επιτρέπει να δημιουργήσουμε ένα ευρύ φάσμα διαδραστικών υλικών πολυμέσων, όπως γραφήματα, αφίσες, παρουσιάσεις, φύλλα εργασίας, κόμικς κ.ά. Αυτό το εργαλείο προτιμήθηκε από την ομάδα εργασίας για τη δημιουργία μιας αφίσας (poster) με θέμα τη σφαγή στο Κομμένο Άρτας το 1943.
- Prezi. Ένα λογισμικό πολυμέσων για ελκυστικές παρουσιάσεις. Είναι μια φιλική εφαρμογή που δεν απαιτεί προηγούμενη εμπειρία σχεδιασμού ή προγραμματισμού. Επιλέχθηκε από την ομάδα εργασίας για μια παρουσίαση με θέμα τις κύριες ημερομηνίες και σημαντικά γεγονότα του Β΄ Παγκόσμιου πολέμου στην Ελλάδα. Με το ίδιο θέμα ασχολήθηκε και μια δεύτερη ομάδα εργασίας, η οποία επέλεξε τη δημιουργία ιστοριογραμμής με το εργαλείο Preceden.
- Vocaroo. Μια πολύ εύκολη εφαρμογή εγγραφής ήχου με παραγόμενα mp3 αρχεία. Το εργαλείο επιλέχθηκε από την μαθητική ομάδα για την ηχογράφηση βασικών λέξεων σχετικών με τον Β΄ Παγκόσμιο πόλεμο.

Στο τρίτο μέρος παρουσιάζονται τα συμπεράσματα και η αξιολόγηση της εμπειρίας αυτής, η οποία ανέδειξε τη θετική συμβολή των ψηφιακών εργαλείων στη βελτίωση της κριτικής σκέψης, της συνεργασίας και της κατανόησης ιστορικών γεγονότων από διαφορετικές πολιτισμικές οπτικές γωνίες.

Λέξεις – κλειδιά: διεθνές πρόγραμμα, Β΄ Παγκόσμιος Πόλεμος, ψηφιακά εργαλεία.

ΑΠΟΦΑΣΙΖΩ ΒΑΣΗ ΔΕΔΟΜΕΝΩΝ: ΈΝΑ ΚΑΙΝΟΤΟΜΟ ΔΙΔΑΚΤΙΚΟ ΣΕΝΑΡΙΟ ΜΕ ΤΗ ΜΕΘΟΔΟ PROJECT ΣΕ ΣΧΟΛΕΙΟ ΔΕΥΤΕΡΗΣ ΕΥΚΑΙΡΙΑΣ

ΠΕΡΙΛΗΨΗ

Τα Σχολεία Δεύτερης Ευκαιρίας (ΣΔΕ) αποτελούν ένα σημαντικό θεσμό που απευθύνεται σε ενήλικες, που για διάφορους λόγους, δεν ολοκλήρωσαν τη βασική τους εκπαίδευση, προσφέροντάς τους μια νέα δυνατότητα εκπαίδευσης. Στόχος τους είναι η ανάπτυξη γνώσεων και δεξιοτήτων που θα επιτρέψουν στους μαθητές τους να ενταχθούν αποτελεσματικά στην αγορά εργασίας και στην κοινωνία. Στο πλαίσιο αυτό, σχεδιάστηκε και υλοποιείται ένα εκπαιδευτικό project που στοχεύει στην κατανόηση της σημασίας των δεδομένων και στη χρήση τους στη διαδικασία λήψης αποφάσεων, το οποίο αξιοποιεί τη μέθοδο Project-Based Learning (PBL), ενισχύοντας έτσι τη βιωματική μάθηση, την κριτική σκέψη και την ενεργή συμμετοχή των εκπαιδευομένων.

Οι μαθητές, εργάζονται πάνω σε ένα σύγχρονο και πρακτικό ζήτημα: πώς μπορούν να λαμβάνουν τεκμηριωμένες αποφάσεις βασισμένες σε δεδομένα και όχι σε υποκειμενικές εκτιμήσεις ή παραπλανητικές πληροφορίες. Στη σημερινή εποχή, όπου η πληροφορία είναι άφθονη αλλά συχνά αναξιόπιστη, η ικανότητα ανάλυσης και ερμηνείας δεδομένων είναι κρίσιμη. Οι συμμετέχοντες μαθαίνουν να χρησιμοποιούν εργαλεία όπως η αναζήτηση στατιστικών στο διαδίκτυο, το brainstorming, το ChatGPT, το Excel ,τη SWOT analysis, την περιγραφική στατιστική, τα control charts, προκειμένου να επεξεργάζονται και να αξιολογούν πληροφορίες από διαφορετικές πηγές. Η εκπαιδευτική διαδικασία ξεκινά με την κατανόηση της σημασίας των δεδομένων και της επιστημονικής προσέγγισης στη αναζήτηση της αλήθειας και στη λήψη αποφάσεων. Αρχικά και σε συνέχεια των μαθημάτων από τους γραμματισμούς των Μαθηματικών, της Πληροφορικής και των Κοινωνικών Επιστημών, εκπαιδεύονται στη χρήση βασικών στατιστικών μεθόδων και πρακτικών αναλύσεων που μπορούν να εφαρμόσουν σε καθημερινές καταστάσεις, στη συνέχεια, επιλέγουν ένα θέμα που τους ενδιαφέρει, συλλέγουν δεδομένα, τα οργανώνουν και τα επεξεργάζονται με τα διαθέσιμα εργαλεία. Μέσα από αυτή τη διαδικασία, μαθαίνουν να διακρίνουν αξιόπιστες από αναξιόπιστες πηγές, να εντοπίζουν μοτίβα και τάσεις στα δεδομένα και να βγάζουν συμπεράσματα βασισμένα σε αντικειμενικά στοιχεία.

Η συμμετοχή σε αυτό το project ενισχύει σημαντικά την αυτοπεποίθηση των μαθητών, καθώς τους επιτρέπει να δουν στην πράξη τη χρησιμότητα της ανάλυσης δεδομένων και της μεθοδικής προσέγγισης στη λήψη αποφάσεων. Επιπλέον, μέσα από τη συνεργασία και τη συζήτηση, αναπτύσσουν δεξιότητες ομαδικής εργασίας, επιχειρηματολογίας και αναστοχασμού. Αυτή η διδακτική προσέγγιση ξεπερνά τα στενά όρια της τάξης, δίνει στους μαθητές τα εφόδια να γίνουν πιο ενεργοί και ενημερωμένοι πολίτες. Τα πρώτα αποτελέσματα της υλοποίησης, δείχνουν έντονο ενδιαφέρον από τους μαθητές, οι οποίοι αντιλαμβάνονται την αξία της τεκμηριωμένης σκέψης τόσο στην επαγγελματική όσο και στην προσωπική τους ζωή και θα μπορούσε να αποτελέσει ένα μοντέλο εκπαιδευτικής πρακτικής που ενισχύει την κριτική σκέψη και τη λήψη αποφάσεων με επιστημονικά τεκμηριωμένο τρόπο, προσφέροντας μια ουσιαστική μαθησιακή εμπειρία προσαρμοσμένη στις ανάγκες των εκπαιδευομένων των ΣΔΕ.

Λέξεις – κλειδιά: Σχολεία Δεύτερης Ευκαιρίας, Λήψη Αποφάσεων, Σενάριο μαθήματος, project, Data.

ΠΕΡΙΛΗΨΗ

Τη σχολική χρονιά 2024-25 υλοποιήθηκε ένα πρόγραμμα σχετικό με το δάσος στο οποίο συμπεριλήφθηκαν και τα ψηφιακά μέσα των νέων τεχνολογιών τόσο κατά τον διδακτικό σχεδιασμό όσο και κατά την υλοποίησή του. Σκοπός ήταν τα παιδιά με βιωματικές δραστηριότητες να ανακαλύψουν τη γνώση και να ενδιαφερθούν για το δάσος ως οικοσύστημα αλλά και ως αισθητηριακή απόλαυση της φύσης, να ενισχυθεί η περιβαλλοντική τους συνείδηση και η ιδιότητα του ενεργού πολίτη. Χρησιμοποιήθηκαν διαδραστικά και ψηφιακά μέσα, αναδεικνύοντας τη δυναμική σχέση των ψηφιακών τεχνολογιών παιδαγωγικής και εκπαίδευσης. Η μεθοδολογία που ακολουθήθηκε βασίστηκε σε μια παιδοκεντρική, διερευνητική προσέγγιση, συνδυάζοντας τη διερευνητική και συνεργατική μάθηση.

Λέξεις – κλειδιά: δάσος, ενεργός πολίτης, ψηφιακές τεχνολογίες

ΠΕΡΙΛΗΨΗ

Η παρούσα μελέτη διερευνά τη συστηματική ενσωμάτωση της Τεχνητής Νοημοσύνης (AI) στη διδασκαλία της Α΄ Λυκείου, εστιάζοντας στη διδακτική προσέγγιση θεμάτων σχετικών με την τηλεργασία και την επικοινωνία από απόσταση. Σκοπός της εργασίας είναι να αναδείξει πώς τα εργαλεία AI μπορούν να υποστηρίξουν την απόκτηση βασικών δεξιοτήτων εξ αποστάσεως συνεργασίας, ενισχύοντας παράλληλα την αυτονομία και τη δημιουργικότητα των μαθητών. Η ερευνητική παρέμβαση βασίστηκε σε ένα σύγχρονο εκπαιδευτικό σενάριο εκμάθησης μέσω εργασιών, ενσωματώνοντας εφαρμογές όπως το ChatGPT, συστήματα δημιουργίας αυτόματων παρουσιάσεων και πλατφόρμες συνεργατικής οργάνωσης του έργου. Παρουσιάζεται η μεθοδολογική προσέγγιση, το παιδαγωγικό πλαίσιο και τα εργαλεία τα οποία αξιοποιήθηκαν, με έμφαση στην πρακτική εφαρμογή της τηλεργασίας σε σχολικό περιβάλλον. Τα αποτελέσματα αναδεικνύουν τη σημασία της Τεχνητής Νοημοσύνης (AI) ως εργαλείου διαφοροποίησης της διδασκαλίας, υποστήριξης των μεταγνωστικών δεξιοτήτων και ενίσχυσης της συνεργασίας και της συμμετοχής των μαθητών. Η Τεχνητή Νοημοσύνη (AI) συνέβαλε στην εξατομίκευση της διδασκαλίας, στη βελτίωση της επικοινωνιακής ικανότητας και στην προώθηση της επαγγελματικής ετοιμότητας. Η εργασία προτείνει προοπτικές μελλοντικής αξιοποίησης της Τεχνητής Νοημοσύνης (AI) για τη διδασκαλία σύνθετων δεξιοτήτων, τονίζοντας τη σημασία της ανάπτυξης των παιδαγωγικών πλαισίων και των δεοντολογικών κατευθύνσεων για τη βιώσιμη ενσωμάτωσή της στην εκπαιδευτική πράξη.

Λέξεις-κλειδιά: Τεχνητή Νοημοσύνη, Τηλεργασία, Συνεργατική Μάθηση, Ψηφιακά Εργαλεία, Εκπαιδευτική Καινοτομία

ΠΕΡΙΛΗΨΗ

Η μετατροπή του μετωπικού συστήματος (στο οποίο τα θρανία είναι το ένα πίσω από το άλλο, απέναντι από την έδρα του δάσκαλου) σε μάθημα με τα παιδιά σε υποομάδες, δεν δίνει, στην τάξη, την (χωρίς ανταγωνισμούς, μεταξύ των παιδιών, λόγω σύσφιγξης των διατομικών σχέσεων, μέσα στην υποομάδα, για αντιμετώπιση των άλλων υποομάδων) μαθητοκεντρικότητα, που επιζητούμε, καθώς οι υποομάδες λειτουργούν, έτσι κι αλλιώς, ανταγωνιστικά, η μία προς την άλλη. Σκοπός της πρακτικής ήταν η μαθητοκεντρικότητα της τάξης ως ενός όλου, με τα θρανία σε κύκλο και (λόγω κατάργησης της έδρας) με τον δάσκαλο (από κυρίαρχος της τάξης, από την έδρα του, που ήταν), τώρα, απλά, συντονιστή του μαθήματος, που θα διεξάγεται (λόγω μετριασμού της σύσφιγξης των σχέσεων των παιδιών, που εντεινόταν, για αντιμετώπιση των παιδιών των άλλων υποομάδων, που δεν θα υπάρχουν, πια) μη ανταγωνιστικά, αλλά συναγωνιστικά, μεταξύ τους, από τα ίδια τα παιδιά. Η (εντελώς προσωπική του εμπνευστή της) πρακτική εφαρμοζόταν σε σχολικές μονάδες, δευτεροβάθμιας, κυρίως, τυπικής και άτυπης, εκπαίδευσης, από το 1979 (έτος διορισμού του ως εκπαιδευτικού) έως το 2013 (έτος αφυπηρέτησής του). Η (ως εντελώς, προσωπικής πρακτικής, προσωπική) μεθοδολογία της βασίζεται στην μετατροπή της μετωπικής, προς τον δάσκαλο, θρανιοτοποθέτησης σε κυκλική, καταργούμενης της έδρας του δασκάλου, κάνοντας τις παράλληλες, ατομικές, μονοδρομικές, από και προς τον δάσκαλο, δράσεις των μαθητών του μετωπικού συστήματος ομαδική δράση, στην οποία, τώρα, θα μπορούν, εκ των πραγμάτων, να έχουν, όλοι την ίδια ευκαιρία να είναι συνδημιουργοί του κοινού έργου της τάξης. Αρχικά, σχεδιάζεται, φανερό, κοινωνιόγραμμα, για τις σχέσεις των παιδιών, στο τμήμα, από τα παιδιά ή και τον δάσκαλο, προς όποια χρήση, από τα παιδιά και τον δάσκαλο, και ακολουθεί συζήτηση, για το καταστατικό λειτουργίας της τάξης, σύνταξη και υπογραφή του. Η συνεδρίαση διεξαγωγής του μαθήματος των παιδιών γίνεται ως εξής. Από την προηγουμένη, τα παιδιά ενημερώνονται, για το μάθημα της ημέρας, για να το επεξεργαστούν. Ύστερα από βραχύτατη αφορμησιακή εισήγηση του δασκάλου, η τάξη, δυνάμει, γίνεται, εν κύκλω, ένα απέραντο εργαστήριο. Το κάθε παιδί, έχοντας, πλήρη, εικόνα της δράσης των άλλων, μπορεί να είναι ρυθμιστής του αποτελέσματος. Το μάθημα είναι μια ενιαία (όχι ως μέρη εξέτασης και παράδοσης) πλατφόρμα συζήτησης. Ο δάσκαλος δεν έχει μόνιμη έδρα, αλλά περιφέρεται, όπου χρειάζεται, για τον καλύτερο συντονισμό του μαθήματος. Στην κυκλική τοποθέτηση των θρανίων, έχει καταργηθεί και ο πίνακας. Στην περίοδο εφαρμογής της πρακτικής, αυτός είχε αντικατασταθεί με χαρτόνια, προς επίδειξη, στους άλλους, του τι γραφόταν, σ' αυτό. Τώρα, όμως, υπερπηδάται το τελευταίο πρόβλημα, που αντιμετώπιζε η πρακτική, με την αντικατάστασή του από τόσες οθόνες υπολογιστών, για κάθε παιδί. Το κάθε παιδί θα μπορεί να γράψει ή να ζωγραφίσει ή να σχηματίσει ή ό,τι άλλο, στον υπολογιστή του, και αυτό να το βλέπουν όλα τα άλλα παιδιά, τα οποία, μάλιστα, θα μπορούν και να συμμετέχουν, σε ό,τι έκανε το παιδί αυτό, διαδραστικά, για το όποιο, κοινό, αποτέλεσμα. Το παραγόμενο προϊόν αποτυπώνεται σε (κοινόχρηστα, διαγωνισμικού τύπου, εξελισσόμενα) «βιβλία», από τα παιδιά, για κάθε μάθημα, για όλα τα ενδιαφέροντα, ως «Ελεύθερη Προαιρετική Εργασία, για το σπίτι». Καθότι τα παιδιά είναι, ως συνδημιουργοί, οι δημιουργοί του μαθήματος, αυτά είναι και που προβαίνουν στην αξιολόγησή του. Τα δελτία αξιολόγησης συλλέγονται, τέλος κάθε

εβδομάδας, μήνα, τριμήνου, τετραμήνου, εξαμήνου, έτους, για εξαγωγή του μέσου όρου βαθμολογίας, από το τμήμα, για κάθε παιδί, με τον δάσκαλο να έχει, με σύμβουλο το κοινωνιόγραμμα, την όποια (αν θα) του δίνεται δυνατότητα τροποποιητικής (στον μέσο όρο της αυτοδιασταυρωτικής, αυτής, αξιολόγησης) παρέμβασης. Τα θετικά αποτελέσματα αποτυπώνονται στην επιστημονική εξέλιξη των παιδιών, η οποία (θετικά σχόλια και τρίτων, κατατεθειμένα, στο «Αρχείο Μαθητικής Δημιουργίας» του Οργανισμού) οφειλόταν (και) στην πρακτική, αυτή. Όμως, λόγω της κόπωσης, που συνεπάγεται, για τον δάσκαλο, αν και θετικότατης αποδοχής, δεν είχε, δυστυχώς, απήχηση.

Λέξεις – κλειδιά: μάθημα χωρίς δάσκαλο, αυτορρύθμιση τάξης, αυτομάθημα, κυκλική θρανιοτοποθέτηση, συνεδριακό μάθημα, διασταυρωτική αυτοαξιολόγηση

ΛΑΝΘΑΣΜΕΝΗ ΕΡΜΗΝΕΙΑ ΜΗΝΥΜΑΤΟΣ, ΛΟΓΩ ΕΓΚΕΦΑΛΙΚΗΣ ΣΥΓΧΥΣΗΣ, ΑΠΟ ΚΑΤΑΙΓΙΣΤΙΚΗ ΠΡΟΒΟΛΗ ΕΙΚΟΝΩΝ, ΣΤΗΝ ΟΘΟΝΗ ΤΟΥ ΥΠΟΛΟΓΙΣΤΗ

ΠΕΡΙΛΗΨΗ

Η εικόνα περιέχει πλήθος πληροφοριών, οι οποίες προσλαμβάνονται ως όλον, η συμπλοκότητα των σχέσεων των μερών του οποίου δυσκολεύει, με την πολυπλοκότητά του, τα μάλιστα, την ερμηνεία του. Η δυσκολία αυτή είναι μεγαλύτερη, στην περίπτωση ανάγκης να δοθεί, εσπευσμένα, μια απάντηση, σε αυτό. Η εργασία αυτή είχε σκοπό να μελετήσει την ικανότητα αναγνώρισης των συναισθηματικών εκφράσεων του προσώπου, σε καταιγιστική προβολή τους, στην οθόνη υπολογιστή, στο πλαίσιο μαθήματος, πράγμα που οφείλεται να το γνωρίζει ο δάσκαλος. Στην έρευνα την οποία παρουσιάζουμε στην εργασία αυτή συμμετείχαν (61 άντρες και 104 γυναίκες=) 165, υποκείμενα, οι οποίοι ζουν στην Ελλάδα, 25-55 χρονών, μέσου μορφωτικού επιπέδου. Χρησιμοποιήθηκε η σειρά των Ekman και Friesen 65 διαφανειών προσώπων με ένα (από ολόκληρο ή μέρος του προσώπου) ή περισσότερα συναισθήματα (F.A.S.T., 1971). Τα υποκείμενα έπρεπε, σε μια πρώτη προβολή τους, να αναγνωρίσουν ένα (οπωσδήποτε, και μόνο ένα) από τα επτά, παγκόσμια αναγνωρισμένα, συναισθήματα (ευτυχία, λύπη, φόβος, θυμός, έκπληξη, αηδία, περιφρόνηση) και, σε μια δεύτερη φάση, με την ίδια σειρά προβολής, να αποδώσουν ένα (οπωσδήποτε, και μόνο ένα) βαθμό, από το 0 (απουσία συναισθήματος) μέχρι το 8 (έντονη παρουσία συναισθήματος), στο καθένα, από τα συναισθήματα, αυτά, σε προκατασκευασμένα φύλλα απαντήσεων, και τις δύο φορές. Ο χρόνος προβολής κάθε διαφάνειας ήταν, προοδευτικά, 10΄΄-5΄΄ και 25΄΄-10΄΄ και ο ενδιάμεσος χρόνος, για την σημείωση των απαντήσεων, ήταν 5΄΄ και 10΄΄, αντίστοιχα, για τις φάσεις αυτές. Τα δεδομένα περάστηκαν σε επτά, όσα και τα συναισθήματα, συγκεντρωτικούς, πίνακες, για κάθε φύλο. Από αυτούς, βγήκαν, για κάθε διαφάνεια, η εκατοστιαία αναλογία των προτιμήσεων συναισθηματικής σημασιοδότησης και ο μέσος όρος της έντασης, που αποδόθηκε, σε αυτές, από το σύνολο των υποκειμένων. Ύστερα, με βάση τις διαφάνειες που συγκεντρώνουν το 20% και πλέον της αποδοχής των υποκειμένων των δύο ομάδων (άνδρες - γυναίκες), για την συγκεκριμένη τους, συναισθηματική, σημασιοδότηση, κατασκευάσθηκε λεξικό συναισθηματικής σημασιοδότησης, που αποδόθηκε, από κάθε ομάδα, για κάθε ομάδα. Σ' αυτό, φαίνονται οι συγκρίσιμες περιπτώσεις, ενδοομαδικά, και διαομαδικά. Η στατιστική ανάλυση (χ^2, για την ένταση, και t test, για την συχνότητα) αφορά στον έλεγχο: α) της έντασης, με βάση την βαθμολογία, που αποδόθηκε, από τα υποκείμενα, σε κάθε συναίσθημα, β) της συχνότητας της αναγνώρισης των συναισθημάτων, και, σε σύγκριση με τα διεθνή standards, γ) της έντασης των συναισθημάτων που αναγνωρίσθηκαν αληθώς, δ) της συχνότητας των συναισθημάτων που αναγνωρίσθηκαν αληθώς. Τα αποτελέσματα δείχνουν τα εξής: Η αναγνωριστική των συναισθημάτων ικανότητα είναι, γενικά, καλή, σε βαθμό συγκρίσιμο, ενδοομαδικά και διομαδικά, επιδεινούμενη, παρά την προοδευτική ευχέρεια αληθούς αναγνώρισης, που προέρχεται από την εξάσκηση, όσο μικραίνει ο χρόνος προβολής και λιγοστεύει ο διαθέσιμος χρόνος της αναγνώρισης αυτής. Οι άνθρωποι, γενικά, δεν βλέπουν πολύ διαφορετικά συναισθήματα, στο πρόσωπο, ακόμα και όταν πρόκειται για διαφορετικό φύλο. Χωρίς το άγχος της γρήγορης διαδικασίας, κάνουμε τις περισσότερες αναγνωρίσεις και αληθείς

αναγνωρίσεις συναισθημάτων, ενώ, με αυτό, η βαθμολογία, που δίνουμε, στα συναισθήματα, που αναγνωρίζουμε, είναι, συνήθως, πιο υψηλή, από την βαθμολογία, που δίνουμε, χωρίς αυτό. Η διαφορά, με τις γυναίκες να υπερέχουν, στην αναγνώριση και στην αληθή αναγνώριση συναισθημάτων, από τους άνδρες, χωρίς αυτό το άγχος, με αυτό, φαίνεται να μην υπάρχει, ουσιωδώς. Στην περίπτωση της γρήγορης διαδικασίας, με το άγχος, που υφέρπει, σε αυτή, στις μονοσήμαντες εκφράσεις, τα καταφέρνουμε καλύτερα, απ' ό,τι στις πολυσήμαντες, όπως, βέβαια, και στην αργότερη διαδικασία, χωρίς το άγχος αυτό. Γενικά, η ικανότητα αναγνώρισης συναισθημάτων είναι καλύτερη, χωρίς το άγχος της γρήγορης διαδικασίας, και, ειδικά, στις γυναίκες. Με το άγχος σπουδής, να προσλάβουμε, να διευθετήσουμε και να ερμηνεύσουμε, μέσα σε ελάχιστο, διαθέσιμο, χρόνο, ένα μεγάλο όγκο πληροφοριών, ο εγκέφαλός μας πέφτει σε σύγχυση, πράγμα, που μας δυσκολεύει στην αναγνώριση του μηνύματος, που μας εκπέμπεται, συνεπαγόμενης, πόσο, μάλλον, αν πρόκειται, όχι για στατικές, αλλά εικόνες σε κίνηση, λάθος εκτιμήσεις.

Λέξεις – κλειδιά: πληροφοριακή κόπωση, εγκεφαλική σύγχυση, ακριβής αναγνώριση μηνύματος

ΚΑΙΝΟΤΟΜΕΣ ΔΙΔΑΚΤΙΚΕΣ ΠΡΟΣΕΓΓΙΣΕΙΣ: ΕΝΙΣΧΥΣΗ ΤΗΣ ΑΥΤΟΔΥΝΑΜΗΣ ΜΑΘΗΣΗΣ ΜΕΣΩ ΤΕΧΝΗΤΗΣ ΝΟΗΜΟΣΥΝΗΣ ΚΑΙ ΜΟΥΣΙΚΗΣ

ΠΕΡΙΛΗΨΗ

Η εμπειρία της διδασκαλίας στη βασικών εννοιών Ηλεκτροτεχνίας σε μαθητές/τριές Λυκείου ανέδειξε τις σημαντικές δυσκολίες που αντιμετωπίζουν στην κατανόηση των εννοιών του ηλεκτρισμού. Πολλοί/ές παρουσιάζουν κενά σε προαπαιτούμενες γνώσεις, δεν είναι εξοικειωμένοι/ες με τη μεθοδολογία της Φυσικής και δυσκολεύονται να αναπτύξουν δεξιότητες αυτοδύναμης μάθησης μέσω της μελέτης βιβλίων. Παράλληλα, η χρήση του κινητού τηλεφώνου για κοινωνικά δίκτυα, μουσική και παιχνίδια αποσπά την προσοχή τους από τη μαθησιακή διαδικασία. Αυτές οι παρατηρήσεις ανέδειξαν την ανάγκη για μια εναλλακτική διδακτική προσέγγιση που να συνδυάζει την ψηφιακή τεχνολογία και τις προτιμήσεις των μαθητών/τριών με τη μαθησιακή διαδικασία.

Λαμβάνοντας υπόψη τα παραπάνω, αναπτύχθηκε και εφαρμόστηκε ένα διδακτικό σενάριο που αξιοποιεί σύγχρονα εργαλεία τεχνητής νοημοσύνης και μουσικής. Ο κύριος στόχος του σεναρίου είναι να ενθαρρύνει τους μαθητές/τριές να μελετήσουν το βιβλίο, να εξοικειωθούν με τους νόμους και τις θεωρίες του φαινομένου που μελετούν, ώστε να τεθούν οι βάσεις για να αποκτήσουν την ικανότητα να τα κατανοούν αυτοτελώς, χωρίς τη χρήση βοηθητικών μεθόδων. Η προσέγγιση δεν εστιάζει αποκλειστικά στην κατανόηση των φυσικών φαινομένων, αλλά κυρίως στην ανάπτυξη της αυτονομίας στη μελέτη και στην ικανότητα των μαθητών να αναζητούν και να ερμηνεύουν τις πληροφορίες μέσα από το σχολικό βιβλίο.

Η διδακτική μεθοδολογία στηρίχθηκε στη θεωρία του Lev Vygotsky, η οποία τονίζει τη σημασία της κοινωνικής αλληλεπίδρασης στη μάθηση. Για την υλοποίηση της, χρησιμοποιείται η εφαρμογή SUNO, και επικουρικά τα λογισμικά Audacity και Openshot.

Ο/Η εκπαιδευτικός (ή ομάδα εκπαιδευτικών) δημιουργούν ένα μουσικό κομμάτι, το οποίο περιλαμβάνει στίχους σχετικούς με τις φυσικές έννοιες και ήχους σύγχρονους και χωρίς να απαιτούνται μουσικές γνώσεις. Οι μαθητές/τριες ακούν το τραγούδι και παρακολουθούν το clip. Εντοπίζουν τις αντίστοιχες πληροφορίες στο σχολικό εγχειρίδιο και τις συνδέουν με την επιστημονική ορολογία. Παράλληλα, συμπληρώνουν εννοιολογικούς πίνακες, οι οποίοι λειτουργούν ως εργαλείο οργάνωσης της γνώσης. Εξέλιξη της προηγουμένης διαδικασίας είναι οι μαθητές/τριες να δημιουργήσουν το δικό τους μουσικό κομμάτι. Χωρίζονται σε ομάδες και αφού μελετήσουν από το βιβλίο τις θεωρητικές έννοιες του νέου κεφαλαίου, δημιουργούν τους δικούς τους στίχους και το δικό τους τραγούδι. Με τη δραστηριότητα αυτή, προσδοκάται να ενισχυθεί κυρίως η δεξιότητα να κατανοούν αυτοτελώς τις επιστημονικές έννοιες όπως αυτές δίνονται στο σχολικό βιβλίο και δευτερευόντως η δημιουργικότητα και η συνεργατικότητα.

Το εν λόγω σενάριο εφαρμόστηκε στη διδασκαλία των ενοτήτων του «Βασικές έννοιες του συνεχούς ρεύματος» αρχικά και του «Ηλεκτρομαγνητισμού» στη συνέχεια, σε μαθητές της Β΄ τάξης Λυκείου. Τα ευρήματα, που προέκυψαν από την εφαρμογή, υποδηλώνουν ότι η τεχνητή νοημοσύνη και η μουσική μπορούν να λειτουργήσουν ως κίνητρα μάθησης, αυξάνοντας τη συμμετοχή των μαθητών/τριών και ενισχύοντας τη μνημονική ανάκληση των φυσικών εννοιών.

Το παρόν υπογραμμίζει τη σημασία της αξιοποίησης καινοτόμων εργαλείων στη διδασκαλία των φυσικών επιστημών, και προτείνει τη διερεύνηση παρόμοιων προσεγγίσεων στο μέλλον. Είναι δυναμικό σενάριο και χωρίς ιδιαίτερες αποκλείσεις μπορεί να αξιοποιηθεί με ευκολία και για άλλα διδακτικά αντικείμενα. Επιπροσθέτως σε πιο μικρές ηλικίες παρέχεται η ευελιξία να ακολουθηθεί μια διαθεματική προσέγγιση με ειδικότητες, όπως Φιλόλογοι, Τεχνολόγοι, Πληροφορικοί και Μουσικοί. Η ενσωμάτωση πολυμεσικών τεχνολογιών και δημιουργικών δραστηριοτήτων μπορεί να αποτελέσει μια αποτελεσματική στρατηγική για την ενίσχυση της μαθησιακής εμπειρίας και της αυτονομίας των μαθητών/τριών στην εκπαιδευτική διαδικασία.

Λέξεις – κλειδιά: καινοτόμες διδακτικές προσεγγίσεις, τεχνητή νοημοσύνη, μουσική, εκπαιδευτικά εργαλεία, αυτοδύναμη μάθηση, μαθησιακή εμπειρία.

ΤΕΧΝΗ ΚΑΙ ΨΗΦΙΑΚΑ ΜΕΣΑ ΣΤΗΝ ΕΚΠΑΙΔΕΥΣΗ : ΜΕΛΕΤΗ ΠΕΡΙΠΤΩΣΗΣ ΣΤΟ ΕΣΠΕΡΙΝΟ ΕΠΑ.Λ. ΠΡΕΒΕΖΑΣ

ΠΕΡΙΛΗΨΗ

Η παρούσα μελέτη περίπτωσης πραγματοποιήθηκε στο πλαίσιο του μαθήματος Ερευνητική Εργασία του προγράμματος σπουδών της Α΄ τάξης του Εσπερινού ΕΠΑ.Λ. Πρέβεζας και πραγματεύεται τη χρήση της τέχνης σε συνδυασμό με ψηφιακά μέσα στην εκπαιδευτική διαδικασία μάθησης. Η ενασχόληση των μαθητών/τριών με την τέχνη ξεκίνησε με την ενημέρωση για ζωγράφους παγκοσμίου φήμης, χρησιμοποιώντας ψηφιακές παρουσιάσεις και βίντεο. Στη συνέχεια, οι μαθητές/τριες αποτύπωσαν τα χαρακτηριστικά έργα των καλλιτεχνών σε μορφή τοιχογραφιών σε μια αίθουσα διδασκαλίας με άδειους τοίχους, χωρίς καμία διακόσμηση. Για την αποτύπωση των έργων στους τοίχους χρησιμοποιήθηκε οθόνη προβολής, υπολογιστής και ψηφιακές εφαρμογές για την επεξεργασία εικόνων των έργων τέχνης. Για την υλοποίηση της δράσης απασχολήθηκαν κυρίως ενήλικοι μαθητές και μαθήτριες, οι οποίοι αποτελούν την πλειοψηφία των μαθητών του σχολείου.

Η αισθητική εμπειρία παρουσιάζει ιδιαίτερο ενδιαφέρον, εφόσον αποτελεί μια καινοτόμο μέθοδο στην εκπαιδευτική διαδικασία που μπορεί να συμβάλλει στη Μετασχηματίζουσα Μάθηση και εφαρμόζεται όχι μόνο στην εκπαίδευση ενηλίκων αλλά και σε όλες τις βαθμίδες της εκπαίδευσης τα τελευταία χρόνια. Η παρατήρηση ενός έργου τέχνης κατά τη διάρκεια μιας εκπαιδευτικής διαδικασίας προκαλεί ερεθίσματα και ενεργοποιεί τον κριτικό στοχασμό των εκπαιδευομένων. Για αυτό τον λόγο ο σκοπός αυτής της δράσης υπήρξε η αποτίμηση από την εφαρμογή της μεθόδου μάθησης μέσα από την τέχνη, η αισθητική διαμόρφωση μιας σχολικής αίθουσας με έργα τέχνης και η εξοικείωση με απλά ψηφιακά μέσα. Επιδιώκοντας την ανάδειξη ενός εναλλακτικού τρόπου διδασκαλίας σε ενήλικες μαθητές του Εσπερινού ΕΠΑ.Λ., επιχειρήθηκε η μελέτη της στάσης των μαθητών/τριών κατά τη διάρκεια υλοποίησης της δράσης και η εισφορά της χρήσης της τέχνης στην ενεργητική συμμετοχή, στην ενίσχυση του κριτικού στοχασμού και στην πιθανότητα επαναπροσδιορισμού στερεοτυπικών αντιλήψεων και παραδοχών.

Στόχος είναι η διερεύνηση του βαθμού στον οποίο οι εκπαιδευόμενοι αξιοποιούν όλες τους τις αισθήσεις, χρησιμοποιούν τη φαντασία τους, ανατρέχουν σε ήδη υπάρχουσες γνώσεις και εμπειρίες και αναπτύσσουν την ικανότητα να σκεφτούν κριτικά κατά τη διάρκεια της εκπαιδευτικής παρέμβασης με τη χρήση έργων τέχνης σε συνδυασμό με βασικά ψηφιακά μέσα.

Στη δράση συμμετείχαν 13 μαθητές ηλικίας από 18 έως 61 ετών και επιλέχθηκε ως μεθοδολογικό εργαλείο η παρατήρηση, μέσω της οποίας δίνεται η ευκαιρία συλλογής δεδομένων που απορρέουν κατά τη διάρκεια πραγματικών καταστάσεων μέσα από τα λεγόμενα των εκπαιδευομένων και αντλώντας περισσότερο προσωπικές πληροφορίες.

Η εφαρμογή της εκπαιδευτικής παρέμβασης συνετέλεσε τόσο στην εξοικείωση των εκπαιδευομένων με την τέχνη όσο και με τα ψηφιακά μέσα. Επιπλέον συνετέλεσε στη μεταξύ τους συνεργασία και στην ανταλλαγή προσωπικών εμπειριών. Κατάφεραν να επεξεργαστούν τις προηγούμενες αντιλήψεις τους, να σκεφτούν κριτικά πάνω σε αυτές και να αναθεωρήσουν σε κάποιες περιπτώσεις, αναπτύσσοντας στοχαστικό διάλογο. Η εμπλοκή των συναισθημάτων και η απελευθέρωση της σκέψης και της έκφρασης, οδήγησε σε αλλαγή στάσης απέναντι σε μια πρωτόγνωρη μαθησιακή εμπειρία που αντιμετωπίστηκε αρχικά με επιφύλαξη, αλλά στην πορεία με ευχαρίστηση και ενθουσιασμό. Η αποκόμιση θετικών εντυπώσεων και η απόκτηση νέων γνώσεων έδωσε κίνητρα για την ενασχόληση εκ νέου με την τέχνη, η οποία συντελεί στην ικανότητα αντίληψης πραγμάτων από διαφορετικές όψεις και στον πιθανό επαναπροσδιορισμό παραδοχών.

Λέξεις – κλειδιά: Εκπαίδευση Ενηλίκων, Μετασχηματίζουσα μάθηση, τέχνη, ψηφιακά μέσα, κριτικός στοχασμός.

ΨΗΦΙΑΚΑ ΕΡΓΑΛΕΙΑ ΓΙΑ ΑΞΙΟΠΟΙΗΣΗ ΣΤΗ ΔΙΔΑΚΤΙΚΗ ΠΡΑΞΗ

ΠΕΡΙΛΗΨΗ

Θέμα της εργασίας αυτής είναι η παρουσίαση πέντε καινοτόμων web 2.0 εργαλείων που διαθέτουν τα εξής χαρακτηριστικά: είναι πανεύκολα στη χρήση και δεν απαιτούν ειδικές ψηφιακές δεξιότητες, παρέχονται εντελώς δωρεάν ή διαθέτουν δωρεάν έκδοση με μεγάλο εύρος δυνατοτήτων για το χρήστη και εξάπτουν το ενδιαφέρον, πράγμα που τα καθιστά κατάλληλα για ενσωμάτωση στη μαθησιακή διαδικασία. Ως εκπαιδευτικοί που αγαπούν το λειτούργημά τους και που διαρκώς στοχεύουν στη βελτίωση της ποιότητας της διδασκαλίας τους και στον εμπλουτισμό της με νέα μέσα και σύγχρονες διδακτικές μεθόδους, αναζητούμε εύχρηστα εργαλεία ώστε να δημιουργούμε κουίζ, ασκήσεις, παρουσιάσεις, νέα κειμενικά είδη και γενικά διδακτικό υλικό για τη σχολική μας τάξη. Ως εκ τούτου παρακολουθούμε διάφορα σεμινάρια και επιμορφώσεις που άπτονται των εκπαιδευτικών θεμάτων. Ανάμεσά τους ξεχωρίζουμε τα σεμινάρια etwinning, όπου παρουσιάζονται μεταξύ άλλων σύγχρονα εργαλεία για να αξιοποιηθούν ποικιλοτρόπως στη μαθησιακή διαδικασία.

Έχουμε χρησιμοποιήσει αρκετά από αυτά στα μαθήματά μας και κάποια από αυτά τα έχουμε ξεχωρίσει ιδιαίτερα για τα χαρακτηριστικά τους αλλά και για την πολύπλευρη παιδαγωγική τους αξιοποίηση στη μαθησιακή διαδικασία. Πρόκειται για το EDpuzzle, το Book Creator, το Quizziz, το Wordwall και το Artsteps. Στην εργασία μας ασχολούμαστε ξεχωριστά με καθένα από τα εργαλεία και επεξηγούμε με παραδείγματα και εικόνες πόσο εύκολη είναι η χρήση τους και πώς μπορούν να βρουν αποτελεσματική εφαρμογή στη μαθησιακή διαδικασία. Τονίζουμε τα βασικά τους χαρακτηριστικά και σχολιάζουμε πώς αξιοποιούνται παιδαγωγικά.

Λέξεις – κλειδιά: κουίζ, πολυμέσα, ψηφιακός εμπλουτισμός

ΑΞΙΟΠΟΙΩΝΤΑΣ ΤΙΣ ΔΥΝΑΤΟΤΗΤΕΣ ΤΟΥ ΗΛΕΚΤΡΟΝΙΚΟΥ ΒΙΒΛΙΟΥ ΣΤΗ ΔΙΔΑΣΚΑΛΙΑ ΤΗΣ ΙΣΤΟΡΙΑΣ: ΜΙΑ ΜΕΛΕΤΗ ΠΕΡΙΠΤΩΣΗΣ ΓΙΑ ΤΗΝ Γ΄ ΓΥΜΝΑΣΙΟΥ

ΠΕΡΙΛΗΨΗ

Στο σύγχρονο εκπαιδευτικό περιβάλλον, η ενσωμάτωση των ψηφιακών μέσων και εργαλείων στην διδακτική πράξη αναδεικνύεται ως κρίσιμος παράγοντας για την ενίσχυση της μαθησιακής εμπειρίας και την προώθηση της ενεργού μάθησης. Ιδιαίτερα για τη διδασκαλία του μαθήματος της ιστορίας, τα ηλεκτρονικά βιβλία (e-books) αποτελούν μια σύγχρονη και δυναμική μορφή ψηφιακού μέσου, η οποία μπορεί να αξιοποιηθεί αποτελεσματικά και να έχει πολλαπλά οφέλη μέσω του εμπλουτισμού του διδακτικού υλικού με πολυμεσικά στοιχεία, όπως η διαδραστικότητα, η ενίσχυση της μαθητοκεντρικής μάθησης, η προώθηση της διαφοροποιημένης διδασκαλίας και η ανάπτυξη ψηφιακών δεξιοτήτων στους μαθητές. Η παρούσα ανακοίνωση προτείνει ως καλή πρακτική αξιοποίησης των ψηφιακών μέσων στην εκπαιδευτική διαδικασία τη δημιουργία και χρήση ενός πρωτότυπου ηλεκτρονικού βιβλίου (e-book) για τη συνδυαστική διδασκαλία διαφόρων ενοτήτων της ιστορίας στην Γ΄ Γυμνασίου. Συγκεκριμένα, παρουσιάζεται η περίπτωση ενός ηλεκτρονικού βιβλίου που δημιουργήθηκε[2] με την πλατφόρμα Book Creator και έχει σχεδιαστεί ειδικά για να αποτελέσει εργαλείο για τη διδασκαλία των βασικότερων ιστορικών σταθμών της διαμόρφωσης των συνόρων του ελληνικού κράτους, στο μάθημα της ιστορίας για την Γ΄ Γυμνασίου. Το ηλεκτρονικό βιβλίο αξιοποιώντας ποικίλα πολυμεσικά στοιχεία, όπως χάρτες, εικόνες, βίντεο, φωνητική αφήγηση, διαδραστικές και ομαδοσυνεργατικές δραστηριότητες έχει ως στόχο να καταστήσει τη μάθηση της ιστορίας πιο ελκυστική και αποτελεσματική για τους μαθητές. Η ευκολία χρήσης, οι ποικίλες δυνατότητες διαμόρφωσης διαδραστικού περιεχομένου και η ευελιξία προσαρμογής στις ανάγκες του μαθήματος αλλά και του μαθητή συμβάλλουν στην καλύτερη κατανόηση της ιστορικής αφήγησης, στην ανάπτυξη της ιστορικής σκέψης και στην κριτική προσέγγιση των ιστορικών πηγών από τους μαθητές, καθώς και στην ενίσχυση της αυτενέργειας του μαθητή και τον ψηφιακό του γραμματισμό. Τα συμπεράσματα από την πιλοτική εφαρμογή του ηλεκτρονικού βιβλίου στην τάξη, οι εντυπώσεις των μαθητών, η ανταπόκριση και αλληλεπίδραση τους με το βιβλίο παρέχουν σημαντικές πληροφορίες για την συνολική συμβολή του στην μαθησιακή διαδικασία, την κατανόηση του παρελθόντος και την εμπέδωση της ιστορικής γνώσης.

Λέξεις – κλειδιά: ηλεκτρονικό βιβλίο (e-book), διδασκαλία ιστορίας, ψηφιακά μέσα, Book Creator, μαθητοκεντρική μάθηση, πολυμεσικά στοιχεία

[2]Το συγκεκριμένο ηλεκτρονικό βιβλίο δημιουργήθηκε στα πλαίσια εργασίας του μεταπτυχιακού προγράμματος «Ψηφιακές και Ήπιες Δεξιότητες στις Επιστήμες της Αγωγής», του Διεθνούς Πανεπιστημίου Ελλάδος (ΔΙΠΑΕ).

ΕΞΕΡΕΥΝΩΝΤΑΣ ΤΟΝ ΚΟΣΜΟ ΜΕ ΓΕΩΓΡΑΦΙΚΑ ΠΛΗΡΟΦΟΡΙΑΚΑ ΣΥΣΤΗΜΑΤΑ (GIS): Η ΓΕΩΓΡΑΦΙΑ ΣΤΗΝ ΠΡΑΞΗ

ΠΕΡΙΛΗΨΗ

Η εκπαίδευση και ειδικότερα το μάθημα της Γεωγραφίας, χρειάζεται καινοτόμα προγράμματα και πρωτότυπες ιδέες. Το Νέο Πρόγραμμα Σπουδών για την Γεωγραφία στο Δημοτικό Σχολείο (2021) αναφέρει την εισαγωγή των Γεωγραφικών Πληροφοριακών Συστημάτων – ΓΣΠ (Geographic Information System –GIS) στην διδακτική πράξη, χωρίς, ωστόσο, να δίνονται στους εκπαιδευτικούς συγκεκριμένες οδηγίες για την επίτευξη αυτού του στόχου. Θέλοντας να γίνει πιο διαδραστικό το μάθημα της Γεωγραφίας, εντάξαμε τα ΓΣΠ στο μάθημα, δίνοντας στους μαθητές τη δυνατότητα να εξερευνήσουν τον κόσμο με αυτά.

Η καινοτόμος δράση αυτή, θα πραγματοποιηθεί σε 22 μαθητές/τριες της Στ΄ τάξης του 3ου Πειραματικού Δημοτικού σχολείου Ευόσμου, από τον Φεβρουάριο ως τον Ιούνιο του 2025. Ο χρόνος υλοποίησης της δράσης πραγματοποιείται εντός του σχολικού ωραρίου και συμπεριλαμβάνεται στις δράσεις των Β΄ και Γ΄ σχολικών τριμήνων. Πραγματοποιείται σε συνεργασία μεταξύ της δασκάλας του τμήματος και της εκπαιδευτικού πληροφορικής με ειδίκευση στα ΓΣΠ.

Τα G.I.S. (Geographic Information Systems) συνδυάζουν τις βάσεις δεδομένων και τα σχεδιαστικά προγράμματα, με σκοπό να επιτρέπουν την επεξεργασία της χωρικής και περιγραφικής πληροφορίας, με τελικό αποτέλεσμα τη δημιουργία δυναμικών χαρτών. Είναι σκόπιμο να αναφερθεί ότι τα GIS αποτελούν δυναμικά συστήματα πληροφοριών, τα οποία με την τεχνολογία της Πληροφορικής και τις ειδικές μαθηματικές μεθόδους διαχειρίζονται και αξιοποιούν δεδομένα από τις Γεωεπιστήμες για την παραγωγή μεταπληροφορίας (μεταδεδομένα - metadata), δηλαδή πληροφορίας υψηλότερου επιπέδου (Bagkou, 2013). Γενικά μπορούμε να πούμε ότι είναι ένα ολοκληρωμένο, σύγχρονο αλλά και πολυδιάστατο «εργαλείο» που προέρχεται και συσχετίζεται άμεσα με το χώρο της πληροφορικής (Konstantinidis, 2002). Παρέχουν την δυνατότητα συλλογής, διαχείρισης, αποθήκευσης, επεξεργασίας, ανάλυσης και οπτικοποίησης, σε ψηφιακό περιβάλλον, των δεδομένων που σχετίζονται με τον χώρο.

Σκοπός της παρούσας εργασίας είναι η παρουσίαση παραδειγμάτων δραστηριοτήτων της συγκεκριμένης καινοτόμας πρακτικής στη διδασκαλία της Γεωγραφίας. Συγκεκριμένα, οι στόχοι του καινοτόμου προγράμματος είναι α) η ενίσχυση της χωρικής αντίληψης των μαθητών/τριών μέσω της εφαρμογής των Γεωγραφικών Πληροφοριακών Συστημάτων (GIS), β) η καλλιέργεια δεξιοτήτων ανάλυσης δεδομένων και επίλυσης προβλημάτων, γ) η ανάπτυξη της συνεργασίας και της ομαδικής εργασίας μέσα από τη διερεύνηση γεωγραφικών θεμάτων και δ) η σύνδεση της γεωγραφίας με την καθημερινή ζωή και τις σύγχρονες ανάγκες.

Οι μαθητές μέσω των δραστηριοτήτων που πραγματοποιούνται (συλλογή δεδομένων, δημιουργία γραμμικών – σημειακών – πολυγωνικών αρχείων, εξαγωγή τελικών χαρτών), έρχονται σε επαφή με βασικές λειτουργίες χαρτογράφησης, εξετάζουν γεωγραφικά δεδομένα και δημιουργούν διαδραστικούς χάρτες στους οποίους απεικονίζουν τις πληροφορίες που συλλέγουν.

Τα προσδοκώμενα μαθησιακά αποτελέσματα είναι:
1. Ανάπτυξη δεξιοτήτων στη χρήση τεχνολογιών και γεωγραφικών δεδομένων.
2. Καλλιέργεια κριτικής σκέψης μέσα από την ανάλυση και τη σύνθεση πληροφοριών.
3. Ενίσχυση της χωρικής αντίληψης και της κατανόησης του φυσικού και ανθρωπογενούς περιβάλλοντος.
4. Ανάπτυξη βασικών δεξιοτήτων στα ψηφιακά σχεδιαστικά προγράμματα.

Τα θέματα που αναπτύσσονται στο πλαίσιο της συγκεκριμένης παρέμβασης περιλαμβάνουν α) τα φυσικά χαρακτηριστικά της Ελλάδας (βουνά, ποτάμια, θάλασσες), β) τις ανθρώπινες δραστηριότητες και πληθυσμιακές κατανομές και γ) τα περιβαλλοντικά ζητήματα (π.χ., πράσινοι χώροι, ρύπανση).Τέλος, οι μαθητές θα δουλεύουν σε ομάδες με καθορισμένους ρόλους.

Για την επίτευξη των στόχων του προγράμματος οι μαθητές χρησιμοποιούν το λογισμικό ArcGIS Online, σχολικά εγχειρίδια γεωγραφίας., διαδικτυακούς χάρτες και γεωγραφικές βάσεις δεδομένων καθώς και φωτογραφικό υλικό που έχουν συλλέξει οι ίδιοι οι μαθητές. Το λογισμικό ArcGIS Online επιλέχθηκε γιατί θεωρήθηκε από τους εκπαιδευτικούς ότι είναι το πιο αξιόπιστο σχεδιαστικό πρόγραμμα και μπορεί να χρησιμοποιηθεί δωρεάν για ένα συγκεκριμένο χρονικό διάστημα.

Η συγκεκριμένη δράση δεν έχει εφαρμοστεί στο παρελθόν στη σχολική μονάδα μας. Ωστόσο, βασίζεται σε διεθνώς αναγνωρισμένες πρακτικές για τη διδασκαλία της γεωγραφίας μέσω σύγχρονων τεχνολογικών εργαλείων, όπως τα Γεωγραφικά Πληροφοριακά Συστήματα (GIS). Η δράση αποτελεί πρωτοβουλία που εισάγει τους μαθητές στη χρήση καινοτόμων μεθόδων, προσαρμοσμένων στις ανάγκες της εκπαιδευτικής κοινότητας για την ανάπτυξη δεξιοτήτων.

Λέξεις – κλειδιά: Γεωγραφικά Πληροφοριακά Συστήματα (GIS), Διαδραστικοί χάρτες, καινοτόμες δράσεις, ArcGIS, Διδασκαλία Γεωγραφίας, Δημοτικό Σχολείο

Η ΧΡΗΣΗ ΤΩΝ PODCAST ΣΤΑ ΦΙΛΟΛΟΓΙΚΑ ΜΑΘΗΜΑΤΑ ΜΙΑ ΠΟΙΟΤΙΚΗ ΠΡΟΣΕΓΓΙΣΗ

Μπότσαρη Λαμπρινή

Αζέλη Ερασμία
Εκπαιδευτικός ΠΕ02, Φιλόλογος
Πρότυπο Λύκειο Ζωσιμαίας Σχολής Ιωαννίνων
Ιωάννινα, Ελλάδα
e-mail: lmpotsari@gmail.com

ΠΕΡΙΛΗΨΗ

Η παρούσα ερευνητική εργασία εξετάζει τη χρήση των podcast ως σύγχρονου εκπαιδευτικού εργαλείου στη διδασκαλία των φιλολογικών μαθημάτων. Στόχος της μελέτης είναι η διερεύνηση της παιδαγωγικής αξίας των podcast, η κατανόηση του τρόπου με τον οποίο διαμορφώνουν τη μαθησιακή εμπειρία των μαθητών, καθώς επίσης και η αξιολόγηση της αποτελεσματικότητάς τους στη βελτίωση της κατανόησης και της κριτικής προσέγγισης σε θέματα λογοτεχνίας, γλώσσας και ιστορίας. Η μεθοδολογία της συγκεκριμένης έρευνας βασίζεται σε ποιοτικές μεθόδους, περιλαμβάνοντας ημιδομημένες συνεντεύξεις με φιλολόγους και μαθητές δευτεροβάθμιας εκπαίδευσης, καθώς και ανάλυση περιεχομένου επιλεγμένων εκπαιδευτικών podcast. Ιδιαίτερη έμφαση δίνεται στην αξιολόγηση της διαδραστικότητας, της αφηγηματικής προσέγγισης και του βαθμού εμπλοκής των μαθητών στη διαδικασία της μάθησης μέσω της ηχητικής εμπειρίας. Παράλληλα, διερευνώνται οι παράγοντες που επηρεάζουν την αποδοχή των podcast ως μαθησιακού μέσου, όπως η θεματολογία, η ποιότητα της παραγωγής, η γλωσσική προσαρμογή και η συνάφεια με τα σχολικά αναλυτικά προγράμματα. Τα ευρήματα της έρευνας αποκαλύπτουν ότι η χρήση των podcast στη διδασκαλία μπορεί να προσφέρει πολλαπλά οφέλη. Συγκεκριμένα, ενισχύει τη μαθησιακή ευελιξία, επιτρέποντας στους μαθητές να προσλαμβάνουν τη γνώση σε οποιαδήποτε χρονική στιγμή και από οποιοδήποτε περιβάλλον. Επιπλέον, η αφηγηματική μορφή και η χρήση ήχου δημιουργούν μια πιο ζωντανή και εμπλουτισμένη μαθησιακή εμπειρία, η οποία μπορεί να αυξήσει την προσοχή, τη συγκέντρωση και την εμπλοκή των μαθητών. Ωστόσο, καταγράφονται και προκλήσεις, όπως η απουσία οπτικών ερεθισμάτων, που είναι κρίσιμα για ορισμένες διδακτικές ενότητες, καθώς και η ανάγκη για προσεκτικά επιλεγμένο και ποιοτικά ελεγμένο περιεχόμενο. Συμπερασματικά, η έρευνα υπογραμμίζει τη δυναμική των podcast ως συμπληρωματικό εργαλείο διδασκαλίας των φιλολογικών μαθημάτων, αναδεικνύοντας την ανάγκη ένταξής τους σε οργανωμένες εκπαιδευτικές στρατηγικές. Προτείνεται η δημιουργία εξειδικευμένου εκπαιδευτικού περιεχομένου, προσαρμοσμένου στις ανάγκες των μαθητών, καθώς και η επιμόρφωση των εκπαιδευτικών στην αποτελεσματική αξιοποίησή τους. Με την κατάλληλη παιδαγωγική καθοδήγηση, τα podcast μπορούν να συμβάλουν ουσιαστικά στην καλλιέργεια της κριτικής σκέψης, της δημιουργικότητας και της ενεργητικής συμμετοχής των μαθητών στη μαθησιακή διαδικασία.

Λέξεις – κλειδιά: podcast , φιλολογικά μαθήματα, ποιοτική έρευνα

ΒΕΛΤΙΣΤΕΣ ΠΡΑΚΤΙΚΕΣ ΓΙΑ ΤΗΝ ΕΝΣΩΜΑΤΩΣΗ ΤΩΝ ΨΗΦΙΑΚΩΝ ΤΕΧΝΟΛΟΓΙΩΝ ΣΤΗ ΔΙΔΑΣΚΑΛΙΑ: ΜΙΑ ΟΛΙΣΤΙΚΗ ΠΡΟΣΕΓΓΙΣΗ

ΠΕΡΙΛΗΨΗ

Η παρούσα μελέτη εστιάζει στις βέλτιστες πρακτικές ενσωμάτωσης των ψηφιακών τεχνολογιών στη διδακτική διαδικασία μέσα από μια ολιστική προσέγγιση. Στόχος της είναι η παρουσίαση σύγχρονων παιδαγωγικών στρατηγικών που αξιοποιούν ψηφιακά εργαλεία, η ανάδειξη των πλεονεκτημάτων και των εγγενών προκλήσεών τους, καθώς και η πρόταση συγκεκριμένων εφαρμογών τόσο στο ελληνικό όσο και στο διεθνές εκπαιδευτικό πλαίσιο. Μέσα από τη βιβλιογραφική ανασκόπηση, τη διερεύνηση καινοτόμων πρακτικών και την ανάλυση σχετικών πολιτικών και συστάσεων, η μελέτη φιλοδοξεί να αποτελέσει ένα ολοκληρωμένο σημείο αναφοράς για εκπαιδευτικούς, ερευνητές και εκπαιδευτικούς οργανισμούς.

Η μεθοδολογική προσέγγιση βασίστηκε σε εκτενή ανασκόπηση πρόσφατων ερευνών και μελετών περίπτωσης, με στόχο τον εντοπισμό σύγχρονων τάσεων και καινοτόμων παιδαγωγικών πρακτικών που αξιοποιούν ψηφιακά εργαλεία στην εκπαίδευση. Η ανάλυση οργανώθηκε θεματικά και εξέτασε την εφαρμογή των τεχνολογιών στη μεικτή και υβριδική μάθηση, τις παιδαγωγικές δυνατότητες των πολυμεσικών και διαδραστικών εργαλείων, τη χρήση Εικονικών Περιβαλλόντων Μάθησης (Virtual Learning Environments – VLEs) στη διδασκαλία, καθώς και τις πρακτικές αξιολόγησης και ανατροφοδότησης μέσω Συστημάτων Διαχείρισης Μάθησης (Learning Management Systems – LMS), με ιδιαίτερη έμφαση στον ρόλο της Τεχνητής Νοημοσύνης (Artificial Intelligence – AI) στην ενίσχυση της εξατομίκευσης και στη βελτιστοποίηση της μαθησιακής διαδικασίας.

Τα ευρήματα καταδεικνύουν ότι η σκόπιμη, στοχευμένη και παιδαγωγικά τεκμηριωμένη χρήση των ψηφιακών τεχνολογιών μπορεί να ενισχύσει ουσιαστικά την ενεργό συμμετοχή, τη συνεργασία και την αυτορρύθμιση των εκπαιδευομένων, ενώ παράλληλα βελτιώνει την ποιότητα της διδασκαλίας και καθιστά δυνατή την εξατομικευμένη αξιολόγηση και ανατροφοδότηση σε πραγματικό χρόνο. Συμπερασματικά, υποστηρίζεται ότι η συστηματική ενσωμάτωση των ψηφιακών εργαλείων στο πλαίσιο μιας ολιστικής στρατηγικής συμβάλλει στη δημιουργία ευέλικτων, προσαρμοστικών και αποτελεσματικών μαθησιακών περιβαλλόντων.

Λέξεις-κλειδιά: Ψηφιακά μαθησιακά εργαλεία, καινοτόμες παιδαγωγικές πρακτικές, Εικονικά Περιβάλλοντα Μάθησης (VLEs), Τεχνητή Νοημοσύνη, εξατομικευμένη μάθηση, ψηφιακά συστήματα αξιολόγησης.

ΑΞΙΟΠΟΙΗΣΗ ΑΙΣΘΗΤΗΡΩΝ ΥΓΡΑΣΙΑΣ ΕΔΑΦΟΥΣ ΣΤΗΝ ΕΚΠΑΙΔΕΥΤΙΚΗ ΠΡΑΞΗ ΜΕ ΧΡΗΣΗ ΨΗΦΙΑΚΩΝ ΜΕΣΩΝ

ΠΕΡΙΛΗΨΗ

Η ενσωμάτωση ψηφιακών μέσων στη σύγχρονη εκπαιδευτική πραγματικότητα αποτελεί καθοριστικό παράγοντα για την αναβάθμιση της διδασκαλίας και την ανάπτυξη δεξιοτήτων STEM στους μαθητές. Παρόλο που στην Ευρωπαϊκή Ένωση δεν υπάρχει ένας συγκεκριμένος ορισμός, το STEM αναφέρεται γενικά στους τομείς της επιστήμης, της τεχνολογίας, της μηχανικής και των μαθηματικών, οι οποίοι θεωρούνται κρίσιμοι για την καινοτομία, την οικονομική ανάπτυξη και την ευημερία. Η εκπαίδευση STEM δίνει έμφαση στην κριτική σκέψη, την επίλυση προβλημάτων και τη δημιουργικότητα, συνδυάζοντας τη θεωρία με την πρακτική εφαρμογή.

Στο πλαίσιο αυτό, η παρούσα εργασία παρουσιάζει τη χρήση αισθητήρων υγρασίας εδάφους σε συνδυασμό με τεχνολογικά εργαλεία για την ενίσχυση της μαθησιακής διαδικασίας στο μάθημα "Φυτική Παραγωγή" της Β’ τάξης του Ενιαίου Ειδικού Επαγγελματικού Γυμνασίου-Λυκείου (ΕΝ.Ε.Ε.ΓΥ.-Λ.) Μεσολογγίου. Το πρόγραμμα υλοποιήθηκε από μαθητές με την καθοδήγηση των εκπαιδευτικών τους, στο πλαίσιο της εργαστηριακής διδασκαλίας του μαθήματος.

Η προσέγγιση αυτή επιτρέπει τη συλλογή, ανάλυση και οπτικοποίηση δεδομένων που αφορούν την υγρασία του εδάφους σε πραγματικό χρόνο. Οι μαθητές εμπλέκονται ενεργά στην τοποθέτηση αισθητήρων στο σχολικό κήπο, καταγράφουν δεδομένα υγρασίας μέσω ψηφιακών πλατφορμών και λογισμικού, όπως το Arduino και το Raspberry Pi, και συγκρίνουν τις μετρήσεις με παραδοσιακές αρδευτικές πρακτικές. Με τον τρόπο αυτό, αναπτύσσουν βασικές γνώσεις στη γεωπονία, την πληροφορική και τα μαθηματικά, ενισχύοντας παράλληλα την κριτική σκέψη και τις δεξιότητες επίλυσης προβλημάτων.

Επιπλέον, η διαθεματική προσέγγιση αυτής της δράσης καθιστά εφικτή τη σύνδεση της θεωρητικής γνώσης με την πρακτική εφαρμογή, καθιστώντας τη μάθηση πιο βιωματική και προσαρμοσμένη στις ανάγκες των μαθητών. Παράλληλα, η αξιοποίηση των δεδομένων επιτρέπει την ανάπτυξη περιβαλλοντικής συνείδησης και την κατανόηση της σημασίας της ορθολογικής διαχείρισης των φυσικών πόρων, όπως το νερό στην άρδευση.

Η εργασία παρουσιάζει τα στάδια σχεδιασμού και υλοποίησης του προγράμματος, καθώς και τα παιδαγωγικά οφέλη που προκύπτουν από τη χρήση των αισθητήρων υγρασίας στην εκπαιδευτική πρακτική. Επιπλέον, αναλύονται τα τεχνικά και διδακτικά εργαλεία που χρησιμοποιήθηκαν, οι προκλήσεις που αντιμετωπίστηκαν και οι προοπτικές εξέλιξης της μεθόδου στο πλαίσιο της ειδικής αγωγής και εκπαίδευσης.

Τα αποτελέσματα της εφαρμογής καταδεικνύουν ότι η ενσωμάτωση των αισθητήρων υγρασίας εδάφους και των ψηφιακών μέσων στη διδακτική διαδικασία ενισχύει τη βιωματική μάθηση, αναπτύσσει δεξιότητες STEM και ψηφιακού προγραμματισμού και βελτιώνει τη συνεργασία μεταξύ μαθητών και εκπαιδευτικών. Συνεπώς, προτείνεται η επέκταση της μεθοδολογίας και σε άλλες εκπαιδευτικές βαθμίδες, με σκοπό τη δημιουργία καινοτόμων μαθησιακών περιβαλλόντων που αξιοποιούν την τεχνολογία προς όφελος της εκπαίδευσης και της βιώσιμης ανάπτυξης.

eTwinning: ΚΤΙΖΟΝΤΑΣ ΜΙΑ ΙΣΧΥΡΗ ΚΟΙΝΟΤΗΤΑ ΚΑΙΝΟΤΟΜΩΝ ΕΚΠΑΙΔΕΥΤΙΚΩΝ

Παρασκευάς Μιχάλης
Καθηγητής στο Πανεπιστήμιο Πελοποννήσου
Αντιπρόεδρος στο Ινστιτούτο Τεχνολογίας Υπολογιστών και Εκδόσεων «Διόφαντος»
Επικεφαλής του Εθνικού Οργανισμού Υποστήριξης eTwinning
email: mparask@cti.gr

ΠΕΡΙΛΗΨΗ

Το eTwinning είναι μια εμβληματική δράση της Ευρωπαϊκής Επιτροπής που προωθεί την εκπαιδευτική καινοτομία και την ανάπτυξη ψηφιακών δεξιοτήτων μέσω συνεργατικών προγραμμάτων. Από το 2005, στην Ελλάδα συμμετείχαν πάνω από 50.000 εκπαιδευτικοί και 14.000 σχολεία, υλοποιώντας περισσότερα από 23.000 έργα. Ο Εθνικός Οργανισμός Υποστήριξης (Ε.Ο.Υ.) eTwinning, υπό την εποπτεία του ΙΤΥΕ «Διόφαντος» και του Υπουργείου Παιδείας, ενισχύει την κοινότητα Ελλήνων eTwinners μέσω των ακόλουθων θεσμών:

Ανοικτά Διαδικτυακά Μαθήματα και MOOCs: Αφορούν σε επιμορφώσεις εστιασμένες σε ΤΠΕ, Web 2.0, διαδραστικούς πίνακες, εκπαιδευτική ρομποτική και STEM. Κάθε κύκλος περιλαμβάνει 200 ώρες επιμόρφωσης, υποστηριζόμενες από 1.000 εθελοντές επιμορφωτές. Ιδιαίτερη έμφαση δίνεται στη Τεχνητή Νοημοσύνη (ΤΝ), όπου στοχευμένα διαδικτυακά μαθήματα και MOOC βοηθούν τους εκπαιδευτικούς να την ενσωματώσουν στη δημιουργία συνεργατικών έργων. Σύμφωνα με το Selfie4Teachers της Ε.Ε., η συμμετοχή στα διαδικτυακά μαθήματα έχει βελτιώσει τις ψηφιακές δεξιότητες των εκπαιδευτικών κατά 17% και των επιμορφωτών κατά 15%. Από το 2021 έως σήμερα, πάνω από 50.000 εκπαιδευτικοί έχουν συμμετάσχει στα ανοικτά διαδικτυακά μαθήματα.

Δράση STEM eTwinning: Σήμερα, 900 σχολεία (1.000 μέχρι το τέλος 2025) διαθέτουν STEM εξοπλισμό από το eTwinning και λαμβάνουν υπηρεσίες επιμόρφωσης από οκτώ (8) διαδικτυακά μαθήματα εστιασμένα στην STEM εκπαίδευση. Επίσης, ο Ε.Ο.Υ. eTwinning διοργανώνει εθνικά και διεθνή σεμινάρια, όπως αυτό που θα διεξαχθεί στην Πύλο τον Μάιο 2025, όπου 50 εκπαιδευτικοί θα επιμορφωθούν σε εκπαιδευτική ρομποτική, προγραμματισμό και φυσικές επιστήμες μέσω Arduino, Micro:bit και STEM kits. Ως αποτέλεσμα αυτών, οι Έλληνες εκπαιδευτικοί υλοποιούν πολλά και ποιοτικά συνεργατικά έργα σε STEM και διακρίνονται σε εθνικούς και ευρωπαϊκούς διαγωνισμούς.

Δράση Initial Teacher Education (δράση ITE): Εκπαιδεύει φοιτητές παιδαγωγικών τμημάτων των Πανεπιστημίων στην εφαρμογή του eTwinning στη διδακτική πρακτική. Σήμερα συμμετέχουν 16 πανεπιστημιακά τμήματα στην Ελλάδα, ενσωματώνοντας το eTwinning στα προγράμματα σπουδών και εκπαιδεύοντας τους φοιτητές στη δημιουργία συνεργατικών έργων. Για την επιμόρφωση των συμμετεχόντων ο Ε.Ο.Υ. eTwinning παρέχει το MOOC «eTwinning ITE». Η Ελλάδα συμμετέχει επίσης ενεργά στον Ευρωπαϊκό Διαγωνισμό της δράσης ITE.

Πρεσβευτές eTwinning: Είναι ένα εθελοντικό δίκτυο 43 εκπαιδευτικών που υποστηρίζουν συναδέλφους στην υλοποίηση συνεργατικών έργων συμβάλλουν στη διάδοση καλών πρακτικών και πραγματοποιούν επιμορφώσεις. Το 2023-24 πραγματοποίησαν 300+ διαδικτυακές επιμορφώσεις με περισσότερες από 20.000 συμμετοχές εκπαιδευτικών.

Εθνικοί και Ευρωπαϊκοί Διαγωνισμοί: Η Ελλάδα διοργανώνει κάθε χρόνο με επιτυχία εθνικούς διαγωνισμούς, ενώ τα εθνικά συνέδρια eTwinning αποτελούν μια πλατφόρμα ανταλλαγής καλών πρακτικών. Έλληνες εκπαιδευτικοί και σχολεία λαμβάνουν συστηματικά διακρίσεις στους ευρωπαϊκούς διαγωνισμούς eTwinning.

Το **ηλεκτρονικό περιοδικό WELCOME**, διαθέσιμο από το 2023, αποτελεί ένα ανοικτό αποθετήριο εκπαιδευτικών πρακτικών και ερευνών με εστίαση στα συνεργατικά έργα. Στις εκδόσεις eTwinning περιλαμβάνονται επίσης και **οδηγοί καλών πρακτικών**, μεθοδολογίες και διδακτικά παραδείγματα, προσφέροντας πολύτιμο εκπαιδευτικό υλικό στην εκπαιδευτική κοινότητα.

Τέλος, ο Ε.Ο.Υ. eTwinning συνεργάζεται με θεσμικούς φορείς όπως:

- Το Ινστιτούτο Εκπαιδευτικής Πολιτικής (ΙΕΠ), για την προώθηση των Εργαστηρίων Δεξιοτήτων μέσω συνεργατικών έργων.
- Το Ίδρυμα Κρατικών Υποτροφιών (ΙΚΥ), για την ενίσχυση της συμμετοχής των σχολείων στο πρόγραμμα Erasmus+.
- Πανεπιστήμια, για την ενσωμάτωση του eTwinning στα προγράμματα σπουδών.

Συμπεράσματα

Η ελληνική κοινότητα eTwinning αναπτύσσει σύγχρονα συνεργατικά εκπαιδευτικά μοντέλα, εστιάζοντας σε ψηφιακές δεξιότητες, STEM και Τεχνητή Νοημοσύνη. Οι επιμορφώσεις, διεθνείς συνεργασίες και διαρκείς καινοτομίες καθιστούν το eTwinning μια ηγετική δύναμη στην εκπαιδευτική καινοτομία στην Ελλάδα και στην Ευρώπη.

Λέξεις – κλειδιά: eTwinning, Συνεργατική Μάθηση, Ψηφιακές Δεξιότητες, STEM Εκπαίδευση, Εκπαιδευτική Καινοτομία

ΠΕΡΙΛΗΨΗ

Η παρούσα εργασία εστιάζει στην αξιολόγηση της «Θερμοκρασίας» των Ανθρωπίνων Δικαιωμάτων στην εκπαιδευτική κοινότητα, με στόχο την αποτίμηση του κλίματος σε σχέση με τα δικαιώματα του ανθρώπου και την εφαρμογή των αρχών της Οικουμενικής Διακήρυξης των Δικαιωμάτων του Ανθρώπου. Αντικείμενο της εργασίας είναι να αναδείξει τη σημασία της ισότητας, της ασφάλειας και της προστασίας των δικαιωμάτων των μαθητών και των μαθητριών.

Η μεθοδολογία που χρησιμοποιήθηκε περιλαμβάνει τη χρήση ερωτηματολογίου Google Forms, που βασίζεται σε 25 κρίσιμες δηλώσεις, οι οποίες σχετίζονται άμεσα με τα ανθρώπινα δικαιώματα, όπως η ασφάλεια, η ίση πρόσβαση στην εκπαίδευση, η συμμετοχή στις δημοκρατικές διαδικασίες και η ελευθερία της έκφρασης. Οι ερωτήσεις αξιολογούν την εφαρμογή αυτών των δικαιωμάτων στην καθημερινή σχολική ζωή, χρησιμοποιώντας κλίμακα από το 1 έως το 4, με σκοπό την ποσοτική εκτίμηση της κατάστασης των ανθρωπίνων δικαιωμάτων. Το ερωτηματολόγιο διανεμήθηκε μέσω των email των συμμετεχόντων και των ιστοσελίδων των σχολείων, εξασφαλίζοντας ευρεία πρόσβαση.

Στην αξιολόγηση συμμετείχαν 235 μαθητές/τριες από 4 σχολεία, το 1ο Γενικό Λύκειο Πρέβεζας, το Εσπερινό ΕΠΑ.Λ. Πρέβεζας, το 1ο ΕΠΑ.Λ. Καρπάθου και το 1ο ΕΠΑ.Λ. Ηρακλείου Κρήτης, με στόχο την πλήρη ανασκόπηση των αντιλήψεων και εμπειριών της σχολικής κοινότητας. Χρησιμοποιήθηκε το Excel για την επεξεργασία των απαντήσεων και την εξαγωγή στατιστικών συμπερασμάτων, καθώς και για τη δημιουργία γραφημάτων για την οπτικοποίηση των αποτελεσμάτων. Η διαδικασία αξιολόγησης είχε ως στόχο την καταγραφή του κλίματος και την ανάλυση των περιοχών που ενδεχομένως απαιτούν βελτίωση. Ειδικότερα, η εργασία επικεντρώθηκε στην αναγνώριση περιοχών διάκρισης σε σχέση με το φύλο, τη φυλή, τη σωματική και διανοητική ικανότητα, καθώς και σε ζητήματα σχετικά με τη συμμετοχή των μαθητών και της σχολικής κοινότητας στις διαδικασίες λήψης αποφάσεων.

Σημαντικός στόχος ήταν η εξασφάλιση της ίσης πρόσβασης των μελών της κοινότητας στην εκπαίδευση και η καταπολέμηση των ανισοτήτων και διακρίσεων. Η αξιολόγηση της «Θερμοκρασίας» των Ανθρωπίνων Δικαιωμάτων συνδυάστηκε με τη χρήση σύγχρονων ψηφιακών μέσων, τα οποία συνέβαλαν στην ενίσχυση της συμμετοχής και της συνεργασίας μεταξύ των μαθητών/τριών, των εκπαιδευτικών κ.λ.π.. Τα ψηφιακά μέσα που χρησιμοποιήθηκαν ήταν οι υπολογιστές, τα tablets, τα κινητά τηλέφωνα, οι προτζέκτορες, καθώς και το διαδίκτυο. Διοργανώθηκαν διαδικτυακές συναντήσεις μέσω Zoom για συζήτηση των αποτελεσμάτων και ανταλλαγή απόψεων. Αναγνωρίστηκαν, επίσης, οι προκλήσεις που σχετίζονται με τη χρήση των ψηφιακών μέσων στην εκπαιδευτική διαδικασία.

Η εργασία επισήμανε την ανάγκη για την εφαρμογή μέτρων προστασίας των προσωπικών δεδομένων και της ιδιωτικότητας στην εκπαιδευτική κοινότητα. Τα ευρήματα δείχνουν ότι η «Θερμοκρασία» των Ανθρωπίνων Δικαιωμάτων μπορεί να βελτιωθεί με τη συνεχιζόμενη εκπαίδευση και την εφαρμογή στρατηγικών που ενισχύουν την ισότητα και την

αποδοχή της διαφορετικότητας. Παράλληλα, η ενσωμάτωση των ψηφιακών μέσων στην εκπαιδευτική διαδικασία όχι μόνο ενίσχυσε τη συμμετοχή των μαθητών/τριών στις διαδικασίες, αλλά συνέβαλε και στην ενδυνάμωση της επικοινωνίας και της διαφάνειας μέσα στην κοινότητα. Χρησιμοποιήθηκε το Google Docs για τη σύνταξη ψηφιακής έκθεσης με τα ευρήματα της έρευνας, ώστε όλοι οι συμμετέχοντες από τα 4 σχολεία, να έχουν άμεση πρόσβαση. Επίσης χρησιμοποιήθηκε το PowerPoint για τη δημιουργία διαδραστικής παρουσίασης με τα κυριότερα σημεία της έκθεσης.

Συνοψίζοντας, η εργασία καταδεικνύει την ανάγκη για μια ολοκληρωμένη προσέγγιση που συνδυάζει την αξιολόγηση των ανθρωπίνων δικαιωμάτων με την εφαρμογή στρατηγικών και ψηφιακών εργαλείων. Η εργασία αναδεικνύει τη σημασία της συνεχούς προσπάθειας για την προώθηση της κοινωνικής δικαιοσύνης, της αλληλεγγύης και του σεβασμού των ανθρωπίνων δικαιωμάτων στην εκπαιδευτική κοινότητα.

Λέξεις – κλειδιά: Ανθρώπινα δικαιώματα, εκπαιδευτική κοινότητα, ψηφιακά μέσα.

ΠΑΡΟΥΣΙΑΣΗ ΚΑΛΩΝ ΠΡΑΚΤΙΚΩΝ ΑΞΙΟΠΟΙΗΣΗΣ ΨΗΦΙΑΚΩΝ ΤΕΧΝΟΛΟΓΙΩΝ ΣΤΗ ΔΙΔΑΚΤΙΚΗ ΠΡΑΞΗ ΚΑΙ ΕΦΑΡΜΟΓΗ ΔΡΑΣΤΗΡΙΟΤΗΤΩΝ ΔΙΑΦΟΡΟΠΟΙΗΜΕΝΗΣ ΔΙΔΑΣΚΑΛΙΑΣ ΚΑΙ ΑΞΙΟΛΟΓΗΣΗΣ ΜΕ ΨΗΦΙΑΚΑ ΕΡΓΑΛΕΙΑ, ΣΥΜΦΩΝΑ ΜΕ ΤΟ ΝΕΟ ΠΡΟΓΡΑΜΜΑ ΣΠΟΥΔΩΝ ΤΟΥ 2023 ΓΙΑ ΤΟ ΜΑΘΗΜΑ ΤΩΝ ΓΑΛΛΙΚΩΝ

ΠΕΡΙΛΗΨΗ

Η ενσωμάτωση και αξιοποίηση των ψηφιακών τεχνολογιών στην ξενόγλωσση εκπαίδευση διαδραματίζει πρωταγωνιστικό ρόλο στην υλοποίηση των στόχων του Νέου Προγράμματος Σπουδών σε έναν συνεχώς εξελισσόμενο ψηφιακό κόσμο που βαδίζει ταχύτατα πλέον στην εποχή της τεράστιας επίδρασης των εργαλείων τεχνητής νοημοσύνης. Η παιδαγωγικά προσανατολισμένη αξιοποίηση τους στη διδασκαλία με βάση τον σχεδιασμό του μαθήματος και τα προσδοκώμενα μαθησιακά αποτελέσματα εμπλουτίζει το περιεχόμενο της με πλούσιο αυθεντικό και επίκαιρο υλικό.

Η μαθησιακή διαδικασία γίνεται πιο ελκυστική και παιγνιώδης για τους/τις μαθητές/τριες, συμμετέχοντας πλέον οι ίδιοι ενεργά με δραστηριότητες βιωματικού χαρακτήρα μέσα σε ψηφιακά περιβάλλοντα, αναπτύσσοντας με τον τρόπο αυτό δεξιότητες ψηφιακού γραμματισμού καθώς και πλήθος άλλων ήπιων και κοινωνικών δεξιοτήτων μετατρέποντας με αυτό τον τρόπο σταδιακά την τάξη σε κοινότητα δημιουργικής μάθησης.

Σκοπός της παρούσας εισήγησης είναι να αναδείξει τις δυνατότητες που προσφέρουν τα ψηφιακά εργαλεία για τη διαφοροποίηση της διδασκαλίας και της αξιολόγησης, καθώς και να παρουσιάσει συγκεκριμένες πρακτικές και παραδείγματα εφαρμογής τους στην εκπαιδευτική πράξη. Επιπλέον, επιδιώκει να εξετάσει τις προκλήσεις και τις προοπτικές που συνδέονται με την ενσωμάτωση των νέων τεχνολογιών στον διδακτικό σχεδιασμό σύμφωνα με τα Νέα Αναλυτικά Προγράμματα Σπουδών.

Πιο συγκεκριμένα, η παρουσίαση μας θα αναδείξει ότι τα ψηφιακά εργαλεία υποστηρίζουν την παροχή εξατομικευμένων μαθησιακών εμπειριών, οι οποίες ανταποκρίνονται στις ανάγκες και τα ενδιαφέροντα κάθε μαθητή, δημιουργούν ευέλικτα μαθησιακά περιβάλλοντα, τα οποία επιτρέπουν στους μαθητές να μαθαίνουν με τον δικό τους τρόπο και ρυθμό, αναπτύσσουν ψηφιακές δεξιότητες σε μαθητές/τριες και εκπαιδευτικούς.

Επιπλέον, θα αναδείξει ότι το e-portfolio, ως ένα δυναμικό αποθετήριο μαθησιακών τεκμηρίων, αναδύεται ως σημαντικό εργαλείο στη μαθησιακή αξιολόγηση. Ενσωματώνοντας αρχές της αυθεντικής αξιολόγησης, το e-portfolio επιτρέπει την ολιστική αποτύπωση της μαθησιακής πορείας, εστιάζοντας στην ανάπτυξη μεταγνωστικών δεξιοτήτων και στην ενίσχυση της αυτορρύθμισης. Μέσω της συγκέντρωσης ποικίλων artifacts, το e-portfolio προάγει την ενδοσκόπηση και την κριτική ανάλυση, διευκολύνοντας τη διαμορφωτική αξιολόγηση και παρέχοντας μια συνεχή ανατροφοδότηση για τη βελτίωση της μάθησης.

Τέλος, οι προτάσεις μας απευθύνονται σε εκπαιδευτικούς, ερευνητές, υπεύθυνους χάραξης εκπαιδευτικής πολιτικής και σε άλλους ενδιαφερόμενους, προτείνοντας δράσεις για την προώθηση της διαφοροποιημένης διδασκαλίας και αξιολόγησης με χρήση ψηφιακών εργαλείων συμβάλλοντας στην ανάπτυξη και εφαρμογή καινοτόμων διδακτικών πρακτικών, οι οποίες ανταποκρίνονται στις ανάγκες των μαθητών/τριών του 21ου αιώνα.

Λέξεις-κλειδιά: ψηφιακά εργαλεία, διαφοροποιημένη διδασκαλία, e-portfolio, νέα αναλυτικά προγράμματα σπουδών

Η ΑΞΙΟΠΟΙΗΣΗ ΔΙΕΠΑΦΩΝ ΤΕΧΝΗΤΗΣ ΝΟΗΜΟΣΥΝΗΣ (AI) ΩΣ ΕΡΓΑΛΕΙΟΥ ΕΝΙΣΧΥΣΗΣ ΤΗΣ ΒΙΩΜΑΤΙΚΗΣ ΜΑΘΗΣΗΣ ΣΤΟ ΝΗΠΙΑΓΩΓΕΙΟ

ΠΕΡΙΛΗΨΗ

Το διδακτικό σενάριο που παρουσιάζεται σχεδιάστηκε σύμφωνα με τις Θεματικές Περιοχές και τα Προσδοκώμενα Μαθησιακά Αποτελέσματα του νέου Προγράμματος Σπουδών για την Προσχολική Εκπαίδευση, εστιάζοντας στα στάδια της ανάπτυξης των φυτών (Φυσικές Επιστήμες), ενώ παράλληλα εμπλέκει τα Θεματικά Πεδία των Κοινωνικών Επιστημών και των Τεχνολογιών Πληροφορίας και Επικοινωνίας (ΤΠΕ). Στόχος του σεναρίου είναι η αξιοποίηση διεπαφών Τεχνητής Νοημοσύνης (AI) ως εργαλείου ενίσχυσης της βιωματικής μάθησης μέσω διαδραστικών και συνεργατικών δραστηριοτήτων.

Ακολουθεί το διδακτικό μοντέλο μάθησης 5e (Engage, Explore, Explain, Elaborate, Evaluate) που προτείνει το νέο Πρόγραμμα Σπουδών για την Προσχολική Εκπαίδευση και δομείται ως εξής: η μάθηση και η διαδικασία εκκινείται με την εισαγωγή μιας διαδραστικής φωνητικής AI μέσω της οποίας μια εικονική μέλισσα εμφανίζεται στην τάξη και ζητά βοήθεια από τους μαθητές/τριες για να μάθει πώς αναπτύσσεται το φυτό. Με τον τρόπο αυτό ενεργοποιείται το ενδιαφέρον και η περιέργεια των παιδιών για το θέμα (Engage). Στη συνέχεια τα νήπια χωρίζονται σε ομάδες, αναζητούν πληροφορίες σχετικά με την ανάπτυξη των φυτών χρησιμοποιώντας εκπαιδευτικό ψηφιακό υλικό, ενώ ο ρόλος του εκπαιδευτικού είναι συντονιστικός και καθοδηγητικός, καθώς μέσα από στοχευμένες ερωτήσεις ενθαρρύνει τα παιδιά να διατυπώσουν τις αρχικές τους γνώσεις και να τις κατανοήσουν καλύτερα εμπλουτίζοντάς τες (Explore). Ακολουθεί η φάση της Ερμηνείας όπου η μέλισσα ζητά επιπλέον διευκρινήσεις και τα παιδιά αξιοποιώντας εργαλεία AI συνεργάζονται και πάλι σε μικρές ομάδες και παρουσιάζουν στην ολομέλεια το αποτέλεσμα της εργασίας τους και όσα έχουν μάθει, ενισχύοντας με αυτό τον τρόπο τη γλωσσική τους ανάπτυξη και προάγοντας την κριτική τους σκέψη (Explain). Για τη δραστηριότητα Εμπέδωσης (Elaborate) γίνεται χρήση ψηφιακών παιχνιδιών αξιολόγησης (π.χ. Wordwall, Quizizz, LearningApps) τόσο για αξιολόγηση όσο και για την επανάληψη των εννοιών με παιγνιώδη τρόπο ώστε να αποτυπωθεί η γνώση των παιδιών με φυσικό και ευχάριστο τρόπο. Έτσι τα νήπια αναπτύσσουν δεξιότητες δημιουργικής σκέψης και ψηφιακής έκφρασης. Το τελευταίο στάδιο, αυτό της Αξιολόγησης, ολοκληρώνεται με δραστηριότητες αυτοαξιολόγησης και ετεροαξιολόγησης, ώστε να καλλιεργηθούν μεταγνωστικές δεξιότητες στους μαθητές/τριες και η ικανότητά τους να αναστοχάζονται πάνω στη μαθησιακή τους πορεία.

Συμπερασματικά, το συγκεκριμένο διδακτικό σενάριο αναδεικνύει τη δυναμική της Τεχνητής Νοημοσύνης στην προσχολική εκπαίδευση, προτείνοντας μια πολυδιάστατη, διαδραστική και συνεργατική προσέγγιση στη μάθηση. Η αξιοποίηση καινοτόμων τεχνολογιών όχι μόνο ενισχύει τη μαθησιακή διαδικασία αλλά και διαμορφώνει το σχολείο του μέλλοντος, στο οποίο η ψηφιακή καινοτομία συνυπάρχει με την παιδαγωγική δημιουργικότητα.

Λέξεις – κλειδιά: Διεπαφές Τεχνητής Νοημοσύνης, διδακτικό μοντέλο 5e, ψηφιακή μάθηση, προσχολική εκπαίδευση και AI

Η ΑΞΙΟΠΟΙΗΣΗ ΨΗΦΙΑΚΩΝ ΤΕΧΝΟΛΟΓΙΩΝ ΣΤΗ ΔΙΔΑΣΚΑΛΙΑ ΤΗΣ ΧΗΜΕΙΑΣ: ΜΕΛΕΤΗ ΤΗΣ ΗΛΕΚΤΡΙΚΗΣ ΑΓΩΓΙΜΟΤΗΤΑΣ ΔΙΑΛΥΜΑΤΩΝ ΜΕΣΩ ΔΙΑΔΡΑΣΤΙΚΗΣ ΠΡΟΣΟΜΟΙΩΣΗΣ ΤΟΥ PHET COLORADO

Τζανάκη Νικολέττα

Πρέβεζα, Ελλάδα
e-mail: letzan@gmail.com

ΠΕΡΙΛΗΨΗ

Η ενσωμάτωση ψηφιακών τεχνολογιών στη διδασκαλία της Χημείας προάγει την ενεργό συμμετοχή των μαθητών και τη βαθύτερη κατανόηση επιστημονικών εννοιών. Η παρούσα εργασία παρουσιάζει μια διδακτική πρόταση για τη μελέτη της ηλεκτρικής αγωγιμότητας υδατικών διαλυμάτων, συνδυάζοντας το πραγματικό πείραμα με τη διαδραστική προσομοίωση "Διάλυμα Ζάχαρης και Αλατιού" του PhET Colorado. Η διδακτική προσέγγιση βασίζεται στη διερευνητική μάθηση (Inquiry-Based Learning - IBL) και εφαρμόστηκε σε μαθητές της Β' Γυμνασίου σε δύο διδακτικές ώρες. Στην πρώτη φάση, οι μαθητές, δουλεύοντας σε ομάδες, διατύπωσαν υποθέσεις και πραγματοποίησαν πειράματα με υδατικά διαλύματα αλατιού (NaCl) και ζάχαρης ($C_{12}H_{22}O_{11}$), καταγράφοντας και αναλύοντας τα αποτελέσματα. Στη δεύτερη φάση, χρησιμοποίησαν την προσομοίωση για να παρατηρήσουν τη διάσταση του NaCl σε ιόντα, κατανοώντας τη σχέση μεταξύ χημικής δομής και αγωγιμότητας.

Η διδακτική παρέμβαση που παρουσιάζεται διαφοροποιείται ουσιαστικά από την παραδοσιακή προσέγγιση διδασκαλίας, προωθώντας τη διερευνητική μάθηση που ενεργοποιεί τους μαθητές ως συμμετοχικά υποκείμενα της εκπαιδευτικής διαδικασίας. Σε ένα τέτοιο πλαίσιο, οι μαθητές εργάστηκαν σε ένα μαθησιακό-διαλογικό περιβάλλον, όπου ανέπτυξαν την κριτική σκέψη και την κατανόηση θεμελιωδών εννοιών της Χημείας, όπως η αγωγιμότητα και η φύση των χημικών ενώσεων. Η πορεία της παρέμβασης, που ακολουθεί το μοντέλο 5E (Engage, Explore, Explain, Elaborate, Evaluate), αποτυπώθηκε σε Φύλλα Εργασίας, με υψηλά ποσοστά σωστών απαντήσεων και ικανοποιητική χρήση επιστημονικής ορολογίας, υποδεικνύοντας εννοιολογική κατανόηση και ικανότητα εφαρμογής γνώσεων σε νέα πλαίσια.

Παράλληλα, η αξιοποίηση τόσο πραγματικών όσο και εικονικών πειραμάτων συνέβαλε στην πολυτροπική προσέγγιση της διδασκαλίας, καθιστώντας τις αφηρημένες έννοιες πιο προσιτές. Η συνδυαστική χρήση των μεθόδων αυτών ενίσχυσε τη συμμετοχή και την αυτενέργεια των μαθητών, ιδιαίτερα όσων συνήθως δυσκολεύονται. Οι μαθητές ενεπλάκησαν ενεργά στη διαδικασία, ανέπτυξαν δεξιότητες ερμηνείας, πρόβλεψης και συνεργασίας, και ανέδειξαν την ικανότητά τους να μεταφέρουν και να επεκτείνουν τη γνώση. Η παρέμβαση αναδεικνύει ότι η χρήση της διερευνητικής μάθησης και των ψηφιακών εργαλείων, όπως οι προσομοιώσεις PhET, μπορεί να μετασχηματίσει τη διδασκαλία της Χημείας σε μια δυναμική, βιωματική και ουσιαστική μαθησιακή εμπειρία.

Λέξεις – κλειδιά: ηλεκτρική αγωγιμότητα, προσομοίωση PhET Colorado, διερευνητική μάθηση (IBL), μοντέλο 5E, πολυτροπική μάθηση

ΔΙΑΘΕΜΑΤΙΚΗ ΠΡΟΣΕΓΓΙΣΗ ΣΤΗΝ ΠΕΡΙΒΑΛΛΟΝΤΙΚΗ ΕΚΠΑΙΔΕΥΣΗ: ΠΕΡΙΒΑΛΛΟΝΤΙΚΗ ΜΗΧΑΝΙΚΗ, ΔΗΜΙΟΥΡΓΙΚΗ ΓΡΑΦΗ, ΤΕΧΝΗΤΗ ΝΟΗΜΟΣΥΝΗ ΚΑΙ ΨΗΦΙΑΚΑ ΜΕΣΑ

ΠΕΡΙΛΗΨΗ

Η διαθεματική προσέγγιση αποτελεί βασικό πυλώνα της σύγχρονης εκπαιδευτικής πρακτικής, καθώς μέσω αυτής αξιοποιούνται γνώσεις και δεξιότητες από διαφορετικούς τομείς, δημιουργώντας μια ολιστική εμπειρία μάθησης. Η παρούσα εισήγηση αποτελεί χαρακτηριστικό παράδειγμα αυτής της προσέγγισης, καθώς συνδυάζει την περιβαλλοντική μηχανική, τη δημιουργική γραφή, την τεχνητή νοημοσύνη και τα ψηφιακά μέσα σε μια ενιαία περιβαλλοντική εκπαιδευτική δράση.

Η διαθεματική προσέγγιση στην Περιβαλλοντική Εκπαίδευση συνδέει γνώσεις από διάφορα γνωστικά πεδία για την κατανόηση σύνθετων περιβαλλοντικών ζητημάτων. Σύμφωνα με πανελλαδική μελέτη (2006-2014), μόνο το 7% των εκπαιδευτικών πρωτοβάθμιας εκπαίδευσης συμμετείχε σε προγράμματα ΠΕ, ενώ η συμμετοχή μαθητών έφτανε το 16%. Παρά τα αρχικά χαμηλά ποσοστά, παρατηρήθηκε αυξητική τάση τα τελευταία χρόνια της μελέτης, ωστόσο, η έλλειψη αναλυτικών δεδομένων καθιστά δύσκολη την πλήρη αξιολόγηση της εφαρμογής και αποτελεσματικότητάς της.

Η δράση πραγματοποιήθηκε σε ΕΠΑΛ και επικεντρώθηκε στη θαλάσσια ρύπανση, ένα σημαντικό περιβαλλοντικό ζήτημα, και είχε ως στόχο την ευαισθητοποίηση των μαθητών μέσα από μια διαδικασία επιστημονικής κατανόησης και δημιουργικής έκφρασης. Ειδικότερα στο πρώτο στάδιο οι μαθητές ενημερώθηκαν για τις αιτίες και τις επιπτώσεις της θαλάσσιας ρύπανσης, αποκτώντας επιστημονικές γνώσεις που αποτέλεσαν τη βάση για τη δημιουργία των ποιημάτων τους. Στη συνέχεια αξιοποίησαν τεχνικές δημιουργικής γραφής, όπως η επιλογή λέξεων σχετικών με το θέμα, οι εικόνες ως ερέθισμα για συγγραφή και η συνειρμική γραφή, για να μετουσιώσουν τις επιστημονικές πληροφορίες σε ποιήματα. Στο τρίτο στάδιο, η τεχνητή νοημοσύνη χρησιμοποιήθηκε για τη δημιουργία εικόνων που αντικατόπτριζαν το περιεχόμενο των ποιημάτων. Τέλος, τα ποιήματα και οι εικόνες συγκεντρώθηκαν σε ένα διαδραστικό ψηφιακό βιβλίο, που ήταν αποτέλεσμα συλλογικής προσπάθειας. Αυτή η συνεργασία ανέδειξε τη σημασία της διαθεματικότητας, καθώς κάθε τομέας συμπληρώθηκε και εμπλουτίστηκε από τον άλλο, δημιουργώντας μια ολοκληρωμένη εκπαιδευτική εμπειρία.

Η δράση ανέδειξε τη δυναμική των ψηφιακών εργαλείων στη σύγχρονη εκπαίδευση, προσφέροντας στους μαθητές τη δυνατότητα να εκφραστούν δημιουργικά, να καλλιεργήσουν ψηφιακές δεξιότητες, να κατανοήσουν το θέμα μέσω της οπτικοποίησης του προβλήματος και να ενισχύσουν την περιβαλλοντική τους ευαισθησία. Παράλληλα, υπογράμμισε τη σημασία της διαθεματικής συνεργασίας, η οποία επιτρέπει στους μαθητές να αντιμετωπίσουν πολύπλοκα ζητήματα από πολλές πλευρές, ενισχύοντας την κριτική τους σκέψη. Η εισήγηση αναδεικνύει τα παιδαγωγικά οφέλη αυτής της προσέγγισης, τις προκλήσεις που προέκυψαν κατά την εφαρμογή της και τις μελλοντικές προοπτικές για περαιτέρω αξιοποίηση της τεχνολογίας στην εκπαιδευτική διαδικασία.

Λέξεις – κλειδιά: διαθεματική προσέγγιση, περιβαλλοντική εκπαίδευση, δημιουργική γραφή, ψηφιακά εργαλεία.

ΠΑΙΔΑΓΩΓΙΚΗ ΑΞΙΟΠΟΙΗΣΗ ΨΗΦΙΑΚΩΝ ΚΑΙ ΤΕΧΝΟΛΟΓΙΚΩΝ ΜΕΣΩΝ ΣΤΗ ΔΙΔΑΣΚΑΛΙΑ ΤΗΣ ΑΓΓΛΙΚΗΣ ΓΛΩΣΣΑΣ: ΘΕΩΡΗΤΙΚΗ ΚΑΙ ΠΡΑΚΤΙΚΗ ΠΡΟΣΕΓΓΙΣΗ

Τσιπλακίδης Ιάκωβος
Ειδικό Εκπαιδευτικό Προσωπικό, Τμήμα Εικαστικών Τεχνών και Επιστημών της Τέχνης, Σχολή Καλών Τεχνών, Πανεπιστήμιο Ιωαννίνων, Συνεργαζόμενο Εκπαιδευτικό Προσωπικού (Σ.Ε.Π.) στο Ε.Α.Π.
e-mail: itsiplak [at] uoi.gr

ΠΕΡΙΛΗΨΗ

Η εργασία αυτή έχει ως αντικείμενό της την ανάδειξη καινοτόμου εκπαιδευτικού σχεδιασμού με την αξιοποίηση ψηφιακών και τεχνολογικών μέσων στη διδασκαλία της Αγγλικής ως ξένης γλώσσας τα οποία παρέχουν τη δυνατότητα αναβάθμισης της διδασκαλίας και εκμάθησής της. Ειδικότερα, στο πλαίσιο αυτό, προτείνει την παιδαγωγική αξιοποίηση ψηφιακών μέσων, αυθεντικών πηγών και βίντεο από το διαδίκτυο και Web 2.0 συνεργατικών εργαλείων για την υλοποίηση ιστοεξερευνήσεων (WebQuests). Ο σχεδιασμός αυτό προτείνεται με βάση την προσωπική εμπειρία μας και τα πορίσματα ερευνών που δείχνουν ότι η ενσωμάτωσή ψηφιακών και τεχνολογικών μέσων στη διδασκαλία αφενός παρέχει πολλαπλά οφέλη και αφετέρου ότι η αποτελεσματική αξιοποίησή τους είναι εφικτή και ρεαλιστική κι όχι απλά θεωρητική.

Η παιδαγωγική αξιοποίηση ψηφιακών μέσων, συνεργατικών εργαλείων και του διαδικτύου για την υλοποίηση ιστοεξερευνήσεων αυξάνει τα κίνητρα των μαθητών, -τριών και την ενεργητική τους συμμετοχή στη μαθησιακή διαδικασία, καθώς βασίζονται σε θέματα και πεδία έρευνας που ανταποκρίνονται στα ενδιαφέροντα των μαθητών και αξιοποιούν με παιδαγωγικά ορθούς τρόπους τις εμπειρίες τους. Επίσης, η συμμετοχή σε ιστοεξερευνήσεις αυξάνει την μαθητική πρωτοβουλία, ενισχύει την αυτόνομη μάθηση και τη διαθεματική προσέγγιση στη μάθηση καταπολεμώντας την παθητικότητα και την αδιαφορία, επειδή οι ιστοεξερευνήσεις τοποθετούν τους μαθητές στο επίκεντρο της μαθησιακής διαδικασίας. Επιπλέον οφέλη αποτελούν η δυνατότητα συνεργασίας, η ανάπτυξη της κριτικής και της δημιουργικής σκέψης αλλά και της διερευνητικής μάθησης, καθώς ενθαρρύνεται η κριτική συλλογή, ανάλυση και επεξεργασία των δεδομένων, κι όχι η αποστήθιση και η απλή παράθεση πληροφοριών. Ένα περαιτέρω ευεργετικό αποτέλεσμα αφορά το γεγονός ότι προάγεται η φυσική διδασκαλία όλων των γλωσσικών δεξιοτήτων στην Αγγλική γλώσσα, κατανόησης και παραγωγής γραπτού και προφορικού λόγου, σε ένα αυθεντικό επικοινωνιακό πλαίσιο.

Ο στόχος της εργασίας αυτής είναι η πρακτική εφαρμογή των βασικών αρχών της εκπαιδευτικής θεωρίας. Στην αρχή της εργασίας επιχειρείται μια σύντομη ανασκόπηση της βιβλιογραφίας και των ερευνών που έχουν πραγματοποιηθεί σχετικά με την παιδαγωγική αξιοποίηση των ιστοεξερευνήσεων, την χρησιμοποίηση πηγών και βίντεο από το διαδίκτυο στη διδασκαλία της Αγγλικής ως ξένης γλώσσας. Στη συνέχεια, με βάση τη σχετική βιβλιογραφία, προτείνουμε μια ιστοεξερεύνηση που μπορεί να υλοποιηθεί στο πλαίσιο της διδασκαλίας της Αγγλικής για μαθητές επιπέδου γλωσσομάθειας Β1. Παρουσιάζουμε τον βασικό της σχεδιασμό, τα στάδια υλοποίησής της, και τα αναμενόμενα θετικά αποτελέσματα από την υλοποίησή της, ιδιαίτερα αυτά που σχετίζονται με την ενίσχυση της ομαδοσυνεργατικής μάθησης, της κριτικής και δημιουργικής σκέψης, της αξιοποίησης αυθεντικού υλικού, και της ανάπτυξης όλων των γλωσσικών δεξιοτήτων. Παρέχουμε, επίσης, οδηγίες για την επιτυχημένη εφαρμογή της ιστοεξερεύνησης, έτσι ώστε τα ψηφιακά και τεχνολογικά μέσα να αξιοποιηθούν αποτελεσματικά, να αποτελέσουν μια καινοτόμο προσέγγιση και να συμβάλουν θετικά στην αύξηση των κινήτρων των μαθητών και στην εκμάθηση της Αγγλικής γλώσσας. Οι εκπαιδευτικοί της Αγγλικής γλώσσας μπορούν να προσαρμόσουν τις δραστηριότητες που προτείνονται και να διευρύνουν το εύρος της προτεινόμενης ιστοεξερεύνησης, την αξιοποίηση των ψηφιακών και τεχνολογικών μέσων και των συνεργατικών εργαλείων για να ανταποκριθούν στις ανάγκες και τα χαρακτηριστικά των δικών τους μαθητών-τριών και το γενικότερο πλαίσιο της διδασκαλίας τους.

Λέξεις – κλειδιά: ψηφιακά και τεχνολογικά μέσα, ιστοεξερευνήσεις, διαδίκτυο, Αγγλική γλώσσα

«ΠΑΜΕ ΠΑΙΔΙΑ ΣΤΗΝ ΕΚΚΛΗΣΙΑ!». ΜΙΑ ΚΑΛΗ ΠΡΑΚΤΙΚΗ ΣΤΟ ΜΑΘΗΜΑ ΤΩΝ ΘΡΗΣΚΕΥΤΙΚΩΝ ΜΕ ΑΞΙΟΠΟΙΗΣΗ ΠΟΛΥΜΕΣΙΚΟΥ ΥΛΙΚΟΥ

Κέρκυρα, Ελλάδα
e-mail: ifakazis@sch.gr

ΠΕΡΙΛΗΨΗ

Το άρθρο αυτό αναφέρεται σε μάθημα Θρησκευτικών που έλαβε χώρα σε μαθητές Γ΄ τάξης Γυμνασίου, και πιο συγκεκριμένα στο Δέσκειο Γυμνάσιο Πάργας κατά το σχολικό έτος 2022-2023. Πιο συγκεκριμένα η θεματική ενότητα με την οποία ασχοληθήκαμε εμείς αφορούσε το κεφάλαιο «Λατρεία και τέχνη σε Ανατολή και Δύση», και ιδιαιτέρως το κομμάτι της αρχιτεκτονικής και της ζωγραφικής του ορθόδοξου χριστιανικού ναού, οπότε θεωρήσαμε πρόσφορο να αξιοποιήσουμε σχετικό λογισμικό. Κάποιοι από τους στόχους που θέσαμε ήταν: να αναγνωρίζουν σε ποιο ρυθμό ανήκει ένας χριστιανικός ναός, να γνωρίζουν βασικές πληροφορίες σχετικά με την αγιογράφηση του ναού και τους συμβολισμούς αυτής, να πληροφορηθούν σχετικά με τη λατρευτική ζωή που λαμβάνει χώρα στον ορθόδοξο ναό κ.ά. Όσον αφορά το υλικό που χρησιμοποιήσαμε ήταν το βιβλίο της Φλώρας Τζανακάκη (Tzanakaki, 2008) «Πάμε στην Εκκλησία!», το οποίο περιέχει CD με λογισμικό και δραστηριότητες.

Το λογισμικό περιλαμβάνει στο αρχικό μενού ως κύριες ενότητες: τα «Περιεχόμενα», όπου περιλαμβάνονται 18 υποενότητες με τα κύρια σημεία της παρουσίασης, για να επιλέξει κάποιος μεμονωμένα το συγκεκριμένο κομμάτι που θέλει να παρακολουθήσει· την «Έναρξη παρουσίασης», όπου ο χρήστης μπορεί να παρακολουθήσει όλες τις ενότητες ως ενιαία παρουσίαση από το avatar του λογισμικού· τις «360 μοίρες», όπου δίνεται η δυνατότητα εικονικής περιήγησης 360 μοιρών στο κέντρο του ναού· τις «Δραστηριότητες», όπου περιέχονται ψηφιακές δραστηριότητες, οι οποίες αντιστοιχούν σε κάποιες από τις ενότητες που παρουσιάζονται από το avatar στο λογισμικό.

Το μάθημα στην τάξη έλαβε χώρα σε τρεις φάσεις. Αρχικά έγινε ενημέρωση των μαθητών δίνοντας βασικές πληροφορίες σχετικά με τη θεματική και το λογισμικό που θα γινόταν χρήση. Εν συνεχεία έγινε προβολή με βιντεοπροβολέα του λογισμικού, με εικονική ξενάγηση από avatar σε εκκλησιαστικό ναό των Αθηνών, δίνοντας βασικές πληροφορίες σχετικά με την αρχιτεκτονική και τη λατρευτική ζωή στο χριστιανικό ναό. Ακολούθως προχωρήσαμε σε επίλυση ψηφιακών δραστηριοτήτων που υπάρχουν στο εν λόγω λογισμικό, σχετικές με την προβολή που έλαβε χώρα πιο πριν. Κάποιες από τις δραστηριότητες που ασχοληθήκαμε είχαν να κάνουν με: τους ρυθμούς των ναών, τον προσανατολισμό του ναού, τα μέρη του ναού, τις εικόνες του τέμπλου και την εικονογράφηση του ναού. Στις ασκήσεις αυτές συνήθως δίνονται τέσσερις εικόνες, π.χ. με τους βασικούς ρυθμούς ναών (βασιλική, βασιλική με τρούλο, σταυροειδής με τρούλο, κατακόμβη), και τέσσερα πλαίσια με τα ονόματα του κάθε ρυθμού. Ο χρήστης θα πρέπει να σύρει με τον κέρσορα κάθε εικόνα στο σωστό πλαίσιο.

Σε επόμενη φάση έγινε επίσκεψη σε τοπικό ορθόδοξο εκκλησιαστικό ναό και εκκλησιαστικό μουσείο με ξενάγηση από τον ιερέα του ναού. Οι μαθητές παρατήρησαν διά ζώσης τα εκκλησιαστικά εκθέματα, τα μέρη του ναού και τις αγιογραφίες, με δυνατότητα για ερωτήσεις και διευκρινίσεις από τον ιερέα και τον Θεολόγο τους. Σε τρίτη φάση δόθηκε φύλλο εργασίας όπου οι μαθητές συνεργαζόμενοι σε ομάδες απάντησαν σε ερωτήσεις σχετικά με το μάθημα και τη διδακτική επίσκεψη που πραγματοποιήθηκαν τις προηγούμενες ημέρες.

Όσον αφορά τους στόχους που θέσαμε θεωρούμε ότι αυτοί επιτεύχθηκαν σε ικανοποιητικό βαθμό, ενώ αυξήθηκαν και τα μαθησιακά κίνητρα των μαθητών. Τις νέες τεχνολογίες γενικά τις αξιοποιήσαμε και τις αξιοποιούμε και πριν και μετά τη σχολική χρονιά που αναφέρουμε στο άρθρο μας (π.χ. χρήση διαδραστικού πίνακα, αξιοποίηση powerpoint, βίντεο από youtube κ.ά.). Συμπερασματικά, θεωρήσαμε ότι η χρήση πολυμεσικού υλικού αποτελεί μια εναλλακτική διδακτική προσέγγιση του μαθήματος των Θρησκευτικών στο Γυμνάσιο, η οποία συμπορεύεται με τη γενικότερη ανάπτυξη των ψηφιακών μέσων στην κοινωνία αλλά και στην εκπαίδευση, και η οποία μπορεί να συμβάλλει τα μέγιστα στην καλύτερη αφομοίωση της διδακτικής ύλης από τους μαθητές.

Λέξεις κλειδιά: ορθόδοξος χριστιανικός ναός, λογισμικό, εικονική ξενάγηση, προβολή, δραστηριότητες, επίσκεψη.

ΘΠ11: Δυναμικά περιβάλλοντα μάθησης και Ψηφιακά Εκπαιδευτικά Εργαλεία

Η ΠΛΑΤΦΟΡΜΑ ESEP (ΕΥΡΩΠΑΪΚΗ ΠΛΑΤΦΟΡΜΑ ΓΙΑ ΤΗΝ ΕΚΠΑΙΔΕΥΣΗ ΣΤΑ ΣΧΟΛΕΙΑ) ΩΣ ΜΕΣΟ ΑΝΑΠΤΥΞΗΣ ΨΗΦΙΑΚΩΝ ΔΕΞΙΟΤΗΤΩΝ ΓΙΑ ΕΚΠΑΙΔΕΥΤΙΚΟΥΣ ΚΑΙ ΜΑΘΗΤΕΣ – ETWINNING & ERASMUS+

Ζαντραβέλη Βαρβάρα

ΠΕΡΙΛΗΨΗ

Η παρούσα μελέτη θα επικεντρωθεί στον τρόπο με τον οποίο η πρόσφατα ενοποιημένη πλατφόρμα, **ESEP** (European School Education Platform - Ευρωπαϊκή Πλατφόρμα Σχολικής Εκπαίδευσης), μπορεί να χρησιμεύσει ως μέσο για την προώθηση, την ανάπτυξη και την καλλιέργεια των ψηφιακών δεξιοτήτων των μελών της εκπαιδευτικής κοινότητας.

Η Ευρωπαϊκή Πλατφόρμα Σχολικής Εκπαίδευσης (ESEP) αποτελεί το σημείο συνάντησης για την εκπαιδευτική κοινότητα σε ολόκληρη την Ευρώπη, συμπεριλαμβανομένου του σχολικού προσωπικού, των μαθητών, των ερευνητών και των υπευθύνων χάραξης πολιτικής. Η πλατφόρμα φιλοξενεί επίσης το **eTwinning**, την διαδικτυακή κοινότητα για τα σχολεία της Ευρώπης. Τα οφέλη για τους εκπαιδευτικούς είναι πολυάριθμα. Στοχεύει στην επαγγελματική τους ανάπτυξη παρέχοντας πρόσβαση σε μια ποικιλία προγραμμάτων συνεχούς επαγγελματικής κατάρτισης, τόσο διαδικτυακά όσο και δια ζώσης, επιτρέποντας στους εκπαιδευτικούς να ενισχύσουν τις δεξιότητές τους και να παραμένουν ενημερωμένοι για τις τελευταίες εκπαιδευτικές πρακτικές. Προσφέρει ευκαιρίες δικτύωσης μέσω της κοινότητας eTwinning, όπου οι εκπαιδευτικοί μπορούν να συνδεθούν, να συνεργαστούν και να ανταλλάξουν ιδέες με συναδέλφους από όλη την Ευρώπη, καλλιεργώντας μια κουλτούρα κοινής μάθησης και καινοτομίας. Τέλος, συμβάλλει στην ανταλλαγή πόρων, καθώς παρέχει ένα πλούσιο αποθετήριο διδακτικού υλικού, επιτρέποντας στους εκπαιδευτικούς να έχουν πρόσβαση και να συνεισφέρουν περιεχόμενο που υποστηρίζει αποτελεσματικές στρατηγικές διδασκαλίας. Αντίστοιχα, η πλατφόρμα προωθεί τη συνεργατική μάθηση μεταξύ των μαθητών. Μέσω της συμμετοχής τους σε έργα eTwinning, η ESEP επιτρέπει στους μαθητές να εμπλακούν σε κοινές δραστηριότητες με συνομηλίκους τους από διαφορετικές χώρες, προωθώντας την πολιτιστική ανταλλαγή και την ομαδική εργασία. Επιπλέον, ενισχύει τον ψηφιακό γραμματισμό εμπλέκοντας τους μαθητές σε δραστηριότητες που τους βοηθούν να αναπτύξουν βασικές ψηφιακές δεξιότητες μέσω της χρήσης διαφόρων διαδικτυακών εργαλείων και πλατφορμών για μάθηση και συνεργασία. Οι μαθητές μπορούν επίσης να λάβουν πιστοποιητικά που αναγνωρίζουν τη συμμετοχή και τα επιτεύγματά τους, ενισχύοντας το κίνητρό τους και εμπλουτίζοντας το εκπαιδευτικό τους προφίλ.

Η πλατφόρμα ESEP έχει σημαντικό αντίκτυπο στην εκπαιδευτική κοινότητα, ενισχύοντας τους δεσμούς και τη συνεργασία μεταξύ εκπαιδευτικών και μαθητών σε ευρωπαϊκό επίπεδο. Συμμετέχοντας σε προγράμματα όπως το eTwinning, οι δάσκαλοι αποκτούν πρόσβαση σε καινοτόμες διδακτικές πρακτικές, ενώ οι μαθητές εξοικειώνονται με σύγχρονα τεχνολογικά εργαλεία, αναπτύσσοντας ταυτόχρονα δεξιότητες επικοινωνίας και ομαδικής εργασίας. Επιπλέον, η πλατφόρμα διευκολύνει την ανταλλαγή εκπαιδευτικού υλικού και βέλτιστων πρακτικών, υποστηρίζοντας τη συνεχή επαγγελματική εξέλιξη των εκπαιδευτικών και προωθώντας τη δια βίου μάθηση. Μέσω αυτών των δυνατοτήτων, η ESEP διαδραματίζει κρίσιμο ρόλο στη διαμόρφωση ενός ενιαίου και δυναμικού ευρωπαϊκού εκπαιδευτικού χώρου, όπου η γνώση και η καινοτομία μοιράζονται και αξιοποιούνται προς όφελος όλων των μελών της κοινότητας. Παρά τα πλεονεκτήματά της, η χρήση της πλατφόρμας ESEP συνοδεύεται επίσης από προκλήσεις. Ένα από τα κύρια ζητήματα που αντιμετωπίζουν οι χρήστες είναι η ανάγκη εξοικείωσης με το περιβάλλον της πλατφόρμας, καθώς απαιτείται χρόνος και εκπαίδευση για την πλήρη αξιοποίησή της. Επιπλέον, η άνιση πρόσβαση στην τεχνολογία και τις ψηφιακές δεξιότητες μπορεί να αποτελέσει εμπόδιο για ορισμένους εκπαιδευτικούς και μαθητές, περιορίζοντας τη συμμετοχή τους στις διαθέσιμες δραστηριότητες. Οι γλωσσικές διαφορές μπορούν επίσης να δημιουργήσουν δυσκολίες, καθώς η επικοινωνία και η συνεργασία μεταξύ χρηστών από διαφορετικές χώρες απαιτούν επαρκή γλωσσική επάρκεια. Παρά τις δυσκολίες αυτές, η συνεχής ανάπτυξη και προσαρμογή της πλατφόρμας, μαζί με την υποστήριξη που παρέχεται στους χρήστες, μπορούν να βοηθήσουν στην αντιμετώπιση αυτών των προκλήσεων, διασφαλίζοντας ότι η ESEP παραμένει ένας πολύτιμος πόρος για την ευρωπαϊκή εκπαιδευτική κοινότητα.

Αυτή η μελέτη θα δώσει έμφαση στην καλλιέργεια των ψηφιακών δεξιοτήτων, ιδιαίτερα μέσω της περιγραφής συγκεκριμένων έργων στα οποία συμμετέχουν καθηγητές και μαθητές από το **4ο Γυμνάσιο Πρέβεζας** κατά την υλοποίηση προγραμμάτων eTwinning και Erasmus+.

Λέξεις-κλειδιά: ESEP, ψηφιακές δεξιότητες, εκπαιδευτικοί, μαθητές, eTwinning, Erasmus+

ΠΕΡΙΛΗΨΗ

Οι παραδοσιακές, στατικές προσεγγίσεις προσφέρουν τεχνικές κατάκτησης γεωμετρικών εννοιών, που μπορεί, σαφώς, να λειτουργούν ως «σκαλωσιές» και εργαλεία για την κατάκτηση της γνώσης. Στην ψηφιοχώρα των σημερινών, γηγενών μαθητών, όμως, καθίστανται μάλλον απαραίτητη η εισαγωγή και ενσωμάτωση, ως διδακτικών μέσων, και των τεχνολογικών, διαμεσολαβητικών εργαλείων. Οι δραστηριότητες μάθησης εφαρμόζονται και υλοποιούνται ευκολότερα με την επιστράτευση της τεχνολογίας. Πράγματι, η μάθηση της Γεωμετρίας έχει «πλεονεκτική μεταχείριση» από την Τεχνολογία, αφού με τη βοήθεια ψηφιακών εργαλείων οι μαθητές μοντελοποιούν γεωμετρικά θέματα και μέσα σε μαθησιακά περιβάλλοντα ζωτικής διάδρασης μελετούν μια πληθώρα γεωμετρικών μορφών.

Η δυναμική μοντελοποίηση του παραδοσιακού, στατικού ευκλείδειου περιβάλλοντος, μέσω του συρσίματος (drag-mode), αποτελεί το σημαντικότερο χαρακτηριστικό γνώρισμα των Δυναμικών Περιβαλλόντων Γεωμετρίας. Το σύρσιμο εισάγει τη μετακίνηση, την τροποποίηση και τον μετασχηματισμό στη στατική Ευκλείδεια Γεωμετρία, με διατήρηση, όμως, των βασικών σχέσεων και ιδιοτήτων των σχημάτων, ενώ φαίνεται ότι είναι και ένας ισχυρός πυρήνας πλούσιων διδακτικών και μαθησιακών δυνατοτήτων. Οι διερευνητικές δυνατότητες του συρσίματος αποτελούν σημαντικές, γνωστικές παροχές αλλά και ένα ισχυρό παιδαγωγικό εργαλείο υποστήριξης γεωμετρικών συλλογισμών, ιδιαίτερα κατά τον σχηματισμό υποθέσεων και εικασιών. Η κατασκευή ενός σχήματος στην οθόνη αντιπροσωπεύει μια ολόκληρη κλάση γεωμετρικών αντικειμένων, αφού για παράδειγμα, κατά τη δημιουργία ενός κύκλου, το σύρσιμο χαρίζει μιαν απειρία κύκλων, απλώς και μόνο με μιαν απλή κίνηση του ποντικιού.

Η παρούσα εργασία θα παρουσιάσει, αναλυτικά και με παραδείγματα, επτά διαφορετικούς τύπους συρσίματος, τους οποίους μετέρχονται οι μαθητές, κατά τη διάρκεια της διαδικασίας επίλυσης ανοιχτών προβλημάτων και σε σχέση με τη χρήση του ποντικιού: Το σύρσιμο περιπλάνησης, το σύρσιμο ελέγχου, το σύρσιμο λανθάνοντα γεωμετρικού τόπου, το σύρσιμο γραμμής αλλά και το δεσμευμένο, το καθοδηγούμενο και το εξαρτημένο σύρσιμο είναι οι κρίσιμες μορφές του συρσίματος, μέσω των οποίων παρουσιάζονται με «κινηματογραφική» απεικόνιση, διάφορες αναπαραστάσεις σχημάτων.

Λέξεις – κλειδιά: Σύρσιμο, Γεωμετρία, Δυναμικά Περιβάλλοντα, Συστήματα

ΧΑΡΤΟΓΡΑΦΩΝΤΑΣ ΤΟΝ ΠΟΛΙΤΙΣΜΟ ΚΑΙ ΤΟ ΠΕΡΙΒΑΛΛΟΝ: ΜΙΑ ΨΗΦΙΑΚΗ ΕΚΠΑΙΔΕΥΤΙΚΗ ΟΔΥΣΣΕΙΑ

ΠΕΡΙΛΗΨΗ

Η παρούσα εργασία παρουσιάζει ένα καινοτόμο εκπαιδευτικό έργο που ενσωματώνει ψηφιακά εργαλεία για την προώθηση των πολυγραμματισμών και της βιωματικής μάθησης. Εστιάζοντας στις πολιτιστικές και περιβαλλοντικές συνδέσεις μεταξύ Θεσσαλονίκης και Κωνσταντινούπολης, το έργο επικεντρώνεται στους Στόχους Βιώσιμης Ανάπτυξης 14 (Ζωή κάτω από το νερό), 15 (Ζωή στην ξηρά) και 17 (Συνεργασίες για τους Στόχους). Χρησιμοποιώντας το λογισμικό ArcGIS, οι μαθητές δημιούργησαν έναν διαδραστικό χάρτη που εντοπίζει μια διαδρομή από ξηρά και θάλασσα, επισημαίνοντας βασικούς πολιτιστικούς, ιστορικούς και οικολογικούς χώρους. Μέσω αυτής της διαδικασίας, ανέπτυξαν τον ψηφιακό γραμματισμό, την περιβαλλοντική και πολιτισμική ευαισθητοποίηση. Το πρόγραμμα ενίσχυσε την κριτική σκέψη και τις συνεργατικές δεξιότητες των μαθητών/τριών, ενώ παράλληλα ενθάρρυνε την ενεργό συμμετοχή και τη διεπιστημονική κατανόηση. Το ArcGIS επέτρεψε τον συνδυασμό της επεξεργασίας γεωχωρικών δεδομένων με τη δημιουργική έκφραση, υποστηρίζοντας μια ολοκληρωμένη προσέγγιση στην εκπαίδευση. Τελικά, το έργο καταδεικνύει πώς η συνέργεια της τεχνολογίας, του πολιτισμού και της περιβαλλοντικής εκπαίδευσης μπορεί να ενισχύσει τη βιωσιμότητα και τη συνεργασία. Ο ψηφιακός χάρτης που δημιουργήθηκε από τους/τις μαθητές/τριες χρησιμεύει τόσο ως μαθησιακό αντικείμενο όσο και ως δημόσια πρόσκληση για την εξερεύνηση της κοινής κληρονομιάς και του μέλλοντος αυτών των δύο ιστορικών πόλεων.

Λέξεις – κλειδιά: ψηφιακά μέσα, πολυγραμματισμοί, ArcGIS, διαδραστικός χάρτης, κριτική σκέψη.

ΕΠΑΝΕΡΜΗΝΕΙΑ ΤΩΝ ΕΠΙΠΕΔΩΝ ΓΕΩΜΕΤΡΙΚΗΣ ΣΚΕΨΗΣ ΤΩΝ VAN HIELE ΥΠΟ ΤΗ ΣΥΝΗΓΟΡΙΑ ΤΩΝ ΠΛΕΟΝΕΚΤΗΜΑΤΩΝ ΤΩΝ ΔΥΝΑΜΙΚΩΝ ΠΕΡΙΒΑΛΛΟΝΤΩΝ ΓΕΩΜΕΤΡΙΑΣ

ΠΕΡΙΛΗΨΗ

Η σχολική Γεωμετρία, που παρουσιάζεται αξιωματικά, υποθέτει ότι οι μαθητές σκέφτονται, μάλλον, με ένα τυπικά συμπερασματικό τρόπο. Μια άλλη θεωρία, όμως, σχετικά με την εκμάθηση της Γεωμετρίας είναι η θεωρία των van Hiele, που αποτελεί, σήμερα, παράγοντα με μεγάλη επίδραση στη σχολική Γεωμετρία, αφού παρά την τεράστια έρευνα για τη γεωμετρική σκέψη, καμία πρόταση δεν έχει προσελκύσει τόσο πολύ την προσοχή όσο η θεωρία των επιπέδων γεωμετρικής σκέψης των van Hiele. Μάλιστα, έχει αναγνωρισθεί η προστιθέμενη αξία του μοντέλου των van Hiele, κατά την περιγραφή, τη μελέτη και την ανάδειξη της γεωμετρικής σκέψης. Το μοντέλο των van Hiele απαρτίζεται από δύο κύριες πτυχές. Η πρώτη αποτελείται από μια ιεραρχική ακολουθία πέντε επιπέδων, συλλογιστικών διεργασιών και γεωμετρικής σκέψης. Το δεύτερο μέρος ενδιαφέρεται για την ανάπτυξη της διαίσθησης των μαθητών και επικεντρώνεται στις φάσεις εκμάθησης, στα μέσα, δηλαδή, τα οποία μετέρχεται ένας δάσκαλος, προκειμένου να αυξήσει την απόδοση των μαθητών του, μέσω αυτών των διάφορων επιπέδων σκέψης.

Έρευνες έχουν δείξει ότι τα Λογισμικά Δυναμικής Γεωμετρίας ενισχύουν τους μαθητές στη μελέτη των γεωμετρικών εννοιών στα παρωθητικά πλαίσια ενεργοποίησης και αξιοποίησης της θεωρίας των van Hiele. Οι δραστηριότητες που βασίζονται στα επίπεδα σκέψης των van Hiele καθίστανται ευκολότερες και αποτελεσματικότερες με την παρουσία διάφορων τεχνολογικών εργαλείων και ειδικά μέσω Δυναμικών Λογισμικών Γεωμετρίας. Η παρούσα εργασία αφού περιγράψει τη θεωρία των van Hiele επιχειρηματολογεί, ακολούθως, υπέρ των Δυναμικών Λογισμικών Γεωμετρίας ως πλεονεκτικών εργαλείων μη στατικής οπτικοποίησης, που δύνανται να προαγάγουν τη σκέψη των μαθητών και προτείνει, και μέσω παραδειγμάτων, μια επαναδιατύπωση και επανερμηνεία των πέντε επιπέδων σκέψης των van Hiele, υπό το φως των Δυναμικών Περιβαλλόντων Γεωμετρίας.

Λέξεις – κλειδιά: Γεωμετρία, Δυναμικά Περιβάλλοντα, Συστήματα, van Hiele

ΠΕΡΙΛΗΨΗ

Στην παρούσα εργασία γίνεται διερεύνηση του θεωρητικού και τεχνολογικού υποβάθρου του IoT, καθώς και των προκλήσεων και των προοπτικών εφαρμογής του με έμφαση στην εκπαιδευτική διαδικασία.

Η εργασία βασίζεται σε υφιστάμενες ερευνητικές μελέτες, θεωρητικά μοντέλα και εμπειρικά δεδομένα σχετικά με την ενσωμάτωση του IoT στην εκπαίδευση. Αναλύεται η δομή και η λειτουργία των IoT συστημάτων στον εκπαιδευτικό τομέα, και η διασύνδεση τους με άλλες τεχνολογίες αιχμής όπως η τεχνητή νοημοσύνη (AI), το υπολογιστικό νέφος (Cloud Computing) και η μηχανική μάθηση (ML). Παρουσιάζονται οι σημαντικότερες εφαρμογές του IoT στην εκπαιδευτική διαδικασία όπως οι έξυπνες τάξεις, οι διαδραστικοί πίνακες, οι φορητές συσκευές ανίχνευσης φυσιολογικών και μαθησιακών παραμέτρων, καθώς και οι αυτοματοποιημένες πλατφόρμες ανάλυσης μαθησιακών δεδομένων.

Γίνεται επίσης αναφορά στην εξατομικευμένη μάθηση, στην αποδοτική διαχείριση πόρων και την διεύρυνση προσβασιμότητας σε εκπαιδευτικά μέσα. Ιδιαίτερη έμφαση δίνεται στην κριτική αξιολόγηση των προτερημάτων του IoT στην εκπαιδευτική διαδικασία καθώς και στις προκλήσεις που ανακύπτουν από την ευρεία χρήση του. Οι προκλήσεις που προκύπτουν από την χρήση του IoT σχετίζονται με κρίσιμα θέματα όπως η ασφάλεια και η ιδιωτικότητα των δεδομένων, το κόστος υλοποίησης των υποδομών καθώς και η προϋπόθεση για εξειδικευμένη τεχνολογική κατάρτιση των εκπαιδευτικών.

Παρουσιάζονται τέλος οι μελλοντικές εξελίξεις του IoT στην εκπαιδευτική κοινότητα υιοθετώντας το σε ένα ευρύτερο τομέα τεχνολογικών εξελίξεων που θα επηρεάζουν την διαχείριση και την αποτελεσματικότητα της εκπαιδευτικής διαδικασίας. Στον τομέα της εκπαίδευσης η αξιοποίηση του Διαδικτύου των πραγμάτων (IoT) και των ψηφιακών μέσων αναμορφώνει την μαθησιακή διαδικασία καθιστώντας την περισσότερο διαδραστική και αποτελεσματική. Το Διαδίκτυο των πραγμάτων έχει την δυνατότητα να μετασχηματίσει τις διδακτικές πρακτικές και την οργανωτική διαχείριση των εκπαιδευτικών ιδρυμάτων μέσω της συλλογής και της ανάλυσης δεδομένων σε πραγματικό χρόνο. Η εξέλιξη του IoT μπορεί να συνδυαστεί με άλλες σημαντικές τεχνολογίες όπως η επαυξημένη πραγματικότητα (AR), η εικονική πραγματικότητα (VR) και η τεχνολογία blockchain για την ασφαλή διαχείριση εκπαιδευτικών δεδομένων ώστε να αναδείξουν ένα νέο, περισσότερο ευφυές και προσαρμόσιμο εκπαιδευτικό περιβάλλον.

Η συστηματική αξιοποίηση του IoT στον εκπαιδευτικό τομέα απαιτεί την ανάπτυξη στρατηγικών πολιτικών, τη θέσπιση ηθικού και νομικού πλαισίου καθώς και την εξασφάλιση βιώσιμων τεχνολογικών υποδομών.

Λέξεις – κλειδιά: Διαδίκτυο των πραγμάτων (IoT), Έξυπνη εκπαίδευση, Τεχνητή νοημοσύνη(AI), Μηχανική Μάθηση(ML), επαυξημένη και εικονική πραγματικότητα(AR/VR), Blockchain.

ΠΕΡΙΛΗΨΗ

Η ραγδαία ανάπτυξη της τεχνητής νοημοσύνης (ΤΝ) και η ενσωμάτωσή της στην εκπαίδευση δημιουργεί νέες προοπτικές στη διδασκαλία των φυσικών επιστημών, προσφέροντας δυναμικά εργαλεία που ενισχύουν τη μαθησιακή διαδικασία. Στην παρούσα εργασία, διερευνάται η αξιοποίηση του ChatGPT ως εργαλείου υποστήριξης της διδασκαλίας της ηλικίας της Γης στη δευτεροβάθμια εκπαίδευση. Συγκεκριμένα, παρουσιάζεται ένα σενάριο διδασκαλίας που συνδυάζει την ενεργό διερεύνηση, τη συνεργατική μάθηση και την κριτική σκέψη, επιτρέποντας στους μαθητές να αλληλεπιδράσουν με το ChatGPT για την αναζήτηση, την επεξεργασία και την αξιολόγηση επιστημονικών πληροφοριών

Η μεθοδολογία βασίζεται σε ένα μικτό μοντέλο διδασκαλίας (blended learning), το οποίο συνδυάζει τη συμβατική διδασκαλία με την τεχνολογία, όπου οι μαθητές διατυπώνουν ερωτήσεις, αναλύουν απαντήσεις και συγκρίνουν τις πληροφορίες του ChatGPT με καθιερωμένες επιστημονικές πηγές. Παράλληλα, διερευνώνται οι προκλήσεις που προκύπτουν από τη χρήση τέτοιων εργαλείων στην εκπαίδευση, όπως η ανάγκη για ψηφιακό γραμματισμό, η αξιοπιστία των πληροφοριών και ο ρόλος του εκπαιδευτικού ως διαμεσολαβητή στη μαθησιακή διαδικασία.

Το προτεινόμενο διδακτικό σενάριο αποτελείται από τρία μέρη: 1. Εισαγωγική διδασκαλία με παρουσίαση βασικών εννοιών σχετικά με την ηλικία της Γης και τις επιστημονικές μεθόδους χρονολόγησης. 2. Αλληλεπίδραση με το ChatGPT, όπου οι μαθητές, οργανωμένοι σε ομάδες, διατυπώνουν ερωτήματα και αναζητούν απαντήσεις, αξιολογώντας τις πληροφορίες που λαμβάνουν. 3. Αξιολόγηση και ανατροφοδότηση, με σκοπό τη σύγκριση της μαθησιακής προόδου και τη διερεύνηση της εμπειρίας των μαθητών από τη χρήση του εργαλείου..

Η ποσοτική ανάλυση της έρευνας βασίστηκε στα εξής εργαλεία συλλογής δεδομένων: προ-τεστ και μετα-τεστ, για τη μέτρηση της γνωστικής εξέλιξης των μαθητών πριν και μετά τη χρήση του ChatGPT. Ερωτηματολόγια κλίμακας Likert, για την αποτύπωση της εμπειρίας των μαθητών και της αντίληψής τους σχετικά με την αξιοπιστία και τη χρησιμότητα τέτοιων εργαλείων. Στατιστική επεξεργασία δεδομένων, με σκοπό την εξαγωγή συμπερασμάτων σχετικά με την αποτελεσματικότητα της ενσωμάτωσης του ChatGPT στη διδακτική πρακτική.

Διαπιστώθηκε ότι η χρήση του ChatGPT ενίσχυσε τη μαθησιακή εμπλοκή, ενθάρρυνε τη διερευνητική προσέγγιση και την ανάπτυξη της κριτικής σκέψης των μαθητών.. Μέσω της στατιστικής ανάλυσης των δεδομένων, προέκυψε ότι βελτίωσε το γνωστικό επίπεδο και τον βαθμό κατανόησης των εννοιών Ωστόσο, αναδεικνύεται η ανάγκη για κατάλληλη παιδαγωγική καθοδήγηση και εκπαιδευτική πολιτική που θα διασφαλίσει την ορθή αξιοποίηση τέτοιων εργαλείων ΤΝ στην εκπαιδευτική διαδικασία.

Λέξεις – κλειδιά: Τεχνητή Νοημοσύνη, Εκπαίδευση 4.0, ChatGPT, Ηλικία της Γης

ΠΕΡΙΛΗΨΗ

Η πανδημία COVID-19 προσέφερε (μέσα στην τραγωδία της) ένα εφαλτήριο ηλεκτρονικής ύπαρξης για πολλές πτυχές και λειτουργίες της κοινωνίας. Όλα τα πιθανά συστατικά στοιχεία των επιχειρησιακών λειτουργιών, εν μέσω lockdowns και κοινωνικής αποστασιοποίησης, μετέφεραν τις δραστηριότητές τους στο διαδίκτυο. Ως εκ τούτου, και η εκπαίδευση ακολούθησε, με ένα ευρύ φάσμα εφαρμογών και αποτελεσματικότητας, που κυμάνθηκε από την ανάδυση πολλών βέλτιστων πρακτικών έως την εμφάνιση πολλών αποκλίσεων, όπως νέοι τρόποι αντιγραφής και υπολογιστές που ήταν συνδεδεμένοι σε πλατφόρμα εξ αποστάσεως εκπαίδευσης αλλά χωρίς την παρουσία του χρήστη. Η μετα-πανδημική πραγματικότητα έχει αφήσει τον κόσμο να προσπαθεί να μετριάσει και να επουλώσει πληγές από πολλές συνέπειες του κορονοϊού, αλλά ταυτόχρονα, και ειδικότερα όσον αφορά στον εκπαιδευτικό τομέα, να παραδίδει πληθώρα εργαλείων που μπορούν να αξιοποιηθούν στη διδασκαλία, αποκαλύπτοντας έτσι ένα νέο φάσμα δυνατοτήτων και ευκαιριών για την εκπαίδευση.

Πολλά πανεπιστήμια στον κόσμο όπου η συμμετοχή στην τάξη δεν είναι υποχρεωτική, καταγράφουν ιστορικά χαμηλά ποσοστά προσέλευσης, σε σημείο που δημιουργούνται δύο διακριτά τμήματα φοιτητών, οι ενεργοί και ανενεργοί. Ταυτόχρονα, η εμπειρία που αποκτήθηκε από τα ηλεκτρονικά μέσα μάθησης μπορεί να προσφέρει μια άμεσα διαθέσιμη λύση για τη συμπερίληψη και την ενίσχυση της συμμετοχής, καθώς και για τη συνέχεια της διδασκαλίας. Κατά συνέπεια, ο εκπαιδευτικός τομέας έχει τη δυνατότητα να χρησιμοποιήσει εργαλεία για τη ζωντανή μετάδοση διαλέξεων, την καταγραφή τους και τον διαμοιρασμό τους σε ιδιωτικές ή/και δημόσια προσβάσιμες πλατφόρμες βίντεο/streaming. Ωστόσο, ανακύπτει το ερώτημα του πώς μπορούν να μετριαστούν τα ζητήματα που προκύπτουν, όπως η διασφάλιση των προσωπικών δεδομένων και, ταυτόχρονα, η μεγιστοποίηση της φυσικής παρουσίας στην τάξη, καθώς οι τεχνολογίες εξ αποστάσεως και υβριδικής διδασκαλίας μπορεί να εκληφθούν ως παράγοντες που απομακρύνουν τους φοιτητές από την αίθουσα, επιβαρύνοντας έτσι την ήδη προβληματική κατάσταση της χαμηλής προσέλευσης.

Στην προσπάθεια αξιοποίησης της τεχνολογίας στην εκπαίδευση, μπορεί να χρησιμοποιηθεί πληθώρα εργαλείων, αλλά ταυτόχρονα πρέπει να διαφυλαχθεί η εκπαιδευτική αξία που διαμορφώνεται εντός της τάξης. Αυτή η κατάσταση αναδεικνύεται ως δίλημμα, καθώς από τη μία πλευρά η τεχνολογία μπορεί να διευκολύνει την παράδοση του προγράμματος σπουδών, επιτρέποντας την επίτευξη των αντίστοιχων μαθησιακών αποτελεσμάτων, από την άλλη όμως μπορεί να θεωρηθεί ως μετάβαση προς την υποβάθμιση της κουλτούρας της τάξης και της αλληλεπίδρασης, οδηγώντας ενδεχομένως σε τελική μείωση της προσέλευσης. Εδώ έγκειται το ερευνητικό κενό και η συμβολή της παρούσας εργασίας. Μετά την πανδημία, αναδύεται το εύλογο ερώτημα σχετικά με τα εργαλεία που παραμένουν αποτελεσματικά για την προώθηση της εξ αποστάσεως μάθησης, των υβριδικών τάξεων, και του branding της εκπαίδευσης, όπου πολλά εκπαιδευτικά ιδρύματα αξιοποιούν εδώ και πολλά χρόνια, ακόμη και πριν από την πανδημία. Αξιοσημείωτα παραδείγματα αποτελούν, για παράδειγμα, το MIT OpenCourseWare (με 5,63 εκατομμύρια συνδρομητές και 7,5 χιλιάδες βίντεο, όπου ολόκληρα μαθήματα έχουν ομαδοποιηθεί σε λίστες βίντεο και είναι προσβάσιμα δωρεάν), το Harvard, το Πανεπιστήμιο Brown και πολλά άλλα, τα οποία χρησιμοποιούν την τεχνολογία ως μέσο προώθησης της γνώσης και της επωνυμίας τους, ενώ ταυτόχρονα ενισχύουν και τη φυσική παρουσία στην τάξη.

Η κατανόηση των τεχνολογιών που μπορεί να φέρουν επανάσταση στη διδασκαλία θα επιτρέψει υψηλότερη αλληλεπίδραση, αλλά ταυτόχρονα πρέπει να δοθεί προσοχή ώστε να μην γίνεται κατάχρηση της τεχνολογίας. Με τη βοήθεια της τεχνητής νοημοσύνης, η παρούσα εργασία παρέχει ένα πλαίσιο αποτελεσματικών στρατηγικών που μπορούν να ενισχύσουν την προσέλευση στην τάξη σε συνδυασμό με τη χρήση της εξ αποστάσεως μάθησης και της υβριδικής διδασκαλίας. Στόχος είναι η δημιουργία μιας εργαλειοθήκης για την αξιοποίηση της τεχνολογίας στην εκπαίδευση, η οποία θα συμμορφώνεται με την ειδική νομοθεσία που διέπει τη σύγχρονη και ασύγχρονη μάθηση, θα προστατεύει τα προσωπικά δεδομένα και, ταυτόχρονα, θα ενισχύει τη φυσική παρουσία στην τάξη. Η έρευνα αυτή είναι σημαντική καθώς

παρέχει την απαραίτητη εστίαση και ανάλυση σε ένα θέμα που απαιτεί εμπλουτισμό. Η έρευνα επικεντρώνεται στην τριτοβάθμια εκπαίδευση, αλλά τα αποτελέσματά της μπορούν να αναπαραχθούν σε όλες τις βαθμίδες διδασκαλίας.

Λέξεις – κλειδιά: Τριτοβάθμια εκπαίδευση, υβριδική διδασκαλία, συμμετοχή στην εκπαίδευση, ηλεκτρονική μάθηση, παρακολούθηση μαθημάτων, συμπερίληψη στην εκπαίδευση.

ΠΡΟΩΘΗΣΗ ΤΗΣ ΕΠΙΛΥΣΗΣ ΠΡΟΒΛΗΜΑΤΩΝ ΣΤΗΝ ΕΚΠΑΙΔΕΥΣΗ STEM: ΑΝΙΧΝΕΥΤΗΣ ΑΕΡΙΩΝ ΜΕ ΕΝΣΩΜΑΤΩΜΕΝΗ ΤΕΧΝΗΤΗ ΝΟΗΜΟΣΥΝΗ

ΠΕΡΙΛΗΨΗ

Αυτή η μελέτη ερευνά την αποτελεσματικότητα της Εκπαίδευσης Βασισμένης σε Προβλήματα (Problem Based Learning - PBL) και της Εκπαίδευσης Δημιουργών (Maker Education) στην ενίσχυση των δεξιοτήτων επίλυσης προβλημάτων μαθητών δευτεροβάθμιας εκπαίδευσης μέσω της ανάπτυξης ενός Ανιχνευτή Αερίων με ενσωματωμένη Τεχνητή Νοημοσύνη (ΤΝ). Με την ενσωμάτωση της ΤΝ στην βιωματική εκπαίδευση STEM, αυτή η έρευνα παρέχει πρακτικές γνώσεις για καινοτόμες εκπαιδευτικές προσεγγίσεις που ενθαρρύνουν την κριτική σκέψη και την τεχνική επάρκεια.

Χρησιμοποιήθηκε μια μικτή μέθοδος έρευνας, που περιλάμβανε 32 μαθητές δευτεροβάθμιας επαγγελματικής εκπαίδευσης του τομέα Ηλεκτρολογίας, Ηλεκτρονικής και Αυτοματισμού. Οι συμμετέχοντες κατηγοριοποιήθηκαν σε τρεις ομάδες: Δημιουργικής Μάθησης (πρακτικά έργα), Εικονικής Μάθησης (προσομοιώσεις) και Κλασικής Μάθησης (παραδοσιακή διδασκαλία). Η μελέτη αξιολόγησε τις στάσεις των μαθητών, πριν και μετά την διδακτική παρέμβαση, συγκεντρώνοντας ποσοτικές και ποιοτικές πληροφορίες ως προς την επίλυση προβλημάτων με χρήση ερωτηματολογίου και ημι-δομημένων συνεντεύξεων. Παρόλο που το μικρό μέγεθος δείγματος περιορίζει τη γενίκευση, τα αποτελέσματα παρέχουν σημαντικές γνώσεις για την αποτελεσματικότητα της μάθησης μέσω κατασκευών με ενσωματωμένη ΤΝ.

Τα ευρήματα δείχνουν ότι ενώ όλες οι ομάδες παρουσίασαν βελτιώσεις στις ικανότητες επίλυσης προβλημάτων, η ομάδα Δημιουργικής Μάθησης παρουσίασε την σημαντικότερη πρόοδο. Οι μαθητές παρουσίασαν υψηλό επίπεδο ενδιαφέροντος και εμπλοκής ενώ τόνισαν ότι έκριναν ως εξαιρετική την εφαρμογή των μαθησιακών τους εμπειριών στον πραγματικό κόσμο. Επιπλέον, η μελέτη εντόπισε προκλήσεις όπως οι περιορισμοί πόρων, η εκπαίδευση των εκπαιδευτικών και η ανάγκη για δομημένη ενσωμάτωση της ΤΝ σε εκπαιδευτικά περιβάλλοντα. Μια εκτενέστερη ανάλυση των δεδομένων σχεδιάζεται να ενισχύσει τα ευρήματα.

Για να ενισχυθεί η πρακτική εφαρμογή, αυτή η παρουσίαση περιλαμβάνει συγκεκριμένα παραδείγματα ενσωμάτωσης της τεχνητής νοημοσύνης στην τάξη, θα συζητήσει τις καλύτερες πρακτικές για την εφαρμογή της και θα αναδείξει πιθανές προκλήσεις σε φάση εφαρμογής ευρείας κλίμακας κατασκευών με ενσωματωμένη ΤΝ. Η συζήτηση θα παρέχει στους εκπαιδευτικούς και τους ερευνητές πρακτικές γνώσεις για την ανάπτυξη βιωματικών δραστηριοτήτων μάθησης μέσω κατασκευών με ενσωματωμένη ΤΝ σε προγράμματα σπουδών STEM, με έμφαση στην καλλιέργεια τόσο τεχνικών όσο και ήπιων δεξιοτήτων στη δευτεροβάθμια εκπαίδευση.

Λέξεις-κλειδιά: Εκπαίδευση Δημιουργών (Maker Education), Εκπαίδευση Βασισμένη σε Προβλήματα (Problem Based Learning - PBL), STEM, Τεχνητή Νοημοσύνη (ΤΝ), Ανιχνευτής Αερίων με ενσωματωμένη ΤΝ.

ΠΕΡΙΛΗΨΗ

Βασικό χαρακτηριστικό της ανθρώπινης προσωπικότητας είναι η δημιουργική σκέψη. Παρόλο που ο άνθρωπος είναι φύσει δημιουργικό ον, ο βαθμός ανάπτυξης αυτής της ικανότητας εξαρτάται από το πόσο υποστηρικτικό είναι το κοινωνικο-πολιτισμικό πλαίσιο, συμπεριλαμβανομένης της εκπαίδευσης. Η καλλιέργειά της αποτελεί πρωταρχικό στόχο για τα περισσότερα εκπαιδευτικά συστήματα του 21ου αιώνα. Ωστόσο, τα σχολεία στην Ελλάδα φαίνεται πώς δυσκολεύονται να δημιουργήσουν τις προϋποθέσεις για να σκέφτονται οι μαθητές/τριες «έξω από το κουτί». Σύμφωνα με εμπειρικά δεδομένα, η δημιουργικότητα ενισχύεται με την εμπλοκή των μαθητών σε διαδικασίες δημιουργικής γραφής, ιδίως όταν αυτές αξιοποιούν τη γενετική τεχνητή νοημοσύνη, η οποία ανοίγει νέους δρόμους στη σύνθετη διαδικασία της συγγραφής. Ωστόσο, η τεχνολογία της τεχνητής νοημοσύνης έχει προκαλέσει και έντονο προβληματισμό με πολλούς να ανησυχούν πως προξενεί έντονη εξάρτηση και τελικά αποδυνάμωση του ανθρώπινου παράγοντα.

Σκοπός, λοιπόν, της παρούσας μελέτης είναι η διερεύνηση των αντιλήψεων των μαθητών/τριών Γυμνασίου για την επίδραση της τεχνητής νοημοσύνης στη δημιουργική σκέψη. Ειδικότερα τίθενται τα ακόλουθα ερευνητικά ερωτήματα: 1) Πώς οι μαθητές αξιολογούν την επίδραση της τεχνητής νοημοσύνης στον τομέα της δημιουργικότητας; 2) Πώς οι μαθητές αντιλαμβάνονται την ορθή χρήση της τεχνητής νοημοσύνης για την καλλιέργεια της δημιουργικής σκέψης;

Η τρέχουσα μελέτη υιοθετεί έναν διερευνητικό, ποιοτικό σχεδιασμό και τη φαινομενολογική προσέγγιση γιατί επιχειρεί την κατανόηση των προσδοκιών και της σημασίας που οι ίδιοι οι μαθητές αποδίδουν στην τεχνητή νοημοσύνη. Επιπλέον, εντάσσεται στο θεωρητικό πλαίσιο της αυτοπροσδιοριζόμενης μάθησης και της κοινωνικής θεωρίας γνωστικής ανάπτυξης του Vygotsky. Είκοσι μαθητές/τριες Γυμνασίου ασχολήθηκαν με δραστηριότητες δημιουργικής γραφής αξιοποιώντας το ChatGPT. Με δεδομένο ότι λίγα είναι γνωστά για το πώς οι μαθητές/τριες γράφουν δημιουργικά με τη χρήση των βοηθών γραφής και πώς πρέπει να είναι η διδασκαλία με τέτοια εργαλεία, το μάθημα έλαβε τη μορφή εργαστηρίου με συγκεκριμένους μαθησιακούς στόχους και δραστηριότητες, που αποσκοπούσαν στην κατάκτηση των δεξιοτήτων της ανάκλησης, κατανόησης, εφαρμογής, ανάλυσης και αναστοχασμού. Μετά την ολοκλήρωση των δραστηριοτήτων, οι συμμετέχοντες αξιολόγησαν τη δημιουργικότητα στα έργα τους με τη βοήθεια μιας ρουμπρίκας βασιζόμενης στα κριτήρια της εικόνας, της φωνής, των χαρακτήρων και της ιστορίας (Mozaffari, 2013; Zedelius et al., 2018), συμπλήρωσαν ένα ερωτηματολόγιο με ερωτήσεις ανοιχτού τύπου και συμμετείχαν σε ομάδες εστίασης.

Τα περιγραφικά δεδομένα αναλύθηκαν θεματικά και αποκάλυψαν ότι οι συμμετέχοντες αξιοποίησαν την τεχνητή νοημοσύνη σε δυσκολίες που συνάντησαν. Με τη βοήθειά της είχαν πρόσβαση σε εναλλακτικές ιδέες, οι οποίες καλλιέργησαν την αποκλίνουσα σκέψη και τη δεξιότητα επίλυσης προβλημάτων ενώ ταυτόχρονα αναπτύχθηκε και ο συναισθηματικός τομέας με την ενίσχυση ψυχολογικών αναγκών. Προέκυψε, ωστόσο, ότι δεν είχαν όλοι οι μαθητές την ικανότητα κριτικής αξιολόγησης, παραγωγής πρωτότυπων ιδεών και διατήρησης της αυθεντικής φωνής τους. Η κατανόηση των νέων δυνατοτήτων και των περιορισμών θα μπορούσε να βοηθήσει τους εκπαιδευτικούς στον προσεκτικότερο σχεδιασμό της διδασκαλίας και στην υιοθέτηση αποτελεσματικότερων στρατηγικών για την ενίσχυση της δημιουργικότητας.

Λέξεις – κλειδιά: δημιουργική σκέψη, τεχνητή νοημοσύνη, αντιλήψεις μαθητών, δευτεροβάθμια εκπαίδευση

ΚΑΛΛΙΕΡΓΕΙΑ ΤΗΣ ΗΠΙΑΣ ΔΕΞΙΟΤΗΤΑΣ ΤΗΣ ΚΡΙΤΙΚΗΣ ΣΚΕΨΗΣ ΜΕΣΩ ΤΝ ΣΤΟ ΔΗΜΟΤΙΚΟ ΣΧΟΛΕΙΟ

ΔΠΕ Θεσπρωτίας
email: dgioka@sch.gr

ΠΕΡΙΛΗΨΗ

Η παρούσα μελέτη διερευνά την αξιοποίηση των chatbots, στην καλλιέργεια της ήπιας δεξιότητας της κριτικής σκέψης σε μαθητές των μεγαλύτερων τάξεων του Δημοτικού Σχολείου. Σχεδιάστηκαν διδακτικά σενάρια σε πέντε γνωστικά αντικείμενα (Γλώσσα, Ιστορία, Αγωγή του Πολίτη, Γεωγραφία, Εργαστήρια Δεξιοτήτων), με τη συνδυαστική χρήση τριών δωρεάν εργαλείων: ChatGPT, Gemini 2.0 Flash και Gemini 2.0 Flash Thinking. Τα σενάρια εφαρμόστηκαν σε δύο Δημοτικά Σχολεία του νομού Θεσπρωτίας και η αποτίμηση των αποτελεσμάτων έγινε μέσω ημιδομημένων συνεντεύξεων σε πέντε εκπαιδευτικούς.

Τα ευρήματα ανέδειξαν ότι τα chatbots συνέβαλαν καθοριστικά στον σχεδιασμό δραστηριοτήτων που ενισχύουν την ανάλυση και τη σύγκριση απόψεων, την τεκμηρίωση ή την αμφισβήτηση άποψης, τον εντοπισμό έμμεσων μηνυμάτων και fake news, τη λήψη τεκμηριωμένης άποψης και την επίλυση προβλήματος. Επιπλέον, πρότειναν καινοτόμες ιδέες που υπερέβαιναν το αρχικό διδακτικό πλάνο των εκπαιδευτικών.

Ωστόσο, με το prompting παρατηρήθηκαν περιορισμοί ως προς την ακρίβεια συγκεκριμένων πληροφοριών, γεγονός που αντιμετωπίστηκε με τη συνδυαστική χρήση της διαδικτυακής αναζήτησης (searching). Συνολικά, η μελέτη επιβεβαιώνει τις προοπτικές των εργαλείων ΤΝ ως υποστηρικτικών μηχανισμών στην εκπαιδευτική πράξη, επισημαίνοντας όμως την ανάγκη για κριτικό ψηφιακό γραμματισμό τόσο από τους εκπαιδευτικούς όσο και από τους μαθητές.

Τέλος η έρευνα θέτει τη βάση για μελλοντικά προγράμματα ευρύτερης κλίμακας, ενταγμένα στο θεωρητικό πλαίσιο της Θεωρίας της Αλλαγής.

Λέξεις – κλειδιά: chatbots, καλλιέργεια κριτικής σκέψης, δημοτικό σχολείο.

ΠΕΡΙΛΗΨΗ

Το έργο αποτελεί ένα Ευρωπαϊκό project που εκπονήθηκε στην πλατφόρμα ESEP τη σχολική χρονιά 2024-2025. Στο έργο συμμετέχουν 19 μέλη, από την Ελλάδα, Τουρκία, Πορτογαλία, Ιταλία και Ρουμανία. Ιδρυτές του είναι το 23ο Νηπιαγωγείο Σταυρούπολης Θεσσαλονίκης και το ICS di Scandale από το San Mauro Marchesato, Ιταλία.

Το πρόγραμμα επικεντρώνεται στην παιδαγωγική αξιοποίηση της τεχνητής νοημοσύνης και την ενσωμάτωσή της σε υπάρχοντα μαθησιακά περιβάλλοντα και πλατφόρμες μάθησης. Αφόρμηση αποτελεί μία βαλίτσα που βρίσκεται τυχαία έξω από το νηπιαγωγείο, γεμάτη με παλιές φωτογραφίες και αντικείμενα μιας γυναίκας της παλιάς εποχής. Οι φωτογραφίες αποτελούν το έναυσμα για να ξεκινήσουμε το ταξίδι μας, από τις παλιές φωτογραφίες έως την Τεχνητή Νοημοσύνη. Ένα ταξίδι γνωριμίας με την ιστορία της φωτογραφίας, τις ασπρόμαυρες και έγχρωμες φωτογραφίες, τις φωτογραφίες πορτραίτα, τη φωτογραφία του δρόμου, αλλιώτικες φωτογραφίες με στόχο την καλλιέργεια ενσυναίσθησης και ευαισθησίας, σε συνδυασμό με τις δυνατότητες που προσφέρουν τα εργαλεία Τεχνητής Νοημοσύνης στη βελτίωση, δημιουργία, επεξεργασία και μετατροπή της εικόνας.

Εργαλεία ΤΝ που χρησιμοποιήθηκαν είναι τα εξής:

ΠΕΡΙΛΗΨΗ

Η ενσωμάτωση και εφαρμογή της Τεχνητής Νοημοσύνης τα τελευταία χρόνια έχει αυξητική πορεία επηρεάζοντας βασικούς πυλώνες της παγκόσμιας οικονομίας. Η δυναμική της πορεία δεν άφησε ανεπηρέαστη την εκπαίδευση, αντιθέτως σήμερα υπάρχει ένα έντονο ενδιαφέρον για τη διερεύνηση της. Η παρούσα έρευνα είναι ένα βιβλιογραφικό άρθρο μέσα από το οποίο αξιοποιούνται η ήδη υπάρχουσες μελέτες, με σκοπό την εξέταση της τεχνητής νοημοσύνης στον τομέα της εκπαίδευσης και πιο συγκεκριμένα εντοπίζοντας τόσο τα πλεονεκτήματα όσο και τα μειονεκτήματα της. Κρίνεται σημαντική η διερεύνηση του υπό εξέταση πεδίου μέσα από την παρουσία εφαρμογών όπως το ChatGPT και Gemini οι οποίες χρησιμοποιούνται συχνά από τους εκπαιδευόμενους.

Τα ευρήματα της έρευνας βοηθούν τα μέλη της εκπαιδευτικής κοινότητας και τους αντίστοιχους φορείς, προκειμένου να αξιολογήσουν την αναγκαιότητα της ομαλής μετάβασης σε μια νέα κανονικότητα, διασφαλίζοντας κάθε ηθικό ζήτημα. Η ορθολογιστική χρήση του ChatGPT και Gemini είναι απαραίτητη για τη διατήρηση της ισορροπίας ανάμεσα στη δυαδική σχέση εκπαιδευτή και εκπαιδευόμενου.

Οι ερευνήτριες για τις ανάγκες της παρούσας επιστημονικής εργασίας χρησιμοποίησαν τη δευτερογενή έρευνα διαμέσου της βιβλιογραφίας, η οποία αναφέρεται σε μια συστηματική μέθοδο ανασκόπησης και κριτικής σχετικά με το υπό εξέταση επιστημονικό πεδίο, βοηθώντας στον προσδιορισμό της τρέχουσας γνώσης, των κενών και των μελλοντικών ερευνητικών κατευθύνσεων. Πραγματοποιήθηκε συστηματική αναζήτηση σε έγκριτες βάσεις δεδομένων, βιβλιοθήκες, ηλεκτρονικά αποθετήρια και άλλες επιστημονικές πηγές για την συλλογή ερευνών σχετικά με την τεχνητή νοημοσύνη στην εκπαίδευση με απώτερο στόχο την αξιολόγηση των πλεονεκτημάτων και μειονεκτημάτων της.

Λέξεις – κλειδιά: Τεχνητή Νοημοσύνη, Εκπαίδευση, ChatGPT, Gemini

e-mail: lapkl@yahoo.gr

ΠΕΡΙΛΗΨΗ

Η παρούσα εργασία εξετάζει τις εφαρμογές της Τεχνητής Νοημοσύνης (ΤΝ) στην πρωτοβάθμια εκπαίδευση ,εστιάζοντας στη βελτίωση της μαθησιακής διαδικασίας ,στην εξατομίκευση της μάθησης και στην υποστήριξη των εκπαιδευτικών. Μέσω βιβλιογραφικής επισκόπησης και ανάλυσης των υπαρχουσών εφαρμογών ,αναδεικνύονται οι βασικές χρήσεις της ΤΝ, όπως η προσωποποιημένη μάθηση, η αυτόματη αξιολόγηση, οι έξυπνοι βοηθοί και τα εκπαιδευτικά παιχνίδια**.**

Ιδιαίτερη έμφαση δίνεται στη χρήση της ΤΝ για την ανάπτυξη γλωσσικών δεξιοτήτων ,την ενσωμάτωση μαθητών με ειδικές ανάγκες και την ανάπτυξη γλωσσικών δεξιοτήτων και τη δημιουργία διαδραστικών περιβαλλόντων μάθησης. Στην παρούσα μελέτη, παρουσιάζεται ένα διδακτικό σενάριο για μαθητές/μαθήτριες ΣΤ' Δημοτικού, όπου εργαλεία ΤΝ, όπως το ChatGPT ,το LanguageTool, το Imagine AI και το Book Creator υποστηρίζουν τη διαδικασία παραγωγής γραπτού λόγου, ενισχύοντας τη δημιουργικότητα και τις ψηφιακές δεξιότητες των μαθητών/μαθητριών.

Τα αποτελέσματα δείχνουν ότι η ΤΝ συμβάλλει στη διαφοροποιημένη μάθηση, την ενίσχυση της ενεργούς συμμετοχής και την ανάπτυξη δεξιοτήτων του 21^{ου} αιώνα. Ωστόσο επισημαίνονται προκλήσεις, όπως η ηθική χρήση ,η προστασία προσωπικών δεδομένων και ο ρόλος του/της εκπαιδευτικού. Παρά τα εμπόδια, η ενσωμάτωση της ΤΝ στην εκπαίδευση προσφέρει σημαντικές ευκαιρίες για τον εκσυγχρονισμό της διδακτικής πρακτικής και την ενίσχυση της μαθησιακής εμπειρίας.

Λέξεις – κλειδιά: Τεχνητή Νοημοσύνη, Παραγωγή Λόγου, Εκπαίδευση, Τεχνολογία

ΠΕΡΙΛΗΨΗ

Στις μέρες μας εκατομμύρια μαθητές παγκοσμίως δεν έχουν εξασφαλισμένο ένα ασφαλές σχολικό περιβάλλον, καθώς σε σχολεία ανά την υφήλιο τα παιδιά και οι έφηβοι μαθαίνουν να ζουν με τον φόβο ως συνέπεια του σχολικού εκφοβισμού. Η σχετική μελέτη αναδεικνύει τη σοβαρότητα και τη περιπλοκότητα του κοινωνικού φαινομένου που ονομάζεται σχολικός εκφοβισμός. Την τελευταία δεκαετία, κυρίως συνεπεία της γρήγορης ψηφιοποίησης, οι εφαρμογές για κινητές συσκευές και ηλεκτρονικούς υπολογιστές επηρεάζουν καθοριστικά τις ζωές των παιδιών καθώς οι μαθητές σε σημαντικό βαθμό ζουν και μαθαίνουν μέσα από αυτές. Σκοπός της παρούσας μελέτης είναι να ενισχύσει την κατανόησή μας σχετικά με τον τρόπο με τον οποίο οι έξυπνες, διαδραστικές τεχνολογίες συμβάλλουν στη μάθηση και στην ενδυνάμωση των χρηστών των εφαρμογών που στοχεύουν στην καταπολέμηση του σχολικού εκφοβισμού.

Λέξεις – κλειδιά: Σχολικός εκφοβισμός, τεχνητή νοημοσύνη, εφαρμογές κατά του σχολικού εκφοβισμού.

ΠΕΡΙΛΗΨΗ

Η ραγδαία εξέλιξη της Τεχνητής Νοημοσύνης (ΤΝ) έχει επιφέρει σημαντικές αλλαγές στη χρήση των ψηφιακών μέσων στην εκπαιδευτική καθημερινότητα, εισάγοντας πολυάριθμες ευκαιρίες, καθώς και προκλήσεις που απαιτούν διερεύνηση σχετικά με το ρόλο της ΤΝ στην εκπαιδευτική διδασκαλία και μάθηση. Τα εργαλεία που λειτουργούν με τη χρήση της ΤΝ αναδιαμορφώνουν τις παιδαγωγικές προσεγγίσεις επιτρέποντας εξατομικευμένες μαθησιακές εμπειρίες, έξυπνα συστήματα διδασκαλίας και προσαρμοστικές αξιολογήσεις. Ωστόσο, αυτές οι εξελίξεις εγείρουν ανησυχίες αναφορικά με το απόρρητο των δεδομένων και τα ηθικά διλήμματα.

Στην Κύπρο, η ενσωμάτωση της ΤΝ στο εκπαιδευτικό σύστημα παραμένει σε πρώιμο στάδιο, παρά την αυξανόμενη επιθυμία και το έντονο ενδιαφέρον για την αναβάθμιση της εκπαιδευτικής διδασκαλίας. Η παρούσα έρευνα εξετάζει τόσο τις προοπτικές της παγκόσμιας εκπαιδευτικής κοινότητας όσο και το επίπεδο εξοικείωσης των Κύπριων εκπαιδευτικών της πρωτοβάθμιας, δευτεροβάθμιας και τριτοβάθμιας εκπαίδευσης σχετικά με την πιθανή ενσωμάτωση της ΤΝ στην εκπαιδευτική πραγματικότητα. Το ερωτηματολόγιο που συμπλήρωσαν οι συμμετέχοντες, αναδεικνύει την αντίληψη σχετικά με την έννοια της ΤΝ, το ποσοστό εξοικείωσης με τα εργαλεία της ΤΝ, τα συναισθήματα που προκαλεί μια πιθανή ενσωμάτωση, καθώς και τον βαθμό προθυμίας για την υιοθέτηση της ΤΝ στους εκπαιδευτικούς χώρους. Εμπεριέχονται, επίσης, ερωτήσεις σχετικά με τα πλεονεκτήματα και τα μειονεκτήματα των εργαλείων ΤΝ στην εκπαίδευση. Αξίζει να σημειωθεί ότι αρκετοί εκπαιδευτικοί ανησυχούν αναφορικά με το αν υπάρχει ή πόσο σύντομα θα μπορούσε να υπάρξει η κατάλληλη υποδομή για την ενσωμάτωση των αντίστοιχων εργαλείων στα εκπαιδευτικά περιβάλλοντα και το μεγαλύτερο ποσοστό αυτών επιθυμεί να έχει το δικαίωμα να αποδεχθεί ή να απορρίψει πιθανή ενσωμάτωση, καθώς οι εκπαιδευτικοί είναι οι άμεσοι μεταδότες της γνώσης.

Η ενσωμάτωση των εργαλείων Τεχνητής Νοημοσύνης στην εκπαιδευτική διαδικασία, προϋποθέτει την κατάλληλη προετοιμασία των εκπαιδευτικών, γεγονός που αναδεικνύει την επιτακτική ανάγκη διενέργειας σεμιναρίων και συνεδρίων, στα οποία οι εκπαιδευτικοί θα έχουν τη δυνατότητα να διατυπώσουν τις απόψεις τους, να ανταλλάξουν εμπειρίες και να συζητήσουν τους προβληματισμούς τους. Τα ευρήματα της παρούσας έρευνας συμβάλλουν στον ευρύτερο διάλογο για τον ψηφιακό μετασχηματισμό της εκπαίδευσης, σκιαγραφώντας στρατηγικές κατευθύνσεις για την υπεύθυνη και αποτελεσματική ενσωμάτωση της ΤΝ στο εκπαιδευτικό σύστημα.

Λέξεις – κλειδιά: ΤΝ στην εκπαίδευση, προσαρμοστική μάθηση, εκπαιδευτικό σύστημα της Κύπρου, παγκόσμια εκπαιδευτική κοινότητα, οφέλη ενσωμάτωσης ΤΝ, αναμενόμενες προκλήσεις της ΤΝ

ΤΕΧΝΗΤΗ ΝΟΗΜΟΣΥΝΗ ΣΤΗΝ ΕΚΠΑΙΔΕΥΣΗ: ΜΙΑ ΒΙΒΛΙΟΜΕΤΡΙΚΗ ΑΝΑΛΥΣΗ ΤΩΝ ΤΑΣΕΩΝ ΚΑΙ ΤΩΝ ΜΕΛΛΟΝΤΙΚΩΝ ΚΑΤΕΥΘΥΝΣΕΩΝ ΤΗΣ ΕΡΕΥΝΑΣ- ΠΡΩΤΑ ΕΥΡΗΜΑΤΑ

ΠΕΡΙΛΗΨΗ

Η Τεχνητή Νοημοσύνη (ΤΝ) στην εκπαίδευση έχει εξελιχθεί τα τελευταία χρόνια σε έναν από τους πιο ραγδαία αναπτυσσόμενους και δυναμικούς ερευνητικούς τομείς. Η αυξανόμενη ενσωμάτωσή της στις εκπαιδευτικές διαδικασίες έχει δημιουργήσει νέες ευκαιρίες για καινοτομία στη διδασκαλία και τη μάθηση, αλλά και προκλήσεις που σχετίζονται με ζητήματα δεοντολογίας, ακαδημαϊκής ακεραιότητας και παιδαγωγικής αξιοποίησης. Η παρούσα μελέτη πραγματοποιεί μια συστηματική βιβλιομετρική ανάλυση της ερευνητικής δραστηριότητας γύρω από την ΤΝ στην εκπαίδευση, με στόχο τη χαρτογράφηση των τάσεων, των θεματικών αξόνων και των μελλοντικών κατευθύνσεων του πεδίου. Το δείγμα περιλαμβάνει συναφείς δημοσιεύσεις από τη βάση δεδομένων Scopus για την περίοδο 2016–2024, οι οποίες αναλύθηκαν με τα εργαλεία Bibliometrix R και VOSviewer. Τα πρώτα αποτελέσματα αναδεικνύουν μια εκθετική αύξηση του επιστημονικού ενδιαφέροντος μετά το 2019, με κυρίαρχες θεματικές τις εφαρμογές των μεγάλων γλωσσικών μοντέλων, την ηθική της ΤΝ, τη μαθησιακή εξατομίκευση και την ακαδημαϊκή ακεραιότητα. Η έρευνα συμβάλλει στη διαμόρφωση μιας επίκαιρης εικόνας του γνωστικού πεδίου και προσφέρει χρήσιμες προτάσεις για μελλοντικές ερευνητικές και εκπαιδευτικές πρωτοβουλίες.

ΠΕΡΙΛΗΨΗ

Η αξιοποίηση της Τεχνητής Νοημοσύνης στην εκπαίδευση απασχολεί σε μεγάλο βαθμό τα τελευταία χρόνια εκπαιδευτικούς αλλά και ερευνητές της εκπαίδευσης. Η παρούσα εργασία ερευνά τις απόψεις μελλοντικών εκπαιδευτικών σε σχέση με τις δυνατότητες που παρέχει η ΤΝ στον εκπαιδευτικό αλλά και στον μαθητή/μαθήτρια, τα προβλήματα και τους κινδύνους που μπορεί να κρύβει η επέκταση της χρήσης της ΤΝ και τέλος για τις προϋποθέσεις και συνθήκες για τη αποτελεσματική και ωφέλιμη χρήση της τεχνολογίας αυτής σε κάθε πεδίο της μαθησιακής διαδικασίας. Η έρευνα έγινε σε σπουδαστές του Ετήσιου Προγράμματος Παιδαγωγικής Κατάρτισης (Ε.Π.ΠΑΙ.Κ.) της Α.Σ.ΠΑΙ.Τ.Ε., διάφορων ειδικοτήτων και επιπέδων διδακτικής εμπειρίας. Οι σπουδαστές αυτοί είναι εν δυνάμει μελλοντικοί εκπαιδευτικοί της πρωτοβάθμιας και κυρίως της δευτεροβάθμιας εκπαίδευσης. Για την συλλογή των δεδομένων χρησιμοποιήθηκε ανώνυμο ηλεκτρονικό ερωτηματολόγιο με ερωτήσεις κλειστού (κλίμακας Likert) αλλά και ανοιχτού τύπου. Πέρα από τα δημογραφικά στοιχεία, το ερωτηματολόγιο συλλέγει στοιχεία σε σχέση με την τεχνολογική επάρκεια των σπουδαστών, την εξοικείωσή τους με την ΤΝ και τις εφαρμογές της, τις αντιλήψεις τους σχετικά με τους τρόπους χρήσης της ΤΝ από εκπαιδευτικούς και μαθητές/μαθήτριες αλλά και τα πιθανά αρνητικά αποτελέσματα από την χρήση της.

Τα αποτελέσματα της έρευνας δείχνουν ότι οι σπουδαστές είναι σε μεγάλο βαθμό εξοικειωμένοι με την ψηφιακή τεχνολογία και ειδικά με την ΤΝ και ότι χρησιμοποιούν εφαρμογές της. Θεωρούν ότι η ΤΝ μπορεί να υποστηρίξει τους εκπαιδευτικούς, ιδίως στην προετοιμασία και σχεδίαση του μαθήματος, στην δημιουργία εκπαιδευτικού υλικού και στην προσέλκυση της προσοχής των μαθητών. Πιστεύουν ότι η ΤΝ μπορεί να βοηθήσει και τους μαθητές/μαθήτριες, αλλά σε μικρότερο βαθμό σε σχέση με τους εκπαιδευτικούς. Συγκεκριμένα, η ΤΝ μπορεί να συνεισφέρει στην εξοικείωσή τους με τη τεχνολογία αλλά και στην παροχή γνώσεων. Οι σπουδαστές αναγνωρίζουν κινδύνους και προβλήματα που μπορεί να συνοδεύουν την αξιοποίηση της ΤΝ στην εκπαιδευτική διαδικασία. Πολύ μεγάλο ποσοστό των ερωτηθέντων θεωρεί ότι υπάρχει ο κίνδυνος παρεμπόδισης και υποβάθμισης της κριτικής σκέψης των μαθητών/-τριών καθώς και ο κίνδυνος εξάρτησης από την τεχνολογία και απομόνωσής τους από το πραγματικό περιβάλλον. Σε μικρότερο βαθμό τους προβληματίζει και ο κίνδυνος λογοκλοπής και παραβίασης πνευματικής ιδιοκτησίας. Η πλειονότητα των σπουδαστών θεωρεί ότι η ΤΝ θα μπορούσε να υποβαθμίσει τον ρόλο του εκπαιδευτικού. Τέλος, η έρευνα έδειξε ότι σχεδόν όλοι οι σπουδαστές θεωρούν επιβεβλημένη την εφαρμογή πολιτικών ορθής και αποτελεσματικής χρήσης της ΤΝ στην εκπαίδευση αλλά και την συστηματική επιμόρφωση των εκπαιδευτικών σε αυτή.

Λέξεις – κλειδιά: Τεχνητή νοημοσύνη, αντιλήψεις εκπαιδευτικών, ψηφιακές τεχνολογίες στη εκπαίδευση.

ΠΕΡΙΛΗΨΗ

Η παρούσα μελέτη εξετάζει την ερευνητική δραστηριότητα στον τομέα της ψηφιακής επαγγελματικής καθοδήγησης και συμβουλευτικής, υιοθετώντας μια ποσοτική βιβλιομετρική προσέγγιση. Το προς ανάλυση σύνολο δεδομένων περιλαμβάνει 167 δημοσιεύσεις, οι οποίες εκτείνονται χρονικά από το 1998 έως τις αρχές του 2025. Η μελέτη αξιοποιεί περιγραφική στατιστική, τεχνικές συνύπαρξης λέξεων-κλειδιών, ανάλυση θεματικών τάσεων και θεματική χαρτογράφηση, προκειμένου να αποσαφηνιστούν η δυναμική της επιστημονικής παραγωγής, τα δίκτυα συγγραφικής συνεργασίας και οι εννοιολογικές δομές του πεδίου. Τα ευρήματα υποδεικνύουν έναν σταθερό ετήσιο ρυθμό δημοσίευσης, με μέσο όρο 10,8 αναφορές ανά εργασία και 3,7 συγγραφείς ανά δημοσίευση. Αξιοσημείωτο είναι ότι μόλις το 14,4% των άρθρων φέρει διεθνή συν-συγγραφή. Οι δημοσιεύσεις σε επιστημονικά περιοδικά συνιστούν τον κυρίαρχο δίαυλο διάχυσης της επιστημονικής γνώσης, ενώ τα πρακτικά συνεδρίων και τα κεφάλαια σε συλλογικούς τόμους διαδραματίζουν συμπληρωματικό ρόλο στην επιστημονική επικοινωνία. Η ανάλυση των θεματικών τάσεων καταδεικνύει μια διανοητική μετάβαση: από ζητήματα θεσμικού και υποδομικού χαρακτήρα (2001-2005), στην ενσωμάτωση της ηλεκτρονικής μάθησης και της υποβοηθούμενης από υπολογιστή διδασκαλίας (2005-2012), και εν συνεχεία στην εφαρμογή της ψηφιακής καθοδήγησης σε εξειδικευμένα πεδία, όπως η ιατρική εκπαίδευση (2010-2014). Το ερευνητικό ενδιαφέρον κορυφώνεται την περίοδο 2022–2023, με τη θεματική εστίαση να μετατοπίζεται σε ζητήματα συναισθηματικής νοημοσύνης, παρακίνησης και εφαρμογών τεχνητής νοημοσύνης. Η θεματική χαρτογράφηση, εντοπίζει τους όρους *άνθρωποι, καθοδήγηση* και *διαδίκτυο* ως ανεπτυγμένες και κινητήριες έννοιες, ενώ παράλληλα αποτυπώνει την ανάδυση νέων θεματικών ενοτήτων σχετικών με την τεχνητή νοημοσύνη και τα chatbots. Συνολικά, τα αποτελέσματα αποτυπώνουν έναν ώριμο και εξελισσόμενο ερευνητικό τομέα, ο οποίος χαρακτηρίζεται από μεταβαλλόμενες θεματικές προτεραιότητες. Μελλοντικές ερευνητικές κατευθύνσεις ενδείκνυται να ενισχύσουν τη διεθνή επιστημονική συνεργασία, να διερευνήσουν τις ηθικές και δεοντολογικές διαστάσεις των εργαλείων καθοδήγησης που βασίζονται στην τεχνητή νοημοσύνη και να αντιμετωπίσουν τις ψηφιακές ανισότητες στα συστήματα επαγγελματικής υποστήριξης.

Λέξεις-κλειδιά: Συμβουλευτική, Ψηφιακά Μέσα, Συστηματική Ανασκόπηση, Επιστημομετρία.

Η ΧΡΗΣΗ ΤΗΣ ΤΕΧΝΗΤΗΣ ΝΟΗΜΟΣΥΝΗΣ ΣΕ ΜΑΘΗΤΕΣ ΜΕ ΜΑΘΗΣΙΑΚΕΣ ΔΥΣΚΟΛΙΕΣ – ΣΥΣΤΗΜΑΤΙΚΗ ΑΝΑΣΚΟΠΗΣΗ

ΠΕΡΙΛΗΨΗ

Οι μαθησιακές δυσκολίες είναι μια νευροαναπτυξιακή διαταραχή που επηρεάζει σημαντικό ποσοστό μαθητών παγκοσμίως, δημιουργώντας ακαδημαϊκές και κοινωνικοσυναισθηματικές προκλήσεις που μπορεί να επηρεάσουν την ενήλικη ζωή. Παρόλο που οι μαθησιακές δυσκολίες δεν είναι πλήρως αντιμετωπίσιμες, τα άτομα που ζουν με αυτές μπορούν να ενισχύσουν σημαντικά τις ικανότητές τους, με τη βοήθεια κατάλληλων μεθόδων διδασκαλίας και υποστηρικτικών εργαλείων. Ο έγκαιρος εντοπισμός των μαθησιακών δυσκολιών και η παροχή κατάλληλης παρέμβασης είναι υψίστης σημασίας όχι μόνο για την υποστήριξη των μαθητών με μαθησιακές δυσκολίες στην αντιμετώπιση των ακαδημαϊκών αναγκών τους αλλά και για την ενίσχυση της κοινωνικής και συναισθηματικής τους ευημερίας, της σωστής ανάπτυξής τους και τη βελτίωση της ποιότητας της ζωής τους. Η τεχνητή νοημοσύνη προσφέρει καινοτόμες δυνατότητες για την υποστήριξη των μαθητών με μαθησιακές δυσκολίες, προσφέροντας εξατομικευμένα ψηφιακά εργαλεία και στρατηγικές μάθησης προσαρμοσμένα στις ιδιαίτερες εκπαιδευτικές τους ανάγκες. Σκοπός αυτής της μελέτης είναι, μέσω της συστηματικής βιβλιογραφικής ανασκόπησης, να εξετάσει τις πιο πρόσφατες εφαρμογές τεχνητής νοημοσύνης που έχουν αναπτυχθεί για την υποστήριξη των μαθητών με μαθησιακές δυσκολίες και την αποτελεσματικότητά τους στη βελτίωση των ακαδημαϊκών τους επιδόσεων. Μέσα από τη βιβλιογραφική αναζήτηση στις βάσεις δεδομένων Scopus, PubMed και Google Scholar εντοπίστηκε περιορισμένος αριθμός μελετών αναφορικά με τον ρόλο της τεχνητής νοημοσύνης στην εκπαίδευση μαθητών με μαθησιακές δυσκολίες. Εντούτοις, μέσα από αυτές τις μελέτες φάνηκε ότι η τεχνητή νοημοσύνη μπορεί να ενισχύσει την εκπαιδευτική πορεία των ατόμων με μαθησιακές δυσκολίες και να διευκολύνει τη μαθησιακή διαδικασία, βελτιώνοντας τις μαθησιακές τους επιδόσεις, μειώνοντας τις προκλήσεις και τις ανισότητες που αντιμετωπίζουν και παρέχοντας με αυτόν τον τρόπο ίσες ευκαιρίες επιτυχίας στον εκπαιδευτικό τομέα. Η συστηματική ανασκόπηση της υπάρχουσας βιβλιογραφίας, σε συνδυασμό με τα ευρήματα της μελέτης, καταδεικνύει ουσιώδη κενά και ανάγκες στην ενσωμάτωση της τεχνητής νοημοσύνης στην εκπαίδευση μαθητών με μαθησιακές δυσκολίες. Συγκεκριμένα, για την περαιτέρω ανάπτυξη της τεχνητής νοημοσύνης στην εκπαίδευση, κρίνεται απαραίτητη η δημιουργία εφαρμογών που θα καλύπτουν τις μαθησιακές ανάγκες των μαθητών με μαθησιακές δυσκολίες και όχι μόνο των φοιτητών. Επιπλέον, η έρευνα επικεντρώνεται κυρίως στη δυσλεξία, αφήνοντας άλλες μαθησιακές δυσκολίες ανεξερεύνητες, γεγονός που αναδεικνύει την ανάγκη για περαιτέρω μελέτες. Παράλληλα, η έλλειψη ερευνών σχετικά με τις αντιλήψεις των εκπαιδευτικών υπογραμμίζει την ανάγκη διερεύνησης του ρόλου τους στην ενσωμάτωση της τεχνητής νοημοσύνης στη διδασκαλία. Τέλος, προτείνεται η περαιτέρω μελέτη υφιστάμενων εφαρμογών, με στόχο τη βελτίωση των αλγορίθμων εξατομίκευσης και τη βέλτιστη απόδοσή τους στην εκπαίδευση μαθητών και φοιτητών με μαθησιακές δυσκολίες.

Λέξεις – κλειδιά: Τεχνητή νοημοσύνη, μαθησιακές δυσκολίες, εξατομικευμένη μάθηση, ψηφιακά εργαλεία, στρατηγικές μάθησης, εξατομικευμένες παρεμβάσεις.

Η ΤΕΧΝΗΤΗ ΝΟΗΜΟΣΥΝΗ ΣΤΗΝ ΕΚΠΑΙΔΕΥΣΗ ΠΙΘΑΝΑ ΕΜΠΟΔΙΑ ΚΑΙ ΚΙΝΔΥΝΟΙ

Πέτσιου Χαρίκλεια
Σύμβουλος Εκπαίδευσης ΠΕ03
ΔΔΕ Ιωαννίνων
Ιωάννινα, Ελλάδα
e-mail: harapetsiou@yahoo.gr

ΠΕΡΙΛΗΨΗ

Κατά την ενσωμάτωση της Τεχνητής Νοημοσύνης (ΤΝ) στο πεδίο της εκπαίδευσης, είναι πιθανό να προκύψουν διάφορες προκλήσεις και δυνητικές απειλές. Παρά τις υποσχόμενες δυνατότητες της ΤΝ, η αλόγιστη εφαρμογή της εγκυμονεί σημαντικούς κινδύνους. Οι βασικοί άξονες ανησυχίας περιλαμβάνουν διλήμματα, όπως η αλγοριθμική μεροληψία, η έλλειψη διαφάνειας, η προστασία προσωπικών δεδομένων, ο τρόπος της ανθρώπινης επικοινωνίας και η ανάπτυξη κριτικής σκέψης. Επιπλέον υπάρχουν και πρακτικά εμπόδια που σχετίζονται με την υλικοτεχνική υποδομή και την επιμόρφωση των εκπαιδευτικών.

Η ερευνητική προσέγγιση της εργασίας είναι ποιοτική και βασίζεται σε ημι-δομημένες συνεντεύξεις με 23 εκπαιδευτικούς Πρωτοβάθμιας και Δευτεροβάθμιας εκπαίδευσης από διάφορα μέρη της Ελλάδας, διαφόρων ειδικοτήτων, οι οποίοι έχουν εμπειρία με δημοφιλή AI chatbots. Αναδείχθηκαν ανησυχίες σχετικές με την παραπληροφόρηση, την αλλοίωση του ρόλου τους και την εξάρτηση των μαθητών από τα συστήματα ΤΝ. Η έρευνα καταλήγει στην ανάγκη για μία συνετή και υπεύθυνη προσέγγιση στην υιοθέτηση της ΤΝ, συνοδευόμενη από τη διαμόρφωση κατάλληλων πολιτικών και κατευθυντήριων αρχών, ώστε να μεγιστοποιηθούν τα οφέλη και να ελαχιστοποιηθούν οι αρνητικές επιπτώσεις.

ΠΕΡΙΛΗΨΗ

Η εργασία αυτή διερευνά τη συγκριτική δυναμική δύο ψηφιακών προσεγγίσεων στην εκπαιδευτική διαδικασία: της παραδοσιακής αναζήτησης πληροφοριών (search) και της διατύπωσης προτροπών σε γλωσσικά μοντέλα Τεχνητής Νοημοσύνης (prompting). Εστιάζοντας στις εφαρμογές τους στη σχολική τάξη, εξετάζεται πώς οι δύο αυτές πρακτικές επηρεάζουν τη γνωστική διαδικασία, την ανάπτυξη δεξιοτήτων του 21ου αιώνα, καθώς και τη στάση μαθητών και εκπαιδευτικών απέναντι στη γνώση.

Αξιοποιώντας μελέτες περίπτωσης από τη διδασκαλία της Πληροφορικής, των Μαθηματικών και της Περιβαλλοντικής Εκπαίδευσης, αποτυπώνονται οι δυνατότητες και οι περιορισμοί κάθε μεθόδου. Η μεθοδολογία βασίστηκε σε ποιοτική ανάλυση διδακτικών σεναρίων και εκπαιδευτικών παρεμβάσεων με εργαλεία τεχνητής νοημοσύνης, σε συνδυασμό με βιβλιογραφική επισκόπηση έγκριτων ακαδημαϊκών πηγών.

Τα αποτελέσματα αναδεικνύουν ότι η αναζήτηση απαιτεί δεξιότητες φιλτραρίσματος πληροφορίας και αξιολόγησης πηγών, αλλά είναι χρονοβόρα και επιρρεπής σε παραπληροφόρηση. Το prompting, αντίθετα, παρέχει άμεσες, προσωποποιημένες και ερμηνευτικές απαντήσεις, ενισχύοντας τη διερεύνηση και τον αναστοχασμό. Ωστόσο, η υπερβολική εξάρτηση από τα γλωσσικά μοντέλα μπορεί να υπονομεύσει την αυτονομία του μαθητή.

Η εργασία καταλήγει ότι ο συνδυασμός των δύο προσεγγίσεων είναι παιδαγωγικά και διδακτικά επωφελής. Προτείνεται η ανάπτυξη μικτών μοντέλων μάθησης που ενσωματώνουν τόσο τη δεξιότητα της αναζήτησης όσο και τη δημιουργική χρήση προτροπών, στο πλαίσιο ενός στοχαστικού, ψηφιακά ενισχυμένου σχολείου.

ΠΕΡΙΛΗΨΗ

Το άρθρο παρουσιάζει τη μεθοδολογία, τα αποτελέσματα και τις τρέχουσες εργασίες του έργου AISE (Artificial Intelligent platform to support Students by assessing their performance skills through predictive models created from their writing skills), το οποίο χρηματοδοτείται από το πρόγραμμα Erasmus+, ΙΚΥ. Στόχος του έργου είναι η εφαρμογή προηγμένων μεθόδων Τεχνητής Νοημοσύνης, με έμφαση στη μέθοδο RAG (Retrieval-Augmented Generation) σε συνδυασμό με Μεγάλα Γλωσσικά Μοντέλα (LLMs), για την αυτόματη αξιολόγηση μαθητικών εκθέσεων σε τρεις διαστάσεις: Περιεχόμενο, Δομή και Γλώσσα. Οι εκθέσεις συλλέχθηκαν από μαθητές δευτεροβάθμιας εκπαίδευσης στην Ελλάδα, την Κύπρο, τη Σερβία και την Κροατία, επεξεργάστηκαν και αξιολογήθηκαν μέσω μιας αρθρωτής υπολογιστικής υποδομής βασισμένης στην ΤΝ. Τα αποτελέσματα δείχνουν υψηλή συμφωνία με τις βαθμολογίες των εκπαιδευτικών, ιδιαίτερα στη διάσταση του Περιεχομένου, ενώ αναδεικνύονται προκλήσεις στην αξιολόγηση των γλωσσικών λεπτομερειών. Το έργο AISE ανοίγει τον δρόμο για επεκτάσιμα, διαφανή και εξατομικευμένα συστήματα ανατροφοδότησης σε εκπαιδευτικά περιβάλλοντα.

ΠΕΡΙΛΗΨΗ

Η παρούσα εργασία εστιάζει στον ρόλο της τεχνητής νοημοσύνης (ΤΝ) ως πολύτιμου εργαλείου στην εκμάθηση της αγγλικής γλώσσας, το οποίο βοηθά τους εκπαιδευτικούς στους πολύπλευρους ρόλους τους. Η παραγωγική ΤΝ μπορεί να βοηθήσει στη δημιουργία ασκήσεων λεξιλογίου/γραμματικής/προφορικών δραστηριοτήτων ή διαλόγων (σε ένα «ανοιχτό» αναλυτικό πρόγραμμα) ή στην προσαρμογή υφιστάμενων ασκήσεων (σε «κλειστά» αναλυτικά προγράμματα), με βάση την εκπαιδευτική κατάσταση και τα προφίλ των μαθητών. Ωστόσο, είναι σημαντικό να αναφερθεί ότι οι δραστηριότητες που υποστηρίζονται από την τεχνητή νοημοσύνη πρέπει να συμμορφώνονται με μεθοδολογικά κριτήρια. Το πλαίσιο AIATAC σχεδιάστηκε με αφορμή το γεγονός ότι οι εκπαιδευόμενοι καθηγητές αγγλικής γλώσσας σε επίπεδο μεταπτυχιακού προγράμματος σπουδών στο Ελληνικό Ανοικτό Πανεπιστήμιο ανέφεραν ότι χρησιμοποιούν την τεχνητή νοημοσύνη για να σχεδιάσουν φύλλα εργασιών με βελτιωμένες εικόνες, ως μέρος του σχεδιασμού των μαθημάτων τους. Πραγματοποιήθηκε ανάλυση του περιεχομένου αυτών των σχεδίων μαθήματος και τα αποτελέσματα αξιολογήθηκαν ως θετικά συσχετιζόμενα με την αύξηση της παρακίνησης και της συμμετοχής των μαθητών στην τάξη. Στη συνέχεια, το πλαίσιο AIATAC σχεδιάστηκε ως αποτέλεσμα της ρεαλιστικής ανάγκης να επεκταθεί και να εφαρμοστεί η προσαρμογή ή η δημιουργία δραστηριοτήτων με τη βοήθεια της τεχνητής νοημοσύνης, με τρόπο βασισμένο σε αρχές, σύμφωνα με τη μεθοδολογία της διδασκαλίας της αγγλικής ως ξένης γλώσσας. Το πλαίσιο AIATAC μπορεί επίσης να εφαρμοστεί στη διδασκαλία της αγγλικής γλώσσας για ειδικούς/ακαδημαϊκούς σκοπούς (ESP/EAP) ή ακόμη και στην περίπτωση της αγγλικής γλώσσας ως μέσου διδασκαλίας (EMI). Αυτή η δυνατότητα εξετάζεται επί του παρόντος στο Πανεπιστήμιο Ιωαννίνων, στο πλαίσιο της διδασκαλίας ESP στο Τμήμα Λογιστικής και Χρηματοοικονομικής, η οποία περιλαμβάνει την ενσωμάτωση της ΤΝ σε σύγχρονες (τάξη/εργαστήριο πληροφορικής) και ασύγχρονες (αυτοδιδασκαλία/ηλεκτρονική μάθηση) μορφές διδασκαλίας, χρησιμοποιώντας γενικές ή πιο εξειδικευμένες εφαρμογές ΤΝ. Το πλαίσιο AIATAC μπορεί να εφαρμοστεί πιο αποτελεσματικά σε ένα εργαστήριο με τον απαιτούμενο εξοπλισμό, προσφέροντας στους μαθητές πρόσβαση σε εφαρμογές και διαδικτυακά εργαλεία. Στην εργασία αναλύεται ο τρόπος με τον οποίο αυτό το πιλοτικό πλαίσιο μπορεί να χρησιμοποιηθεί με μεθοδολογικά κατάλληλο τρόπο.

Λέξεις-κλειδιά: Διδασκαλία της αγγλικής γλώσσας, παραγωγική ΤΝ, προσαρμογή στο πλαίσιο, δημιουργία/προσαρμογή εργασιών, πλαίσιο AIATAC.

ΠΕΡΙΛΗΨΗ

Η παρούσα εργασία μελετά την αλληλεπίδραση παιδιών ηλικίας 5-12 ετών με ένα σύγχρονο μηχατρονικό σύστημα συγκρίνοντας τα αποτελέσματα που λαμβάνονται από τρία εργαλεία αξιολόγησης της χρηστικότητας. Το σύστημα μηχατρονικής είναι ένα αυτόνομο ρομποτικό όχημα που κατασκευάστηκε με τη βοήθεια του εκπαιδευτικού πακέτου Lego Mindstorms EV3 Education. Η κατασκευή χρησιμοποιείται από 100 παιδιά ηλικίας 5-12 ετών σε τρία σενάρια διαφορετικής δυσκολίας και στη συνέχεια καθένα από αυτά τα παιδιά απαντά σε τρία ερωτηματολόγια. Το πρώτο ερωτηματολόγιο που αξιολογεί τη χρηστικότητα είναι το SUS (System Usability Scale - Κλίμακα Χρηστικότητας Συστήματος) και αποτελείται από 10 ερωτήσεις, το δεύτερο είναι το USE (Usefulness, Satisfaction, Ease of Use - Χρησιμότητα, Ικανοποίηση, Ευκολία Χρήσης) το οποίο αποτελείται από 30 ερωτήσεις που χωρίζονται σε τέσσερις ενότητες και αξιολογούν τη χρησιμότητα, την ευκολία χρήσης, την ευκολία εκμάθησης και την ικανοποίηση αντίστοιχα. Το τρίτο ερωτηματολόγιο δημιουργήθηκε και υιοθετήθηκε από προηγούμενη έρευνα (Τσαγκάρης, 2023) και αποτελείται από 20 ερωτήσεις χωρισμένες σε τέσσερις ενότητες που αξιολογούν την αποτελεσματικότητα, την αποδοτικότητα, την ικανοποίηση και την ευκολία χρήσης.

Η έρευνα περιλάμβανε ένα δείγμα 100 παιδιών, ηλικίας 5-12 ετών (5-6 ετών 48%, 7-8 ετών 26%, 9-10 ετών 16%, 11-12 ετών 10%), εκ των οποίων το 84% ήταν αγόρια και το 16% κορίτσια, με το 48% να κατοικεί στη δυτική Θεσσαλονίκη και το 52% να κατοικεί εκτός Θεσσαλονίκης. Από τα αποτελέσματα του πρώτου ερωτηματολογίου (SUS), κανείς συμπεραίνει ότι η χρήση του συστήματος μηχατρονικής δημιουργεί τη διάθεση για συχνή χρήση (94% Συμφωνούν), δεν είναι περίπλοκη (80% Συμφωνούν), αποπνέει εμπιστοσύνη κατά τη χρήση (98% Συμφωνούν), είναι εύκολο να μάθει κανείς να το χρησιμοποιεί (70% Συμφωνούν), και ότι για τις μικρότερες ηλικίες των 5-6 ετών, σε αντίθεση με τα παιδιά 11-12 ετών, απαιτείται η βοήθεια ενός τεχνικού για τη χρήση του.

Σύμφωνα με τα αποτελέσματα του δεύτερου ερωτηματολογίου (USE), στην πρώτη του ενότητα που αξιολογεί τη Χρησιμότητα, το 92% συμφωνεί ότι τους βοηθά να είναι πιο αποδοτικοί, το 98% συμφωνεί ότι είναι χρήσιμο και το 98% επίσης συμφωνεί ότι κάνει όλα όσα περίμεναν να κάνει. Στη δεύτερη του ενότητα που αξιολογεί την Ευκολία Χρήσης, το 92% λέει ότι είναι εύκολο στη χρήση, το 94% συμφωνεί ότι είναι φιλικό προς το χρήστη, το 96% δηλώνει ότι είναι ευέλικτο και ότι μπορούν να ανακάμψουν από λάθη γρήγορα και εύκολα. Στην τρίτη του ενότητα που αξιολογεί την Ευκολία Εκμάθησης, το 90% θυμάται εύκολα πώς να το χρησιμοποιεί και το 80% δηλώνει ότι είναι εύκολο να μάθει κανείς και να το χρησιμοποιήσει. Η τέταρτη και τελευταία ενότητα του δεύτερου ερωτηματολογίου αξιολογεί την Ικανοποίηση, με το 100% να δηλώνει ότι είναι ευχαριστημένοι με τη διεπαφή, το 96% να λέει ότι θα το συνιστούσε σε έναν φίλο και το 98% να λέει ότι είναι υπέροχο.

Όσον αφορά το τρίτο ερωτηματολόγιο, στις πρώτες πέντε ερωτήσεις που αξιολογούν την Αποτελεσματικότητα, το 96% διαφωνεί ότι γίνονται λάθη κατά την αλληλεπίδραση, ενώ το 100% συμφωνεί ότι η διεπαφή λειτουργεί όπως αναμένεται. Στη δεύτερη του ενότητα, που αφορά την Αποδοτικότητα, το 100% συμφωνεί ότι η αλληλεπίδραση είναι εύκολη και το 92% συμφωνεί ότι υπάρχει ελευθερία κίνησης για το χρήστη. Η Ικανοποίηση είναι αυτό που αξιολογείται στην τρίτη ενότητα του ερωτηματολογίου, με το 100% να συμφωνεί ότι η λειτουργία του συστήματος δεν είναι κουραστική και ότι η αλλαγή της εντολής είναι εύκολη, ενώ στην τέταρτη ενότητα, η οποία αξιολογεί την Ευκολία Χρήσης, το 96% δηλώνει ότι είναι ευέλικτο στην επιλογή κινήσεων, το 100% ότι οι εντολές είναι αξιομνημόνευτες, και ότι η εκπαίδευση είναι εύκολη.

Λέξεις-κλειδιά: Εκπαιδευτική Ρομποτική, Συστήματα Μηχατρονικής, Αξιολόγηση Χρηστικότητας

Wedosave: FORGOTTEN BABY SYNDROME ΡΟΜΠΟΤΙΚΟ ΣΥΣΤΗΜΑ ΠΡΟΣΤΑΣΙΑΣ ΤΗΣ ΖΩΗΣ ΑΠΟ ΤΟ ΣΥΝΔΡΟΜΟ ΞΕΧΑΣΜΕΝΟΥ ΠΑΙΔΙΟΥ

Αυγουλάς Νικόλαος
Καθηγητής Πληροφορικής ΠΕ86
Υποδιευθυντής 11ου Δημοτικού Σχολείου Καλαμαριάς
e-mail: navgou11dim@gmail.com

ΠΕΡΙΛΗΨΗ

Το Wedosave:ForgottenBabySyndrome είναι μια ρομποτική εφαρμογή που κατασκευάστηκε και προγραμματίστηκε από τους μαθητές και μαθήτριες της Στ τάξη του 11ου Δημοτικού Σχολείου Καλαμαριάς που περιλαμβάνει κατάλληλους αυτοματισμούς για την πρόληψη περιστατικών του Συνδρόμου Ξεχασμένου Παιδιού.

Η χρονική διάρκεια εκπόνησης του συγκεκριμένου Project ήταν 6 εβδομάδες στις οποίες τα παιδιά ήρθαν σε επαφή με τον μικροελεγκτή MICROBIT και το περιβάλλον προγραμματισμού του, δούλεψαν σε ομάδες των τεσσάρων και ακολουθώντας στοχευμένες δραστηριότητες κατανόησης της λειτουργίας της συσκευής και των δυνατοτήτων της και ανακάλυψαν τις λειτουργίες που αυτό προσφέρει για την επίλυση του προβλήματος που τους δόθηκε.

Το Σύνδρομο Ξεχασμένου Παιδιού αφορά την περίπτωση που ο/η οδηγός αυτοκινήτου που συνοδεύει ανήλικο ειδικά σε βρεφική ηλικία, δύναται να ξεχάσει την παρουσία του παιδιού στην καμπίνα και να αποχωρήσει, αφήνοντας το σε επικίνδυνο για την υγεία του περιβάλλον, ιδίως τους καλοκαιρινούς μήνες.

Η ρομποτική διάταξη αποτελείται από αισθητήρες βάρους που προσαρμόζονται στο παιδικό καρεκλάκι και αισθητήρα για τη μέτρηση της θερμοκρασίας εντός του αυτοκινήτου. Ταυτόχρονα, υπάρχουν συσκευές ειδοποίησης του συνοδού όπως κινητό τηλέφωνο και smart watch, αλλά και ενεργοποίησης του συναγερμού του αυτοκινήτου ώστε το παιδί, με τη βοήθεια κάποιου περαστικού, να βγει από το αυτοκίνητο και να μεταφερθεί σε δροσερό περιβάλλον.

Τέλος, κατασκευάστηκε αυτόματος μηχανισμός για να ανοίγει το παράθυρο και να δροσίζεται το παιδί, μέχρι ο συνοδός ή κάποιος περαστικός να το απομακρύνει από τον κίνδυνο.
Όλες οι κατασκευές, όπως ο μηχανισμός παραθύρου, και οι συσκευές με τους αισθητήρες και τους προειδοποιητικούς μηχανισμούς, αποτελούνται από Microbit τα οποία επικοινωνούν μεταξύ τους με ραδιοκύματα.

Το Wedosave προσέφερε μαθησιακά οφέλη σε πολλαπλά επίπεδα, καθώς βασίστηκε

- στον επικοδομητισμό καθώς οι μαθητές/τριες κατέγραψαν, σχεδίασαν κατασκεύασαν και ανέλυσαν παραμέτρους της λύσης του προβλήματος ,
- την ομαδοσυνεργατική διδασκαλία χωριζόμενοι σε ομάδες των 3 και 4 ατόμων,
- τη διαθεματική προσέγγιση αφού οι μαθητές χρησιμοποίησαν τις γνώσεις τους από τη φυσική και τα ηλεκτρικά κυκλώματα αλλά και τη βιολογία και τους τρόπους με τους οποίους δροσίζεται το σώμα μας,
- τη μέθοδο project καθώς οι εργασία πέρασε από διαφορετικά στάδια (σχεδιασμός, ανάλυση, κατασκευή και παρουσίαση)
- την εξατομικευμένη μάθηση καθώς οι μαθητές/τριες μπορούσαν να επιλέξουν με ποιο κομμάτι της εργασίας θα ήθελαν να ασχοληθούν περισσότερο.

Λόγω της ιδιαίτερης απήχησης του Wedosave, εκτός από την παρουσίαση του στο Μαθητικό Συνέδριο Πληροφορικής της Περιφερειακής Δ/νσης Κεντρικής Μακεδονίας και στο Φεστιβάλ Μαθητικές Ρομποτικής του Πειραματικού Γυμνασίου Πανεπιστημίου Μακεδονίας και Φεστιβάλ Ρομποτικής Δ/νσης Β/θμιας Νομού Πέλλας, οι μαθητές είχαν την ευκαιρία να δώσουν συνεντεύξεις σε πλήθος Μέσων Μαζικής Επικοινωνίας αποκτώντας εμπειρία αλλά και αυτοπεποίθηση για τις προσπάθειές και τις δυνατότητές τους.

Λέξεις – κλειδιά: Σύνδρομο Ξεχασμένου Παιδιού, STEM, Microbit, ρομποτική, προγραμματισμός.

ΕΝΣΩΜΑΤΩΣΗ ΤΟΥ ΑΛΓΟΡΙΘΜΙΚΟΥ ΤΡΟΠΟΥ ΣΚΕΨΗΣ ΚΑΙ ΤΟΥ ΠΡΟΓΡΑΜΜΑΤΙΣΜΟΥ ΣΤΗ ΔΕΥΤΕΡΟΒΑΘΜΙΑ ΕΚΠΑΙΔΕΥΣΗ ΜΕΣΩ ΤΗΣ ΕΚΠΑΙΔΕΥΤΙΚΗΣ ΡΟΜΠΟΤΙΚΗΣ: ΜΕΛΕΤΗ ΠΕΡΙΠΤΩΣΗΣ ΒΑΣΙΣΜΕΝΗ ΣΤΟ ΝΕΟ ΕΛΛΗΝΙΚΟ ΑΝΑΛΥΤΙΚΟ ΠΡΟΓΡΑΜΜΑ ΤΟΥ ΙΕΠ

email: arondo@sch.gr

ΠΕΡΙΛΗΨΗ

Το παρόν άρθρο παρουσιάζει μια μελέτη περίπτωσης που διερευνά την ενσωμάτωση του αλγοριθμικού τρόπου σκέψης και του προγραμματισμού στην ανώτερη δευτεροβάθμια εκπαίδευση μέσω της εκπαιδευτικής ρομποτικής. Η παρέμβαση βασίζεται στο νέο εθνικό αναλυτικό πρόγραμμα σπουδών Πληροφορικής που εκπονήθηκε από το Ινστιτούτο Εκπαιδευτικής Πολιτικής (ΙΕΠ), εστιάζοντας στη θεματική ενότητα «Αλγοριθμική Σκέψη – Προγραμματισμός Υπολογιστικών Συστημάτων» και ειδικότερα στην υποενότητα «Προγραμματισμός Ρομπότ και Υλικού.»

Μέσω ενός σεναρίου που βασίστηκε στη χρήση μικροελεγκτών Arduino και πλατφορμών προσομοίωσης όπως το Tinkercad, οι μαθητές καθοδηγήθηκαν στην κατασκευή και τον προγραμματισμό αυτοματοποιημένων συστημάτων. Η προσέγγιση συνδυάζει την προσομοίωση με τον φυσικό υπολογισμό, ενισχύοντας την ενασχόληση των μαθητών με εφαρμογές της τεχνολογίας στην πραγματική ζωή. Δόθηκε έμφαση στη μαθητοκεντρική και βιωματική μάθηση, στην ομαδική εργασία και στην καλλιέργεια βασικών ψηφιακών δεξιοτήτων.

Η μελέτη υλοποιήθηκε κατά τη σχολική χρονιά 2023–2024 με μαθητές της Β’ Λυκείου, αναδεικνύοντας αυξημένη συμμετοχή, βελτιωμένη ικανότητα στον προγραμματισμό, καθώς και ενισχυμένες δεξιότητες επίλυσης προβλημάτων και συνεργασίας. Τα ευρήματα δείχνουν ότι η εκπαιδευτική ρομποτική αποτελεί ένα ισχυρό μέσο διδασκαλίας βασικών εννοιών της Πληροφορικής, προάγοντας ταυτόχρονα τη δημιουργική και κριτική σκέψη.

Λέξεις-κλειδιά: Εκπαιδευτική Ρομποτική, Αλγοριθμική Σκέψη, Φυσικός Υπολογισμός, Δευτεροβάθμια Εκπαίδευση, Arduino

ΑΛΓΟΡΙΘΜΟΣ ΚΑΛΛΙΕΡΓΕΙΑΣ ΚΡΟΚΟΥ - ΕΞΕΡΕΥΝΩΝΤΑΣ ΤΑ ΒΗΜΑΤΑ ΤΗΣ ΦΥΣΗΣ ΜΕ ΤΟΝ ΠΡΟΓΡΑΜΜΑΤΙΣΜΟ

Τσίρου Αντιγόνη
Εκπαιδευτικός Πληροφορικής, MSc
Διεύθυνση Πρωτοβάθμιας Εκπαίδευσης Κοζάνης, Υπουργείο Παιδείας και Θρησκευμάτων
Κοζάνη, Ελλάδα
e-mail: tsirouant@gmail.com

ΠΕΡΙΛΗΨΗ

Η εργασία με τίτλο «Αλγόριθμος Καλλιέργειας Κρόκου - Εξερευνώντας τα Βήματα της Φύσης με τον Προγραμματισμό» παρουσιάζει μια καινοτόμο διδακτική προσέγγιση για τους μαθητές της πρωτοβάθμιας εκπαίδευσης, συνδυάζοντας τον προγραμματισμό με την εξερεύνηση φυσικών φαινομένων. Η βασική εστίαση της εργασίας είναι η ανάπτυξη της αλγοριθμικής σκέψης μέσω της βιωματικής, οπτικής και απτικής μάθησης, χρησιμοποιώντας ως κεντρικό εργαλείο μια ψηφιακή μακέτα που απεικονίζει τα στάδια ανάπτυξης του φυτού Κρόκος (σαφράν Κοζάνης).

Στη μεθοδολογία της εργασίας, η εκπαιδευτικός, με βάση την εμπειρία της στην πληροφορική, έχει σχεδιάσει και εκτυπώσει μια μακέτα με εικόνες, που παρουσιάζουν διαδοχικά τα στάδια καλλιέργειας του Κρόκου. Τοποθετώντας τη μακέτα στο τραπέζι της τάξης, τα παιδιά ενθαρρύνονται να εντοπίσουν το συγκεκριμένο στάδιο που έχει υποδείξει η εκπαιδευτικός και να διαμορφώσουν τον αντίστοιχο αλγόριθμο. Προτού προχωρήσουν στον προγραμματισμό με το ρομπότ Bee-Bot, η εκπαιδευτικός παρουσιάζει κάρτες εντολών (δημιουργημένες από αυτήν) οι οποίες αντιπροσωπεύουν κινήσεις όπως «μπροστά», «πίσω», «δεξιά», «αριστερά», «παύση», «ξεκίνα» και «καθαρισμός μνήμης». Οι κάρτες τοποθετούνται σε σωστή σειρά δίπλα στη μακέτα, προσφέροντας μια οπτική αναπαράσταση της ακολουθίας ενεργειών που απαιτούνται για την καλλιέργεια του φυτού.

Η εφαρμογή της μεθοδολογίας πραγματοποιείται μέσω δραστηριοτήτων, που εμπλέκουν ενεργά τους μαθητές στην απόφαση για την κατασκευή του αλγορίθμου και την υλοποίησή του με το ρομπότ. Η δραστηριότητα αυτή, πέρα από την ενίσχυση των τεχνικών δεξιοτήτων, δίνει έμφαση στην κριτική σκέψη και τη συνεργασία μεταξύ των μαθητών. Τα κύρια ευρήματα της εργασίας υποδεικνύουν ότι η σύνδεση της θεωρητικής γνώσης με πρακτικές εφαρμογές, μέσω βιωματικής μάθησης, ενισχύει την κατανόηση των αλγοριθμικών εννοιών και προάγει την ομαδική εργασία.

Τέλος, τα αποτελέσματα δείχνουν ότι η χρήση οπτικών και απτικών εργαλείων συμβάλλει στη δημιουργία ενός ελκυστικού μαθησιακού περιβάλλοντος, όπου οι μαθητές αναπτύσσουν δεξιότητες επίλυσης προβλημάτων και ενισχύουν την αυτοπεποίθησή τους στην εφαρμογή τεχνολογικών λύσεων. Η προσέγγιση αυτή επιτρέπει στους μαθητές να συνδέσουν τις διαδικασίες της φύσης με τον προγραμματισμό, κατανοώντας έτσι τη σημασία της ακολουθίας και της δομής σε ένα πολυδιάστατο μαθησιακό πλαίσιο. Οι επιπρόσθετες παρατηρήσεις επιβεβαιώνουν τη θετική επίδραση της μεθοδολογίας στην ενίσχυση της δημιουργικότητας και των μαθησιακών αποτελεσμάτων.

Λέξεις – κλειδιά: αλγοριθμική σκέψη, προγραμματισμός, βιωματική μάθηση, οπτική μάθηση, απτική μάθηση, συνεργασία, καλλιέργεια Κρόκου.

ΘΠ15: Παιχνιδοποίηση (Gamification) στην Εκπαίδευση

ΜΕΛΕΤΗ ΤΗΣ ΑΠΟΤΕΛΕΣΜΑΤΙΚΟΤΗΤΑΣ ΚΑΙΝΟΤΟΜΩΝ ΔΙΔΑΚΤΙΚΩΝ ΠΑΡΕΜΒΑΣΕΩΝ ΓΙΑ ΤΗ ΜΑΘΗΣΗ ΤΟΥ ΑΤΟΜΙΚΟΥ ΠΡΟΤΥΠΟΥ BOHR ΚΑΙ ΤΟΥ ΠΕΡΙΟΔΙΚΟΥ ΠΙΝΑΚΑ

ΠΕΡΙΛΗΨΗ

Θέματα όπως το Ατομικό Πρότυπο του Bohr και ο Περιοδικός Πίνακας, παραμένουν απαιτητικά στη διδασκαλία της Χημείας, με ιδιαίτερες δυσκολίες για τους μαθητές της Α' Λυκείου. Στο πλαίσιο αυτής της πρόκλησης, η παρούσα μελέτη διερευνά τον αντίκτυπο διαφορετικών στρατηγικών διδασκαλίας έναντι της παραδοσιακής τυπικής παράδοσης, αξιοποιώντας περιβάλλοντα ψηφιακής διάδρασης, επιτραπέζιου παιχνιδιού και χρήσης ρομποτικού συστήματος. Διερευνά πόσο συμβάλουν στην πραγματική κατανόηση του Ατομικού Προτύπου του Bohr και του Περιοδικού Πίνακα και αυξάνουν την ενεργό εμπλοκή των μαθητών. Ο σχεδιασμός και η διεξαγωγή της έρευνας αναπτύχθηκαν σε δύο φάσεις, ξεκινώντας με μια πιλοτική φάση για τη διόρθωση απαραίτητων αλλαγών και συνεχίζοντας με την κύρια φάση. Η ανάλυση των δεδομένων, τόσο ποσοτικών όσο και ποιοτικών, αποκαλύπτει ότι οι διδακτικές παρεμβάσεις που βασίζονται σε παιγνιώδεις προσεγγίσεις φαίνεται να ενισχύουν σημαντικά τόσο τη γνωστική απόδοση, όσο και την ενεργό συμμετοχή των μαθητών στη μαθησιακή διαδικασία, σε σύγκριση με την παραδοσιακή προσέγγιση, ενώ η ρομποτική παρέμβαση, αν και ελκυστική, δεν επιφέρει εξίσου υψηλές μαθησιακές αποδόσεις. Τα αποτελέσματα ενισχύουν την ανάγκη επαναπροσδιορισμού της διδασκαλίας της Χημείας με τη χρήση μοντέλων διδασκαλίας που να εκφράζουν μια πληθώρα στυλ μάθησης των εκάστοτε μαθητών. Η σύγκριση των εν λόγω παρεμβάσεων με την παραδοσιακή διδασκαλία αποκαλύπτει διαφορές στην επίδοση των μαθητών, προσφέροντας σημαντικά ερευνητικά συμπεράσματα για την αναμόρφωση της διδασκαλίας της Χημείας.

Λέξεις-κλειδιά: Χημεία, παιχνιδοποίηση, διδακτικές παρεμβάσεις, ψηφιακά μέσα, ρομποτική, Ατομικό Πρότυπο του Bohr.

ΠΕΡΙΛΗΨΗ

Ο σχεδιασμός, η εφαρμογή και η αξιολόγηση εκπαιδευτικών μουσειοπαιδαγωγικών προγραμμάτων αποτέλεσε προτεραιότητα για την αστική μη κερδοσκοπική εταιρία «Μουσείο Γέσιου - Ο Μακεδονικός Αγώνας και η Έδεσσα ΑΜΚΕ».

Συγκεκριμένα, -μέσα σε ένα πολυαισθητηριακό περιβάλλον –στις αίθουσες του Μουσείου- και Αδιαδραστικό εκπαιδευτικό πλαίσιο, που χρησιμοποιεί και αναδεικνύει την αξία των Ν.Τ. και των web2 εργαλείων-, επιχειρήθηκε η καλλιέργεια των πολιτισμικών δεξιοτήτων των μαθητών/τριών γυμνασίων και λυκείων στα περιεχόμενα και στα εκθέματα της συλλογής του μουσείου, στην τοπική ιστορία και στον πολιτισμό.

Ο σχεδιασμός του εκπαιδευτικού προγράμματος «Μαθαίνω τον Μακεδονικό Αγώνα», για μαθητές/τριες Γυμνασίων και Λυκείων (ηλικίας 13-17 ετών) βασίστηκε σε διάφορες μεθόδους, τεχνικές,προσεγγίσεις και περιβάλλοντα. Δόθηκε ιδιαίτερη έμφαση στις αρχές της παιχνιδοκεντρικής προσέγγισης (Domnus, 2010) και έτσι σχεδιάστηκε ένα εκπαιδευτικό, ψηφιακό δωμάτιο απόδρασης - escape room, ακολουθώντας τα τρία βασικά στάδια, σύμφωνα με τα χαρακτηριστικά της δραστηριοκεντρικής προσέγγισης–προστάδιο, κύριο στάδιο, μεταστάδιο- (Willis, 1996). Στο πρόγραμμα ενσωματώθηκαν εναλλακτικοί τρόποι αξιολόγησης καταγραφής συναισθημάτων των μαθητών/τριών που συμμετέχουν.

Λέξεις - κλειδιά: παιχνιδοκεντρική προσέγγιση, μουσειοπαιδαγωγικά προγράμματα, εκπαιδευτικά δωμάτια απόδρασης, educational escape rooms

ΠΕΡΙΛΗΨΗ

Η παρούσα μελέτη περίπτωσης αποτελεί κομμάτι ενός ευρύτερου ερευνητικού έργου του Πανεπιστημίου Δυτικής Μακεδονίας που αφορά τον συνδυασμό καινοτόμων τεχνολογικών εργαλείων και εκπαιδευτικών μεθόδων με σκοπό τη βελτίωση των μαθησιακών αποτελεσμάτων και την ενίσχυση της διαδικασίας μάθησης.

Η έρευνα πραγματοποιήθηκε στο Τμήμα Μηχανικών Σχεδίασης Προϊόντων και Συστημάτων και αφορά τον σχεδιασμό και ανάπτυξη μιας ψηφιακής εφαρμογής σε περιβάλλον εικονικής πραγματικότητας που έχει ως στόχο να αποτελέσει ένα βοηθητικό εργαλείο εκπαίδευσης για τη διδασκαλία εικαστικών και καλλιτεχνικών κινημάτων. Η προτεινόμενη εφαρμογή εισάγει την τεχνολογία εικονικής πραγματικότητας για την εκπαίδευση φοιτητών του τμήματος πάνω στο καλλιτεχνικό κίνημα του De Stijl. Η εκπαιδευτική διαδικασία ενισχύεται αξιοποιώντας στρατηγικές μάθησης που βασίζονται στο παιχνίδι εξυπηρετώντας συγκεκριμένους εκπαιδευτικούς στόχους. Η τελική μορφή της εφαρμογής προσομοιάζει με ένα παιχνίδι εικονικής πραγματικότητας που βασίζεται στη λογική ανάπτυξης ψηφιακών εκπαιδευτικών δωματίων διαφυγής. Το εκπαιδευτικό αντικείμενο ενσωματώνεται αρμονικά στο συνολικό σχεδιασμό της εφαρμογής, μέσα από τη δημιουργία ειδικά σχεδιασμένων γρίφων όπου οι χρήστες καλούνται να επιλύσουν. Τελικός στόχος είναι μέσω της αλληλεπίδρασης με αντικείμενα του εικονικού περιβάλλοντος, οι φοιτητές να γνωρίσουν και να κατανοήσουν καλύτερα βασικά ιστορικά στοιχεία, αισθητικά κριτήρια και τις κύριες σχεδιαστικές αρχές του καλλιτεχνικού κινήματος.

Η εφαρμογή σχεδιάστηκε σύμφωνα με ένα μεθοδολογικό πλαίσιο που υιοθετεί στοιχεία από την σχεδιαστική σκέψη και δημιουργική διαδικασία για την ανάπτυξη νέων προϊόντων, έχοντας ως άξονες σχεδιασμού τις δυνατότητες χρήσης της τεχνολογίας εικονικής πραγματικότητας και την αξιοποίηση της παιχνιδοποίησης ως βασική μέθοδο μάθησης.

Η δοκιμή της εφαρμογής πραγματοποιήθηκε στο Τμήμα Μηχανικών Σχεδίασης Προϊόντων και Συστημάτων. Στην διαδικασία πρώιμης αξιολόγησης συμμετείχε ένα πρώτο δείγμα 8 φοιτητών του τμήματος. Η μεθοδολογία που ακολουθήθηκε αφορούσε τη συμπλήρωση ερωτηματολογίων και την απάντηση σε ερωτήσεις γνώσεων σχετικών με το εκπαιδευτικό αντικείμενο, πριν και μετά την χρήση της εφαρμογής.

Τα αποτελέσματα που προέκυψαν έδειξαν σημαντική βελτίωση στα μαθησιακά αποτελέσματα όσον αφορά την επίδοση των φοιτητών. Από ένα σύνολο 10 ερωτήσεων, ο μέσος όρος των σωστών απαντήσεων ήταν 6,63 πριν τη χρήση της εφαρμογής και 9,00 μετά τη χρήση της εφαρμογής (αύξηση 35,75%). Αύξηση επίσης σημειώθηκε και στην θετική άποψη των φοιτητών για την ενσωμάτωση της τεχνολογίας εικονικής πραγματικότητας στην διαδικασία μάθησης, πριν και μετά τη χρήση της εφαρμογής (αύξηση 15,15%) όπως και των εκπαιδευτικών παιχνιδιών (αύξηση 8,82%). Όσον αφορά τη συνολική εμπειρία τα αποτελέσματα έδειξαν ότι οι φοιτητές έκριναν πολύ θετικά την εμπειρία τους από τη χρήση της εφαρμογής με μέσο όρο αξιολόγησης σύμφωνα με την 5βάθμια κλίμακα του Likert, 4,5 (90%). Ως προς τον παράγοντα του ενθουσιασμού, η αξιολόγηση των φοιτητών ήταν 4,38 (87,50%). Ενώ στο κατά πόσο η εμπειρία τους φάνηκε παρακινητική και ενδιαφέρουσα, η αξιολόγηση ήταν 4,63 (92,50%).

Συνολικά, τα πρώτα ευρήματα της αξιολόγησης δείχνουν μια πολύ ενθαρρυντική προοπτική για τη δημιουργία μιας ελκυστικής εκπαιδευτικής εμπειρίας που παρακινεί σημαντικά το ενδιαφέρον, και τον ενθουσιασμό των φοιτητών ως προς το εκπαιδευτικό αντικείμενο.

Η παρούσα εργασία αναμένεται να συμβάλει στη συνεχιζόμενη έρευνα στον τομέα των τεχνολογικών εξελίξεων και στην εφαρμογή καινοτόμων πρακτικών σε εκπαιδευτικά περιβάλλοντα, με στόχο τη βελτιστοποίηση της μαθησιακής εμπειρίας και των μαθησιακών αποτελεσμάτων. Διερευνά και προτείνει δημιουργικούς τρόπους συνδυασμού εργαλείων τεχνολογίας εμβύθισης και μεθοδολογιών μάθησης που βασίζονται στο παιχνίδι εστιάζοντας παράλληλα σε συγκεκριμένους εκπαιδευτικούς στόχους.

Λέξεις – κλειδιά: Μεθοδολογίες εκπαίδευσης, τεχνολογίες εμβύθισης, εικονική πραγματικότητα, παιχνιδοποίηση, σχεδιασμός προϊόντων.

ΟΤΑΝ Η ΙΣΤΟΡΙΑ ΓΙΝΕΤΑΙ ΠΑΙΧΝΙΔΙ: ΑΞΙΟΠΟΙΩΝΤΑΣ ΤΗΝ ΤΕΧΝΗΤΗ ΝΟΗΜΟΣΥΝΗ ΚΑΙ ΤΗΝ ΠΑΙΧΝΙΔΟΠΟΙΗΣΗ ΣΤΟ ΜΑΘΗΜΑ ΤΗΣ ΙΣΤΟΡΙΑΣ.

Δρ. Ευάγγελος Σίτας

ΠΕΡΙΛΗΨΗ

Ανέκαθεν η πλειονότητα των μαθητών υποστηρίζει ότι η Ιστορία είναι ένα δύσκολο μάθημα και πως η επιτυχία έρχεται μέσα από την αποστήθιση της διδακτέας ύλης. Στην παρούσα εργασία προτείνεται ένας νέος τρόπος προσέγγισης που έχει ως στόχο να βελτιώσει την εμπλοκή των μαθητών απελευθερώνοντας τους από τα δεσμά της μετωπικής αφήγησης και της αποστήθισης. Θα προτείνουμε μεθόδους για την ενσωμάτωση της ΤΝ σε παιχνιδοποιημένες δραστηριότητες διδασκαλίας και θα εξετάσουμε κατά πόσο η χρήση αυτών των μηχανισμών μπορεί να βελτιώσει την εμπλοκή των μαθητών και τη γνωστική τους απόδοση σε σύγκριση με παραδοσιακές μεθόδους διδασκαλίας.

Αρχικά, αναλύθηκαν οι ανάγκες των μαθητών και καθορίστηκαν οι εκπαιδευτικοί στόχοι. Έπειτα σχεδιάστηκαν οι παιχνιδοποιημένες δραστηριότητες. Με τη βοήθεια της τεχνητής νοημοσύνης προσαρμόσαμε και βελτιώσαμε τις υπάρχουσες δραστηριότητες. Δυο ομάδες μαθητών συμμετείχαν στην έρευνα και ο διαχωρισμός τους σε πειραματική ομάδα και ομάδα ελέγχου έγινε τυχαία. Συγκρίναμε τα αποτελέσματα των ομάδων με χρήση διαγνωστικών και τελικών αξιολογήσεων. Η πιλοτική εφαρμογή έδειξε αυξημένη εμπλοκή και βελτιωμένη απόδοση των μαθητών σε σύγκριση με παραδοσιακές μεθόδους.

Τα τελευταία χρόνια, η παιχνιδοποίηση έχει αναδειχθεί ως μια σύγχρονη παιδαγωγική προσέγγιση, που στην πιο απλή της εκδοχή, χρησιμοποιώντας δηλαδή προκλήσεις, ανταμοιβές και πίνακες κατάταξης, έχει αποδειχθεί ότι μπορεί να βελτιώσει την μαθησιακή εμπειρία. Σήμερα, η τεχνητή νοημοσύνη συνιστά ίσως μια από τις μεγαλύτερες τάσεις στο χώρο της ψηφιακής τεχνολογίας και ολοένα εξελίσσεται ως η τεχνολογία του μέλλοντος φέρνοντας επανάσταση τόσο στον τρόπο που διδάσκουμε όσο και στον τρόπο που μαθαίνουμε. Ο συνδυασμός αυτών των δύο μπορεί να προσφέρει σημαντικά οφέλη στην εκπαίδευση γενικότερα και στην διδασκαλία της ιστορίας ειδικότερα..

Λέξεις – κλειδιά: παιχνιδοποίηση, τεχνητή νοημοσύνη, διδασκαλία ιστορίας, καινοτόμες παιδαγωγικές προσεγγίσεις.

ΠΑΙΧΝΙΔΟΠΟΙΗΣΗ ΚΑΙ ΨΗΦΙΑΚΗ ΑΦΗΓΗΣΗ ΩΣ ΕΡΓΑΛΕΙΑ ΓΙΑ ΤΗΝ ΔΗΜΙΟΥΡΓΙΑ ΔΡΑΣΤΗΡΙΟΤΗΤΩΝ ΑΝΙΧΝΕΥΣΗΣ ΕΛΛΕΙΜΜΑΤΩΝ ΠΡΑΓΜΑΤΟΛΟΓΙΑΣ ΓΙΑ ΠΑΙΔΙΑ

ΠΕΡΙΛΗΨΗ

Οι πραγματολογικές δεξιότητες αποτελούν θεμέλιο λίθο για την κοινωνική αλληλεπίδραση και την ακαδημαϊκή επιτυχία των παιδιών. Τα παραδοσιακά εργαλεία ανίχνευσης συχνά δεν προσελκύουν το ενδιαφέρον των παιδιών, γεγονός που έχει οδηγήσει στην αναζήτηση εναλλακτικών ψηφιακών και παιγνιωδών προσεγγίσεων. Η παρούσα μελέτη διερευνά τη σκοπιμότητα αξιοποίησης ψηφιακών δραστηριοτήτων, που συνδυάζουν στοιχεία παιχνιδοποίησης και ψηφιακής αφήγησης, ως μέσου ανίχνευσης ελλειμμάτων πραγματολογικών δεξιοτήτων σε παιδιά δημοτικού.

Σχεδιάσαμε και αναπτύξαμε διαδραστικές ψηφιακές δραστηριότητες με τη χρήση του PowerPoint, ενσωματώνοντας αφηγηματικά στοιχεία και μηχανισμούς παιχνιδιού για την αξιολόγηση διαφόρων πτυχών της πραγματολογικής ικανότητας. Στη μελέτη συμμετείχαν έξι παιδιά ηλικίας 8–12 ετών, με τη γραπτή συγκατάθεση των γονέων τους. Οι ατομικές συνεδρίες πραγματοποιήθηκαν σε υποστηρικτικά περιβάλλοντα, ενώ η χρηστικότητα, η εμπλοκή και η συνολική εμπειρία αξιολογήθηκαν μέσω δομημένων συνεντεύξεων.

Τα παιδιά ανταποκρίθηκαν θετικά στις ψηφιακές δραστηριότητες, εκφράζοντας υψηλό επίπεδο ενδιαφέροντος και συμμετοχής. Οι περισσότεροι βρήκαν το περιβάλλον εύχρηστο και τις δραστηριότητες ευχάριστες, με ιδιαίτερη προτίμηση στο διαδραστικό σκέλος διαλόγου. Μικρά τεχνικά ή λειτουργικά ζητήματα εντοπίστηκαν σε μεμονωμένες περιπτώσεις, χωρίς όμως να επηρεάσουν ουσιαστικά τη συνολική εμπειρία.

Τα αρχικά ευρήματα της μελέτης υποδηλώνουν ότι η αξιοποίηση ψηφιακών δραστηριοτήτων μπορεί να αποτελέσει μια φιλική προς το παιδί και ελκυστική προσέγγιση για την προκαταρκτική ανίχνευση πραγματολογικών δεξιοτήτων. Ως μελέτη σκοπιμότητας, με μικρό και μη κλινικό δείγμα, απαιτείται περαιτέρω έρευνα με μεγαλύτερο και πιο ετερογενές πληθυσμό, ώστε να διαπιστωθεί η εγκυρότητα της και να επεκταθεί η εφαρμογή της σε εκπαιδευτικά και κλινικά περιβάλλοντα.

Λέξεις-κλειδιά: Πραγματολογία, διαδραστική ανίχνευση, μελέτη σκοπιμότητας, παιχνιδοποίηση, ψηφιακή αφήγηση, παιδιά

ΠΑΙΧΝΙΔΟΠΟΙΗΣΗ (GAMIFICATION) ΣΤΗ ΔΕΥΤΕΡΟΒΑΘΜΙΑ ΕΚΠΑΙΔΕΥΣΗ: ΟΦΕΛΗ, ΕΦΑΡΜΟΓΗ ΚΑΙ ΕΜΠΟΔΙΑ ΥΛΟΠΟΙΗΣΗΣ

ΠΕΡΙΛΗΨΗ

Ο σύγχρονος εκπαιδευτικός αναζητά διαρκώς καινοτόμες διδακτικές προσεγγίσεις που ενισχύουν τη μαθησιακή διαδικασία και κινητοποιούν τους μαθητές. Μία από τις πλέον διαδεδομένες τεχνικές είναι η παιχνιδοποίηση (Gamification), η οποία αξιοποιεί στοιχεία, μηχανισμούς και χαρακτηριστικά των παιχνιδιών σε μη παιγνιώδη περιβάλλοντα. Μέσω της χρήσης σημάτων (badges), πόντων, πινάκων κατάταξης και προκλήσεων, η παιχνιδοποίηση επιδιώκει να αυξήσει τη συμμετοχή των μαθητών, να ενισχύσει τα κίνητρα και να βελτιώσει τη διαδραστικότητα στην εκπαιδευτική διαδικασία. Στη Δευτεροβάθμια Εκπαίδευση, η εφαρμογή της παιχνιδοποίησης μπορεί να συμβάλει στη δημιουργία ενός πιο ελκυστικού μαθησιακού περιβάλλοντος, ενισχύοντας τόσο την εμπλοκή των μαθητών όσο και την αποτελεσματικότητα της διδασκαλίας. Παράλληλα, οι εκπαιδευτικοί εμφανίζονται θετικοί ως προς την εφαρμογή της, αναγνωρίζοντας τα οφέλη που προκύπτουν από την αξιοποίησή της.

Η παρούσα μελέτη εστιάζει στις **εφαρμογές της** παιχνιδοποίησης στη Δευτεροβάθμια Εκπαίδευση στην Ελλάδα**,** εξετάζοντας τόσο τα **οφέλη** όσο και τις **προκλήσεις** που προκύπτουν από την υλοποίηση της. Αρχικά, μέσω βιβλιογραφικής ανασκόπησης, μελετήθηκαν έρευνες και άρθρα που παρουσιάζουν εφαρμογές της παιχνιδοποίησης στη Δευτεροβάθμια εκπαίδευση, τόσο στη γενική όσο και στην ειδική αγωγή, αναδεικνύοντας τα οφέλη και τις δυνατότητές της σε διαφορετικά μαθησιακά περιβάλλοντα. Τα αποτελέσματα δείχνουν ότι η παιχνιδοποίηση συνδέεται με αυξημένη μαθητική συμμετοχή, υψηλότερα κίνητρα μάθησης και βελτιωμένη αλληλεπίδραση μεταξύ μαθητών και εκπαιδευτικών.

Στη συνέχεια, πραγματοποιήθηκε ποσοτική έρευνα μέσω ερωτηματολογίου με τη συμμετοχή 45 εκπαιδευτικών διαφόρων ειδικοτήτων της Δευτεροβάθμιας Εκπαίδευσης από τις ΔΔΕ Μαγνησίας και Λάρισας. Στόχος της έρευνας ήταν η καταγραφή των βασικών προκλήσεων που αντιμετωπίζουν οι εκπαιδευτικοί στην εφαρμογή της παιχνιδοποίησης. Τα ευρήματα καταδεικνύουν ότι, παρά τη θετική στάση των εκπαιδευτικών, υπάρχουν σημαντικά εμπόδια που περιορίζουν την υιοθέτηση της τεχνικής. Συγκεκριμένα, τα κυριότερα εμπόδια που αναδείχθηκαν είναι η έλλειψη επιμόρφωσης των εκπαιδευτικών, η ανεπαρκής υλικοτεχνική υποδομή, το μέγεθος της τάξης και ο περιορισμένος διαθέσιμος διδακτικός χρόνος.

Η εργασία καταλήγει στο συμπέρασμα ότι η επιτυχημένη ενσωμάτωση της παιχνιδοποίησης στη Δευτεροβάθμια εκπαίδευση απαιτεί θεσμική υποστήριξη, αναβάθμιση των σχολικών υποδομών και στοχευμένη επιμόρφωση των εκπαιδευτικών, ώστε να αξιοποιηθεί πλήρως το δυναμικό της τεχνικής αυτής προς όφελος της μαθησιακής διαδικασίας.

Λέξεις – κλειδιά: Παιχνιδοποίηση, Δευτεροβάθμια Εκπαίδευση, Οφέλη, Εμπόδια, Εμπλοκή Μαθητών

THE USE OF DIGITAL GAMES FOR TEACHING READING IN MULTILINGUAL GREEK PRIMARY SCHOOL CLASSROOMS: THE CASE OF D_READ-NARRATE

ABSTRACT

This paper presents an innovative educational software, D_Read-Narrate, designed to support the language, reading and narrative skills of monolingual but mainly bilingual children (8-12 years old) attending Greek public primary schools. As part of the D_Read-Narrate project, software was developed using parts of iRead, an already developed software (https://iread-project.eu/) under the Horizon 2020 funding program to promote the reading skills of students with dyslexia, beginning readers and students learning English as a foreign language. Our aim is to present the design of the software and how it works and to analyze an exemplary lesson plan for its use in educational practice. This software was developed in the framework of the project: "Digital applications for teaching reading and narrative skills in multilingual Greek primary school classes D_READ-NARRATE". This project is carried out within the framework of the National Recovery and Resilience Plan Greece 2.0, funded by the European Union – NextGenerationEU (Implementation body: HFRI). It aims to develop a set of educational web applications that improve the language skills of primary school students learning Greek as a second language (L2). The software includes educational tools (digital classrooms, assessment, assignment of tasks), language assessment software before, during and after use, and student profiles with stored performance data and personalized feedback. From March 2025, the software will be used in public primary schools with reception classes and in schools with many bilingual pupils (e.g. schools for intercultural education) to evaluate its effectiveness.

Keywords: Smart Games, reading, bilinguals, language skills

ΠΕΡΙΛΗΨΗ

Η παρούσα εργασία επικεντρώνεται στην υποστήριξη της διδασκαλίας βασικών εννοιών των Δομών Δεδομένων και Αλγορίθμων, μέσω της ανάπτυξης ενός διαδραστικού εκπαιδευτικού περιβάλλοντος εικονικής πραγματικότητας (Virtual Reality – VR). Στόχος είναι η ενίσχυση της εννοιολογικής κατανόησης μέσω βιωματικής και πειραματικής αλληλεπίδρασης, αξιοποιώντας τις δυνατότητες της VR τεχνολογίας.

Το Virtual AlgoLab, είναι ένα εκπαιδευτικό VR παιχνίδι, υλοποιημένο στην πλατφόρμα Unity, το οποίο περιλαμβάνει έναν εικονικό χώρο με τέσσερα ανεξάρτητα παιχνίδια (minigame). Κάθε παιχνίδι (minigame) έχει σχεδιαστεί ώστε να αποτυπώνει και να αναδεικνύει μία θεμελιώδη έννοια της Πληροφορικής: συνδεδεμένες λίστες, κόμβους, κύκλους Hamilton και δυαδική αναζήτηση. Η δομή του περιβάλλοντος χρήστη είναι εργονομική και απλοποιημένη, με στόχο την υποστήριξη της πλοήγησης από αρχάριους χρήστες χωρίς προηγούμενη εμπειρία σε VR συστήματα.

Η λειτουργικότητα του παιχνιδιού εστιάζει στην ενεργή εμπλοκή των χρηστών μέσω πλοήγησης, επιλογής, και αλληλεπίδρασης με αντικείμενα και έννοιες που αντιστοιχούν σε αλγοριθμικές διαδικασίες ή δομές δεδομένων. Η σχεδίαση βασίστηκε σε παιδαγωγικές αρχές ενεργητικής μάθησης και εννοιολογικής μεταφοράς σε ψηφιακά περιβάλλοντα.

Για την αποτίμηση της αποτελεσματικότητας του παιχνιδιού στην επίτευξη του σκοπού του, πραγματοποιήθηκαν δοκιμές με μαθητές δημοτικού, και φοιτητές. Παρατηρήθηκε πως το VR Algolabs καταφέρνει με επιτυχία να ελκύσει το ενδιαφέρον όλων των ηλικιακών ομάδων, ενώ οι χρήστες που το αξιολόγησαν δεν παρουσίασαν ιδιαίτερη δυσκολία στην κατανόηση του στόχου και του θεωρητικού υπόβαθρου από κάθε minigame.

Λέξεις-Κλειδιά: Virtual Reality, AlgoLab, εκπαιδευτικό παιχνίδι, Δομές Δεδομένων, Αλγόριθμοι, Unity.

ΘΠ16: Εικονική, Επαυξημένη και Μικτή Πραγματικότητα στην Εκπαίδευση

ΠΕΡΙΛΗΨΗ

Η ενσωμάτωση των εικονικών εργαστηρίων (Virtual Laboratories) στη δευτεροβάθμια εκπαίδευση STEM (Επιστήμη, Τεχνολογία, Μηχανική και Μαθηματικά) μεταμορφώνει τις παραδοσιακές διδακτικές πρακτικές, προσφέροντας διαδραστικά, οικονομικά και ευέλικτα μαθησιακά περιβάλλοντα. Η παρούσα μελέτη εξετάζει τις διδακτικές προσεγγίσεις, τα οφέλη, τις προκλήσεις και τις προοπτικές των VLs στην ενίσχυση της επιστημονικής μάθησης. Τα εικονικά εργαστήρια προσομοιώνουν πραγματικά εργαστηριακά περιβάλλοντα, επιτρέποντας στους μαθητές να διεξάγουν ψηφιακά πειράματα, να μεταβάλλουν παραμέτρους και να οπτικοποιούν σύνθετα φαινόμενα ενισχύοντας την εμπλοκή, την παρακίνηση και τη μάθηση μέσω διερεύνησης. Παρά τα πλεονεκτήματά τους, εξακολουθούν να υφίστανται περιορισμοί, όπως η απουσία απτικής εμπειρίας, η ανάγκη επιμόρφωσης των εκπαιδευτικών, η εναρμόνιση με το αναλυτικό πρόγραμμα και οι ανισότητες στην ψηφιακή πρόσβαση. Συνιστάται μια μικτή προσέγγιση μάθησης που συνδυάζει φυσικά και εικονικά εργαστήρια, ώστε να διασφαλίζεται η ολόπλευρη ανάπτυξη δεξιοτήτων. Με την εμφάνιση τεχνολογιών όπως η τεχνητή νοημοσύνη, η επαυξημένη πραγματικότητα και οι συνεργατικές διαδικτυακές πλατφόρμες, το μέλλον των VLs στη δευτεροβάθμια STEM εκπαίδευση διαγράφεται ελπιδοφόρο. Συνολικά, τα εικονικά εργαστήρια μπορούν να διαδραματίσουν κρίσιμο ρόλο στην προετοιμασία των μαθητών για την ανώτερη εκπαίδευση STEM, καλλιεργώντας εννοιολογική κατανόηση και βασικές δεξιότητες του 21ου αιώνα.

Λέξεις – κλειδιά: Εικονικά εργαστήρια, Δευτεροβάθμια εκπαίδευση, STEM.

ΘΠ17: Διαδικτυακά εκπαιδευτικά περιβάλλοντα για την ενίσχυση της μικτής και της εξ αποστάσεως εκπαίδευσης

ΠΕΡΙΛΗΨΗ

Οι εξ αποστάσεως εξετάσεις, που καθιερώθηκαν κατά την περίοδο της πανδημίας και παραμένουν σε χρήση στο Ελληνικό Ανοικτό Πανεπιστήμιο (ΕΑΠ), αποτελούν μια διαδικασία που απαιτεί συνεχή επαναπροσδιορισμό. Και αυτό διότι οι εξετάσεις αυτής της μορφής όχι μόνο εισάγουν νέες προκλήσεις, αλλά και απαιτούν διαφορετικές στρατηγικές αξιολόγησης για τη διασφάλιση της εγκυρότητας και αξιοπιστίας των αποτελεσμάτων. Σημαντικά ζητήματα που εγείρονται περιλαμβάνουν τις διαδικασίες ταυτοποίησης και επιτήρησης των φοιτητών/τριών, την επιλογή θεμάτων εξετάσεων (μορφή, περιεχόμενο κ.ά.), καθώς και την εξασφάλιση της ευθυγράμμισης αυτών με τους εκπαιδευτικούς στόχους.

Στο πλαίσιο αυτό, η τεχνολογία έχει διαδραματίσει καίριο ρόλο σε αυτή τη μεταμόρφωση, ενσωματώνοντας εργαλεία όπως το λογισμικό ανίχνευσης ομοιότητας (Turnitin) και εξειδικευμένα λογισμικά επιτήρησης. Παράλληλα, η εμφάνιση της Τεχνητής Νοημοσύνης ενισχύει τις προκλήσεις, καθώς απαιτείται μια πιο σύνθετη και στοχευμένη προσέγγιση για την ανάπτυξη θεμάτων που αποτρέπουν τη μη αυθεντική συμμετοχή των φοιτητών/τριών. Για παράδειγμα, οι εξετάσεις με ανοικτά βιβλία, βασική επιλογή στο υπό μελέτη Πρόγραμμα Μεταπτυχιακών Σπουδών (ΠΜΣ) «Εκπαίδευση & Τεχνολογίες σε Συστήματα Εξ Αποστάσεως Διδασκαλίας και Μάθησης - Επιστήμες της Αγωγής (ΕΤΑ)» του ΕΑΠ της παρούσας εργασίας, αναδεικνύουν την κριτική σκέψη ως τον πρωταρχικό παράγοντα αξιολόγησης. Η εστίαση στη δεξιότητα αυτή αποτελεί ακρογωνιαίο λίθο της εκπαιδευτικής διαδικασίας και αντανακλά τις απαιτήσεις της σύγχρονης εποχής.

Στη βάση αυτή, η εργασία αυτή στοχεύει στη συστηματική παρουσίαση και ανάλυση των διαδικασιών που εφαρμόστηκαν στις εξ αποστάσεως εξετάσεις του ΠΜΣ ΕΤΑ του ΕΑΠ κατά την πενταετία (2020-2025), καταδεικνύοντας τα οφέλη και τις προκλήσεις. Επιπλέον, συζητείται η εξέλιξη των μεθόδων αξιολόγησης, με έμφαση στη διασφάλιση ότι οι φοιτητές/τριες εμπλέκονται ουσιαστικά και αποδεικνύουν τη γνώση και τις δεξιότητες που ανέπτυξαν κατά τη διάρκεια των Θεματικών Ενοτήτων.

Ως προς τη μεθοδολογία της, η παρούσα εργασία εστιάζει στο σύνολο των διαδικασιών των εξ αποστάσεως εξετάσεων και πρακτικών αξιολόγησης που εφαρμόστηκαν στο ΠΜΣ «ΕΤΑ» του ΕΑΠ στη διάρκεια 11 εξαμήνων. Εξετάζεται η ανάπτυξη θεμάτων εξετάσεων και πρακτικών αξιολόγησης και κατά πόσο αυτές ευθυγραμμίζονται με τις τεχνολογικές και παιδαγωγικές εξελίξεις. Μελετάται ο τρόπος με τον οποίο οι διδάσκοντες/ουσες προσαρμόζονται στην ενσωμάτωση εργαλείων όπως το Turnitin, για την αποτροπή φαινομένων λογοκλοπής, και της Τεχνητής Νοημοσύνης, για την πρόκληση αυθεντικής εμπλοκής των φοιτητών/τριών στις εξετάσεις. Διερευνάται η εφαρμογή κάποιων από τις πρακτικές που υιοθετήθηκαν στο πλαίσιο της μορφής αυτών των εξ αποστάσεως εξετάσεων.

Λέξεις κλειδιά: εξ αποστάσεως εκπαίδευση, τεχνολογία, ψηφιακές εξετάσεις, εγκυρότητα, αξιοπιστία, αυθεντική αξιολόγηση, κριτική σκέψη

ΠΕΡΙΛΗΨΗ

Οι Ειδικές Μαθησιακές Δυσκολίες (ΕΜΔ) αποτελούν νευροαναπτυξιακές διαταραχές που επηρεάζουν βασικές ακαδημαϊκές δεξιότητες, καθιστώντας αναγκαία την εφαρμογή εξατομικευμένων και συμπεριληπτικών εκπαιδευτικών προσεγγίσεων. Η ενσωμάτωση των ψηφιακών τεχνολογιών στη σύγχρονη εκπαιδευτική πραγματικότητα, ιδιαίτερα κατά και μετά την πανδημία COVID-19, ανέδειξε νέες δυνατότητες υποστήριξης των μαθητών/τριών με ΕΜΔ, αλλά παράλληλα κατέστησε εμφανείς υφιστάμενες ανισότητες ως προς την πρόσβαση και την παιδαγωγική αξιοποίηση των τεχνολογικών μέσων.

Σκοπός της παρούσας μελέτης είναι η διερεύνηση της αποτελεσματικότητας των ψηφιακών εργαλείων στην υποστήριξη μαθητών/τριών με ΕΜΔ, καθώς και η κριτική αποτίμηση των προκλήσεων που σχετίζονται με την ψηφιακή προσβασιμότητα και την εκπαιδευτική συμπερίληψη. Σε μεθοδολογικό επίπεδο, η έρευνα βασίζεται σε συστηματική επισκόπηση και δευτερογενή ανάλυση δεδομένων από διεθνείς εκθέσεις οργανισμών, όπως η UNESCO, ο OECD και η Ευρωπαϊκή Επιτροπή, για την περίοδο 2020–2023, με έμφαση στη συγκριτική ανάλυση της χρήσης ψηφιακών τεχνολογιών ανά κατηγορία ΕΜΔ.

Τα ευρήματα της μελέτης καταδεικνύουν υψηλότερα επίπεδα υιοθέτησης και τεχνολογικής ωριμότητας για παρεμβάσεις που αφορούν τη δυσλεξία, σε σύγκριση με άλλες μαθησιακές δυσκολίες, όπως η δυσαριθμησία. Παράλληλα, αναδεικνύεται η ύπαρξη σημαντικού ψηφιακού χάσματος και ελλείψεων στην εξειδικευμένη επιμόρφωση των εκπαιδευτικών στην Ελλάδα σε σύγκριση με άλλες χώρες του δυτικού κόσμου. Η μελέτη καταλήγει στην ανάγκη διαμόρφωσης μιας ολιστικής ψηφιακής στρατηγικής που θα στηρίζεται στις αρχές της Καθολικής Σχεδίασης για τη Μάθηση, με στόχο τη διασφάλιση της ισότιμης πρόσβασης και της ουσιαστικής εκπαιδευτικής συμπερίληψης όλων των μαθητών/τριών με ΕΜΔ.

Λέξεις-κλειδιά: Ειδικές Μαθησιακές Δυσκολίες, ψηφιακά μέσα, ψηφιακό χάσμα, εξ αποστάσεως εκπαίδευση, συμπερίληψη

ΘΠ18: Κοινωνικά δίκτυα και εκπαίδευση

ΚΟΙΝΩΝΙΚΑ ΔΙΚΤΥΑ ΚΑΙ ΕΚΠΑΙΔΕΥΣΗ

ΠΕΡΙΛΗΨΗ

Τα κοινωνικά δίκτυα έχουν γίνει αναπόσπαστο κομμάτι της σύγχρονης ζωής, επηρεάζοντας σχεδόν όλους τους τομείς, συμπεριλαμβανομένης και της εκπαίδευσης. Η χρήση τους στην εκπαιδευτική διαδικασία έχει ανοίξει νέους ορίζοντες, αλλά ταυτόχρονα θέτει και σημαντικές προκλήσεις. Η παρούσα εργασία αποσκοπεί στο να εξετάσει τη σχέση αυτή, να αναλύσει τη σχετική νομοθεσία και να προτείνει κατευθύνσεις για την ορθή χρήση των κοινωνικών δικτύων στο εκπαιδευτικό περιβάλλον. Αναλυτικότερα, τα κοινωνικά δίκτυα έχουν γίνει αναπόσπαστο κομμάτι της σύγχρονης ζωής, επηρεάζοντας σχεδόν όλους τους τομείς, συμπεριλαμβανομένης και της εκπαίδευσης. Η ραγδαία εξέλιξη της τεχνολογίας και η διείσδυση των ψηφιακών πλατφορμών στην καθημερινότητά μας, έχουν μεταβάλει τον τρόπο με τον οποίο μαθαίνουμε, επικοινωνούμε και συνεργαζόμαστε. Στο πλαίσιο της εκπαίδευσης, τα κοινωνικά δίκτυα έχουν ανοίξει νέους ορίζοντες, προσφέροντας ευκαιρίες για διαδραστική μάθηση, συνεργασία και πρόσβαση σε πλούσιους εκπαιδευτικούς πόρους. Ωστόσο, η χρήση τους δεν υφίσταται χωρίς προκλήσεις. Ζητήματα όπως η προστασία της ιδιωτικής ζωής, η ασφάλεια των δεδομένων, ο κυβερνοεκφοβισμός και η ανάγκη για ψηφιακή παιδεία αποτελούν σημαντικές ανησυχίες που απαιτούν προσοχή και αντιμετώπιση. Για τούτο, θα προσπαθήσουμε να εξετάσουμε τη σχέση αυτή, αναλύοντας τόσο τις ευκαιρίες όσο και τις προκλήσεις που προκύπτουν από τη χρήση των κοινωνικών δικτύων στο εκπαιδευτικό περιβάλλον. Στόχος είναι να κατανοήσουμε πώς αυτές οι πλατφόρμες μπορούν να ενισχύσουν την εκπαιδευτική διαδικασία, να διευκολύνουν την επικοινωνία μεταξύ μαθητών και εκπαιδευτικών και να προωθήσουν την καινοτομία στη διδασκαλία. Παράλληλα, θα εξεταστούν οι νομικές και ηθικές διαστάσεις της χρήσης των κοινωνικών δικτύων, με έμφαση στην προστασία των δεδομένων και των δικαιωμάτων των μαθητών. Η συζήτηση θα επικεντρωθεί και στην ορθή χρήση των κοινωνικών δικτύων, προτείνοντας κατευθύνσεις και καλές πρακτικές που μπορούν να υιοθετηθούν από εκπαιδευτικούς και εκπαιδευτικούς φορείς. Θα αναλυθούν τα πλεονεκτήματα της ψηφιακής παιδείας, η σημασία της ευαισθητοποίησης των μαθητών για τους κινδύνους του διαδικτύου και ο ρόλος των εκπαιδευτικών ως μεντόρων στην ψηφιακή εποχή. Επιπλέον, θα διερευνηθεί πώς τα κοινωνικά δίκτυα μπορούν να συμβάλλουν στη δημιουργία ενός πιο συμπεριληπτικού και δίκαιου εκπαιδευτικού συστήματος, παρέχοντας πρόσβαση σε γνώση και πόρους σε μαθητές από διαφορετικά κοινωνικά και γεωγραφικά πλαίσια.

Τέλος η παρούσα εργασία στοχεύει να προσφέρει μια ολοκληρωμένη προσέγγιση στη σχέση μεταξύ κοινωνικών δικτύων και εκπαίδευσης, συνδυάζοντας θεωρητική ανάλυση, πρακτικές εφαρμογές και νομικές προοπτικές. Μέσα από τη συλλογική συζήτηση και την ανταλλαγή ιδεών, επιδιώκεται να διαμορφωθεί ένας οδικός χάρτης για την ασφαλή, υπεύθυνη και αποτελεσματική χρήση των κοινωνικών δικτύων στην εκπαίδευση, προς όφελος τόσο των μαθητών όσο και της εκπαιδευτικής κοινότητας στο σύνολό της.

Λέξεις – κλειδιά: Κοινωνικά δίκτυα, εκπαίδευση, διδασκαλία, συμπερίληψη.

ΘΠ19: Διαδικτυακές Κοινότητες Μάθησης

ΠΕΡΙΛΗΨΗ

Η ανάδειξη των νέων τεχνολογιών και οι άπειρες εφαρμογές τους σε όλες τις πτυχές της ζωής μας, έχουν επηρεάσει τα εκπαιδευτικά συστήματα παγκοσμίως. Στο Ελληνικό δημόσιο σχολικό περιβάλλον πολλοί εκπαιδευτικοί αισθάνονται ότι ήρθε η ώρα να αγκαλιάσουν τις παιδαγωγικές εφαρμογές των Νέων Τεχνολογιών , όχι απλώς ως τεχνολογικό εργαλείο, αλλά σαν όχημα για να βελτιώσουν τις διδακτικές τους προσεγγίσεις, προωθώντας τη συνεχή επαγγελματική ανάπτυξη των εκπαιδευτικών και τις δεξιότητες του 21ου αιώνα για τους μαθητές τους, μέσα από την εμπνευσμένη συνεργασία τους σε κοινότητες πρακτικής και μάθησης. Η παρούσα μελέτη πραγματεύεται τον σχεδιασμό, εφαρμογή και αξιολόγηση της συμμετοχής μας στα πλαίσια του μαθήματος της Αγγλικής Γλώσσας στο 4ο Δημοτικό Σχολείο Πρέβεζας στην μοναδική διαδικτυακή κοινότητα μάθησης του “Out of Eden Learn” (OOEL) του Οργανισμού Project Zero της Παιδαγωγικής Σχολής του Πανεπιστήμιου Harvard. Πιο συγκεκριμένα, τα αποτελέσματα της συμμετοχής μας στα διάφορα μαθησιακά ταξίδια, σχεδιασμένα από την ερευνητική ομάδα του Harvard, από την αρχική πιλοτική εφαρμογή των Εργαστηρίων Δεξιοτήτων το 2020 σε εθνικό επίπεδο και οι διεθνείς μας συνεργασίες τα επόμενα χρόνια, ανέδειξαν πολύ θετικά αποτελέσματα σχετικά με την εσωτερική κινητοποίηση των μαθητών μας καθώς και την προώθηση των πολυγραμματισμών και των συμπεριληπτικών, ψηφιακών, δεξιοτήτων κριτικής σκέψης σε ένα διασυνδεδεμένο, πολιτισμικά και γλωσσικά πλούσιο, μαθησιακό περιβάλλον.

Λέξεις – κλειδιά: Διαδικτυακές Κοινότητες Μάθησης, Δεξιότητες του 21ου αιώνα, Ρουτίνες σκέψης, “Out of Eden Learn” , Ψηφιακή μάθηση, Πολυγραμματισμοί

ΠΕΡΙΛΗΨΗ

Η παρούσα μελέτη εξετάζει την εφαρμογή του RQDA, ενός λογισμικού ανοιχτού κώδικα για ποιοτική ανάλυση κειμένων, στη συστηματική ανάλυση συνεδριών εκπαιδευτικής συμβουλευτικής. Οκτώ ηχογραφημένες συνεδρίες, διάρκειας περίπου μίας ώρας η καθεμία, απομαγνητοφωνήθηκαν, εισήχθησαν στο RQDA και οργανώθηκαν μέσω του περιβάλλοντος εργασίας που παρέχει. Η επαγωγική θεματική κωδικοποίηση παρήγαγε πέντε τύπους οπτικοποιήσεων: ραβδογράμματα συχνότητας κωδικών, θεματικούς χάρτες, δίκτυα συνύπαρξης κωδικών, λεκτικά δενδροδιαγράμματα και συννεφόλεξα. Από την ποιοτική θεματική ανάλυση προέκυψε ότι τα τμήματα που αφορούσαν την εφαρμογή σχεδίου δράσης, την παροχή πληροφοριών και την έγκαιρη ανταπόκριση αντιστοιχούσαν σε πάνω από το 85% του συνόλου των κωδικοποιήσεων, αναδεικνύοντας την κυρίαρχη έμφαση στην πρακτική καθοδήγηση και την υποστήριξη σε πραγματικό χρόνο. Κωδικοί με μικρότερη συχνότητα, όπως οι δεξιότητες ακρόασης, η οικοδόμηση σχέσεων και η συναισθηματική καθησύχαση, ανέδειξαν δευτερεύουσες συναισθηματικές διαστάσεις. Τα δίκτυα συνύπαρξης επιβεβαίωσαν ισχυρές σχέσεις μεταξύ του σχεδιασμού δράσης και της ανταλλαγής πληροφοριών, ενώ οι οπτικοποιήσεις λέξεων αποκάλυψαν επαναλαμβανόμενα γλωσσικά μοτίβα συνεργατικής λήψης αποφάσεων. Τα αποτελέσματα αναδεικνύουν τη συμβολή του RQDA στην ενίσχυση της διαφάνειας και της επαναληψιμότητας της ποιοτικής ανάλυσης, καθώς και στη λειτουργική του ένταξη σε ποσοτικές διαδικασίες στο πλαίσιο σύνθετων ερευνητικών σχεδιασμών. Εφεξής, η αξιοποίηση συνδυαστικών μεθοδολογιών που ενσωματώνουν ποιοτικά δεδομένα σε ποσοτικά μοντέλα δύναται να προσφέρει βαθύτερη κατανόηση των συμβουλευτικών διεργασιών και να ενισχύσει τη συνολική μεθοδολογική εγκυρότητα.

Λέξεις-κλειδιά: RQDA, Ποιοτική Ανάλυση, Εργαλεία Λογισμικού Ανοιχτού Κώδικα, Εκπαιδευτική Συμβουλευτική

ΘΠ24: Διδασκαλία και ψηφιακά μέσα

ΠΕΡΙΛΗΨΗ

Ο σκοπός της παρούσης εργασίας είναι να καταδείξει την χρησιμότητα των επιστημονικών λογισμικών στην κατανόηση, στον υπολογισμό και στην εμβάθυνση των εννοιών των φυσικών επιστημών, μέσω συνδυαστικών και κινούμενων απεικονίσεων. Είναι μάλιστα ιδιαίτερα σημαντική για φυσικά μεγέθη και έννοιες, οι οποίες είναι αφηρημένες, και δεν υπάρχει άμεση εποπτεία σε αυτές (π.χ. τα μεγέθη των πεδίων, τα ατομικά και κυματικά φαινόμενα). Όλα τα παραπάνω γίνονται με την βοήθεια των λογισμικών MAPLE και MATHCAD. Επίσης, μέσω του λογισμικού προσομοίωσης TINA, δίνεται μία ισχυρή εναλλακτική πρόταση μελέτης ηλεκτρικών κυκλωμάτων σε σχέση με την κλασσική εργαστηριακή και καταδεικνύεται η αποτελεσματικότητα της, ιδιαίτερα σε περιπτώσεις, όπου η εργαστηριακή δραστηριότητα δεν μπορεί να πραγματοποιηθεί λόγω ενδογενών προβλημάτων.

Στο πρώτο μέρος της εργασίας δημιουργούνται και απεικονίζονται τα χαρακτηριστικά φυσικά μεγέθη του ηλεκτροστατικού πεδίου, όπως η ένταση, οι ισοδυναμικές καμπύλες ή επιφάνειες, οι δυναμικές γραμμές σε δύο και τρείς διαστάσεις για ένα μεμονωμένο φορτίο, όπως επίσης και για συνδυασμό φορτίων.

Στο δεύτερο μέρος της εργασίας, παρουσιάζονται κυματικά φαινόμενα στο επίπεδο και στον χώρο, όπως η χωροχρονική διάδοση ενός κύματος σταθερού πλάτους, αλλά και με απόσβεση, χωροχρονική παραγωγή στάσιμου κύματος, χωροχρονική παραγωγή και εξέλιξη διακροτήματος και συμβολής κυμάτων.

Στο τρίτο μέρος της εργασίας, γίνεται παραγωγή και σχεδίαση ατομικών τροχιακών. Απεικονίζονται τα ατομικά τροχιακά s, p, d, f, καθώς και το υβριδικό sp^2 στο επίπεδο και στον χώρο, όπως επίσης, διαγράμματα πυκνότητας και διάφορες τομές τους στον χώρο.

Στο τελευταίο μέρος της εργασίας, παρουσιάζεται η μελέτη ηλεκτρικών και κατ’ επέκταση ηλεκτρονικών κυκλωμάτων, μέσω της δυνατότητας POSTPROCESSING του λογισμικού προσομοίωσης ηλεκτρικών και ηλεκτρονικών κυκλωμάτων TINA.

Λέξεις – κλειδιά: Ηλεκτροστατικό Πεδίο, Κύματα, Ατομικά Τροχιακά, Ηλεκτρικά Κυκλώματα.

ΜΙΚΡΑΣΙΑΤΙΚΗ ΚΑΤΑΣΤΡΟΦΗ ΚΑΙ ΜΙΚΡΑΣΙΑΤΙΚΑ ΜΝΗΜΕΙΑ : ΕΚΠΑΙΔΕΥΤΙΚΗ ΠΡΩΤΟΒΟΥΛΙΑ ΜΕ ΧΡΗΣΗ ΨΗΦΙΑΚΩΝ ΕΡΓΑΛΕΙΩΝ

e-mail: alexandropoulosalekos@yahoo.com

ΠΕΡΙΛΗΨΗ

Η παρούσα εργασία εξετάζει την εκπαιδευτική πρωτοβουλία του μαθητικού ομίλου Ιστορίας με τίτλο «Μικρασιατική Καταστροφή και Μικρασιατικά Μνημεία», η οποία υλοποιήθηκε στο 1ο Πρότυπο Γυμνάσιο Πρέβεζας κατά το σχολικό έτος 2022-2023. Σκοπός της πρωτοβουλίας ήταν η συνδυασμένη εμβάθυνση στην ιστορική γνώση και μνήμη της Μικρασιατικής Καταστροφής, μέσω της ενσωμάτωσης καινοτόμων ψηφιακών εργαλείων στην εκπαιδευτική διαδικασία. Η εργασία αναλύει πώς η χρήση της τεχνολογίας ενίσχυσε την κατανόηση των ιστορικών γεγονότων, επιτρέποντας στους μαθητές να προσεγγίσουν και να παρουσιάσουν την ιστορία με σύγχρονο και διαδραστικό τρόπο.

Η μεθοδολογία που ακολουθήθηκε περιλάμβανε τη χρήση ψηφιακών πλατφορμών για την αναζήτηση, ανάλυση και επεξεργασία ιστορικών πηγών, όπως επίσης και την εκπόνηση εργασιών και δημιουργία παρουσιάσεων μέσω λογισμικών παρουσίασης (π.χ. PowerPoint). Παράλληλα, χρησιμοποιήθηκαν ψηφιακά εργαλεία για τη συγκέντρωση φωτογραφικού υλικού, τη δημιουργία ψηφιακών αφισών και την οργάνωση ψηφιακών εκδηλώσεων. Ένα σημαντικό στάδιο του προγράμματος ήταν η δημιουργία ενός τραγουδιού, το οποίο μελοποιήθηκε με τη χρήση μουσικών λογισμικών παραγωγής (όπως το GarageBand και το FL Studio), καθώς και η δημιουργία ψηφιακού ραδιοφωνικού προγράμματος, όπου οι μαθητές παρουσίασαν ιστορικά δεδομένα μέσω ενός σύγχρονου μέσου επικοινωνίας.

Τα κύρια ευρήματα της εργασίας υποδεικνύουν τη θετική επίδραση της χρήσης ψηφιακών εργαλείων στην ενίσχυση της συνεργασίας και της δημιουργικότητας των μαθητών. Η αξιοποίηση των τεχνολογικών εργαλείων επέτρεψε στους μαθητές να συμμετέχουν ενεργά σε όλες τις φάσεις του έργου, ενισχύοντας την κριτική σκέψη και την ικανότητά τους να παράγουν ψηφιακό περιεχόμενο. Ιδιαίτερα, η δημιουργία του τραγουδιού και του ψηφιακού ραδιοφωνικού προγράμματος αποτέλεσε μια κορυφαία στιγμή της μαθησιακής διαδικασίας, καθώς συνδύασε τη μουσική και την ιστορική μνήμη με την τεχνολογία, προσφέροντας στους μαθητές τη δυνατότητα να εκφραστούν δημιουργικά.

Τα αποτελέσματα καταδεικνύουν ότι η συνδυασμένη χρήση παραδοσιακών μεθόδων διδασκαλίας και ψηφιακών εργαλείων ενισχύει την εκπαιδευτική διαδικασία, προσφέροντας στους μαθητές πολύτιμες δεξιότητες για τη σύγχρονη εποχή. Οι μαθητές ανέπτυξαν τις δεξιότητές τους στην κριτική σκέψη, την έκφραση και τη συνεργασία σε ψηφιακό περιβάλλον, αποκτώντας εμπειρίες που ενισχύουν την ικανότητά τους να προσεγγίζουν ιστορικά θέματα με δημιουργικό και σύγχρονο τρόπο.

Λέξεις – κλειδιά: Μικρασιατική Καταστροφή, ιστορική μνήμη, ψηφιακά εργαλεία.

ΔΙΔΑΣΚΑΛΙΑ ΤΟΥ ΜΑΘΗΜΑΤΟΣ ΤΗΣ ΙΣΤΟΡΙΑΣ ΜΕ ΤΗ ΧΡΗΣΗ ΨΗΦΙΑΚΩΝ ΜΕΣΩΝ: ΠΑΡΟΥΣΙΑΣΗ ΣΧΕΔΙΟΥ ΔΙΔΑΣΚΑΛΙΑΣ

ΠΕΡΙΛΗΨΗ

Η διδασκαλία της Ιστορίας αποτελεί μία ιδιαίτερη παιδαγωγική πρόκληση, απαιτώντας την ενεργοποίηση της κριτικής σκέψης, την ερμηνεία ιστορικών πηγών και τη σύνδεση παρελθόντος και παρόντος. Η αξιοποίηση των ψηφιακών μέσων παρέχει νέες δυνατότητες προς αυτή την κατεύθυνση, καθιστώντας την ιστορική γνώση περισσότερο διαδραστική και προσιτή στους μαθητές.

Η ενσωμάτωση της τεχνολογίας στην ιστορική εκπαίδευση περιλαμβάνει τη χρήση διαδραστικών χαρτών, εικονικών αναπαραστάσεων, πολυμεσικού υλικού, ψηφιακών αρχείων και εκπαιδευτικών πλατφορμών. Τα εργαλεία αυτά επιτρέπουν στους μαθητές να εξερευνούν ιστορικά γεγονότα μέσω οπτικοποιημένων δεδομένων, να αναλύουν πρωτογενείς πηγές και να συμμετέχουν σε βιωματικές δραστηριότητες. Για παράδειγμα, οι γεωγραφικά πληροφοριακά συστήματα (GIS) και εφαρμογές όπως το Google Earth επιτρέπουν την ιστορική χαρτογράφηση, διευκολύνοντας την κατανόηση του χωροχρονικού πλαισίου των γεγονότων. Επιπλέον, οι τεχνολογίες εικονικής και επαυξημένης πραγματικότητας (VR/AR) δίνουν τη δυνατότητα «ψηφιακών επισκέψεων» σε ιστορικούς χώρους, ενισχύοντας την εμπειρική προσέγγιση της Ιστορίας.

Το πολυμεσικό υλικό, όπως ντοκιμαντέρ, διαδραστικά βίντεο και ιστορικά αρχεία, προσφέρει μια πολυτροπική διδακτική προσέγγιση που ανταποκρίνεται στις διαφοροποιημένες μαθησιακές ανάγκες. Παράλληλα, η ψηφιακή αφήγηση (digital storytelling) ενισχύει τη δημιουργική συμμετοχή των μαθητών, επιτρέποντάς τους να κατασκευάζουν τις δικές τους ιστορικές αφηγήσεις, συνδυάζοντας πηγές, εικόνες και βίντεο.

Η παιγνιοποίηση (gamification) αποτελεί έναν ακόμη καινοτόμο διδακτικό μηχανισμό, καθώς ενσωματώνει στοιχεία πρόκλησης, ανταμοιβής και συνεργασίας. Πλατφόρμες όπως το Kahoot!, το Quizizz και το Mission US επιτρέπουν την αφομοίωση ιστορικών γνώσεων μέσω διαδραστικών δραστηριοτήτων, αυξάνοντας το ενδιαφέρον των μαθητών.

Παρά τις δυνατότητες που προσφέρει η τεχνολογία, προκύπτουν προκλήσεις που απαιτούν προσεκτική διαχείριση. Η αξιοπιστία των ψηφιακών πηγών, η ανάπτυξη κριτικής προσέγγισης στην πληροφορία και η επιμόρφωση των εκπαιδευτικών στη χρήση ψηφιακών εργαλείων συνιστούν βασικούς παράγοντες επιτυχούς ενσωμάτωσης της τεχνολογίας στην ιστορική διδασκαλία.

Συμπερασματικά, η αξιοποίηση των ψηφιακών μέσων στη διδασκαλία της Ιστορίας δεν αποτελεί απλώς έναν τεχνολογικό εκσυγχρονισμό, αλλά μια παιδαγωγική αναβάθμιση που ενισχύει την κριτική σκέψη, τη βιωματική μάθηση και τη βαθύτερη κατανόηση του ιστορικού παρελθόντος. Με τη σωστή χρήση των εργαλείων αυτών, η Ιστορία καθίσταται πιο προσιτή και ελκυστική, διαμορφώνοντας ενεργούς και συνειδητοποιημένους πολίτες.

Η παρούσα εργασία εξετάζει τον ρόλο των ψηφιακών τεχνολογιών στη διδασκαλία της Ιστορίας, εστιάζοντας σε σύγχρονες μεθόδους που αξιοποιούν διαδραστικούς χάρτες, εικονικές αναπαραστάσεις, πολυμεσικό υλικό και εργαλεία παιχνιδοποίησης μέσα από την παρουσίαση ενός σχεδίου διδασκαλίας δύο ωρών, στο μάθημα της Ιστορίας της Στ΄ τάξης, στην ενότητα: «Η δεύτερη πολιορκία και η έξοδος του Μεσολογγίου».

Η ενσωμάτωση ψηφιακών τεχνολογιών στη διδασκαλία της ενότητας συνέβαλε καθοριστικά στην ενίσχυση της ιστορικής σκέψης και της ενεργού συμμετοχής των μαθητών. Η χρήση διαδραστικών χαρτών και εικονικών αναπαραστάσεων διευκόλυνε την κατανόηση του χωροχρονικού πλαισίου των γεγονότων, ενώ το πολυμεσικό υλικό και

η ψηφιακή αφήγηση προήγαγαν τη βιωματική και δημιουργική μάθηση. Επιπλέον, η αξιοποίηση παιχνιδοποιημένων δραστηριοτήτων ενίσχυσε το ενδιαφέρον και την αφομοίωση του περιεχομένου. Παράλληλα, οι μαθητές ανέπτυξαν δεξιότητες κριτικής ανάλυσης ψηφιακών πηγών. Ωστόσο, αναδείχθηκαν προκλήσεις σχετικές με τη διαχείριση του διδακτικού χρόνου και την ανάγκη συστηματικής επιμόρφωσης των εκπαιδευτικών στη χρήση ψηφιακών μέσων.

Λέξεις - κλειδιά: διδασκαλία Ιστορίας, ψηφιακά μέσα, διαδραστική μάθηση, εικονικές αναπαραστάσεις, παιχνιδοποίηση, τεχνολογία στην εκπαίδευση

ΤΟ ΒΙΝΤΕΟΜΑΘΗΜΑ ΩΣ ΜΕΣΟ ΔΙΔΑΣΚΑΛΙΑΣ ΚΑΙ ΑΞΙΟΛΟΓΗΣΗΣ ΣΤΗΝ ΕΠΑΓΓΕΛΜΑΤΙΚΗ ΕΚΠΑΙΔΕΥΣΗ. ΣΧΕΔΙΑΣΜΟΣ ΚΑΙ ΥΛΟΠΟΙΗΣΗ ΒΙΝΤΕΟΜΑΘΗΜΑΤΟΣ ΣΕ ΜΑΘΗΜΑΤΑ ΤΟΥ ΕΠΑΓΓΕΛΜΑΤΙΚΟΥ ΛΥΚΕΙΟΥ

ΠΕΡΙΛΗΨΗ

Αυτή η εργασία προσφέρει μια ολοκληρωμένη εξέταση του βιντεομαθήματος ως ζωτικής σημασίας ψηφιακού εργαλείου διδασκαλίας και αξιολόγησης στην επαγγελματική εκπαίδευση. Υποστηρίζει την ενσωμάτωσή του από τους εκπαιδευτικούς επαγγελματικής κατάρτισης, υπογραμμίζοντας τη δυνατότητά τους να ενισχύσουν τις υπάρχουσες εκπαιδευτικές πρακτικές.

Προτείνει διάφορες επιλογές λογισμικού για τη δημιουργία βιντεομαθημάτων, επισημαίνοντας τις ευέλικτες εφαρμογές και τα παιδαγωγικά οφέλη τους, ενώ παράλληλα αντιμετωπίζει προκλήσεις όπως πιθανές τεχνικές δυσκολίες και την ανάγκη απαιτούμενης κατάρτισης. Η διαδικασία ανάπτυξης ενός βιντεομαθήματος υλοποιείται μέσω της πλατφόρμας Ted Ed, η οποία επιτρέπει στους εκπαιδευτικούς να δημιουργούν διαδραστικά μαθήματα, ενσωματώνοντας ερωτήσεις και εκπαιδευτικούς πόρους απευθείας στο περιεχόμενο του βίντεο.

Η μελέτη αναλύει δύο βιντεομαθήματα για μαθητές Επαγγελματικού Λυκείου, το ένα με θέμα τη «Στοματική Υγιεινή» και το άλλο με θέμα τα «Συστήματα Ψύξης Κινητήρων Αυτοκινήτων». Αυτή η προσέγγιση επιτρέπει στους εκπαιδευτικούς να αξιολογούν την πρόοδο και τη συμμετοχή των μαθητών, επιτρέποντας παράλληλα την αυτοαξιολόγηση από τους ίδιους τους μαθητές. Η ανατροφοδότηση προέκυψε μέσω ερωτηματολογίου που συμπλήρωσαν οι μαθητές μετά τη διδασκαλία, παρέχοντας πληροφορίες σχετικά με την αποτελεσματικότητα της συγκεκριμένης μορφής διδασκαλίας και τους τομείς βελτίωσής της. Τα συμπεράσματα υπογραμμίζουν τη σημασία του βιντεομαθήματος στην επαγγελματική εκπαίδευση και επιβεβαιώνουν την αποτελεσματικότητά τους ως διδακτικό εργαλείο.

Λέξεις – κλειδιά: Βιντεομάθημα, TedEd, ανεστραμμένη τάξη, Αγωγή Υγείας, Θερμοδυναμική, ΕΠΑ.Λ.

Η ΕΠΙΔΡΑΣΗ ΤΟΥ CHARLES BAUDELAIRE ΣΤΑ ΠΟΙΗΜΑΤΑ : «ΙΘΑΚΗ» ΤΟΥ Κ.Π. ΚΑΒΑΦΗ ΚΑΙ «ΤΑΞΙΔΙ ΣΤΑ ΚΥΘΗΡΑ» ΤΟΥ ΚΩΣΤΑ ΟΥΡΑΝΗ ΜΕΣΩ ΤΗΣ ΨΗΦΙΑΚΗΣ ΑΦΗΓΗΣΗΣ

ΠΕΡΙΛΗΨΗ

Στόχος της συγκεκριμένης εισήγησης αποτελεί η ανίχνευση και η αποτύπωση των διακειμενικών όψεων της μπωντλαιρικής ποίησης σε επιγενόμενους Έλληνες ποιητές μέσω της ψηφιακής αφήγησης. Αρχικά, θα αποδοθεί η σημασία της αφήγησης, η συμβολή της στην εκπαιδευτική διαδικασία, καθώς και τα βασικά στοιχεία που διέπουν την αφηγηματολογία. Θα εξεταστούν οι βασικές αρχές της ψηφιακής αφήγησης, τα στάδια δημιουργίας της σε συσχέτιση με τα μαθησιακά οφέλη σε επίπεδο πρόσληψης. Θα παρατεθούν μεθοδολογικά εργαλεία αξιοποίησης της ψηφιακής αφήγησης με βασικότερο στόχο οι μαθητές να αποκτήσουν μια διασταλτική οπτική και αντίληψη της λογοτεχνίας σε συγκριτολογικό και σε διακειμενικό επίπεδο. Θα δοθεί έμφαση στην επιλογή των κατάλληλων ψηφιακών εργαλείων που να αναδεικνύουν την ιδέα του ταξιδιού στην ουτοπία ως ένα βασικό μέσο εικονοπλαστικής αφήγησης με έντονες κινηματογραφικές συνηχήσεις. Η έννοια του ταξιδιού είναι καταλυτική ως μοτίβο ενεργοποίησης της δημιουργικής φαντασίας. Σε αυτή τη βάση, η μπωντλαιρική ποίηση εξαπέλυσε ανιχνευτές εδάφους στην ενεργοποίηση των αόρατων μηχανισμών που συνέχουν την κοσμική τάξη. Ο σταθερός απόηχος του Μπωντλαίρ είναι εμφανής στην μοντέρνα και στην μεταμοντέρνα νεοελληνική ποίηση σε ζητήματα που σχετίζονται με την απόδραση στο επέκεινα ως ένα μη-τόπο, συνιστώντας ένα δυνητικό πεδίο εναλλακτικής βίωσης του είναι. Ο Μπωνλαίρ σηματοδότησε ποιητικά την αέναη μετάβαση μέσα στο πλήθος. Επικαθόρισε το πεπρωμένο του σύγχρονου ανθρώπου, καταδικασμένου μέσα στην σθεναρή πάλη αντίρροπων δυνάμεων, στο μεταίχμιο ανάμεσα στο φως και στο σκοτάδι, στην αναζήτηση της εσωτερικής πληρότητας και του κενού, στη διεκδίκηση ενός λειασμένου αύριο που να αντιπαρέρχεται την καταβαράθρωση στα έγκατα της ύπαρξης. Μέσω της ψηφιακής αφήγησης στην λογοτεχνία, οι μαθητές θα είναι σε θέση να αφομοιώσουν με άκρως δημιουργικό τρόπο τη σημασία του ταξιδιού ως μέσου εσωτερικής αναζήτησης και παράλληλα εξοικείωσης σε επίπεδο εξωτερικής πραγματικότητας με αδιερεύνητα μέχρι στιγμής πεδία. Η επενέργεια της ψηφιακής αφήγησης στην ποίηση σηματοδοτεί την ενεργοποίηση στο έπακρο της μαγείας των ποιητικών εικόνων δημιουργώντας μια ιδιοσύστατη ποιητική της τεχνολογίας. Οι προσδοκώμενοι στόχοι της συγκεκριμένης εισήγησης σχετίζονται με την καλλιέργεια μιας ευρυγώνιας οπτικής των μαθητών και παράλληλα με την εξοικείωσή τους με την ποίηση ως διαχρονικό πεδίο έμπνευσης.

Λέξεις – κλειδιά: ψηφιακή αφήγηση, αφηγηματολογία, εικονοπλαστική αφήγηση.

Η ΕΦΑΡΜΟΓΗ ΨΗΦΙΑΚΩΝ ΜΕΣΩΝ ΓΙΑ ΤΗΝ ΕΞ ΑΠΟΣΤΑΣΕΩΣ ΔΙΔΑΣΚΑΛΙΑ ΤΕΧΝΙΚΩΝ ΜΑΘΗΜΑΤΩΝ: ΜΕΛΕΤΗ ΕΦΑΡΜΟΓΗΣ ΓΙΑ ΤΟ ΜΑΘΗΜΑ ΣΧΕΔΙΑΣΜΟΥ ΟΔΙΚΩΝ ΕΡΓΩΝ

ΠΕΡΙΛΗΨΗ

Η εξ αποστάσεως διδασκαλία αλλά και η εξέταση των μαθημάτων της τριτοβάθμιας εκπαίδευσης αποτελεί πρόκληση τόσο για τους διδάσκοντες όσο και για τους φοιτητές αυτών. Τα ποιοτικά αλλά και ποσοτικά χαρακτηριστικά της πληροφορίας που θα πρέπει να επικοινωνηθεί καθιστούν την αναζήτηση και χρήση των πλέον πρόσφορων ψηφιακών μέσων απαραίτητα. Επιπρόσθετα η μειωμένη έως και ανύπαρκτη πολλές φορές αλληλεπίδραση μεταξύ διδασκόντων και φοιτητών και η περιορισμένη ως εκ τούτου ανατροφοδότηση καθόλη τη διάρκεια της εκπαιδευτικής διαδικασίας απαιτούν την εφαρμογή καινοτόμων διαδικασιών διδασκαλίας. Η πρόσφατη υποχρεωτική πραγματοποίηση του συνόλου των διδακτικών δραστηριοτήτων στην τριτοβάθμια και όχι μόνο εκπαίδευση εξαιτίας της πανδημίας, ανέδειξε την αδυναμία του συστήματος διδασκόντων και ψηφιακών μέσων ώστε να διατηρηθεί ένα επίπεδο σπουδών εφάμιλλο με αυτό που επικρατούσε στην προ πανδημίας εποχή. Παράλληλα όμως αποτέλεσε και ευκαιρία ιδιαίτερα εξαιτίας της παρατεταμένης διάρκειας της εξ αποστάσεως εκπαίδευσης να αναπτυχθούν εργαλεία και διαδικασίες που θα είναι ικανά να προσφέρουν αυξημένο επίπεδο γνώσης ανά πάσα στιγμή. Άλλωστε η πραγματοποίηση της εξ αποστάσεως εκπαίδευσης στη δευτεροβάθμια εκπαίδευση σε περίπτωση έκτακτου ή απρόβλεπτου γεγονότος έχει προσφάτως νομοθετηθεί από το Υπουργείο Παιδείας, Θρησκευμάτων και Αθλητισμού όπως και η δυνατότητα εξ αποστάσεως κατάρτισης στις Σχολές Ανώτερης Επαγγελματικής Κατάρτισης (πρώην ΙΕΚ). Στην τριτοβάθμια εκπαίδευση η εξ αποστάσεως αξιολόγηση των φοιτητών υπό προϋποθέσεις ισχύει εδώ και τρία έτη κάτι που εσχάτως εφαρμόστηκε σε πολλά πανεπιστημιακά ιδρύματα κατά τις τελικές εξετάσεις του χειμερινού εξαμήνου του ακαδημαϊκού έτους 2023-2024. Είναι συνεπώς πιθανό η εξ αποστάσεως εκπαίδευση να επαναληφθεί μελλοντικά και άρα είναι αναγκαία η αναζήτηση μεθόδων που θα προσφέρουν το προσδοκώμενο αποτέλεσμα.

Στην παρούσα εργασία περιγράφεται ο τρόπος με τον οποίο καλύφθηκε η εκπαιδευτική διαδικασία, συμπεριλαμβανομένης και της τελικής αξιολόγησης των φοιτητών, στα πλαίσια ενός μαθήματος τριτοβάθμιας εκπαίδευσης που διδάσκεται στο τμήμα Πολιτικών Μηχανικών του Πανεπιστημίου Θεσσαλίας και αφορά τον γεωμετρικό σχεδιασμό οδικών έργων. Το συγκεκριμένο μάθημα μάλιστα περιλαμβάνεται στους οδηγούς σπουδών των τμημάτων Πολιτικών και Αγρονόμων και Τοπογράφων μηχανικών τόσο στην Ελλάδα όσο και στο εξωτερικό. Αναλύονται τόσο τα τεχνικά μέσα όσο και η μεθοδολογία που εφαρμόστηκε καθόλη τη διάρκεια των ακαδημαϊκών εξαμήνων ενώ παρουσιάζονται στατιστικά στοιχεία για τις επιδόσεις των φοιτητών πριν και κατά τη διάρκεια της περιόδου της εξ αποστάσεως εκπαιδευτικής διαδικασίας. Αξίζει να σημειωθεί πως στα πλαίσια του εν λόγω μαθήματος οι φοιτητές εκπόνησαν ένα ιδιαίτερα απαιτητικό θέμα που αφορούσε την ολοκληρωμένη μελέτη ενός οδικού έργου με εβδομαδιαίες διορθώσεις και αυστηρές ενδιάμεσες καταληκτικές ημερομηνίες προόδου με τη χρήση ενός σχεδιαστικού προγράμματος.

Η έρευνα κατέδειξε πως κατά τη διάρκεια της εξ αποστάσεως διδασκαλίας, το αρχικό ενδιαφέρον για την εκπόνηση του εξαμηνιαίου θέματος ήταν μεγάλο όμως λιγότεροι φοιτητές συγκριτικά με άλλες χρονιές το ολοκλήρωσαν. Επιπλέον κατά τη διάρκεια της πρώτης εξ αποστάσεως εξεταστικής περιόδου το ποσοστό των επιτυχόντων φοιτητών ήταν ιδιαίτερα υψηλό κάτι που μειώθηκε στα φυσιολογικά προ πανδημίας επίπεδα στις επόμενες εξεταστικές περιόδους.

Η εργασία φιλοδοξεί, μεταξύ άλλων, να συνεισφέρει σε όσους συναδέλφους εκπαιδευτικούς αναζητούν μια αποτελεσματική διαδικασία εξ αποστάσεως παράδοσης μαθημάτων και διενέργειας εξετάσεων με τη χρήση ψηφιακών μέσων. Αυτό που άλλωστε φάνηκε στα πλαίσια της έρευνας είναι πως με τα διαθέσιμα ψηφιακά μέσα στα πανεπιστημιακά ιδρύματα, τα επίπεδα της προσφερόμενης γνώσης τόσο ποιοτικά όσο και ποσοτικά κατά τη διάρκεια της εξ αποστάσεως

και της δια ζώσης διδασκαλίας και εξέτασης του εν λόγω μαθήματος αλλά και άλλων με παρόμοιες απαιτήσεις και τρόπο διδασκαλίας, με κριτήριο το ποσοστό των φοιτητών που έλαβαν προβιβάσιμο βαθμό, μπορεί να είναι παραπλήσια.

Λέξεις – κλειδιά: Εξ αποστάσεως διδασκαλία, εξ αποστάσεως αξιολόγηση, εκπόνηση θέματος, ψηφιακά μέσα.

ΟΡΓΑΝΩΝΟΝΤΑΣ ΤΟ ΜΑΘΗΜΑ ΤΗΣ ΜΟΥΣΙΚΗΣ ΜΕ ΤΟ PADLET

Μιχαηλίδου Ματίνα
Εκπαιδευτικός Μουσικής Επιστήμης (ΠΕ79.01)
6ο Γυμνάσιο Κοζάνης
Κοζάνη, Ελλάδα
email: tiniomi22@gmail.com

ΠΕΡΙΛΗΨΗ

Η ενσωμάτωση των ψηφιακών τεχνολογιών στη διδακτική πράξη αποτελεί αναπόσπαστο κομμάτι της σύγχρονης εκπαιδευτικής πραγματικότητας, προσφέροντας νέες δυνατότητες για την οργάνωση και τον εμπλουτισμό της μαθησιακής διαδικασίας. Στο πλαίσιο αυτό, η παρούσα εργασία εστιάζει στη χρήση της ψηφιακής πλατφόρμας Padlet ως εργαλείου διαχείρισης και ενίσχυσης της διδασκαλίας της Μουσικής στη δευτεροβάθμια εκπαίδευση.

Το Padlet είναι μια διαδραστική διαδικτυακή εφαρμογή που επιτρέπει τη δημιουργία συνεργατικών ψηφιακών πινάκων, στους οποίους εκπαιδευτικοί και μαθητές μπορούν να αναρτούν πολυμεσικό περιεχόμενο όπως κείμενα, εικόνες, βίντεο και αρχεία ήχου. Η ευελιξία του το καθιστά ιδιαίτερα κατάλληλο για το μάθημα της Μουσικής, καθώς επιτρέπει τη δημιουργία συλλογικών εργασιών, την ανάρτηση μαθητικών ηχογραφήσεων, την εξερεύνηση μουσικών ειδών και τη συνεργασία σε συνθετικές ή αναλυτικές μουσικές δραστηριότητες.

Συγκεκριμένα, η εργασία παρουσιάζει καλές πρακτικές αξιοποίησης του Padlet στη διδασκαλία της Μουσικής, με έμφαση στη δημιουργία διαδραστικών δραστηριοτήτων (διαδραστικοί χάρτες μουσικών ειδών, ανάρτηση ηχογραφήσεων και ανταλλαγή απόψεων, συνεργατική σύνθεση μουσικής, ερευνητικές εργασίες για συνθέτες και μουσικά κινήματα, δημιουργία διαδραστικών κουίζ και παιχνιδιών, ανάλυση μουσικών έργων και ακροάσεις με σχολιασμό, ψηφιακά portfolios μουσικών εργασιών, δημιουργία ηλεκτρονικής τάξης), οι οποίες ενισχύουν τη μαθησιακή εμπειρία.

Οι προϋποθέσεις για τη δημιουργία ενός Padlet από τον εκπαιδευτικό περιλαμβάνουν τη δημιουργία λογαριασμού στην πλατφόρμα (μέσω email ή λογαριασμού Google/Microsoft), την επιλογή του κατάλληλου πλάνου (δωρεάν ή συνδρομητικό), τη σύνδεση με τους μαθητές (πρόσβαση μέσω κωδικού πρόσκλησης, συνδέσμου ή ενσωμάτωσης σε σύστημα διαχείρισης μάθησης όπως το Google Classroom ή το Microsoft Teams), τη ρύθμιση των επιλογών απορρήτου και συνεργασίας (δημόσιο, με κωδικό ή ιδιωτικό), καθώς και την προσαρμογή της διάταξης (διάφορες μορφές όπως πλέγμα, χρονολόγιο, χάρτης) ανάλογα με τις ανάγκες του μαθήματος.

Η χρήση του Padlet στη μουσική τάξη προσφέρει μια δυναμική και συνεργατική προσέγγιση της μάθησης, ενισχύει τη συμμετοχή των μαθητών και καλλιεργεί τη δημιουργικότητα και την κριτική σκέψη. Επιπλέον, η χρήση πολυτροπικού περιεχομένου διευκολύνει την προσαρμογή της διδασκαλίας σε διαφορετικά μαθησιακά στυλ, συμβάλλοντας στη διαφοροποίηση και εξατομίκευση της εκπαιδευτικής διαδικασίας.

Η εργασία παρουσιάζει τα Padlet που δημιουργήθηκαν τα τελευταία χρόνια για τις ανάγκες του μαθήματος της Μουσικής και για τις τρεις τάξεις του Γυμνασίου. Κάθε σχολική χρονιά, κάθε τμήμα διαθέτει το δικό του Padlet, στο οποίο αναρτώνται δεδομένα που σχετίζονται με το ετήσιο project αλλά και με το εβδομαδιαίο διδακτικό περιεχόμενο.

Το Padlet αποτελεί ένα ιδιαίτερα χρήσιμο ψηφιακό εργαλείο για την οργάνωση του μαθήματος της Μουσικής, καθώς επιτρέπει την ανάπτυξη μιας περισσότερο συμμετοχικής και δημιουργικής εκπαιδευτικής εμπειρίας. Μέσα από την παρουσίαση αυτών των καλών πρακτικών, αναδεικνύεται η σημασία της ένταξης των ψηφιακών τεχνολογιών στη διδακτική πράξη, συμβάλλοντας στη διαμόρφωση ενός σύγχρονου και αποτελεσματικού μαθησιακού περιβάλλοντος.

Λέξεις – κλειδιά: διδασκαλία, μάθημα Μουσικής, ψηφιακά εργαλεία, Padlet

Η ΣΟΦΟΚΛΕΙΑ ΑΝΤΙΓΟΝΗ ΣΤΗΝ ΠΡΟΣΧΟΛΙΚΗ ΕΚΠΑΙΔΕΥΣΗ: ΨΗΦΙΑΚΑ ΕΡΓΑΛΕΙΑ ΚΑΙ ΠΑΙΔΑΓΩΓΙΚΕΣ ΠΡΟΣΕΓΓΙΣΕΙΣ.

ΠΕΡΙΛΗΨΗ

Οι Αρχαίες Τραγωδίες στην προσχολική εκπαίδευση δύνανται να αποτελέσουν σημαντικό εργαλείο διδασκαλίας. Οι εκπαιδευτικοί οφείλουν να τις εντάξουν στην εκπαιδευτική καθημερινότητα και να τις ενσωματώσουν στο πρόγραμμα σπουδών. Τα οφέλη του Δράματος, ως μεθόδου διδασκαλίας, είναι πολλαπλά. Πρωτίστως, το Δράμα μπορεί να προσφέρει τη δυνατότητα στους εκπαιδευτικούς να προσεγγίσουν μαθητές, οι οποίοι δυσκολεύονται να παρακολουθήσουν την εκπαιδευτική διαδικασία, η οποία στηρίζεται σε παραδοσιακές μεθόδους, αυξάνοντας το ενδιαφέρον τους για όσα διαδραματίζονται εντός της σχολικής τάξης. Επιπλέον, έχει αναδειχθεί ότι συνδέει τους μαθητές με τον εαυτόν τους και τους άλλους, μεταμορφώνει το παραδοσιακό περιβάλλον μάθησης και προκαλεί τους μαθητές να προσεγγίσουν και εκείνοι τις γνώσεις με έναν διαφορετικό τρόπο, πολυαισθητηριακό, ο οποίος εντάσσει τους μαθητές ως ολότητα εντός της εκπαιδευτικής διαδικασίας και αξιοποιεί γνώσεις, εμπειρίες, βιώματα και συναισθήματα σε όλη τη διαδικασία. Το συναίσθημα, το οποίο βρίσκεται στην καρδιά του δράματος, συχνά αγνοείται στην εκπαίδευση. Ωστόσο μια εκπαιδευτική διαδικασία, η οποία στηρίζεται μόνο στη λογική και απομονώνει το συναίσθημα, δεν μπορεί να προσφέρει στους μαθητές μια ολιστική γνωστική πράξη και κατ' επέκταση ολιστική μόρφωση.

Η παρούσα εργασία εστιάζει στη διερεύνηση του ρόλου που μπορεί να διαδραματίσει η προσέγγιση της Σοφόκλειας Αντιγόνης στην Προσχολική Εκπαίδευση, αξιοποιώντας ψηφιακά εργαλεία για την ενίσχυση της μαθησιακής εμπειρίας. Στόχος είναι η ανάδειξη των αξιών του έργου – Ελεύθερη Βούληση, Θρησκεία και η σχέση της με την Πόλη, Άγραφοι Θεϊκοί Νόμοι, Δικαιοσύνη, Καθήκον, Αγάπη – και η αναζήτηση διδακτικών πρακτικών για τη διδασκαλία τους σε παιδιά προσχολικής ηλικίας. Η μεθοδολογία της εργασίας βασίζεται στη χρήση ψηφιακών εργαλείων, όπως διαδραστικές παρουσιάσεις με εικόνες, βίντεο και ήχο, ψηφιακά παιχνίδια που ενισχύουν την κατανόηση των αξιών του έργου, καθώς και εφαρμογές όπως το Puppet Pals και το Toontastic, οι οποίες επιτρέπουν στα παιδιά να δημιουργήσουν και να αφηγηθούν δικές τους εκδοχές της ιστορίας. Επιπλέον, η ψηφιακή σχεδίαση αξιοποιείται ως εργαλείο έκφρασης και αναστοχασμού, δίνοντας στα παιδιά τη δυνατότητα να αποτυπώσουν εικαστικά τις ιδέες και τα συναισθήματά τους. Τα ευρήματα της εργασίας δείχνουν ότι η ενσωμάτωση ψηφιακών εργαλείων στη διδασκαλία της Αντιγόνης στην προσχολική εκπαίδευση ενισχύει την ενεργό συμμετοχή των παιδιών, προάγει τη δημιουργική σκέψη και διευκολύνει την κατανόηση αφηρημένων εννοιών. Τα αποτελέσματα υπογραμμίζουν τη σημασία της διαδραστικής μάθησης και της αξιοποίησης της τεχνολογίας στη διαμόρφωση ενός ελκυστικού και παιδαγωγικά αποτελεσματικού περιβάλλοντος διδασκαλίας.

Λέξεις κλειδιά: Δράμα, Σοφοκλής, Αντιγόνη, Αξίες, Προσχολική Εκπαίδευση, Ψηφιακά εργαλεία, Παιδαγωγικές Προσεγγίσεις.

ΠΕΡΙΛΗΨΗ

Η διδασκαλία των ξένων γλωσσών έχει μετεξελιχθεί και εμπλουτιστεί σημαντικά από το Ευρωπαϊκό Πλαίσιο Αναφοράς για τις Γλώσσες (CEFR), το οποίο αποτελεί ένα διεθνές πλαίσιο, που διακρίνει την επάρκεια γλώσσας σε τρία βασικά επίπεδα: Α (βασικός χρήστης), Β (ανεξάρτητος χρήστης) και C (ικανός χρήστης), δίνοντας έμφαση στα μαθησιακά αποτελέσματα στο τέλος κάθε μαθησιακής διαδικασίας.

Κατά συνέπεια, οι εκπαιδευτικοί ξένων γλωσσών μπορούν να δομήσουν τη διδασκαλία τους εστιάζοντας στους μαθησιακούς στόχους , στις στρατηγικές μάθησης και στην αξιολόγηση, τα οποία ορίζονται από περιγραφητέες επικοινωνιακών δραστηριοτήτων σε κάθε επίπεδο γλωσσομάθειας . Σύμφωνα με το Ευρωπαϊκό Πλαίσιο Αναφοράς για τις Γλώσσες, που δίνει προτεραιότητα στην επίτευξη των μαθησιακών αποτελεσμάτων και στις ποικίλες μεθοδολογικές προσεγγίσεις, οι εκπαιδευτικοί ξένων γλωσσών έχουν την ευελιξία να ανανεώνουν και να εμπλουτίζουν συνεχώς το περιεχόμενο των μαθημάτων τους, εστιάζοντας στην καθημερινή επικοινωνία και στα ενδιαφέροντα, τις ανάγκες και τα επιτεύγματα των μαθητών.

Έτσι, τα τελευταία χρόνια, η ενσωμάτωση του ψηφιακού γραμματισμού στην καθημερινή επικοινωνιακή και γλωσσική δραστηριότητα έχει γίνει απαραίτητη. Το αναθεωρημένο CEFR (2020) περιλαμβάνει μαθησιακά αποτελέσματα που σχετίζονται με ψηφιακές δεξιότητες. Δεδομένου ότι τα ψηφιακά εργαλεία δεν συμπληρώνουν απλώς τη διδασκαλία, αλλά συνδιαμορφώνουν στις μέρες μας το καθημερινό, το κοινωνικό και το μαθησιακό περιβάλλον των μαθητών/-τριών, θα πρέπει να εξετάσουμε ,ανάμεσα σε άλλα, και τα ακόλουθα ερωτήματα:

- Πώς συμβάλλει η ενσωμάτωση ψηφιακών εργαλείων στη συσχέτιση των ψηφιακών δραστηριοτήτων με τους μαθησιακούς στόχους και την ανάπτυξη της εξατομικευμένης μάθησης στη διδασκαλία ξένων γλωσσών;
- Πώς μπορούν τα ψηφιακά εργαλεία (π.χ. εκπαιδευτικές πλατφόρμες, διαδραστικά παιχνίδια ή άλλες εφαρμογές με φυσικούς ομιλητές) να προωθήσουν μεταγνωστικές δεξιότητες όπως η αυτορυθμιζόμενη μάθηση ή η αυτοαξιολόγηση; Πώς μπορούν οι εκπαιδευτικοί ξένων γλωσσών να αξιοποιήσουν αυτά τα εργαλεία για να στηρίξουν αποτελεσματικά την διαφοροποιημένη διδασκαλία ή την μικτή και εξ αποστάσεως εκπαίδευση;
- Με ποιους τρόπους μπορεί ο ψηφιακός γραμματισμός να αυξήσει την αλληλεπίδραση, τη συνεργατική μάθηση και την επικοινωνία στη διδασκαλία ξένων γλωσσών;

Η εισήγηση θα ολοκληρωθεί με συγκεκριμένα παραδείγματα από τη διδακτική πράξη, στα οποία αξιοποιούνται ψηφιακές εφαρμογές κατά τη διδασκαλία της Γερμανικής Γλώσσας σε μαθητές/-τριες της Ε' Δημοτικού – επίπεδο Γλωσσομάθειας Α' (Αρχαρίων).

Λέξεις-κλειδιά: German language, primary school, digital literacy, communicative language activities, digital competencies, differentiated instruction

ΨΗΦΙΑΚΕΣ ΔΙΑΔΡΟΜΕΣ ΠΡΟΣ ΤΗΝ ΑΡΧΑΙΟΤΗΤΑ: ΔΙΔΑΣΚΑΛΙΑ ΤΗΣ ΑΡΧΑΙΑΣ ΕΛΛΗΝΙΚΗΣ ΜΕΣΩ ΤΗΣ ΕΠΙΓΡΑΦΙΚΗΣ ΚΑΙ ΤΗΣ ΕΚΠΑΙΔΕΥΤΙΚΗΣ ΤΕΧΝΟΛΟΓΙΑΣ

ΠΕΡΙΛΗΨΗ

Τα τελευταία χρόνια παρατηρείται έντονο ερευνητικό ενδιαφέρον για τη διερεύνηση των στάσεων εκπαιδευτικών και μαθητών απέναντι στις Κλασικές Σπουδές, καθώς και για την επίδραση της χρήσης τεχνολογικών μέσων —όπως εκπαιδευτικές εφαρμογές, ψηφιακά παιχνίδια, λογισμικά και άλλες ψηφιακές πλατφόρμες— στη διδασκαλία των φιλολογικών μαθημάτων. Η ανάγκη αυτή προκύπτει από τη διαπίστωση ότι οι μαθητές και οι μαθήτριες εμφανίζουν συχνά μειωμένο κίνητρο για την εκμάθηση της Αρχαίας Ελληνικής. Είναι γνωστό, ήδη εδώ και πέντε δεκαετίες, ότι η ενσωμάτωση των *Τεχνολογιών Πληροφορίας και Επικοινωνίας* (ΤΠΕ) στο εκπαιδευτικό σύστημα προσφέρει πολλαπλά οφέλη, τα οποία όμως συνοδεύονται ταυτόχρονα και από σημαντικές προκλήσεις.

Το θεωρητικό υπόβαθρο της παρούσας έρευνας στηρίζεται στην παραδοχή ότι το ελκυστικό περιβάλλον των ψηφιακών παιχνιδιών και τα ευέλικτα μαθησιακά περιβάλλοντα, που αναδύονται μέσα από την επιτυχημένη ενσωμάτωση των παραπάνω μέσων, μπορούν να λειτουργήσουν ως πηγές κινήτρου για μάθηση.

Η εργασία εστιάζει στη διερεύνηση της δυνατότητας αξιοποίησης των ψηφιακών μέσων στη διδασκαλία της αρχαίας ελληνικής γλώσσας, με στόχο την εξοικείωση των μαθητών με τη γλώσσα και τον πολιτισμό μέσω της μελέτης των αρχαίων ελληνικών επιγραφών. Χωρίς αυτές, η κατανόηση του αρχαίου ελληνικού πολιτισμού θα ήταν ελλιπής και ενδεχομένως στρεβλή, καθώς τα λογοτεχνικά και ιστορικά κείμενα δεν επαρκούν για την πλήρη αποτύπωση του αρχαίου κόσμου.

Οι επιγραφές, ως πρωτογενείς και άμεσες πηγές, προσφέρουν ανεκτίμητες πληροφορίες και σώζονται συχνά σε καλύτερη κατάσταση σε σύγκριση με άλλα γραπτά τεκμήρια, χάρη στην ανθεκτικότητα των υλικών τους. Η ελληνική επιγραφική, συγκεκριμένα, μελετά επιγραφές που έχουν χαραχθεί στην ελληνική γλώσσα και αλφαβητική γραφή πάνω σε σκληρά υλικά όπως πέτρα, μάρμαρο, πήλινα αγγεία, ξύλο, οστά ή μέταλλο.

Σκοπός της παρούσας μελέτης είναι να αναδείξει πώς τα ψηφιακά εργαλεία μπορούν να διευκολύνουν την πρόσβαση και ερμηνεία των επιγραφών, ενισχύοντας με αυτόν τον τρόπο την επαφή των μαθητών με την αρχαία ελληνική γλώσσα και τον αρχαίο κόσμο ευρύτερα.

Η μεθοδολογία βασίζεται σε μία πολυδιάστατη προσέγγιση που συνδυάζει θεωρητική έρευνα και πρακτική εφαρμογή. Αρχικά, πραγματοποιήθηκε βιβλιογραφική ανασκόπηση για τη διδασκαλία της αρχαίας ελληνικής και τη χρήση ψηφιακών μέσων. Στη συνέχεια, σχεδιάστηκε και εφαρμόστηκε ένα εκπαιδευτικό πρόγραμμα που μεταξύ άλλων εστιάζει στη δημιουργία ψηφιακών μαθησιακών αντικειμένων, όπως είναι η *Φρασίκλεια*, τα οποία μπορούν να αξιοποιηθούν από μαθητές όλων των τάξεων του σχολείου -με τις κατάλληλες προσαρμογές-, ακόμη και σε φοιτητές και φοιτήτριες Τμημάτων Φιλολογίας. Μάλιστα, αυτές οι δραστηριότητες πραγματοποιούνται στο πλαίσιο του ερευνητικού προγράμματος DiGIA, που υλοποιείται στο Τμήμα Φιλολογίας του Αριστοτελείου Πανεπιστημίου Θεσσαλονίκης.

Μέσα από τη διαδραστική ενασχόληση, οι μαθητές και οι μαθήτριες αναπτύσσουν την κριτική τους σκέψη και τις γλωσσικές τους δεξιότητες, ενώ αποκτούν βαθύτερη κατανόηση της ιστορικής και πολιτισμικής αξίας των επιγραφών. Παράλληλα, η άμεση επαφή με αυθεντικό επιγραφικό υλικό προσφέρει νέες διδακτικές δυνατότητες, καθιστώντας το μάθημα των Αρχαίων Ελληνικών πιο προσιτό και ελκυστικό.

Λέξεις – κλειδιά: αρχαία ελληνική επιγραφική, αρχαία ελληνική γλώσσα, ψηφιακό μαθησιακό αντικείμενο

ΧΡΗΣΗ ΨΗΦΙΑΚΩΝ ΕΡΓΑΛΕΙΩΝ ΣΤΗΝ ΕΚΠΑΙΔΕΥΣΗ

ΠΕΡΙΛΗΨΗ

Η εργασία αναφέρεται στην ενσωμάτωση των ψηφιακών εργαλείων στην εκπαίδευση και πώς αυτά επηρεάζουν τη διδασκαλία και τη μάθηση. Στην εισαγωγή, επισημαίνεται η χρήση ψηφιακών εργαλείων όπως εκπαιδευτικές πλατφόρμες (π.χ. Google Classroom), διαδραστικά μαθήματα (π.χ. Kahoot!), εκπαιδευτικά βίντεο (π.χ. YouTube), και εργαλεία συνεργασίας (π.χ. Microsoft Teams). Αυτά τα εργαλεία ενισχύουν τη μάθηση, διευκολύνουν την επικοινωνία και την συνεργασία, και επιτρέπουν προσωποποιημένες εμπειρίες μάθησης για κάθε μαθητή.

Στη βιβλιογραφική ανασκόπηση, η εργασία αναλύει τον ρόλο της Πληροφορικής και των ΤΠΕ στην εκπαίδευση. Αναφέρεται στην ανάγκη οι μαθητές να αποκτήσουν βασικές γνώσεις γύρω από την τεχνολογία και τις ΤΠΕ, ενώ ταυτόχρονα να αναπτύξουν δεξιότητες κριτικής σκέψης και κοινωνικής συμπεριφοράς. Παρά την εξοικείωση των μαθητών με τις ψηφιακές τεχνολογίες, ερευνητικά δεδομένα δείχνουν ότι οι μαθητές δεν αξιοποιούν πλήρως τις δυνατότητες των ΤΠΕ στη μαθησιακή διαδικασία. Επομένως, η εκπαίδευση πρέπει να ενσωματώνει δραστηριότητες που ενισχύουν την κριτική σκέψη και την ικανότητα επίλυσης προβλημάτων.

Η εργασία επίσης εξετάζει τις θεωρίες μάθησης που επηρεάζουν την ενσωμάτωση των ΤΠΕ στην εκπαιδευτική διαδικασία, όπως ο συμπεριφορισμός και ο εποικοδομητισμός.. Επίσης, παρατίθεται η εξέλιξη της ένταξης των ΤΠΕ στην εκπαίδευση, από τη χρήση μέσων μαζικής ενημέρωσης μέχρι την πλήρη ενσωμάτωσή τους στην εκπαιδευτική διαδικασία

Ένα σημαντικό μέρος της εργασίας αφορά την κινητή μάθηση (m-learning), η οποία χρησιμοποιεί φορητές συσκευές όπως κινητά τηλέφωνα και ταμπλέτες για την υποστήριξη της μάθησης, ενώ επισημαίνεται η σημασία της συνεργασίας, της κριτικής σκέψης και της δια βίου μάθησης. Χαρακτηρίζεται από διαδραστικά στοιχεία, προσωπική προσαρμογή και άμεση ανατροφοδότηση, ενισχύοντας την αποτελεσματικότητα και την αλληλεπίδραση στη διαδικασία της μάθησης. Τέλος, η εργασία αναφέρεται στη χρήση της Τεχνητής Νοημοσύνης (AI) στην εκπαίδευση, η οποία προσφέρει εξατομικευμένες μαθησιακές εμπειρίες και υποστηρίζει την εκπαιδευτική διαδικασία με τη βοήθεια αλγορίθμων και νευρωνικών δικτύων.

Συνολικά, η ενσωμάτωση των ψηφιακών εργαλείων και της ΤΠΕ στην εκπαίδευση προσφέρει πολλές δυνατότητες για τη βελτίωση της διδασκαλίας και της μάθησης, απαιτώντας όμως μια προσεκτική προσέγγιση για την αποτελεσματική αξιοποίησή τους.

Λέξεις κλειδιά: Ψηφιακά εργαλεία, Τεχνητή Νοημοσύνη, Κινητή Μάθηση, εκπαίδευση

ΠΕΡΙΛΗΨΗ

Η αυξανόμενη χρήση εκπαιδευτικών βίντεο στη διδασκαλία δημιουργεί νέες προκλήσεις και ευκαιρίες για τη βελτίωση της μαθησιακής διαδικασίας. Οι αυτοματοποιημένες περιλήψεις εκπαιδευτικών βίντεο, βασισμένες σε αλγορίθμους μηχανικής μάθησης, προσφέρουν ένα καινοτόμο εργαλείο που μπορεί να αξιοποιηθεί για την ενίσχυση της κατανόησης, της αυτοαξιολόγησης των μαθητών και της ανατροφοδότησης από τους εκπαιδευτικούς. Η παρούσα εργασία διερευνά τους τρόπους με τους οποίους η αυτοματοποιημένη σύνοψη εκπαιδευτικών βίντεο μπορεί να συμβάλει στην αποτελεσματικότερη οργάνωση της εκπαιδευτικής διαδικασίας.

Η ενσωμάτωση εκπαιδευτικών βίντεο στη διδασκαλία μπορεί να έχει βοηθήσει τους εκπαιδευτικούς· ωστόσο, η κατανόησή τους μπορεί να είναι απαιτητική ορισμένες φορές, ιδιαίτερα όταν το περιεχόμενο είναι τεχνικό ή μεγάλης διάρκειας. Η αυτοματοποιημένη περίληψη ενός βίντεο δύναται να παρέχει στους μαθητές μια σύντομη και περιεκτική παρουσίαση των κύριων σημείων του, διευκολύνοντας την απορρόφηση πληροφοριών και μειώνοντας τον γνωστικό φόρτο. Επιπλέον, οι μαθητές μπορούν να χρησιμοποιούν τις περιλήψεις για προεπισκόπηση του περιεχομένου πριν από τη θέαση ή για γρήγορη ανασκόπηση μετά την ολοκλήρωση του βίντεο, ενισχύοντας έτσι την κατανόηση και την απομνημόνευση βασικών εννοιών. Μην ξεχνάμε ότι οι μαθητές ζούνε στην εποχή της ραγδαίας εξέλιξης της τεχνολογίας και στην εποχή της «ταχύτητας» όπου βομβαρδίζονται καθημερινά από δεκάδες «σύντομες» πληροφορίες τύπου κειμένου (twitter) και βίντεο (shorts, tik tok). Μία σχετικά σύντομη περίληψη ενός εκπαιδευτικού βίντεο εκτός από την εκπαιδευτική του χροιά δείχνει να ταιριάζει καλύτερα στο μοτίβο της πληροφορίας που δέχονται καθημερινά οι μαθητές, κάτι που την κάνει πιο προσιτή και ελκυστική σε σχέση με ένα βίντεο μεγάλης διάρκειας.

Βασικά οφέλη των μαθητών αποτελούν η γρήγορη ανασκόπηση του υλικού καθώς και η καλύτερη κατανόηση των κύριων σημείων. Η σύγκριση μίας αυτοματοποιημένης σύνοψης με τη σύνοψη που έχουν κάνει οι μαθητές πάνω στην ίδια ενότητα μπορεί να τους βοηθήσει να εντοπίσουν τυχόν παραβλέψεις, παρανοήσεις ή ελλείψεις στην κατανόησή τους. Η διαδικασία αυτή ενισχύει τις μεταγνωστικές τους δεξιότητες και τους βοηθά να γίνουν πιο αυτόνομοι στη μάθησή τους. Επίσης, μπορούν να αξιοποιούν τις περιλήψεις για να επαναλαμβάνουν γρήγορα τα βασικά σημεία ενός κεφαλαίου πριν από τις εξετάσεις.

Από την πλευρά των εκπαιδευτικών, οι αυτοματοποιημένες περιλήψεις μπορούν να αξιοποιηθούν ως εργαλείο ανατροφοδότησης ή και εξατομίκευσης της διδασκαλίας. Οι εκπαιδευτικοί μπορούν να ελέγχουν τις συνόψεις που παράγονται για να εντοπίζουν ποια σημεία του βίντεο δυσκολεύουν τους μαθητές και να προσαρμόζουν ανάλογα τη διδακτική τους προσέγγιση. Επιπλέον, η δυνατότητα παραγωγής περιλήψεων διαφορετικού επιπέδου λεπτομέρειας επιτρέπει τη διαφοροποίηση της διδασκαλίας, ώστε να ανταποκρίνεται στις ανάγκες μαθητών με διαφορετικά επίπεδα κατανόησης, διαφορετικό επίπεδο ετοιμότητας, διαφορετικά ενδιαφέροντα και γενικότερα διαφορετικά μαθησιακά προφίλ.

Μία ακόμα σημαντική εφαρμογή αφορά την προσβασιμότητα. Οι αυτοματοποιημένες περιλήψεις μπορούν να υποστηρίξουν μαθητές με μαθησιακές δυσκολίες ή εκείνους που προτιμούν τη γραπτή πληροφορία έναντι της ακουστικής, εφόσον το βίντεο είναι ξενόγλωσσο και μπορούν να ενσωματωθούν υπότιτλοι στη σύνοψη. Παρέχοντας μια συνοπτική εκδοχή του εκπαιδευτικού περιεχομένου, οι μαθητές μπορούν να κατανοήσουν καλύτερα τα βασικά σημεία, ακόμα και αν δυσκολεύονται στην άμεση επεξεργασία προφορικού λόγου. Επιπλέον, οι μαθητές και οι εκπαιδευτικοί

μπορούν να εντοπίζουν γρήγορα τα πιο σημαντικά σημεία ενός βίντεο, εξοικονομώντας χρόνο και βελτιώνοντας τη μαθησιακή εμπειρία.

Για την εξαγωγή των περιλήψεων χρησιμοποιήθηκε λογισμικό (Chasanis et al., 2014), πάνω σε εκπαιδευτικά βίντεο του Τομέα Ηλεκτρολογίας και του Τομέα Υγείας, και η συνολική αποδοχή από τους μαθητές ξεπέρασε το 80%.

Συμπερασματικά, η αυτοματοποιημένη δημιουργία περιλήψεων εκπαιδευτικών βίντεο αποτελεί ένα ισχυρό εργαλείο που μπορεί να ενισχύσει την εκπαιδευτική διαδικασία σε πολλαπλά επίπεδα. Βοηθά τους μαθητές να οργανώνουν τη γνώση, να αυτοαξιολογούνται και να βελτιώνουν τις δεξιότητές τους, ενώ παράλληλα προσφέρει στους εκπαιδευτικούς ένα χρήσιμο μέσο ανατροφοδότησης και διαφοροποίησης της διδασκαλίας. Η ενσωμάτωση αυτών των εργαλείων στη σύγχρονη εκπαίδευση μπορεί να οδηγήσει σε ένα πιο ευέλικτο, αποτελεσματικό και προσβάσιμο μαθησιακό περιβάλλον.

Λέξεις – κλειδιά: Περίληψη βίντεο, Εκπαιδευτικό βίντεο, Αυτοαξιολόγηση

ΘΠ25: Η ψηφιακή αφήγηση στη διδακτική πράξη

Η ΣΥΜΒΟΛΗ ΤΗΣ ΨΗΦΙΑΚΗΣ ΑΦΗΓΗΣΗΣ ΣΤΗΝ ΛΟΓΟΤΕΧΝΙΑ ΣΤΗΝ ΔΕΥΤΕΡΟΒΑΘΜΙΑ ΕΚΠΑΙΔΕΥΣΗ: Η ΠΕΡΙΠΤΩΣΗ ΤΗΣ ΠΛΑΤΩΝΙΚΗΣ ΑΛΛΗΓΟΡΙΑΣ ΤΟΥ ΣΠΗΛΑΙΟΥ

Δρ. Κοψάρης Κοσμάς
Διευθυντής 2ου Γυμνασίου Πρέβεζας
e-mail: kkopsaris@hotmail.com

ΠΕΡΙΛΗΨΗ

Στόχος της συγκεκριμένης εισήγησης αποτελεί η απόδοση των καταλυτικών εννοιών που συνέχουν την αλληγορία του σπηλαίου μέσω της ψηφιακής αφήγησης. Αρχικά, θα γίνει μια επισκόπηση της σημασίας της λογοτεχνικής εκπαίδευσης κατά τον 21ο αιώνα, καθώς και της βαρύτητας της λογοτεχνίας στην σύγχρονη εποχή ως μέσο αξιοποίησης των νέων γραμματισμών. Θα γίνει αναφορά στο κατά πόσο η ψηφιακή αφήγηση μπορεί να συντελέσει καταλυτικά στην εξοικείωση, στη δημιουργική εμβάθυνση και στην αφομοίωση θεματικών που διέπονται από έντονες εννοιολογικές διχοστασίες, όπως γνώση-άγνοια, φως-σκοτάδι, δεσμά-ελευθερία, θεωρητικός βίος στον αντίποδα του ενεργού-πρακτικού βίου. Θα τονιστεί ο ρόλος των μαθητών στο σχεδιασμό και στην επιτυχή πραγμάτωση του συγκεκριμένου εκπαιδευτικού σεναρίου. Ο πλατωνικός μύθος του σπηλαίου συνιστά μια αστείρευτη δεξαμενή έμπνευσης για τους σύγχρονους δημιουργούς. Μεθοδολογικά, γίνεται εφαρμογή της ψηφιακής αφήγησης κατά την φάση της ανάγνωσης της αλληγορίας και σε ένα δεύτερο επίπεδο στην φάση ύστερα από την ανάγνωση ώστε να προβούν οι μαθητές σε σύνθετους κριτικούς συσχετισμούς και σε διακειμενικές προσεγγίσεις. Για μια διαγνωστική προσέγγιση μέσω της ψηφιακής αφήγησης, ανατέθηκαν εργασίες στους μαθητές, όπως για παράδειγμα η κατασκευή μιας χρονογραμμής αποτύπωσης των σταδίων αποδέσμευσης με τη χρήση του διαδικτυακού εργαλείου timerime ή της δημιουργίας μιας πολυμεσικής αφίσας με τη χρήση των διαδικτυακών εργαλείων popplet ή glogster.

Σε αυτή τη βάση, η εξιστόρηση της πλατωνικής αλληγορίας του σπηλαίου μέσω των εργαλείων της ψηφιακής αφήγησης συνέβαλε σημαντικά στην κατανόηση των δύσκολων φιλοσοφικών εννοιών της από τους μαθητές, καθιστώντας την φιλοσοφική αφήγηση περισσότερο εύληπτη και συντελώντας ώστε να εμπεδωθεί η έννοια της αναπαράστασης στη λογοτεχνία, καθώς και των ειδικότερων αφηγηματικών μέσων και τεχνικών, όπως ο διάλογος ή η μίμηση.

Παράλληλα, η ψηφιακή αξιοποίηση μέσα από τη συγκεκριμένη περίπτωση είναι χρήσιμη για την κατανόηση των βαθύτερων και συμπαντικών νοημάτων που ενέχει η αλληγορία του σπηλαίου του Πλάτωνα ως λογοτεχνικό είδος που επικοινωνεί με πλήθος έργων της σύγχρονης λογοτεχνίας. Ως εκ τούτου, ο πλατωνικός απόηχος σχετίζεται με τη δυνατότητα της αυτοπραγμάτωσης όταν η εκάστοτε τρέχουσα πραγματικότητα συνθλίβει την αυτενέργεια και ετεροκαθορίζει το άτομο. Μέσω μιας ψηφιακής αφήγησης οι μαθητές, όπως και κάθε αναγνώστης, έχουν τη δυνατότητα να μυηθούν στα άδυτα του πλατωνικού σπηλαίου, ακολουθώντας τους δεσμώτες στον ανηφορικό δρόμο προς την ελευθερία της ύπαρξης. Αυτό συνεπάγεται ότι μέσω μιας ψηφιακής αποτύπωσης οι μαθητές είναι σε θέση να εσωτερικεύσουν και να εμπεδώσουν πλήρως ένα θεωρητικό μοντέλο που μπορεί να τους φανεί ιδιαίτερα δύσκολο και απρόσιτο.

Συνοψίζοντας, μέσω των ψηφιακών εργαλείων οι μαθητές γίνονται ενεργοί δείκτες μιας αναπαριστώμενης ιστορίας, προσλαμβάνουν βιωματικά την πλατωνική αλληγορία, έχοντας την αίσθηση μιας προσωπικής συμβολής στην μετάβαση των δεσμωτών από το σκοτάδι στο φως. Το φιλοσοφικό ταξίδι έτσι τρέπεται σε ένα προσωπικό οδοιπορικό στην πλήρη γνώση του κοσμικού μηχανισμού ως ελλείπον σημείο και συνάμα απώτερος στόχος της πλατωνικής αλληγορίας του σπηλαίου.

Λέξεις – κλειδιά: ψηφιακή αφήγηση, πλατωνική αλληγορία

Η ΨΗΦΙΑΚΗ ΑΦΗΓΗΣΗ ΩΣ ΚΡΙΣΙΜΟ ΠΑΙΔΑΓΩΓΙΚΟ ΠΛΑΙΣΙΟ ΑΝΑΔΕΙΞΗΣ ΤΗΣ ΛΕΙΤΟΥΡΓΙΚΗΣ ΔΙΑΧΕΙΡΙΣΗΣ ΦΙΛΙΚΩΝ ΣΧΕΣΕΩΝ ΣΕ ΜΑΘΗΤΕΣ ΕΙΔΙΚΟΥ ΔΗΜΟΤΙΚΟΥ ΣΧΟΛΕΙΟΥ

ΠΕΡΙΛΗΨΗ

Η αφήγηση αποτελεί κρίσιμη διάσταση του ανθρώπινου πολιτισμού. Είναι ένας φυσικός τρόπος επικοινωνίας και οργάνωσης των εμπειριών σε βάθος χρόνου. Η ισχύς της συνίσταται στο συναισθηματικό αποτέλεσμα, επειδή εμπνέει τη φαντασία, προσελκύοντας περισσότερο και καλύτερα το ενδιαφέρον από οποιαδήποτε άλλη μορφή πληροφοριών. Ιδιαίτερα στο εκπαιδευτικό συγκείμενο, οι ιστορίες βοηθούν τους μαθητές να εκφραστούν καλύτερα, να αναπτύξουν τη φαντασία και το λεξιλόγιό τους, αλλά και να εξωτερικεύουν τα συναισθήματα τους, να βελτιώσουν την ενσυναίσθηση, την κριτική σκέψη και τις κοινωνικές τους δεξιότητες.

Η ψηφιακή αφήγηση χρησιμοποιεί εφαρμογές πολυμέσων, όπως κείμενο, ήχους, μουσική, κόμικς και βίντεο. Στο χρονικό διάστημα των τελευταίων τουλάχιστον 25 ετών, έχει εξελιχθεί σε ένα εξαιρετικά ισχυρό γνωστικό εργαλείο και μέσο διδασκαλίας. Αξιοποιώντας την πανάρχαια τέχνη της αφήγησης και συνδέοντάς την με την τεχνολογία, η ψηφιακή αφήγηση παρέχει ένα πολυαισθητηριακό περιβάλλον μάθησης. Ειδικά, στην Ειδική Αγωγή, η ψηφιακή αφήγηση συμβάλλει στην ενεργοποίηση του ενδιαφέροντος και στη διευκόλυνση της επίτευξης των μαθησιακών στόχων, αποτελώντας μια σημαντική διδακτική και μαθησιακή εξάρτυση, ιδίως στα γλωσσικά μαθήματα.

Η παρούσα εργασία επικεντρώνεται σε μια διδακτική πρόταση βασισμένη σε ένα ψηφιακό παραμύθι με τίτλο «Δύο φίλοι μα τι φίλοι!», το οποίο σχεδιάστηκε και γράφτηκε από εκπαιδευτικό Ειδικού Σχολείου, για μαθητές με αναπηρία ή/και ειδικές εκπαιδευτικές ανάγκες. Μέσω της μελέτης της συγκεκριμένης ιστορίας, οι μαθητές μπορεί να αναπτύξουν τη γλωσσική και την κοινωνική τους συναίσθηση, αλλά και να μάθουν για τον αληθινό ανθρώπινο πλούτο, με την ανάδειξη των υψηλών αξιών της φιλίας, της αποδοχής και της αλληλοϋποστήριξης. Δεδομένου ότι οι μαθητές Ειδικών Σχολείων δυσκολεύονται να κάνουν φίλους, τέτοιες παρεμβάσεις θεωρούνται απαραίτητες για την ένταξή τους, την υγιή κοινωνική τους εξέλιξη, καθώς και για τη συνολική τους ανάπτυξη ως ενεργών και ισότιμων πολιτών.

Λέξεις – κλειδιά: Ψηφιακή αφήγηση, φιλία, Ειδικό Σχολείο

Η ΨΗΦΙΑΚΗ ΑΦΗΓΗΣΗ ΩΣ ΕΡΓΑΛΕΙΟ ΚΑΛΛΙΕΡΓΕΙΑΣ ΚΡΙΤΙΚΗΣ ΣΚΕΨΗΣ ΣΤΟΥΣ ΜΑΘΗΤΕΣ

ΠΕΡΙΛΗΨΗ

Η παρούσα βιβλιογραφική ανασκόπηση εξετάζει διεξοδικά τη σχέση ανάμεσα στην ψηφιακή αφήγηση και την ανάπτυξη της κριτικής σκέψης στους μαθητές. Στόχος της παρούσας μελέτης είναι να αναδείξει πώς η δημιουργία, η ανάλυση και η αξιολόγηση ψηφιακών αφηγήσεων μπορούν να ενισχύσουν ουσιαστικά την ικανότητα των μαθητών/-τριών να αξιολογούν πληροφορίες με κριτικό πνεύμα, να διατυπώνουν έγκυρα επιχειρήματα και να επιλύουν σύνθετα προβλήματα με δημιουργικό τρόπο.

Η μεθοδολογία που ακολουθήθηκε βασίζεται σε συστηματική βιβλιογραφική ανασκόπηση, με κριτήρια επιλογής που περιλαμβάνουν τη συνάφεια με το αντικείμενο της ψηφιακής αφήγησης και της κριτικής σκέψης, τη δημοσίευση σε έγκριτα επιστημονικά περιοδικά και τη χρονολογική εγγύτητα των ερευνών (τελευταία δεκαετία). Οι πηγές περιλαμβάνουν θεωρητικά άρθρα, εμπειρικές μελέτες και μετα-αναλύσεις που εστιάζουν στις εκπαιδευτικές εφαρμογές της ψηφιακής αφήγησης.

Η ανασκόπηση αυτή καλύπτει ένα ευρύ φάσμα ερευνητικών εργασιών και εξετάζει τις εφαρμογές της ψηφιακής αφήγησης σε διάφορα εκπαιδευτικά πλαίσια, από την Πρωτοβάθμια έως την Τριτοβάθμια εκπαίδευση. Εμβαθύνει στις προκλήσεις και τις ευκαιρίες που αναδύονται κατά την ενσωμάτωση της ψηφιακής αφήγησης στην εκπαιδευτική πρακτική, καθώς και στις επιπτώσεις της στην ανάπτυξη Δεξιοτήτων του 21ου αιώνα, όπως η συνεργασία, η επικοινωνία και η δημιουργικότητα.

Μεταξύ των κύριων θεματικών ενοτήτων που αναλύονται, περιλαμβάνονται ο ακριβής ορισμός και τα βασικά χαρακτηριστικά της ψηφιακής αφήγησης, τα θεωρητικά πλαίσια που συνδέουν την αφήγηση με την κριτική σκέψη, οι συγκεκριμένες εφαρμογές της ψηφιακής αφήγησης στην εκπαίδευση, τα εργαλεία και οι τεχνικές που χρησιμοποιούνται για τη δημιουργία και την ανάλυση ψηφιακών ιστοριών, καθώς και τα αποτελέσματα της ψηφιακής αφήγησης στην ανάπτυξη δεξιοτήτων κριτικής σκέψης. Επιπλέον, διερευνώνται οι προκλήσεις και οι προτάσεις για την αποτελεσματική ενσωμάτωση της ψηφιακής αφήγησης στην εκπαιδευτική διαδικασία.

Η συμβολή της παρούσας ανασκόπησης έγκειται στην ανάδειξη τόσο των κύριων ευρημάτων της υπάρχουσας έρευνας όσο και των υφιστάμενων κενών. Ειδικότερα, διαπιστώνεται ότι η ψηφιακή αφήγηση έχει θετική επίδραση στην κριτική σκέψη, αλλά απαιτούνται περισσότερες εμπειρικές μελέτες που να εξετάζουν τη μακροπρόθεσμη επίδρασή της και την προσαρμογή της σε διαφορετικά εκπαιδευτικά περιβάλλοντα.

Συνοψίζοντας, η βιβλιογραφική ανασκόπηση καταλήγει ότι η ψηφιακή αφήγηση αποτελεί ένα πολλά υποσχόμενο εργαλείο για την καλλιέργεια της κριτικής σκέψης στους μαθητές. Η δημιουργία και η ανάλυση ψηφιακών ιστοριών μπορούν να ενισχύσουν σημαντικά την ενεργό μάθηση, την συνεργασία και την ανάπτυξη δεξιοτήτων που είναι απαραίτητες για την επιτυχία στον σύγχρονο ψηφιακό κόσμο. Η αποτελεσματική ενσωμάτωση της ψηφιακής αφήγησης στην εκπαίδευση απαιτεί την κατάλληλη εκπαίδευση και υποστήριξη των εκπαιδευτικών, την πρόσβαση σε σύγχρονα τεχνολογικά εργαλεία και τη δημιουργία ενός υποστηρικτικού μαθησιακού περιβάλλοντος που ενθαρρύνει την καινοτομία και τη δημιουργικότητα.

Λέξεις – κλειδιά: Ψηφιακή αφήγηση, κριτική σκέψη, ανάπτυξη δεξιοτήτων

Η ΨΗΦΙΑΚΗ ΑΦΗΓΗΣΗ ΣΤΗΝ ΠΡΟΣΧΟΛΙΚΗ ΕΚΠΑΙΔΕΥΣΗ ΚΑΙ ΤΗΝ ΕΙΔΙΚΗ ΑΓΩΓΗ. ΤΑ ΠΑΙΔΙΑ ΔΗΜΙΟΥΡΓΟΥΝ ΨΗΦΙΑΚΕΣ ΙΣΤΟΡΙΕΣ.

ΠΕΡΙΛΗΨΗ

Τα σημερινά παιδιά ζουν σ' έναν ψηφιακό κόσμο και οι νέες τεχνολογίες αποτελούν ένα σημαντικό στοιχείο της παιδικής κουλτούρας. Ο Prensky (2006) χρησιμοποίησε τον όρο «ψηφιακοί αυτόχθονες»(digital natives), για να αναφερθεί στα σημερινά παιδιά που μιλούν την ψηφιακή γλώσσα των υπολογιστών, των βιντεοπαιχνιδιών και του διαδικτύου. Σε αντίθεση, εκείνοι που δεν γεννήθηκαν στην ψηφιακή εποχή θεωρούνται «ψηφιακοί μετανάστες» (digital immigrants), επειδή έχουν υιοθετήσει πολλές πλευρές των ΤΠΕ, ακριβώς όπως όσοι μαθαίνουν μια δεύτερη γλώσσα αργότερα στη ζωή τους .(Nikolopoulou, 2018).

Στο πλαίσιο της εκπαίδευσης τονίζονται ιδιαίτερα τα οφέλη της ψηφιακής τεχνολογίας, καθώς οι υπολογιστές προσφέρουν στα παιδιά πρόσβαση σε νέους, άγνωρους κόσμους και διεγείρουν τη δίψα τους για μάθηση.

Μια ιδιαίτερη θέση στον τομέα της προσχολικής εκπαίδευσης και της Ειδικής Αγωγής κατέχει η αφήγηση, η οποία συμβάλλει αποτελεσματικά στη μάθηση. Άλλωστε η μάθηση είναι αποτελεσματική, όταν προσφέρεται στα παιδιά πολυτροπικά, με έναν ευχάριστο και διασκεδαστικό τρόπο.

Με την εμφάνιση των νέων τεχνολογιών δημιουργήθηκε μια νέα μορφή αφήγησης, η ψηφιακή αφήγηση (Digital Story telling), από την οποία τα παιδιά αποκομίζουν πολλά οφέλη, αποκτούν περαιτέρω δεξιότητες και όχι μόνο μια απλή γνωριμία κι εξοικείωση με τους ηλεκτρονικούς υπολογιστές. Αλληλοεπιδρούν με τους συμμαθητές τους, δημιουργώντας σχέσεις οικειότητας κι εμπιστοσύνης, εκφράζονται δημιουργικά και αποκτούν ψηφιακές δεξιότητες.

Λέξεις κλειδιά: Νέες Τεχνολογίες, Ψηφιακή Αφήγηση, Προσχολική Εκπαίδευση, Ειδική Αγωγή

ΘΠ26: Εκπαιδευτική αξιολόγηση με τη χρήση ψηφιακών μέσων και εργαλείων

Η ΧΡΗΣΗ ΤΕΧΝΟΛΟΓΙΑΣ EYE-TRACKING ΓΙΑ ΤΗΝ ΑΞΙΟΛΟΓΗΣΗ ΠΡΑΓΜΑΤΟΛΟΓΙΚΩΝ ΔΕΞΙΟΤΗΤΩΝ ΣΕ ΠΑΙΔΙΑ: ΣΥΣΤΗΜΑΤΙΚΗ ΑΝΑΣΚΟΠΗΣΗ

ΠΕΡΙΛΗΨΗ

Η πραγματολογική ικανότητα αποτελεί κρίσιμο στοιχείο της κοινωνικής επικοινωνίας, ιδίως κατά την παιδική ηλικία. Παιδιά με Πραγματολογική Διαταραχή (ΠΔ) ή άλλες Νευροαναπτυξιακές Διαταραχές (ΝαΔ) συχνά εμφανίζουν ελλείμματα που επηρεάζουν την κοινωνική τους ενσωμάτωση. Η τεχνολογία eye-tracking προσφέρει ένα καινοτόμο και αντικειμενικό εργαλείο αξιολόγησης, που επιτρέπει την καταγραφή και ανάλυση των οφθαλμικών κινήσεων και της εστίασης της προσοχής κατά την επικοινωνία. Η παρούσα συστηματική ανασκόπηση, βάσει PRISMA 2020, αναλύει 43 σχετικές μελέτες (2019–2025) από την PubMed, με στόχο την αξιολόγηση της εφαρμογής του eye-tracking στην ανίχνευση πρώιμων πραγματολογικών δεικτών. Τα αποτελέσματα αυτής της εργασίας δείχνουν ότι η τεχνολογία eye-tracking μπορεί να ανιχνεύσει πρώιμες διαφοροποιήσεις στις κοινωνικές-επικοινωνιακές δεξιότητες των παιδιών, συμβάλλοντας στην έγκαιρη διάγνωση. Η μειωμένη διάρκεια κοινωνικού βλέμματος και η περιορισμένη χρήση χαμόγελου κατά την κοινωνική αλληλεπίδραση συνδέονται με αυξημένα συμπτώματα σε παιδιά με αυτισμό και δυσκολίες επεξεργασίας κοινωνικών μηνυμάτων. Η χρήση eye-tracking ενισχύει την εγκυρότητα των διαγνώσεων, υποστηρίζει την πρώιμη παρέμβαση και προτείνεται ως εργαλείο ενσωματωμένο σε θεραπευτικά και εκπαιδευτικά προγράμματα. Η τεχνολογία αυτή δίνει νέες προοπτικές στη βελτίωση της ποιότητας ζωής παιδιών με ΝαΔ μέσω στοχευμένης και τεκμηριωμένης παρέμβασης.

Λέξεις – κλειδιά: eye-tracking, πραγματολογικές δεξιότητες, νευροαναπτυξιακές διαταραχές, πρώιμη διάγνωση, λογοθεραπεία, εκπαιδευτική παρέμβαση

ΘΠ27: Διοίκηση Εκπαίδευσης και ψηφιακές τεχνολογίες

ΟΙ Τ.Π.Ε ΩΣ ΕΡΓΑΛΕΙΑ ΔΙΟΙΚΗΣΗΣ ΚΑΙ ΒΕΛΤΙΩΣΗΣ ΤΗΣ ΑΠΟΔΟΣΗΣ ΣΤΗΝ ΕΚΠΑΙΔΕΥΣΗ

ΠΕΡΙΛΗΨΗ

Η οργανωτική και η διοικητική ανασυγκρότηση της σύγχρονης Ελληνικής σχολικής μονάδας έχει ως κυρίαρχο στόχο την εύρυθμη και αποδοτική λειτουργία της, στο εσωτερικό πλαίσιο λειτουργίας της, αλλά και στο ευρύτερο κοινωνικό ιστό που υπάρχει και εξελίσσεται. Η χρήση των Τεχνολογιών Πληροφορίας και Επικοινωνιών,(Τ.Π.Ε.) αποτελεί μια επαναλαμβανόμενη πραγματικότητα και μπορεί να προσφέρει, μέσα από πρακτικές και σύγχρονα τεχνολογικά εργαλεία αποδοτικότερες και αποτελεσματικότερες επιδόσεις του ανθρώπινου δυναμικού. Δίχως να επηρεάζει ποιο θα είναι το είδος του οργανισμού, δηλαδή εάν εξυπηρετεί ένα σχολείο ή μια εταιρεία, ένα αποδοτικό και αξιόπιστο πληροφοριακό σύστημα διοίκησης, (Π.Σ.) αποτελεί πάντα μια σπουδαία επένδυση για τον οργανισμό. Η αξιολόγησή του σε τακτά χρονικά διαστήματα ώστε να κρίνεται η αποδοτικότητα της επένδυσης αυτής είναι αναγκαία.

Ένας ουσιαστικός ρόλος των Εκπαιδευτικών Πληροφοριακών Συστημάτων είναι να περιορίσουν, στη φάση του σχεδιασμού των επιμέρους μέτρων της εκπαιδευτικής πολιτικής, την έλλειψη σιγουριάς μέσω της τροφοδοσίας πληροφοριών, οι οποίες μπορούν να αξιοποιηθούν ώστε να παρθούν με σωστό τρόπο οι σωστές αποφάσεις. Δηλαδή τα οφέλη που συνεπάγονται από τη χρήση των εκπαιδευτικών πληροφοριακών συστημάτων, συνδέονται με την αύξηση της αποδοτικότητας και της αποτελεσματικότητας της διοίκησης και του εκπαιδευτικού προσωπικού κάθε σχολικού οργανισμού. Η αποδοτικότητα (efficiency) σχετίζεται με την ικανότητα να παίρνονται οι αποφάσεις σωστά. Η αποτελεσματικότητα (effectiveness) αναφέρεται στην ικανότητα να παίρνονται οι σωστές αποφάσεις. Συνεπώς, το να λαμβάνει κάποιος μια απόφαση σωστά, δε σημαίνει ότι παίρνει και τη σωστή απόφαση.

Τα Εκπαιδευτικά Πληροφοριακά Συστήματα δεν παρέχουν άμεσα τυποποιημένες αποφάσεις στους χρήστες, ούτε προτείνουν προσχεδιασμένο τρόπο λήψης αποφάσεων που εξασφαλίζει επιτυχία. Εξυπηρετούν τα πρόσωπα που εμπλέκονται με τα εκπαιδευτικά θέματα στη διαδικασία λήψης των αποφάσεων, προσφέροντας μια σειρά από επίλεκτες πληροφορίες που είναι οι εκροές της επεξεργασίας των κατάλληλων δεδομένων τα οποία καταχωρήθηκαν στον Η/Υ. Συνεπώς, το άτομο που θα κριθεί να λάβει κάποιες σημαντικές αποφάσεις, από το χώρο της εκπαίδευσης, θα βασισθεί όχι μόνο στις πληροφορίες με τις οποίες θα του παρέχει το πληροφοριακό σύστημα, αλλά και στην εμπειρία, στην κρίση και τη διαίσθησή του. Τέλος ένα ζήτημα που πρέπει να εξετάζεται είναι η λειτουργικότητα του υπάρχοντος πληροφοριακού συστήματος και η ανάγκη ανακατασκευής του ή επέκτασής του.

Στόχος της συγκεκριμένης εργασίας είναι να παρουσιάσει τις δυνατότητες των πληροφοριακών συστημάτων ώστε να προσφέρουν έναν παραγωγικό και αποδοτικό τρόπο για την εξυπηρέτηση των αναγκών των σχολικών δομών. Αποτελούν ένα χρήσιμο εργαλείο στα χέρια της Διοίκησης, καθώς έχουν τη δυνατότητα να γνωρίζουν κάθε φορά τον προγραμματισμό που έχει πραγματοποιηθεί όπως και όλες τις σημαντικές πληροφορίες που σχετίζονται με αυτόν.

Λέξεις Κλειδιά: Τεχνολογία της Πληροφορίας, Ψηφιακή ανασυγκρότηση, Εκπαιδευτικά πληροφοριακά συστήματα.

Η ΣΥΜΒΟΛΗ ΤΩΝ ΠΛΗΡΟΦΟΡΙΑΚΩΝ ΣΥΣΤΗΜΑΤΩΝ ΣΤΗΝ ΕΚΠΑΙΔΕΥΣΗ: ΑΞΙΟΛΟΓΗΣΗ ΑΠΟΤΕΛΕΣΜΑΤΙΚΟΤΗΤΑΣ ΤΟΥ MYSCHOOL

Κοτζαμουράτογλου Γεώργιος
Εκπαιδευτικός Δευτεροβάθμιας Εκπαίδευσης, Ηλεκτρολόγος Μηχανικός και Οικονομολόγος
1ο Εργαστηριακό Κέντρο (Ε.Κ.) Πρέβεζας, Διεύθυνση Δευτεροβάθμιας Εκπαίδευσης Πρέβεζας

email: kotzamou@sch.gr

ΠΕΡΙΛΗΨΗ

Η ψηφιακή εποχή και η ένταξη πληροφοριακών συστημάτων σε οργανισμούς οδήγησε σε σημαντικές αλλαγές και στη διαχείριση των εκπαιδευτικών δομών, με τα πληροφοριακά συστήματα να παίζουν κρίσιμο ρόλο στη διοίκηση της εκπαίδευσης. Αυτή η εργασία αξιολογεί τη συμβολή του πληροφοριακού συστήματος Myschool στην Ελληνική εκπαίδευση, την αποτελεσματικότητά του, τα πλεονεκτήματά και μειονεκτήματά του, καθώς επίσης και προτάσεις βελτίωσής του, βασιζόμενη σε βιβλιογραφική ανασκόπηση που πραγματοποιήθηκε.

Το Myschool είναι ένα ολοκληρωμένο σύστημα που επιτρέπει την κεντρική διαχείριση των πληροφοριών για υλικοτεχνική υποδομή, μαθητές, εκπαιδευτικούς και των διαδικασιών της σχολικής μονάδας. Η εφαρμογή του βελτίωσε σημαντικά τη διοίκηση της εκπαίδευσης, μειώνοντας τη γραφειοκρατία, αυξάνοντας τη διαφάνεια και βοηθώντας στη λήψη αποφάσεων. Τα κυριότερα οφέλη από τη χρήση του περιλαμβάνουν την αποτελεσματική διαχείριση των αρχείων των μαθητών, τη μείωση του φόρτου εργασίας και την άμεση πρόσβαση σε δεδομένα παρακολούθησης, βαθμολογίας και φοίτησης. Η ψηφιοποίηση επιτάχυνε την επεξεργασία και αποθήκευση των πληροφοριών, παρέχοντας μια συνολική εικόνα της εκπαιδευτικής κατάστασης σε κάθε σχολική μονάδα. Το Myschool βελτιώνει επίσης την επικοινωνία μεταξύ εκπαιδευτικών, γονέων και διοικητικών υπαλλήλων, προσφέροντας συνεχή ενημέρωση για την πρόοδο των μαθητών.

Παρά τα θετικά, υπάρχουν ζητήματα για περισσότερη απλοποίηση, διευκόλυνση και αυτοματοποίηση των εργασιών στην πλατφόρμα Myschool. Πολλοί εκπαιδευτικοί και διοικητικοί υπάλληλοι δυσκολεύονται να το χρησιμοποιήσουν σωστά λόγω έλλειψης εκπαίδευσης. Αυτό δείχνει ότι η διεπαφή και οι λειτουργίες του χρειάζονται βελτίωση για να είναι πιο φιλικές στον χρήστη. Η έλλειψη βοήθειας και επιμόρφωσης οδηγεί σε μειωμένη αποτελεσματικότητα και λιγότερη χρήση των δυνατοτήτων του συστήματος. Περισσότερη αυτοματοποίηση στην διαδικασία καταχώρισης και ενημέρωσης των δεδομένων θα βοηθήσει να μειωθεί ο φόρτος εργασίας εκπαιδευτικών και στελεχών. Η δυνατότητα άντλησης στοιχείων σε συγκεκριμένη μορφή από άλλα προγράμματα (Excel, timetable, κ.α.) θα βοηθούσε στην ταχύτερη εισαγωγή μεγάλου όγκου δεδομένων που μπορεί να προϋπήρχαν (εργαστηριακός εξοπλισμός, κ.α.) ή την ευκολότερη καταχώρηση του ωρολογίου προγράμματος που δημιουργείται με κάποιο άλλο πρόγραμμα. Ιδανικά, καλό θα ήταν το Myschool να έχει την δυνατότητα δημιουργίας ωρολογίου προγράμματος. Δυνατότητες καταγραφής των πρακτικών ή η αυτόματη αποτύπωση των αναγκών σε εκπαιδευτικούς (κενά – πλεονάσματα) θα βοηθούσε στον καλύτερο προγραμματισμό για την επόμενη χρονιά.

Η διασύνδεση επίσης με άλλες κρατικές πλατφόρμες, μπορεί να κάνει πιο εύκολες και σύντομες τις εργασίες, μειώνοντας την ανάγκη για πολλαπλές εισαγωγές δεδομένων και επιτρέποντας τον άμεσο έλεγχο των δεδομένων. Το σύστημα φαίνεται να μην είναι τόσο ικανό στην ανάλυση δεδομένων σε σχέση με άλλα διεθνή συστήματα. Από τη σύγκριση του Myschool με συστήματα όπως το SIMS (Ηνωμένο Βασίλειο) και το PowerSchool (ΗΠΑ),και από την εξέταση μελετών που έχουν γίνει, φάνηκε ότι το Ελληνικό σύστημα υστερεί στην ανάλυση δεδομένων και στην προσαρμογή στις ανάγκες των σχολείων.

Για να βελτιωθεί το Myschool, προτείνονται αλλαγές όπως η προσθήκη εργαλείων ανάλυσης δεδομένων, η σύνδεση με άλλες πλατφόρμες και η δημιουργία ενός περιβάλλοντος που να είναι πιο εύκολο στη χρήση. Επίσης, η συνεχής εκπαίδευση των χρηστών, η ενίσχυση των μηχανισμών ασφαλείας και η δυνατότητα άντλησης στοιχείων από άλλες εφαρμογές, είναι σημαντικά για να χρησιμοποιείται καλύτερα το σύστημα. Επιπρόσθετα, η διαβαθμισμένη πρόσβαση εκπαιδευτικών, μαθητών και γονέων μπορούν να βελτιώσουν το ρόλο του Myschool.

Συνοψίζοντας, το Myschool έχει παίξει σημαντικό ρόλο στον εκσυγχρονισμό της Ελληνικής παιδείας, προσφέροντας νέα μέσα για τη διαχείριση και την ανάλυση εκπαιδευτικών πληροφοριών. Όμως, για να προσφέρει ακόμα περισσότερα είναι απαραίτητη η διαρκής εξέλιξη του συστήματος, η προσαρμογή στις απαιτήσεις των χρηστών, η εκπαίδευσή τους και η ενίσχυση της προστασίας και της άντλησης των δεδομένων. Η μελλοντική ανάπτυξη του Myschool μπορεί να βοηθήσει ουσιαστικά στη βελτίωση της αποτελεσματικότητας και της ποιότητας της διοίκησης της ελληνικής εκπαίδευσης και στη βελτίωση της διδασκαλίας.

Λέξεις κλειδιά: Πληροφοριακά συστήματα, Εκπαιδευτική διοίκηση, Myschool, Ψηφιακή διαχείριση δεδομένων.

ΑΞΙΟΛΟΓΗΣΗ ΤΗΣ ΠΛΑΤΦΟΡΜΑΣ MYSCHOOL: ΑΠΟΨΕΙΣ ΕΚΠΑΙΔΕΥΤΙΚΩΝ, ΠΡΟΒΛΗΜΑΤΑ ΚΑΙ ΣΤΡΑΤΗΓΙΚΕΣ ΒΕΛΤΙΩΣΗΣ

ΠΕΡΙΛΗΨΗ

Η παρούσα έρευνα επικεντρώνεται στη χρήση της πλατφόρμας MySchool από τους εκπαιδευτικούς και αναλύει τις απόψεις τους σχετικά με τη λειτουργικότητά της, την επίδρασή της στη σχολική διοίκηση και τα προβλήματα που αντιμετωπίζουν κατά τη χρήση της. Στόχος της είναι να διερευνήσει τη χρήση της πλατφόρμας από τους εκπαιδευτικούς, να αξιολογήσει τη λειτουργικότητά της, καθώς και να εντοπίσει τα προβλήματα και τις ανάγκες που ανακύπτουν κατά τη χρήση της. Σκοπός της είναι να κατανοήσει πώς αντιλαμβάνονται οι εκπαιδευτικοί τη συμβολή της πλατφόρμας στην εκπαιδευτική και διοικητική διαδικασία του σχολείου, να αναδείξει τις διαφοροποιήσεις στις απόψεις μεταξύ νέων και έμπειρων εκπαιδευτικών, καθώς και των διευθυντών, και να προτείνει στρατηγικές για την ενίσχυση της λειτουργικότητας και την επίλυση των τεχνικών ζητημάτων που αντιμετωπίζουν.

Η έρευνα, η οποία πραγματοποιήθηκε σε πανελλήνιο επίπεδο, είναι μέρος της διπλωματικής μου εργασίας, στο πλαίσιο του προγράμματος μεταπτυχιακών σπουδών «Διοίκηση Επιχειρήσεων και Οργανισμών» του τμήματος Λογιστικής και Χρηματοοικονομικής του Πανεπιστημίου Ιωαννίνων. Η έρευνα βασίζεται σε δείγμα 143 εκπαιδευτικών, από τους οποίους 75 είναι γυναίκες και 68 άνδρες. Η πλειονότητα των συμμετεχόντων είναι ηλικίας 36-50 ετών, κατέχει μεταπτυχιακό τίτλο σπουδών, εργάζεται σε γυμνάσια και δεν έχει εκπαιδευτεί στο πληροφοριακό σύστημα Myschool αλλά ούτε έχει εμπειρία χρήσης άλλων πληροφοριακών συστημάτων.

Τα αποτελέσματα δείχνουν ότι οι απόψεις των εκπαιδευτικών σχετικά με την πλατφόρμα MySchool είναι γενικά θετικές, καθώς οι περισσότεροι θεωρούν τη χρήση της εύκολη και την εμπειρία θετική. Ωστόσο, εντοπίζονται διαφοροποιήσεις στην αξιολόγηση της πλατφόρμας, που εστιάζονται κυρίως σε τεχνικά προβλήματα, όπως η δυσχέρεια στη συμβατότητα με άλλα συστήματα. Παρά τις δυσκολίες αυτές, οι εκπαιδευτικοί αναγνωρίζουν ότι το MySchool συμβάλλει σημαντικά στη διαχείριση σχολικών δεδομένων και στην εκτέλεση διοικητικών εργασιών, αν και από την έρευνα προκύπτει ότι δεν έχει περιορίσει σημαντικά τον διοικητικό φόρτο τους.

Οι εκπαιδευτικοί εκφράζουν την ανάγκη για νέες λειτουργίες στην πλατφόρμα, όπως η δυνατότητα ηλεκτρονικής αίτησης πιστοποιητικών και η αποστολή ειδοποιήσεων σε πραγματικό χρόνο, οι οποίες θα διευκόλυναν σημαντικά την καθημερινή τους εργασία.

Η έρευνα καταλήγει στην ανάγκη για τεχνικές βελτιώσεις στην πλατφόρμα και τη συνένωσή της με άλλες ψηφιακές εφαρμογές και συστήματα, προκειμένου να ενισχυθεί η συνολική λειτουργικότητά της και να εξυπηρετήσει καλύτερα τις ανάγκες των εκπαιδευτικών και της σχολικής κοινότητας. Προτάσεις για τη βελτίωση του MySchool περιλαμβάνουν την ανάπτυξη νέων εργαλείων και τη βελτιστοποίηση των υπαρχόντων, ώστε να ενισχυθεί η αποδοτικότητα και η ευχρηστία της πλατφόρμας στην εκπαιδευτική διαδικασία.

Λέξεις – κλειδιά: Myschool, έρευνα, λειτουργικότητα, αντιλήψεις χρηστών.

ΨΗΦΙΑΚΟΣ ΜΕΤΑΣΧΗΜΑΤΙΣΜΟΣ ΚΑΙ ΕΚΠΑΙΔΕΥΣΗ: Η ΣΥΜΒΟΛΗ ΤΩΝ ΠΛΗΡΟΦΟΡΙΑΚΩΝ ΣΥΣΤΗΜΑΤΩΝ ΔΙΟΙΚΗΣΗΣ- MYSCHOOL

ΠΕΡΙΛΗΨΗ

Η εργασία επικεντρώνεται στη μελέτη και ανάλυση των Πληροφοριακών Συστημάτων Διοίκησης στον τομέα της εκπαίδευσης, με ιδιαίτερη έμφαση στο σύστημα MySchool στην Ελλάδα. Σκοπός της είναι να εξετάσει τον ρόλο αυτών των συστημάτων στην αποτελεσματική διαχείριση και αποθήκευση δεδομένων των σχολικών μονάδων και τη συνεισφορά τους στον ψηφιακό μετασχηματισμό του εκπαιδευτικού συστήματος. Η εργασία αναδεικνύει τη σημασία των Πληροφοριακών Συστημάτων Διοίκησης, όπως το Σύστημα Πληροφοριών Μαθητών, το Σύστημα Διαχείρισης Μάθησης, το Σύστημα Υποστήριξης Αποφάσεων κ.α., στην ενίσχυση των διοικητικών και ακαδημαϊκών διαδικασιών, την υποστήριξη της στρατηγικής λήψης αποφάσεων και την επίτευξη μεγαλύτερης διαφάνειας και αποτελεσματικότητας στα εκπαιδευτικά ιδρύματα.

Η μεθοδολογία που χρησιμοποιήθηκε περιλαμβάνει ανασκόπηση της βιβλιογραφίας σχετικά με τα Πληροφοριακά Συστήματα Διοίκησης στην εκπαίδευση, την ανάλυση του ελληνικού συστήματος MySchool, καθώς και την αναφορά σε διεθνείς μελέτες και παραδείγματα από άλλες χώρες. Εκεί αξιολογούνται οι προκλήσεις που συνδέονται με την εφαρμογή αυτών των συστημάτων, όπως η αντίσταση στην αλλαγή, η έλλειψη εξειδικευμένου προσωπικού και οι τεχνολογικοί περιορισμοί.

Από τα ευρήματα της μελέτης προκύπτει ότι τα Πληροφοριακά Συστήματα Διοίκησης, όπως το MySchool, συμβάλλουν σημαντικά στην καλύτερη διαχείριση των δεδομένων των μαθητών και των σχολικών μονάδων, καθώς και στη διευκόλυνση των διοικητικών διαδικασιών. Παράλληλα, η ενοποίηση των διάσπαρτων συστημάτων σε μία ενιαία πλατφόρμα ενισχύει τη διαφάνεια και την αποτελεσματικότητα, επιτρέποντας τη συνεχιζόμενη παρακολούθηση των μαθησιακών επιδόσεων, την αξιολόγηση των εκπαιδευτικών και τη βελτίωση των στρατηγικών αποφάσεων. Στη διάρκεια της πανδημίας COVID-19, το MySchool συνέβαλε στην υποστήριξη της ηλεκτρονικής επικοινωνίας, αποδεικνύοντας την αναγκαιότητα της ψηφιακής τεχνολογίας στην εκπαίδευση.

Συνολικά, η εργασία υπογραμμίζει τη σημασία των Πληροφοριακών Συστημάτων Διοίκησης στην εκπαιδευτική διαδικασία, αναγνωρίζοντας τα πλεονεκτήματα τους στην ανάπτυξη των εκπαιδευτικών συστημάτων και την στρατηγική λήψη αποφάσεων, ενώ επισημαίνει και τις προκλήσεις που συνδέονται με την εφαρμογή τους. Η επιτυχία αυτών των συστημάτων εξαρτάται από την κατάλληλη υποστήριξη, την εκπαίδευση και την προσαρμογή τους στις σύγχρονες ανάγκες της εκπαίδευσης.

Λέξεις – κλειδιά: Ψηφιακός μετασχηματισμός, MySchool, εκπαίδευση.

ΠΕΡΙΛΗΨΗ

Η ψήφιση του νόμου περί εισαγωγής του «Ψηφιακού Βιβλίου Πράξεων Συλλόγου Διδασκόντων» (Αριθμ. 3446/16-05-2024 – ΦΕΚ 2988/Β/28-05-2024) στις 28 Μαΐου του 2024, και η εφαρμογή τον Σεπτέμβριο του 2024 στις σχολικές μονάδες, σηματοδότησε σημαντικές ποιοτικές και ποσοτικές αλλαγές στη διοίκηση των σχολικών μονάδων. Για όσες σχολικές μονάδες υλοποίησαν και εφάρμοσαν τον νόμο, και τον ενσωμάτωσαν ως εργαλείο «ψηφιακής διαχείρισης» εντός των διοικητικών διαδικασιών, διαπίστωσαν υποβόσκουσες αντιθέσεις και συγκρούσεις χρόνων, αντιφάσεις κατά την υλοποίηση, αλλά και προκλήσεις από τα οφέλη. Η εφαρμογή του συγκεκριμένου νόμου σηματοδότησε μία μετάβαση από τις παγιωμένες τυποποιημένες πρακτικές των διαδικασιών των Συλλόγων σε μία νέα ρυθμιστική πραγματικότητα, η οποία εισήγαγε στοιχεία και χαρακτηριστικά ψηφιακού μετασχηματισμού στην σχολική μονάδα, τα οποία αναγνωρίστηκαν από όλους/-ες τους/τις εκπαιδευτικούς. Το παρόν άρθρο εντασσόμενο στον γόνιμο ακαδημαϊκό διάλογο του Συνεδρίου για μία δυναμική σχέση ψηφιακών μέσων, διοικητικής μέριμνας και εκπαιδευτικού έργου, κατατίθεται με την μορφή «απολογισμού» και αποτυπώνει εμπειρίες, δυσκολίες και προοπτικές από αυτήν την νέα πραγματικότητα. Η εισήγηση, από την πλευρά της διοίκησης και του διαχειριστικού ελέγχου των σχολικών μονάδων δεν αποσιωπά, ειδικά εκείνα τη σημεία της εφαρμογής του νόμου για το «Ψηφιακό Βιβλίο Πράξεων Συλλόγου Διδασκόντων», τα οποία λειτούργησαν ως εμπόδιο στην ομαλή υλοποίηση του διοικητικού έργου, αλλά ούτε και την δυσοίωνη προοπτική της εδραίωσης των συναδελφικών σχέσεων σε υπαγωγικές και ιεραρχικές σχέσεις που ενισχύουν την ψηφιακή γραφειοκρατία, αντί της διευκόλυνσης της άσκησης του διοικητικού έργου. Περισσότερο όμως από όλα δεν αποσιωπά ότι τελικά για τον ψηφιακό μετασχηματισμό των σχολικών μονάδων δεν αρκεί μία επίπλαστη πληροφοριακή ενημέρωση, αλλά απαιτείται μία επένδυση στον ψηφιακό εγγραμματισμό όλων των μελών της σχολικής μονάδας χωρίς αποκλεισμούς και χωρίς μονομέρειες. Αυτό όμως δεν είναι υπόθεση ενός νόμου αλλά μίας συνολικής αυθεντικής μετασχηματίζουσας διοικητικής πολιτικής για όλες τις σχολικές μονάδες.

Λέξεις – κλειδιά: Διοίκηση Εκπαίδευσης και ψηφιακές τεχνολογίες, Ψηφιακού βιβλίου πράξεων Συλλόγου Διδασκόντων, διοικητικές σχέσεις των εκπαιδευτικών, ψηφιακή γραφειοκρατία

ΠΕΡΙΛΗΨΗ

Η παρούσα ποιοτική μελέτη αξιολογεί το ΟΠΣΥΔ (Ολοκληρωμένο Πληροφοριακό Σύστημα Πρωτοβάθμιας και Δευτεροβάθμιας Εκπαίδευσης), ένα σύστημα ηλεκτρονικής διακυβέρνησης που αποτελεί βασικό εργαλείο για τη διαχείριση του προσωπικού στην Ελληνική Πρωτοβάθμια και Δευτεροβάθμια Εκπαίδευση. Το ΟΠΣΥΔ, που χαρακτηρίζεται ως πληροφοριακό σύστημα διαχείρισης ανθρώπινου δυναμικού, επιτρέπει αμφίδρομη αλληλεπίδραση μεταξύ εκπαιδευτικών και περιφερειακών Διευθύνσεων Εκπαίδευσης, δίνοντας τη δυνατότητα ηλεκτρονικής υποβολής αιτήσεων, ανέβασμα εγγράφων και διαχείρισης αιτημάτων. Η έρευνα, η οποία διεξήχθη από τον Φεβρουάριο έως τον Ιούνιο του 2024 μέσω δομημένων συνεντεύξεων στις περιοχές της Ηπείρου και της Πελοποννήσου, περιελάμβανε 15 μη μόνιμους εκπαιδευτικούς και 7 διοικητικούς υπαλλήλους από περιφερειακές διευθύνσεις εκπαίδευσης. Στόχος των συνεντεύξεων ήταν η καταγραφή των τρόπων αλληλεπίδρασης, ο εντοπισμός δυσκολιών και η συλλογή προτάσεων βελτίωσης των διοικητικών διαδικασιών.

Τα βασικά ευρήματα δείχνουν ότι οι κύριοι προβληματισμοί δεν σχετίζονται με τεχνικά ζητήματα του ίδιου του ΟΠΣΥΔ, αλλά κυρίως με δυσκολίες που προκύπτουν από τις διοικητικές διαδικασίες και τον τρόπο εφαρμογής τους, ιδίως λόγω της χρήσης πολλαπλών πληροφοριακών συστημάτων με παρόμοιους σκοπούς. Οι διοικητικοί υπάλληλοι ανέφεραν σημαντική σπατάλη χρόνου λόγω επαναλαμβανόμενης καταχώρησης δεδομένων σε διαφορετικά συστήματα όπως MySchool, eDataCenter και Μητρώο Ανθρώπινου Δυναμικού, τα οποία δεν επικοινωνούν μεταξύ τους για αυτόματο συγχρονισμό δεδομένων.

Η μελέτη καταλήγει ότι ο σχεδιασμός και η υλοποίηση λύσεων διαλειτουργικότητας μεταξύ των υφιστάμενων πληροφοριακών συστημάτων είναι επιβεβλημένα, ώστε να επιτρέπεται η μαζική εισαγωγή και ο αυτόματος συγχρονισμός δεδομένων, μειώνοντας τους χρόνους διεκπεραίωσης και επιτρέποντας στο προσωπικό να εστιάσει σε ουσιαστικά καθήκοντα. Προτείνεται επίσης η βελτίωση των δυνατοτήτων επικοινωνίας ώστε να επιτυγχάνεται έγκαιρη διόρθωση λαθών από τους αιτούντες. Οι προτάσεις περιλαμβάνουν την αποσύνδεση της ενημέρωσης των δικαιολογητικών στο ΟΠΣΥΔ από τις προκηρύξεις, επιτρέποντας τη συνεχή υποβολή, και την ενσωμάτωση υποστηριζόμενων από τεχνητή νοημοσύνη chatbots, υπό επίβλεψη ανθρώπινων ειδικών, για την καθοδήγηση των αιτούντων. Επιπλέον, η ενσωμάτωση της εξειδικευμένης γνώσης για την απόδοση εκπαιδευτικών ειδικοτήτων στο σύστημα eDiplomas θα διασφαλίσει την αυτόματη και ακριβή ενημέρωση των ειδικοτήτων απευθείας από τα πανεπιστήμια.

Λέξεις – κλειδιά: ΟΠΣΥΔ, Ηλεκτρονική Διακυβέρνηση, Διαχείριση Ανθρώπινου Δυναμικού, Διοίκηση Εκπαίδευσης, Διοικητικές Διαδικασίες, Διαλειτουργικότητα

ΠΕΡΙΛΗΨΗ

Η ψηφιακή μετάβαση στην εκπαίδευση έχει επαναπροσδιορίσει ριζικά τον ρόλο των εκπαιδευτικών ηγετών, οι οποίοι καλούνται να διαχειριστούν πολύπλοκες συνθήκες, να αναπτύξουν νέες δεξιότητες και να διαμορφώσουν στρατηγικές που ανταποκρίνονται στις απαιτήσεις του 21ου αιώνα. Η εργασία αυτή εξετάζει τις βασικές προκλήσεις, τις αναδυόμενες καινοτομίες και τις μετασχηματιστικές πρακτικές που επανακαθορίζουν την εκπαιδευτική ηγεσία στη σύγχρονη ψηφιακή εποχή.

Κεντρική πρόκληση αποτελεί το ψηφιακό χάσμα, που δημιουργεί ανισότητες στην πρόσβαση σε τεχνολογικές υποδομές και ψηφιακές ευκαιρίες μάθησης. Παράλληλα, οι αυξανόμενες ανησυχίες για την προστασία των προσωπικών δεδομένων απαιτούν την εφαρμογή αυστηρών πολιτικών και την ανάληψη ευθύνης από υπεύθυνους προστασίας δεδομένων εντός των σχολικών μονάδων. Η ανάγκη συνεχούς επαγγελματικής ανάπτυξης αναδεικνύεται ως κρίσιμος παράγοντας για την επιτυχή ενσωμάτωση της τεχνολογίας στη διδασκαλία, ενώ η αξιοποίηση νέων τεχνολογιών, όπως η τεχνητή νοημοσύνη, το cloud computing και τα μεγάλα δεδομένα, απαιτεί στρατηγικό σχεδιασμό και στοχοθετημένη επιμόρφωση.

Στην προσπάθεια αντιμετώπισης αυτών των προκλήσεων, οι εκπαιδευτικοί ηγέτες υιοθετούν καινοτόμες προσεγγίσεις, όπως η λήψη αποφάσεων βάσει δεδομένων, που ενισχύει την αποτελεσματικότητα των εκπαιδευτικών παρεμβάσεων και των πολιτικών. Η προσαρμοστική και μετασχηματιστική ηγεσία προωθεί την ευελιξία, τη συλλογικότητα και τη δημιουργία διαφανούς, συνεργατικού εκπαιδευτικού περιβάλλοντος. Παράλληλα, εργαλεία όπως οι διαδικτυακές πλατφόρμες μάθησης και τα μικρο-πιστοποιητικά αξιοποιούνται για την ενίσχυση του ψηφιακού γραμματισμού των εκπαιδευτικών και την υποστήριξη της επαγγελματικής τους ανέλιξης.

Ιδιαίτερη έμφαση δίνεται σε μετασχηματιστικές πρακτικές, όπως η εξατομικευμένη μάθηση, η οποία αξιοποιεί την τεχνολογία για να προσαρμόσει το μαθησιακό περιεχόμενο στις ανάγκες και τα ενδιαφέροντα των μαθητών, ενισχύοντας τη συμμετοχή και την επίδοσή τους. Εξίσου σημαντική είναι η συνεργατική λήψη αποφάσεων, η οποία προωθεί τη συμμετοχή όλων των εμπλεκόμενων μερών —εκπαιδευτικών, μαθητών, γονέων— στη διαμόρφωση της στρατηγικής του σχολείου, ενδυναμώνοντας το αίσθημα εμπιστοσύνης και συνιδιοκτησίας. Η εργασία αναδεικνύει παραδείγματα εφαρμογής καινοτόμων προσεγγίσεων σε σχολικές μονάδες και εκπαιδευτικά δίκτυα, αναδεικνύοντας τη δυναμική των σύγχρονων μοντέλων ηγεσίας.

Συμπερασματικά, η εκπαιδευτική ηγεσία στην ψηφιακή εποχή απαιτεί επαναπροσδιορισμό στρατηγικών, ενίσχυση του επαγγελματισμού και υιοθέτηση μιας κουλτούρας συνεχούς μάθησης και προσαρμογής. Οι εκπαιδευτικοί ηγέτες καλούνται να ηγηθούν με όραμα, συνδυάζοντας τεχνογνωσία, συνεργασία και τεχνολογική ενσωμάτωση, προκειμένου να ανταποκριθούν στις απαιτήσεις της σύγχρονης εκπαίδευσης. Η εργασία προσφέρει ένα εννοιολογικό πλαίσιο και ένα σύνολο πρακτικών εργαλείων που συμβάλλουν στον επιστημονικό και επαγγελματικό διάλογο για την εκπαίδευση στην εποχή της ψηφιακής μετάβασης.

Λέξεις – κλειδιά: Ηγεσία στην Εκπαίδευση, Ψηφιακός Μετασχηματισμός, Διοίκηση Σχολικών Μονάδων, Εκπαιδευτική Καινοτομία, Λήψη Αποφάσεων βάσει Δεδομένων, Επαγγελματική Ανάπτυξη

ΕΚΠΑΙΔΕΥΤΙΚΗ ΨΗΦΙΟΠΟΙΗΣΗ : ΠΡΟΚΛΗΣΕΙΣ, ΕΥΚΑΙΡΙΕΣ ΚΑΙ Η ΣΗΜΑΣΙΑ ΤΗΣ ΓΙΑ ΤΟΝ ΕΚΣΥΓΧΡΟΝΙΣΜΟ ΚΑΙ ΤΗΝ ΙΣΟΤΗΤΑ ΣΤΗΝ ΕΚΠΑΙΔΕΥΤΙΚΗ ΔΙΑΔΙΚΑΣΙΑ

ΠΕΡΙΛΗΨΗ

Η παρούσα εργασία εξετάζει την ψηφιοποίηση στην εκπαίδευση, εστιάζοντας στην κατανόηση των βασικών εννοιών, της ιστορικής της εξέλιξης, των παγκόσμιων τάσεων, της σημασίας της και της εφαρμογής της στη δημόσια εκπαίδευση, όπως αποτυπώνεται στη σχετική διεθνή βιβλιογραφία. Στόχος της είναι να προσφέρει μια σφαιρική εικόνα για τις διάφορες διαστάσεις της ψηφιοποίησης στην εκπαίδευση, καθώς και για τις προκλήσεις και τις ευκαιρίες που προκύπτουν από τη χρήση τεχνολογιών στις εκπαιδευτικές διαδικασίες. Επιπλέον, σκοπός της είναι να αναδείξει τη σημασία της ψηφιοποίησης για τον εκσυγχρονισμό της εκπαίδευσης και την ενίσχυση των δεξιοτήτων των μαθητών, ενώ παράλληλα εξετάζει τις επιπτώσεις της στην ισότητα και την προσβασιμότητα στην εκπαίδευση.

Αρχικά, η εργασία εξετάζει τον ορισμό και το πεδίο εφαρμογής της ψηφιοποίησης στην εκπαίδευση. Ορισμένα από τα κύρια χαρακτηριστικά της ψηφιοποίησης περιλαμβάνουν την ενσωμάτωση ψηφιακών εργαλείων και πόρων, όπως οι ηλεκτρονικές πλατφόρμες, τα ψηφιακά βιβλία και οι διαδικτυακές πλατφόρμες μάθησης, που επιτρέπουν τη διδασκαλία και τη μάθηση σε διάφορα περιβάλλοντα και μορφές. Η ψηφιοποίηση εκτείνεται σε πολλές περιοχές, όπως η αποθήκευση και διανομή υλικού, η αλληλεπίδραση μεταξύ μαθητών και δασκάλων και η δυνατότητα προσαρμοσμένων μαθησιακών διαδρομών για τους μαθητές.

Η διαδικασία της ψηφιοποίησης ξεκίνησε με την εισαγωγή υπολογιστών στις σχολικές αίθουσες, ενώ σταδιακά εξελίχθηκε με τη χρήση διαδικτυακών εργαλείων και πλατφορμών. Σήμερα, η ψηφιοποίηση προάγει την ανάπτυξη νέων παιδαγωγικών μοντέλων, τα οποία συνδυάζουν τη διαδραστικότητα και την εξατομίκευση της μάθησης, επιτρέποντας στους μαθητές να αλληλεπιδρούν με το διδακτικό υλικό και να συμμετέχουν ενεργά στην εκπαιδευτική διαδικασία. Μέσω αυτών των εργαλείων, επιτυγχάνεται τόσο η καλύτερη οργάνωση και παρακολούθηση της εκπαιδευτικής πορείας, όσο και η εύρυθμη λειτουργία των σχολικών μονάδων.

Ένα καθοριστικό στοιχείο της εργασίας συνιστά η ανάλυση της ψηφιοποίησης στην εκπαίδευση, η οποία ενδυναμώνει τις δεξιότητες ψηφιακής παιδείας των μαθητών, προετοιμάζοντας τους για τις απαιτήσεις του 21ου αιώνα και τη σύγχρονη αγορά εργασίας. Η ανάπτυξη δεξιοτήτων, όπως η κριτική σκέψη, η δημιουργικότητα και η ικανότητα επίλυσης προβλημάτων, καθίσταται πλέον επιτακτική προκειμένου να εξασφαλιστεί η ομαλή ένταξη των μαθητών στην κοινωνία της πληροφορίας και της τεχνολογίας. Επιπλέον, η ψηφιοποίηση προσφέρει τη δυνατότητα αποτελεσματικής διαχείρισης του εκπαιδευτικού περιβάλλοντος, τόσο σε διοικητικό όσο και σε παιδαγωγικό επίπεδο, καθιστώντας τις εκπαιδευτικές διαδικασίες πιο αποδοτικές, ευέλικτες και προσαρμοσμένες στις σύγχρονες ανάγκες.

Η παρούσα εργασία ακολούθως εστιάζει στην ενίσχυση της ισότητας στην εκπαίδευση, διασφαλίζοντας την προσβασιμότητα των εκπαιδευτικών πόρων σε όλους τους μαθητές, ανεξαρτήτως κοινωνικοοικονομικής κατάστασης ή γεωγραφικής τοποθεσίας. Η πανδημία COVID-19 επέσπευσε τη διαδικασία αυτή, καθιστώντας τις ψηφιακές λύσεις απαραίτητες για την εξασφάλιση της αδιάλειπτης εκπαίδευσης υπό δύσκολες συνθήκες. Η αυξημένη εξάρτηση από τις ψηφιακές τεχνολογίες κατά την περίοδο της πανδημίας ανέδειξε τη θεμελιώδη σημασία τους για την προσαρμογή και την αποτελεσματικότητα του εκπαιδευτικού συστήματος σε καταστάσεις έκτακτης ανάγκης. Σήμερα, η ψηφιοποίηση αναγνωρίζεται ως κρίσιμο στοιχείο για τον εκσυγχρονισμό και την εξέλιξη της εκπαίδευσης, συμβάλλοντας στη μετατροπή της εκπαιδευτικής διαδικασίας στην εποχή του ψηφιακού μετασχηματισμού.

Λέξεις – κλειδιά: Ψηφιοποίηση, εκπαίδευση, εκσυγχρονισμός.

ΘΕΩΡΗΤΙΚΕΣ ΠΡΟΣΕΓΓΙΣΕΙΣ ΓΙΑ ΤΗΝ ΑΝΤΙΛΗΨΗ ΤΩΝ ΧΡΗΣΤΩΝ ΠΛΗΡΟΦΟΡΙΑΚΩΝ ΣΥΣΤΗΜΑΤΩΝ ΔΙΑΧΕΙΡΙΣΗΣ ΕΚΠΑΙΔΕΥΣΗΣ

Ντέντες Ηλίας

email: iliasde@hotmail.com

ΠΕΡΙΛΗΨΗ

Η παρούσα εργασία αποσκοπεί στην ανάλυση των θεωρητικών προσεγγίσεων που σχετίζονται με την αποδοχή και την υιοθέτηση νέων τεχνολογιών στον τομέα της εκπαίδευσης, με ιδιαίτερη αναφορά στα Πληροφοριακά Συστήματα Διαχείρισης Εκπαίδευσης. Ο κύριος σκοπός της είναι η διερεύνηση των παραμέτρων που επηρεάζουν τη χρήση αυτών των συστημάτων από τους χρήστες τους, όπως οι εκπαιδευτικοί, οι διευθυντές σχολείων και άλλοι αρμόδιοι εκπαιδευτικοί φορείς, καθώς και η ανάλυση των θεωρητικών εννοιών που σχετίζονται με τη χρήση τους, μέσω του Μοντέλου Αποδοχής Τεχνολογίας, της Ενοποιημένης Θεωρίας Αποδοχής και Χρήσης της Τεχνολογίας και της Θεωρίας Διάχυσης Καινοτομιών του Rogers.

Ο στόχος της εργασίας είναι η κατανόηση των παραμέτρων που επηρεάζουν την αποδοχή των Πληροφοριακών Συστημάτων Διαχείρισης Εκπαίδευσης από τους χρήστες τους, καθώς και η διερεύνηση των στρατηγικών που απαιτούνται για την ενίσχυση της αποτελεσματικότητας αυτών των συστημάτων στον εκπαιδευτικό τομέα. Η εργασία εστιάζει στην εξέταση της εφαρμογής των Πληροφοριακών Συστημάτων Διαχείρισης Εκπαίδευσης σε διάφορα εκπαιδευτικά περιβάλλοντα, αναλύοντας τις δυσκολίες και τις προκλήσεις που αντιμετωπίζουν οι χρήστες τους, καθώς και τις επιπτώσεις που αυτές οι προκλήσεις ενδέχεται να επιφέρουν στην υιοθέτηση και στην αποτελεσματικότητά τους.

Η μεθοδολογία που ακολουθείται αποσκοπεί στη διερεύνηση των θεωρητικών προσεγγίσεων και στην αξιολόγηση της εφαρμογής τους σε πρακτικό επίπεδο. Επιπλέον, η εργασία επιδιώκει να προσδιορίσει τα εμπόδια που αντιμετωπίζουν οι χρήστες κατά την εφαρμογή των Πληροφοριακών Συστημάτων Διαχείρισης Εκπαίδευσης και να αναλύσει στρατηγικές που θα μπορούσαν να ενισχύσουν την υιοθέτησή τους. Κεντρική θέση καταλαμβάνει η ανάγκη για αποτελεσματική υποστήριξη και εκπαίδευση των χρηστών των συστημάτων αυτών, καθώς και η βελτίωση των υποδομών που απαιτούνται για την επιτυχή εφαρμογή τους.

Η εργασία επικεντρώνεται στην ανάλυση των παραμέτρων που συνδέονται με τις θετικές ή αρνητικές επιπτώσεις των αντιλήψεων των χρηστών σχετικά με την ευχρηστία και τη χρησιμότητα των Πληροφοριακών Συστημάτων Διαχείρισης Εκπαίδευσης. Επίσης, εξετάζεται η σημασία της κοινωνικής επιρροής και των συνθηκών διευκόλυνσης για την αποδοχή αυτών των τεχνολογιών.

Η παρούσα έρευνα παρουσιάζει σημαντικά ευρήματα και προτάσεις για τη βελτίωση των Πληροφοριακών Συστημάτων Διαχείρισης Εκπαίδευσης, προκειμένου να ενισχυθεί η αποτελεσματικότητα και η ισότητα στον τομέα της εκπαίδευσης μέσω της χρήσης νέων τεχνολογιών.

Λέξεις – κλειδιά: Πληροφοριακά Συστήματα Διαχείρισης Εκπαίδευσης, μεθοδολογία, χρήστες.

ΟΙ ΣΤΑΣΕΙΣ ΚΑΙ ΟΙ ΑΝΤΙΛΗΨΕΙΣ ΤΩΝ ΣΤΕΛΕΧΩΝ ΠΡΩΤΟΒΑΘΜΙΑΣ ΚΑΙ ΔΕΥΤΕΡΟΒΑΘΜΙΑΣ ΕΚΠΑΙΔΕΥΣΗΣ ΣΤΟ ΕΛΛΗΝΙΚΟ ΕΚΠΑΙΔΕΥΤΙΚΟ ΣΥΣΤΗΜΑ, ΣΧΕΤΙΚΑ ΜΕ ΤΗ ΔΙΟΙΚΗΣΗ ΤΗΣ ΕΚΠΑΙΔΕΥΣΗΣ ΚΑΙ ΤΙΣ ΚΑΙΝΟΤΟΜΙΕΣ ΠΟΥ ΕΦΑΡΜΟΖΟΝΤΑΙ

Πασχοδήμας Γεώργιος
Εκπαιδευτικός Δευτεροβάθμιας Εκπαίδευσης
Πρέβεζα , Ελλάδα
email: g.paschodimas@yahoo.gr

ΠΕΡΙΛΗΨΗ

Η έρευνα αυτή υλοποιήθηκε για τις ανάγκες συγγραφής της Διπλωματικής Εργασίας του εκπαιδευτικού στο πλαίσιο ολοκλήρωσης του Μεταπτυχιακού Προγράμματος Σπουδών με τίτλο «Διοίκηση & Οργάνωση Εκπαιδευτικών Μονάδων» στο Διεθνές Πανεπιστήμιο της Ελλάδος που ολοκληρώθηκε τον Ιούνιο του 2024.

Η μελέτη παρουσιάζει σημαντικά ευρήματα σχετικά: με το προφίλ, τις αντιλήψεις των στελεχών-εκπαιδευτικών για την διοίκηση της εκπαίδευσης, τις ανάγκες και τις προκλήσεις που αντιμετωπίζουν, καθώς και τις προτεραιότητες για τη βελτίωση του εκπαιδευτικού συστήματος.

Για τις ανάγκες δημοσιοποίησης στοιχείων της έρευνας στο 1ο Διεθνές Επιστημονικό Συνέδριο Πρέβεζας με τίτλο**: «Ψηφιακά Μέσα στη Σύγχρονη Εκπαιδευτική Πραγματικότητα. Θέσεις, Αντιθέσεις, Προκλήσεις και Προοπτικές»** αναζητήθηκαν αποτελέσματα της μελέτης που πραγματεύονται την αξιολόγηση της χρήσης ψηφιακών μέσων ως καινοτόμων πρακτικών στην εκπαιδευτική διοίκηση, με στόχο την αναβάθμιση των διοικητικών διαδικασιών και τη βελτίωση της επικοινωνίας εντός του εκπαιδευτικού οργανισμού.

Στην μελέτη αυτή διερευνήθηκε, εκτός των άλλων, ο τρόπος με τον οποίο η ψηφιακή μετάβαση μπορεί να συμβάλει στη μείωση της γραφειοκρατίας, στην εξοικονόμηση χρόνου και πόρων, καθώς και στην ενίσχυση της διαφάνειας και της συλλογικής λήψης αποφάσεων. Για την υλοποίηση της έρευνας χρησιμοποιήθηκε ποσοτική μεθοδολογία, με τη συλλογή δεδομένων μέσω δομημένων ερωτηματολογίων που διανεμήθηκαν σε εκπαιδευτικούς και διοικητικά στελέχη από διάφορα επίπεδα του εκπαιδευτικού συστήματος. Το δείγμα επιλέχθηκε με σκοπιμότητα, ώστε να διασφαλιστεί η αντιπροσωπευτικότητα του πληθυσμού και να καταγραφούν διαφορετικές προοπτικές όσον αφορά τη χρήση των ψηφιακών μέσων στην καθημερινή διοικητική πρακτική. Η ανάλυση των δεδομένων πραγματοποιήθηκε με στατιστικές μεθόδους, επιτρέποντας την εξαγωγή συμπερασμάτων για τις επιδράσεις και τις προκλήσεις που συνοδεύουν την ενσωμάτωση της ψηφιακής τεχνολογίας.

Λέξεις – κλειδιά: ψηφιακά μέσα, εκπαιδευτική διοίκηση, καινοτομία, ψηφιακή μετάβαση, επαγγελματική κατάρτιση.

ΨΗΦΙΑΚΑ ΜΕΣΑ ΚΑΙ ΔΙΟΙΚΗΣΗ ΕΚΠΑΙΔΕΥΤΙΚΩΝ ΜΟΝΑΔΩΝ

Χαλβαντζής Βασίλειος, ΠΕ79.01
Διευθυντής Μουσικού Σχολείου Πρέβεζας
Πρέβεζα, Ελλάδα
email: billchalv@gmail.com

ΠΕΡΙΛΗΨΗ

Η ενσωμάτωση των ψηφιακών μέσων στη διαχείριση εκπαιδευτικών μονάδων έχει αλλάξει σημαντικά τον τρόπο λειτουργίας των σχολείων και των ακαδημαϊκών ιδρυμάτων. Με την ταχεία πρόοδο της τεχνολογίας, τα ψηφιακά εργαλεία έχουν γίνει απαραίτητα για τους διευθυντές σχολείων, τους δασκάλους και το διοικητικό προσωπικό, ενισχύοντας την επικοινωνία, τη λήψη αποφάσεων και τη συνολική αποτελεσματικότητα. Αυτή η εισήγηση διερευνά τον ρόλο των ψηφιακών μέσων στη διαχείριση εκπαιδευτικών μονάδων, επισημαίνοντας τα οφέλη, τις προκλήσεις και τις βέλτιστες πρακτικές για αποτελεσματική εφαρμογή.

Τα ψηφιακά μέσα περιλαμβάνουν ένα ευρύ φάσμα τεχνολογικών εργαλείων, όπως οι πλατφόρμες κοινωνικών μέσων, τα συστήματα διαχείρισης μάθησης (LMS), τα εργαλεία συνεργασίας που βασίζονται σε σύννεφο και το λογισμικό ανάλυσης δεδομένων. Πλατφόρμες όπως το Google Workspace for Education και το Microsoft 365 Education επιτρέπουν τη συνεργασία σε πραγματικό χρόνο, τη διαχείριση εγγράφων και την οργάνωση εργασιών, προσφέροντας μια ολοκληρωμένη λύση για τη διοίκηση των σχολικών μονάδων.

Ένα από τα βασικά πλεονεκτήματα των ψηφιακών μέσων στη διαχείριση του σχολείου είναι η ικανότητά τους να διευκολύνουν την άμεση και διαφανή επικοινωνία. Εφαρμογές όπως το Zoom, Microsoft Teams και Google Meet υποστηρίζουν διαδικτυακές συναντήσεις, διασφαλίζοντας την απρόσκοπτη αλληλεπίδραση μεταξύ σχολικού προσωπικού, μαθητών και γονέων. Επιπλέον, πλατφόρμες κοινωνικής δικτύωσης, όπως το Facebook, Twitter και LinkedIn, βοηθούν τα εκπαιδευτικά ιδρύματα να επικοινωνούν με τις κοινότητές τους, να μοιράζονται ενημερώσεις και να προωθούν τις δραστηριότητές τους.

Τα συστήματα διαχείρισης μάθησης (LMS), όπως το Moodle, Google Classroom και Blackboard, έχουν φέρει επανάσταση στη διαχείριση της εκπαίδευσης απλοποιώντας τη διαχείριση μαθημάτων, την παρακολούθηση και την κοινή χρήση πόρων. Οι εκπαιδευτικοί μπορούν να οργανώνουν σχέδια μαθημάτων, να διανέμουν εργασίες και να παρακολουθούν την πρόοδο των μαθητών μέσω αυτών των εργαλείων, καθιστώντας τη διαδικασία πιο διαφανή και αποδοτική.

Η ανάλυση δεδομένων παίζει καθοριστικό ρόλο στη σύγχρονη εκπαιδευτική διαχείριση. Εργαλεία όπως το Google Forms, Microsoft Forms και Power BI επιτρέπουν στους διαχειριστές να συλλέγουν και να αναλύουν δεδομένα που σχετίζονται με την απόδοση των μαθητών, τη συμμετοχή, την αποτελεσματικότητα των εκπαιδευτικών και την κατανομή των πόρων. Χρησιμοποιώντας προγνωστικά αναλυτικά στοιχεία, οι διευθυντές σχολείων μπορούν να εντοπίσουν τάσεις, να αντιμετωπίσουν προληπτικά προκλήσεις και να βελτιώσουν τα ακαδημαϊκά αποτελέσματα.

Επιπλέον, τα ψηφιακά μέσα υποστηρίζουν τη συμμετοχική διακυβέρνηση ενθαρρύνοντας τη συνεργασία μεταξύ εκπαιδευτικών, μαθητών και ενδιαφερόμενων μερών. Εργαλεία όπως το Slack, Trello και Asana προσφέρουν πλατφόρμες για αποτελεσματική διαχείριση έργων, συντονισμό εργασιών και βελτίωση της ομαδικής εργασίας.

Παρά τα πολυάριθμα πλεονεκτήματά τους, η υιοθέτηση των ψηφιακών μέσων στη διαχείριση εκπαιδευτικών μονάδων παρουσιάζει αρκετές προκλήσεις. Η ασφάλεια των δεδομένων και το απόρρητο αποτελούν σημαντικές ανησυχίες, γι' αυτό απαιτούνται λύσεις όπως τα GDPR Compliance Tools (OneTrust, TrustArc) για τη διαχείριση προσωπικών δεδομένων. Επιπλέον, το ψηφιακό χάσμα αποτελεί πρόβλημα, καθώς δεν έχουν όλα τα εκπαιδευτικά ιδρύματα ίση πρόσβαση σε τεχνολογικούς πόρους. Η αντίσταση στην αλλαγή μεταξύ των εκπαιδευτικών και των διαχειριστών μπορεί επίσης να εμποδίσει την επιτυχή εφαρμογή των ψηφιακών εργαλείων.

Η παροχή επαρκούς κατάρτισης και προγραμμάτων επαγγελματικής ανάπτυξης είναι ζωτικής σημασίας για να ξεπεραστούν αυτά τα εμπόδια. Επενδύοντας σε προγράμματα επιμόρφωσης και τεχνολογικές λύσεις, οι εκπαιδευτικές μονάδες μπορούν να αξιοποιήσουν πλήρως τα ψηφιακά μέσα, διασφαλίζοντας την αποτελεσματική και βιώσιμη ενσωμάτωσή τους στη σχολική διοίκηση.

Συμπερασματικά, τα ψηφιακά μέσα έχουν φέρει επανάσταση στη διαχείριση εκπαιδευτικών μονάδων βελτιώνοντας την επικοινωνία, ενισχύοντας τη λήψη αποφάσεων και εξορθολογίζοντας τα διοικητικά καθήκοντα. Ενώ εξακολουθούν να υπάρχουν προκλήσεις όπως η ασφάλεια των δεδομένων, το ψηφιακό χάσμα και η αντίσταση στην αλλαγή, η υιοθέτηση στρατηγικών πολιτικών και η επένδυση στην επαγγελματική ανάπτυξη μπορούν να εξασφαλίσουν την επιτυχή ενσωμάτωση των ψηφιακών εργαλείων στην εκπαίδευση. Καθώς η τεχνολογία συνεχίζει να εξελίσσεται, τα εκπαιδευτικά ιδρύματα πρέπει να αγκαλιάσουν τον ψηφιακό μετασχηματισμό για να δημιουργήσουν πιο αποτελεσματικά, περιεκτικά και προσαρμοστικά περιβάλλοντα μάθησης.

Λέξεις – κλειδιά: Ψηφιακά μέσα, διοίκηση εκπαιδευτικών μονάδων.

ΘΠ28: Επαγγελματική ανάπτυξη εκπαιδευτικών με την αξιοποίηση νέων τεχνολογιών

ΑΥΤΟΕΠΙΜΟΡΦΩΣΗ ΕΚΠΑΙΔΕΥΤΙΚΩΝ ΜΕ ΑΞΙΟΠΟΙΗΣΗ ΤΟΥ E- LEARNING - LAMAP ΣΤΟ ΓΑΛΛΙΚΟ ΕΚΠΑΙΔΕΥΤΙΚΟ ΣΥΣΤΗΜΑ

Γριβόπουλος Κωνσταντίνος
Φυσικός, Δρ. Διδακτικής Φυσικών Επιστημών
Γενικό Λύκειο Νεοχωρίου Δήμου Ι.Π. Μεσολογγίου
Μεσολόγγι, Ελλάδα
e-mail: kgrivop@gmail.com

ΠΕΡΙΛΗΨΗ

Για τις επιμορφωτικές ανάγκες των Γάλλων εκπαιδευτικών στη διδασκαλία των φυσικών επιστημών δημιουργήθηκε το ψηφιακό μέσο e-learning-Lamap. Οι διαχειριστές και οι επιμορφωτές της πλατφόρμας προσφέρουν σε νηπιαγωγούς, δασκάλους και καθηγητές Γυμνασίων μια σειρά ωριαίων βιντεοπαρουσιάσεων (tutoriels) για την εκμάθηση και εμπέδωση της επιστημονικής - διερευνητικής μεθόδου. Ωστόσο, σε αυτόν τον ψηφιακό πόρο προσεγγίζεται και θεματολογία ευρύτερου ενδιαφέροντος, προσαρμοσμένη στη σχολική βαθμίδα για την οποία κάθε χρήστης - εκπαιδευτικός ενδιαφέρεται. Ειδικότερα, η σελίδα για την ψηφιακή αυτοεπιμόρφωση « démarches d'investigation » συμβάλλει στην προετοιμασία των εκπαιδευτικών στη μαθητοκεντρική διδασκαλία των φυσικών επιστημών με εφαρμογή της διερευνητικής μεθόδου, εξοικειώνοντάς τους με τα επιμέρους στάδια αυτής. Οι χρήστες της πλατφόρμας έχουν τη δυνατότητα ελεύθερης πρόσβασης σε επιστημονικό και παιδαγωγικό υλικό. Επιπρόσθετα, αλληλεπιδρούν με συναδέλφους τους για ανταλλαγή εμπειριών, απόψεων, ιδεών κλπ., μέσα από προβλεπόμενα φόρουμ που οργανώνονται ανά θεματολογία. Έτσι, οι εκπαιδευτικοί καλλιεργούν εξ' αποστάσεως επαγγελματικές δεξιότητες σε χρόνο της δικής τους επιλογής και με τους προσωπικούς τους ρυθμούς.

Το κείμενο διαρθρώνεται ως εξής: η εισαγωγή ακολουθείται από τη διασάφηση των εννοιών αυτοεπιμόρφωση, κοινότητες μάθησης και επιστημονική - διερευνητική μέθοδος διδασκαλίας. Κατόπιν, παρουσιάζεται η αρχιτεκτονική της πλατφόρμας e - learning - Lamap και ο τρόπος λειτουργίας της στην αυτοεπιμόρφωση και διάδραση των εκπαιδευτικών.

Λέξεις-κλειδιά: Αυτοεπιμόρφωση, επιστημονική - διερευνητική μέθοδος διδασκαλίας, ψηφιακό μέσο e-learning-Lamap.

Η ΕΜΦΥΛΗ ΔΙΑΣΤΑΣΗ ΣΤΗΝ ΑΞΙΟΠΟΙΗΣΗ ΚΑΙ ΧΡΗΣΗ ΤΗΣ ΨΗΦΙΑΚΗΣ ΤΕΧΝΟΛΟΓΙΑΣ (ΑΠΟ ΤΟΥΣ/ΤΙΣ ΕΚΠΑΙΔΕΥΤΙΚΟΥΣ) ΣΤΗ ΔΕΥΤΕΡΟΒΑΘΜΙΑ ΕΚΠΑΙΔΕΥΣΗ

Ευσταθιάδου Άννα
Εκπαιδευτικός ΠΕ02 Φιλολόγων

Κοζάνη, Ελλάδα
email: annitaefkoz@gmail.com

ΠΕΡΙΛΗΨΗ

Από τη δεκαετία του 1980, δεκαετία κατά την οποία οι Νέες Τεχνολογίες κάνουν, σταδιακά, εμφανή την παρουσία τους σε πολλούς τομείς της ανθρώπινης δραστηριότητας- στην εργασία, στην εκπαίδευση, στην επιστήμη, στην πολιτική- έως και σήμερα, παρατηρούνται έμφυλες διαφορές στην πρόσβαση, χρήση αλλά και αξιοποίηση των Τεχνολογιών της Πληροφορίας. Η ποιοτική βελτίωση των εκπαιδευτικών συστημάτων, η ισότιμη παροχή ψηφιακών δεξιοτήτων, η αναδιαμόρφωση του εκπαιδευτικού συστήματος μέσω του ψηφιακού μετασχηματισμού αποτελεί στόχο στρατηγικής σημασίας για την Ευρωπαϊκή Ένωση και, φυσικά, για την Ελλάδα.

Σύγχρονες έρευνες δείχνουν ότι το φύλο, ως κοινωνική κατασκευή, εξακολουθεί να αποτελεί σημαντικό παράγοντα ανισότητας **και** στο πεδίο της ψηφιακής τεχνολογίας. Κι αυτό διότι στερεοτυπικές αντιλήψεις που αφορούν τη σχέση των φύλων με τις νέες τεχνολογίες αντανακλούν την πολύ διαδεδομένη άποψη ότι οι ψηφιακές δεξιότητες αποτελούν ανδρικό πεδίο δράσης περισσότερο παρά αντικείμενο ενασχόλησης και εξειδίκευσης των γυναικών. Οι ίδιοι οι εκπαιδευτικοί, τόσο οι άνδρες όσο και οι γυναίκες, θεωρούν τους μαθητές τους ικανότερους από τις μαθήτριες τους στη χρήση και αξιοποίηση των δυνατοτήτων της ψηφιακής τεχνολογίας. Οι γυναίκες εκπαιδευτικοί έχουν χαμηλότερες προσδοκίες και περιορισμένη εμπιστοσύνη στην ικανότητά τους να εντάξουν και να χρησιμοποιήσουν την ψηφιακή τεχνολογία στην καθημερινή διδακτική πρακτική.

Στην παρούσα εργασία επιχειρείται βιβλιογραφική επισκόπηση των έμφυλων διαφορών αναφορικά με το βαθμό αξιοποίησης και χρήσης της ψηφιακής τεχνολογίας από τους/τις εκπαιδευτικούς δευτεροβάθμιας εκπαίδευσης στην εκπαιδευτική διαδικασία κατά τις δύο, κυρίως, τελευταίες δεκαετίες, με την ολοκληρωτική «διείσδυση» και επικράτηση των ΤΠΕ σε όλους τους τομείς της ανθρώπινης δραστηριότητας και έκφρασης, ιδιαίτερα μάλιστα μετά την περίοδο της πανδημίας. Η επιδημική κρίση της νόσου COVID-19, είχε σοβαρές συνέπειες στην εκπαίδευση και την κατάρτιση και δημιούργησε νέα δεδομένα στην εκπαιδευτική πραγματικότητα.

Συγκεκριμένα εξετάζονται οι διαφορές φύλου ως προς τις στάσεις και τις αντιλήψεις των γυναικών εκπαιδευτικών απέναντι στην ολοένα αυξανόμενη χρήση της τεχνολογίας στην εκπαίδευση, την κατανόηση της αδήριτης ανάγκης απόκτησης ψηφιακών δεξιοτήτων για την πιο αποτελεσματική προσαρμογή στα σύγχρονα εκπαιδευτικά δεδομένα, τις ψηφιακές δεξιότητες που κατέχουν οι γυναίκες εκπαιδευτικοί συγκριτικά με τους άντρες συναδέλφους τους, τις γνώσεις τους για τα ψηφιακά εργαλεία (λογισμικά, πλατφόρμες, εφαρμογές), το βαθμό αξιοποίησης ενός ευρέως φάσματος ψηφιακών τεχνολογιών στη μαθησιακή διαδικασία και τυχόν αλλαγές που έχουν προκύψει με το πέρασμα των δεκαετιών.

Λέξεις κλειδιά: έμφυλες διαφορές, ψηφιακή τεχνολογία, εκπαιδευτικοί δευτεροβάθμιας εκπαίδευσης, ψηφιακές δεξιότητες, ψηφιακός γραμματισμός

Η ΕΠΑΓΓΕΛΜΑΤΙΚΗ ΚΑΙ ΕΠΙΣΤΗΜΟΝΙΚΗ ΑΝΑΒΑΘΜΙΣΗ ΤΩΝ ΕΚΠΑΙΔΕΥΤΙΚΩΝ ΩΣ ΚΡΙΣΙΜΗ ΔΙΑΣΤΑΣΗ ΚΑΙ ΠΡΟΟΠΤΙΚΗ ΤΩΝ ΔΥΝΑΤΟΤΗΤΩΝ ΤΗΣ ΤΕΧΝΗΤΗΣ ΝΟΗΜΟΣΥΝΗΣ

ΠΕΡΙΛΗΨΗ

Η επιμόρφωση των εκπαιδευτικών αποτελεί κλειδί για την ουσιαστική αναβάθμιση της ποιότητας της εκπαίδευσης. Ένας επιμορφωμένος εκπαιδευτικός μπορεί να βελτιώσει σημαντικά τις παιδαγωγικές και διδακτικές του δεξιότητες, να αυξήσει την επιστημονική αυτογνωσία του, την επαγγελματική του αυτοπεποίθηση και τον ενθουσιασμό του, ώστε να δημιουργήσει τις συνθήκες εκείνες που θα του επιτρέψουν να ανταποκρίνεται πληρέστερα και επιτυχέστερα στην ποικιλομορφία και την ετερογένεια των αναγκών των μαθητών του. Η συνεχής επιστημονική και επαγγελματική αναβάθμιση των εκπαιδευτικών θεωρείται απαραίτητη όχι μόνο για τους νέους αλλά και για τους έμπειρους εκπαιδευτικούς, αφού πέραν των άλλων ενισχύει και το πάθος τους αλλά και την αποτελεσματικότητα του πολυδύναμου και πολυσύνθετου ρόλου τους. Μολονότι έχουν παρατηρηθεί δυσκολίες στην αλλαγή των διδακτικών πρακτικών και των πεποιθήσεων των εκπαιδευτικών, είναι αναγνωρισμένη η αξία στοχευμένων προγραμμάτων επιμόρφωσης υπό την προϋπόθεση, βέβαια, ότι αυτά θα γεφυρώνουν το χάσμα μεταξύ της θεωρίας και της πράξης, όπως ήδη είχε επισημάνει, από το 1914, ο μεγάλος John Dewey.

Στη σημερινή ψηφιακή εποχή, η επιμόρφωση των εκπαιδευτικών είναι περισσότερο αναγκαία από ποτέ, καθώς πέραν της ενίσχυσης και του βέλτιστου μετασχηματισμού των διαδικασιών, των μεγεθών και των διαστάσεων της διδασκαλίας και της μάθησης, μπορεί να αναδείξει και να προσφέρει νέες παιδαγωγικές δεξιότητες στους μάχιμους εκπαιδευτικούς, απαραίτητες για τη δημιουργία αλληλεπιδραστικών και εποικοδομιστικών περιβαλλόντων μάθησης τα οποία θα ανταποκρίνονται στις σύγχρονες κοινωνικοοικονομικές και τεχνολογικές συνθήκες. Προς αυτή την προκλητική σύγχρονη εκπαιδευτική απαίτηση, η αξιοποίηση της Τεχνητής Νοημοσύνης (ΤΝ) στην επιμόρφωση των εκπαιδευτικών προβάλλει ως μία εκ των ων ουκ άνευ ψηφιακή διαμεσολάβηση, καθώς μπορεί να προσφέρει καινοτόμες και ριζοσπαστικές δυνατότητες υποστήριξης της επαγγελματικής και επιστημονικής αναβάθμισής τους. Η ΤΝ μπορεί να παρέχει πλούσιες ευκαιρίες μικρομάθησης και δια βίου μάθησης στους εκπαιδευτικούς, να αναλύει πληθώρα εκπαιδευτικών δεδομένων, να προτείνει στοχευμένες διδακτικές και παιδαγωγικές παρεμβάσεις, να δημιουργεί εξατομικευμένα και διαφοροποιημένα σχέδια διδασκαλίας αλλά και ρεαλιστικά σενάρια, όπως και να παρέχει συνεχή και αντικειμενική ανατροφοδότηση. Η ΤΝ, από τώρα και στο εξής, θα διεκδικεί σημαντικό ρόλο και μερίδιο στην οικοδόμηση ενός αποτελεσματικού μοντέλου επιμόρφωσης, το οποίο θα είναι ικανό να υποστηρίζει τον εκπαιδευτικό στον απαιτητικό και πληθωρικό ρόλο του, ώστε, τελικά, να ενισχύεται η συνολική ποιότητα του εκπαιδευτικού έργου, αλλά και να παγιώνεται το θετικό αποτύπωμα της μαθησιακής εμπειρίας των μαθητών.

Προς την κατεύθυνση αυτή, η παρούσα εργασία θα παρουσιάσει πρακτικές εφαρμογές της ΤΝ, οι οποίες μπορούν να υποστηρίξουν την επαγγελματική και επιστημονική ανάπτυξη των εκπαιδευτικών και να συμβάλουν σημαντικά στην αναμόρφωση της εκπαιδευτικής διαδικασίας, καθώς και στη διαρκώς επιζητούμενη βελτίωση της ποιότητας της εκπαίδευσης.

Λέξεις – κλειδιά: Τεχνητή Νοημοσύνη, επιμόρφωση, αναβάθμιση, εκπαιδευτικός

ΨΗΦΙΑΚΗ ΕΠΙΜΟΡΦΩΣΗ & ΕΚΠΑΙΔΕΥΣΗ: Ο ΕΚΠΑΙΔΕΥΤΙΚΟΣ ΣΤΗΝ ΕΠΟΧΗ ΤΗΣ ΤΕΧΝΟΛΟΓΙΑΣ

ΠΕΡΙΛΗΨΗ

Η επαγγελματική ανάπτυξη των εκπαιδευτικών αποτελεί αναπόσπαστο στοιχείο της ποιοτικής εκπαίδευσης, ενώ οι ραγδαίες τεχνολογικές εξελίξεις δημιουργούν νέες δυνατότητες και προκλήσεις. Η παρούσα εργασία εξετάζει τη συμβολή της ψηφιακής επιμόρφωσης στην ενίσχυση της διδακτικής πρακτικής των εκπαιδευτικών, μέσα από τη χρήση καινοτόμων εργαλείων, όπως η εξ αποστάσεως εκπαίδευση, οι διαδικτυακές πλατφόρμες επιμόρφωσης, οι κοινότητες πρακτικής και η τεχνητή νοημοσύνη. Η ανάλυση βασίζεται σε βιβλιογραφική επισκόπηση και παρουσίαση επιλεγμένων παραδειγμάτων εφαρμογής από την ευρωπαϊκή και κυπριακή εκπαιδευτική πραγματικότητα.

Λέξεις-κλειδιά: Ψηφιακή επιμόρφωση, εκπαιδευτικοί, εξ αποστάσεως εκπαίδευση, τεχνητή νοημοσύνη, επαγγελματική ανάπτυξη.

ΑΝΤΙΛΗΨΕΙΣ ΚΑΙ ΑΠΟΨΕΙΣ ΕΝ ΔΥΝΑΜΕΙ ΛΟΓΟΘΕΡΑΠΕΥΤΩΝ ΓΙΑ ΤΗΝ ΧΡΗΣΗ ΤΗΣ ΤΕΧΝΟΛΟΓΙΑΣ ΤΗΣ ΟΦΘΑΛΜΟΚΙΝΗΣΗΣ ΣΤΙΣ ΔΕΞΙΟΤΗΤΕΣ ΑΝΑΓΝΩΣΗΣ

ΠΕΡΙΛΗΨΗ

Η παρούσα μελέτη διερευνά τη χρήση της τεχνολογίας οφθαλμοκίνησης (eye-tracking) για τη διάγνωση και την παρέμβαση σε αναγνωστικές δυσκολίες, εστιάζοντας στις αντιλήψεις των φοιτητών/τριών του Τμήματος Λογοθεραπείας του Πανεπιστημίου Ιωαννίνων. Σκοπός της έρευνας είναι να καταγράψει σε ποιον βαθμό οι φοιτητές/τριες αντιλαμβάνονται τα οφέλη αυτής της τεχνολογίας, ποια είναι η στάση τους ως προς την ενσωμάτωσή της στην κλινική πράξη της Λογοθεραπείας και ποιες δυσκολίες ενδέχεται να συναντήσουν κατά την εφαρμογή της. Το δείγμα της έρευνας αποτελείται από 49 προπτυχιακούς φοιτητές/τριες (Α:5, Γ:44) που επέλεξαν να συμμετέχουν απαντώντας σε ανώνυμο ερωτηματολόγιο. Τα αποτελέσματα υποδεικνύουν ότι οι φοιτητές αναγνωρίζουν τη σημαντική συμβολή της τεχνολογίας στην ενίσχυση της διαγνωστικής ακρίβειας και στην ανάπτυξη εξατομικευμένων θεραπευτικών παρεμβάσεων. Ωστόσο, εντοπίζονται προκλήσεις όπως το υψηλό κόστος εξοπλισμού, η ανάγκη εξειδικευμένης εκπαίδευσης και η δυσκολία ενσωμάτωσης της τεχνολογίας σε καθιερωμένες παρεμβατικές πρακτικές. Προτείνεται από τους εν δυνάμει λογοθεραπευτές η μελλοντική έρευνα να εστιάσει στη διερεύνηση της ένταξης της τεχνολογίας οφθαλμοκίνησης στην εκπαίδευση Λογοθεραπευτών ή/και άλλων συναφών ειδικοτήτων, με στόχο την ενίσχυση των κλινικών δεξιοτήτων των μελλοντικών επαγγελματιών αλλά και την αποτελεσματική αξιοποίησή της στην πρώιμη ανίχνευση και παρέμβαση σε δυσκολίες που επηρεάζουν τη δεξιότητα της ανάγνωσης.

Λέξεις-κλειδιά: Τεχνολογία οφθαλμοκίνησης, αξιολόγηση αναγνωστικών δυσκολιών, παρακολούθηση οφθαλμικών κινήσεων, διάγνωση και παρέμβαση, λογοθεραπεία και τεχνολογία.

ΠΕΡΙΛΗΨΗ

Η παρούσα εργασία ερευνά την εφαρμογή της τεχνικής Stop Motion ως εργαλείο για τη δημιουργία εκπαιδευτικού υλικού, παρουσιάζοντας τη συμβολή του στην ενεργητική μάθηση και στην ανάπτυξη γνωστικών, κοινωνικών και τεχνικών δεξιοτήτων. Το Stop Motion ενδείκνυται για παιδαγωγικές εφαρμογές, που προάγουν τη βιωματική και δημιουργική μάθηση, ενισχύοντας την προσωπική έκφραση, τη συνεργασία και την αφηγηματική ικανότητα των μαθητών. Μέσω της χρήσης φυσικών υλικών εργαλείων και τεχνολογικών μέσων, οι μαθητές αποκτούν εμπειρική επαφή με τη μάθηση, αναλαμβάνουν ρόλους δημιουργών και αφηγητών, και μαθαίνουν πώς να οργανώνουν και να υλοποιούν σύνθετα έργα με παιδαγωγικό περιεχόμενο.

Η εργασία εξετάζει τόσο τη θεωρητική θεμελίωση της μεθόδου, όσο και την εφαρμογή της. Επιπλέον, παρουσιάζονται τα οφέλη και οι προκλήσεις που σχετίζονται με την ενσωμάτωση του Stop Motion στην τάξη, καθώς και προτάσεις για την αποτελεσματική αξιοποίησή του από τους εκπαιδευτικούς. Τέλος, τονίζεται η διαθεματική και συμπεριληπτική δυναμική της τεχνικής, που επιτρέπει την προσαρμογή της στις ανάγκες των μαθητών, προάγοντας την παιδαγωγική καινοτομία και την ενεργή συμμετοχή όλων. Η προσέγγιση αυτή αντανακλά τις σύγχρονες διδακτικές προσεγγίσεις, όπου ο μαθητής τοποθετείται στο επίκεντρο της μαθησιακής διαδικασίας και η τεχνολογία λειτουργεί υποστηρικτικά προς την ανάπτυξη της δημιουργικότητας και της συνεργατικής κουλτούρας.

Λέξεις – κλειδιά: stop motion, εκπαιδευτικό υλικό, ψηφιακή αφήγηση, βιωματική μάθηση, δημιουργικότητα, συνεργατική μάθηση, τεχνολογία στην εκπαίδευση, πρωτοτυποποίηση, project-based learning (PBL), συμπερίληψη, συναισθηματική ενδυνάμωση

ΕΙΣΑΓΩΓΗ

Η δυναμική της σύγχρονης εκπαίδευσης δεν ορίζεται πλέον από την απλή μετάδοση γνώσεων από τον δάσκαλο στον μαθητή, αλλά από την ικανότητά της να ενεργοποιεί τη δημιουργικότητα, την κριτική σκέψη και την ενεργή συμμετοχή του μαθητή στην διαδικασία της γνώσης. Οι σημερινοί μαθητές δεν είναι πλέον παθητικοί δέκτες, αλλά αναμένεται να είναι ενεργοί ερευνητές και δημιουργοί στο πλαίσιο ενός πιο ανοικτού και συμμετοχικού σχολείου. Η ένταξη πολυμέσων και ψηφιακών τεχνολογιών στις καθημερινές διδακτικές πρακτικές έχει διαμορφώσει ένα νέο μαθησιακό περιβάλλον, όπου η καινοτομία, η αναπαράσταση της γνώσης με πολλαπλούς τρόπους και η συναισθηματική εμπλοκή του μαθητή κατέχουν κυρίαρχη θέση.

Μέσα σε αυτό το πλαίσιο, η τεχνική του Stop Motion προσφέρει μια ευκαιρία για την ανάδειξη της δημιουργικότητας των μαθητών και την ενίσχυση της βιωματικής μάθησης. Το Stop Motion βασίζεται στη λήψη διαδοχικών φωτογραφιών αντικειμένων, φιγούρων ή σχεδίων που μετακινούνται σταδιακά. Όταν οι εικόνες αυτές προβάλλονται σε γρήγορη ταχύτητα, παράγεται η ψευδαίσθηση της κίνησης, δίνοντας ζωή σε στατικά αντικείμενα. Πέρα από το αισθητικό και τεχνικό του ενδιαφέρον, το Stop Motion λειτουργεί ως παιδαγωγικό εργαλείο, καθώς επιτρέπει στους μαθητές να εκφράσουν ιδέες, να αφηγηθούν ιστορίες και να αναπαραστήσουν αφηρημένες έννοιες μέσω οπτικοακουστικών τρόπων.

Η δημιουργία τέτοιων έργων ενισχύει τη μάθηση με τρόπο βιωματικό και δημιουργικό. Η παιδαγωγική σημασία του Stop Motion δεν περιορίζεται στην τελική παραγωγή ενός βίντεο, αλλά εστιάζει στη διαδικασία: από τον σχεδιασμό και τη συνεργασία μέχρι την επίλυση προβλημάτων, την αφήγηση και την τεχνολογική δεξιότητα. Αποτελεί δηλαδή ένα πολυτροπικό και διαθεματικό εργαλείο που ενδυναμώνει τον μαθητή, επιτρέποντάς του να εμπλακεί πλήρως με το περιεχόμενο του μαθήματος, να δημιουργήσει και να στοχαστεί.

Η εργασία που ακολουθεί εξετάζει διεξοδικά τη χρήση του Stop Motion ως εκπαιδευτικού εργαλείου. Αρχικά, παρατίθεται το θεωρητικό υπόβαθρο που το καθιστά παιδαγωγικά έγκυρο. Στη συνέχεια, αναλύονται η μεθοδολογία εφαρμογής στην τάξη, παραδείγματα από εκπαιδευτικά σενάρια και η εμπειρική τεκμηρίωση των αποτελεσμάτων. Τέλος, συζητούνται οι προκλήσεις και οι περιορισμοί, ενώ προτείνονται τρόποι για την ενίσχυση της εφαρμογής του στην ελληνική και διεθνή εκπαιδευτική πραγματικότητα.

ΘΕΩΡΗΤΙΚΟ ΠΛΑΙΣΙΟ

Η αποτελεσματική ενσωμάτωση ενός εργαλείου στην εκπαιδευτική διαδικασία δεν είναι ζήτημα τεχνικής επιλογής, αλλά παιδαγωγικής τεκμηρίωσης. Η θεωρία της μάθησης αποτελεί την βάση για την αξιολόγηση της παιδαγωγικής αξίας του Stop Motion. Στην περίπτωση αυτή, το εργαλείο αυτό δεν επιτελεί απλώς αισθητική ή τεχνολογική λειτουργία, αλλά ανταποκρίνεται σε ουσιώδεις παιδαγωγικές αρχές που προέρχονται από διαφορετικά θεωρητικά ρεύματα.

Η κατασκευαστική θεωρία της μάθησης, όπως αυτή θεμελιώθηκε από τον Jean Piaget, δίνει έμφαση στην ενεργητική οικοδόμηση της γνώσης από το ίδιο το υποκείμενο. Ο μαθητής δεν απομνημονεύει, αλλά αλληλεπιδρά με το περιβάλλον, διερευνά, κάνει υποθέσεις και κατασκευάζει τη γνώση του. Η δημιουργία ενός stop motion έργου αποτελεί ακριβώς μια τέτοια διαδικασία: ο μαθητής καλείται να οργανώσει πληροφορίες, να επιλέξει αναπαραστατικά μέσα, να διαμορφώσει αφηγηματική δομή και να εφαρμόσει τεχνικές υλοποίησης. Η ίδια η δημιουργική διαδικασία είναι η μάθηση (Jean Piaget, 1952).

Σύμφωνα με τον Vygotsky, η μάθηση είναι κοινωνική και οικοδομείται στο πλαίσιο της «ζώνης επικείμενης ανάπτυξης», εκεί όπου ο μαθητής υποστηρίζεται από άλλους, συχνά πιο έμπειρους, μέσα σε περιβάλλοντα συνεργασίας. Το Stop Motion ως ομαδική δραστηριότητα επιτρέπει στους μαθητές να συνεργαστούν, να μοιραστούν ρόλους (σκηνοθέτης, φωτογράφος, αφηγητής, δημιουργός αντικειμένων), να αλληλεπιδράσουν δημιουργικά και να επιλύσουν προβλήματα συλλογικά. Η ενσωμάτωση της γλώσσας τόσο προφορικής όσο και γραπτής στην αφήγηση, ενισχύει επιπλέον την ανάπτυξη της μεταγλωσσικής επίγνωσης και της επικοινωνιακής ικανότητας . (Vygotsky, L. S., 1978).

Ο Papert υποστήριξε με την θεωρία Constructionism ότιι μαθητές μαθαίνουν καλύτερα όταν κατασκευάζουν κάτι που έχει προσωπικό νόημα για εκείνους και είναι κοινωνικά επικοινωνίσιμο — όπως ένα ψηφιακό αντικείμενο, μια ιστορία, ένα πρόγραμμα. Το Stop Motion ενσωματώνει αυτή τη λογική, αφού κάθε παραγόμενο βίντεο αποτελεί υλοποίηση ενός γνωστικού ή αφηγηματικού στόχου μέσω υλικών και τεχνολογικών μέσων. Εδώ, ο υπολογιστής ή η συσκευή δεν αποτελεί το κέντρο της διδασκαλίας, αλλά τον «συνεργάτη» στην κατασκευή της γνώσης (Papert, S., 1980).

Τέλος, η θεωρία των multiliteracies (New London Group, 1996) εισάγει μια πιο σύγχρονη διάσταση: τη δυνατότητα του μαθητή να διαχειρίζεται και να εκφράζεται μέσα από ποικίλα μέσα και μορφές αναπαράστασης. Στη σύγχρονη κοινωνία, η γλωσσική ικανότητα δεν είναι μόνο λεκτική ή γραπτή, αλλά και οπτική, ψηφιακή, χωρική. Το stop motion επιτρέπει ακριβώς αυτή τη δυνατότητα: ενσωματώνει λόγο, εικόνα, ήχο και κίνηση, επιτρέποντας στους μαθητές να αναπτύξουν δεξιότητες πολυτροπικού εγγραμματισμού και να εκφραστούν με τρόπο αυθεντικό και σύνθετο (New London Group, 1996).

ΜΕΘΟΔΟΛΟΓΙΑ

Η παρούσα εργασία ακολουθεί μια θεωρητικο-πρακτική μεθοδολογική προσέγγιση, με σκοπό να διερευνήσει και να αναδείξει τις δυνατότητες του Stop Motion ως εργαλείου σχεδιασμού εκπαιδευτικού υλικού. Δεν βασίζεται σε ποσοτική ή ποιοτική έρευνα με δείγμα μαθητών, αλλά σε κριτική ανάλυση του παιδαγωγικού πλαισίου της τεχνικής και παρουσίαση της διαδικασίας παραγωγής υλικού στο πλαίσιο ενός εκπαιδευτικού σχεδιασμού.

Η προσέγγιση οργανώνεται γύρω από τη μελέτη της τεχνικής του Stop Motion ως σχεδιαστικού εργαλείου για την παραγωγή σύντομων οπτικοακουστικών βίντεο που μπορούν να χρησιμοποιηθούν στην εκπαιδευτική πράξη. Η μεθοδολογία περιλαμβάνει την ανάλυση των χαρακτηριστικών της τεχνικής, τα στάδια παραγωγής, τις τεχνολογικές απαιτήσεις και τις παιδαγωγικές δυνατότητες, όπως αναδεικνύονται μέσα από θεωρητικά πρότυπα και παραδείγματα χρήσης.

Η εργασία βασίστηκε στην αξιοποίηση υλικών χαμηλού κόστους για την παραγωγή πειραματικού υλικού, χωρίς τη συμμετοχή μαθητών. Συγκεκριμένα, κατασκευάστηκε ένα δείγμα βίντεο με την τεχνική του Stop Motion, με στόχο να αναδειχθούν οι τεχνικές, χρονικές και δημιουργικές απαιτήσεις του μέσου. Η παραγωγή αυτή λειτούργησε ως εφαρμοσμένο παράδειγμα για τη διερεύνηση της μεθοδολογίας, των εργαλείων και της εν δυνάμει εκπαιδευτικής αξιοποίησης της τεχνικής.

Συνοπτικά, η μεθοδολογία οργανώνεται ως εξής:

1. Θεωρητική διερεύνηση του Stop Motion ως εργαλείου ψηφιακής αφήγησης.
2. Καταγραφή της τεχνικής διαδικασίας παραγωγής (σχεδιασμός, κατασκευή υλικών, φωτογράφιση, ψηφιακή επεξεργασία).
3. Παραγωγή ενδεικτικού βίντεο που τεκμηριώνει τη διαδικασία (Εικόνα 1).
4. Σχολιασμός των ευρημάτων, προβληματισμών και δυνατοτήτων που προέκυψαν από την πρακτική υλοποίηση.

Εικόνα 1.
Αυτοσχέδιο studio παραγωγής Stop Motion

Η εργασία αποσκοπεί όχι στην εμπειρική αποτίμηση της αποτελεσματικότητας της τεχνικής στη μαθησιακή επίδοση, αλλά στην τεκμηρίωση των μεθοδολογικών βημάτων που απαιτούνται για την αξιοποίησή της από τον εκπαιδευτικό, καθώς και στην ανάδειξη της παιδαγωγικής δυναμικής της.

Εφαρμογή παραδείγματος

- Στόχος: Η παρουσίαση μιας απλής ιστορίας που θέλει να περάσει ένα μήνυμα. Έτσι, δημιουργήθηκαν 4 θεματικά δωμάτια, με σκοπό να παρουσιαστεί η καθημερινή ζωή ενός ανθρώπου που αλληλοεπιδρά με τα έπιπλα.
- Μελέτη: Σε αυτό το στάδιο ερευνήθηκαν τα υλικά, τα εργαλεία και η διαστασιολόγιση
- Υλοποίηση: Για την δημιουργία των δωματίων, οι χώροι και τα έπιπλα κατασκευάστηκαν εξ ολοκλήρου στο χέρι. Με την χρήση μια έτοιμης μαριονέτας, ενός smartphone και της εφαρμογής STOP MOTION™ APP, ενός τρίποδα και ενός προβολέα πραγματοποιήθηκε η φωτογράφιση.
- Ολοκλήρωση: Με την βοήθεια της εφαρμογής που καταγράφηκαν τα στιγμιότυπα δημιουργήθηκαν τα τελικά βίντεο.
- Αποτέλεσμα: Ένας «άνθρωπος» κινείται μέσα στον χώρο και χρησιμοποιεί τα έπιπλα. Ο στόχος επιτεύχθηκε (Εικόνα 2).

Εικόνα 2.
Φωτογραφίες από την παραγωγή Stop Motion

ΠΑΙΔΑΓΩΓΙΚΗ ΕΦΑΡΜΟΓΗ ΣΤΗΝ ΕΚΠΑΙΔΕΥΣΗ

Η ενσωμάτωση του Stop Motion στην εκπαιδευτική διαδικασία προσφέρει δυνατότητες όχι μόνο αισθητικής έκφρασης, αλλά και ουσιαστικής ενδυνάμωσης της μάθησης. Πρόκειται για ένα εργαλείο που επιτρέπει τις μαθητές, να γίνουν αφηγητές, σκηνοθέτες και ερευνητές, ενισχύοντας την αυτενέργεια και την αυτορρύθμιση. Η εκπαιδευτική χρήση του Stop Motion υπερβαίνει τα όρια του τεχνολογικού εργαλείου και μετατρέπεται σε μέσο πολυτροπικής έκφρασης, οργάνωσης νοήματος και μετασχηματισμού τις γνώσης (Robin, B., 2008).

Καθώς η δημιουργία του βίντεο Stop Motion απαιτεί συνεργασία, σχεδιασμό, κατασκευή, αφήγηση, τεχνική δεξιότητα και στοχαστική παρουσίαση, αποτελεί μια σύνθετη διαδικασία που εντάσσεται σε μοντέλα ενεργούς μάθησης. Η διαδικασία αυτή συνδέεται άμεσα με το project-based learning (PLB), τις δημιουργικές δραστηριότητες STEAM (Science Technology Engineering Art Mathematics), τις βιωματικές στρατηγικές και τις πρακτικές διαφοροποιημένης διδασκαλίας (Thomas, L., & Knezek, G., 2015 & Van Joolingen, W., et al., 2020).

Η υλοποίηση μπορεί να προσαρμοστεί σε διαφορετικές ηλικίες και γνωστικά αντικείμενα, αναδεικνύοντας τη διαθεματική φύση του εργαλείου. Στην πρωτοβάθμια εκπαίδευση, η τεχνική μπορεί να ενσωματωθεί σε γλωσσικά μαθήματα για τη δημιουργία παραμυθιών, σε φυσικές επιστήμες για την απεικόνιση φυσικών φαινομένων, και στα μαθηματικά για την οπτικοποίηση γεωμετρικών εννοιών. Στη δευτεροβάθμια εκπαίδευση, το Stop Motion μπορεί να λειτουργήσει ως εργαλείο για την παρουσίαση ιστορικών γεγονότων, τη μοντελοποίηση βιολογικών διαδικασιών, ή ακόμη και για τη δημιουργία εκπαιδευτικών βίντεο ευαισθητοποίησης (Wishart, J. 2017).

ΣΥΝΑΙΣΘΗΜΑΤΙΚΗ ΚΑΙ ΨΥΧΟΠΑΙΔΑΓΩΓΙΚΗ ΔΙΑΣΤΑΣΗ

Η δημιουργία ενός Stop Motion έργου προσφέρει πολύ περισσότερα από την κατανόηση ενός σχολικού περιεχομένου. Ενεργοποιεί τη φαντασία, ενισχύει την αυτοεκτίμηση και παράγει μια ισχυρή αίσθηση συμμετοχής και ιδιοκτησίας της γνώσης. Οι μαθητές βιώνουν ένα αποτέλεσμα που τους ανήκει, το οποίο δημιούργησαν από το μηδέν και μπορούν να το μοιραστούν με την κοινότητα (Robin B, 2008 & Thomas, L., & Knezek, G., 2015).

Ιδιαίτερα σημαντική είναι η συμβολή του Stop Motion στη εκφραστική ανάπτυξη. Οι μαθητές που δυσκολεύονται στη λεκτική έκφραση, βρίσκουν στο μέσο αυτό μια δίοδο εξωλεκτικής επικοινωνίας. Το γεγονός ότι το τελικό έργο παράγεται σε ομάδα ενισχύει τις κοινωνικές δεξιότητες, την ανοχή στη διαφορετικότητα και την αποδοχή (Jitsupa N. et al., 2012 & Robin B, 2008) . Η οπτικοποίηση μέσω εικόνας και ήχου ενισχύει την ενσυναίσθηση, ιδιαίτερα όταν τα θέματα αφορούν κοινωνικά ζητήματα όπως η φιλία, ο ρατσισμός ή ο σχολικός εκφοβισμός (Robin, B., 2008) .

ΑΠΟΤΕΛΕΣΜΑΤΑ ΚΑΙ ΟΦΕΛΗ

Ερευνητικές εργασίες καταδεικνύουν ότι η χρήση του Stop Motion αυξάνει την εμπλοκή των μαθητών, ιδιαίτερα όσων δυσκολεύονται με παραδοσιακές μορφές μάθησης. Η χρήση της τεχνικής αναπτύσσει την επιμονή, την υπευθυνότητα, την οργανωτική σκέψη και την ακρίβεια. Παράλληλα, διευκολύνει τη μεταγνωστική λειτουργία, αφού οι μαθητές είναι υποχρεωμένοι να σχεδιάσουν, να αξιολογήσουν και να αναπροσαρμόσουν τις δημιουργίες τους μέσα από συνεχείς κύκλους αναστοχασμού (Thomas & Knezek, 2015).

Η μαθησιακή πρόοδος δεν εκδηλώνεται μόνο στο περιεχόμενο, αλλά και στις δεξιότητες διαδικασίας: η κατανόηση πώς κάτι γίνεται, πώς σχεδιάζεται, πώς τεκμηριώνεται. Αυτά τα χαρακτηριστικά συνάδουν με τις αρχές της εκπαίδευσης για τη βιώσιμη ανάπτυξη και της μάθησης μέσω σχεδιασμού (Design-Based Learning - DBL), ενισχύοντας την ικανότητα για ανάληψη πρωτοβουλιών.

ΠΡΟΚΛΗΣΕΙΣ ΚΑΙ ΠΕΡΙΟΡΙΣΜΟΙ

Παρά τα οφέλη, η εφαρμογή του Stop Motion ενέχει δυσκολίες. Ο πρώτος και προφανής περιορισμός είναι η απαίτηση χρόνου. Η δημιουργία ενός λεπτού Stop Motion βίντεο μπορεί να απαιτεί αρκετές ώρες εργασίας. Αυτό καθιστά αναγκαίο τον επανασχεδιασμό του χρόνου εντός της τάξης και την ενσωμάτωση του project σε μεσοπρόθεσμο πλάνο.

Δεύτερον, απαιτείται κατάλληλος εξοπλισμός, όπως κάμερες, σταθερά τρίποδα και φωτισμός. Ωστόσο, με την ανάπτυξη των κινητών συσκευών και των φιλικών προς τον χρήστη εφαρμογών, ο παράγοντας κόστους περιορίζεται σημαντικά.

Τρίτον, απαιτείται επιμόρφωση του εκπαιδευτικού όχι μόνο σε τεχνικό επίπεδο, αλλά και στη διαχείριση ομαδοσυνεργατικών δραστηριοτήτων, στον διδακτικό σχεδιασμό πολυτροπικών projects και στην αξιολόγηση μη γραμμικών προϊόντων.

ΣΥΜΠΕΡΑΣΜΑΤΑ ΚΑΙ ΠΡΟΤΑΣΕΙΣ

Το Stop Motion είναι ένα πολυδιάστατο εργαλείο μάθησης. Δεν είναι απλώς μια αισθητική ή τεχνολογική δραστηριότητα· είναι μέσο δημιουργίας, συνεργασίας, νοηματοδότησης και ενσυναίσθησης. Ενσωματώνεται οργανικά στη φιλοσοφία της σύγχρονης εκπαίδευσης που εστιάζει στον μαθητή ως φορέα δράσης και έκφρασης.

Η αξιοποίηση της τεχνικής σε όλα τα γνωστικά αντικείμενα αποτελεί πρόκληση αλλά και ευκαιρία. Μπορεί να λειτουργήσει ενισχυτικά στην εξ αποστάσεως εκπαίδευση, να ενσωματωθεί σε σχέδια εργασίας, αλλά και να μετατραπεί σε εργαλείο συμπερίληψης σε τάξεις με ποικιλία μαθησιακών προφίλ. Για να επιτευχθεί αυτό, απαιτείται συστηματική επιμόρφωση, δημιουργία ανοιχτών εκπαιδευτικών πόρων, ενίσχυση της συνεργασίας μεταξύ εκπαιδευτικών διαφορετικών ειδικοτήτων και αναγνώριση της καλλιτεχνικής έκφρασης ως ισότιμου φορέα μάθησης.

ΒΙΒΛΙΟΓΡΑΦΙΑ

ΠΕΡΙΛΗΨΗ

Σε περιόδους κρίσεων επέρχονται ριζικές αλλαγές της κοινωνίας. Στην Ελλάδα ο Covid-19 παρουσιάστηκε τον 02/2020 με το κλείσιμο των σχολείων και την εφαρμογή της εξ αποστάσεως εκπαίδευσης.

Μέσω της έρευνας διερευνήθηκε το μέλλον της ΕξΑΕ, μέσα από το πρίσμα των μαθητών δευτεροβάθμιας εκπαίδευσης. Εφαρμόστηκε μικτή δειγματοληψία (Στρωματοποιημένη και κατά Συστάδες). Συμμετείχαν 462 μαθητές Γυμνασίων και Λυκείων των νομών Αττικής και Κυκλάδων. Η έρευνα διεξήχθη τον 05/2020. Τα δεδομένα συλλέχθηκαν στο LimeSyrvey, αναλύθηκαν με SPSS (25), ακαδημαϊκή άδεια. Πραγματοποιήθηκε έλεγχος αξιοπιστίας του ερωτηματολογίου με τον δείκτη Cronbach's alpha, περιγραφική στατιστική, παραγοντική ανάλυση και η δοκιμασία Chi-square.

Η ανάλυση Chi-square έδειξε ότι το 76,2% των μαθητών δεν επιθυμούσε μελλοντικά την εφαρμογή της ΕξΑΕ, ενώ μόλις το 13% τη θεωρούσε σημαντική ως μορφή εκπαίδευσης και επιθυμούσε τη μελλοντική εφαρμογή της.

Εν κατακλείδι, η ΕξΑΕ δεν οργανώθηκε με μεθοδικότητα βάσει παιδαγωγικών μεθόδων και τεχνικών με αποτέλεσμα να μη γίνει αποδεκτή από την εκπαιδευτική κοινότητα. Οι απόψεις των μαθητών Γυμνασίων και Λυκείων (ΓΕΛ - ΕΠΑΛ) επηρεάστηκαν αρνητικά με αποτέλεσμα να μην επιθυμούν μια ενδεχόμενη μελλοντική εφαρμογή της, δεδομένης της μη εφαρμογής των αρχών που διέπουν την ΕξΑΕ.

Λέξεις - κλειδιά: Εξ Αποστάσεως Εκπαίδευση, Τηλεκπαίδευση, Τεχνολογίες Πληροφοριών και Επικοινωνιών, Σύγχρονη, Ασύγχρονη.

Συντομογραφίες: Απλή Τυχαία Δειγματοληψία (ΑΤΔ), Εξ Αποστάσεως Εκπαίδευση (ΕξΑΕ), Τεχνολογίες Πληροφοριών και Επικοινωνιών (ΤΠΕ)

ΕΙΣΑΓΩΓΗ

Μετά την ανακήρυξή του Covod-19 ως παγκόσμια πανδημία το Μάρτιο του 2020, πολλές χώρες της Ε.Ε. άρχισαν να κλείνουν τα εκπαιδευτικά ιδρύματα για να περιορίσουν την εξάπλωση του. Ο ρόλος των παιδιών στη μετάδοση της νόσου παρέμενε ασαφής, ειδικά στο πλαίσιο παραμονής τους στο σχολικό περιβάλλον. Τα διαθέσιμα στοιχεία της περιόδου παρουσίαζαν πως τα παιδιά μολύνονταν και μετέφεραν τον ιό στα μέλη της οικογένειας (European Centre for Disease Prevention and Control [ECDC], 2021),

Το κλείσιμο των σχολείων πυροδότησε την προσπάθεια για εφαρμογή της ΕξΑΕ (Sofos et al., 2015). Οι ανάγκες ήταν μεγάλες. Οι μαθητές της τελευταίας τάξης του Λυκείου έπρεπε να συνεχίσουν την προετοιμασία τους για τις Πανελλαδικές Εξετάσεις, ενώ οι υπόλοιπες τάξεις χρειάζονταν την καθοδήγηση των καθηγητών για να μη χαθεί η επαφή των μαθητών με τα μαθήματα. Η ΕξΑΕ ξεκίνησε στις 16/03/2020 σε πιλοτική φάση σε τρεις νομούς (AlfaVita, 2020) και επεκτάθηκε μία εβδομάδα αργότερα στο σύνολο των Λυκείων της χώρας. Προτεραιότητα δόθηκε στους μαθητές Λυκείου. Εντυπωσιακή θεωρείται η ανταπόκριση μαθητών και εκπαιδευτικών στην ΕξΑΕ. Είναι γεγονός ότι στην περίοδο της πανδημίας, η εφαρμογή ΤΠΕ με τη χρήση σύγχρονης και ασύγχρονης ΕξΑΕ στήριξε σε παγκόσμιο επίπεδο την εκπαιδευτική κοινότητα σε κάθε εκπαιδευτική βαθμίδα.

Για το άνοιγμα των σχολείων πάρθηκαν παγκοσμίως τα απαραίτητα υγειονομικά μέτρα (Naftemporiki, 2020 · McAuley, 2020 · Wires,2020 · Godin, 2020 · Barr, 2020 · Bretan, 2020). Στην Ελλάδα οι αποφάσεις που πάρθηκαν αφορούσαν αποστάσεις θρανίων, μέγιστος αριθμός μαθητών, κ.ά, (Ministerial Decision 63314/ΓΔ4/2020). Ωστόσο, παρά τα αναρίθμητα αρνητικά της πανδημίας οργανώθηκε η ψηφιακή εξέλιξη της χώρας που κάτω από κανονικές συνθήκες θα απαιτούνταν χρόνια.

Η παγκόσμια ανησυχία, σύμφωνα με τη διεθνή βιβλιογραφία (Cao et al., 2020 · Daniel, 2020 · Dhawan, 2020 · Anouti & Naim El Rouadi, 2020), οδήγησε στην ανάγκη περαιτέρω διερεύνησης αυτής της νέας εκπαιδευτικής κατάστασης

ΜΕΘΟΔΟΣ ΤΗΣ ΕΡΕΥΝΑΣ

Το Δείγμα της Μελέτης

Η έρευνα διεξήχθη το Μάιο - Ιούνιο του 2020. Επιλέχτηκαν σχολεία με μικτό πληθυσμό αγοριών – κοριτσιών. Το τελικό δείγμα αποτελούνταν από αντιπροσωπευτικό και ομοιογενή αριθμό μαθητών, με σκοπό την αξιοπιστία και την εγκυρότητα της έρευνας (Farmakis, 2015). Τον πληθυσμό της έρευνας αποτέλεσαν μαθητές Γυμνάσιων και Λυκείων. Οι περιοχές που διεξήχθη η έρευνα ήταν σχολεία της Αθήνας και της Πάρου. Στην έρευνα συμμετείχαν 3 Γυμνάσια, 3 Λύκεια από την Αττική και 3 Γυμνάσια, 3 Λύκεια από τις Κυκλάδες. Αναλυτικότερα, το δείγμα αποτελούνταν από 12 σχολεία που το κάθε ένα είχε τρεις διαφορετικές τάξεις (Α', Β', Γ').

Κατά το δειγματοληπτικό σχεδιασμό αποφασίστηκε η συμμετοχή 500 μαθητών, οι 300 φοιτούσαν σε Γυμνάσια, (50 ανά σχολείο), ενώ οι 200 σε Λύκεια, (34 ανά σχολείο). Ο τελικός αριθμός των συμμετεχόντων της έρευνας ήταν 462 μαθητές, Πίνακας 2, αριθμός ικανοποιητικός για την αμερόληπτη και χωρίς προκαταλήψεις κατάθεση των απόψεων τους (Cohen et al., 2017).

Η Μέθοδος της Δειγματοληψίας

Κατά το δειγματοληπτικό σχεδιασμό αποφασίστηκε η εφαρμογή μικτής δειγματοληψίας, ως η καταλληλότερη μέθοδος, για αντιπροσωπευτικότερο δείγμα του πληθυσμού (Collins et al, 2007 · Sharp et al., 2011).

Επιλέχθηκαν για την έρευνα οι νομοί Αττικής και Κυκλάδων (στρωματοποιημένη δειγματοληψία). Κάθε ένας εξ αυτών αποτέλεσε διαφορετικό στρώμα της έρευνας. Η ιδιαιτερότητα της συγκεκριμένης μελέτης ήταν η συμμετοχή πληθυσμών από αστικές και ημιαστικές (νησιωτικές) περιοχές.

Στη συνέχεια εφαρμόστηκε η κατά συστάδες απλή τυχαία δειγματοληψία πολλών σταδίων ίσου μεγέθους (Kamalu et al., 2024). Η δειγματοληψία ήταν τυχαία διότι στα διάφορα στάδια της, οι σύνθετες μονάδες επιλέχθηκαν με απλή τυχαία δειγματοληψία (Chalkikias et al., 2015). Τα μέλη του πληθυσμού προσεγγίστηκαν με έμμεσο τρόπο, μέσω μεγαλύτερων ομάδων στις οποίες ανήκει το κάθε μέλος. Επιλέχθηκαν ισομεγέθη δείγματα των πληθυσμών της έρευνας.

Αναλογικός καταμερισμός μεταξύ δειγμάτων και πληθυσμών δεν εφαρμόστηκε διότι, προέκυπταν δείγματα μαθητών των Κυκλάδων πολύ μικρά για να διεξαχθούν συμπεράσματα (Zafiropoulos, 2010). Η κατά συστάδες

δειγματοληψία πραγματοποιείται σε διάφορα στάδια, ώστε να εξυπηρετηθούν οι ανάγκες της έρευνας (Farmakis, 2015). Κατά το δειγματοληπτικό σχεδιασμό η δειγματοληψία εφαρμόστηκε σε 4 στάδια:

- 1ο στάδιο, με ΑΠΔ, πραγματοποιήθηκε η επιλογή της πρωτογενούς δειγματοληπτικής μονάδας. Από τις περιφέρειες του νομού Αττικής επιλέχθηκε με κλήρωση η Δ' Αθήνας. Από τις περιφέρειες του νομού Κυκλάδων επιλέχθηκε η Δ' Κυκλάδων.
- 2ο στάδιο, με ΑΠΔ, επιλέχθηκε η δευτερογενής δειγματοληπτική μονάδα που αφορούσε τα σχολεία της έρευνας.
- 3ο στάδιο, από τα σχολεία της έρευνας επιλέχθηκαν τα προς μελέτη τμήματα.
- 4ο στάδιο, από τα τμήματα των σχολείων επιλέχθηκαν οι μαθητές. Η επιλογή του δείγματος πραγματοποιήθηκε σε επίπεδο μεμονωμένων μελών του πληθυσμού (Papageorgiou, 2015).

Πίνακας 1.
Δομή ερωτηματολογίου

Τμήματα	Είδος ερωτήσεων	Πλήθος ερωτήσεων
Πρώτο	Δημογραφικά στοιχεία	3
Δεύτερο	Μέλλον της ΕξΑΕ	17

Η Δομή του Ερωτηματολογίου

Πραγματοποιήσαμε ποσοτική έρευνα με χρήση κατάλληλα δομημένων ερωτηματολογίων (Iseris, 2016). Μοιράστηκαν ερωτηματολόγια και στις τρεις τάξεις (Α', Β', Γ') κάθε σχολείου. Στη σύνταξη του ερωτηματολογίου, χρησιμοποιήθηκαν σαφείς ερωτήσεις κλειστού τύπου, με χρήση απλής γλώσσας και ύπαρξης κατάλληλων επεξηγήσεων. Το ερωτηματολόγιο αποτελούνταν από δύο μέρη. Οι ερωτήσεις ήταν διαβαθμισμένης κλίμακας τύπου Likert με τρεις διαβαθμισμένες απαντήσεις «λίγο», «αρκετά», «πολύ». Ο χρόνος συμπλήρωσης των ερωτηματολογίων διαρκούσε 10 λεπτά. Η δομή του ερωτηματολογίου παρουσιάζεται στον **Πίνακα 1.**

Η Στατιστική Ανάλυση των Δεδομένων

Κατά τη στατιστική ανάλυση πραγματοποιήθηκε:

- Περιγραφική στατιστική ανάλυση
- Έλεγχος αξιοπιστίας του ερωτηματολογίου με το δείκτη Cronbach's Alpha.
- Παραγοντική ανάλυση
- Chi-square test για να διερευνηθούν οι σημαντικότερες συσχετίσεις μεταξύ των μεταβλητών που απαρτίζουν το ερευνητικό ερώτημα, «βαθμός επιθυμίας για μελλοντική εφαρμογή της ΕξΑΕ».

Οι Περιορισμοί της Μελέτης

Παρουσιάστηκαν μεθοδολογικοί περιορισμοί που αφορούσαν το μέγεθος του δείγματος, την έλλειψη προηγούμενης έρευνας, καθώς επίσης χρονικοί περιορισμοί και περιορισμοί μεροληψίας και φόβου λόγω πανδημίας (Alex, 2023).

Πίνακας 2
Συμμετέχοντες στην έρευνα.

Φύλο	**Πλήθος συμμετοχών**	**Ποσοστό**
Κορίτσια	240	52,06%
Αγόρια	222	47,94%
Σχολεία	**Πλήθος συμμετοχών**	**Ποσοστό**
Γυμνάσια(6)	288	62,47%
Λύκεια (6)	174	37,53%
Συμμετέχοντες στην έρευνα	468	100%
Σύνολο ερωτηματολογίων	462	97,72%

ΑΠΟΤΕΛΕΣΜΑΤΑ ΤΗΣ ΕΡΕΥΝΑΣ

Περιγραφική Στατιστική

Στον **Πίνακα 2** φαίνονται οι συμμετέχοντες στην έρευνα. Οι μαθήτριες (52,06%) που έλαβαν μέρος στην έρευνα ήταν ελαφρώς περισσότερες από τους μαθητές (47,94%), ενώ οι μαθητές των Γυμνασίων (62,47%) ήταν περισσότεροι από των Λυκείων (37,53%).

Πίνακας 3
Chi-square μεταξύ του βαθμού που ταιριάζει στους μαθητές η ΕξΑΕ και της επιθυμίας για μελλοντική εφαρμογή της. Η διαφορά είναι στατιστικά σημαντική, (p<0,001).

		Βαθμός που ταιριάζει στους μαθητές η ΕξΑΕ			
		Λίγο	**Αρκετά**	**Πολύ**	**Σύνολο**

Έλεγχος Αξιοπιστίας

Προσδιορίστηκε ο συντελεστής αξιοπιστίας Cronbach's Alpha για να ελεγχθεί εάν οι ερωτήσεις παρουσιάζουν υψηλή μεταξύ τους συνοχή (Markos, 2012). Ο συντελεστής είχε τιμή: a = 0,807.

Παραγοντική Ανάλυση

Πριν από κάθε ερευνητικό ερώτημα, αναλύθηκαν οι μεταβλητές με τη μεθοδολογία της ανάλυσης παραγόντων. Σκοπός ήταν να δούμε την αλληλεπίδραση των μεταβλητών ως προς την μεταξύ τους συνδιακύμανση, ώστε να επικεντρωθούμε σε λίγες μόνο μεταβλητές – ερωτήσεις όπου οι απαντήσεις τους παίζουν καθοριστικό ρόλο στην ερμηνεία του ερευνητικού ερωτήματος. Από τις 17 ερωτήσεις που συνδέονταν με το ερευνητικό ερώτημα (επιθυμία μελλοντικής εφαρμογής της ΕξΑΕ) οι 7 είχαν τη μεγαλύτερη σχέση μεταξύ τους με τιμή Extraction του Factor Analysis μεγαλύτερη από 0,6 και τιμή του στατιστικού κριτηρίου Kaiser Meyer Olkin αρκετά υψηλή 0,769.

Εφαρμογή της Δοκιμασίας Chi-Square

Για κάθε σημαντική μεταβλητή του ερευνητικού ερωτήματος μελετήθηκε η σχέση της με τη μεταβλητή «βαθμός επιθυμίας για μελλοντική εφαρμογή της ΕξΑΕ». Για το σκοπό αυτό φτιάχτηκαν ξεχωριστοί πίνακες για κάθε ζεύγος μεταβλητών, ένας εκ των οποίων είναι ο Πίνακας 3.

Στον **Πίνακα 3** φαίνεται πως οι μαθητές δεν επιθυμούσαν την εφαρμογή της ΕξΑΕ στο μέλλον καθώς δεν τους ταιριάζει ως μορφή εκπαίδευσης. Με την εφαρμογή παρόμοιων πινάκων δημιουργήθηκε ο **Πίνακας 4**.

Η ανάλυση Chi-square έδειξε ότι το 76,2% των μαθητών δεν επιθυμεί μελλοντικά την εφαρμογή της ΕξΑΕ, ενώ μόλις το 13% τη θεωρεί σημαντική ως μορφή εκπαίδευσης, (**Πινάκας 3, Πίνακας 4**).

ΣΥΜΠΕΡΑΣΜΑΤΑ

- Το 76,2% των μαθητών ΔΕΝ επιθυμούσε μελλοντικά την εφαρμογή της ΕξΑΕ

  Από όλους όσοι ΔΕΝ επιθυμούσαν τη μελλοντική εφαρμογή της ΕξΑΕ:
  1. το 22,7% επέδειξε ικανοποίηση από την εφαρμογή της κατά την διάρκεια της πανδημίας, (p<0,001).
  2. το 4,8% ανέφερε πως τους ταιριάζει απολύτως ως μορφή εκπαίδευσης, (p<0,001).
  3. το 5,4% ανέφερε πως η συμβατική διδασκαλία ενισχύεται από την ΕξΑΕ, (p<0,001).
  4. το 2,6% θεωρούσε πως βελτιώθηκαν σημαντικά οι θεωρητικές τους γνώσεις συγκριτικά με τη διδασκαλία στην αίθουσα, (p<0,001).
  5. το 6,1% επιθυμούσε την πραγματοποίηση μαθημάτων από εκπαιδευτικούς του Υπουργείου ελλείψει εκπαιδευτικών του σχολείου τους, (p<0,001).
  6. το 18,6% επιθυμούσε τη διεξαγωγή των μαθημάτων πέραν του σχολείου, (p<0,001).
  7. το 15,4% επιθυμούσε την ελευθερία χρόνου που προσέφερε η ΕξΑΕ, (p<0,001).

- Το 13% των μαθητών επιθυμούσε μελλοντικά την εφαρμογή της ΕξΑΕ

  Από όλους όσοι επιθυμούσαν τη μελλοντική εφαρμογή της ΕξΑΕ:
  1. το 6,9% επέδειξε ικανοποίηση από την εφαρμογή της, κατά τη διάρκεια της πανδημίας, (p<0,001).
  2. το 4,1% ανέφερε πως ταιριάζει στους ίδιους τους μαθητές ως μορφή εκπαίδευσης, (p<0,001).
  3. το 4,5% ανέφερε πως η συμβατική διδασκαλία ενισχύεται σημαντικά από την ΕξΑΕ, (p<0,001).
  4. το 2,8% θεωρούσε πως βελτιώθηκαν σημαντικά οι γνώσεις τους συγκριτικά με τη δια ζώσης διδασκαλία, (p<0,001).
  5. το 4,3% επιθυμούσε την πραγματοποίηση μαθημάτων από εκπαιδευτικούς του Υπουργείου ελλείψει των εκπαιδευτικών του σχολείου τους, (p<0,001).
  6. το 6,5% επιθυμούσε τη διεξαγωγή των μαθημάτων πέραν του σχολείου, (p<0,001).
  7. το 5,4% επιθυμούσε την ελευθερία χρόνου που προσέφερε, (p<0,001).

ΠΑΡΑΓΟΝΤΕΣ ΠΟΥ ΕΠΗΡΕΑΣΑΝ ΤΗ ΣΥΜΜΕΤΟΧΗ ΤΩΝ ΜΑΘΗΤΩΝ ΣΤΗΝ ΕΞ ΑΠΟΣΤΑΣΕΩΣ ΔΙΔΑΣΚΑΛΙΑ ΚΑΤΑ ΤΗΝ ΠΑΝΔΗΜΙΑ

Ζιώγα Στυλιανή
ΠΕ 86, 1ο ΓΕΛ Ιωαννίνων

email: ziogastella68@gmail.com

ΠΕΡΙΛΗΨΗ

Η εργασία αυτή ερευνά την εμπειρία των μαθητών Λυκείου από την εξ αποστάσεως εκπαίδευση κατά την πανδημία, εξετάζοντας τους παράγοντες που επηρέασαν την ανταπόκρισή τους. Στόχος ήταν να διερευνηθεί το ενδιαφέρον των μαθητών και οι τεχνολογικοί και παιδαγωγικοί παράγοντες που επηρέασαν τη συμμετοχή τους, να αναλυθούν οι αντιλήψεις τους σχετικά με την υποστήριξη, την αλληλεπίδραση, το εκπαιδευτικό υλικό και την ποιότητα των συστημάτων διαχείρισης μάθησης και τον ρόλο της οικογένειας. Η έρευνα πραγματοποιήθηκε τον Οκτώβριο του 2020 σε 100 μαθητές Α' και Β' Λυκείου από τα Ιωάννινα, με τη χρήση ψηφιακού ερωτηματολογίου 12 ερωτήσεων κλειστού τύπου και πολλαπλής επιλογής. Τα αποτελέσματα έδειξαν ότι η εξάρτηση από την τεχνολογία δημιούργησε προβλήματα (εξοπλισμός, σύνδεση), επηρεάζοντας αρνητικά τη συμμετοχή των μαθητών, ενώ οι εκπαιδευτικοί χρειάστηκε να αναπτύξουν νέους ρόλους. Οι μαθητές αντιμετώπισαν τεχνικά προβλήματα που επιλύθηκαν σχετικά γρήγορα, αλλά η κουλτούρα της συμβατικής εκπαίδευσης δυσκόλεψε την προσαρμογή στην εξ αποστάσεως εκπαίδευση. Εξέφρασαν αρνητικές αντιλήψεις για την επικοινωνία και την υποστήριξη από τους εκπαιδευτικούς, καθώς και για την ποιότητα του εκπαιδευτικού υλικού, ενώ η οικογένεια διαδραμάτισε σημαντικό ρόλο στην υποστήριξή τους.

Λέξεις - κλειδιά: εξ αποστάσεως διδασκαλία, πανδημία, υποστήριξη, αλληλεπίδραση

ΕΙΣΑΓΩΓΗ

Η εκπαίδευση στην Ελλάδα γνώρισε διάφορες αλλαγές στην πορεία της κατά την πάροδο των χρόνων, που επηρέασαν τον προσανατολισμό της. Η πανδημία επέβαλε την καθολική εφαρμογή της εξ αποστάσεως διδασκαλίας χωρίς τα εκπαιδευτικά ιδρύματα να μπορούν να ανταποκριθούν στο αίτημα της αναγκαιότητας αυτής. Το ενδιαφέρον εστιάζεται, κυρίως, στους μαθητές και στους παράγοντες εκείνους, τεχνολογικούς και παιδαγωγικούς, που υπαγορεύουν την εκδήλωση της δυσαρέσκειας ή τη θετική ανταπόκρισή τους στα διαδικτυακά περιβάλλοντα μάθησης από απόσταση.

Η επίδραση της εξ αποστάσεως εκπαίδευσης έκτακτης ανάγκης στη λειτουργία της συμβατικής εκπαίδευσης είναι ιδιαίτερα σημαντική, όμως προκύπτουν προβλήματα εξαιτίας της φύσης του μοντέλου της εξ αποστάσεως εκπαίδευσης κατά την εφαρμογή του από τις συμβατικές δομές εκπαίδευσης. Ο ρόλος του εκπαιδευτικού στην εξ αποστάσεως εκπαίδευση δεν αφορά μόνο στη μετάδοση γνώσεων αλλά είναι καθοδηγητικός και συμβουλευτικός. Το διδακτικό υλικό αποτελεί τη βάση της μαθησιακής διαδικασίας γι' αυτό ο σχεδιασμός και η δημιουργία του είναι ιδιαίτερης σημασίας. Ο εκπαιδευτικός στις περισσότερες περιπτώσεις δεν γνωρίζει ούτε έχει εκπαιδευτεί πώς να το δημιουργήσει, καθώς στην διδακτική πράξη αξιοποιούσε κυρίως το σχολικό εγχειρίδιο. Η εξοικείωση των εκπαιδευτικών, συχνά, με τις νέες τεχνολογίες είναι δύσκολη, επειδή δεν μπορούν να αλληλοεπιδρούν άμεσα, όπως στη δια ζώσης διδασκαλία. Ο μαθητοκεντρικός χαρακτήρας της μάθησης δυσχεραίνει το έργο εκπαιδευτικών, οι οποίοι έχουν μάθει να εφαρμόζουν δασκαλοκεντρικές προσεγγίσεις. Η απομόνωση που νιώθουν εκπαιδευτικοί και μαθητές δημιουργεί προβλήματα στην επικοινωνία μεταξύ τους αλλά και στην αλληλεπίδραση τους. Οι βασικοί παράγοντες που επηρεάζουν την συμμετοχή του μαθητή στην ηλεκτρονική μάθηση περιλαμβάνουν την υποστήριξη, το εκπαιδευτικό υλικό και την ποιότητα του συστήματος διαχείρισης μάθησης.

Μορφές της εξ αποστάσεως εκπαίδευσης

Η εξ αποστάσεως εκπαίδευση έκτακτης ανάγκης, όπως εφαρμόστηκε κατά την περίοδο της πανδημίας, δεν ταυτίζεται με την παραδοσιακή εξ αποστάσεως εκπαίδευση. Σύμφωνα με τους Bozkurt και Sharma (2020), αυτή η εξ αποστάσεως διδασκαλία ήταν μια προσωρινή λύση για τη συνέχιση της εκπαιδευτικής διαδικασίας κατά τη διάρκεια της κρίσης και χαρακτηρίζεται από συγκεκριμένες διαφορές σε σχέση με τη συστηματική και οργανωμένη εκπαίδευση από απόσταση.

Η εξ αποστάσεως εκπαίδευση διακρίνεται σε τρεις κύριες κατηγορίες: ασύγχρονη, σύγχρονη και μικτή μάθηση (Anastasiades, 2014). Η σύγχρονη εκπαίδευση από απόσταση, σύμφωνα με τους Arkorful και Abaidoo (2014), περιλαμβάνει την ταυτόχρονη πρόσβαση εκπαιδευτικών και μαθητών μέσω διαδικτύου, επιτρέποντας την αλληλεπίδραση σε πραγματικό χρόνο. Αυτό επιτυγχάνεται μέσω εργαλείων όπως οι τηλεδιασκέψεις και οι αίθουσες συνομιλίας, προσφέροντας τη δυνατότητα άμεσης ανατροφοδότησης και συζήτησης μεταξύ των συμμετεχόντων. Σημαντικό πλεονέκτημα της είναι η ευελιξία ως προς τον χρόνο και τον τόπο συμμετοχής, που επιτρέπει στους μαθητές και στους εκπαιδευτικούς να συμμετέχουν από διαφορετικά γεωγραφικά σημεία χωρίς να έχουν φυσική παρουσία σε έναν συγκεκριμένο χώρο (Anastasiades, 2014).

Από την άλλη πλευρά, η ασύγχρονη εξ αποστάσεως εκπαίδευση επιτρέπει στους εκπαιδευτικούς και τους μαθητές να αλληλεπιδρούν χωρίς να έχουν την ταυτόχρονη παρουσία τους στο διαδίκτυο. Οι συμμετέχοντες μπορούν να δημοσιεύουν ανακοινώσεις και να ανταλλάσσουν μηνύματα σε διαφορετικές χρονικές στιγμές, χρησιμοποιώντας εργαλεία όπως φόρουμ, ηλεκτρονικό ταχυδρομείο κ.α. Αυτό το μοντέλο μάθησης παρέχει μεγαλύτερη ευελιξία, καθώς οι μαθητές μπορούν να διαχειρίζονται τον ρυθμό και τον χρόνο της μάθησής τους, προσαρμόζοντας τη διαδικασία στις προσωπικές τους ανάγκες και συνθήκες. Ωστόσο η ασύγχρονη εκπαίδευση παρουσιάζει ορισμένα μειονεκτήματα, όπως η έλλειψη άμεσης ανατροφοδότησης και η αίσθηση απομόνωσης που μπορεί να βιώνουν οι μαθητές λόγω των περιορισμένων αλληλεπιδράσεων με συμμαθητές και εκπαιδευτικούς (Anastasiades, 2014). Η μικτή μάθηση, αναφέρεται στον συνδυασμό παραδοσιακής διδασκαλίας δια ζώσης και διαδικτυακής μάθησης. Σύμφωνα με τους Dziuban et al. (2004), αποτελεί μια παιδαγωγική προσέγγιση που εκμεταλλεύεται τα πλεονεκτήματα και των δύο μορφών εκπαίδευσης.

Η ασύγχρονη μάθηση, σύμφωνα με τον Kumi-Yeboah (2013), μπορεί να χρησιμοποιηθεί είτε μέσω διαδικτύου είτε εκτός σύνδεσης, και περιλαμβάνει μια ποικιλία δραστηριοτήτων, από την παρακολούθηση βιντεοσκοπημένων διαλέξεων έως τη συμμετοχή σε φόρουμ συζητήσεων. Έτσι προσφέρει στους μαθητές την ελευθερία να αλληλεπιδρούν με το υλικό και τους άλλους συμμετέχοντες χωρίς να δεσμεύονται από συγκεκριμένα ωράρια. Ωστόσο, η έλλειψη άμεσης αλληλεπίδρασης μπορεί να αποτελέσει εμπόδιο για την άμεση επίλυση αποριών και την πιο βαθιά κατανόηση του υλικού. Στη σύγχρονη μάθηση, η τηλεδιάσκεψη αποτελεί το βασικότερο μέσο επικοινωνίας, επιτρέποντας την άμεση οπτικοακουστική επικοινωνία μεταξύ εκπαιδευτικών και μαθητών, όμως απαιτεί ειδικές γνώσεις από εκπαιδευτικούς και μαθητές (Armakolas & Panagiotakopoulos, 2020). Χρειάζεται οι εκπαιδευτικοί να αναπτύξουν νέες στρατηγικές και να

προσαρμόσουν τις μεθόδους διδασκαλίας στις ανάγκες των μαθητών, λαμβάνοντας υπόψη την απόσταση και την έλλειψη φυσικής παρουσίας.

Η εξ αποστάσεως εκπαίδευση όταν χρησιμοποιείται για αντικατάσταση της παραδοσιακής διδασκαλίας, θέτει προκλήσεις που απαιτούν την ανάπτυξη νέων δεξιοτήτων και τη μετάβαση από την παθητική στη συμμετοχική μάθηση. Οι εκπαιδευτικοί πρέπει να διαθέτουν συνδυασμό τεχνολογικών και παιδαγωγικών δεξιοτήτων για να εφαρμόσουν αποτελεσματική διδασκαλία. Η απόσταση και η έλλειψη άμεσης επαφής δυσχεράνει την ανάπτυξη σχέσεων μεταξύ εκπαιδευτικών και μαθητών, καθιστώντας την επικοινωνία και την αλληλεπίδραση πιο απαιτητικές. Σύμφωνα με τον García-Aretio (2017), η ποιότητα της εκπαίδευσης από απόσταση μπορεί να συγκριθεί με αυτήν της παραδοσιακής εκπαίδευσης, όταν σχεδιάζεται και δημιουργείται με τα κατάλληλα παιδαγωγικά εργαλεία και τεχνικές για να επιτύχει ισάξια ή και καλύτερα αποτελέσματα σε σχέση με την παραδοσιακή εκπαιδευτική διαδικασία.

Εκπαιδευτικό υλικό

Η ποιότητα του συστήματος αφορά τη σχεδίαση και την εργονομία της πλατφόρμας ηλεκτρονικής μάθησης που χρησιμοποιείται, διασφαλίζοντας ότι η πλατφόρμα είναι εύχρηστη και λειτουργική. Το εκπαιδευτικό υλικό αναφέρεται στην παραγωγή μαθημάτων υψηλής ποιότητας, με σαφές και περιεκτικό περιεχόμενο που είναι καλά οργανωμένο και δομημένο. Η υποστήριξη, από την άλλη πλευρά, αφορά την παροχή τεχνικής βοήθειας στους μαθητές, ώστε να μην επιλυθούν τυχόν προβλήματα που προκύπτουν κατά τη διάρκεια της εκμάθησης, και μπορεί να παρέχεται είτε από τεχνικούς είτε από εκπαιδευτικούς (Cidral et al., 2018).

Στη συμβατική εκπαίδευση χρησιμοποιείται ο όρος «σχολικό εγχειρίδιο», ενώ στην εξ αποστάσεως εκπαιδευτικό υλικό. Το σχολικό εγχειρίδιο περιλαμβάνει το διδακτικό εγχειρίδιο (βασικό βιβλίο μελέτης), το βιβλίο εργασιών και ασκήσεων, το βιβλίο του εκπαιδευτικού, λεξικά κ.α.. Όλα αυτά λειτουργούν συνδυαστικά ως μέσα με ποικίλες διδακτικές λειτουργίες για τη στήριξη της σχολικής δια ζώσης εκπαίδευσης. Κατ΄ αναλογία, ένα εκπαιδευτικό πακέτο μπορεί να περιέχει έντυπο, οπτικοακουστικό και ηλεκτρονικό αλληλεπιδραστικό υλικό. Το υλικό αυτό είναι διαμορφωμένο με ειδική διδακτική μεθοδολογία και λειτουργεί ως προπαρασκευασμένη διδασκαλία. Μπορεί να περιέχει ηλεκτρονικά κείμενα, οπτικοακουστικό υλικό, αλληλεπιδραστικό υλικό, διαδραστικές δυνατότητες (συνομιλίες, τηλεδιάσκεψη κ.ά.). Η ποικιλία των στοιχείων που περιέχει ένα μαθησιακό περιβάλλον, έγκειται στο γεγονός ότι κάθε ένα από αυτά αναλαμβάνει συγκεκριμένες λειτουργίες στο πλαίσιο της δια ζώσης ή της εξ αποστάσεως εκπαίδευσης προκειμένου να δημιουργηθούν συνθήκες ενεργής μάθησης.

Το ψηφιακό εκπαιδευτικό υλικό διαδραματίζει κρίσιμο ρόλο στην εξ αποστάσεως εκπαίδευση, καθώς οι μαθητές συχνά εργάζονται ατομικά, και το περιεχόμενο πρέπει να αντισταθμίζει την έλλειψη προσωπικής επικοινωνίας. Το υλικό πρέπει να οργανώνεται και να παρουσιάζεται σύμφωνα με τις βασικές παιδαγωγικές αρχές, ώστε να διευκολύνεται η αλληλοεπίδραση του μαθητή με το μαθησιακό περιεχόμενο (Sofos et al., 2015). Η οργάνωση και η παρουσίαση του μαθησιακού περιεχομένου είναι θεμελιώδεις παράμετροι για κάθε εκπαιδευτικό που δημιουργεί εκπαιδευτικό υλικό, καθώς αυτές οι παράμετροι καθορίζουν την επιτυχία της εξ αποστάσεως εκπαίδευσης και διαφέρουν σημαντικά από τα παραδοσιακά σχολικά εγχειρίδια.

Τύποι Αλληλεπίδρασης

Στην εξ αποστάσεως εκπαίδευση πυρήνας της αλληλεπίδρασης είναι ο μαθητής, κατά συνέπεια η αλληλεπίδραση, εξαρτάται από τις ανάγκες του εκπαιδευόμενου. Επομένως, μπορούμε να ορίσουμε την αλληλεπίδραση ως έναν τρόπο που οδηγεί τη γνώση σε επαφή με τον μαθητή ή έναν τρόπο που βοηθά τον μαθητή να έχει πρόσβαση στη γνώση μέσω του περιεχομένου από μόνος του. Το 1989, ο Moore ορίζει τρεις τύπους αλληλεπίδρασης: μαθητές και εκπαιδευτικοί, μαθητές και περιεχόμενο και μεταξύ μαθητών. Στη συνέχεια οι Hillman et al. (1994), πρόσθεσαν έναν τέταρτο τύπο αλληλεπίδρασης, που αφορά τον μαθητή και το περιβάλλον διεπαφής, δηλαδή αλληλεπίδραση του μαθητή με το τεχνολογικό μέσο.

Οι τρεις πρώτοι τύποι αλληλεπίδρασης πραγματοποιούνται επίσης και σε παραδοσιακά εκπαιδευτικά περιβάλλοντα με φυσική παρουσία. Παρόλο που θεωρείται ότι ο τέταρτος τύπος αλληλεπίδρασης, δηλαδή η αλληλεπίδραση μεταξύ μαθητών και διεπαφών υπάρχει κυρίως στα ηλεκτρονικά μαθήματα, έχει παρατηρηθεί επίσης και σε περιβάλλοντα δια ζώσης μάθησης. Η αλληλεπίδραση μεταξύ μαθητών και διεπαφών είναι η διαδικασία χειραγώγησης διαφόρων εργαλείων για την επίτευξη μιας εργασίας που τελικά επιτρέπει στους μαθητές να φτάσουν στη γνώση χρησιμοποιώντας τις αισθήσεις τους προκειμένου να αποθηκεύσουν πληροφορίες σε αισθητήρια συστήματα. Λόγω των τεχνολογικών εξελίξεων οι τύποι αλληλεπιδράσεων αναπτύσσονται με τα αισθητήρια συστήματα των φορητών

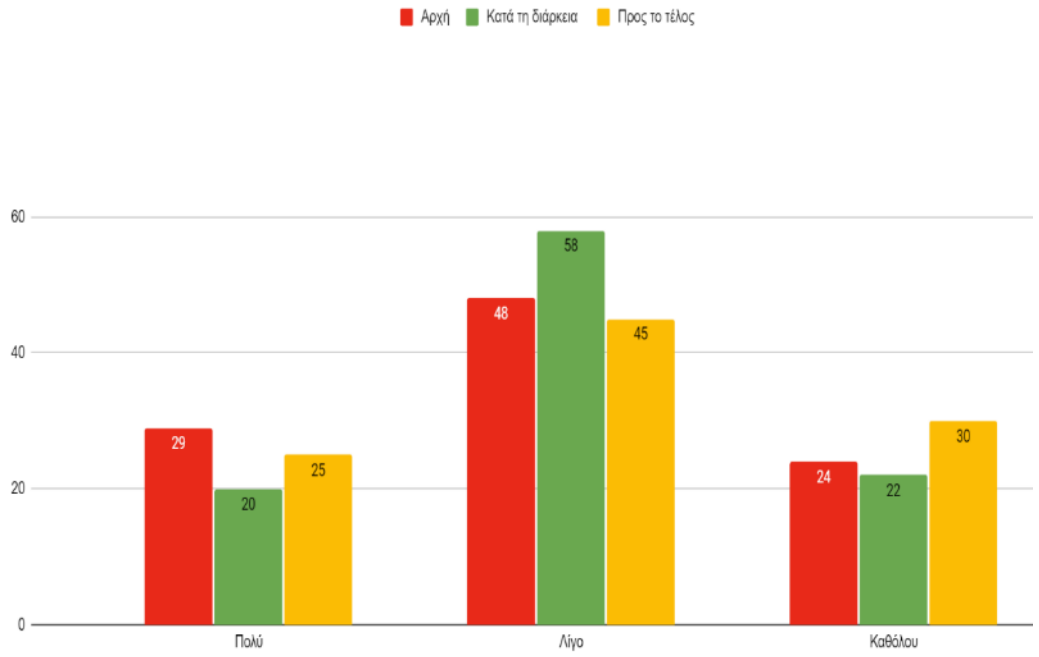
συσκευών. Η εξέλιξη της τεχνολογίας και η εφαρμογή της εξ αποστάσεως εκπαίδευσης προσθέτει νέους τύπους αλληλεπίδρασης.

Μεθοδολογία έρευνας

Σκοπός της έρευνας ήταν να διερευνηθούν οι παράγοντες που επηρέασαν τη συμμετοχή των μαθητών Λυκείου στην επείγουσα εξ αποστάσεως διδασκαλία που εφαρμόστηκε στο πρώτο lockdown (Μάρτιος – Μάιος 2020), στην Ελλάδα. Η έρευνα υλοποιήθηκε τον Οκτώβριο του 2020 με 100 μαθητές Α΄ και Β΄ Γενικού Λυκείου των Ιωαννίνων που είχαν παρακολουθήσει εξ αποστάσεως μαθήματα το σχ. έτος 2019-2020. Για τη συλλογή των δεδομένων δημιουργήθηκε ένα ψηφιακό ερωτηματολόγιο με 12 ερωτήσεις κλειστού τύπου και πολλαπλής επιλογής. Η εγκυρότητα της έρευνας διασφαλίστηκε μέσω βιβλιογραφικής επισκόπησης μέχρι το 2020.

ΑΠΟΤΕΛΕΣΜΑΤΑ

Ερώτημα 1. Οι παράγοντες που επηρέασαν την παραμονή των μαθητών στα μαθήματα ήταν:



Εικόνα 1
Αποτελέσματα ερώτημα 1

Σύμφωνα με την Εικόνα 1, οι σημαντικότεροι λόγοι ήταν τα τεχνικά προβλήματα (57 απαντήσεις) που αφορούσαν διακοπές ηλεκτρικού ρεύματος αλλά κυρίως έλλειψη πρόσβασης στο διαδίκτυο, καθώς και τεχνικά προβλήματα με την πλατφόρμα eclass (47 απαντήσεις) η οποία ήταν το βασικό μέσο διδασκαλίας. Ενώ ο κυριότερος λόγος που καθόρισε τη συνέχιση της παρακολούθησης ήταν ότι αποτελούσε για αυτούς μια υποχρεωτική μορφή εκπαίδευσης και όφειλαν να συμμετέχουν (46 απαντήσεις). Επίσης, 38 μαθητές επέλεξαν ως έναν από τους λόγους για την παρακολούθηση των μαθημάτων τον σχεδιασμό του μαθήματος, ενώ 31 μαθητές έδωσαν ως απάντηση την αλληλεπίδραση που είχαν με τους εκπαιδευτικούς, οι 27 μαθητές θεώρησαν ότι είχαν καλές επιδόσεις και οι 23 μαθητές επηρεάστηκαν από την ποικιλία των εργασιών. Στις χαμηλότερες προτιμήσεις των μαθητών είναι η αντίληψη ότι τα καταφέρνουν στα ηλεκτρονικά μαθήματα (20 απαντήσεις), η ευκολία στη διαχείριση των διαδικτυακών μαθημάτων (19 απαντήσεις) και η άνεση στη χρήση των πλατφόρμων (19 απαντήσεις). Συμπερασματικά τα αίτια που απέτρεψαν τους μαθητές να συνεχίσουν τα μαθήματα σχετίζονταν με τα τεχνικά προβλήματα που αντιμετώπιζαν εξαιτίας του διαδικτύου ή εξαιτίας της πλατφόρμας, ενώ ο βασικότερος λόγος για τη συνέχιση ήταν η υποχρεωτικότητα αυτής της μορφής εκπαίδευσης. Επίσης, η οργάνωση των μαθημάτων και η αλληλεπίδραση με τους εκπαιδευτικούς διαδραμάτισαν κάποιους επιπρόσθετους παράγοντες για την παραμονή των μαθητών στα διαδικτυακά μαθήματα.

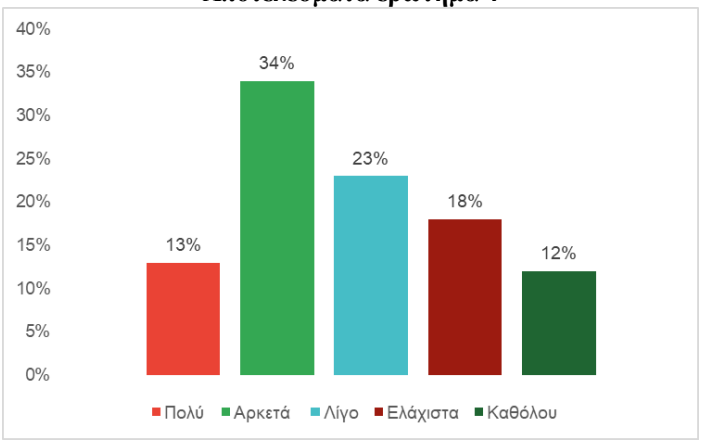
Ερωτήματα 2. Το ενδιαφέρον των μαθητών για τα μαθήματα στην αρχή, κατά τη διάρκεια και προς το τέλος της εξ αποστάσεως διδασκαλίας ήταν:

Εικόνα 2
Αποτελέσματα ερώτημα 2

Από τις απαντήσεις των μαθητών (Εικόνα 2) γίνεται εμφανές ότι το ενδιαφέρον των μαθητών για τα ηλεκτρονικά μαθήματα σε όλη την διάρκεια ήταν περιορισμένο, καθώς οι απαντήσεις για την επιλογή «λίγο» κυμαίνονται από 48%, 58% και 45%. Οι μισοί σχεδόν μαθητές δεν ενδιαφέρονται για την εξ αποστάσεως εκπαίδευση παρότι συμμετείχαν σε αυτή. Το μεγαλύτερο ενδιαφέρον έδειξαν στην αρχή των ηλεκτρονικών μαθημάτων (29% πολύ) και το μικρότερο ενδιαφέρον στο τέλος των μαθημάτων (30% καθόλου).

Ερώτημα 3. Για την εγγραφή στα διαδικτυακά μαθήματα οι μαθητές είχαν υποστήριξη από:

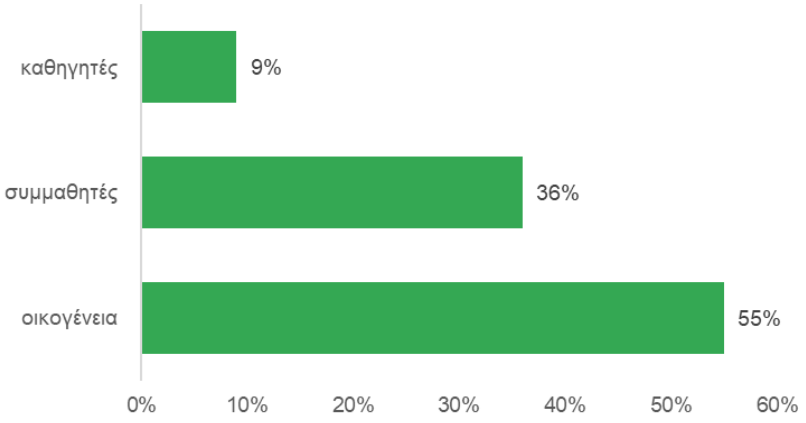
Εικόνα 3
Αποτελέσματα ερώτημα 3



Σύμφωνα με την Εικόνα 3 για την εγγραφή τους οι μισοί μαθητές (50%) υποστηρίχθηκαν από την οικογένεια τους, καθώς η ενημέρωση από το σχολείο έγινε στους γονείς τους και η εγγραφή τους στο Πανελλήνιο σχολικό δίκτυο έγινε από αυτούς. Ορισμένοι από τους μαθητές (21%) όμως, έκαναν την εγγραφή μόνοι τους, λόγω μη εξοικείωσης των γονέων με την τεχνολογία, ενώ όλοι οι μαθητές έχουν τέτοιου είδους εμπειρίες στην καθημερινότητα τους κάνοντας

εγγραφές σε διάφορους ιστότοπους. Ελάχιστοι μαθητές θεωρούν ότι βοηθήθηκαν από τη διεύθυνση του σχολείου (10%), τους εκπαιδευτικούς (9%) και τους συμμαθητές τους (10%). Το σχολείο δεν καθίσταται υποστηρικτικό ούτε μέσω της διεύθυνσης ούτε μέσω των εκπαιδευτικών, καθώς οι περισσότεροι από αυτούς δεν διέθεταν τις απαιτούμενες γνώσεις.

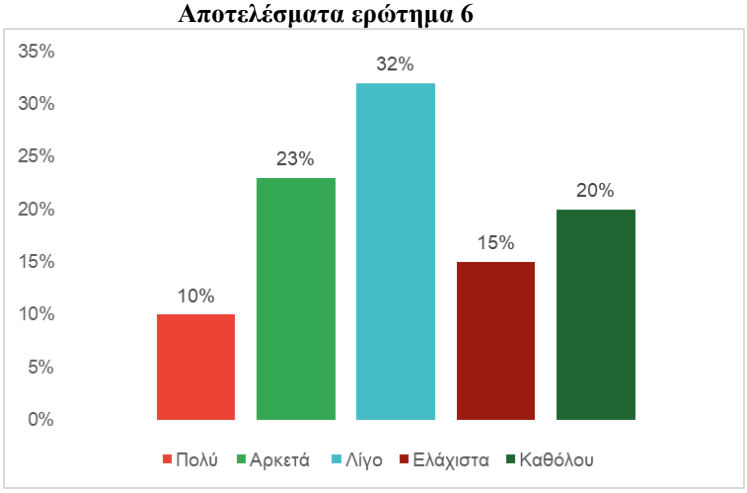
Ερώτημα 4. Οι εκπαιδευτικοί ανταποκρίνονταν απαντώντας σε email ή μηνύματα εντός 48 ωρών στα ερωτήματα ή τις εργασίες των μαθητών.



Εικόνα 4
Αποτελέσματα ερώτημα 4

Από τις απαντήσεις των μαθητών (Εικόνα 4) παρατηρούμε ότι το 47 % από αυτούς θεωρεί πως οι εκπαιδευτικοί απαντούσαν άμεσα, το 41% πιστεύει πως οι εκπαιδευτικοί καθυστερούσαν αλλά απαντούσαν, ενώ το 12% υποστηρίζει ότι οι εκπαιδευτικοί δεν είχαν συνέπεια/αδυνατούσαν να ανταποκριθούν.

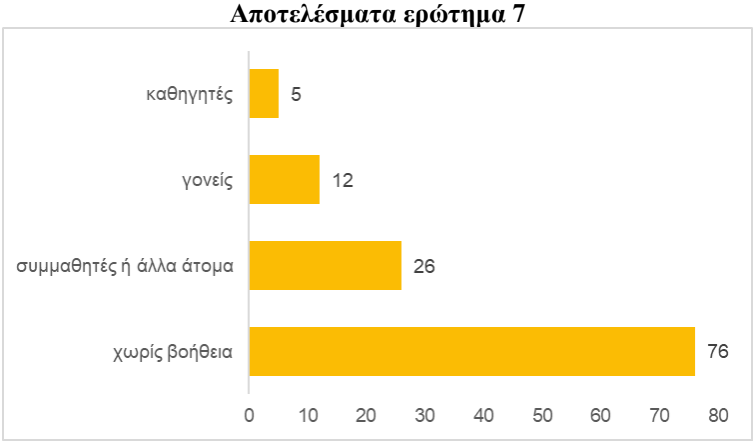
Ερώτημα 5. Κατά τη διάρκεια των μαθημάτων στις δυσκολίες που αντιμετώπισαν οι μαθητές είχαν υποστήριξη από τους:



Εικόνα 5
Αποτελέσματα ερώτημα 5

Σύμφωνα με την Εικόνα 5 οι μαθητές στις δυσκολίες που αντιμετώπισαν είχαν υποστήριξη από την οικογένεια τους (55%) που τους βοηθούσε να ξεπεράσουν τα προβλήματα. Οι μαθητές που δεν μπορούσαν να στηριχθούν στην οικογένεια τους λόγω έλλειψης γνώσεων ζητούσαν συμβουλές και βοήθεια από τους συμμαθητές τους (36%). Μόνο το 9% των μαθητών υποστηρίζει ότι δέχθηκε τη βοήθεια και την καθοδήγηση από τους εκπαιδευτικούς του σχολείου.

Ερώτημα 6. Οι εκπαιδευτικοί έδιναν παράταση στις προθεσμίες, όταν τις ζητούσαν οι μαθητές

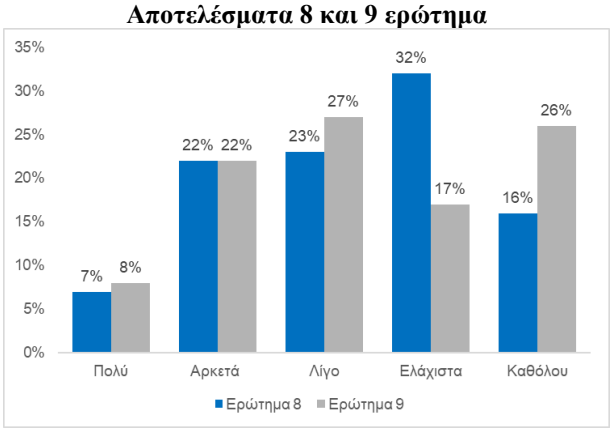


Εικόνα 6
Αποτελέσματα ερώτημα 6

Οι εκπαιδευτικοί δεν έδιναν παράταση προθεσμίας στους μαθητές για παράδοση εργασιών. Μόνο το 10% θεωρεί ότι έδιναν σε μεγάλο βαθμό και το 23% μαθητών πιστεύει σε ικανοποιητικό βαθμό. Αντίθετα, η πλειοψηφία των μαθητών το 67% αντιμετώπισε μια άρνηση από τους εκπαιδευτικούς. Η εξ αποστάσεως εκπαίδευση ως μια νέα μορφή εκπαίδευσης για τους εκπαιδευτικούς δημιουργεί απαιτήσεις και δυσκολίες με αποτέλεσμα να μην μπορούν να κατανοήσουν τις δυσκολίες που αντιμετώπιζαν οι μαθητές για να λειτουργήσουν υποστηρικτικά απέναντι σε αυτούς (Εικόνα 6).

Ερώτημα 7. Όταν οι εργασίες ήταν πολύ απαιτητικές οι μαθητές ζητούσαν βοήθεια από:

Εικόνα 7
Αποτελέσματα ερώτημα 7

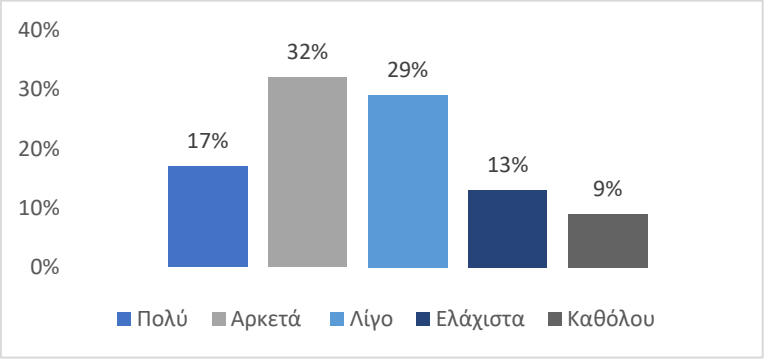


Σύμφωνα με την Εικόνα 7 η πλειονότητα των μαθητών διεκπεραίωνε τις περισσότερες εργασίες χωρίς βοήθεια (76 απαντήσεις), καθώς οι εργασίες αφορούσαν ύλη που την είχαν διδαχθεί στη δια ζώσης διδασκαλία. Σε ορισμένες εργασίες οι μαθητές απάντησαν ότι έλαβαν τη βοήθεια των συμμαθητών τους (26 απαντήσεις), ενδεχομένως σε περιπτώσεις που είχαν αδυναμία και ελλείψεις. Από το σύνολο των μαθητών, 12 από αυτούς απάντησαν ότι έλαβαν βοήθεια για την διεκπεραίωση των εργασιών από τους γονείς τους, οπωσδήποτε αυτοί οι μαθητές είχαν γονείς που είχαν το γνωστικό υπόβαθρο και μπορούσαν να συνδράμουν τα παιδιά τους, ενώ αξιοσημείωτο αποτελεί το αποτέλεσμα ότι μόνο 5 από τους 100 μαθητές έλαβαν βοήθεια για την υλοποίηση των εργασιών από εκπαιδευτικούς. Αυτό το αποτέλεσμα εγείρει ερωτήματα σχετικά με τον βαθμό επικοινωνίας και συνεργασίας μεταξύ εκπαιδευτικών και μαθητών.

Ερώτημα 8. Με τα διαδικτυακά μαθήματα οι μαθητές θεωρούν ότι υπήρχε αλληλεπίδραση και επικοινωνία με τους εκπαιδευτικούς, όπως στη δια ζώσης διδασκαλία (στην τάξη)

Ερώτημα 9. Κατά τη διάρκεια του μαθήματος οι μαθητές θεωρούν ότι υπήρχε συνεργασία και αλληλεπίδραση με τους συμμαθητές τους στην εξ αποστάσεως εκπαίδευση

Εικόνα 8
Αποτελέσματα 8 και 9 ερώτημα

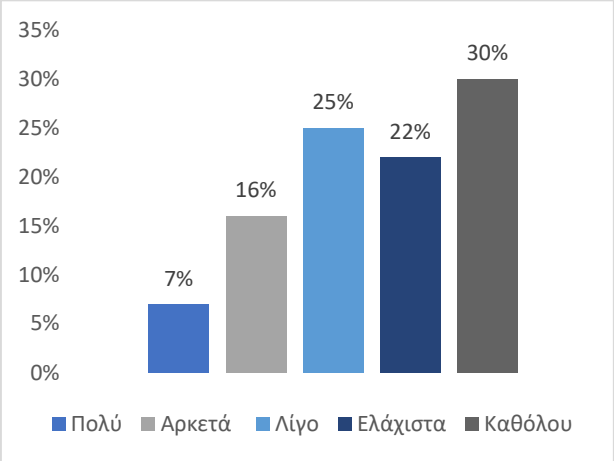


Τα ερωτήματα 8 και 9 παρουσιάζουν ενδιαφέρον να εξεταστούν συνδυαστικά, καθώς παρατηρείται κοινή αντιμετώπιση από τους μαθητές σε αυτά. Με τα παραπάνω ερωτήματα διερευνούμε τις αντιλήψεις των μαθητών σχετικά με την επικοινωνία και την αλληλεπίδραση τους με τους εκπαιδευτικούς καθώς και με τους συμμαθητές τους. Σύμφωνα με το Εικόνα 8 τα ποσοστά 7% και 8% σχεδόν ταυτίζονται για τα δύο ερωτήματα όσων μαθητών δίνουν την απάντηση «πολύ» και ταυτίζονται τα αντίστοιχα ποσοστά (22%), για όσους απαντούν «αρκετά», ενώ συγκεντρωτικά τα ποσοστά αυτά είναι 29% και 30% αντίστοιχα για τα ερωτήματα 8 και 9. Επομένως, μόνο 3 στους 10 μαθητές πιστεύουν ότι με την εξ αποστάσεως εκπαίδευση μπορούσαν να αλληλοεπιδράσουν με τους εκπαιδευτικούς και τους συμμαθητές τους κατά την εκπαιδευτική διαδικασία.

Συγκεντρωτικά, τα ποσοστά για τις απαντήσεις «λίγο», «ελάχιστα» και «καθόλου» τείνουν να ταυτίζονται με 71% για το ερώτημα 8 και 70% για το ερώτημα 9. Κατά συνέπεια οι 7 στους 10 μαθητές πιστεύουν ότι δεν υπήρχε αλληλεπίδραση, επικοινωνία και συνεργασία αφενός με τους εκπαιδευτικούς και αφετέρου με τους υπόλοιπους μαθητές που συμμετείχαν από κοινού στα μαθήματα. Το ποσοστό των μαθητών που απαντά ότι είχε λίγη επικοινωνία με τους εκπαιδευτικούς είναι κατά 4% μικρότερο από το αντίστοιχο για τους συμμαθητές. Το 32% των μαθητών είχε την ελάχιστη επικοινωνία με τους εκπαιδευτικούς, ενώ το αντίστοιχο ποσοστό για τους συμμαθητές είναι 17%, ενώ καμιά επικοινωνία απάντησε το 26% δεν είχε με τους συμμαθητές ενώ το αντίστοιχο ποσοστό για τους συμμαθητές είναι 16%. Σε γενικές γραμμές οι μαθητές επιλέγουν να έχουν στα διαδικτυακά μαθήματα την ελάχιστη και μικρότερη επικοινωνία με τους εκπαιδευτικούς παρά με τους συμμαθητές τους.

Ερώτημα 10. Οι μαθητές θεωρούν ότι η ενεργοποίηση της συνομιλίας στην πλατφόρμα ασύγχρονης εκπαίδευσης θα διευκόλυνε την επίλυση των αποριών στο μάθημα

Εικόνα 9
Αποτελέσματα ερώτημα 10

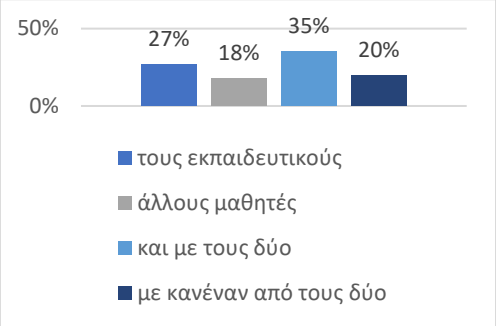


Σύμφωνα με την Εικόνα 9 οι μαθητές σε ποσοστό 17% απάντησαν ότι η ενεργοποίηση της συνομιλίας στην πλατφόρμα θα διευκόλυνε την επίλυση των αποριών στα μαθήματα και τις εργασίες ενώ το 32% αυτών θεωρεί ότι σε ικανοποιητικό βαθμό θα λειτουργούσε αυτή η επιλογή υποστηρικτικά για τους ίδιους. Συγκεντρωτικά το 49% εκφράζει τη θετική αντίληψη για αυτόν τον τρόπο αλληλεπίδρασης με τους εκπαιδευτικούς και τους συμμαθητές. Η συνομιλία θα έδινε λύσεις σε απορίες και εμπόδια που αντιμετώπιζαν οι μαθητές κατά την διεκπεραίωση των εργασιών, καθώς μέσω αυτής θα μπορούσαν να επικοινωνήσουν με τους εκπαιδευτικούς είτε οι ίδιοι είτε άλλοι μαθητές, να θέτουν ερωτήματα κοινοποιημένα προς όλους και να δίνονται απαντήσεις. Αυτή η μορφή επικοινωνίας θα ήταν μια καλή λύση επικοινωνίας κυρίως για τους μαθητές που ένιωθαν ανασφάλεια, ντροπή ή φόβο να κάνουν ερωτήσεις στους εκπαιδευτικούς, χωρίς να χρειάζεται οι ίδιοι να εκθέσουν τις απορίες αλλά κάποιοι άλλοι συμμαθητές τους.

Το 29% των μαθητών υποστηρίζει ότι η συνομιλία θα βοηθήσει στην επίλυση αποριών σε μικρότερο βαθμό, ενώ το 13% αυτών δίνει την απάντηση «ελάχιστα» και τέλος το 9% δίνει την απάντηση «καθόλου». Συγκεντρωτικά το 51% των μαθητών που συμμετείχαν στην έρευνα υποστηρίζει ότι δεν θεωρεί τη συνομιλία έναν τρόπο που θα διευκόλυνε την επίλυση αποριών στα μαθήματα. Κατά συνέπεια παρατηρώντας τα ποσοστά των θετικών και των αρνητικών αντιλήψεων διαπιστώνουμε ότι οι αντιλήψεις των μαθητών διχάζονται. Η αιτία πιθανόν είναι ότι η συνομιλία είναι ένας τρόπος επικοινωνίας, ο οποίος δεν έχει εφαρμοστεί και έτσι οι μαθητές δεν γνωρίζουν κατά πόσο είναι αποτελεσματική.

Ερώτημα 11. Η πλατφόρμα τηλεδιάσκεψης ευνοεί τη δημιουργία ενός συναισθηματικού δεσμού με τον εκπαιδευτικό σε όλη τη διάρκεια των μαθημάτων

Εικόνα 10
Αποτελέσματα ερώτημα 11



Από την Εικόνα 10 που απεικονίζει τις απαντήσεις των μαθητών παρατηρούμε ότι το μικρότερο ποσοστό των μαθητών (7%) απαντά «πολύ», το 16% απαντά «αρκετά». Από τα ποσοστά αυτά συμπεραίνουμε ότι λίγοι μαθητές θεωρούν ότι έχουν θετικές αντιλήψεις για τη συμβολή της πλατφόρμας σύγχρονης εκπαίδευσης στην επαφή και επικοινωνία με τους εκπαιδευτικούς. Το 77% των μαθητών δεν πιστεύει ότι η πλατφόρμα αυτή μπορεί να ευνοήσει τη δημιουργία συναισθηματικού δεσμού με τους εκπαιδευτικούς. Αναλυτικά παρατηρούμε ότι το 22% απαντά «ελάχιστα», το 25% απαντά «λίγο» και τέλος το μεγαλύτερο ποσοστό των μαθητών (30%) απαντά «καθόλου». Αδιαμφισβήτητα και ξεκάθαρα η πλειονότητα των μαθητών έχει αρνητικές αντιλήψεις και απόψεις για την πλατφόρμα Webex ως μέσο επικοινωνίας και επαφής. Η πιο πιθανή αιτία είναι ότι η πλειονότητα των μαθημάτων έγιναν με ασύγχρονη μορφή και η χρήση της σύγχρονης εκπαίδευσης ήταν εξαιρετικά περιορισμένη και σπάνια.

Ερώτημα 12. Η εξ αποστάσεως εκπαίδευση έδωσε τη δυνατότητα στους μαθητές να επικοινωνούν διαδικτυακά την περίοδο της καραντίνας με:

Σύμφωνα με την Εικόνα 11 των 35% των μαθητών που είναι το μεγαλύτερο ποσοστό υποστηρίζει ότι είχε τη δυνατότητα να επικοινωνεί τόσο με τους εκπαιδευτικούς, όσο και με τους συμμαθητές τους στα μαθήματα. Το 27% αυτών απαντά ότι επικοινωνούσε με τους εκπαιδευτικούς, ενώ το 20% με κανέναν από αυτούς. Τέλος το 18% των μαθητών θεωρεί ότι επικοινωνούσε με συμμαθητές τους. Παρατηρούμε ότι η επικοινωνία των μαθητών με συμμαθητές ήταν περιορισμένη, κυρίως επεδίωκαν να επικοινωνήσουν ταυτόχρονα με συμμαθητές και εκπαιδευτικούς καθώς επίσης μόνο με τους εκπαιδευτικούς. Σημαντικό είναι και το ποσοστό των μαθητών που θεωρούν ότι δεν υπήρχε καμιά επικοινωνία με κανέναν.

Εικόνα 11
Αποτελέσματα ερώτημα 12

ΣΥΜΠΕΡΑΣΜΑΤΑ

Η εξάρτηση της εξ αποστάσεως εκπαίδευσης από την τεχνολογία δημιούργησε τεχνολογικά προβλήματα (δυσλειτουργία εξοπλισμού, κακή σύνδεση) που επηρέασαν αρνητικά τους συμμετέχοντες. Σε πολλές περιπτώσεις οι εκπαιδευτικοί αδυνατούσαν να ολοκληρώσουν με επιτυχία τη διδασκαλία νιώθοντας έτσι ανασφάλεια και απροθυμία να αξιοποιήσουν την τεχνολογία στη μαθησιακή διαδικασία. Η στάση τους απέναντι στην εξ αποστάσεως εκπαίδευση επηρέασε σε μεγάλο βαθμό την επιτυχία της παρεχόμενης εκπαίδευσης. Η εξ αποστάσεως εκπαίδευση προσέφερε ευελιξία στους μαθητές ωστόσο δημιούργησε αυξημένες απαιτήσεις στους εκπαιδευτικούς (δημιουργία μαθημάτων, ανάρτηση ψηφιακού υλικού, διορθώσεις εργασιών, απαντήσεις στα emails). Επιπλέον οι εκπαιδευτικοί έπρεπε να είναι εξοπλισμένοι με τεχνολογικές δεξιότητες και να προσαρμόσουν τη διδασκαλία τους ώστε να ανταποκρίνεται στις ανάγκες των μαθητών. Όλα τα παραπάνω απαιτούν κατάρτιση και δαπάνη χρόνου από τη μεριά των διδασκόντων ενώ υπήρχε απουσία κινήτρων.

Η πρόσβαση στο διαδίκτυο και τα τεχνικά προβλήματα επηρέασαν σε μεγάλο βαθμό αρνητικά τις αντιλήψεις των μαθητών για την εξ αποστάσεως εκπαίδευση. Στην παρούσα έρευνα η πλειοψηφία των μαθητών αντιμετώπισε τεχνικά προβλήματα, τα οποία όμως δεν επηρέασαν σε μεγάλο βαθμό την ικανότητα παρακολούθησης του μαθήματος και επιλύθηκαν σχετικά άμεσα. Η εξ αποστάσεως εκπαίδευση είναι μια μορφή εκπαίδευσης, η οποία είναι άρρηκτα συνδεδεμένη με την τεχνολογία και τη χρήση ψηφιακών εργαλείων και μέσων από άλλους τρόπους διδασκαλίας και μάθησης, με αποτέλεσμα οι τεχνικές δυσκολίες να δημιουργούν συναισθήματα αβεβαιότητας στους μαθητές. Όλοι οι μαθητές αναγκάστηκαν να παρακολουθήσουν την εξ αποστάσεως εκπαίδευση ενώ είχαν συνηθίσει τη δια ζώσης εκπαίδευση με κυρίαρχα χαρακτηριστικά τον βιβλιοκεντρισμό, την απομνημόνευση, την μετωπική διδασκαλία. Αυτή η κουλτούρα της συμβατικής εκπαίδευσης δημιουργεί ιδιαίτερες δυσκολίες στους μαθητές που καλούνται να εξοικειωθούν και να υιοθετήσουν την αντίληψη της ανοικτής εξατομικευμένης μάθησης, καθώς έπρεπε να διαμορφώσουν το δικό τους ρυθμό μάθησης.

Στην εξ αποστάσεως εκπαίδευση οι δυνατότητες συνεργασίας, αλληλεπίδρασης και επικοινωνίας προβλημάτισαν αρκετά τους εκπαιδευόμενους, καθώς ήταν περιορισμένες σύμφωνα με την έρευνα. Οι προκλήσεις δεν αφορούσαν μόνο τον διαφορετικό ρόλο του εκπαιδευτικού αλλά, κυρίως, τις δεξιότητες που πρέπει να έχει αναπτύξει ώστε η επικοινωνία μεταξύ αυτού και των μαθητών του να είναι ουσιαστική. Από τα αποτελέσματα της παρούσας έρευνας διαπιστώθηκε ότι οι μαθητές έχουν αρνητικές αντιλήψεις σχετικά με την επικοινωνία και αλληλεπίδραση από τους διδάσκοντες. Η στάση των εκπαιδευτικών μέσα από τις αντιλήψεις των μαθητών παρουσιάζεται ως ουδέτερη. Παρατηρούμε να μην έχουν αναλάβει ρόλο ενεργητικό οι εκπαιδευτικοί που να τους επιτρέπει να επικοινωνούν και να αλληλεπιδρούν με τους μαθητές τους. Σύμφωνα με τον Αναστασιάδη (Anastasiades,2020) η εξ αποστάσεως εκπαίδευση απαιτεί από τους εκπαιδευτικούς να αναλάβουν νέους διευρυμένους ρόλους εστιάζοντας, εκτός από τη διδασκαλία, στη συμβουλευτική υποστήριξη των μαθητών, προκειμένου να αλληλεπιδράσουν με το εκπαιδευτικό υλικό μέσω ειδικά σχεδιασμένων δραστηριοτήτων. Επίσης, να αφιερώσουν χρόνο για τον σχεδιασμό δραστηριοτήτων, να ενθαρρύνουν, να υποστηρίζουν συναισθηματικά και ψυχολογικά τους μαθητές για να μπορέσουν να οικοδομήσουν τις γνώσεις και να επιτύχουν τους στόχους τους.

Στη δια ζώσης διδασκαλία ο εκπαιδευτικός χρησιμοποιεί το σχολικό εγχειρίδιο με στόχο την κάλυψη της διδακτέας ύλης βάση του αναλυτικού προγράμματος σπουδών. Την παιδαγωγική προσέγγιση την καλύπτει ο εκπαιδευτικός μέσω της δια ζώσης διδασκαλίας του. Στη διαμόρφωση του εκπαιδευτικού υλικού κεντρικό ρόλο διαδραματίζει η διδακτική ικανότητα του εκπαιδευτικού με τη συνδυαστική χρήση περισσότερων μέσων και μορφών

παρουσίασης των περιεχομένων. Το εκπαιδευτικό υλικό στην εξ αποστάσεως εκπαίδευση εκτός από την αρτιότητα του γνωστικού περιεχομένου χρειάζεται να διαθέτει μια σειρά από παιδαγωγικά και τεχνικά χαρακτηριστικά, που έχουν σκοπό να υποστηρίξουν και να εμψυχώσουν τους εκπαιδευόμενους στη μελέτη τους. Ανάλογα με το μοντέλο και την προσέγγιση της διδασκαλίας ο εκπαιδευτικός μπορεί να αναπλαισιώσει τη λειτουργία των ηλεκτρονικών μέσων στην εκπαιδευτική διαδικασία (Sofos et al., 2015).

Από την έρευνα προκύπτει ότι το εκπαιδευτικό υλικό που παρείχαν οι εκπαιδευτικοί δεν ήταν επαρκώς κατάλληλο, ενδιαφέρον και ολοκληρωμένο για τους μαθητές. Έτσι, δεν καταφέρνει να τους κινητοποιήσει ή να λειτουργήσει ως σημείο έλξης. Στην εξ αποστάσεως εκπαίδευση, το διδακτικό υλικό αποτελεί βασικό εργαλείο μάθησης, απαιτώντας προσεκτικό σχεδιασμό, καθώς ο μαθητής χρειάζεται υψηλό βαθμό αυτονομίας. Στο πλαίσιο της ασύγχρονης μάθησης, το υλικό πρέπει να ενσωματώνει χαρακτηριστικά που να το καθιστούν ελκυστικό, καθοδηγητικό, επεξηγηματικό και αποτελεσματικό για να επιτευχθούν οι μαθησιακοί στόχοι. Για να είναι λειτουργικό, οφείλει να ενεργοποιεί διδακτικές διαδικασίες όπως η καθοδήγηση στη μελέτη, η ενίσχυση της αλληλεπίδρασης με το περιεχόμενο, η ανατροφοδότηση, η σαφήνεια στα δύσκολα σημεία, η αξιολόγηση της προόδου, καθώς και η ενίσχυση και η ενθάρρυνση του μαθητή. Είναι σημαντικό ο μαθητής να γνωρίζει τι πρέπει να μάθει, να μπορεί να αξιολογήσει την πρόοδό του και να εντοπίζει τυχόν αδυναμίες μέσω δραστηριοτήτων αυτοαξιολόγησης, οι οποίες θα παρέχουν ουσιαστική ανατροφοδότηση (Nikolaou, 2020).

Η έρευνα αναδεικνύει τη σημαντική συμβολή στην εξ αποστάσεως εκπαίδευση της οικογένειας, η οποία παρέχει υλική, τεχνολογική και συναισθηματική υποστήριξη στα παιδιά. Αρχικά, εξασφαλίζει κατάλληλο χώρο μελέτης, όπου αυτό είναι εφικτό, καθώς και τον απαραίτητο εξοπλισμό και σύνδεση στο διαδίκτυο. Παράλληλα, στηρίζει τους μαθητές σε τεχνικά ζητήματα, διευκολύνει την εγγραφή τους στα μαθήματα και, όταν μπορεί, βοηθά στη μαθησιακή διαδικασία. Η πλειονότητα των οικογενειών είναι παρούσα σε όλα τα στάδια της εξ αποστάσεως εκπαίδευσης, ενισχύοντας τα παιδιά γνωστικά, συναισθηματικά και ψυχολογικά. Ο ρόλος του γονέα είναι ιδιαίτερα σημαντικός, καθώς αποτελεί τον βασικό υποστηρικτή της εκπαιδευτικής διαδικασίας στο σπίτι. Τα ευρήματα της έρευνας συμφωνούν με προηγούμενες μελέτες (Kelekidou et al., 2017· Anastasiades, 2020), που επιβεβαιώνουν τον καθοριστικό ρόλο της οικογένειας, ειδικά στην πρωτοβάθμια εκπαίδευση. Με την εγγραφή των παιδιών στο Πανελλήνιο Σχολικό Δίκτυο, τη διασύνδεσή τους με τις εκπαιδευτικές πλατφόρμες και την τεχνολογική υποστήριξη, οι οικογένειες συνέβαλαν ουσιαστικά στη συμμετοχή τους στα μαθήματα από απόσταση.

ΠΕΡΙΛΗΨΗ

Η συγκεκριμένη εργασία εξετάζει την εφαρμογή της Τεχνητής Νοημοσύνης (ΤΝ) στον τομέα της Φυσικής Αγωγής, με έμφαση στις γνώσεις των εκπαιδευτικών. Η χρήση της ΤΝ στην εκπαίδευση έχει επεκταθεί ραγδαία τα τελευταία χρόνια, με ιδιαίτερες δυνατότητες για την προσαρμογή και ενίσχυση της εκπαιδευτικής εμπειρίας. Στη Φυσική Αγωγή, ωστόσο, η υιοθέτηση της παραμένει περιορισμένη, κυρίως λόγω έλλειψης γνώσης και επιμόρφωσης. Η έρευνα αυτή στοχεύει στη διερεύνηση του βαθμού κατανόησης και αποδοχής της από τους εκπαιδευτικούς, εστιάζοντας στις προοπτικές ενσωμάτωσής της στη διδασκαλία.

Η μεθοδολογία της έρευνας ακολούθησε ποσοτική ερευνητική προσέγγιση και περιλάμβανε τη συλλογή δεδομένων μέσω ηλεκτρονικών ερωτηματολογίων, τα οποία διανεμήθηκαν σε καθηγητές Φυσικής Αγωγής από όλη την Ελλάδα. Το δείγμα περιλάμβανε 250 συμμετέχοντες, οι οποίοι εργάζονται τόσο στην πρωτοβάθμια όσο και στη δευτεροβάθμια εκπαίδευση. Η ανάλυση των δεδομένων πραγματοποιήθηκε με τη χρήση περιγραφικών και επαγωγικών στατιστικών τεχνικών, μέσω του λογισμικού SPSS.

Η έρευνα ανέδειξε ότι οι γνώσεις των εκπαιδευτικών σχετικά με την ΤΝ είναι γενικά περιορισμένες. Το 23,6% δήλωσε ότι δεν είναι καθόλου εξοικειωμένο ενώ το 37,2% ανέφερε χαμηλό επίπεδο εξοικείωσης. Μόνο το 32,4% δήλωσε μέτρια εξοικείωση, ενώ τα ποσοστά των εκπαιδευτικών που αισθάνονται υψηλό επίπεδο εξοικείωσης είναι πολύ χαμηλά (Πολύ: 6,0%, Πάρα πολύ: 0,8%).Η εξοικείωση με τις βασικές αρχές, όπως η λειτουργία και οι τύποι της είναι επίσης περιορισμένη, με ορισμένους να αναγνωρίζουν μόνο τις πιο διαδεδομένες εφαρμογές της τεχνολογίας. Βρέθηκε θετική συσχέτιση μεταξύ της επιμόρφωσης στις ΤΠΕ και της επιμόρφωσης στην ΤΝ ($\rho=0.176, p=0.005$). Οι εκπαιδευτικοί που έχουν λάβει επιμόρφωση στις ΤΠΕ είναι πιο πιθανό να έχουν εμπειρία ή ενδιαφέρον και για επιμόρφωση στην ΤΝ. Αυτό υποδεικνύει ότι η προηγούμενη εκπαίδευση στις τεχνολογίες γενικά αυξάνει το ενδιαφέρον για πιο εξειδικευμένους τομείς. Σχετικά με την εμπειρία τους στη χρήση της, οι περισσότεροι εκπαιδευτικοί δήλωσαν ότι δεν έχουν χρησιμοποιήσει την τεχνολογία αυτή είτε στο εκπαιδευτικό πλαίσιο είτε σε άλλους τομείς.

Τα αποτελέσματα της έρευνας ανέδειξαν έντονη την ανάγκη για επιμόρφωση των εκπαιδευτικών Φυσικής Αγωγής στον τομέα της Τεχνητής Νοημοσύνης, ενώ οι συμμετέχοντες αναγνώρισαν τη σημασία και τη χρησιμότητα τέτοιων πρωτοβουλιών για την εκπαιδευτική διαδικασία. Παρά τη σχετική έλλειψη εξοικείωσης που αναδείχθηκε στα αποτελέσματα η πλειονότητα των συμμετεχόντων αξιολόγησε την επιμόρφωση ως πολύ χρήσιμη, εύρημα που υπογραμμίζει την ανάγκη για επαγγελματική ανάπτυξη στον τομέα αυτό.

Λέξεις - κλειδιά: Τεχνητή νοημοσύνη, Φυσική Αγωγή, Γνώσεις, Εκπαίδευση.

ΠΛΑΙΣΙΟ ΚΑΙ ΣΗΜΑΣΙΑ ΤΗΣ ΕΡΕΥΝΑΣ

Η Τεχνητή Νοημοσύνη αποτελεί έναν από τους πλέον καινοτόμους τομείς της τεχνολογίας, με ευρεία εφαρμογή σε πολλούς κλάδους, μεταξύ των οποίων και η εκπαίδευση. Τα τελευταία χρόνια, η τεχνητή νοημοσύνη έχει αναδειχθεί ως ένα ισχυρό εργαλείο που προσφέρει τη δυνατότητα μετασχηματισμού της μαθησιακής εμπειρίας, προσδίδοντας νέα διάσταση στη διδασκαλία και τη μάθηση. Μέσα από τη χρήση προηγμένων τεχνολογιών, όπως η μηχανική μάθηση, η ανάλυση δεδομένων και οι προσαρμοστικοί αλγόριθμοι, η τεχνητή νοημοσύνη υπόσχεται να ενισχύσει την αποτελεσματικότητα και την αποδοτικότητα της εκπαιδευτικής διαδικασίας (L. Chen, Chen, & Lin, 2020).

Η εφαρμογή της στην εκπαίδευση δεν περιορίζεται σε θεωρητικό επίπεδο, αλλά ήδη χρησιμοποιείται ευρέως σε πολλά πεδία. Για παράδειγμα, προσαρμοστικές πλατφόρμες μάθησης, όπως το DreamBox και το Smart Sparrow, επιτρέπουν την εξατομίκευση της μαθησιακής εμπειρίας, προσαρμόζοντας το περιεχόμενο στις ανάγκες του κάθε μαθητή (Olusanya, 2023). Ταυτόχρονα, εργαλεία αξιολόγησης, όπως το Gradescope, διευκολύνουν την αυτοματοποιημένη βαθμολόγηση, εξοικονομώντας χρόνο για τους εκπαιδευτικούς (Xu, 2024). Παράλληλα, εφαρμογές ανάλυσης δεδομένων, όπως το Tableau, επιτρέπουν την καλύτερη κατανόηση της προόδου των μαθητών μέσα από την ερμηνεία μεγάλων όγκων δεδομένων (Batt, Grealis, Harmon, & Tomolonis, 2020).

Στον πυρήνα της εφαρμογής της στην εκπαίδευση βρίσκεται η δυνατότητά της να ενισχύσει τη μάθηση μέσω εξατομικευμένων προσεγγίσεων. Οι αλγόριθμοι τεχνητής νοημοσύνης μπορούν να εντοπίζουν τις ατομικές ανάγκες και προτιμήσεις των μαθητών, διαμορφώνοντας μοναδικές διαδρομές μάθησης που ανταποκρίνονται στις ιδιαιτερότητές τους. Επιπλέον, η αυτοματοποιημένη αξιολόγηση επιτρέπει την άμεση ανατροφοδότηση, προωθώντας τη βελτίωση των μαθησιακών αποτελεσμάτων. Η δυνατότητα παροχής διαρκούς υποστήριξης μέσω ψηφιακών βοηθών, όπως τα chatbots, ενισχύει την αυτονομία των μαθητών, καθιστώντας τη μάθηση πιο ενεργητική και προσανατολισμένη στις ανάγκες τους (X. Chen, Zou, Xie, Cheng, & Liu, 2022).

Η Φυσική Αγωγή, ένας τομέας που συχνά θεωρείται λιγότερο συμβατικός όσον αφορά την υιοθέτηση τεχνολογιών, διαθέτει ιδιαίτερες δυνατότητες ενσωμάτωσης της τεχνητής νοημοσύνης. Εφαρμογές ανάλυσης κίνησης, όπως το Dartfish, επιτρέπουν την ακριβή αξιολόγηση της τεχνικής των μαθητών, βοηθώντας τους να βελτιώσουν τις επιδόσεις τους. Παράλληλα, συστήματα προσαρμοσμένων προγραμμάτων άσκησης, όπως το Myzone, παρέχουν εξατομικευμένες ασκήσεις και δραστηριότητες βασισμένες στα επίπεδα φυσικής κατάστασης κάθε μαθητή. Επιπλέον, μπορούν να χρησιμοποιηθούν για την παρακολούθηση της προόδου των μαθητών, προσφέροντας στους εκπαιδευτικούς πολύτιμες πληροφορίες για τη βελτίωση της διδασκαλίας (H. S. Lee & Lee, 2021). Η ενσωμάτωση της βέβαια δεν αφορά μόνο τη βελτίωση των μαθησιακών αποτελεσμάτων, αλλά και τη δημιουργία μιας περισσότερο συμπεριληπτικής και εξατομικευμένης εμπειρίας. Η ικανότητα της να ανταποκρίνεται στις διαφορετικές ανάγκες των μαθητών, ανεξαρτήτως επιπέδου ή δεξιοτήτων, μπορεί να διαμορφώσει ένα εκπαιδευτικό περιβάλλον που προάγει τη συμμετοχικότητα και τη διαρκή εξέλιξη. Με αυτόν τον τρόπο, δεν αποτελεί απλώς ένα εργαλείο, αλλά μια πλατφόρμα που ανοίγει νέους ορίζοντες στη διδασκαλία της Φυσικής Αγωγής, καθιστώντας την πιο δυναμική και αποτελεσματική.

ΑΝΑΓΚΑΙΟΤΗΤΑ ΤΗΣ ΕΡΕΥΝΑΣ

Η σύγχρονη εκπαίδευση βρίσκεται σε μια μεταβατική περίοδο, όπου οι τεχνολογικές εξελίξεις επαναπροσδιορίζουν τις πρακτικές διδασκαλίας και μάθησης. Η Τεχνητή Νοημοσύνη αναδύεται ως ένας κρίσιμος παράγοντας μετασχηματισμού, προσφέροντας δυνατότητες εξατομικευμένης μάθησης και αξιολόγησης. Στο πλαίσιο της Φυσικής Αγωγής, ο ρόλος της είναι πολλά υποσχόμενος, ωστόσο η υιοθέτησή της δεν έχει ακόμη εδραιωθεί. Η Φυσική Αγωγή αποτελεί ένα βασικό κομμάτι για τη συνολικής ανάπτυξης των μαθητών αφού προάγει τη σωματική ευεξία, την κοινωνική αλληλεπίδραση και την πειθαρχία. Παράλληλα, η Τεχνητή Νοημοσύνη έχει αποδείξει ότι μπορεί να ενισχύσει σημαντικά τη διδασκαλία και τη μάθηση μέσω προηγμένων εργαλείων που παρέχουν εξατομικευμένη καθοδήγηση και ανατροφοδότηση. Η σύνδεση τους μπορεί να προσφέρει καινοτόμες προσεγγίσεις που ενισχύουν την εμπειρία των μαθητών, ενώ διευκολύνουν την παρακολούθηση και αξιολόγηση της προόδου τους.

Η τεχνητή νοημοσύνη μέσω συστημάτων ανάλυσης κίνησης, μπορεί να αξιολογήσει με ακρίβεια την απόδοση των μαθητών και να αναγνωρίσει τυχόν αδυναμίες στις κινήσεις ή τις τεχνικές τους. Επιπλέον, άλλες εφαρμογές της μπορούν να δημιουργήσουν εξατομικευμένα προγράμματα εκγύμνασης, λαμβάνοντας υπόψη τις ιδιαίτερες ανάγκες, τις φυσικές δυνατότητες και τους στόχους κάθε μαθητή. Για παράδειγμα, ένα μαθησιακό σύστημα βασισμένο σε μια τέτοια τεχνολογία μπορεί να παρέχει ανατροφοδότηση σε πραγματικό χρόνο κατά την εκτέλεση ασκήσεων, προτείνοντας διορθωτικές ενέργειες για τη βελτίωση της τεχνικής. Εκτός από την εξατομίκευση, η τεχνητή νοημοσύνη μπορεί να συμβάλει και στη συλλογή δεδομένων για τη φυσική δραστηριότητα των μαθητών, τα οποία μπορούν να αναλυθούν για να προκύψουν πολύτιμες πληροφορίες σχετικά με την απόδοση και την υγεία τους. Παράλληλα, οι δυνατότητες της

μπορούν να ενισχύσουν τη διδασκαλία και τη μάθηση, προάγοντας μια πιο διαδραστική και αποτελεσματική εμπειρία για τους μαθητές.

Σκοπός της εργασίας είναι η διερεύνηση των γνώσεων και η καταγραφή του βαθμού εξοικείωσης των καθηγητών Φυσικής Αγωγής στην πρωτοβάθμια και την δευτεροβάθμια εκπαίδευση σχετικά με τη χρήση της Τεχνητής Νοημοσύνης στο μάθημα τους. Μέσα από την έρευνα, θα κατανοήσουμε αν οι εκπαιδευτικοί έχουν επαρκή γνώση για τις βασικές αρχές και τις εφαρμογές της ΤΝ και αν θεωρούν ότι η ΤΝ μπορεί να συμβάλει στην προώθηση της διδασκαλίας. Επίσης, θα διερευνήσουμε τις προτιμήσεις τους για τρόπους εκπαίδευσης και τις εκπαιδευτικές ανάγκες τους. Τα αποτελέσματα της έρευνας φιλοδοξούν να υποστηρίξουν τη διαμόρφωση εκπαιδευτικών πολιτικών και πρακτικών που θα επιτρέψουν την ομαλή ενσωμάτωση της Τεχνητής Νοημοσύνης στη διδασκαλία της Φυσικής Αγωγής, διασφαλίζοντας την αποτελεσματικότητα και την αποδοχή της από την εκπαιδευτική κοινότητα και να αποσαφηνιστούν οι προοπτικές αυτής της τεχνολογίας στο μάθημα της γυμναστικής.

ΤΕΧΝΗΤΗ ΝΟΗΜΟΣΥΝΗ

Η Τεχνητή Νοημοσύνη αποτελεί ένα από τα πιο σημαντικά και πολυσυζητημένα πεδία της σύγχρονης τεχνολογίας, με ευρύ φάσμα εφαρμογών που επηρεάζουν κάθε πτυχή της ανθρώπινης ζωής. Στον πυρήνα της, ορίζεται ως η ικανότητα των μηχανών να προσομοιώνουν πτυχές της ανθρώπινης νοημοσύνης, όπως η μάθηση, η λογική, η επίλυση προβλημάτων, η αντίληψη και η γλώσσα. Αυτή η δυνατότητα έχει ως στόχο να επιτρέψει στις μηχανές να "σκέφτονται" και να "λειτουργούν" με τρόπο παρόμοιο με τους ανθρώπους και να παρέχουν λύσεις σε προβλήματα αλλά και να εκτελούν εργασίες που παραδοσιακά απαιτούσαν ανθρώπινη νοημοσύνη (Helm et al., 2020).

Βασικά ορίζεται από πολλούς ειδικούς ως η επιστήμη και η μηχανική της δημιουργίας έξυπνων συστημάτων, τα οποία μπορούν να συλλέγουν δεδομένα, να τα επεξεργάζονται και να λαμβάνουν αποφάσεις με βάση αυτά. Ο όρος "Τεχνητή Νοημοσύνη" πρωτοχρησιμοποιήθηκε το 1956 από τον John McCarthy κατά τη διάρκεια του συνεδρίου στο Dartmouth, όπου τέθηκαν οι βάσεις για το πεδίο (McCarthy, 1981). Στον πυρήνα της, επικεντρώνεται στην αναπαραγωγή πτυχών της ανθρώπινης νοημοσύνης, όπως:

- Μάθηση: Οι μηχανές μπορούν να "μαθαίνουν" από δεδομένα μέσω διαδικασιών όπως η μηχανική μάθηση και η βαθιά μάθηση όπου οι αλγόριθμοι αναλύουν τεράστια ποσά δεδομένων για να βελτιώσουν την απόδοσή τους (Helm et al., 2020).
- Λογική και επίλυση προβλημάτων: Επιδιώκει να αναπαραγάγει τη λογική σκέψη ώστε να επιτρέπει στις μηχανές να βρίσκουν λύσεις σε πολύπλοκα προβλήματα.
- Αντίληψη: Έχει τη δυνατότητα να "κατανοεί" τον κόσμο μέσω της επεξεργασίας αισθητηριακών δεδομένων, όπως εικόνες και ήχοι.
- Γλώσσα: Ένα από τα πιο ενδιαφέροντα πεδία της είναι η κατανόηση και η παραγωγή φυσικής γλώσσας, όπως φαίνεται στις εφαρμογές γλωσσικών μοντέλων και συστημάτων αυτόματης μετάφρασης (Natale & Ballatore, 2020).

Είναι σημαντικό να τη διαχωρίσουμε από άλλες σχετικές τεχνολογίες, όπως οι αυτοματισμοί οι οποίοι βασίζονται σε προγραμματισμένες οδηγίες και λειτουργούν μέσα σε σαφώς καθορισμένα όρια. Αντίθετα με αυτό η τεχνητή νοημοσύνη έχει την ικανότητα να μαθαίνει και να προσαρμόζεται σε νέα δεδομένα και καταστάσεις, χωρίς να απαιτείται εκ νέου προγραμματισμός (Saghiri, Vahidipour, Jabbarpour, Sookhak, & Forestiero, 2022). Η διαφορά αυτή καθιστά την τεχνητή νοημοσύνη ιδιαίτερα ισχυρή για την επίλυση προβλημάτων που δεν μπορούν να αντιμετωπιστούν εύκολα μέσω παραδοσιακών μεθόδων. Για παράδειγμα, οι αυτοματισμοί σε μια γραμμή παραγωγής εκτελούν τις ίδιες κινήσεις ξανά και ξανά, ενώ ένα σύστημα τεχνητής νοημοσύνης μπορεί να βελτιώσει τις διαδικασίες παραγωγής με ανάλυση των δεδομένων σε πραγματικό χρόνο και να προσαρμόζει τη λειτουργία του ανάλογα με τις συνθήκες (Jha, Doshi, Patel, & Shah, 2019).

Η βάση της σύγχρονης τεχνητής νοημοσύνης είναι η μηχανική μάθηση η οποία στην ουσία επιτρέπει στις μηχανές να "μαθαίνουν" από δεδομένα χωρίς να είναι σαφώς προγραμματισμένες. Η βαθιά μάθηση άλλος ένας όρος που ακούγεται συχνά, αποτελεί εξέλιξη της μηχανικής μάθησης και είναι βασισμένη σε νευρωνικά δίκτυα που μιμούνται τον τρόπο λειτουργίας του ανθρώπινου εγκεφάλου. Αυτή η τεχνολογία έχει οδηγήσει σε εντυπωσιακά επιτεύγματα, όπως η αναγνώριση προσώπων, η αυτόνομη οδήγηση και οι αυτόματες διαγνώσεις στην υγειονομική περίθαλψη (Dimiduk, Holm, & Niezgoda, 2018). Η κατανόηση του τι είναι η τεχνητή νοημοσύνη είναι απαραίτητο για να αντιληφθούμε τις δυνατότητες και τους περιορισμούς της. Ως πολυδιάστατη τεχνολογία, όχι μόνο αλλάζει τον τρόπο που ζούμε, αλλά θέτει και ηθικές προκλήσεις που πρέπει να αντιμετωπιστούν καθώς συνεχίζουμε να την εξελίσσουμε.

ΦΥΣΙΚΗ ΑΓΩΓΗ

Η Φυσική Αγωγή αποτελεί έναν θεμέλιο λίθο της εκπαίδευσης αφού συνδέει τη σωματική άσκηση με τη συνολική ανάπτυξη του ανθρώπου. Από την αρχαιότητα ακόμα έως και τη σύγχρονη εποχή, η Φυσική Αγωγή έχει διαμορφωθεί μέσα από πολιτισμικές, κοινωνικές και πολιτικές αλλαγές και αντικατοπτρίζει τις εκάστοτε αντιλήψεις για την υγεία, την εκπαίδευση και τον ρόλο του σώματος. Στη σύγχρονη εποχή δεν περιορίζεται μόνο στη σωματική δραστηριότητα, αλλά προάγει τη λεγόμενη ολιστική προσέγγιση για την υγεία και την ευεξία. Μέσα από τη χρήση καινοτόμων τεχνολογιών πλέον, όπως τα συστήματα παρακολούθησης φυσικής δραστηριότητας και τα εξατομικευμένα προγράμματα άσκησης, κατέχει ένα σημαντικό ρόλο στην καλλιέργεια υγιών συνηθειών και την εκπαίδευση για τη δια βίου άσκηση. Έχει εξελιχθεί σε ένα πολυδιάστατο πεδίο που συνδυάζει επιστημονική γνώση, κοινωνικές πρωτοβουλίες και διεθνή συνεργασία. Ο ρόλος της πλέον ξεπερνά την παραδοσιακή διδασκαλία σωματικών δεξιοτήτων, επικεντρώνοντας στην ολιστική ανάπτυξη του ανθρώπου, την κοινωνική δικαιοσύνη και τη βιωσιμότητα.

Η διδασκαλία της Φυσικής Αγωγής έχει υποστεί σημαντικές αλλαγές τις τελευταίες δεκαετίες αντικατοπτρίζοντας τις ραγδαίες εξελίξεις στην τεχνολογία, τις κοινωνικές ανάγκες και τα επιστημονικά δεδομένα (Collins, 2011). Ενώ παλαιότερα επικεντρωνόταν κυρίως στη φυσική δραστηριότητα και την καλλιέργεια της φυσικής κατάστασης, σήμερα η προσέγγισή της είναι πολυδιάστατη, με έμφαση στην ολιστική ανάπτυξη του ατόμου. Η UNESCO, ως ο κορυφαίος διεθνής οργανισμός για την εκπαίδευση, την επιστήμη και τον πολιτισμό, έχει διαδραματίσει καθοριστικό ρόλο στην προώθηση και ενίσχυση της φυσικής αγωγής κατά τον 21ο αιώνα. Αναγνωρίζοντας τη σημασία της φυσικής αγωγής για την ολόπλευρη ανάπτυξη του ανθρώπου, έχει αναλάβει πρωτοβουλίες που στοχεύουν στη βελτίωση της ποιότητας, της προσβασιμότητας και της ένταξης της φυσικής αγωγής σε παγκόσμιο επίπεδο (Uhlenbrock & Meier, 2018).

Παράλληλα, οι κοινωνικές αλλαγές έχουν συμβάλει στη διαμόρφωση νέων στόχων και προτεραιοτήτων αφού οι αυξημένες απαιτήσεις για ενσωμάτωση και ίσες ευκαιρίες στην εκπαίδευση έχουν οδηγήσει στην ανάπτυξη πρακτικών που ενθαρρύνουν τη συμμετοχή όλων των μαθητών, ανεξάρτητα από τις φυσικές ή κοινωνικοοικονομικές τους συνθήκες. Σημαντική είναι και η έμφαση στη βιωσιμότητα και την περιβαλλοντική συνείδηση που έχει επίσης φέρει τη φύση στο επίκεντρο προωθώντας δραστηριότητες που ενισχύουν τη σύνδεση των μαθητών με το φυσικό περιβάλλον.

Τέλος, τα ερευνητικά δεδομένα έχουν παίξει καθοριστικό ρόλο στην αναμόρφωση της διδασκαλίας της γυμναστικής. Για παράδειγμα επιστημονικές μελέτες έχουν αποδείξει τη σημασία της φυσικής δραστηριότητας για τη σωματική, ψυχική και κοινωνική υγεία και έχουν οδηγήσει στη διαμόρφωση προγραμμάτων που βασίζονται σε τεκμήρια και έχουν σχεδιαστεί για να ανταποκρίνονται στις ανάγκες των μαθητών. Η συνεργασία ανάμεσα σε ερευνητές και εκπαιδευτικούς έχει οδηγήσει στη δημιουργία καινοτόμων μεθόδων διδασκαλίας που προάγουν τη βιωματική μάθηση, την ανάπτυξη δεξιοτήτων ζωής και την καλλιέργεια αξιών.

ΤΕΧΝΗΤΗ ΝΟΗΜΟΣΥΝΗ ΣΤΗΝ ΦΥΣΙΚΗ ΑΓΩΓΗ

Η Τεχνητή Νοημοσύνη έχει φέρει επανάσταση στη Φυσική Αγωγή, με τα συστήματα ανάλυσης κίνησης να αποτελούν ένα από τα πιο προηγμένα εργαλεία που έχουν ενσωματωθεί στον τομέα αυτό. Τα συστήματα ανάλυσης κίνησης αξιοποιούν τεχνολογίες τεχνητής νοημοσύνης, όπως επεξεργασία εικόνας, μηχανική μάθηση και αισθητήρες, για να παρακολουθούν, να αναλύουν και να βελτιώνουν την ανθρώπινη κίνηση. Ο στόχος αυτών των συστημάτων είναι να παρέχουν ακριβείς και λεπτομερείς πληροφορίες για την απόδοση, να εντοπίζουν αδυναμίες και να βοηθούν στην πρόληψη τραυματισμών, βελτιώνοντας έτσι την ποιότητα της φυσικής αγωγής και της αθλητικής απόδοσης (H. S. Lee & Lee, 2021). Τα συστήματα ανάλυσης κίνησης βασίζονται σε προηγμένες τεχνολογίες καταγραφής δεδομένων. Η διαδικασία ξεκινά με τη συλλογή δεδομένων από αισθητήρες ή κάμερες που τοποθετούνται σε στρατηγικά σημεία του σώματος ή του περιβάλλοντος. Οι αισθητήρες αυτοί, όπως το επιταχυνσιόμετρο και το γυροσκόπιο, καταγράφουν πληροφορίες για την ταχύτητα, την επιτάχυνση, τη γωνία κίνησης και άλλες παραμέτρους. Οι κάμερες, από την άλλη, χρησιμοποιούν τεχνολογίες όπως τα συνελικτικά νευρωνικά δίκτυα (CNNs) για την αναγνώριση και παρακολούθηση σημείων κίνησης στο σώμα. Έπειτα, τα δεδομένα αυτά επεξεργάζονται από αλγορίθμους, οι οποίοι εντοπίζουν μοτίβα, μετρούν αποκλίσεις από τις ιδανικές κινήσεις και παρέχουν αναλυτικά αποτελέσματα (Y. Wang, Han, & Wang, 2022).

Στον σχεδιασμό και την παρακολούθηση προγραμμάτων άσκησης η Τεχνητή Νοημοσύνη έχει επιφέρει σημαντικές αλλαγές στον τομέα της Φυσικής Αγωγής, αφού την κάνει πιο εξατομικευμένη και αποτελεσματική. Μέσω προηγμένων αλγορίθμων, πλατφόρμες μπορούν να συλλέγουν και να αναλύουν δεδομένα από διάφορες πηγές, όπως φορητές συσκευές, αισθητήρες και εφαρμογές, και να προσαρμόζουν τα προγράμματα άσκησης στις μοναδικές ανάγκες κάθε ατόμου. Η διαδικασία αυτή περιλαμβάνει τη συλλογή δεδομένων, την ανάλυση προτύπων, τη δημιουργία

κατάλληλων προγραμμάτων άσκησης και τη συνεχή παρακολούθηση της προόδου (T. Zhou, Wu, Wang, Wang, & Zhang, 2024). Οι πλατφόρμες που χρησιμοποιούνται για αυτόν τον σκοπό συνδυάζουν τεχνολογίες μηχανικής μάθησης, αναγνώρισης προτύπων και ανάλυσης δεδομένων σε πραγματικό χρόνο. Εφαρμογές όπως το MyFitnessPal και το Strava χρησιμοποιούν δεδομένα δραστηριότητας, όπως βήματα, απόσταση και καρδιακό ρυθμό, για να παρέχουν στο χρήστη εξατομικευμένα σχέδια φυσικής δραστηριότητας. Αυτές οι εφαρμογές αξιοποιούν δεδομένα που συλλέγονται από φορητές συσκευές, όπως έξυπνα ρολόγια και fitness trackers, και παρέχουν πληροφορίες για την απόδοση, καθώς και προτάσεις για την επίτευξη συγκεκριμένων στόχων φυσικής κατάστασης (Farrokhi, Farahbakhsh, Rezazadeh, & Minerva, 2021).

Τα παραπάνω διευκολύνουν τους εκπαιδευτικούς να παρακολουθούν τις επιδόσεις των μαθητών, να εντοπίζουν αδυναμίες και να προσαρμόζουν τις ασκήσεις στις ανάγκες κάθε ατόμου. Παράλληλα, τα δεδομένα που συλλέγονται από αυτούς τους μαθητές μπορούν να αποθηκευτούν και να χρησιμοποιηθούν για την κατανόηση της συνολικής προόδου μιας τάξης, παρέχοντας στους εκπαιδευτικούς πολύτιμα στατιστικά στοιχεία. Η ανάλυση δεδομένων παίζει επίσης ρόλο στη βελτιστοποίηση αυτών των προγραμμάτων. Μέσα από την επεξεργασία δεδομένων απόδοσης, όπως η μέγιστη κατανάλωση οξυγόνου (VO2 max), η καρδιακή συχνότητα και η δύναμη των μυών, τα συστήματα μπορούν να προσδιορίσουν τις πιο αποτελεσματικές στρατηγικές εκπαίδευσης όπως περισσότερο χρόνο αποκατάστασης μεταξύ των ασκήσεων ή ότι οι ασκήσεις ευλυγισίας πρέπει να έχουν προτεραιότητα (Chase, 2020).

ΜΕΘΟΔΟΛΟΓΙΑ

Το δείγμα της παρούσας έρευνας αποτελείται από 250 εκπαιδευτικούς Φυσικής Αγωγής, οι οποίοι εργάζονται στην πρωτοβάθμια και δευτεροβάθμια εκπαίδευση. Περιλαμβάνει εκπαιδευτικούς από ένα ευρύ ηλικιακό φάσμα από 22 έως 60+ ετών. Βέβαια η πλειονότητα των συμμετεχόντων ανήκει στις ηλικιακές ομάδες 41-50 ετών και 51-60 ετών, γεγονός που αντανακλά την εμπειρία των εκπαιδευτικών Φυσικής Αγωγής, καθώς πρόκειται κυρίως για άτομα με πολυετή προϋπηρεσία. Υπάρχει σχεδόν ισοκατανομή στα δύο φύλα με 131 άντρες και 118 γυναίκες γεγονός που συμβάλλει στην αντιπροσωπευτικότητα του δείγματος όσον αφορά την εκπροσώπηση των ανδρών και γυναικών στον χώρο της Φυσικής Αγωγής. Αντίστοιχη ισοκατανομή υπάρχει και στη συμμετοχή από πρωτοβάθμια και δευτεροβάθμια εκπαίδευση. Όσον αφορά το μορφωτικό επίπεδο, το δείγμα μας πάλι θεωρείται αντιπροσωπευτικό αφού οι μισοί σχεδόν είναι κάτοχοι πτυχίου, και οι άλλοι μισοί κατέχουν μεταπτυχιακό δίπλωμα, ενώ ένα μικρό ποσοστό διαθέτει διδακτορικό τίτλο. Η παρουσία υψηλού ποσοστού εκπαιδευτικών με μεταπτυχιακή και διδακτορική εκπαίδευση υποδηλώνει έναν καλά καταρτισμένο πληθυσμό εκπαιδευτικών, στοιχείο που ενισχύει την εγκυρότητα των απόψεων και των γνώσεων τους σχετικά με τη χρήση της τεχνητής νοημοσύνης στην εκπαίδευση.

Η επιλογή της ποσοτικής μεθόδου για την παρούσα έρευνα βασίστηκε στην ανάγκη να προσεγγιστεί το ερευνητικό ζήτημα με αντικειμενικό και μετρήσιμο τρόπο. Ο κύριος στόχος της μελέτης μας είναι να καταγράψουμε τις γνώσεις των εκπαιδευτικών Φυσικής Αγωγής σχετικά με τη χρήση της τεχνητής νοημοσύνης στο εκπαιδευτικό τους έργο. Τα ερωτήματα της έρευνας μας απαιτούν μια μεθοδολογική προσέγγιση που να εξασφαλίζει τη συλλογή δεδομένων από μεγάλο δείγμα συμμετεχόντων, την εξαγωγή γενικεύσιμων συμπερασμάτων και τη δυνατότητα σύγκρισης αποτελεσμάτων και η ποσοτική μέθοδος ανταποκρίνεται ιδανικά σε αυτές τις απαιτήσεις. Η συγκεκριμένη μέθοδος μας επέτρεψε να μετρήσουμε με ακρίβεια τις γνώσεις των εκπαιδευτικών μέσω δομημένων ερωτηματολογίων, τα οποία είναι σχεδιασμένα ώστε να εξασφαλίζουν τη συνέπεια και τη στατιστική αξιοπιστία των απαντήσεων.

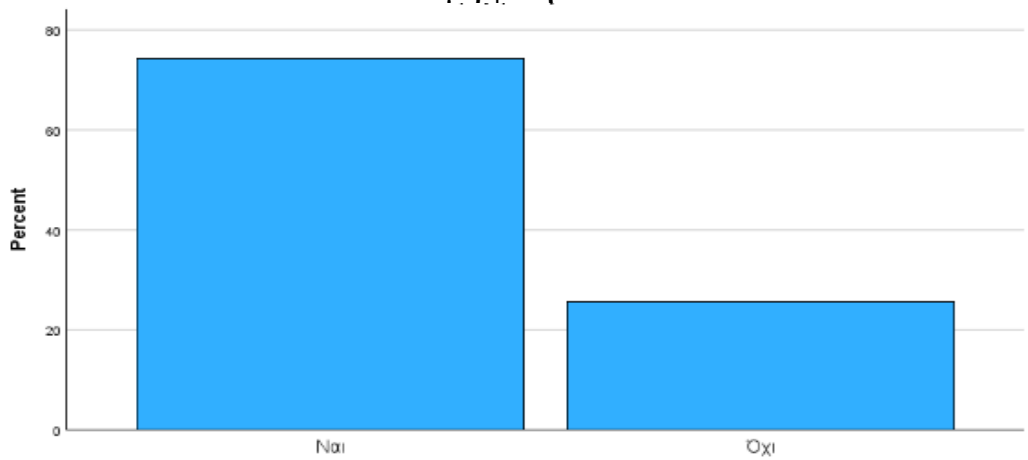
Πίνακας 1
Δείκτης Αξιοπιστίας Cronbach's Alpha

Στάδιο	Cronbach's Alpha	M.T Κλίμακας	T.A	Χαμηλότερη Corrected Item-Total Correlation
Αρχή	0.86	3.85	0.72	0.35
Τέλος	0.88	3.87	0.7	0.42

Το ερωτηματολόγιο που χρησιμοποιήθηκε στην παρούσα έρευνα σχεδιάστηκε με στόχο τη συλλογή δεδομένων που να αντικατοπτρίζουν τις γνώσεις των εκπαιδευτικών Φυσικής Αγωγής σχετικά με τη χρήση της τεχνητής νοημοσύνης στη διδασκαλία. Ο σχεδιασμός του ακολούθησε μια συστηματική μεθοδολογία, ώστε να διασφαλιστεί η εγκυρότητα, η αξιοπιστία και η σαφήνεια των ερωτήσεων, αλλά και η συνάφεια τους με τους στόχους της έρευνας. Για τη συλλογή δεδομένων στην παρούσα έρευνα χρησιμοποιήθηκε συνδυασμός δειγματοληψίας ευκολίας και στοχευμένης δειγματοληψίας, δύο μεθόδων που ενσωματώθηκαν για να εξασφαλίσουν τόσο την πρακτικότητα όσο και τη στόχευση του πληθυσμού που μας ενδιέφερε. Για την αξιολόγηση της αξιοπιστίας του ερωτηματολογίου, πραγματοποιήσαμε έλεγχο εσωτερικής συνέπειας μέσω του δείκτη Cronbach's Alpha (Πίνακας 1). Ο αρχικός Cronbach's Alpha για όλη την κλίμακα ήταν 0,86, υποδεικνύοντας ικανοποιητική εσωτερική συνοχή. Εξετάσαμε τις "Corrected Item-Total

Correlations" για κάθε ερώτηση. Μια συγκεκριμένη ερώτηση παρουσίαζε χαμηλότερη συσχέτιση (0,35), κάτι που υποδείκνυε ότι δεν ευθυγραμμιζόταν πλήρως με την υπόλοιπη κλίμακα. Αφαιρώντας την ερώτηση αυτή, ο δείκτης Cronbach's Alpha αυξήθηκε από 0,86 σε 0,88, βελτιώνοντας περαιτέρω τη συνοχή του εργαλείου.

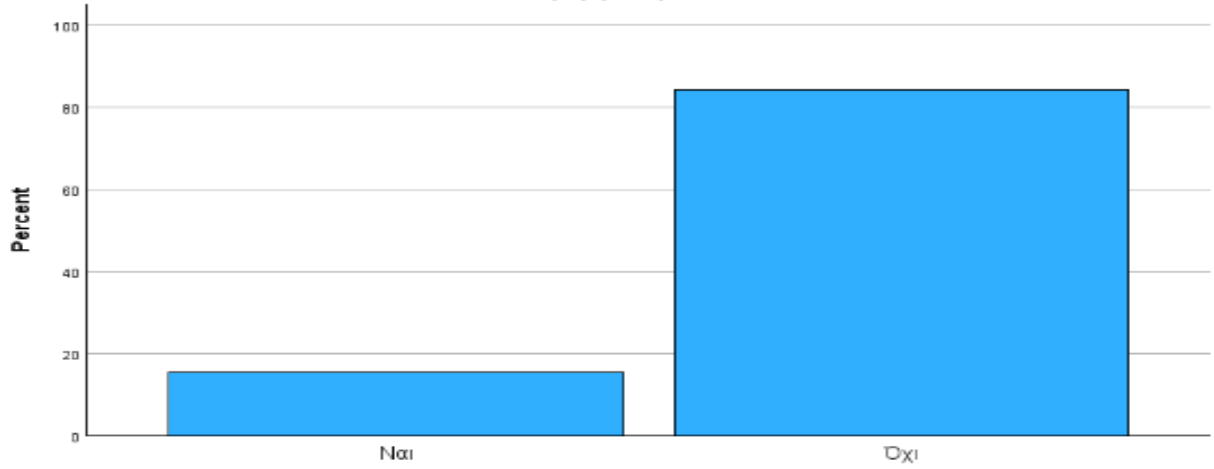
ΑΠΟΤΕΛΕΣΜΑΤΑ



Στο πλαίσιο της παρούσας έρευνας, τα δεδομένα συλλέχθηκαν μέσω ηλεκτρονικών ερωτηματολογίων με το εργαλείο Google Forms, τα οποία συμπληρώθηκαν από τους συμμετέχοντες. Οι απαντήσεις εξήχθησαν σε αρχείο Excel, όπου πραγματοποιήθηκε η αρχική επεξεργασία και κωδικοποίηση των δεδομένων. Αφού ολοκληρώθηκε η κωδικοποίηση, τα δεδομένα εισήχθησαν στο στατιστικό λογισμικό SPSS (Statistical Package for the Social Sciences), το οποίο αποτελεί ένα από τα πιο ευρέως χρησιμοποιούμενα εργαλεία για την ανάλυση κοινωνικών επιστημών.

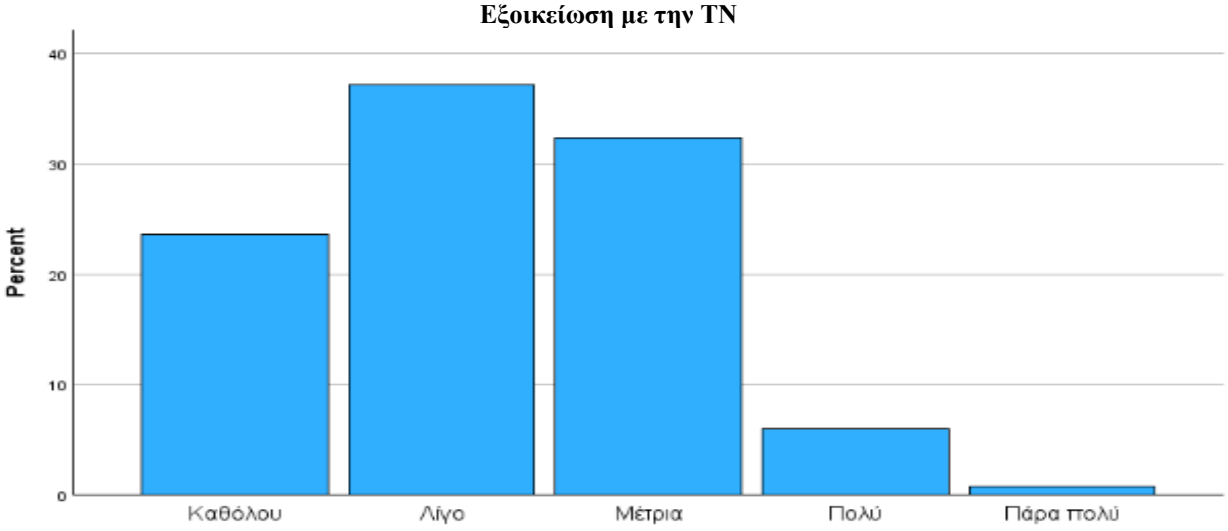
Όσον αφορά την ηλικιακή κατανομή, η πλειονότητα των συμμετεχόντων, σε ποσοστό 49,6%, ανήκει στην ηλικιακή ομάδα 51-60 ετών, γεγονός που υποδηλώνει ότι το δείγμα περιλαμβάνει κυρίως εκπαιδευτικούς με πολυετή εμπειρία. Η δεύτερη μεγαλύτερη ομάδα είναι οι 41-50 ετών με ποσοστό 25,6%. Οι νεότερες ηλικιακές ομάδες, 31-40 ετών και 22-30 ετών, αποτελούν μικρότερα ποσοστά, 12% και 4,8% αντίστοιχα. Τέλος, το 8% του δείγματος ήταν μεγαλύτεροι από 60 ετών. Η κατανομή του φύλου αντίθετα ήταν αρκετά ισορροπημένη. Οι άνδρες αποτελούν την πλειονότητα με ποσοστό 52,4%, ενώ οι γυναίκες ακολουθούν με ποσοστό 47,2%. Μόλις 1 άτομο από το σύνολο των συμμετεχόντων δήλωσε διαφορετική ταυτότητα φύλου. Η ανάλυση της επαγγελματικής εμπειρίας δείχνει μια σημαντική διαφοροποίηση στο δείγμα. Το 46,4% των συμμετεχόντων έχουν περισσότερα από 21 χρόνια προϋπηρεσίας, κάτι που επιβεβαιώνει την εμπειρία και τη σταθερότητα του εκπαιδευτικού προσωπικού στο δείγμα όπως το υποθέσαμε από τα αποτελέσματα στην ηλικία. Αντίθετα, το 19,6% έχει 0-5 χρόνια προϋπηρεσίας, ενώ τα ποσοστά μειώνονται για τις ενδιάμεσες κατηγορίες: 6-10 χρόνια (15,6%), 16-20 χρόνια (10%) και 11-15 χρόνια (8,4%). Όσον αφορά το μορφωτικό επίπεδο, η πλειονότητα των εκπαιδευτικών διαθέτει υψηλό επίπεδο εκπαίδευσης. Συγκεκριμένα, το 48% των συμμετεχόντων κατέχει μόνο πτυχίο, το 46,8% έχει ολοκληρώσει μεταπτυχιακές σπουδές, ενώ ένα μικρότερο ποσοστό, 5,2%, κατέχει διδακτορικό τίτλο. Τα δεδομένα αυτά δείχνουν μια σημαντική εκπαιδευτική βάση στο δείγμα.

Σχετικά με το σχολείο που εργάζονται, η πλειονότητα εργάζεται σε δημόσια σχολεία, με ποσοστό 92%, ενώ μόνο το 8% εργάζεται σε ιδιωτικά σχολεία. Αν και στο ελληνικό εκπαιδευτικό σύστημα η δημόσια εκπαίδευση κυριαρχεί, από την κατανομή συμπεραίνουμε πως δεν είναι γενικεύσιμο για τα ιδιωτικά σχολεία. Όσο αφορά τη βαθμίδα εκπαίδευσης, το 57,2% των συμμετεχόντων εργάζεται στην πρωτοβάθμια εκπαίδευση, ενώ το 42,8% εργάζεται στη δευτεροβάθμια. Σε αντίθεση με το προηγούμενο, αυτή η κατανομή υποδηλώνει ότι το δείγμα αντιπροσωπεύει επαρκώς και τις δύο βαθμίδες του εκπαιδευτικού συστήματος.



Επιμορφώσεις που έχουν παρακολουθήσει οι συγκεκριμένοι εκπαιδευτικοί. Σημαντική πλειονότητα των συμμετεχόντων, σε ποσοστό 74,4%, δήλωσαν ότι έχουν παρακολουθήσει κάποια επιμόρφωση στις ΤΠΕ (Διάγραμμα 1), υποδεικνύοντας την ευρεία διάδοση τέτοιων εκπαιδευτικών πρωτοβουλιών ενώ το ¼ 25,6% δεν έχει συμμετάσχει σε τέτοιες επιμορφώσεις.

Διάγραμμα 1
Επιμόρφωση ΤΠΕ

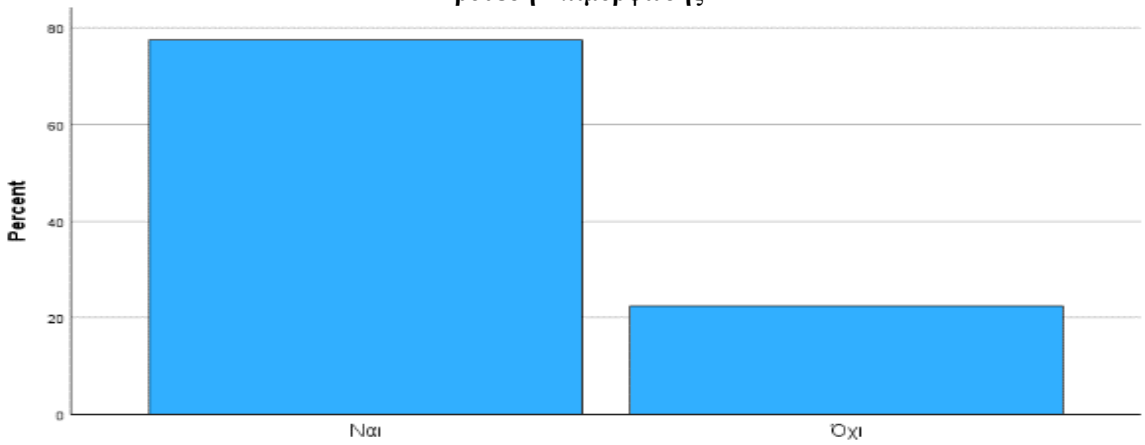


Σε αντίθεση μόνο το 15,6% των συμμετεχόντων έχουν παρακολουθήσει επιμόρφωση πάνω στην Τεχνητή Νοημοσύνη (Διάγραμμα 2), ενώ το 84,4% δήλωσαν ότι δεν έχουν λάβει τέτοιου είδους εκπαίδευση. Αυτό το εύρημα υποδηλώνει την περιορισμένη διάδοση εκπαιδευτικών πρωτοβουλιών σχετικών με την Τεχνητή Νοημοσύνη, παρά τη διαρκώς αυξανόμενη σημασία της στον εκπαιδευτικό τομέα.

Διάγραμμα 2
Επιμόρφωση ΤΝ

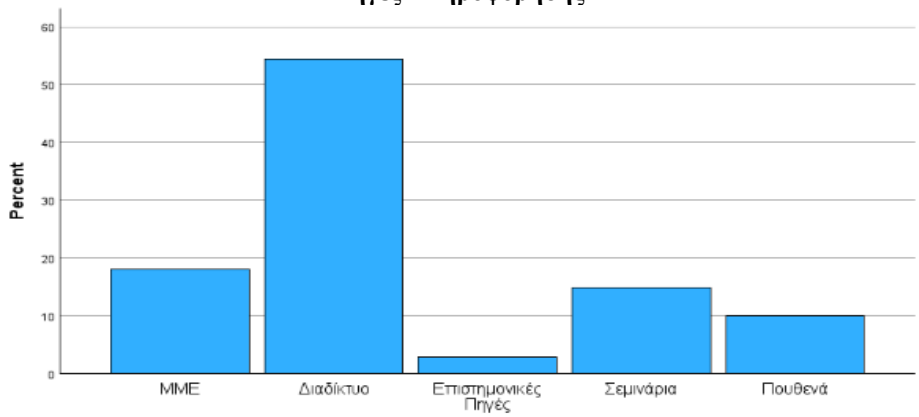
Το επίπεδο εξοικείωσης των συμμετεχόντων με την Τεχνητή Νοημοσύνη εμφανίζεται σχετικά χαμηλό (Διάγραμμα 3). Συγκεκριμένα το 23,6% δήλωσε ότι δεν είναι καθόλου εξοικειωμένο ενώ το 37,2% ανέφερε χαμηλό επίπεδο εξοικείωσης (Λίγο). Μόνο το 32,4% δήλωσε μέτρια εξοικείωση, ενώ τα ποσοστά των εκπαιδευτικών που αισθάνονται υψηλό επίπεδο εξοικείωσης είναι πολύ χαμηλά (Πολύ: 6,0%, Πάρα πολύ: 0,8%). Η γενική εικόνα υποδηλώνει ότι η εξοικείωση των εκπαιδευτικών φυσικής αγωγής είναι περιορισμένη, με την πλειονότητα των συμμετεχόντων να έχει μικρή ή καμία επαφή με αυτές τις έννοιες. Αυτό αναδεικνύει την ανάγκη για εκπαιδευτικές πρωτοβουλίες που θα ενισχύσουν τη γνώση και την εξοικείωση με αυτήν την τεχνολογία.

Διάγραμμα 3
Εξοικείωση με την ΤΝ



Το θετικό είναι πως η διάθεση για εκπαίδευση σε αυτό το νέο εργαλείο είναι έντονη. Το 77,6% των συμμετεχόντων θα ενδιαφερόταν να παρακολουθήσει ένα σχετικό πρόγραμμα εκπαίδευσης ή σεμινάριο (Διάγραμμα 4) και μόνο το 22,4% δήλωσε ότι δεν ενδιαφέρεται.

Σχετικά με τις πηγές πληροφόρησης τους, η πλειονότητα των συμμετεχόντων (54,4%) βασίζεται στο διαδίκτυο και τα μέσα κοινωνικής δικτύωσης (Διάγραμμα 5). Τα ειδησεογραφικά μέσα, όπως η τηλεόραση, οι εφημερίδες και τα περιοδικά, αποτελούν πηγή πληροφόρησης για το 18% των συμμετεχόντων, ενώ μόλις το 2,8% αντλεί πληροφορίες από



επιστημονικά άρθρα ή βιβλία. Επιπλέον, το 14,8% των συμμετεχόντων ενημερώνεται μέσω σεμιναρίων και εκπαιδευτικών προγραμμάτων, ενώ το 10% δήλωσε ότι δεν έχει λάβει καμία πληροφορία για την TN. Η επικράτηση του διαδικτύου και των μέσων κοινωνικής δικτύωσης υποδηλώνει ότι οι πληροφορίες είναι εύκολα προσβάσιμες, αλλά ενδέχεται να μην είναι πάντα επαρκώς τεκμηριωμένες ή αξιόπιστες. Η χαμηλή χρήση επιστημονικών πηγών αναδεικνύει την ανάγκη για πρόσβαση σε ποιοτικότερη πληροφόρηση.

Διάγραμμα 4
Πρόθεση Επιμόρφωσης

Ένας τρόπος να εντοπίσουμε αν γνωρίζουν αυτή τη νέα τεχνολογία ήταν η ερώτηση που τους ζητούσε να επιλέξουν αν γνωρίζουν διάφορα είδη τεχνητής νοημοσύνης. Η Ανάλυση Εικόνας αναδείχθηκε ως η πιο γνωστή τεχνολογία, καθώς το 52% των συμμετεχόντων την αναγνώρισε. Ακολουθεί η Παραγωγική TN, με το 40,8% να δηλώνει εξοικείωση, και η Μηχανική Μάθηση, που αναγνωρίστηκε από το 31,2%. Αντίθετα, η Βαθιά Μάθηση, μια πιο εξειδικευμένη τεχνολογία, είναι γνωστή μόνο στο 8,8% των συμμετεχόντων. Παράλληλα, ένα ποσοστό 9,6% δήλωσε ότι δεν έχει καμία γνώση για τις παραπάνω τεχνολογίες. Τα δεδομένα δείχνουν ότι το 61,2% των συμμετεχόντων δεν έχει ακούσει για την εφαρμογή της TN στη Φυσική Αγωγή, ενώ μόνο το 38,8% δήλωσε εξοικείωση. Αυτό υποδηλώνει ότι η περιορισμένη γνώση για τα υπάρχοντα εργαλεία αποτελεί σημαντικό εμπόδιο για την αποδοχή και την υιοθέτησή τους.

Διάγραμμα 5.
Πηγές Πληροφόρησης

Σχετικά με την εξοικείωση με κάποια από τα διαθέσιμα εργαλεία τεχνητής νοημοσύνης που μπορούν να χρησιμοποιηθούν στη Φυσική Αγωγή παρατηρήσαμε πως είναι περιορισμένη. Το εργαλείο Mirror αναγνωρίστηκε από το 31,2% των συμμετεχόντων, ακολουθούμενο από το Athos, το οποίο ήταν γνωστό στο 30,8%. Το Onyx καταγράφηκε ότι το γνώριζαν στο 20,8%, ενώ το Tonal είχε μικρότερη εξοικείωση, με το 16,8% των συμμετεχόντων να το γνωρίζουν. Παράλληλα, ένα 18,8% δήλωσε ότι δεν γνωρίζει κανένα από τα παραπάνω εργαλεία. Σημαντικό είναι πως στην επιλογή άλλο δεν καταγράφηκε καμία άλλη εφαρμογή.

Τα δεδομένα μας δεν πληρούν τις προϋποθέσεις κανονικότητας, και ως εκ τούτου χρησιμοποιήσαμε μη παραμετρικά τεστ για τις περαιτέρω αναλύσεις από τα οποία προέκυψαν οι παρακάτω συσχετίσεις.

Επιμόρφωση στις ΤΠΕ και Επιμόρφωση στην ΤΝ

Υπάρχει θετική συσχέτιση μεταξύ της Επιμόρφωσης στις ΤΠΕ και της Επιμόρφωσης στην ΤΝ (ρ=0.176,p=0.005). Οι εκπαιδευτικοί που έχουν λάβει επιμόρφωση στις ΤΠΕ είναι πιο πιθανό να έχουν εμπειρία ή ενδιαφέρον και για επιμόρφωση στην ΤΝ. Αυτό υποδεικνύει ότι η προηγούμενη εκπαίδευση στις τεχνολογίες γενικά αυξάνει το ενδιαφέρον για πιο εξειδικευμένους τομείς.

Πίνακας 2.
Επιμόρφωση στις ΤΠΕ και στην ΤΝ.

Διαδίκτυο για Ιδέες και Εξοικείωση με την ΤΝ

Η χρήση του Διαδικτύου για Ιδέες σχετίζεται θετικά με την Εξοικείωση με την ΤΝ (ρ=0.192,p=0.002). Οι εκπαιδευτικοί που ανατρέχουν συχνά στο διαδίκτυο για ιδέες διδασκαλίας φαίνεται να είναι πιο εξοικειωμένοι με την τεχνητή νοημοσύνη. Το διαδίκτυο προσφέρει πολλές πηγές πληροφόρησης και για αυτή τη τεχνολογία, γεγονός που μπορεί να ενισχύει την εξοικείωση.

Πίνακας 3.
Διαδίκτυο και Εξοικείωση με την ΤΝ

Διαδίκτυο για Ιδέες - Εξοικείωση με την ΤΝ	0.192	0.002

Εξοικείωση με την ΤΝ και Στάση Ενσωμάτωσης

Η Εξοικείωση με την ΤΝ συσχετίζεται θετικά με τη Στάση Ενσωμάτωσης (ρ=0.303,p<0.001). Όσο πιο εξοικειωμένοι είναι οι εκπαιδευτικοί με την τεχνητή νοημοσύνη, τόσο πιο θετικά αξιολογούν την ενσωμάτωσή της στη διδασκαλία. Αυτή η συσχέτιση δείχνει ότι η εξοικείωση μειώνει τον φόβο ή την επιφυλακτικότητα και προάγει θετικές στάσεις.

ΣΥΝΟΨΙΖΟΝΤΑΣ ΤΑ ΕΥΡΗΜΑΤΑ

Η έρευνα ανέδειξε ότι οι γνώσεις των εκπαιδευτικών σχετικά με την τεχνητή νοημοσύνη είναι γενικά περιορισμένες. Μόνο ένα μικρό ποσοστό των συμμετεχόντων δήλωσε ότι έχει μέτρια ή υψηλή εξοικείωση, ενώ η πλειονότητα εμφανίζει χαμηλό επίπεδο γνώσεων ή πλήρη άγνοια. Η εξοικείωση με τις βασικές αρχές, όπως η λειτουργία και οι τύποι της (π.χ., μηχανική μάθηση, βαθιά μάθηση, ανάλυση εικόνας), είναι επίσης περιορισμένη, με ορισμένους να αναγνωρίζουν μόνο τις πιο διαδεδομένες εφαρμογές της τεχνολογίας.

Οι πηγές πληροφόρησης που χρησιμοποιούν οι εκπαιδευτικοί για να ενημερωθούν σχετικά περιλαμβάνουν κυρίως το διαδίκτυο και τα μέσα κοινωνικής δικτύωσης, τα οποία αναφέρονται από την πλειονότητα των συμμετεχόντων. Ωστόσο, αυτή η εξάρτηση από ανεπίσημες πηγές πληροφόρησης εγείρει ερωτήματα για την ποιότητα και την εγκυρότητα των πληροφοριών που λαμβάνουν. Παράλληλα, παρατηρείται χαμηλή χρήση επιστημονικών πηγών, όπως άρθρα, βιβλία ή εξειδικευμένα εκπαιδευτικά προγράμματα. Αυτή η τάση δείχνει την έλλειψη πρόσβασης ή ενδιαφέροντος για πιο τεκμηριωμένη και ποιοτική πληροφόρηση.

Σχετικά με την εμπειρία τους στη χρήση της, οι περισσότεροι εκπαιδευτικοί δήλωσαν ότι δεν έχουν χρησιμοποιήσει την τεχνολογία αυτή είτε στο εκπαιδευτικό πλαίσιο είτε σε άλλους τομείς. Ορισμένοι ανέφεραν εμπειρία από τη χρήση εφαρμογών σε προσωπικό επίπεδο, όπως εφαρμογές παρακολούθησης φυσικής κατάστασης ή υγείας, αλλά αυτή η εμπειρία δεν φαίνεται να έχει μεταφερθεί στη διδακτική πράξη.

ΠΕΡΙΟΡΙΣΜΟΙ

Παρά τη σημαντική συμβολή της στην κατανόηση των γνώσεων των εκπαιδευτικών Φυσικής Αγωγής, η παρούσα έρευνα συνοδεύεται από ορισμένους περιορισμούς που ενδέχεται να επηρεάζουν τη γενίκευση και την ερμηνεία των αποτελεσμάτων.

Η αντιπροσωπευτικότητα του δείγματος είναι περιορισμένη όσον αφορά την κατανομή μεταξύ ιδιωτικών και δημόσιων σχολείων. Με μόνο το 8% των συμμετεχόντων να προέρχεται από ιδιωτικά σχολεία, τα αποτελέσματα ενδέχεται να μην αντικατοπτρίζουν πλήρως τις προκλήσεις και τις ευκαιρίες στον ιδιωτικό τομέα της εκπαίδευσης.

Η έρευνα διεξήχθη σε συγκεκριμένο χρονικό πλαίσιο, γεγονός που δεν επιτρέπει τη διερεύνηση δυναμικών αλλαγών στις στάσεις και τις γνώσεις των εκπαιδευτικών για την Τεχνητή Νοημοσύνη. Μια διαχρονική προσέγγιση θα μπορούσε να αναδείξει τις εξελίξεις σε βάθος χρόνου.

ΠΡΟΤΑΣΕΙΣ ΜΕΛΛΟΝΤΙΚΗΣ ΕΡΕΥΝΑΣ

Η παρούσα έρευνα ανέδειξε σημαντικά ευρήματα σχετικά με τις γνώσεις των εκπαιδευτικών Φυσικής Αγωγής ως προς την Τεχνητή Νοημοσύνη. Τα ευρήματα αυτά ανοίγουν νέους δρόμους για περαιτέρω έρευνα, ώστε να εμβαθύνουμε στη δυναμική και στις προοπτικές του πεδίου.

Είναι απαραίτητη η διεξαγωγή μελετών που θα επικεντρωθούν σε εκπαιδευτικούς του ιδιωτικού τομέα. Η χαμηλή συμμετοχή αυτής της ομάδας στην παρούσα έρευνα καθιστά αναγκαία τη στοχευμένη διερεύνηση των ιδιαίτερων χαρακτηριστικών, προκλήσεων και ευκαιριών που αντιμετωπίζουν οι εκπαιδευτικοί σε ιδιωτικά σχολεία, καθώς και τη σύγκριση με τους συναδέλφους τους στον δημόσιο τομέα.

Επιπλέον, είναι σημαντικό να διερευνηθούν οι επιπτώσεις εκπαιδευτικών προγραμμάτων επιμόρφωσης στην Τεχνητή Νοημοσύνη. Μελέτες που θα εξετάσουν την αλλαγή των γνώσεων των εκπαιδευτικών πριν και μετά από εξειδικευμένα προγράμματα επιμόρφωσης θα μπορούσαν να αναδείξουν τις πιο αποτελεσματικές μεθόδους κατάρτισης. Παράλληλα, η έρευνα θα μπορούσε να επεκταθεί σε άλλες εκπαιδευτικές βαθμίδες, προκειμένου να διερευνηθεί η διαφοροποίηση στις ανάγκες και τις προκλήσεις ενσωμάτωσης της σε ποικίλα μαθησιακά περιβάλλοντα.

Τέλος, προτείνεται η διεξαγωγή διαχρονικών μελετών (longitudinal studies) για την καταγραφή των μεταβολών στις γνώσεις των εκπαιδευτικών απέναντι στην Τεχνητή Νοημοσύνη, καθώς και των αλλαγών στην εκπαιδευτική πρακτική, με την πάροδο του χρόνου και την πρόοδο της τεχνολογίας.

ΠΕΡΙΛΗΨΗ

Τα νέα Προγράμματα Σπουδών έχουν ως αφετηρία τα μαθησιακά αποτελέσματα, δηλαδή όλα όσα χρειάζεται να γνωρίζουν, να κατανοούν και να μπορούν να εφαρμόσουν οι μαθητές και οι μαθήτριες μετά την ολοκλήρωση κάθε μαθησιακής διαδικασίας μετακινώντας το κέντρο βάρους της έμφασης από το γνωστικό αντικείμενο, τους/τις διδάσκοντες/ουσες και τη διδακτική διαδικασία προς τους/τις μαθητές/τριες και τα προσδοκώμενα αποτελέσματα μάθησης. Στον πυρήνα της διδακτικής μεθοδολογίας βρίσκονται η δημιουργία περιβαλλόντων καθοδηγούμενης μάθησης, η αυτενέργεια, η συνεργατική δράση σε ομάδες, η διερευνητική μάθηση, η βιωματική προσέγγιση, η συνεργατική επίλυση προβλήματος, η επικοινωνιακή προσέγγιση, και η μετασχηματιστική λογική.

Το παρόν διδακτικό σενάριο, έχει ως θέμα την «ψηφιακή» οργάνωση της σχολικής βιβλιοθήκης και εφαρμόσθηκε στα πλαίσια πολιτιστικού προγράμματος με τη συμμετοχή μαθητών και μαθητριών ενός Ημερήσιου Γυμνασίου της Αττικής ενισχύοντας τη συνεργατική μάθηση με τη βοήθεια των ΤΠΕ και επιτυγχάνοντας γνωστικούς διδακτικούς στόχους σχετικούς με τα υπολογιστικά φύλλα, τα συνεργατικά έγγραφα και τις ιστοεξερευνήσεις. Η υλοποίησή του βασίστηκε στη χρήση της υπηρεσίας e-grafis που παρέχεται από το Πανελλήνιο Σχολικό Δίκτυο και έχει ως απαραίτητη προϋπόθεση τη δημιουργία και χρήση Μαθητικών Λογαριασμών για όλους/ες τους/τις συμμετέχοντες/ουσες. Ο σχεδιασμός του σεναρίου περιλαμβάνει τέσσερις φάσεις υλοποίησης, γνωστικούς και ψυχοσυναισθηματικούς στόχους, ανατροφοδότηση πριν από κάθε νέα φάση, αξιολόγηση στο τέλος και αναστοχασμό των πεπραγμένων.

Για το σχεδιασμό και την υλοποίηση του εκπαιδευτικού σεναρίου εφαρμόσθηκε η μέθοδος project και οι στρατηγικές διδασκαλίας που ακολουθήθηκαν ήταν η άμεση διδασκαλία και η ανακαλυπτική μάθηση. Κατά την εφαρμογή του σεναρίου παρατηρήθηκε ότι η συνεργατική μάθηση με τη βοήθεια των υπολογιστών προωθεί την καλλιέργεια κοινωνικών δεξιοτήτων όπως η επικοινωνία και η συνεργασία και την καλλιέργεια ψηφιακών δεξιοτήτων με κυριότερη τη διαχείριση συνεργατικών περιβαλλόντων υλοποίησης δραστηριοτήτων. Παράλληλα διαπιστώθηκε ότι η αξιοποίηση των Ψηφιακών Μέσων σε πολιτιστικά προγράμματα ή στα εργαστήρια δεξιοτήτων μπορεί να ενισχύσει τη δυναμική της διδασκαλίας, να τονώσει το ενδιαφέρον των μαθητών, να βελτιώσει το μαθησιακό κλίμα και να ενισχύσει την αποτελεσματικότητα της εκπαιδευτικής διαδικασίας. Το θέμα του project και η καθοδήγηση από τον/την εκπαιδευτικό αναφέρθηκαν ως οι κυριότεροι θετικοί παράγοντες ενώ η ώρα διεξαγωγής ως ο σημαντικότερος αρνητικός παράγοντας. Τέλος, η διαφορετική ταχύτητα με την οποία εργάζονται τα μέλη μιας ομάδας αναφέρθηκε ως το σημαντικότερο πρόβλημα της συνεργατικής δράσης.

Λέξεις κλειδιά: συνεργατική μάθηση, e-grafis, ιστοεξερεύνηση, ΤΠΕ, εκπαιδευτικό σενάριο, πρόγραμμα σπουδών, πολιτιστικό πρόγραμμα

ΕΙΣΑΓΩΓΗ

Ένα σχολείο με κοινωνικοπαιδαγωγικό προσανατολισμό οραματίζεται να εκπαιδεύσει, όχι μόνο τους μαθητές και τις μαθήτριες αλλά όλα τα άτομα και τις ομάδες που σχετίζονται με τη σχολική κοινότητα, να αγωνίζονται, επιδιώκοντας καθ' όλη τη διάρκεια της ζωής τους την προσωπική τους πολύπλευρη ανάπτυξη, με στόχο να γίνουν ικανοί να ζήσουν μια αυτεξούσια ζωή, με ευκαιρίες, αξιοσύνη, αίσθηση καθήκοντος, θετικές σχέσεις με τους άλλους, προσφορά και πληρότητα (Mylonakou - Keke, 2019:430). Στα πλαίσια του οράματος αυτού και πέρα απο τις οδηγίες του Αναλυτικού Προγράμματος Σπουδών στα διδακτικά αντικείμενα, σχεδιάζονται εκπαιδευτικές δράσεις ολιστικού χαρακτήρα που υλοποιούνται με διαφορετικούς τρόπους ανάλογα με τη φύση τους και το σχεδιασμό τους.

Εκπαιδευτικές δράσεις όπως τα εργαστήρια δεξιοτήτων και τα πολιτιστικά προγράμματα σε ορισμένες περιπτώσεις και ανάλογα με τη θεματολογία τους, τοποθετούν τον εκπαιδευτικό σε θέση καθοδηγητή, συνδιερευνητή και βοηθού που δίνει ελευθερίες στους μαθητές και τις μαθήτριες, καλλιεργεί την αντιληπτική τους εγρήγορση και ενισχύει την ικανότητα τους να ερευνούν, να συνεργάζονται και να δημιουργούν (Daskalakis, 2017:227-228). Παράλληλα, ενθαρρύνουν και προάγουν την ομαδική και συνεργατική μάθηση η οποία σύμφωνα με ορισμένους εκπαιδευτικούς και πολλούς γονείς έχει τη μορφή εξαίρεσης και απόκλισης από τα «κανονικά» μαθήματα (Raptis & Galanoudaki-Rapti 2017:494), ειδικά όταν εντάσσουν τις ΤΠΕ στην εκπαιδευτική διαδικασία η οποία λειτουργεί μετασχηματιστικά και ενισχυτικά όσον αφορά τις πρακτικές διδασκαλίας και μάθησης (Tzimogiannis, 2019:58). Συγχρόνως η οργάνωση των νέων διδακτικών σεναρίων αναβαθμίζει το ρόλο του εκπαιδευόμενου, ο οποίος γίνεται συν-σχεδιαστής του μαθησιακού περιβάλλοντος με τον γραμμικό και εξωτερικά ελεγχόμενο σχεδιασμό να δίνει τη θέση του στην επαναληπτική, αυτορυθμιζόμενη και συστημική διαδικασία (Lowyck et al., 2001:515).

Η ΣΥΝΕΡΓΑΤΙΚΗ ΜΑΘΗΣΗ

Με τον όρο συνεργατική μάθηση (collaborative learning) περιγράφεται ένα ευρύ φάσμα εκπαιδευτικών προσεγγίσεων, όπου οι μαθητές απαιτείται και ενθαρρύνονται να συνεργαστούν για την επίλυση προβλημάτων ή την υλοποίηση μαθησιακών δραστηριοτήτων και εργασιών (Tzimogiannis, 2017:142-143) . Η συνεργασία φέρνει ορισμένα οφέλη, π.χ. ανταλλαγή γνώσεων, συνδυασμό ειδικών δεξιοτήτων ή διανομή εργασίας, αλλά επίσης εισάγει δυσκολίες μέσω κακής επικοινωνίας, απωλειών συντονισμού και πιθανών συγκρούσεων στόχων (Griffin et al., 2018:42). Στον πυρήνα της υλοποίησης της εκπαιδευτικής δράσης βρίσκεται η συνεργασία και η συλλογικότητα. Συνεργασία είναι δυνατόν να υπάρχει ανάμεσα σε άτομα που αναλαμβάνουν ξεχωριστό κομμάτι ενός συνολικού έργου επιδιώκοντας ένα κοινό σκοπό, ενώ η συλλογικότητα προϋποθέτει μεγαλύτερο βαθμό αλληλεξάρτησης, διαπραγμάτευσης και διάχυσης ιδεών, καθώς και ταύτισης με το στόχο ή την επιτυχία ολόκληρης της ομάδας ή και όλων των μελών ξεχωριστά (Raptis & Galanoudaki-Rapti 2017:498). Ωστόσο, έχει παρατηρηθεί (Le et al., 2018:117) : α) ότι ο κοινός στόχος για τη δημιουργία ενός ομαδικού «προϊόντος» μπορεί να οδηγήσει στην υποτίμηση των λιγότερο ικανών μαθητών και την αποποίηση της ευθύνης-συμμετοχής, β) ότι όταν οι εκπαιδευτικοί δεν επικεντρώνονται στη διδασκαλία των δεξιοτήτων συνεργασίας, οι μαθητές δυσκολεύονται να συμμετάσχουν σε συνεργατικές εργασίες και γ) ότι όταν οι εκπαιδευτικοί επικεντρώνονται κατά κύριο λόγο στην παραγωγικότητα της ομάδας χωρίς να αξιολογούν ταυτόχρονα τη συνεργατική απόδοση, τα μέλη της ομάδας μπορεί να μην παροτρύνονται να ενισχύσουν την κοινωνική αλληλεπίδραση και την αλληλοβοήθεια προκειμένου να επωφεληθούν όλοι από τη συνεργασία.

ΤΟ ΕΡΓΑΛΕΙΟ E-GRAFIS

Τα Συνεργατικά Έγγραφα είναι μια νέα υπηρεσία του Πανελλήνιου Σχολικού Δικτύου για την online διαχείριση εγγράφων με ασφαλή τρόπο και υποστηρίζουν τη διαχείριση και την αποθήκευση ηλεκτρονικών εγγράφων μέσω του διαδικτύου. Είναι χρήσιμα εργαλεία για την εκπαίδευση, τόσο για τις διευθύνσεις και τα σχολεία, όσο και για τους εκπαιδευτικούς και τους μαθητές και τις μαθήτριες, επειδή υποστηρίζουν τη συνεργατικότητα και τον ασφαλή διαμοιρασμό πληροφοριών. Η υπηρεσία «Συνεργατικών Εγγράφων ΠΣΔ» e-grafis παρέχει δωρεάν και με απόλυτη πιστοποίηση των χρηστών της, παρόμοια λειτουργικότητα με ανάλογες εμπορικές υπηρεσίες Dropbox, Google Drive, Microsoft Onedrive, κλπ. και για τη χρήση της απαιτείται από τους μαθητές και τις μαθήτριες το άνοιγμα μέσω φυλλομετρητή Ιστού (web browser) της σελίδας http://grafis.sch.gr και η είσοδος με τους κωδικούς που διαθέτουν από το ΠΣΔ. Συνοπτικά, μέσα από αυτή την υπηρεσία Συνεργατικών Εγγράφων παρέχονται στα μέλη του ΠΣΔ οι δυνατότητες της δημιουργίας νέων εγγράφων και αρχείων, της επεξεργασίας υπαρχόντων εγγράφων σε πραγματικό χρόνο, της κατηγοριοποίησης, οργάνωσης και αποθήκευσης εγγράφων και αρχείων, της εισαγωγής εγγράφων και αρχείων από εξωτερικές πηγές καθώς και της εξαγωγή τους, της αναζήτησης εγγράφων και αρχείων, της προσθήκης πολυμέσων σε έγγραφα (π.χ. φωτογραφίες, video κλπ.), της αναζήτησης εγγράφων και αρχείων, της καταχώρισης αρχείου μέσω ειδικής διεπαφής από οποιονδήποτε υπολογιστή με σύνδεση στο διαδίκτυο, της οργάνωσης και ανάθεσης εργασιών με τη χρήση ημερολογίων και της οργάνωσης προσωπικών επαφών.

ΕΚΠΑΙΔΕΥΤΙΚΟ ΣΕΝΑΡΙΟ

Σκοποί

Οι εκπαιδευτικοί σκοποί προέρχονται συνήθως από τις τρεις ακόλουθες πηγές: το παιδί, την κοινωνία ή τις επιστήμες (Jacobsen et al., 2011:114). Η εκπαιδευτική δράση που αναλύεται στην παρούσα εργασία αντλεί τους σκοπούς της από τους μαθητές και τις μαθήτριες (παιδί) καθώς και από το νέο αναλυτικό πρόγραμμα του μαθήματος της Πληροφορικής στο Γυμνάσιο (επιστήμες).

Ο σκοπός της συνεργατικής μάθησης, της αρμονικής συνύπαρξης και της αποτελεσματικής μαθησιακά αλληλεπίδρασης αποτελεί τον πρώτο σκοπό της εκπαιδευτικής δράσης. Η επίτευξη του σκοπού αναπτύσσει κοινωνικό κεφάλαιο δημιουργώντας ένα ανθρώπινο δίκτυο, που παράγει πόρους μέσα από κοινά αποδεκτές αξίες και κανόνες, την αίσθηση του καθήκοντος, το επίπεδο εμπιστοσύνης, κατανόησης, αλληλουποστήριξης και αλληλεπίδρασης διευκολύνοντας τη συνεργατική δράση είτε μέσα στην ομάδα είτε και ανάμεσα σε ομάδες (Mylonakou - Keke, 2019:145). Ο κοινός στόχος μετατρέπει τα ζεύγη των ομάδων σε μια κοινότητα εργασίας, τα μέλη της οποίας εξαρτώνται αμοιβαία μεταξύ τους και αναπτύσσουν με την πάροδο του χρόνου ένα αίσθημα αμοιβαίας ευθύνης και προσφοράς για το κοινό έργο (Tzimogiannis, 2017:145).

Ο δεύτερος σκοπός της εκπαιδευτικής δράσης πηγάζει από το νέο αναλυτικό πρόγραμμα σπουδών του μαθήματος της Πληροφορικής στο Γυμνάσιο, έχει δύο σκέλη και παραπέμπει στην καλή γνώαη των συνεργατικών εγγράφων (λογιστικά φύλλα) και στην εξοκείωση με το διαδίκτυο και τις ιστοεξερευνήσεις. Η αξιοποίηση των λογιστικών φύλλων δεν αποτελεί προτεραιότητα των εκπαιδευτικών διότι θεωρείται ότι δεν εμπλέκουν στη μαθησιακή διαδικασία πολλούς τομείς της νόησης, όπως η λανθάνουσα και η διαισθητική γνώση, η φαντασία κ.α., αλλά και γιατί οι εκπαιδευτικοι είτε δεν έχουν εκπαιδευτεί αρκετά στο αντικείμενό τους, είτε έχουν μικρή εμπειρία στις πρακτικές χρήσης του, είτε θεωρούν ότι δεν αποτελούν γνώση για το επίπεδο της χαμηλής και της μεσαίας εκπαιδευτικής βαθμίδας (Raptis & Galanoudaki-Rapti 2017:360). Απ την άλλη πλευρά τα αλληλεπιδραστικά χαρακτηριστικά των σύγχρονων τεχνολογιών του Ιστού μπορούν να υποστηρίξουν νέες εκπαιδευτικές πρακτικές παιδαγωγικής συνεργατικης οικοδόμησης της γνώσης (Tzimogiannis, 2019:57) ενώ η παιδαγωγική αξιοποίηση του διαδικτύου στην εκπαιδευτική διαδικασία προσφέρει ανεξάντλητες ποσότητες πληροφοριών για οποιοδήποτε θέμα και δυνατότητες επικοινωνίας και συνεργασίας (Daskalakis, 2017:453).

Στόχοι

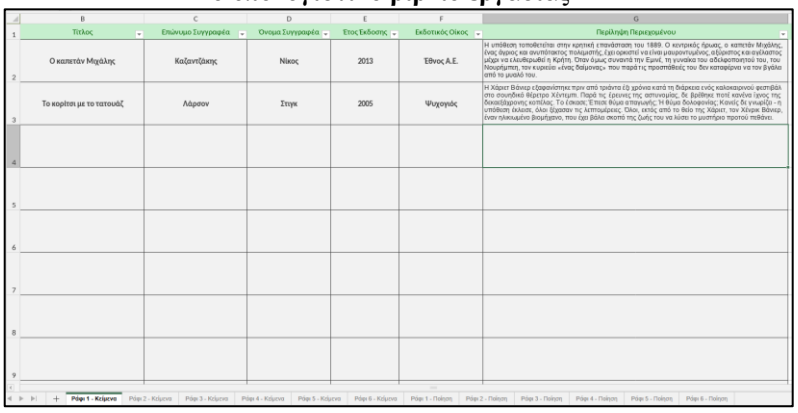
Οι στόχοι δημιουργούν κίνητρα εστιάζοντας την προσοχή των μαθητών στην ασυμφωνία μεταξύ του τρέχοντος και του ιδανικού επιπέδου επίτευξής τους (O' Donnell et al., 2021:534) και μπορούν σύμφωνα με τους Jacobsen et al. (2011:114) να ταξινομηθούν σε τρεις μεγάλες περιοχές: τη γνωστική που αναφέρεται στο νοητικό πεδίο, τη συναισθηματική (ωρίμανση των στάσεων και των αξιών) και την ψυχοκινητική (ανάπτυξη μυϊκών δεξοτήτων και συντονισμού).

Οι στόχοι του εκπαιδευτικού σεναρίου είναι οι εξής: α) η αποτελεσματική συνεργασία για τη μάθηση (ψυχοκινητικός στόχος), β) η αναζήτηση πληροφοριών σε ένα λογιστικό φύλλο που λειτουργεί ως βάση δεδομένων (γνωστικός στόχος) και γ) η αναζήτηση πληροφοριών στο διαδίκτυο (γνωστικός στόχος). Οι γνωστικοί στόχοι συνδέονται άμεσα με το νέο πρόγραμμα σπουδών για το μάθημα της Πληροφορικής στο Γυμνάσιο και συγκεκριμένα με την ενότητα 5 (Γνωρίζω το Διαδίκτυο και επικοινωνώ) του βιβλίου της Α Γυμνασίου, με την ενότητα 3 (Ανάλυση δεδομένων με Υπολογιστικά Φύλλα) του βιβλίου της Β Γυμνασίου και με την ενότητα 5 (Συνεργάζομαι σε διαδικτυακά περιβάλλοντα) του βιβλίου της Γ Γυμνασίου. Ο συνδυασμός διδακτικών αντικειμένων διαφορετικών τάξεων, καθιστά το σενάριο εφαρμόσιμο στα πλαίσια ενός πολιτιστικού προγράμματος ή των εργαστηρίων δεξιοτήτων.

Στρατηγικές

Οι στρατηγικές διδασκαλίας που ακολουθούνται είναι δύο: η άμεση διδασκαλία και η ανακαλυπτική μάθηση. Η άμεση διδασκαλία εφαρμόζεται πριν και κατά τη διάρκεια της πρώτης φάσης του σεναρίου καθώς και στην τρίτη φάση όπου παρουσιάζονται με ακρίβεια οι στόχοι και οι δεξιότητες που καλούνται οι μαθητές να αποκτήσουν χωρίς πάρ' αυτα να στερούνται της παροχής αρκετών ευκαιριών για αλληλεπίδραση με τον εκπαιδευτικό μέσω ερωταποκρίσεων, ανακεφαλαιώσεων, πρακτικών εξάσκησης και διόρθωσης των λαθών τους (Τριλιανός, 2013:184). Η ανακαλυπτική μάθηση, συχνά προϋποθέτει κάποιο είδος καθοδήγησης ή υποστήριξης από έναν εκπαιδευτικό, ώστε κατά κάποιο τρόπο να αποτελεί ουσιαστικά καθοδηγούμενη ανακάλυψη (O' Donnell et al., 2021:114) και εφαρμόζεται με αυτό τον τρόπο στη δεύτερη φάση της υλοποίησης του εκπαιδευτικού σεναριου.

Εποπτικά μέσα



Τα εποπτικά μέσα που χρησιμοποιήθηκαν για την υλοποίηση της εκπαιδευτικής δράσης είναι τα εξής: α) τα λογοτεχνικά έργα της σχολικής βιβλιοθήκης, β) ο εξοπλισμός του εργαστηρίου (11 υπολογιστές) και γ) το λογισμικό (λογιστικά φύλλα του e-γραφις, Insight Teacher, φυλλομετρητές).

Φάσεις υλοποίησης

Η διάρκεια της εκπαιδευτικής δράσης παραπέμπει σε ένα μακροπρόθεσμο σχεδιασμό που σύμφωνα με τους Jacobsen et al. (2011:198) διαμορφώνεται βάσει τριών παραγόντων: α) τα χαρακτηριστικά των μαθητών (ικανότητες, ανάγκες, ενδιαφέροντα, προηγούμενες εμπειρίες), β) το φυσικό περιβάλλον (διαρρρύθμιση σχολικής αίθουσας και διαμόρφωση θετικού κλίματος) και γ) τη διαχείριση της τάξης (κανόνες και διαδικασίες). Αρχικά οργανώνεται μια συνάντηση γνωριμίας, ενημέρωσης, καθορισμού των ομάδων και ανάθεσης καθηκόντων. Η προσοχή εστιάζεται στη δημιουργία ομάδων και στη σαφήνεια των οδηγιών προς αυτές. Όσον αφορά τη σύνθεση των ομάδων το βάρος πέφτει στη επιλογή των καταλληλότερων ζευγών με βάση την προσδοκόμενη αποτελεσματικότητα. Σε ένα περιβάλλον συνεργατικής μάθησης, όλα τα μέλη της ομάδας είναι υπεύθυνα τόσο για τη δική τους ατομική μάθηση όσο και για την αλληλο-διδασκαλία μεταξύ τους που συμβάλλει στην ατομική ανάπτυξη και στην ενίσχυση της συλλογικής γνώσης (Tzimogiannis, 2019:242). Οι ικανοί μαθητές αποτελούν σύμφωνα με τους O' Donnell et al. (2021:153-154) ιδανικούς συνεργάτες γιατί καταλαβαίνουν εξαιρετικά καλά τη ζώνη εγγύτερης ανάπτυξης των αρχαρίων και εστιάζουν την καθοδήγησή τους σε αυτές ακριβώς τις ανάγκες, παραδοχή με γνώμονα την οποία επιδιώκεται η σύνθεση των ομάδων εργασίας.

Στην πρώτη φάση (2-4 διδακτικές ώρες) δίνονται οδηγίες βάσει των οποίων θα καταχωρηθούν οι απαραίτητες πληροφορίες στο συνεργατικό λογιστικό φύλλο (Εικόνα 1) ενώ αυτό που προέχει είναι η αρμονική συνεργασία των μελών κάθε ομάδας ώστε να διαφαλισθεί η αποτελεσματική συνύπαρξη και συνεργασία των μελών της. Αρχικά οι ομάδες ενημερώνονται για τα φύλλα εργασίας στα οποία έχουν δικαίωμα να εργάζονται και στη συνέχεια παρουσιάζονται παραδείγματα σύμφωνα με τα οποία γίνεται ο χωρισμός των λογοτεχνικών έργων στις κατηγορίες της πεζογραφίας και της ποίησης για να ακολουθήσει η καταχώρηση των απαραίτητων πληροφοριών (τίτλος, ονοματεπώνυμο συγγραφέα, αριθμός σελίδων) στο κοινόχρηστο λογιστικό φύλλο. Με τη δραστηριότητα αυτή καθορίζεται με ακρίβεια η φύση της δεξιότητας που πρόκειται να γίνει αντικείμενο μάθησης και γνώσης, διαιρείται σε τμήματα το έργο και προσδιορίζεται η λογική σειρά των ενεργειών που πρέπει να κάνουν ο μαθητές για να φτάσουν στο επιθυμητό αποτέλεσμα (Τριλιανός, 2013:186). Η διάρκεια της φάσης αυτής εξαρτάται από τον αριθμό των λογοτεχνικών έργων που διαθέτει το σχολείο και από τον αριθμό των μαθητών και των μαθητριών που συμμετέχουν στην εκπαιδευτική δράση.

Εικόνα 1
Το υπολογιστικό βιβλίο εργασίας

Η ενημέρωση-καθοδήγηση στην δεύτερη φάση (2-4 διδακτικές ώρες) περιλαμβάνει οδηγίες και ένα παράδειγμα ιστοεξερεύνησης στο οποίο αναζητείται μια σύντομη περίληψη ενός λογοτεχνικού έργου στο διαδίκτυο ώστε να καταχωρηθεί στο πεδίο «Περίληψη» για την οποία θέσαμε ως όριο τις 50 λέξεις. Οι μαθητές και οι μαθήτριες καλούνται να συνθέσουν σύντομες περιλήψεις των λογοτεχνικών έργων που καταχώρησαν στη βάση δεδομένων (κοινόχρηστο υπολογιστικό φύλλο) αναζητώντας πληροφορίες για το περιεχόμενο τους στο διαδίκτυο.

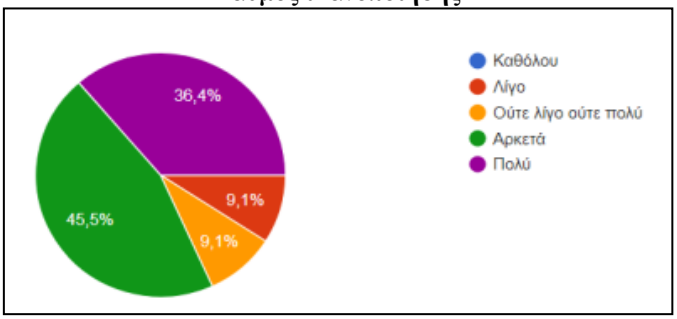
Στην τρίτη φάση (1 διδακτική ώρα) οι μαθητές διδάσκονται-μαθαίνουν να αναζητούν πληροφορίες στο υπολογιστικό φύλλο με απλή αναζήτηση ή χρήση των φίλτρων της εφαρμογής των υπολογιστικών φύλλων. Στη συνέχεια τους δίνεται ένα φύλλο δραστηριοτήτων για να διαπιστωθεί ο βαθμός κατανόησης των ιστοεξερευνήσεων.

Η τέταρτη φάση του σεναρίου (1 διδακτική ώρα) χαρακτηρίζεται ως αξιολογική για το Πρόγραμμα. Οι μαθητές και οι μαθήτριες καλούνται ατομικά να συμπληρώσουν ένα ερωτηματολόγιο ώστε να διαπιστώθει ο βαθμός επίτευξης του ψυχοκινητικού στόχου Α σε συνδυασμό με την παρατήρηση του εκπαιδευτικού καθ' όλη τη διάρκεια υλοποίησης της δράσης η οποία λειτουργεί συμπληρωματικά για την εξαγωγή ασφαλέστερων συμπερασμάτων. Συγχρόνως καταγράφονται οι στάσεις τους (διάθεση, ενδιαφέρον κ.α.), τα κίνητρα συμμετοχής, η διάθεση συμμετοχής σε μελλοντικές εκπαιδευτικές δράσεις κ.α.

Ανατροφοδότηση

Η ανατροφοδότηση παρέχεται στο τέλος κάθε φάσης και αποτελεί σημαντική παράμετρο σύνδεσης της συναισθηματικής ικανοποίησης των μαθητών και των μαθητρών με την επίδοση ανά φάση υλοποίησης με την προϋπόθεση ότι θα δοθεί έγκαιρα (O' Donnell et al., 2021:57). Περιλαμβάνει την ενημέρωση για τα αποτελέσματα της προηγούμενης φάσης, τις όποιες επιπλέον ενέργειες πρέπει να γίνουν συμπληρωματικά από την κάθε ομάδα ξεχωριστά και τις οδηγίες για την επίτευξη των στόχων της επόμενης φάσης ως την τελευταία.

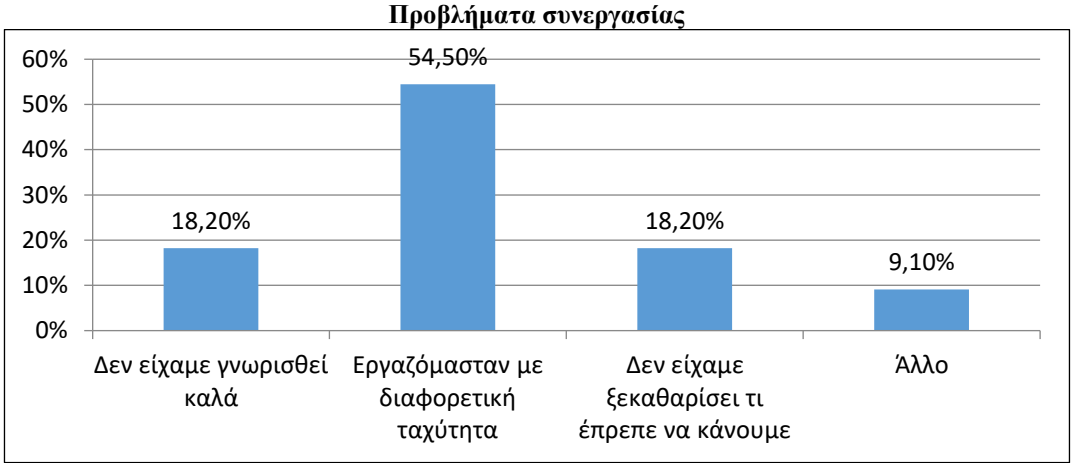
Αξιολόγηση



Ως αξιολόγηση ορίζεται η εκτίμηση του βαθμού ανταπόκρισης που παρουσιάζει ένα πρόσωπο, ένα αντικείμενο ή μια κατάσταση σε σχέση προς μια αξία (Daskalakis, 2017:244). Η αξιολόγηση σύμφωνα με τους O' Donnell et al. (2021:688) εχει δύο μορφές, την διαμορφωτική κατά την οποία θα αναζητηθουν στοιχεία που αφορούν τη μάθηση και πως αυτή θα ενισχυθεί και την αθροιστική κατά την οποία θα «μετρηθούν» το γνωστικό επίπεδο και οι δεξιότητες που απέκτησαν οι μαθητές.

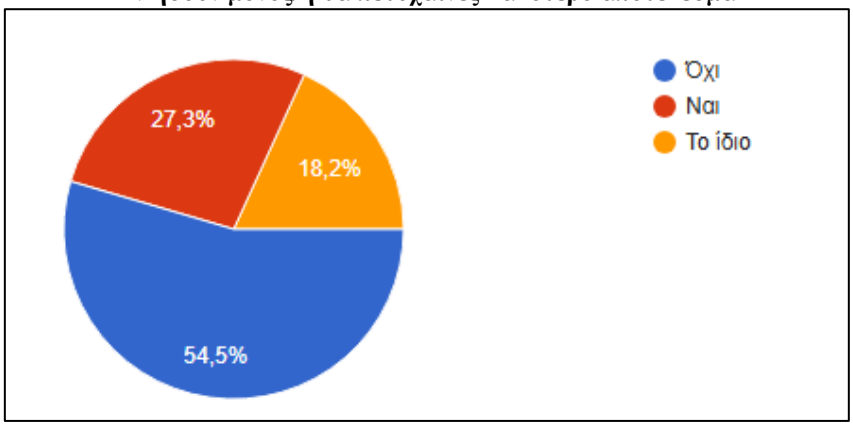
Η αξιολόγηση των γνωστικών στόχων έγινε με το διαμοιρασμό στους μαθητές και στις μάθητριες ενός φύλλου δραστηριοτήτων. Το εργαλείο αξιολόγησης κατασκευάστηκε με κριτήριο την αξιοπιστία που καθορίζεται με τη διαίρεση του σε δύο μισά και τη σύγκριση των αποτελεσμάτων τους και την εγκυρότητα περιεχομένου η οποία βασίζεται στη σύνδεση των διδακτικών στόχων με τη διδακτέα ύλη (Τριλιανός, 2013:431).

ΑΠΟΤΙΜΗΣΗ ΕΚΠΑΙΔΕΥΤΙΚΗΣ ΔΡΑΣΗΣ



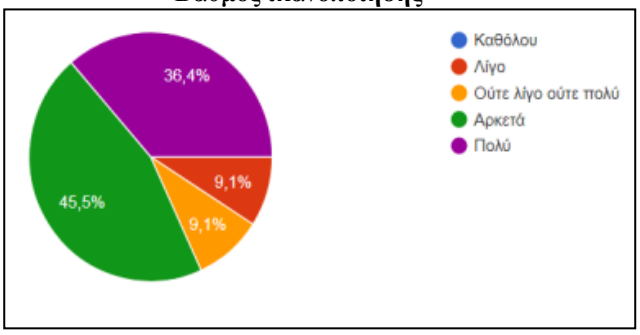
Η εκπαιδευτική δράση υλοποιήθηκε στα πλάισια ενός πολιτιστικού προγράμματος στο οποίο συμμετείχαν ένδεκα μαθητές και μαθήτριες της Α τάξης ενός Ημερήσιου Γυμνασίου της Αττικής και επί της ουσίας αποτελεί μια μελέτη περίπτωσης. Πέρα από την αξιολόγηση της υλοποίησης των διδακτικών στόχων με τη βοήθεια των φύλλων εργασίας. για τη συνολική αποτίμηση χρησιμοποιήθηκε ένα ερωτηματολόγιο στάσεων που συμπληρώθηκε από τους/τις συμμετέχοντες/ουσες μαθητές/τριες μετά το τέλος του προγράμματος.

Εικόνα 2
Βαθμός ικανοποίησης

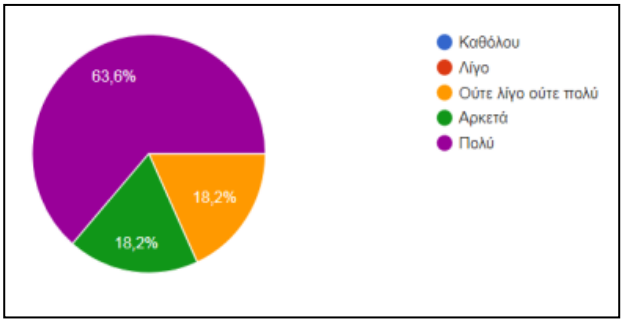


Για την αξιολόγηση του ψυχοσυναισθηματικού στόχου της αποτελεσματικής συνεργασίας, (πέρα από το παραγόμενο αποτέλεσμα και το φύλλο εργασίας) οι μαθητές και οι μαθήτριες ερωτήθηκαν για το βαθμό ικανοποίησης και τα προβλήματα συνεργασίας που αντιμετώπισαν. Η πλειοψηφία (αθροιστικά 81,9%) δήλωσε ότι έμειναν ικανοποιημένοι (Αρκετά ή Πολύ) από τη συνεργασία που είχαν (Εικόνα 2) ενώ ως μεγαλύτερο πρόβλημα, σε ποσοστό 54,5%, αναφέρθηκε η διαφορετική ταχύτητα με την οποία εργάζονταν τα μέλη της ομάδας (Εικόνα 3).

Εικόνα 3
Προβλήματα συνεργασίας

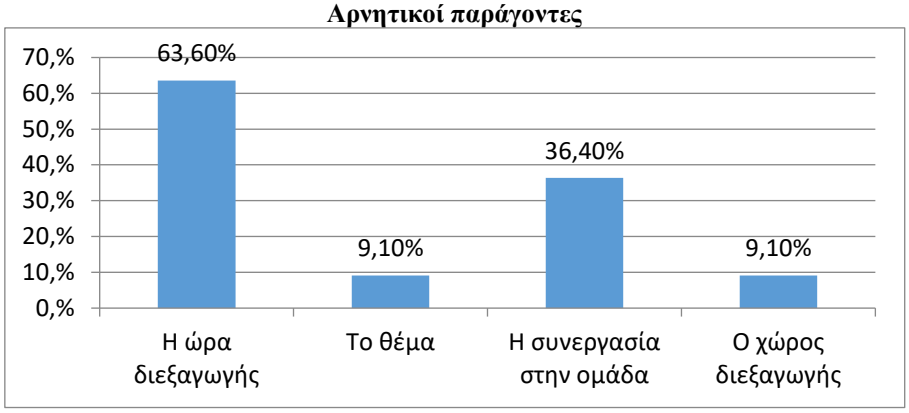


Εικόνα 4
Αν ήσουν μόνος/η θα πετύχαινες καλύτερο αποτέλεσμα

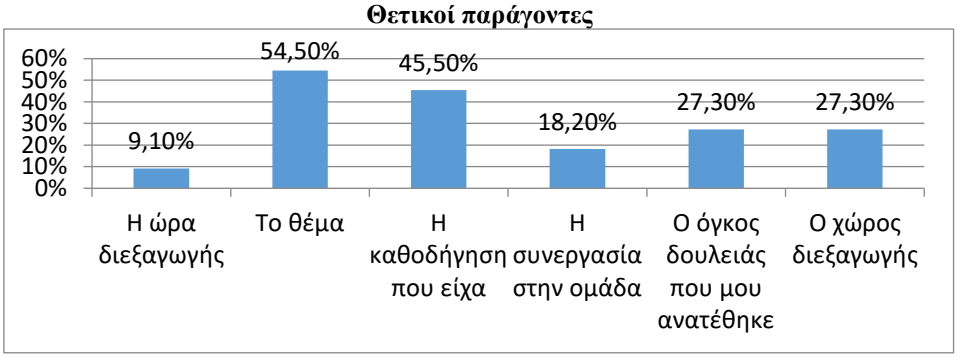


Στην ερώτηση «Αν ήσουν μόνος/η θα πετύχαινες καλύτερο αποτέλεσμα;» (Εικόνα 4) η πλειοψηφία (54,5%) απάντησε Όχι, το 27,3% απάντησε Ναι ενώ το 18,2% απάντησε Το ίδιο

Εικόνα 5
Βαθμός ικανοποίησης

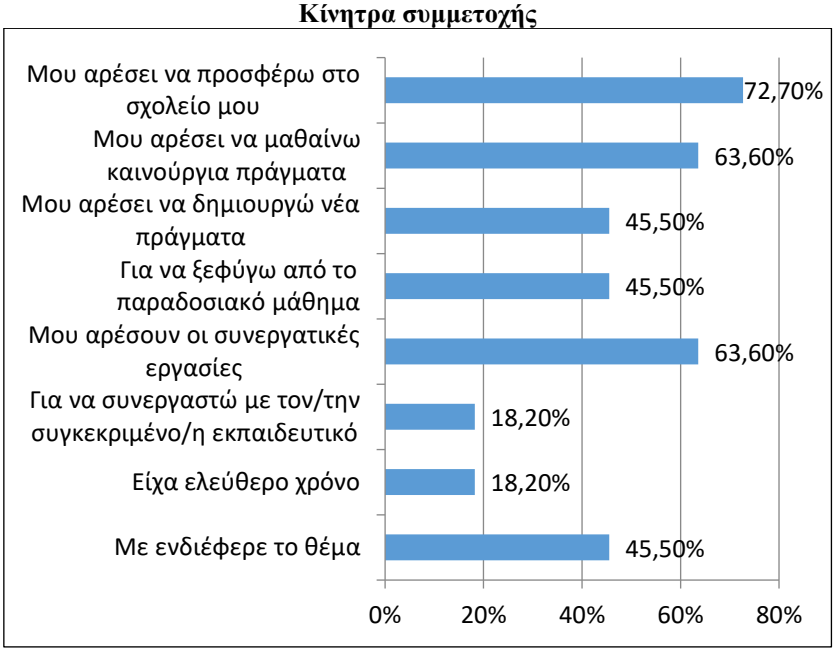


Εικόνα 6
Βαθμός ενδιαφέροντος

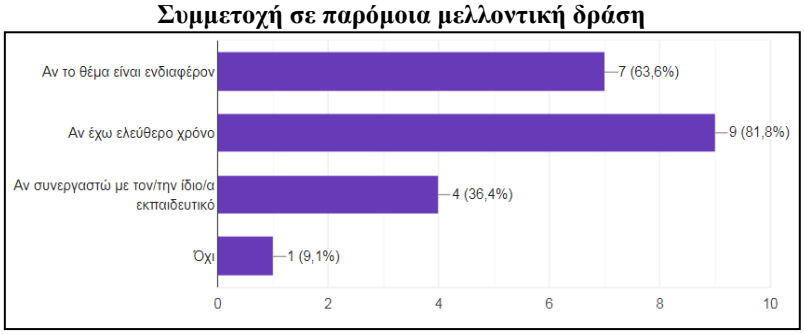


Ο βαθμός ικανοποίησης από τη συμμετοχή στο Πολιτιστικό πρόγραμμα (Αρκετά ή Πολύ) μετρήθηκε αθροιστικά στο 81,9% (Εικόνα 5) όπως και ο βαθμός ενδιαφέροντος (Εικόνα 6).

Εικόνα 7
Αρνητικοί παράγοντες

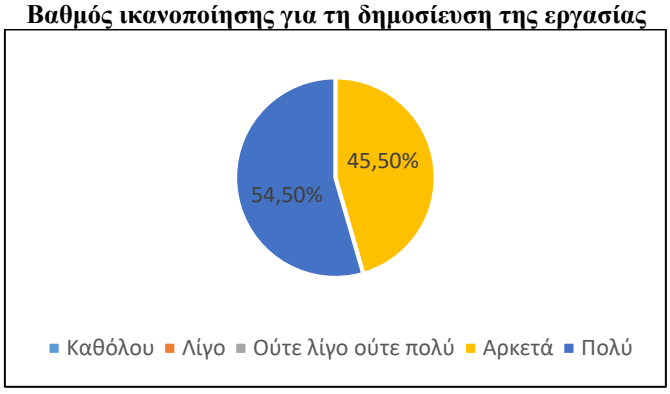


Εικόνα 8
Θετικοί παράγοντες



Ως πιο αρνητικός παράγοντας του προγράμματος (Εικόνα 7) αναφέρθηκε η ώρα διεξαγωγής με ποσοστό 63,6% και ως πιο θετικός (Εικόνα 8) το θέμα με ποσοστό 54,5%.

Εικόνα 9
Κίνητρα συμμετοχής



Ως σημαντικότερα κίνητρα συμμετοχής (Εικόνα 9) αναφέρθηκαν η διάθεση για προσφορά στο σχολείο με ποσοστό 72,7%, η διάθεση για μάθηση νέων πραγμάτων με ποσοστό 63,6% και ο συνεργατικός χαρακτήρας της εργασίας με ποσοστό 63,6%.

Εικόνα 10
Συμμετοχή σε παρόμοια μελλοντική δράση

Στην ερώτηση για πιθανή συμμετοχή σε παρόμοια μελλοντική εκπαιδευτική δράση (Εικόνα 10), ο ελεύθερος χρόνος αναφέρθηκε σε ποσοστό 81,8% ως η βασική προϋπόθεση με το 9,1% να απαντά ότι δεν θα συμμετείχε.

Εικόνα 11
Βαθμός ικανοποίησης για τη δημοσίευση της εργασίας

Τέλος, στην ερώτηση για το βαθμό ικανοποίησης από τη δημοσίευση της εργασίας στην ιστοσελίδα του σχολείου (Εικόνα 11), το 45,5% απάντησε Αρκετά και το 54,5% Πολύ.

ΑΝΑΣΤΟΧΑΣΜΟΣ

Σύμφωνα με τους O' Donnell et al. (2021:64) ο αναστοχασμός συνδέεται με τη διερεύνηση των γεγονότων που συνέβησαν στην τάξη καθώς και των αιτίων και των συνεπειών τους, με την αναζήτηση και τον προσδιορισμό των αντιδράσεων και των αλλαγών που θα προκαλέσει η διαφοροποίηση στη διδασκαλία και εν τέλει με τη διασφάλιση ότι η επόμενη διδασκαλία θα είναι περισσότερο αποτελεσματική από τη σημερινή. Ο αναστοχασμός πεπραγμένων της δράσης με βάση τις απαντήσεις των μαθητών στο ερωτηματολόγιο, τις παρατηρήσεις κατά τη διάρκεια υλοποίησης του σεναρίου και τις επιδόσεις των μαθητών και των μαθητριών στις δραστηριότητες αξιολόγησης οδήγησε στα εξής συμπεράσματα: α) οι μαθητές και οι μαθήτριες θα λειτουργήσουν ακόμα καλύτερα (διάθεση και απόδοση) αν τους δοθούν περισσότερα εσωτερικά κίνητρα (δημοσιοποίηση της εργασίας τους, συνεργασία με άλλα σχολεία κ.α.), β) η σύνθεση των ομάδων θα πρέπει να γίνεται με τρόπο τέτοιο ώστε να επιτυγχάνεται το βέλτιστο αποτέλεσμα από τη συνεργασία των μελών της ομάδας γεγονός που καθιστά τις προσυνεργατικές δραστηριότητες και την αξιολόγηση των ικανοτήτων των μαθητών και των μαθητριών σύμφωνα με τον Τριλιανό (2013:314) απαραίτητες πριν τη συστηματική ομαδοποίηση τους και γ) η συμμετοχή των μαθητών σε εκπαιδευτικές δράσεις επηρεάζεται από τη σχέση και την εικόνα που έχουν οι μαθητές και οι μαθήτριες για τον/την εκπαιδευτικό-συντονιστή γεγονός που καθιστά το κτίσιμο καλών διαπροσωπικών σχέσεων ως θεμέλιο της υλοποίησης και της επιτύχιας εκπαιδευτικών δράσεων τέτοιου τύπου.

ΕΠΕΚΤΑΣΕΙΣ

Η βάση δεδομένων (υπολογιστικό φύλλο) μπορεί να αποτελέσει χρήσιμο εκπαιδευτικό εργαλείο στα χέρια όσων εκπαιδευτικών θελήσουν να οργανώσουν δραστηριότητες που σχετίζονται άμεσα με τη μελέτη λογοτεχνικών κειμένων. Μέσα από την ηλεκτρονική τάξη ή την ιστοσελίδα του σχολείου όπου και θα έχει αναρτηθεί, οι μαθητές και οι μαθήτριες μπορούν να έχουν πρόσβαση στη σχολική βιβλιοθήκη και να επιλέγουν τα λογοτεχνικά έργα «πάνω» στα οποία θα εργασθούν. Έτσι επιτυγχάνεται η άμβλυνση των ποικίλων στεγανών ανάμεσα στους γνωστικούς τομείς και στη θεωρία και τη μάθηση με τους μαθητές και τις μαθήτριες να μαθαίνουν και να αναπτύσσονται όσο το δυνατόν ολόπλευρα μέσα

από τις διαθεματικές εργασίες τις οποίες θα κληθούν να υλοποίησουν (Raptis & Galanoudaki-Rapti 2017:512-515). Παράλληλα, το κοινωνικό κεφάλαιο μπορεί να αυξηθεί σε επίπεδο σχολικής μονάδας αν δοθεί η δυνατότητα δανεισμού βιβλίων από τους γονείς και τους κηδεμόνες των μαθητών και των μαθητριών ή από μαθητές και μαθήτριες όμορων σχολείων.

Το διδακτικό σενάριο μπορεί να εφαρμοσθεί και στις τελευταίες τάξεις του Δημοτικού μιας και στις επιδιώξεις και τους προσανατολισμούς του προγράμματος σπουδών για τις ΤΠΕ και την Πληροφορική στο Δημοτικο περιλαμβάνεται η ψηφιακή ικανότητα η οποία μεταξύ άλλων προωθεί τη γνώση στη διαχειριση λογιστικών φύλλων και την αποτελεσματική αναζήτηση των κατάλληλων και έγκυρων δεδομένων στο διαδίκτυο. Εναλλακτικά η εφαρμογή του μπορεί να γίνει στα Εργαστήρια Δεξιοτήτων.

Τέλος η βάση δεδομένων μπορεί να χρησιμοποιηθεί για τη δημιουργία με τη βοήθεια του App Invertor μιας εφαρμογής για φορητές συσκευές που διαχειρίζεται δεδομένα που βρίσκονται σε ένα «δημόσιο» υπολογιστικό φύλλο, εκπαιδευτική δραστηριότητα η οποία μπορεί να υλοποιηθεί στα πλάισια της διδασκαλίας της ενότητας 2 (Προγραμματιστικά περιβάλλοντα -Δημιουργία εφαρμογών) του μαθήματος Εφαρμογές Πληροφορικής της Α’ Λυκείου.

ΣΥΜΠΕΡΑΣΜΑΤΑ

Τέσσερις από τις σημαντικότερες δεξιότητες του 21ου αιώνα είναι η επίλυση προβλημάτων, η συνεργατική επίλυση προβλημάτων, ο πληροφορικός και ψηφιακός γραμματισμός και η παγκόσμια πολιτειότητα (Griffin et al., 2018:22). Η υπηρεσία e-grafis του ΠΣΔ μέσω του διαμοιρασμού και της ταυτόχρονης επεξεργασίας αρχείων καθώς και της συνεργασίας με άλλα μέλη του ΠΣΔ παρέχει τη δυνατότητα στους μαθητές και τις μαθήτριες να εξασκηθούν στη συνεργατική υλοποίηση δραστηριοτήτων αναπτύσσοντας δεξιότητες συνεργατικής μάθησης και επίλυσης προβλημάτων με τη βοήθεια του υπολογιστή. Η δεξιότητα της συνεργατικής επίλυσης προβλημάτων συνδέεται άμεσα με τη συνεργατική μάθηση χωρίς όμως η ομαδοκεντρική διδασκαλία να εκλαμβάνεται πάντα ως πανάκεια στη διδακτική πράξη για το λόγο ότι δεν είναι δυνατόν να εφαρμοσθεί σε οποιαδήποτε μαθησιακή ύλη και ότι παραμένει πάντοτε μια απαιτητική για τον εκπαιδευτικό μέθοδος (Τριλιανός, 2013:186). Στην ιδανική της εκδοχή, οι μαθητές ενθαρρύνονται να συμμετέχουν αμοιβαία σε μια συντονισμένη προσπάθεια για να υλοποιήσουν μια εργασία και να αναπτύξουν νέες γνώσεις και δεξιότητες (Tzimogiannis, 2019:241).

Η αλληλεπίδραση μεταξύ των θεωριών της συνεργατικής μάθησης, των τηλεπικοινωνιών και της εκπαίδευσης που έχει χαρακτηριστικά κοινότητας έχει ανοίξει το δρόμο για το σχεδιασμό και την οργάνωση πιο υβριδικών, συνεργατικών περιβαλλόντων μάθησης, που ενσωματώνουν διαφορετικές και νέου τύπου λειτουργίες επικοινωνίας με παιδαγωγικό τρόπο (Lowyck et al., 2001:514). Στην παρούσα εργασία διαπιστώθηκε ότι η συνεργατική μάθηση με τη βοήθεια των υπολογιστών προωθεί την καλλιέργεια κοινωνικών δεξιοτήτων όπως η επικοινωνία και η συνεργασία και την καλλιέργεια ψηφιακών δεξιοτήτων με κυριότερη τη διαχείριση συνεργατικών περιβαλλόντων υλοποίησης δραστηριοτήτων. Ωστόσο η παραγωγικότητα μιας ομάδας δε συμβαδίζει εξ ολοκλήρου με το βαθμό ικανοποίησης των μελών της γεγονός που καθιστά της αξιολόγηση της συνεργατικής απόδοσης εξίσου σημαντική με αυτή της παραγωγικότητας. Τέλος, σημαντικό ρόλο για την επιτυχία εκπαιδευτικών δράσεων τέτοιου τύπου, σύμφωνα με την αποτίμηση της εκπαιδευτικής δράσης από τους μαθητές και τις μαθήτριες, διαδραματίζουν η σχέση που έχουν με τον/την συντονιστή/τρια εκπαιδευτικό καθώς και τα εσωτερικά κίνητρα που τους δίνονται (δημοσίευση της εργασίας, συνεργασία με άλλα σχολεία κ.α.).

ΠΕΡΙΛΗΨΗ

Όσο η εξέλιξη των εργαλείων που βασίζονται στην Τεχνητή Νοημοσύνη (Τ.Ν.) προχωρά και η χρήση τους στη διδασκαλία των Φυσικών Επιστημών διευρύνεται, καθίσταται φανερό ότι δημιουργεί πολλές ευκαιρίες βελτίωσης της διδασκαλίας και συνακολούθως των μαθησιακών αποτελεσμάτων. Επιπλέον, η μελέτη των πεποιθήσεων και των στάσεων των εκπαιδευτικών στην ενσωμάτωση της Τ.Ν. στην εκπαιδευτική διαδικασία αναδεικνύεται ως ένα σημαντικό ζήτημα. Τα αποτελέσματα πολλών μελετών στη διδασκαλία των Φυσικών Επιστημών (Φ.Ε.) αναφέρουν τους ποικίλους και επικείμενους ρόλους της τεχνητής νοημοσύνης στην εκπαίδευση. Παρόλα αυτά, οι εκπαιδευτικοί Φ.Ε., αντιμετωπίζουν, την τελευταία δεκαετία, μια ιδιαίτερα μεγάλη πρόκληση, τη χρήση της Τ.Ν. στη σχολική τάξη χωρίς όμως να έχει υπάρξει ένας σημαντικός κεντρικός σχεδιασμός που να τους υποστηρίζει.

Η παρούσα μελέτη ερευνά τις στάσεις και πεποιθήσεις 40 εκπαιδευτικών Φ.Ε. Δευτεροβάθμιας εκπαίδευσης, της Θεσσαλίας και της Ηπείρου, απέναντι στην ενσωμάτωση των υπαρχόντων εργαλείων Τ.Ν., στην τάξη τους. Ειδικότερα, η έρευνα αυτή μελετά τις απόψεις των εκπαιδευτικών σχετικά με τα εργαλεία Τ.Ν., όπως το Gemini, το πρόγραμμα για την περίληψη αρχείων pdf με τεχνητή νοημοσύνη, το Gamma.app, τα οποία κατέχουν δυναμικό ρόλο στη βελτίωση παιδαγωγικών πρακτικών. Για τη συλλογή των δεδομένων της έρευνας σχετικά με την αξιολόγηση των στάσεων και πεποιθήσεων των εκπαιδευτικών, σχεδιάστηκε και διανεμήθηκε σε αυτούς ένα ερωτηματολόγιο 19 ερωτήσεων κλειστού τύπου και οι απαντήσεις δόθηκαν στην τετραβάθμια κλίμακα Likert.

Από τα αποτελέσματα των απαντήσεων προκύπτει ότι οι εκπαιδευτικοί παρόλο που στην πλειονότητά τους είναι εξοικειωμένοι με τη χρήση των ηλεκτρονικών υπολογιστών και στη χρήση των διαδραστικών πινάκων στη καθημερινή τους διδασκαλία, αισθάνονται σε μεγάλο βαθμό επιφυλακτικοί απέναντι στη χρήση των εργαλείων της Τ.Ν. και επιπλέον δηλώνουν ότι έχουν ελλιπή γνώση αυτών καθώς και ότι πιστεύουν ότι είναι ανέτοιμοι να προχωρήσουν στη χρήση αυτών των εργαλείων αποτελεσματικά στη σχολική τάξη, Τα αποτελέσματα καταδεικνύουν την ανάγκη δημιουργίας επιμορφωτικών σεμιναρίων για την αποτελεσματική γνωστική υποστήριξη των εκπαιδευτικών.

Λέξεις – κλειδιά: εκπαιδευτικοί, ερωτηματολόγιο, τεχνητή νοημοσύνη

ΘΕΩΡΗΤΙΚΗ ΕΙΣΑΓΩΓΗ

Αρκετές έρευνες τα τελευταία χρόνια εστιάζουν στην κατανόηση, την ανάλυση αλλά και την πρόβλεψη της επίδρασης που έχει η Τ.Ν. στην εκπαίδευση. Η Τ.Ν. έχει πολλαπλούς και ιδιαίτερα σημαντικούς ρόλους στις διδακτικές και μαθησιακές διαδικασίες και σε όλες τις συνιστώσες αυτών και έχει δυναμικό ρόλο όχι μόνο στο παρόν αλλά και στο μέλλον των μαθητών (Mahmoud, 2020). Το αυξημένο ενδιαφέρον των ερευνητών οφείλεται στην επιτακτική ανάγκη των εκπαιδευτικών να προσαρμοστούν στα νέα δεδομένα του ψηφιακού τοπίου του 21ου αιώνα. Η προσαρμογή και μετάβαση καθορίζει εκ νέου όχι μόνο τους ρόλους των εκπαιδευτικών, αλλά και των μαθητών και είναι προφανώς μεγίστης σημασίας για την εκπαιδευτική διαδικασία, όχι μόνο από τεχνολογική αλλά και από παιδαγωγική άποψη.

Ενδεικτικά αναφέρουμε έρευνες όπως αυτές των Fahimirad και Kotamjani (2018) αλλά και των Tapalova και Zhiyenbayeva (2022), τα ευρήματα των οποίων τονίζουν τα πλεονεκτήματα της χρήσης εργαλείων Τ.Ν. και τη συμβολή τους στην βελτίωση των μαθησιακών αποτελεσμάτων. Ωστόσο, στη διάρκεια των τελευταίων ετών εγείρονται ζητήματα που αφορούν τις στάσεις και τις αντιλήψεις των εκπαιδευτικών σε σχέση με τη χρήση των εργαλείων Τ.Ν. Τα αποτελέσματα των ερευνών σε σχέση με το παραπάνω ζήτημα ποικίλουν. Πιο συγκεκριμένα σε έρευνα των Sutcu και Sutcu, (2023), οι εκπαιδευτικοί φαίνεται να αισθάνονται αισιοδοξία σε σχέση με τη χρήση της ΤΝ και υποστηρίζουν ότι δημιουργεί ευνοϊκό περιβάλλον μάθησης. Στην έρευνα των Aghaziarati et al. (2023) τονίζεται η ανάγκη για επιμόρφωση των εκπαιδευτικών που θα έχει ως στόχο την κατανόηση και την ορθή χρήση της Τ.Ν., έτσι ώστε να έχει τα επιθυμητά μαθησιακά αποτελέσματα.

Στον ελληνικό χώρο η έρευνα στον τομέα διερεύνησης των στάσεων και αντιλήψεων των εκπαιδευτικών είναι πιο περιορισμένη. Ενδεικτικά αναφέρουμε την εργασία της Varmazi (2022) που αφορά τους εκπαιδευτικούς πρωτοβάθμιας και δευτεροβάθμιας εκπαίδευσης και αυτή της Petropoulou (2024), που αφορά τους εκπαιδευτικούς δευτεροβάθμιας. Σε σχέση τώρα με τις αντιλήψεις και τις στάσεις των εκπαιδευτικών, στο χώρο των Φυσικών Επιστημών στον διεθνή χώρο, έχουν υλοποιηθεί πολυάριθμες έρευνες (Darayseh, 2023˙ Hebert et al., 2021˙ United Nations Educational, Scientific and Cultural Organization, 2019˙ Tallvid, 2016). Τα αποτελέσματα αυτών των μελετών καταδεικνύουν ότι σεβαστό ποσοστό εκπαιδευτικών παρόλο που αναγνωρίζει τις δυνατότητες της Τ.Ν. δεν αισθάνονται προετοιμασμένοι στο να εντάξουν τα διαθέσιμα εργαλεία με αποτέλεσμα να εμμένουν σε παραδοσιακούς τρόπους διδασκαλίας, μιας και με αυτόν τον τρόπο αισθάνονται πιο ασφαλείς και αποτελεσματικοί στη διδασκαλία τους. Αυτό που απασχόλησε τους ερευνητές δεν ήταν μόνο το αν χρησιμοποιούν οι εκπαιδευτικοί την Τ.Ν. αλλά και τους παράγοντες που επηρεάζουν τις στάσεις και τις αντιλήψεις απέναντι στην Τ.Ν., όπως π.χ. το άγχος και η αυτοαποτελεσματικότητα.

ΜΕΘΟΔΟΛΟΓΙΑ

Η παρούσα εργασία έχει ως σκοπό τη διερεύνηση των στάσεων και των αντιλήψεων τω εκπαιδευτικών Φυσικών Επιστημών Δευτεροβάθμιας εκπαίδευσης καθώς και ποια εργαλεία χρησιμοποιούνται από αυτούς. Συγκεκριμένα τα ερευνητικά ερωτήματα είναι τα εξής:

- Ποιες είναι οι αντιλήψεις και οι στάσεις των εκπαιδευτικών Φ.Ε. σχετικά με τη χρήση εργαλείων Τ.Ν.; Το ερώτημα αυτό στοχεύει στη διερεύνηση του πως οι εκπαιδευτικοί αντιλαμβάνονται την Τ.Ν., ποιες είναι οι προσδοκίες τους και αν τυχόν υπάρχουν επιφυλάξεις ή ανησυχίες.
- Ποια εργαλεία Τ.Ν. χρησιμοποιούν οι εκπαιδευτικοί Φ.Ε. στη διδασκαλία τους και με ποιους τρόπους τα ενσωματώνουν; Αυτό το ερώτημα στοχεύει να καταγράψει τα συγκεκριμένα εργαλεία που χρησιμοποιούν οι εκπαιδευτικοί καθώς και τις μεθόδους και τις στρατηγικές που ακολουθούν για την ενσωμάτωσή τους στη διδασκαλία.

Το δείγμα της παρούσας έρευνας αποτέλεσαν 40 εκπαιδευτικοί του κλάδου ΠΕ04 που υπηρετούν σε σχολεία δευτεροβάθμιας εκπαίδευσης από τις Περιφέρειες Θεσσαλίας και Ηπείρου Για την επεξεργασία των ερωτημάτων δόθηκε στους εκπαιδευτικούς ερωτηματολόγιο το οποίο αποτελείται από 18 ερωτήσεις κλειστού τύπου και είναι χωρισμένο σε 3 μέρη. Στο 1ο μέρος ζητήθηκαν ατομικά στοιχεία τα οποία αφορούσαν.

a) Ηλικία
b) Έτη υπηρεσίας
c) Σπουδές πέραν του βασικού πτυχίου
d) Ειδικότητα (Φυσικός, Χημικός, Βιολόγος, Γεωλόγος)

Ακολουθεί το 2ο μέρος που αποτελούνταν από 8 ερωτήσεις οι οποίες διερευνούσαν τις αντιλήψεις και στάσεις εκπαιδευτικών σχετικά με τη χρήση της ΤΝ.

1) Πιστεύω ότι η Τ.Ν. είναι ένα χρήσιμο εργαλείο που βοηθάει στη βελτίωση της διδασκαλίας των Φ.Ε.
2) Πιστεύω ότι η χρήση εργαλείων Τ.Ν. είναι απαραίτητη στην προετοιμασία των μαθητών κατά τον 21ο αιώνα

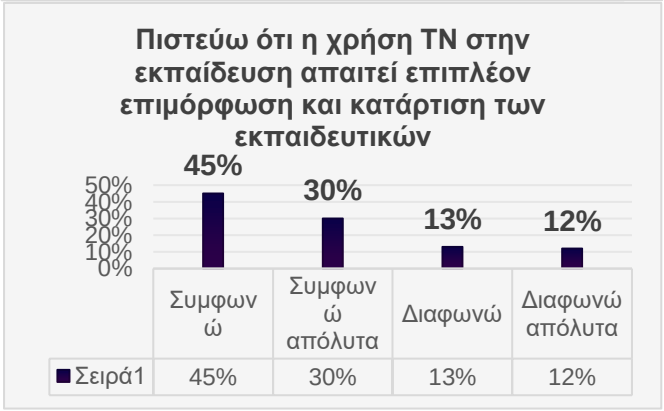
3) Πιστεύω ότι η Τ.Ν. μπορεί να κάνει πιο ελκυστικά τα μαθήματα για τους μαθητές
4) Ανησυχώ για την ηθική διάσταση της χρήσης Τ.Ν. στην εκπαίδευση
5) Ανησυχώ ότι η χρήση Τ.Ν. θα αντικαταστήσει το ρόλο του εκπαιδευτικού στην τάξη
6) Αισθάνομαι άνετα να ενσωματώσω εργαλεία Τ.Ν. στην διδασκαλία μου
7) Πιστεύω ότι η χρήση Τ.Ν. στην εκπαίδευση απαιτεί επιπλέον επιμόρφωση και κατάρτιση των εκπαιδευτικών
8) Πιστεύω ότι οι όποιες αντιρρήσεις στη χρήση εργαλείων Τ.Ν. στη διδασκαλία οφείλονται κυρίως σε έλλειψη ενημέρωσης και εκπαίδευσης σχετικά με το θέμα.

Πίνακας 1
Αποτελέσματα σε σχέση με το 1ο μέρος του ερωτηματολογίου.

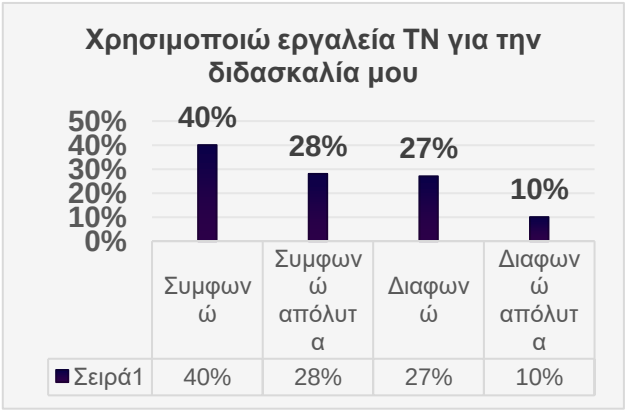
Κατηγορίες	Υποκατηγορίες	Συχνότητα
Φύλο	Άνδρες	22
	Γυναίκες	18
Ηλικιακή ομάδα	<35	4
	35-44	10
	45-55	16
	>55	10
Έτη προϋπηρεσίας	0-4 έτη	0
	5-10 έτη	5
	11-20 έτη	26
	Πάνω από 20 έτη	19
Σπουδές	Βασικό πτυχίο	8
	Δεύτερο πτυχίο	2
	Μεταπτυχιακό	26
	Διδακτορικό	4
Ειδικότητα	Φυσικός	22
	Χημικός	9
	Βιολόγος	7
	Γεωλόγος	2

Στο 3ο μέρος ζητήθηκε από τους εκπαιδευτικούς να δηλώσουν ποια εργαλεία χρησιμοποιούν, μέσω των ακόλουθων ερωτήσεων:

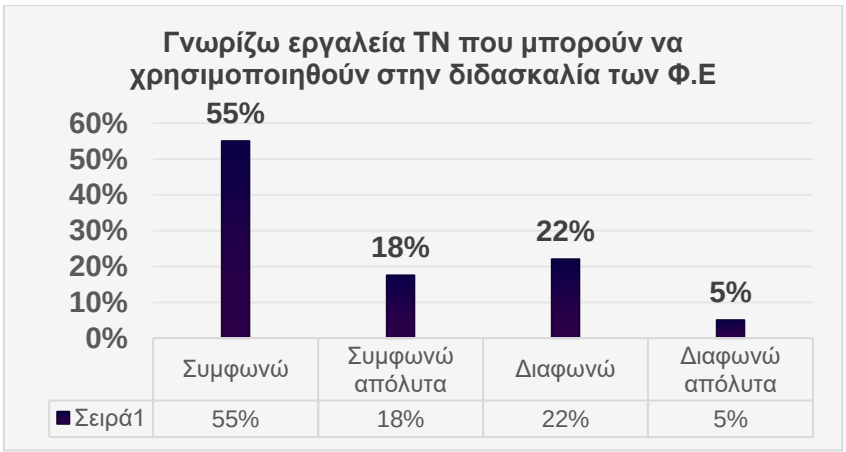
1) Χρησιμοποιώ εργαλεία Τ.Ν. για την προετοιμασία της διδασκαλίας μου για τη δημιουργία εκπαιδευτικού υλικού
2) Χρησιμοποιώ εργαλεία Τ.Ν. στη διάρκεια της διδασκαλία μου



3) Χρησιμοποιώ εργαλεία Τ.Ν. για την αξιολόγηση των μαθητών
4) Χρησιμοποιώ κυρίως το ChatGPT ή/και το Gemini στη διδασκαλία μου
5) Χρησιμοποιώ κυρίως εκπαιδευτικές πλατφόρμες βασισμένες στην Τ.Ν.
6) Γνωρίζω εργαλεία Τ.Ν. που μπορούν να χρησιμοποιηθούν στην διδασκαλία των Φ.Ε.

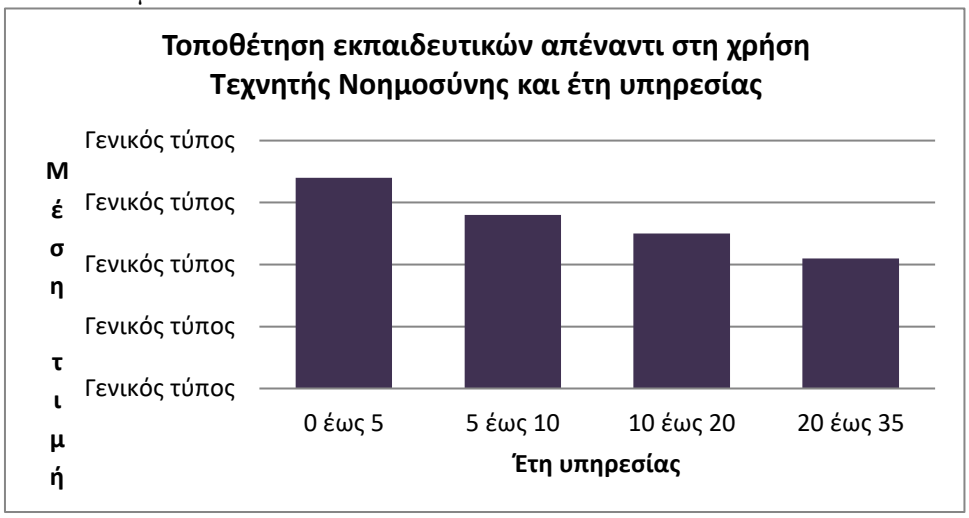


ΑΠΟΤΕΛΕΣΜΑΤΑ - ΣΤΑΤΙΣΤΙΚΗΣ ΑΝΑΛΥΣΗΣ - ΣΧΟΛΙΑΣΜΟΣ ΑΠΟΤΕΛΕΣΜΑΤΩΝ



Για να ελεγχθεί η αξιοπιστία του ερωτηματολογίου υπολογίστηκε ο συντελεστής α Cronbach α=0,73. Η στατιστική ανάλυση έγινε με το πρόγραμμα SPSS. Χρησιμοποιήθηκε 4-βάθμια κλίμακα Likert με τις επιλογές Διαφωνώ απόλυτα, Διαφωνώ, Συμφωνώ, Συμφωνώ απόλυτα. Στον παρακάτω ΠΙΝΑΚΑ 1 παρουσιάζονται τα αποτελέσματα σε σχέση με το 1ο μέρος του ερωτηματολογίου.

Στα παρακάτω διαγράμματα παρουσιάζονται τα ποσοστά από τις απαντήσεις των εκπαιδευτικών σε μέρος των ερωτήσεων του ερωτηματολογίου.



Επιπροσθέτως υπολογίσαμε το μέσο όρο όλων των ερωτήσεων που αφορούν τη στάση των εκπαιδευτικών απέναντι στη χρήση της T.N., σε σχέση με τα έτη προϋπηρεσίας τους. Στο παρακάτω συγκεντρωτικό διάγραμμα παρουσιάζουμε τα αποτελέσματα.

Η τοποθέτηση των εκπαιδευτικών στην 4-βαθμια κλίμακα τύπου Likert ήταν θετική με τους εκπαιδευτικούς που έχουν 0-5 έτη υπηρεσίας να εμφανίζουν τη μεγαλύτερη μέση τιμή 3,4 (±0,3) και την ομάδα των εκπαιδευτικών 20-35 έτη υπηρεσίας να έχουν τη χαμηλότερη μέση τιμή 2,1 (±0,2).

Διερευνήθηκε επίσης εάν υπάρχει θετική συσχέτιση μεταξύ της ηλικίας των εκπαιδευτικών και της άποψης ότι η χρήση T.N. στην εκπαίδευση απαιτεί επιπλέον επιμόρφωση και κατάρτιση των εκπαιδευτικών μέσω του συντελεστή Pearson, ο οποίος υπολογίστηκε ίσος με ($r(38) = .68$, $p<.05$

Θετική συσχέτιση υπήρχε επίσης μεταξύ των ετών υπηρεσίας των εκπαιδευτικών και της ανησυχίας για την ηθική διάσταση της χρήσης TN στην εκπαίδευση μεPearson ($r(38) = .73$, $p<.05$.

Σε σχέση με τη χρησιμότητα της T.N. ως εργαλείο διδασκαλίας η πλειοψηφία των εκπαιδευτικών (περίπου 50%) συμφωνεί ότι η T.N. αποτελεί χρήσιμο εργαλείο που βοηθάει στη βελτίωση της διδασκαλίας των Φυσικών Επιστημών. Επιπλέον, περίπου 30% συμφωνεί απόλυτα με αυτή τη δήλωση. Αντίθετα, μόνο 15% διαφωνεί και λιγότερο από 5% διαφωνεί απόλυτα. Παρατηρούμε δηλαδή συνολικά μια θετική στάση των εκπαιδευτικών προς τη χρησιμότητα της T.N., με ποσοστό συμφωνίας που φτάνει το 80%.

Σχετικά με το κρίσιμο θέμα της ηθικής διάστασης της χρήσης της T.N. στην εκπαίδευση, σημαντικό ποσοστό (περίπου 52%) των εκπαιδευτικών εκφράζει ανησυχία παρόλη τη θετική αποδοχή της χρησιμότητάς της. Επιπλέον, περίπου 18% συμφωνεί απόλυτα με αυτή την ανησυχία. Συνολικά 70% των εκπαιδευτικών εκφράζει προβληματισμούς σχετικά με τις ηθικές επιπτώσεις της T.N., ενώ μόνο 30% διαφωνεί με αυτές τις ανησυχίες (περίπου 22% διαφωνεί και 8% διαφωνεί απόλυτα).

Αναφορικά με την ανάγκη επιμόρφωσης και κατάρτισης, η πλειοψηφία των εκπαιδευτικών (περίπου 45%) συμφωνεί ότι η χρήση T.N. στην εκπαίδευση απαιτεί επιπλέον επιμόρφωση και κατάρτιση των εκπαιδευτικών. Περίπου 30% συμφωνεί απόλυτα με αυτή την άποψη. Αντίθετα, μόνο 13% διαφωνεί και 12% διαφωνεί απόλυτα. Συνολικά, το 75% των εκπαιδευτικών αναγνωρίζει την ανάγκη περαιτέρω επιμόρφωσης για την αποτελεσματική αξιοποίηση της T.N. στη διδασκαλία.

Σχετικά με τη γνώση εργαλείων T.N. που μπορούν να χρησιμοποιηθούν στη διδασκαλία των Φ.Ε., περίπου 55% των εκπαιδευτικών συμφωνεί ότι γνωρίζει τέτοια εργαλεία, ενώ περίπου 18% συμφωνεί απόλυτα. Περίπου 22% διαφωνεί και μόνο 5% διαφωνεί απόλυτα. Συνολικά, το 73% των εκπαιδευτικών δηλώνει ότι γνωρίζει εργαλεία T.N. που μπορούν να αξιοποιηθούν στη διδασκαλία των Φυσικών Επιστημών.

Όσον αφορά την τρέχουσα χρήση εργαλείων T.N. στη διδασκαλία, περίπου 40% των εκπαιδευτικών συμφωνεί ότι χρησιμοποιεί τέτοια εργαλεία, ενώ περίπου 28% συμφωνεί απόλυτα. Αντίθετα, περίπου 27% διαφωνεί και 10% διαφωνεί απόλυτα. Συνολικά, το 68% των εκπαιδευτικών δηλώνει ότι ήδη χρησιμοποιεί εργαλεία T.N. στη διδασκαλία του, γεγονός που υποδηλώνει σημαντική διείσδυση της τεχνολογίας αυτής στην εκπαιδευτική πρακτική.

ΣΥΜΠΕΡΑΣΜΑΤΑ – ΠΡΟΤΑΣΕΙΣ

Τα αποτελέσματα της παρούσας έρευνας καταδεικνύουν μια γενικά θετική στάση των εκπαιδευτικών Φυσικών Επιστημών απέναντι στη χρήση της Τεχνητής Νοημοσύνης ως εργαλείου διδασκαλίας. Η πλειοψηφία των εκπαιδευτικών αναγνωρίζει τη χρησιμότητα της T.N. και δηλώνει εξοικειωμένη με σχετικά εργαλεία, με σημαντικό ποσοστό να αναφέρει ότι ήδη τα χρησιμοποιεί στην πράξη.

Ωστόσο, παράλληλα με την αποδοχή της τεχνολογίας, οι εκπαιδευτικοί εκφράζουν σημαντικές ανησυχίες σχετικά με την ηθική διάσταση της χρήσης T.N. στην εκπαίδευση. Αυτό υποδηλώνει την ανάγκη για περαιτέρω συζήτηση και έρευνα σχετικά με τις ηθικές προεκτάσεις της εφαρμογής της T.N. στο εκπαιδευτικό περιβάλλον.

Επιπλέον, η έρευνα αναδεικνύει τη σαφή ανάγκη για επιπλέον επιμόρφωση και κατάρτιση των εκπαιδευτικών στη χρήση της T.N., γεγονός που υπογραμμίζει τη σημασία της συνεχούς επαγγελματικής ανάπτυξης στον τομέα αυτό.

Είναι ενδιαφέρον ότι οι θετικές στάσεις απέναντι στην T.N. και η τρέχουσα χρήση της παρατηρούνται σε ένα δείγμα όπου κυριαρχούν εκπαιδευτικοί με σημαντική εμπειρία (10-35 έτη) και ηλικίες 45-54 ετών. Αυτό ενδεχομένως αντικρούει την υπόθεση ότι οι μεγαλύτερης ηλικίας και εμπειρίας εκπαιδευτικοί είναι λιγότερο δεκτικοί σε νέες τεχνολογίες.

Συμπερασματικά, η έρευνα αναδεικνύει μια δυναμική σχέση μεταξύ των εκπαιδευτικών Φυσικών Επιστημών και της Τεχνητής Νοημοσύνης, με σημαντική αποδοχή και ενσωμάτωση της τεχνολογίας αυτής στη διδακτική πρακτική. Παράλληλα, αναδεικνύονται προκλήσεις που σχετίζονται με ηθικά ζητήματα και την ανάγκη επιμόρφωσης.

Προτείνεται η περαιτέρω έρευνα για τη διερεύνηση των ηθικών διαστάσεων της χρήσης T.N. στην εκπαίδευση καθώς και ο σχεδιασμός στοχευμένων προγραμμάτων επιμόρφωσης για εκπαιδευτικούς Φυσικών Επιστημών. Επιπλέον, θα ήταν χρήσιμη η μελέτη συγκεκριμένων εφαρμογών T.N. στη διδασκαλία των Φυσικών Επιστημών και η αξιολόγηση της αποτελεσματικότητάς τους στη μαθησιακή διαδικασία.

ΕΚΠΑΙΔΕΥΤΙΚΕΣ ΔΡΑΣΕΙΣ ΚΑΙ ΚΑΙΝΟΤΟΜΙΑ: Ο ΚΡΟΚΟΣ ΚΟΖΑΝΗΣ ΚΑΙ ΤΟ BEEBOT ΩΣ ΔΙΔΑΚΤΙΚΑ ΕΡΓΑΛΕΙΑ

Τσίρου Αντιγόνη
Εκπαιδευτικός Πληροφορικής, MSc
Διεύθυνση Πρωτοβάθμιας Εκπαίδευσης Κοζάνης, Υπουργείο Παιδείας και Θρησκευμάτων
Κοζάνη, Ελλάδα
e-mail: tsirouant@gmail.com

ΠΕΡΙΛΗΨΗ

Η παρούσα έρευνα διερευνά την αποτελεσματικότητα της δράσης «Κρόκος Κοζάνης» σε συνδυασμό με τη χρήση του ρομπότ Bee-Bot σε μεικτές ομάδες της πρωτοβάθμιας εκπαίδευσης στην περιοχή της Κοζάνης. Η εργασία εστιάζει στη σύνδεση του τοπικού πολιτισμού, των παραδόσεων και της οικονομικής σημασίας του κρόκου με την εκπαιδευτική διαδικασία, ενώ παράλληλα αξιοποιεί την καινοτόμο τεχνολογία της ρομποτικής για την ενίσχυση της ομαδικής μάθησης και των δεξιοτήτων προγραμματισμού.

Στο πλαίσιο της έρευνας, δημιουργήθηκε ένα ηλεκτρονικό ερωτηματολόγιο (Google Forms), το οποίο διανεμήθηκε σε 32 εκπαιδευτικούς μετά την ολοκλήρωση εκπαιδευτικών δράσεων για τον Κρόκο Κοζάνης. Οι εκπαιδευτικοί απάντησαν ανώνυμα, ενώ τα δεδομένα συλλέχθηκαν και επεξεργάστηκαν αυτόματα, επιτρέποντας μια συστηματική ανάλυση των απόψεων τους για τη σύνδεση του διδακτικού θέματος με την πραγματική ζωή και τη χρήση του ρομπότ Bee-Bot στην τάξη.

Η μεθοδολογία περιλάμβανε την καταγραφή δημογραφικών στοιχείων (φύλο, ηλικία, μορφωτικό επίπεδο, χρόνια υπηρεσίας), που υποδεικνύουν ένα δείγμα έμπειρων εκπαιδευτικών με κυρίαρχη παρουσία γυναικών και σημαντική επαγγελματική προϋπηρεσία. Τα αποτελέσματα της έρευνας αποκαλύπτουν ότι οι εκπαιδευτικοί θεωρούν το θέμα του Κρόκου άρρηκτα συνδεδεμένο με την καθημερινή ζωή των μαθητών, επισημαίνοντας την αξία του για την τοπική κουλτούρα, τα έθιμα και την οικονομία της περιοχής.

Παράλληλα, η χρήση του ρομπότ Bee-Bot ενίσχυσε την ομαδοσυνεργατική μάθηση, προωθώντας την αμοιβαία αλληλεπίδραση, την κριτική και δημιουργική σκέψη, καθώς και την πρακτική εξοικείωση με βασικές αρχές προγραμματιστικής σκέψης. Οι εκπαιδευτικοί παρατήρησαν ιδιαίτερα οφέλη όσον αφορά τη συμμετοχή όλων των μαθητών, συμπεριλαμβανομένων των «αδύναμων», και την ενίσχυση των κοινωνικο-συναισθηματικών δεξιοτήτων.

Τα συνολικά συμπεράσματα επιβεβαιώνουν τη θετική διάθεση για την ενσωμάτωση καινοτόμων πρακτικών στη διδασκαλία, επισημαίνοντας την ανάγκη για περαιτέρω επιμόρφωση στη χρήση ρομποτικών εργαλείων. Η παρούσα περίληψη προσφέρει μια συνοπτική εικόνα της έρευνας, προσκαλώντας τον αναγνώστη να ανακαλύψει σε βάθος τις λεπτομέρειες της μεθοδολογίας και των ευρημάτων, τα οποία συμβάλλουν στη βελτίωση της εκπαιδευτικής πρακτικής.

Η μελέτη αυτή παρουσιάζει όχι μόνο την άμεση επίδραση των καινοτόμων μεθόδων στη μάθηση, αλλά και τις προοπτικές για μελλοντικές εφαρμογές που μπορούν να ενισχύσουν την ποιότητα της εκπαιδευτικής διαδικασίας.

Λέξεις-κλειδιά: Κρόκος Κοζάνης, Bee-Bot , διαφοροποιημένη διδασκαλία, ομαδική συνεργασία, ρομποτική, βιωματική μάθηση.

ΕΙΣΑΓΩΓΗ

Η παρούσα έρευνα διεξήχθη στο πλαίσιο της εκπαιδευτικής δράσης με θέμα τον Κρόκο Κοζάνης και τη χρήση του ρομπότ Bee-Bot στην πρωτοβάθμια εκπαίδευση. Στόχος της ήταν η διερεύνηση των απόψεων των εκπαιδευτικών σχετικά με τη σύνδεση της διδασκαλίας με την τοπική πραγματικότητα και τη συμβολή της ρομποτικής στην ενίσχυση της μαθησιακής διαδικασίας.

Για τη συλλογή των δεδομένων χρησιμοποιήθηκε ηλεκτρονικό ερωτηματολόγιο, στο οποίο ανταποκρίθηκαν 32 εκπαιδευτικοί. Η πλειονότητα των συμμετεχόντων ήταν γυναίκες με πολυετή εκπαιδευτική εμπειρία, γεγονός που προσδίδει ιδιαίτερη βαρύτητα στις απαντήσεις. Οι ερωτήσεις επικεντρώθηκαν τόσο στη θεματολογία της δράσης όσο και στην εφαρμογή της εκπαιδευτικής ρομποτικής με το ρομπότ Bee-Bot , εξετάζοντας την επίδρασή τους στη συνεργατική μάθηση, τη συμμετοχή όλων των μαθητών και την ανάπτυξη βασικών δεξιοτήτων.

Η ανάλυση των απαντήσεων παρέχει πολύτιμα ευρήματα για τη δυναμική αξιοποίηση τοπικών θεματικών και καινοτόμων τεχνολογιών στην εκπαιδευτική πράξη, ενισχύοντας τη βιωματική, διαθεματική και διαφοροποιημένη προσέγγιση της διδασκαλίας.

ΔΙΔΑΚΤΙΚΗ ΚΑΙΝΟΤΟΜΙΑ ΚΑΙ ΤΟΠΙΚΗ ΠΟΛΙΤΙΣΜΙΚΉ ΤΑΥΤΟΤΗΤΑ

Η σύνδεση της εκπαιδευτικής διαδικασίας με στοιχεία της τοπικής πολιτισμικής ταυτότητας αποτελεί μια σύγχρονη και ουσιαστική διδακτική πρακτική, που ενισχύει τη βιωματική και ουσιαστική μάθηση. Η εστίαση σε θεματικές που σχετίζονται με την καθημερινότητα, την ιστορία και την οικονομική ζωή του τόπου συμβάλλει όχι μόνο στην καλύτερη κατανόηση των μαθησιακών αντικειμένων, αλλά και στην καλλιέργεια πολιτιστικής συνείδησης και κοινωνικής ενσυναίσθησης στους μαθητές.

Η δράση με θέμα τον Κρόκο Κοζάνης αξιοποίησε ένα τοπικό προϊόν με διεθνή αναγνώριση, δημιουργώντας ένα πλούσιο και αυθεντικό μαθησιακό περιβάλλον. Μέσα από τη συγκεκριμένη θεματολογία, οι μαθητές είχαν την ευκαιρία να γνωρίσουν τα ήθη, τα έθιμα και την οικονομική σημασία του κρόκου, συνδέοντας έτσι τη σχολική γνώση με την πραγματική ζωή.

Εικόνα 1.
Μακέτα που χρησιμοποιήθηκε σε δράσεις και απεικονίζει τα στάδια του φυτού Κρόκος Κοζάνης (σαφράν) το ρομπότ Bee-Bot. (Το υλικό σχεδιάστηκε & δημιουργήθηκε από την Τσίρου Αντιγόνη)

Παράλληλα, η χρήση του εκπαιδευτικού ρομπότ Bee-Bot ενίσχυσε τη διαθεματική και διαφοροποιημένη διδασκαλία, προάγοντας τη συνεργατική μάθηση και τη συμμετοχή όλων των μαθητών. Η εισαγωγή της εκπαιδευτικής ρομποτικής στην πρωτοβάθμια εκπαίδευση αποτέλεσε έναν καινοτόμο άξονα της δράσης, προσφέροντας ευκαιρίες για

την ανάπτυξη της υπολογιστικής σκέψης και την ενεργό εμπλοκή των μαθητών σε δραστηριότητες εξερεύνησης, επίλυσης προβλημάτων και δημιουργίας.

Η παρούσα έρευνα επιχείρησε να αποτυπώσει τις απόψεις των εκπαιδευτικών για την αποτελεσματικότητα αυτής της σύνθεσης τοπικού πολιτισμικού περιεχομένου και εκπαιδευτικής τεχνολογίας. Μέσα από τη συστηματική ανάλυση των απαντήσεών τους, αναδεικνύεται η δυναμική της τοπικής θεματολογίας ως εργαλείο ενδυνάμωσης της μαθησιακής εμπειρίας, καθώς και η θετική αποδοχή της ρομποτικής ως παιδαγωγικού μέσου καινοτομίας.

Εικόνα 2.

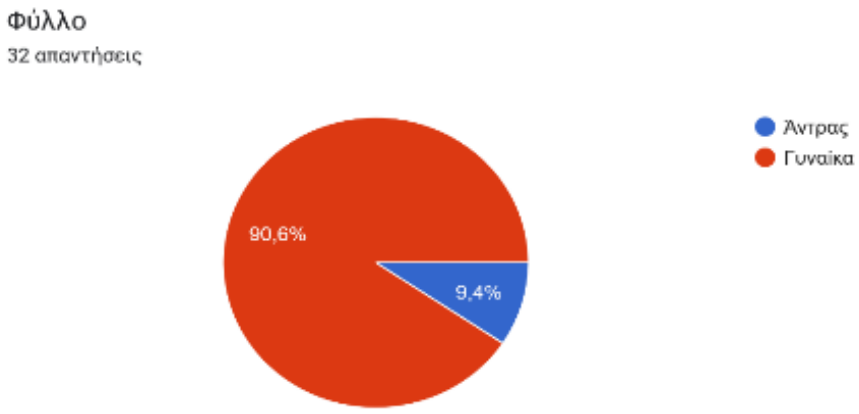
(Το υλικό σχεδιάστηκε & δημιουργήθηκε από την Τσίρου Αντιγόνη)

ΜΕΛΕΤΗ ΚΑΙ ΑΝΑΛΥΣΗ ΑΠΟΤΕΛΕΣΜΑΤΩΝ ΤΗΣ ΕΡΕΥΝΑΣ ΓΙΑ ΤΗ ΔΡΑΣΗ ΜΕ ΤΟ ΦΥΤΟ «ΚΡΟΚΟΣ ΚΟΖΑΝΗΣ» ΚΑΙ ΤΗΝ ΑΞΙΟΠΟΙΗΣΗ ΤΟΥ ΡΟΜΠΟΤ BEE-BOT

Στην παρούσα μελέτη παρουσιάζονται και αναλύονται τα δεδομένα από ερωτηματολόγιο που διανεμήθηκε σε 32 εκπαιδευτικούς στην Α/θμια Εκπ/ση, με στόχο τη διερεύνηση των απόψεών τους για:

- Τη σύνδεση του διδασκόμενου θέματος (Κρόκος Κοζάνης) με την πραγματική ζωή.
- Την αξιοποίηση της ρομποτικής (Bee-Bot) σε ομάδες μεικτής δυναμικότητας και την επίδρασή της στη μαθησιακή διαδικασία.

Παρακάτω γίνεται συστηματική παρουσίαση των βασικών αξόνων της έρευνας και των αποτελεσμάτων, συνοδευόμενη από ερμηνείες και συμπεράσματα.



ΔΗΜΟΓΡΑΦΙΚΑ ΣΤΟΙΧΕΊΑ ΣΥΜΜΕΤΕΧΟΝΤΩΝ

Φύλο: Από το σύνολο των 32 συμμετεχόντων, οι 29 είναι γυναίκες και οι 3 είναι άντρες.
Συνεπώς, το δείγμα είναι κατά πλειοψηφία γυναικείο (περίπου 90,6% γυναίκες, 9,4 % είναι άνδρες).

Ηλικιακή Κατανομή: Υπάρχουν συμμετέχοντες στις ηλικιακές ομάδες 31-40 (6%), 41-50 (25%), 51-60 (66%) και 60+ (3%). Η πλειονότητα των εκπαιδευτικών (πάνω από τους μισούς) βρίσκονται στην ομάδα 51-60 ετών, ενώ ακολουθούν οι ηλικίες 41-50. Αυτό υποδηλώνει ότι το δείγμα έχει κυρίως έμπειρους εκπαιδευτικούς, μεγαλύτερης ηλικίας, με πολλά χρόνια υπηρεσίας.

Μορφωτικό Επίπεδο: Όλοι οι εκπαιδευτικοί είναι απόφοιτοι τριτοβάθμιας εκπαίδευσης (Πανεπιστημιακό πτυχίο). Μερικοί από αυτούς κατέχουν και Μεταπτυχιακό τίτλο (13%), (εντοπίζονται αρκετές περιπτώσεις κατόχων Μεταπτυχιακού). Λίγοι δήλωσαν επιπλέον τίτλους (3%) (π.χ. Παιδαγωγική Ακαδημία).

Εικόνα 3.
Δημογραφικά στοιχεία/Φύλο

Χρόνια Υπηρεσίας & Σχέση Εργασίας: Η μεγάλη πλειονότητα των συμμετεχόντων (ιδίως όσοι είναι 51-60 ετών) έχουν πάνω από 20 χρόνια υπηρεσίας (69%). Στις υπόλοιπες ηλικιακές ομάδες εμφανίζονται συχνά οι κατηγορίες 10-20 χρόνια υπηρεσίας (31%). Όλοι οι εκπαιδευτικοί είναι μόνιμοι στη δημόσια εκπαίδευση (100%).

Το 1ο ερευνητικό ερώτημα προς τους εκπαιδευτικούς αφορά την **Σύνδεση του Θέματος «Κρόκος Κοζάνης» με την Πραγματική Ζωή**: Στο ερωτηματολόγιο περιλαμβάνονταν ερωτήσεις σχετικές με το εάν το διδασκόμενο θέμα, δηλαδή ο Κρόκος Κοζάνης, είχε «απόλυτη σύνδεση με την πραγματική ζωή».

Σύνδεση με ήθη-έθιμα: Οι 30 εκπαιδευτικοί απάντησαν **«Ναι»** (94%) στην ερώτηση για τη σύνδεση του θέματος με την πραγματική ζωή (2 εκπαιδευτικοί - 6% δεν απάντησαν).

Οικονομία του τόπου: Οι 30 εκπαιδευτικοί απάντησαν **«Ναι»** (94%) στην ερώτηση για τη σύνδεση του θέματος με την πραγματική ζωή (2 εκπαιδευτικοί - 6% απάντησαν όχι).

Αναφέρουν ότι οι μαθητές ήρθαν σε επαφή με την **τοπική κουλτούρα**, **τα ήθη και τα έθιμα**, αλλά και την **οικονομική σημασία** του Κρόκου για την περιοχή της Κοζάνης. Ορισμένοι τονίζουν ότι οι μαθητές συνειδητοποίησαν τη σπουδαιότητα του φυτού για τους παραγωγούς και την **αγροτική-οικονομική δραστηριότητα**.

Σύνδεση παρελθόντος-παρόντος-μέλλοντος: Οι περισσότεροι συμμετέχοντες θεωρούν ότι το θέμα προσφέρει μια χρονολογική σύνδεση (πώς καλλιεργούνταν, πώς χρησιμοποιείται σήμερα, ποιες είναι οι προοπτικές στο μέλλον). Το 85 % δηλαδή 27 εκπαιδευτικοί απάντησαν Ναι και μικρή μειοψηφία (3 εκπαιδευτικοί το 10% απάντησαν όχι και 2 εκπαιδευτικοί δεν απάντησαν) ότι η σύνδεση με το μέλλον δεν ήταν τόσο σαφής.

Το 2ο ερευνητικό ερώτημα: Οι εκπαιδευτικοί ρωτήθηκαν αν η χρήση της ρομποτικής Bee-Bot : **Βοήθησε στην Ομαδοσυνεργατική Μάθηση**: Πολλές απαντήσεις κυμαίνονται από «Πολύ» απάντησαν 7 εκπαιδευτικοί δηλαδή το 22% έως «Παρά πολύ» 20 εκπαιδευτικοί δηλαδή το 62% θετικές. Λίγοι εκπαιδευτικοί δήλωσαν «Ικανοποιητικά», 5 εκπαιδευτικοί δηλαδή το 16% χωρίς όμως να αρνούνται τη χρησιμότητα του. Γενικά, οι εκπαιδευτικοί παρατήρησαν ότι το ρομπότ Bee-Bot προκάλεσε μεγάλο ενδιαφέρον και συνεργασία μεταξύ των μαθητών, καθώς οι ομάδες έπρεπε να σχεδιάσουν διαδρομές, να συζητήσουν, να διορθώσουν λάθη κ.λπ.

Το 3ο ερευνητικό ερώτημα για το αν **Υπήρχε αμοιβαία αλληλεπίδραση του ρομπότ (Bee-Bot) με τον μαθητή:** Η συντριπτική πλειονότητα απάντησε «Πολύ» 10 εκπαιδευτικοί δηλαδή το 31% , «Παρά πολύ» 20 εκπαιδευτικοί δηλαδή το 63% και 2 εκπαιδευτικοί απάντησαν ικανοποιητικά. Εκπαιδευτικοί ανέφεραν ότι οι μαθητές

«διασκέδασαν» με τον προγραμματισμό, ένιωσαν ότι καθοδηγούν το ρομπότ και ταυτόχρονα «έβλεπαν» τις συνέπειες των εντολών τους σε πραγματικό χρόνο.

Το 4ο ερευνητικό ερώτημα για το αν **Καλλιέργησε την κριτική και δημιουργική σκέψη των μαθητών η διδασκαλία με τα Bee-Bot** : Σχεδόν όλοι απάντησαν «Ναι» 29 εκπαιδευτικοί δηλαδή το 91% και 3 δηλαδή 9% εκπαιδευτικοί απάντησαν όχι ή κάποιο θετικό βαθμό συμφωνίας. Οι εκπαιδευτικοί σημείωσαν ότι η διαδικασία επίλυσης προβλημάτων (programming – debugging – τροποποίηση εντολών) κινητοποίησε τη δημιουργικότητα και τη λογική σκέψη των παιδιών.

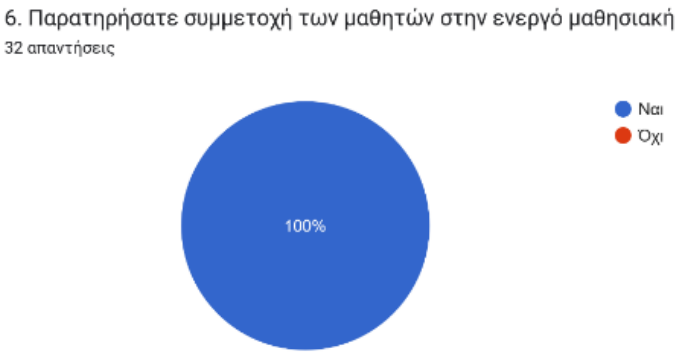
Το 5ο ερευνητικό ερώτημα προς τους εκπαιδευτικούς ήταν: Στο ερωτηματολόγιο υπήρχε πεδίο όπου οι εκπαιδευτικοί κλήθηκαν να επιλέξουν ή να αναφέρουν (από 2 προτάσεις) συγκεκριμένα οφέλη που παρατήρησαν. Οι πιο συχνές αναφορές ήταν: **«Οι μαθητές αφηγήθηκαν φανταστικές ή πραγματικές ιστορίες μετά την περιήγηση με το ρομπότ στη μακέτα»**: Κάποιοι εκπαιδευτικοί παρατήρησαν ότι το Bee-Bot ενίσχυσε και την **αφηγηματική ικανότητα** των παιδιών, καθώς τα παιδιά εμπνεύστηκαν από τη διαδρομή/μακέτα για να δημιουργήσουν ιστορίες απάντησαν 5 εκπαιδευτικοί (16,7%).

«Οι μαθητές κατανόησαν τη σπουδαιότητα του φυτού για τους ανθρώπους που εργάζονται για την παραγωγή του»: Εμφανίζεται πολύ συχνά, τονίζοντας ότι τα παιδιά εκτίμησαν την εργασία των παραγωγών και τη διαδικασία παραγωγής του κρόκου. απάντησαν 12 εκπαιδευτικοί (40%).

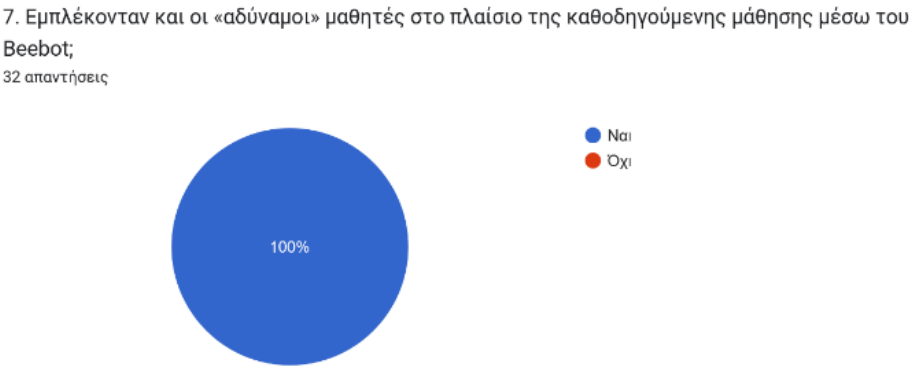
«Οι μαθητές ανακάλυψαν τη χρησιμότητα του φυτού στην υγεία και τη διατροφή»: Πολλές φορές υπογραμμίζεται η διάσταση της διατροφής/υγείας και το ενδιαφέρον των παιδιών για τα ευεργετικά στοιχεία του κρόκου απάντησαν 17 εκπαιδευτικοί (56,7%)

«Οι μαθητές ανέπτυξαν ικανότητες προγραμματισμού»: Πάρα πολλοί εκπαιδευτικοί σημείωσαν ρητά ότι τα παιδιά εξοικειώθηκαν με βασικές αρχές προγραμματιστικής σκέψης (αλγοριθμική λογική, βήμα προς βήμα εκτέλεση, διορθωτικές κινήσεις) απάντησαν 26 εκπαιδευτικοί (86,7%).

Εικόνα 4.
Γράφημα από τις απαντήσεις στην ερώτηση αν καλλιέργησε την κριτική και δημιουργική σκέψη των μαθητών η διδασκαλία με τα Bee-Bot /απάντηση Ναι



Το 6ο ερευνητικό ερώτημα προς τους εκπαιδευτικούς ήταν**: Παρατηρήσατε συμμετοχή των μαθητών στην ενεργό μαθησιακή διαδικασία:** Η συντριπτική πλειονότητα απάντησε **«Ναι»** ποσοστό 100% στην ερώτηση αν παρατηρήθηκε **ενεργή συμμετοχή** των μαθητών. Η χρήση του Bee-Bot προκάλεσε **ενθουσιασμό** και **περιέργεια**, με αποτέλεσμα τα παιδιά να θέλουν να συνεργαστούν.



Το 7ο ερευνητικό ερώτημα προς τους εκπαιδευτικούς ήταν: **Εμπλέκονταν και οι «αδύναμοι» μαθητές στο πλαίσιο της καθοδηγούμενης μάθησης μέσω του Bee-Bot .** Επίσης, όλοι οι εκπαιδευτικοί δήλωσαν Ναι δηλαδή ποσοστό 100% ότι οι «αδύναμοι» μαθητές εντάχθηκαν πιο εύκολα στη δραστηριότητα. Οι εκπαιδευτικοί εστιάζουν στο

ότι το Bee-Bot δίνει **πρακτική, χειροπιαστή διάσταση** στη μάθηση, με αποτέλεσμα μαθητές που δυσκολεύονται θεωρητικά, να συμμετέχουν ενεργά στον σχεδιασμό, στην κίνηση του ρομπότ κ.ο.κ.

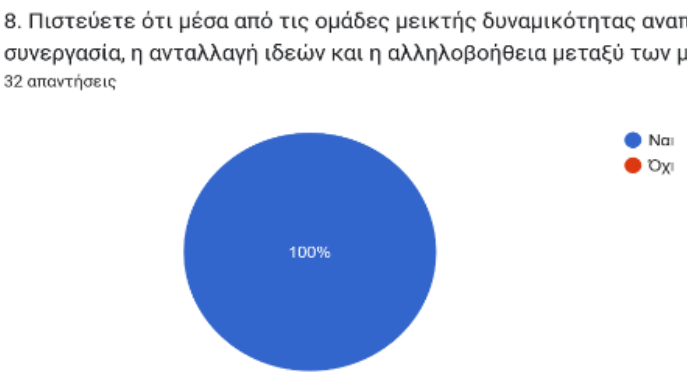
Εικόνα 5.
Γράφημα από τις απαντήσεις αν παρατηρήσατε συμμετοχή των μαθητών στην ενεργό μαθησιακή διαδικασία

Εικόνα 6.
Γράφημα από τις απαντήσεις στην ερώτηση αν Εμπλέκονταν και οι «αδύναμοι» μαθητές στο πλαίσιο της καθοδηγούμενης μάθησης μέσω του Bee-Bot .

Το 8ο ερευνητικό ερώτημα προς τους εκπαιδευτικούς ήταν: **Πιστεύετε ότι μέσα από τις ομάδες μεικτής δυναμικότητας αναπτύχθηκε η αρμονική συνεργασία, η ανταλλαγή ιδεών και η αλληλοβοήθεια μεταξύ των μαθητών σας.** Όλοι οι εκπαιδευτικοί απάντησαν 100% «Ναι» στο ότι οι ομάδες μεικτής δυναμικότητας βοήθησαν στην αρμονική συνεργασία, ανταλλαγή ιδεών και αλληλοβοήθεια.

Σε Ποιους Τομείς Παρεμβαίνει η Διαφοροποιημένη Διδασκαλία με το Bee-Bot :

Στο 9ο ερευνητικό ερώτημα: Οι συμμετέχοντες κλήθηκαν να επιλέξουν έως τρεις τομείς (από μια λίστα) όπου θεωρούν ότι η χρήση του Bee-Bot ασκεί τη μεγαλύτερη επιρροή. Οι κατηγορίες ήταν:

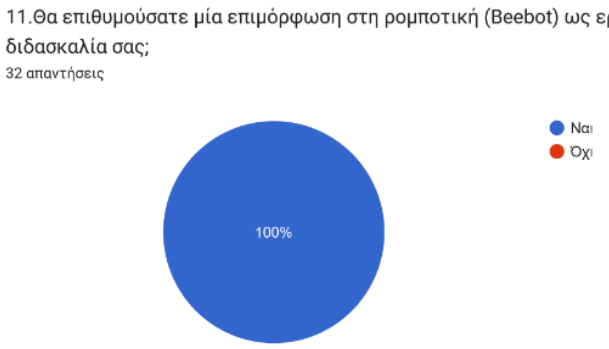


Νοητικές ικανότητες (π.χ. κριτική σκέψη, αλγοριθμική λογική): Απάντησαν 25 εκπαιδευτικοί δηλαδή το 26% .Σχεδόν όλοι συμφώνησαν ότι το Bee-Bot ενισχύει την **ανάπτυξη νοητικών δεξιοτήτων**.

Ελλειμματική προσοχή: Οι εκπαιδευτικοί που το επέλεξαν είναι 8 και ποσοστό 8%, καθώς θεώρησαν ότι η δια δραστικότητα του ρομπότ **βοηθά στην προσήλωση** και περιορίζει την απόσπαση προσοχής.

Προφορικός λόγος: Οι εκπαιδευτικοί που το επέλεξαν είναι 20 δηλαδή το 21%, ειδικά σε όσους χρησιμοποίησαν δραστηριότητες αφήγησης (φανταστικές ιστορίες κ.λπ.).

Γραπτός λόγος - Ορθογραφία - Μηχανισμός ανάγνωσης: Οι εκπαιδευτικοί που το επέλεξαν είναι 18 δηλαδή το 18%. Για την ορθογραφία είναι 12 εκπαιδευτικοί δηλαδή το 12%. Ο μηχανισμός ανάγνωσης είναι 15 εκπαιδευτικοί δηλαδή το 15%. Αυτές οι δεξιότητες επιλέχθηκαν λιγότερο σε σύγκριση με τις «νοητικές ικανότητες» ή την «προφορική έκφραση», αλλά ορισμένοι εκπαιδευτικοί σημείωσαν ότι, στο πλαίσιο διαθεματικών δραστηριοτήτων, μπορεί να υποστηριχθεί και ο γραπτός λόγος.



Εικόνα 7.
Γράφημα από τις απαντήσεις στην ερώτηση αν Πιστεύετε ότι μέσα από τις ομάδες μεικτής δυναμικότητας αναπτύχθηκε η αρμονική συνεργασία, η ανταλλαγή ιδεών και η αλληλοβοήθεια μεταξύ των μαθητών σας.

Εικόνα 8.
Γράφημα από τις απαντήσεις στην ερώτηση αν η διαφοροποιημένη διδασκαλία με το ρομπότ Bee-Bot κατά τη γνώμη σας σε ποιους τομείς παρεμβαίνει; (επιλέξτε 3)

Εικόνα 9.
Γράφημα από τις απαντήσεις στην ερώτηση αν θα επιθυμούσατε μία επιμόρφωση στη ρομποτική (Bee-Bot) ως εργαλείο μάθησης στην διδασκαλία σας.

Στο 10ο ερευνητικό ερώτημα: **Βάση των προ αξιολογικών και μεταξιολογικών συζητήσεων που έγιναν με τους μαθητές η διδασκαλία με τα Bee-Bot επιτυγχάνει τους μακροπρόθεσμους στόχους.**

Οι εκπαιδευτικοί κλήθηκαν να απαντήσουν εάν, βάσει προ αξιολογικών και μεταξιολογικών συζητήσεων, η διδασκαλία με το ρομπότ Bee-Bot επιτυγχάνει μακροπρόθεσμους στόχους. Η πλειονότητα απάντησε «Ναι» 30 εκπαιδευτικοί 94% απάντησαν ναι και 2 όχι 6% , κρίνοντας ότι η βιωματική και συνεργατική φύση του εργαλείου αφήνει θετικό αποτύπωμα στους μαθητές και μπορεί να συμβάλει στη διαρκή τους εξέλιξη.

Στο 11ο ερευνητικό ερώτημα: **Θα επιθυμούσατε μία επιμόρφωση στη ρομποτική (Bee-Bot) ως εργαλείο μάθησης στην διδασκαλία σας.**

Επίσης, η συντριπτική πλειονότητα δηλώνει ότι **θα επιθυμούσε περαιτέρω επιμόρφωση** για την αξιοποίηση του Bee-Bot στη διδασκαλία 100%. Αυτό επιβεβαιώνει το γενικά θετικό κλίμα και την ανάγκη υποστήριξης, ώστε οι εκπαιδευτικοί να ενσωματώνουν μεθοδικά τη ρομποτική στην τάξη.

ΣΥΜΠΕΡΑΣΜΑΤΑ

Η ερευνητική αποτίμηση της δράσης με θέμα τον Κρόκο Κοζάνης και την παράλληλη χρήση του ρομπότ Bee-Bot στην πρωτοβάθμια εκπαίδευση ανέδειξε σημαντικά παιδαγωγικά οφέλη, τόσο σε επίπεδο περιεχομένου όσο και σε επίπεδο μεθοδολογίας. Η πλειονότητα των εκπαιδευτικών αναγνώρισε τη θεματική του κρόκου ως πλήρως συνδεδεμένη με την πραγματική ζωή, επιβεβαιώνοντας την αξία της τοπικής ταυτότητας ως εργαλείο διδασκαλίας. Η εστίαση σε ένα προϊόν που φέρει πολιτιστικό, ιστορικό και οικονομικό φορτίο ενίσχυσε τη βιωματικότητα της μάθησης και ενδυνάμωσε τη σχέση των μαθητών με τον τόπο τους.

Η εισαγωγή του Bee-Bot ως εργαλείου εκπαιδευτικής ρομποτικής αποτιμήθηκε θετικά από το σύνολο σχεδόν των συμμετεχόντων, με ιδιαίτερη έμφαση στην ενίσχυση της συμμετοχής όλων των μαθητών, περιλαμβανομένων και όσων αντιμετωπίζουν μαθησιακές δυσκολίες. Οι εκπαιδευτικοί διαπίστωσαν ότι η χρήση του ρομπότ προήγαγε την ομαδοσυνεργατική μάθηση, την ανταλλαγή ιδεών, την αλληλοβοήθεια και την ανάπτυξη κοινωνικο-συναισθηματικών δεξιοτήτων. Το Bee-Bot θεωρήθηκε ως εργαλείο που διευκολύνει τη συνεργασία, καλλιεργεί την κριτική και δημιουργική σκέψη και εμπλέκει ενεργά όλους τους μαθητές, ενώ μέσω της διαφοροποιημένης διδασκαλίας και της ομαδικής εργασίας παρατηρήθηκε ενίσχυση του ομαδικού πνεύματος και ανάπτυξη κοινωνικών και συναισθηματικών δεξιοτήτων.

Αξιοσημείωτο είναι το γεγονός ότι το 100% των εκπαιδευτικών δήλωσε πως θα επιθυμούσε επιμόρφωση στη ρομποτική, στοιχείο που αποκαλύπτει τη θετική τους στάση απέναντι στην εκπαιδευτική καινοτομία και την ανάγκη για ενίσχυση των επαγγελματικών τους δεξιοτήτων. Το ενδιαφέρον αυτό αποτελεί ισχυρή ένδειξη για την αναγκαιότητα σχεδιασμού στοχευμένων προγραμμάτων επιμόρφωσης και ενσωμάτωσης της ρομποτικής σε περισσότερα διδακτικά αντικείμενα.

Συνοψίζοντας, η μελέτη επιβεβαιώνει τη δυναμική της σύνδεσης τοπικών θεματικών με καινοτόμες παιδαγωγικές προσεγγίσεις. Η αξιοποίηση της πολιτισμικής ταυτότητας σε συνδυασμό με τη ρομποτική μπορεί να προσφέρει πλούσιες μαθησιακές εμπειρίες και να συμβάλει ουσιαστικά στην ποιοτική αναβάθμιση της διδασκαλίας στην πρωτοβάθμια εκπαίδευση.

ΠΕΡΙΛΗΨΗ

Η φιλία αποτελεί βασική συνθήκη για την υγιή ανάπτυξη των ατομικών και κοινωνικών σχέσεων, ιδίως κατά την ευαίσθητη περίοδο της εφηβείας. Ενώ κατά βάση η φιλία θεωρείται αμοιβαία και αμφίδρομη, συχνά στο πλαίσιο της ειδικής αγωγής, η διάκριση μεταξύ φιλίας, συνοδείας και φροντίδας συχνά συγχέεται. Αυτή η ασάφεια μπορεί να οδηγήσει σε φιλίες που στερούνται αμοιβαίας δυναμικής η οποία παρατηρείται στα τυπικά σχολεία, δημιουργώντας αισθήματα απογοήτευσης, απομόνωσης και κοινωνικής περιθωριοποίησης.

Η παρούσα εργασία επιχειρεί να αναδείξει τη δυναμική των σχέσεων φιλίας σε ένα μικρό σχολείο ειδικής αγωγής δευτεροβάθμιας εκπαίδευσης, χρησιμοποιώντας την ανάλυση κατευθυνόμενων δικτύων. Μέσω της ανάλυσης κοινωνικών δικτύων, υπολογίζονται μετρικές, μερικές εκ των οποίων βασίζονται σε αλγόριθμους τεχνητής νοημοσύνης, ώστε να αναδειχθούν σημαντικοί ρόλοι και δομικές ιδιαιτερότητες του δικτύου φιλίας των μαθητών. Αυτές οι μετρικές, αποκαλύπτουν κρυφά μοτίβα και δυναμικές που δεν είναι άμεσα ορατές, προσφέροντας πολύτιμες πληροφορίες για την κατανόηση των κοινωνικών αλληλεπιδράσεων τους.

Στόχος της έρευνας είναι να παράσχει στους εκπαιδευτικούς και τους ειδικούς επαγγελματίες ένα εργαλείο για την ενίσχυση των κοινωνικών σχέσεων, την καταπολέμηση της απομόνωσης και την πρόληψη του εκφοβισμού. Στην ανάλυση χρησιμοποιήθηκαν ανωνυμοποιημένα δεδομένα από 22 ενεργούς μαθητές, με κάθε μαθητή να συνδέεται με 3 έως 5 φίλους.

Λέξεις – κλειδιά: Ειδική Αγωγή, Φιλία, Κοινωνικά Δίκτυα, Ανάλυση Συνδέσεων

ΕΙΣΑΓΩΓΗ

Η φιλία στην εφηβεία αποτελεί έναν από τους σημαντικότερους παράγοντες κοινωνικοποίησης, επηρεάζοντας τόσο την ψυχολογική ανάπτυξη όσο και την εκπαιδευτική πορεία των μαθητών (Bagwell & Schmidt, 2011). Οι σχέσεις φιλίας συνεισφέρουν στην αίσθηση του ανήκειν, στη διαμόρφωση ταυτότητας, στις δεξιότητες συνεργασίας και στη συναισθηματική ανάπτυξη. Στα γενικά σχολεία, η αμοιβαιότητα στη φιλία συνήθως θεωρείται δεδομένη, όμως σε περιβάλλοντα ειδικής αγωγής η εικόνα είναι συχνά πιο περίπλοκη. Οι μαθητές με σοβαρές μαθησιακές δυσκολίες ή/και αναπηρία συχνά αντιμετωπίζουν δυσκολία στην επικοινωνία ή στη δημιουργία δεσμών, γεγονός που καθιστά τη χαρτογράφηση των κοινωνικών τους σχέσεων κρίσιμη για τη υποστήριξή τους (Rose & Asher, 2017).

Στην εποχή της ψηφιακής εκπαίδευσης και της τεχνητής νοημοσύνης, η ανάλυση κοινωνικών δικτύων (Social Network Analysis – SNA) μπορεί να αποτελέσει πολύτιμο εργαλείο για την κατανόηση και την ενίσχυση της κοινωνικής δυναμικής στα σχολεία (Wasserman & Faust, 1994). Οι αλγόριθμοι Τεχνητής Νοημοσύνης (ΤΝ) δίνουν τη δυνατότητα να επεξεργαζόμαστε πολύπλοκες δομές δεδομένων και να εξάγουμε πρακτικά συμπεράσματα για την καθημερινή εκπαιδευτική πράξη (Russell & Norvig, 2021). Επιπλέον, η διερεύνησης της φιλίας ως ένα δίκτυο σχέσεων μπορεί να φωτίζει πτυχές οι οποίες δεν είναι δυνατό να γίνουν εύκολα αντιληπτές χρησιμοποιώντας απλές μετρικές της ποσοτικής κοινωνικής έρευνας.

ΘΕΩΡΗΤΙΚΟ ΠΛΑΙΣΙΟ

Η ανάλυση κοινωνικών δικτύων προσφέρει ένα συστηματικό πλαίσιο για τη μελέτη των κοινωνικών σχέσεων ως δομών από κόμβους (μαθητές) και ακμές (φιλίες) (Wasserman & Faust, 1994; Borgatti, Everett, & Johnson, 2013). Στο σχολικό πλαίσιο, η ανάλυση κοινωνικών δικτύων συμβάλλει στην ανάδειξη προτύπων ενδεικτικών της ένταξη, επιρροής αλλά και μεσολάβησης που δεν είναι άμεσα ορατά από τις τυπικές παρατηρήσεις (Gest, 2010). Σε περιβάλλοντα ειδικών συνθηκών και κοινωνικές ομάδες μεγαλύτερου πλήθους όπως για παράδειγμα ένα σχολείο πολλών μαθητών ή μια δομή ειδικής αγωγής, η χαρτογράφηση των αυτού του είδους των σχέσεων μπορεί να αποκαλύψει «κρυφούς» ρόλους και να κατευθύνει στοχευμένες παρεμβάσεις ένταξης (Carter et al., 2015; Koster, Pijl, Nakken, & Van Houten, 2010). Αντίστοιχες έρευνες που αξιοποιούν την ανάλυση κοινωνικών δικτύων έχουν πραγματοποιηθεί σε όλες τις βαθμίδες εκπαίδευσης (Cairns et al., 1995; Currarini et al., 2010; Garrote et al., 2023; Kasari et al., 2011; Kindermann, 1993; Moody, 2001; Pijl et al., 2011; Schwab et al., 2022; Tsoni & Verykios, 2019; Tsoni et al., 2019, 2021, 2022, 2024) με αποτελέσματα πολύ βοηθητικά όσον αφορά τις δυνατότητες παρέμβασης και βελτίωσης των κοινωνικών σχέσεων των μαθητών. Άλλωστε, ο κοινωνικός χαρακτήρας της μάθησης έχει τονιστεί από σημαντικούς διανοητές της εκπαίδευσης ήδη από τις αρχές του προηγούμενου αιώνα (Dewey, 1916; Durkheim, 1956; Mead, 1934; Vygotsky, 1978, 1986).

Οι δομικές ιδιότητες των δικτύων παρουσιάζουν χαρακτηριστικά εύκολα ερμηνεύσιμα στην κοινωνική έρευνα. Κλασικές ιδιότητες όπως το φαινόμενο του μικρού κόσμου (small-world) ή η τοπική συσσώρευση κόμβων (clustering) επηρεάζουν τη διάχυση πληροφοριών και προτύπων συμπεριφοράς στην τάξη (Watts & Strogatz, 1998). Η ομοφιλία εκφράζει την τάση των ανθρώπων να συνδέονται με έχοντες όμοια χαρακτηριστικά με αυτούς. Βιβλιογραφικά αποδεικνύεται ότι το χαρακτηριστικό της ομοφιλίας επηρεάζει ισχυρά τη διαμόρφωση των δικτυών φιλίας (McPherson, Smith-Lovin, & Cook, 2001) και σχετίζεται με την αποδοχή μαθητών με μαθησιακές δυσκολίες (Koster et al., 2010). Η τριαδική σύγκλειση και η μεταβατικότητα (triadic closure/transitivity) αφορούν χαρακτηριστικά δικτύων ενδεικτικά της σταθερότητας των ομάδων (Holland & Leinhardt, 1971), ενώ η κοινοτική δομή (Community structure) αποτυπώνεται με πολυπλοκότερες μετρικές όπως το modularity το οποίο δείχνει την τάση ενός δικτύου να διαχωρίζεται σε συνεκτικές υποομάδες (Newman & Girvan, 2004; Blondel, Guillaume, Lambiotte, & Lefebvre, 2008).

Οι πιο χαρακτηριστικές μετρικές ως προς τους ρόλους που διαδραματίζουν οι κόμβοι ενός δικτύου (στην προκειμένη περίπτωση οι μαθητές) είναι οι μετρικές κεντρικότητας. Προσφέρουν διαφορετικές οπτικές για το πόσο πρωταγωνιστικός είναι ο ρόλος ενός μαθητή. Εν ολίγοις, ο βαθμός (Degree) αποτυπώνει δημοφιλία, η εγγύτητα (closeness) την προσβασιμότητα, η ενδιάμεση κεντρικότητα (betweenness) τη μεσολάβηση (Freeman, 1977, 1978; Borgatti, 2005). Η ιδιοδιανυσματική κεντρικότητα και το PageRank καταγράφουν την επιρροή ενός κόμβου με βάση την επιρροή των γειτόνων (Bonacich, 1987; Brin & Page, 1998), ενώ ο HITS διαχωρίζει ρόλους «hubs» και «authorities» (Kleinberg, 1999). Αναλυτικότερα, ο βαθμός ενός κόμβου σε ένα δίκτυο αναφέρεται στον αριθμό των συνδέσεων (ή ακμών) που έχει αυτός ο κόμβος με άλλους κόμβους. Σε ένα κατευθυνόμενο δίκτυο ο εισερχόμενος βαθμός (in-degree) είναι ίσος με τον αριθμό των ακμών που κατευθύνονται προς τον κόμβο, ενώ ο εξερχόμενος βαθμός (out-degree) είναι ο αριθμός των ακμών που ξεκινούν από τον κόμβο προς άλλους κόμβους. Η κεντρικότητα εγγύτητας δείχνει πόσο γρήγορα ένας κόμβος μπορεί να φτάσει σε όλους τους άλλους κόμβους μέσω των συνδέσεων του. Ουσιαστικά, σε ένα δίκτυο γνωριμιών, αποτυπώνει ποιοι είναι οι πιο "προσβάσιμοι" άνθρωποι. Σε ένα δίκτυο φιλίας ένα άτομο με υψηλή κεντρικότητα εγγύτητας μπορεί να επικοινωνήσει πιο γρήγορα με όλους τους άλλους, ακόμα κι αν δεν έχει μεγάλο αριθμό φίλων. Η ενδιάμεση κεντρικότητα δείχνει πόσο συχνά ένας κόμβος βρίσκεται στις συντομότερες διαδρομές μεταξύ άλλων

κόμβων σε ένα δίκτυο. Αντικατοπτρίζει τον ρόλο του κόμβου ως "διαμεσολαβητή" στη ροή πληροφοριών. Ένας κόμβος με υψηλή ενδιάμεση κεντρικότητα μπορεί να είναι ένας συνδετικός κρίκος μεταξύ διαφορετικών ομάδων ανθρώπων. Η ιδιοδιανυσματική κεντρικότητα αποτελεί ένα πιο πολύπλοκο και εκλεπτυσμένο μέτρο δικτύου. Αποδίδει την σημασία ενός κόμβου σε ένα δίκτυο, λαμβάνοντας υπόψη όχι μόνο τον αριθμό των συνδέσεών του αλλά και τη σημαντικότητα των γειτόνων του. Δύο κόμβοι με τον ίδιο αριθμό συνδέσεων μπορεί να έχουν πολύ διαφορετική ιδιοδιανυσματική κεντρικότητα, αν οι γείτονές τους έχουν διαφορετική επιρροή στο δίκτυο. Στο δίκτυο φιλίας, τα άτομα με υψηλή ιδιοδιανυσματική κεντρικότητα μπορεί να είναι ηγέτες ή άτομα επιρροής, δηλαδή άτομα που μπορούν να συνδέσουν διαφορετικές κοινωνικές ομάδες και να επηρεάσουν τις αλληλεπιδράσεις και τη διασπορά πληροφοριών ή απόψεων. Η εκκεντρότητα από την άλλη μεριά, δείχνει την απόσταση μεταξύ ενός κόμβου και του πιο απομακρυσμένου από αυτόν, κόμβου στο δίκτυο. Ένα άτομο με υψηλή εκκεντρότητα μπορεί να έχει λιγότερους φίλους ή να μην είναι τόσο συνδεδεμένο, γεγονός που μπορεί να το καθιστά πιο ευάλωτο σε κοινωνική απομόνωση. Αυτά τα άτομα μπορεί να χρειάζονται περισσότερη υποστήριξη και να είναι πιο ευαίσθητα σε κοινωνικές αλλαγές.

Πέραν των βασικών μετρικών στα δίκτυα χρησιμοποιούνται αλγόριθμοι με μεγαλύτερη πολυπλοκότητα που έχουν την δυνατότητα να ανιχνεύουν πιο πολύπλοκες σχέσεις μεταξύ τω κόμβων ενός δικτύου. Ο αλγόριθμος PageRank που αρχικά δημιουργήθηκε για την κατάταξη των ιστοσελίδων βάσει σημαντικότητας μπορεί να χρησιμοποιηθεί και η σημασία του να επεκταθεί και σε άλλων μορφών δίκτυα ΄πως είναι τα δίκτυα φιλίας. Η τιμή του εξαρτάται από τον αριθμό των άλλων κόμβων που τον συνδέουν και από το PageRank αυτών των κόμβων. Δηλαδή, ένας κόμβος που συνδέεται με άλλους σημαντικούς κόμβους (που έχουν ήδη υψηλό PageRank) θεωρείται και αυτός σημαντικός. Το PageRank υπολογίζεται επαναληπτικά μέσω αναδρομικών σχέσεων μέχρι να επιτευχθεί ένα σταθερό αποτέλεσμα. Άτομα με υψηλό PageRank είναι κεντρικά, επιδραστικά και σημαντικά στο κοινωνικό δίκτυο, με μεγαλύτερη ικανότητα επιρροής και διασύνδεσης με άλλες κοινωνικές ομάδες. Το PageRank ενισχύει την κατανόηση των κοινωνικών ιεραρχιών και της κοινωνικής κινητικότητας σε ένα δίκτυο φιλίας. Ένας αντίστοιχης σημασίας αλγόριθμός είναι ο αλγόριθμος HITS (Hyperlink-Induced Topic Search). Σε αυτή τη μέθοδο ανάλυσης δικτύων αποδίδονται δύο χαρακτηριστικά: το Hub που αποτυπώνει πόσο σημαντικούς κόμβους δείχνει ένας κόμβος και το Authority που δείχνει πόσο αξιόπιστος ή σημαντικός είναι ένας κόμβος. Οι κόμβοι με υψηλό hub σε ένα δίκτυο φιλίας είναι συνήθως οι μεσολαβητές, αυτοί που γνωρίζουν πολλούς ανθρώπους και τους συνδέουν μεταξύ τους. Οι κόμβοι με υψηλό Authority είναι τα άτομα που θεωρούνται πιο σεβαστά και έχουν τη δύναμη να επηρεάζουν τη γνώμη ή τις αποφάσεις άλλων ατόμων στο δίκτυο, επειδή είναι συνδεδεμένα με σημαντικά hubs. Αυτά τα άτομα μπορούν να είναι εκείνα που προάγουν νέες ιδέες ή μοιράζονται πληροφορίες σε άλλους κόμβους.

Τέλος, η αμοιβαιότητα σε ένα δίκτυο υπολογίζεται συνήθως ως το ποσοστό των αμφίδρομων συνδέσεων ενός κόμβου συγκριτικά με τις συνολικές συνδέσεις στο δίκτυο. Στην περίπτωση ενός δικτύου φιλίας, η αμοιβαιότητα αναφέρεται στο ποσοστό των σχέσεων που είναι αμφίδρομες. Η αμοιβαιότητα στις κατευθυνόμενες σχέσεις συνδέεται με σταθερότερες φιλίες και πιο ικανοποιητικές σχέσεις και των δύο μερών (Garlaschelli & Loffredo, 2004). Η ένταση των δεσμών, δηλαδή κατά πόσον είναι ισχυροί ή ασθενείς, επηρεάζει την πρόσβαση σε πόρους και ευκαιρίες (Granovetter, 1973). Σχολικά δίκτυα με πλούσιες εγκάρσιες συνδέσεις δημιουργούν κοινωνικό κεφάλαιο που ενισχύει τη μάθηση και την ένταξη (Coleman, 1988; Putnam, 2000).

Οι ισορροπημένες φιλικές σχέσεις στην εφηβεία συνδέονται με ευημερία, βελτιωμένη ακαδημαϊκή επίδοση και ανάπτυξη δεξιοτήτων αυτορρύθμισης (Bagwell & Schmidt, 2011; Wentzel, 2015). Σε περιβάλλοντα ειδικής αγωγής, οι μαθητές με αναπηρίες παρουσιάζουν συχνά μειωμένα δίκτυα φίλων και αυξημένο κίνδυνο απομόνωσης (Locke, Ishijima, Kasari, & London, 2016, Carter et al., 2015). Παρεμβάσεις που βασίζονται στην αξιοποίηση αναλύσεων κοινωνικών δικτύων έχουν συμβάλει στην βελτίωση στη συμμετοχή και την αποδοχή από συνομηλίκους (Carter et al., 2015). Επιπλέον, η ενσωμάτωση αλγορίθμων τεχνητής νοημοσύνης στην ανάλυση κοινωνικών δικτύων διευκολύνει την αυτοματοποιημένη εξαγωγή μετρικών, την ανίχνευση προτύπων και την παραγωγή προγνωστικών δεικτών για στενευμένες παρεμβάσεις (Russell & Norvig, 2021). Στο πεδίο της εξόρυξης εκπαιδευτικών δεδομένων, οι αλγόριθμοι χρησιμοποιούνται για τον εντοπισμό μαθησιακών αλλά κοινωνικών κινδύνων, τη μοντελοποίηση αλληλεπιδράσεων και την υποστήριξη αποφάσεων (Baker & Inventado, 2014; Romero & Ventura, 2020). Η ενσωμάτωση μετρικών όπως PageRank και HITS σε σχολικές μελέτες επιτρέπει την ανάδειξη χαρακτηριστικών ρόλων, όπως για παράδειγμα ηγετών ή διαμεσολαβητών, με μεγαλύτερη ακρίβεια.

Ωστόσο, η χαρτογράφηση κοινωνικών σχέσεων μαθητών μπορεί να εγείρει ζητήματα ιδιωτικότητας και δεοντολογίας. Η αρχή της «συμφραζόμενης ακεραιότητας» (contextual integrity) υποδεικνύει ότι η χρήση δεδομένων πρέπει να ευθυγραμμίζεται με τις προσδοκίες του κοινωνικού πλαισίου (Nissenbaum, 2010). Η ανωνυμοποίηση, η ελαχιστοποίηση δεδομένων και η συμμετοχική συναίνεση είναι κρίσιμες πρακτικές στην εκπαιδευτική έρευνα. Συνολικά, το θεωρητικό πλαίσιο δικαιολογεί την επιλογή πολλαπλών μετρικών ανάλυσης κοινωνικών δικτύων και αλγοριθμικών εργαλείων για την ανάδειξη ρόλων, την κατανόηση της αμοιβαιότητας και την υποστήριξη παρεμβάσεων ένταξης στο ειδικό σχολείο.

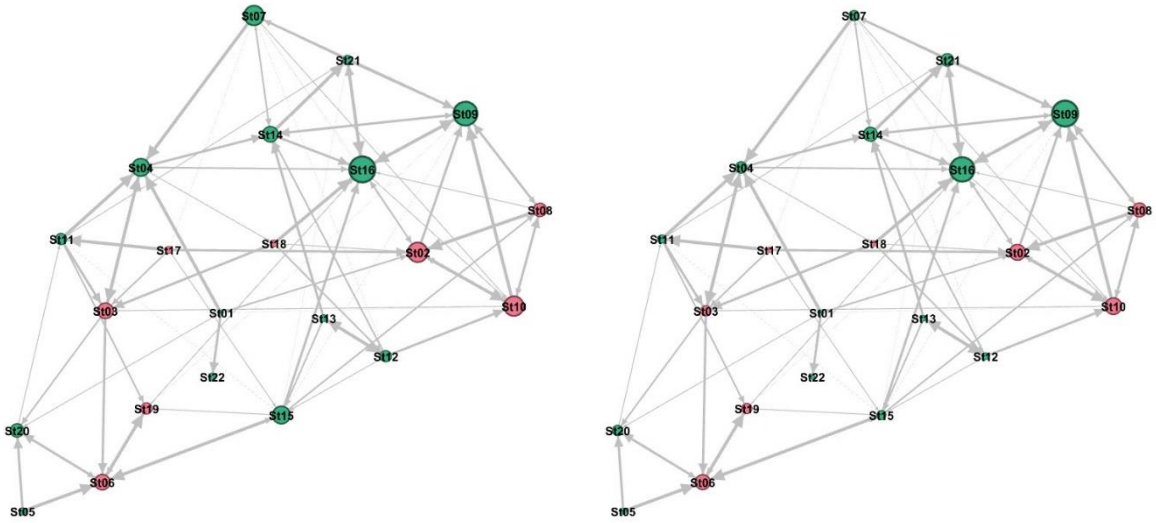
ΜΕΘΟΔΟΛΟΓΙΑ

Η παρούσα έρευνα πραγματοποιήθηκε σε ένα Ενιαίο Ειδικό Επαγγελματικό Γυμνάσιο–Λύκειο με 22 μαθητές ηλικίας 13 έως 22 ετών κατά τη διάρκεια του σχολικού έτους 2024-2025. Οι μαθητές κλήθηκαν να αναφέρουν 3–5 φίλους από το σχολείο, ιεραρχώντας τις επιλογές τους. Σε αυτές τις επιλογές αποδόθηκε βαρύτητα (5 = καλύτερος φίλος, 1 = λιγότερο σημαντικός φίλος). Στη συνέχεια δημιουργήθηκε ένας κατευθυνόμενος γράφος όπου κάθε μαθητής αντιπροσωπεύεται από έναν κόμβο και κάθε ακμή υπονοεί φιλία μεταξύ των κόμβων που ενώνει. Η κατεύθυνση της ακμής υποδηλώνει και την κατευθυντηκότητα της σχέσης. Δηλαδή, όταν ο μαθητής Α δηλώνει ως φίλο του τον μαθητή Β τότε η ακμής κατευθύνεται από το Α στο Β. Αυτό σημαίνει ότι ο εισερχόμενος βαθμός ενός κόμβου δείχνει τον αριθμό των μαθητών που δήλωσαν τον συγκεκριμένο μαθητής ως φίλο, ενώ ο εισερχόμενος βαθμός δείχνει τον αριθμό των φίλων που δηλώθηκαν από τον μαθητή. Δεδομένου ότι οι μαθητές είχαν την οδηγία να δηλώσουν ως 5 φίλους, ο ανώτατος εξερχόμενος βαθμός ήταν 5.

Η διαδικασία της ανάλυσης περιλάμβανε τον υπολογισμό των βασικών μετρικών και την χρήση των αλγορίθμων που περιεγράφηκαν στην προηγούμενη ενότητα. Επιπλέον έγιναν πολλαπλές οπτικοποιήσεις του δικτύου, λαμβάνοντας υπόψιν τα αποτελέσματα διαφορετικών μετρικών ώστε να αποτυπωθεί και οπτικά ο διαφορετικός ρόλος του κάθε μαθητή στην σχολική κοινότητα.

ΑΠΟΤΕΛΕΣΜΑΤΑ

Αρχικά υπολογίστηκαν δείκτες που αφορούν το δίκτυο συνολικά (Πίνακας 1). Ο μέσος βαθμός δείχνει ότι οι μαθητές δήλωσαν κατά μέσο όρο 4,13 φίλους. Η διάμετρος του δικτύου ισούται με 6 που είναι ένας αρκετά μεγάλος αριθμός για ένα τόσο μικρό δίκτυο. Ένα λάβουμε υπόψη την θεωρία του “six degrees of separation” που σημαίνει ότι δύο οποιοιδήποτε άνθρωποι στο δίκτυο συνδέονται μέσω το πολύ 6 ενδιάμεσων γνωριμιών, καταλήγουμε στο συμπέρασμα ότι οι δύο πιο απομακρυσμένοι μαθητές δεν έχουν αλληλοεπιδράσει καθόλου. Στον αντίποδα, η πυκνότητα του είναι 0.92, αυτό σημαίνει ότι το δίκτυο έχει 92% των πιθανών ακμών που θα μπορούσε να έχει, δηλαδή είναι σχεδόν πλήρες (πλησιάζει πολύ σε ένα complete graph, όπου κάθε κόμβος συνδέεται με όλους τους άλλους). Αυτό δείχνει ότι οι κόμβοι είναι πολύ έντονα συνδεδεμένοι μεταξύ τους, με ελάχιστους να μην έχουν καμία απευθείας σύνδεση. Τα δύο αυτά, εκ πρώτης όψεως αντικρουόμενα αποτελέσματα δείχνουν ότι η μεγάλη διάμετρος οφείλεται σε ιδιαίτερες περιπτώσεις μαθητών οι οποίοι δεν επιδιώκουν φιλικούς δεσμούς ενώ γενικά η σχολική κοινότητα είναι αρκετά δεμένη, με ισχυρούς δεσμούς και πολλαπλές συνδέσεις. Η χαμηλή κοινοτική δομή δείχνει χαμηλή τάση δημιουργίας υποομάδων. Το μέσο μήκος διαδρομής που είναι πολύ κοντά στο 2 σημαίνει ότι κάθε μαθητής χρειάζεται μόνο 2 ενδιάμεσους φίλους για να φτάσει σε οποιονδήποτε άλλο μαθητή.

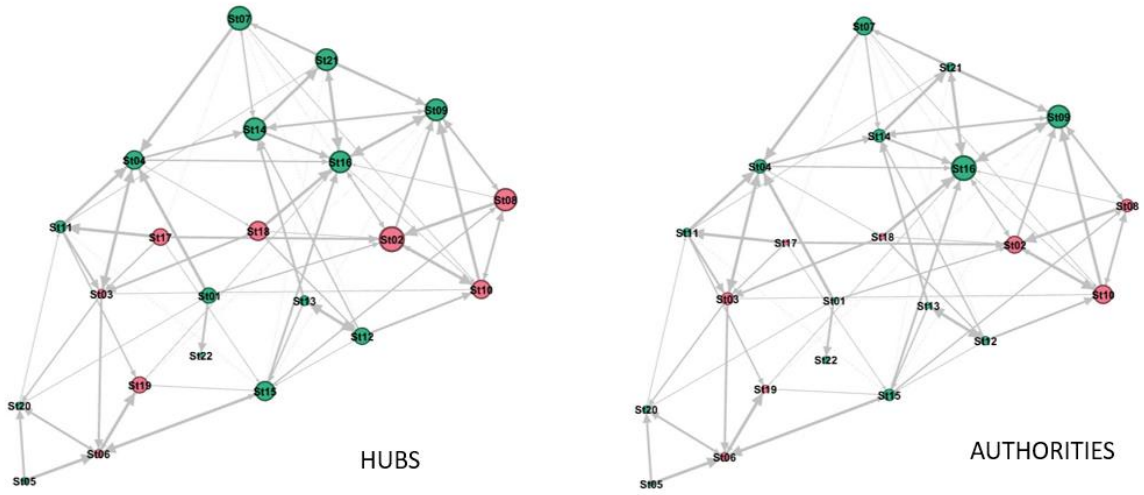


Πίνακας 1
Μετρικές Δικτύου

Μετρική	Τιμή
Μέσος βαθμός	4,13
Διάμετρος δικτύου	6,0
Πυκνότητα δικτύου	0,92
Κοινοτική δομή (modularity)	0,30
Μέσο μήκος διαδρομής	2,30
Συνολική αμοιβαιότητα	0,50

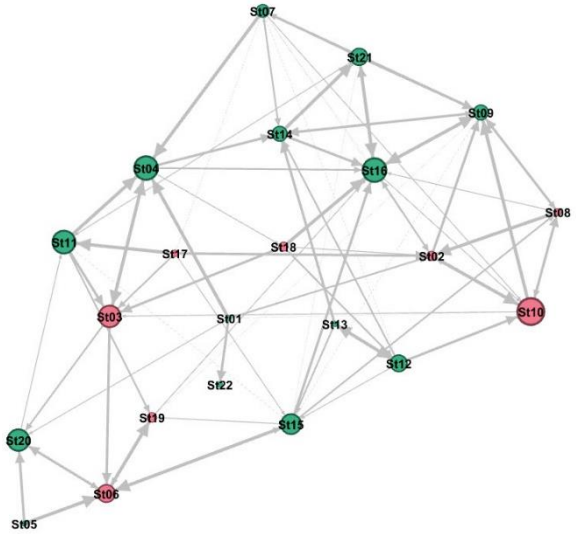
Η ανάλυση ανέδειξε ένα δίκτυο ιδιαίτερα συνεκτικό. Παρά το μικρό μέσο μήκος διαδρομής, η αμοιβαιότητα αποδείχθηκε χαμηλότερη από την αναμενόμενη, με τις μισές σχέσεις να μην είναι αμφίδρομες. Αυτό δείχνει ότι η κοινωνική αποδοχή και η φιλία δεν είναι πάντα ισόρροπες. Οι μετρικές PageRank και ιδιοδιανυσματικής κεντρικότητας εντόπισαν μαθητές με υψηλή επιρροή. Αυτοί οι μαθητές λειτουργούσαν ως άτυποι ηγέτες, με τη δύναμη να επηρεάζουν την κοινότητα Στην εικόνα 1 παρουσιάζονται δύο απεικονίσεις του δικτύου των μαθητών. Το χρώμα των κόμβων αντιπροσωπεύει το φύλο (με πράσινο απεικονίζονται τα αγόρια και με πορτοκαλί τα κορίτσια). Το μέγεθος των κόμβων

στον πρώτο γράφο είναι ανάλογο του συνολικού βαθμού κάθε κόμβου. Αυτό σημαίνει ότι όσο μεγαλύτερος είναι κάθε κόμβος, τόσο περισσότερους φίλους έχει ο μαθητής. Στον δεύτερο γράφο το μέγεθος των κόμβων αντιπροσωπεύει το PageRank κάθε κόμβου. Η διαφορά της πληροφορίας που δίνουν τα δύο διαγράμματα αναδεικνύεται σε κάποιες χαρακτηριστικές περιπτώσεις όπως είναι η περίπτωση του κόμβου που αντιστοιχεί στον μαθητή st15 που ενώ έχει αρκετούς φίλους επειδή οι φίλοι του δεν είναι μεγάλης «σημαντικότητας» για το δίκτυο (χαμηλό PageRank) η δική του «σημαντικότητα» είναι μικρή. Στον αντίποδα, ο μαθητής st21 έχει λιγότερους φίλους αλλά μεγάλης «σημαντικότητας» άρα ή «σημαντικότητα» του στο δίκτυο αυξάνεται.



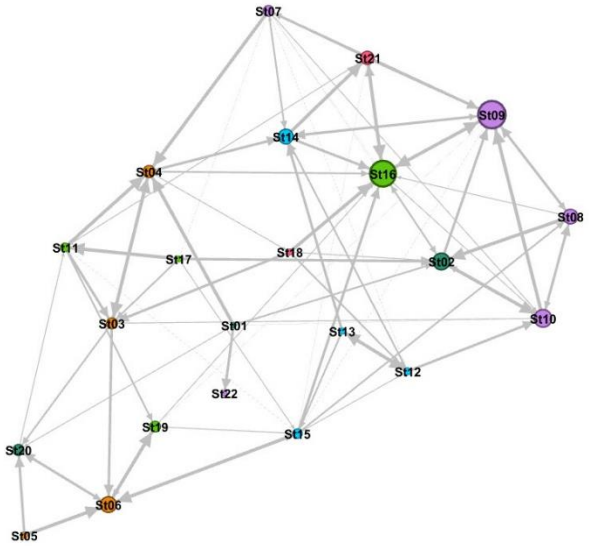
Εικόνα 1.
Το δίκτυο των μαθητών (Βαθμός vs PageRank)

Βαθμός PageRank



Στην επόμενη απεικόνιση (Εικόνα 2) έχει χρησιμοποιηθεί ο αλγόριθμος HITS ώστε να τροποποιηθεί το μέγεθος των κόμβων βάσει του δείκτη hub (αριστερά) και authority (δεξιά). Αυτό σημαίνει ότι κόμβοι μεγάλου μεγέθους στον αριστερό γράφο είναι μαθητές που δρουν ως συνδετικοί κρίκοι με «σημαντικούς» ή δημοφιλείς μαθητές. Αντίστοιχα, κόμβοι μεγάλου μεγέθους στον δεξί γράφο αντιπροσωπεύουν δημοφιλείς μαθητές που κατέχουν σημαντικό ρόλο στο δίκτυο.

Εικόνα 2.
Το δίκτυο των μαθητών (HITS)



Όπως προαναφέρθηκε, εκτός από τους προφανείς πρωταγωνιστές του δικτύου φιλίας που είναι οι δημοφιλείς, κεντρικοί μαθητές και όσοι συνδέονται άμεσα με αυτούς, σημαντικός αν και όχι τόσο άμεσα ορατός είναι ο ρόλος των μαθητών που λειτουργούν συνδετικά στο δίκτυο. Πρόκειται για μαθητές με υψηλή ενδιάμεση κεντρικότητα στους οποίους οφείλεται κυρίως η συνεκτικότητα του δικτύου (Εικόνα 3). Επιπλέον, μαθητές με υψηλή ενδιάμεση κεντρικότητα έπαιζαν ρόλο συνδετικών κρίκων, διασφαλίζοντας τη συνοχή του δικτύου. Ενδιαφέρον παρουσιάζει το εύρημα ότι μαθητές που δεν θεωρούνταν «δημοφιλείς» βάσει βαθμού είχαν κομβική σημασία για την ένωση διαφορετικών υποομάδων.

Εικόνα 3.
Το δίκτυο των μαθητών (Betweenness Centrality)

Στην Εικόνα 4, κάθε κόμβος είναι χρωματισμένος σύμφωνα με το τμήμα στο οποίο ανήκει ο μαθητής που αναπαριστά. Η κατανομή των χρωμάτων εμφανίζεται διάσπαρτη στον γράφο, χωρίς σαφή συγκέντρωση ώστε να σχηματίζονται συγκεκριμένα υποσύνολα, στοιχείο που υποδηλώνει ότι οι δεσμοί φιλίας δεν εξαρτώνται σε σημαντικό βαθμό από το τμήμα.

Εικόνα 4.
Το δίκτυο των μαθητών ανά τμήμα

Σημαντική πληροφορία παρέχεται από τον υπολογισμό της αμοιβαιότητας στο δίκτυο. Πέραν της συνολικής αμοιβαιότητας που όπως αναφέρθηκε παραπάνω είναι αρκετά χαμηλή (0,5, υπολογίστηκε η αμοιβαιότητα για κάθε μαθητή ξεχωριστά. Η τιμή κυμαίνεται στο [0,1]: είναι 1 όταν όλα τα άτομα που ο μαθητής έχει δηλώσει ως φίλους τον

έχουν επίσης δηλώσει ως φίλο, και 0 όταν κανένα από τα άτομα που έχει δηλώσει ως φίλους δεν τον έχει δηλώσει ως φίλο. Χαμηλές τιμές αμοιβαιότητας παρατηρούνται συχνότερα σε μαθητές με αυξημένες υποστηρικτικές ανάγκες, όπου οι δεσμοί τείνουν να είναι ανομοιοβαρείς (σχέση τύπου φροντιστή–φροντιζόμενου).

Εικόνα 6.

Η Εικόνα 6 παρουσιάζει την κατάταξη των μαθητών σε πολλαπλές μετρικές κεντρικότητας. Διαπιστώνεται μερική σύγκλιση στις ανώτερες θέσεις. Περιορισμένος αριθμός μαθητών εμφανίζεται σταθερά ψηλά στις πιο εξεζητημένες μετρικές (ιδιοδιανυσματική κεντρικότητα, PageRank, authority), υποδηλώνοντας ύπαρξη πυρήνα επιρροής. Αντίθετα, μαθητές με υψηλές τιμές hub ή εξερχόμενο βαθμό αλλά μέτριο authority φαίνεται να λειτουργούν ως εκκινητές δεσμών χωρίς αντίστοιχη αναγνώριση, ενώ αυξημένη ενδιάμεση κεντρικότητα με μέτριο βαθμό υποδεικνύει διαμεσολαβητικό ρόλο μεταξύ υποομάδων. Δεδομένης της υψηλής πυκνότητας του δικτύου (0,92) και του μικρού μέσου μήκους διαδρομής (2,3), οι τιμές της κεντρικότητας εγγύτητας εμφανίζονται συμπιεσμένες και συνεπώς εμφανίζουν μειωμένη διακριτική ικανότητα σε σχέση με τις προαναφερθείσες κεντρικότητες. Επιπλέον, η απουσία συστηματικής υπερεκπροσώπησης συγκεκριμένου τμήματος στις κορυφές των κατατάξεων συνάδει με χαμηλή ομοφιλία ως προς το χαρακτηριστικό «τμήμα».

ΣΥΖΗΤΗΣΗ-ΣΥΜΠΕΡΑΣΜΑΤΑ

Τα αποτελέσματα καταδεικνύουν ότι η αμοιβαιότητα στις φιλικές σχέσεις δεν είναι δεδομένη: 12 από τους 22 μαθητές έχουν περισσότερες μονόπλευρες φιλίες. Οι διαφορετικές μετρικές της ανάλυσης δικτύου μπορούν να αποτυπώσουν διαφορετικά χαρακτηριστικά της δομής των σχέσεων μεταξύ των μαθητών. Η ύπαρξη μαθητών με υψηλή ενδιάμεση κεντρικότητα υποδηλώνει ότι ακόμα και μαθητές χωρίς ιδιαίτερη δημοφιλία παίζουν κρίσιμο ρόλο στη διατήρηση της κοινωνικής συνοχής. Η αναγνώριση αυτών των μαθητών είναι απαραίτητη για την πρόληψη κοινωνικής απομόνωσης και τη στήριξη της ψυχοκοινωνικής τους ανάπτυξης. Στο συγκεκριμένο σχολείο το δίκτυο φιλίας είναι συνεκτικό, με μικρό μέσο μήκος διαδρομής όπως είναι αναμενόμενο για ένα μικρό σχολείο. Υπάρχουν μαθητές με ηγετικές τάσεις αλλά και μαθητές που δρουν ενωτικά, συνδέοντας μαθητές που θα κινδύνευαν με απομόνωση. Ορισμένοι μαθητές που δεν συγκαταλέγονται στους «δημοφιλείς» έχουν μεγάλη ενδιάμεση κεντρικότητα και είναι αυτοί που κρατάνε ενωμένη τη μαθητική κοινότητα.

Η ανάδειξη των ρόλων των μαθητών μπορεί να βοηθήσει τους εκπαιδευτικούς και το ειδικό προσωπικό να λάβουν δράση ώστε να ενισχύσουν τις κοινωνικές και τις φιλικές σχέσεις και να βελτιώσουν το κλίμα στο σχολείο. Η δημιουργία ενός κοινωνικού προφίλ για κάθε μαθητή μέσα στο σχολικό πλαίσιο αποτελεί ένα χρήσιμο εργαλείο για την σύνταξη κι εφαρμογή του εξατομικευμένου προγράμματος εκπαίδευσης, ειδικά όσον αφορά την ανάπτυξη δεξιοτήτων κοινωνικής συμπεριφοράς, κοινωνικής οργάνωσης κοκ. Η μελέτη αναδεικνύει επίσης το εκπαιδευτικό όφελος που μπορεί να αποφέρει η ανάλυσης κοινωνικών δικτύων. Οι εκπαιδευτικοί μπορούν να χρησιμοποιήσουν τις πληροφορίες που προσφέρουν τα δεδομένα για να παρέμβουν, ενισχύοντας την κοινωνική δικτύωση των πιο ευάλωτων μαθητών. Παράλληλα, οι μαθητές με ηγετικούς ρόλους μπορούν να κινητοποιηθούν για να ενισχύσουν την ομαδικότητα και την αποδοχή. Στη διεθνή βιβλιογραφία, παρόμοια ευρήματα έχουν καταγραφεί για τη σημασία των «κρυφών ηγετών» σε σχολικές τάξεις (Farmer et al., 2019).

Η καινοτομία της παρούσας μελέτης έγκειται στη χρήση τεχνικών Τεχνητής Νοημοσύνης για την ενίσχυση της ανάλυσης, καθιστώντας την πιο αποτελεσματική και αξιοποιήσιμη στην καθημερινή πράξη. Η ανάλυση κοινωνικών δικτύων σε συνδυασμό με αλγορίθμους τεχνητής νοημοσύνης αποτελεί ισχυρό εργαλείο για την κατανόηση των κοινωνικών σχέσεων στην εκπαίδευση. Η μελέτη σε ειδικό σχολείο ανέδειξε: α) την πολυπλοκότητα της φιλίας, β) την ύπαρξη μαθητών-γεφυρών, γ) τη σημασία της χρήσης ανάλυσης κοινωνικών δικτύων για την ενίσχυση της κοινωνικής συνοχής. Οι εκπαιδευτικοί μπορούν να αξιοποιήσουν τα αποτελέσματα για την ανάπτυξη εξατομικευμένων παρεμβάσεων, με στόχο την προώθηση της κοινωνικής ένταξης και την αποτροπή της απομόνωσης. Η μεθοδολογία αυτή μπορεί να επεκταθεί σε μεγαλύτερα δείγματα και διαφορετικά εκπαιδευτικά περιβάλλοντα, συνδυάζοντας ποσοτικά και ποιοτικά δεδομένα.

ΠΕΡΙΛΗΨΗ

Σκοπός της εργασίας είναι να διερευνήσει τις γνώσεις των μαθητών Δημοτικού για τη χρήση της τεχνητής νοημοσύνης στην εκπαίδευση. Για το σκοπό αυτό πραγματοποιήθηκε μια ποσοτική έρευνα σε δείγμα 321 μαθητών Δημοτικού που πηγαίνουν στις τάξεις Δ, Ε και ΣΤ στο Νομό Ζακύνθου. Η συλλογή των δεδομένων έγινε με διανομή έντυπου ερωτηματολογίου στους μαθητές. Τα αποτελέσματα της έρευνας έδειξαν πως η πλειοψηφία των μαθητών γνώριζαν την έννοια της τεχνητής νοημοσύνης (78.5%) και είχαν χρησιμοποιήσει οι ίδιοι ή οι γονείς τους τεχνητή νοημοσύνη (59.7%). Από την ανάλυση των δεδομένων προέκυψε πως οι μαθητές τείνουν να συμφωνήσουν με το ότι η Τεχνητή Νοημοσύνη μπορεί να δημιουργήσει εκπαιδευτικά παιχνίδια που κάνουν τη μάθηση πιο διασκεδαστική, μπορεί να χρησιμοποιηθεί για να δημιουργήσει εκπαιδευτικά παιχνίδια, μπορεί να βοηθήσει τους μαθητές να μάθουν νέες γλώσσες με πιο εύκολο τρόπο και μπορεί να βοηθήσει στην επίλυση μαθηματικών προβλημάτων με εξηγήσεις βήμα-βήμα. Γενικά, οι μαθητές έχουν ένα μέτριο προς υψηλό επίπεδο γνώσεων σε ζητήματα τεχνητής νοημοσύνης, μια ουδέτερη στάση απέναντι στην τεχνητή νοημοσύνη και σε μέτριο βαθμό αναγνωρίζουν τα οφέλη της τεχνητής νοημοσύνης σε διάφορους τομείς της καθημερινότητας. Τέλος, τα ευρήματα έδειξαν πως η αύξηση των γνώσεων των μαθητών και η διαμόρφωση μιας θετικότερης αντίληψης για την τεχνητή νοημοσύνη επηρεάζει θετικά τη στάση των μαθητών για τη χρήση τεχνητής νοημοσύνης στην εκπαιδευτική διαδικασία.

Λέξεις – κλειδιά: Τεχνητή νοημοσύνη, εκπαίδευση, γνώσεις μαθητών, πρωτοβάθμια εκπαίδευση

ΕΙΣΑΓΩΓΗ

Η τεχνολογία έχει αλλάξει εντελώς το εκπαιδευτικό τοπίο, παρέχοντες δυνατότητες για νέες εκπαιδευτικές προσεγγίσεις (Zhang & Aslan, 2021). Ωστόσο, η απλή χρήσης της τεχνολογίας δεν εγγυάται βελτιωμένη εκπαιδευτική ποιότητα ή καλύτερα ακαδημαϊκά αποτελέσματα. Είναι σημαντικό να καθοριστεί πώς τα ψηφιακά εργαλεία μπορούν να υποστηρίξουν αποτελεσματικά τους μαθητές κατά την εκπαιδευτική διαδικασία (Haldorai et al., 2020). Ως εκ τούτου, κάθε τύπος τεχνολογίας που χρησιμοποιείται στον τομέα της εκπαίδευσης πρέπει να εξετάζεται με βάση τα ιδιαίτερα χαρακτηριστικά του (An & Oliver, 2020).

Μια αναδυόμενη τεχνολογία που αναδιαμορφώνει το εκπαιδευτικό τοπίο είναι η Τεχνητή Νοημοσύνη (AI) (Ouyang & Jiao, 2021). Η τεχνητή νοημοσύνη έχει τη δυνατότητα να κάνει προβλέψεις, να παίρνει αποφάσεις και να εκτελεί εργασίες προσομοιώνοντας την ανθρώπινη συμπεριφορά με χρήση δεδομένων (Popenici & Kerr, 2017; Williamson & Eynon, 2020). Οι τεχνολογίες τεχνητής νοημοσύνης, όπως η μηχανική μάθηση, η επεξεργασία φυσικής γλώσσας και τα νευρωνικά δίκτυα, έχουν βοηθήσει στη δημιουργία τεχνολογικών συστημάτων ικανών να εκτελούν εργασίες που απαιτούν συνήθως ανθρώπινη νοημοσύνη. Οι εξελίξεις και η προσβασιμότητα του έχουν οδηγήσει σε εκθετική ανάπτυξη, επηρεάζοντας θεμελιωδώς κοινωνικούς τομείς όπως, για παράδειγμα, η βιομηχανία της υγείας, η μεταποίηση, οι μεταφραστικές υπηρεσίες και η εξυπηρέτηση πελατών. Αυτό που φαίνεται να ενδιαφέρει τους ερευνητές τα τελευταία έτη είναι ο αντίκτυπος της τεχνητής νοημοσύνης στην εκπαίδευση (Kamalov et al., 2023; Seo et al., 2021). Στον τομέα της εκπαίδευσης, οι ερευνητές υποστηρίζουν ότι όταν η τεχνητή νοημοσύνη αξιοποιείται στο μέγιστο των δυνατοτήτων της, μπορεί να βελτιώσει την εκπαιδευτική διαδικασία και να παρέχει σημαντικά οφέλη σε εκπαιδευτικούς και μαθητές (Holmes & Tuomi, 2022; Yang, 2022).

Έχουν δημιουργηθεί διαφορετικές μορφές Τεχνητής Νοημοσύνης για την εκπαίδευση συμπεριλαμβανομένων συστημάτων υποστήριξης συνεργατικής μάθησης και εξατομικευμένων εκπαιδευτικών προσεγγίσεων (Ouyang & Jiao, 2021). Καθώς η συγκεκριμένη τεχνολογία συνεχίζει να αναδιαμορφώνει το εκπαιδευτικό τοπίο, υπάρχει μια αυξανόμενη ανάγκη να κατανοήσουμε τον αντίκτυπο της τεχνητής νοημοσύνης στους μαθητές. Από την ανασκόπηση της βιβλιογραφίας έχουν καταγραφεί αρκετές έρευνες που έχουν εξετάσει είτε τις απόψεις των εκπαιδευτικών για τη χρήση της τεχνητής νοημοσύνης στην εκπαίδευση (Cabero-Almenara et al., 2024; Kuleto et al., 2022; Velli & Zafiropoulos, 2024) είτε τις απόψεις μαθητών δευτεροβάθμιας εκπαίδευσης για τη χρήση της τεχνητής νοημοσύνης στην εκπαίδευση (Bochniarz et al., 2021; Chai et al., 2020; Suh & Ahn, 2022). Έως τώρα δεν έχει καταγραφεί έρευνα που να έχει αξιολογήσει τις γνώσεις των μαθητών Δημοτικού για τη χρήση της τεχνητής νοημοσύνης στην εκπαίδευση. Με βάση την παραπάνω διαπίστωση γίνεται φανερό πως είναι σημαντικό να μελετηθεί το συγκεκριμένο θέμα καθώς μια τέτοια μελέτη θα μπορέσει να παράσχει σημαντικά ευρήματα για το πως οι μαθητές Δημοτικού βλέπουν την ενσωμάτωση της τεχνητής νοημοσύνης στην εκπαιδευτική διαδικασία καθώς και για το ποιοι παράγοντες σχετίζονται με τη στάση των μαθητών απέναντι στην τεχνητή νοημοσύνη. Επιπλέον, το συγκεκριμένο θέμα είναι σημαντικό καθώς στην Ελλάδα έως τώρα δεν έχει πραγματοποιηθεί έρευνα σε δείγμα μαθητών ούτε στη δευτεροβάθμια εκπαίδευση. Οπότε η παρούσα μελέτη αποτελεί μια από τις πρώτες ερευνητικές προσπάθειες αξιολόγησης των γνώσεων των μαθητών/τριών για την τεχνητή νοημοσύνη στο Ελληνικό εκπαιδευτικό πλαίσιο.

Τα αποτελέσματα της διπλωματικής εργασίας αναμένεται να δώσουν χρήσιμα στοιχεία αναφορικά με το πως βλέπουν οι μαθητές Δημοτικού την ένταξη και τη χρήση συστημάτων τεχνητής νοημοσύνης στην εκπαιδευτική διαδικασία. Από την έρευνα αναμένεται να αναδειχθούν τα οφέλη που αναγνωρίζουν οι μαθητές από τη χρήση τεχνητής νοημοσύνης, το αν οι μαθητές έχουν γνώσεις σε ζητήματα τεχνητής νοημοσύνης καθώς και αν είναι θετικοί απέναντι στην τεχνητή νοημοσύνη γενικά. Τα αποτελέσματα θα μπορούσαν να χρησιμοποιηθούν από αρμόδιους φορείς με στόχο την στοχευμένη ενημέρωση των μαθητών σε ζητήματα που αφορούν την τεχνητή νοημοσύνη καθώς και στην δημιουργία στρατηγικών για την ένταξη της τεχνητής νοημοσύνης στην εκπαιδευτική διαδικασία.

ΑΝΑΣΚΟΠΗΣΗ ΒΙΒΛΙΟΓΡΑΦΙΑΣ

Από τη δεκαετία του 1950, η τεχνητή νοημοσύνη (AI) είναι ένας αναπτυσσόμενος τομέας τεχνολογίας που ενσωματώνει συνεχώς νέες στρατηγικές και τακτικές (Popenici & Kerr, 2017). Τα συστήματα που χρησιμοποιούν τεχνητή νοημοσύνη μπορούν να μαθαίνουν μόνα τους και να βελτιώνονται με την πάροδο του χρόνου χρησιμοποιώντας δεδομένα (Williamson & Eynon, 2020). Αυτή η τεχνολογία μπορεί να προσομοιώσει την ανθρώπινη συμπεριφορά εκτελώντας εργασίες, λαμβάνοντας αποφάσεις και κάνοντας προβλέψεις. Σήμερα, η τεχνητή νοημοσύνη είναι ένα κρίσιμο συστατικό πολλών ψηφιακών τεχνολογιών που χρησιμοποιούνται συνήθως, όπως τα smartphone, οι έξυπνοι βοηθοί στο σπίτι και τα αυτοκίνητα (Abduljabbar et al., 2019; Mori et al., 2024).

Συνοπτικά, η τεχνητή νοημοσύνη περιλαμβάνει ένα φάσμα τεχνολογιών που έχουν σχεδιαστεί για να αναπαράγουν ή να προσομοιώνουν τις ανθρώπινες γνωστικές λειτουργίες. Το πεδίο γενικά κατηγοριοποιείται με βάση

την ικανότητα (δυνατότητες) σε Narrow AI, General AI και το θεωρητικό Super Intelligent AI, και με βάση τη λειτουργικότητα σε συστήματα που κυμαίνονται από απλές αντιδραστικές μηχανές έως εκείνες που μπορεί τελικά να έχουν αυτογνωσία. Καθώς η έρευνα συνεχίζεται, αυτοί οι ορισμοί και οι ταξινομήσεις πιθανότατα θα εξελιχθούν, διαμορφώνοντας τόσο την τεχνική ανάπτυξη της τεχνητής νοημοσύνης όσο και τα ηθικά πλαίσια που απαιτούνται για την καθοδήγηση της ενσωμάτωσής της τεχνητής νοημοσύνης στην κοινωνία (Davenport, 2019).

Πολλές δυνατότητες βελτίωσης των εκπαιδευτικών εμπειριών έχουν καταστεί εφικτές από τις τεχνολογικές εξελίξεις. Η εκπαιδευτική τεχνολογία (Edtech), είναι ένας ταχέως αναπτυσσόμενος τομέας που περιλαμβάνει μια σειρά από θεωρίες μάθησης εκτός από χρήσιμα ψηφιακά εργαλεία (Haleem et al., 2022). Η μάθηση τη σημερινή εποχή είναι πλέον διαθέσιμη τόσο στις «παραδοσιακές» τάξεις με την δια ζώσης επικοινωνία μεταξύ εκπαιδευτικού και μαθητή όσο εξ αποστάσεως με χρήση εργαλείων τεχνολογίας που επιτρέπουν την επικοινωνία και αλληλοεπίδραση εκπαιδευτικού και μαθητή από απόσταση (Sharma, 2022).

Η τεχνητή νοημοσύνη αναδιαμορφώνει όλο και περισσότερο το εκπαιδευτικό τοπίο με την εισαγωγή καινοτόμων μεθόδων που ενισχύουν τόσο τη διδασκαλία όσο και τη μάθηση. Μία από τις πιο σημαντικές επιπτώσεις της τεχνητής νοημοσύνης στην εκπαίδευση είναι η ικανότητά της να παρέχει εξατομικευμένες μαθησιακές εμπειρίες (Kaswan et al., 2024). Αναλύοντας μεμονωμένα δεδομένα, τα συστήματα τεχνητής νοημοσύνης μπορούν να προσαρμόσουν το εκπαιδευτικό περιεχόμενο, να προσαρμόσουν τις ταχύτητες εκμάθησης και να εντοπίσουν τομείς όπου ένας μαθητής μπορεί να χρειαστεί πρόσθετη υποστήριξη. Αυτή η προσαρμογή όχι μόνο βοηθά τους μαθητές να κατανοήσουν πιο αποτελεσματικά τις δύσκολές γι' αυτούς έννοιες, αλλά ενθαρρύνει επίσης μια πιο ελκυστική και διαδραστική διαδικασία μάθησης (Owoc et al., 2021).

Ένα άλλο πλεονέκτημα της ενσωμάτωσης της τεχνητής νοημοσύνης στην εκπαίδευση είναι η ελάφρυνση του διοικητικού φόρτου εργασίας που συχνά μειώνει τον χρόνο των εκπαιδευτικών (Alam, 2021). Τα συστήματα που τροφοδοτούνται από την τεχνητή νοημοσύνη μπορούν να αυτοματοποιήσουν εργασίες ρουτίνας όπως η βαθμολόγηση, η παρακολούθηση της παρουσίας των μαθητών και ο προγραμματισμός, επιτρέποντας στους εκπαιδευτικούς να αφιερώνουν περισσότερο χρόνο σε διαδραστικές και δημιουργικές πτυχές της διδασκαλίας. Αυτό όχι μόνο βελτιώνει την αποτελεσματικότητα των εκπαιδευτικών μονάδων αλλά ενισχύει επίσης την ποιότητα της εκπαίδευσης ελευθερώνοντας πολύτιμο χρόνο από τους εκπαιδευτικούς (Mishra & Varshney, 2024).

Η τεχνητή νοημοσύνη διαδραματίζει επίσης σημαντικό ρόλο στο να κάνει την εκπαίδευση πιο προσιτή ενώ η χρήση της μπορεί να προωθήσει μια εκπαίδευση χωρίς αποκλεισμούς. Οι προηγμένες τεχνολογικές πλατφόρμες που χρησιμοποιούν τεχνητή νοημοσύνη μπορούν να προσφέρουν μετάφραση γλώσσας σε πραγματικό χρόνο, προσαρμοστικά εργαλεία εκμάθησης και προσβάσιμο περιεχόμενο που απευθύνεται σε μαθητές με διαφορετικές ανάγκες, συμπεριλαμβανομένων εκείνων με αναπηρίες (Almufareh et al., 2024). Καταρρίπτοντας τα παραδοσιακά εμπόδια στη μάθηση, οι λύσεις που βασίζονται σε συστήματα τεχνητής νοημοσύνης διασφαλίζουν ότι όλοι οι μαθητές έχουν την ευκαιρία να επιτύχουν ανεξάρτητα από το υπόβαθρό τους ή τις ατομικές τους προκλήσεις (Schicchi & Taibi, 2024).

Επιπλέον, η εισαγωγή της τεχνητής νοημοσύνης στην εκπαιδευτική διαδικασία ενισχύει ένα περιβάλλον καινοτομίας και δημιουργικότητας. Διαδραστικά εργαλεία και ψηφιακές προσομοιώσεις που βασίζονται στην τεχνητή νοημοσύνη μετατρέπουν αφηρημένες ιδέες σε απτές μαθησιακές εμπειρίες, διεγείροντας έτσι την κριτική σκέψη και τις δεξιότητες επίλυσης προβλημάτων (Chang & Tsai, 2021). Τέτοιες ελκυστικές μέθοδοι όχι μόνο προσελκύουν την προσοχή των μαθητών αλλά και τους προετοιμάζουν για ένα μέλλον όπου η τεχνολογική ευχέρεια και γνώση θα είναι απαραίτητη (Creely & Henriksen, 2019).

Συνοπτικά, η τεχνητή νοημοσύνη φέρνει μια σειρά από οφέλη στην εκπαιδευτική διαδικασία, που κυμαίνονται από εξατομικευμένη μάθηση και διοικητική αποτελεσματικότητα έως ενισχυμένη προσβασιμότητα και καινοτόμες μεθόδους διδασκαλίας. Καθώς αυτές οι τεχνολογίες συνεχίζουν να εξελίσσονται, υπόσχονται τη δημιουργία πιο αποτελεσματικών, ελκυστικών και περιεκτικών εκπαιδευτικών εμπειριών για τους μαθητές σε όλο τον κόσμο.

Η εισαγωγή της τεχνητής νοημοσύνης στην εκπαιδευτική διαδικασία έχει πυροδοτήσει ποικίλες αντιδράσεις τόσο από εκπαιδευτικούς όσο και από μαθητές, αντανακλώντας ένα περίπλοκο μείγμα ενθουσιασμού, σκεπτικισμού και επιφυλακτικής αισιοδοξίας (Chai et al., 2020; Choi et al., 2024; Kuleto et al., 2022). Οι εκπαιδευτικοί, που βρίσκονται στην πρώτη γραμμή της διαμόρφωσης της εκπαιδευτικής διαδικασίας, επιδεικνύουν μια σειρά στάσεων απέναντι στην τεχνητή νοημοσύνη. Πολλοί εκπαιδευτικοί εκτιμούν τη δυνατότητα της τεχνητής νοημοσύνης να τους βοηθήσει σε εργασίες ρουτίνας, επιτρέποντάς τους έτσι να εστιάσουν περισσότερο στην εξατομικευμένη διδασκαλία και στις ουσιαστικές αλληλεπιδράσεις με τους μαθητές τους (Yue et al., 2024). Αυτοί οι εκπαιδευτικοί βλέπουν την τεχνητή νοημοσύνη ως ένα εργαλείο που μπορεί να βελτιώσει τη μαθησιακή εμπειρία προσφέροντας ανατροφοδότηση σε πραγματικό χρόνο, διευκολύνοντας τη διαφοροποιημένη διδασκαλία και υποστηρίζοντας την ανάπτυξη στρατηγικών

διδασκαλίας που βασίζονται σε πραγματικά δεδομένα (Ayanwale et al., 2022). Ωστόσο, υπάρχει επίσης μια ομάδα εκπαιδευτικών που εκφράζουν ανησυχίες για την ταχεία ενσωμάτωση της τεχνητής νοημοσύνης στην εκπαίδευση. Αυτοί οι εκπαιδευτικοί ανησυχούν ότι η υπερβολική εξάρτηση από την τεχνολογία θα μπορούσε να υπονομεύσει το ανθρώπινο στοιχείο της διδασκαλίας, δυνητικά μειώνοντας τον ρόλο της ενσυναίσθησης, της δημιουργικότητας και της κριτικής σκέψης που προωθείται από την παραδοσιακή παιδαγωγική (Chai et al., 2023).

Οι μαθητές, από την άλλη πλευρά, γενικά επιδεικνύουν υψηλό επίπεδο περιέργειας και είναι ανοιχτοί απέναντι στις νέες τεχνολογίες, συμπεριλαμβανομένης της τεχνητής νοημοσύνης. Πολλοί νέοι μαθητές εκτιμούν τα διαδραστικά και προσαρμοστικά περιβάλλοντα μάθησης που μπορεί να δημιουργήσει η τεχνητή νοημοσύνη, διαπιστώνοντας ότι η εξατομικευμένη ανατροφοδότηση και το προσαρμοσμένο περιεχόμενο μπορούν να κάνουν τις εκπαιδευτικές τους εμπειρίες πιο ελκυστικές και σύγχρονες (Marx et al., 2023). Η χρήση εκπαιδευτικών πλατφορμών που βασίζονται στην τεχνητή νοημοσύνη συχνά οδηγεί σε μια πιο δυναμική διαδικασία μάθησης, όπου οι μαθητές αισθάνονται ενδυναμωμένοι από την ικανότητα να μαθαίνουν με τον δικό τους ρυθμό και λαμβάνουν άμεση υποστήριξη όταν χρειάζεται (Kim & Youngjun, 2020). Παρά αυτές τις θετικές στάσεις, ορισμένοι μαθητές εκφράζουν ανησυχία για τα πιθανά μειονεκτήματα ενός εκπαιδευτικού συστήματος με επίκεντρο την τεχνητή νοημοσύνη. Οι ανησυχίες σχετικά με την πιθανή απώλεια της άμεσης ανθρώπινης αλληλεπίδρασης, η πρόκληση της χρήσης πολύπλοκων τεχνολογικών εργαλείων χωρίς επαρκή υποστήριξη και ο φόβος να χαθεί η επαφή με τους εκπαιδευτικούς ή τους συμμαθητές τους είναι αυτές που αναφέρονται σε μεγαλύτερο βαθμό (Marx et al., 2023).

Ουσιαστικά, οι στάσεις τόσο των εκπαιδευτικών όσο και των μαθητών απέναντι στην τεχνητή νοημοσύνη στην εκπαίδευση διαμορφώνονται από την ισορροπία μεταξύ των πολλά υποσχόμενων δυνατοτήτων της και των προκλήσεων που παρουσιάζει (Pokrivcakova, 2023). Ενώ οι εκπαιδευτικοί επιδιώκουν να αξιοποιήσουν την τεχνητή νοημοσύνη για να βελτιώσουν τις διδακτικές πρακτικές και να βελτιώσουν την αποτελεσματικότητα τους, είναι επιφυλακτικοί για τη διατήρηση των βασικών αξιών της ανθρωποκεντρικής εκπαίδευσης (Chai et al., 2023). Ομοίως, οι μαθητές ενθουσιάζονται από τις εξατομικευμένες και διαδραστικές ευκαιρίες που προσφέρει η τεχνητή νοημοσύνη, αλλά αναγνωρίζουν επίσης τη σημασία της διατήρησης ουσιαστικών ανθρώπινων συνδέσεων στο μαθησιακό περιβάλλον. Αυτή η εξελισσόμενη σχέση μεταξύ τεχνολογίας και παιδαγωγικής υποδηλώνει ότι η επιτυχής ενσωμάτωση της τεχνητής νοημοσύνης στην εκπαίδευση θα εξαρτηθεί από την εξεύρεση μιας αρμονικής ισορροπίας που μεγιστοποιεί τα οφέλη της ενώ θα αντιμετωπίζει τις θεμιτές ανησυχίες όλων των εμπλεκόμενων (Kim & Youngjun, 2020; Marx et al., 2023).

ΜΕΘΟΔΟΛΟΓΙΑ

Η έρευνα πραγματοποιήθηκε σε δείγμα μαθητών πρωτοβάθμιας εκπαίδευσης. Η επιλογή του δείγματος βασίστηκε στη μεθοδολογία δειγματοληψίας που είναι γνωστή ως δειγματοληψία σκοπιμότητας. Στο συγκεκριμένο τύπο δειγματοληψίας ένας ερευνητής επιλέγει συμμετέχοντες με βάση την ευκολία πρόσβασης και τη διαθεσιμότητά τους. Αυτή η μέθοδος χρησιμοποιείται συχνά όταν ο χρόνος ή οι πόροι είναι περιορισμένοι και καθιστούν ανέφικτη τη χρήση πιο αυστηρών μεθόδων δειγματοληψίας όπως η απλή τυχαία δειγματοληψία ή η δειγματοληψία κατά συστάδες (Creswell & Creswell, 2022). Για τη διεξαγωγή της έρευνας μοιράστηκαν συνολικά 350 έντυπα ερωτηματολόγια σε μαθητές της Δ, Ε και ΣΤ Δημοτικού στο Ν. Ζακύνθου. Η επιλογή των συγκεκριμένων μαθητών έγινε από το ευρύτερο κοινωνικό και εργασιακό περιβάλλον των ερευνητών. Συνολικά, από τα 350 ερωτηματολόγια επιστράφηκαν συμπληρωμένα τα 321 (ποσοστό ανταπόκρισής 91.7%). Το δείγμα της έρευνας αποτελούνταν κατά 53.6% (ν = 172) από αγόρια και κατά 46.4% (ν = 149) από κορίτσια. Τα στοιχεία δείχνουν πως το 35.5% (ν = 114) των μαθητών πηγαίνουν στη Δ Δημοτικού, το 37.4% (ν = 120)των μαθητών πηγαίνουν στην Ε Δημοτικού και το 27.1% (ν = 87) των μαθητών πηγαίνουν στη ΣΤ Δημοτικού. Τέλος, από το σύνολο του δείγματος το 52.3% (ν = 168) των μαθητών διαμένει σε αστική περιοχή και το 47.7% (ν = 153) των μαθητών διαμένει σε αγροτική περιοχή.

Η συλλογή των πρωτογενών δεδομένων πραγματοποιήθηκε με διανομή έντυπου ερωτηματολογίου. Το ερωτηματολόγιο φτιάχτηκε από τους ίδιους τους ερευνητές στηριζόμενοι σε προηγούμενα ερωτηματολόγια τα οποία μετρούσαν στάσεις μαθητών/ μαθητριών σε άλλα αντικείμενα. Αρχικά, το ερωτηματολόγιο της έρευνας δόθηκε σε πανεπιστημιακούς καθηγητές όπου έκαναν τις απαραίτητες παρατηρήσεις και διορθώσεις και σε φιλόλογο που το κοίταξε συντακτικά για τυχόν παραλείψεις ή ασάφειες. Στην επόμενη φάση δόθηκε σε δύο μαθητές της τέταρτης δύο μαθητές της πέμπτης και σε δύο μαθητές της έκτης τάξης για να εξεταστεί αν το κατά πόσο ήταν κατανοητό από μαθητές αυτής της ηλικίας. Αφού έγιναν οι απαραίτητες παρατηρήσεις και διορθώσεις αφαιρέθηκαν κάποιες ερωτήσεις και οι ερευνητές κατέληξαν στην τελική του μορφή όπου περιείχε 16 ερωτήματα για τις γνώσεις των μαθητών. Μετά τις στατιστικές αναλύσεις στην πιλοτική φάση διαπιστώθηκε ότι όλα τα ερωτήματα φόρτιζαν θετικά και δεν είχαν χαμηλή φόρτιση. Για το λόγο αυτό αποφασίστηκε να χρησιμοποιηθεί όπως έχει. Όλες οι ερωτήσεις είναι διατυπωμένες σε κλίμακα Likert είτε με διαβάθμιση από 1 = διαφωνώ απόλυτα έως 5 = συμφωνώ απόλυτα .Από τις απαντήσεις στις 16 ερωτήσεις που αξιολογούν τις γνώσεις των μαθητών για τη χρήση της τεχνητής νοημοσύνης στην εκπαίδευση υπολογίστηκε η

μεταβλητή «Γνώσεις» που λαμβάνει τιμές στο διάστημα [1, 5]. Η μεταβλητή υπολογίστηκε ως ο μέσος όρος των απαντήσεων των μαθητών στις 16 ερωτήσεις.

Η συλλογή του ερευνητικού υλικού πραγματοποιήθηκε σε δημόσια σχολεία πρωτοβάθμιας εκπαίδευσης του Ν. Ζακύνθου. Η έρευνα πραγματοποιήθηκε 8-10 Ιανουαρίου 2025 ενώ η πιλοτική έρευνα 16-18 Δεκεμβρίου 2024 μέσω έντυπων ερωτηματολογίων. Τα έντυπα ερωτηματολόγια διανεμήθηκαν από τον ίδιους τους ερευνητες στους μαθητές/τριες του Νομού Ζακύνθου, αφού προηγουμένως είχε ζητηθεί η άδεια εισόδου στα σχολεία από τους διευθυντές των σχολείων. Η συμμετοχή στην έρευνα ήταν εθελοντική. Πριν τη συμπλήρωση πραγματοποιήθηκε ενημέρωση για το περιεχόμενο και τους στόχους της έρευνας, ενώ έγινε σαφές ότι τα δεδομένα θα χρησιμοποιηθούν καθαρά για ερευνητικούς/ ακαδημαϊκούς σκοπούς και ότι θα τηρηθεί η ανωνυμία. Στους ερωτηθέντες τονίσθηκε ιδιαίτερα ότι τα ερωτηματολόγια συμπληρώνονται ανώνυμα, ότι δεν υπάρχουν σωστές ή λάθος απαντήσεις και ότι τα αποτελέσματα θα χρησιμοποιηθούν για καθαρά επιστημονικούς σκοπούς, ενώ τους ζητήθηκε να απαντήσουν με απόλυτη ειλικρίνεια και στο κατάλληλο περιβάλλον. Με τους συμμετέχοντες δεν έγινε καμία συζήτηση σχετικά με τη θεματολογία της έρευνας πριν τη συμπλήρωση των ερωτηματολογίων, πέρα από τις οδηγίες, όπου χρειάστηκε, για την πλήρη κατανόηση των ερωτήσεων και την αποφυγή λαθών. Ο συνολικός χρόνος που απαιτήθηκε για τη συμπλήρωσή τους, σύμφωνα με τον αρχικό σχεδιασμό, την πιλοτική έρευνα αλλά και τα λεγόμενα των ίδιων των μαθητών/μαθητριών που συμμετείχαν στην κυρίως έρευνα, υπολογίστηκε περίπου στα 10-15 λεπτά.

Η ανάλυση των δεδομένων πραγματοποιήθηκε με χρήση του λογισμικού επεξεργασίας και ανάλυσης ποσοτικών δεδομένων SPSS version 27. Σε πρώτο στάδιο στα δεδομένα της έρευνας πραγματοποιήθηκε ανάλυση αξιοπιστίας υπολογίζοντας το συντελεστή αξιοπιστίας α του Cronbach. Σύμφωνα με τη βιβλιογραφία τιμές του συντελεστή αξιοπιστίας α του Cronbach άνω του 0.7 είναι ένδειξη ενός καλού επιπέδου αξιοπιστίας (Creswell & Creswell, 2022). Στη συνέχεια πραγματοποιήθηκε περιγραφική ανάλυση για την αποτύπωση των γνώσεων μαθητών/τριών δημοτικού για την τεχνητή νοημοσύνη στην εκπαίδευση. Για την περιγραφική ανάλυση έγινε υπολογισμός του μέσου όρου (ΜΟ) και της τυπικής απόκλισης (ΤΑ) καθώς όλες οι μεταβλητές της έρευνας είναι διατακτικές σε κλίμακα 1 έως 5. Τέλος, πραγματοποιήθηκε ανάλυση με εφαρμογή στατιστικών ελέγχων με στόχο να διερευνηθούν διαφορές στις γνώσεις των μαθητών ως προς το φύλο, την τάξη και τον τόπο διαμονής Για το σκοπό αυτό χρησιμοποιήθηκε ο έλεγχος ανεξαρτησίας χ^2, ο έλεγχος t-test, ο έλεγχος one-wayANOVA και ο έλεγχος two-wayANOVA.

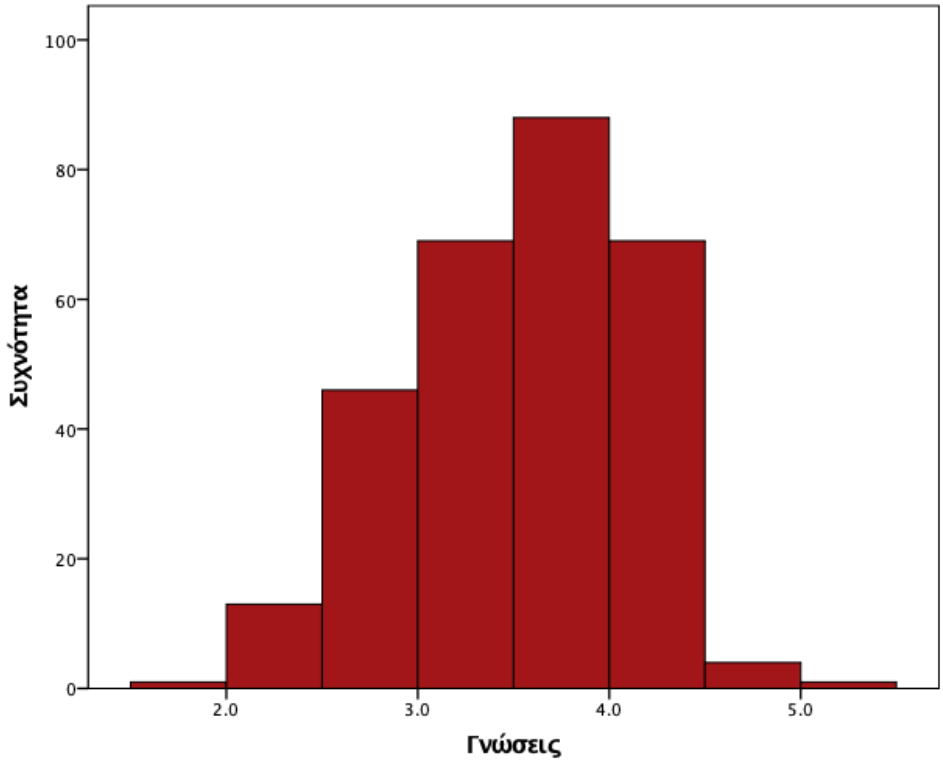
ΑΠΟΤΕΛΕΣΜΑΤΑ

Στην πρώτη ενότητα της ανάλυσης παρουσιάζονται τα αποτελέσματα της ανάλυσης σχετικά με την αξιοπιστία του ερωτηματολογίου της έρευνας. Από τον Πίνακα 1 προκύπτει πως η ενότητα του ερωτηματολογίου που διερευνά τις γνώσεις των μαθητών σε ζητήματα τεχνητής νοημοσύνης εμφανίζει αξιοπιστία α = 0.781 (ικανοποιητικό επίπεδο αξιοπιστίας). Από τον ανάλυση για τις μεμονωμένες ερωτήσεις και το κατά πόσο αυτές πρέπει να συμπεριληφθούν στην κλίμακα ή όχι (στήλη Cronbach's Alpha if Item Deleted) προκύπτει πως η αφαίρεση οποιασδήποτε ερώτησης από τις 16 θα είχε ως αποτέλεσμα τη μείωση του συντελεστή αξιοπιστίας.

Πίνακας 1
Έλεγχος αξιοπιστίας για τη διάσταση «Γνώσεις»

Cronbach's Alpha	N of Items
.781	16

Η επόμενη ανάλυση αφορά την καταγραφή του ποσοστού των μαθητών που γνωρίζει τι είναι η τεχνητή νοημοσύνη και του ποσοστού των μαθητών που έχουν χρησιμοποιήσει οι ίδιοι ή οι γονείς τους τεχνητή νοημοσύνη. Από τα αποτελέσματα προκύπτει πως το 78.5% των μαθητών ανέφεραν πως γνωρίζουν την έννοια της τεχνητής νοημοσύνη και πως το 57.9% των μαθητών ανέφεραν πως έχουν χρησιμοποιήσει οι ίδιοι ή οι γονείς τους τεχνητή νοημοσύνη.



Από τις μεμονωμένες ερωτήσεις που αξιολογούν τις γνώσεις των μαθητών για την τεχνητή νοημοσύνη προκύπτει πως οι μαθητές τείνουν να συμφωνήσουν με το ότι η Τεχνητή Νοημοσύνη μπορεί να δημιουργήσει εκπαιδευτικά παιχνίδια που κάνουν τη μάθηση πιο διασκεδαστική (ΜΟ = 3.8, ΤΑ = 1.3), μπορεί να χρησιμοποιηθεί για να δημιουργήσει εκπαιδευτικά παιχνίδια (ΜΟ = 3.8, ΤΑ = 1.1), μπορεί να βοηθήσει τους μαθητές να μάθουν νέες γλώσσες με πιο εύκολο τρόπο (ΜΟ = 3.7, ΤΑ = 1.2) και μπορεί να βοηθήσει στην επίλυση μαθηματικών προβλημάτων με εξηγήσεις βήμα-βήμα (ΜΟ = 3.7, ΤΑ = 1.2).

Παρόμοια, οι μαθητές τείνουν να συμφωνήσουν με το ότι υπάρχουν εκπαιδευτικές εφαρμογές που χρησιμοποιούν Τεχνητή Νοημοσύνη για να απαντούν σε ερωτήσεις μαθητών (ΜΟ = 3.7, ΤΑ = 1.3) και με το ότι η Τεχνητή Νοημοσύνη μπορεί να προτείνει εκπαιδευτικά βίντεο ή υλικό ανάλογα με αυτά που ενδιαφέρουν τους μαθητές/μαθήτριες (ΜΟ = 3.6, ΤΑ = 1.1), μπορεί να βοηθήσει τους μαθητές να μάθουν να σχεδιάζουν ή να ζωγραφίζουν (ΜΟ = 3.6, ΤΑ =

1.2) και μπορεί να χρησιμοποιηθεί για να δημιουργήσει εικονικές τάξεις όπου οι μαθητές μπορούν να συμμετέχουν (ΜΟ = 3.6, ΤΑ = 1.3). Αντίστοιχα, οι μαθητές έχουν μια ουδέτερη άποψη για το αν η Τεχνητή Νοημοσύνη μπορεί να χρησιμοποιηθεί για να δημιουργήσει εξατομικευμένα μαθήματα για κάθε μαθητή (ΜΟ = 3.1, ΤΑ = 1.3), για το αν η Τεχνητή Νοημοσύνη μπορεί να βοηθήσει τους δασκάλους να αξιολογούν τις εργασίες πιο γρήγορα (ΜΟ = 3.2, ΤΑ = 1.2) και για το αν η Τεχνητή Νοημοσύνη μπορεί να προβλέψει ποιοι μαθητές χρειάζονται περισσότερη βοήθεια στα μαθήματά τους (ΜΟ = 3.2, ΤΑ = 1.4).

Συνολικά, το μέσο επίπεδο γνώσεων των μαθητών για την τεχνητή νοημοσύνη είναι ίσο με 3.5 (ΤΑ = 0.6) σε μια κλίμακα μεταξύ 1 και 5 (Διάγραμμα 1). Το εύρημα δείχνει πως οι μαθητές έχουν ένα μέτριο προς υψηλό επίπεδο γνώσεων σε ζητήματα τεχνητής νοημοσύνης.

Διάγραμμα 1.
Κατανομή της μεταβλητής «Γνώσεις»

Η επόμενη ανάλυση είχε στόχο να διερευνήσει το κατά πόσο καταγράφονται σημαντικές διαφορές στις γνώσεις των μαθητών ως προς το φύλο, την τάξη και την περιοχή διαμονής. Από τον έλεγχο t-test προκύπτει πως δεν υπάρχει στατιστικά σημαντική διαφορά στο συνολικό επίπεδο γνώσεων μεταξύ αγοριών και κοριτσιών ($t = 0.526$, $p = 0.599$). Παρόμοια, δεν καταγράφηκαν στατιστικά σημαντικές διαφορές ως προς το φύλο των μαθητών σε καμία από τις επιμέρους ερωτήσεις που αξιολογούν τις γνώσεις τους ($p > 0.05$).

Ο έλεγχος one-wayANOVA έδειξε πως δεν καταγράφεται στατιστικά σημαντική διαφορά στο επίπεδο γνώσεων των μαθητών σε σύγκριση με την τάξη τους ($F = 0.234$, $p = 0.792$). Αντίθετα, καταγράφηκαν δύο στατιστικά σημαντικές διαφορές στο κατά πόσο οι μαθητές πιστεύουν πως η Τεχνητή Νοημοσύνη μπορεί να βοηθήσει στην επίλυση μαθηματικών προβλημάτων με εξηγήσεις βήμα-βήμα ($F = 3.396$, $p = 0.035$) κατά πόσο οι μαθητές πιστεύουν πως η Τεχνητή Νοημοσύνη μπορεί να χρησιμοποιηθεί για να δημιουργήσει εικονικές τάξεις όπου οι μαθητές μπορούν να συμμετέχουν ($F = 3.848$, $p = 0.022$). Η ανάλυση έδειξε πως οι μαθητές της Δ Δημοτικού (ΜΟ = 3.9, ΤΑ = 1.2) συμφωνούν σε μεγαλύτερο βαθμό από τους μαθητές Ε Δημοτικού (ΜΟ = 3.7, ΤΑ = 1.2) και ΣΤ Δημοτικού (ΜΟ = 3.5, ΤΑ = 1.2) με το ότι η Τεχνητή Νοημοσύνη μπορεί να βοηθήσει στην επίλυση μαθηματικών προβλημάτων με εξηγήσεις βήμα-βήμα. Παρόμοια, οι μαθητές της Δ Δημοτικού (ΜΟ = 3.7, ΤΑ = 1.4) και Ε Δημοτικού (ΜΟ = 3.6, ΤΑ = 1.2) συμφωνούν σε μεγαλύτερο βαθμό από τους μαθητές ΣΤ Δημοτικού (ΜΟ = 3.2, ΤΑ = 1.3) με το ότι η Τεχνητή Νοημοσύνη μπορεί να χρησιμοποιηθεί για να δημιουργήσει εικονικές τάξεις όπου οι μαθητές μπορούν να συμμετέχουν.

Από την ανάλυση του ελέγχου t-test δεν καταγράφεται στατιστικά σημαντική διαφορά στο επίπεδο γνώσεων των μαθητών σε σύγκριση με την περιοχή διαμονής ($t = -1.041$, $p = 0.299$). Αντίθετα, καταγράφηκε στατιστικά σημαντική διαφορά στο κατά πόσο οι μαθητές πιστεύουν πως τα ρομπότ που διδάσκουν μαθητές λειτουργούν με Τεχνητή Νοημοσύνη($t = 2.070$, $p = 0.039$). Τα αποτελέσματα έδειξαν πως οι μαθητές από αστική περιοχή (ΜΟ = 3.5, ΤΑ = 1.2) συμφωνούν σε μεγαλύτερο βαθμό με το ότι τα ρομπότ που διδάσκουν μαθητές λειτουργούν με Τεχνητή Νοημοσύνη σε σύγκριση με τους μαθητές από αγροτική περιοχή (ΜΟ = 3.3, ΤΑ = 1.2).

Τέλος, πραγματοποιήθηκε ανάλυση για να εξεταστεί αν υπάρχει σημαντική αλληλοεπίδραση μεταξύ φύλου και τάξης στο επίπεδο γνώσεων των μαθητών. Από τα αποτελέσματα προκύπτει πως δεν καταγράφεται στατιστικά σημαντική αλληλοεπίδραση μεταξύ φύλου και τάξης στο επίπεδο γνώσεων των μαθητών ($F = 1.748$, $p = 0.176$).

ΣΥΜΠΕΡΑΣΜΑΤΑ

Η παρούσα εργασία είχε σκοπό να εξετάσει τις γνώσεις των μαθητών Δημοτικού για τη χρήση της τεχνητής νοημοσύνης στην εκπαίδευση. Τα αποτελέσματα έδειξαν πως γενικά οι μαθητές Δημοτικού έχουν ένα μέτριο επίπεδο γνώσεων αναφορικά με τη χρήση της τεχνητής νοημοσύνης στην εκπαίδευση ενώ έχουν μια ουδέτερη στάση για τη χρήση της τεχνητής νοημοσύνης στην εκπαίδευση. Παρόμοια, οι μαθητές σε μέτριο βαθμό αναγνωρίζουν τα οφέλη της τεχνητής νοημοσύνης σε διάφορους τομείς της καθημερινότητας καθώς και τα πιθανά οφέλη της στην εκπαιδευτική διαδικασία εκφράζοντας μια ουδέτερη αντίληψη στις ερωτήσεις που τους τέθηκαν για τη χρησιμότητά της. Τα αποτελέσματα αυτά δείχνουν πως οι μαθητές Δημοτικού τη σημερινή εποχή δεν είναι ακόμη εξοικειωμένοι με την τεχνητή νοημοσύνη και έχουν γενικά μια ουδέτερη άποψη για τη χρήση της στην εκπαιδευτική διαδικασία. Για το λόγο αυτό πρέπει να πραγματοποιηθούν δράσεις ενημέρωσης των μαθητών για την τεχνητή νοημοσύνη και την χρήση της στην εκπαιδευτική διαδικασία πριν πραγματοποιηθεί εφαρμογή της στην πράξη. Η ενημέρωση των μαθητών αναμένεται να διαμορφώσει υψηλότερο επίπεδο γνώσεων και θετικότερες αντιλήψεις για την τεχνητή νοημοσύνη και αυτό με τη σειρά του αναμένεται να διαμορφώσει μια θετικότερη στάση των μαθητών για τη χρήση της τεχνητής νοημοσύνης στην εκπαιδευτική διαδικασία.

ΠΕΡΙΟΡΙΣΜΟΙ ΤΗΣ ΕΡΕΥΝΑΣ

Η εργασία που πραγματοποιήθηκε έχει και ορισμένους περιορισμούς που περιορίζουν την γενικευσιμότητα των αποτελεσμάτων στο σύνολο των μαθητών Δημοτικού. Βασικός περιορισμός της έρευνας είναι ότι το δείγμα των μαθητών επιλέχθηκε από μια συγκεκριμένη γεωγραφική περιοχή (Ν. Ζακύνθου) ενώ ο τρόπος επιλογής του δείγματος έγινε με βάση μια μορφή δειγματοληψίας σκοπιμότητας. Αυτά τα δύο στοιχεία μειώνουν την εξωτερική εγκυρότητα της μελέτης με αποτέλεσμα τα αποτελέσματα να μη αντιπροσωπεύουν το σύνολο των μαθητών Δημοτικού στην Ελλάδα.

ΠΡΟΤΑΣΕΙΣ

Τα αποτελέσματα που προέκυψαν παρέχουν μια εικόνα για τις γνώσεις των μαθητών αλλά για να έχουμε μια πιο αντιπροσωπευτική εικόνα θα πρέπει μελλοντικά να πραγματοποιηθεί μεγαλύτερη σε έκταση έρευνα με μαθητές από όλη την Ελλάδα που θα επιλεχθούν με χρήση κάποιας μορφής δειγματοληψίας όπως η στρωματοποιημένη δειγματοληψία. Επιπλέον, μελλοντικά θα πρέπει να διερευνηθούν οι γνώσεις των εκπαιδευτικών αλλά και των γονέων των μαθητών αναφορικά με τη χρήση της τεχνητής νοημοσύνης στην εκπαίδευση. Τέλος, σε μελλοντική έρευνα θα ήταν χρήσιμο να διεξαχθεί συνδυασμός ποσοτικής και ποιοτικής έρευνας σε μαθητές και εκπαιδευτικούς ώστε να μπορεί να αναδειχθεί ένα ασφαλέστερο συμπέρασμα αναφορικά με τις προκλήσεις και τα οφέλη της χρήσης τεχνητής νοημοσύνης στην εκπαίδευση.

ΘΠ2: Η παιδαγωγική ενσωμάτωση των Ψηφιακών Μέσων στη διδακτική πράξη (Θεωρίες Μάθησης, Προγράμματα Σπουδών και Ψηφιακά Μέσα)

ΔΙΔΑΣΚΑΛΙΑ ΟΛΟΚΛΗΡΟΥ ΤΟΥ ΛΟΓΟΤΕΧΝΙΚΟΥ ΕΡΓΟΥ ΤΟΥ Κ. ΘΕΟΤΟΚΗ «Η ΤΙΜΗ ΚΑΙ ΤΟ ΧΡΗΜΑ» ΜΕ ΤΗ ΧΡΗΣΗ Τ.Π.Ε.

Βοντίτσου Άννα

avontitsou@yahoo.gr

ΠΕΡΙΛΗΨΗ

Η εισήγηση αυτή αναδεικνύει την αξιοποίηση των Τ.Π.Ε. στη διδασκαλία της λογοτεχνίας στη Β΄ Λυκείου, συγκεκριμένα στο έργο «Η τιμή και το χρήμα» του Κ. Θεοτόκη. Η χρήση ψηφιακών μέσων -το διαδίκτυο, ο διαδραστικός πίνακας, η e-τάξη, το οπτικοακουστικό υλικό (ebook, ταινία) και η τεχνητή νοημοσύνη (γλωσσικά μοντέλα)- συνεισφέρει στην επίτευξη των διδακτικών στόχων μέσω καινοτόμων μεθόδων.

Εισαγωγικά, παρουσιάζονται τα προγράμματα σπουδών των ετών 2011, 2021, 2023-2024 που στοχεύουν στον κριτικό και ψηφιακό γραμματισμό. Στη συνέχεια, καταγράφονται ο θετικός ρόλος των Τ.Π.Ε. στην εκπαίδευση και ειδικότερα στη διδασκαλία της λογοτεχνίας αλλά και οι προκλήσεις.

Στο κύριο μέρος της εισήγησης αναλύεται η διδακτική πρόταση ολόκληρης της νουβέλας του Κ. Θεοτόκη μέσω της πλατφόρμας e-τάξη. Περιγράφονται το μοντέλο διδασκαλίας, οι μέθοδοι, η πορεία διδασκαλίας, τα βοηθητικά μέσα και δειγματικά παρουσιάζονται σε φύλλα εργασίας ερωτήσεις κατανόησης, σχολιασμού απόψεων, αφηγηματολογίας, διακειμενικότητας, οπτικοποίησης παραγράφων, αλλαγής αφηγηματικών τρόπων ή οπτικής γωνίας αλλά και παραγωγής λόγου με τη βοήθεια της Τ.Ν.

Στο τέλος της εισήγησης, συνάγονται τα συμπεράσματα από την αλληλεπιδραστική σχέση των Τ.Π.Ε. με τη διδακτική της λογοτεχνίας.

Λέξεις – κλειδιά: λογοτεχνία, μεικτό μοντέλο διδασκαλίας, χρήση Τ.Π.Ε., τεχνητή νοημοσύνη (Τ.Ν.), ψηφιακός γραμματισμός, νέα προγράμματα σπουδών.

ΕΙΣΑΓΩΓΗ

Με τα προγράμματα σπουδών του 2011 (Π.Σ. 2011) αλλά και των 2021 (Π.Σ. 2021), 2023-2024 (Ν.Π.Σ. 2023-2024) αναφορικά με τη διδασκαλία της Γλώσσας/Λογοτεχνίας επιδιώκεται ο κριτικός και ο πολυτροπικός γραμματισμός, που ανανεώνουν όλη τη μαθησιακή διαδικασία (Anastasiadou-Symeonidou et al., 2015). Τα νέα Π.Σ. του 2023-2024 προωθούν την ενεργό συμμετοχή και συνεργασία όλων των μαθητών/-τριών, μέσω της δημιουργίας περιβαλλόντων συμπερίληψης, καθοδηγούμενης μάθησης, αυτενέργειας, συνεργατικής δράσης, διερευνητικής μάθησης, βιωματικής προσέγγισης, συνεργατικής επίλυσης προβλημάτων, επικοινωνιακής προσέγγισης, και μετασχηματιστικής λογικής (Ι.Ε.Ρ./Ν.C.). Επίσης, προωθούν τη χρησιμοποίηση νέων τεχνολογιών στη διδακτική πρακτική, αξιοποιώντας τα πλεονεκτήματα της ηλεκτρονικής μάθησης και τα διαθέσιμα ψηφιακά εργαλεία, ώστε με την απόκτηση ψηφιακής εγγραμματοσύνης να αυξηθεί η συμμετοχικότητα, η συνεργατικότητα και να δοθούν κίνητρα για μάθηση (Ι.Ε.Ρ./Ν.C.). Μέσα σ' αυτό το πλαίσιο προτείνεται η διδασκαλία της νουβέλας του Κ. Θεοτόκη με τη χρήση των Τ.Π.Ε. που βοηθούν, για να φτάσει το διδακτικό υλικό στους μαθητές, να προβληθεί (αρχεία, διαδίκτυο, ηλεκτρονική τάξη, διαδραστικός πίνακας, ebook) αλλά και να χρησιμοποιηθεί στη δημιουργική γραφή, την οπτικοποίηση αφηγηματικού λόγου ή την διεκπεραίωση ομαδοσυνεργατικών εργασιών.

Ο ΡΟΛΟΣ ΤΩΝ Τ.Π.Ε. ΣΤΗΝ ΕΚΠΑΙΔΕΥΣΗ: ΘΕΤΙΚΑ ΚΑΙ ΠΡΟΚΛΗΣΕΙΣ

Οι Τ.Π.Ε. έχουν εισβάλει στην καθημερινή ζωή όλων, εκπαιδευτικών και μαθητών/-τριών. Είναι προφανές συνεπώς, γιατί τα σύγχρονα εκπαιδευτικά προγράμματα σπουδών εντάσσουν τα εργαλεία των τεχνολογιών αυτών στη μαθησιακή διαδικασία, αξιοποιώντας τα για τις απαιτήσεις των εκπαιδευτικών δραστηριοτήτων από μικρή ηλικία και με φυσικό τρόπο (Dimitrakopoulou, 2002). Ενδεικτικά, τονίζεται πως μέσα από τη χρήση του διαδραστικού πίνακα αυξάνεται ο ρυθμός και η περιεκτικότητα του μαθήματος αλλά και η συνεργατικότητα και η συμμετοχικότητα, διευκολύνεται η διαλογική διδασκαλία, αυξάνεται το ενδιαφέρον των μαθητών/-τριών από την παρουσίαση διδακτικού υλικού πολυτροπικά βάσει πολυαισθητηριακής προσέγγισης της γνώσης, μπορεί να αξιοποιηθεί και στην ειδική αγωγή (οπτικο-ακουστικό υλικό: ebook-ταινία) και την παραστατική διδασκαλία, προσφέρονται κίνητρα για μάθηση (Anastasiades et al., 2010; Koenraad, 2008; Niarrou & Grousouzakou, 2007). Οι έρευνες έδειξαν ακόμα ότι ο σχεδιασμός του μαθήματος σε διαδραστικό πίνακα μπορεί να βοηθήσει τους εκπαιδευτικούς να γίνουν πιο αποτελεσματικοί και με αυτό τον τρόπο να αυξήσουν την παραγωγικότητα τους. Η συγκεκριμένη τεχνολογία δίνει έμφαση στις στρατηγικές μάθησης που αφορούν στο «Μάθημα για Όλη την Τάξη» (Niarrou & Grousouzakou, 2007). Ταυτόχρονα, η χρήση της πλατφόρμας ηλεκτρονικής μάθησης (η-τάξη) παρέχει σε όλους, μαθητές/-τριες και εκπαιδευτικούς, ασφαλή και δωρεάν πρόσβαση ως πιστοποιημένοι χρήστες μέσω του λογαριασμού τους στο Πανελλήνιο Σχολικό Δίκτυο, οποιαδήποτε χρονική στιγμή, οπουδήποτε και αν βρίσκονται και από οποιαδήποτε σταθερή ή φορητή συσκευή (σταθερό υπολογιστή, φορητό, ταμπλέτα, κινητό τηλέφωνο). Βέβαια και η χρήση της τεχνητής νοημοσύνης, ως βοηθού του εκπαιδευτικού (**Kofteros,** 2024) μπορεί να εισαχθεί σε διάφορες φάσεις της διδασκαλίας των φιλολογικών μαθημάτων και συγκεκριμένα της λογοτεχνίας, όπως θα αναδειχθεί μέσα από τη διδακτική πρόταση. Παράλληλα, μέσω Τ.Ν. δημιουργούνται ιστορίες με εναλλακτικό τέλος, οπτικοποιούνται αποσπάσματα του έργου, αντικαθίστανται αφηγηματικοί τρόποι και τεχνικές, δημιουργούνται ιστορίες με κοινό θέμα, και αποδίδεται συνοπτικά το περιεχόμενο των κεφαλαίων ταχύτατα. Η χρήση συγκεκριμένα των ψηφιακών βοηθών μάθησης (chatbots) έχει τη δυνατότητα να βελτιώνει συνεχώς το μαθησιακό περιβάλλον, καθώς και να διεγείρει τον ενθουσιασμό, την πρωτοβουλία και τη δημιουργικότητα και την αλληλεπίδραση των μαθητών/τριών (Adiguzel, et al., *2023; Laos, 2025;* Lytsiousi*, 2025; Mavridis, 2024)*. Επιπρόσθετα, οι Τ.Π.Ε. μπορούν να συμβάλλουν στην ανάδειξη του παιγνιώδους χαρακτήρα της έντυπης λογοτεχνίας μέσω ποικίλων εφαρμογών για κατασκευή εννοιολογικών χαρτών, σταυρολέξων, κουίζ κ.ά. Αλλά και ο επεξεργαστής κειμένου ευνοεί τον πειραματισμό με τις λέξεις, ευνοεί τις διορθώσεις και τις επάλληλες γραφές κατά τη δημιουργική γραφή. Η μεταγραφή, εξάλλου, ενός λογοτεχνικού κειμένου με τη βοήθεια των πολυμέσων αναδεικνύει τη συνομιλία τεχνών στο εσωτερικό του και τη συνεργασία των αισθήσεων για την πρόσληψή του.

Η ΔΙΔΑΚΤΙΚΗ ΠΡΟΤΑΣΗ ΓΙΑ ΤΟ ΕΡΓΟ ΤΟΥ Κ. ΘΕΟΤΟΚΗ «Η ΤΙΜΗ ΚΑΙ ΤΟ ΧΡΗΜΑ»

Η ΕΠΙΛΟΓΗ ΤΟΥ ΕΡΓΟΥ

Ο Κ. Θεοτόκης είναι εκπρόσωπος του κοινωνικού ρεαλισμού κι ο εισηγητής του κοινωνιστικού μυθιστορήματος, αυτός που διεύρυνε ουσιαστικότερα από κάθε άλλον σύγχρονό του τα όρια της ηθογραφίας και της έδωσε καινούργια αίγλη (Ziras, 1979; Karvelis, 1978; Mastrodimitris, 1978; Stergiopoulos, 1986; Charis, 1963, 1976; Chourmouzios, 1946). Στη νουβέλα του «Η τιμή και το χρήμα» - έτος συγγραφής: 1911-1912, έτος έκδοσης: 1914- δεν εμμένει στη φωτογραφική απεικόνιση της πραγματικότητας αλλά στρέφεται στην κριτική και αντικειμενική επισκόπηση αυτής. Ρεαλιστική η γραφή του (Beaton, 1996; Politis, 1999: 257; Vitti, 1987) με σαφή επίδραση από τον (Γαλλικό) νατουραλισμό (Galaios, 2011; Dallas, 2005: 224-225, 231-234; Karvelis, 2017; Filippidis, 1997). Το δίδαγμα του Κ. Θεοτόκη είναι αυτό του κοινωνικού ρεαλιστή (Stergiopoulos, 1986) να δείξει, δηλαδή, πώς ο χαρακτήρας είναι δημιούργημα των κοινωνικών συνθηκών, όπου ζει ο άνθρωπος. Έντονη εξάλλου είναι η επιθυμία του για κοινωνική δικαιοσύνη και η αναμόρφωση της κοινωνίας,

επηρεασμένος από τον σοσιαλισμό, καθώς μέσα από τις νουβέλες του θέλησε να δείξει το δρόμο που θα οδηγούσε τη γυναίκα στην κοινωνική της απελευθέρωση (Karvelis, 2017). Με τον τρόπο αυτό εξυπηρετούνται και οι στρατηγικές του/της εκπαιδευτικού και ικανοποιούνται οι γνωστικοί και μεταγνωστικοί στόχοι του μαθήματος σύμφωνα με τον κριτικό γραμματισμό των Ν.Π.Σ. Ολοκληρώνοντας, η διδακτική αξιοποίηση μέσω Τ.Π.Ε. της νουβέλας του Κ. Θεοτόκη, που στηρίζεται σε διδασκαλία κειμενικού είδους που παράγεται σε συγκεκριμένο κοινωνικοπολιτιστικό πλαίσιο και γίνεται φορέας ιδεολογίας, εντάσσεται στο παραπάνω πλαίσιο.

ΣΚΟΠΟΙ ΤΗΣ ΔΙΔΑΣΚΑΛΙΑΣ

Οι στόχοι της διδασκαλίας ενός λογοτεχνικού έργου με τη χρήση Τ.Π.Ε. εντάσσονται στους γενικούς σκοπούς του μαθήματος που κι αυτοί εντάσσονται στους σκοπούς της εκπαίδευσης που αποτελεί μέρος της όλης παιδείας (Balaskas, 1990: 136). Συγκεκριμένα, οι στόχοι διδασκαλίας του έργου του Κ. Θεοτόκη είναι οι εξής:

- Να γνωρίσουν οι μαθητές/-τριες το είδος του μυθιστορήματος, το λογοτεχνικό ρεύμα στο οποίο εντάσσεται το έργο, το συγγραφέα και να εξοικειωθούν με τις αρχές της αφηγηματολογίας.
- Να πληροφορηθούν τη θέση της γυναίκας στις αρχές του 20ου αι, το θεσμό της προίκας και να τα συγκρίνουν με τη σύγχρονη εποχή (φεμινιστικό κίνημα, χειραφέτηση της γυναίκας).
- Να γνωρίσουν την κοινωνία της Κέρκυρας των αρχών του 20ου αι (άνοδος αστικής τάξης και παρακμή της αριστοκρατίας), ώστε να επιτευχθεί μια μετάγγιση βιωμένης εμπειρίας από τον πομπό στο δέκτη (Balaskas, 1985, 1990).
- Να προβληματιστούν σχετικά με τη σχέση Τιμής - Χρήματος αλλά και με τις παθογένειες της ελληνικής κοινωνίας της εποχής εκείνης.
- Να εξοικειωθούν με την τεχνολογία που αποτελεί την καθημερινότητά τους και να βιώσουν τη σχέση της τεχνολογίας/Τ.Ν. με τη γλώσσα/λογοτεχνία.
- Να απολαύσουν το έργο όσον αφορά το περιεχόμενο αλλά και την αισθητική του.
- Να καλλιεργηθεί η φιλαναγνωσία των μαθητών / -τριών.
- Να γνωρίσουν τη γλώσσα του κειμένου.
- Να βιώσουν τις ανησυχίες, τους φόβους, τις αγωνίες και τα έντονα συναισθήματα που χαρακτηρίζουν την καθημερινή ζωή των ανθρώπων, που πολλές φορές δεν καθορίζουν τη μοίρα τους.
- Να κατανοήσουν τα κίνητρα των συμπεριφορών και των στάσεων των ηρώων. Να γνωρίσουν το ήθος και τους χαρακτήρες τους και να παρακολουθήσουν την εξέλιξη της ψυχολογικής τους πορείας.

ΜΟΝΤΕΛΟ ΚΑΙ ΜΕΘΟΔΟΙ ΔΙΔΑΣΚΑΛΙΑΣ

Το μοντέλο διδασκαλίας είναι μεικτό, μαθητοκεντρικό και δασκαλοκεντρικό. Εστιάζει στο λογοτεχνικό κείμενο (κειμενοκεντρική μέθοδος) το οποίο εντάσσει στο ιστορικο-φιλολογικό περικείμενό του. Πρόκειται για ένα μοντέλο μαθητοκεντρικό, καθώς στηρίζεται στο **διερευνητικό τρόπο μάθησης, αλλά και δασκαλοκεντρικό, καθώς η διδασκαλία πραγματώνεται μέσα από μια διαλογική διδασκαλία (διδακτικός διάλογος με ερωταποκρίσεις)**. Τελείται δηλαδή μια καθοδηγούμενη διερεύνηση για την κατανόηση των αφηγηματικών τρόπων ή τεχνικών, των εκφραστικών μέσων αλλά και του επτανησιακού ιδιώματος, της κοινωνίας των αρχών του 20ου αι αλλά και της ψυχολογικής πορείας των ηρώων. Ταυτόχρονα, το μαθητοκεντρικό μοντέλο διδασκαλίας στηρίζεται και στην ομαδοκεντρική μέθοδο, μια μάθηση που αναδεικνύει την κοινωνική διάσταση της μάθησης, καθώς ενισχύει τη συνεργατική εργασία. Μέθοδος διδασκαλίας είναι και μια **διακειμενική προσέγγιση της λογοτεχνίας** (συνανάγνωση κειμένων), η «συνομιλία», δηλαδή, του κειμένου με άλλα έργα του ιδίου ή άλλων συγγραφέων, ομόθεμα (με κοινούς θεματικούς άξονες) ή ομότροπα (με κοινούς εκφραστικούς τρόπους). Τέλος, γίνεται χρήση Τ.Π.Ε. που αποτελούν συστατικό στοιχείο οργάνωσης και λειτουργίας του μαθήματος και προσανατολίζουν την εκπαίδευση σε μη γλωσσικά ερεθίσματα αλλά σε οπτικοακουστικά, ώστε να επιτυγχάνεται μια πολυτροπική παρουσίαση του λογοτεχνικού κειμένου.

ΠΡΟΑΠΑΙΤΟΥΜΕΝΑ

Διαδραστικός πίνακας, σύνδεση με το διαδίκτυο, γνώση κειμενογράφου, χρήσης ηλεκτρονικής τάξης, χρήσης των γλωσσικών μοντέλων (chatbots) της τεχνητής νοημοσύνης αλλά και γνώση του αφηγηματικού είδους και βασικών όρων αφηγηματολογίας (π.χ. αφηγητής, αφηγηματικοί τρόποι και τεχνικές).

Η ΔΙΔΑΚΤΙΚΗ ΠΟΡΕΙΑ
ΣΥΝΔΕΣΗ ΜΕ ΤΑ ΠΡΟΗΓΟΥΜΕΝΑ (1 ΩΡΑ)

Έχει προηγηθεί α) εισαγωγική διδασκαλία για τη Νέα Αθηναϊκή σχολή και την πεζογραφία των τελευταίων δεκαετιών του 19ου αι και των αρχών του 20ου αι για την ηθογραφία, για το μυθιστόρημα (και τις διαφορές του από το

διήγημα και τη νουβέλα) για τις τεχνοτροπίες που παρατηρούνται την ίδια περίοδο στο μυθιστόρημα (ρεαλισμός-νατουραλισμός). β) εισαγωγική διδασκαλία για τον ηθογράφο Κερκυραίο πεζογράφο Κ. Θεοτόκη (βίος, τόπος, χρόνος, οικονομική και πολιτική κατάσταση της εποχής του, λογοτεχνικές και πολιτικές επιρροές του).

ΠΑΡΟΥΣΙΑΣΗ -ΚΑΤΑΝΟΗΣΗ ΤΟΥ ΕΡΓΟΥ

Όλο το έργο χωρίζεται σε 13 κεφάλαια[1] που φέρουν τίτλο. Στην πλατφόρμα της ηλεκτρονικής τάξης αναρτάται σύνδεσμος με το ηχητικό βιβλίο (eVivlio – Audiobooks) (I.E.P.) και ένα αρχείο με το έργο του Κ. Θεοτόκη, έκδοσης Γιάννη Φαρσάρη, Ανοιχτή βιβλιοθήκη (www.openbook.gr). Οι μαθητές/-τριες οφείλουν να έχουν διαβάσει ή ακούσει το κεφάλαιο που πρόκειται να διδαχθεί. Μπορούν να χρησιμοποιήσουν ένα γλωσσάρι του επτανησιακού ιδιώματος που έχει αναρτηθεί στην ηλεκτρονική τάξη, για να κατανοήσουν τις ιδιωματικές λέξεις του έργου. Η διδασκαλία κάθε κεφαλαίου είναι ωριαία και ακολουθείται πορεία απαγωγική (ανεστραμμένη πυραμίδα): αναρτώνται στην e -τάξη ανά κεφάλαιο ερωτήσεις κατανόησης και επεξεργασίας του αφηγηματικού λόγου βάσει της ερευνητικής και διαλεκτικής μεθόδου διδασκαλίας από κάτι γενικό σε κάτι πιο ειδικό. Αρχικά, παρουσιάζεται το κείμενο συνοπτικά, δίνοντας έμφαση στην πλοκή, το κύριο θέμα, τους βασικούς χαρακτήρες, τον τόπο και το χρόνο. Αναρτώνται ερωτήσεις όπως: Ποιο είναι το βασικό θέμα του κεφαλαίου; Ποιος είναι ο κεντρικός ήρωας και τα άλλα πρόσωπα; Ποιος είναι ο τόπος και ο χρόνος; Πώς εξελίσσεται ο μύθος; Ποιο είναι το κύριο μήνυμα του συγγραφέα; (Κορυφή της πυραμίδας -Βασικές πληροφορίες-Γενική εικόνα). Αμέσως μετά εξετάζεται το «πώς αφηγείται ο συγγραφέας», το ύφος του, τα εκφραστικά μέσα (εικόνες, παρομοιώσεις, μεταφορές, κοσμητικά επίθετα κ.ά), οι αφηγηματικοί τρόποι (αφήγηση, διάλογος, περιγραφή, εσωτερικός μονόλογος, σχόλιο) και τεχνικές (όπως ευθύγραμμη αφήγηση, επιτάχυνση κ. ά). Ταυτόχρονα, θέτονται προβληματισμοί για τη σχέση γλώσσας και τεχνικής με την κατανόηση του κειμένου. Θέτονται ερωτήσεις όπως: Με ποιους αφηγηματικούς τρόπους παρουσιάζονται οι ήρωες; Ποια γλωσσικά μέσα χρησιμοποιούνται, για να περιγραφούν οι ήρωες; Με ποιες εικόνες (οπτικές, κινητικές, ακουστικές, οσφρητικές) παρουσιάζονται ο τόπος ή οι ήρωες; Ποιο το ύφος του κειμένου και με ποιες γλωσσικές επιλογές το επιτυγχάνει ο συγγραφέας; Ποια η γλώσσα του κειμένου; Μπορείτε να βρείτε τύπους του επτανησιακού ιδιώματος; (Μέση της πυραμίδας – γλώσσα, ύφος, αφηγηματικοί τρόποι και τεχνικές). Ολοκληρώνοντας, η διδασκαλία προχωρά στη διερεύνηση του «γιατί», σε βαθύτερη ανάλυση των χαρακτήρων, των ψυχολογικών τους διακυμάνσεων τεκμηριωμένη στον αφηγηματικὸ λόγο, αφού το έργο συνδέεται με το ιστορικό και κοινωνικό πλαίσιο στο οποίο γράφτηκε. Ενθαρρύνονται οι μαθητές να εκφράσουν προσωπικές απόψεις και να αναπτύξουν επιχειρήματα. Διατυπώνονται για παράδειγμα οι ερωτήσεις: Ποια η συναισθηματική κατάσταση του ήρωα; Πώς κρίνετε τη συμπεριφορά του ήρωα; Για ποιους λόγους νομίζετε πως η ήρωας ενεργεί με αυτόν τον τρόπο; Ποια η σχέση του τίτλου με τη φράση «Ανάθεμα τα τάλαρα!», Πώς θα δρούσατε εσείς σε ανάλογη περίπτωση; Ποιον ήρωα θαυμάζετε και ποιον όχι και γιατί; (Βάση της πυραμίδας -Λεπτομερής ανάλυση και κριτική σκέψη). Ολοκληρώνοντας, γίνεται ωριαία αποτίμηση όλου του έργου με γενικές ερωτήσεις αναφορικά με τον τίτλο, τα χαρακτηριστικά της ηθογραφίας, τα κοινωνικά προβλήματα της εποχής, τη γλώσσα του κειμένου, τους χαρακτήρες, τις αξίες: Να εξηγήσετε γιατί, κατά τη γνώμη σας, ο συγγραφέας επέλεξε το συγκεκριμένο τίτλο για το έργο. Ποιος άλλος τίτλος νομίζετε θα ταίριαζε στη νουβέλα αυτή; Ποια χαρακτηριστικά της ηθογραφίας εντοπίζετε στο έργο του Κ. Θεοτόκη (αναφέρετε 5 χαρακτηριστικά με αναφορές από το έργο). Ο Κ. Θεοτόκης κατακρίνει τα κακώς κείμενα της εποχής του. Ποια είναι τα σημαντικότερα προβλήματα τα οποία αναφέρονται στο πεζογράφημα; Να καταγράψετε γλωσσικές ιδιωματικές λέξεις ή φράσεις που χρησιμοποιούσαν οι Έλληνες της Κέρκυρας της εποχής στην οποία αναφέρεται το έργο. Να ετοιμάσετε ένα μικρό γλωσσάρι μ' αυτά ή να καταγράψετε κάποια χαρακτηριστικά του ιδιώματος. Ποιες προσωπικότητες της νουβέλας θαυμάσατε πιο πολύ και γιατί; Ποιες αξίες προβάλλονται στο έργο του Θεοτόκη; Όταν η διδασκαλία ολόκληρου του έργου ολοκληρωθεί, γίνεται προβολή της ταινίας της Τώνιας Μαρκετάκη (1984), «Η τιμή της αγάπης» βασισμένη στη νουβέλα του Κ. Θεοτόκη (επιλεγμένα αποσπάσματα). Γίνεται σύγκριση της ταινίας με τη νουβέλα, εντοπίζονται τυχόν διαφορές και οι λόγοι της διαφοροποίησης.

ΑΞΙΟΛΟΓΗΣΗ ΤΟΥ ΜΑΘΗΜΑΤΟΣ

Η αξιολόγηση του μαθήματος γίνεται με ατομικές και ομαδικές εργασίες ανά κεφάλαιο που αποστέλλονται μέσω e-τάξης. Έχουν καθοριστεί οι ομάδες (μέλη και υπεύθυνοι που ανεβάζουν στην πλατφόρμα την ομαδική εργασία). Η βαθμολογία και η διόρθωση των εργασιών αποστέλλονται ηλεκτρονικά.

[1] Α΄ Το λαθρεμπόριο. Β΄Ο διάλογος της σιόρας Επιστήμης με τον Αντρέα και η πρώτη συνάντηση του Αντρέα με τη Ρήνη. Γ΄ Στην ταβέρνα του Τραγούδη. Δ΄ Στην πλατεία του Μαντουκιού και στο σπίτι της σιόρας Επιστήμης. Ε΄Ο Αντρέας ταξιδεύει με το καΐκι του, για να κάνει λαθρεμπόριο. ΣΤ΄ Ο Αντρέας κλέβει τη Ρήνη με τη θέλησή της. Ζ΄Η σιόρα Επιστήμη μαθαίνει την αρπαγή της Ρήνης και τρέχει να τη σώσει. Η΄Ο αγώνας λόγων του Σπύρου και της σιόρας Επιστήμης. Θ΄Η αντιφατική συμπεριφορά του Αντρέα. Ι' Η τραγική κατάσταση της Ρήνης. ΙΑ΄Η αγάπη ανάμεσα στη σιόρα Επιστήμη και την κόρη της νικά! ΙΒ΄Η σιόρα Επιστήμη πηγαίνει στην αγορά, για να βρει τον Αντρέα. ΙΓ΄Η Ρήνη αρνείται την πρόταση του Αντρέα να την παντρευτεί.

(Α) Οι ατομικές εργασίες περιλαμβάνουν ερωτήσεις (1) περιεχομένου και σχετικές με το συγκείμενο (χωροχρόνος, ιστορικές, κοινωνικές και οικονομικές συνθήκες του χρόνου συγγραφής, ο πολιτισμός, οι αντιλήψεις, οι παραδόσεις και τα ήθη), (2) κειμενικών δεικτών (λογοτεχνικό είδος, αφηγηματικοί τρόποι, τεχνικές, σχήματα λόγου, γλωσσικές επιλογές, στοιχεία εξέλιξης και πλοκής, οι χαρακτήρες και η δράση τους, το ύφος. ο τίτλος), (3) σχολιασμού απόψεων διακειμενικότητας (συνανάγνωσης του έργου με άλλα έργα του ιδίου ή άλλων συγγραφέων, με κοινούς θεματικούς άξονες ή με κοινούς εκφραστικούς τρόπους), (4) χρήσης Τ.Ν. (chatbots): (α) οπτικοποίησης (εικονογράφησης) κάποιων αφηγηματικών αποσπασμάτων και αξιολόγηση του αποτελέσματος από τους ίδιους τους/τις μαθητές/τριες (β) αλλαγής αφηγητή, οπτικής γωνίας, αφηγηματικών τρόπων (π.χ. αντικατάσταση του εσωτερικού μονολόγου ή του διαλόγου με τριτοπρόσωπη αφήγηση) κάποιων αποσπασμάτων και αξιολόγηση του αποτελέσματος, (γ) ανάπτυξης διαλόγου των μαθητών/-τριών με τον Κ. Θεοτόκη/Τ.Ν. (chatbot) π.χ. για την επιλογή του τίτλου ή των αφηγηματικών τρόπων με στόχο την ανάπτυξη επιχειρηματολογίας αλλά και κριτικής αντιμετώπισης της Τ.Ν.

(Β) Οι ομαδικές εργασίες: Οι μαθητές/-τριες χωρισμένοι σε ομάδες των 4 ατόμων βάσει της ομαδοσυνεργατικής μεθόδου (Matsagouras, 2000) αναλαμβάνουν εργασίες (1) παραγωγής κριτικού λόγου: η ανάπτυξη τεκμηριωμένης προσωπικής γνώμης, η συμφωνία ή η διαφωνία τους με προβλήματα, θέσεις, στάσεις, στερεότυπα, προκαταλήψεις κ.ά. που θέτει το κείμενο (2) δημιουργικής γραφής, που συνοδεύεται με ετεροαξιολόγηση (**Kofteros**, 2024: 93) όπως: (α) Δημιουργίας εναλλακτικού τέλους: «Αν αλλάζατε το τέλος της νουβέλας, πώς θα τελειώνατε το πεζογράφημα; Φανταστείτε ένα διαφορετικό τέλος και προχωρήστε σε παραγωγή λόγου. Έπειτα ζητήστε από την Τ.Ν. (chatbots) να κάνει το ίδιο και αξιολογήστε το αποτέλεσμα. Ποια πρόταση θεωρείτε πιο πετυχημένη και γιατί;» (β) Προσθήκης κάποιου ήρωα με αποτέλεσμα την αλλαγή της πλοκής ή της σκηνής. Για παράδειγμα: «Ο μπάρμπα Σπύρος στο κεφ. ΙΑ΄ βρίσκεται έξω από το παράθυρο του σπιτιού του Αντρέα και ακούει τις ηρωίδες να μιλούν και αυτός σχολιάζει το διάλογο των γυναικών με εσωτερικό μονόλογο. Φανταστείτε τη σκηνή και ζητήστε και από την Τ.Ν. (chatbots) να κάνει το ίδιο. Στη συνέχεια, αξιολογείστε το αποτέλεσμα.» (γ) Καταγραφής συναισθημάτων και σκέψεων κάποιου ήρωα του έργου από τους μαθητές στο ημερολόγιό τους. (δ) Περιληπτικής απόδοσης του περιεχομένου ενός κεφαλαίου: «Ετοιμάστε την περίληψη του κεφαλαίου και ζητήστε το ίδιο από την Τ.Ν. (chatbots). Στη συνέχεια αξιολογήστε τις περιλήψεις.»

ΦΥΛΛΑ ΕΡΓΑΣΙΑΣ

ΦΥΛΛΟ 1^{Ο}: ΚΕΦΑΛΑΙΟ Γ΄: Α΄ ΜΕΡΟΣ - ΑΤΟΜΙΚΕΣ ΕΡΓΑΣΙΕΣ

1. α) Ποιος ο τόπος, ο χρόνος και τα πρόσωπα του 3^{ου} κεφαλαίου; β) Πώς περιγράφεται η ταβέρνα του Τραγούδη (βρείτε επίθετα και εικόνες: οπτικές, ακουστικές, κινητικές και οσφρητικές);

2. α) Να αναφέρετε κάποια επαγγέλματα που υπήρχαν στην Κέρκυρα στις αρχές του 20ου αι. και να σχολιάσετε την εξέλιξή τους στον 21^{ο} αι. β) Να καταγράψετε από το κεφάλαιο γ΄ γλωσσικές ιδιωματικές λέξεις ή φράσεις που χρησιμοποιούσαν οι Έλληνες της Κέρκυρας της εποχής στην οποία αναφέρεται το έργο.

3.α) Γιατί οι άνδρες δεν ήθελαν να αποκτούν κορίτσια στις αρχές του 20^{ου} αι; Να απαντήσετε με αναφορές στο τρίτο κεφάλαιο. β) Διαβάζοντας το τρίτο κεφάλαιο βρίσκετε αναλογίες αναφορικά με τη θέση του άντρα στη σημερινή εποχή;

4.α) «Σας το δίνω γραφτό, η Κυβέρνηση είναι πεσμένη.» «Το ξέρουμε» του αποκρίθηκε ο Αντρέας «που δεν ανήκεις στο κόμμα, γιατί δεν έφαες όσα ήθελες από την εργολαβία του θεάτρου·μα το χατήρι δε θα σου γένει.» Ποια πολιτική κατάσταση της εποχής στην Κέρκυρα καυτηριάζει ο συγγραφέας; β) Να συγκρίνετε το παρακάτω απόσπασμα από το έργο του Κ. Χατζόπουλου, «Αγάπη στο χωριό» με το συγκεκριμένο κεφάλαιο από το έργο του Κ. Θεοτόκη «Η τιμή και το χρήμα».

«Καλώς τουν κυρ Γιώργ'» άκουσε άξαφνα μια φωνή από το βάθος και προχώρησε εκεί. Θολό φως, πέφτοντας από ένα στενό παράθυρο θαμπόφεγγε τρεις ανθρώπους καθισμένους γύρω σ΄ ένα μικρό τραπέζι. «Μουρέ ισείς είσαστι; Τόστρουσάτι κιόλας; Απ' ν' ικλισά ίσα στουν πουτιστή!» είπε σαν τους γνώρισε πως ήταν τρεις αργατικοί, και στάθηκι μπροστά τους. «Ήρθαμι να κάνουμι σιφτέ τ' Φώτ' στου νέου απόγειου. Κάτσι να σι κεράσουμι» είπε ο ένας απ' αυτούς. «Οχ, καημένι Τάσου, δεν είμι να κάτσου. Ήρθα κάτ' να που τ' Φώτ΄ιδώ», απάντησε ο Γιώργης γυρίζοντας κατά το Φώτη που σίμωσε από το βάθος με το γιλέκι μονάχα και με μακριά ποδιά ίσα με κάτω. «Ξ'στός ανέστ'», είπε τούτος, δίνοντάς του το χέρι και πρόβαλε το στόμα. «Αληθώς ανέστ'». Ο Γιώργης έκαμε το ίδιο κίνημα. Εκείνοι που κάθονταν στο τραπέζι,

σαν τους είδαν που φιλήθηκαν, σηκώθηκαν και φιλήθηκαν κι αυτοί με το Γιώργη. «Έχ'ς αδειά να σ' που ένα λόγου;» ρώτησε τούτος το Φώτη ύστερα από μικρή σιωπή. «Μιταχαράς» αποκρίθηκε εκείνος και τράβηξε προς τα μέσα. Ο Γιώργης τον ακολούθησε. «Να πιάσου δυο κρασάκια;» ρώτησε ο πρώτος, άμα έφτασαν σ' ένα τραπέζι μπροστά στον πάγκο, κ' έδωκε ένα σκαμνί του Γιώργη. «Δεν τ' αφήν'ς καλύτιρα!» «Να στείλου να μας φέρ'νι δυο καφέδις;» «Ότ' έπια. Κάτσι να σ' που τώρα πόχ'ς αδειά, μπριν έρθ' ου κόσμους» ξαναπάντησε ο Γιώργης και κάθισε.» Κ. Χατζόπουλος, «Αγάπη στο χωριό».

Β΄ ΜΕΡΟΣ - ΕΡΓΑΣΙΕΣ ΟΜΑΔΟΣΥΝΕΡΓΑΤΙΚΕΣ

Α΄ Ομάδα: Σχετικά με τη θέση των αντρών επισημαίνεται από την Ευγενία Ζαβρίδου (Zavridou, 2010: 55): «Οι άντρες αφιερώνουν αρκετό χρόνο καθημερινά στη διασκέδασή τους με τις συναναστροφές και τις συζητήσεις τους στις ταβέρνες.» Να βρείτε αν επιβεβαιώνεται αυτή η επισήμανση στο 3ο κεφάλαιο.

Β΄ Ομάδα: «Η βασική ιδέα του έργου, που επαναλαμβάνεται σταθερά από τη Ρήνη και τον Αντρέα όπως και από άλλα πρόσωπα, είναι η ιδέα που συνοψίζεται στη φράση «Ανάθεμά τα τά τάλαρα!». Στηρίζεται στη βασική αντίθεση χρήμα (υλικό) - τιμή (πνευματικό). Η αντίθεση αυτή συνδηλώνει πως η υπερτίμηση του χρήματος και η υποτίμηση της τιμής δημιουργούν μια αντιφατική κατάσταση που προκαλεί πόνο.» Πώς επιβεβαιώνεται η άποψη αυτή της Ευγενίας Ζαβρίδου (Zavridou, 2010: 52) στο τρίτο κεφάλαιο;

Γ΄ Ομάδα: «Η γυναίκα της εποχής πρέπει να υπακούει σε έναν κώδικα συμπεριφοράς και να ακολουθεί ένα συγκεκριμένο πρότυπο αρετών, δηλαδή να είναι ηθική, τίμια και εργατική. Αυτές οι τρεις ιδιότητες πρέπει να συνδυάζονται με την ομορφιά και την προίκα, για να έχει μια κοπέλα ελπίδες να παντρευτεί.» Πώς επιβεβαιώνε-ται η παραπάνω άποψη της Ευγενίας Ζαβρίδου (Zavridou,2010: 54-55) στο τρίτο κεφάλαιο;

Δ΄ Ομάδα: «Απέναντι στον πόλεμο ο συγγραφέας παίρνει αρνητική στάση δηλώνοντας ότι οι πόλεμοι είναι πηγή της αδικίας και της ανισότητας: Εκφράζει πόνο για το δράμα της ελληνικής κοινωνίας που αντιμετωπίζει την αθλιότητα και την εκμετάλλευση, παρουσιάζοντάς το με γλαφυρότητα μέσα από τον καθημερινό αγώνα, την αγωνία για το καθημερινό ψωμί, το μόχθο και τον κάματο που παραμένουν αδικαίωτα, την πίκρα που λυγίζει την ηθική και την αγνότητα των ανθρώπων.» Να βρείτε αν επιβεβαιώνεται αυτή η άποψη της Ευγενίας Ζαβρίδου (Zavridou, 2010: 51) στο τρίτο κεφάλαιο.

Ε΄ Ομάδα: «Η ταβέρνα σεσημασμένος νατουραλιστικός χώρος περιγράφεται όχι μόνο εξωτερικά και εσωτερικά (κυρίως), αλλά και ως φορέας ποικίλλων διαταξικών λειτουργιών (ψυχαγωγίας, πολιτικής συζήτησης και προπαγάνδας).» Να επιβεβαιώσετε την άποψη του Ιωάννη Γαλαίου (Galaios, 2011: 330) στο συγκεκριμένο κεφάλαιο.

ΦΥΛΛΟ 2Ο: Ζ΄ ΚΕΦΑΛΑΙΟ: Α΄ ΜΕΡΟΣ – ΑΤΟΜΙΚΕΣ ΕΡΓΑΣΙΕΣ

1.α) Ποιος ο τόπος, ο χρόνος και τα πρόσωπα της αφήγησης στο κεφάλαιο Ζ΄; β) Πώς αντέδρασε η σιόρα Επιστήμη, όταν η γειτόνισσά της η Κωνσταντίνα έτρεξε να την πληροφορήσει πως ο Αντρέας έκλεψε την κόρη της; Με ποια εκφραστικά μέσα παρουσιάζεται από τον Κ. Θεοτόκη η αντίδρασή της;

2. Ποιους από τους παρακάτω αφηγηματικούς τρόπους χρησιμοποιεί ο Κ. Θεοτόκης σ΄ αυτό το κεφάλαιο: αφήγηση, περιγραφή, διάλογος, εσωτερικός μονόλογος, ελεύθερος πλάγιος λόγος, σχόλιο; Ποιος ο ρόλος τους;

3.α) Ποια τα συναισθήματα της σιόρας Επιστήμης, όταν πληροφορήθηκε την αρπαγή της κόρης της από τον Αντρέα; β) Ποια τα συναισθήματα του κόσμου για τη σιόρα Επιστήμη σ' αυτό το κεφάλαιο; Με ποια γλωσσικά μέσα εκφράζονται;

4. Να οπτικοποιήσετε μέσω T.N. (chatbots) κάποιο απόσπασμα του κεφαλαίου και έπειτα να αξιολογήσετε το αποτέλεσμα.

5. Να συγκρίνετε (α)τη συμπεριφορά των γονιών της νεαρής ηρωίδας του Κ. Θεοτόκη, όταν πληροφορήθηκαν την «ατίμωσή» της στο απόσπασμα του έργου «Υπόληψη» του Κ. Θεοτόκη που σας δίνεται παρακάτω, με τη συμπεριφορά της σιόρας Επιστήμης στο συγκεκριμένο κεφάλαιο του Κ. Θεοτόκη. (β) τους άγραφους νόμους της αγροτικής κοινωνίας των αρχών του 20ου αι αναφορικά με την «τιμή» της κοπέλας.

«Το σόι μας είναι φτωχό, ναι, μα είναι αντρόπιαστο. Εγώ είμαι γέροντας, μα έχω εδικούς παληκάρια. Λέγε Μαρία, τι σου'καμε ο παλιάνθρωπος;» Κ' εσηκώθηκε. «Σου μίλησε άσκημους λόγους;» ερώτησε. «Ναι» είπε δειλά η

Μαρία. «Κ' επαραδέχτηκες;» εφώναξε η μητέρα χολεμένη, σηκώνοντας μία σκίζα από τη στιά για να δείρει τη θυγατέρα της. «Αυτά τα διδάγματα σου'χα δώκει; Έτσι μας τιμάς;» Επρόστεσε φοβερίζοντας. «Δε φταίω» είπε η Μαρία κρούβοντας ντροπιασμένη το πρόσωπο. «Έπρεπε να του βγάλεις τα μάτια» της αποκρίθηκε η μάνα της. «Μόπιασε το χέρι!». «Το χέρι; Κι από τα χτες δεν ήξερες να μιλήσεις;» «Σκύλα» την έβρισε ο Ζόψης αχνίζοντας. «Ξαφνικό μας» είπε η μάνα χτυπώντας το κεφάλι της. «Τέτοια θέρισσα είσουνε και σ' εθρέφαμε σπίτι μας; Θα σε διώξουμε όμως, ή θα σε κάμουμε να δώκεις τέλος χωρίς φαί και χωρίς πιοτό.» «Και σου' καμε κι άλλο;» ερώτησε βραχνά ο πατέρας «σ΄εφίλησε κιόλας α χρειάζεται;» Μια στιγμή ετσώπασαν όλοι. Οι γονέοι ετήραξαν ανήσυχοι τη θυγατέρα τους προσμένοντας την απάντηση. Εκείνη τους εκοίταξε φοβισμένη κ' εκούνησε άφωνα το κεφάλι. «Τι λες μωρή» είπε ο γέρος οργισμένος και της έπιασε το χέρι και την ετίναξε όσο εδυνότουν. «Τέτοια ντροπή μού' καμες;» Όμως την ερώτησε: «Ήταν κι άλλος αυτού;» «Ναι» αποκρίθηκε τρομασμένη «μας είδε η Κατερίνα και η μάνα της». «Αχ, αχ» έκαμε η μητέρα και την έφτυσε στο πρόσωπο και την εχτύπησε με τη σκίζα. Το χωριό λοιπόν όλο το ξέρει. Και γω να σε βαστάξω σπίτι μου. Φεύγα γλήγορα, φεύγα. Ή να σε πάρει ή να χαθείς.» Και λέγοντας έτσι ο πατέρας την ετίναζε και την άμπωνε θυμωμένος προς την πόρτα και με μια κλωτσιά την έβγαλε όξω.» Κ. Θεοτόκης, Η Υπόληψη (1904).

Β΄ ΜΕΡΟΣ - ΕΡΓΑΣΙΕΣ ΟΜΑΔΟΣΥΝΕΡΓΑΤΙΚΕΣ

Α΄ Ομάδα: «Η σιόρα Επιστήμη οδηγημένη από την ανάγκη, ανέπτυξε έναν υπολογιστικό χαρακτήρα με κέντρο της συνείδησής της το χρήμα.» Επιβεβαιώνεται η άποψη του Γ.Δ. Παγανού (Paganos 2017: 39) για τη σιόρα Επιστήμη σ΄ αυτό το κεφάλαιο;

Β΄ Ομάδα: Το κεφάλαιο θα μπορούσε να ονομαστεί «ο ύμνος της αγάπης». Επιβεβαιώνεται αυτός ο χαρακτηρισμός;

Γ΄ Ομάδα: Ο διάλογος αποτελεί τον κυρίαρχο αφηγηματικό τρόπο στα περισσότερα μέρη του διηγήματος, με αποτέλεσμα να αποδίδονται με παραστατικότητα, ζωντάνια και αμεσότητα οι συναισθηματικές εξάρσεις και οι δραματικές εντάσεις. Επιβεβαιώνεται η άποψη στο συγκεκριμένο κεφάλαιο;

Δ΄ Ομάδα: «Υπάρχει μια ομαλή εξέλιξη του αφηγηματικού χρόνου χωρίς περίτεχνες αναδρομές και επανασυνδέσεις.» Επιβεβαιώνεται η άποψη του Γ. Δ. Παγανού (Paganos 2017: 41) στο συγκεκριμένο κεφάλαιο;

Ε΄ Ομάδα: «Κεντρικός στόχος των ιστοριών του Θεοτόκη είναι οι δυνάμεις που κινούν τα νήματα, διαμορφώνουν τους χαρακτήρες και βρίσκονται πίσω από τις αποφάσεις τους και τις πράξεις τους. Στις δυνάμεις αυτές ανήκουν οι άγραφοι νόμοι της αγροτικής κοινωνίας (π.χ. η τιμή της κόρης ή της οικογένειας) και τα ανθρώπινα πάθη (π.χ. το ερωτικό πάθος, η ζήλια). Έτσι άλλοι ήρωες εμφανίζονται ως υπερασπιστές της τιμής της γυναίκας και της υπόληψης της οικογένειας και άλλοι είναι δέσμιοι των παθών τους.» Επιβεβαιώνεται η παραπάνω άποψη του Τάκη Καρβέλη (Karvelis, 2017: 34) στο συγκεκριμένο κεφάλαιο, μελετώντας τη συμπεριφορά των βασικών ηρώων;

ΦΥΛΛΟ 3^{Ο}: ΚΕΦΑΛΑΙΟ ΙΑ΄: Α΄ ΜΕΡΟΣ – ΑΤΟΜΙΚΕΣ ΕΡΓΑΣΙΕΣ

1.α) Πώς αντέδρασε η τοπική κοινωνία, όταν η Ρήνη άρχισε να δουλεύει στο εργοστάσιο; β) Ποιες κοινωνικές αλλαγές βλέπετε να συντελούνται στη μικρή συντηρητική κοινωνία αυτού του προαστίου της Κέρκυρας;

2.α) Ποιες αξίες προβάλλονται σ' αυτήν την ενότητα; β)Ποια η συναισθηματική κατάσταση των ηρωίδων (μάνας & κόρης);

3.Υποθέστε πως αλλάζει ο αφηγητής (παντογνώστης αφηγητής-συγγραφέας) και αφηγήτρια του κεφαλαίου γίνεται η Ρήνη. Τι αλλαγές θα συμβούν στο πρόσωπο του αφηγητή και στην οπτική γωνία; Στη συνέχεια ζητήστε από τα γλωσσικά μοντέλα της Τ.Ν. (chatbots) να προχωρήσουν σ' αυτήν την αλλαγή στο συγκεκριμένο κεφάλαιο. Πώς κρίνετε αυτήν την αλλαγή του αφηγητή διαβάζοντας το νέο κεφάλαιο που σας έχει δώσει η Τ.Ν.;

4. Ποια τα συναισθήματά σας για τις δύο ηρωίδες-πρωταγωνίστριες του Κ. Θεοτόκη, όπως σας γεννιούνται από τα λόγια και τα έργα τους στη συγκεκριμένη σκηνική ενότητα;

5. «Στον πυρήνα και των δύο έργων υπάρχει το ίδιο πρόβλημα: η υποβαθμισμένη θέση της γυναίκας μέσα στην ελληνική κοινωνία των αρχών του 20^{ου} αι. Ο Α. Παπαδιαμάντης επιλέγοντας μια προωθημένη φανταστική λύση έδωσε μια «δαιμονική» και τραγικότερη διάσταση στον τύπο της ηρωίδας του. Αντίθετα, ο Θεοτόκης μένοντας πιστός στις σοσιαλιστικές ιδέες που τον ενέπνευσαν, όταν έγραφε την κοινωνική του νουβέλα -πριν από τους Βαλκανικούς πολέμους-

θέλησε να δείξει με μέθοδο αυστηρά ρεαλιστική το δρόμο που θα οδηγούσε τη γυναίκα στην κοινωνική της απελευθέρωση» (Paganos, 2017: 38). Αφού διαβάσετε το παρακάτω απόσπασμα από τη Φόνισσα (1903) του Α. Παπαδιαμάντη και αφού το συγκρίνετε με τη συγκεκριμένη σκηνική ενότητα της νουβέλας «Η Τιμή και το χρήμα» (1912) του Κ. Θεοτόκη, να επιβεβαιώσετε την παραπάνω άποψη του Γ.Δ. Παγανού.

«Τι δούλεψη να κάμη κανείς στη φτώχεια!... Η μεγαλύτερη καλωσύνη που μπορούσε να τους εκάμη (ενν. στα κορίτσια) θα ήτον να είχε κανείς στερφοβότανο να τους δώση. (Θε μ', σχώρεσέ με!) Ας ήτον και παλικαροβότανο!επέφερε Γιατί κάνει όλο κοριτσάκια, κι αυτή η φτωχιά!... Θαρρώ πως έχει πέντ' έξι ως τώρα. Δεν ξέρω αν της έχη πεθάνει κανένα... απ' αυτά τα εφτάψυχα!» Είχεν ερευνήσει, τω όντι, επί χρόνους πολλούς, εις τα βουνά και τας φάραγγας, όπως εύρη «παλικαροβότανο» διά την κόρην της, αλλ' εκείνο το οποίον της είχε δώσει δεν επέτυχεν εξ εναντίας, ενήργησε μάλλον ως «κοριτσοβότανο». Και όμως εις αυτήν άλλοτε, όταν της το έδωκεν η ανδραδέλφη της, είχε τελεσφορήσει, διότι έκαμε τέσσαρας υιούς, και μόνον τρεις θυγατέρας. Όσον αφορά το «στερφοβότανο», ο πνευματικός τής είχεν ειπεί προ χρόνων ότι είναι μεγάλη αμαρτία.[…]Η Φραγκογιαννού εσκέφθη: «Θα φωνάξουν, τάχα;... Θ' ακουστή; Πού ν' ακουστή!... Πρέπει να κάμω γλήγορα, προσέθηκε μέσα της. Αυτός, όπου είναι, τώρα σε λίγο, θά 'ρθη δω, γιατί θα σουρουπώση, και δε θα βλέπη να κάνη δουλειά εκεί κάτω... Και πρέπει να φεύγω το γληγορότερο, χωρίς να με ιδή, όπως δεν με είδε ως τώρα».Εδίστασε προς στιγμήν. Ησθάνθη μέσα της φοβεράν πάλην. Είτα είπε, σχεδόν μεγαλοφώνως: «Καρδιά!... αυτό είναι μια απόφαση».Και δράξασα με τας δύο χείρας τα δύο κοράσια, τα ώθησε με μεγάλην βίαν.Ηκούσθη μέγας πλαταγισμός.Τα δύο πλάσματα έπλεαν εις το νερόν της στέρνας. Η μεγαλυτέρα κορασίς έρρηξεν οξείαν κραυγήν, ήτις αντήχησεν εις την μοναξιάν της εσπέρας.— Μα...!Εξ εμφύτου ορμής, η Φραγκογιαννού έστρεψε το πρόσωπον προς την λευκήν καλύβην, όπου μέχρι τούδε είχεν εστραμμένα τα νώτα.Και συγχρόνως ητοιμάζετο να φύγη, και συνάμα έστρεφε τον κανθόν του όμματος προς την στέρναν, διά να ιδή αν διήρκει η αγωνία. Ανέλαβε το καλάθι της, το οποίον είχεν αποθέσει κατ' γης, και απεμακρύνθη δύο βήματα. «Φόνισσα, Α. Παπαδιαμάντης».

Β΄ ΜΕΡΟΣ - ΟΜΑΔΟΣΥΝΕΡΓΑΤΙΚΕΣ ΕΡΓΑΣΙΕΣ

Α΄ Ομάδα: «Η νέα αναζητεί τη μητρική στοργή, γιατί η καρδιά της έχει πληγωθεί, αναζητεί τη ζεστασιά, γιατί νιώθει κατάμονη να αντιμετωπίσει την σκληρότητα του κόσμου και η σιόρα Επιστήμη θα αλαφρύνει την ψυχή της κόρης της, όπως μόνο οι μάνες ξέρουν.» Να επιβεβαιώσετε την άποψη της Ευγενίας Ζαβρίδου (Zavridou, 2010: 42) στο Ι Α΄ κεφάλαιο.

Β΄ Ομάδα: «Οι μητέρες θυγατέρων, καθώς ζουν κάτω από το άγχος της αποκατάστασής τους - μια και η προίκα συνήθως είναι ανύπαρκτη και επομένως οι πιθανότητες πιο περιορισμένες - όλες μεθοδεύονται χίλιους τρόπους, για να συνδυάσουν την αυστηρότητα με την ανοχή, την ελευθερία κινήσεων των θυγατέρων τους με τον περιορισμό. Η μάνα σ' αυτή τη σκηνική ενότητα φαίνεται να υποχωρεί και αλλάζει στάση, προκειμένου να δει την κόρη της παντρεμένη». Να επιβεβαιώσετε την άποψη της Ανθούλας Σεφεριάδου (Seferiadou, 1982: 326) και να εξηγήσετε τους λόγους της υποχώρησής της.

Γ΄ Ομάδα: «Και όταν σε λίγο ο Ανδρέας, χαρούμενος για την υποχώρηση της σιόρα Επιστήμης στο ζήτημα της προίκας θα της ζητήσει να τον ακολουθήσει, η Ρήνη θα του δώσει ένα ηθικό μάθημα με την άρνησή της.» Να σχολιάσετε την άποψη του Γ.Δ. Παγανού (Paganos 2017: 39) στο Ι Α΄ κεφάλαιο.

Δ΄ Ομάδα: «Τα βασικά πρόσωπα του έργου είναι αποκλειστικά οι δυο γυναίκες. Αντίθετα οι άντρες (ο Αντρέας, ο θείος του, ο Σπύρος και ο γέρο-Τρίνκουλος) απεικονίζονται παραδομένοι είτε στις ανθρώπινες αδυναμίες είτε στις κοινωνικές προκαταλήψεις και ανίκανοι να σπάσουν τα δεσμά τους». Να επιβεβαιώσετε την άποψή του Γ.Δ. Παγανού (Paganos 2017: 40) βασισμένοι στο Ι Α΄ κεφάλαιο.

Ε΄ Ομάδα: Η Ρήνη χαρακτηρίζεται ως περίπτωση γυναίκας που απελευθερώνεται από τις προκαταλήψεις, που επικρατούσαν στην εποχή της. Να εκφράσετε τις απόψεις σας πάνω σ' αυτή τη θέση με βάση το Ι Α΄ κεφάλαιο.

ΣΥΜΠΕΡΑΣΜΑΤΑ

Μέσα από τη διδακτική πρόταση, λοιπόν, αναδεικνύεται η αλληλεπιδραστική σχέση ψηφιακών μέσων με τη διδακτική της λογοτεχνίας και η αποτελεσματικότητα του περιβάλλοντος μάθησης από τη χρήση των τεχνολογικών εφαρμογών. Η χρήση των Τ.Π.Ε. είναι πολλαπλώς ωφέλιμη, αν αξιοποιηθούν σε ένα περιβάλλον εργασίας, που βασίζεται σε μια νέα λογική διδακτικής και παιδαγωγικής προσέγγισης του μαθήματος που διευκολύνει την ανάπτυξη δεξιοτήτων για την αναζήτηση πληροφοριών, την κριτική επεξεργασία και συνθετική παρουσίαση των δεδομένων που συλλέγονται με τη χρήση πολυτροπικών κειμένων και ποικίλων σημειωτικών πόρων, την πραγμάτευση ενός θέματος από διαφορετικές οπτικές γωνίες, τον πειραματισμό κατά το γράψιμο και την παραστατικότητα στην παρουσίαση· τη συνεργατική μάθηση

και την ανάπτυξη πρωτοβουλιών στο πλαίσιο της ομάδας. Αναφαίνονται και οι προκλήσεις από αυτή τη σύζευξη γνωστικού αντικειμένου και Τ.Π.Ε. σύμφωνα με τους παιδαγωγικούς σκοπούς της διδακτικής πρότασης στο πλαίσιο των κριτικών και πολυτροπικών προγραμμάτων διδασκαλίας της λογοτεχνίας των τελευταίων χρόνων, καθώς απαιτείται ψηφιακή κατάρτιση, δημιουργικότητα και ηθική χρήση. Όμως παρά τις προκλήσεις, η χρήση των Τ.Π.Ε. στη διδασκαλία της λογοτεχνίας δημιουργεί προσδοκίες για μια καινοτόμα, πιο συμμετοχική, διδασκαλία των λογοτεχνικών κειμένων στη σχολική τάξη.

ΠΕΡΙΛΗΨΗ

Οι σύγχρονες θεωρίες μάθησης αναγνωρίζουν την ανάγκη για μια συμπεριληπτική εκπαιδευτική διαδικασία η οποία θα σέβεται και θα λαμβάνει υπόψη της τη διαφορετικότητα των μαθητών, σε ένα πλαίσιο διαφοροποιημένης διδασκαλίας, η οποία είναι η μεθοδολογία που βασίζεται στην υπόθεση ότι η διδακτική πράξη χρειάζεται να διαφοροποιείται και να προσαρμόζεται ανάλογα με τις εμπειρίες, τις ανάγκες, τη διαφορετικότητα του μαθητικού πληθυσμού και τα ιδιαίτερα χαρακτηριστικά της κάθε τάξης. Οι παράμετροι που διαφοροποιούνται αφορούν το περιβάλλον της μάθησης, το περιεχόμενο και τη διαδικασία της μάθησης, και το αποτέλεσμα της μάθησης.

Μια τέτοια μαθησιακή διαδικασία, η οποία αξιοποιεί με παιδαγωγικά ορθούς τρόπους τις θεωρητικές παραδοχές του οικοδομισμού και τις νέες τεχνολογίες, απαιτεί από τους εκπαιδευτικούς να αποστασιοποιηθούν από το παραδοσιακό και συντηρητικό δασκαλοκεντρικό μοντέλο διδασκαλίας, που συχνά χαρακτηρίζεται και από μια επιφυλακτική στάση έναντι στην καινοτομία στη διδασκαλία και την εκπαίδευση γενικότερα. Στο πλαίσιο του παραπάνω προβληματισμού, στην εργασία αυτή εξετάζουμε τον ρόλο του εκπαιδευτικού στη διαφοροποιημένη διδασκαλία, δηλαδή, τον τρόπο με τον οποίο θα πρέπει να σκέφτεται και να ενεργεί πριν, κατά τη διάρκεια, αλλά και μετά από την πραγματοποίηση της διδασκαλίας, όταν αναστοχάζεται και «αφουγκράζεται» την τάξη έτσι ώστε να συμβάλλει στην επιτυχή της εφαρμογή. Περιγράφουμε τα χαρακτηριστικά που χρειάζεται να έχουν οι εκπαιδευτικοί που επιθυμούν να εγκαταλείψουν την παραδοσιακή δασκαλοκεντρική προσέγγιση στη διδασκαλία της αγγλικής γλώσσας και να υιοθετήσουν μια προσέγγιση που θέτει στο επίκεντρο τους μαθητές τους, τα ενδιαφέροντα, τα μαθησιακά τους στυλ και τις ανάγκες τους και αξιοποιεί τις νέες τεχνολογίες.

Στη συζήτηση αυτή αποφεύγουμε «μηχανιστικές» προσεγγίσεις από την ελληνική και την ξενόγλωσση βιβλιογραφία που εστιάζονται σε «ρόλους» του εκπαιδευτικού, επειδή μια τέτοια «ανελαστική» θεώρηση δεν συνάδει με τον χαρακτήρα της διαφοροποιημένης διδασκαλίας, η οποία είναι μεν μια οργανωμένη και συστηματική διαδικασία, αλλά δεν μπορεί να βάλει τον εκπαιδευτικό σε συγκεκριμένα «καλούπια». Κατά συνέπεια, στη συγκεκριμένη εργασία, η έννοια της φράσης «ρόλος» του εκπαιδευτικού αναφέρεται στα χαρακτηριστικά που είναι χρήσιμο να έχουν οι εκπαιδευτικοί που επιχειρούν να εφαρμόσουν στην πράξη τα πορίσματα ερευνών σχετικά με τη διαφοροποιημένη διδασκαλία και την αξιοποίηση των νέων τεχνολογιών.

Επειδή η εφαρμογή της διαφοροποιημένης διδασκαλία προϋποθέτει την αποδοχή μιας γενικότερης φιλοσοφίας προσέγγισης της μαθησιακής διαδικασίας, οι εκπαιδευτικοί χρειάζεται να αποδέχονται αυτή τη φιλοσοφία και τον τρόπο σκέψης για τη διδακτική πράξη, να είναι πρόθυμοι να κινηθούν έξω από τη «ζώνη άνεσής» τους και να δοκιμάσουν νέες ιδέες και πρακτικές. Είναι σημαντικό να απομακρυνθούν από την αντίληψη που έχουν για τους εαυτούς τους ως αυτοί που διαθέτουν και μοιράζουν τη γνώση και να κινηθούν προς μια θεώρηση του ρόλου τους που βρίσκεται εγγύτερα σε αυτό του «ενορχηστρωτή μαθησιακών ευκαιριών», αναλαμβάνοντας τον ρόλο του μέντορα. Επίσης, είναι απαραίτητο να παρακολουθούν και να παρατηρούν συστηματικά τους μαθητές τους κατά τη διάρκεια της ατομικής ή της ομαδικής τους εργασίας, να διαπιστώνουν τις δυσκολίες των μαθητών από πρώτο χέρι τη στιγμή που παρουσιάζονται και να παρέχουν υποστήριξη. Τέλος, με στόχο την επαγγελματική τους ανάπτυξη, είναι απαραίτητη η γνώση των θεωρητικών αρχών της διαφοροποιημένης διδασκαλίας, καθώς η γνώση αυτή θα τους βοηθήσει να εντοπίσουν τα χαρακτηριστικά που χρειάζεται να έχουν οι εκπαιδευτικοί που επιχειρούν να εφαρμόσουν τη διαφοροποίηση στη διδασκαλία μέσω των νέων τεχνολογιών σε πρακτικό επίπεδο. Παράλληλα, η αναστοχαστική και κριτική μελέτη της βασικής βιβλιογραφίας θα τους ενισχύσει στην προσπάθειά τους να εφαρμόσουν στο ελληνικό σχολείο τα πορίσματα ερευνών που έχουν πραγματοποιηθεί σε διαφορετικά εκπαιδευτικά συστήματα με τα δικά τους χαρακτηριστικά και ιδιαιτερότητες.

Λέξεις – κλειδιά: διαφοροποιημένη διδασκαλία, νέες τεχνολογίες, ρόλος εκπαιδευτικών

ΕΙΣΑΓΩΓΗ

Η εργασία αυτή εστιάζει στον ρόλο και στα χαρακτηριστικά που είναι χρήσιμο να έχουν οι εκπαιδευτικοί που επιχειρούν να εφαρμόσουν στην πράξη τη διαφοροποιημένη διδασκαλία στη διδασκαλία της αγγλικής γλώσσας, αξιοποιώντας παράλληλα με παιδαγωγικά κατάλληλο τρόπο τις νέες τεχνολογίες. Βασίζεται στην παραδοχή ότι οι εκπαιδευτικοί αποτελούν κεντρικό και καθοριστικό παράγοντα στην επιτυχή εφαρμογή της διαφοροποιημένης διδασκαλίας και ότι ο ρόλος του έχει καίρια σημασία (Sakellariou & Mitsi, 2018). Η εργασία ακολουθεί την παρακάτω διάρθρωση. Στην αρχή περιγράφονται οι λόγοι για τους οποίους η διαφοροποιημένη διδασκαλία αποτελεί έναν αποτελεσματικό και καινοτόμο τρόπο οργάνωσης της εκπαιδευτικής πράξης. Ακολουθεί η συνοπτική περιγραφή και ανάλυση των χαρακτηριστικών της. Με βάση την συζήτηση αυτή, η εργασία επικεντρώνεται στον ρόλο των εκπαιδευτικών, εξετάζοντας τις ενέργειες τις οποίες χρειάζεται να κάνουν, αλλά και τη γενικότερη συμπεριφορά τους έτσι ώστε η διαφοροποίηση της διδασκαλίας να συμβάλλει με θετικό τρόπο στην προσπάθεια αναβάθμισης της διδασκαλίας.

Η ΑΝΑΓΚΗ ΓΙΑ ΤΗ ΔΙΑΦΟΡΟΠΟΙΗΣΗ ΤΗΣ ΔΙΔΑΣΚΑΛΙΑΣ

Το σύγχρονο σχολείο βρίσκεται αντιμέτωπο με μια σειρά από προκλήσεις. Συχνά επισημαίνεται, τόσο από εκπαιδευτικούς όσο κι από μελετητές της εκπαίδευσης, ότι το σχολείο με τον τρόπο που λειτουργεί σήμερα δεν παράγει υψηλά ακαδημαϊκά αποτελέσματα για όλους τους μαθητές. Δυσκολεύεται να ανταποκριθεί στις ανάγκες και τις απαιτήσεις της σύγχρονης ψηφιακής κοινωνίας και να ενσωματώσει συστηματικά τις νέες τεχνολογίες στη διδασκαλία, ενώ παράλληλα συχνά δεν καταφέρνει να εμπλέξει με ενεργητικό τρόπο τους μαθητές στη μαθησιακή διαδικασία.

Αυτό αποδίδεται σε μεγάλο βαθμό στο γεγονός ότι δεν είναι ελκυστικό σε μια μεγάλη κατηγορία μαθητών. Το σχολείο συχνά φαίνεται ότι συνεχίζει να εδράζεται σε παρωχημένες παραδοσιακές μεθόδους μετωπικής διδασκαλίας, αδυνατώντας να ενσωματώσει δημιουργικά και να αξιοποιήσει πλήρως καινοτόμες και μαθητοκεντρικές εκπαιδευτικές μεθόδους. Ωστόσο, ερευνητικά δεδομένα δείχνουν ότι η παραδοσιακή μετωπική προσέγγιση της διδασκαλίας που προορίζεται για τον «μέσο μαθητή» δεν είναι αποτελεσματική, καθώς ευνοεί την παθητικότητα, δεν καλύπτει τις ανάγκες ενός σημαντικού αριθμού μαθητών και δεν παρέχει ευκαιρίες για μάθηση (Valiandes and Neophytou, 2017b). Ως εκ τούτου, η μαθησιακή διαδικασία χρειάζεται να εμπλουτιστεί με μεθόδους διδασκαλίας οι οποίες προτάσσουν τη συμπερίληψη, αξιοποιώντας βιωματικές πρακτικές, τη συνεργατική και τη διερευνητική μάθηση, λαμβάνοντας υπόψη τα ενδιαφέροντα και τα ιδιαίτερα χαρακτηριστικά των μαθητών με απώτερο στόχο τη σχολική επιτυχία για όλους τους μαθητές.

Η διαφοροποιημένη διδασκαλία μπορεί, εφόσον χρησιμοποιηθεί συστηματικά και μεθοδικά, να αποτελέσει μια τεκμηριωμένη και αποτελεσματική απάντηση στο ανωτέρω ζήτημα. Η διαφοροποιημένη διδασκαλία βασίζεται στις αρχές του οικοδομισμού (Valiandes and Neophytou, 2017a) και στην υπόθεση ότι η διδακτική πράξη χρειάζεται να διαφοροποιείται και να προσαρμόζεται ανάλογα με τις εμπειρίες, τις ανάγκες, τη διαφορετικότητα του μαθητικού πληθυσμού και τα ιδιαίτερα χαρακτηριστικά της κάθε τάξης. Κατά συνέπεια, στο πλαίσιο της διαφοροποίησης, οι εκπαιδευτικοί, σχεδιάζουν μεθοδικά και διεξάγουν τη διδασκαλία των μαθημάτων τους με γνώμονα το γεγονός ότι οι μαθητές δεν αποτελούν ένα ομοιογενές σύνολο, αλλά διαφορετικές προσωπικότητες που έχουν διαφορετικές δεξιότητες, ικανότητες, ενδιαφέροντα, μαθησιακά στυλ, κίνητρα, ανάγκες και ταχύτητα μάθησης (Dodge, 2005). Λαμβάνοντας υπόψη τα προαναφερθέντα, οι εκπαιδευτικοί με προγραμματισμένες και σκόπιμες ενέργειες προσαρμόζουν παραμέτρους της μαθησιακής διαδικασίας, όπως τις διδακτικές μεθόδους, τους διαθέσιμους πόρους, τις πηγές πληροφόρησης, το περιεχόμενο, τις δραστηριότητες και τις απαιτήσεις των εργασιών που υποβάλλουν οι μαθητές, προκειμένου να αποδείξουν την κατανόηση και τις δεξιότητες που έχουν αναπτύξει. Οι παράμετροι που διαφοροποιούνται στο πλαίσιο της διαφοροποιημένης διδασκαλίας είναι: (α) το περιβάλλον της μάθησης, (β) το περιεχόμενο και τη διαδικασία της μάθησης, (γ) και το αποτέλεσμα της μάθησης (Tomlinson, 2001).

Στο σημείο αυτό χρειάζεται να επισημανθούν δύο χαρακτηριστικά της διαφοροποιημένης διδασκαλίας, επειδή συχνά αποτελούν πεδίο παρανοήσεων. Πρώτον, χρειάζεται να υπογραμμιστεί ότι ο στόχος της διαφοροποιημένης διδασκαλίας δεν είναι αποκλειστικά να υποστηρίξει τους μαθητές με λιγότερες γνώσεις και χαμηλότερες επιδόσεις, αλλά να ωφελήσει όλους τους μαθητές. Οι σύγχρονες θεωρίες μάθησης αναγνωρίζουν την ανάγκη για μια συμπεριληπτική εκπαιδευτική διαδικασία η οποία θα σέβεται και θα λαμβάνει υπόψη της τη διαφορετικότητα των μαθητών, σε ένα πλαίσιο διαφοροποιημένης διδασκαλίας που χρησιμοποιεί συστηματικά σχεδιασμένες πρακτικές, οι οποίες δίνουν στους εκπαιδευτικούς τη δυνατότητα να ανταποκριθούν στις ανάγκες όλων των μαθητών σε ετερογενείς τάξεις, επιτρέποντάς τους με τον τρόπο αυτό να έχουν τα μέγιστα μαθησιακά αποτελέσματα (Pozas et al., 2021).

Δεύτερον, η διαφοροποιημένη διδασκαλία δεν είναι απλά μια μέθοδος με προκαθορισμένες «λύσεις» που μπορούν να ακολουθήσουν οι εκπαιδευτικοί και οι οποίες είναι «υποχρεωτικά» επιτυχημένες. Η διαφοροποιημένη διδασκαλία συνιστά μια ολοκληρωμένη θεωρία και φιλοσοφία που διαπερνά όλα τα στάδια της μαθησιακής διαδικασίας· από τον προσδιορισμό του προβλήματος (π.χ. η διδασκαλία δεν είναι αποτελεσματική και χρειάζεται επαναξιολόγηση ή/και προσαρμογές/αλλαγές), ως τον σχεδιασμό, την υλοποίηση και την αξιολόγηση της διδακτικής πράξης και της ανατροφοδότησής της με τα αποτελέσματα της διαδικασίας που προηγήθηκε. Αποτελεί μια πειστική και ουσιαστική θεωρία που έχει συγκεκριμένη εφαρμογή στη σχολική τάξη, επειδή η διαφοροποίηση στη διδασκαλία στηρίζεται σε ένα γερό θεωρητικό υπόβαθρο και όγκο ερευνών, που διερευνούν τη διαφορετικότητα των μαθητών και τις μοναδικές ανάγκες τους. Μετουσιώνοντας την εκπαιδευτική θεωρία σε εκπαιδευτική πράξη, η διαφοροποιημένη διδασκαλία συνεπάγεται την εφαρμογή διδακτικών πρακτικών εντός της τάξης, οι οποίες δεν είναι τυχαίες ή αυθόρμητες, αλλά συστηματικές και προγραμματισμένες. Αυτές οι πρακτικές περιλαμβάνουν, όπως έχει αναφερθεί παραπάνω, την προσαρμογή κρίσιμων παραμέτρων, όπως το περιβάλλον της μάθησης, του περιεχομένου, της διαδικασίας μάθησης και του αποτελέσματος της διδασκαλίας (Tomlinson & Imbeau, 2010) προκειμένου να εξασφαλιστεί ότι όλοι οι μαθητές έχουν τη δυνατότητα για ενεργή, κι όχι παθητική, συμμετοχή και εμπλοκή στις μαθησιακές δραστηριότητες, και συνεπώς, μπορούν να ωφεληθούν από τη μαθησιακή διαδικασία.

Στην εργασία μας αυτή, με βάση την ανασκόπηση της βιβλιογραφίας, αλλά και την εμπειρία μας, υποστηρίζουμε ότι η διαφοροποιημένη διδασκαλία εντάσσεται στο ευρύτερο πλαίσιο καινοτόμων διδακτικών πρακτικών. Οι καινοτόμες διδακτικές πρακτικές αποτελούν προσεγγίσεις που αποσκοπούν στην ενίσχυση της ενεργής και ουσιαστικής μαθητικής συμμετοχής, προωθούν συστηματικά την κριτική και τη δημιουργική σκέψη, έχουν τη δυνατότητα να προσαρμοστούν στις ανάγκες και εμπειρίες των μαθητών και, εν τέλει, δημιουργούν ευνοϊκές συνθήκες για μάθηση και πρόοδο για όλους τους μαθητές. Οι μέθοδοι αυτές συχνά αξιοποιούν δημιουργικά τις Τεχνολογίες της Πληροφορίας και της Επικοινωνίας (Τ.Π.Ε.)., την ομαδοσυνεργατικότητα και μαθητοκεντρικές μεθόδους διδασκαλίας, όπως η ανακαλυπτική και η διερευνητική μάθηση και η διδασκαλία με την αξιοποίηση ερευνητικών εργασιών (projects). Διακρίνονται από τις παραδοσιακές και συντηρητικές μεθόδους διδασκαλίας, οι οποίες συχνά είναι δασκαλοκεντρικές και χρησιμοποιούν ομοιόμορφες μορφές μάθησης, παραγνωρίζοντας την ατομικότητα των μαθητών. Συνεπώς, δεν ενεργοποιούν τα μαθησιακά κίνητρα, αλλά ενισχύουν την αποστασιοποίηση από τη διδασκαλία και την παθητικότητα.

Στο πλαίσιο του παραπάνω προβληματισμού, στην εργασία αυτή εξετάζουμε τον ρόλο των εκπαιδευτικών στη διαφοροποιημένη διδασκαλία, δηλαδή, τον τρόπο με τον οποίο θα πρέπει να σκέφτονται και να ενεργούν πριν, κατά τη διάρκεια, αλλά και μετά από την πραγματοποίηση της διδασκαλίας, όταν αναστοχάζονται και «αφουγκράζονται» την τάξη και τη διδασκαλία έτσι ώστε να συμβάλλουν στην επιτυχή της εφαρμογή. Περιγράφουμε τα χαρακτηριστικά που χρειάζεται να έχουν οι εκπαιδευτικοί που επιθυμούν να εγκαταλείψουν την παραδοσιακή δασκαλοκεντρική προσέγγιση στη διδασκαλία της αγγλικής γλώσσας και να υιοθετήσουν μια προσέγγιση που θέτει στο επίκεντρο τους μαθητές τους, τα ενδιαφέροντα, τα μαθησιακά τους στυλ και τις ανάγκες τους και αξιοποιεί τις νέες τεχνολογίες.

Στη συζήτηση αυτή, όπως έχουμε ήδη αναφέρει, αποφεύγουμε τυποποιημένες προσεγγίσεις από την ελληνική και την ξενόγλωσση βιβλιογραφία που εστιάζονται σε «ρόλους» του εκπαιδευτικού, επειδή μια τέτοια «ανελαστική» θεώρηση δεν συνάδει με τον χαρακτήρα της διαφοροποιημένης διδασκαλίας, η οποία είναι μεν μια οργανωμένη και συστηματική διαδικασία, αλλά δεν μπορεί να περιορίσει τους εκπαιδευτικούς σε προκαθορισμένα και άκαμπτα (και, συνεπώς, μη δημιουργικά) πλαίσια. Επομένως, στη συγκεκριμένη εργασία, η έννοια της φράσης «ρόλος» του εκπαιδευτικού αναφέρεται στα χαρακτηριστικά που είναι χρήσιμο να έχουν οι εκπαιδευτικοί που επιχειρούν να εφαρμόσουν στην πράξη τα πορίσματα ερευνών σχετικά με τη διαφοροποιημένη διδασκαλία και την αξιοποίηση των νέων τεχνολογιών.

Ο ΡΟΛΟΣ ΤΩΝ ΕΚΠΑΙΔΕΥΤΙΚΩΝ ΣΤΗ ΔΙΑΦΟΡΟΠΟΙΗΜΕΝΗ ΔΙΔΑΣΚΑΛΙΑ

Η μαθησιακή διαδικασία που ενσωματώνει τη διαφοροποίηση στη διδασκαλία, και η οποία επιδιώκει να αξιοποιήσει με παιδαγωγικά ορθούς τρόπους τις θεωρητικές παραδοχές του οικοδομισμού, που υποστηρίζει ότι η μάθηση αποτελεί μια ενεργή διαδικασία οικοδόμησης της γνώσης (von Glasersfeld, 1996), και τις νέες τεχνολογίες, απαιτεί από τους εκπαιδευτικούς να αποστασιοποιηθούν από το παραδοσιακό και συντηρητικό δασκαλοκεντρικό μοντέλο διδασκαλίας, το οποίο συχνά χαρακτηρίζεται και από μια επιφυλακτική στάση έναντι στην καινοτομία στη διδασκαλία και την εκπαίδευση γενικότερα.

Στο τμήμα αυτό της εργασίας περιγράφουμε τα χαρακτηριστικά που χρειάζεται να έχουν οι εκπαιδευτικοί που επιθυμούν να εγκαταλείψουν την παραδοσιακή δασκαλοκεντρική προσέγγιση και επιδιώκουν να οργανώσουν τη διδακτική πράξη με επίκεντρο τους μαθητές τους, τα ενδιαφέροντα, τα μαθησιακά τους στυλ και τις ανάγκες τους, αξιοποιώντας ταυτόχρονα και τις νέες τεχνολογίες. Φυσικά, δεν επιχειρείται ο προσδιορισμός και η περιγραφή όλων των

επιθυμητών χαρακτηριστικών των εκπαιδευτικών. Παρουσιάζονται, ωστόσο, οι θεμελιώδεις αρχές και τα βασικά χαρακτηριστικά των εκπαιδευτικών στη διαφοροποιημένη διδασκαλία. Από τη συζήτηση αυτή, οι αναγνώστες μπορούν να συνάγουν τα γνωρίσματα τα οποία διακρίνουν τους εκπαιδευτικούς που εφαρμόζουν αποτελεσματικά τη διαφοροποίηση στη διδασκαλία, αλλά κι εκείνα τα οποία αποτελούν τροχοπέδη στην ολοκληρωμένη και αποτελεσματική της εφαρμογή.

ΑΞΙΟΠΟΙΗΣΗ ΔΙΑΦΟΡΕΤΙΚΩΝ ΚΑΙ ΕΥΕΛΙΚΤΩΝ ΟΜΑΔΟΠΟΙΗΣΕΩΝ

Η διαφοροποιημένη διδασκαλία αποτελεί μια ευέλικτη φιλοσοφία διδασκαλίας, που αξιοποιεί διαφορετικές μεθόδους, τεχνικές και ομαδοποιήσεις μαθητών (Gheyssens et al., 2022; Tomlinson, 2017). Για παράδειγμα, οι εκπαιδευτικοί αξιοποιούν, ανάλογα με την ιδιαιτερότητα κάθε τάξης, την ατομική εργασία, την εργασία σε ζευγάρια και την εργασία σε επίπεδο τάξης (ολομέλεια). Επειδή η εργασία σε επίπεδο τάξης έχει ταυτιστεί με την παραδοσιακή «μετωπική», δασκαλοκεντρική διδασκαλία, αυτό δεν σημαίνει ότι η διδασκαλία που σχεδιάζεται και υλοποιείται με βάση τη διαφοροποιημένη διδασκαλία απορρίπτει a priori την εργασία σε επίπεδο τάξης.

Για παράδειγμα, στη διδασκαλία της αγγλικής γλώσσας, σε ένα μάθημα που έχει ως στόχο την ανάπτυξη της δεξιότητας παραγωγής προφορικού λόγου, της κριτικής σκέψης, της συνεργασίας και της αποδοχής διαφορετικών απόψεων, οι μαθητές συμμετέχουν σε μια συζήτηση με θέμα: "Πρέπει οι έφηβοι να χρησιμοποιούν τα κοινωνικά δίκτυα;" Οι εκπαιδευτικοί που επιθυμούν να χρησιμοποιήσουν διαφορετικές και ευέλικτες ομαδοποιήσεις, που «ρέουν» με φυσικό τρόπο από τον σχεδιασμό της ανωτέρω μαθησιακής δραστηριότητας, έχουν τη δυνατότητα να χωρίζουν την τάξη σε δύο ομάδες: μία υπέρ της χρήσης κοινωνικών δικτύων από τους εφήβους και μία κατά. Σε επίπεδο ατομικής εργασίας, οι μαθητές λαμβάνουν κάρτες με σημειώσεις (note cards) και γράφουν 2-3 βασικά επιχειρήματα που υποστηρίζουν τη θέση τους. Η διαφοροποίηση στο στάδιο αυτό μπορεί να αφορά την χρήση λεξικών για κάποιους μαθητές και την παροχή λεξιλογίου ή εκφράσεων για να τους βοηθήσει να γράψουν τις απόψεις τους. Οι πιο προχωρημένοι μαθητές μπορούν να γράψουν μια μικρή παράγραφο με παραδείγματα και αιτιολόγηση των απόψεών τους. Στη συνέχεια, οι μαθητές εργάζονται σε ζευγάρια. Συζητούν τα επιχειρήματά τους και παρουσιάζουν (π.χ. σε δύο λεπτά) τις ιδέες τους στον συμμαθητή τους, ενώ στη συνέχεια αλλάξουν ρόλους. Η ομαδική εργασία πραγματοποιείται ενώνοντας τα ζευγάρια για να σχηματιστούν μικρές ομάδες των τεσσάρων μαθητών. Στις ομάδες αυτές, οι μαθητές επεξεργάζονται τα επιχειρήματά τους, επιλέγοντας τα ισχυρότερα και πιο πειστικά. Σε επίπεδο τάξης, διεξάγεται η συζήτηση, ανάμεσα στις δύο μεγαλύτερες ομάδες (υπέρ και κατά της χρήσης των κοινωνικών δικτύων από τους εφήβους).

Δραστηριότητες σαν και αυτή που περιγράφεται παραπάνω, στην οποία οι μαθητές εκφράζουν ελεύθερα τις απόψεις τους, προϋποθέτουν ένα υποστηρικτικό, φιλικό και μη ανταγωνιστικό περιβάλλον μάθησης, τα βασικά χαρακτηριστικά του οποίου περιγράφονται στην επόμενη ενότητα.

ΔΙΑΦΟΡΟΠΟΙΗΣΗ ΤΟΥ ΠΕΡΙΒΑΛΛΟΝΤΟΣ ΜΑΘΗΣΗΣ

Η διαφοροποίηση του περιβάλλοντος της μάθησης έχει ως συνιστώσες το φυσικό περιβάλλον της τάξης, αλλά και τις σχέσεις ανάμεσα στους μαθητές και ανάμεσα στους μαθητές και τους εκπαιδευτικούς. Αναφέρεται, δηλαδή, τόσο στον χώρο όσο και στις σχέσεις που διαμορφώνονται μέσα στη σχολική τάξη και αφορά τη διαφοροποίηση ως προς το κλίμα και την οργάνωση της τάξης.

Οι εκπαιδευτικοί χρειάζεται να δημιουργούν ένα υποστηρικτικό περιβάλλον μάθησης, το οποίο ευνοεί την παροχή υψηλού επιπέδου εκπαίδευσης (Mills et al., 2014). Η διαφοροποιημένη διδασκαλία αποσκοπεί στη δημιουργία μιας σχολικής τάξης στην οποία οι μαθητές αισθάνονται άνετα και στην οποία οι διαφορές δεν αντιμετωπίζονται ως «αναγκαία κακά», αλλά ως ευκαιρίες για εμπλουτισμό της διδακτικής πράξης. Η βέλτιστη αξιοποίηση της διαφοροποιημένης διδασκαλίας επιτυγχάνεται μέσω ενός υποστηρικτικού περιβάλλοντος μάθησης στο οποίο οι μαθητές έχουν την αίσθηση της ασφάλειας και του σεβασμού.

Στο πλαίσιο αυτό, ο στόχος του εκπαιδευτικού σε ένα εκπαιδευτικό σύστημα που επιδιώκει να εφαρμόσει τη διαφοροποιημένη διδασκαλία είναι η δημιουργία ενός φιλικού σχολικού κλίματος μέσα στην τάξη, που μειώνει το σχολικό άγχος των μαθητών. Το σχολικό άγχος αποτελεί έναν παράγοντα ο οποίος στη σχετική βιβλιογραφία έχει συνδεθεί με χαμηλές επιδόσεις, ιδιαίτερα αναφορικά με την επίδοση στην ξένη γλώσσα (Horwitz, 2001). Οι μαθητές που βιώνουν μαθησιακό άγχος δεν συμμετέχουν ενεργητικά στη μαθησιακή διαδικασία και στις εκπαιδευτικές δραστηριότητες, κυρίως επειδή φοβούνται ότι τα λάθη που θα κάνουν στη χρήση της ξένης γλώσσας θα αποτελέσουν αντικείμενο αρνητικής αξιολόγησης από τους εκπαιδευτικούς και τους συμμαθητές τους. Κατά συνέπεια, επιλέγουν την παθητική συμμετοχή και δεν εμπλέκονται με ενεργό και δημιουργικό τρόπο στη μαθησιακή διαδικασία.

Από τα παραπάνω συνάγεται ότι είναι σημαντικό οι εκπαιδευτικοί να δημιουργούν στην τάξη, και ιδιαίτερα στην ξενόγλωσση τάξη όπου είναι φυσικό οι μαθητές να κάνουν αρκετά λάθη, μια ατμόσφαιρα στην οποία, όπως έχει προαναφερθεί, τα λάθη στη χρήση της ξένης γλώσσας δεν αποτελούν αντικείμενο κριτικής, αλλά μια φυσιολογική διαδικασία κατά την εκμάθηση της ξένης γλώσσας και μια ευκαιρία για μάθηση (Dörnyei, 2001). Επιπλέον, να μην διορθώνουν άμεσα όλα τα λάθη των μαθητών στη χρήση της ξένης γλώσσας, καθώς αυτό υπονομεύει την αυτοπεποίθησή τους και τους αποτρέπει από το να συμμετέχουν στις μαθησιακές δραστηριότητες. Οι εκπαιδευτικοί χρειάζεται, επίσης, να παρέχουν σχόλια προς τους μαθητές σχετικά με την επίδοσή τους εστιάζοντας στα θετικά σημεία και την προσπάθεια που καταβάλλουν, αποφεύγοντας τις συγκρίσεις και αρνητικές αξιολογήσεις.

Η στάση των εκπαιδευτικών έναντι στην αξιολόγηση στη διαφοροποιημένη διδασκαλία εξετάζεται συνοπτικά στην ενότητα που ακολουθεί.

ΑΞΙΟΠΟΙΗΣΗ ΤΗΣ ΕΝΑΛΛΑΚΤΙΚΗΣ ΑΞΙΟΛΟΓΗΣΗΣ

Ένα κρίσιμο χαρακτηριστικό της διαφοροποιημένης διδασκαλίας αποτελεί το γεγονός ότι οι εκπαιδευτικοί οφείλουν να χρησιμοποιούν συνδυαστικά τόσο τις παραδοσιακές μορφές αξιολόγησης (αρχική/διαγνωστική, διαμορφωτική, τελική ή αθροιστική) όσο και εναλλακτικές μορφές αξιολόγησης. Οι διάφορες αυτές μορφές αξιολόγησης που χρησιμοποιούνται στη διαφοροποιημένη διδασκαλία είναι αναγκαίο να έχουν τα ακόλουθα χαρακτηριστικά: (α) να αποτελούν μια διαρκή διαδικασία και είναι στενά συνδεδεμένες η μια με την άλλη, (β) να υιοθετούν μια μαθητοκεντρική, κι όχι μια ανταγωνιστική προσέγγιση, η οποία να θέτει ως απώτερο στόχο την αξιολόγηση της πορείας της διδασκαλίας και τον έλεγχο επίτευξης των μαθησιακών στόχων που έχουν τεθεί για κάθε έναν μαθητή ξεχωριστά. Συνεπώς, η αξιολόγηση στη διαφοροποιημένη διδασκαλία δεν αποτελεί έναν μηχανισμό που τιμωρεί τους μαθητές για τυχόν αποτυχία επίτευξης συγκεκριμένων μαθησιακών στόχων, αλλά ένα μέσο ανατροφοδότησης που επισημαίνει στους μαθητές τα θετικά σημεία της προσπάθειάς τους, αλλά και τα βήματα που χρειάζεται να ακολουθήσουν για να αναπτύξουν τις δεξιότητές τους και να επιτύχουν τους μαθησιακούς στόχους. Επίσης, η αξιολόγηση είναι πιο αποτελεσματική όταν αποτελεί ένα εργαλείο που δείχνει τον βαθμό επίτευξης των μαθησιακών στόχων και παρέχει πληροφορίες αναφορικά με τους παράγοντες που χρειάζεται να τροποποιηθούν στη διδασκαλία, προκειμένου οι εκπαιδευτικοί να παρέχουν στους μαθητές την ευκαιρία να κατακτήσουν τη γνώση και τους μαθησιακούς στόχους.

Μορφές εναλλακτικής αξιολόγησης που χρησιμοποιούνται συχνά στην ξενόγλωσση εκπαίδευση είναι οι ακόλουθες (Valiandes and Neophytou, 2017a): αξιολόγηση με βάση ατομική ή ομαδική ερευνητική εργασία (project), αξιολόγηση με βάση τον φάκελο του μαθητή/φάκελος επιτευγμάτων του μαθητή (portfolio), ημερολόγιο μάθησης (learning log), και με βάση την αυτοαξιολόγηση ή/και ετεροαξιολόγηση.

Οι παραπάνω μορφές εναλλακτικής αξιολόγησης δεν εστιάζουν αποκλειστικά σε ποσοτικά χαρακτηριστικά (π.χ. βαθμός), αλλά και σε ποιοτικά χαρακτηριστικά της επίδοσης των μαθητών. Δηλαδή, οι εναλλακτικές μορφές αξιολόγησης δεν έχουν ως επίκεντρο τη βαθμολογία, αλλά την περιγραφή της πορείας του μαθητή προς τους μαθησιακούς στόχους που έχουν τεθεί, λαμβάνοντας υπόψη τα ιδιαίτερα χαρακτηριστικά του κάθε μαθητή και την πρόοδο που έχει δείξει. Είναι, επίσης, περιγραφικές, επειδή ενδιαφέρονται: (α) να περιγράψουν τη διαφορά ανάμεσα στο τρέχον επίπεδο γνώσεων των μαθητών και το επιθυμητό (τους μαθησιακούς στόχους), (β) να περιγράψουν και άλλους τομείς, εκτός από τη βαθμολογία (π.χ. τις συνεργατικές, επικοινωνιακές δεξιότητες των μαθητών, τα μαθησιακά κίνητρα, κλπ.), γεγονός που σημαίνει ότι καλύπτει πτυχές της δραστηριότητας των μαθητών μέσα στη σχολική τάξη αλλά και την ευρύτερη σχολική κοινότητα οι οποίες δεν λαμβάνονται υπόψη στην παραδοσιακή/συμβατική αξιολόγηση, και (γ) να συλλέξουν πληροφορίες από τρεις αλληλοσυνδεόμενους «παράγοντες» της μαθησιακής διαδικασίας: τους μαθητές, τους γονείς και τους ίδιους τους εκπαιδευτικούς.

ΑΠΟΔΟΧΗ ΤΗΣ ΦΙΛΟΣΟΦΙΑΣ ΤΗΣ ΔΙΑΦΟΡΟΠΟΙΗΜΕΝΗΣ ΔΙΔΑΣΚΑΛΙΑΣ

Η αποτελεσματική και μεθοδική εφαρμογή της διαφοροποιημένης διδασκαλίας έχει ως προϋπόθεση την αποδοχή μιας γενικότερης φιλοσοφίας για τη διδασκαλία και έναν τρόπο σκέψης για τη διδακτική πράξη με βάση τον σεβασμό για τους μαθητές, την αναγνώριση των διαφορών τους και τη θέληση για υποστήριξη έτσι ώστε να ωφεληθούν όλοι οι μαθητές (Smale-Jacobse, et al., 2019). Κατά συνέπεια, οι εκπαιδευτικοί που επιθυμούν να την εφαρμόσουν χρειάζεται να επιδεικνύουν διάθεση να κινηθούν έξω από τη «ζώνη άνεσής» τους, ενσωματώνοντας στη διδασκαλία νέες ιδέες και πρακτικές. Είναι σημαντικό, στο πλαίσιο του οικοδομισμού, να απομακρυνθούν από την αντίληψη που έχουν για τους εαυτούς τους ως αυτοί που διαθέτουν και μοιράζουν τη γνώση (Schcolnik et al. 2006) και να κινηθούν προς μια θεώρηση του ρόλου τους που βρίσκεται εγγύτερα σε αυτό του «ενορχηστρωτή μαθησιακών ευκαιριών» και του μέντορα. Επίσης, είναι χρήσιμο να παρακολουθούν και να παρατηρούν συστηματικά τους μαθητές τους κατά τη διάρκεια της

ατομικής ή της ομαδικής τους εργασίας, να διαπιστώνουν τις δυσκολίες που αντιμετωπίζουν, τη στιγμή που αυτές παρουσιάζονται, έτσι ώστε να παρέχουν υποστήριξη και την κατάλληλη ανατροφοδότηση.

Τέλος, με στόχο την επαγγελματική τους ανάπτυξη, είναι απαραίτητη η γνώση των θεωρητικών αρχών της διαφοροποιημένης διδασκαλίας, καθώς η γνώση αυτή θα τους βοηθήσει να εντοπίσουν τα χαρακτηριστικά που χρειάζεται να έχουν οι εκπαιδευτικοί που επιχειρούν να εφαρμόσουν την διαφοροποίηση στη διδασκαλία σε πρακτικό επίπεδο. Παράλληλα, η αναστοχαστική και κριτική μελέτη της βασικής βιβλιογραφίας θα τους ενισχύσει στην προσπάθειά τους να εφαρμόσουν στο ελληνικό σχολείο τα πορίσματα ερευνών που έχουν πραγματοποιηθεί σε διαφορετικά εκπαιδευτικά συστήματα που έχουν τα δικά τους χαρακτηριστικά και ιδιαιτερότητες.

ΤΕΧΝΟΛΟΓΙΕΣ ΤΗΣ ΠΛΗΡΟΦΟΡΙΑΣ ΚΑΙ ΤΗΣ ΕΠΙΚΟΙΝΩΝΙΑΣ

Η συμβολή των Τεχνολογιών της Πληροφορίας και της Επικοινωνίας (Τ.Π.Ε.) στην εφαρμογή της διαφοροποιημένης διδασκαλίας είναι καίριας σημασίας, καθώς οι νέες τεχνολογίες έχουν τη δυνατότητα να υποστηρίξουν τη σύζευξη των θεωρητικών αρχών της διαφοροποιημένης διδασκαλίας με την πρακτική της εφαρμογή στη σχολική τάξη. Η διαφοροποιημένη διδασκαλία αξιοποιεί παιδαγωγικά τις Τ.Π.Ε. για να μεγιστοποιήσει τα μαθησιακά αποτελέσματα. Αυτό απορρέει από το γεγονός ότι οι νέες τεχνολογίες επιτρέπουν εναλλακτικούς τρόπους παρουσίασης του εκπαιδευτικού υλικού, πολλαπλούς τρόπους αξιοποίησής του και εμπλοκής των μαθητών με αυτό, καθώς επίσης και ποικίλες προσεγγίσεις αναφορικά με τους τρόπους παρουσίασης του αποτελέσματος της μάθησης (Panteliadou, 2013).

Ειδικότερα, και χωρίς το θέμα να εξαντλείται στην παρούσα εργασία, σε σχέση με τη διαφοροποίηση της παρουσίασης του αποτελέσματος της μάθησης, εργαλεία του συμμετοχικού ιστού (Web 2.0), που διευκολύνουν την αλληλεπίδραση, τη συνεργασία και τον διαμοιρασμό περιεχομένου (Diamantis & Bikos, 2022), μπορούν να αξιοποιηθούν για τη συνεργασία των μαθητών στο πλαίσιο της δημιουργίας του τελικού προϊόντος. Επιπλέον, εργαλεία Web 2.0, όπως ιστολόγια (blogs), wikis, podcasts (π.χ. ηχητικές συζητήσεις), εικονικά περιβάλλοντα μάθησης (virtual learning environments), εργαλεία για ψηφιακές παρουσιάσεις και αφηγήσεις (digital storytelling tools), ιστότοποι κοινωνικής δικτύωσης, ψηφιακές αφίσες (digital posters) και διαδικτυακές παρουσιάσεις είναι δυνατό να χρησιμοποιηθούν για να παρουσιάσουν οι μαθητές με δημιουργικό τρόπο τα αποτελέσματα της μαθησιακής διαδικασίας. Αναφορικά με τη διαφοροποίηση του περιεχομένου, το διαδίκτυο παρέχει μια ευρεία γκάμα υλικού, όπως για παράδειγμα, βίντεο, εικόνες, ηχητικά αρχεία, πολυτροπικά κείμενα (multimodal texts), που δε βασίζονται αποκλειστικά στον γραπτό λόγο για τη μετάδοση του μηνύματος, κείμενα με υπερσυνδέσμους (hyperlinks), κλπ., τα οποία μπορεί να αξιοποιήσει ο εκπαιδευτικός, ανάλογα με το μαθησιακό στυλ των μαθητών (Karatza, 2019).

Ωστόσο, αυτό που χρειάζεται να επισημανθεί είναι ότι οι εκπαιδευτικοί χρειάζεται να υιοθετούν μια «εκλεκτική» και «αναστοχαστική» προσέγγιση σε σχέση με τη βέλτιστη χρησιμοποίηση των νέων τεχνολογιών. Αυτό έχει ως βασική προϋπόθεση την εξοικείωση των εκπαιδευτικών τόσο με τις δυνατότητες όσο και με τους περιορισμούς των ψηφιακών εργαλείων που είναι διαθέσιμα, έτσι ώστε να είναι σε θέση να επιλέγουν τα κατάλληλα και τα πιο αποδοτικά. Τα κατάλληλα ψηφιακά εργαλεία (π.χ. πλατφόρμες κοινωνικών μέσων, συνεργατικά εργαλεία, το διαδίκτυο) θα τους επιτρέψουν να επιτύχουν τους μαθησιακούς στόχους που έχουν θέσει, χωρίς να αποπροσανατολίζουν ή να μπερδεύουν τους μαθητές.

Για παράδειγμα, στο πλαίσιο της διδασκαλίας της αγγλικής γλώσσας, μια εφαρμογή Web 2.0 με την οποία έχουν τη δυνατότητα να δημιουργήσουν διαδικτυακές παιγνιώδεις δραστηριότητες και κουίζ (π.χ. Kahoot!) μπορεί να είναι χρήσιμη για ατομική ή για εργασία σε ζευγάρια για την εξάσκηση σε λεξιλόγιο ή γραμματική, αλλά όχι ιδιαίτερα κατάλληλη για την εξάσκηση δεξιοτήτων κριτικής και δημιουργικής σκέψης. Επιπλέον, είναι δυνατό να δίνει έμφαση στις γρήγορες απαντήσεις και στον ανταγωνισμό, κάτι το οποίο μπορεί να δημιουργήσει ένα περιβάλλον μάθησης το οποίο είναι ανταγωνιστικό και κατάλληλο για μαθητές με «οπτικό» στυλ μάθησης, αλλά όχι ιδιαίτερα ελκυστικό σε κάποιους μαθητές (π.χ. αυτούς που είναι ακουστικοί ή κιναισθητικοί τύποι). Ένα τέτοιο περιβάλλον μάθησης είναι πιθανό να μην προάγει την διαφοροποίηση στη διδασκαλία και την αποτελεσματική ενσωμάτωση των νέων τεχνολογιών, αλλά αντίθετα μπορεί να προκαλέσει σχολικό άγχος και χαμηλά μαθησιακά κίνητρα. Με βάση το παράδειγμα αυτό, είναι εμφανές ότι οι εκπαιδευτικοί χρειάζεται να λαμβάνουν αποφάσεις σχετικά με την έκταση, το εύρος και τον τρόπο αξιοποίησης των νέων τεχνολογιών, λαμβάνοντας υπόψη τους μαθησιακούς στόχους που έχουν θέσει, τα χαρακτηριστικά των μαθητών τους, και το ευρύτερο πλαίσιο της διδασκαλίας.

ΑΤΟΜΙΚΑ ΧΑΡΑΚΤΗΡΙΣΤΙΚΑ ΤΩΝ ΕΚΠΑΙΔΕΥΤΙΚΩΝ

Εκτός από τα παραπάνω, οι εκπαιδευτικοί που θα επιχειρήσουν να εφαρμόσουν στην πράξη τα πορίσματα ερευνών σχετικά με την αξιοποίηση της διαφοροποιημένης διδασκαλίας θα πρέπει να διαθέτουν και συγκεκριμένα

χαρακτηριστικά. Τα χαρακτηριστικά αυτά (νοοτροπία και τρόπος με τον οποίο αντιμετωπίζουν τη διδασκαλία) είναι απαραίτητα στους εκπαιδευτικούς που επιθυμούν να βγουν από τη ζώνη άνεσής τους, δηλαδή, να εγκαταλείψουν διδακτικές πρακτικές που εφαρμόζουν για χρόνια όταν αυτές δεν είναι αποτελεσματικές, και να υιοθετήσουν καινοτόμες διδακτικές πρακτικές.

Πρώτον, οι εκπαιδευτικοί χρειάζεται να έχουν ευελιξία και ετοιμότητα προκειμένου να επιλέξουν τον κατάλληλο τρόπο για την παρουσίαση του νέου περιεχομένου και να αξιολογήσουν την κατανόηση του νέου υλικού από τους μαθητές για να ανταποκριθούν στα διαφορετικά μαθησιακά στυλ των μαθητών. Η έννοια του μαθησιακού στυλ βασίζεται στην υπόθεση ότι κάθε άνθρωπος έχει ένα διαφορετικό μονοπάτι με το οποίο η νέα πληροφορία γίνεται ευκολότερα αντιληπτή, έναν διαφορετικό δρόμο για να μαθαίνει, δηλαδή «να συλλέγει, να επεξεργάζεται και να οργανώνει τις πληροφορίες» (Platsidou & Zagora, 2006:160). Κάποιοι μαθητές μαθαίνουν κάτι μόνο όταν οι πληροφορίες και το μαθησιακό υλικό παρουσιάζονται οπτικά (οπτικοί τύποι/visual learners), κάποιοι άλλοι μαθητές μαθαίνουν καλύτερα μέσω της ακρόασης (ακουστικοί τύποι/auditory learners), ενώ οι κιναισθητικοί τύποι (kinaesthetic learners) προτιμούν την κίνηση, την αφή, τη μίμηση, το παιχνίδι ρόλων και τη βιωματική εμπειρία. Επιπλέον, κάποιοι μαθητές προτιμούν να προσεγγίζουν το μαθησιακό υλικό σταδιακά, βήμα-βήμα, ενώ κάποιοι υιοθετούν μια συνολικότερη προσέγγιση.

Η συζήτηση αυτή δείχνει ότι οι εκπαιδευτικοί χρειάζεται να εμπλακούν σε μια προσπάθεια κατανόησης των μαθητών τους και να αντιλαμβάνονται ότι η πληροφορία χρειάζεται να παρουσιάζεται με πολλαπλούς τρόπους, έτσι ώστε να απευθυνθούν σε όλους τους μαθητές, οι οποίοι έχουν διαφορετικά μαθησιακά στυλ (Platsidou & Zagora, 2006). Αντίστοιχα, οι εργασίες και οι δραστηριότητες στις οποίες συμμετέχουν οι μαθητές είναι χρήσιμο να λαμβάνουν υπόψη τα διαφορετικά μαθησιακά στυλ των μαθητών. Οι εκπαιδευτικοί θα το επιτύχουν αυτό αξιοποιώντας την επικοινωνία, την παρατήρηση και τη συζήτηση με τους μαθητές προκειμένου να τους γνωρίσουν καλύτερα, να γνωρίσουν τα ενδιαφέροντά τους, τον τρόπο με τον οποίο επιθυμούν να εργάζονται, τις προσδοκίες που έχουν για το μάθημα, το εκπαιδευτικό υλικό, τις δραστηριότητες που τους παρωθούν, κλπ.

Δεύτερον, χρειάζεται υπομονή και επιμονή, επειδή η διαφοροποιημένη διδασκαλία δεν αποφέρει άμεσα θετικά αποτελέσματα. Η επιμονή είναι απαραίτητη, καθώς ερευνητικά ευρήματα δείχνουν ότι παράγοντες όπως το μεγάλο μέγεθος των τάξεων, η έλλειψη κατάλληλου εξοπλισμού και οι χρονικοί περιορισμοί αποτελούν δυσκολίες στην εφαρμογή της διαφοροποιημένης διδασκαλίας (Palaiopanou, 2020).

Τρίτον, χρειάζεται η διάθεση για συνεργασία με τους άλλους εκπαιδευτικούς του σχολείου, με τη διοίκηση και με τους γονείς. Αυτό είναι σημαντικό, επειδή η διαφοροποίηση στη διδασκαλία εφαρμόζεται ευκολότερα και παράγει καλύτερα αποτελέσματα σε ένα σχολείο στο οποίο δεν εφαρμόζεται αποσπασματικά από 1-2 εκπαιδευτικούς, αλλά αποτελεί τη συνήθη εκπαιδευτική μεθοδολογία που έχει ενσωματωθεί και «εγγραφεί» στην κουλτούρα του σχολείου. Η συνεργασία με τους γονείς επιτρέπει στους εκπαιδευτικούς να εξηγήσουν τον τρόπο διδασκαλίας και να αποκτήσουν την υποστήριξη των γονέων, οι οποίοι συχνά έχουν συνηθίσει στη συντηρητική και δασκαλοκεντρική διαδικασία και ενδεχομένως να μην κατανοούν τις προσπάθειες των εκπαιδευτικών να εμπλέξουν ενεργά όλους τους μαθητές σε μια προσέγγιση με την οποία αυτοί δεν είναι εξοικειωμένοι.

ΣΥΜΠΕΡΑΣΜΑ

Η ενσωμάτωση καινοτόμων εκπαιδευτικών πρακτικών στη διδασκαλία παρέχει τη δυνατότητα για αναβάθμιση της ποιότητας της διδασκαλίας και την ενίσχυση όλων των μαθητών στην προσπάθειά τους για την αξιοποίηση των δυνατοτήτων τους και την επίτευξη των μαθησιακών στόχων.

Σε επίπεδο πράξης, για να αποδειχτούν πράγματι ωφέλιμες καινοτόμες εκπαιδευτικές πρακτικές, όπως η διαφοροποιημένη διδασκαλία, χρειάζεται γνώση του θεωρητικού πλαισίου, έτσι ώστε οι εκπαιδευτικοί να μπορούν να μετατρέψουν την εκπαιδευτική θεωρία σε ρεαλιστικές πρακτικές που μπορούν να εφαρμόσουν στη σχολική τάξη. Είναι απαραίτητη, επίσης, μια αλλαγή στον τρόπο με τον οποίο οι εκπαιδευτικοί αντιλαμβάνονται τον ρόλο τους, και ειλικρινή διάθεση για καινοτομία, επειδή τα αποτελέσματα της διαφοροποιημένης διδασκαλίας δεν είναι άμεσα ορατά, αλλά χρειάζονται χρόνο για να γίνουν αντιληπτά.

Με βάση την παραπάνω συζήτηση, στην εργασία αυτή επισημάναμε τις γενικές κατευθύνσεις, τη «φιλοσοφία» η οποία χρειάζεται να διέπει τους εκπαιδευτικούς που επιχειρούν να εφαρμόσουν τη διαφοροποίηση στη διδασκαλία της αγγλικής γλώσσας. Ειδικότερα, οι παραπάνω προτάσεις αναφορικά με τον ρόλο των εκπαιδευτικών στη διαφοροποιημένη διδασκαλία αποτελούν χαρακτηριστικά, αλλά και γνωστικά και πνευματικά εφόδια που χρειάζεται να διαθέτουν οι εκπαιδευτικοί που επιθυμούν να εγκαταλείψουν την παραδοσιακή δασκαλοκεντρική προσέγγιση στη διδασκαλία της

αγγλικής γλώσσας και να υιοθετήσουν μια προσέγγιση που θέτει στο επίκεντρο τους μαθητές τους, τα ενδιαφέροντα, τα μαθησιακά τους στυλ και τις ανάγκες τους.

ΠΕΡΙΛΗΨΗ

Η ανατρεπτική δυναμική των νέων τεχνολογιών αποτελεί πλέον καθημερινό γεγονός που επιδρά τόσο στις επαγγελματικές όσο και στις ακαδημαϊκές επιδιώξεις του ατόμου, από το επίπεδο της πρωτοβάθμιας εκπαίδευσης μέχρι και το ανώτερο επίπεδο γνώσης. Το παρόν πόνημα διερευνά αυτές τις νέες τεχνολογίες που διαφαίνεται να διαταράσσουν σε μεγάλο βαθμό τις ισορροπίες κατάκτησης της επιστημονικής γνώσης, όπως big data analytics (BDA), robotic process automation (RPA), artificial intelligence (AI), Internal of Things (IoT) and distributed ledger technologies (DLT). Αυτή η ανατρεπτική δυναμική διερευνάται από τα στοιχεία ακαδημαϊκών φορέων του τομέα λογιστικής και ελεγκτικής, καθώς οι εν δυνάμει απόφοιτοι εκτίθενται από την έναρξη της επαγγελματικής τους δραστηριοποίησης σε σωρεία τεχνολογικών μεταβολών, μειονεκτούν στην αγορά εργασίας άνευ της κατάλληλης ακαδημαϊκής προετοιμασίας και δυσχεραίνονται στην υιοθέτηση τεχνολογικών εργαλείων κατά τις συνήθεις εργασιακές τους πρακτικές.

Μέσω της παρούσας βιβλιογραφικής ανασκόπησης επιχειρείται η ευαισθητοποίηση των φορέων γνώσης στην υιοθέτηση στο μέγιστο βαθμό όλων των νέων τεχνολογιών κατά την μετάδοση της γνώσης ανεξαρτήτως πεδίου. Τα αποτελέσματα καταδεικνύουν ότι καθώς οι νέες τεχνολογίες αυξάνουν τις εργασιακές απαιτήσεις χρήσης τους από τον επαγγελματία του τομέα λογιστικής και χρηματοοικονομικής ελεγκτικής, μετακυλίεται στην τριτοβάθμια εκπαίδευση η ευθύνη της αρτιότερης προετοιμασίας των εν δυνάμει φοιτητών. Συναφώς, καταδεικνύεται το γεγονός ότι τα ακαδημαϊκά ιδρύματα αρχίζουν σταδιακά να αναγνωρίζουν την απαίτηση για ενσωμάτωση και εφαρμοστική χρήση των υπόψη τεχνολογιών με διαφορετικές μεθόδους προσέγγισης και βαθμό υιοθέτησης. Επίσης, αναδεικνύονται οι τομείς βελτίωσης και οι τάσεις απόκλισης από την τεχνολογική εξέλιξη, συνεκτιμώντας την προδιάθεση για διατήρηση της ακαδημαϊκής ισορροπίας, ενώ επισημαίνεται ο αντίκτυπος της μονοδιάστα της χρήσης των παλαιότερων, κατά τη διδασκαλία των νεότερων τεχνολογιών. Συνακολούθως, η πίεση για επικαιροποίηση της κατάρτισης επί των αναδυόμενων τεχνολογιών μετακυλίεται στην πρότερη βαθμίδα εκπαίδευσης, ως εφαλτήριο του δομημένου εγκλιματισμού σε μία διαρκή εξέλιξη. Τέλος, τα αποτελέσματα της παρούσας αναδεικνύουν την ανάγκη για επικαιροποίηση των οριζόντιων (ήπιων) δεξιοτήτων ως εργαλείο διαχείρισης των αναδυόμενων τεχνολογιών και μίας ολιστικής βελτίωσης της ακαδημαϊκής και επαγγελματικής απόδοσης των αποφοίτων.

Ολοκληρώνοντας, η παρούσα αναδεικνύει θέματα μελλοντικής έρευνας αναφορικά με τα αντικείμενα και τους τομείς ενσωμάτωσης στην Τριτοβάθμια Εκπαίδευση, καθώς και τις σχετικές εκπαιδευτικές πρακτικές.

Λέξεις – κλειδιά: Λογιστική, Ελεγκτική, Εκπαίδευση, Αναδυόμενες Τεχνολογίες.

ΕΙΣΑΓΩΓΗ

Αναγνωρίζοντας ότι η τεχνολογία πάντα αποτελεί ανατρεπτικό παράγοντα του συνολικού κοινωνικού γίγνεσθαι, το παρόν πόνημα έχει ως αντικείμενο τη λογιστική και ελεγκτική δραστηριότητα. Επικεντρώνεται στην ταχεία επίδραση των νέων τεχνολογιών στους συγκεκριμένους τομείς, καθώς είναι προφανές ότι απαιτεί την ενσωμάτωση των υπόψη τεχνολογικών δεξιοτήτων στην ουσιαστική επαγγελματική δραστηριοποίηση του ατόμου-επαγγελματία (ACCA, 2020b) στη λογιστική και ελεγκτική κατεύθυνση (Dai and Vasarhelyi, 2017).

Οι επαγγελματικοί φορείς πιστοποίησης (ACCA, 2021; Chartered Accountants Ireland, 2019; CIMA, 2021) επικαιροποίησαν ήδη τα εξεταζόμενα αντικείμενα, ενώ οι μεγάλες λογιστικές και ελεγκτικές εταιρείες έχουν επενδύσει στα απαιτούμενα νέα τεχνολογικά εργαλεία, προκειμένου να ανταπεξέλθουν στις τρέχουσες επαγγελματικές απαιτήσεις (Cooper et al., 2019). Τουναντίον, η τριτοβάθμια εκπαίδευση υπόκειται κριτική για τη διαφαινόμενη καθυστέρηση ή αναβλητικότητα στην ενσωμάτωση των νέων τεχνολογιών (Dzuranin et al., 2018; Griffin and Wright, 2015; Hasan, 2022). Η υστέρηση αυτή φαίνεται να επιβεβαιώνεται από το γεγονός ότι, σε παγκόσμια κλίμακα, προτιμούνται οι απόφοιτοι των τεχνολογικών σχολών (IT, computer science κλπ.) από τις μεγάλες ελεγκτικές εταιρείες έναντι των αποφοίτων των λογιστικών σχολών/τμημάτων (Qasim et al., 2022). Έρευνες καταδεικνύουν ότι το 31% των νεοπροσληφθέντων από τις λογιστικές εταιρείες δεν είναι απόφοιτοι λογιστικών τμημάτων, σημειώνοντας σταθερή αυξητική τάση 11% ετησίως (Tysiac and Drew, 2018). Η τμηματική ενασχόληση επί των επιπτώσεων αυτής της εξέλιξης στην ακαδημαϊκή κοινότητα της λογιστικής και της ελεγκτικής (Apostolou et al., 2022) καθώς και η μελέτη της επίδρασης ανά μεμονωμένη τεχνολογία (Hasan, 2022; Liu et al., 2021) έχουν σαν αποτέλεσμα οι απόφοιτοι λογιστικής να μειονεκτούν ολιστικά και να επιδεικνύουν άρνηση στην υιοθέτησή των κατά την μετέπειτα επαγγελματική τους σταδιοδρομία (Qasim and Kharbat, 2020). Πάνω από δεκαετία, η επιστημονική κοινότητα κρούει τον κώδωνα στην πανεπιστημιακή κοινότητα για την επικαιροποίηση των προγραμμάτων εκπαίδευσης προκειμένου να αναπτύξουν εργαλειοθήκη για την μετάδοση των τεχνολογικών δεξιοτήτων σε επίπεδο ανταγωνιστικό της επαγγελματικής απασχόλησης (Lawson et al., 2014; McKinney et al., 2017).

Η παρούσα επιχειρεί να απαντήσει γιατί πρέπει η ακαδημαϊκή κοινότητα να ενσωματώσει τις νέες τεχνολογίες εκείνες που φέρονται να έχουν την μεγαλύτερη επίπτωση στον επαγγελματικό χώρο της λογιστικής και της ελεγκτικής. Οι υπό εξέταση νέες τεχνολογίες ανασκοπούνται ταυτόχρονα, παρόλο που η εξέλιξή τους βρίσκεται σε διαφορετικό στάδιο ανάπτυξης και επίδρασης, προκειμένου να εντοπιστούν οι σύγχρονες επικαιροποιημένες τάσεις. Η ερευνητική μεθοδολογία και οι τεχνικές που χρησιμοποιήθηκαν παρουσιάζονται στο δεύτερο μέρος της παρούσας, στο τρίτο μέρος επιχειρείται μία συνοπτική παρουσίαση των νέων τεχνολογιών, ενώ στο τέταρτο μέρος διερευνάται η ενσωμάτωση από την ακαδημαϊκή κοινότητα και ακολουθεί η παρουσίαση των αποτελεσμάτων στο πέμπτο μέρος. Τέλος, στο έκτος μέρος ακολουθεί η συζήτηση και προτείνονται ερωτήματα για μελλοντική έρευνα. Η συμβολή της παρούσας επαφίεται στο γεγονός ότι συνεκτιμά ταυτόχρονα τα είδη των νέων τεχνολογιών που επιδρούν στους τομείς της λογιστικής και της ελεγκτικής, προκειμένου να συνδράμει την ακαδημαϊκή και την ευρύτερη εκπαιδευτική κοινότητα στην συμμετοχή και ενασχόληση με αυτές (Kotb et al., 2019; McConville, 2023).

ΜΕΘΟΔΟΛΟΓΙΑ ΚΑΙ ΤΕΧΝΙΚΕΣ

Η βιβλιογραφική ανασκόπηση επιχειρεί να αναγνωρίσει τις σύγχρονες τάσεις και να επισημάνει καίρια σημεία που διατάσσουν και επιδρούν στην τριτοβάθμια εκπαίδευση στον τομέα της λογιστικής και της ελεγκτικής, αλλά επιβαρύνουν και διογκώνουν τις απαιτήσεις εναρμόνισης της ευρύτερου εκπαιδευτικού σχήματος, αναφορικά με τις νέες τεχνολογίες. Η ημι-συστηματική μεθοδολογία επιλέχθηκε, καθώς επιτρέπει την προσέγγιση ενός θέματος από διαφορετικά επιστημονικά πεδία, προκειμένου να αντληθούν χρήσιμες πληροφορίες και τάση για εφαρμογή (Snyder, 2019). Η παρούσα ημι-συστηματική βιβλιογραφική ανασκόπηση διενεργήθηκε χρησιμοποιώντας πηγές διεπιστημονικών πεδίων που έχουν δημοσιευθεί σε περιοδικά καταχωρημένα στους ιστότοπους Google Scholar, Web of Science και Scopus ως ενδείκτες ποιοτικών ερευνών, προκειμένου να αξιοποιηθούν οι μελέτες από διαφορετικά επιστημονικά πεδία, πλέον της λογιστικής, ώστε να εκμαιευθούν κατεκτημένες τεχνογνωσίες και εμπειρίες από αυτά τα πεδία που χρησιμοποιούν ήδη τις συγκεκριμένες τεχνολογίες.

Η παραμετροποίηση του ερωτήματος καταλόγου περιλάμβανε τους όρους “BDA”, “ML”, ”AI”, ”data security”, “data analytics”, “IoT’, “cloud computing”, “RPA”,“DLT”, “XBRL” και “accounting” και “audit” και “education”. Ειδικά στην παράμετρο “audit” εξαιρέθηκαν μελέτες που αναφέρονταν σε τεχνικό έλεγχο ή έλεγχο ασφαλείας ή έλεγχο κυβερνοάμυνας, καθώς αναφέρονται κυρίως σε θέματα του επιστημονικού πεδίου της πληροφορικής και δικτύων αναμετάδοσης της πληροφορίας, ήτοι διαφοροποιείται από το πεδίο ενδιαφέροντος που είναι ο χρηματοοικονομικός έλεγχος. Επίσης, ενσωματώθηκε το ‘cloud computing” καθώς πρωτίστως είναι αποθηκευτικός χώρος, αλλά επιδρά στην αξιοπιστία των λογιστικών δεδομένων και αρχείων που τηρούνται (χρόνος και πλήθος πληροφοριών και ιδιοκτησιακό

καθεστώς) υπό την σκέπη του internet based computing. Τέλος, σημειώνεται ότι στον όρο DLT εμπεριέχεται η έννοια του blockchain, καθώς αποτελεί υποείδος της υπόψη τεχνολογίας, ως τεχνολογικό μέσο διάχυσης, τήρησης και επιβεβαίωσης της πληροφορίας.

Αναφορικά με το χρονικό διάστημα αναφοράς επιλέχθηκε εύρος δημοσιεύσεων 2020-2024, ως πιο αντιπροσωπευτικό καθώς από το 2020 εντοπίζονται αισθητά διαφοροποιημένες έρευνες για σχηματοποιημένες συστημικά έννοιες, όπως για παράδειγμα το DeFi πλέον έχει διαφοροποιηθεί από τον αμιγή τομέα της λογιστικής. Επίσης, η ανασκόπηση περιλαμβάνει μόνο δημοσιεύσεις στην αγγλική γλώσσα με διεξαγωγή του πρώτου επιπέδου ελέγχου των αποτελεσμάτων από τις περιλήψεις, προκειμένου να αποβληθούν έρευνες εκτός του αντικειμένου εκπαίδευσης ή με μία ελάχιστη αναφορά χωρίς εκπαιδευτικό αποτέλεσμα.

ΕΠΙΔΡΑΣΤΙΚΕΣ ΤΕΧΝΟΛΟΓΙΕΣ ΣΤΗ ΛΟΓΙΣΤΙΚΗ ΚΑΙ ΤΗΝ ΕΛΕΓΚΤΙΚΗ

Η παρούσα ανασκόπηση αναφέρεται στο σύνολο των μέχρι τώρα διαφοροποιημένων τεχνολογιών που επιδρούν στους τομείς της λογιστικής και ελεγκτικής, και συγκεκριμένα στις Big Data Analytics (συμπεριλαμβανόμενων των data analytics), Machine Learning, Artificial Intelligence, Internet of Things, Data Security, Cloud computing, Robotic Process Automation και Distributed Ledger Technologies (συμπεριλαμβανόμενου του Blockchain). Εν συντομία θα οριστούν οι υπόψη τεχνολογίες (σύμφωνα με την εφαρμοστική τους χρήση) διακριτά και θα παρουσιαστούν οι εργαλειοθήκες - μνημονεύοντας παράλληλα εμπεριεχόμενους κινδύνους / δυσχέρειες - που παράγονται υπό το πρίσμα της λογιστικής και της ελεγκτικής, καθώς και οι νέες απαιτήσεις που αναδεικνύονται ως πρόκριμα αναβάθμισης των τεχνικών και επαγγελματικών δεξιοτήτων των υπόψη τομέων.

Πρωτίστως, το τεράστιο πλήθος δεδομένων έχει προκαλέσει έκρηξη στοιχείων και αρχείων σε όλους τους τομείς δραστηριότητας, ειδικά όμως όσον αφορά την λογιστική, ελεγκτική και εκπαίδευση, τα δεδομένα καθίστανται μη διαχειρίσιμα με τις συμβατικές μεθόδους διαχείρισης, ταξινόμησης και διατήρησής τους. Για τις ανάγκες της παρούσας δεν προκρίνεται η διάκριση των δεδομένων σε μεγάλα ή μικρά (big data ή απλά data) καθώς πλέον όλα τα δεδομένα καλύπτονται και εμφανίζουν τα χαρακτηριστικά των 4 "v" (volume, velocity, variety, veracity - όγκος, ταχύτητα, ποικιλία, εγκυρότητα) διαφοροποιώντας τα από την παραδοσιακή θεώρηση των στοιχείων/αρχείων που τηρούνταν σε έντυπα βιβλία, συμπαρασύροντας αντίστοιχα και την πληροφορία που αυτά ενσωματώνουν (Laney, 2001). Συνεπακόλουθο των χαρακτηριστικών αυτών είναι η ανάπτυξη BDA (Big Data Analytics) προκειμένου να καταστεί δυνατή μία διαδικασία χρήσης δεδομένων (δομημένων και μη) μέσω της εφαρμογής αναλυτικών τεχνικών και μοντέλων (στατιστικών, ποσοτικών, διαγνωστικών και περιγραφικών) ως εργαλεία ανάλυσης και διύλισης των συσσωρευμένων πληροφοριών (Schneider et al., 2015; Appelbaum et al., 2017). Αντιστοίχως το βάρος της λογιστικής μεταφέρεται στη διοικητική λογιστική / διαχειριστική λογιστική (management accounting) και στους χρηματοοικονομικούς ελέγχους (audit) (Moeller et al., 2020; Nielsen, 2015; Schmidt et al., 2020; Dai and Vasarhelyi, 2017; Warren et al., 2015). Παράλληλα, οι επαγγελματικοί φορείς πιστοποίησης (ACCA, 2020b) επισημαίνουν την ανάγκη ενίσχυσης των ήπιων δεξιοτήτων όπως κριτική σκέψη, αντίληψη αφηρημένων σχέσεων, επίλυση προβλημάτων παράλληλα με τις απαραίτητες τεχνικές (data literacy, data interpretation, data analysis, data finance, data visualisation, data mining) δεξιότητες (Blix, 2021).

Η επόμενη τεχνολογία ανήκει στην κατηγορία τεχνολογικής παρέμβασης που γίνεται λιγότερο αισθητή, λόγω του τρόπου αλληλεπίδρασής της με τον εργασιακό βίο. Ως τεχνολογία το RPA (Robotic Process Automation - RPA / Ρομποτική Αυτοματοποίηση Διαδικασιών-Διεργασιών / Ψηφιακά Ρομπότ) ορίζεται μία ομπρέλα εργαλείων χρήσης εικονικών ρομπότ λογισμού - τα γνωστά ως bots - για την εκτέλεση χειρωνακτικών, χρονοβόρων, επαναλαμβανόμενων, δομημένων και κοστοβόρων εργασιών (Van der Aalst et al., 2018; Cooper et al., 2019). Η εν λόγω τεχνολογία αξιοποιείται στη λογιστική και ελεγκτική για διεργασίες όπως συμφωνίες υπολοίπου (τραπεζικό / ταμειακά διαθέσιμα - reconciliations), επιβεβαίωση παραγγελιοληψίας / παραγγελιοδοσίας (order validation), παρακολούθηση αποθεμάτων (inventory tracking), φορολογικές αναφορές (tax reporting), τέλους χρήσης αναφορές και ενοποιήσεις (financial reporting closing - consolidation) καθώς και διεξαγωγή βασικών ελεγκτικών διεργασιών (Moffitt et al., 2018). Συνακολούθως, λογιστές και ελεγκτές πρέπει να ελέγχουν κάθε τομέα ανάθεσης και εκτέλεσης που εξυπηρετείται από bot, ώστε να διασφαλίσουν την αξιοπιστία και ακρίβεια του πυρήνα της δικής τους εξατομικευμένης εργασίας (McCann, 2018; Kokina et al. (2021).

Ίσως η πιο διαφημισμένη από όλες τεχνολογία, αυτή της τεχνητής νοημοσύνης (Artificial Intelligence - AI) συμπεριλαμβάνει μία πλειάδα τεχνολογιών όπου υπολογιστικός αλγόριθμος εκτελεί εργασίες χωρίς την ανθρώπινη παρέμβαση όπως οπτικοποίηση, σημασιολογική ανάλυση, λήψη αποφάσεων, μηχανική μάθηση (Gotthardt et al., 2020; Petkov, 2020; Cho et al., 2020). Η επίδραση στους τομείς της λογιστικής και ελεγκτικής είναι εντυπωσιακή διεκπεραιώνοντας τις διεργασίες ανάλυσης (δομημένων και μη) δεδομένων, εκτίμησης, αναγνώρισης δοσοληψιών, εκτέλεσης, ελέγχου καταχωρήσεων (πολυκριτηριακή και συγκριτική), διερεύνησης τάσεων, κινδύνων, πρόβλεψης και

κενών προς αποφυγή ή συμμόρφωση ή διαχείριση (ICAEW, 2018a; ACCA,2020a). Προς επίρρωση της επίδρασης, το 96% των μεγάλων λογιστικών εταιρειών έχουν υιοθετήσει ή προγραμματίζουν ή εκπαιδεύουν να υιοθετήσουν AI τεχνολογίες για την εκτέλεση λογιστικών διεργασιών (Thomson Reuters, 2024), σε μετεξέλιξη του 11% υιοθέτησης κατά το 2019 (Oracle, 2019). Ήτοι, απαιτείται γνώση μοντελοποίησης (modeling), αξιολόγησης (valuation), εγκληματολογική λογιστική (forensic accounting) και εκτίμησης / πρόβλεψης ποσοτικών και ποιοτικών τεχνικών αναλύσεων (Technical Analysis), ενώ σε επίπεδο προσωπικών δεξιοτήτων (soft skills) η έμφαση δίνεται στην προσαρμοστικότητα, δημιουργικότητα και κριτική σκέψη επί της πληροφορίας (Bakarich and O'Brien, 2021, Ding et al., 2020).

Στο επίπεδο της τεχνολογίας κατανεμημένου καθολικού (Distributed Ledger Technology - DLT) περιλαμβάνονται σωρεία τεχνολογιών με προεξέχουσες τις blockchain, hashgraph, directed acyclic graph (DAG), holochain, tempo/radix οι οποίες ήδη έχουν εισαχθεί και αξιοποιούνται από τα υπολογιστικά συστήματα και αγορές. Ένας γενικευμένος ορισμός αποδίδει την DLT ως έναν ψηφιακό κατάλογο επιβεβαιωμένων καταχωρήσεων (digital ledger - ψηφιακό καθολικό) εξασφαλίζοντας διαφάνεια και χρονική συνέπεια των στοιχείων (Dai and Vasarhelyi, 2017). Η εν λόγω τεχνολογία κυριαρχεί προκρίνοντας την τριπλογραφία (Triple Entry Accounting - TEA) έναντι της παραδοσιακής διπλογραφίας, καθώς εισέρχεται η έννοια της διάστασης της επιβεβαίωσης γεγονότος (Fullana and Ruiz, 2021; Kitsantas, 2022). Ήδη μελέτες καταδεικνύουν ότι η DTL θα παράξει ολοκληρωμένες επιχειρηματικές λύσεις αναφορικά με τις λογιστικές επιβεβαιωμένες καταχωρήσεις των στοιχείων και αρχείων των οικονομικών καταστάσεων και αναφορών (Inghirami, 2019; Dai and Vasarhelyi, 2017), ενώ ερευνητές επεξεργάζονται τη συνολική τροποποίηση των λογιστικών καταχωρήσεων, τεχνικών ελέγχου και εκτέλεσης του χρηματοοικονομικού ελέγχου (Coyne and McMickle, 2017; Schmitz and Leoni, 2019; ICAEW, 2018b), ενώ απαιτείται να επιδείξουν επιμέλεια στην αξιολόγηση, καταχώρηση, επιβεβαίωση και έλεγχο των σχετιζόμενων DLT περιουσιακών στοιχείων και υποχρεώσεων τηρώντας την κείμενη νομοθεσία (Nicolau, 2021).

Λιγότερο προφανής είναι η εμπλοκή της τεχνολογίας διαδικτύου των πραγμάτων (Internet of Things - IoT) καθώς αρχικά εντοπίζεται στην ανάπτυξη της τεχνολογικής υποδομής και των τεχνολογικών μέσων της υποδομής, όμως η τεχνολογική υποδομή (π.χ. 5G δίκτυο) προετοίμασε και προετοιμάζει το έδαφος για επαγγελματική αξιοποίηση και εφαρμογή. Ως πρώτο σημείο εμπλοκής αποτελεί το στοιχείο "χρόνου" καθώς δίνει τη δυνατότητα διενέργειας ελέγχου χρηματοοικονομικών στοιχείων και αρχείων (big data) σε πραγματικό χρόνο ακόμα και εξ αποστάσεως. Συνακολούθως, ο έλεγχος καθίσταται διαρκής συμπιέζοντας την ακατάπαυστη λογιστική εργασία, όπως ενδεικτικά το CloudAccounting απαιτείται για CloudAuditing, με διαρκής εποπτεία των λογαριασμών / καταχωρήσεων βελτιστοποιώντας τη διαχείριση κινδύνου σε όλα τα επίπεδα και τήρηση των κανονιστικών διατάξεων (INAA, 2023). Βασικά στοιχεία της τεχνολογίας είναι ο διαμοιρασμός των λογιστικών εργασιών, ελαχιστοποίηση της ελεγκτικής προσπάθειας, αναβάθμιση των χρηματοοικονομικών αναφορών και συρρίκνωση του χρόνου ολοκλήρωσης της ελεγκτικής αναφοράς. Επιπλέον, η XBRL (eXtensive Business Reporting Language) είναι η ενδεικνυόμενη γλώσσα για την ψηφιακή χρηματοοικονομική αναφορά και πληροφορίας, η οποία ήδη αξιοποιείται ως διεθνές πρότυπο (πλαίσιο) κωδικοποίησης και αναφορών του συνόλου των χρηματοοικονομικών και μη χρηματοοικονομικών πληροφοριών (XBRL, 2025).

Σημειώνεται ότι ήδη πολλά συστήματα επιχειρησιακού σχεδιασμού (ERP) έχουν συμπεριλάβει DBA, AI, ML λειτουργίες στα λογισμικά τους προς διευκόλυνση των λογιστικών και ελεγκτικών διεργασιών (SAP S / 4 HANA / ORACLE), ενώ ήδη έχουν εμπορικά αναπτυχθεί DLT τεχνολογίες από παρόχους εφαρμογών όπως ενδεικτικά το Azure (Microsoft), η Leonardo (SAP) αλλά και το Rubix Core (Deloitte - Dapp Creator). Τέλος, επισημαίνεται ότι η ανωτέρω παρουσίαση είναι ενδεικτική και όχι εξαντλητική, προς εξυπηρέτηση της οριοθέτησης των όρων που διερευνούνται στην παρούσα βιβλιογραφική ανασκόπηση.

ΑΚΑΔΗΜΑΪΚΗ ΕΝΣΩΜΑΤΩΣΗ ΣΤΗ ΛΟΓΙΣΤΙΚΗ ΚΑΙ ΕΛΕΓΚΤΙΚΗ

Στο παρόν μέρος θα γίνει ανασκόπηση ανά τεχνολογία ή με μερική ομαδοποίηση των τεχνολογιών, όπως προκύπτει από τις μελέτες και θα επιχειρηθεί μία συγκεντρωτική παρουσίαση των αποτελεσμάτων στο τέλος του, προκειμένου να εξαχθούν τα θέματα προς συζήτηση. Επίσης, πρέπει να σημειωθεί ότι κάποιες τεχνολογίες έχουν μελετηθεί περισσότερο από άλλες, είτε επειδή είναι λιγότερο τεχνικές είτε επειδή έχουν ήδη εξελιχθεί. Για τον λόγο αυτό τα συνολικά αποτελέσματα θα παρουσιαστούν συγκεντρωτικά αναφορικά με την τάση που υποδεικνύεται από τους μελετητές.

Αρχικά, η BDA που δύναται να καλυφθεί εργαστηριακά, δεν απαιτεί υποστήριξη με νέα συγγράμματα ή επένδυση σε νέο εξοπλισμό και προσεγγίζει ολιστικά κάποια από τα άλλα ακαδημαϊκά μαθήματα (π.χ. στατιστική) έχει ενσωματωθεί σε μεγάλο βαθμό από τα ιδρύματα στο υφιστάμενό τους πρόγραμμα (Andiola et al., 2020; ACCA, 2020b; Liu et al., 2021), και σε μεγάλο δε βαθμό διδάσκεται διακριτά από άλλα μαθήματα (Moore and Felo, 2021) ή στα πλαίσια των μαθημάτων πληροφοριακών συστημάτων λογιστικής (Losi et al., 2022; Qasim et al., 2022; Qasim and Kharbat, 2020). Προκύπτουν προβληματισμοί όμως αφενός με τις ικανότητες και γνώσεις επί των BDA που έχουν οι ίδιοι οι

εκπαιδευτές και αφετέρου η έλλειψη επαρκούς χώρου διοργάνωσης των υπόψη μαθημάτων, καθώς σημειώνεται μεγαλύτερο ενδιαφέρον προσέλευσης (Andiola et al., 2020; Dzuranin et al., 2018; Losi et al., 2022). Επίσης, μελετητές διαπίστωσαν ότι τα εκπαιδευτικά προγράμματα είναι γενικόλογα ή με εντυπωσιακότερους τίτλους από την πραγματική ύλη που καλύπτεται, με αποτέλεσμα τόσο οι εκπαιδευτές όσο και οι εκπαιδευόμενοι να υποαποδίδουν ή να αδιαφορούν (Andiola et al., 2020). Τέλος, αριθμός μελετών προβληματίζεται επί της περιορισμένης έκθεσης σε συναφείς εφαρμογές, καθώς κατά κύριο λόγο τα BDA προσεγγίζονται ακαδημαϊκά από συμβατικά εργαλεία (EXCEL) με ελάχιστη έκθεση σε άλλα προγράμματα όπως το TABLEAU (Andiola et al., 2020; Schoenfeldt and Birt, 2020; Laplante and Vernon, 2021; Raschke and Charron, 2021). Συμπερασματικά, παρατηρείται μία θεμελιωμένη αντίληψη της ακαδημαϊκής κοινότητας υπέρ της απόκτησης της υπόψη τεχνικής (επαγγελματικής / κάθετης) δεξιότητας, αποφεύγοντας τα σύνθετα τεχνολογικά εργαλεία και τις προσωπικές (κοινωνικές / οριζόντιες) δεξιότητες που απαιτούνται, για την αποδοτικότερη κατάκτηση της ακαδημαϊκής γνώσης (Shawver and Shawver, 2020; Losi et al., 2022).

Αναφορικά με την RPA, παρόλο που πρότερες μελέτες έχουν ήδη αναδείξει την ανάγκη για ακαδημαϊκή προετοιμασία των αποφοίτων λογιστικής στην εν λόγω τεχνολογία (Cooper et al., 2019), οι μελετητές αναδεικνύουν την έλλειψη τεχνογνωσίας, εξοπλισμού και προσωπικού στα ακαδημαϊκά ιδρύματα (Vincent et al., 2020), πλέον της ενδεχόμενης απλής θεωρητικής παρουσίασής της στο μάθημα των πληροφοριακών συστημάτων λογιστικής (Harrast and Wood, 2023) ενώ υπάρχει πλέον διαθεσιμότητα σε εκτενείς ασκήσεις (Vincent et al., 2020), οργανωμένη διάταξη μαθημάτων (EY, 2022), και εργαλειοθήκες (Keys and Zhang, 2020). Όσον αφορά την AI εντοπίζεται ελάχιστη βιβλιογραφία σε σχέση τη λογιστική ή ελεγκτική (Zhang et al., 2020). Όμως, οι υφιστάμενες μελέτες καταδεικνύουν την ανάγκη επικαιροποιήσης των προγραμμάτων σπουδών, ώστε να καλυφθούν οι εκτεταμένες ανάγκες των αγορών και της βιομηχανίας αναφορικά με την υπόψη τεχνολογία τόσο στη λογιστική όσο και την ελεγκτική (Hasan, 2022; Polimeni and Burke, 2021). Στην ίδια κατεύθυνση κινείται και η βιβλιογραφία αναφορικά με την DLT (Zhang et al., 2020; ICAEW, 2018b). Σημαντική επισήμανση αναδύεται όμως από μελέτες που υιοθετούν την έκθεση των φοιτητών λογιστικής στην DLT προκειμένου να αξιολογούν την επίδραση της DLT (Stratopoulos, 2020; Lee et al. 2022). Μελέτη επί της εκπαίδευσης σε μεταπτυχιακούς φοιτητές απεδείχθη πιο αποτελεσματική από το αντίστοιχο εκπαιδευτικό πρόγραμμα σε προπτυχιακούς φοιτητές (Stern and Reinstein, 2021). Τέλος, αναδεικνύεται μία τάση για εμπειρική και εφαρμοσμένη πανεπιστημιακή γνώση αντί της θεωρητικής ενασχόλησης με την υπόψη τεχνολογία (Kaden et al., 2021).

Όσον αφορά στην τεχνολογία AI, η έμφαση δίνεται στην ευρύτερη αντίληψη της τεχνολογίας, επί του παρόντος, καθώς λόγω των ιδιοτήτων της μπορεί να απορροφήσει αντικείμενα για τα οποία δεν απαιτείται ο ανθρώπινος παράγοντας αξιοποιώντας το ανθρώπινο δυναμικό σε δραστηριότητες πιο απαιτητικές. Έτσι προτείνεται η ακαδημαϊκή χρήση AI (σε συνδυασμό με άλλες τεχνολογίες) για εκτέλεση βασικών (όχι τεχνικών) λογιστικών λειτουργιών προκειμένου να εκπαιδευτούν στην διαχείριση / αξιολόγηση / ανάδειξη των "κακώς" παραχθέντων αποτελεσμάτων ή ενεργειών (Ballantine, et al., 2024). Αξίζει να σημειωθεί ότι η AI, φέρει θετικές και αρνητικές κριτικές, καθώς την συγκεκριμένη τεχνολογία την ακολουθεί μία σκοτεινή ως προς την χρήση της πορεία που πλήττει την αξιοπιστία των αποτελεσμάτων της, όμως μελέτες αναδεικνύουν τη σημαντικότητά της στη λογιστική και την αποδοχή της ως εκπαιδευτικό εργαλείο συνολικά από την πλευρά των ίδιων των φοιτητών (Sundkvist and Kulset, 2024). Τέλος, ενδιαφέρον προκαλεί το γεγονός της έλλειψης μελετών αναφορικά με την IoT και τη λογιστική, παρόλο που ήδη υφίστανται μελέτες που καταδεικνύουν τη σημαντικότητα υιοθέτησης της IoT από την πανεπιστημιακή κοινότητα με στόχο την καινοτομία και την ακαδημαϊκή πρωτοπορία σε διεπιστημονικό επίπεδο παρέχοντας υψηλού επιπέδου εκπαίδευση (Aldowah et al., 2017; INAA, 2023). Επί των συνδυαστικών τεχνολογιών, μελέτες δείχνουν να συμφωνούν στην επιτακτική ανάγκη ενσωμάτωσης των τεχνολογιών στα υφιστάμενα πεδία / μαθήματα σε πανεπιστημιακό επίπεδο (Qasim and Kharbat, 2020), προκειμένου να αναπτυχθούν ανταγωνιστικές τεχνολογικές δεξιότητες (Qasim et al., 2022). Ενώ στην επισήμανση ότι ο βαθμός ενσωμάτωσης συναρτάται από την άρνηση ή την αποδοχή τόσο της ακαδημαϊκής όσο και της φοιτητικής κοινότητας, προκρίνεται η προληπτική αντιμετώπιση με ευρεία τεχνολογική εναρμόνιση των ακαδημαϊκών προγραμμάτων σύμφωνα με τις επικαιροποιημένες απαιτήσεις της αγοράς εργασίας (Polimeni and Burke, 2021). Πιο εφαρμοστικά συμπεράσματα προκύπτουν από τις μελέτες που διερευνούν την ανταπόκριση και τις δυσχέρειες των ίδιων των φοιτητών σε επικαιροποιημένα ακαδημαϊκά προγράμματα (Wang, 2022), όπου οι φοιτητές ανταποκρίθηκαν εξαιρετικά ως προς το τεχνικό μέρος της κατάρτισης, όμως υποαπέδωσαν στις ανοιχτού τύπου ασκήσεις και ορθή εκτέλεση ερωτημάτων, με αποτέλεσμα να εξαγχθούν μη αξιολογήσιμα αποτελέσματα (Yassin and Toumeh, 2024).

Επιπρόσθετα, διερευνώντας το λανθάνον ή ανεπίσημο αναλυτικό πρόγραμμα (εντοπίζεται και ως παραπρόγραμμα - hidden curriculum), μελέτες καταδεικνύουν τάση του ακαδημαϊκού προσωπικού στην εκπαίδευση επί της χρήσης έναντι της έκθεσης των φοιτητών στην τεχνική χρήσης των νέων τεχνολογιών (Handoyo, 2024; Sebele-Mpofu, 2024). Τέλος, προεξέχουσα θέση εντοπίζεται στο κενό που σχηματίζεται από τα χαρακτηριστικά της ίδιας της πιστοποίησης, που επιβεβαιώνει πλήρωση συγκεκριμένης απαίτησης και όχι γνώσης (AACSB, 2022) ή καλύπτει συγκεκριμένα αντικείμενα (Ballantine et al, 2024).

Συγκεντρωτικά, οι επικαιροποιημένες τάσεις που αφορούν στην τριτοβάθμια εκπαίδευση είναι η ανάγκη εξοικείωσης των προπτυχιακών φοιτητών με τις νέες τεχνολογίες είτε ως αυτόνομα μαθήματα είτε ενσωματωμένα στα υφιστάμενα μαθήματα των ακαδημαϊκών προγραμμάτων. Έτσι, τα ακαδημαϊκά ιδρύματα καλούνται να υπερβούν το επίπεδο της απλής διδαχής αναφορικά με την χρήση της τεχνολογίας καθιστώντας επιτακτική την εφαρμοστική χρήση τους σε σχέση με τα αντικείμενα της λογιστικής και της ελεγκτικής (Schoenfeldt and Birt, 2020). Συνοψίζοντας προκύπτει ότι, δεν υφίσταται μία ιδανική μέθοδος εκπαίδευσης (π.χ μελέτη περίπτωσης, προσομοίωση, εκπόνηση εργασιών, αυτοτελές ή ενσωματωμένο μάθημα), ενώ παράλληλα με την εφαρμοστική χρήση των νέων τεχνολογιών θα πρέπει να αναπτύσσονται οι οριζόντιες δεξιότητες (Tysiac, 2020) με κυρίαρχες την κριτική σκέψη, την αναλυτική σκέψη, τη δόμηση προβληματικών, την αντίληψη μη σχηματοποιημένων ή μη δομημένων προβλημάτων, την επικοινωνία (προφορική και ψηφιακή), τη δημιουργικότητα, την προσαρμοστικότητα, τη διαχείριση χρόνου, τη κατάτμηση πληροφορίας και την κατανόηση κατάστασης (προβλήματος).

ΑΠΟΤΕΛΕΣΜΑΤΑ

Η παρούσα ανασκόπηση διερευνώντας την επενέργεια των επιδραστικών τεχνολογιών στα ακαδημαϊκά προγράμματα των κατευθύνσεων της λογιστικής και της ελεγκτικής, καταλήγει στην επιβεβαίωση της τάσης για ενσωμάτωσή (αυτοτελώς) ή και εμπλουτισμό (συσχετισμένα) των υφισταμένων προγραμμάτων σπουδών τριτοβάθμιας εκπαίδευσης στις υπόψη κατευθύνσεις (Moore and Felo, 2021). Λόγω της διαφοροποίησης της εξέλιξης των ίδιων των τεχνολογιών και της πολυεπίπεδης επιρροής στις υπόψη κατευθύνσεις, της αφομοίωσης από αυτές και της αυτονόμησης σε υποκλάδο της τεχνολογίας σε διαφορετικό χρόνο και πεδίο, οι τάσεις παρουσιάζονται αθροιστικά καθώς εμφανίζουν σε έναν άξονα. Ο κοινός αυτός άξονας είναι η βελτιστοποίηση και επικαιροποίηση της παρεχόμενης γνώσης προς επίτευξη της ενδεδειγμένης προετοιμασίας των αποφοίτων των ακαδημαϊκών ιδρυμάτων.

Η κεντρική τάση της εκπαιδευτικής κοινότητας είναι η εφαρμοστική τους χρήση επιτρέποντας ευελιξία και συνεργασία σε ακαδημαϊκό επίπεδο με παραλλαγές των μεθόδων εκπαίδευσης επί των νέων τεχνολογιών ανά τεχνολογία ή και ανά επιστημονικό αντικείμενο και επίπεδο. Παρόλες τις υφιστάμενες δυσχέρειες (Zhang et al., 2020) σε επίπεδο τεχνογνωσίας, τεχνολογίας, τεχνολογικής κατάρτισης, χρηματοδότησης και ακαδημαϊκού χρόνου, επιχειρείται δυναμικά πλέον υιοθετώντας πολύπλευρες και πλουραλιστικές παιδαγωγικές μεθόδους (Andiola et al., 2020) η πληρέστερη ακαδημαϊκή προετοιμασία των φοιτητών των οικείων τμημάτων (Harrast and Wood, 2023). Εκτός από την ίδια την αγορά εργασίας και τους φορείς επαγγελματικής πιστοποίησης που απαιτούν από τους επαγγελματίες μία πιο τεχνική κατάρτιση των αποφοίτων (Andiola et al., 2020), τα ακαδημαϊκά ιδρύματα σταδιακά προσεγγίζουν άμεσα ή έμμεσα τα παραδοσιακά εκπαιδευτικά αντικείμενα με τις υπόψη τεχνολογίες (Moore and Felo, 2021). Βασική δυσκολία που συναντάται ακαδημαϊκά είναι η πρωταρχική κλίση (προτίμηση) υπέρ της χρήσης των υφιστάμενων εργαλείων (τεχνολογιών) προκειμένου να διδαχθεί μία νέα τεχνολογία (Andiola et al., 2020). Συνακολούθως, υποβαθμίζεται η αξιοποίηση των νέων εργαλειοθηκών και αποξενώνονται οι φοιτητές από την υιοθέτηση της νέας τεχνολογίας (Stratopoulos, 2020). Επιπρόσθετα, το κόστος απόκτησης, αδειοδότησης, τεχνογνωσίας και διατήρησης όλων των προαναφερθέντων τεχνολογιών και του προσωπικού που απαιτείται από κάθε εκπαιδευτικό ίδρυμα αποτελεί αποτρεπτικό παράγοντα. Αναντίρρητα, η συνδυαστική αξιοποίηση όλων των τεχνολογιών (Polimeni and Burke, 2021) ενδείκνυται καθώς έμπρακτα ενισχύει τη δημιουργικότητα, προσαρμοστικότητα, κριτική σκέψη και δεξιότητα επίλυσης προβλημάτων (Keys and Zhang, 2020; Harrast and Wood, 2023) από τα ίδια τα εκπαιδευτικά ιδρύματα.

Συμπληρωματικά, ως προς τον τρόπο ενσωμάτωσης (αυτόνομα ή ενσωματωμένα) σε υφιστάμενα εκπαιδευτικά αντικείμενα, καθώς και ως προς την εκπαιδευτική μέθοδο, η παρούσα ανασκόπηση καταδεικνύει ότι είναι δευτερεύουσας σημασίας σε σχέση με τον εκπαιδευτικό στόχο. Κάθε εκπαιδευτικός τομέας (μάθημα) παρέχει ποικιλία δεξιοτήτων, ενώ κάθε τεχνολογία έχει διαφορετικό βαθμό αντιστοίχισης. Κάποιες μπορούν να διδαχθούν αυτόνομα (DLT) και άλλα ενσωματωμένα (BDA με στατιστική, διοικητική λογιστική, χρηματοοικονομική ανάλυση, επιχειρησιακή πληροφορική). Δύναται λοιπόν το κάθε ίδρυμα ανάλογα με τον προσανατολισμό που το διακατέχει να εμπλουτίσει το εκπαιδευτικό του πρόγραμμα με την εργαλειοθήκη του (σε αντικείμενα, βαθμό και έκταση) κατ' επιλογή (Polimeni and Burke, 2021), σε πιο πρακτικά ή σε πιο τεχνικά πεδία (Kaden et al., 2021). Μελέτες επισημαίνουν ότι στόχος είναι η έκθεση στις τεχνολογίες εφαρμοστικά προκειμένου να αναπτυχθούν παράλληλα οι πολύ σημαντικές οριζόντιες δεξιότητες και όχι η απλή στατική χρήση των τεχνολογιών. Ο παράγοντας ανάπτυξης των οριζόντιων δεξιοτήτων διαφαίνεται κρίσιμος καθώς οι φοιτητές είναι ήδη εξοικειωμένοι με τις τεχνολογίες, οπότε το χρηστικό μέρος της εκπαίδευσης δεν καθίσταται χρονοβόρο. Ο παράγοντας βιωματικής εκπαίδευσης (hands-on) δεν αποτελεί αντικείμενο μελέτης της παρούσας, όμως από την ανασκόπηση προκύπτει ότι η βιωματική εκπαίδευση με τις εργαλειοθήκες των τεχνολογιών επιταχύνουν την ανάπτυξη των δεξιοτήτων, (Zhang et al., 2020; Apostolou et al., 2022), καθώς δεν περιορίζεται στη γνώση εξαγωγής δεδομένων αλλά ερμηνεία αυτών (αυτοσκοπός).

Η ανάπτυξη των οριζόντιων δεξιοτήτων επισημαίνεται από όλες τις μελέτες που προαναφέρθηκαν, καθώς οι τεχνολογίες έχουν κύριο γνώρισμα την πρακτικότητά τους. Συνεπώς, αξιοποιούνται από όλες τις βαθμίδες εκπαίδευσης, αφορούν όλα τα επαγγέλματα, εμφανίζονται σταδιακά από όλες τις εκφάνσεις της καθημερινότητας. Άρα η αρχική ανάπτυξη των οριζόντιων δεξιοτήτων θα πρέπει να έχει έναρξη την πρωτοβάθμια, να εξελίσσεται στη δευτεροβάθμια και να ενισχύεται στο επίπεδο της τριτοβάθμιας εκπαίδευσης (Kokina et al., 2021; Shawver and Shawver, 2020; Dzuranin et al., 2018; Zhang et al., 2015; Riley et al., 2021), προκειμένου να επέλθει σταδιακή ωρίμανση ανά επίπεδο εκπαίδευσης.

ΣΥΜΠΕΡΑΣΜΑΤΑ

Η ακαδημαϊκή κοινότητα στους τομείς της λογιστικής και της ελεγκτικής αποδεικνύει ότι καταβάλλει προσπάθεια ενσωμάτωσης των νέων τεχνολογιών στα προγράμματα σπουδών της. Βέβαια, καθώς οι τεχνολογίες υπεισέρχονται σε επιστημονικά και επαγγελματικά πεδία, κατ' αντιστοιχία σταθεροποιούνται και οι γνωστικές απαιτήσεις που απαιτούνται. Επομένως, αναμένεται στα επόμενα χρόνια να διαπιστώσουμε ευρύτερη εφαρμογή και διείσδυση των υπόψη τεχνολογιών στα ακαδημαϊκά προγράμματα. Επίσης, καθώς νέες τεχνολογίες οριοθετούνται στην αγορά εργασίας, απατείται να διατηρηθεί η ευελιξία των τομέων διάδρασης με τα επίσημα προγράμματα σπουδών και επαγρύπνηση για παρέμβαση ή εμπλουτισμό των δομικών στοιχείων των νέων τεχνολογιών στην αντίστοιχη επιστημονική κατεύθυνση.

Βασικά συμπεράσματα του παρόντος πονήματος είναι η υιοθέτηση των νέων τεχνολογιών και των εργαλειοθηκών αυτών, η χρήση της κατάλληλης (ακόμα και συνδυασμένης) τεχνολογίας σε σχέση με το εκπαιδευτικό αντικείμενο, η αποφυγή της σωρευτικής θεωρητικής αντιμετώπισης καθώς οι νέες τεχνολογίες είναι εξατομικευμένης πρακτικής εφαρμογής, η κατανόηση από την ίδια την ακαδημαϊκή κοινότητα των εργαλειοθηκών και των γνωστικών στοιχείων που απαιτείται να υιοθετηθούν, ώστε να αξιοποιούνται σε συνάρτηση με τις δεξιότητες (οριζόντιες και κάθετες) που επιβάλλεται να αποκτηθούν ακόμα και σταδιακά.

Για τον λόγο αυτό προτείνεται να διερευνηθεί περαιτέρω, η σκοπιμότητα της παροχής πιστοποίησης της τεχνογνωσίας από το ίδια τα ακαδημαϊκά ιδρύματα επί των τεχνολογιών που έχουν εξαντληθεί μέσα από τα οικεία ακαδημαϊκά προγράμματα, με στόχο να αποφευχθεί η σε δεύτερο χρόνο της απαίτηση πιστοποίηση κατάρτισης, ως πλεονασματική. Επιπλέον, σκόπιμο είναι να διερευνηθεί περαιτέρω ο βαθμός στον οποίο τα ακαδημαϊκά ιδρύματα εγκαταλείπουν την εκτεταμένη χρήση προυπαρχουσών τεχνολογιών για να εξηγήσουν ή να εξοικειώσουν τους φοιτητές με τις νέες τεχνολογίες, έχοντας ως γνώμονα τις επικαιροποιημένες εργασιακές απαιτήσεις.

ΠΕΡΙΛΗΨΗ

Ο COVID-19 πρωτοεμφανίστηκε στην Κίνα το Δεκέμβριο του 2019. Μετά την ανακήρυξή του ως παγκόσμια πανδημία τον Μάρτιο του 2020, πολλές χώρες της Ε.Ε. έκλεισαν τα εκπαιδευτικά ιδρύματα. Στην Ελλάδα η SARS-CoV-2 παρουσιάστηκε το Φεβρουάριο του 2020. Μετά το ένατο κρούσμα, ανακοινώθηκε το κλείσιμο εκπαιδευτικών ιδρυμάτων, συγκεκριμένων νομών για 48 ώρες στις 5-6 Μαρτίου. Παρά τα αναρίθμητα αρνητικά της πανδημίας, πάρθηκαν αποφάσεις και οργανώθηκε η ψηφιακή εξέλιξη της χώρας. Το κλείσιμο των σχολείων πυροδότησε την προσπάθεια για εφαρμογή της ΕξΑΕ.

Μέσω της έρευνας διερευνήθηκαν τα οφέλη της ΕξΑΕ, μέσα από το πρίσμα των μαθητών δευτεροβάθμιας εκπαίδευσης. Εφαρμόστηκε μικτή δειγματοληψία (Στρωματοποιημένη και κατά Συστάδες). Συμμετείχαν 462 μαθητές Γυμνασίων και Λυκείων των νομών Αττικής και Κυκλάδων. Η έρευνα διεξήχθη τον 05/2020. Τα δεδομένα συλλέχθηκαν στο LimeSyrvey, αναλύθηκαν με SPSS (25). Πραγματοποιήθηκε έλεγχος αξιοπιστίας του ερωτηματολογίου με το δείκτη Cronbach’s Alpha, περιγραφική στατιστική, παραγοντική ανάλυση και η δοκιμασία Chi-square.

Το 78,1% των μαθητών ωφελήθηκαν λίγο από την ΕξΑΕ, έναντι του 6,9% των μαθητών που ωφελήθηκαν πολύ από την εφαρμογή της.

Η ΕξΑΕ στήριξε μέσω της πανδημίας το Ελληνικό εκπαιδευτικό σύστημα, σε κάθε βαθμίδα εκπαίδευσης, ωστόσο οι μαθητές Γυμνασίων και Λυκείων, κατά πλειοψηφία, δήλωσαν πως δεν ωφελήθηκαν από αυτή τη μορφή εκπαίδευσης, καθώς δεν ικανοποιήθηκαν οι αρχικές τους προσδοκίες και δεν απέκτησαν τις θεωρητικές γνώσεις που ήλπιζαν ότι θα αποκτήσουν.

Η σύγκριση των ευρημάτων με αντίστοιχα από τη διεθνή βιβλιογραφία αποκαλύπτει κοινά προβλήματα, προκλήσεις αλλά και διαφορές που σχετίζονται με τις ιδιαιτερότητες του εκάστοτε εκπαιδευτικού συστήματος, το επίπεδο τεχνολογικής υποδομής της κάθε χώρας, με τους ιδιαίτερους πολιτισμικούς και οικονομικούς παράγοντες της.

Λέξεις - κλειδιά: Εξ Αποστάσεως Εκπαίδευση, Τηλεκπαίδευση, Τεχνολογίες Πληροφοριών και Επικοινωνιών, Σύγχρονη, Ασύγχρονη. Συντομογραφίες: Απλή Τυχαία Δειγματοληψία (ΑΤΔ), Εξ Αποστάσεως Εκπαίδευση (ΕξΑΕ), Τεχνολογίες Πληροφοριών και Επικοινωνιών (ΤΠΕ)

ΕΙΣΑΓΩΓΗ

Την περίοδο της πανδημίας η εφαρμογή ΤΠΕ με τη χρήση σύγχρονης και ασύγχρονης ΕξΑΕ στήριξε σε παγκόσμιο επίπεδο την εκπαιδευτική κοινότητα σε κάθε εκπαιδευτική βαθμίδα.

Είναι γεγονός ότι τα σχολεία σε χρόνο ρεκόρ εκλαισαν το ένα μετά το άλλο σε παγκόσμιο επίπεδο. Στην Ελλάδα το άνοιγμα των σχολείων, μετά τις καλοκαιρινές διακοπές, σηματοδότησε μια περίοδο αύξησης των κρουσμάτων κορωνοϊού, γεγονός που προκάλεσε ανησυχία για πιθανότητα ενός νέου ξεσπάσματος, με δεδομένο ότι το χειμώνα υπάρχει έξαρση της γρίπης. Οι χώρες της Ε.Ε έλαβαν διαφορετικά μέτρα για το άνοιγμα των σχολείων. Η Ελλάδα ακολούθησε την κοινή πρακτική με τις άλλες χώρες της Ε.Ε. κατά τη διάρκεια της πανδημίας, σύμφωνα με τις συστάσεις του W.H.O. (**Πίνακας 1**).

Πίνακας 1
Ημερομηνίες επανεκκίνησης των σχολείων της Ε.Ε. και μέτρα προστασίας των μαθητών στα σχολεία κατά τη διάρκεια της πανδημίας

Χώρες	Ημερομηνία ανοίγματος σχολείων	Μέτρα προστασίας μετά το άνοιγμα των σχολείων πρωτοβάθμιας και δευτεροβάθμιας εκπαίδευσης
Ελλάδα (Kathimerini, 2020)	14/09/2020	Χρήση μάσκας σε όλους τους χώρους του σχολείου. Χρήση αντισηπτικών. Διαφορετικά διαλείμματα.
Ισπανία (Wires,2020)	Ορισμένα σχολεία λειτούργησαν από 07/09/2020	Διατήρηση απόστασης (τουλάχιστον 1,5m), οι σχολικές εγκαταστάσεις απολυμαίνονταν τουλάχιστον μία φορά ημερησίως, ενώ οι τουαλέτες καθαρίζονταν τρεις φορές κάθε μέρα.
Γαλλία (McAuley, 2020)	01/09/2020	Οι καθηγητές και οι μαθητές άνω των 11 ετών φορούσαν μάσκες σε όλους τους χώρους, εάν δεν ήταν εγγυημένη η ελάχιστη απόσταση του 1m.
Βέλγιο (Naftemporiki, 2020)	01/09/2020	Χρήση μάσκας άνω των 12 ετών.
Δανία (Naftemporiki, 2020)	10/10/2020	Στις σχολικές αίθουσες υπήρχαν 10 – 12 μαθητές οι οποίοι βρίσκονταν σε απόσταση 2m και έπλεναν τα χέρια τους κάθε μιάμιση ώρα, ενώ δεν ήταν υποχρεωτική η χρήση μάσκας.
Μ.Βρετανία (Barr, 2020)	Από αρχές Σεπτέμβρη	Χρήση μάσκας όλων των μαθητών.
Ιταλία (Orlandi, 2020)	14/10/2020	Η μάσκα ήταν υποχρεωτική κατά την άφιξη και αναχώρηση του μαθητή από το σχολείο, αλλά όχι μέσα στην τάξη, αν υπήρχε η απαραίτητη απόσταση. Προσλήφθηκαν 40.000 επιπλέον εκπαιδευτικοί και τα σχολεία προμηθεύτηκαν μονά θρανία για να διασφαλιστούν οι αποστάσεις.
Ολλανδία (Naftemporiki, 2020)	08/2020	Δεν ήταν αναγκαία η απόσταση μεταξύ των μαθητών. Ορισμένα σχολεία απαιτούσαν από τους μεγαλύτερους μαθητές να φορούν μάσκες στους διαδρόμους λόγω έλλειψης χώρου. Οι μεγαλύτεροι μαθητές διατηρούσαν απόσταση από τους δασκάλους.
Γερμανία (Godin, 2020)	10/08/2020	Χρήση μάσκας για τους μαθητές άνω των 15 ετών. Η Βόρεια Ρηνανία-Βεστφαλία ήταν αρχικώς το μόνο κρατίδιο που κατέστησε υποχρεωτική τη μάσκα στα σχολεία, ενώ οι μαθητές σε κρατίδια όπως το Βερολίνο τη φορούσαν μόνο έξω από τις τάξεις.
Πολωνία **(**Bretan, 2020**)**	01/09/2020	Οι αρχές δεν επέβαλαν τη χρήση μάσκας ή τη μείωση του αριθμού των μαθητών στις αίθουσες, τα παιδιά καλούνταν να πλένουν τα χέρια τους συχνά και να αποφεύγουν τις συγκεντρώσεις σε μεγάλες ομάδες.
Σουηδία (Naftemporiki, 2020)	20/08/2020	Οι μάσκες δεν ήταν υποχρεωτικές και το κάθε σχολείο ήταν υπεύθυνο για την επιβολή κανόνων.

Η πανδημία ήταν στην πραγματικότητα η μεγαλύτερη πρόκληση που αντιμετώπισαν ποτέ τα εκπαιδευτικά συστήματα παγκοσμίως και σχετίστηκε άμεσα με την ΕξΑΕ. Αυτό επιβεβαιώνεται από τη διεθνή βιβλιογραφία. Μεταξύ των σχετικών δημοσιευμένων άρθρων περιλαμβάνονται έρευνες και κείμενα για:

- Το άγχος και τον ψυχολογικό αντίκτυπο της επιδημίας COVID-19 σε φοιτητές κολεγίων (Cao et al., 2020).
- Ρεαλιστικές οδηγίες ειδικά γραμμένες για δασκάλους, μαθητές, γονείς και ιδρύματα σχετικά με τον τρόπο διαχείρισης της ΕξΑΕ κατά τη διάρκεια του COVID-19 (Daniel, 2020).
- Την ΕξΑΕ ως (μία και μοναδική λύση) πανάκεια κατά τη διάρκεια της κρίσης του COVID-19 (Dhawan, 2020).
- Πειράματα διαδικτυακής μάθησης σε σχολεία δευτεροβάθμιας εκπαίδευσης κατά τη διάρκεια του κορωνοϊού (Anouti & Naim El Rouadi, 2020).

Η παγκόσμια ανησυχία, μας οδήγησε σε ανάγκη περαιτέρω διερεύνησης αυτής της νέας εκπαιδευτικής κατάστασης.

ΜΕΘΟΔΟΣ ΤΗΣ ΕΡΕΥΝΑΣ

ΤΟ ΔΕΙΓΜΑ ΤΗΣ ΜΕΛΕΤΗΣ

Η έρευνα διεξήχθη το Μάιο του 2020. Επιλέχτηκαν σχολεία με μικτό πληθυσμό αγοριών – κοριτσιών. Το τελικό δείγμα αποτελούνταν από αντιπροσωπευτικό και ομοιογενή αριθμό μαθητών, με σκοπό την αξιοπιστία και την εγκυρότητα της έρευνας (Farmakis, 2015). Τον πληθυσμό της έρευνας αποτέλεσαν μαθητές Γυμνάσιων και Λυκείων. Οι περιοχές που διεξήχθη η έρευνα ήταν σχολεία της Αθήνας και της Πάρου. Στην έρευνα συμμετείχαν 3 Γυμνάσια, 3 Λύκεια από την Αττική και 3 Γυμνάσια, 3 Λύκεια από τις Κυκλάδες. Αναλυτικότερα, το δείγμα αποτελούνταν από 12 σχολεία που το κάθε ένα είχε τρεις διαφορετικές τάξεις (Α', Β', Γ').

Κατά το δειγματοληπτικό σχεδιασμό αποφασίστηκε η συμμετοχή 500 μαθητών, οι 300 φοιτούσαν σε Γυμνάσια, (50 ανά σχολείο), ενώ οι 200 σε Λύκεια, (34 ανά σχολείο). Ο τελικός αριθμός των συμμετεχόντων της έρευνας ήταν 462 μαθητές, Πίνακας 3, αριθμός ικανοποιητικός για την αμερόληπτη και χωρίς προκαταλήψεις κατάθεση των απόψεων τους (Cohen et al., 2017).

Η ΜΕΘΟΔΟΣ ΤΗΣ ΔΕΙΓΜΑΤΟΛΗΨΙΑΣ

Κατά το δειγματοληπτικό σχεδιασμό αποφασίστηκε η εφαρμογή μικτής δειγματοληψίας, ως η καταλληλότερη μέθοδος, για αντιπροσωπευτικότερο δείγμα του πληθυσμού (Collins et al, 2007 · Sharp et al., 2011).

Επιλέχθηκαν για την έρευνα οι νομοί Αττικής και Κυκλάδων (στρωματοποιημένη δειγματοληψία). Κάθε ένας εξ αυτών αποτέλεσε διαφορετικό στρώμα της έρευνας. Η ιδιαιτερότητα της συγκεκριμένης μελέτης ήταν η συμμετοχή πληθυσμών από αστικές και ημιαστικές (νησιωτικές) περιοχές.

Στη συνέχεια εφαρμόστηκε η κατά συστάδες απλή τυχαία δειγματοληψία πολλών σταδίων ίσου μεγέθους (Kamalu et al., 2024). Η δειγματοληψία ήταν τυχαία διότι στα διάφορα στάδια της, οι σύνθετες μονάδες επιλέχθηκαν με απλή τυχαία δειγματοληψία (Chalikias et al., 2015). Τα μέλη του πληθυσμού προσεγγίστηκαν με έμμεσο τρόπο, μέσω μεγαλύτερων ομάδων στις οποίες ανήκει το κάθε μέλος. Επιλέχθηκαν ισομεγέθη δείγματα των πληθυσμών της έρευνας.

Αναλογικός καταμερισμός μεταξύ δειγμάτων και πληθυσμών δεν εφαρμόστηκε διότι, προέκυπταν δείγματα μαθητών των Κυκλάδων πολύ μικρά για να διεξαχθούν συμπεράσματα (Zafiropoulos, 2010). Η κατά συστάδες δειγματοληψία πραγματοποιείται σε διάφορα στάδια, ώστε να εξυπηρετηθούν οι ανάγκες της έρευνας (Farmakis, 2015). Κατά το δειγματοληπτικό σχεδιασμό η δειγματοληψία εφαρμόστηκε σε 4 στάδια:

- 1ο στάδιο, με ΑΠΔ, πραγματοποιήθηκε η επιλογή της πρωτογενούς δειγματοληπτικής μονάδας. Από τις περιφέρειες του νομού Αττικής επιλέχθηκε με κλήρωση η Δ' Αθήνας. Από τις περιφέρειες του νομού Κυκλάδων επιλέχθηκε η Δ' Κυκλάδων.
- 2ο στάδιο, με ΑΠΔ, επιλέχθηκε η δευτερογενής δειγματοληπτική μονάδα που αφορούσε τα σχολεία της έρευνας.
- 3ο στάδιο, από τα σχολεία της έρευνας επιλέχθηκαν τα προς μελέτη τμήματα.
- 4ο στάδιο, από τα τμήματα των σχολείων επιλέχθηκαν οι μαθητές. Η επιλογή του δείγματος πραγματοποιήθηκε σε επίπεδο μεμονωμένων μελών του πληθυσμού (Papageorgiou, 2015).

Η ΔΟΜΗ ΤΟΥ ΕΡΩΤΗΜΑΤΟΛΟΓΙΟΥ

Πραγματοποιήσαμε ποσοτική έρευνα με χρήση κατάλληλα δομημένων ερωτηματολογίων (Iseris, 2016). Μοιράστηκαν ερωτηματολόγια και στις τρεις τάξεις (Α', Β', Γ') κάθε σχολείου. Στη σύνταξη του ερωτηματολογίου, χρησιμοποιήθηκαν σαφείς ερωτήσεις κλειστού τύπου, με χρήση απλής γλώσσας και ύπαρξης κατάλληλων επεξηγήσεων. Το ερωτηματολόγιο αποτελούνταν από δύο μέρη. Οι ερωτήσεις ήταν διαβαθμισμένης κλίμακας τύπου Likert με τρεις

διαβαθμισμένες απαντήσεις «λίγο», «αρκετά», «πολύ». Ο χρόνος συμπλήρωσης των ερωτηματολογίων διαρκούσε 10 λεπτά. Η δομή του ερωτηματολογίου παρουσιάζεται στον **Πίνακα 2**

Πίνακας 2.
Δομή ερωτηματολογίου

Τμήματα	Είδος ερωτήσεων	Πλήθος ερωτήσεων
Πρώτο	Δημογραφικά στοιχεία	3
Δεύτερο	Οφέλη από την ΕξΑΕ	18

Η ΣΤΑΤΙΣΤΙΚΗ ΑΝΑΛΥΣΗ ΤΩΝ ΔΕΔΟΜΕΝΩΝ

Κατά τη στατιστική ανάλυση πραγματοποιήθηκε:

- Περιγραφική στατιστική ανάλυση
- Έλεγχος αξιοπιστίας του ερωτηματολογίου με το δείκτη Cronbach's Alpha.
- Παραγοντική ανάλυση
- Chi-square test για να διερευνηθούν οι σημαντικότερες συσχετίσεις μεταξύ των μεταβλητών που απαρτίζουν το ερευνητικό ερώτημα, «βαθμός ικανοποίησης από τα οφέλη της ΕξΑΕ».

ΟΙ ΠΕΡΙΟΡΙΣΜΟΙ ΤΗΣ ΜΕΛΕΤΗΣ

Παρουσιάστηκαν μεθοδολογικοί περιορισμοί που αφορούσαν το μέγεθος του δείγματος, την έλλειψη προηγούμενης έρευνας, καθώς επίσης χρονικοί περιορισμοί και περιορισμοί μεροληψίας και φόβου λόγω πανδημίας (Alex, 2023).

ΑΠΟΤΕΛΕΣΜΑΤΑ ΤΗΣ ΕΡΕΥΝΑΣ

ΠΕΡΙΓΡΑΦΙΚΗ ΣΤΑΤΙΣΤΙΚΗ

Στον **Πίνακα 3** φαίνονται οι συμμετέχοντες στην έρευνα. Οι μαθήτριες (52,06%) που έλαβαν μέρος στην έρευνα ήταν ελαφρώς περισσότερες από τους μαθητές (47,94%), ενώ οι μαθητές των Γυμνασίων (62,47%) ήταν περισσότεροι από των Λυκείων (37,53%).

Πίνακας 3.
Συμμετέχοντες στην έρευνα.

Φύλο	Πλήθος συμμετοχών	Ποσοστό
Κορίτσια	240	52,06%
Αγόρια	222	47,94%
Σχολεία	Πλήθος συμμετοχών	Ποσοστό
Γυμνάσια(6)	288	62,47%
Λύκεια (6)	174	37,53%
Συμμετέχοντες στην έρευνα	468	100%
Σύνολο ερωτηματολογίων	462	97,72%

ΕΛΕΓΧΟΣ ΑΞΙΟΠΙΣΤΙΑΣ

Προσδιορίστηκε ο συντελεστής αξιοπιστίας Cronbach's Alpha για να ελεγχθεί εάν οι ερωτήσεις παρουσιάζουν υψηλή μεταξύ τους συνοχή (Markos, 2012). Ο συντελεστής είχε τιμή: a = 0,753.

ΠΑΡΑΓΟΝΤΙΚΗ ΑΝΑΛΥΣΗ

Πριν από κάθε ερευνητικό ερώτημα, αναλύθηκαν οι μεταβλητές με τη μεθοδολογία της ανάλυσης παραγόντων. Σκοπός ήταν να δούμε την αλληλεπίδραση των μεταβλητών ως προς την μεταξύ τους συνδιακύμανση, ώστε να επικεντρωθούμε σε λίγες μόνο μεταβλητές (ερωτήσεις) όπου οι απαντήσεις τους παίζουν καθοριστικό ρόλο στην ερμηνεία του ερευνητικού ερωτήματος. Η ανάλυση παραγόντων έδειξε ότι από τις 18 ερωτήσεις που συνδέονταν με το ερευνητικό ερώτημα, οι 9 είχαν τη μεγαλύτερη σχέση μεταξύ τους με τιμή Extraction του Factor Analysis μεγαλύτερη από 0,6 και τιμή του στατιστικού κριτηρίου Kaiser Meyer Olkin αρκετά υψηλή 0,813.

ΕΦΑΡΜΟΓΗ ΤΗΣ ΔΟΚΙΜΑΣΙΑΣ CHI-SQUARE

Για κάθε σημαντική μεταβλητή του ερευνητικού ερωτήματος μελετήθηκε η σχέση της με τη μεταβλητή «βαθμός ικανοποίησης από τα οφέλη της ΕξΑΕ». Για το σκοπό αυτό φτιάχτηκαν ξεχωριστοί πίνακες για κάθε ζεύγος μεταβλητών, ένας εκ των οποίων είναι ο **Πίνακας 4**.

Πίνακας 4.
Chi-square για το βαθμό ενδιαφέροντος της σύγχρονης ΕξΑΕ και το βαθμό ικανοποίησης από τα οφέλη που προσφέρει. Η διαφορά είναι στατιστικά σημαντική, (p <0,001).

		Βαθμός ενδιαφέροντος για τη σύγχρονη ΕξΑΕ (Webex).			
		Λίγο	**Αρκετά**	**Πολύ**	**Σύνολο**
Βαθμός ικανοποίησης από τα οφέλη της ψηφιακής εκπαίδευσης (Βελτίωση θεωρητικών γνώσεων)	**Λίγο**	27,3% (126)	27,3% (126)	23,6% (109)	78,1% (361)
	Αρκετά	2,6% (12)	4,8% (22)	7,6% (35)	14,9% (69)
	Πολύ	0,6% (3)	1,9% (9)	4,3% (20)	6,9% (32)
	Σύνολο	30,5% (141)	34% (157)	35,5% (164)	100% (462)

Στον **Πίνακα 4** φαίνεται πως οι μαθητές δεν έδειξαν ενδιαφέρον για την ΕξΑΕ και δεν ωφελήθηκαν από αυτή. Με την εφαρμογή παρόμοιων πινάκων δημιουργήθηκε ο **Πίνακας 5**.

Πίνακας 5.
Απαντήσεις των μαθητών επί των σημαντικότερων ερωτημάτων που αφορούν το βαθμό ικανοποίησης από τα οφέλη της ΕξΑΕ.

Α/Α	**Προφίλ μαθητών**		**Οφέλη από την ψηφιακή εκπαίδευση (Βελτίωση θεωρητικών γνώσεων)**				
		Συνολικά Ποσοστά ικανοποίησης μαθητών	**Λίγο**	**Αρκετά**	**Πολύ**	**Σύνολο**	**Τιμή p Chi-square**
	Μεταβλητές		78,1% (361)	14,9% (69)	6,9% (32)	100% (462)	
1	**Το εκπαιδευτικό υλικό της ασύγχρονης ΕξΑΕ (e-class) ήταν πολύ ενδιαφέρον.***	Λίγο 50,4% Πολύ 20,6%	13,4% (62)	3,9% (18)	3,2% (15)		
2	**Η χρήση του εκπαιδευτικού υλικού της ασύγχρονης ΕξΑΕ (e-class) ενίσχυσε σημαντικά την εκπαιδευτική διαδικασία.***	Λίγο 68,4% Πολύ 10,2%	5,8% (27)	2,6% (12)	1,7% (8)		
3	**Το εκπαιδευτικό υλικό της ασύγχρονης ΕξΑΕ (e-class) ενημερωνόταν συχνά, ως προς τη δομή και το περιεχόμενο.***	Λίγο 46,1% Πολύ 21,6%	13,9% (64)	4,5% (21)	3,2% (15)		<0,001
4	**Η συμβατική διδασκαλία ενισχύεται σημαντικά από την ΕξΑΕ.***	Λίγο 70,3% Πολύ 11,9%	5,4% (25)	3,7% (17)	2,8% (13)		

Α/Α	Προφίλ μαθητών		Οφέλη από την ψηφιακή εκπαίδευση (Βελτίωση θεωρητικών γνώσεων)				
		Συνολικά Ποσοστά ικανοποίησης μαθητών	Λίγο	Αρκετά	Πολύ	Σύνολο	Τιμή p Chi-square
	Μεταβλητές		78,1% (361)	14,9% (69)	6,9% (32)	100% (462)	
5	**Οι μαθητές ήταν πολύ ευχαριστημένοι από τον τρόπο που πραγματοποιήθηκαν τα εξ αποστάσεως σύγχρονα μαθήματα.***	Λίγο 40,7% Πολύ 21,9%	12,6% (58)	5,6% (26)	3,7% (17)		
6	**Υπήρξε μεγάλο ενδιαφέρον για τη σύγχρονη ΕξΑΕ (Webex).**	Λίγο 30,5% Πολύ 35,5%	23,6% (109)	7,6% (35)	4,3% (20)		<0,001
7	**Οι μαθητές ήταν πολύ ευχαριστημένοι από τις δεξιότητες πληροφορικής που απέκτησαν.**	Λίγο 66,7% Πολύ 11,9%	6,7% (31)	2,8% (13)	2,4% (11)		
8	**Οι μαθητές ήταν πολύ ευχαριστημένοι από δεξιότητες που απέκτησαν στα εργαστηριακά μαθήματα.**	Λίγο 85,5% Πολύ 0,2%	0,0% (0)	0,0% (0)	0,2% (1)		0,05
9	**Οι μαθητές θεωρούν σημαντική την απουσία πίνακα.**	Λίγο 21,6% Πολύ 65,7%	43,7% (202)	9,5% (44)	3,5% (16)		0,663

Οι μεταβλητές που συμπεριλήφθησαν στον παράγοντα του SPSS και θεωρούνται οι πιο σημαντικές ως προς την ερμηνεία του ερευνητικού ερωτήματος είναι όσες παρουσιάζονται με (*).

Η ανάλυση (Chi-square) έδειξε ότι το 78,1% των μαθητών δεν έμεινε ικανοποιημένο από τις θεωρητικές γνώσεις που απέκτησε (ωφελήθηκε λίγο από την ΕξΑΕ), ενώ το 6,9% θεωρούσε ότι οι γνώσεις του βελτιώθηκαν σημαντικά, (**Πίνακας 3, Πίνακας 4**).

ΣΥΜΠΕΡΑΣΜΑΤΑ

Από όλους όσοι ωφελήθηκαν λίγο από την ΕξΑΕ (78,1%):

1. το 13,4% υποστήριξε πως το υλικό της ασύγχρονης ΕξΑΕ είναι ενδιαφέρον, (p<0,001).
2. το 5,8% δήλωσε πως η χρήση της ασύγχρονης ΕξΑΕ ενίσχυσε σημαντικά την εκπαιδευτική διαδικασία, (p<0,001).
3. το 13,9% δήλωσε πως το εκπαιδευτικό υλικό της ασύγχρονης ΕξΑΕ ήταν αρκετά ενημερωμένο ως προς τη δομή και το περιεχόμενο, (p<0,001).
4. το 5,4% ανέφερε πως ενισχύεται σημαντικά η συμβατική διδασκαλία από την ΕξΑΕ, (p<0,001).
5. το 12,6% δήλωσε ευχαριστημένο από τον τρόπο διεξαγωγής των μαθημάτων σύγχρονης ΕΑΕ, (p<0,001).
6. το 23,6% ανέφερε πως τα σύγχρονα μαθήματα ΕξΑΕ ήταν πολύ ενδιαφέροντα, (p<0,001).
7. το 6,7% δήλωσε πως βελτιώθηκαν σημαντικά οι δεξιότητες τους στην πληροφορική, (p<0,001).
8. το 0,2% δήλωσε πως βελτιώθηκαν οι δεξιότητες στους στα εργαστηριακά μαθήματα, (p=0,05).
9. το 43,7% θεωρούσε σημαντική την απουσία πίνακα, (p>0,05).

Από όλους όσοι ωφελήθηκαν πολύ από την ΕξΑΕ (6,9%):

1. το 3,2% δήλωσε ότι αυτό συνέβη χάρη στο ενδιαφέρον υλικό της ασύγχρονης εκπαίδευσης, (p<0,001).
2. το 1,7% δήλωσε ότι η χρήση της ασύγχρονης ΕξΑΕ ενίσχυσε σημαντικά την εκπαιδευτική διαδικασία, (p<0,001).
3. το 3,2% ανέφερε πως το e-class ήταν πολύ ενημερωμένο, (p<0,001).

4. το 2,8% ανέφερε πως ενισχύεται σημαντικά η συμβατική διδασκαλία από την ΕξΑΕ, (p<0,001).
5. το 3,7% ανέφερε πως ήταν ικανοποιημένο από τον τρόπο διεξαγωγής των μαθημάτων σύγχρονης ΕξΑΕ, (p<0,001).
6. το 4,3% ανέφερε πως τα σύγχρονα μαθήματα ΕξΑΕ ήταν πολύ ενδιαφέροντα, (p<0,001).
7. το 2,4% ανέφερε πως βελτιώθηκαν σημαντικά οι δεξιότητες τους στην πληροφορική, (p<0,001),
8. το 0,2% δήλωσε πως βελτιώθηκαν οι δεξιότητες στους στα εργαστηριακά μαθήματα, (p=0,05).
9. το 3,5% θεωρούσε σημαντική την απουσία πίνακα, (p=0,663).

Εν κατακλείδι, η ΕξΑΕ μπορεί να στήριξε το Ελληνικό εκπαιδευτικό σύστημα, ωστόσο δεν ωφέλησε στο βαθμό που όφειλε, διότι δεν οργανώθηκε με μεθοδικότητα, βάσει παιδαγωγικών μεθόδων και τεχνικών. Επιπλέον, δεν ακολουθήθηκαν οι αρχές που διέπουν την ΕξΑΕ με αποτέλεσμα να μη γίνει αποδεκτή από τους μαθητές.

ΠΕΡΙΛΗΨΗ

Η παρούσα μελέτη διερευνά τη χρήση της μάθησης μέσω κινητών συσκευών στη διδασκαλία της Φυσικής στο δημοτικό σχολείο, με ιδιαίτερη έμφαση στην έννοια της Θερμότητας. Το θεωρητικό πλαίσιο βασίζεται σε πολλές θεωρίες μάθησης, όπως η θεωρία της συμπεριφορικής μάθησης, η θεωρία της ανακαλυπτικής μάθησης, ο κονστρουκτιβισμός και ο κοινωνικός κονστρουκτιβισμός, για να παράσχει μια ολιστική εξήγηση της επιστημονικής μάθησης των μαθητών. Η έρευνα διερευνά επίσης την παρούσα κατάσταση της επιστημονικής εκπαίδευσης στην Ελλάδα, δίνοντας έμφαση στις προοπτικές και τις προκλήσεις των μαθητών στην κατανόηση της έννοιας της θερμότητας. Εξετάζει τα κίνητρα, τα οφέλη και τα μειονεκτήματα της μάθησης μέσω κινητών συσκευών, αναλύοντας τις έννοιες του σχεδιασμού της κινητής μάθησης και τη διαδικασία παραγωγής εκπαιδευτικών εφαρμογών.

Η μελέτη χρησιμοποιεί έναν συνδυασμό ερευνητικών προσεγγίσεων ευχρηστίας και αποτελεσματικότητας, χρησιμοποιώντας μια μεικτή μεθοδολογική προσέγγιση. Η μελέτη ευχρηστίας εξετάζει το μέγεθος της ευκολίας και της εμπλοκής της εκπαιδευτικής εφαρμογής, ενώ η έρευνα αποτελεσματικότητας μετρά την επίδραση της εφαρμογής στην κατανόηση της Θερμότητας από τους μαθητές. Η προσέγγιση της μελέτης περίπτωσης χρησιμοποιείται για την παροχή πολύτιμων πληροφοριών σχετικά με τις μαθησιακές εμπειρίες και τα αποτελέσματα των μαθητών. Το δείγμα αποτελείται από μαθητές δημοτικού σχολείου, ενώ τα δεδομένα συλλέγονται με τεστ πριν και μετά την εφαρμογή, ερωτηματολόγια και παρατηρήσεις.

Τα ευρήματα δείχνουν ότι η χρήση εφαρμογών κινητής μάθησης μπορεί να βελτιώσει σημαντικά τη συμμετοχή των μαθητών και την κατανόηση των ιδεών της φυσικής. Η αξιολόγηση της ευχρηστίας αποκαλύπτει σημαντικά επίπεδα ευχαρίστησης και απλότητας της χρήσης, ενώ η αξιολόγηση της αποτελεσματικότητας καταδεικνύει σημαντικές βελτιώσεις στη συγκράτηση πληροφοριών και στις ικανότητες εφαρμογής των μαθητών. Η έρευνα συνεχίζεται με τη συζήτηση των αναμενόμενων πλεονεκτημάτων της μάθησης μέσω κινητών συσκευών, προσφέροντας τεκμηριωμένες προτάσεις προς τους εκπαιδευτικούς και τους υπεύθυνους χάραξης πολιτικής για τη διευκόλυνση της χρήσης της τεχνολογίας στην επιστημονική εκπαίδευση.

Λέξεις – κλειδιά: voice assistant, Android, ευχρηστία, αποτελεσματικότητα, εφαρμογή,Η Μάθηση μέσω Κινητών Συσκευών (M-Learning) στη Διδασκαλία της Φυσικής στο Δημοτικό Σχολείο

Η ραγδαία εξέλιξη της τεχνολογίας έχει φέρει επανάσταση σε πολλούς τομείς της ανθρώπινης δραστηριότητας, και η εκπαίδευση δεν αποτελεί εξαίρεση. Οι κινητές συσκευές, όπως τα smartphones και τα tablets, έχουν γίνει αναπόσπαστο κομμάτι της καθημερινότητάς μας, και η ενσωμάτωσή τους στην εκπαιδευτική διαδικασία, γνωστή ως m-learning (mobile learning), παρουσιάζει σημαντικές προοπτικές. Ειδικότερα, στη διδασκαλία των Φυσικών Επιστημών στο δημοτικό σχολείο, όπου η πειραματική προσέγγιση και η βιωματική μάθηση διαδραματίζουν κεντρικό ρόλο, η χρήση κινητών συσκευών μπορεί να προσδώσει νέα δυναμική και να βελτιώσει την αποτελεσματικότητα της διδασκαλίας.

ΤΟ ΠΑΙΔΑΓΩΓΙΚΟ ΠΛΑΙΣΙΟ ΚΑΙ ΤΑ ΟΦΕΛΗ ΤΟΥ M-LEARNING

Η διδασκαλία της Φυσικής στο δημοτικό σχολείο έχει ως βασικό στόχο να προκαλέσει το ενδιαφέρον των μαθητών για τον φυσικό κόσμο, να αναπτύξει την παρατηρητικότητα και την κριτική τους σκέψη, και να τους εξοικειώσει με βασικές επιστημονικές έννοιες. Το παραδοσιακό μοντέλο διδασκαλίας, βασισμένο κυρίως στη θεωρία και την απομνημόνευση, συχνά αδυνατεί να εμπλέξει ενεργά τους μικρούς μαθητές (Ally, 2009). Αντίθετα, το m-learning, μέσω της διαδραστικής και εξατομικευμένης μάθησης που προσφέρει, μπορεί να γεφυρώσει αυτό το χάσμα (Sung, Chang & Liu, 2016).

Ένα από τα σημαντικότερα οφέλη του m-learning είναι η φορητότητα των συσκευών. Αυτή η δυνατότητα επιτρέπει η μάθηση να μην περιορίζεται μόνο εντός της σχολικής τάξης, αλλά να επεκτείνεται σε οποιοδήποτε περιβάλλον, όπως το σπίτι, το πάρκο ή ένα μουσείο. Για τη Φυσική, αυτό είναι ιδιαίτερα σημαντικό, καθώς οι μαθητές μπορούν να παρατηρήσουν φυσικά φαινόμενα στην πραγματική τους διάσταση και να συνδέσουν τη θεωρία με την πράξη (Kukulska-Hulme, 2012). Για παράδειγμα, μπορούν να χρησιμοποιήσουν εφαρμογές για να μετρήσουν την ταχύτητα ενός κινούμενου αντικειμένου στην αυλή του σχολείου ή να καταγράψουν ήχους και να τους αναλύσουν.

Επιπλέον, οι κινητές συσκευές προσφέρουν πρόσβαση σε πλούσιο εκπαιδευτικό υλικό. Υπάρχουν αναρίθμητες εφαρμογές, προσομοιώσεις, εκπαιδευτικά βίντεο και διαδραστικά παιχνίδια που μπορούν να καταστήσουν τις αφηρημένες έννοιες της Φυσικής πιο κατανοητές και ελκυστικές. Οι μαθητές μπορούν να εξερευνήσουν εικονικά εργαστήρια, να πραγματοποιήσουν πειράματα με ασφάλεια και να οπτικοποιήσουν δύσκολα φαινόμενα, όπως η κυκλοφορία του ηλεκτρικού ρεύματος ή η διάθλαση του φωτός. Αυτό ενισχύει τη βιωματική μάθηση και την ενεργό συμμετοχή, καθιστώντας τους μαθητές συνδημιουργούς της γνώσης (Vavoula & Sharples, 2009).

Η ενσωμάτωση των κινητών συσκευών στη διδασκαλία της Φυσικής στο δημοτικό σχολείο μπορεί να λάβει διάφορες μορφές. Οι εκπαιδευτικοί μπορούν να χρησιμοποιήσουν εφαρμογές για:

Διαδραστικές ασκήσεις και κουίζ, για την εμπέδωση των εννοιών και την άμεση ανατροφοδότηση.

Προσομοιώσεις και εικονικά πειράματα, για την κατανόηση σύνθετων φαινομένων.

Εκπαιδευτικά παιχνίδια (gamification), για την αύξηση του κινήτρου και την ψυχαγωγική μάθηση (Johnson et al., 2016).

Εργαλεία συλλογής και ανάλυσης δεδομένων: Οι αισθητήρες των συσκευών μετατρέπουν τα κινητά σε φορητά εργαστήρια.

Δημιουργία περιεχομένου: Οι μαθητές παράγουν βίντεο, παρουσιάσεις ή ημερολόγια παρατήρησης, ενισχύοντας τη δημιουργικότητα.

Παρά τα πολλαπλά οφέλη, η επιτυχής ενσωμάτωση του m-learning στη διδασκαλία της Φυσικής αντιμετωπίζει και ορισμένες προκλήσεις. Μία από τις σημαντικότερες είναι η έλλειψη επαρκούς υποδομής και κατάλληλης επιμόρφωσης των εκπαιδευτικών (Traxler, 2010). Πολλοί μπορεί να μην είναι εξοικειωμένοι με τις τεχνολογίες ή να διστάζουν να τις ενσωματώσουν στη διδακτική πράξη. Επίσης, η ασφάλεια στο διαδίκτυο, η προστασία των προσωπικών δεδομένων και η διαχείριση της τάξης αποτελούν σημαντικά ζητήματα (UNESCO, 2018).

Συνοψίζοντας, η μάθηση μέσω κινητών συσκευών προσφέρει μια συναρπαστική ευκαιρία να μετασχηματιστεί η διδασκαλία της Φυσικής στο δημοτικό σχολείο. Με σωστό σχεδιασμό, τεχνολογική υποστήριξη και επιστημονικά τεκμηριωμένη επιμόρφωση, το m-learning μπορεί να βελτιώσει την κατανόηση των εννοιών και να καλλιεργήσει θετική στάση προς τις Φυσικές Επιστήμες (Sung, Chang, & Liu, 2016; Traxler, 2010).

ΕΡΕΥΝΗΤΙΚΗ ΔΟΜΗ ΚΑΙ ΣΚΟΠΟΙ

Η ερευνητική διαδικασία οργανώθηκε σε τρεις άξονες:

Ευχρηστία: Διερευνήθηκε η φιλικότητα της εφαρμογής προς τον χρήστη, η πολυπλοκότητα της πλοήγησης, η ανάγκη για εξωτερική βοήθεια, και η γενική εμπειρία χρήσης.

Αποτελεσματικότητα: Εξετάστηκε η γνωστική επίδραση της χρήσης της εφαρμογής, μέσω συγκριτικής ανάλυσης pre-test και post-test ερωτηματολογίων.

Ικανοποίηση και αποδοχή: Μετρήθηκε η ικανοποίηση από τη χρήση της εφαρμογής από μαθητές και εκπαιδευτικούς, μέσω ημιδομημένων συνεντεύξεων και του SUS.

Η επιλογή της ημιπειραματικής μεθοδολογίας ενισχύθηκε από τη φύση της παρέμβασης που πραγματοποιήθηκε, καθώς εξετάστηκε η διαφορά επιδόσεων πριν και μετά τη χρήση της εφαρμογής (Cohen et al., 2018).

ΕΡΕΥΝΗΤΙΚΗ ΠΡΟΣΕΓΓΙΣΗ ΕΥΧΡΗΣΤΙΑΣ ΕΦΑΡΜΟΓΗΣ ΓΙΑ ΚΙΝΗΤΕΣ ΣΥΣΚΕΥΕΣ ΜΕ USABILITY TEST

Η επιτυχία μιας εφαρμογής για κινητές συσκευές εξαρτάται σε μεγάλο βαθμό από την ευχρηστία της, δηλαδή το πόσο εύκολη και ευχάριστη είναι η χρήση της για τους χρήστες. Μια εφαρμογή μπορεί να προσφέρει εντυπωσιακές λειτουργίες, αλλά αν είναι δύσχρηστη, οι χρήστες θα την εγκαταλείψουν γρήγορα. Η ερευνητική προσέγγιση ευχρηστίας (usability research) είναι μια συστηματική διαδικασία που στοχεύει στον εντοπισμό προβλημάτων ευχρηστίας και στη βελτίωση της εμπειρίας του χρήστη (User Experience - UX). Ένα από τα πιο αποτελεσματικά εργαλεία αυτής της προσέγγισης είναι το usability test (δοκιμή ευχρηστίας).

Η διεξαγωγή αυτής της έρευνας είναι ωφέλιμη και επίκαιρη, καθώς εξετάζεται αν η εφαρμογή και ο τρόπος λειτουργίας της είναι κατανοητός από τον μαθητή, αν είναι εύκολη στη χρήση της και στη μάθησή της και αν είναι κατάλληλη για το επίπεδο των μαθητών.

Τα αποτελέσματα της έρευνας μπορούν να αξιοποιηθούν από την εκπαιδευτική κοινότητα, ώστε οι εκπαιδευτικοί να ανακαλύψουν το πόσο αποτελεσματικό παιδαγωγικό εργαλείο μπορεί να αποδειχθεί η χρήση μια Ηλεκτρονικής εφαρμογής σε κάποιο στάδιο της διδακτικής διαδικασίας ώστε να επιτευχθεί η ενεργή εμπλοκή των μαθητών στη διαδικασία της μάθησης.

Επίσης, αν η εφαρμογή αποδειχθεί χρήσιμη και εύχρηστη, θα μπορούσε να εμπλουτιστεί με περισσότερα θέματα.

ΑΠΟΤΕΛΕΣΜΑΤΑ ΕΡΕΥΝΑΣ ΕΥΧΡΗΣΤΙΑΣ ΕΦΑΡΜΟΓΗΣ (USABILITY TEST)

Το usability test είναι μια ποιοτική μέθοδος έρευνας κατά την οποία πραγματικοί χρήστες αλληλεπιδρούν με την εφαρμογή (ή ένα πρωτότυπο αυτής) σε ένα ελεγχόμενο περιβάλλον, ενώ ένας ερευνητής παρακολουθεί και καταγράφει τη συμπεριφορά τους. Ο στόχος δεν είναι να ελεγχθεί η λειτουργικότητα της εφαρμογής (αν δουλεύει δηλαδή), αλλά το πώς οι χρήστες την χρησιμοποιούν, ποιες δυσκολίες αντιμετωπίζουν, και πώς νιώθουν κατά τη διάρκεια της αλληλεπίδρασης

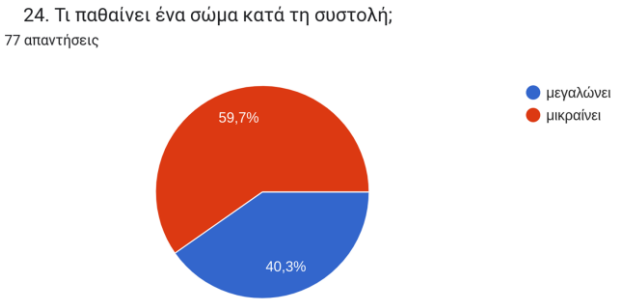
Στην περίπτωση της Εφαρμογής Φυσικογνωμικά, ο έλεγχος ευχρηστίας πραγματοποιήθηκε για να προσδιοριστεί ο βαθμός στον οποίο κατανοούν οι χρήστες το προϊόν, πόσο εύκολο είναι στην εκμάθησή του, πόσο εύκολο στη χρήση του και πόσο ελκυστικό είναι για τους χρήστες υπό συγκεκριμένες συνθήκες και απαιτήσεις.

Το δείγμα των ερωτώμενων αποτέλεσαν 14 εκπαιδευτικοί Πρωτοβάθμιας εκπαίδευσης οι οποίοι αφού έκαναν χρήση της Ε.Φ., απάντησαν στο ερωτηματολόγιο Ευχρηστίας

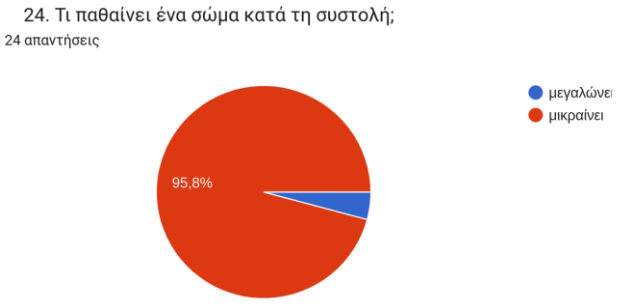
ΑΠΟΤΕΛΕΣΜΑΤΑ ΕΡΕΥΝΗΤΙΚΗΣ ΠΡΟΣΕΓΓΙΣΗΣ ΑΠΟΤΕΛΕΣΜΑΤΙΚΟΤΗΤΑΣ ΕΦΑΡΜΟΓΗΣ

Η ερευνητική προσέγγιση της αποτελεσματικότητας μιας εφαρμογής για κινητές συσκευές στη διδασκαλία της Φυσικής στο δημοτικό σχολείο είναι πολύπλευρη. Δεν αρκεί απλώς η ύπαρξη της τεχνολογίας, αλλά απαιτείται συστηματική διερεύνηση για να διασφαλιστεί ότι αυτή προσφέρει ουσιαστική παιδαγωγική προστιθέμενη αξία,

βελτιωμένα μαθησιακά αποτελέσματα και συμβάλλει στην επίτευξη των μαθησιακών στόχων με τον καλύτερο δυνατό τρόπο.



Βασικό πεδίο της έρευνας Αποτελεσματικότητας της εφαρμογής αφορά την κατανόηση των σχετικών εννοιών από μαθητές. Ως εργαλείο μέτρησης χρησιμοποιήθηκε ένα ερωτηματολόγιο γνωστικού περιεχομένου, το οποίο διαμοιράστηκε σε 2 φάσεις, δηλαδή πριν και μετά την χρήση της εφαρμογής.

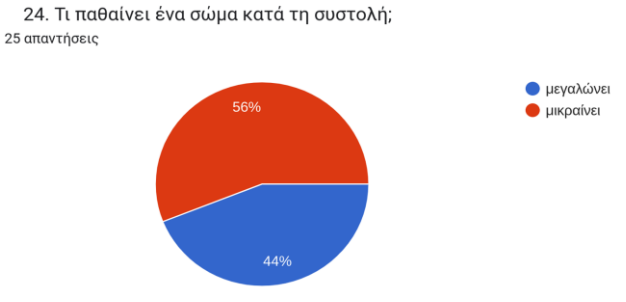


Σκοπός της 1ης φάσης ήταν να διαπιστωθεί το επίπεδο των γνώσεων που είχαν οι μαθητές πάνω σε θέματα του κεφαλαίου της Θερμότητας. Επισημαίνεται ότι είναι μια ενότητα που είχαν ήδη διδαχθεί στο σχολείο όλοι οι μαθητές. Τα αποτελέσματα αυτής της φάσης έδειξαν ότι μεγάλο ποσοστό των μαθητών δεν είχε κατακτήσει το γνωστικό αντικείμενο μέσα από την τυπική εκπαιδευτική διαδικασία. Έτσι, ερωτήσεις που αφορούσαν βασικές έννοιες της Φυσικής και έχουν εφαρμογή στην καθημερινότητα του ανθρώπου, δεν είχαν σταθερές απαντήσεις από την πλειοψηφία του δείγματος κι αυτό φάνηκε από τη μεγάλη διασπορά των απαντήσεων στις ερωτήσεις, όπως είναι ορατό και στα διαγράμματα που ακολουθούν.

Κατά τη 2η φάση της έρευνας δόθηκαν τα ερωτηματολόγια στους ίδιους μαθητές αφού έκαναν χρήση της Ε.Φ..

Ερώτηση με α/α 24. Τι παθαίνει ένα σώμα κατά τη συστολή;

Διαγράμματα 1α-1β
Αποτελεσματικότητα στην κατανόηση εννοιών – Συστολή (Πειραματική ομάδα)

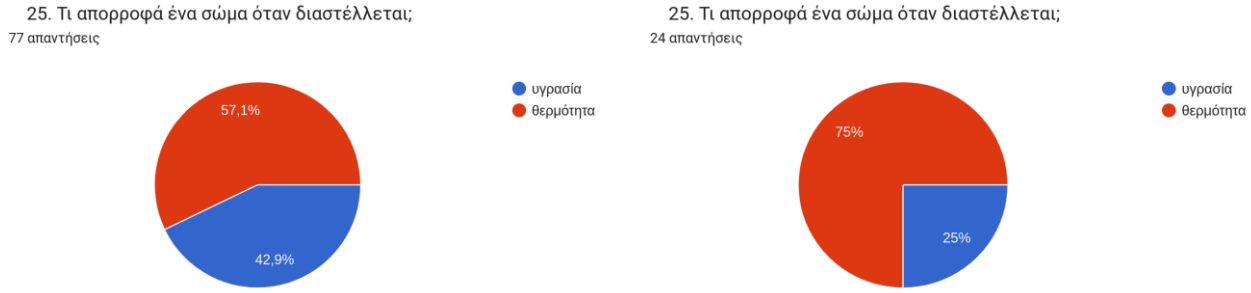


Αλλαγή φυσικής κατάστασης σώματος κατά τη Συστολή. Από τη θεωρητική προσέγγιση του Βιβλίου των Φυσικών της Ε τάξης Δημοτικού και τα συμπεράσματα που εξάγονται από τις πειραματικές εργασίες, είναι γνωστό ότι ”Όταν ένα σώμα αποβάλλει θερμότητα, ψύχεται. Τότε μικραίνει σε όλες του τις διαστάσεις. Το φαινόμενο αυτό ονομάζεται συστολή” (Φυσικά Ε Δημοτικού Βιβλίο μαθητή).

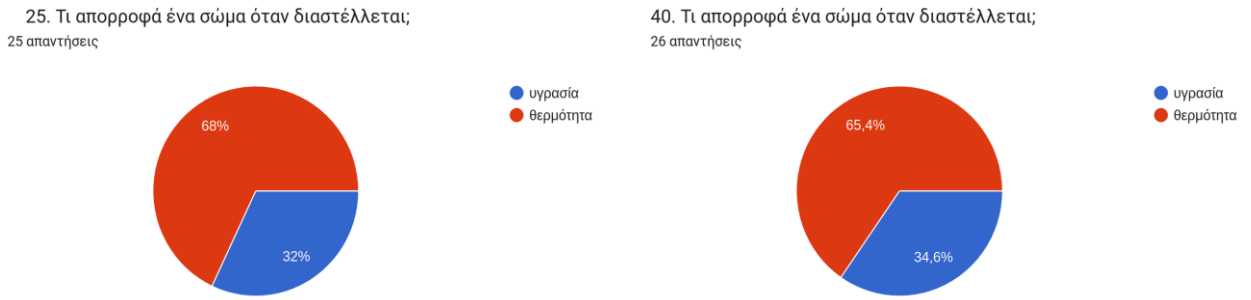
Οι απαντήσεις έδειξαν ότι σχεδόν οι μισοί μαθητές πίστευαν (40%) ότι ένα σώμα μεγαλώνει κατά τη Συστολή. Είναι φανερό ότι οι έννοιες της Διαστολής και Συστολής είναι συγκεχυμένες στο μυαλό των παιδιών.

Μετά τη χρήση της εφαρμογής οι σωστές απαντήσεις πλησίασαν το 90%. Φαίνεται ότι με τη χρήση της Ε.Φ, κατακτήθηκε σωστά η γνώση κι απομακρύνθηκαν οι αμφιβολίες που υπήρχαν.

Διαγράμματα 2α-2β
Αποτελεσματικότητα στην κατανόηση εννοιών – Συστολή (Ομάδα ελέγχου)



Παράλληλα ελέγχοντας και τα αποτελέσματα της Ομάδας ελέγχου, διαπιστώνεται ότι οι απαντήσεις μεταβλήθηκαν ελαφρώς προς τη σωστή κατεύθυνση μεταξύ των δύο τεστ αξιολόγησης.



Ερώτηση με α/α 25. Τι απορροφά ένα σώμα όταν διαστέλλεται;

Διαγράμματα 3α-3β
Αποτελεσματικότητα στην κατανόηση εννοιών – Τι απορροφά ένα σώμα όταν διαστέλλεται; (Πειραματική ομάδα)

Στο Τετράδιο εργασιών των Φυσικών της Ε Δημοτικού ο μαθητής/ μαθήτρια ανακαλύπτει κάθε φυσικό φαινόμενο μέσα από πειραματικές διαδικασίες που εκτελούν με τη βοήθεια του εκπαιδευτικού της τάξης. Στο τέλος καλείται να εκφράσει τα συμπεράσματά του ερμηνεύοντας τα αποτελέσματα των πειραμάτων. Στα κεφάλαια της διαστολής των στερεών, των υγρών και των αερίων, αποτελεί κοινή παραδοχή ότι τα σώματα όταν απορροφούν θερμότητα διαστέλλοντα. Από τις απαντήσεις στη συγκεκριμένη ερώτηση φαίνεται ότι οι μαθητές/ μαθήτριες δεν κατέκτησαν τη σωστή ορολογία. Οι μισοί περίπου 42,9% δεν απάντησαν σωστά. Το ποσοστό των λανθασμένων απαντήσεων μειώθηκε στο 25% μετά τη χρήση της Ε.Φ.

Διαγράμματα 4α-4β
Αποτελεσματικότητα στην κατανόηση εννοιών – Τι απορροφά ένα σώμα όταν διαστέλλεται; (Ομάδα ελέγχου)

Παρατηρώντας τα αποτελέσματα των απαντήσεων της Ομάδας Ελέγχου, διαπιστώνουμε πως το ποσοστό των λανθασμένων επιλογών των χρηστών δε μεταβλήθηκε σημαντικά στη δεύτερη φορά.

Ερώτηση με α/α 42. Ποια είναι η φυσική κατάσταση ενός σώματος μετά την τήξη;

Σύμφωνα με το εξαγόμενο συμπέρασμα στο Τετράδιο εργασιών των Φυσικών Ε Δημοτικού: Όταν ένα στερεό παίρνει θερμότητα, κάποια στιγμή αρχίζει να αλλάζει φυσική κατάσταση. Ένα μέρος του γίνεται υγρό. Τα αποτελέσματα των αρχικών απαντήσεων της Πειραματικής ομάδας υποδεικνύουν μια ασαφή θέση για τους μισούς σχεδόν ερωτόμενους μαθητές. Μετά τη χρήση της εφαρμογής το ποσοστό σψστών απαντήσεων αυξήθηκε στο 88%.

Διαγράμματα 5α-5β
Αποτελεσματικότητα στην κατανόηση εννοιών – Ποια είναι η φυσική κατάσταση ενός σώματος μετά την τήξη; (Πειραματική ομάδα)

Διαγράμματα 6α-6β
Αποτελεσματικότητα στην κατανόηση εννοιών – Ποια είναι η φυσική κατάσταση ενός σώματος μετά την τήξη; (Ομάδα ελέγχου)

Παρατηρώντας τα αντίστοιχα αποτελέσματα της Ερευνητικής ομάδας συμπεραίνουμε πως οι σωστές απαντήσεις παρέμειναν σταθερές και στις δύο αξιολογήσεις.

Αποτελέσματα Ποσοτικής Ανάλυσης
Πειραματική Ομάδα:
Μέσο ποσοστό σωστών pre-test: 61,35%
Μέσο ποσοστό σωστών post-test: 75,00%
Μέση μεταβολή: +13,65 μονάδες
$t(76) = 6,02$, $p < 0,001$ (στατιστικά σημαντική βελτίωση)
Ομάδα Ελέγχου:
Μέσο ποσοστό σωστών pre-test: 53,6%
Μέσο ποσοστό σωστών post-test: 58,2%
Μέση μεταβολή: +4,6 μονάδες
$t(45) = -2,53$, $p = 0,014$ (οριακή στατιστική βελτίωση)

Πίνακας 1.
Σύγκριση Πειραματικής και Ομάδας Ελέγχου

Δείκτης	Πειραματική Ομάδα	Ομάδα Ελέγχου
Pre-test (%)	61,35%	53,6%
Post-test (%)	75,00%	58,2%
Μέση Μεταβολή	+13,65	+4,6
Στατιστική Σημαντικότητα	$p < 0,001$	$p = 0,014$

Η στατιστική ανάλυση υποδεικνύει σαφή ανωτερότητα της επίδρασης της εφαρμογής στη γνωστική ενίσχυση της έννοιας της Θερμότητας.

ΠΟΙΟΤΙΚΗ ΑΝΑΛΥΣΗ

Οι συνεντεύξεις ανέδειξαν υψηλά επίπεδα ικανοποίησης. Οι μαθητές χαρακτήρισαν την εφαρμογή ως «εύχρηστη», «διασκεδαστική» και «κατανοητή». Ιδιαίτερη αναφορά έγινε στον ρόλο των πειραμάτων και του φωνητικού βοηθού. Οι απαντήσεις έδειξαν συναισθηματική εμπλοκή και θετική διάθεση, ενώ προτάθηκαν μικρές αισθητικές βελτιώσεις.

Απόσπασμα (Ιωάννα): «Θα θυμάμαι τις πληροφορίες έτσι όπως τις έμαθα, γιατί τις εφάρμοσα κιόλας... δεν θα τα θυμάμαι απλά όπως τα διάβασα, θα τα θυμάμαι γιατί τα έκανα και εφαρμογή».

ΣΥΖΗΤΗΣΗ

Η εφαρμογή απέδειξε την παιδαγωγική της αξία, εφόσον συνδύασε στοιχεία παιχνιδιού, οπτικοποίησης και προσωπικής αλληλεπίδρασης. Το m-learning, όπως αναφέρεται από τον Kearney et al. (2012), καθιστά τη μάθηση πιο ελκυστική και συμβατή με τα μαθησιακά προφίλ των ψηφιακών μαθητών. Η σύγκριση με την ομάδα ελέγχου επιβεβαιώνει ότι οι τεχνολογικά ενισχυμένες στρατηγικές προσφέρουν ανώτερη γνωστική υποστήριξη. Επιπλέον, οι θετικές μαρτυρίες από τις συνεντεύξεις ενισχύουν την αξιοπιστία των ποσοτικών ευρημάτων.

ΠΕΡΙΟΡΙΣΜΟΙ

Περιορισμένος αριθμός ταυτοποιημένων συμμετεχόντων στην τελική φάση
Απουσία μακροχρόνιας παρακολούθησης της διατήρησης γνώσεων
Πιθανή προκατάληψη λόγω αυτοαναφορικών μεθόδων
Περιορισμένη γενικευσιμότητα λόγω μικρού γεωγραφικού εύρους

ΣΥΜΠΕΡΑΣΜΑΤΑ ΚΑΙ ΠΡΟΤΑΣΕΙΣ

Η χρήση εκπαιδευτικών εφαρμογών με φωνητικό βοηθό, σε συνδυασμό με διαδραστικό περιεχόμενο και εικονικά εργαστήρια, αποδεικνύεται αποτελεσματική στην ενίσχυση της γνώσης. Η παρούσα μελέτη αναδεικνύει την ανάγκη ενσωμάτωσης των εργαλείων m-learning στην πρωτοβάθμια εκπαίδευση. Προτείνεται η περαιτέρω έρευνα με ευρύτερο δείγμα, όπως και η δημιουργία πολυθεματικών εφαρμογών που να καλύπτουν περισσότερα πεδία των Φυσικών Επιστημών.

ΣΥΜΠΕΡΑΣΜΑΤΑ ΕΡΕΥΝΑΣ ΓΙΑ ΤΗ ΧΡΗΣΗ ΤΩΝ ΜΕΣΩΝ ΚΟΙΝΩΝΙΚΗΣ ΔΙΚΤΥΩΣΗΣ ΑΠΟ ΕΦΗΒΟΥΣ

Κατσαρός Κωνσταντίνος
Σύμβουλος Εκπαίδευσης Πληροφορικής ΠΕ86
Διεύθυνσης Δευτεροβάθμιας Εκπαίδευσης Αιτωλοακαρνανίας
e-mail: katsaros74@sch.gr

ΠΕΡΙΛΗΨΗ

Η παρούσα μελέτη διερευνά τη χρήση των μέσων κοινωνικής δικτύωσης από μαθητές Δευτεροβάθμιας Εκπαίδευσης, εστιάζοντας στις συνήθειες, στους κινδύνους που μπορεί να προκύψουν από τη χρήση των μέσων αλλά και στους πιθανούς τρόπους αντιμετώπισής τους.

Για τη συλλογή των δεδομένων χρησιμοποιήθηκε ερωτηματολόγιο που διανεμήθηκε και συμπληρώθηκε από 80 μαθητές Β Λυκείου (32 αγόρια και 48 κορίτσια), ηλικίας 16-17 ετών, προερχόμενους από ένα αστικό σχολείο της Λευκάδας. Το ερωτηματολόγιο δημιουργήθηκε με στόχο να αποτυπωθούν οι συνήθειες, η συχνότητα αλλά και ο τρόπος χρήσης των κοινωνικών δικτύων, να εντοπιστούν πιθανοί κίνδυνοι (όπως διαδικτυακός εκφοβισμός, παραβίαση προσωπικών δεδομένων, εθισμός) και να εξεταστεί αν υπάρχουν διαφορές στην επίδραση αυτών των κινδύνων ανάλογα με το φύλο των μαθητών.

Τα ευρήματα επιβεβαιώνουν την εφαρμογή της θεωρίας του ψηφιακού εθισμού (Young, 1998) όσον αφορά την υπερβολική χρήση, της κοινωνικής μάθησης (Bandura, 1977) στις επιλογές πλατφορμών και συμπεριφορών, και της αντίληψης του κινδύνου (Slovic, 1987) στις διαφορές φύλου.

Σύμφωνα με τα αποτελέσματα, η πλειονότητα των μαθητών χρησιμοποιεί τα μέσα κοινωνικής δικτύωσης σε καθημερινή βάση, κυρίως στην επικοινωνία με φίλους - συγγενείς και στην ψυχαγωγία και λιγότερο στην ενημέρωση. Δημοφιλέστερες πλατφόρμες αναδεικνύονται το Instagram, το TikTok και το Snapchat ενώ λιγότερο δημοφιλής είναι η πλατφόρμα του Facebook και του Χ.

Είναι σημαντικό όμως να τονιστεί ότι ένα σημαντικό ποσοστό μαθητών ανέφερε ότι έχει έρθει αντιμέτωπο με κινδύνους ή έχει γνώση ότι άτομα του άμεσου περιβάλλοντός του έχουν αντιμετωπίσει καταστάσεις που τους έκαναν να αισθανθούν άβολα. Η επεξεργασία των ερωτηματολογίων ανέδειξε ότι οι μαθήτριες βιώνουν πιο συχνά περιστατικά που τις κάνουν να νοιώθουν άβολα αλλά από την άλλη αυτό τις ωθεί να ανησυχούν περισσότερο για την ασφάλεια των προσωπικών τους δεδομένων και τις κάνει επιφυλακτικότερες έναντι των μαθητών στην αντιμετώπιση και διαχείριση διαδικτυακών κινδύνων. Αντίθετα, τα αγόρια εμφανίζονται πιο επιρρεπή σε θέματα πρόληψης κινδύνων.

Η έρευνα αναδεικνύει επίσης ότι οι περισσότεροι μαθητές έχουν διδαχθεί και γνωρίζουν βασικούς τρόπους προστασίας (όπως διαχείριση κωδικών, ρυθμίσεις απορρήτου, αποκλεισμός ανεπιθύμητων χρηστών, αναζήτηση σε σχετικές ιστοσελίδες), όμως είτε από αμέλεια είτε από άλλους λόγους δεν εφαρμόζουν πάντα τους απαιτούμενους κανόνες για την ατομική τους ασφάλεια.

Η εκπαίδευση σε θέματα ψηφιακής ασφάλειας και η προώθηση ενός υγιούς διαδικτυακού περιβάλλοντος κρίνονται απαραίτητες, τόσο από τους εκπαιδευτικούς όσο και από τους γονείς. Έμφαση πρέπει να δοθεί επίσης στη διερεύνηση των αιτιών της διαφοράς που παρατηρήθηκε να υπάρχει ανάλογα με το φύλο των μαθητών.

Λέξεις – κλειδιά: διαδίκτυο, μέσα κοινωνικής δικτύωσης, εκφοβισμός, ασφάλεια

ΕΙΣΑΓΩΓΗ

Τα μέσα κοινωνικής δικτύωσης έχουν καταστεί αναπόσπαστο μέρος της καθημερινότητας των εφήβων, προσφέροντας νέους εναλλακτικούς τρόπους επικοινωνίας, ψυχαγωγίας και έκφρασης σε σχέση με το παρελθόν. Ωστόσο, η ευρεία χρήση τους έχει εγείρει ανησυχίες για τους πιθανούς κινδύνους που ελλοχεύουν, ιδιαίτερα σε ηλικιακές ομάδες με περιορισμένη εμπειρία και κρίση (Livingstone & Helsper, 2007).

Σκοπός της παρούσας μελέτης είναι να αποτυπώσει τον τρόπο με τον οποίο μαθητές Δευτεροβάθμιας Εκπαίδευσης, που συμμετείχαν σε έρευνα με χρήση ερωτηματολογίου, χρησιμοποιούν τα κοινωνικά δίκτυα, να εντοπίσει τους κινδύνους που αντιμετωπίζουν και να αναδείξει τις στάσεις και αντιδράσεις τους. Στην μελέτη εξετάστηκε επίσης αν το φύλο των μαθητών / μαθητριών επιδρά στα υπό εξέταση ζητήματα.

ΘΕΩΡΗΤΙΚΟ ΠΛΑΙΣΙΟ

Η παρούσα μελέτη βασίστηκε σε τρεις βασικές θεωρητικές προσεγγίσεις που χρησιμοποιήθηκαν για να ερμηνευθεί η συμπεριφορά των εφήβων στον ψηφιακό χώρο: τη Θεωρία του Ψηφιακού Εθισμού (Young, 1998), τη Θεωρία της Κοινωνικής Μάθησης (Bandura, 1977) και τη Θεωρία της Αντίληψης του Κινδύνου (Slovic, 1987). Οι θεωρίες αυτές προσφέρουν το πρίσμα υπό το οποίο επιχειρείται να κατανοηθεί η σχέση των νέων με τα μέσα κοινωνικής δικτύωσης, λαμβάνοντας υπόψη τόσο ψυχολογικές όσο και κοινωνικές διαστάσεις.

Συγκεκριμένα, η Θεωρία Ψηφιακού Εθισμού υποστηρίζει ότι η υπερβολική χρήση του διαδικτύου μπορεί να οδηγήσει σε συμπεριφορές εξάρτησης, επηρεάζοντας τη σχολική επίδοση, την ψυχολογία και τις κοινωνικές σχέσεις των εφήβων. Η Kimberly Young υπήρξε πρωτοπόρος στη μελέτη της εθιστικής χρήσης του Διαδικτύου, προτείνοντας ότι η υπερβολική και ανεξέλεγκτη χρήση του μπορεί να αποκτήσει τα χαρακτηριστικά κλινικής εξάρτησης. Σύμφωνα με τη θεωρία της, ο ψηφιακός εθισμός χαρακτηρίζεται από εμμονική ανάγκη για σύνδεση, απώλεια ελέγχου του χρόνου χρήσης, παραμέληση καθημερινών δραστηριοτήτων και υποχρεώσεων και συναισθηματική εξάρτηση από τη διαδικτυακή παρουσία. Τα μέσα κοινωνικής δικτύωσης, και ιδιαίτερα εφαρμογές όπως το TikTok και το Instagram, ενισχύουν αυτή την εξάρτηση μέσω μηχανισμών άμεσης ανταμοιβής και συνεχούς αλληλεπίδρασης. Στους εφήβους, οι οποίοι διανύουν ένα κρίσιμο στάδιο ταυτότητας και αναζήτησης κοινωνικής αποδοχής, η ανάγκη για «ψηφιακή αναγνώριση» (likes, followers, shares) μπορεί να αποτελέσει ισχυρό ερέθισμα, αυξάνοντας τον κίνδυνο εξάρτησης.

Από την άλλη, η Θεωρία Κοινωνικής Μάθησης, περιγράφει πώς οι έφηβοι υιοθετούν συμπεριφορές παρατηρώντας πρότυπα στο περιβάλλον τους. Τα social media αποτελούν ισχυρά μέσα μίμησης και διάδοσης. Ο Albert Bandura, υποστηρίζει ότι η ανθρώπινη συμπεριφορά μαθαίνεται παρατηρώντας και μιμούμενη πρότυπα από το περιβάλλον. Η θεωρία αυτή βασίζεται στη διαδικασία της παρατήρησης – μίμησης – ενίσχυσης, όπου οι άνθρωποι υιοθετούν συμπεριφορές εάν διαπιστώνουν ότι αυτές επιβραβεύονται. Στο περιβάλλον των social media, οι έφηβοι εκτίθενται διαρκώς σε πρότυπα συμπεριφοράς — είτε πρόκειται για διάσημους influencers είτε για συνομηλίκους — τα οποία παρουσιάζονται συχνά με εξιδανικευμένο τρόπο, ενισχύοντας την πίεση για συμμόρφωση και αποδοχή. Μέσω της μίμησης αυτών των προτύπων ενισχύονται καταναλωτικές και αισθητικές συμπεριφορές (μόδα, trends), διαμορφώνονται στάσεις ζωής και αξίες και κανονικοποιούνται ακόμη και τοξικές ή επικίνδυνες συμπεριφορές, όπως το διαδικτυακό bullying ή η υπερπροβολή της προσωπικής ζωής. Η συγκεκριμένη θεωρία αποκτά ιδιαίτερη σημασία όταν εξετάζουμε την επίδραση των μέσων σε νέους που δεν έχουν αναπτύξει ακόμη πλήρως τις δεξιότητες κριτικής σκέψης και αυτορρύθμισης.

Τέλος, η Θεωρία Αντίληψης του Κινδύνου, εξηγεί πώς άτομα και κοινωνικές ομάδες αντιλαμβάνονται και αντιδρούν σε κινδύνους, επηρεαζόμενα από παράγοντες όπως το φύλο, η εμπειρία και η κοινωνική θέση. Ο Paul Slovic ανέπτυξε τη θεωρία της υποκειμενικής αντίληψης του κινδύνου, σύμφωνα με την οποία οι άνθρωποι δεν αντιδρούν σε απειλές με βάση την αντικειμενική επικινδυνότητά τους, αλλά με βάση το πώς τις αντιλαμβάνονται συναισθηματικά και πολιτισμικά. Η θεωρία του Slovic αναδεικνύει ότι το φύλο, η ηλικία και το κοινωνικό πλαίσιο επηρεάζουν την αντίληψη των κινδύνων. Οι γυναίκες (σε όλες τις ηλικίες) αντιλαμβάνονται τους κινδύνους ως μεγαλύτερους και είναι πιο επιφυλακτικές, ιδίως σε θέματα προσωπικής ασφάλειας και προστασίας της ιδιωτικότητας ενώ οι άνδρες συχνά υποεκτιμούν τους κινδύνους και εμφανίζονται πιο πρόθυμοι να ρισκάρουν ή να αγνοούν απειλές. Η θεωρία αυτή είναι ιδιαίτερα σημαντική για την παρούσα μελέτη, καθώς εξετάζει τις διαφορές φύλου στην αντίληψη των διαδικτυακών κινδύνων, όπως έχουν καταδείξει και μεταγενέστερες έρευνες (Harris et al., 2017). Η πολιτισμική διάσταση του φύλου (gender socialization) φαίνεται να παίζει ρόλο στην καλλιέργεια αυτών των στάσεων, όπως καταδεικνύουν και μεταγενέστερες έρευνες (Harris et al., 2017).

Η σύνθεση των παραπάνω θεωριών μάς επιτρέπει να κατανοήσουμε γιατί οι μαθητές στρέφονται σε συγκεκριμένα μέσα (μέσω της θεωρίας της κοινωνικής μάθησης), πώς ενδέχεται να αποκτήσουν συμπεριφορές εξάρτησης (μέσω της θεωρίας του ψηφιακού εθισμού) και γιατί διαφοροποιούνται ανάλογα με το φύλο ως προς την εμπειρία και την αντιμετώπιση των διαδικτυακών κινδύνων (μέσω της θεωρίας της αντίληψης του κινδύνου). Η ενοποίηση αυτών των προσεγγίσεων αποτελεί βασικό θεωρητικό υπόβαθρο για την ερμηνεία των ευρημάτων της έρευνας και τη διαμόρφωση πρακτικών παρεμβάσεων στο πεδίο της σχολικής και οικογενειακής αγωγής.

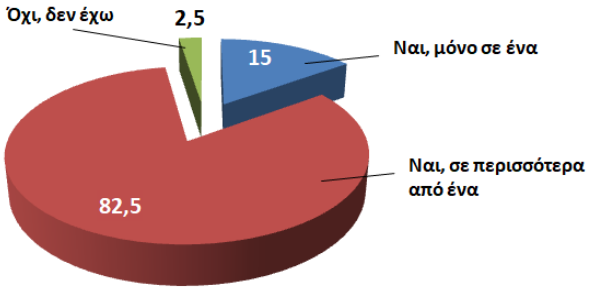
ΜΕΘΟΔΟΛΟΓΙΑ

Η έρευνα πραγματοποιήθηκε σε Λύκειο της Λευκάδας και συμμετείχαν 80 μαθητές Β' Λυκείου (32 αγόρια και 48 κορίτσια), ηλικίας 16-17 ετών. Χρησιμοποιήθηκε ερωτηματολόγιο κλειστού τύπου, το οποίο κάλυπτε τη συχνότητα και τους σκοπούς χρήσης των μέσων κοινωνικής δικτύωσης, τις εμπειρίες με διαδικτυακούς κινδύνους (εκφοβισμός, παραβίαση δεδομένων, εθισμός), τις στρατηγικές προστασίας και τις αντιλήψεις ανά φύλο. Το ερωτηματολόγιο απαντήθηκε στο εργαστήριο Πληροφορικής από τους μαθητές στο πλαίσιο γενικότερης παρέμβασης για θέματα ασφάλειας στο διαδίκτυο και συμπληρώθηκε παρουσία εκπαιδευτικού.

Η ανάλυση έγινε με τη χρήση περιγραφικής στατιστικής και οπτικοποίηση των αποτελεσμάτων σε ποσοστιαίες κατανομές.

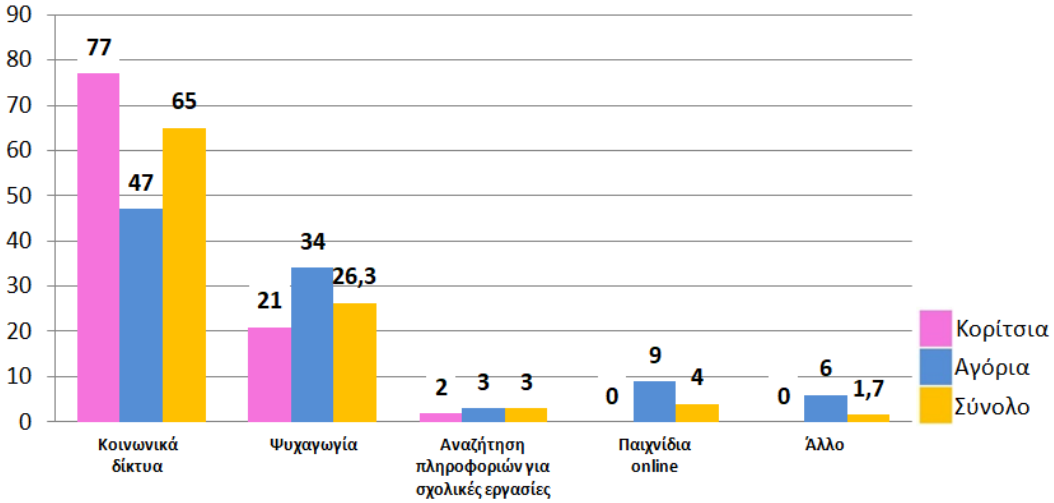
ΑΠΟΤΕΛΕΣΜΑΤΑ

Η πλειοψηφία των ερωτηθέντων ήταν κορίτσια, γεγονός που μπορεί να επηρεάσει τα συνολικά ευρήματα, αλλά τελικά μας δίνει τη δυνατότητα να εντοπίσουμε τις διαφορές στην αντίληψη των θεμάτων που εξετάστηκαν αλλά και πιθανές διαφορετικές προσεγγίσεις σε αυτά.



Κυρίαρχη συσκευή για πρόσβαση στο διαδίκτυο αποτελεί το κινητό τηλέφωνο με ποσοστό πάνω από 95% στο σύνολο των ερωτηθέντων.

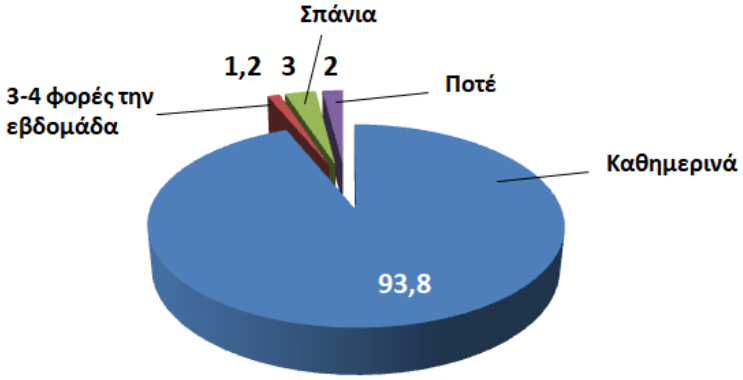
Κύριες δραστηριότητες



Η κύρια δραστηριότητα για τους ερωτώμενους είναι η σύνδεση και χρήση κοινωνικών δικτύων και μάλιστα σε πολύ μεγάλα ποσοστά, με τα δύο τρίτα των εφήβων να τα χρησιμοποιούν ενεργά. Σχεδόν όλοι οι έφηβοι (97.5%) έχουν λογαριασμό σε κοινωνικά δίκτυα, με τη συντριπτική πλειοψηφία (82.5%) να είναι ενεργή σε περισσότερες από μία πλατφόρμες (Εικόνα 1) Κοινωνικής Δικτύωσης.

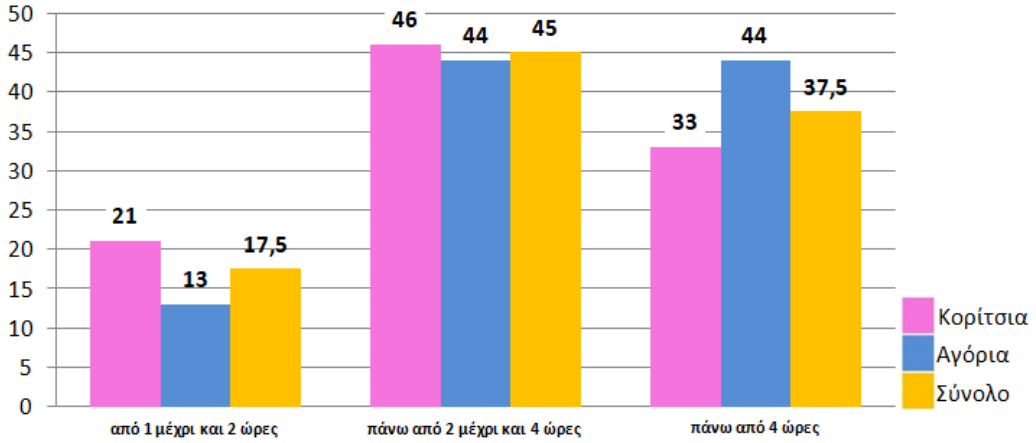
Η ψυχαγωγία ακολουθεί σε μεγάλη απόσταση. Η χρήση για σχολικές εργασίες ή παιχνίδια είναι πολύ μικρότερη (Εικόνα 2).

Εικόνα 1.
Έχεις λογαριασμό σε μέσο κοινωνικής δικτύωσης;



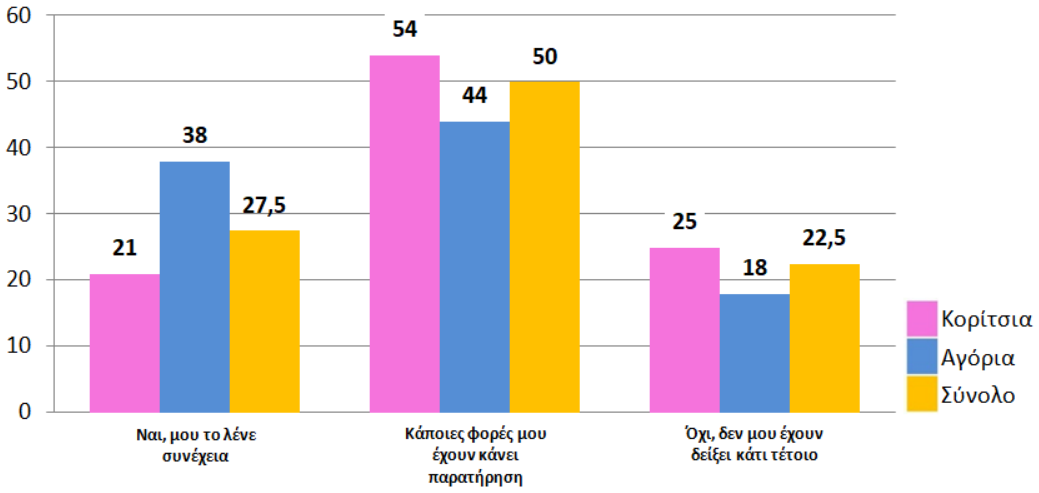
Εικόνα 2.
Ποια είναι η κύρια σου δραστηριότητα στο διαδίκτυο;

Η χρήση των κοινωνικών δικτύων είναι καθημερινή, σχεδόν καθολικά (93.8%) (Εικόνα 3). Υπάρχει σαφής διαφορά στις κύριες δραστηριότητες αν εστιάσουμε στις απαντήσεις ανά φύλο. Τα κορίτσια κυριαρχούν στη χρήση κοινωνικών δικτύων (77% έναντι 47% των αγοριών). Αντίθετα, τα αγόρια ασχολούνται πολύ περισσότερο με την ψυχαγωγία (34% έναντι 21% των κοριτσιών) και, κυρίως, με τα online παιχνίδια (9% έναντι 0% των κοριτσιών).



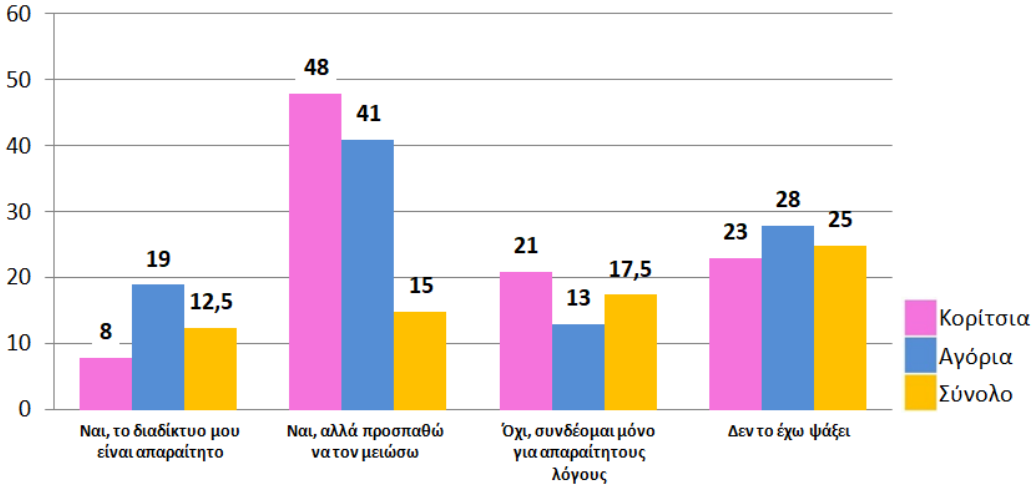
Εικόνα 3.
Πόσο συχνά χρησιμοποιείς τα κοινωνικά δίκτυα;

Χρόνος χρήσης



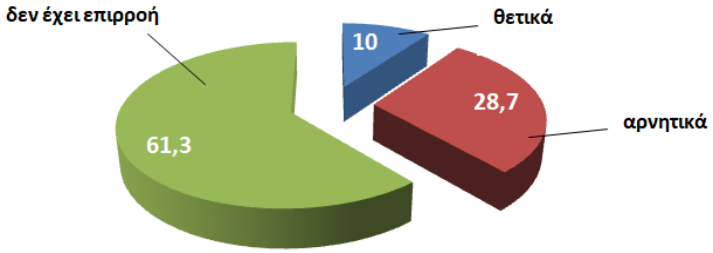
Σχεδόν οι μισοί (45%) των ερωτηθέντων χρησιμοποιούν το διαδίκτυο για 2-4 ώρες την ημέρα, ενώ ένα σημαντικό ποσοστό (37.5%) το χρησιμοποιεί πάνω από 4 ώρες. Τα αγόρια περνούν αναλογικά περισσότερο χρόνο στο διαδίκτυο (> 4 ώρες: 44% αγόρια έναντι 33% κορίτσια), ενώ τα κορίτσια έχουν ελαφρώς μεγαλύτερο ποσοστό στην κατηγορία 1-2 ώρες (Εικόνα 4).

Εικόνα 4.
Πόσες ώρες την ημέρα χρησιμοποιείς το διαδίκτυο;



Οι περισσότεροι γονείς (77.5% συνολικά) εκφράζουν ανησυχία για τον χρόνο που περνούν τα παιδιά τους στο διαδίκτυο, είτε συχνά (27.5%) είτε περιστασιακά (50%). Οι γονείς των αγοριών εκφράζουν την ανησυχία τους σε ποσοστό 38% στα αγόρια και 21% στα κορίτσια ("Ναι, μου το λένε συνέχεια": 38% αγόρια έναντι 21% κορίτσια). Στις παρατηρήσεις που κάνουν τα ποσοστά είναι 44% στα αγόρια και 54% στα κορίτσια (Εικόνα 5).

Εικόνα 5.
Οι γονείς σας θεωρούν ότι καταναλώνετε υπερβολικό χρόνο στο διαδίκτυο;

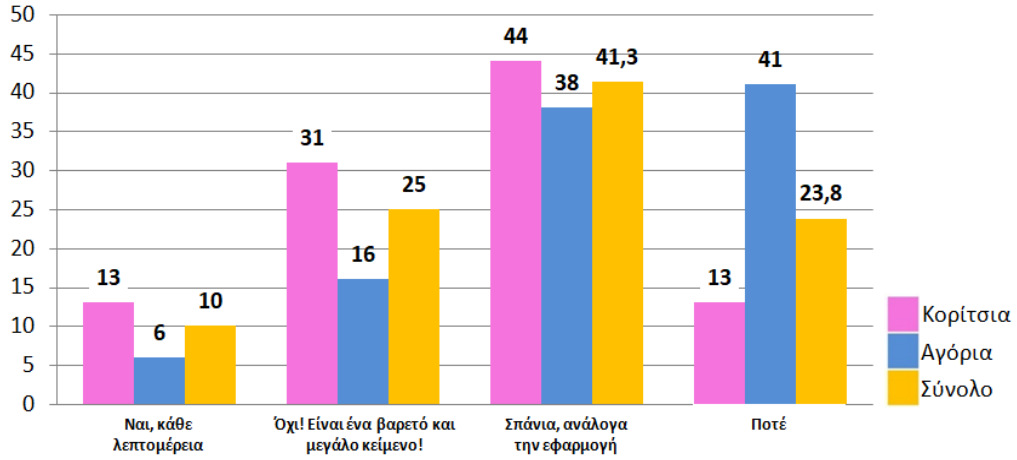


Μεταξύ των ερωτώμενων, ένα 27.5% αναγνωρίζει ως υπερβολική τη χρήση που κάνει (12.5% το θεωρεί απαραίτητο και 15% προσπαθεί να τη μειώσει) ενώ το 25% δηλώνει ότι "δεν το έχει ψάξει" (Εικόνα 6). Τα αγόρια σε μεγαλύτερο ποσοστό θεωρούν το διαδίκτυο "απαραίτητο" (19% έναντι 8% των κοριτσιών), ενώ τα κορίτσια αναγνωρίζουν περισσότερο την ανάγκη να μειώσουν το χρόνο χρήσης ("Ναι, αλλά προσπαθώ να τον μειώσω": 48% κορίτσια έναντι 31% αγόρια). Τα κορίτσια επίσης δηλώνουν πιο συχνά ότι συνδέονται μόνο για απαραίτητους λόγους (21% έναντι 13%).

Εικόνα 6.
Εσύ θεωρείς ότι καταναλώνεις υπερβολικό χρόνο στο διαδίκτυο;

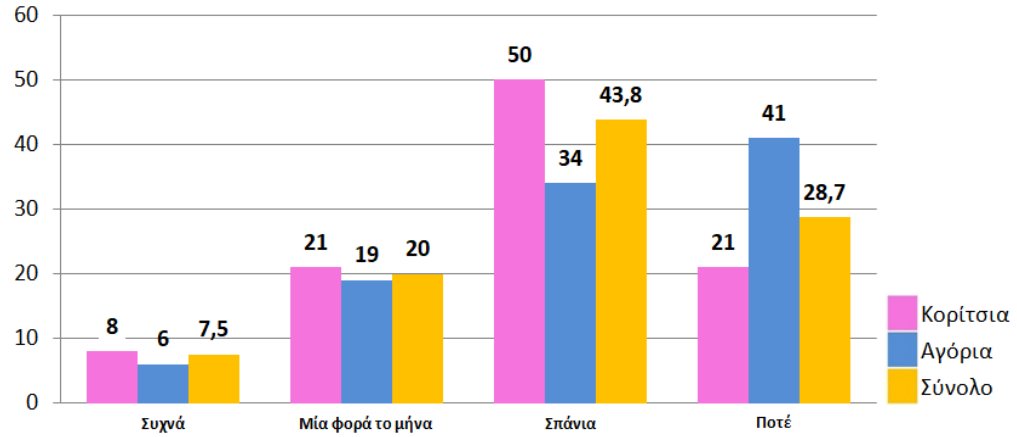
Η πλειοψηφία των ερωτώμενων (61.3%) πιστεύει ότι η χρήση του διαδικτύου δεν επηρεάζει τη σχολική τους απόδοση. Ωστόσο, ένα σχεδόν 30% αναφέρει αρνητική επίδραση (Εικόνα 7).

Εικόνα 7.
Πιστεύεις ότι η χρήση του διαδικτύου έχει επηρεάσει την απόδοσή σου στο σχολείο....



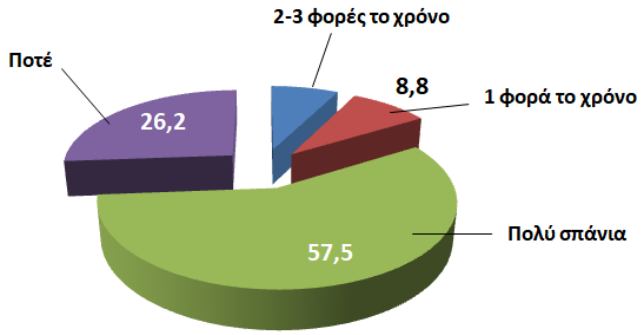
Ασφάλεια και διαμοιρασμός υλικού

Ένα ποσοστό (10%) διαβάζει λεπτομερώς τις συμφωνίες χρήσης των μέσων κοινωνικής δικτύωσης στα οποία έχουν πρόσβαση. Η πλειοψηφία είτε τις βρίσκει βαρετές/μεγάλες (25%) είτε τις διαβάζει σπάνια (41.3%) ή ποτέ (23.8%). Τα κορίτσια είναι πιο πιθανό να διαβάσουν "κάθε λεπτομέρεια" (13% έναντι 6% των αγοριών) και "σπάνια" να το κάνουν (44% έναντι 38%). Αντίθετα, τα αγόρια απορρίπτουν πιο συχνά την ανάγνωση ως "βαρετό και μεγάλο κείμενο" (31% έναντι 11% των κοριτσιών) (Εικόνα 8).



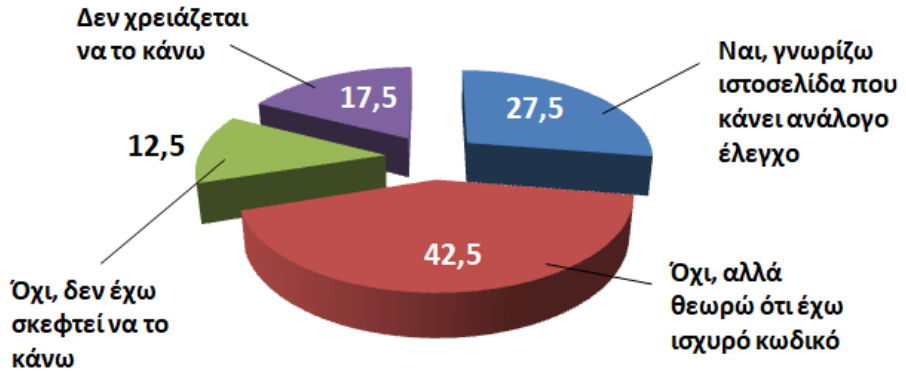
Η πλειοψηφία των εφήβων (72.5%) δεν ελέγχει συχνά (43.8% σπάνια, 28.7% ποτέ) τις ρυθμίσεις απορρήτου. Τα αγόρια ενώ από τη μια δηλώνουν ότι ελέγχουν "συχνά" τις ρυθμίσεις απορρήτου σε διπλάσιο ποσοστό από τα κορίτσια (10% έναντι 5%) από την άλλη δηλώνουν επίσης "ποτέ" σε μεγαλύτερο ποσοστό (37% έναντι 21% των κοριτσιών). Τα κορίτσια ελέγχουν "σπάνια" σε πολύ μεγαλύτερο ποσοστό (50% έναντι 34%) (Εικόνα 9).

Η συντριπτική πλειοψηφία (83.7%) αλλάζει τους κωδικούς πρόσβασης πολύ σπάνια ή ποτέ. Πάνω από τους μισούς (56.3%) χρησιμοποιούν τον ίδιο ή παρόμοιους κωδικούς πρόσβασης για πολλούς λογαριασμούς.



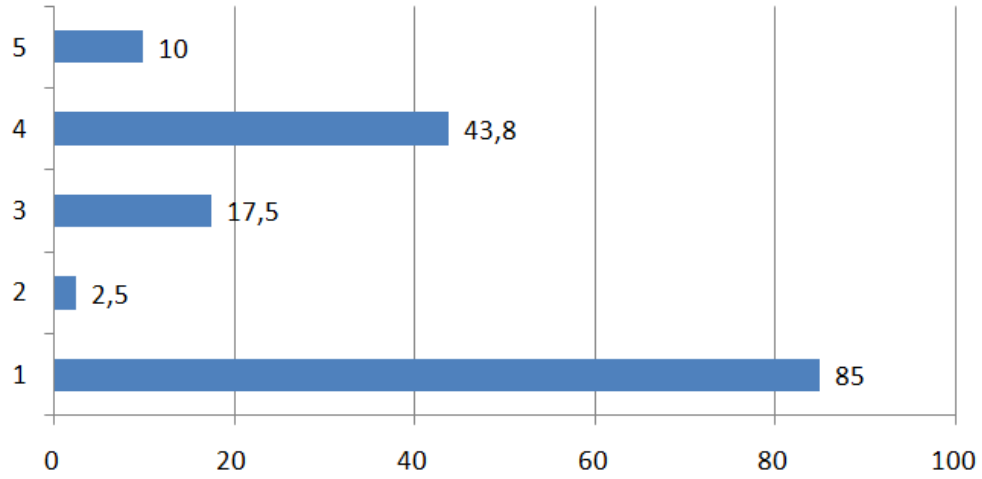
Εικόνα 8.
Διαβάζεις τη συμφωνία πριν δημιουργήσεις λογαριασμό σε μέσα κοινωνικής δικτύωσης ή εφαρμογές που συνδέεσαι;

Εικόνα 9.
Ελέγχεις τις ρυθμίσεις απορρήτου στα κοινωνικά σου δίκτυα;



Εικόνα 10.
Πόσο συχνά αλλάζεις τους κωδικούς πρόσβασης στα μέσα κοινωνικής δικτύωσης ή σε εφαρμογές που χρησιμοποιείς;

Ωστόσο, η συνολική τάση για χρήση ίδιων κωδικών είναι υψηλή και στα δύο φύλα (Κορίτσια: 55%, Αγόρια: 57%) (Εικόνα 10). Ένα μεγάλο ποσοστό (42.5%) "θεωρεί" ότι έχει ισχυρό κωδικό χωρίς να το έχει ελέγξει, ενώ ένα άλλο

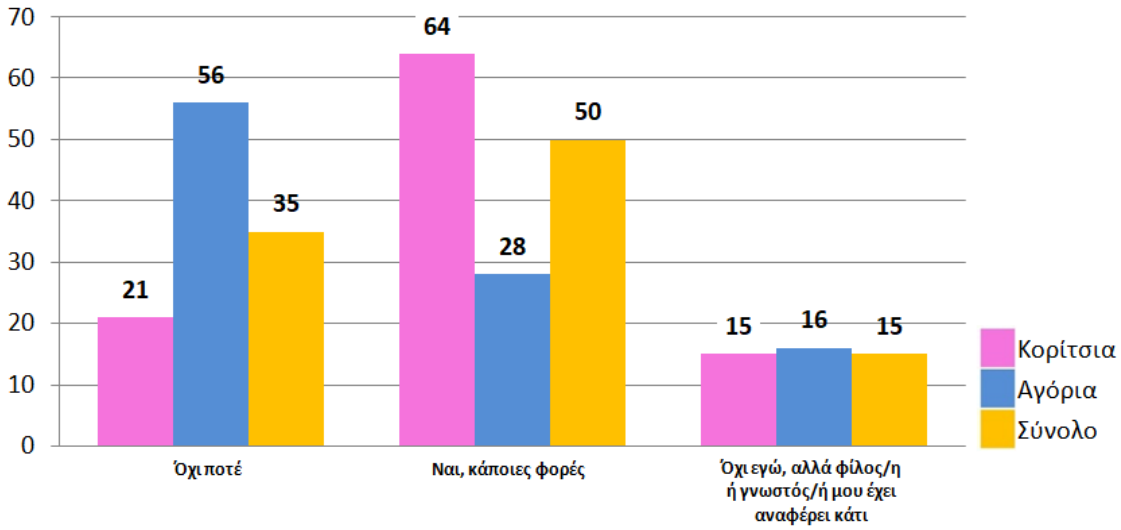


30% είτε δεν έχει σκεφτεί να το κάνει είτε πιστεύει ότι δεν χρειάζεται (Εικόνα 11). Τα αγόρια δηλώνουν σε ελαφρώς μεγαλύτερο ποσοστό ότι χρησιμοποιούν τον ίδιο κωδικό "σχεδόν πάντα" (20% έναντι 13% των κοριτσιών).

Εικόνα 11.
Έχεις ελέγξει ποτέ πόσο "ισχυρός" είναι ο κωδικός πρόσβασης που έχεις επιλέξει;

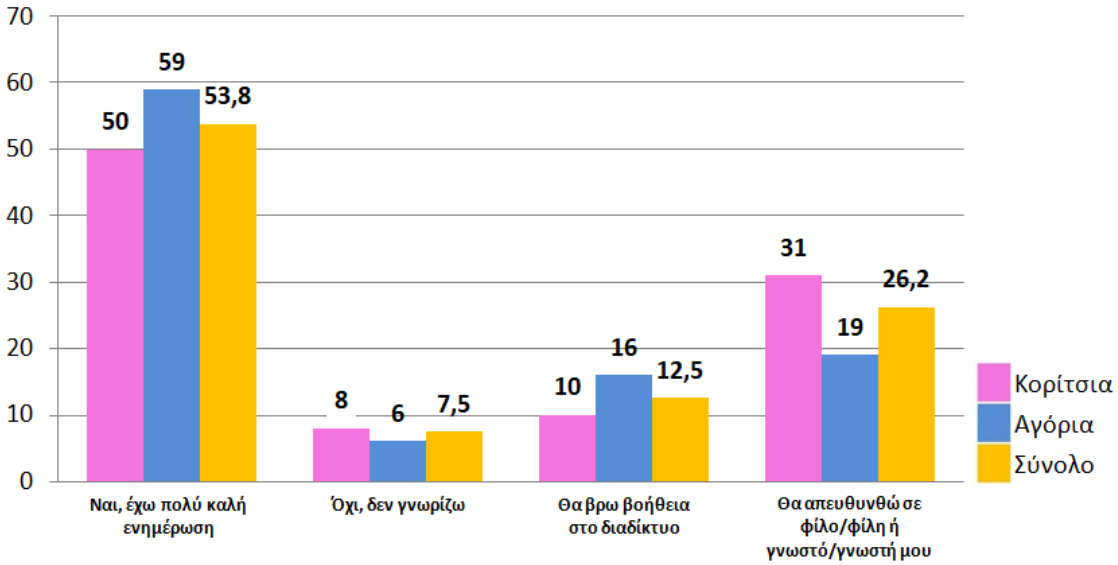
Οι ερωτηθέντες, θα μοιραζόταν προσωπικά στοιχεία όπως όνομα, επώνυμο και κινητό τηλέφωνο σε υψηλό ποσοστό (85%). Επίσης, ένα σημαντικό ποσοστό (43.8%) θα μοιραζόταν φωτογραφίες/βίντεο (Εικόνα 12). Όσον αφορά στο θέμα της μόνιμης διαγραφής περιεχομένου online, σχεδόν 60% (36.2% + 23.8%) δεν είναι σίγουροι ή πιστεύουν ότι η διαγραφή δεν είναι μόνιμη, κάτι που είναι πιο κοντά στην πραγματικότητα πολλών διαδικτυακών πλατφορμών.

Εικόνα 12.
Ποια από τα παρακάτω θεωρείς ότι θα μπορούσες να μοιραστείς με άλλους στο διαδίκτυο; (πολλαπλή επιλογή)



1. Προσωπικά στοιχεία (Όνομα – Επώνυμο, Κινητό τηλέφωνο, κλπ)
2. Διεύθυνση κατοικίας
3. Ωράριο δραστηριοτήτων
4. Φωτογραφίες - βίντεο
5. Μέρη που συχνάζω

Συμπεριφορές και ενημέρωση



Ένα μεγάλο ποσοστό των ερωτηθέντων (50%) έχει νιώσει άβολα με τη συμπεριφορά άλλων στο διαδίκτυο, ενώ ένα επιπλέον 15% γνωρίζει κάποιον που έχει βιώσει κάτι τέτοιο. Τα κορίτσια έχουν νιώσει άβολα "κάποιες φορές" σε πολύ μεγαλύτερο ποσοστό από τα αγόρια (64% έναντι 28%) που δηλώνουν "όχι ποτέ" σε πολύ μεγαλύτερο ποσοστό (56% έναντι 21% των κοριτσιών) (Εικόνα 13).

Εικόνα 13.
Έχεις νοιώσει ποτέ άβολα με τη συμπεριφορά άλλου στο διαδίκτυο;

Πάνω από τους μισούς εφήβους (53.8%) δηλώνουν καλά ενημερωμένοι για θέματα ασφαλούς χρήσης του διαδικτύου. Ωστόσο, ένα σημαντικό ποσοστό (26.2%) θα απευθυνόταν σε φίλους/γνωστούς αν συναντούσε δυσκολίες ή διαδικτυακές επιθέσεις. Ένα ποσοστό 7.5% δηλώνει ότι δεν γνωρίζει πού να απευθυνθεί σε περίπτωση που δεχτεί παρενόχληση (Εικόνα 14). Τα αγόρια δηλώνουν ελαφρώς πιο ενημερωμένα (59% έναντι 50% των κοριτσιών) και πιο πιθανό να αναζητήσουν βοήθεια στο διαδίκτυο (16% έναντι 10% των κοριτσιών). Αντίθετα, τα κορίτσια είναι πιο πιθανό να απευθυνθούν σε φίλους/γνωστούς (31% έναντι 19% των αγοριών).

Εικόνα 14.
Γνωρίζεις που θα απευθυνθείς σε περίπτωση που δεχτείς μια διαδικτυακή απειλή;

ΣΥΖΗΤΗΣΗ

Τα ευρήματα επιβεβαιώνουν καταρχάς την υψηλή έκθεση των εφήβων στο διαδίκτυο σε καθημερινή βάση και τις γνώσεις που υπάρχουν σχετικά με τις προτιμήσεις των νέων για τη χρήση συγκεκριμένων μέσων κοινωνικής δικτύωσης, ενώ ενισχύουν και επιβεβαιώνουν πλήρως τις θεωρητικές προσεγγίσεις που παρουσιάστηκαν και αναδεικνύουν τις σύνθετες σχέσεις που αναπτύσσουν οι έφηβοι με τα μέσα κοινωνικής δικτύωσης αλλά και τους κινδύνους που ενέχουν αυτά.

Η διαπίστωση ότι η συντριπτική πλειονότητα των μαθητών χρησιμοποιεί καθημερινά τα μέσα κοινωνικής δικτύωσης, επιβεβαιώνει την αυξανόμενη «ψηφιοποίηση» της εφηβικής ζωής. Τα ευρήματα ευθυγραμμίζονται με έρευνες όπως αυτή των Twenge et al. (2018), που καταγράφουν ραγδαία αύξηση της καθημερινής χρήσης μεταξύ εφήβων σε παγκόσμιο επίπεδο. Οι έφηβοι αφιερώνουν σημαντικό χρόνο στο διαδίκτυο, κυρίως μέσω κινητών τηλεφώνων, με τα κοινωνικά δίκτυα να κυριαρχούν στην καθημερινή τους δραστηριότητα, γεγονός που σύμφωνα με τα αποτελέσματα απασχολεί τόσο τους γονείς όσο και τους ίδιους. Σύμφωνα μάλιστα με αυτά, φαίνεται να υπάρχει μεγαλύτερη αυτορρύθμιση και επίγνωση της χρήσης από την πλευρά των κοριτσιών, ενώ τα αγόρια δείχνουν μεγαλύτερη εξάρτηση ή λιγότερη προσπάθεια για μείωση. Για ένα σημαντικό κομμάτι των εφήβων, η αυξημένη χρήση του διαδικτύου μπορεί να αποτελεί παράγοντα απόσπασης ή μείωσης της ακαδημαϊκής επίδοσης ενώ σίγουρα αποτελεί αιτία προστριβής με τους γονείς που προβαίνουν συχνά σε παρατηρήσεις.

Η θεωρία του Bandura (1977) επιβεβαιώνεται καθώς τόσο η χρήση όσο και οι στάσεις φαίνεται να επηρεάζονται από πρότυπα που προβάλλονται στο διαδίκτυο. Επιπλέον, η ψηφιακή εξάρτηση, όπως περιγράφεται από τη Young (1998), φαίνεται να εμφανίζεται κυρίως σε πλατφόρμες που ενισχύουν τη συνεχή αλληλεπίδραση και την ανατροφοδότηση μέσω "likes" και σχολίων, όπως το TikTok και το Instagram.

Η υπεροχή του Instagram, TikTok και Snapchat σε σχέση με πλατφόρμες όπως το Facebook ή το X (πρώην Twitter), επιβεβαιώνει πως οι μαθητές επιλέγουν μέσα κοινωνικής δικτύωσης που ενσωματώνουν περισσότερη άμεση αλληλεπίδραση εγκαταλείποντας μέσα που θεωρούνται ξεπερασμένα για τις ηλικίες αυτές ή που φαίνεται να επιλέγονται από γονείς ή ενήλικες (Anderson & Jiang, 2018).

Σαφώς αποτυπώνεται ότι οι μαθητές και οι μαθήτριες χρησιμοποιούν τα μέσα για επικοινωνία και ψυχαγωγία και όχι για ενημέρωση, επιβεβαιώνοντας τη λειτουργία των μέσων αυτών σύμφωνα με την περιγραφή που κάνει η θεωρία της Κοινωνικής Μάθησης του Bandura (1977). Τα κορίτσια κυριαρχούν στα κοινωνικά δίκτυα, ενώ τα αγόρια στην ψυχαγωγία και τα online παιχνίδια. Αυτή η διάκριση ήταν η πιο σαφής και αναμενόμενη. Οι νέοι, μέσω της παρατήρησης και της μίμησης, αναζητούν αποδοχή αλλά και ταύτιση με πρότυπα.

Παράλληλα, αναδεικνύονται οι σημαντικές διαφοροποιήσεις στην αντίληψη του κινδύνου ανάλογα με το φύλο των μαθητών, γεγονός που συμφωνεί με τη θεωρία του Slovic (1987). Οι μαθήτριες εμφανίζονται πιο ευαισθητοποιημένες σε θέματα προσωπικής ασφάλειας, ενώ τα αγόρια δείχνουν μεγαλύτερη αδιαφορία και ενίοτε έλλειψη προληπτικής συμπεριφοράς. Αυτό ίσως σχετίζεται με κοινωνικά στερεότυπα που ενισχύουν την ανθεκτικότητα ή την αίσθηση κυριαρχίας των αγοριών στον ψηφιακό χώρο (Livingstone & Brake, 2010).

Ιδιαίτερο ενδιαφέρον παρουσιάζει το εύρημα ότι πολλοί μαθητές έχουν βιώσει ή γνωρίζουν περιστατικά κινδύνων, όπως παρενόχληση, διαδικτυακός εκφοβισμός ή παραβίαση της ιδιωτικότητας. Το γεγονός αυτό συνδέεται άμεσα με τη θεωρία του Ψηφιακού Εθισμού (Young, 1998), καθώς η παρατεταμένη και ανεξέλεγκτη έκθεση στα μέσα αυξάνει τις πιθανότητες να βρεθεί κάποιος σε τέτοια περιστατικά.

Αξιοσημείωτη είναι επίσης και η διαφορά στις εμπειρίες μεταξύ φύλων. Τα κορίτσια δηλώνουν ότι συχνότερα αντιμετωπίζουν περιστατικά που τις κάνουν να αισθάνονται άβολα και, ως αποτέλεσμα, επιδεικνύουν μεγαλύτερη προσοχή και ευαισθησία σε θέματα προστασίας δεδομένων. Αντίθετα, τα αγόρια εμφανίζονται λιγότερο επιφυλακτικά και πιο επιρρεπή σε απερίσκεπτη χρήση, επιβεβαιώνοντας τη θεωρία του Slovic (1987) περί διαφοροποιημένης αντίληψης του κινδύνου με βάση το φύλο, αφού οι μαθήτριες είναι πιο ευαισθητοποιημένες σε θέματα διαδικτυακής παρενόχλησης και παραβίασης προσωπικών δεδομένων, σε αντίθεση με τους μαθητές, οι οποίοι τείνουν να έχουν πιο χαλαρή στάση. Η συγκεκριμένη διαφοροποίηση ενδέχεται να ερμηνευτεί και υπό το πρίσμα των πολιτισμικών προτύπων: κορίτσια κοινωνικοποιούνται συχνά σε ένα περιβάλλον που τις προτρέπει να είναι προστατευτικές και επιφυλακτικές, ενώ τα αγόρια ενθαρρύνονται προς πιο ριψοκίνδυνες ή αυθόρμητες συμπεριφορές (Harris et al., 2017).

Ένα σημείο που επίσης αναδεικνύεται είναι το γεγονός ότι, αν και οι περισσότεροι μαθητές δηλώνουν ότι έχουν διδαχθεί βασικές πρακτικές ψηφιακής ασφάλειας (π.χ. διαχείριση κωδικών, ρυθμίσεις απορρήτου), δεν τις εφαρμόζουν από αμέλεια ή, ακόμη χειρότερα, θεωρούν ότι δεν χρειάζεται να τις εφαρμόσουν. Αυτή η ασυνέπεια μεταξύ γνώσης και πράξης επισημαίνει την ανάγκη για ουσιαστικότερη ψηφιακή παιδεία, που δεν περιορίζεται στη μετάδοση πληροφοριών αλλά δίνει έμφαση στην κριτική σκέψη, την ενσυναίσθηση και την αυτορρύθμιση. Φαίνεται συνεπώς πως οι μαθητές ενώ γνωρίζουν την ορθή συμπεριφορά την παραβλέπουν είτε γιατί δεν εκτιμούν τον κίνδυνο ως σημαντικό, είτε γιατί οι κοινωνικές πιέσεις και η επιθυμία για συμμετοχή σε συγκεκριμένες πρακτικές (π.χ. δημόσια προφίλ, tagging σε φωτογραφίες, reposts) υπερνικούν τη λογική της προστασίας. Μάλιστα, η προθυμία να μοιραστούν τόσο ευαίσθητες πληροφορίες εγείρει σοβαρά ζητήματα ιδιωτικότητας και κινδύνων όπως το cyberbullying ή η εκμετάλλευση.

Τα δεδομένα της παρούσας μελέτης τονίζουν την ανάγκη για συστηματική και ουσιαστική εκπαίδευση στον ψηφιακό γραμματισμό. Δεν αρκεί η απλή διδασκαλία τεχνικών δεξιοτήτων, χρειάζεται ένα ολιστικό παιδαγωγικό πλαίσιο, το οποίο θα ενσωματώνει την κριτική προσέγγιση των μέσων (πώς κατασκευάζεται το περιεχόμενο, ποιοι το παράγουν, ποιες είναι οι συνέπειες), την κοινωνική υπευθυνότητα στη διαδικτυακή επικοινωνία και τη συμμετοχική μάθηση, όπου οι μαθητές εμπλέκονται ενεργά σε σενάρια επίλυσης προβλημάτων και προσομοιώσεις διαδικτυακών καταστάσεων.

Αξίζει επίσης να σημειωθεί ότι είναι κρίσιμη η συνεργασία και η ενίσχυση του ρόλου των γονέων και κηδεμόνων. Η καθοδήγηση από ενήλικες που όμως κατανοούν τα χαρακτηριστικά αυτών των μέσων και μπορούν να συνομιλήσουν ισότιμα με τους εφήβους είναι θεμελιώδους σημασίας αφού τα μέσα κοινωνικής δικτύωσης δεν είναι απλώς ένα τεχνολογικό εργαλείο, αποτελούν πεδίο πολιτισμικής διαπραγμάτευσης και κοινωνικής ταυτότητας για τους νέους.

ΣΥΜΠΕΡΑΣΜΑΤΑ

Η έρευνα επιβεβαιώνει ότι η χρήση των μέσων κοινωνικής δικτύωσης είναι θεμελιώδες στοιχείο της εφηβικής ζωής, με θετικά και αρνητικά αποτελέσματα. Αποτελούν πλέον αναπόσπαστο κομμάτι της καθημερινότητας των εφήβων, κυρίως για λόγους κοινωνικής αλληλεπίδρασης και ψυχαγωγίας. Ωστόσο, ενέχουν σημαντικούς κινδύνους, τους οποίους οι μαθητές γνωρίζουν σε θεωρητικό επίπεδο, αλλά συχνά δυσκολεύονται να διαχειριστούν στην πράξη.

Επιβεβαιώθηκε η ύπαρξη έμφυλων διαφοροποιήσεων τόσο στη βιωματική εμπειρία των κινδύνων όσο και στην αντίδραση απέναντί τους, με τις μαθήτριες να δείχνουν μεγαλύτερη ευαισθησία και εγρήγορση για θέματα ασφαλείας, αλλά και να εκτίθενται συχνότερα σε προβληματικές καταστάσεις.

Τα αποτελέσματα είναι παρόμοια με αυτά άλλων ερευνητικών αλλά και θεωρητικών εργασιών και υπογραμμίζουν την ανάγκη για συστηματική εκπαίδευση στον ψηφιακό γραμματισμό, όχι μόνο σε επίπεδο γνώσεων αλλά και σε επίπεδο δεξιοτήτων, στάσεων και συμπεριφορών.

Οι άξονες παρέμβασης πρέπει να περιλαμβάνουν ενίσχυση της ψηφιακής εκπαίδευσης εντός της σχολικής μονάδας, στοχευμένες παρεμβάσεις πρόληψης, λαμβάνοντας υπόψη τις διαφοροποιήσεις φύλου αλλά και συνεργασία μεταξύ εκπαιδευτικών, γονέων και ειδικών ψυχικής υγείας για τη δημιουργία ασφαλούς διαδικτυακού περιβάλλοντος.

ΠΡΟΤΑΣΕΙΣ ΓΙΑ ΜΕΛΛΟΝΤΙΚΗ ΕΡΕΥΝΑ

Στο πλαίσιο μελλοντικής έρευνας θα μπορούσαν να ενταχθούν η ποιοτική διερεύνηση εμπειριών μέσω συνεντεύξεων που θα εστιάζουν στην αποκάλυψη βαθύτερων στάσεων, συναισθημάτων και εμπειριών των μαθητών από την καθημερινή τους εμπλοκή στα μέσα κοινωνικής δικτύωσης, η διαχρονική μελέτη που θα επέτρεπε την καταγραφή αλλαγών στη χρήση των μέσων αλλά και την αντίληψη κινδύνων με την πάροδο του χρόνου, τη συγκριτική μελέτη ακόμη και μεταξύ σχολείων, αφού η σύγκριση μαθητών από διαφορετικές περιοχές (αστικές, ημιαστικές, αγροτικές) ή διαφορετικού τύπου σχολείων (ΓΕΛ, ΕΠΑΛ, ιδιωτικά) μπορεί να προσφέρει πληρέστερη εικόνα αλλά και πειραματικές παρεμβάσεις ψηφιακής ασφάλειας για εφήβους, με μετρήσιμα αποτελέσματα στην αλλαγή στάσεων και συμπεριφορών. με σχεδιασμό και αξιολόγηση.

ΠΕΡΙΛΗΨΗ

Εισαγωγή: Η αξιοποίηση των νέων τεχνολογιών στη διδακτική πράξη έχει αναδιαμορφώσει την εκπαίδευση, προσφέροντας καινοτόμα εργαλεία που ενισχύουν τη μαθησιακή εμπειρία. Οι Τεχνολογίες της Πληροφορίας και της Επικοινωνίας (ΤΠΕ) επιτρέπουν την αλληλεπίδραση, τη συνεργασία και την πρόσβαση σε εκπαιδευτικούς. Παράλληλα, προάγουν την εξατομικευμένη μάθηση και τη δημιουργικότητα, ενώ υποστηρίζουν τους εκπαιδευτικούς στην οργάνωση και παρουσίαση της γνώσης. Ωστόσο, η αποτελεσματική ενσωμάτωσή τους απαιτεί κατάλληλη εκπαίδευση, τεχνική υποστήριξη και στρατηγική προσέγγιση, ώστε να αξιοποιηθούν πλήρως οι δυνατότητές τους.

Σκοπός: Η εργασία εξετάζει τη χρήση των ΤΠΕ στην τριτοβάθμια εκπαίδευση, αναλύοντας τα οφέλη, τις προκλήσεις και το βαθμό ενσωμάτωσής τους από τους καθηγητές τριτοβάθμιας εκπαίδευσης. Παράλληλα, διερευνά τις αντιλήψεις των εκπαιδευτικών σχετικά με τη χρησιμότητα, τις προκλήσεις και τις επιπτώσεις των ΤΠΕ στη διδασκαλία και τη μάθηση.

Μέθοδος: Η μελέτη πραγματοποιήθηκε με συμπλήρωση ερωτηματολογίου από 62 καθηγητές πανεπιστημίου σχετικά με την ενσωμάτωση των ΤΠΕ στην εκπαιδευτική διαδικασία.

Αποτελέσματα: Η πλειονότητα των καθηγητών (96,8%) έχει ενσωματώσει τις ΤΠΕ στις διδακτικές πρακτικές, με θετικές αντιλήψεις για τη χρησιμότητα, το ενδιαφέρον και την ασφάλεια των τεχνολογιών αυτών. Ωστόσο, αναδείχθηκαν εμπόδια, όπως η έλλειψη τεχνικής υποστήριξης, η ανεπάρκεια κατάλληλου λογισμικού και οι περιορισμοί χρόνου, ειδικά σε συγκεκριμένες ηλικιακές ομάδες. Παρά τη συχνή χρήση βασικών εργαλείων, όπως το διαδίκτυο και οι εφαρμογές γραφείου, πιο εξειδικευμένα εργαλεία, όπως οι διαδραστικοί πίνακες και τα λογισμικά ψηφιακών τεστ, παραμένουν ανεκμετάλλευτα. Επιπλέον, καταγράφηκε ισχυρή επιθυμία για περαιτέρω επιμόρφωση, εστιάζοντας σε προχωρημένες δεξιότητες υπολογιστών, ασφάλεια στο διαδίκτυο και αξιοποίηση εργαλείων Web 2.0.

Συμπεράσματα: Η μελέτη υπογραμμίζει τη σημαντική συμβολή των ΤΠΕ στη βελτίωση της εκπαιδευτικής διαδικασίας, ενώ ταυτόχρονα αναδεικνύει τα εμπόδια που περιορίζουν την πλήρη αξιοποίησή τους. Απαιτείται πρόσθετη υποστήριξη και στοχευμένη επιμόρφωση για την ενίσχυση των δεξιοτήτων τους. Ο σχεδιασμός προγραμμάτων κατάρτισης και η προσαρμογή εκπαιδευτικών πολιτικών στις ανάγκες των καθηγητών κρίνονται αναγκαία για τη βέλτιστη ενσωμάτωση των ΤΠΕ και τη βελτίωση της συνολικής εκπαιδευτικής εμπειρίας.

Λέξεις– κλειδιά: ΤΠΕ, Διδακτική Πράξη, Επιμόρφωση, Εμπόδια και προκλήσεις.

ΕΙΣΑΓΩΓΗ

Η ραγδαία εξέλιξη των Τεχνολογιών Πληροφορίας και Επικοινωνιών (ΤΠΕ) έχει διαμορφώσει ένα νέο εκπαιδευτικό περιβάλλον, στο οποίο η χρήση των τεχνολογικών εργαλείων δεν αποτελεί απλώς υποστηρικτικό μέσο, αλλά αναδεικνύεται ως καταλυτικός παράγοντας για την ενίσχυση της διδασκαλίας και της μάθησης. Ιδιαίτερα στο πλαίσιο της εκπαίδευσης, οι εκπαιδευτικοί καλούνται να ενσωματώσουν τις ΤΠΕ στην καθημερινή διδακτική πρακτική, γεγονός που απαιτεί τόσο επαρκή επιμόρφωση όσο και θετική στάση απέναντι στην καινοτομία. Η παρούσα εργασία εξετάζει το βαθμό ένταξης των ΤΠΕ στη διδακτική διαδικασία στην τριτοβάθμια εκπαίδευση, εστιάζοντας στην επιμόρφωση των εκπαιδευτικών, τις αντιλήψεις τους και τις προκλήσεις που αντιμετωπίζουν.

Το θεωρητικό πλαίσιο στηρίζεται σε σύγχρονες προσεγγίσεις για την επαγγελματική ανάπτυξη των εκπαιδευτικών (Bikos & Tzifopoulos, 2016· Yusuf et al., 2013), τη σημασία του τεχνολογικού γραμματισμού (Lagou & Voudouri, 2017· Onasanya et al., 2010), καθώς και στη συμβολή των ΤΠΕ στη μεταμόρφωση των συστημάτων εκπαίδευσης (Barakabitze et al., 2019· Oliver, 2002). Ιδιαίτερη έμφαση δίδεται στον ρόλο της επιμόρφωσης, καθώς οι μελέτες καταδεικνύουν ότι χωρίς συστηματική, ουσιαστική και βιωματική κατάρτιση, η τεχνολογία παραμένει αναξιοποίητη στην εκπαιδευτική διαδικασία. (Sergis & Koutroumanos, 2013· Komis et al., 2014)

Η ενσωμάτωση των ΤΠΕ στην εκπαίδευση αναδεικνύεται ως κρίσιμος παράγοντας αλλαγής και καινοτομίας στην εκπαίδευση παγκοσμίως (Yusuf et al., 2013; Oliver, 2002). Στην Αφρική και ιδιαίτερα στη Νιγηρία, οι ΤΠΕ θεωρούνται καταλύτης για τη βελτίωση της ποιότητας της εκπαίδευσης, αν και υπάρχουν σημαντικές προκλήσεις όπως η έλλειψη υποδομών, περιορισμένη επιμόρφωση εκπαιδευτικών και ανεπαρκής χρηματοδότηση (Adam, 2003; Barakabitze et al., 2019; Murgor, 2015).

Σε αγροτικές περιοχές της Νότιας Αφρικής, οι περιορισμοί στην πρόσβαση και οι τεχνικές δυσκολίες εμποδίζουν την αποτελεσματική χρήση των ΤΠΕ στη δευτεροβάθμια εκπαίδευση (Mathevula & Uwizeyimana, 2014).

Παρόμοια προβλήματα διαφαίνονται και στις ανώτερες εκπαιδευτικές δομές, όπου παρά την ευρεία αναγνώριση των ωφελειών των ΤΠΕ, η αποδοχή και χρήση τους από τους καθηγητές παραμένει περιορισμένη λόγω στάσεων, έλλειψης κινήτρων και τεχνολογικού γραμματισμού (Onasanya et al., 2010; Idowu & Esere, 2013).

Η επιμόρφωση των εκπαιδευτικών στην Ελλάδα αποτελεί θεμελιώδη παράμετρο για την επιτυχή ένταξη των ΤΠΕ στη διδασκαλία (Karras & Oikonomidis, 2015; Sergis & Koutroumanos, 2013). Μοντέλα μικτής και εξ αποστάσεως επιμόρφωσης προτείνονται ως αποτελεσματικά μέσα επαγγελματικής ανάπτυξης, ειδικά σε περιβάλλοντα πολυπολιτισμικής εκπαίδευσης (Komis et al., 2014; Bikos & Tzifopoulos, 2016). Ωστόσο, παραμένουν εμπόδια όπως οι ατομικοί και σχολικοί παράγοντες που επηρεάζουν τη χρήση των ΤΠΕ, όπως η τεχνοφοβία, η έλλειψη χρόνου και οι περιορισμένοι πόροι (Mitsiopoulou & Vekyri, 2011; Karipidis, 2013).

Επιπλέον, η ψηφιακή παιδεία και ο τεχνολογικός γραμματισμός των εκπαιδευτικών θεωρούνται βασικές δεξιότητες για την ένταξη των ΤΠΕ στη σχολική πρακτική, ιδιαίτερα στα πρωτοβάθμια σχολεία (Lagou & Voudouri, 2017). Οι στάσεις και αντιλήψεις των εκπαιδευτικών παίζουν καθοριστικό ρόλο στην επιτυχή υιοθέτηση καινοτόμων τεχνολογιών (Tzimogiannis & Komis, 2004; Ertmer et al., 2012).

Σε παγκόσμιο επίπεδο, η χρήση των ΤΠΕ συνδέεται με την ανάπτυξη της μαθησιακής διαδικασίας μέσω e-learning, την ευελιξία στην εκπαιδευτική διαδικασία, και την ενίσχυση των δεξιοτήτων των μαθητών (Mikre, 2011; Mahlangu, 2018; Dabbagh, 2023). Ωστόσο, σημαντικές προκλήσεις όπως η ανισότητα στην πρόσβαση, οι τεχνικές δυσκολίες και η ανάγκη συνεχούς υποστήριξης και επιμόρφωσης αναδεικνύονται σε όλες τις χώρες (UNESCO, 2009; Madaki et al., 2021).

Οι ΤΠΕ προσφέρουν πολλαπλά οφέλη στην εκπαιδευτική διαδικασία, αναφέρονται ενδεικτικά τα παρακάτω:

Αρχικά, η ενίσχυση της πρόσβασης στη γνώση, μέσω διαδικτυακών πηγών και ηλεκτρονικών μαθημάτων οι μαθητές και φοιτητές μπορούν να έχουν πρόσβαση σε πλούσιο εκπαιδευτικό υλικό ανεξάρτητα από γεωγραφικούς περιορισμούς (Olufunso & Tony, 2014; Ukpe, 2023).

Η προώθηση ενεργητικής μάθησης, καθώς οι τεχνολογίες επιτρέπουν διαδραστικές και πολυαισθητηριακές εμπειρίες μάθησης που αυξάνουν το ενδιαφέρον και την εμπλοκή των μαθητών (Shatri & Kelmendi, 2023).

Επίσης προσφέρουν ευελιξία στον χρόνο και χώρο μάθησης επειδή η εξ αποστάσεως εκπαίδευση και η ασύγχρονη μάθηση διευκολύνουν την προσαρμογή της εκπαίδευσης σε ατομικές ανάγκες και περιορισμούς (Bikos & Tzifopoulos, 2016; Mahlangu, 2018).

Επιπλέον των παραπάνω συμβάλλουν στη βελτίωση των δεξιοτήτων ψηφιακού γραμματισμού, με τη χρήση ΤΠΕ αναπτύσσει απαραίτητες δεξιότητες για τη σύγχρονη κοινωνία και αγορά εργασίας (Lagou & Voudouri, 2017).

Τέλος, δίνουν δυνατότητα εξατομίκευσης της μάθησης: Τα ψηφιακά εργαλεία επιτρέπουν την προσαρμογή της εκπαιδευτικής εμπειρίας ανάλογα με τις ανάγκες και ικανότητες του κάθε μαθητή (Dabbagh, 2023).

Εκτός από τα πλεονεκτήματα των ΤΠΕ στην εκπαίδευση, εύκολα μπορούμε να εντοπίσουμε και να καταγράψουμε και μια σειρά από δυσκολίες και αρκετές προκλήσεις, κυριότερες από τις οποίες φαίνονται παρακάτω

Πρωτίστως είναι η έλλειψη υποδομών και τεχνικών μέσων, με το πρόβλημα να εμφανίζεται ιδιαίτερα σε αγροτικές ή οικονομικά υποανάπτυκτες περιοχές καθώς η πρόσβαση σε τεχνολογίες είναι περιορισμένη ή ανύπαρκτη (Mathevula & Uwizeyimana, 2014; Butcher, 2014).

Ακολούθως, η αντίσταση και αρνητικές στάσεις των εκπαιδευτικών, αναμενόμενες ως ένα βαθμό, καθώς ο άνθρωπος έχει την τάση να αντιστέκεται σε αλλαγές όπως η τεχνοφοβία, η έλλειψη κινήτρων ή η αδυναμία προσαρμογής σε νέες μεθόδους εμποδίζουν κάποιες φορές την ουσιαστική ενσωμάτωση των ΤΠΕ (Tzimogiannis & Komis, 2004; Ertmer, 1999).

Άλλο ένα θέμα είναι τα ποικίλα προβλήματα επιμόρφωσης, στα οποία συμπεριλαμβάνονται η ανεπαρκής ή μη συστηματική επιμόρφωση των εκπαιδευτικών περιορίζει τη χρήση και αξιοποίηση των ΤΠΕ (Karras & Oikonomidis, 2015; Sergis & Koutroumanos, 2013).

Ο ψηφιακός αποκλεισμός, ιδίως σε όχι τόσο αναπτυγμένες κοινωνίες, αποτελεί έναν υπαρκτό κίνδυνο διεύρυνσης των κοινωνικών ανισοτήτων λόγω άνισης πρόσβασης σε τεχνολογικά μέσα (UNESCO, 2009).

Επίσης, οι τεχνικές δυσκολίες και υποστήριξη όπως η ανεπαρκής τεχνική υποστήριξη και προβλήματα λειτουργίας των συστημάτων επηρεάζουν αρνητικά την εκπαιδευτική διαδικασία (Madaki et al., 2021).

Μία τελευταία αλλά εξ' ίσου σημαντική πρόκληση, αποτελεί η πιθανή απομόνωση μαθητών: Η εξ αποστάσεως εκπαίδευση μπορεί να μειώσει την κοινωνική αλληλεπίδραση και να επηρεάσει αρνητικά την ψυχοκοινωνική ανάπτυξη (Mahlangu, 2018).

ΣΚΟΠΟΣ ΤΗΣ ΕΡΥΝΑΣ

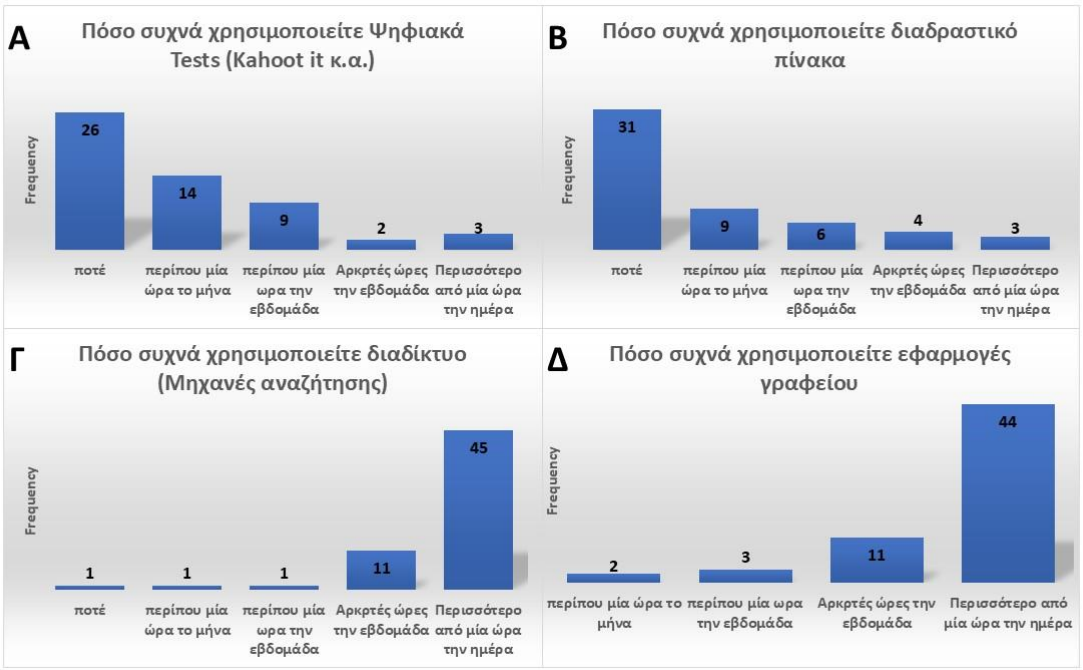
Η παρούσα έρευνα πραγματοποιήθηκε με σκοπό να εξετάσει τη χρήση των ΤΠΕ στην τριτοβάθμια εκπαίδευση, αναλύοντας τα οφέλη, τις προκλήσεις και το βαθμό ενσωμάτωσής τους από τους καθηγητές τριτοβάθμιας εκπαίδευσης. Επιπλέον θέλησε να αναλύσει και να διερευνήσει τις αντιλήψεις των εκπαιδευτικών σχετικά με τη χρησιμότητα, τις προκλήσεις και τις επιπτώσεις των ΤΠΕ στη διδασκαλία και τη μάθηση.

Η έρευνα πραγματοποιήθηκε με τη συμπλήρωση των ερωτηματολογίων που διανεμήθηκε σε διδάσκοντες στην τριτοβάθμια εκπαίδευση από διάφορες περιοχές της Ελλάδας. Μέσω της ανάλυσης των απαντήσεων, διερευνώνται οι στάσεις των εκπαιδευτικών απέναντι στις ΤΠΕ, η ποιότητα της επιμόρφωσής τους, καθώς και τα εμπόδια που συναντούν, όπως ενδεικτικά η έλλειψη υλικοτεχνικής υποδομής, ο περιορισμένος χρόνος και η απουσία θεσμικής στήριξης. Ακολούθησε στατιστική ανάλυση με τη χρήση του λογισμικού SPSS 28. Για την ανάλυση των δεδομένων, χρησιμοποιήθηκαν τα περιγραφικά στατιστικά (descriptive statistics) για τον υπολογισμό των συχνοτήτων των απαντήσεων. Επιπλέον, πραγματοποιήθηκαν αναλύσεις με τη χρήση των δοκιμών Chi-square (χ^2) για τον προσδιορισμό σημαντικών συσχετίσεων μεταξύ των μεταβλητών και της One-way ANOVA για την εξερεύνηση σημαντικών διαφορών μεταξύ των ομάδων των συμμετεχόντων σε σχέση με τις διάφορες παραμέτρους της μελέτης.

Τα ευρήματα της μελέτης φανερώνουν ότι παρότι οι εκπαιδευτικοί αντιλαμβάνονται την αξία των ΤΠΕ, πολλοί δηλώνουν ανεπαρκώς προετοιμασμένοι να τις αξιοποιήσουν αποτελεσματικά. Οι περισσότεροι θεωρούν πως η υπάρχουσα επιμόρφωση είναι αποσπασματική ή θεωρητική, χωρίς άμεση εφαρμογή στην πράξη. Ωστόσο, διαπιστώνεται

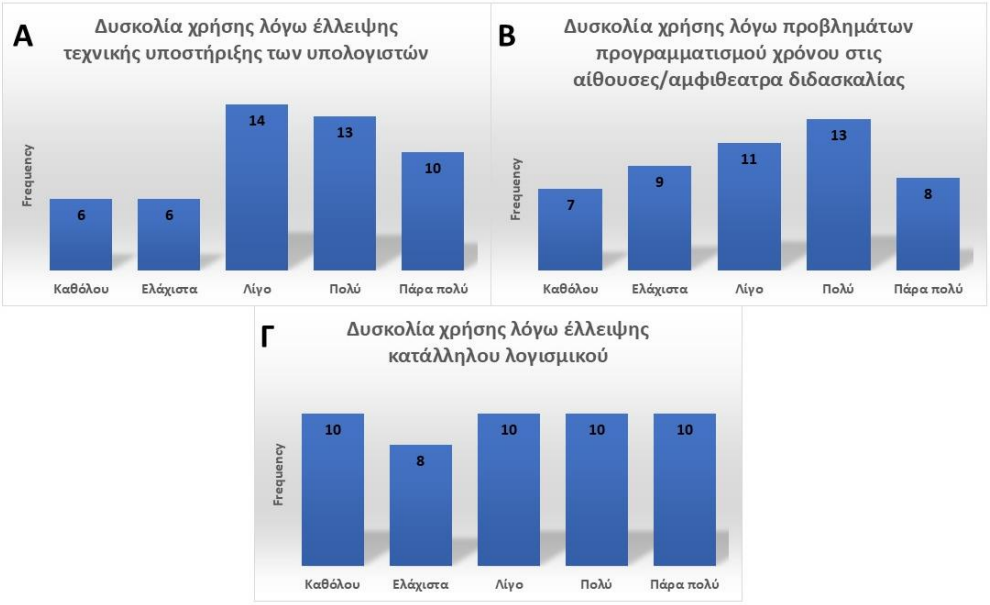
και έντονο ενδιαφέρον για συνεχιζόμενη επιμόρφωση μέσω ευέλικτων μορφών όπως η εξ αποστάσεως εκπαίδευση (Bagakis, 2010· Mahlangu, 2018).

ΑΠΟΤΕΛΕΣΜΑΤΑ



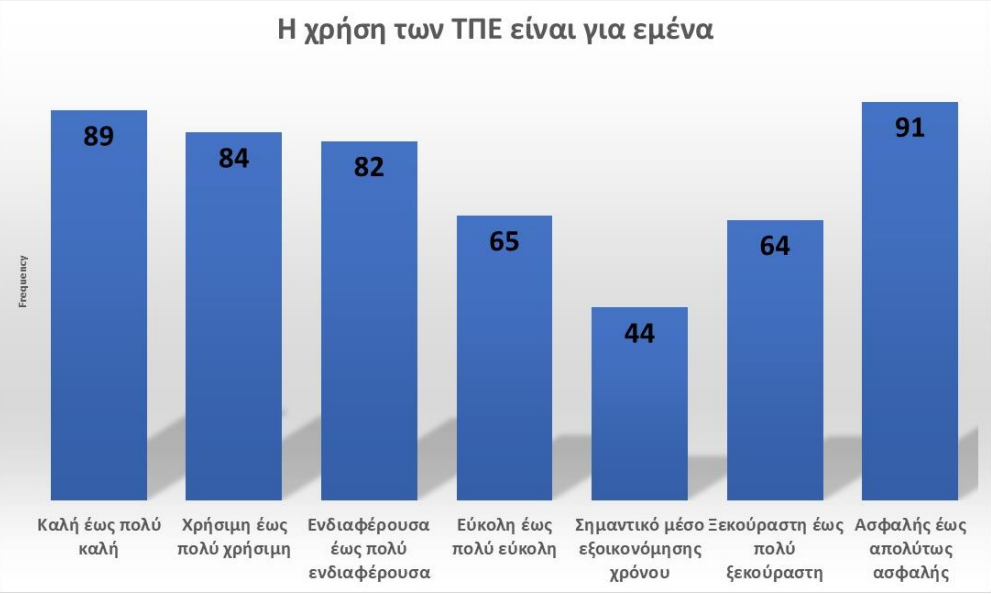
Από την ανάλυση των δεδομένων προέκυψε ότι η πλειονότητα των συμμετεχόντων καθηγητών χρησιμοποιεί ΤΠΕ στη διδασκαλία τους. Συγκεκριμένα, 60 από τους 62 καθηγητές (96,8%) δήλωσαν ότι ενσωματώνουν ΤΠΕ στη διδακτική τους πρακτική, ενώ μόνο 2 καθηγητές (3,2%) ανέφεραν ότι δεν χρησιμοποιούν καθόλου ΤΠΕ (Διάγραμμα 1). Το παραπάνω εύρημα υπογραμμίζει τη γενικευμένη υιοθέτηση των ΤΠΕ στην εκπαιδευτική διαδικασία, αναδεικνύοντας τη σημασία της τεχνολογίας ως εργαλείο υποστήριξης της διδασκαλίας στην τριτοβάθμια εκπαίδευση.

Διάγραμμα 1
Χρήση ΤΠΕ στη διδασκαλία.



Η χρήση συγκεκριμένων εργαλείων ΤΠΕ στη Διδασκαλία από τους Καθηγητές φαίνεται στα ακόλουθα γραφήματα (διάγραμμα 2) τα οποία απεικονίζουν τη συχνότητα χρήσης διάφορων εργαλείων ΤΠΕ (όπως ψηφιακά τεστ, Kahoot it, διαδραστικοί πίνακες, διαδίκτυο και εφαρμογές γραφείου) από καθηγητές στη διδασκαλία τους. Τα δεδομένα παρουσιάζουν τις συχνότητες χρήσης αυτών των εργαλείων, αποκαλύπτοντας ποια εργαλεία χρησιμοποιούνται πιο συχνά και ποια σπανιότερα από το διδακτικό προσωπικό.

Διάγραμμα 2
Συχνότητα χρήσης συγκεκριμένων εργαλείων.



Τα συχνότερα εμπόδια που αντιμετωπίζουν οι καθηγητές στη χρήση των ΤΠΕ εμφανίζονται στα γραφήματα του διαγράμματος 3 με τα αντίστοιχα ποσοστά τους. Μεταξύ αυτών είναι η έλλειψη κατάλληλου λογισμικού, τεχνικής υποστήριξης, καθώς και τον προγραμματισμό χρόνου στις αίθουσες/αμφιθέατρα διδασκαλίας. Τα αποτελέσματα δείχνουν ότι η επιτυχής χρήση των ΤΠΕ εξαρτάται σε μεγάλο βαθμό από την παροχή τεχνικής υποστήριξης και την επαρκή οργάνωση των διδακτικών χώρων. Επιπλέον, υποδεικνύουν την ανάγκη για εξειδικευμένο λογισμικό, που να ανταποκρίνεται στις ανάγκες των καθηγητών. Η αντιμετώπιση αυτών των παραγόντων θα μπορούσε να ενισχύσει τις θετικές αντιλήψεις για τις ΤΠΕ και να αυξήσει τη συχνότητα χρήσης τους.

Διάγραμμα 3
Εμπόδια χρήσης συγκεκριμένων εργαλείων.

Εν συνεχεία στο διάγραμμα 4 εμφανίζονται οι αντιλήψεις των Καθηγητών σχετικά με τη χρήση των ΤΠΕ. Περιλαμβάνει αξιολογήσεις ως προς την ευκολία, τη χρησιμότητα, το ενδιαφέρον, την εξοικονόμηση χρόνου, και την ασφάλεια που παρέχουν τα ΤΠΕ, αναδεικνύοντας τη συνολική θετική στάση των εκπαιδευτικών προς τη χρήση τους. Τα αποτελέσματα αυτά υπογραμμίζουν την ευρεία αποδοχή των ΤΠΕ από τους εκπαιδευτικούς, τόσο ως λειτουργικό εργαλείο στη διδασκαλία όσο και ως μέσο που συμβάλλει στην αποτελεσματικότητα και την εξοικονόμηση χρόνου.

Διάγραμμα 4
Αντιλήψεις Καθηγητών σχετικά με τη χρήση ΤΠΕ.

Μια ακόμα παράμετρος που μελετήθηκε και αξιολογήθηκε ήταν η αναγκαιότητα Διδακτικής Κατάρτισης για τους Καθηγητές. Το διάγραμμα 5 απεικονίζει τη στάση των καθηγητών σχετικά με την ανάγκη για διδακτική κατάρτιση, πέρα από την επιστημονική. Η συντριπτική πλειοψηφία θεωρεί ότι η διδακτική κατάρτιση αποτελεί απαραίτητο χαρακτηριστικό για την αποτελεσματική άσκηση του έργου τους. Τα ευρήματα αυτά υπογραμμίζουν τη σημασία της επένδυσης στην ανάπτυξη τόσο επιστημονικών όσο και διδακτικών δεξιοτήτων για τη διασφάλιση ποιοτικής διδασκαλίας και υποστήριξης των μαθησιακών αναγκών.

Διάγραμμα 5
Αναγκαιότητα διδακτικής κατάρτισης, πέραν της επιστημονικής.

ΣΥΜΠΕΡΑΣΜΑΤΑ

Βασισμένοι στην έρευνα που πραγματοποιήσαμε, θα μπορούσαμε να καταγράψουμε ότι οι ΤΠΕ είναι αναπόσπαστο κομμάτι της εκπαιδευτικής διαδικασίας και θα έχουν αυξανόμενο ρόλο στο μέλλον. Επιπλέον, η επαυξημένη πραγματικότητα και η τεχνητή νοημοσύνη αποτελούν πλέον αναπόσπαστα εργαλεία της τέταρτης βιομηχανικής επανάστασης και επηρεάζουν ήδη κάθε πτυχή της ζωής μας, συμπεριλαμβανομένης της εκπαίδευσης. Ωστόσο, η ενσωμάτωση αυτών των τεχνολογιών απαιτεί προσεκτική προσέγγιση, με την ανάπτυξη δικλείδων ασφαλείας που θα εξασφαλίζουν την ηθική και υπεύθυνη χρήση τους. Η τεχνητή νοημοσύνη μπορεί να αναγνωρίζει, να μαθαίνει και να προσαρμόζεται, όμως αυτό που της λείπει – και ενδέχεται να της λείπει για αρκετό καιρό ακόμα – είναι η ψυχή, ο συναισθηματικός κόσμος και η φαντασία, που χαρακτηρίζουν τον άνθρωπο.

Συμπερασματικά, από τα δεδομένα μας, θα επισημαίναμε ότι οι ΤΠΕ έχουν σημαντική συμβολή στη βελτίωση της εκπαιδευτικής διαδικασίας, ενώ ταυτόχρονα αναδεικνύει τα εμπόδια που περιορίζουν την πλήρη αξιοποίησή τους, χρειάζεται, όμως, πρόσθετη υποστήριξη και στοχευμένη επιμόρφωση για την ενίσχυση των δεξιοτήτων των διδασκόντων. Οι τεχνολογικές εξελίξεις προχωρούν με ραγδαίους ρυθμούς, μεταμορφώνοντας διαρκώς το εκπαιδευτικό τοπίο. Αν και οι προκλήσεις είναι μεγάλες, οι ευκαιρίες που ανοίγονται είναι εξίσου εντυπωσιακές. Ο σχεδιασμός προγραμμάτων κατάρτισης και η προσαρμογή εκπαιδευτικών πολιτικών στις ανάγκες των καθηγητών κρίνονται αναγκαία, για τη βέλτιστη ενσωμάτωση των ΤΠΕ και τη βελτίωση της συνολικής εκπαιδευτικής εμπειρίας. Το κλειδί βρίσκεται στη διαρκή προσαρμογή, στην εκπαίδευση και στην καλλιέργεια ενός συνεργατικού πνεύματος ανάμεσα στον άνθρωπο και την τεχνολογία, με τελικό στόχο την πρόοδο της κοινωνίας μας.

ΕΡΕΥΝΑ ΓΙΑ ΤΗΝ ΑΞΙΟΠΟΙΗΣΗ ΤΩΝ ΤΕΧΝΟΛΟΓΙΩΝ ΠΛΗΡΟΦΟΡΙΑΣ ΚΑΙ ΕΠΙΚΟΙΝΩΝΙΩΝ ΑΠΟ ΤΟΥΣ ΕΚΠΑΙΔΕΥΤΙΚΟΥΣ ΤΗΣ ΔΕΥΤΕΡΟΒΑΘΜΙΑΣ ΕΚΠΑΙΔΕΥΣΗΣ ΤΟΥ ΝΟΜΟΥ ΙΩΑΝΝΙΝΩΝ

Μπρίτσα Ελεονώρα
Εκπαιδευτικός Πληροφορικός ΠΕ86-Med
Διεύθυνση Δευτεροβάθμιας Εκπαίδευσης
Ιωάννινα, Ελλάδα
e-mail:eleonbritsa@gmail.com

ΠΕΡΙΛΗΨΗ

Ο σκοπός της παρούσας εργασίας ήταν η διερεύνηση της αξιοποίησης των Τεχνολογιών Πληροφορίας και Επικοινωνιών από τους εκπαιδευτικούς που υπηρετούν στις σχολικές μονάδες της δευτεροβάθμιας εκπαίδευσης του Νομού Ιωαννίνων. Μέσα από τη συμμετοχή 139 εκπαιδευτικών διαφόρων ειδικοτήτων στη διαδικτυακή συμπλήρωση σχετικού ερωτηματολογίου εξετάστηκαν ζητήματα όπως: η διαθεσιμότητα και ο τρόπος πρόσβασης στον υλικοτεχνικό εξοπλισμό, το ποσοστό χρήσης των διαθέσιμων Τ.Π.Ε., ο τύπος δραστηριοτήτων στις οποίες αξιοποιούνται οι Τ.Π.Ε., το είδος μαθησιακού και διδακτικού υλικού που χρησιμοποιείται από τους εκπαιδευτικούς, βασικοί παράγοντες που επηρεάζουν αρνητικά τη χρήση των Τ.Π.Ε., η συμμετοχή των εκπαιδευτικών σε επιμορφωτικές δράσεις για τις Τ.Π.Ε. στη διδασκαλία, καθώς και οι απόψεις και στάσεις των εκπαιδευτικών σχετικά με τις Τ.Π.Ε. κατά τη διδασκαλία και γενικότερα στα πλαίσια της σχολικής μονάδας. Η συλλογή των δεδομένων του ερωτηματολογίου διεξήχθη κατά το προτελευταίο δίμηνο του έτους 2018. Πολλά από τα αποτελέσματα της έρευνας συμφωνούν με τα αντίστοιχα της τελευταίας έρευνας του ευρωπαϊκού δικτύου European Schoolnet. Μεταξύ των σημαντικότερων συμπερασμάτων της έρευνας συγκαταλέγονται τα εξής: υφίσταται ανεπάρκεια κατάλληλου υλικοτεχνικού εξοπλισμού για τη χρήση Τ.Π.Ε. που αποτελεί και τον πιο αρνητικό παράγοντα χρήσης τους στη διδασκαλία και τη μάθηση, υπάρχει μεγαλύτερη τάση αξιοποίησης των Τ.Π.Ε., οι εκπαιδευτικοί Θεωρητικών Σπουδών δημιουργούν συχνότερα δικό τους ψηφιακό υλικό λόγω πιθανής ανεπάρκειας έτοιμου αντίστοιχου υλικού και συμβουλεύονται περισσότερο το υλικό από το σχολικό δίκτυο και τις σχολικές βάσεις δεδομένων ενώ συνάμα επιμορφώνονται περισσότερο σε προσωπικό επίπεδο για τις Τ.Π.Ε. στον ελεύθερο χρόνο τους για να μπορέσουν να ανταπεξέλθουν στις σύγχρονες απαιτήσεις, η επιμόρφωση στις Τ.Π.Ε. από προσωπικό του σχολείου είναι πολύ σπάνια, αναδεικνύεται ο σημαντικός ρόλος της επιμόρφωσης λόγω συχνής εμπλοκής των εκπαιδευτικών με τα πεδία στα οποία επιμορφώθηκαν, η σημαντικότερη θετική συνεισφορά της χρήσης των Τ.Π.Ε. είναι η ενίσχυση της συνεργασίας των μαθητών, ενώ απαιτούνται ριζικές αλλαγές στα σχολεία για την πλήρη εκμετάλλευση των Τ.Π.Ε. στη διδασκαλία και τη μάθηση.

Λέξεις-κλειδιά: Τεχνολογίες Πληροφορίας και Επικοινωνιών (Τ.Π.Ε.), Χρήση και Αξιοποίηση των Τ.Π.Ε. στη Διδασκαλία, Δευτεροβάθμια Εκπαίδευση, Απόψεις, Στάσεις, Επιμόρφωση.

ΕΙΣΑΓΩΓΗ

Οι Τεχνολογίες Πληροφορίας και Επικοινωνιών (Τ.Π.Ε.) συνιστούν βασικό συστατικό της σύγχρονης κοινωνίας και αναπόσπαστο κομμάτι της σύγχρονης εκπαίδευσης. Η χρήση και αξιοποίησή τους στην εκπαιδευτική διαδικασία αποτέλεσε αντικείμενο πολλών ερευνών από την πρώτη κιόλας εμφάνισή τους. Πολλές από αυτές διαπραγματεύονται την επίδραση των Τ.Π.Ε. στο χώρο της δευτεροβάθμιας εκπαίδευσης μέσα από τις σκοπιές μαθητών, εκπαιδευτικών, διευθυντών και όλων γενικότερα των οντοτήτων του εκπαιδευτικού συστήματος. Η παρούσα εργασία μελετά τη χρήση και αξιοποίηση των Τ.Π.Ε. στις σχολικές μονάδες της δευτεροβάθμιας εκπαίδευσης του Νομού Ιωαννίνων, από πλευράς εκπαιδευτικών και περιλαμβάνει τρία κεφάλαια.

Στο ερευνητικό μέρος της εργασίας, το πρώτο κεφάλαιο παραθέτει τα βασικά στοιχεία της έρευνας, όπως ο σκοπός, ο πληθυσμός και το δείγμα, τα εργαλεία και η μεθοδολογία που χρησιμοποιήθηκε για τη διεξαγωγή της. Το επόμενο κεφάλαιο περιλαμβάνει τη στατιστική ανάλυση που πραγματοποιήθηκε στα δεδομένα που συλλέχθηκαν. Μέσα από την ανάλυση αυτήν περιγράφονται και οι συσχετίσεις που εντοπίστηκαν μεταξύ των υπό μελέτη μεταβλητών

Στο τελευταίο κεφάλαιο παρουσιάζονται αναλυτικά όλα τα συμπεράσματα που προέκυψαν από τη διεξαγωγή της έρευνας, μαζί με προτάσεις για πιθανή επέκταση της έρευνας.

ΕΡΕΥΝΑ

Έρευνα για τη χρήση των Τ.Π.Ε. στη Δευτεροβάθμια Εκπαίδευση

Σκοπός και στόχοι της έρευνας

Η παρούσα έρευνα βασίστηκε στη μελέτη του European Schoolnet (2019) για τη χρήση και τον αντίκτυπο των Τ.Π.Ε. στα ευρωπαϊκά σχολεία. Στόχος της ήταν η διερεύνηση της χρήσης, αξιοποίησης και στάσεων των εκπαιδευτικών της δευτεροβάθμιας εκπαίδευσης στην Ελλάδα, εστιάζοντας στη διαθεσιμότητα εξοπλισμού, τη χρήση Τ.Π.Ε., την επιμόρφωση και τις απόψεις για τη διδασκαλία με Τ.Π.Ε.

Εργαλεία έρευνας

Το κύριο εργαλείο της έρευνας ήταν ένα καλά σχεδιασμένο, πολύπλευρο ερωτηματολόγιο απευθυνόμενο σε όλους τους εκπαιδευτικούς της δευτεροβάθμιας εκπαίδευσης του νομού Ιωαννίνων. Η επιλογή του κρίθηκε κατάλληλη λόγω των διαθέσιμων μέσων και του περιορισμένου χρόνου, αποτελώντας ικανοποιητική μέθοδο για τη διερεύνηση των ζητούμενων, υποστηριζόμενη από προηγούμενη επιστημονικά τεκμηριωμένη ευρωπαϊκή έρευνα.

Ερευνητική μεθοδολογία

Η έρευνα ακολουθεί ποσοτική προσέγγιση, βασισμένη στη συλλογή και ανάλυση αριθμητικών δεδομένων για εξαγωγή στατιστικά τεκμηριωμένων συμπερασμάτων (Ζαφειρόπουλος, 2015). Τα δεδομένα συγκεντρώθηκαν μέσω δομημένου ερωτηματολογίου στο Google Forms, με θεματική οργάνωση σύμφωνα με τους ερευνητικούς άξονες και διασφάλιση ανωνυμίας. Πριν τη διάθεση, το ερωτηματολόγιο υποβλήθηκε σε πιλοτικό έλεγχο με δέκα εκπαιδευτικούς, χωρίς να απαιτηθούν τροποποιήσεις.

Πληθυσμός και δείγμα έρευνας – Δειγματοληψία

Η έρευνα πραγματοποιήθηκε μεταξύ των εκπαιδευτικών των 66 σχολείων δευτεροβάθμιας εκπαίδευσης του νομού Ιωαννίνων. Το ερωτηματολόγιο στάλθηκε αρχικά στους διευθυντές των σχολικών μονάδων μέσω ηλεκτρονικού ταχυδρομείου, με ενημέρωση για τους στόχους και τη διαδικασία της έρευνας. Οι διευθυντές προώθησαν στη συνέχεια τον υπερσύνδεσμο συμπλήρωσης στους εκπαιδευτικούς τους. Η πρόσβαση στο ερωτηματολόγιο προστατεύτηκε με κωδικό για να διασφαλιστεί η συμμετοχή μόνο του στοχευόμενου πληθυσμού. Η διαδικασία συμπλήρωσης ολοκληρώθηκε εντός του καθορισμένου χρονικού διαστήματος.

ΠΑΡΟΥΣΙΑΣΗ, ΑΝΑΛΥΣΗ ΚΑΙ ΣΧΟΛΙΑΣΜΟΣ ΤΩΝ ΑΠΟΤΕΛΕΣΜΑΤΩΝ

Παρουσιάζονται και αναλύονται τα αποτελέσματα από τις απαντήσεις των 139 εκπαιδευτικών. Τα δεδομένα καταγράφηκαν μέσω Google Forms, αναλύθηκαν με SPSS 17.0 και απεικονίστηκαν με Excel. Χρησιμοποιήθηκαν μέθοδοι Περιγραφικής Στατιστικής (πίνακες συχνοτήτων, διαγράμματα) και Επαγωγικής Στατιστικής (Pearson X^2 για σχέσεις μεταξύ μεταβλητών).

Α΄ Μέρος – Ατομικά στοιχεία

Στο πρώτο μέρος του ερωτηματολογίου καταγράφηκαν τα ατομικά στοιχεία των συμμετεχόντων στην έρευνα εκπαιδευτικών. Σύμφωνα με αυτά, οι περισσότεροι εκπαιδευτικοί (σε ποσοστό 62,6%) ήταν γυναίκες, αλλά υπήρχε και σημαντικό ποσοστό αντρών (της τάξεως του 37,4%). Όσο αφορά την ειδικότητα των εκπαιδευτικών, ανάμεσα στους τρεις βασικούς και γενικούς κλάδους της Πληροφορικής, των Θεωρητικών και των Θετικών Σπουδών, σχεδόν οι μισοί ερωτώμενοι ήταν εκπαιδευτικοί Πληροφορικής, αλλά και ένα μεγάλο ποσοστό (38,1%) ήταν εκπαιδευτικοί Θεωρητικών Σπουδών. Οι εκπαιδευτικοί Θετικών Σπουδών ανήλθαν στο χαμηλό αλλά όχι αμελητέο ποσοστό του 15,8%.

Στην έρευνα υπήρξε ικανοποιητική συμμετοχή από εκπαιδευτικούς που υπηρετούν και στους τρεις τύπους σχολείων της δευτεροβάθμιας εκπαίδευσης, ενώ όσο αφορά την ηλικία τους σχεδόν οι μισοί από τους ερωτώμενους ήταν από 46 μέχρι και 55 ετών. Μεταξύ των υπολοίπων ηλικιών, οι αμέσως επόμενες μεγαλύτερες συμμετοχές εκδηλώθηκαν από εκπαιδευτικούς ηλικίας από 36 μέχρι και 45 ετών, όπως και μεγαλύτερης των 55 ετών.

Το τελευταίο ερώτημα του πρώτου μέρους του ερωτηματολογίου είχε να κάνει με τα συνολικά έτη άσκησης διδακτικού έργου από τους συμμετέχοντες εκπαιδευτικούς. Οι περισσότεροι ερωτώμενοι διαθέτουν από 21 μέχρι και 30 έτη προϋπηρεσίας, ενώ αμέσως μετά έρχονται όσοι διαθέτουν από 11 μέχρι και 20 έτη. Εδώ παρατηρείται η αναλογία ποσοστών βάσει και του προηγούμενου ερωτήματος, καθώς κατά κύριο λόγο όσο μεγαλύτερη είναι η ηλικία ενός εκπαιδευτικού τόσο πιο πολλά έτη διδακτικής προϋπηρεσίας διαθέτει.

Β΄ Μέρος – Υλικοτεχνικός εξοπλισμός για την υποστήριξη της διδασκαλίας

Στο δεύτερο μέρος του ερωτηματολογίου εξετάστηκαν η διαθεσιμότητα και η πρόσβαση στον υλικοτεχνικό εξοπλισμό που διαθέτουν οι σχολικές μονάδες των ερωτώμενων. Όσο αφορά τη διαθεσιμότητα, η πλειονότητα του υλικοτεχνικού εξοπλισμού (ποσοστό 68,3%) διατίθεται για μαθητές και εκπαιδευτικό, ενώ μια σημαντική μερίδα εξοπλισμού διατίθεται μόνον για τον εκπαιδευτικό.

Για τον τρόπο πρόσβασης στο διαθέσιμο υλικοτεχνικό εξοπλισμό, παρατηρήθηκε αρχικά μια αρνητική εικόνα στη μη δυνατότητα πρόσβασης κατά ένα μεγάλο ποσοστό σε σταθερό ή φορητό υπολογιστή χωρίς πρόσβαση στο διαδίκτυο. Επίσης, αρνητική εικόνα δημιουργήθηκε και από τα χαμηλά ποσοστά μόνιμης πρόσβασης σε φορητά υπολογιστικά συστήματα. Ενθαρρυντικό όμως στοιχείο αποτελεί το γεγονός πως, σε πολύ μεγάλο βαθμό, στα εργαστήρια Η/Υ των σχολικών μονάδων οι εκπαιδευτικοί όλων των ειδικοτήτων έχουν μόνιμη πρόσβαση, ενώ σε μερικές περιπτώσεις απαιτείται και αίτημα πρόσβασης σε αυτά (π.χ. προφορική αίτηση χρήσης προς δ/ντή ή υπεύθυνο εργαστηρίου Η/Υ).

Γ΄ Μέρος – Χρήση Τ.Π.Ε. στη διδασκαλία

Στο επόμενο μέρος του ερωτηματολογίου εξετάστηκαν ζητήματα που αφορούν τη χρήση των Τ.Π.Ε. στη διδασκαλία. Αρχικά, σχεδόν ένας στους δύο ερωτώμενους έχει χρησιμοποιήσει υπολογιστές ή/και διαδίκτυο για περισσότερα από 6 έτη κατά τη διδακτική του υπηρεσία μέχρι πρότινος. Το μεγάλο αυτό ποσοστό δικαιολογείται και από τα αντίστοιχα μεγάλα ποσοστά του 3ου ερωτήματος, όπου αθροιστικά περίπου τρεις στους τέσσερις εκπαιδευτικούς δήλωσαν πως έχουν από 11 έτη και άνω διδακτική προϋπηρεσία.

Μεταξύ των δραστηριοτήτων στις οποίες εμπλέκεται η χρήση και αξιοποίηση των Τ.Π.Ε. στη διδασκαλία και τη μάθηση, οι ερωτηθέντες εκπαιδευτικοί φαίνεται να ασχολούνται σε καθημερινή ή σχεδόν καθημερινή βάση κυρίως με την περιήγηση και αναζήτηση πληροφοριών, ενώ η πιο σπάνια δραστηριότητα είναι αυτή της διαδικτυακής επικοινωνίας με τους γονείς των μαθητών τους. Σε μηνιαία βάση επικρατεί η δραστηριότητα της δημιουργίας ψηφιακού υλικού, η οποία προφανώς απαιτεί αρκετό χρόνο για την υλοποίησή της, ενώ σε εβδομαδιαία βάση οι εκπαιδευτικοί ασχολούνται με αρκετές από τις παρεχόμενες δραστηριότητες, όπως η χρήση εφαρμογών για προετοιμασία παρουσιάσεων, η περιήγηση και αναζήτηση πληροφοριών, η αναζήτηση μαθησιακών πόρων για τους μαθητές, η αξιολόγηση ψηφιακών μαθησιακών πόρων και η δημιουργία ψηφιακού υλικού.

Σχετικά με τον τύπο μαθησιακού και διδακτικού υλικού που αξιοποιούν οι εκπαιδευτικοί κατά τη διδασκαλία με χρήση Τ.Π.Ε., πρωτοπόρος αναδείχθηκε η γενική αναζήτηση στο διαδίκτυο, ενώ πολύ υψηλό ποσοστό συγκέντρωσαν οι εδραιωμένες εκπαιδευτικές πηγές.

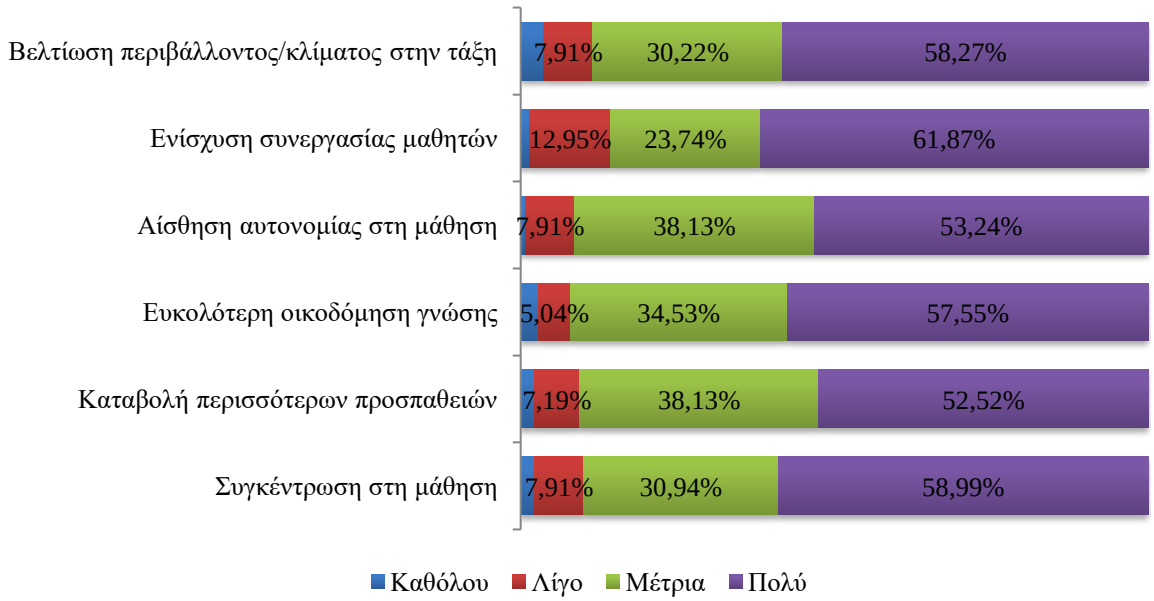
Το ερωτηματολόγιο στόχευε και στην εξέταση μιας σειράς παραγόντων που μπορεί να επηρεάσουν αρνητικά τη χρήση των Τ.Π.Ε. στη διδασκαλία. Η πρώτη παρατήρηση που πρέπει να γίνει έγκειται στο γεγονός ότι όλοι οι παρεχόμενοι παράγοντες επηρεάζουν αρνητικά τη χρήση Τ.Π.Ε., τουλάχιστον κατά το ήμισυ, στο μέγιστο βαθμό. Τα μεγαλύτερα

ποσοστά αρνητικής επίδρασης καταγράφηκαν στους παράγοντες που σχετίζονται με την ανεπάρκεια υλικοτεχνικού εξοπλισμού, όπως ηλεκτρονικοί υπολογιστές, φορητοί ή μη, σύνδεση στο διαδίκτυο, αλλά και διαδραστικοί πίνακες. Στο αμέσως επόμενο επίπεδο αρνητικής επίδρασης τοποθετήθηκε η οργάνωση του σχολικού χώρου, ενώ τα υψηλότερα ποσοστά μη αρνητικής επίδρασης αφορούν παράγοντες όπως το ενδιαφέρον, οι τεχνολογικές δεξιότητες και η παιδαγωγική καθοδήγηση του εκπαιδευτικού.

Δ΄ Μέρος – Κατάρτιση/Επιμόρφωση για τη χρήση Τ.Π.Ε. στη διδασκαλία

Στον τομέα της επιμόρφωσης, σχεδόν επτά στους δέκα εκπαιδευτικούς δήλωσαν πως δεν είναι υποχρεωτική η επιμόρφωση/κατάρτισή τους στις Τ.Π.Ε. για την πραγματοποίηση της διδασκαλίας τους.

Επίσης, το κυρίαρχο πεδίο επιμόρφωσής τους κατά την τελευταία σχολική διετία ήταν η προσωπική μάθηση για τις Τ.Π.Ε. στον ελεύθερό τους χρόνο, ενώ τη δεύτερη θέση κατέλαβε το πεδίο της παιδαγωγικής χρήσης των Τ.Π.Ε. στη διδασκαλία και τη μάθηση, και την τελευταία θέση η επιμόρφωση στις Τ.Π.Ε. από προσωπικό του σχολείου.

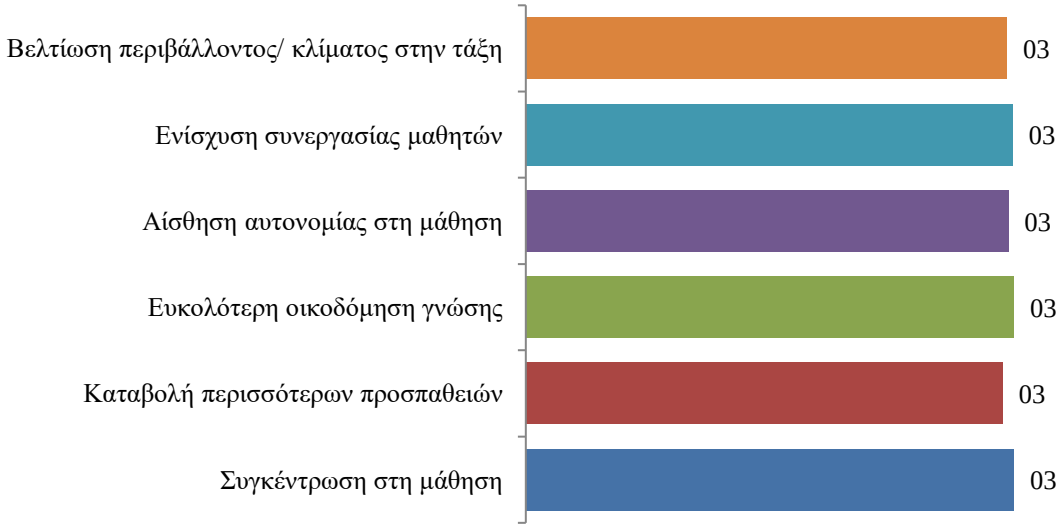


Σε μια προσπάθεια διερεύνησης του κατά πόσον η εμπλοκή με τα προηγούμενα πεδία επιμόρφωσης ήταν σύντομη ή μη, οι εκπαιδευτικοί δήλωσαν κατά πλειοψηφία ότι το χρονικό διάστημα εμπλοκής τους διήρκεσε παραπάνω από 6 ημέρες, ενώ πολύ λίγοι εκπαιδευτικοί (ποσοστό 4,32%) δεν ασχολήθηκαν καθόλου με τα πεδία στα οποία επιμορφώθηκαν.

Ε΄ Μέρος – Στάσεις/Απόψεις εκπαιδευτικών για τις Τ.Π.Ε.

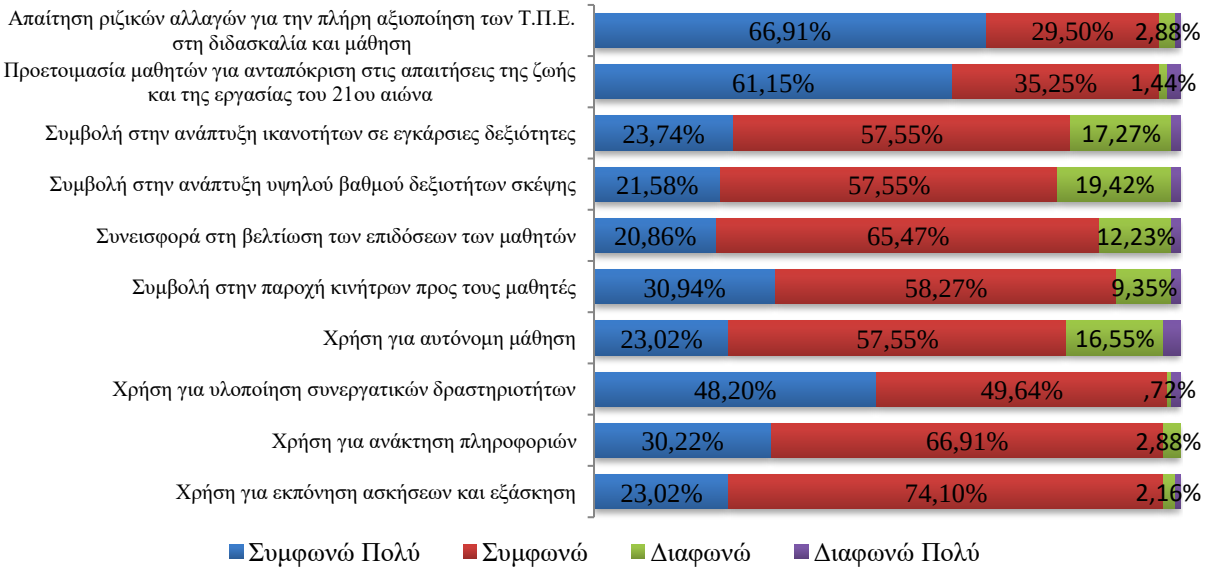
Το τελευταίο τμήμα του ερευνητικού μας ερωτηματολογίου περιλαμβάνει δύο ερωτήματα που στοχεύουν στη διερεύνηση των απόψεων και των στάσεων των εκπαιδευτικών σχετικά με τη χρήση των Τ.Π.Ε. στη διδασκαλία και τη μάθηση.

Όπως φαίνεται και στην (Εικόνα 1) που απεικονίζει γραφικά τα ποσοστά απαντήσεων για το συγκεκριμένο ερώτημα, τη μεγαλύτερη θετική επίδραση (ποσοστό 61,87%) συγκέντρωσε ο παράγοντας της συνεργασίας μεταξύ των μαθητών.



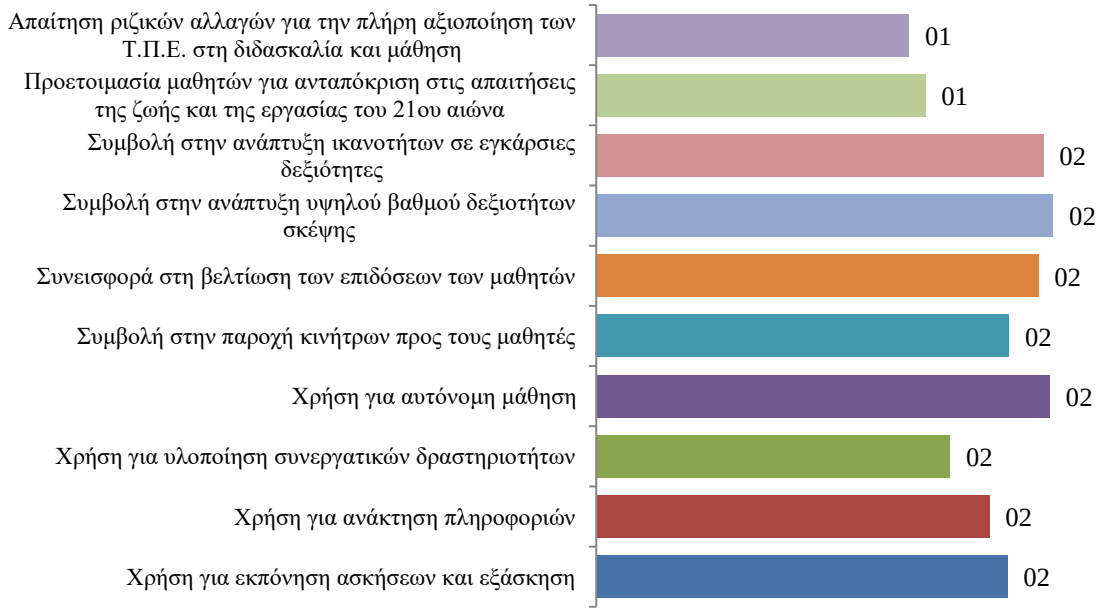
Εικόνα 1
Γραφική απεικόνιση ποσοστών απαντήσεων του ερωτήματος «Θετική επίδραση της χρήσης των Τ.Π.Ε. κατά τη διδασκαλία»

Αν συνυπολογιστεί στο σύνολο της θετικής επίδρασης και η μέτρια βαθμολόγηση που έδωσαν οι εκπαιδευτικοί, τότε τα αθροιστικά ποσοστά δείχνουν πως οι 8 με 9 στους 10 εκπαιδευτικούς θεωρούν πως η χρήση Τ.Π.Ε. στη διδασκαλία έχει όντως θετική επίδραση



Αξιοσημείωτο είναι το γεγονός σε όλες τις ερωτήσεις καταγράφεται ιδιαίτερα θετική στάση των καθηγητών για τη χρήση των Τ.Π.Ε., όπως αυτή αποτυπώνεται από τους υψηλούς μέσους όρους (2).

Εικόνα 2
Μέσοι όροι απαντήσεων του ερωτήματος «Θετική επίδραση της χρήσης των Τ.Π.Ε. κατά τη διδασκαλία»



Το ερευνητικό μας ερωτηματολόγιο ολοκληρώνεται με ένα σημαντικό ερώτημα μέσα από το οποίο μελετάται η στάση των εκπαιδευτικών απέναντι στη χρήση των Τ.Π.Ε. στο σχολείο (Εικόνα 3) .

Εικόνα 3
Γραφική απεικόνιση ποσοστών απαντήσεων του ερωτήματος «Στάσεις των εκπαιδευτικών για τη χρήση των Τ.Π.Ε. στο σχολείο»

Στην (Εικόνα 4) αποτυπώνεται η γενικότερη τάση συμφωνίας των εκπαιδευτικών στα ερωτήματα που τέθηκαν στη συγκεκριμένη ενότητα.

Εικόνα 4

ΣΥΜΠΕΡΑΣΜΑΤΑ ΚΑΙ ΠΡΟΤΑΣΕΙΣ

Μέσα από την έρευνα που περιγράφηκε στα προηγούμενα κεφάλαια της παρούσας εργασίας και την ανάλυση των αποτελεσμάτων που παρουσιάστηκαν, προκύπτουν χρήσιμα και ουσιαστικά συμπεράσματα σχετικά με τη χρήση και αξιοποίηση των Τεχνολογιών Πληροφορίας και Επικοινωνιών (Τ.Π.Ε.) από τους εκπαιδευτικούς της Δευτεροβάθμιας Εκπαίδευσης του Νομού Ιωαννίνων.

Αρχικά, το φύλο και ο τύπος σχολείου υπηρέτησης των εκπαιδευτικών δεν φάνηκε να επηρεάζουν σημαντικά τα υπό μελέτη ζητήματα, γεγονός που καταδεικνύει την ορθότητα και την αντιπροσωπευτικότητα της δειγματοληψίας. Αντίθετα, σε ό,τι αφορά την πρόσβαση στον υλικοτεχνικό εξοπλισμό, διαμορφώνεται μια αρνητική εικόνα, καθώς σημαντικό ποσοστό των εκπαιδευτικών δήλωσε ότι η πρόσβαση σε υπολογιστικά συστήματα στις σχολικές μονάδες δεν είναι επαρκής, γεγονός που λειτουργεί ανασταλτικά στη συστηματική αξιοποίηση των Τ.Π.Ε.

Αναφορικά με τη διάρκεια χρήσης υπολογιστών ή/και διαδικτύου για διδακτικούς σκοπούς, διαπιστώθηκε ότι οι μεγαλύτεροι σε ηλικία εκπαιδευτικοί εμφανίζουν μεγαλύτερη εμπειρία χρήσης, στοιχείο που ανατρέπει τη συνήθη αντίληψη ότι οι παλαιότεροι εκπαιδευτικοί υστερούν σε σχέση με τις νέες τεχνολογίες. Το εύρημα αυτό αποτυπώνει μια γενικότερη τάση αυξημένης αξιοποίησης των Τ.Π.Ε. από το σύνολο σχεδόν των εκπαιδευτικών και συνάδει με τα αποτελέσματα της έρευνας του European Schoolnet (2019), σύμφωνα με τα οποία η χρήση υπολογιστών στη διδασκαλία υπερβαίνει τον ευρωπαϊκό μέσο όρο.

Η συχνότερη δραστηριότητα που σχετίζεται με τη χρήση των Τ.Π.Ε. αφορά την αναζήτηση πληροφοριών και εκπαιδευτικού υλικού στο διαδίκτυο για την προετοιμασία των μαθημάτων, ενώ λιγότερο συχνή είναι η ανάρτηση εργασιών στη σχολική ιστοσελίδα, κυρίως από μεγαλύτερους σε ηλικία εκπαιδευτικούς. Το διαδίκτυο αναδεικνύεται ως το βασικό εργαλείο άντλησης μαθησιακού υλικού, σε αντίθεση με το μη διαδικτυακό ηλεκτρονικό υλικό, το οποίο χρησιμοποιείται σε περιορισμένο βαθμό.

Ιδιαίτερο ενδιαφέρον παρουσιάζουν τα συμπεράσματα που αφορούν την επιμόρφωση των εκπαιδευτικών. Οι εκπαιδευτικοί Θεωρητικών Σπουδών φαίνεται να επιμορφώνονται περισσότερο μέσω προσωπικής μάθησης στον ελεύθερο χρόνο τους, ενώ η διδακτική προϋπηρεσία συσχετίζεται με τη συμμετοχή σε επιμορφωτικές δράσεις, κυρίως σε θέματα παιδαγωγικής αξιοποίησης των Τ.Π.Ε. Τα ευρήματα αυτά αναδεικνύουν τη σημασία της επιμόρφωσης ως μιας συνεχούς και διαρκούς διαδικασίας.

Σε γενικό επίπεδο, οι εκπαιδευτικοί υπογραμμίζουν την αναγκαιότητα χρήσης των Τ.Π.Ε. από τους μαθητές, θεωρώντας ότι συμβάλλουν καθοριστικά στην προετοιμασία τους για τις απαιτήσεις της κοινωνίας και της αγοράς εργασίας του 21ου αιώνα. Παράλληλα, επισημαίνουν ότι η ουσιαστική αξιοποίηση των Τ.Π.Ε. προϋποθέτει ριζικές

αλλαγές στα σχολεία, με έμφαση στις κατάλληλες υποδομές, στον σύγχρονο εξοπλισμό και στη συστηματική υποστήριξη μέσω εκπαιδευτικών πολιτικών.

Τέλος, η παρούσα έρευνα θα μπορούσε να επεκταθεί σε πανελλαδικό επίπεδο και να εμπλουτιστεί με τη συμμετοχή των μαθητών, ενισχύοντας περαιτέρω τη διερεύνηση των παραγόντων που επηρεάζουν τη χρήση και αξιοποίηση των Τ.Π.Ε. στη σύγχρονη εκπαιδευτική πραγματικότητα.

ΠΕΡΙΛΗΨΗ

Η ψηφιοποίηση της εκπαίδευσης έχει αναδείξει ανισότητες στην πρόσβαση στην τεχνολογία, τον ψηφιακό γραμματισμό και τις εκπαιδευτικές υποδομές, ιδιαίτερα στην πρωτοβάθμια εκπαίδευση. Η παρούσα μελέτη διερευνά το ψηφιακό χάσμα στα ελληνικά δημοτικά σχολεία μέσα από βιβλιογραφική ανάλυση, εστιάζοντας στις προκλήσεις, τις νέες ανισότητες και τις συμπεριληπτικές πρακτικές που εφαρμόζονται για την άμβλυνσή του.

Η επισκόπηση της βιβλιογραφίας καταδεικνύει ότι η πρόσβαση στις Τεχνολογίες Πληροφορίας και Επικοινωνιών (ΤΠΕ) στα δημοτικά σχολεία της Ελλάδας είναι άνισα κατανεμημένη. Στα αστικά κέντρα, οι σχολικές μονάδες διαθέτουν περισσότερες τεχνολογικές υποδομές, ενώ τα αγροτικά σχολεία αντιμετωπίζουν σοβαρές ελλείψεις σε εξοπλισμό και συνδεσιμότητα. Ταυτόχρονα, οι μαθητές από οικογένειες χαμηλού εισοδήματος συχνά στερούνται πρόσβασης σε ηλεκτρονικές συσκευές και σταθερή σύνδεση στο διαδίκτυο, γεγονός που τους αποκλείει από σύγχρονες μαθησιακές πρακτικές.

Πέρα από την απλή πρόσβαση, η μελέτη αναδεικνύει την έννοια της "δευτερογενούς ψηφιακής ανισότητας", η οποία αφορά τις διαφορές στις δεξιότητες χρήσης της τεχνολογίας. Οι μαθητές από εύπορες οικογένειες τείνουν να αναπτύσσουν υψηλότερα επίπεδα ψηφιακού γραμματισμού, ενώ οι μαθητές από μειονεκτούντα περιβάλλοντα συχνά περιορίζονται σε στοιχειώδεις δεξιότητες, γεγονός που έχει μακροπρόθεσμες συνέπειες στην εκπαιδευτική και επαγγελματική τους πορεία.

Επιπλέον, η επιμόρφωση των εκπαιδευτικών στις ΤΠΕ παραμένει αποσπασματική και άνισα κατανεμημένη, επηρεάζοντας την αποτελεσματική ενσωμάτωση των τεχνολογικών εργαλείων στη διδασκαλία. Η έλλειψη συνεκτικής εκπαιδευτικής πολιτικής και η περιορισμένη κρατική χρηματοδότηση έχουν ως αποτέλεσμα τη χαμηλή υιοθέτηση των ΤΠΕ στην καθημερινή διδακτική πρακτική. Παρότι έχουν εφαρμοστεί προγράμματα ψηφιακής εκπαίδευσης, η εφαρμογή τους είναι συχνά αποσπασματική, με πολλά σχολεία να βασίζονται σε εξωτερικές χρηματοδοτήσεις και ιδιωτικές πρωτοβουλίες.

Για την αντιμετώπιση αυτών των προκλήσεων, αναπτύσσονται συμπεριληπτικές πρακτικές στην ελληνική πρωτοβάθμια εκπαίδευση. Τα προγράμματα επιμόρφωσης εκπαιδευτικών εστιάζουν στην ανάπτυξη ψηφιακών δεξιοτήτων, επιτρέποντας τη δημιουργία διαδραστικών και συμπεριληπτικών μαθησιακών εμπειριών. Οι σχολικές πρωτοβουλίες ψηφιακού γραμματισμού, όπως εργαστήρια κωδικοποίησης και διαδραστικά προγράμματα, συμβάλλουν στην ισότιμη πρόσβαση στην τεχνολογία. Παράλληλα, οι κοινοτικές συνεργασίες με ιδιωτικούς φορείς παρέχουν τεχνολογικό εξοπλισμό και οικονομική υποστήριξη στα σχολεία. Παρά τις θετικές πρωτοβουλίες, εξακολουθούν να υπάρχουν εμπόδια. Η απουσία ολοκληρωμένης εθνικής στρατηγικής για την ψηφιακή εκπαίδευση και η εξάρτηση από εξωτερικές χρηματοδοτήσεις εγείρουν ανησυχίες για τη βιωσιμότητα των δράσεων. Αν και οι ΤΠΕ μπορούν να βελτιώσουν τη διδασκαλία και τη μαθησιακή διαδικασία, η ελλιπής ή λανθασμένη ενσωμάτωσή τους μπορεί να διευρύνει περαιτέρω τις ανισότητες μεταξύ των μαθητών.

Συμπερασματικά, η μελέτη υπογραμμίζει την επείγουσα ανάγκη για συνολικές στρατηγικές γεφύρωσης του ψηφιακού χάσματος. Η άνιση πρόσβαση στην τεχνολογία, οι διαφοροποιήσεις στον ψηφιακό γραμματισμό και η ελλιπής υποστήριξη των εκπαιδευτικών διατηρούν τις εκπαιδευτικές ανισότητες. Ωστόσο, οι συμπεριληπτικές πρακτικές, όπως η στοχευμένη επιμόρφωση εκπαιδευτικών και τα σχολικά προγράμματα ψηφιακού γραμματισμού, μπορούν να προωθήσουν ένα πιο ισότιμο ψηφιακό μαθησιακό περιβάλλον. Για να επιτευχθεί πραγματική ψηφιακή ένταξη, απαιτείται μια συνεργατική προσέγγιση που να περιλαμβάνει εκπαιδευτικούς, πολιτικούς φορείς και την ευρύτερη κοινότητα.

Λέξεις – κλειδιά: Ψηφιακό Χάσμα, Πρωτοβάθμια Εκπαίδευση, Εκπαιδευτική Ανισότητα, Ψηφιακός Γραμματισμός, Πρόσβαση στις ΤΠΕ, Συμπεριληπτική Εκπαίδευση

ΕΙΣΑΓΩΓΗ

Η αυξανόμενη ψηφιοποίηση των κοινωνικών σχέσεων και της καθημερινής ζωής έχει φέρει στο προσκήνιο την έννοια του «ψηφιακού χάσματος», καθιστώντας την αντικείμενο ενδελεχούς εξέτασης στις δημόσιες, πολιτικές και ακαδημαϊκές συζητήσεις. Οι υπεύθυνοι χάραξης πολιτικής και οι ερευνητές διερευνούν τόσο την έκταση όσο και τις συνέπειες των ψηφιακών ανισοτήτων σε ποικίλες διαστάσεις της κοινωνικής ζωής, υπογραμμίζοντας τη σύνδεσή τους με βαθύτερες κοινωνικές, πολιτικές και οικονομικές ανισότητες.

Διευρύνοντας το ερευνητικό πεδίο του ψηφιακού χάσματος από τη δευτεροβάθμια στην πρωτοβάθμια εκπαίδευση, με επίκεντρο την Ελλάδα, το παρόν δοκίμιο επιδιώκει να συμβάλει στη συνεχιζόμενη επιστημονική συζήτηση για τις κοινωνικές, δομικές και ψηφιακές ανισότητες στην εκπαίδευση. Βασισμένο σε συστηματική βιβλιογραφική επισκόπηση ελληνικών και διεθνών μελετών, το δοκίμιο αναδεικνύει τις νέες προκλήσεις και ανισότητες που προκύπτουν από την ψηφιοποίηση στο πλαίσιο της πρωτοβάθμιας εκπαίδευσης.

Παρότι οι ψηφιακές ανισότητες έχουν ήδη συνδεθεί με τις μαθησιακές επιδόσεις και τις διαφοροποιήσεις στα εκπαιδευτικά αποτελέσματα, το παρόν δοκίμιο στοχεύει στην παραγωγή νέας, ποιοτικής γνώσης σχετικά με τις ψηφιακές ανισότητες στην Ελλάδα. Ο στόχος είναι να συμβάλει στην ανάπτυξη μιας πιο ολοκληρωμένης κατανόησης των πρακτικών χωρίς αποκλεισμούς, οι οποίες μπορούν να αμβλύνουν αυτές τις διαφορές.

Η απότομη μετάβαση στην ψηφιοποίηση πραγματοποιήθηκε χωρίς να ληφθούν υπόψη τα διαφοροποιημένα επίπεδα ψηφιακών δεξιοτήτων των εκπαιδευτικών, καθώς και οι ανισότητες στις τεχνολογικές υποδομές των δημοτικών σχολείων, γεγονός που όξυνε το ψηφιακό χάσμα εντός του σχολικού περιβάλλοντος. Ως εκ τούτου, καθίσταται επιτακτική η ανάγκη αντιμετώπισης αυτού του φαινομένου. Στο πλαίσιο αυτό, το δοκίμιο αποσκοπεί στην ανάδειξη των προκλήσεων και των ανισοτήτων που συνοδεύουν την ψηφιοποίηση της ελληνικής πρωτοβάθμιας εκπαίδευσης, καθώς και στην ανάλυση των νέων συνεκπαιδευτικών πρακτικών που αναδύονται για την άμβλυνσή τους.

ΚΑΤΑΝΟΗΣΗ ΤΟΥ ΨΗΦΙΑΚΟΥ ΧΑΣΜΑΤΟΣ ΣΤΗΝ ΠΡΩΤΟΒΑΘΜΙΑ ΕΚΠΑΙΔΕΥΣΗ

Ο όρος «ψηφιακό χάσμα» αναφέρεται στις άνισες ευκαιρίες πρόσβασης και χρήσης της ψηφιακής τεχνολογίας μεταξύ διαφορετικών κοινωνικών ομάδων. Στον τομέα της εκπαίδευσης, και ειδικά στην πρωτοβάθμια βαθμίδα, το ψηφιακό χάσμα επηρεάζει τις μαθησιακές πρακτικές και διαμορφώνει τις εκπαιδευτικές επιδόσεις. Ο όρος χρησιμοποιείται για να περιγράψει ανισότητες στις ψηφιακές δεξιότητες μαθητών και εκπαιδευτικών, οι οποίες σχετίζονται με κοινωνικά χαρακτηριστικά και οργανωτικές συνθήκες της εκπαίδευσης. Υπάρχει γενική παραδοχή ότι οι ΤΠΕ ενισχύουν τις εκπαιδευτικές ευκαιρίες, ιδίως όταν ενσωματώνονται στο πρόγραμμα σπουδών, ενώ η έλλειψη πρόσβασης αποτελεί σοβαρό μειονέκτημα στη σύγχρονη εκπαίδευση (Van et al., 2022).

Το ψηφιακό χάσμα στην ελληνική πρωτοβάθμια εκπαίδευση αντικατοπτρίζει τις ανισότητες που παρατηρούνται σε άλλες χώρες της ΕΕ. Είναι ιδιαίτερα έντονο μεταξύ μαθητών, εκπαιδευτικών και σχολικών ιδρυμάτων και απορρέει από κοινωνικοοικονομικές και γεωγραφικές ανισότητες. Έρευνες δείχνουν ότι παιδιά από οικογένειες με χαμηλό μορφωτικό επίπεδο ή χαμηλό εισόδημα, καθώς και όσα μιλούν διαφορετική γλώσσα από αυτήν του σχολείου, είναι πιο ευάλωτα στις συνέπειες του ψηφιακού χάσματος. Επιπλέον, σημαντικό ρόλο διαδραματίζει η γεωγραφική κατανομή των πόρων ΤΠΕ, με τις αγροτικές περιοχές να μειονεκτούν έναντι των αστικών (Dimopoulos et al., 2021).

Η ανάλυση των τρεχόντων δεδομένων και της εμπειρικής έρευνας αναδεικνύει σημαντικές ανισότητες στην πρόσβαση και χρήση των εργαλείων Τεχνολογίας Πληροφορικής και Επικοινωνιών (ΤΠΕ) στην ελληνική πρωτοβάθμια εκπαίδευση. Η διαθεσιμότητα υπολογιστών, διαδικτυακής σύνδεσης και εκπαιδευτικού λογισμικού συνδέεται αρνητικά με τη χαμηλή κοινωνικοοικονομική ανάπτυξη ορισμένων περιοχών. Η αντιμετώπιση αυτών των ανισοτήτων είναι κρίσιμη για τη δημιουργία ενός εκπαιδευτικού περιβάλλοντος χωρίς αποκλεισμούς, διασφαλίζοντας ότι όλοι οι μαθητές έχουν ίσες ευκαιρίες σε ένα ψηφιακό εκπαιδευτικό τοπίο. Η έλλειψη πρόσβασης στις ΤΠΕ λειτουργεί ως μορφή «αναπηρίας» με αρνητικές επιπτώσεις στα μαθησιακά αποτελέσματα, όπως καταδεικνύεται από σχετικές θεωρίες μάθησης και εμπειρικά δεδομένα (Linos et al., 2022).

Για τη γεφύρωση αυτού του τεχνολογικού χάσματος, απαιτείται συνεργασία σε πολλαπλά επίπεδα. Οι εκπαιδευτικοί ηγέτες διαδραματίζουν κρίσιμο ρόλο, υποστηρίζοντας βελτιώσεις υποδομής και την ένταξη των ΤΠΕ στο πρόγραμμα σπουδών. Παράλληλα, η συνεργασία με τοπικές κοινότητες και κυβερνητικούς φορείς μπορεί να ενισχύσει την ικανότητα των σχολείων να προσαρμοστούν στις τεχνολογικές εξελίξεις (Bandyopadhyay et al., 2021).

Η ένταξη των ΤΠΕ στην εκπαίδευση απαιτεί όχι μόνο πρόσβαση στα εργαλεία αλλά και την κατάλληλη κατάρτιση των εκπαιδευτικών. Είναι κρίσιμο να επενδυθεί στην επαγγελματική ανάπτυξη, ώστε οι εκπαιδευτικοί να αξιοποιούν αποτελεσματικά την τεχνολογία στη διδακτική τους πρακτική και να ανταποκρίνονται στις απαιτήσεις ενός ψηφιακά εμπλουτισμένου μαθησιακού περιβάλλοντος (Asad et al., 2021).

Η γεφύρωση του ψηφιακού χάσματος δεν αφορά μόνο οικονομικές παραμέτρους αλλά και την προώθηση της ισότητας στην εκπαίδευση. Αποτελεί μια προσπάθεια αναγνώρισης των δυνατοτήτων κάθε μαθητή και εξάλειψης των εμποδίων που περιορίζουν την πρόοδό του. Η διαμόρφωση ενός δικαιότερου εκπαιδευτικού συστήματος απαιτεί άμεση δράση και διαρκή δέσμευση (Howard et al., 2022).

Διεθνείς αξιολογήσεις αποκαλύπτουν έντονο ψηφιακό χάσμα μεταξύ μαθητών διαφορετικού κοινωνικοοικονομικού υποβάθρου στην Ελλάδα. Οι μαθητές από χαμηλότερα κοινωνικοοικονομικά στρώματα εμφανίζουν χαμηλότερα επίπεδα ψηφιακού γραμματισμού συγκριτικά με συνομηλίκους τους από ευνοϊκότερο περιβάλλον. Τοπικές μελέτες επιβεβαιώνουν αυτές τις αποκλίσεις, αποδεικνύοντας τη σαφή συσχέτιση μεταξύ του ψηφιακού γραμματισμού και της κοινωνικοοικονομικής θέσης. Παιδιά με πρόσβαση σε υπολογιστή ή Διαδίκτυο στο σπίτι έχουν μεγαλύτερη πιθανότητα ενασχόλησης με την τεχνολογία και σε σχολικά περιβάλλοντα (Gounopoulos, 2024).

Οι ανισότητες αυτές οδήγησαν σε αποσπασματικές πολιτικές, κυρίως κατά και μετά τα Μνημόνια, που επικεντρώθηκαν σε επιμέρους οικονομικές στρατηγικές, παραμελώντας την ανάγκη για συνεκτική ανάπτυξη και μακροπρόθεσμη στρατηγική στον τομέα της εκπαίδευσης (Conley et al., 2023).

ΠΡΟΚΛΗΣΕΙΣ ΠΟΥ ΑΝΤΙΜΕΤΩΠΙΖΟΥΜΕ ΣΤΗ ΓΕΦΥΡΩΣΗ ΤΟΥ ΨΗΦΙΑΚΟΥ ΧΑΣΜΑΤΟΣ

Το ψηφιακό χάσμα στην πρωτοβάθμια εκπαίδευση αποτελεί μια διαρκώς εντεινόμενη πρόκληση που επηρεάζει άμεσα την εκπαιδευτική διαδικασία και τις ευκαιρίες μάθησης των μαθητών. Έρευνες έχουν δείξει ότι οι πρωτοβουλίες για τη δημιουργία διαδικτυακών πόρων και η παροχή τεχνολογικής υποστήριξης, όπως εργαστήρια υπολογιστών τα Σαββατοκύριακα, μπορούν να ενισχύσουν τη συμπεριληπτικότητα στην εκπαίδευση. Ωστόσο, η ανισομερής ανάπτυξη των υποδομών υπογραμμίζει μια αυξανόμενη εκπαιδευτική ανισότητα: οι εύπορες περιοχές καταγράφουν ταχύτερη βελτίωση της πρόσβασης σε ψηφιακά εργαλεία, ενώ οι λιγότερο ευνοημένες περιοχές παραμένουν σε μειονεκτική θέση, γεγονός που απαιτεί άμεση παρέμβαση. Εμπειρικά δεδομένα καταδεικνύουν ότι πολλές οικογένειες αντιμετωπίζουν σοβαρά εμπόδια στην πρόσβαση στο διαδίκτυο, γεγονός που περιορίζει τις μαθησιακές τους δυνατότητες. Συγκεκριμένα, η έλλειψη προσωπικού υπολογιστή ή άλλης κατάλληλης συσκευής έχει αναφερθεί ως ένας από τους κυριότερους παράγοντες που παρεμποδίζουν την εκπαιδευτική πρόοδο των μαθητών. Επιπλέον, οι οικογένειες επισημαίνουν την ανεπαρκή ή ασταθή σύνδεση στο διαδίκτυο ως έναν κρίσιμο περιορισμό, ο οποίος επηρεάζει αρνητικά την πρόσβαση σε ψηφιακούς πόρους και βασικές εφαρμογές εκμάθησης, μειώνοντας έτσι τις δυνατότητες αξιοποίησης της διαδικτυακής εκπαίδευσης (Helsper, 2021).

Το συναισθηματικό άγχος και η ανασφάλεια σχετικά με τη χρήση του διαδικτύου αποτελούν πρόσθετους παράγοντες που εντείνουν το ψηφιακό χάσμα, επηρεάζοντας αρνητικά την εκπαιδευτική διαδικασία. Οι μαθητές που δεν διαθέτουν επαρκείς δεξιότητες πλοήγησης και χρήσης ψηφιακών εργαλείων δυσκολεύονται να αξιοποιήσουν τις διαθέσιμες τεχνολογικές δυνατότητες, γεγονός που τους τοποθετεί σε μειονεκτική θέση σε ένα εκπαιδευτικό περιβάλλον που εξαρτάται όλο και περισσότερο από την ψηφιακή μάθηση. Η αντιμετώπιση αυτών των προκλήσεων είναι ζωτικής σημασίας για την προώθηση ισότιμης πρόσβασης στην εκπαίδευση. Δεν πρόκειται απλώς για εκπαιδευτική ανάγκη, αλλά για κοινωνική υποχρέωση, προκειμένου να διασφαλιστεί ότι κάθε μαθητής έχει ίσες ευκαιρίες στη σύγχρονη ψηφιακή εποχή (Martzoukou, 2022).

Το ψηφιακό χάσμα στην εκπαίδευση είναι άμεσα συνδεδεμένο με τη χρόνια ανεπαρκή χρηματοδότηση των σχολείων σε τεχνολογικούς πόρους. Παρά τις εξαγγελίες για την ενίσχυση των ΤΠΕ και τις πρωτοβουλίες ψηφιοποίησης, η πραγματικότητα δείχνει ότι η απόκτηση των περισσότερων ψηφιακών εργαλείων εξακολουθεί να επιβαρύνει τις οικογένειες των μαθητών. Αυτή η ανισότητα είναι ιδιαίτερα έντονη στα δημοτικά σχολεία και τις αγροτικές περιοχές, όπου η πρόσβαση σε σύγχρονα ψηφιακά μέσα υστερεί σημαντικά σε σύγκριση με τα αστικά σχολεία και τα γυμνάσια (Stamopoulos et al., 2024).

Η οικονομική κρίση στην Ελλάδα έχει παρεμποδίσει σοβαρά την αναβάθμιση της τεχνολογικής υποδομής στα σχολεία. Το πρόβλημα επιτείνεται από την απροθυμία ή την αδυναμία πολλών εκπαιδευτικών να αξιοποιήσουν πλήρως τα ψηφιακά εργαλεία λόγω ελλιπούς κατάρτισης και πρακτικής εμπειρίας. Συχνά, οι εκπαιδευτικοί στερούνται των απαραίτητων δεξιοτήτων για την ενσωμάτωση του ψηφιακού περιεχομένου στη διδακτική διαδικασία, ιδίως όταν πρόκειται για μαθητές με ειδικές εκπαιδευτικές ανάγκες (Doris, 2023).

Η αποτελεσματική ενσωμάτωση των ψηφιακών εργαλείων προϋποθέτει σαφή καθορισμό ρόλων και ευθυνών μεταξύ των εκπαιδευτικών και διοικητικών στελεχών. Ένα επιτυχημένο εκπαιδευτικό ίδρυμα οφείλει να αξιοποιεί όλους τους διαθέσιμους πόρους και να ενθαρρύνει τη συνεργασία, ώστε να επιτυγχάνονται οι στρατηγικοί στόχοι του. Κεντρικός άξονας αυτής της διαδικασίας είναι η διδακτική μεθοδολογία. Ο διευθυντής του σχολείου, παρότι δεν έχει πλήρη αυτονομία στη διαμόρφωση μαθησιακών ομάδων, διαδραματίζει κρίσιμο ρόλο στην υποστήριξη μαθητών μέσω προγραμμάτων ένταξης και ενισχυτικής διδασκαλίας. Παράλληλα, είναι υπεύθυνος για την καταγραφή και κάλυψη ελλείψεων σε τεχνολογικό εξοπλισμό. Για παράδειγμα, η ανάγκη για έξι επιπλέον προβολείς οδήγησε σε συνεργασία με τον Σύλλογο Γονέων, ο οποίος ανέλαβε την προμήθειά τους, διασφαλίζοντας την ισότιμη πρόσβαση όλων των τάξεων στην τεχνολογία (Alenezi, 2023). Είναι απαραίτητη η συνεργασία με τις δημοτικές αρχές, τη Διεύθυνση Πρωτοβάθμιας Εκπαίδευσης και το Υπουργείο Παιδείας για την εξασφάλιση πόρων και προγραμμάτων που θα μπορούσαν να στηρίξουν την απόκτηση νέων τεχνολογικών εργαλείων, όπως υπολογιστές και διαδραστικοί πίνακες. Η αποτελεσματική αξιοποίηση αυτών των πόρων απαιτεί συλλογική λήψη αποφάσεων και ορθολογική κατανομή του διδακτικού προσωπικού, σε ευθυγράμμιση με τους εκπαιδευτικούς στόχους (Challoumis, 2024).

ΕΜΦΑΝΙΣΗ ΝΕΩΝ ΑΝΙΣΟΤΗΤΩΝ ΣΤΗΝ ΨΗΦΙΑΚΗ ΕΠΟΧΗ

Το ψηφιακό χάσμα δεν αποτελεί απλώς συνέχεια του κοινωνικού αποκλεισμού, αλλά μια εξελισσόμενη μορφή ανισότητας που εντείνεται με την ενσωμάτωση των Τεχνολογιών Πληροφορίας και Επικοινωνιών (ΤΠΕ) στην καθημερινή ζωή. Η άνιση κατανομή της πρόσβασης και εκπαίδευσης στις ΤΠΕ μπορεί όχι μόνο να διατηρήσει αλλά και να εντείνει τις κοινωνικές ανισότητες, διαμορφώνοντας νέες μορφές αποκλεισμού (Heeks, 2022). Στην πρωτοβάθμια εκπαίδευση, το ψηφιακό χάσμα επηρεάζει τόσο τους μαθητές όσο και τους εκπαιδευτικούς, καθορίζοντας τις ακαδημαϊκές και κοινωνικές τους εμπειρίες. Οι μαθητές με περιορισμένη πρόσβαση σε ΤΠΕ δυσκολεύονται να ανταποκριθούν στις προσδοκίες των εκπαιδευτικών τους, γεγονός που αντανακλάται στην εκπαιδευτική τους επίδοση. Παράλληλα, το χάσμα αυτό επηρεάζει δυσανάλογα μαθητές από οικονομικά μειονεκτούσες περιοχές ή οικογένειες μεταναστών, ενισχύοντας την περιθωριοποίησή τους στην εκπαιδευτική διαδικασία (Vonitsanos et al., 2024).

Η ανάπτυξη των ψηφιακών δεξιοτήτων των μαθητών εξαρτάται σε μεγάλο βαθμό από την επάρκεια των εκπαιδευτικών. Η σύνδεση της μαθηματικής εκπαίδευσης με τη μεθοδολογία της Πληροφορικής μπορεί να ενισχύσει την ικανότητα των δασκάλων να καλλιεργήσουν ουσιαστικές ψηφιακές δεξιότητες στους μαθητές τους. Ωστόσο, όταν οι μαθητές δεν διαθέτουν τις απαιτούμενες δεξιότητες, το χάσμα μεταξύ των προσδοκιών των εκπαιδευτικών και των πραγματικών δυνατοτήτων των μαθητών γίνεται ακόμα πιο εμφανές, δημιουργώντας πρόσθετα εμπόδια στη μάθηση. Το ψηφιακό χάσμα εκδηλώνεται σε πολλαπλά επίπεδα: επηρεάζει την ακαδημαϊκή επίδοση, τη συμμετοχή στη μαθησιακή διαδικασία και τη δυνατότητα πρόσβασης σε εκπαιδευτικούς πόρους. Η ανεπαρκής ενσωμάτωση των ΤΠΕ επιδεινώνει τις προϋπάρχουσες ανισότητες, ιδίως για τους μαθητές που ήδη αντιμετωπίζουν κοινωνικοοικονομικές δυσκολίες (Vonitsanos et al., 2024).

Η τεχνολογία μπορεί να εντείνει τις κοινωνικές και γεωγραφικές ανισότητες, δημιουργώντας έναν φαύλο κύκλο ψηφιακού αποκλεισμού. Οι μαθητές με περιορισμένες ψηφιακές δεξιότητες δυσκολεύονται να συμβαδίσουν και να αξιοποιήσουν τεχνολογικούς πόρους, γεγονός που τους τοποθετεί σε μειονεκτική θέση. Οι ψηφιακές ικανότητες συνδέονται άμεσα με την κοινωνικοοικονομική κατάσταση των γονέων, κατατάσσοντας τους μαθητές σε επίπεδα δεξιοτήτων από χαμηλό έως υψηλό, ανάλογα με τη γνώση και τη συχνότητα χρήσης των υπολογιστών. Η ενσωμάτωση της τεχνολογίας στη διδασκαλία αποτελεί βασική παιδαγωγική πρόκληση. Οι εκπαιδευτικοί μπορούν να αξιοποιήσουν τους υπολογιστές για τη βελτίωση της διδασκαλίας και τη διευκόλυνση της πρόσβασης σε καινοτόμους εκπαιδευτικούς πόρους, λειτουργώντας ως φορείς συμπεριληπτικής εκπαίδευσης. Είναι κρίσιμο το ελληνικό εκπαιδευτικό σύστημα να διασφαλίσει ισότιμη πρόσβαση στην τεχνολογία, επιτρέποντας σε όλους τους μαθητές να επιτύχουν το μέγιστο των δυνατοτήτων τους (Ross et al., 2022).

ΠΡΑΚΤΙΚΕΣ ΧΩΡΙΣ ΑΠΟΚΛΕΙΣΜΟΥΣ ΓΙΑ ΤΗΝ ΑΝΤΙΜΕΤΩΠΙΣΗ ΤΟΥ ΨΗΦΙΑΚΟΥ ΧΑΣΜΑΤΟΣ

Το ψηφιακό χάσμα αποτελεί μια κρίσιμη πρόκληση στη σύγχρονη κοινωνία, καθιστώντας αναγκαία την υιοθέτηση χωρίς αποκλεισμούς μεθοδολογιών. Η ενίσχυση του ψηφιακού γραμματισμού, σε συνδυασμό με τη δίκαιη πρόσβαση στις Τεχνολογίες Πληροφορίας και Επικοινωνιών (ΤΠΕ), μπορεί να συμβάλει ουσιαστικά στη μείωση των εκπαιδευτικών ανισοτήτων. Για την καλλιέργεια ενός ανθεκτικού πλαισίου ψηφιακού γραμματισμού, είναι απαραίτητη η συνεργασία εκπαιδευτικών φορέων, τοπικών κοινοτήτων και παγκόσμιων αναπτυξιακών οργανισμών. Οι πρωτοβουλίες αυτές πρέπει να εμπλέκουν ενεργά εκπαιδευτικούς και κηδεμόνες, προωθώντας τη συμμετοχή των μαθητών σε ένα συμπεριληπτικό ψηφιακό περιβάλλον (Lazou & Tsinakos, 2023).

Η παρούσα ανάλυση επιχειρεί να αμφισβητήσει τη διάκριση μεταξύ του ψηφιακού χάσματος και του ψηφιακού γραμματισμού, διευκρινίζοντας συχνές παρερμηνείες που εξισώνουν την ψηφιακή προσβασιμότητα με την ανάπτυξη ψηφιακών δεξιοτήτων. Στην τελική ενότητα, εξετάζονται συγκεκριμένες ελληνικές πρωτοβουλίες των τελευταίων ετών, οι οποίες αναδεικνύουν υποδειγματικές πρακτικές και παρέχουν χρήσιμα συμπεράσματα για τη διαμόρφωση αποτελεσματικών πολιτικών που στοχεύουν στη γεφύρωση του ψηφιακού χάσματος (Sindakis, S. & Showkat, 2024).

Η επαγγελματική εξέλιξη των εκπαιδευτικών είναι κρίσιμη για την ενίσχυση της ψηφιακής δέσμευσης των μαθητών και την προετοιμασία τους ως ψηφιακών πολιτών. Δύο βασικές προϋποθέσεις για την επιτυχία του ψηφιακού γραμματισμού, όπως αναδεικνύεται από σχετικές μελέτες, είναι (α) η ενσωμάτωσή του στις εκπαιδευτικές πολιτικές και πρακτικές και (β) η θεμελίωσή του ως βασικού στοιχείου της μαθησιακής εμπειρίας. Τέσσερα τεκμηριωμένα προγράμματα παρέμβασης αξιοποιούν προσαρμοστικές τεχνολογίες για εξατομικευμένη διδασκαλία, προσαρμοσμένη στις διαφορετικές ανάγκες των μαθητών. Το προσαρμοστικό λογισμικό, αν και αναπτύχθηκε αρχικά ως βιομηχανικό εργαλείο, αποδεικνύεται ιδιαίτερα χρήσιμο στη δημιουργία μαθησιακών περιβαλλόντων χωρίς αποκλεισμούς. Η ικανότητά του να προσαρμόζεται δυναμικά στις ατομικές ανάγκες των μαθητών το καθιστά πολύτιμο εργαλείο για την εξατομίκευση της εκπαίδευσης και τη βελτίωση των μαθησιακών αποτελεσμάτων (Mokhtari, 2023).

Ένα βασικό πλεονέκτημα της προσαρμοστικής τεχνολογίας είναι η ικανότητά της να προσαρμόζεται στα διαφορετικά επίπεδα κατανόησης των μαθητών. Παρέχει δραστηριότητες που διατηρούν την πνευματική διέγερση χωρίς να γίνονται υπερβολικά απλοϊκές, ενισχύοντας έτσι τη μαθησιακή εμπειρία. Η αξιοποίησή της από τους εκπαιδευτικούς είναι κρίσιμη, καθώς επιτρέπει τη δημιουργία συμπεριληπτικών εκπαιδευτικών περιβαλλόντων σε τάξεις με μεγάλη ετερογένεια. Η πλήρης ένταξη των μαθητών απαιτεί όχι μόνο πρόσβαση σε τεχνολογικές συσκευές και αξιόπιστη διαδικτυακή σύνδεση αλλά και εκπαιδευτικό λογισμικό που προσαρμόζεται στις ατομικές τους ανάγκες. Η εξατομικευμένη μάθηση διευκολύνεται όταν το περιεχόμενο είναι σχολαστικά σχεδιασμένο ώστε να προσφέρει διαφοροποιημένες μαθησιακές διαδρομές. Κεντρικός στόχος είναι η συνεχής καινοτομία στην εκπαιδευτική διαδικασία, με τεχνολογίες που βελτιώνουν τη μαθησιακή εμπειρία και προωθούν ουσιαστική εμπλοκή των μαθητών (Rakap, 2024).

ΣΥΜΠΕΡΑΣΜΑ ΚΑΙ ΜΕΛΛΟΝΤΙΚΕΣ ΚΑΤΕΥΘΥΝΣΕΙΣ

Ο πρωταρχικός στόχος αυτής της εισήγησης ήταν να εξετάσει διεξοδικά την ύπαρξη και τη φύση του ψηφιακού χάσματος στην πρωτοβάθμια εκπαίδευση στην Ελλάδα, με έμφαση στη χαρτογράφηση και την τεκμηρίωση των διαφορετικών εμπειριών των μαθητών. Στο πλαίσιο αυτής της ανάλυσης, προκύπτει ένας περιορισμός, ο οποίος ωστόσο αποτελεί και μια ουσιαστική συμβολή: η παρούσα έρευνα αναδεικνύει μια «νέα» μορφή μαθησιακής ανισότητας. Είναι σημαντικό να σημειωθεί ότι η πλειονότητα της διεθνούς βιβλιογραφίας σε αυτόν τον τομέα αποτελείται κυρίως από θεωρητικές προσεγγίσεις και άρθρα πολιτικής. Αντιθέτως, οι εμπειρικές μελέτες που βασίζονται σε δεδομένα επικεντρώνονται κυρίως σε μαθητές πρωτοβάθμιας και δευτεροβάθμιας εκπαίδευσης ανεπτυγμένων οικονομιών, αφήνοντας κενά στην κατανόηση του φαινομένου σε διαφορετικά εκπαιδευτικά πλαίσια. Αυτό το δοκίμιο επιδιώκει να καλύψει αυτό το κενό, παρέχοντας μια μαθητοκεντρική, εμπειρικά τεκμηριωμένη περιγραφή του ψηφιακού χάσματος στην ελληνική πρωτοβάθμια εκπαίδευση (Dimopoulos et al., 2021).

Η μελέτη τεκμηριώνει τις ανισότητες στην πρόσβαση και τη χρήση των ψηφιακών πόρων, οι οποίες διαμορφώνονται από το σχολικό και οικογενειακό περιβάλλον των μαθητών. Αυτές οι διαφορές έχουν άμεσο αντίκτυπο στον ψηφιακό γραμματισμό και την ηλεκτρονική ασφάλεια των μαθητών. Εφόσον το μέλλον της εκπαίδευσης είναι αναπόφευκτα ψηφιακό, είναι κρίσιμο οι υφιστάμενες εκπαιδευτικές και τεχνολογικές ανισότητες να μην αναπαραχθούν με νέες μορφές. Οι έντονες ψηφιακές διαφοροποιήσεις εντός του εκπαιδευτικού συστήματος μιας χώρας της ΕΕ αναδεικνύουν την αντιφατική φύση της τεχνολογίας, η οποία ενώ υπόσχεται ισότιμη πρόσβαση στη γνώση, συχνά οδηγεί σε ενίσχυση των κοινωνικών και εκπαιδευτικών αποκλεισμών (Susan & Kumar, 2021).

Από την οπτική της ασφάλειας, του κόστους και των παιδαγωγικών πρακτικών, η εισαγωγή, η βιβλιογραφική επισκόπηση και οι μεθοδολογικές ενότητες αυτού του δοκιμίου ανέδειξαν τις προκλήσεις που αντιμετωπίζουν οι μαθητές της ελληνικής πρωτοβάθμιας εκπαίδευσης στη διαδικασία ψηφιακής μάθησης. Η κριτική ανάλυση της βιβλιογραφίας αποκάλυψε ότι οι τεχνολογικές υποδομές όχι μόνο δεν εξάλειψαν τις εκπαιδευτικές ανισότητες αλλά, αντίθετα, τις επιτάχυναν, επεκτείνοντας τα προϋπάρχοντα χάσματα. Αυτή η πραγματικότητα δεν αντικατοπτρίζει έναν σταδιακό μετασχηματισμό προς ένα δικαιότερο εκπαιδευτικό περιβάλλον, αλλά μια αναπαραγωγή και όξυνση των υφιστάμενων αποκλεισμών. Κάθε ενότητα της ανάλυσης παρουσίασε με σαφήνεια τα πολλαπλά επίπεδα αυτών των ανισοτήτων, αποδεικνύοντας πώς διαμορφώνονται μέσα από τις εκπαιδευτικές δομές και τις κοινωνικοοικονομικές συνθήκες (Giannoulas et al., 2021).

Η διαπίστωση σημαντικά χαμηλότερων επιπέδων επάρκειας στην ηλεκτρονική ασφάλεια σε ορισμένες ομάδες μαθητών εγείρει σοβαρές ανησυχίες. Υποδηλώνει ότι η εντατική ψηφιακή παρακολούθηση, η οποία συχνά προβάλλεται ως μέτρο αντιμετώπισης του ψηφιακού χάσματος, μπορεί να εξελιχθεί σε παράγοντα περαιτέρω περιθωριοποίησης. Αν θεωρήσουμε ότι «η φτώχεια είναι μια τραγωδία», τότε η επέκταση της «ψηφιακής φτώχειας» και η συστηματική στέρηση των παιδιών από ψηφιακούς πόρους συνιστούν μια βαθιά δημοκρατική πρόκληση. Σε αυτό το πλαίσιο, η επιδίωξη της ψηφιακής ισότητας αντιμετωπίζει ένα διττό πρόβλημα: αν δεν εξετάσουμε επαρκώς τις πολυεπίπεδες ανισότητες που εντοπίζονται στην ψηφιακή εκπαίδευση, κινδυνεύουμε να συμβάλουμε άθελά μας στην αναπαραγωγή και εδραίωση αυτών των ανισοτήτων (Tsatsou).

Παρά τη συχνά αισιόδοξη ρητορική που περιβάλλει τον τεχνολογικό μετασχηματισμό στην εκπαίδευση, μια προσεκτικότερη εμπειρική ανάλυση αμφισβητεί την κυρίαρχη παγκόσμια αφήγηση περί αδιάλειπτης προόδου. Αντιθέτως, αναδεικνύει την ιστορική συνέχεια των εκπαιδευτικών προκλήσεων, αποκαλύπτοντας ότι πολλές από τις σημερινές δυσκολίες στην εκπαιδευτική τεχνολογία αποτελούν επαναλήψεις παλαιότερων ζητημάτων, ενταγμένων σε ένα πιο σύνθετο πλαίσιο. Το επιχείρημα που αναπτύχθηκε σε αυτή την ενότητα καταδεικνύει ότι οι τεχνολογικές εξελίξεις του 20ού και του 21ου αιώνα δεν συνιστούν ριζικό μετασχηματισμό, αλλά μάλλον μια προέκταση και αναπροσαρμογή προϋπαρχουσών παιδαγωγικών πρακτικών. Συνεπώς, η ανάλυση αυτή υπογραμμίζει την ανάγκη θεμελιωδών παρεμβάσεων για τη δημιουργία ενός πιο δίκαιου και συμπεριληπτικού εκπαιδευτικού μέλλοντος (Elf et al., 2022).

ΠΕΡΙΛΗΨΗ

Την τελευταία δεκαετία, η εκπαίδευση παγκοσμίως τείνει να μεταμορφωθεί ριζικά λόγω της ταχείας εξέλιξης των ψηφιακών τεχνολογιών. Ο ψηφιακός μετασχηματισμός δεν περιορίζεται στην υποστήριξη των παραδοσιακών διδακτικών μεθόδων, αλλά αναδιαμορφώνει ουσιαστικά τον τρόπο με τον οποίο αποκτάται, διαμοιράζεται και βιώνεται η γνώση, καθώς και η οργάνωση και διοίκηση των εκπαιδευτικών οργανισμών. Η ενσωμάτωση καινοτομιών, όπως η τεχνητή νοημοσύνη, η μηχανική μάθηση, τα MOOCs και οι εικονικές τάξεις, έχει ανοίξει νέους δρόμους στη μάθηση, προσφέροντας μεγαλύτερη προσβασιμότητα, εξατομίκευση και επεκτασιμότητα. Ωστόσο, αυτή η εξέλιξη συνοδεύεται από σοβαρές προκλήσεις. Παρά τις ευκαιρίες, ο ψηφιακός μετασχηματισμός μπορεί να εντείνει τις υφιστάμενες κοινωνικές και οικονομικές ανισότητες, δημιουργώντας ένα νέο «ψηφιακό χάσμα». Η άνιση πρόσβαση σε ψηφιακά εργαλεία, υποδομές και οι δεξιότητες, ιδίως σε ευάλωτες κοινωνικές ομάδες ή απομακρυσμένες κοινότητες, αποτελεί βασικό εμπόδιο για την ισότιμη εκπαίδευση. Η εργασία αυτή αναλύει τον διττό χαρακτήρα του ψηφιακού μετασχηματισμού και τονίζει την ανάγκη για συμμετοχικές, δίκαιες και συμπεριληπτικές πολιτικές. Υιοθετεί τη μεθοδολογία της βιβλιογραφικής ανασκόπησης και μελέτης κειμένων πολιτικής. Αναλύει τις βασικές προκλήσεις κατά το ψηφιακό μετασχηματισμό της εκπαίδευσης και στην τελευταία ενότητα προτείνει συγκεκριμένες στρατηγικές – όπως η επένδυση σε τεχνολογικές υποδομές και η ενίσχυση των ψηφιακών δεξιοτήτων μαθητών, εκπαιδευτικών και πολιτών – ώστε η τεχνολογία να συμβάλλει ουσιαστικά στη μείωση των εκπαιδευτικών ανισοτήτων.

Λέξεις κλειδιά: ψηφιακός μετασχηματισμός, πρωτοβάθμια και δευτεροβάθμια εκπαίδευση, ψηφιακό χάσμα, ψηφιακές ανισότητες.

ΕΙΣΑΓΩΓΗ

Στη σύγχρονη εποχή, τα εκπαιδευτικά συστήματα παγκοσμίως υπόκεινται σημαντική αλλαγή λόγω της ταχείας εξέλιξης των ψηφιακών τεχνολογιών. Αυτός ο ψηφιακός μετασχηματισμός δεν συνιστά απλώς μια ενίσχυση των παραδοσιακών διδακτικών πρακτικών με ψηφιακά μέσα. Αντιπροσωπεύει μια θεμελιώδη αναδιαμόρφωση του τρόπου πρόσβασης, οικοδόμησης και εμπειρίας της γνώσης. Από την ενσωμάτωση της τεχνητής νοημοσύνης και της μηχανικής μάθησης σε προσαρμοστικές πλατφόρμες μάθησης έως την επέκταση των μαζικών ανοικτών διαδικτυακών μαθημάτων (MOOC) και των εικονικών τάξεων, η ψηφιακή επανάσταση αναδιαμορφώνει κάθε πτυχή της εκπαίδευσης (Luckin et al., 2016). Ωστόσο, παρά τη δυνατότητά του να εκσυγχρονίσει τη μάθηση στην εποχή της τεχνητής νοημοσύνης και να διευρύνει την πρόσβαση, ο ψηφιακός μετασχηματισμός έχει επίσης εντείνει τις υπάρχουσες ανισότητες, εισάγοντας νέες μορφές αποκλεισμού και δημιουργώντας αυτό που οι μελετητές και οι υπεύθυνοι χάραξης πολιτικής αναφέρονται όλο και περισσότερο ως «ψηφιακό χάσμα» (van Dijk, 2020).

Η παρούσα εργασία διερευνά τη διττή φύση του ψηφιακού μετασχηματισμού στην εκπαίδευση: τις αξιοσημείωτες ευκαιρίες που παρουσιάζει και τις προκλήσεις που επιβάλλει, ιδίως για την ισότητα και την ένταξη. Συγκεκριμένα, εξετάζει την άνιση πρόσβαση σε ψηφιακά εργαλεία, υποδομές και δεξιότητες σε διάφορα κοινωνικά, οικονομικά, γεωγραφικά και δημογραφικά πλαίσια. Αναλύοντας κριτικά αυτές τις ανισότητες μέσα από το πρίσμα της τρέχουσας έρευνας, των παγκόσμιων περιπτωσιολογικών μελετών και των πολιτικών ψηφιακού γραμματισμού, η παρούσα μελέτη στοχεύει να συμβάλει σε μια βαθύτερη κατανόηση του τρόπου με τον οποίο οι ψηφιακές τεχνολογίες επηρεάζουν την εκπαιδευτική ισότητα.

Η κεντρική θέση αυτής της εργασίας είναι ότι ενώ ο ψηφιακός μετασχηματισμός προσφέρει επαναστατικές δυνατότητες για εξατομίκευση μάθηση, προσβασιμότητα και επεκτασιμότητα, ταυτόχρονα αναπαράγει - και σε ορισμένες περιπτώσεις επιδεινώνει - τις υπάρχουσες κοινωνικές και οικονομικές ανισότητες. Επιπλέον, εάν οι πολιτικές ψηφιακής εκπαίδευσης δεν σχεδιαστούν με γνώμονα τη συμμετοχικότητα και την ισότητα, το εκπαιδευτικό χάσμα θα συνεχίσει να αυξάνεται. Στην τελευταία ενότητα της παρούσας εργασίας διατυπώνονται προτάσεις για στοχευμένες εθνικές και διεθνείς στρατηγικές για τη γεφύρωση του ψηφιακού χάσματος, συμπεριλαμβανομένων των επενδύσεων σε υποδομές, της κατάρτισης σε ψηφιακές δεξιότητες μαθητών και εκπαιδευτικών και της χάραξης πολιτικής χωρίς αποκλεισμούς.

ΘΕΩΡΗΤΙΚΟ ΠΛΑΙΣΙΟ - ΕΝΝΟΙΟΛΟΓΙΚΕΣ ΑΠΟΣΑΦΗΝΙΣΕΙΣ
ΨΗΦΙΑΚΟΣ ΜΕΤΑΣΧΗΜΑΤΙΣΜΟΣ ΣΤΗΝ ΕΚΠΑΙΔΕΥΣΗ

Ο όρος «ψηφιακός μετασχηματισμός στην εκπαίδευση» αναφέρεται στη συστηματική ενσωμάτωση ψηφιακών τεχνολογιών στις διαδικασίες διδασκαλίας, μάθησης και διοίκησης των εκπαιδευτικών οργανισμών, με στόχο τη βελτίωση της ποιότητας του παρεχόμενου εκπαιδευτικού έργου και της πρόσβασης στην εκπαίδευση (European Commission, 2020). Περιλαμβάνει, μεταξύ άλλων, την αξιοποίηση των Τεχνολογιών Πληροφορίας και Επικοινωνιών (ΤΠΕ) για εξατομικευμένη και διαφοροποιημένη μάθηση, υιοθέτηση μικτών μοντέλων μάθησης (blended learning), ανάπτυξη ψηφιακών δεξιοτήτων μαθητών και εκπαιδευτικών, καινοτομία στη διδασκαλία και αξιολόγηση, καθώς και στη διοίκηση εκπαιδευτικών οργανισμών. Σύμφωνα με τον Selwyn (2016), ο ψηφιακός μετασχηματισμός επηρεάζει θετικά την εξατομικευμένη μάθηση και την ανάπτυξη δεξιοτήτων και μπορεί να προωθήσει την κοινωνική δικαιοσύνη, υπό την προϋπόθεση ότι συνοδεύεται από πολιτικές ισότιμης πρόσβασης και ανάπτυξης δεξιοτήτων.

Η Υπόσχεση του Ψηφιακού Μετασχηματισμού στην Εκπαίδευση

Ο ψηφιακός μετασχηματισμός έχει τεράστιες δυνατότητες για την ενίσχυση των εκπαιδευτικών αποτελεσμάτων. Στον πυρήνα αυτής της πρόκλησης βρίσκεται η ικανότητα της τεχνολογίας να εξατομικεύει τις μαθησιακές εμπειρίες. Τα έξυπνα συστήματα διδασκαλίας και τα προσαρμοστικά λογισμικά και περιβάλλοντα μάθησης δημιουργούν εξατομικευμένες εμπειρίες που ανταποκρίνονται στο ρυθμό και το μαθησιακό στυλ κάθε μαθητή (Pane et al., 2017). Αυτά τα εργαλεία μπορούν να βοηθήσουν στην κάλυψη των μαθησιακών κενών, στη μείωση των ποσοστών εγκατάλειψης του σχολείου και στη βελτίωση της συνολικής απόδοσης των μαθητών.

Επιπλέον, η τεχνολογία μπορεί να ενισχύει την προσβασιμότητα. Οι μαθητές που είναι γεωγραφικά απομονωμένοι ή σωματικά ανίκανοι να παρακολουθήσουν παραδοσιακές αίθουσες διδασκαλίας μπορούν πλέον να έχουν πρόσβαση σε εκπαίδευση υψηλής ποιότητας μέσω διαδικτυακών πλατφορμών. Εργαλεία, όπως προγράμματα ανάγνωσης οθόνης, λογισμικά μετατροπής ομιλίας σε κείμενο και υπηρεσίες μετάφρασης σε πραγματικό χρόνο υποστηρίζουν τους μαθητές με αναπηρίες και όσους μαθαίνουν σε πολύγλωσσα περιβάλλοντα (UNESCO, 2021). Ως αποτέλεσμα, η εκπαίδευση γίνεται πιο συμπεριληπτική, ευέλικτη και ανταποκρίνεται σε ποικίλες ανάγκες εκπαιδευτών και εκπαιδευόμενων.

Η επεκτασιμότητα της ψηφιακής εκπαίδευσης συνιστά ένα επιπλέον πλεονέκτημα. Το εκπαιδευτικό υλικό μπορεί να διανεμηθεί με ελάχιστο κόστος σε χιλιάδες, ακόμη και εκατομμύρια, μαθητές. Τα MOOC, για παράδειγμα, διασφαλίζουν την πρόσβαση σε μαθήματα από αναγνωρισμένα πανεπιστήμια σε όλο τον πλανήτη, προσεγγίζοντας μαθητές σε περισσότερες από 190 χώρες (Liyanagunawardena et al., 2013). Κατά τη διάρκεια της πανδημίας COVID-19, οι πλατφόρμες αυτές διαδραμάτισαν κρίσιμο ρόλο στη διασφάλιση της συνέχειας της μάθησης, αναδεικνύοντας τη χρησιμότητά τους και σε περιόδους κρίσης (OECD, 2021).

Ωστόσο, ενώ τα οφέλη του ψηφιακού μετασχηματισμού είναι προφανή, δεν κατανέμονται ομοιόμορφα. Πολλοί μαθητές, ειδικά εκείνοι που προέρχονται από χαμηλότερα κοινωνικοοικονομικά στρώματα ή περιθωριοποιημένες κοινότητες, αντιμετωπίζουν περιορισμένη πρόσβαση σε ψηφιακά εργαλεία και συνδέσεις, γεγονός που οδηγεί σε χαμηλότερη συμμετοχή και επίδοση (DiMaggio & Hargittai, 2001). Ως εκ τούτου, η μετάβαση στην ψηφιακή μάθηση ενισχύει το εκπαιδευτικό χάσμα αντί να το μειώσει.

Επιπλέον, οι εκπαιδευτικοί συχνά δεν διαθέτουν την απαραίτητη εκπαίδευση και υποστήριξη για την υιοθέτηση ψηφιακών εργαλείων με παιδαγωγικό τρόπο (Eickelmann & Vennemann, 2017). Η ανάπτυξη των ψηφιακών δεξιοτήτων των εκπαιδευτικών είναι καθοριστική για τον περιορισμό του ψηφιακού χάσματος σε επίπεδο σχολικής τάξης (European Schoolnet, 2018).

ΨΗΦΙΑΚΟ ΧΑΣΜΑ (DIGITAL GAP)

Το ψηφιακό χάσμα (digital gap) αναφέρεται στη διαφορά μεταξύ ατόμων, κοινοτήτων ή εθνών όσον αφορά την πρόσβαση και την ικανότητα χρήσης ψηφιακών τεχνολογιών, όπως το διαδίκτυο, οι υπολογιστές και οι κινητές συσκευές. Αυτό το χάσμα μπορεί να υπάρχει λόγω διαφορών στο εισόδημα, τη γεωγραφία, την εκπαίδευση, την ηλικία ή τις υποδομές. Συνεπώς, το ψηφιακό χάσμα δεν αφορά μόνο την τεχνολογική διάσταση της πρόσβασης, αλλά και τις κοινωνικές και πολιτισμικές δυνατότητες των ομάδων να αξιοποιούν τις τεχνολογίες (Warschauer, 2004). Ο Van Dijk (2020) αναλύει το ψηφιακό χάσμα σε τέσσερις διαστάσεις: 1.Χάσμα Πρόσβασης – Ορισμένοι άνθρωποι δεν έχουν πρόσβαση στο διαδίκτυο ή σε ψηφιακές συσκευές λόγω κόστους ή διαθεσιμότητας, 2.Χάσμα Χρήσης – Ακόμα και αν υπάρχει πρόσβαση, κάποιοι μπορεί να μην διαθέτουν τις απαραίτητες δεξιότητες ή γνώσεις για να χρησιμοποιούν αποτελεσματικά τα ψηφιακά εργαλεία, 3.Χάσμα Ποιότητας – Η ταχύτητα και η αξιοπιστία των διαδικτυακών συνδέσεων διαφέρουν σημαντικά, επηρεάζοντας τις ευκαιρίες για εκπαίδευση και εργασία, 4. Χάσμα Περιεχομένου – Πολλοί διαδικτυακοί πόροι είναι διαθέσιμοι μόνο σε συγκεκριμένες γλώσσες ή μορφές, περιορίζοντας την πρόσβαση για ορισμένους χρήστες.

ΨΗΦΙΑΚΕΣ ΑΝΙΣΟΤΗΤΕΣ (DIGITAL DIVIDE): ΕΝΑ ΠΟΛΥΠΛΕΥΡΟ ΠΡΟΒΛΗΜΑ

Οι ψηφιακές ανισότητες (digital divide) δεν είναι ένα μονοδιάστατο ζήτημα, αλλά μια σύνθετη αλληλεπίδραση πολλαπλών μορφών μειονεξίας. Αυτές περιλαμβάνουν ανισότητες στην πρόσβαση σε υλικό (όπως φορητούς υπολογιστές, tablet κ.α.), την έλλειψη συνδεσιμότητας (διαθέσιμο και αξιόπιστο διαδίκτυο για όλους), τον ψηφιακό αναλφαβητισμό και την απουσία υποστηρικτικών περιβαλλόντων μάθησης. Τα ζητήματα αυτά συχνά έχουν τις ρίζες τους σε ευρύτερες κοινωνικοοικονομικές και διαρθρωτικές ανισότητες.

Κοινωνικοοικονομικές ανισότητες

Μία από τις πιο ορατές μορφές ψηφιακής ανισότητας σχετίζεται με το εισόδημα και την κοινωνικοοικονομική κατάσταση. Τα νοικοκυριά με χαμηλότερα επίπεδα εισοδήματος είναι σημαντικά λιγότερο πιθανό να έχουν πρόσβαση σε διαδίκτυο υψηλής ταχύτητας, σύγχρονες συσκευές και ήσυχους χώρους μάθησης. Μια έρευνα του 2020 αποκάλυψε ότι ενώ το 92% των νοικοκυριών στις ΗΠΑ που κερδίζουν πάνω από 75,000$ ετησίως είχαν ευρυζωνική σύνδεση στο σπίτι, ενώ μόνο το 56% εκείνων που κερδίζουν κάτω από 30,000$ είχαν την ίδια δυνατότητα (Atske & Perrin, 2021). Η έλλειψη πρόσβασης, ιδίως σε νοικοκυριά με παιδιά σχολικής ηλικίας, μπορεί να οδηγήσει σε εκτεταμένη απώλεια μάθησης και χαμηλές ακαδημαϊκές επιδόσεις.

Στο πλαίσιο του κλεισίματος των σχολείων κατά τη διάρκεια της πανδημίας COVID-19, οι ανισότητες αυτές έγιναν ακόμη πιο εμφανείς. Οι μαθητές από εύπορες οικογένειες ήταν πιο πιθανό να έχουν πρόσβαση σε πλατφόρμες εξ αποστάσεως μάθησης, σύνδεση στο διαδίκτυο, ατομικό εξοπλισμό ψηφιακών εργαλείων, δυνατότητα να παρακολουθήσουν εικονικές συνεδρίες διδασκαλίας και να επωφεληθούν από τη γονική υποστήριξη. Αντίθετα, οι μαθητές χαμηλού εισοδήματος συχνά υστερούσαν τόσο στον εξοπλισμό όσο και στην προσβασιμότητα λόγω έλλειψης των απαραίτητων πόρων (OECD, 2021).

Γεωγραφικές ανισότητες και ανισότητες υποδομών

Η γεωγραφική θέση διαδραματίζει επίσης σημαντικό ρόλο στον καθορισμό της πρόσβασης στην ψηφιακή εκπαίδευση. Οι αγροτικές και απομακρυσμένες περιοχές συχνά δεν διαθέτουν την ευρυζωνική υποδομή που απαιτείται για την υποστήριξη της ηλεκτρονικής μάθησης. Σε πολλά μέρη του Παγκόσμιου Νότου, η πρόσβαση στο διαδίκτυο παραμένει απαγορευτικά ακριβή ή εντελώς μη διαθέσιμη. Για παράδειγμα, η Παγκόσμια Τράπεζα (World Bank, 2019) σημείωσε ότι στην υποσαχάρια Αφρική, λιγότερο από το 30% των σχολείων είχαν πρόσβαση σε ηλεκτρική ενέργεια, πόσο μάλλον σε αξιόπιστο διαδίκτυο.

Ακόμη και στις ανεπτυγμένες χώρες, οι αγροτικές περιοχές υποφέρουν συχνά από ψηφιακή υπανάπτυξη. Στις Ηνωμένες Πολιτείες, εκατομμύρια νοικοκυριά σε αγροτικές περιοχές εξακολουθούν να στερούνται διαδικτύου υψηλής ταχύτητας παρά τις πρωτοβουλίες συνδεσιμότητας σε εθνικό επίπεδο. Αυτά τα κενά υποδομής περιορίζουν σημαντικά τις εκπαιδευτικές ευκαιρίες για τους μαθητές σε αυτές τις περιοχές, διαιωνίζοντας κύκλους υπανάπτυξης και μειονεξίας.

Στην Ελλάδα, σύμφωνα με δεδομένα της ΕΛΣΤΑΤ (2023), το 83% των νοικοκυριών διαθέτει πρόσβαση στο διαδίκτυο, αλλά το ποσοστό πέφτει στο 65% στις αγροτικές και παραμεθόριες ή ορεινές περιοχές. Επιπλέον, το 28% των μαθητών δηλώνει ότι δεν διαθέτει κατάλληλο χώρο ή εξοπλισμό για μελέτη στο σπίτι. Στην έρευνα αναφέρεται ότι περιοχές με το χαμηλότερο ποσοστό πρόσβασης είναι η Δυτική Μακεδονία και η Στερεά Ελλάδα.

Δημογραφικές ανισότητες στην ψηφιακή εκπαίδευση

Εκτός από τα κοινωνικοοικονομικά και γεωγραφικά εμπόδια, δημογραφικοί παράγοντες όπως η ηλικία, το φύλο και η εθνικότητα επηρεάζουν επίσης σημαντικά την πρόσβαση και τα αποτελέσματα της ψηφιακής εκπαίδευσης. Μια σημαντική ανησυχία είναι το ψηφιακό χάσμα μεταξύ των φύλων. Αν και η πρόσβαση στην εκπαίδευση έχει βελτιωθεί παγκοσμίως, τα κορίτσια εξακολουθούν να αντιμετωπίζουν άνιση πρόσβαση σε ψηφιακά εργαλεία και πλατφόρμες σε πολλές περιοχές. Η Διεθνής Ένωση Τηλεπικοινωνιών (ITU, 2020) αναφέρει ότι παγκοσμίως, το 55% των ανδρών χρησιμοποιούν το διαδίκτυο σε σύγκριση με μόλις το 48% των γυναικών, ένα χάσμα που είναι ακόμη μεγαλύτερο στις χώρες χαμηλού εισοδήματος. Αυτή η ανισότητα μπορεί να αποδοθεί σε πολλούς παράγοντες, συμπεριλαμβανομένων των πολιτιστικών προτύπων που αποθαρρύνουν τη συμμετοχή των γυναικών σε τομείς που σχετίζονται με την τεχνολογία, του χαμηλότερου ψηφιακού γραμματισμού μεταξύ των γυναικών και της μειωμένης αυτονομίας στη λήψη αποφάσεων στο νοικοκυριό. Όταν η πρόσβαση στη ψηφιακή εκπαίδευση περιορίζεται από έμφυλους περιορισμούς, ενισχύονται οι υφιστάμενες εκπαιδευτικές και οικονομικές ανισότητες και περιορίζεται η πλήρης και ισότιμη συμμετοχή των γυναικών στο κοινωνικό και οικονομικό γίγνεσθαι.

Η ηλικία αποτελεί μια άλλη δημογραφική μεταβλητή που επηρεάζει τη ψηφιακή πρόσβαση. Ενώ οι νέοι συχνά θεωρούνται «ψηφιακοί ιθαγενείς», αυτή η υπόθεση κρύβει σημαντικές διαφορές στα επίπεδα ψηφιακών δεξιοτήτων. Οι ενήλικες, συμπεριλαμβανομένων των εκπαιδευτικών, μπορεί επίσης να αντιμετωπίσουν δυσκολίες κατά τον ψηφιακό μετασχηματισμό (Eickelmann & Vennemann, 2017). Η ξαφνική μετάβαση στη διαδικτυακή διδασκαλία κατά τη διάρκεια της πανδημίας COVID-19 ανέδειξε σημαντικά κενά στην ετοιμότητα και τις ψηφιακές ικανότητες της πλειοψηφίας των εκπαιδευτικών να ανταποκριθούν στη μετάβαση στην επείγουσα εξ αποστάσεως διδασκαλία με αξιοποίηση διαδικτυακών πλατφορμών και ψηφιακών εργαλείων (König et al., 2020). Αυτή η απόκλιση εμπόδισε την αποτελεσματική και ισότιμη παροχή ψηφιακής μάθησης στους μαθητές και έθεσε πρόσθετα βάρη στους εκπαιδευτικούς που δεν είχαν εντρυφήσει ή εκπαιδευτεί σε εικονικές παιδαγωγικές προσεγγίσεις.

Η εθνικότητα και η φυλή επιδεινώνουν περαιτέρω τις ψηφιακές ανισότητες. Στις ΗΠΑ, για παράδειγμα, τα αφροαμερικανικά και ισπανόφωνα νοικοκυριά είναι λιγότερο πιθανό από τα λευκά νοικοκυριά να έχουν πρόσβαση σε διαδίκτυο υψηλής ταχύτητας και ψηφιακές συσκευές (Anderson &; Perrin, 2020). Στη χώρα μας, καθώς και σε άλλες βαλκανικές χώρες όπως η Βουλγαρία, αντίστοιχη ανισότητα υπάρχει έντονη στη φυλή των ρομά (European Commission: 2024.) Αυτές οι ανισότητες δεν είναι μόνο τεχνικές αλλά και κοινωνικές, καθώς αντικατοπτρίζουν μακροχρόνιες ανισότητες στον πλούτο, την εκπαίδευση και τις επενδύσεις σε υποδομές.

ΨΗΦΙΑΚΟΣ ΓΡΑΜΜΑΤΙΣΜΟΣ & ΧΑΣΜΑ ΨΗΦΙΑΚΩΝ ΔΕΞΙΟΤΗΤΩΝ

Πέρα από τη φυσική πρόσβαση στην τεχνολογία, η ικανότητα αποτελεσματικής χρήσης ψηφιακών εργαλείων – ο ψηφιακός γραμματισμός – είναι ένας κρίσιμος καθοριστικός παράγοντας των εκπαιδευτικών αποτελεσμάτων στη ψηφιακή εποχή (Raj & Gupta, 2025). Ο ψηφιακός γραμματισμός περιλαμβάνει ένα ευρύ φάσμα ικανοτήτων, συμπεριλαμβανομένης της πλοήγησης για εύρεση πληροφοριών, της κριτικής αξιολόγησης των πηγών, της διαδικτυακής επικοινωνίας και της δημιουργίας και χρήσης ψηφιακού περιεχομένου. Καθώς η εκπαίδευση εξαρτάται όλο και περισσότερο από τα ψηφιακά εργαλεία, οι εκπαιδευτικοί αλλά και οι μαθητές που δεν διαθέτουν αυτές τις ικανότητες αντιμετωπίζουν αυξανόμενα μειονεκτήματα.

Εστιάζοντας αρχικά στους μαθητές, πολυάριθμες μελέτες επισημαίνουν ότι τα επίπεδα ψηφιακών δεξιοτήτων ποικίλλουν ευρέως ανάλογα με την κοινωνικοοικονομική κατάσταση, την εκπαίδευση των γονέων και την ποιότητα του σχολείου. Για παράδειγμα, μελέτη της Ευρωπαϊκής Επιτροπής (European Comission, 2022) διαπίστωσε ότι μόνο το 56 % των μαθητών σε σχολεία χαμηλότερου εισοδήματος σε ολόκληρη την Ευρωπαϊκή Ένωση επέδειξαν επαρκείς ψηφιακές δεξιότητες, σε σύγκριση με πάνω από 85 % σε σχολεία υψηλού εισοδήματος. Αυτό το χάσμα οδηγεί σε άνιση συμμετοχή σε ψηφιακά περιβάλλοντα μάθησης και περιορίζει τις μελλοντικές ακαδημαϊκές και επαγγελματικές προοπτικές των μαθητών.

Επιπλέον, ο ψηφιακός γραμματισμός μαθητών συχνά θεωρείται δεδομένος και δε διδάσκεται ρητά. Πολλά εκπαιδευτικά ιδρύματα αναμένουν από τους μαθητές να πλοηγηθούν σε πολύπλοκες ψηφιακές πλατφόρμες χωρίς επαρκή κατάρτιση, γεγονός που επιδεινώνει τις ανισότητες. Το ζήτημα αυτό είναι ιδιαίτερα έντονο σε νεότερους μαθητές ή σε άτομα με ειδικές εκπαιδευτικές ανάγκες. Χωρίς στοχευμένη διδασκαλία στις ψηφιακές ικανότητες, τα πλεονεκτήματα της ψηφιακής εκπαίδευσης δεν μπορούν να υλοποιηθούν δίκαια.

Ο ΡΟΛΟΣ ΤΩΝ ΕΚΠΑΙΔΕΥΤΙΚΩΝ ΙΔΡΥΜΑΤΩΝ ΚΑΙ ΤΗΣ ΔΙΟΙΚΗΣΗΣ ΣΤΟΝ ΨΗΦΙΑΚΟ ΜΕΤΑΣΧΗΜΑΤΙΣΜΟ

Τα εκπαιδευτικά ιδρύματα και τα διοικητικά τους όργανα διαδραματίζουν καίριο ρόλο στην καθοδήγηση του ψηφιακού μετασχηματισμού. Η επιτυχής ενσωμάτωση της ψηφιακής τεχνολογίας απαιτεί κάτι περισσότερο από απλή πρόσβαση σε συσκευές - περιλαμβάνει τον επανασχεδιασμό του προγράμματος σπουδών, την επαγγελματική ανάπτυξη των εκπαιδευτικών και τη δημιουργία υποστηρικτικών ψηφιακών οικοσυστημάτων εντός των σχολείων.

Ένας από τους βασικούς παράγοντες που επηρεάζουν την επιτυχή ενσωμάτωση της ψηφιακής τεχνολογίας στον σχολικό οργανισμό είναι η ηγεσία (Kavitha & Kursheed 2024). Τα σχολεία με διορατικούς, ψηφιακά εγγράμματους ηγέτες-διευθυντές είναι πιο πιθανό να εφαρμόσουν αποτελεσματικές ψηφιακές στρατηγικές και να διασφαλίσουν ότι τόσο οι μαθητές όσο και οι εκπαιδευτικοί υποστηρίζονται καθ' όλη τη διάρκεια της μετάβασης. Σύμφωνα με τους Fullan και Langworthy (2014), η ισχυρή ηγεσία είναι απαραίτητη για την προώθηση μιας κουλτούρας καινοτομίας και τη συστηματική και στοχευμένη ανάπτυξη ψηφιακών πρωτοβουλιών με την πάροδο του χρόνου.

Η κατάρτιση των εκπαιδευτικών είναι ένας άλλος κρίσιμος τομέας. Η επαγγελματική εξέλιξη πρέπει να υπερβαίνει την τεχνική κατάρτιση και να περιλαμβάνει στρατηγικές και εργαλεία για παιδαγωγική αξιοποίηση ψηφιακών εργαλείων και τεχνητής νοημοσύνης για τη μάθηση. Η έρευνα δείχνει ότι οι εκπαιδευτικοί που λαμβάνουν συστηματική ψηφιακή κατάρτιση είναι πιο αποτελεσματικοί στην ενσωμάτωση της τεχνολογίας στις τάξεις τους (Darling-Hammond et al., 2017) και αισθάνονται ικανοί και επαρκείς ώστε να αξιοποιήσουν ψηφιακά μέσα στη διδασκαλία τους. Τα εκπαιδευτικά ιδρύματα κάθε βαθμίδας που επενδύουν σε τέτοιας μορφής κατάρτιση όχι μόνο βελτιώνουν την ποιότητα της εκπαίδευσης, αλλά συμβάλλουν επίσης στον μετριασμό των ανισοτήτων στα μαθησιακά αποτελέσματα των σπουδαστών τους.

Επιπλέον, κάθε κράτος πρέπει να υιοθετήσει πολιτικές που δίνουν προτεραιότητα στην ισότιμη ψηφιακή πρόσβαση και ένταξη για μαθησιακούς σκοπούς. Αυτό περιλαμβάνει τη εξασφάλιση δωρεάν εξοπλισμού σε μαθητές που έχουν ανάγκη, την επιδότηση της πρόσβασης στο διαδίκτυο και την παροχή στοχευμένης υποστήριξης σε ευάλωτες ομάδες. Χωρίς τέτοια μέτρα, οι θεσμικές προσπάθειες ενδέχεται ακούσια να διευρύνουν τα υφιστάμενα κενά.

ΑΠΑΝΤΗΣΕΙΣ ΠΟΛΙΤΙΚΗΣ ΚΑΙ ΠΑΓΚΟΣΜΙΕΣ ΣΤΡΑΤΗΓΙΚΕΣ

Για την αντιμετώπιση του ψηφιακού χάσματος στην εκπαίδευση, διάφορες κυβερνήσεις και διεθνείς οργανισμοί έχουν αναπτύξει στοχευμένες πολιτικές και προγράμματα. Αυτές αφορούν επενδύσεις σε υποδομές έως μεταρρυθμίσεις προγραμμάτων σπουδών και συμπράξεις δημόσιου-ιδιωτικού τομέα.

Για παράδειγμα, η εθνική στρατηγική της Φινλανδίας για την ψηφιακή εκπαίδευση δίνει έμφαση στην ψηφιακή ισότητα και τη διά βίου μάθηση. Η κυβέρνηση έχει επενδύσει σε διαδίκτυο υψηλής ταχύτητας για όλα τα σχολεία, έχει αναπτύξει εθνικά προγράμματα σπουδών που ενσωματώνουν ψηφιακές ικανότητες και έχει θεσπίσει προγράμματα κατάρτισης εκπαιδευτικών (Ministry of Education and Culture, Finland, 2020). Ως αποτέλεσμα, η Φινλανδία κατατάσσεται σταθερά μεταξύ των κορυφαίων χωρών όσον αφορά την ψηφιακή ετοιμότητα και τα εκπαιδευτικά αποτελέσματα.

Ομοίως, το Plan Ceibal της Ουρουγουάης παρέχει σε κάθε μαθητή και δάσκαλο φορητό υπολογιστή και δωρεάν πρόσβαση στο διαδίκτυο, συμβάλλοντας στη γεφύρωση του ψηφιακού χάσματος και στη βελτίωση των μαθησιακών αποτελεσμάτων σε όλες τις κοινωνικοοικονομικές ομάδες (Katz, 2017). Η επιτυχία του προγράμματος έγκειται όχι μόνο στη διανομή συσκευών, αλλά και στην ολοκληρωμένη προσέγγισή του στην κατάρτιση των εκπαιδευτικών, τη συμμετοχή των γονέων και την τοπική ανάπτυξη περιεχομένου.

Στην Ελλάδα, εστιάζοντας από το 2020 και μετά, υλοποιούνται πολυδιάστατες πολιτικές ψηφιακού γραμματισμού εκπαιδευτικών και μαθητών που συνδυάζουν: 1.Υποδομές (διαδραστικοί πίνακες, πλατφόρμες, πολλαπλό βιβλίο): Κάθε σχολείο στην Ελλάδα εξοπλίζεται με διαδραστικούς πίνακες, ενώ ταυτόχρονα εξασφαλίζεται η πρόσβαση όλων των σχολείων σε πλατφόρμες μάθησης όπως η e-me, η e-class, το ψηφιακό φροντιστήριο κ.α. Ταυτόχρονα, στο πλαίσιο εφαρμογής των νέων προγραμμάτων σπουδών (ΦΕΚ 136/Α/3-8-2021), είναι σε εξέλιξη πρόγραμμα του ΙΕΠ (κωδικός ΟΠΣ ΤΑ 5174140) για τη δημιουργία νέου ψηφιακού αποθετηρίου (kaleduscope) που θα περιλαμβάνει 15000 ανοικτούς εκπαιδευτικούς πόρους (OERs), καθώς και πληθώρα ολοκληρωμένων ψηφιακών σεναρίων διδασκαλίας και μάθησης για εκπαιδευτικούς και μαθητές, τα οποία θα υποστηρίζουν τόσο τη διδασκαλία όσο και την εξατομικευμένη μάθηση από το δημοτικό μέχρι και το λύκειο. Στην ίδια φιλοσοφία εντάσσεται και η καθιέρωση του πολλαπλού βιβλίου, όπου για κάθε διδακτικό αντικείμενο θα είναι διαθέσιμα περισσότερα του ενός διδακτικά βιβλία σε ψηφιακή μορφή. Σε κάθε εγκεκριμένο σχολικό βιβλίο περιλαμβάνεται, σε ποσοστό 30% τουλάχιστον, ψηφιακό υλικό ελεύθερα προσβάσιμο από μαθητές και εκπαιδευτικούς, 2. Ψηφιακές δεξιότητες (εκπαιδευτική και κοινωνική διάσταση): σε επίπεδο εκπαιδευτικής πολιτικής προβλέπονται δράσεις ψηφιακού γραμματισμού και επαγγελματικής ανάπτυξης εκπαιδευτικών που σχετίζονται τόσο με ψηφιακά εργαλεία και εργαλεία τεχνητής νοημοσύνης όσο και με εργαλεία παιδαγωγικής αξιοποίησης και ενσωμάτωσης των νέων τεχνολογιών στην καθημερινή διδακτική πρακτική. Το ΙΕΠ είναι κατεξοχήν ο αρμόδιος θεσμοθετημένος φορέας επιμόρφωσης εκπαιδευτικών. Ενδεικτικά αναφέρουμε τα προγράμματα κατάρτισης εκπαιδευτικών στη διαφοροποιημένη διδασκαλία, 3. Ταυτόχρονα, οι νέοι θεσμοί των Περιφερειακών Εποπτών Ποιότητας Εκπαίδευσης, Εποπτών Ποιότητας εκπαίδευσης και Συμβούλων εκπαίδευσης αναλαμβάνουν πρωτοβουλίες επιμόρφωσης και κατάρτισης εκπαιδευτικών , όπως προβλέπεται σύμφωνα με τον νόμο 4823/2021, 4. Εξ αποστάσεως διδασκαλία & μάθηση (για την υποστήριξη μαθητών και επιμόρφωση εκπαιδευτικών). Συνιστά «παράπλευρη ωφέλεια» της εποχής της πανδημίας η ανάδειξη των δυνατοτήτων των ψηφιακών τεχνολογιών για τη διδασκαλία και τη μάθηση. Ήδη η συντριπτική πλειοψηφία των Ελλήνων εκπαιδευτικών έχουν διαμορφώσει θετική αντίληψη σχετικά με την προστιθέμενη αξία της ενσωμάτωσης ψηφιακών εργαλείων στη διδασκαλία και μάθηση και έχουν υιοθετήσει στην καθημερινή τους πρακτική παιδαγωγικές στρατηγικές διδασκαλίας με αξιοποίηση νέων τεχνολογιών (όπως η ανεστραμμένη τάξη κ.α.), 5.Τοπικές & ευρωπαϊκά ευθυγραμμισμένες δράσεις (DigComp, VET). Γίνεται διάλογος για την ενσωμάτωση της Τεχνητής Νοημοσύνης στη διδασκαλία και μάθηση με τρόπο που δεν θα περιορίζει την ανθρώπινη νοημοσύνη ή τον ρόλο του δασκάλου, αλλά θα συμβάλλει στην ανάπτυξη της κριτικής σκέψης των μαθητών, στη βελτίωσης της διαδικασίας αξιολόγησης, στον περιορισμό του χρόνου των εκπαιδευτικών για διεκπεραίωση γραφειοκρατικών εργασιών κ.α.

Αρκετές από αυτές τις πολιτικές δείχνουν να μην περιορίζονται στην άνωθεν ρύθμιση, αλλά εμπλέκουν ενεργά εκπαιδευτικούς, σχολικές κοινότητες και μαθητές, με στόχο τη μείωση του ψηφιακού χάσματος σε όλες τις εκπαιδευτικές βαθμίδες και με ιδιαίτερη έμφαση στην κάλυψη ακόμα και της πιο απομακρυσμένης ή δυσπρόσιτης περιοχής της Ελλάδας.

Σε παγκόσμιο επίπεδο, διεθνείς οργανισμοί όπως η UNESCO και η Παγκόσμια Τράπεζα έχουν επίσης ξεκινήσει πρωτοβουλίες για την προώθηση της ψηφιακής ισότητας. Το πρόγραμμα «Εκπαίδευση για τη Βιώσιμη Ανάπτυξη» της UNESCO υποστηρίζει πολιτικές ψηφιακής εκπαίδευσης χωρίς αποκλεισμούς και τονίζει τη σημασία του τοπικού πλαισίου στον σχεδιασμό πολιτικής (UNESCO, 2021). Εν τω μεταξύ, η Παγκόσμια Τράπεζα έχει χρηματοδοτήσει έργα ψηφιακών υποδομών στην Αφρική, την Ασία και τη Λατινική Αμερική για τη στήριξη της εκπαίδευσης κατά τη διάρκεια και μετά την πανδημία COVID-19, ενώ ενδεικτικά αναφέρονται διασυνοριακές πρωτοβουλίες όπως το Έργο Roma Plus (2021–2024) για τον ψηφιακό γραμματισμό των ρομά σε Ελλάδα, Βόρεια Μακεδονία και Βουλγαρία (https://romaplus.eu/el/).

Ωστόσο, δεν είναι όλες οι προσπάθειες πολιτικής εξίσου επιτυχείς. Ορισμένα προγράμματα έχουν αποτύχει λόγω έλλειψης μακροπρόθεσμου σχεδιασμού, ανεπαρκούς υποστήριξης εκπαιδευτικών ή κακής εφαρμογής. Για να είναι αποτελεσματικές, οι πολιτικές ψηφιακής εκπαίδευσης πρέπει να βασίζονται σε τεκμηριωμένες μελέτες, συστηματικότητα και διάρκεια, να καθοδηγούνται από το ζητούμενο της καθολικής και ισότιμης πρόσβασης και να υποστηρίζονται από επαρκή χρηματοδότηση και μηχανισμούς παρακολούθησης.

Επιπτώσεις του Ψηφιακού Μετασχηματισμού στην Εμπειρία των Μαθητών και την Ποιότητα της Εκπαίδευσης

Η ταχεία στροφή προς την ψηφιακή εκπαίδευση έχει επηρεάσει βαθιά τις καθημερινές εμπειρίες των μαθητών, την ακαδημαϊκή συμμετοχή και την ψυχική ευεξία. Ενώ τα ψηφιακά περιβάλλοντα μάθησης προσφέρουν ευελιξία και αυτονομία, εισάγουν επίσης νέους στρεσογόνους παράγοντες, ιδιαίτερα για μαθητές με περιορισμένα συστήματα υποστήριξης. Πολλοί μαθητές έχουν αναφέρει δυσκολίες στη διατήρηση ή αύξηση των κινήτρων μάθησης, καθώς και στη συγκέντρωση και την αίσθηση της κοινότητας σε πλήρως διαδικτυακές ή υβριδικές τάξεις (Garris & Fleck, 2020). Οι προκλήσεις αυτές έχουν σημαντικές επιπτώσεις στις ακαδημαϊκές τους επιδόσεις και στα μακροπρόθεσμα εκπαιδευτικά αποτελέσματα.

Μια κρίσιμη διάσταση της εμπειρίας των μαθητών σχετίζεται με το επίπεδο διαδραστικότητας και ανατροφοδότησης σε ψηφιακά περιβάλλοντα. Μελέτες έχουν δείξει ότι οι μαθητές προοδεύουν όταν λαμβάνουν έγκαιρη, εξατομικευμένη ανατροφοδότηση και ευκαιρίες συνεργασίας (Martin et al., 2020). Τέτοια χαρακτηριστικά απαιτείται να υπάρχουν σε ψηφιακές πλατφόρμες ή προσβάσιμα σε όλους τους μαθητές. Επιπρόσθετα, σε χώρες με ανεπαρκείς ψηφιακούς πόρους, ή με σχολεία όπου η αναλογία μαθητών προς εκπαιδευτικούς είναι μεγάλη και ταυτόχρονα με περιορισμένη τεχνολογική υποδομή μπορεί να περιοριστεί η ουσιαστική συμμετοχή, διευρύνοντας το εκπαιδευτικό χάσμα.

Η ψυχική υγεία είναι μια άλλη παράμετρος ανησυχίας. Η ψηφιακή εκπαίδευση συχνά οδηγεί σε αυξημένο χρόνο οθόνης, κοινωνική απομόνωση και θολά, ή σε κάποιες περιπτώσεις ανύπαρκτα όρια χρήσης ψηφιακών εργαλείων και οθονών τόσο για τις ανάγκες του σχολείου, όσο και κατά την παραμονή των παιδιών εντός σπιτιού. Σύμφωνα με έρευνα της Αμερικανικής Ψυχολογικής Εταιρείας (American Psychological Association, 2021), οι μαθητές βίωσαν αυξημένο άγχος και κατάθλιψη κατά τη διάρκεια περιόδων εξ αποστάσεως μάθησης. Αυτά τα ζητήματα επηρέασαν δυσανάλογα τους μαθητές από ευάλωτα περιβάλλοντα που δεν διέθεταν ασφαλείς, ήσυχους χώρους για μελέτη ή συναισθηματική υποστήριξη στο σπίτι.

Η ποιότητα της διδασκαλίας είναι επίσης ένα διαρκές ζητούμενο κατά τον ψηφιακό μετασχηματισμό της εκπαίδευσης. Έρευνες δείχνουν ότι ενώ σχολικοί οργανισμοί έχουν προσαρμόσει επιτυχώς τα προγράμματα σπουδών σε διαδικτυακές μορφές, δυσκολεύονται να υιοθετήσουν τη νέα φιλοσοφία και συνήθως μεταφέρουν το υφιστάμενο διδακτικό υλικό σε ψηφιακή μορφή χωρίς τον απαιτούμενο επανασχεδιασμό, οδηγώντας σε μια παραδοσιακή διδασκαλία ντυμένη με στοιχεία τεχνολογίας. Απαιτούνται συστήματα αποτίμησης, πρωτοτυποποίησης και αξιολόγησης της ψηφιακής εκπαίδευσης για τη διασφάλιση της ποιότητας.

Ψηφιακή Εκπαίδευση και Ακαδημαϊκή Επίδοση

Οι ακαδημαϊκές επιδόσεις σε ψηφιακά περιβάλλοντα ποικίλλουν σημαντικά ανάλογα με την ποιότητα της παράδοσης, την ψηφιακή πρόσβαση και την ετοιμότητα των μαθητών. Η έρευνα που συγκρίνει τα διαδικτυακά και τα διά ζώσης μαθησιακά αποτελέσματα αποκαλύπτει μικτά αποτελέσματα. Άρθρο με συστηματική ανασκόπηση 18 μελετών που αξιολογούν την επίδραση της online μάθησης στην απόδοση και την εμπλοκή των μαθητών καταλήγει ότι σε περιπτώσεις όπου υπήρχε καλή πρόσβαση, υψηλό κίνητρο και διαδραστική προσέγγιση διδασκαλίας, οι επιδόσεις συχνά βελτιώνονταν. Ωστόσο, παρουσιάζονται και προβλήματα όπως απογοήτευση, απομόνωση και μειωμένη αλληλεπίδραση με τον εκπαιδευτικό και με τους συμμαθητές (Akpen, et al. 2024). Στην πρωτοβάθμια και δευτεροβάθμια εκπαίδευση, οι μαθητές που δεν έχουν πρόσβαση σε αξιόπιστο διαδίκτυο, υποστηρικτικά μαθησιακά περιβάλλοντα ή δεν διαθέτουν ισχυρές δεξιότητες ψηφιακού γραμματισμού τείνουν να υστερούν σε διαδικτυακά περιβάλλοντα (Kuhfeld et al., 2020). Η απώλεια μάθησης, ιδιαίτερα στα μαθηματικά και τις φυσικές επιστήμες, έχει τεκμηριωθεί σε πολλές χώρες κατά τη διάρκεια παρατεταμένων περιόδων ψηφιακής διδασκαλίας.

Οι πρακτικές αξιολόγησης συνιστούν επίσης μία μεγάλη πρόκληση. (Çekiç & Bakla 2021). Οι διαδικτυακές εξετάσεις εγείρουν ανησυχίες σχετικά με την ακαδημαϊκή ακεραιότητα, την προσβασιμότητα και την αξιοπιστία των υφιστάμενων τεχνολογιών. Επιπλέον, πολλές αξιολογήσεις δεν έχουν προσαρμοστεί ώστε να καταγράφουν δεξιότητες κριτικής σκέψης. Ως εκ τούτου, η αξιολόγηση στην ψηφιακή εκπαίδευση παραμένει ένας τομέας που χρειάζεται εξέλιξη.

Θεσμική Διασφάλιση Ποιότητας στην Ψηφιακή Εποχή

Η διασφάλιση της ποιότητας των εκπαιδευτικών εμπειριών στην ψηφιακή εποχή αποτελεί αυξανόμενη ανησυχία για τους υπεύθυνους χάραξης πολιτικής και τους εμπλεκόμενους στη διδακτική και μαθησιακή διαδικασία. Τα παραδοσιακά πλαίσια διασφάλισης της ποιότητας είναι συχνά ακατάλληλα για την αξιολόγηση διαδικτυακών και υβριδικών μοντέλων μάθησης, καθιστώντας αναγκαία την ανάπτυξη νέων σημείων αναφοράς και εργαλείων παρακολούθησης.

Εγείρονται ποικίλα ερωτήματα και προκλήσεις διασφάλισης ψηφιακής ποιότητας που σχετίζονται με: 1. *Προσβασιμότητα:* Τα ψηφιακά μέσα μπορούν να χρησιμοποιηθούν από όλους τους μαθητές, συμπεριλαμβανομένων των ατόμων με αναπηρίες; 2. *Παιδαγωγική Αρτιότητα:* Ο σχεδιασμός του ψηφιακού μαθήματος υποστηρίζει την αποτελεσματική μάθηση; 3. *Εγκυρότητα Αξιολόγησης:* Οι αξιολογήσεις ευθυγραμμίζονται με τους μαθησιακούς στόχους και παρέχονται δίκαια; 4. *Ετοιμότητα Εκπαιδευτικών:* Εκπαιδεύονται οι εκπαιδευτές στην ηλεκτρονική παιδαγωγική και την παιδαγωγική αξιοποίηση τεχνολογικών εργαλείων; 5. *Υποστήριξη Μαθητών:* Υπάρχουν ισχυρά συστήματα ακαδημαϊκής συμβουλευτικής, ψυχικής υγείας και τεχνικής βοήθειας;

Οργανισμοί, όπως η Quality Matters (2022) και η European Association for Quality Assurance in Higher Education (ENQA), έχουν αναπτύξει πλαίσια για την αξιολόγηση της ποιότητας της ψηφιακής εκπαίδευσης, αλλά η υιοθέτηση αυτών των συστημάτων είναι ζητούμενο, ώστε τα εκπαιδευτικά πρότυπα να ενσωματώνουν μετρήσιμους δείκτες ποιότητας, καθώς και διαδικασίες διαπίστευσης ενταγμένες στον στρατηγικό προγραμματισμό κάθε σχολικού οργανισμού.

Η ΣΗΜΑΣΙΑ ΤΟΥ ΚΕΝΤΡΙΚΟΥ ΣΧΕΔΙΑΣΜΟΥ ΚΑΙ ΤΩΝ ΣΤΡΑΤΗΓΙΚΩΝ ΧΩΡΙΣ ΑΠΟΚΛΕΙΣΜΟΥΣ

Για την αντιμετώπιση της ψηφιακής ανισότητας, οι ad hoc ή αποσπασματικές λύσεις είναι ανεπαρκείς. Ο ψηφιακός μετασχηματισμός της εκπαίδευσης απαιτεί ολοκληρωμένες, μακρόπνοες στρατηγικές που συνδυάζουν την ανάπτυξη υποδομών, πολιτικών χωρίς αποκλεισμούς και συστημική μεταρρύθμιση. Ο κεντρικός σχεδιασμός είναι ιδιαίτερα σημαντικός για τη διασφάλιση ότι οι αποφάσεις είναι δίκαιες και βιώσιμες.

Μια πολύπλευρη στρατηγική θα πρέπει να περιλαμβάνει: 1.*Επέκταση Υποδομών:* Οι κυβερνήσεις πρέπει να επενδύσουν στην επέκταση της ευρυζωνικότητας, ειδικά σε αγροτικές και υποεξυπηρετούμενες περιοχές, και να διασφαλίσουν ότι κάθε μαθητής έχει πρόσβαση σε τουλάχιστον μια συσκευή που υποστηρίζει την ψηφιακή εκπαίδευση, 2. *Εκπαίδευση σε Ψηφιακές Δεξιότητες:* Τα σχολεία θα πρέπει να ενσωματώσουν τον ψηφιακό γραμματισμό σε όλα τα προγράμματα σπουδών, ξεκινώντας από τις πρώτες τάξεις φοίτησης και επεκτείνοντας το πλάνο στην εκπαίδευση ενηλίκων και την κατάρτιση των εκπαιδευτικών, 3. *Μοντέλα Χρηματοδότησης με Βάση τα Ίδια Κεφάλαια:* Η εκπαιδευτική χρηματοδότηση πρέπει να αναδιαρθρωθεί για να υποστηρίξει ιδρύματα που εξυπηρετούν ευάλωτες κοινωνικές ομάδες και πληθυσμούς, επιτρέποντας τη δίκαιη ανάπτυξη ψηφιακών πόρων, 4. *Συμπράξεις Δημόσιου-Ιδιωτικού Τομέα:* Η συνεργασία με εταιρείες τεχνολογίας μπορεί να επιταχύνει την ανάπτυξη υποδομών και περιεχομένου, αλλά πρέπει να διέπεται από αυστηρά πρότυπα ποιότητας, ισότητας και προστασίας της ιδιωτικής ζωής, 5. *Συνεχής Παρακολούθηση και Αξιολόγηση:* Οι πολιτικές πρέπει να καθοδηγούνται από δεδομένα, να προσαρμόζονται με βάση την αποτελεσματικότητα, τη συμμετοχικότητα και τις εξελισσόμενες ανάγκες των μαθητών.

Δεδομένου ότι η τεχνολογική πρόοδος υπερβαίνει τα σύνορα, απαιτούνται συντονισμένες παγκόσμιες προσπάθειες για την ανταλλαγή βέλτιστων πρακτικών, την παροχή οικονομικής στήριξης σε χώρες χαμηλού εισοδήματος και την πρόληψη της εμβάθυνσης των παγκόσμιων εκπαιδευτικών ανισοτήτων.

ΣΥΜΠΕΡΑΣΜΑΤΑ

Ο ψηφιακός μετασχηματισμός στην εκπαίδευση παρουσιάζει τόσο πρωτοφανείς ευκαιρίες όσο και σοβαρές προκλήσεις. Από τη μία πλευρά, η τεχνολογία επιτρέπει εξατομικευμένη, προσβάσιμη και κλιμακούμενη μάθηση. Από την άλλη, κινδυνεύει να εδραιώσει τις υφιστάμενες ανισότητες και να δημιουργήσει νέες μορφές αποκλεισμού εάν δεν εφαρμοστεί προσεκτικά.

Αυτή η εργασία διερευνά την πολυπλοκότητα της ψηφιακής ανισότητας στην εκπαίδευση μέσα από πολλαπλές οπτικές: κοινωνικοοικονομικές, γεωγραφικές, δημογραφικές, θεσμικές και καθοδηγούμενες από την εκάστοτε εκπαιδευτική πολιτική. Στο πλαίσιο αυτό, αναδείχτηκε ότι η ψηφιακή πρόσβαση και επιτυχία δεν καθορίζεται μόνο από την παρουσία συσκευών ή συνδέσεων στο διαδίκτυο, αλλά και από τις ψηφιακές δεξιότητες εκπαιδευτών και

εκπαιδευόμενων, την ποιότητα των παιδαγωγικών εργαλείων και τεχνικών, την ηγεσία του σχολικού οργανισμού και τη συνεχή δέσμευση της εκάστοτε πολιτικής ηγεσία.

Για να διασφαλιστεί ότι τα οφέλη του ψηφιακού μετασχηματισμού κατανέμονται δίκαια, πρέπει να υιοθετηθεί μια ολιστική και χωρίς αποκλεισμούς προσέγγιση - μια προσέγγιση που δίνει προτεραιότητα στις υποδομές και την κατάρτιση, διασφαλίζει την ποιότητα της εκπαίδευσης και αντιμετωπίζει τους κοινωνικούς ανασταλτικούς παράγοντες της ψηφιακής επιτυχίας. Καθώς το παγκόσμιο εκπαιδευτικό σύστημα συνεχίζει να εξελίσσεται, η ισότητα πρέπει να παραμείνει στο επίκεντρο των στρατηγικών ψηφιακής εκπαίδευσης. Χωρίς μια τέτοια δράση, ο ψηφιακός μετασχηματισμός μπορεί να γίνει εργαλείο διαστρωμάτωσης και όχι ισότητας.

ΠΕΡΙΛΗΨΗ

Η παρούσα εργασία εστιάζεται στο ψηφιακό χάσμα (ψηφιακός αναλφαβητισμός) και τις ανισότητες που προκύπτουν και αφορά στη θεμελιώδη γνώση που σχετίζεται με τη χρήση του διαδικτύου, τη χρήση ψηφιακών εργαλείων (επεξεργασία κειμένων, αποστολή ηλεκτρονικής αλληλογραφίας κ.λπ.). Σε ένα σύγχρονο περιβάλλον υπέρ-πληροφόρησης και τεχνολογικής επανάστασης με την έλευση του 21ου αιώνα το να μην είναι σε θέση ένα άτομο να χρησιμοποιεί σωστά μια ψηφιακή συσκευή (κινητό) ή να μην μπορεί να χρησιμοποιήσει ένα ηλεκτρονικό υπολογιστή στη καθημερινότητα ακούγεται απίθανο και έρχεται σε σύγκρουση με την κοινή λογική.

Ο ψηφιακός αναλφαβητισμός είναι η αδυναμία του ατόμου να χρησιμοποιήσει την ψηφιακή τεχνολογία και τις δυνατότητες που προσφέρει μέσω των εφαρμογών της στην καθημερινότητα (εργασία, εκπαίδευση, επικοινωνία, γεγονότα που επηρεάζουν και διαμορφώνουν τη ζωή). Η αδυναμία της γνώσης των ψηφιακών τεχνολογιών και δυνατοτήτων επιφέρει σοβαρές συνέπειες σε κοινωνικό και οικονομικό επίπεδο (εκπαίδευση, εργασία, κοινωνική συμμετοχή). Αυτό ως συνέπεια έχει πρακτικό και κοινωνικό αντίκτυπο στο ψηφιακό αναλφάβητο άτομο με τη δημιουργία ανισότητας και μη ίσης αντιμετώπισης σε διάφορες πτυχές της καθημερινότητας του.

Η εργασία μας εστιάζεται στην έρευνα που υλοποιήθηκε στο σχολείο μας (2ο Πειραματικό Λύκειο Λευκάδας «Άγγελος Σικελιανός») κατά την τρέχουσα σχολική χρονιά (2024-2025) στα πλαίσια των δράσεων του ενεργού πολίτη (δράσεις ενίσχυσης της Ενεργού Πολιτειότητας του Ινστιτούτου Εκπαιδευτικής Πολιτικής – ΙΕΠ). Ο σκοπός της δράσης ήταν οι μαθητές/τριες που έχουν αναπτύξει τεχνολογικές δεξιότητες (ως ένα βαθμό) να βοηθήσουν και άλλα άτομα (γονείς, παπούδες , συγγενείς κ.λπ.) να αποκτήσουν βασικές ψηφιακές δεξιότητες (επικοινωνία με τους οικείους του, με δημόσιες υπηρεσίες και τράπεζες), οι οποίες να είναι χρήσιμες για τη ζωή τους. Επίσης οι μαθητές/τριες μέσα από τη διαδικασία της έρευνας να αντιληφθούν και οι ίδιοι / ίδιες τις μορφές, τις αιτίες και τους τρόπους μείωσης των ψηφιακών ανισοτήτων που υπάρχουν (πρόσβαση, επιρροή και δημιουργία σε περιεχόμενο και συμμετοχή, εκπαίδευση , βελτίωση υποδομών, τεχνολογικές πολιτικές).

Η μεθοδολογία της έρευνας στηρίχθηκε στα στάδια της επιλογής συμμετεχόντων από διάφορες κοινωνικές ομάδες (ηλικία, φύλο, περιοχές, οικονομικό επίπεδο, εκπαίδευση) με τη χρήση ερωτηματολογίων (διαδικτυακά ή δια ζώσης) με κλειστές ερωτήσεις, προσωπικών συναντήσεων και ανάλυση των ποσοτικών δεδομένων, καθώς και τη μελέτη δεδομένων από διάφορους οργανισμούς (Unesco, Eurostat) και δημοσίων βάσεων πληροφοριών και τη σύγκριση τους με τη έρευνα των μαθητών. Οι μαθητές/τριες συμμετείχαν σε όλες τις φάσεις υλοποίησης της εργασίας, τον καθορισμό των στόχων της δράσης μέσω της καταγραφής και ανάλυσης της υπάρχουσας κατάστασης, τη συλλογή-ανάλυση των δεδομένων, τη συμμετοχή με εμπλεκόμενους φορείς (δημόσιων αρχών και ιδιωτικού τομέα) και της ευαισθητοποίησης. Τέλος, οι μαθητές / μαθήτριες, στηριζόμενοι στα αποτελέσματα της ανάλυσης των δεδομένων για τη βελτίωση του ψηφιακού γραμματισμού και τη μείωση του ψηφιακού χάσματος διατύπωσαν και κατέγραψαν τις δικές τους προτάσεις.

Η έρευνα υπογραμμίζει τη σημασία της ανάπτυξης ψηφιακών δεξιοτήτων στους μαθητές, καθώς η τεχνολογία αποτελεί πλέον βασικό εργαλείο μάθησης και εξέλιξης. Μπορεί να εξασφαλίσει μια πιο δίκαιη κοινωνία, όπου όλα τα άτομα θα έχουν τα εργαλεία που χρειάζονται για να επιτύχουν σε έναν ψηφιακό κόσμο. Η μείωση των ψηφιακών ανισοτήτων αλλά και ταυτόχρονα η ενίσχυση της ισότιμης πρόσβασης σε ψηφιακές τεχνολογίες και ψηφιακές ευκαιρίες ενισχύει τη κοινωνική συνοχή και καινοτομία σε όλες τις κοινωνικές ομάδες.

Λέξεις–κλειδιά: Ψηφιακός γραμματισμός – αναλφαβητισμός, ψηφιακό χάσμα, ανισότητες στη χρήση της τεχνολογίας, e-skills.

ΕΙΣΑΓΩΓΗ

Η τεχνολογική πρόοδος του 21ου αιώνα έχει επηρεάσει σε βάθος την κοινωνική, εκπαιδευτική και επαγγελματική ζωή. Ωστόσο, η άνιση πρόσβαση και χρήση των τεχνολογιών δημιουργεί ένα νέο είδος κοινωνικής ανισότητας: τις ψηφιακές ανισότητες. Ο ψηφιακός αναλφαβητισμός, δηλαδή η αδυναμία χρήσης βασικών ψηφιακών εργαλείων, αποτελεί σημαντικό εμπόδιο στη συμμετοχή των πολιτών στη σύγχρονη κοινωνία. Η ψηφιακή τεχνολογία εξελίσσεται ραγδαία και επηρεάζει όλους τους τομείς της ανθρώπινης δραστηριότητας: εκπαίδευση, εργασία, επικοινωνία, πολιτική συμμετοχή. Ωστόσο, δεν έχουν όλοι οι πολίτες τις ίδιες δυνατότητες πρόσβασης ή επάρκειας στη χρήση των τεχνολογιών. Η «ψηφιακή ανισότητα» αποτελεί πλέον έναν από τους σημαντικότερους παράγοντες κοινωνικού αποκλεισμού.

ΘΕΩΡΗΤΙΚΟ ΠΛΑΙΣΙΟ

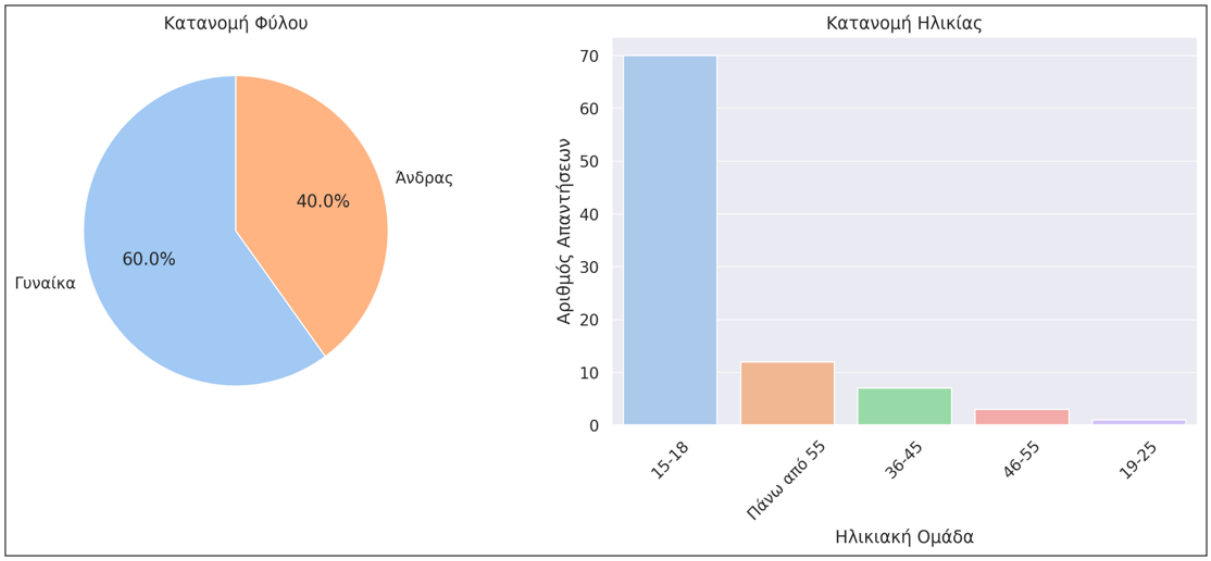
Ο όρος "ψηφιακό χάσμα" (digital divide) περιγράφει την απόσταση μεταξύ εκείνων που έχουν πρόσβαση και γνώσεις στις ψηφιακές τεχνολογίες και εκείνων που στερούνται αυτών. Οι ψηφιακές δεξιότητες (e-skills) είναι πλέον απαραίτητες για την πρόσβαση σε πληροφορίες, την επικοινωνία, την εργασία και την εκπαίδευση. Η έλλειψή τους οδηγεί σε κοινωνικό αποκλεισμό και διεύρυνση των ανισοτήτων. Ο ψηφιακός αναλφαβητισμός αναφέρεται στην αδυναμία χρήσης βασικών ψηφιακών μέσων και εργαλείων (ηλεκτρονικό ταχυδρομείο, πλοήγηση στο διαδίκτυο, χρήση εφαρμογών). Τα αίτια μπορεί να σχετίζονται με το μορφωτικό επίπεδο, την ηλικία, το φύλο, το γεωγραφικό περιβάλλον και το οικονομικό υπόβαθρο. Οι επιπτώσεις εκτείνονται σε κοινωνικό, επαγγελματικό και πολιτικό επίπεδο.

ΜΕΘΟΔΟΛΟΓΙΑ ΕΡΕΥΝΑΣ

Η έρευνα διεξήχθη στο 2ο Πειραματικό Λύκειο Λευκάδας «Άγγελος Σικελιανός» τη σχολική χρονιά 2024–2025, στο πλαίσιο του προγράμματος Ενεργού Πολιτειότητας του ΙΕΠ.

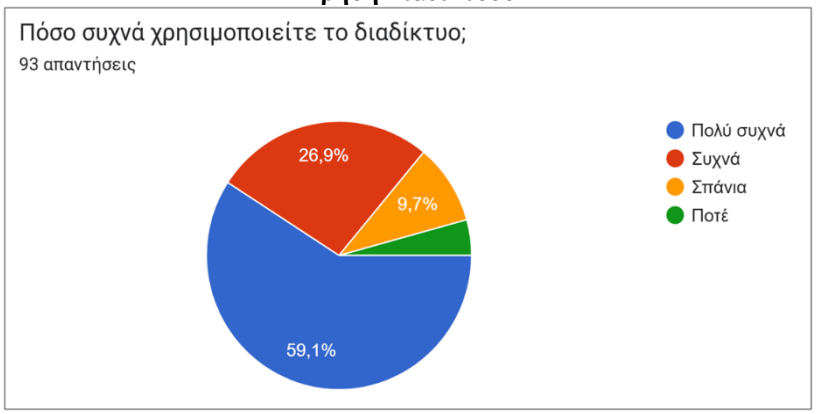
- **Δείγμα:** Μαθητές/τριες Α’, Β’ Λυκείου και ενήλικες (γονείς, παππούδες, συγγενείς).
- **Μέσα συλλογής δεδομένων:** Ερωτηματολόγια (ηλεκτρονικά και έντυπα), προσωπικές συνεντεύξεις, παρατήρηση.
- **Στάδια:**
    1. Καταγραφή υπάρχουσας κατάστασης
    2. Εκπαίδευση μαθητών σε βασικές δεξιότητες διδασκαλίας
    3. Διδασκαλία ενηλίκων από μαθητές
    4. Ανάλυση ποσοτικών και ποιοτικών δεδομένων

Σύνοψη δεδομένων
Μεταβλητές:



- Φύλο: Άνδρας / Γυναίκα
- Ηλικιακή ομάδα: 15-18, 19-25, 36-45, 46-55, Πάνω από 55
- Τύπος δυσκολίας:
- Η έλλειψη βασικών δεξιοτήτων χρήσης ψηφιακών εργαλείων
- Η αδυναμία ανάγνωσης και γραφής στο διαδίκτυο
- Η μη πρόσβαση σε υπολογιστές και ίντερνετ
- Συχνότητα εμφάνισης: Ποτέ, Σπάνια, Συχνά, Πολύ συχνά
- Επίπεδο άνεσης: Καθόλου άνετος/η, Λίγο άνετος/η, Άνετος/η, Πολύ άνετος/η

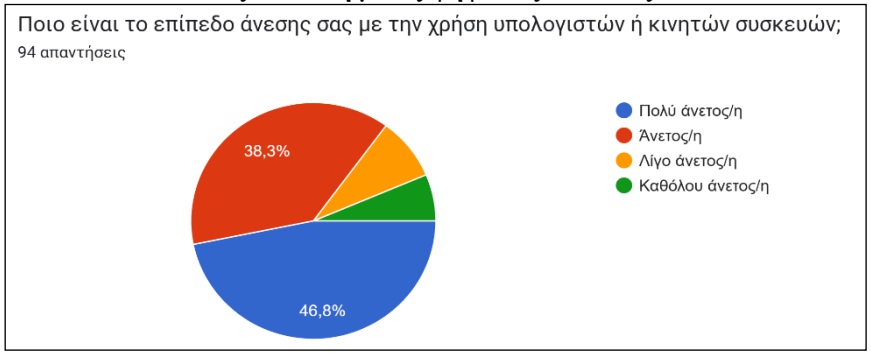
ΑΝΑΛΥΣΗ ΕΡΕΥΝΑΣ



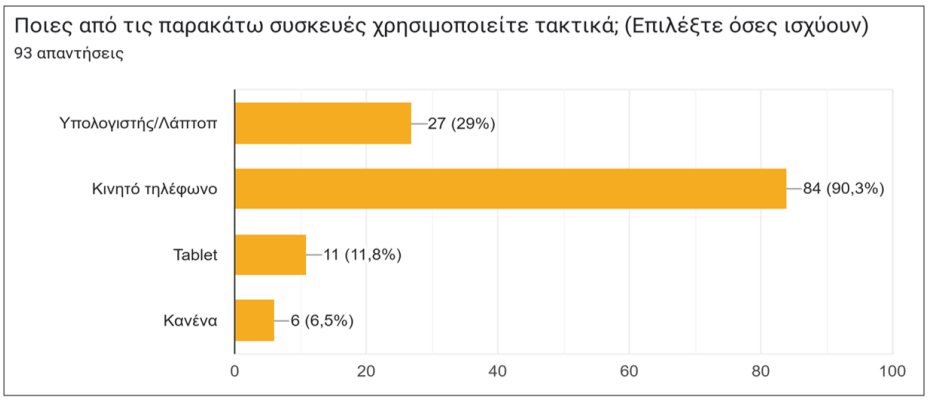
Το ερωτηματολόγιο της έρευνας δημιουργήθηκε για να ανιχνευθούν δεδομένα και πληροφορίες σχετικά με τον **αντίκτυπο του ψηφιακού αναλφαβητισμού στην κοινωνία**, με δημογραφικά στοιχεία (φύλο, ηλικία), απόψεις, και εμπειρίες των συμμετεχόντων.

Δημογραφική Ανάλυση (Εικόνα 5)**:**
Φύλο: Η πλειοψηφία των απαντήσεων προέρχεται από **Γυναίκες**.
Ηλικία: Η πιο συχνή ηλικιακή ομάδα είναι **15-18 ετών**, ενώ υπάρχουν και απαντήσεις από μεγαλύτερες ηλικίες, όπως **άνω των 55**. Το συμπέρασμα είναι ότι το φαινόμενο αφορά **πολλές ηλικιακές ομάδες**, με κυρίαρχη εκπροσώπηση από τη νεολαία.

Εικόνα 6
Δημογραφικά Στοιχεία

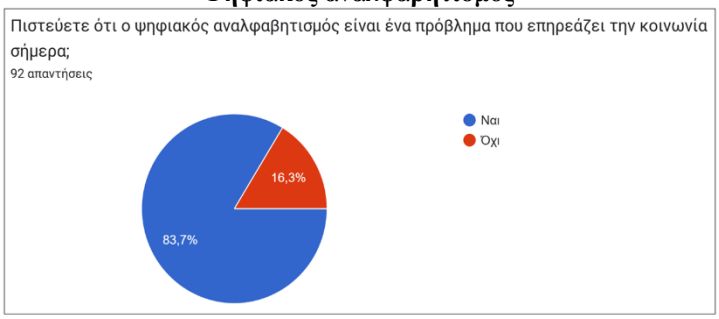


Εικόνα 7
Χρήση Διαδικτύου



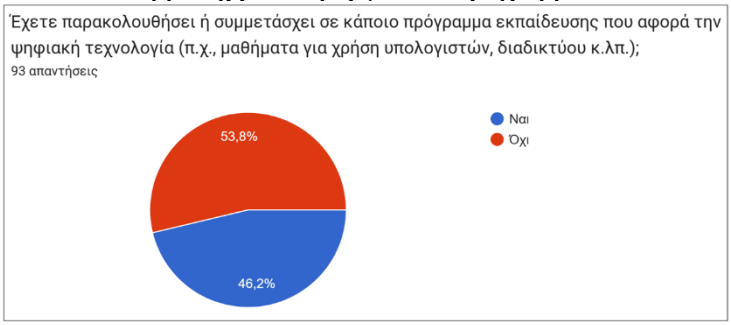
Η πλειοψηφία των συμμετεχόντων δήλωσε ότι χρησιμοποιεί το διαδίκτυο **συχνά** ή **πολύ συχνά**. Λίγοι δήλωσαν **σπάνια** χρήση, κάτι που δείχνει ότι η **ψηφιακή πρόσβαση** είναι γενικά διαδεδομένη και παρά την πρόσβαση, ο ψηφιακός αναλφαβητισμός ενδέχεται να σχετίζεται με **ποιότητα χρήσης**, όχι μόνο με συχνότητα. Το **συ**μπέρασμα είναι ότι η πρόσβαση στο διαδίκτυο είναι **ευρέως διαδεδομένη**, το πρόβλημα του ψηφιακού αναλφαβητισμού **δεν έγκειται στην πρόσβαση**, αλλά στη **χρήση και κατανόηση**.

Εικόνα 8
Εξοικείωση με τις ψηφιακές συσκευές



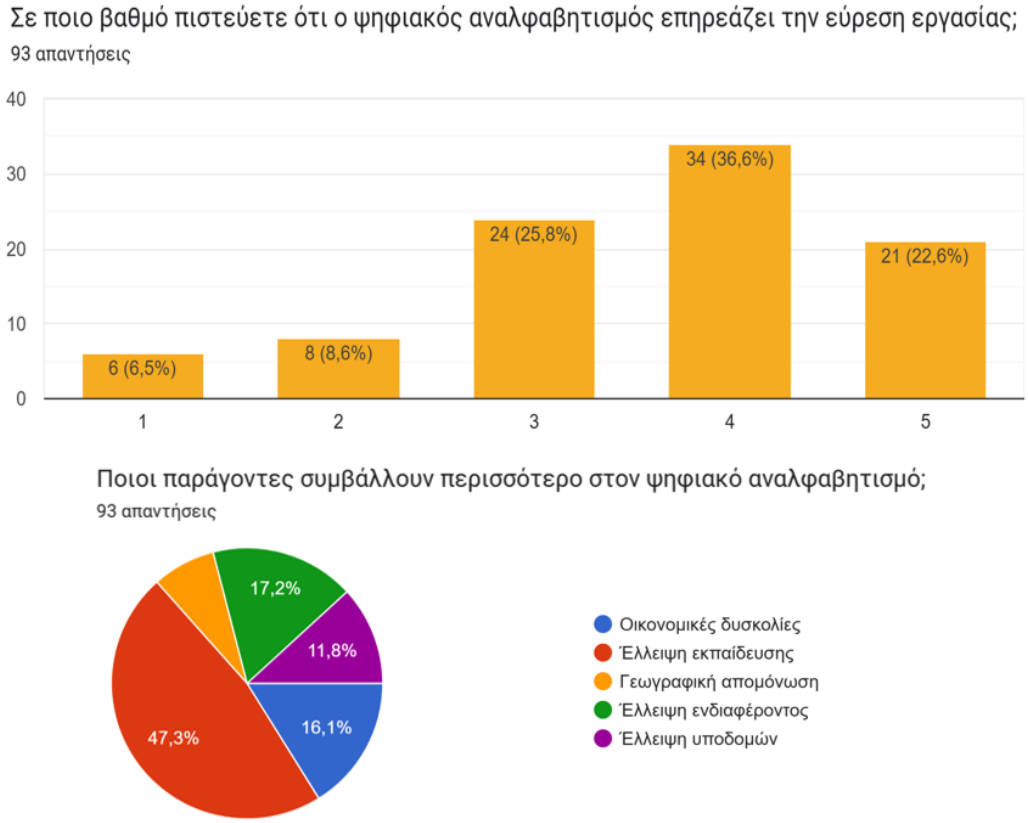
Οι περισσότεροι συμμετέχοντες δήλωσαν ότι νιώθουν **πολύ άνετα** ή **αρκετά άνετα** με τα τεχνολογικά μέσα. Ωστόσο, καταγράφηκε και ένα **ποσοστό που δηλώνει μικρή ή καθόλου άνεση**, ιδιαίτερα σε μεγαλύτερες ηλικίες. Παρά τη συχνή χρήση, **δεν νιώθουν όλοι εξοικειωμένοι** με την τεχνολογία. Υπάρχει **σημαντικό ποσοστό με χαμηλή ψηφιακή αυτοπεποίθηση**, ιδίως σε **μεγαλύτερες ηλικίες**.

Εικόνα 9
Χρήση Ψηφιακής Συσκευής



Το μεγαλύτερο ποσοστό των ερωτηθέντων χρησιμοποιεί το κινητό τηλέφωνο ως ψηφιακή συσκευή για τη διεκπεραίωση διαφόρων αναγκών της καθημερινότητας (επικοινωνία, αναζήτηση πληροφοριών, παραγγελία προϊόντων κλπ). Προφανώς το κινητό τηλέφωνο εξυπηρετεί και προσφέρει τεράστια γκάμα ψηφιακών δυνατότητων με αποτέλεσμα να είναι η πιο δημοφιλής ηλεκτρονική συσκευή. Ακολουθεί **ο φορητός υπολογιστής/υπολογιστής** με ικανοποιητικό ποσοστό, ο οποίος χρησιμοποιείται για εργασίες που απαιτούν αυξημένες υπολογιστικές ανάγκες (σχεδιασμό προϊόντων, αρχιτεκτονικά/μηχανολογικά σχέδια κλπ.).

Εικόνα 10
Ψηφιακός αναλφαβητισμός



Το μεγαλύτερο ποσοστό έχει αντιληφθεί ότι ο ψηφιακός αναλφαβητισμός επηρεάζει άμεσα την καθημερινότητα και το τρόπο αλληλεπίδρασης με τον ιστό της κοινωνίας. Η **τεράστια πλειοψηφία** χρησιμοποιεί καθημερινά ή πολύ συχνά το διαδίκτυο, γεγονός που δείχνει **ευρεία πρόσβαση** στην τεχνολογία. Άρα, το πρόβλημα του ψηφιακού αναλφαβητισμού **δεν σχετίζεται με την πρόσβαση**, αλλά με **τον τρόπο χρήσης και τις δεξιότητες**.

Εικόνα 11
Συμμετοχή σε επιμορφωτικά προγράμματα

Εικόνα 12
Εύρεση εργασίας και παραγοντες ψηφιακού αναφαλβητισμού

Το μεγαλύτερο ποσοστό (36,6%) των ερωτηθέντων θεωρεί ο ψηφιακός αναλφαβητισμός επηρεάζει την εύρεση εργασίας, ενώ ως βασικό παράγοντα του ψηφιακού αναλφαβητισμού αναφέρθηκε **η έλλειψη εκπαίδευσης (σε ποσοστό (47,3%).** Η εύρεση εργασίας πλέον στο παρόν και στο μέλλον θα έχει να κάνει με τις ψηφιακές δεξιότητες που θα διαθέτει κάποιος και που θα μπορεί να αξιοποίησει. Επίσης η έλλειψη εκπαίδευσης είναι το πιο σημαντικό μέρος το οποίο θα πρέπει να βρεθεί λύση ώστε να μην αποκλείονται κοινωνικές ομάδες.

Εικόνα 13
Συνέπειες και προτάσεις

Η έλλειψη εκπαίδευσης στη χρήση ψηφιακών δεξιοτήτων οδηγεί σύμφωνα με το παραπάνω διάγραμμα σε μειωμένες επαγγελματικές ευκαιρίες και προοπτικές αλλά και σε κοινωνική απομόνωση των ανθρώπων. Όπως προκύπτει από την έρευνα, η δημιουργία εκπαιδευτικών προγραμμάτων, δωρεάν μαθημάτων και επιμορφωτικών προγραμμάτων πρέπει να αποτελέσει σημαντική μέριμνα ώστε να μειωθούν οι ψηφιακές ανισότητες και να υπάρξει μια μεγαλύτερη ισορροπία όσον αφορά τις ψηφιακές δεξιότητες των ανθρώπων.

ΑΠΟΤΕΛΕΣΜΑΤΑ

Η πλειονότητα των συμμετεχόντων δήλωσε σημαντική βελτίωση στις βασικές έννοιες των ψηφιακών δεξιοτήτων. Οι μαθητές / μαθήτριες ανέπτυξαν αυξημένη κατανόηση του κοινωνικού ρόλου της τεχνολογίας και της έννοιας της ισότητας στην πρόσβαση. Η σύγκριση με διεθνή δεδομένα ανέδειξε την Ελλάδα ως χώρα με μέτρια ψηφιακή ετοιμότητα, αλλά υψηλό ενδιαφέρον για συμπερίληψη.

- Σημαντικό ποσοστό ενηλίκων (ειδικά μεγαλύτερης ηλικίας) δεν γνώριζε τη χρήση email, ψηφιακών εφαρμογών επικοινωνίας και πρόσβασης σε δημόσιες υπηρεσίες.
- Οι μαθητές / μαθήτριες ανέπτυξαν δεξιότητες συνεργασίας, ενσυναίσθησης και κοινωνικής προσφοράς.
- Οι ενήλικες ανέφεραν βελτίωση στην καθημερινή τους αυτονομία (π.χ. χρήση gov.gr, τραπεζικών συναλλαγών, επικοινωνία με συγγενείς).
- Ο ψηφιακός αναλφαβητισμός δεν είναι απλώς τεχνολογικό, αλλά κοινωνικό ζήτημα.
- Απαιτεί **συντονισμένη δράση** από εκπαίδευση, τοπική αυτοδιοίκηση και κράτος.
- Η εξάλειψή του θα οδηγήσει σε μεγαλύτερη ισότητα, συμμετοχή και ευκαιρίες.

ΣΥΖΗΤΗΣΗ – ΣΥΜΠΕΡΑΣΜΑΤΑ

Η έρευνα ανέδειξε τη σημασία της εκπαίδευσης στον ψηφιακό γραμματισμό, τόσο για τη μείωση του κοινωνικού αποκλεισμού όσο και για την ενίσχυση της διαγενεακής συνεργασίας. Η δράση αυτή προσέφερε ένα πρότυπο εκπαιδευτικής παρέμβασης με πρακτικό και κοινωνικό αντίκτυπο. Η μείωση του ψηφιακού αναλφαβητισμού είναι ζωτικής σημασίας για την ισότιμη κοινωνική συμμετοχή. Η προώθηση του ψηφιακού γραμματισμού συμβάλλει στη δημοκρατική λειτουργία, την καινοτομία και τη συνοχή των κοινωνιών. Τα σχολεία μπορούν να αποτελέσουν κόμβους γνώσης και δράσης για την επίτευξη αυτού του στόχου.

Η εκπαίδευση μπορεί να λειτουργήσει ως βασικός μοχλός για τη γεφύρωση του ψηφιακού χάσματος. Η ενεργός συμμετοχή των μαθητών σε δράσεις κοινωνικής ωφέλειας ενισχύει τη διαγενεακή συνεργασία και προωθεί την έννοια της ψηφιακής υπευθυνότητας. Η ενσωμάτωση παρόμοιων προγραμμάτων σε εθνικό επίπεδο θα μπορούσε να συμβάλει στη μείωση των ανισοτήτων. Η καταπολέμηση του ψηφιακού αναλφαβητισμού δεν είναι μόνο τεχνικό ζήτημα αλλά και κοινωνικό. Η ενίσχυση των ψηφιακών δεξιοτήτων αποτελεί κρίσιμο παράγοντα για την ενδυνάμωση των πολιτών, την κοινωνική συνοχή και την προώθηση της καινοτομίας.

ΠΡΟΤΑΣΕΙΣ – ΠΑΙΔΑΓΩΓΙΚΕΣ ΠΡΟΕΚΤΑΣΕΙΣ

Κύριες Προκλήσεις στη Χρήση της Τεχνολογίας

Οι κύριες προκλήσεις που αντιμετωπίζονται κατά τη χρήση της τεχνολογίας είναι:

- **Κακή σύνδεση στο διαδίκτυο:** Έλλειψη υποδομών.
- **Έλλειψη εκπαίδευσης:** Η βασική πρόκληση για πολλούς.
- **Τεχνικά προβλήματα:** Δυσκολίες που προκύπτουν από τη χρήση της τεχνολογίας.
- **Έλλειψη υποδομών:** Γενικότερο πρόβλημα, εκτός από τη σύνδεση.

Προτεινόμενες Δράσεις για την Ενίσχυση της Ψηφιακής Εκπαίδευσης

Για την ενίσχυση της ψηφιακής εκπαίδευσης στην κοινότητα, προτείνονται:

- **Δωρεάν σεμινάρια/προγράμματα εκμάθησης ψηφιακών δεξιοτήτων:** Για όλες τις ηλικίες.
- **Ενίσχυση της σχολικής εκπαίδευσης στην πληροφορική:** Περισσότερες ώρες, πιο ενδιαφέρον μάθημα.
- **Δημοτικές δράσεις και ενημέρωση:** Ενημερωτικές καμπάνιες και μαθήματα από τους δήμους.
- **Οικονομική υποστήριξη για απόκτηση συσκευών και πρόσβασης στο διαδίκτυο**.
- **Ειδική επιμόρφωση για ηλικιωμένους και ευάλωτες ομάδες**.

Προτάσεις για τη Μείωση του Ψηφιακού Αναλφαβητισμού

Οι προτάσεις για τη μείωση του ψηφιακού αναλφαβητισμού συνοψίζονται σε:

- **Δωρεάν και προσβάσιμα προγράμματα εκπαίδευσης:** Για όλες τις ηλικίες, με έμφαση στους ηλικιωμένους.
- **Ενίσχυση της πληροφορικής στα σχολεία:** Με καλύτερα βιβλία, περισσότερες ώρες και πρακτική εφαρμογή.
- **Κρατικά προγράμματα και επιχορηγήσεις:** Για πρόσβαση στο διαδίκτυο και απόκτηση συσκευών.
- **Ενημερωτικές καμπάνιες:** Για την ευαισθητοποίηση του κοινού.

- **Δημιουργία κινήτρων για εκμάθηση:** Να γίνει η τεχνολογία πιο ενδιαφέρουσα για όλους.
- **Βελτίωση των υποδομών:** Ειδικά σε απομακρυσμένες περιοχές.

Συνοψίζοντας, η έρευνα αναδεικνύει την αναγνώριση του ψηφιακού αναλφαβητισμού ως ένα σοβαρό κοινωνικό πρόβλημα, με πολλαπλές συνέπειες στην καθημερινότητα και την επαγγελματική ζωή. Οι προτάσεις στρέφονται κυρίως προς την ενίσχυση της εκπαίδευσης σε όλες τις ηλικίες, τη βελτίωση των υποδομών και την παροχή κινήτρων για την ψηφιακή ένταξη.

ΠΑΡΑΡΤΗΜΑΤΑ

Ερωτηματολόγιο: Ψηφιακό Χάσμα στην Τρίτη Ηλικία
Σκοπός: Κατανόηση του βαθμού εξοικείωσης και των δυσκολιών που αντιμετωπίζουν οι ηλικιωμένοι με τις ψηφιακές τεχνολογίες.

Μέρος Α: Δημογραφικά Στοιχεία

Ομάδα εργασίας:	**Τμήμα:**
1ο: ……	
2ο: ……	
3ο:	

1. Φύλο:
   ☐ Άνδρας
   ☐ Γυναίκα
   ☐ Άλλο
2. Ηλικία:
   ☐ 60–64
   ☐ 65–69
   ☐ 70–74
   ☐ 75–79
   ☐ 80+
3. Εκπαιδευτικό επίπεδο:
   ☐ Πρωτοβάθμια
   ☐ Δευτεροβάθμια
   ☐ Ανώτερη/Ανώτατη
   ☐ Δεν πήγα σχολείο

Μέρος Β: Πρόσβαση & Χρήση Τεχνολογιών

4. Έχετε στο σπίτι σας: (επιλέξτε όλα όσα ισχύουν)
   ☐ Υπολογιστή (desktop/laptop)
   ☐ Tablet
   ☐ Έξυπνο κινητό (smartphone)
   ☐ Σύνδεση στο διαδίκτυο (Internet)
5. Χρησιμοποιείτε ηλεκτρονικό υπολογιστή ή κινητό τηλέφωνο;
   ☐ Καθημερινά
   ☐ Μερικές φορές την εβδομάδα
   ☐ Σπάνια
   ☐ Ποτέ
6. Χρησιμοποιείτε το διαδίκτυο;
   ☐ Καθόλου
   ☐ Σπάνια
   ☐ Τακτικά
   ☐ Καθημερινά

7. Για ποιους λόγους χρησιμοποιείτε την τεχνολογία; (επιλέξτε όλα όσα ισχύουν)
   ☐ Επικοινωνία με οικογένεια/φίλους (π.χ. Viber, WhatsApp)
   ☐ Ανάγνωση ειδήσεων
   ☐ Πληρωμές/συναλλαγές (e-banking)
   ☐ Ιατρικές υπηρεσίες (π.χ. myHealth, ραντεβού)
   ☐ Ψυχαγωγία (π.χ. YouTube, παιχνίδια)
   ☐ Δεν χρησιμοποιώ
8. Ποια από τις παρακάτω δραστηριότητες έχετε κάνει στο διαδίκτυο; (επιλέξτε όσες ισχύουν)
   ☐ Αναζήτηση πληροφοριών (π.χ. Google)
   ☐ Παρακολούθηση βίντεο (π.χ. YouTube)

☐ Επικοινωνία (Viber, WhatsApp)
☐ Ηλεκτρονικές υπηρεσίες (π.χ. gov.gr, e-banking)
☐ Κανένα από τα παραπάνω

Μέρος Γ: Δυσκολίες & Αντιλήψεις

7. Πόσο άνετα αισθάνεστε με τη χρήση της τεχνολογίας;
   ☐ Πολύ άνετα
   ☐ Αρκετά άνετα
   ☐ Όχι ιδιαίτερα άνετα
   ☐ Καθόλου άνετα
8. Ποιες δυσκολίες αντιμετωπίζετε;
   ☐ Δυσκολία στην κατανόηση της λειτουργίας
   ☐ Φόβος μήπως κάνω λάθος
   ☐ Έλλειψη υποστήριξης από άλλους
   ☐ Οικονομικό κόστος
   ☐ Καμία ιδιαίτερη δυσκολία
9. Θα θέλατε να παρακολουθήσετε κάποιο πρόγραμμα εκμάθησης τεχνολογιών;
   ☐ Ναι
   ☐ Όχι
   ☐ Ίσως, ανάλογα με τον τρόπο και τον τόπο διεξαγωγής
10. Πιστεύετε ότι η τεχνολογία μπορεί να βελτιώσει την ποιότητα ζωής σας;
    ☐ Ναι
    ☐ Όχι
    ☐ Δεν είμαι σίγουρος/η
11. Πιστεύετε ότι οι ψηφιακές δεξιότητες είναι σημαντικές για την καθημερινή ζωή;
    ☐ Ναι
    ☐ Όχι
    ☐ Δεν είμαι σίγουρος/η
12. Θα θέλατε να μάθετε περισσότερα για την τεχνολογία;
    ☐ Ναι
    ☐ Όχι
    ☐ Ίσως

Ανοιχτές Ερωτήσεις

10. Ποιο είναι το μεγαλύτερο εμπόδιο που αντιμετωπίζετε στη χρήση της τεχνολογίας;
    .....
11. Ποια θέματα θα θέλατε να μάθετε καλύτερα;
    .....

ΘΠ5: Ψηφιακός-Οπτικός Γραμματισμός

Η ΕΦΑΡΜΟΓΗ ΤΗΣ ΠΟΛΥΤΡΟΠΙΚΟΤΗΤΑΣ ΣΤΟ ΠΛΑΙΣΙΟ ΤΗΣ ΔΙΔΑΣΚΑΛΙΑΣ ΤΟΥ ΓΛΩΣΣΙΚΟΥ ΜΑΘΗΜΑΤΟΣ: ΜΙΑ ΣΥΣΤΗΜΑΤΙΚΗ ΑΝΑΣΚΟΠΗΣΗ ΤΗΣ ΒΙΒΛΙΟΓΡΑΦΙΑΣ

ΠΕΡΙΛΗΨΗ

Η πολυτροπικότητα θεωρείται μια καινοτόμος προσέγγιση στον τομέα της εκπαίδευσης, καθώς ενσωματώνει ποικιλία σημειωτικών πόρων, με στόχο να ενισχυθεί η μάθηση και η κατανόηση. Η πολυτροπικότητα παρέχει μια πιο ολοκληρωμένη προσέγγιση στη μάθηση, καθώς επιτρέπει στη μαθητική κοινότητα να αλληλεπιδρά με το εκπαιδευτικό υλικό, μέσα από πολλούς και διαφορετικούς τρόπους. Αυτή η μαθησιακή προσέγγιση δεν περιορίζεται μόνο στο γραπτό κείμενο, αλλά επεκτείνεται σε άλλες μορφές αναπαράστασης όπως είναι οι εικόνες και η ψηφιακή τεχνολογία, που αποτελούν αναπόσπαστο κομμάτι του σύγχρονου κόσμου. Μέσω της πολυτροπικότητας οι μαθητές και οι μαθήτριες μπορούν να αναπτύξουν μια βαθύτερη κατανόηση των εννοιών και να βελτιώσουν τις γλωσσικές δεξιότητές τους, ενώ ταυτοχρόνως να καλλιεργήσουν την κριτική σκέψη και τη δημιουργικότητά τους. Σκοπός της παρούσας μελέτης είναι η διερεύνηση της εφαρμογής της πολυτροπικότητας στο μάθημα της γλώσσας στην πρωτοβάθμια εκπαίδευση, μέσα από την ανάπτυξη των επιπτώσεων που επιφέρει στη μαθητική και εκπαιδευτική κοινότητα. Η έρευνα στηρίζεται σε βιβλιογραφική ανασκόπηση, η οποία πραγματοποιήθηκε μέσω της αναζήτησης πρωτογενών πηγών. Το σύνολο των επιλεγμένων πηγών που χρησιμοποιήθηκαν ήταν 33 έρευνες ποιοτικές, ποσοτικές και μικτές. Επιπροσθέτως οι έρευνες έπρεπε να είναι γραμμένες είτε στην ελληνική, είτε στην αγγλική γλώσσα και να έχουν δημοσιευθεί από το 2000 έως το 2025, ενώ οι λέξεις κλειδιά που χρησιμοποιήθηκαν στις μηχανές αναζήτησης έπρεπε να συνδέονται με τον τίτλο ή και το περιεχόμενο της έρευνας. Όσον αφορά τα κριτήρια αποκλεισμού των ερευνών, αποκλείστηκαν όσες πρωτογενείς έρευνες δεν ήταν σχετικές με το ερευνητικό θέμα, δεν είχαν σαφώς καθορισμένο ερευνητικό δείγμα, το δείγμα ήταν περιορισμένο και δεν περιλάμβαναν ποσοτικά ή ποιοτικά δεδομένα. Τα ευρήματα της έρευνας αναδεικνύουν τη θετική επίδραση της πολυτροπικότητας στη διδασκαλία της γλώσσας στην πρωτοβάθμια εκπαίδευση. Η χρήση πολυτροπικών κειμένων και διαδραστικών εργαλείων συμβάλλει σημαντικά στη βελτίωση της αναγνωστικής ικανότητας των μαθητών/-τριών, καθώς επιτρέπει την παρουσίαση πληροφοριών μέσα από διαφορετικούς τρόπους, ενισχύοντας την κατανόηση, την απομνημόνευση και τη διατήρηση της γνώσης. Οι μαθητές και οι μαθήτριες που εκτίθενται σε πολυτροπικά μέσα δείχνουν μεγαλύτερη εμπλοκή και ενδιαφέρον στη γλωσσική διδασκαλία, ενώ παράλληλα αναπτύσσουν την κριτική τους σκέψη μέσα από τη σύνθεση και την ανάλυση των πληροφοριών. Επίσης, η ενσωμάτωση πολυτροπικών στοιχείων στα σχολικά βιβλία, όπως εικόνες, διαδραστικές ιστορίες και εκπαιδευτικά λογισμικά, έχει διαπιστωθεί ότι ενισχύει τη σχέση των μαθητών/-τριών με τα γλωσσικά κείμενα, καθιστώντας τη μάθηση πιο ελκυστική, προσβάσιμη και αποτελεσματική. Παράλληλα, η έρευνα κατέδειξε ότι η εφαρμογή της πολυτροπικότητας παρουσιάζει προκλήσεις. Πολλοί εκπαιδευτικοί δε διαθέτουν την απαραίτητη κατάρτιση στη χρήση πολυτροπικών εργαλείων και λογισμικών, γεγονός που περιορίζει την αποτελεσματική τους εφαρμογή στην τάξη. Επίσης, η έλλειψη υποδομών, η αδυναμία πρόσβασης σε σύγχρονα τεχνολογικά μέσα και ο περιορισμένος χρόνος διδασκαλίας συχνά καθιστούν δύσκολη την ενσωμάτωση πολυτροπικών δραστηριοτήτων. Παρόλα αυτά, η συνεχής τεχνολογική εξέλιξη και οι νέες εκπαιδευτικές πολιτικές δείχνουν ότι η πολυτροπικότητα κερδίζει έδαφος και αναμένεται να διαδραματίσει σημαντικό ρόλο στη μελλοντική διδασκαλία της γλώσσας. Η ανάπτυξη στοχευμένων επιμορφωτικών προγραμμάτων για τους/τις εκπαιδευτικούς, η ενσωμάτωση πολυτροπικών μεθόδων στη διδακτική πράξη και η βελτίωση των πολυτροπικών λογισμικών, θεωρούνται καίρια βήματα για την αποτελεσματική εφαρμογή αυτής της προσέγγισης στην πρωτοβάθμια εκπαίδευση.

Λέξεις κλειδιά: Πολυτροπικότητα, γλωσσική διδασκαλία, πρωτοβάθμια εκπαίδευση.

ΕΙΣΑΓΩΓΗ

Είναι κοινώς αποδεκτό ότι η εκπαιδευτική διαδικασία βρίσκεται σε μια διαρκή εξέλιξη, καθώς προσαρμόζεται στις ανάγκες και τις προκλήσεις του σύγχρονου κόσμου. Μία από τις σημαντικότερες εξελίξεις στον τομέα της εκπαίδευσης είναι η ενσωμάτωση της πολυτροπικότητας, η οποία αναφέρεται στη χρήση πολλαπλών τρόπων επικοινωνίας, όπως ο γραπτός και ο προφορικός λόγος, οι εικόνες, οι ήχοι, τα βίντεο και τα ψηφιακά μέσα (Cope & Kalantzis, 2021). Η πολυτροπικότητα συγκαταλέγεται στους πιο σύγχρονους και πολυσυζητημένους όρους της εκπαιδευτικής κοινότητας, ειδικά σε τομείς όπως η γλωσσική διδασκαλία, καθώς επηρεάζει ουσιαστικά τον τρόπο με τον οποίο οι μαθητές και οι μαθήτριες μαθαίνουν και επικοινωνούν (Kress,2010). Η πολυτροπικότητα παρέχει μια πιο ολοκληρωμένη προσέγγιση στη μάθηση, εφόσον επιτρέπει στη μαθητική κοινότητα να αλληλεπιδρά με το εκπαιδευτικό υλικό, μέσα από πολλούς και διαφορετικούς τρόπους. Αυτή η μαθησιακή προσέγγιση δεν περιορίζεται μόνο στο γραπτό κείμενο, αλλά επεκτείνεται σε άλλες μορφές αναπαράστασης όπως είναι οι εικόνες και η ψηφιακή τεχνολογία, που αποτελούν αναπόσπαστο κομμάτι του σύγχρονου κόσμου (Bezemer & Kress, 2016). Μέσα από την πολυτροπικότητα οι μαθητές/-τριες μπορούν να αναπτύξουν μια βαθύτερη κατανόηση των εννοιών και να βελτιώσουν τις γλωσσικές δεξιότητές τους, ενώ ταυτοχρόνως να καλλιεργήσουν την κριτική σκέψη τη δημιουργικότητά τους (Tomlinson, 2017).

Η πολυτροπικότητα επιδρά βαθιά στον τρόπο με τον οποίο τα άτομα διδάσκονται και μαθαίνουν. Αναλυτικότερα, μέσω της πολυτροπικότητας, αναγνωρίζεται μια πιο ολιστική προσέγγιση όσον αφορά τη μάθηση, καθώς πλέον είναι ευρέως αποδεκτό, ότι οι μαθητές/-τριες δεν μαθαίνουν μόνο μέσω της γλώσσας, αλλά και με τη χρήση άλλων μορφών αναπαράστασης (Cope & Kalantzis, 2009). Πληθώρα ερευνών έχει καταδείξει ότι οι μαθητές/-τριες μπορούν να κατανοούν ένα πολύπλοκο επιστημονικό θέμα καλύτερα, μέσα από συνδυασμό κειμένου και γραφημάτων ή εικόνων (Cope & Kalantzis, 2009; Cope & Kalantzis, 2021; Serafini, 2012). Επιπροσθέτως υποστηρίζεται η διαφοροποίηση της διδασκαλίας μέσω της πολυτροπικότητας, καθώς επιτρέπει στους/στις εκπαιδευτικούς την προσαρμογή των μαθησιακών υλικών και δραστηριοτήτων στις ανάγκες και στα ενδιαφέροντα της μαθητικής κοινότητας (Bezemer & Kress, 2016). Η εφαρμογή της πολυτροπικότητας ωστόσο δεν λαμβάνει χώρα χωρίς προκλήσεις. Η ανάγκη επιμόρφωσης της εκπαιδευτικής κοινότητας, η ανεπάρκεια σε επίπεδο τεχνολογικών υποδομών για αναθεώρηση των εκπαιδευτικών πρακτικών, αποτελούν σημαντικά εμπόδια, τα οποία πρέπει να ξεπεραστούν για την επίτευξη της αποτελεσματικής ενσωμάτωσης των πολυτροπικών δραστηριοτήτων στην εκπαιδευτική πράξη (Walsh, 2010). Ωστόσο παρά τις δυσκολίες εφαρμογής της πολυτροπικότητας οι προοπτικές που επιφέρει στην εκπαίδευση είναι ιδιαίτερα θετικές, μιας και προσφέρει πλούσιες ευκαιρίες για να ενισχυθεί η μαθησιακή εμπειρία για να προωθηθεί μια πιο συνεργατική και δημιουργική εκπαιδευτική κουλτούρα (Jewitt, 2013).

Αντικείμενο της παρούσας μελέτης είναι η διερεύνηση της έννοιας της πολυτροπικότητας και της σημασίας της για τη σύγχρονη εκπαιδευτική διαδικασία, με έμφαση στην πρωτοβάθμια εκπαίδευση και ειδικότερα στο μάθημα της γλώσσας. Μέσω συστηματικής βιβλιογραφικής ανασκόπησης, αναλύονται οι επιπτώσεις της πολυτροπικής διδασκαλίας στο γλωσσικό μάθημα, οι συνέπειες της εφαρμογής της στη μαθητική και εκπαιδευτική κοινότητα, καθώς και οι προκλήσεις που ανακύπτουν από την υιοθέτηση της συγκεκριμένης προσέγγισης. Παράλληλα, εξετάζονται οι προοπτικές για την επιτυχή ενσωμάτωση της πολυτροπικότητας στην εκπαιδευτική πράξη. Η μελέτη επικεντρώνεται στα εξής ερευνητικά ερωτήματα:

1. Ποιες είναι οι επιδράσεις της πολυτροπικής διδασκαλίας στο γλωσσικό μάθημα της πρωτοβάθμιας εκπαίδευσης, τόσο στη μαθητική όσο και στην εκπαιδευτική κοινότητα;
2. Πώς αξιοποιούν οι εκπαιδευτικοί της πρωτοβάθμιας εκπαίδευσης τα πολυτροπικά και ψηφιακά μέσα στη διδασκαλία της γλώσσας και ποιες είναι οι επιπτώσεις αυτής της αξιοποίησης στη μαθησιακή διαδικασία;

Με σκοπό να απαντηθούν τα ερευνητικά ερωτήματα της παρούσας εργασίας, πραγματοποιήθηκε βιβλιογραφική ανασκόπηση στις ηλεκτρονικές βάσεις δεδομένων «Scopus» και «Google Scholar». Η χρονική περίοδος που κάλυψε η αναζήτηση ήταν από το 2000 έως και το 2025.. Χρησιμοποιήθηκαν λέξεις κλειδιά όπως: «Multimodality», «Primary education», «Literacy» και «language lesson». Αρχικά εντοπίστηκαν 446 μελέτες, από τις οποίες επιλέχθηκαν τελικά 33 πρωτογενείς ποσοτικές, ποιοτικές και μεικτές έρευνες, βάσει συγκεκριμένων κριτηρίων ένταξης και αποκλεισμού. Οι μελέτες αυτές αναλύθηκαν για να διαφανούν οι επιδράσεις της πολυτροπικότητας στη γλωσσική διδασκαλία στην πρωτοβάθμια εκπαίδευση, καθώς και οι προκλήσεις που αντιμετωπίζουν οι εκπαιδευτικοί κατά την εφαρμογή της.

ΑΠΟΤΕΛΕΣΜΑΤΑ ΕΡΕΥΝΑΣ

ΠΟΛΥΤΡΟΠΙΚΑ/ΨΗΦΙΑΚΑ ΜΕΣΑ ΠΟΥ ΧΡΗΣΙΜΟΠΟΙΟΥΝ ΟΙ ΕΚΠΑΙΔΕΥΤΙΚΟΙ ΠΡΩΤΟΒΑΘΜΙΑΣ ΕΚΠΑΙΔΕΥΣΗΣ ΚΑΤΑ ΤΗ ΔΙΔΑΣΚΑΛΙΑ ΤΟΥ ΜΑΘΗΜΑΤΟΣ ΤΗΣ ΓΛΩΣΣΑΣ

Η παρούσα έρευνα κατέδειξε ότι οι εκπαιδευτικοί της πρωτοβάθμιας εκπαίδευσης εκτός από τα παραδοσιακά μέσα, όπως είναι το γραπτό κείμενο, χρησιμοποιούν διάφορες πολυτροπικές προσεγγίσεις που διευκολύνουν την ενεργή συμμετοχή των μαθητών/-τριών και την καλλιέργεια των γλωσσικών δεξιοτήτων. Αναλυτικότερα οι εκπαιδευτικοί κάνουν χρήση διαδραστικών λευκών πινάκων (Interactive Whiteboards - IWBs), οι οποίοι τους επιτρέπουν να συνδυάζουν κείμενο, εικόνα, βίντεο ή και ήχο κατά τη διδασκαλία της γλώσσας (Beauchamp & Kennewell, 2010). Οι διαδραστικοί πίνακες ενισχύουν τη συμμετοχή της μαθητικής κοινότητας, παρέχοντάς της έναν ευέλικτο τρόπο παρουσίασης των πολυτροπικών κειμένων. Επίσης οι διαδραστικοί πίνακες επιτρέπουν στους/στις εκπαιδευτικούς να ενισχύουν τη συμμετοχή των μαθητών/-τριών, καθώς τους παρέχουν ένα εργαλείο για τον τρόπο παρουσίασης και διαχείρισης των πολυτροπικών κειμένων (Beauchamp & Kennewell, 2010). Μέσω της χρήσης των διαδραστικών πινάκων οι μαθητές/-τριες δεν είναι απλοί αποδέκτες κάποιας πληροφορίας, αλλά μπορούν να συμμετέχουν ενεργά στη διδασκαλία, μετακινώντας στοιχεία από την οθόνη, απαντώντας σε ερωτήσεις, δημιουργώντας τα δικά τους κείμενα και παρουσιάσεις. Ωστόσο οι εκπαιδευτικοί δεν εκμεταλλεύονται πλήρως τις δυνατότητες των διαδραστικών πινάκων, λόγω της έλλειψης κατάλληλης κατάρτισης και υποστήριξης (Türel, 2010).

Επιπροσθέτως κατά τη διδασκαλία της γλώσσας, γίνεται χρήση από τους/τις εκπαιδευτικούς πληθώρας λογισμικών και εφαρμογών. Οι εκπαιδευτικές εφαρμογές περιλαμβάνουν διαδραστικές ιστορίες ή παιχνίδια λέξεων, τα οποία ενισχύουν την κατανόηση και την χρήση της γλώσσας από τους/τις μαθητές/-τριες (Neumann, 2016). Τα εκπαιδευτικά λογισμικά που σχεδιάζονται για την πρωτοβάθμια εκπαίδευση, εμπεριέχουν διαδραστικές ασκήσεις, παιχνίδια λέξεων ή γλωσσικά στοιχεία που λειτουργούν ενισχυτικά της κατανόησης και της χρήσης της γλώσσας από τους/τις μαθητές/-τριες. Αυτά τα λογισμικά παρέχουν στους/στις μαθητές/-τριες ευκαιρίες για εξατομικευμένη μάθηση, καθώς μαθαίνουν με τον δικό τους ρυθμό και αναπτύσσουν γλωσσικές δεξιότητες μέσω επαναληπτικών των δραστηριοτήτων (Neumann, 2016). Επίσης οι εκπαιδευτικοί κατά τη διδασκαλία τους εφαρμόζουν λογισμικά που περιλαμβάνουν διαδραστικές ιστορίες, επιτρέποντας στους/στις μαθητές/-τριες να αλληλεπιδράσουν με το περιεχόμενο του κειμένου, να επιλέξουν την πορεία της ιστορίας, να συμμετέχουν σε δραστηριότητες που σχετίζονται με αυτό. Αυτές οι εφαρμογές ενισχύουν την κατανόηση της αφήγησης και βοηθούν τους/τις μαθητές/-τριες να αναπτύξουν κριτική σκέψη και να λάβουν αποφάσεις που επηρεάζουν την εξέλιξη της ιστορίας (Neumann, 2016).

Αντιστοίχως στο μάθημα της γλώσσας οι εκπαιδευτικοί εφαρμόζουν πολυτροπικά παιχνίδια, όπως σταυρόλεξα και αναγραμματισμούς, τα οποία θεωρούνται ιδιαίτερα αποτελεσματικά για την εκμάθηση λεξιλογίου. Τα προαναφερόμενα παιχνίδια δεν είναι μόνο διασκεδαστικά, αλλά θεωρούνται εξαιρετικά χρήσιμα για την επανάληψη και την ενίσχυση της ορθογραφίας, της σημασίας και της χρήσης των λέξεων. Μέσα από την επίλυση γλωσσικων προβλημάτων και την πρόκληση του νου, οι μαθητές/-τριες μπορούν να βελτιώσουν τις γλωσσικές δεξιότητές τους με έναν ενθαρρυντικό και ελκυστικό τρόπο (Wu et al., 2013). Συνάμα, τα βίντεο και οι πολυμεσικές παρουσιάσεις χρησιμοποιούνται ευρέως για να εμπλουτιστεί η διδασκαλία των γλωσσικών εννοιών. Η χρήση πολυτροπικών εργαλείων μπορεί να βοηθήσει τους/τις μαθητές/-τριες να συνδέσουν το γραπτό κείμενο με οπτικά και ακουστικά ερεθίσματα, ενισχύοντας την πολυτροπική του κατανόηση, ειδικότερα όταν πρόκειται για τη διδασκαλία σύνθετων γλωσσικών εννοιών. Οι εκπαιδευτικοί χρησιμοποιούν τα βίντεο καθώς τους/τις επιτρέπουν να παρέχουν στους/στις μαθητές/-τριες συνδυασμό πληροφοριών μέσα από πολλά αισθητηριακά κανάλια, διευκολύνοντας την κατανόηση και τη διατήρηση των πληροφοριών αυτών. Τα βίντεο επιτρέπουν στους/στις μαθητές/-τριες να επεξεργάζονται πληροφορίες μέσω διαφορετικών καναλιών, περιορίζοντας την πιθανότητα υπερφόρτωσης ενός συγκεκριμένου καναλιού, όπως είναι για παράδειγμα ο γραπτός λόγος, με αποτέλεσμα να παρεμποδίζεται η γνωστική υπερφόρτωση του/της μαθητή/-τριας (Dalton, 2012). Τα βίντεο δημιουργούν ένα πλούσιο πλαίσιο (context) για τη γλωσσική μάθηση, αφού παρουσιάζουν ρεαλιστικά σενάρια και πολιτισμικά παραδείγματα, συνθήκη που επιτρέπει στους/στις μαθητές/-τριες να βιώνουν τη γλώσσα σε πραγματικά περιβάλλοντα, ενισχύοντας την κατανόηση της πρακτικής εφαρμογής της και προάγοντας την πολιτισμική συνείδηση (Dalton, 2012).

Αντιστοίχως οι πολύμεσικές παρουσιάσεις χρησιμοποιούνται από τους/τις εκπαιδευτικούς, γιατί τους/τις επιτρέπουν να ενσωματώνουν διάφορα μέσα σε μια ενιαία παρουσίαση. Ο συνδυασμός κειμένου, εικόνας και ήχου, ενισχύει την γλωσσική ανάπτυξη των μαθητών/-τριών και διευκολύνει την κατανόηση και την απομνημόνευση των πληροφοριών. Παράλληλα οι πολυμεσικές παρουσιάσεις παρέχουν ευέλικτο πλαίσιο διδασκαλίας, επιτρέποντας στους/στις εκπαιδευτικούς να προσαρμόζονται εύκολα στις ανάγκες των μαθητών/-τριών, ενισχύοντας παράλληλα τη διαφοροποιημένη μάθηση. Ομοίως οι πολυμεσικές παρουσιάσεις περιλαμβάνουν δραστηριότητες όπως τα κουΐζ, οι

ερωτήσεις πολλαπλής επιλογής και δραστηριότητες αντιστοίχισης, οι οποίες επιτρέπουν στους/στις μαθητές/-τριες να συμμετέχουν ενεργά στη μάθηση της γλώσσας (Wu et al., 2013).

Οι εκπαιδευτικοί επίσης στο πλαίσιο της διδασκαλίας τους κάνουν χρήση ψηφιακών βιβλίων και e-books, τα οποία επιτρέπουν στους/στις μαθητές/-τριες να αλληλεπιδρούν με το κείμενο με νέους τρόπους. Για παράδειγμα οι μαθητές/-τριες χρησιμοποιώντας ψηφιακά βιβλία μπορούν να ακούσουν το κείμενο, να το διαβάσουν ή να βλέπουν κινούμενες εικόνες που συνοδεύουν την αφήγηση (Hutchison, Beschorner & Schmidt-Crawford, 2012). Τα ψηφιακά βιβλία χρησιμοποιούνται καθώς αυτά περιλαμβάνουν πολυτροπικά στοιχεία όπως είναι για παράδειγμα οι υπερσυνδέσεις, λεξικά και σημειώσεις, που οι μαθητές/-τριες μπορούν να χρησιμοποιήσουν, ώστε να εμβαθύνουν και να κατανοήσουν το κείμενο. Η προαναφερόμενη αλληλεπίδραση βοηθά τους/τις μαθητές/-τριες να συνδέσουν νέες πληροφορίες με προϋπάρχουσες γνώσεις, διευκολύνοντας την κριτική σκέψη και την κατανόηση σε βάθος, κάτι που βοηθά ιδιαίτερα το έργο των εκπαιδευτικών (Larson, 2010).

Αντιστοίχως η χρήση των e-books από την πλευρά των εκπαιδευτικών, συμβάλλει ώστε οι μαθητές/-τριες να αποφασίσουν τον ρυθμό και τη διδασκαλία της μάθησης τους. Οι μαθητές/-τριες μπορούν να επιστρέψουν σε προηγούμενες σελίδες, να επαναλαμβάνουν την ακρόαση ενός τμήματος του βιβλίου, να διαβάσουν πιο γρήγορα ή πιο αργά, αναλόγως του επιπέδου κατανόησης και των ενδιαφερόντων τους. Σύμφωνα με έρευνα που πραγματοποιήθηκε διαπιστώθηκε ότι αυτή η μορφή μάθησης προάγει την αυτονομία των μαθητών/-τριών και αυξάνει την αίσθηση ελέγχου στη μαθησιακή διαδικασία. Ωστόσο πρέπει να επισημανθεί ότι η χρήση των ψηφιακών βιβλίων και των e-books από την πλευρά των εκπαιδευτικών, τους/τις φέρνει αντιμέτωπους με ορισμένες προκλήσεις, με σημαντικότερη όλων, την εξασφάλιση ισότιμης πρόσβασης όλων των μαθητών/-τριών σε ψηφιακές συσκευές και πόρους, καθώς και την ανάγκη για κατάλληλη εκπαίδευση στη χρήση αυτών των εργαλείων. Οι εκπαιδευτικοί επίσης πρέπει να είναι κατάλληλα προετοιμασμένοι να ενσωματώνουν τα ψηφιακά βιβλία με τέτοιο τρόπο που να ενισχύει την εκπαιδευτική διαδικασία και όχι απλώς να αντικαθιστούν τα παραδοσιακά μέσα διδασκαλίας (Larson, 2015).

Οι πλατφόρμες όπως είναι το Google Classroom ή το Edmodo χρησιμοποιούνται στο πλαίσιο της προώθησης της συνεργατικής μάθησης στην πρωτοβάθμια εκπαίδευση, καθώς οι μαθητές/-τριες μπορούν να συμμετέχουν σε συζητήσεις, να μοιράζονται κείμενα και εικόνες και να συνεργάζονται κατά την πραγματοποίηση έργων. Η χρήση των κοινωνικών δικτύων στη γλωσσική διδασκαλία, ενισχύει την αλληλεπίδραση μεταξύ μαθητών/-τριών και προάγει την ανάπτυξη των γλωσσικών δεξιοτήτων τους (Greenhow & Lewin, 2016). Αντιστοίχως οι εκπαιδευτικοί χρησιμοποιούν τις προαναφερόμενες πλατφόρμες, προκειμένου να ενισχύουν τη συνεργατική μάθηση, η οποία επιτρέπει στους/στις μαθητές/-τριες να αναπτύσσουν γλωσσικές δεξιότητες με ποικίλους τρόπους. Παραδείγματος χάρη οι μαθητές/-τριες μπορούν να γράφουν και να διορθώνουν κείμενα μαζί, να συζητούν ζητήματα που αφορούν τη γλώσσα και τη γραμματική μέσω forum και να παρουσιάζουν τα έργα τους ομαδικά. Η παραπάνω μορφή συνεργατικής δραστηριότητας, ενισχύει όχι μόνο τις γραπτές, αλλά και τις προφορικές δεξιότητες των μαθητών/-τριών, ενισχύοντας παράλληλα την αυτοπεποίθησή τους στη χρήση της γλώσσας (Greenhow & Lewin, 2016; Mills & Chandra, 2011). Αντιστοίχως οι εκπαιδευτικοί έχουν τη δυνατότητα να παρέχουν άμεση αξιολόγηση στους/στις μαθητές/-τριες και να βελτιώνουν τις γλωσσικές δεξιότητές τους σε πραγματικό χρόνο (Chen, Lambert, & Guidry, 2010). Ωστόσο και σε αυτή την περίπτωση η κύρια πρόκληση που αντιμετωπίζουν οι εκπαιδευτικοί κατά την εφαρμογή των εκπαιδευτικών πλατφορμών είναι η κατάλληλη κατάρτιση, ώστε να μπορούν να αξιοποιήσουν πλήρως τις δυνατότητες αυτών των εργαλείων, όπως επίσης απαιτείται η διασφάλιση ότι όλοι οι μαθητές/-τριες έχουν πρόσβαση στις απαραίτητες τεχνολογίες και στο διαδίκτυο για να συμμετέχουν ισότιμα στις δραστηριότητες (Ertmer & Ottenbreit-Leftwich, 2010). Παρά ωστόσο τις προκλήσεις, οι εκπαιδευτικές πλατφόρμες παρέχουν τεράστιες προοπτικές για τη βελτίωση της γλωσσικής διδασκαλίας και μάθησης, ιδιαίτερα σε ένα περιβάλλον που απαιτεί διαρκή αλληλεπίδραση και συνεργασία (Greenhow & Lewin, 2016).

ΤΡΟΠΟΙ ΧΡΗΣΗΣ ΤΩΝ ΠΟΛΥΤΡΟΠΙΚΩΝ-ΨΗΦΙΑΚΩΝ ΜΕΣΩΝ ΑΠΟ ΤΟΥΣ ΕΚΠΑΙΔΕΥΤΙΚΟΥΣ ΠΡΩΤΟΒΑΘΜΙΑΣ ΕΚΠΑΙΔΕΥΣΗΣ

Η χρήση πολυτροπικών και ψηφιακών μέσων στη διδασκαλία του μαθήματος της γλώσσας στην πρωτοβάθμια εκπαίδευση, έχει μεταβάλλει πραγματικά τον τρόπο με τον οποίο οι εκπαιδευτικοί προσεγγίζουν τη μάθηση. Τα πολυτροπικά και ψηφιακά μέσα παρέχουν πληθώρα πόρων και τρόπων (modes), που μπορούν να χρησιμοποιήσουν οι εκπαιδευτικοί για να ενισχύσουν την κατανόηση, την αφομοίωση της νέας γνώσης και την κριτική σκέψη των μαθητών/-τριών (Chen, Lambert, & Guidry, 2010). Αναλυτικότερα οι εκπαιδευτικοί όπως επισημάνθηκε, χρησιμοποιούν εικόνες και βίντεο για την ενίσχυση και την κατανόηση των μαθητών/-τριών σχετικά με ένα κειμένο. Για παράδειγμα πριν την ανάγνωση ενός κειμένου είναι σύνηθες οι εκπαιδευτικοί να παρουσιάζουν ένα σύντομο βίντεο που σχετίζεται με το θέμα του κειμένου, ώστε να αναπτύξουν οι μαθητές/-τριες αναπαραστάσεις και να κατανοήσουν το περιεχόμενο του κειμένου (Larson, 2015). Αντιστοίχως μέσω της χρήσης των διαδραστικών λογισμικών, οι εκπαιδευτικοί επιτρέπουν στους/στις μαθητές/-τριες να αλληλεπιδρούν με το κείμενο, εμπλεκόμενοι σε δραστηριότητες όπως είναι η αντιστοίχιση εικόνων με

λέξεις ή η τοποθέτηση γεγονότων στη σωστή χρονική σειρά. Τα προαναφερόμενα εργαλεία λειτουργούν υποστηρικτικά της γλωσσικής κατανόησης, ειδικότερα για τους/τις μαθητές/-τριες που παρουσιάζουν δυσκολίες ανάγνωσης ή προτιμούν διαφορετικούς τρόπους μάθησης (Beauchamp & Kennewell, 2010).

Στην προσπάθεια για αφόρμηση και κέντρισμα του ενδιαφέροντος, οι εκπαιδευτικοί κάνουν χρήση ψηφιακό κόμικς και διαδραστικών ιστοριών, τα οποία χρησιμοποιούνται συχνά για τη διδασκαλία των γλωσσικών εννοιών. Μέσω των προαναφερόμενων, οι εκπαιδευτικοί επιτρέπουν στους/στις μαθητές/-τριες να βλέπουν τη γλώσσα σε χρήση, εντός ενός ενδιαφέροντος και διαδραστικού πλαισίου, στοιχεία που κεντρίζουν το ενδιαφέρον τούς μέσα από την αφήγηση και τα οπτικά στοιχεία που χρησιμοποιούν (Walsh, 2015). Παράλληλα τα εκπαιδευτικά βιβλία και παιχνίδια που ενσωματώνουν λέξεις και φράσεις σχετικές με τη γλώσσα, χρησιμοποιούνται από τους εκπαιδευτικούς για να προσεγγίζουν τους/τις μαθητές/-τριες και να τους/τις ενθαρρύνουν, να εξερευνήσουν το γλωσσικό περιεχόμενο με ένα διασκεδαστικό τρόπο (Neumann, 2016). Στην προσπάθεια εφαρμογής της νέας γνώσης μέσω της πολυτροπικότητας, οι εκπαιδευτικοί δημιουργούν ψηφιακές παρουσιάσεις όπως προαναφέρθηκε, προκειμένου να αναπαραστήσουν το νέο γνωστικό κεφάλαιο. Οι παρουσιάσεις αυτές περιλαμβάνουν κείμενο, εικόνες, βίντεο και ήχο, θέλοντας με αυτό τον τρόπο η μαθητική κοινότητα να χρησιμοποιήσει ποικίλα μέσα έκφρασης των ιδεών της (Rowsell & Walsh, 2011). Παράλληλα οι εκπαιδευτικοί προάγουν τη συγγραφή από την πλευρά των μαθητών/-τριών παρουσιάσεων και ιστοριών, οι οποίες τους επιτρέπουν να εφαρμόσουν με δημιουργικό τρόπο τη νέα γνώση. Αυτές οι δραστηριότητες προωθούν τη συνεργατική μάθηση και την εμπλοκή των μαθητών/-τριών σε ένα διαδραστικό περιβάλλον μέσω κειμένου, εικόνας και ήχου (Larson, 2015).

Η αξιολόγηση και η ανατροφοδότηση μέσω της χρήσης πλατφορμών αξιολόγησης και διαδραστικών κουίζ, αποτελούν ακόμη τρόπους προώθησης της πολυτροπικότητας στην πρωτοβάθμια εκπαίδευση. Οι εκπαιδευτικοί χρησιμοποιούν τα προαναφερόμενα εργαλεία προκειμένου να αξιολογήσουν το επίπεδο κατανόησης των μαθητών/-τριών σε πραγματικό χρόνο, προσφέροντας τους άμεση τροφοδότηση μετά την ολοκλήρωση των δραστηριοτήτων (Greenhow & Lewin, 2016). Συνάμα στο πλαίσιο της αξιολόγησης και της ανατροφοδότησης της μαθητικής κοινότητας προάγεται η χρήση εργαλείων συνεργατικής μάθησης (π.χ. Google Classroom), τα οποία παρέχουν τη δυνατότητα στους/στις εκπαιδευτικούς να προβαίνουν σε αναθέσεις εργασιών, σε συλλογή εργασιών και σε ηλεκτρονική ανατροφοδότηση. Οι μαθητές/-τριες από την πλευρά τους μπορούν να υποβάλλουν εργασίες που περιλαμβάνουν κείμενο, εικόνες και βίντεο, παρέχοντας στους/στις εκπαιδευτικούς μια πλήρη εικόνα των γλωσσικών ικανοτήτων τους (Hutchison, Beschorner & Schmidt-Crawford, 2012).

Τέλος η ανάπτυξη της κριτικής σκέψης των μαθητών/-τριών προάγεται από την πλευρά των εκπαιδευτικών μέσω της ανάλυσης πολυτροπικών κειμένων, της δημιουργίας και της ανάλυσης ψηφιακών έργων. Πιο συγκεκριμένα, οι εκπαιδευτικοί ενθαρρύνουν τους/τις μαθητές/-τριες να αναλύουν πολυτροπικά κείμενα όπως διαφημίσεις, αφίσες ή ιστοσελίδες, αναζητώντας τους τρόπους με τους οποίους τα διάφορα μέσα επικοινωνίας αλληλεπιδρούν, για να δημιουργήσουν νόημα. Μέσω τον προαναφερόμενων, οι μαθητές/-τριες αναπτύσσουν την κριτική σκέψη και την ικανότητα ερμηνείας πολυτροπικών αναπαραστάσεων (Jewitt, 2013). Ολοκληρώνοντας, οι εκπαιδευτικοί δημιουργούν ψηφιακά έργα όπως blogs, βίντεο ή αφίσες, τα οποία επιτρέπουν στους/στις μαθητές/-τριες να εφαρμόσουν την κριτική σκέψη και να συνθέσουν πολυτροπικά κείμενα. Οι εκπαιδευτικοί καθοδηγούν τους/τις μαθητές/-τριες στην ανάλυση των επιλογών τους και των επιπτώσεων που έχουν αυτές στην επικοινωνία του μηνύματος (Larson, 2015).

ΕΠΙΠΤΩΣΕΙΣ ΤΗΣ ΠΟΛΥΤΡΟΠΙΚΟΤΗΤΑΣ ΣΤΗ ΜΑΘΗΤΙΚΗ ΚΟΙΝΟΤΗΤΑ

Συνοψίζοντας διαπιστώθηκε ότι τα πολυτροπικά κείμενα που συνδυάζουν διαφορετικούς τρόπους επικοινωνίας (κείμενο, εικόνα και ήχο), συμβάλουν στον εμπλουτισμό του γλωσσικού μαθήματος και στην καλύτερη κατανόηση (Nelson & Johnson, 2014; Malini, & Saundravalli, 2016) και ανάπτυξη της κριτικής σκέψης των μαθητών/-τριών. Η πολυτροπικότητα ενισχύει τη διδασκαλία του μαθήματος της γλώσσας στην πρωτοβάθμια εκπαίδευση και βοηθά ώστε αυτό να γίνει περισσότερο ενδιαφέρον και προσιτό (Fterniati, 2011; Bao, 2017; Handayani, 2018), με αποτέλεσμα να είναι περισσότερο προσηλωμένοι και πρόθυμοι να εμπλακούν ενεργά στην ανάγνωση (Bao, 2017). Επίσης η επεξεργασία των πολυτροπικών κειμένων κατά τη διδασκαλία του μαθήματος, παρέχει πολλαπλά οφέλη στους/στις μαθητές/-τριες, καθώς αυτοί ενισχύουν την κατανόηση της γλώσσας, προωθείται η δημιουργική έκφραση (Dahlström, 2016), αναπτύσσεται η πολυτροπική γραμματική ικανότητα και η δημιουργικότητα (Nelson & Johnson, 2014; Bao, 2017).

Αντιστοίχως η επιτυχής ενσωμάτωση της πολυτροπικότητας στα εκπαιδευτικά λογισμικά μπορεί να συμβάλει σημαντικά στην ανάπτυξη του πολύγραμματισμού στους/στις μαθητές/-τριες. Η ανάπτυξη αυτή θεωρείται ιδιαίτερα κρίσιμη, καθώς η μαθητική κοινότητα καλείται να λειτουργήσει σε ένα παγκόσμιο περιβάλλον, στο οποίο η επικοινωνία δεν περιορίζεται μόνο στο γραπτό ή προφορικό λόγο, αλλά περιλαμβάνει και πολυτροπικές μορφές (Fterniati & Trokalli, 2020). Έχει διαπιστωθεί ερευνητικά ότι οι μαθητές/-τριες που εκτίθεται σε πολυτροπικά κείμενα, παρουσιάζουν

σημαντικά καλύτερη κατανόηση και κατακτούν πληρέστερα τη δεξιότητα της ανάγνωσης, σε σύγκριση με όσους εκτίθενται μόνο σε παραδοσιακές μεθόδους διδασκαλίας στο μάθημα της γλώσσας (Baharani και Ghafournia, 2015; Bao, 2017; Ganapathy, 2016; Theodotou, 2019). Η χρήση πολυτροπικών μέσων όπως εικόνων, βίντεο, ήχου, βοηθούν τους/τις μαθητές/-τριες να κατανοήσουν καλύτερα το περιεχόμενο και το πλαίσιο του κείμενου με το οποίο έρχονται σε επαφή, καθιστώντας την ανάγνωση μια πιο ολοκληρωμένη και εμπλουτισμένη εμπειρία (Nelson & Johnson, 2014; Bao, 2017; Ganapathy, 2016). Ακόμη και η απλή χρήση των εικόνων που εμπεριέχονται σε πολυτροπικά κείμενα, ενθαρρύνει τις συζητήσεις στην τάξη, ενώ αντιστοίχως η χρήση σύνθετων οπτικών αφηγήσεων, εμπλέκει τους/τις μαθητές/-τριες σε δημιουργικές δραστηριότητες, με τις εικόνες να παρέχουν ποικίλες ευκαιρίες για εμπλουτισμό της μαθησιακής εμπειρίας (Ganapathy, 2016).

Οι μαθητές/-τριες της πρωτοβάθμιας εκπαίδευσης που εμπλέκονται σε πολυτροπικές δραστηριότητες, μπορούν να συνδέσουν τον γλωσσικό μάθημα με τις εμπειρίες τους από τον πραγματικό κόσμο. Μέσω της πολυτροπικότητας, οι μαθητές/-τριες μπορούν να διαπιστώσουν πως τα διάφορα επικοινωνιακά μέσα αλληλοσυμπληρώνονται και να αναπτύξουν δεξιότητες που τους είναι απαραίτητες να έχουν, στον πολυδιάστατο κόσμο της επικοινωνίας (Fterniati, 2011). Συνάμα διαπιστώθηκε ο καταλυτικός ο ρόλος της εικόνας στα γλωσσικά κείμενα της πρωτοβάθμιας εκπαίδευσης, εφόσον η εικόνα όχι μόνο υποστηρίζει την κατανόηση των κειμένων από τους/τις μαθητές/-τριες, αλλά τους βοηθά να διαμορφώσουν την αισθητική αντίληψη τους και να ενισχύσουν τη συναισθηματική εμπλοκή τους με τα κείμενα (Malini & Saundravalli, 2016; Draina, 2020).

Οι πολυτροπικές μεταφορές κειμένου βοηθούν επίσης στην ανάπτυξη της κριτικής σκέψης των μαθητών/-τριών, αφού εκτίθενται σε πολλαπλούς τρόπους αναπαράστασης, με συνέπεια να ενθαρρύνονται να αναλύσουν και να συνθέσουν πληροφορίες από διαφορετικές πηγές, βελτιώνοντας έτσι την κριτική τους ικανότητα (Baharani & Ghafourni, 2015; Bao, 2017; Ganapathy, 2016). Αντιστοίχως έχει διαπιστωθεί, ότι η πολυτροπικότητα προάγει την ικανότητα των μαθητών/-τριών να εξετάζουν πληροφορίες από διαφορετικές οπτικές γωνίες και να αναλύουν τα κείμενα σύμφωνα με τις αναπαραστάσεις του περιεχομένου τους (Bao, 2017). Παράλληλα ενισχύεται αυτή η δεξιότητα των μαθητών/-τριών καθώς χρησιμοποιούν ποικίλες μορφές αναπαράστασης για να δημιουργήσουν και να παράγουν πολυδιάστατες αφηγήσεις. Η παραπάνω δυνατότητα επιτρέπει στους/στις μαθητές/-τριες να εκφράζουν τις ιδέες τους με δημιουργικότερους και αυθεντικότερους τρόπους (Nelson, & Johnson, 2014; Dahlström, 2016).

Συνάμα οι μαθητές/-τριες που εμπλέκονται σε πολυτροπικές δραστηριότητες ενθαρρύνονται να σκέφτονται πέρα από το παραδοσιακό γραπτό κείμενο, αφού έρχονται σε επαφή με οπτικά, ακουστικά και κινητικά στοιχεία κατά τη διάρκεια των αφηγήσεων (Dahlström, 2016). Ομοίως μέσω της πολυτροπικότητας ενισχύεται η συνεργασία μεταξύ των μαθητών/-τριών, καθώς συνεργάζονται για να συνδυάσουν διαφορετικά μέσα και να αναπτύξουν νέες αφηγήσεις. Στο πλαίσιο αυτής της συνεργασίας τα πολυτροπικά κείμενα συμβάλλουν στην κοινωνική μάθηση και στην καλλιέργεια των διαπροσωπικών δεξιοτήτων των μαθητών/-τριών (Dahlström, 2016; Theodotou, 2019). Επίσης κατά την εμπλοκή τους σε πολυτροπικές προσεγγίσεις οι μαθητές/-τριες έχουν την ευκαιρία να χρησιμοποιήσουν ψηφιακά μέσα, γεγονός που ενισχύει όχι μόνο τις γλωσσικές δεξιότητές τους, αλλά και τους εξοικειώνει με τις ψηφιακές τεχνολογίες που είναι απαραίτητες στον σύγχρονο κόσμο (Ganapathy, 2016; Malini, & Saundravalli, 2016). Εκτός από την καλλιέργεια των προαναφερόμενων δεξιοτήτων τα πολυτροπικά κείμενα συμβάλλουν στην ενίσχυση της πολιτισμικής κατανόησης των μαθητών/τριών. Ειδικότερα οι μαθητές/-τριες της πρωτοβάθμιας εκπαίδευσης μέσω της εικόνας, μπορούν να κατανοήσουν πολιτισμικά στοιχεία, τα οποία είναι ιδιαίτερα δύσκολο να μεταδοθούν μόνο με το γραπτό ή τον προφορικό λόγο. Αυτή η δυνατότητα καθιστά την εικόνα στο πλαίσιο του πολιτιστικού κειμένου είναι χρήσιμο εργαλείο για τη διδασκαλία της πολιτισμικής ποικιλομορφίας και την ανάπτυξη της διαπολιτισμικής ευαισθησίας των μαθητών/-τριών (Dahlström, 2016).

ΕΠΙΠΤΩΣΕΙΣ ΤΗΣ ΠΟΛΥΤΡΟΠΙΚΟΤΗΤΑΣ ΣΤΗΝ ΕΚΠΑΙΔΕΥΤΙΚΗ ΚΟΙΝΟΤΗΤΑ

Η εφαρμογή της πολυτροπικότητας στην εκπαιδευτική κοινότητα έχει επιτύχει σημαντικές αλλαγές στον τρόπο διδασκαλίας και μάθησης, επηρεάζοντας με θετικό τρόπο τη μαθησιακή εμπειρία, ενώ ταυτοχρόνως δημιουργεί νέες προκλήσεις στους/στις εκπαιδευτικούς. Η έρευνα έχει επισημάνει ότι η πολυτροπική γραμματιστική ικανότητα των εκπαιδευτικών, θεωρείται ιδιαίτερα χρήσιμη για την εφαρμογή πολυτροπικών στρατηγικών στη διδασκαλία της γλώσσας. Οι εκπαιδευτικοί που έχουν αναπτύξει πολυτροπικές προσεγγίσεις, μπορούν να ενσωματώνουν ποικίλα μέσα στη διδασκαλία τους, εμπλουτίζοντας την εμπειρία της μάθησης (Eksi & Yakisik, 2015). Οι εκπαιδευτικοί που χρησιμοποιούν πολυτροπικά υλικά, επιτρέπουν στους/στις μαθητές/-τριες τη δυνατότητα διάδρασης με το μαθησιακό περιεχόμενο, μέσω της χρήσης πολλαπλών τρόπων, γεγονός που βοηθά σε καλύτερη κατανόηση της ύλης. Για παράδειγμα οι εκπαιδευτικοί που ενσωματώνουν βίντεο ή διαδραστικές εφαρμογές κατά τη διδασκαλία της γλώσσας, μετατρέπουν τη μάθηση σε πιο ενδιαφέρουσα και συναρπαστική διαδικασία, η οποία συμβάλλει στην αύξηση της προσοχής και της συμμετοχής των μαθητών/-τριών (Walsh, 2015). Συνάμα η πολυτροπικότητα ενθαρρύνει τη δημιουργικότητα των εκπαιδευτικών και την

αλληλεπίδραση με τη μαθητική κοινότητα. Οι μαθητές/-τριες εμπλεκόμενοι σε πολυτροπικές δραστηριότητες ενισχύουν την κριτική σκέψη, όπως επίσης έχουν τη δυνατότητα συνδυασμού πληροφοριών από διαφορετικές πηγές. Οι παραπάνω δυνατότητες βοηθούν τους/τις εκπαιδευτικούς να παρέχουν στους/στις μαθητές/-τριες εκπαιδευτικές εμπειρίες, καθώς δεν περιορίζονται σε παραδοσιακές μορφές έκφρασης όπως είναι για παράδειγμα το γραπτό κείμενο (Mills & Exley, 2014).

Παράλληλα η πολυτροπικότητα διευκολύνει την εξατομικευμένη διδασκαλία. Οι εκπαιδευτικοί μπορούν να προσαρμόζουν το υλικό και τη διδασκαλία τους με βάση τις ανάγκες και τα ενδιαφέροντα του κάθε μαθητή/-τρια. Για παράδειγμα οι μαθητές/-τριες που μαθαίνουν καλύτερα μέσω της ακουστικής πρόληψης, μπορούν να επωφεληθούν από τη χρήση ηχητικών βιβλίων ή podcast, ενώ κάποιοι άλλοι προτιμούν την οπτική πρόσληψη είναι διαγράμματα και βίντεο (Eksi & Yakisik, 2015). Η πολυτροπικότητα επίσης συμβάλλει, ώστε να βελτιωθεί η επικοινωνία της εκπαιδευτικής κοινότητας. Οι μαθητές/-τριες και οι εκπαιδευτικοί έχουν τη δυνατότητα να επικοινωνούν και να συνεργάζονται μέσω πληθώρας καναλιών, όπως είναι για παράδειγμα οι ψηφιακές πλατφόρμες, τα κοινωνικά δίκτυα και οι πολυμεσικές παρουσιάσεις. Η προαναφερόμενη πολυδιάστατη προσέγγιση συμβάλει ενισχυτικά της συνεργατικής μάθησης και της δημιουργίας ενός πιο δυναμικού εκπαιδευτικού περιβάλλοντος (Walsh, 2015).

Ωστόσο η εφαρμογή της πολυτροπικότητας επιφέρει προκλήσεις στην εκπαιδευτική κοινότητα. Αναλυτικότερα οι εκπαιδευτικοί πρέπει να προσαρμόζονται στις νέες τεχνολογίες και μεθόδους διδασκαλίας, κάτι που απαιτεί επιπλέον χρόνο και κατάρτιση. Επίσης πρέπει να εξοικειώνονται με διάφορα μέσα, ώστε να μπορούν να ενσωματώσουν αποτελεσματικά τη διδασκαλία τους. Στις προαναφερόμενες προκλήσεις θα πρέπει επίσης να αναφερθεί η έλλειψη κατάλληλης υποδομής και η ανισότητα πρόσβασης σε τεχνολογικά μέσα, συνθήκη που μπορεί να δημιουργήσει προκλήσεις στην εφαρμογή της πολυτροπικότητας (Mills & Exley, 2014). Τέλος η αξιολόγηση της μαθησιακής προόδου, μπορεί να γίνει περισσότερο πολύπλοκη μέσω της εφαρμογής της πολυτροπικότητας, καθώς περιλαμβάνει ποικίλα μέσα και τρόπους έκφρασης των μαθητών/-τριών. Η ποσοτικοποίηση και η σύγκριση της απόδοσης των μαθητών/-τριών κατά την εφαρμογή πολυτροπικών δραστηριοτήτων θεωρείται πιο δύσκολη, καθώς απαιτούνται νέοι μέθοδοι αξιολόγησης, που να λαμβάνουν υπόψη τα διαφορετικά μαθησιακά αποτελέσματα (Walsh, 2015).

ΣΥΜΠΕΡΑΣΜΑΤΑ

Συνοψίζοντας, κατανοείται από τα όσα προαναφέρθηκαν ότι η πολυτροπικότητα εντάσσεται σε συχνές και αποτελεσματικές προσεγγίσεις της διδασκαλίας, καθώς επιφέρει σημαντικές αλλαγές στο εκπαιδευτικό σύστημα (Jewitt, 2013). Μέσα από την ενσωμάτωση διαφορετικών τρόπων επικοινωνίας όπως είναι το κείμενο, η εικόνα, ο ήχος και το βίντεο, οι εκπαιδευτικοί πρωτοβάθμιας εκπαίδευσης μπορούν να παρέχουν μια πιο πλούσια και πιο ολοκληρωμένη μαθησιακή εμπειρία, η οποία ενισχύει την κατανόηση και την αφομοίωση της γνώσης από τους/τις μαθητές/-τριες (Serafini, 2014). Εστιάζοντας στο μάθημα της γλώσσας, η πολυτροπικότητα συμβάλλει στη βελτίωση των γλωσσικών δεξιοτήτων των μαθητών/-τριών, καθώς ενθαρρύνεται η κριτική σκέψη τους και προάγεται η δημιουργικότητα (Nelson & Johnson, 2014). Η διατήρηση της γλωσσικής κατανόησης των μαθητών/-τριών προέρχεται από τη συνδυαστική χρήση κειμένου, εικόνας, ήχου και άλλων πολυτροπικών μέσων (Serafini, 2012a). Οι μαθητές/-τριες εκτιθέμενοι σε ποικίλα ερεθίσματα μέσω της εμπλοκής τους σε πολυτροπικές δραστηριότητες, κατακτούν αποτελεσματικότερα την αναγνωστική δεξιότητα (Nelson & Johnson, 2014). Επιπροσθέτως κατανοούν καλύτερα έννοιες και γεγονότα που περιγράφονται, με αποτέλεσμα η μάθηση να γίνεται περισσότερο προσβάσιμη και κατανοητή (Unsworth, 2020). Η εφαρμογή της πολυτροπικής προσέγγισης στο μάθημα της γλώσσας προάγει τη γλωσσική παραγωγή, αφού οι μαθητές/-τριες ενθαρρύνονται να δημιουργήσουν τα δικά τους πολυτροπικά κείμενα, στα οποία χρησιμοποιούν και συνδυάζουν διάφορες μορφές επικοινωνίας. Η προαναφερόμενη δυνατότητα βοηθά τους/τις μαθητές/-τριες να κατανοήσουν καλύτερα τον τρόπο λειτουργίας της γλώσσας, σε συνδυασμό με άλλα μέσα και να βελτιώσουν τις δεξιότητές τους στην προφορική έκφραση (Arizpe & Styles, 2016).

Η προαγωγή της κριτικής σκέψης λαμβάνει χώρα μέσω της ανάλυσης και της ερμηνείας πληροφοριών από διαφορετικές πηγές και μέσα (Serafini, 2012a), διαδικασία που αναγκάζει τους/τις μαθητές/-τριες να σκέφτονται πιο σύνθετα, εξετάζοντας τα διάφορα στοιχεία τους και αλληλεπιδρώντας μεταξύ τους για τη δημιουργία νοήματος. Οι μαθητές/-τριες μαθαίνουν να αξιολογούν πως οι διαφορετικοί επικοινωνιακοί τρόποι συμβάλλουν στη διαμόρφωση της αντίληψής τους και στην κριτική αξιολόγηση των πληροφοριών που λαμβάνουν (Bao, 2017). Παράλληλα μέσω της πολυτροπικότητας οι μαθητές/-τριες αναπτύσσουν την ικανότητα συνδυασμού πληροφοριών από διάφορες πηγές, με συνέπεια να εκφράζουν τις ιδέες τους με πολλούς και διαφορετικούς τρόπους. Η προαναφερόμενη δυνατότητα βοηθά στην κατανόηση του πολυδιάστατου επικοινωνιακού κόσμου και στην ενίσχυση των κοινωνικών και διαπολιτισμικών δεξιοτήτων της μαθητικής κοινότητας (Dahlström, 2016). Εκτός των προαναφερομένων η εμπλοκή των μαθητών/τριών σε πολυτροπικά κείμενα κατά τη διδασκαλία του γλωσσικού μαθήματος, συμβάλει στην εξατομίκευση της μάθησης, καθώς οι μαθητές/-τριες μπορούν να προσεγγίσουν το μαθησιακό υλικό με τρόπο που να ταιριάζει καλύτερα στη μαθησιακό τους προφίλ, ενώ οι εκπαιδευτικοί μπορούν να προσαρμόσουν τις δραστηριότητες και τα υλικά τους, ώστε να

ανταποκρίνονται στις ανάγκες και στα ενδιαφέροντα της μαθητικής κοινότητας (Hutchison, Beschorner & Schmidt-Crawford, 2012; Bezemer & Kress, 2016). Συνάμα η πολυτροπική γλωσσική διδασκαλία ενισχύει τη συνεργατική μάθηση, καθώς οι μαθητές/-τριες συνεργάζονται σε ομαδικές δραστηριότητες, όπως για παράδειγμα τη δημιουργία ψηφιακών αφηγήσεων ή πολυμεσικών παρουσιάσεων (Greenhow & Lewin, 2016). Επίσης βοηθά στην ενίσχυση της πολιτισμικής κατανόησης των μαθητών/-τριών, αφού τα πολυτροπικά κείμενα περιλαμβάνουν εικόνες και πολυμέσα από διάφορους πολιτισμούς, με συνέπεια οι μαθητές/-τριες να αποκτούν μια πιο σφαιρική αντίληψη της παγκόσμιας ποικιλομορφίας (Greenhow & Lewin, 2016).

Ωστόσο η εφαρμογή της πολυτροπικότητας συνοδεύεται από προκλήσεις όπως για παράδειγμα την ανάγκη των εκπαιδευτικών για κατάρτιση, την έλλειψη τεχνολογικών υποδομών, την προσαρμογή των εκπαιδευτικών πρακτικών στις πολυτροπικές μεθόδους (Eksi & Yakisik, 2015; Beauchamp & Kennewell, 2010). Επιπροσθέτως η αξιολόγηση της μαθησιακής προόδου μέσω των πολυτριπικών δραστηριοτήτων αποτελεί μια σύνθετη και απαιτητική διαδικασία, αφού είναι αναγκαία η εφαρμογή νέων αξιολογικών μεθόδων που να ανταποκρίνονται στις πολυτροπικές μεθόδους διδασκαλίας. Παρά τις προκλήσεις ωστόσο με τις οποίες έρχεται αντιμέτωπη η εκπαιδευτική κοινότητα, οι προοπτικές για την εφαρμογή της πολυτροπικότητας είναι θετικές. Η συνεχής τεχνολογική εξέλιξη, σε συνδυασμό με την ενίσχυση της επαγγελματικής ανάπτυξης των εκπαιδευτικών, μπορεί να βοηθήσουν καθοριστικά στην επιτυχή ενσωμάτωση πολυτροπικών δραστηριοτήτων στην πρωτοβάθμια εκπαίδευση. Η πολυτροπικότητα δεν αποτελεί μόνο ένα εργαλείο για να ενισχυθεί η μάθηση, αλλά ένα σημαντικό μέσο για να προωθηθεί μια πιο συνεργατική και δημιουργική εκπαιδευτική κουλτούρα (Mills & Exley, 2014).

ΠΡΟΟΠΤΙΚΕΣ ΕΡΕΥΝΑΣ

Η παρούσα έρευνα αναδεικνύει την ανάγκη αναθεώρησης των διδακτικών πρακτικών, με στόχο την ουσιαστική ενσωμάτωση της πολυτροπικότητας στη γλωσσική διδασκαλία, μέσω της συστηματικής χρήσης πολυτροπικών λογισμικών και στρατηγικών που ενθαρρύνουν τη δημιουργική εμπλοκή των μαθητών/-τριών (Fterniati & Trokalli, 2020). Η διαφοροποίηση και εξατομίκευση των δραστηριοτήτων, βάσει των αναγκών και ενδιαφερόντων των μαθητών/-τριών, κρίνεται αναγκαία για την ενίσχυση της ενεργούς μάθησης (Serafini, 2012· Handayani, 2018· Draina, 2020). Σε ένα επικοινωνιακά πολυσύνθετο περιβάλλον, η πολυτροπικότητα προτείνεται ως βασικό εργαλείο προσαρμογής της διδασκαλίας της ανάγνωσης στις σύγχρονες απαιτήσεις, υποστηρίζοντας την ανάπτυξη γνωστικών, συναισθηματικών και κοινωνικών δεξιοτήτων (Bao, 2017· Theodotou, 2019). Τέλος, τονίζεται η ανάγκη για σχεδιασμό και αξιολόγηση πολυτροπικών δραστηριοτήτων στο πλαίσιο των αναλυτικών προγραμμάτων σπουδών (Eksi & Yakisik, 2015), ενισχύοντας την παραγωγή πολυτροπικών κειμένων και την ολιστική μαθησιακή εμπειρία.

ΠΕΡΙΛΗΨΗ

Αντικείμενο της παρούσας μελέτης είναι η πραγμάτευση διαγραμματικών αναπαραστάσεων της γνώσης και ειδικότερα της εννοιολογικής χαρτογράφησης. Στην ψηφιακή εποχή τα περιβάλλοντα μάθησης μετασχηματίζονται προκειμένου να ανταποκριθούν στις νέες προκλήσεις. Η διαδικασία μάθησης αποδεσμεύεται από χωροχρονικούς περιορισμούς και εξελίσσεται διαρκώς με απώτερο στόχο την αναβάθμιση της μαθησιακής εμπειρίας. Αδιαμφισβήτητα, η διάδραση συνιστά κεντρικό ζήτημα αλλά και ζητούμενο συγχρόνως. Στο πλαίσιο αυτό, η έννοια των πολυγραμματισμών αποκτά νέες διαστάσεις και προοπτικές. Ξεκινώντας από την αξιοποίηση της εννοιολογικής χαρτογράφησης στη διδασκαλία και τη μάθηση θα παρουσιαστούν συνοπτικά τα οφέλη αυτής της προσέγγισης. Η εννοιολογική χαρτογράφηση αξιοποιείται σε διάφορα γνωστικά αντικείμενα. Το πεδίο εφαρμογής αντλείται από το μάθημα της Κοινωνικής και Πολιτικής Αγωγής, το οποίο περιλαμβάνει μεγάλο εύρος θεμάτων και εννοιών. Έμφαση δίνεται στην προώθηση της νοηματοδοτούμενης μάθησης. Επίσης, αναλύονται οι δυνατότητες αξιοποίησης της εννοιολογικής χαρτογράφησης για την επεξεργασία και σύνθεση πληροφοριών, την ανάπτυξη ιδεών και εννοιών, την κατάκτηση νέας γνώσης, την ανάπτυξη κριτικής σκέψης και δημιουργικότητας. Ιδιαίτερα σημαντικό είναι πως η εννοιολογική χαρτογράφηση προσφέρει τη δυνατότητα οπτικοποίησης σχέσεων μεταξύ εννοιών, γεγονός που συμβάλλει στην εις βάθος κατανόηση του υπό μελέτη θέματος. Ως επακόλουθο, αναδεικνύεται η εννοιολογική χαρτογράφηση, ως εκπαιδευτική στρατηγική που μπορεί να αναδείξει καινοτόμους εκπαιδευτικούς σχεδιασμούς σε ψηφιακά περιβάλλοντα μάθησης.

Λέξεις – κλειδιά: πολυγραμματισμοί, πολυτροπικότητα, εννοιολογική χαρτογράφηση, ψηφιακά μέσα.

ΕΙΣΑΓΩΓΗ

Οι ταχύτατες εξελίξεις στον τομέα της τεχνολογίας επηρεάζουν το πλαίσιο της επικοινωνίας, αλλά και της μάθησης. Στις μέρες μας παρατηρούνται αλλαγές στον τρόπο επικοινωνίας, λόγω της εκτεταμένης χρήσης της εικόνας. Η κυριαρχία του γραπτού λόγου δεν μπορεί να μείνει ανεπηρέαστη (Kress, 2000). Οι προφορικές και γραπτές γλωσσικές μορφές είναι σημαντικές. Όμως, αποτελούν μέρος ενός συνόλου που είναι πολυτροπικό. Με την εξέλιξη της επικοινωνίας που υποστηρίζεται από τις νέες τεχνολογίες και τα μέσα ενημέρωσης, «δεν είναι πλέον δυνατή η κατανόηση της γλώσσας και των χρήσεών της, χωρίς να κατανοήσουμε την επίδραση όλων των τρόπων επικοινωνίας που συνυπάρχουν σε οποιοδήποτε κείμενο» (Kress, 2000:337). Αδιαμφισβήτητα, οι δύο αυτές έννοιες - επικοινωνία και μάθηση - είναι αλληλένδετες. Πώς η επικοινωνία και η μάθηση συνδέονται, πώς επηρεάζει η επικοινωνία τη μάθηση και το αντίστροφο, πώς καταλήγουν σε σύνθεση και δημιουργία νοήματος; Είναι αλήθεια ότι η διδασκαλία σχετίζεται με σημαντικές πτυχές της επικοινωνιακής διαδικασίας. Η σχολική τάξη λειτουργεί ως κοινωνικό περιβάλλον όπου λαμβάνουν χώρα η επικοινωνία και η μάθηση. Ζητούμενο είναι να μάθουν τα παιδιά πώς να μαθαίνουν. Αδιαμφισβήτητα, η πολυτροπική επικοινωνία (Multimodal Communication) και η ανάπτυξη της αντίστοιχης ικανότητας αποκτούν ιδιαίτερη σημασία στο σχολείο του 21ου αιώνα. Χάρη στις νέες τεχνολογίες αξιοποιούνται και μπορούν να συνυπάρχουν διάφορες μορφές επικοινωνίας και γραμματισμού. Άλλωστε, πριν από την έναρξη της σχολικής εκπαίδευσης τα παιδιά προσεγγίζουν το θέμα του γραμματισμού μέσω διαφόρων δραστηριοτήτων. Ο Kress (1997) επισημαίνει την ανάγκη για επανεκτίμηση του φαινομένου του γραμματισμού και κατά συνέπεια μια σημαντική αλλαγή στην εκπαιδευτική πρακτική. Εστιάζοντας στην ποικιλία των αντικειμένων που δημιουργούν τα παιδιά (όπως σχέδια, κολάζ), ο Kress αναδεικνύει τη συνοχή των πράξεων των παιδιών πριν την κατάκτηση γλώσσας και γραφής. Πρόκειται για ενέργειες των παιδιών που νοηματοδοτούν τις πράξεις τους. Για τον λόγο αυτό, η ενασχόληση με τον γραμματισμό θα πρέπει να θεωρείται διάσταση της ευρύτερης ενασχόλησης με δραστηριότητες επικοινωνιακού χαρακτήρα που έχουν νόημα για το ίδιο το παιδί.

Πράγματι, οι πολυγραμματισμοί - οι διαστάσεις του γραμματισμού - παρέχουν ένα πλαίσιο για τη διδασκαλία και τη μάθηση προσφέροντας νέες προοπτικές. Επίσης, η συνδυαστική χρήση εννοιολογικής χαρτογράφησης (Concept Mapping) σε ψηφιακά περιβάλλοντα και πολυγραμματισμών (Multiliteracies Approach) ενισχύει τη μαθησιακή εμπειρία καθιστώντας τη μάθηση πιο διαδραστική. Στο πλαίσιο αντιμετώπισης αυτών των προκλήσεων έρχεται να συνεισφέρει η παρούσα μελέτη η οποία εστιάζει στη συνέργεια εννοιολογικής χαρτογράφησης και πολυγραμματισμών με πεδίο εφαρμογής το γνωστικό αντικείμενο της Κοινωνικής και Πολιτικής Αγωγής. Το άρθρο διαρθρώνεται ως εξής: Μετά την εισαγωγή ακολουθεί το θεωρητικό πλαίσιο όπου αναλύονται οι έννοιες «πολυγραμματισμοί» και «εννοιολογική χαρτογράφηση». Στη δεύτερη ενότητα παρουσιάζεται η σύνδεση πολυγραμματισμών και εννοιολογικής χαρτογράφησης και πώς αυτή μπορεί να αξιοποιηθεί για την ανάλυση και κριτική προσέγγιση σύνθετων εννοιών στο σχολείο και συγκεκριμένα στο μάθημα της Κοινωνικής και Πολιτικής Αγωγής. Εξετάζονται τα οφέλη στη διδασκαλία και τη μάθηση. Ακολουθούν τα συμπεράσματα.

ΘΕΩΡΗΤΙΚΟ ΠΛΑΙΣΙΟ

Η θεωρία των πολυγραμματισμών διευρύνει την παραδοσιακή έννοια του γραμματισμού ως απλής ικανότητας ανάγνωσης και γραφής. Αναγνωρίζει ότι στη σύγχρονη κοινωνία, το νόημα παράγεται και προσλαμβάνεται μέσω πολλών και διαφορετικών τρόπων. Η έννοια των πολυγραμματισμών έρχεται να συμπληρώσει ήδη υπάρχουσες πρακτικές διδασκαλίας γραμματισμού. Θεμελιώνεται στις δυνατότητες μιας εκπαίδευσης γραμματισμού στον 21ο αιώνα που λαμβάνει υπόψη σε ποιους απευθύνεται, τη σημασία της πολιτισμικής και γλωσσικής ποικιλομορφίας, αλλά και τις καθημερινές πρακτικές κατασκευής νοήματος. Από τη στιγμή που διευρύνονται τα πολυτροπικά κανάλια επικοινωνίας μετασχηματίζεται όχι μόνο ο τρόπος επικοινωνίας, αλλά και μάθησης. Κατά συνέπεια, η παιδαγωγική καλείται να διαμορφώσει προσεγγίσεις και πρακτικές στο νέο αυτό σχολικό συγκείμενο (Kalantzis and Cope, 2001). Πρέπει ακόμα να σημειωθεί πως οι νέες τεχνολογίες επικοινωνίας επηρεάζουν τον τρόπο δημιουργίας νοήματος. Έτσι, το νόημα διαμορφώνεται πλέον εμπεριέχοντας σχήματα νοήματος οπτικά και ηχητικά. Ως επακόλουθο, η σύνδεσή του με τον γραπτό λόγο ακολουθεί φθίνουσα πορεία. Από την άλλη, ο οπτικός γραμματισμός συνδέεται ολοένα και περισσότερο με την οπτική επικοινωνία, περιλαμβάνοντας - μεταξύ άλλων - διεπιφάνειες πολυμέσων, τεχνολογίες επικοινωνίας μέσω οθόνης. Αναπόφευκτα, οι εξελίξεις αυτές επιδρούν στη διδασκαλία της γλώσσας και του γραμματισμού. Στο επίκεντρο του ενδιαφέροντος τίθεται η ανάπτυξη δεξιοτήτων με απώτερο στόχο την κριτική κατανόηση και παραγωγή κειμένων που συνδυάζουν διαφορετικά σημειωτικά μέσα και πόρους. Για τη δημιουργία κειμένου αξιοποιούνται διαθέσιμοι πόροι. Αυτή η διαδικασία περιλαμβάνει αναζήτηση, επιλογή και σύνθεση πληροφοριών διαφόρων μορφών που προέρχονται από διαφορετικές πηγές. Η θεωρία των πολυγραμματισμών έχει τη δυνατότητα να υποστηρίξει παιδαγωγικές πρακτικές που προσελκύουν το ενδιαφέρον των μαθητών/τριών και επιπλέον ενθαρρύνουν και ενισχύουν την ενεργό εμπλοκή τους στη μαθησιακή διαδικασία. Οι Bezemer και Kress (2016) εστιάζουν στην ανάλυση της μάθησης και της επικοινωνίας στη σύγχρονη εποχή ως ένα ολοκληρωμένο ενιαίο πεδίο. Ειδικότερα, τονίζουν τη σύνδεση μεταξύ πολυτροπικότητας (multimodality), μάθησης και επικοινωνίας που οδηγεί στη νοηματοδότηση. Συνεπώς, για τη μελέτη του νοήματος χρειάζεται να δοθεί προσοχή σε όλους τους σημειωτικούς πόρους που χρησιμοποιήθηκαν για τη δημιουργία ενός πλήρους

συνόλου (Bezemer and Jewitt, 2018). Η πολυτροπικότητα αποκτά ιδιαίτερη σημασία λόγω του ότι βασίζεται στην αλληλεπίδραση διαφορετικών σημειωτικών πόρων και εν τέλει στη δημιουργία νοήματος.

Η εκπαιδευτική σημασία των αναπαραστάσεων συνάδει με την εποικοδομιστική θεώρηση των διαδικασιών μάθησης και τις κοινωνικοπολιτισμικές θεωρήσεις της γνώσης και της μάθησης. Για τη σχεδίαση υπολογιστικών περιβαλλόντων μάθησης αντλούνται στοιχεία από τη θεωρία του εποικοδομισμού (Karasavvidis & Komis, 2008). Όσον αφορά στην εποικοδομιστική μάθηση (constructive learning), οι εκπαιδευόμενοι οργανώνουν τις νέες γνώσεις σε σχέση με πρότερες γνώσεις και σε συνέχεια αυτών επιδιώκοντας τον σχηματισμό ολοκληρωμένων εννοιών. Σύμφωνα με αυτή τη θεώρηση η νόηση αναπτύσσεται μέσω της κοινωνικής αλληλεπίδρασης μεταξύ παιδιών και ενηλίκων (Vygotsky, 1978), ενώ η γνώση δεν μεταδίδεται, ακριβώς επειδή πρόκειται για διαδικασία προσωπικής δόμησης της γνώσης (Psycharis & Kalovrektis, 2018). Η προσέγγιση αυτή υποστηρίζει την ανακάλυψη και την άμεση απόκτηση μαθησιακών εμπειριών. Η χρήση νέων τεχνολογιών αναδεικνύει την επικοινωνία διδασκομένων και διδασκόντων, ενώ συγχρόνως διευκολύνει τις διαδικασίες μάθησης (Kampourakis & Loukis, 2006). Οι νέες τεχνολογίες παρέχουν εργαλεία, τα οποία καθιστούν ευκολότερη τη δημιουργία περιβαλλόντων μάθησης που βασίζονται στην ερευνητική διαδικασία και μπορούν να διαχειριστούν οι μαθητές/τριες. Επιπρόσθετα, η δυνατότητα οπτικοποίησης δυσνόητων εννοιών ή φαινομένων και η μετάβαση από στατικά σε δυναμικά μοντέλα έχει σημαντικές επιδράσεις όχι μόνο στην έρευνα, αλλά και στις διαδικασίες μάθησης (US-National Research Council, Committee on Social Research and Education, 2006).

Η εννοιολογική χαρτογράφηση αναπτύχθηκε από τον John Novak (Novak, 1977; Novak, 1998) με βάση τις ψυχολογικές απόψεις του David Ausubel (1978) σχετικά με τη νοηματοδοτούμενη μάθηση (Meaningful Learning Theory). Σύμφωνα με αυτή τη θεώρηση η γνώση σχετίζεται με έννοιες και αναπαραστάσεις που προϋπάρχουν σε γνωστικές δομές. Έτσι αποκτούν νόημα. Ο Novak εφάρμοσε την προσέγγιση του Ausubel εντάσσοντας πρότερες γνώσεις σε εννοιολογικούς χάρτες και δημιούργησε δίκτυα εννοιών και σχέσεων. Ο εννοιολογικός χάρτης συνιστά μια ιεραρχικά διαρθρωμένη γραφική αναπαράσταση συσχετίσεων μεταξύ εννοιών (Novak, 1990; Novak and Gowin, 1984). Οι συνδεδεμένες έννοιες και οι σύνδεσμοι δημιουργούν προτάσεις και επιτρέπουν να διαβαστεί ο εννοιολογικός χάρτης από έννοια σε έννοια (Novak and Cañas, 2008). Ας σημειωθεί ακόμη ότι οι εννοιολογικοί χάρτες παρουσιάζουν ομοιότητες με τη δομή του δικτύου γνώσης του μανθάνοντα. Σύμφωνα με τις γνωστικές και κονστρουκτιβιστικές θεωρίες, η απόκτηση γνώσης περιλαμβάνει την κατασκευή ιεραρχικών ρυθμίσεων μεταξύ κεντρικών και περιφερειακών εννοιών που συνδέονται μεταξύ τους (Jacobs-Lawson and Hershey, 2002). Η εννοιολογική χαρτογράφηση, όπως και η νοητική χαρτογράφηση σε υπολογιστικό περιβάλλον αξιοποιεί δυνατότητες για τη διαχείριση πληροφοριών στην ψηφιακή εποχή. Με διαρκώς αυξανόμενο τον όγκο πληροφοριών που καλούνται διαχειριστούν οι άνθρωποι, αλλά και με την ταχύτητα με την οποία πρέπει να διαχειρίζονται αυτές τις πληροφορίες, καθίσταται αναγκαία η χρήση τεχνολογιών και εργαλείων που συνάδουν με τον τρόπο λειτουργίας του εγκεφάλου (Buzan T. and Buzan B., 2010).

ΑΞΙΟΠΟΙΗΣΗ ΤΗΣ ΕΝΝΟΙΟΛΟΓΙΚΗΣ ΧΑΡΤΟΓΡΑΦΗΣΗΣ ΚΑΙ ΤΩΝ ΠΟΛΥΓΡΑΜΜΑΤΙΣΜΩΝ ΣΤΗ ΔΙΔΑΣΚΑΛΙΑ ΚΑΙ ΤΗ ΜΑΘΗΣΗ

Είναι αλήθεια πως σημαντικό μέρος της σχολικής μάθησης συνδέεται με την απομνημόνευση μεγάλου όγκου πληροφοριών με μικρή διαφοροποίηση των «μεγάλων ιδεών». Όμως, αυτές οι ιδέες έχουν ιδιαίτερη σημασία και μπορούν να βοηθήσουν τους/τις μαθητές/τριες να αναπτύξουν ισχυρές δομές γνώσης. Για αυτόν τον λόγο, η δημιουργία εννοιολογικού χάρτη κατά τη διάρκεια μελέτης ενός θέματος σε οποιονδήποτε τομέα μπορεί να είναι εξαιρετικά χρήσιμη τόσο για μαθητές/τριες όσο και για εκπαιδευτικούς (Novak, 2011). Ο εννοιολογικός χάρτης περιλαμβάνει κόμβους (που αναπαριστούν έννοιες) και συνδέσμους (που αναπαριστούν σχέσεις μεταξύ των εννοιών) προσφέροντας τη δυνατότητα αναπαράστασης εννοιών και επιπλέον οπτικοποίησης σχέσεων μεταξύ των εννοιών. Έτσι, υποστηρίζεται η οργάνωση και αναπαράσταση της γνώσης και ακόμη η ουσιαστική μάθηση.

Η εννοιολογική χαρτογράφηση έχει αξιοποιηθεί στο πλαίσιο της σχολικής εκπαίδευσης ήδη από τη δεκαετία του 1980 με θετικά αποτελέσματα (Heinze-Fry and Novak, 1990; Novak, Gowin and Johansen, 1983) για διάφορους σκοπούς. Διαπιστώθηκε ότι η εννοιολογική χαρτογράφηση, ως παιδαγωγικό εργαλείο, μπορεί να ενισχύσει την κατανόηση επιστημονικών εννοιών, αλλά και του τρόπου σύνδεσης με άλλες έννοιες. Έρευνα που διεξήχθη σε μαθητές/τριες δευτεροβάθμιας εκπαίδευσης στις ΗΠΑ προκειμένου να αντιμετωπιστεί το πρόβλημα των χαμηλών επιδόσεων στο μάθημα της Φυσικής, έδειξε ότι βελτιώθηκε σημαντικά η επίδοση με τη χρήση της εννοιολογικής χαρτογράφησης έναντι της άμεσης διδασκαλίας (Pankratius, 1990). Τα αποτελέσματα έρευνας σχετικά με τη χρήση εννοιολογικής χαρτογράφησης στη διδασκαλία των Μαθηματικών έδειξαν ότι οι μαθητές/τριες εντόπισαν και κατανόησαν σχέσεις μεταξύ μαθηματικών εννοιών δημιουργώντας εννοιολογικό χάρτη. Όπως χαρακτηριστικά αναφέρουν, μόνο αφού φτιάξουν τον εννοιολογικό χάρτη είναι σε θέση να «δουν τη δομή των αντίστοιχων μαθηματικών γνώσεων» (Brinkmann, 2003:46). Όπως φαίνεται η γραφική απεικόνιση των εννοιών βοήθησε τους/τις μαθητές/τριες να οργανώσουν τις γνώσεις τους. Μελέτη διάρκειας δώδεκα ετών σε μαθητές/τριες που χρησιμοποίησαν λογισμικό εννοιολογικής χαρτογράφησης στις φυσικές επιστήμες - από το δημοτικό σχολείο μέχρι και τη δευτεροβάθμια

εκπαίδευση - αναδεικνύει τη θετική επίδραση που είχε στα μαθησιακά αποτελέσματα (Novak, 2004; Novak, 2005). Επίσης, από έρευνα που διεξήχθη σε μαθητές/τριες δημοτικού σχολείου στην Ελλάδα προκύπτει ότι η ενσωμάτωση της εννοιολογικής χαρτογράφησης στο πεδίο των επιστημών λειτουργεί ως αποτελεσματικό γνωστικό εργαλείο για την οργάνωση της επιστημονικής γνώσης και την οικοδόμηση της γνώσης (Bakouli and Jimoyiannis, 2014). Από τα αποτελέσματα έρευνας σε μαθητές/τριες ΣΤ΄ τάξης δημοτικού στην Ελλάδα (Koufou, 2011), με σκοπό τη διερεύνηση της συνεργατικής και ατομικής οικοδόμησης της γνώσης μέσω εννοιολογικής χαρτογράφησης σε υπολογιστικό περιβάλλον, αποτυπώθηκε η αποτελεσματικότητα της χρήσης εννοιολογικού χάρτη ως εργαλείο αξιολόγησης της μαθησιακής διαδικασίας σε ατομικό, αλλά και ομαδικό επίπεδο. Ακόμη, διαπιστώθηκε ότι η χρήση εννοιολογικού χάρτη συνέβαλε στη βελτίωση της επίδοσης μαθητή με ειδικές μαθησιακές δυσκολίες (δυσλεξία). Σύμφωνα με τα παραπάνω αναδεικνύεται η προσθετική αξία της ενσωμάτωσης της εννοιολογικής χαρτογράφησης στη διδασκαλία, τη μάθηση και την αξιολόγηση.

Συνέργεια εννοιολογικής χαρτογράφησης και πολυγραμματισμών

Ο εννοιολογικός χάρτης βασίζεται στην αρχή ότι ουσιαστική μάθηση συμβαίνει όταν ο εκπαιδευόμενος δομεί τη γνώση ιεραρχικά και διερευνά τη συσχέτιση μεταξύ εννοιών. Η προσθετική αξία της χρήσης εννοιολογικού χάρτη στη διδασκαλία και τη μάθηση ενισχύεται όταν η χρήση του συνδέεται με επίλυση συγκεκριμένων προβλημάτων, αφού με αυτόν τον τρόπο οι μαθητές/τριες έχουν την ευκαιρία να θέσουν υπό αμφισβήτηση εσφαλμένες αντιλήψεις και να οικοδομήσουν νέες. Ιδιαίτερη σημασία έχει η συνεργατική δημιουργία εννοιολογικού χάρτη, διότι προωθεί την ανάπτυξη δεξιοτήτων επικοινωνίας και συνεργασίας, επίλυσης προβλημάτων και διαμορφώνει κατάλληλα το πλαίσιο για την ανάπτυξη διαλόγου. Ακόμη, τα σύγχρονα περιβάλλοντα εννοιολογικής χαρτογράφησης απελευθερώνουν χρόνο για ενεργό εμπλοκή των μαθητών/τριών στη διαδικασία μάθησης και διευκολύνουν την προσέγγιση πολύπλοκων συσχετίσεων μεταξύ εννοιών. Επιπλέον, οι πολυγραμματισμοί επιτρέπουν στους/στις μαθητές/τριες να αναπτύξουν την κατανόηση μέσω γραπτού λόγου, οπτικών αναπαραστάσεων, ψηφιακών δημιουργιών, προφορικών παρουσιάσεων και άλλων μορφών επικοινωνίας. Αξίζει να σημειωθεί πως με αυτόν τον τρόπο εμπλουτίζεται και αναβαθμίζεται η μαθησιακή εμπειρία.

Συνδυάζοντας την εννοιολογική χαρτογράφηση με τη χρήση ψηφιακών μέσων και τη δημιουργία πολυτροπικών κειμένων, διαγράφονται νέες προοπτικές για τη διδασκαλία και τη μάθηση. Οι πολυτροπικοί εννοιολογικοί χάρτες δύνανται να λειτουργήσουν ενισχυτικά στο πλαίσιο της πολυτροπικής μάθησης και να ενθαρρύνουν την ενεργό εμπλοκή όλων των μαθητών/τριών. Η σύνδεση της εννοιολογικής χαρτογράφησης με ποικίλες διαστάσεις του γραμματισμού προσφέρει ένα δυναμικό πλαίσιο για τον εμπλουτισμό της εκπαιδευτικής διαδικασίας. Η προσέγγιση των πολυγραμματισμών διευκολύνει την επικοινωνία και τη μάθηση, αφού αξιοποιούνται κατά περίπτωση προφορικός και γραπτός λόγος, εικόνες, ψηφιακά μέσα κλπ.

Η εννοιολογική χαρτογράφηση εντάσσεται στην εκπαιδευτική διαδικασία: α) ως μέσο διδασκαλίας, β) ως μέσο μάθησης, γ) ως εργαλείο αξιολόγησης. Επίσης, μπορεί να αξιοποιηθεί στη διδασκαλία διαφόρων γνωστικών αντικειμένων. Το πεδίο εφαρμογής αντλείται από το μάθημα της Κοινωνικής και Πολιτικής Αγωγής, το οποίο στην Ελλάδα περιλαμβάνεται στα Προγράμματα Σπουδών Πρωτοβάθμιας και Δευτεροβάθμιας Εκπαίδευσης.

Κοινωνική και Πολιτική Αγωγή: Σκοπός και Προκλήσεις

Σύμφωνα με το Πρόγραμμα Σπουδών, γενικός σκοπός του μαθήματος της Κοινωνικής και Πολιτικής Αγωγής είναι η ανάπτυξη αξιών, γνώσεων, δεξιοτήτων και στάσεων στους/στις μαθητές/τριες προκειμένου να γίνουν ενεργοί δημοκρατικοί πολίτες με κριτική ικανότητα και συμμετοχική δράση. Βασικό σκοπό του μαθήματος της Κοινωνικής και Πολιτικής Αγωγής στο Δημοτικό Σχολείο αποτελεί η ενδυνάμωση της δημοκρατικής ταυτότητας των μαθητών/τριών και η ανάπτυξη της δημοκρατικής συνείδησης και δράσης. Επιδιώκεται η ανάπτυξη δεξιοτήτων και ικανοτήτων που συνδέονται με την κριτική σκέψη, τη δημιουργική φαντασία, τη λογική ανάλυση και τη συναισθηματική επίγνωση ώστε να έχουν τη δυνατότητα, μέσω της κατανόησης και ερμηνείας της κοινωνικής πραγματικότητας, να συμμετέχουν ως ενεργοί πολίτες στην κοινωνία (Ministerial Decision 10537/2023). Στο πλαίσιο του μαθήματος ανά βαθμίδα εκπαίδευσης μελετώνται θέματα, όπως: α) Στο Δημοτικό Σχολείο: σεβασμός των ανθρωπίνων δικαιωμάτων και θεμελιωδών ελευθεριών, αξίες δημοκρατίας, δικαίου, ισότητας (Ministerial Decision 10537/2023), β) Στο Γυμνάσιο: επικοινωνία, κοινωνικοί ρόλοι, πολιτικοί θεσμοί, πολιτικές ταυτότητες, δικαιώματα-υποχρεώσεις, νόμοι, δημοκρατία, πολίτης (Ministerial Decision 4318/2023), γ) Στο Γενικό Λύκειο: θεσμοί οργάνωσης της κοινωνίας και της πολιτείας, ανθρώπινα δικαιώματα, ηθικές αξίες, η αειφορία ως μοντέλο οικονομικής και κοινωνικής οργάνωσης (Ministerial Decision 4009/2023).

Λαμβάνοντας υπόψη την διεπιστημονική φύση και τη σημασία των θεμάτων που εξετάζονται στο μάθημα της Κοινωνικής και Πολιτικής Αγωγής, αλλά και τον σημαντικό ρόλο που διαδραματίζει το συγκεκριμένο μάθημα στην εξέλιξη των μαθητών/τριών ως ενεργών και υπεύθυνων πολιτών, το σχολείο καλείται να αντιμετωπίσει νέες προκλήσεις. Ενδεικτικά αναφέρουμε την πολυπλοκότητα των κοινωνικών και πολιτικών ζητημάτων στις σύγχρονες πολυπολιτισμικές κοινωνίες, την αυξανόμενη ετερογένεια του μαθητικού πληθυσμού και την ανάγκη για συστηματική και επιστημονική προσέγγιση των διαφόρων θεμάτων αξιοποιώντας Τεχνολογίες της Πληροφορίας και της Επικοινωνίας. Για την αντιμετώπιση αυτών των προκλήσεων, προτείνεται η χρήση εννοιολογικής χαρτογράφησης και πολυγραμματισμών τόσο για δραστηριότητες εντός όσο και για δραστηριότητες εκτός τάξης.

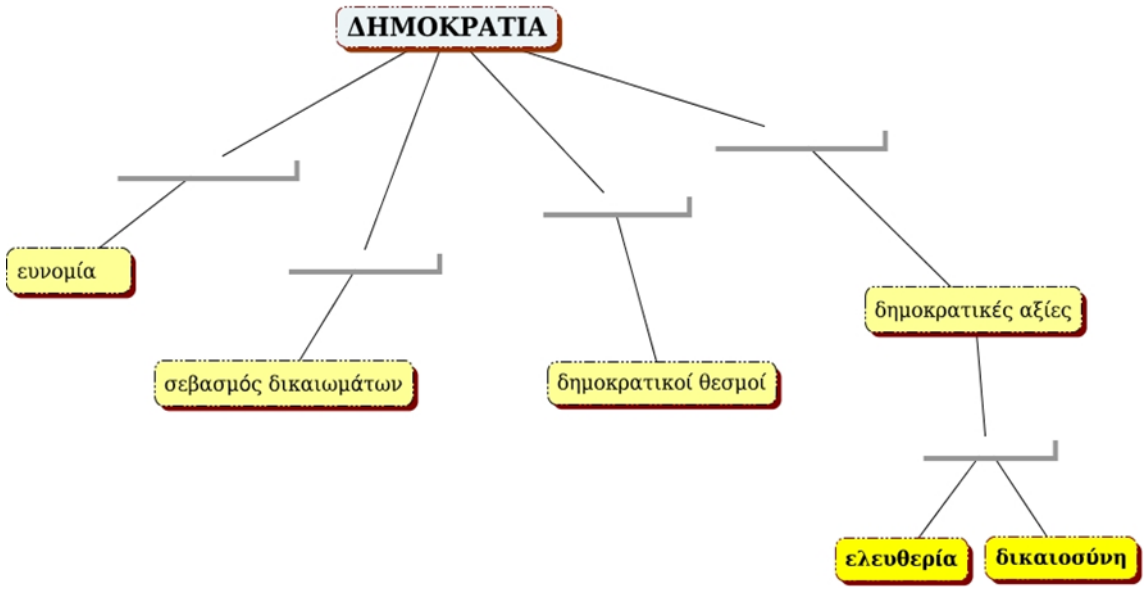
Αξιοποίηση εννοιολογικής χαρτογράφησης και πολυγραμματισμών στο μάθημα της Κοινωνικής και Πολιτικής Αγωγής

Το μάθημα της Κοινωνικής και Πολιτικής Αγωγής περιλαμβάνει μεγάλο εύρος θεμάτων και εννοιών. Η ενσωμάτωση της εννοιολογικής χαρτογράφησης σε αυτό το μάθημα με διάφορους τρόπους και για διάφορους σκοπούς δύναται να συμβάλλει στην αναβάθμιση της εκπαιδευτικής διαδικασίας και την επίτευξη των προσδοκώμενων μαθησιακών αποτελεσμάτων. Ιδιαίτερα σημαντικό είναι πως οι εννοιολογικοί χάρτες αξιοποιούνται για την ανάλυση κοινωνικών φαινομένων προσφέροντας τη δυνατότητα παρουσίασης διαφόρων πτυχών του θέματος, σύγκρισης διαφορετικών οπτικών, εντοπισμού συνδέσεων και σχέσεων μεταξύ εννοιών. Επιπρόσθετα, η ενσωμάτωση ψηφιακών εργαλείων εννοιολογικής χαρτογράφησης στην εκπαιδευτική διαδικασία προωθεί την ενεργό εμπλοκή των μαθητών/τριών και την ανάπτυξη δεξιοτήτων μάθησης 21ου αιώνα (δημιουργικότητα, συνεργασία, επικοινωνία, κριτική σκέψη).

Με στόχο την κατανόηση σύνθετων εννοιών οι μαθητές/τριες μπορούν να δημιουργήσουν εννοιολογικούς χάρτες για να οργανώσουν και να συνδέσουν βασικές έννοιες μιας θεματικής ενότητας (π.χ. κράτος, έθνος, κυβέρνηση), αλλά και για να διακρίνουν θεμελιώδεις έννοιες όπως ελευθερία, ισότητα, δικαιοσύνη. Επίσης, η διαφοροποίηση της σημασίας μιας έννοιας ανάλογα με το πλαίσιο μπορεί να αποτυπωθεί με τη χρήση εννοιολογικού χάρτη (π.χ. παρουσίαση της έννοιας των δημοκρατικών αξιών στο σχολείο, την κοινωνία). Η ανάλυση κοινωνικών φαινομένων ή/και προβλημάτων επιτρέπει τη σύγκριση, τον εντοπισμό σχέσεων, αιτίων, αντιθέσεων και συνεπειών ενός κοινωνικού ή πολιτικού γεγονότος (π.χ. εξέταση παραγόντων που οδήγησαν σε ένα κοινωνικό πρόβλημα και επιπτώσεις στην κοινότητα). Αξίζει να σημειωθεί ότι η συνεργατική δημιουργία εννοιολογικών χαρτών προάγει τη συνεργασία, την επικοινωνία και την ενεργό συμμετοχή. Από την άλλη, οι εννοιολογικοί χάρτες δύνανται να χρησιμοποιηθούν και ως σημείο αναφοράς για συζητήσεις στην τάξη βοηθώντας τους/τις μαθητές/τριες να εκφράσουν τις σκέψεις τους και να αναπτύξουν διάλογο. Λόγου χάρη, για το θέμα των Μέσων Μαζικής Ενημέρωσης δημιουργείται εννοιολογικός χάρτης αναφορικά με τον ρόλο τους στη διαμόρφωση της κοινής γνώμης, τις επιπτώσεις της παραπληροφόρησης, αλλά και ζητήματα δεοντολογίας. Για παράδειγμα, αρχικά δίνεται η κεντρική έννοια και ακολουθεί η δημιουργία εννοιολογικού χάρτη ή γίνεται συμπλήρωση ή επέκταση με συνδέσμους και έννοιες. Έτσι, η εννοιολογική χαρτογράφηση αναπτύσσεται ως ευέλικτη τεχνική και δυναμικό μέσο για την προαγωγή της κατανόησης, της κριτικής σκέψης, της συνεργασίας και της επικοινωνίας εμπλουτίζοντας τη διδασκαλία και προσδίδοντας στη μάθηση ουσιαστικό νόημα. Επιπλέον, η δημιουργία πολυτροπικών εννοιολογικών χαρτών προσφέρει την ευκαιρία στους/στις μαθητές/τριες να αναπτύξουν την κατανόησή τους μέσω γραπτού λόγου, οπτικών αναπαραστάσεων, ψηφιακών δημιουργιών, προφορικών παρουσιάσεων και άλλων μορφών επικοινωνίας.

Οι Θεματικές Ενότητες του μαθήματος της Κοινωνικής και Πολιτικής Αγωγής στην Ε΄ και τη ΣΤ΄ τάξη Δημοτικού αναπτύσσονται γύρω από τρεις άξονες/Θεματικά Πεδία: α) Η ζωή στο σπίτι μου, β) Η ζωή στο σχολείο μου, και γ) Η ζωή στην κοινότητα και στον ευρύτερο κόσμο (Ministerial Decision 10537/2023). Στη συνέχεια παρουσιάζονται διδακτικές προσεγγίσεις για τη συνδυαστική χρήση εννοιολογικής χαρτογράφησης και πολυγραμματισμών στη διδασκαλία και τη μάθηση. Επιλέγεται για τη ΣΤ΄ Τάξη από το Γ΄ Θεματικό Πεδίο η 3η ενότητα «Ιθαγένεια και εθνική ταυτότητα» και ειδικότερα το θέμα που αφορά στην ιδιότητα του ενεργού πολίτη. Στο πλαίσιο αυτό μελετώνται η ιδιότητα του ενεργού πολίτη, καθώς και ο ρόλος που έχουν οι ίδιοι ως Έλληνες πολίτες στο σχολείο και την ευρύτερη κοινότητα. Αξιοποιώντας το διαδικτυακό λογισμικό Coggle (https://coggle.it/) δημιουργήσαμε εννοιολογικό χάρτη με θέμα τον ρόλο του ενεργού πολίτη στη σύγχρονη εποχή (Διάγραμμα 1). Στον εννοιολογικό χάρτη αποτυπώνονται προβλήματα, αλλά και προκλήσεις που αντιμετωπίζει ο πολίτης στις μέρες μας και παράλληλα αναδεικνύεται η ιδιότητα της ενεργού πολιτειότητας. Επιπλέον, αυτή η ενότητα της Κοινωνικής και Πολιτικής Αγωγής συνδέθηκε με το Πρόγραμμα Σπουδών «Δράσεις Ενεργού Πολίτη» που εφαρμόζεται στην Πρωτοβάθμια και Δευτεροβάθμια Εκπαίδευση από το σχολικό έτος 2024-2025, επειδή σκοπός του είναι «να προετοιμάσει πολίτες με δεξιότητες κριτικής σκέψης, συνεργασίας και κοινωνικής υπευθυνότητας οι οποίοι συμβάλλουν ενεργά στη δημιουργία μιας βιώσιμης κοινωνίας, βασισμένης στην αειφορία, την κοινωνική δικαιοσύνη και την περιβαλλοντική προστασία» (Ministerial Decision 130372/2024). Στον συγκεκριμένο εννοιολογικό χάρτη η σύνδεση μεταξύ των εννοιών, η χρήση χρωμάτων, εικόνας και η σύνδεση με ψηφιακούς πόρους δημιουργούν ένα ελκυστικό περιβάλλον μάθησης, το οποίο προσφέρεται για επεξεργασία από τους/τις

μαθητές/τριες σε ατομικό ή/και ομαδικό επίπεδο προκειμένου αυτό να συνδεθεί με τις εμπειρίες τους και τα πραγματικά προβλήματα διαμορφώνοντας περιβάλλον αυθεντικής μάθησης. Ο εννοιολογικός χάρτης είναι διαθέσιμος στον ακόλουθο σύνδεσμο https://coggle.it/diagram/Z-5gj-qwsN-jtU1h/t/-/16cf475f9e559c50defc6168ad9fc90d267def8dca7fbc36578925c217be1683



Διάγραμμα 1
Εννοιολογικός χάρτης: Ο ρόλος του ενεργού πολίτη.

Μια ακόμη διδακτική εφαρμογή της εννοιολογικής χαρτογράφησης στο μάθημα της Κοινωνικής και Πολιτικής Αγωγής έχει ως θέμα τη θεμελιώδη έννοια της δημοκρατίας. Στόχος είναι να κατανοήσουν οι μαθητές/τριες τη σύνθετη έννοια της δημοκρατίας, τους θεσμούς που τη στηρίζουν, αλλά και τις προκλήσεις που αντιμετωπίζουν οι δημοκρατικές κοινωνίες στη σύγχρονη εποχή. Για τον σκοπό αυτό, προτείνεται η δημιουργία εννοιολογικού χάρτη συνεργατικά. Οι μαθητές/τριες χωρίζονται σε ομάδες. Κάθε ομάδα καλείται να δημιουργήσει εννοιολογικό χάρτη έχοντας ως κεντρική έννοια τη «δημοκρατία». Οι μαθητές/τριες συνδέουν την έννοια της δημοκρατίας με άλλες σχετικές έννοιες όπως: ευνομία, σεβασμός δικαιωμάτων, δημοκρατικοί θεσμοί, δημοκρατικές αξίες. Χρησιμοποιούνται γραμμές και λέξεις - συνδέσεις (π.χ. διασφαλίζει) για να αποτυπωθούν σχέσεις μεταξύ εννοιών (π.χ. η «δημοκρατία» διασφαλίζει « σεβασμό των δικαιωμάτων»). Οι μαθητές/τριες ενθαρρύνονται να εμπλουτίσουν και να επεκτείνουν τον εννοιολογικό χάρτη, αξιοποιώντας διάφορες διαστάσεις του γραμματισμού. Για παράδειγμα, προτείνεται να χρησιμοποιήσουν διαφορετικά χρώματα, σχήματα και εικόνες, να παραπέμπουν σε πρωτογενείς πηγές. Ακολουθεί παρουσίαση από κάθε ομάδα του εννοιολογικού χάρτη που δημιούργησε και συζήτηση στην ολομέλεια της τάξης. Έμφαση δίνεται στην ανάλυση και τη σύνδεση μεταξύ των εννοιών και στους λόγους που οδήγησαν σε αυτή, με τον/την εκπαιδευτικό σε ρόλο διευκολυντικό και υποστηρικτικό. Εάν κριθεί σκόπιμο, δίνεται η ευκαιρία εμπλουτισμού και αναθεώρησης του εννοιολογικού χάρτη. Επιπρόσθετα, ως επέκταση όλης αυτής της διεργασίας μπορεί να δημιουργηθεί ένας κοινός εννοιολογικός χάρτης, ως αποτέλεσμα σύνθεσης που θα αντιπροσωπεύει την τάξη. Στο πλαίσιο αυτής της προσέγγισης δίνεται ο ακόλουθος εννοιολογικός χάρτης με θέμα τη δημοκρατία (Διάγραμμα 2). Ο εννοιολογικός αυτός χάρτης δημιουργήθηκε με IHMC Cmap Tools (https://cmap.ihmc.us/cmap-cloud/) και είναι διαθέσιμος στον παρακάτω σύνδεσμο https://cmapscloud.ihmc.us:443/rid=1SG381PZY-1GMLGRF-107LH0Z

Το σημαντικότερο από όλα είναι ότι μέσω της εννοιολογικής χαρτογράφησης οι μαθητές/τριες έχουν τη δυνατότητα να αποτυπώσουν την πολυδιάστατη έννοια της δημοκρατίας και να κατανοήσουν σε βάθος τη σημασία των δημοκρατικών αξιών και θεσμών. Οι μαθητές/τριες εμπλέκονται ενεργά στη διαδικασία μάθησης, καθώς αναλύουν, αξιολογούν πληροφορίες και δημιουργούν πολυτροπικά κείμενα αναπτύσσοντας έτσι κριτική σκέψη.

Διάγραμμα 2
Εννοιολογικός χάρτης: Δημοκρατία.

ΣΥΜΠΕΡΑΣΜΑΤΑ

Η εννοιολογική χαρτογράφηση, ως εκπαιδευτική στρατηγική, αξιοποιώντας διαστάσεις του γραμματισμού και ψηφιακά περιβάλλοντα μάθησης, δύναται να υποστηρίξει την ουσιαστική μάθηση και καινοτόμους εκπαιδευτικούς σχεδιασμούς. Οι εννοιολογικοί χάρτες χρησιμεύουν ως εργαλείο για τη διδασκαλία, τη μάθηση και επιπλέον την αξιολόγηση. Επιτρέπουν στους/στις εκπαιδευτικούς να αποτιμήσουν τον βαθμό κατανόησης οπτικοποιώντας τον τρόπο με τον οποίο οι μαθητές/τριες οργανώνουν τη γνώση και εντοπίζουν τομείς προς βελτίωση. Ιδιαίτερα σημαντικό είναι πως η εννοιολογική χαρτογράφηση ενισχύει τη γνωστική εμπλοκή των μαθητών/τριών, το ενδιαφέρον για μάθηση και τον κριτικό στοχασμό. Παράλληλα, ενθαρρύνεται η επικοινωνία, η συνεργασία και η ανταλλαγή ιδεών. Αξίζει να αναφερθεί ότι η χρήση ψηφιακών μέσων και η δυνατότητα έκφρασης με ποικίλους τρόπους (λέξεις, εικόνες κλπ.) διευκολύνουν τη διαδικασία μάθησης για μαθητές/τριες με διαφορετικά στυλ μάθησης. Οι προοπτικές της αξιοποίησης εννοιολογικής χαρτογράφησης και πολυγραμματισμών στη διδασκαλία του μαθήματος της Κοινωνικής και Πολιτικής Αγωγής παρουσιάζουν ιδιαίτερο ενδιαφέρον.

Εν κατακλείδι, η σύνδεση της εννοιολογικής χαρτογράφησης με τους πολυγραμματισμούς προσφέρει ένα δυναμικό πλαίσιο για την αναβάθμιση της διδασκαλίας και της μάθησης. Προτείνεται περαιτέρω μελέτη και διερεύνηση της ενσωμάτωσης της εννοιολογικής χαρτογράφησης σε γνωστικά αντικείμενα που διδάσκονται στην Πρωτοβάθμια και Δευτεροβάθμια Εκπαίδευση.

ΘΠ6: Ψηφιακή Ηθική

ΤΕΧΝΗΤΗ ΝΟΗΜΟΣΥΝΗ ΚΑΙ ΗΘΙΚΗ: ΠΡΟΚΛΗΣΕΙΣ ΚΑΙ ΛΥΣΕΙΣ

Σαμωνάς Κωνσταντίνος
Εκπαιδευτικός ΠΕ02
ΔΔΕ Πρέβεζας, Γυμνάσιο Λούρου
Πρέβεζα, Ελλάδα
e-mail: samkon@sch.gr

ΠΕΡΙΛΗΨΗ

Το παρόν άρθρο εστιάζει στη θεματική της Ψηφιακής Ηθικής και ιδιαίτερα στον τομέα της Ηθικής στην Τεχνητή Νοημοσύνη (ΤΝ) και τις προκλήσεις που ανακύπτουν από την εισαγωγή της στην εκπαίδευση. Αρχικά γίνεται μια παρουσίαση των όρων ΤΝ. Έπειτα παρουσιάζονται οι τρόποι που η ΤΝ έχει εισχωρήσει στην εκπαίδευση και τα θετικά που μπορεί να επιφέρει σε ζητήματα διοίκησης και διαχείρισης, στη διδασκαλία και στη μάθηση, όπως η προσωποποιημένη μάθηση, η δημιουργία ποιοτικού παιδαγωγικού περιεχομένου με δυνατότητα προσαρμογής στις ανάγκες των μαθητών/τριών, η έγκυρη και έγκαιρη αξιολόγηση και ανατροφοδότηση, προβλέψεις και παρεμβάσεις για μαθητές/τριες που δυσκολεύονται. Στη συνέχεια αναδεικνύονται τα πιο σημαντικά προβλήματα σχετικά με την εισαγωγή και τη χρήση της ΤΝ στην εκπαίδευση, όπως η ιδιωτικότητα, η προστασία των δεδομένων, η μεροληψία και η αδιαφάνεια των αλγορίθμων, το ψηφιακό χάσμα, ο πλαγιαρισμός και γενικότερα οι κίνδυνοι για την ακαδημαϊκή ακεραιότητα. Έπειτα, αφού παρουσιαστούν το πλαίσιο των ηθικών σχολών της δεοντολογίας, του ωφελιμισμού και των αρετών, γίνεται διερεύνηση των υφιστάμενων κανόνων δεοντολογίας με έμφαση σε εκείνους των διεθνών και διακρατικών θεσμών της UNICEF, του ΟΑΣΑ και της Ευρωπαϊκής Ένωσης, αλλά και του νομικού πλαισίου που έχει αναπτυχθεί στην Ευρωπαϊκή Ένωση (ΕΕ) -ΓΚΠΔ και Κανονισμός σχετικά με την ΤΝ-, που αναδεικνύει ότι οι κώδικες δεοντολογίας αδυνατούν να επιφέρουν τα επιδιωκόμενα αποτελέσματα για διάφορες αιτίες, όπως ο ανταγωνισμός μεταξύ εταιρειών ή κρατών και η εξάρτηση της επιστημονικής προόδου από τη χρηματοδότηση επενδυτών με πιθανόν ιδιοτελείς σκοπούς, και ότι απαιτείται η ενίσχυση της θεσμικής θωράκισης. Τέλος, γίνεται αναφορά στον ρόλο του σχολείου για την καλλιέργεια όχι μόνο γνώσεων και δεξιοτήτων που είναι απαραίτητες για τη δημιουργική αξιοποίηση της ΤΝ αλλά και την ηθική συνείδηση κατά την εφαρμογή της από τους/τις μαθητές/τριες ως ενήλικες, ώστε να περιοριστούν αρνητικές πρακτικές και αποτελέσματα που θα βλάψουν την κοινωνία, και η ανάγκη για επιμόρφωση των εκπαιδευτικών στα αντίστοιχα θέματα, ώστε να αποτελέσουν πρότυπα για τους/τις μαθητές/τριες.

Λέξεις – κλειδιά: Τεχνητή Νοημοσύνη, Ηθική, Εκπαίδευση

ΕΙΣΑΓΩΓΗ

Το 1950 ο Alan Turing εισηγήθηκε την πιθανότητα οι μηχανές να μπορούν να σκεφτούν. Από τότε έχει υπάρξει σημαντική επιστημονική πρόοδος που οδήγησε σε μία σειρά από καινοτομίες που χρησιμοποιούμε στην καθημερινότητά μας, χωρίς να γνωρίζουμε ότι ανήκουν στον χώρο της ΤΝ, όπως για παράδειγμα οι μηχανές αναζήτησης, τα ρομπότ συζήτησης (chatbots). Όταν το 2022 η εταιρεία OpenAI παρουσίασε το ChatGPT, το ενδιαφέρον για την ΤΝ και για το τι είχε να προσφέρει σε διάφορους τομείς κορυφώθηκε. Ταυτόχρονα διατυπώθηκαν μια σειρά από ενδοιασμούς σχετικά με την ΤΝ. Στο παρόν άρθρο γίνεται μια προσπάθεια να απαντηθούν κάποια ερωτήματα: Τι είναι η ΤΝ; Ποια οφέλη και ποιοι κίνδυνοι ανακύπτουν από τη χρήση της στην εκπαίδευση; Υπάρχει κάποιο ηθικό υπόβαθρο στο οποίο μπορούμε να στηριχτούμε, για να μειωθούν οι αρνητικές συνέπειες της ΤΝ; Εκφράζονται αυτά σε κάποια κείμενα (δεοντολογίας, νόμοι) με γενικό χαρακτήρα; Πώς μπορεί η εκπαίδευση να βοηθήσει στην καλλιέργεια ηθικής σκέψης και δράσης;

ΟΡΙΣΜΟΙ ΤΗΣ ΤΝ

Δεν υφίσταται ένας κοινά αποδεκτός από ερευνητές της ΤΝ ορισμός της, όπως επισήμαναν οι Legg & Hutter (2007) στη συλλογή ορισμών της έννοιας νοημοσύνη. Οι εισηγητές του όρου McCarthy et al. (1955) τον όρισαν ως «κάνοντας μία μηχανή να συμπεριφέρεται με τρόπο που θα μπορούσε να χαρακτηριστεί ευφυής, αν ένας άνθρωπος συμπεριφερόταν παρομοίως» (όπως αναφέρεται στο Ahmad & al., 2021: 2). Ορισμοί που εστιάζουν στην αναπαραγωγή ή μίμηση της ανθρώπινης ευφυΐας για συγκρότηση συλλογισμών, δημιουργικότητα, επίλυση προβλημάτων, μάθηση, αυτοβελτίωση, δόθηκαν από τους Whitby (2009), Coppin (2004), Zachos et al (2015), Bailey (2023), Akgun & Greenhow (2022), Harkut & al. (2019), Γεωργούλη (Georgouli,2015). Σύμφωνα με τη unicef (2021: 16) η ΤΝ «αναφέρεται σε συστήματα μηχανών τα οποία δύνανται, με βάση ένα σύνολο στόχων καθορισμένων από άνθρωπο, να κάνουν προβλέψεις, προτάσεις ή να λάβουν αποφάσεις που επηρεάζουν υλικά ή εικονικά περιβάλλοντα. Τα συστήματα ΤΝ αλληλοεπιδρούν μαζί μας και δρουν στο περιβάλλον μας, είτε άμεσα ή έμμεσα. Συχνά, φαίνεται να ενεργούν αυτόνομα και δύνανται να προσαρμόζουν τη συμπεριφορά τους μαθαίνοντας το εννοιολογικό πλαίσιο». Παραπλήσια ορίζεται στον Κανονισμό 2024/1689 της ΕΕ (άρθρο 3) ένα σύστημα ΤΝ ως «μηχανικό σύστημα που έχει σχεδιαστεί, για να λειτουργεί με διαφορετικά επίπεδα αυτονομίας και μπορεί να παρουσιάζει προσαρμοστικότητα μετά την εφαρμογή του και το οποίο, για ρητούς ή σιωπηρούς στόχους, συνάγει, από τα στοιχεία εισόδου που λαμβάνει, πώς να παράγει στοιχεία εξόδου, όπως προβλέψεις, περιεχόμενο, συστάσεις ή αποφάσεις που μπορούν να επηρεάσουν υλικά ή εικονικά περιβάλλοντα». Με τους ορισμούς αυτούς αποφεύγεται η αναφορά στον όρο «ευφυΐα» που δύσκολα προσδιορίζεται και η προσοχή στρέφεται στον ρόλο του ανθρώπου, στα αναμενόμενα από τη λειτουργία των συστημάτων ΤΝ και στο ότι δύνανται να ασκήσουν επιρροή σε διάφορα περιβάλλοντα.

ΤΝ ΣΤΗΝ ΕΚΠΑΙΔΕΥΣΗ: ΟΦΕΛΗ

Κάθε τεχνολογική εξέλιξη επηρεάζει όλους τους τομείς μιας κοινωνίας και αναπόφευκτα η εκπαίδευση είναι ένας από αυτούς. Η ΤΝ δύναται να προσφέρει αρκετά οφέλη σε ποικίλους τομείς (EU, 2020, Bailey, 2023, Ahmad et al., 2021, Akgun & Greenhow, 2021, Chen et al., 2020, Jyothi Sreedhar et al., 2023, Harry, 2023, Eden et al. 2024):

- **Διδασκαλία μαθητών/τριών**. Π.χ. παροχή ακολουθίας εργασιών για κατανόηση, λήψη εξατομικευμένης εκπαίδευσης, εκμάθηση ξένης γλώσσας.
- **Υποστήριξη μαθητών/τριών**. Π.χ. επισήμανση σημείων για βελτίωση, προσαρμογή της διδασκαλίας στις ανάγκες των μαθητών/τριών, επεξήγηση δύσκολων εννοιών για επίτευξη των μαθησιακών στόχων, παιγνιοποίηση, κριτική για γραπτές και άλλες εργασίες.
- **Υποστήριξη εκπαιδευτικών**. Π.χ. αυτόματη αξιολόγηση, σχολιασμός εργασιών, δημιουργία σχεδίων μαθημάτων, υλικού διαφοροποιημένης διδασκαλίας, φύλλων εργασίας, εντοπισμός μαθητών/τριών που αντιμετωπίζουν δυσκολίες, αναστοχασμός σχετικά με το υλικό, τις μεθόδους και τις πρακτικές διδασκαλίας.
- **Υποστήριξη συστήματος**. Π.χ. υποστήριξη επικοινωνίας με γονείς και κηδεμόνες και άλλους φορείς, οργάνωση τάξεων, βέλτιστη κατανομή πόρων, καθοδήγηση μαθητών/τριών για τη μελλοντική ακαδημαϊκή πορεία τους, παρακολούθηση του σχολικού κλίματος.
- **Υποστήριξη γονέων και κηδεμόνων**. Π.χ. δημιουργία αιτημάτων προς τη διεύθυνση, εποπτεία της επίδοσης, βοήθεια για διερεύνηση ακαδημαϊκής εξέλιξης.

ΤΝ ΣΤΗΝ ΕΚΠΑΙΔΕΥΣΗ: ΠΡΟΚΛΗΣΕΙΣ

Όπως όλες οι καινοτομίες, έτσι και η είσοδος της ΤΝ στην εκπαίδευση εγείρει μια σειρά από ζητήματα που σχετίζονται τόσο με τον τρόπο δόμησης και λειτουργίας των συστημάτων ΤΝ όσο και τη χρήση τους. Οι κυριότεροι κίνδυνοι είναι (Borenstein & Howard, 2020, Bailey, 2023, Akgun & Greenhow: 2021, Holmes et al., 2022):

- **Ισότιμη πρόσβαση**. Π.χ. αποκλεισμός μειονοτήτων, κοινωνικά περιθωριακών ομάδων, ΑΜεΑ, ή λόγω του κοινωνικοοικονομικού πλαισίου και γεωγραφικών περιορισμών.
- **Ψηφιακό χάσμα**. Π.χ. ανισότιμη πρόσβαση σε τεχνολογική υποδομή και αξιόπιστη σύνδεση στο Διαδίκτυο.
- **Προστασία προσωπικών δεδομένων**. Π.χ. διαρροή και κακόβουλη επεξεργασία των εκπαιδευτικών δεδομένων, ιδίως των ευαίσθητων προσωπικών δεδομένων.
- **Ιδιωτικότητα**. Π.χ. διαρκής επιτήρηση της δραστηριότητας των χρηστών.
- **Αυτονομία**. Π.χ. αδυναμία των χρηστών να ενεργούν σύμφωνα με τις δικές τους αρχές και τα δικά τους συμφέροντα.
- **Πιθανές προκαταλήψεις**. Π.χ. διατήρηση και ενίσχυση ανισοτήτων ως προς το φύλο, την εθνικότητα κι άλλα, λόγω μεροληψιών στις βάσεις δεδομένων.
- **Διαφάνεια και λογοδοσία**. Π.χ. αδιαφάνεια στον τρόπο σχεδιασμού των αλγορίθμων, στην ποιότητα των βάσεων δεδομένων, στη λογική λήψης αποφάσεων.
- **Αμεροληψία, εγκυρότητα και ισότητα**. Π.χ. πιθανές προκαταλήψεις και διακρίσεις στην περίπτωση αξιολόγησης μαθητών/τριών και λήψης αποφάσεων για την ακαδημαϊκή πορεία τους.
- **Υπερβολική εμπιστοσύνη**. Π.χ. μη έλεγχος της ακρίβειας και της εγκυρότητας των αποτελεσμάτων των συστημάτων ΤΝ.
- **Εξαπάτηση/Πλαγιαρισμός**. Π.χ. χρήση των συστημάτων ΤΝ για επίλυση εργασιών με αποτέλεσμα τη μη εκμάθηση της διδασκόμενης ύλης και τη μη απόκτηση απαραίτητων δεξιοτήτων.

Αναπόφευκτα, για τους λόγους αυτούς αναφύονται θέματα ηθικής συμπεριφοράς τόσο των δημιουργών όσο και των χρηστών των συστημάτων ΤΝ.

ΗΘΙΚΗ: ΔΕΟΝΤΟΛΟΓΙΚΗ, ΩΦΕΛΙΜΙΣΤΙΚΗ ΚΑΙ ΑΡΕΤΩΝ

Στην αντιμετώπιση των προκλήσεων αυτών μπορεί να βοηθήσει η Ηθική, ο πρακτικός κλάδος της Φιλοσοφίας ο οποίος μελετά το σύστημα που διέπει τη συμπεριφορά μας, στοχεύει στη μείωση του κακού ή της ζημιάς και εμπεριέχει τους ηθικούς κανόνες, τα ηθικά ιδανικά και τις ηθικές αρετές (Audi, 1999, Dokas, 1981). Μέσω της Ηθικής επιδιώκεται η διατύπωση κανόνων οι οποίοι καθορίζουν τη συμπεριφορά και τις αποφάσεις μας, ώστε αυτά να είναι σύμφωνα με τις ηθικές αξίες. Τρία από τα ρεύματα της Ηθικής είναι η δεοντολογική, ο ωφελιμισμός και η ηθική των αρετών. Η **δεοντολογική** ηθική είναι κανονιστική, επειδή επιζητά να ορίσει τις καθολικές ηθικές αρχές βάσει των οποίων οι άνθρωποι οφείλουν να ενεργούν σε κάθε περίσταση. Κριτήριο για την ηθική αξία των ενεργειών μας είναι οι εσωτερικές αρχές τους κι όχι τα αποτελέσματά τους (Larry & Moore, 2024, Blackburn, χχ, Audi, 1999). Βάση των κανόνων είναι ο ορθολογισμός (Audi, 1999, Dokas, 1981). Ο Καντ εισηγήθηκε την κατηγορική προσταγή βάσει της οποίας καθένας/καθεμία από εμάς οφείλει να ενεργεί με τρόπο που η δική του/της συμπεριφορά να μπορεί να γίνει ο καθολικός κανόνας της κοινωνίας και η ανθρωπότητα να χρησιμοποιείται πάντα ως σκοπός κι όχι απλά ως μέσο (Rohlf, 2024, Blackburn, χχ, Dokas, 1981). Αντίθετα, ο **ωφελιμισμός** προωθεί την επίτευξη ευτυχίας για τον μεγαλύτερο δυνατό αριθμό ανθρώπων που επηρεάζονται από τις ενέργειές μας, και θεμελιώνεται στη λογική αγαθοεργία (Audi, 1999, Blackburn, χχ, Sinnott-Armstrong, 2023, Dokas, 1981). Κριτήριο για την ηθική αξία των ενεργειών μας είναι τα αποτελέσματά τους (Blackburn, χχ, Sinnott-Armstrong, 2023). Τέλος, η **ηθική των αρετών** εστιάζει στην καλλιέργεια του χαρακτήρα και των αρετών, των εξαιρετικών ιδιοτήτων του χαρακτήρα οι οποίες αναπτύσσονται μέσω της εξάσκησης στις συγκεκριμένες αρετές (Audi, 1999, Blackburn, χχ, Hursthouse & Pettigrove, 2023). Απαιτείται η ανάπτυξη της κριτικής ικανότητας, για να διακρίνουμε και να κάνουμε ανεξάρτητα ό,τι είναι ηθικά απαιτούμενο ή να πραγματώσουμε ό,τι είναι άριστο (Audi, 1999, Blackburn, χχ). Επιδιώκεται μια ζωή ευτυχισμένη και ενάρετη (Blackburn, χχ). Επομένως, ως λογικά και κοινωνικά όντα κρίνουμε, επιλέγουμε και ενεργούμε με βάση κανόνες και αρχές που χαρακτηρίζονται ως ηθικοί ή μη. Το ίδιο ισχύει και στην περίπτωση των συστημάτων ΤΝ τόσο για τους δημιουργούς τους όσο και για τους χρήστες τους.

ΔΕΟΝΤΟΛΟΓΙΚΑ ΚΑΙ ΝΟΜΙΚΑ ΚΕΙΜΕΝΑ

Για να περιοριστούν οι αρνητικές συνέπειες από τη χρήση των συστημάτων ΤΝ και να ωφελούνται οι χρήστες τους τα μέγιστα, είναι αναγκαίο αυτά να είναι αξιόπιστα, ιδιότητα που στηρίζεται σε τρεις συνιστώσες σύμφωνα με την Ομάδα Εμπειρογνωμόνων Υψηλού Επιπέδου για την ΤΝ (ΟΕΥΕ, 2019). Πρώτον, τα συστήματα ΤΝ πρέπει να είναι **σύννομα**, δηλαδή να τηρούν τις νομοθετικές και κανονιστικές ρυθμίσεις. Δεύτερον, πρέπει να είναι **δεοντολογικά**, δηλαδή να τηρούν τους κανόνες δεοντολογίας. Τρίτον, πρέπει να είναι **στιβαρά**, δηλαδή να εξασφαλίζουν την ασφάλεια και την προστασία των χρηστών τόσο σε τεχνολογικό όσο και κοινωνικό επίπεδο. Καμία από τις ιδιότητες αυτές δεν επαρκεί από μόνη της, αλλά και οι τρεις συνεργούν και αλληλοεπικαλύπτονται, επειδή (α) το υφιστάμενο νομοθετικό πλαίσιο δεν συμβαδίζει πάντα με τις τεχνολογικές εξελίξεις, βρίσκεται σε σύγκρουση με τη δεοντολογία και ίσως δεν είναι το κατάλληλο για την επίλυση ζητημάτων που ανακύπτουν και, επομένως, είναι αναγκαίο να υφίσταται ένα ισχυρό

δεοντολογικό πλαίσιο και (β) η ύπαρξη τέτοιου πλαισίου δεν επαρκεί, για να αποτρέψει κινδύνους από ακούσια βλάβη. Αποτέλεσμα της αξιοπιστίας των συστημάτων ΤΝ είναι ότι εξασφαλίζεται η υπεύθυνη ανταγωνιστικότητα σχετικά με αυτά. Για το λόγο αυτό έχουν υιοθετηθεί ποικίλα δεοντολογικά κείμενα από εταιρείες που ερευνούν και αναπτύσσουν συστήματα ΤΝ, από κρατικούς, διακρατικούς και διεθνείς φορείς και έχουν θεσπιστεί νόμοι για τη ρύθμιση του πεδίου.

Το πρώτο χρονολογικά διακυβερνητικό πρότυπο για την ΤΝ υιοθετήθηκε από το Συμβούλιο του ΟΑΣΑ (OECD) το 2019 με τον τίτλο *Recommendation of the Council on Artificial Intelligence* και αναθεωρήθηκε το 2024 (OECD, 2025). Στην *Πρόταση* αναπτύσσονται (α) οι αρχές για υπεύθυνη επιστασία της αξιόπιστης ΤΝ και (β) οι εθνικές πολιτικές και η διεθνής συνεργασία. Οι αρχές που προτείνονται είναι:

- **Συμπεριληπτική οικονομική μεγέθυνση, αειφόρος ανάπτυξη και ευημερία** με επιδίωξη την αύξηση των ανθρώπινων ικανοτήτων, την ενίσχυση δημιουργικότητας, την προώθηση της συμπερίληψης, τη μείωση των ανισοτήτων και την προστασία του φυσικού περιβάλλοντος.
- Σεβασμός στο κράτος δικαίου, στα ανθρώπινα δικαιώματα και τις δημοκρατικές αρχές, συμπεριλαμβανομένων της αμεροληψίας και της ιδιωτικότητας με επιδίωξη την αποφυγή διακρίσεων, την ισότητα, την ελευθερία, την αξιοπρέπεια, την αυτονομία, την προστασία των δεδομένων, τη διαφορετικότητα, την κοινωνική δικαιοσύνη και τα εργατικά δικαιώματα και την προστασία από την παραπληροφόρηση.
- **Διαφάνεια και επεξηγησιμότητα** (explainability) με επιδίωξη την καλλιέργεια της γενικής κατανόησης για τις ικανότητες και τους περιορισμούς των συστημάτων ΤΝ, την επίγνωση των χρηστών ότι διεπιδρούν με συστήματα ΤΝ, την παροχή πληροφοριών σχετικά με τις πηγές δεδομένων, τη διαδικασία και τη λογική που διαμόρφωσαν τις εκροές, και τη δυνατότητα να αμφισβητήσουν τις εκροές εκείνοι που επηρεάζονται δυσμενώς.
- **Στιβαρότητα, ασφάλεια και προστασία** με επιδίωξη την ορθή λειτουργία, την αποφυγή αδικαιολόγητων κινδύνων, τη δυνατότητα διόρθωσης και παροπλισμού των συστημάτων που επιδεικνύουν ανεπιθύμητη συμπεριφορά και την ακεραιότητα πληροφοριών.
- **Λογοδοσία** με επιδίωξη την εξασφάλιση ιχνηλασιμότητας, τη διαρκή διαχείριση κινδύνου σε όλες τις φάσεις ζωής ενός συστήματος ΤΝ και την υπεύθυνη αντιμετώπιση κινδύνων.

Στον τομέα των εθνικών πολιτικών και της διεθνούς συνεργασίας προτείνονται (α) η επένδυση στην έρευνα και την ανάπτυξη της ΤΝ, (β) η καλλιέργεια συμπεριληπτικού οικοσυστήματος που διευκολύνει την ΤΝ, (γ) η διαμόρφωση διευκολυντικής διαλειτουργικής διακυβέρνησης και πολιτικού περιβάλλοντος για την ΤΝ, (δ) η ανάπτυξη ικανοτήτων και η προετοιμασία για μετασχηματισμό της αγοράς εργασίας, και (ε) η διεθνής συνεργασία για αξιόπιστη ΤΝ.

Η Ευρωπαϊκή Ένωση (ΕΕ) δημοσίευσε τις *Κατευθυντήριες Γραμμές Δεοντολογίας για αξιόπιστη ΤΝ* οι οποίες συντάχθηκαν το 2018 από την ανεξάρτητη ΟΕΥΕ για την ΤΝ. Στο κείμενο προσδιορίστηκαν πέντε θεμελιώδη ανθρώπινα δικαιώματα: (α) ο σεβασμός της ανθρώπινης αξιοπρέπειας, (β) η ελευθερία του ατόμου, (γ) ο σεβασμός της δημοκρατίας, της δικαιοσύνης και του κράτους δικαίου, (δ) η ισότητα, απαγόρευση των διακρίσεων και αλληλεγγύη, (ε) τα δικαιώματα πολιτών. Από αυτά πηγάζουν τέσσερις δεοντολογικές αρχές:

- **Σεβασμός της ανθρώπινης αυτονομίας** η οποία προσδιορίζεται ως αυτοδιάθεση, συμμετοχή στις δημοκρατικές διαδικασίες, ενίσχυση των δεξιοτήτων και εποπτεία των συστημάτων ΤΝ.
- **Πρόληψη βλάβης** η οποία προσδιορίζεται ως προστασία της ανθρώπινης αξιοπρέπειας και της σωματικής και πνευματικής ακεραιότητας, συμπερίληψη ευάλωτων ανθρώπων και κοινωνικών ομάδων και προστασία του φυσικού περιβάλλοντος.
- **Δικαιοσύνη** η οποία προσδιορίζεται ως δίκαιη κατανομή ωφελειών και κόστους, αμεροληψία, αποφυγή διακρίσεων, ισότιμες ευκαιρίες, αποφυγή εξαπάτησης και έννομη προστασία απέναντι σε αποφάσεις που λαμβάνονται από συστήματα ΤΝ.
- **Επεξηγησιμότητα** η οποία προσδιορίζεται ως διαφάνεια στις διαδικασίες επεξεργασίας των δεδομένων και λήψης απόφασης, επίγνωση των χρηστών για τις δυνατότητες και τον σκοπό των συστημάτων ΤΝ και επεξήγηση με σαφήνεια σε εκείνους που θα υποστούν τις συνέπειες των αποφάσεων αυτών.

Σε παγκόσμιο επίπεδο η unicef, εκκινώντας από τη διαπίστωση ότι, παρά την πληθώρα δεοντολογικών κειμένων και εθνικών πολιτικών για τα συστήματα ΤΝ και τη θεμελίωσή τους στα ανθρώπινα δικαιώματα, δεν λαμβάνονται υπόψη τα ιδιαίτερα χαρακτηριστικά και δικαιώματα των παιδιών, εξέδωσε το 2021 το *Policy guidance on AI for children 2.0* το οποίο ήταν αποτέλεσμα των εργασιών ομάδας συντακτών και επιτροπής συμβούλων ποικίλης προέλευσης και υπόβαθρου, διαβούλευσης και αναθεώρησης από εθνικές κυβερνήσεις, οργανισμούς της κοινωνίας των πολιτών και εταιρείες από διάφορα μέρη της γης, ενώ λήφθηκε υπόψη και η γνώμη 250 παιδιών που συμμετείχαν σε εννέα εργαστήρια σε πέντε χώρες. Στο κείμενο αναγνωρίζεται ότι η ΤΝ συνοδεύεται από οφέλη και κινδύνους για την ανάπτυξη των παιδιών και εισάγεται η έννοια της παιδοκεντρικής ΤΝ η οποία σχεδιάζεται για παιδιά με κύρια επιδίωξη τη μεγιστοποίηση των ευκαιριών για ανάπτυξη των παιδιών, την ελαχιστοποίηση των κινδύνων σε βάρος των παιδιών και την ενίσχυση της διεπίδρασης μεταξύ των παιδιών και των συστημάτων ΤΝ.

Βάσει της *Σύμβασης για τα Δικαιώματα του Παιδιού* καθορίζονται ως θεμέλια για μια παιδοκεντρική ΤΝ (α) η **Προστασία** από κάθε επιβλαβή και μεροληπτική επίπτωση των συστημάτων ΤΝ και από κάθε βλάβη και εκμετάλλευση, (β) η **Πρόβλεψη (ωφέλεια)** ότι οι ευκαιρίες που πηγάζουν από τα συστήματα ΤΝ για την εκπαίδευση, την υγεία και το παιχνίδι, πρέπει να ενισχυθούν, όταν είναι κατάλληλη η χρήση των συστημάτων ΤΝ για τα παιδιά, και (γ) η **Συμμετοχή (συμπερίληψη όλων των παιδιών)** στη διαμόρφωση των συστημάτων ΤΝ και στη λήψη λελογισμένων αποφάσεων σχετικά με τη χρήση τους και τον αντίκτυπο που μπορεί να έχουν στη ζωή τους (unicef, 2021). Βασιζόμενη στις αρχές αυτές η unicef προτείνει εννέα απαιτήσεις για μια παιδοκεντρική ΤΝ, οι οποίες συνοδεύονται από συγκεκριμένες προτάσεις:

- **Υποστήριξη της ανάπτυξης των παιδιών και της ευημερίας τους**. Προτείνεται (α) ο σχεδιασμός πολιτικών και πρακτικών σχετικά με την ΤΝ βάσει των επιπτώσεων και των κινδύνων για τα παιδιά, (β) ο σχεδιασμός συστημάτων ΤΝ εστιασμένων στα δικαιώματα των παιδιών, (γ) ο περιορισμός των αρνητικών συνεπειών στο περιβάλλον και (δ) ο σχεδιασμός ποιοτικής αξιολόγησης των συστημάτων ΤΝ που να ελέγχει τις εμπειρίες των παιδιών κατά τη διεπίδρασή τους με αυτά.
- **Εξασφάλιση της συμμετοχής των παιδιών και για τα παιδιά**. Προτείνεται (α) η διαφοροποίηση εκείνων που εμπλέκονται στο σχεδιασμό, την ανάπτυξη συστημάτων ΤΝ, για να περιορίζεται η μεροληψία, (β) η αποφυγή κάθε είδους αποκλεισμού (ηλιακού, φύλου, ικανοτήτων, γεωγραφικού και πολιτισμικού) και (γ) η εμπλοκή των παιδιών στη διαμόρφωση των πολιτικών και στο σχεδιασμό και την ανάπτυξη των συστημάτων ΤΝ.
- **Προτεραιοποίηση της αμεροληψίας και των μη διακρίσεων σε βάρος των παιδιών**. Προτείνεται (α) η υποστήριξη περιθωριοποιημένων παιδιών, ευάλωτων ομάδων και προσφύγων, με σεβασμό στις πολιτισμικές, κοινωνικές και τοπικές διαφορές, (β) η δημιουργία βάσεων δεδομένων που να διασφαλίζουν την ποικιλομορφία, με ορθότητα, συνέπεια, εγκυρότητα και ποιότητα και (γ) η τροποποίηση των αλγόριθμων για την επίτευξη αμεροληψίας.
- **Προστασία των δεδομένων και της ιδιωτικότητας των παιδιών**. Προτείνεται (α) ο περιορισμός των δεδομένων στα όσο το δυνατόν λιγότερα, ταυτόχρονα όμως επαρκή για τη λειτουργία των συστημάτων ΤΝ προς όφελος των παιδιών, (β) να είναι τα παιδιά κύριοι των προσωπικών δεδομένων ανάλογα με τη φάση ανάπτυξή τους, (γ) η προστασία της ιδιωτικότητας από τον σχεδιασμό, βάσει των αρχών για επεξεργασία των δεδομένων για συγκεκριμένο σκοπό, για διαφάνεια στην επεξεργασία των «κρυφών» δεδομένων, και για διατήρησή τους για ελάχιστο χρονικό διάστημα και (δ) η μη δημιουργία προφίλ βασισμένου σε συλλογικά χαρακτηριστικά.
- **Ασφάλεια για τα παιδιά**. Προτείνεται (α) η ανάπτυξη πολιτικών και στρατηγικών για την ΤΝ που να μετριάζουν τις επιβλαβείς για τα παιδιά πρακτικές της, (β) η διαρκής εποπτεία σε όλο τον κύκλο ζωής των συστημάτων ΤΝ των επιπτώσεών τους στα κοινωνικά συστήματα και στις δομές, όπως και στην ανάπτυξη και στο γνωστικό επίπεδο των παιδιών, (γ) ο έλεγχος των συστημάτων ΤΝ σε ζητήματα ασφάλειας, προστασίας και στιβαρότητας και (δ) η χρήση των συστημάτων ΤΝ για προστασία των παιδιών από κινδύνους (π.χ. απαγωγή, πορνογραφία).
- **Παροχή διαφάνειας, επεξηγησιμότητας και λογοδοσίας για τα παιδιά**. Προτείνεται (α) η προώθηση της επεξηγησιμότητας και της διαφάνειας των συστημάτων ΤΝ, (β) η χρήση γλώσσας κατανοητής από τα παιδιά ανάλογα με την ηλικία τους, (γ) η σαφής ενημέρωσης των παιδιών και των γονέων και κηδεμόνων τους ότι διεπιδρούν με σύστημα ΤΝ, (δ) η σύννομη λειτουργία των συστημάτων ΤΝ, για να προστατεύουν και να ενισχύουν τα παιδιά, (ε) ο έλεγχος, η ανανέωση και η εξέλιξη του ρυθμιστικού πλαισίου με συμπερίληψη των δικαιωμάτων των παιδιών και (στ) η διαρκής επίβλεψη της ΤΝ για πιθανές παραβιάσεις των δικαιωμάτων των παιδιών.
- **Ενίσχυση κυβερνήσεων και εταιρειών σχετικά με τη γνώση της ΤΝ και των δικαιωμάτων των παιδιών**. Προτείνεται (α) η καλλιέργεια της επίγνωσης των διαμορφωτών πολιτικών, των διοικητικών στελεχών και των δημιουργών ΤΝ στο ζήτημα των δικαιωμάτων των παιδιών, (β) η αποκόμιση κέρδους με προώθηση του αιτήματος για αξιόπιστη και διαφανή ΤΝ για τα παιδιά και (γ) η δέσμευση για δημιουργία μιας παιδοκεντρικής ΤΝ.
- **Προετοιμασία των παιδιών για εξελίξεις της ΤΝ στο παρόν και στο μέλλον**. Προτείνεται (α) η ανάπτυξη προγραμμάτων εκπαίδευσης για τα παιδιά σε θέματα τεχνικά και δεξιοτήτων (π.χ. κριτική σκέψη, ενσυναίσθηση), (β) η ανάπτυξη δεξιοτήτων των εκπαιδευτικών σχετικά με τις κοινωνικές και προσωπικές επιπτώσεις της ΤΝ για τα παιδιά, (γ) η ενίσχυση της χρήσης των συστημάτων ΤΝ στην εκπαίδευση, όταν αυτά δεν θέτουν σε κίνδυνο τα παιδιά και παρέχουν ευκαιρίες σε περιθωριοποιημένες ομάδες, ευάλωτα άτομα, (δ) η διευκόλυνση της συνεργασίας μεταξύ εκπαιδευτικών ιδρυμάτων και εταιρειών και (ε) εκστρατείες ενημέρωσης προς γονείς και κηδεμόνες και προς την κοινωνία συνολικά σχετικά με το ποια δεδομένα πρέπει τα παιδιά να διαμοιράζονται, γιατί, με ποιον και πού, και ποια συστήματα ΤΝ να χρησιμοποιούν.
- **Δημιουργία ενός διευκολυντικού περιβάλλοντος**. Προτείνεται (α) η υποστήριξη για την ανάπτυξη τεχνικής υποδομής, ώστε να διαμοιράζονται τα οφέλη της ΤΝ ισότιμα, (β) η χρηματοδότηση για πολιτικές και στρατηγικές εστιασμένες στην παιδοκεντρική ΤΝ, (γ) η υποστήριξη της έρευνα για την ΤΝ για τα παιδιά και

μαζί με αυτά και (δ) η συνεργασία για τη δημιουργία λογισμικού ανοικτού κώδικα, ανοικτών βάσεων δεδομένων, ανοικτών μοντέλων ΤΝ.

Παρά την κριτική ότι το κείμενο της unicef παρουσιάζει ανακολουθίες και συγκρούσεις τόσο μεταξύ των απαιτήσεων όσο και μεταξύ των προτάσεων, ανεπαρκή συμπερίληψη και αντιπροσωπευτικότητα, διατήρηση του ψηφιακού χάσματος, ασάφειες σχετικά με την ανταπόκριση των φύλων και των ηλικιών των παιδιών που συμμετείχαν στα εργαστήρια, είναι το πρώτο διεθνές κείμενο που επιχειρεί να αντιμετωπίσει το κενό σχετικά με τις επιπτώσεις της ΤΝ στα παιδιά, ενώ επιχειρήθηκε να συμπεριληφθεί η γνώμη χωρών του αναπτυσσόμενου κόσμου και των παιδιών (Liu & Ding, 2024).

Όπως είναι λογικό, τα δεοντολογικά κείμενα συνδέονται στενά με τη δεοντολογική ηθική, επειδή επιδιώκουν να διαμορφώσουν ένα κοινό πλαίσιο κανόνων συμπεριφοράς. Παρόλο που έχουν ιδιαίτερη αξία και λειτουργούν ως οδηγοί για τη λήψη αποφάσεων, όποτε ανακύπτουν ηθικά ζητήματα που δεν καλύπτονται από νόμους και διατάξεις, δεν είναι δεσμευτικά και η τήρησή τους εναπόκειται στη συνείδηση εκείνου/ης που αντιμετωπίζει τα ζητήματα αυτά (Borestein & Howard, 2021). Επιπλέον, οι διεθνείς και διακρατικοί οργανισμοί που τα υιοθετούν δεν διαθέτουν κάποιον μηχανισμό επιβολής τους σε περίπτωση παραβιάσεων των αρχών τους (Hagendorff, 2020). Αντίθετα, οι εταιρείες παραγωγής και έρευνας συστημάτων ΤΝ πρόθυμα υιοθετούν ή διαμορφώνουν δικούς τους κώδικες δεοντολογίας, γιατί με τον τρόπο αυτόν αποφεύγουν από τη μία μεριά τη δέσμευση και από την άλλη την εισαγωγή νομοθετικών και κανονιστικών ρυθμίσεων που πιθανόν θα περιορίσουν το έργο τους, και για να αποκρύψουν τις πρακτικές τους από το κοινό-«ηθικό ξέπλυμα» (Hagendorff, 2020). Από την έρευνα έχει αποδειχθεί ότι οι ηθικοί κώδικες και η δεοντολογία δεν επηρεάζουν τις αποφάσεις των δημιουργών λογισμικού (McNamara & al., 2018). Οι κύριες αιτίες για την ανεπάρκεια των δεοντολογικών κειμένων είναι ο ανταγωνισμός κρατών, η επιδίωξη οικονομικού κέρδους από τις εταιρείες, τα ατομικά χαρακτηριστικά γνωρίσματα των δημιουργών, τα χαρακτηριστικά του οργανωσιακού περιβάλλοντος, τα χαρακτηριστικά του ηθικού ζητήματος και φυσικά το γενικότερο οικονομικό σύστημα (Hagendorff, 2020, McNamara & al., 2018).

Για τους λόγους αυτούς είναι αναγκαία η ανάπτυξη νομικών κειμένων. Σε επίπεδο ΕΕ έχουν εκδοθεί δύο *Κανονισμοί* με τα οποία επιχειρήθηκε να ρυθμιστούν ζητήματα σχετικά με την επεξεργασία προσωπικών δεδομένων το πρώτο και την ΤΝ το δεύτερο. Ο *Κανονισμός 2016/679* του Ευρωπαϊκού Κοινοβουλίου και Συμβουλίου (EU, 2016), γνωστός ως *Γενικός Κώδικας για την Προστασία Δεδομένων* (ΓΚΠΔ-GDPR), προβλέπει την προστασία των φυσικών προσώπων από την επεξεργασία των δεδομένων προσωπικού χαρακτήρα κυρίως σε θέματα που σχετίζονται με τον τομέα της αγοράς. Αρχές που πρέπει να διέπουν την επεξεργασία των προσωπικών δεδομένων είναι η νομιμότητα, η αντικειμενικότητα και διαφάνεια, ο περιορισμός του σκοπού, η ελαχιστοποίηση των δεδομένων, η ακρίβεια, ο περιορισμός της περιόδου αποθήκευσης, η ακεραιότητα και η εμπιστευτικότητα, η λογοδοσία (άρθρο 5). Η νομιμότητα στηρίζεται στη συναίνεση του υποκειμένου της επεξεργασίας (άρθρο 6). Για τα παιδιά ως ελάχιστο ηλιακό όριο συγκατάθεσης έχει οριστεί το 16 έτος, ενώ κάτω αυτού τους έτους η συγκατάθεση παρέχεται από τους γονείς και κηδεμόνες, ενώ επιτρέπεται στα κράτη-μέλη να ορίσουν άλλο ηλικιακό όριο αλλά όχι κάτω των 13 ετών (άρθρο 8). Η επεξεργασία ευαίσθητων προσωπικών δεδομένων (φυλετική ή εθνοτική καταγωγή, θρησκευτικές ή φιλοσοφικές πεποιθήσεις, συνδικαλιστική δράση, γενετικά δεδομένα, βιομετρικά δεδομένα, δεδομένα υγείας, σεξουαλική ζωή και γενετήσιος προσανατολισμός) απαγορεύεται με μερικές εξαιρέσεις (άρθρο 9). Το υποκείμενο των δεδομένων δικαιούται να έχει πρόσβαση στα δεδομένα του (άρθρο 15), να αιτηθεί τη διόρθωσή τους (άρθρο 16), τη διαγραφή τους (άρθρο 17), τον περιορισμό της επεξεργασίας τους (άρθρο 18), τη μεταφορά τους σε άλλον υπεύθυνο επεξεργασίας (άρθρο 20), να εναντιωθεί στην επεξεργασία των δεδομένων του και στην αυτοματοποιημένη λήψη αποφάσεων και την κατάρτιση προφίλ (άρθρο 22). Τα δικαιώματα αυτά ισχύουν και στον χώρο της εκπαίδευσης και τα δεδομένα που δημιουργούνται από τους/τις μαθητές/τριες κατά την αλληλεπίδρασή τους με τα συστήματα ΤΝ.

Το 2024 το Ευρωπαϊκό Κοινοβούλιο και το Ευρωπαϊκό Συμβούλιο δημοσίευσαν τον *Κανονισμό 2024/1689* (EU, 2024) *για τη θέσπιση εναρμονισμένων κανόνων σχετικά με την τεχνητή νοημοσύνη*. Εκκινώντας από τις διαπιστώσεις ότι τα συστήματα ΤΝ εξελίσσονται ραγδαία, ότι είναι αναγκαία η οικοδόμηση εμπιστοσύνης προς την ΤΝ στην κοινωνία, ότι απαιτείται να προστατευτούν τα δημόσια συμφέροντα στην υγεία, την ασφάλεια και τα θεμελιώδη δικαιώματα, ότι είναι αναγκαία η θέσπιση κοινών κανόνων στην ΕΕ, ότι είναι δυνατή η αντικανονική χρήση των συστημάτων ΤΝ για τη χειραγώγηση, την εκμετάλλευση και τον κοινωνικό έλεγχο, ότι τα συστήματα ΤΝ επηρεάζουν σημαντικούς τομείς της κοινωνίας και της οικονομίας, όπως η εκπαίδευση, η εργασία, οι δημόσιες υπηρεσίες, η απονομή δικαιοσύνης, οι δημοκρατικές εκλογές, και βάσει των κατευθυντήριων γραμμών δεοντολογίας για αξιόπιστη ΤΝ που δημοσιοποιήθηκαν το 2019 από τον ΟΕΥΕ για την ΤΝ, το Ευρωπαϊκό Κοινοβούλιο και το Ευρωπαϊκό Συμβούλιο:

- Όρισαν ως σκοπό την υιοθέτηση ανθρωποκεντρικής και αξιόπιστης ΤΝ (άρθρο 1).
- Απαγόρευσαν πρακτικές της ΤΝ, όπως η παραπλάνηση, η χειραγώγηση, η εκμετάλλευση, η εκτίμηση κινδύνου φυσικών προσώπων για την τέλεση αξιόποινης πράξης κ.λπ. (άρθρο 5).

- Προσδιόρισαν τα κριτήρια χαρακτηρισμού ενός συστήματος ΤΝ ως υψηλού κινδύνου (άρθρο 6), διαφοροποιώντας το από ένα μοντέλο γενικού σκοπού (άρθρο 53). Ως υψηλού κινδύνου απαριθμούνται στο Παράρτημα ΙΙΙ εκείνα που σχετίζονται με τη βιομετρική ταυτοποίηση και κατηγοριοποίηση, την αναγνώριση συναισθημάτων, την εκπαίδευση και την επαγγελματική κατάρτιση, την απασχόληση, πρόσβαση και απόλαυση ιδιωτικών και δημόσιων υπηρεσιών, την επιβολή του νόμου, τη διαχείριση της μετανάστευσης, την απονομή δικαιοσύνης και τις δημοκρατικές διαδικασίας.
- Καθόρισαν τις απαιτήσεις που είναι αναγκαίες για την ορθή λειτουργία ενός συστήματος ΤΝ υψηλού κινδύνου, όπως (α) η ύπαρξη συστήματος διαχείρισης κινδύνου σε όλον τον κύκλο ζωής του συστήματος ΤΝ (άρθρο 9), (β) η συλλογή, επεξεργασία και χρήση των δεδομένων που χρησιμοποιούνται στην εκπαίδευση, η επικύρωση και δοκιμή των συστημάτων ΤΝ σύμφωνα με τον σκοπό (άρθρο 10), (γ) η τήρηση αρχείων καταγραφής συμβάντων για ιχνηλασιμότητα (άρθρο 12), (δ) η διαφάνεια στον σχεδιασμό και την ανάπτυξη συστημάτων ΤΝ (άρθρο 13), (ε) η ύπαρξη κατάλληλων εργαλείων διεπαφής ανθρώπου-μηχανής, ώστε να εξασφαλίζεται η εποπτεία από τον άνθρωπο (άρθρο 14), και (στ) να εξασφαλίζεται η ακρίβεια, η στιβαρότητα και η κυβερνοασφάλεια σε όλον τον κύκλο ζωής των συστημάτων ΤΝ (άρθρο 15).
- Επίσης, προσδιόρισαν τις υποχρεώσεις των παρόχων συστημάτων ΤΝ γενικού σκοπού (άρθρο 53) να συμμορφώνονται με τους κανονισμούς για τα πνευματικά δικαιώματα και να γνωστοποιούν το περιεχόμενο με το οποίο έγινε η εκπαίδευση του μοντέλου.
- Τέλος, ορίστηκαν σώματα για την παρακολούθηση της εφαρμογής του Κανονισμού τόσο σε επίπεδο Ευρωπαϊκής Επιτροπής με τη σύσταση Συμβουλίου ΤΝ όσο και σε εθνικό επίπεδο (άρθρα 64-70), παρακολούθηση των συστημάτων ΤΝ μετά την αγορά, αναφορά σοβαρών συμβάντων και εποπτεία της αγοράς (άρθρα 72-94) και κώδικες δεοντολογίας και κατευθυντήριες γραμμές (άρθρα 95-96).

Ο *Κανονισμός* είναι αποτέλεσμα της ανάγκης να τεθεί ένα πλαίσιο κανόνων στην ανάπτυξη των συστημάτων ΤΝ και στη διάθεση τους στην αγορά, να διασφαλιστεί ότι αυτά χρησιμοποιούνται προς όφελος συνολικά όλων των χρηστών τους, να μειωθούν οι πιθανές ανησυχίες της κοινωνίας των πολιτών, χωρίς όμως να εμποδίζεται η εξέλιξή τους και η καινοτομία (άρθρα 57-63), και ακολουθεί τις δεοντολογικές αρχές που έχει ορίσει ο ΟΕΥΕ για την ΤΝ.

Τόσο τα δεοντολογικά όσο και τα νομικά κείμενα ακολουθούν την επιστημονική έρευνα σχετικά με τις προκλήσεις που ανακύπτουν με την είσοδο της ΤΝ στην εκπαίδευση και προσπαθούν να περιορίσουν τις αρνητικές συνέπειες (Borenstein & Howard, 2020), υιοθετώντας θέσεις, όπως η συμπερίληψη και η πρόσβαση όλων στα συστήματα ΤΝ, η τήρηση του νομικού πλαισίου για την επεξεργασία των προσωπικών δεδομένων, η υιοθέτηση πολιτικών και πρακτικών για την προστασία, τη συλλογή και την επεξεργασία των προσωπικών και εκπαιδευτικών δεδομένων, η καλλιέργεια του ψηφιακού γραμματισμού, ο κριτικός έλεγχος των αλγόριθμων και των βάσεων δεδομένων για την αποφυγή προκαταλήψεων, η διαφάνεια, η ιχνηλασιμότητα, η επεξηγησιμότητα, η λογοδοσία, η αμεροληψία (Eden et al., 2024).

ΕΚΠΑΙΔΕΥΣΗ ΓΙΑ ΚΑΛΛΙΕΡΓΕΙΑ ΗΘΙΚΗΣ ΣΥΜΠΕΡΙΦΟΡΑΣ ΣΧΕΤΙΚΑ ΜΕ ΤΗ ΤΝ

Η εκπαίδευση επηρεάζεται θετικά και αρνητικά από τη χρήση των συστημάτων ΤΝ. Ο ρόλος της στο θέμα αυτό είναι σημαντικός σε δύο επίπεδα. Πρώτον, για την καλλιέργεια του γραμματισμού στην ΤΝ, του γραμματισμού 4η γενιάς κατά τη Γαβριηλίδου (Gavriilidou, 2024) σύμφωνα με την οποία βασική δεξιότητα είναι η μεταγνώση, ώστε ο/η μαθητής/τρια να είναι σε θέση να αξιολογεί την ποιότητα των μαθησιακών πόρων και δεδομένων που προσφέρονται από τα συστήματα ΤΝ, και σκοπός είναι να μπορούν οι μαθητές/τριες να προσαρμόζονται στο διαρκώς μεταβαλλόμενο περιβάλλον, να προβλέπουν μελλοντικά προβλήματα και να αναζητούν βιώσιμες λύσεις λαμβάνοντας υπόψη τις συνέπειες των αποφάσεών τους. Δεύτερο, για τη διαμόρφωση της ηθικής συνείδησης και πρακτικής των μαθητών/τριών, ώστε να κάνουν ορθή χρήση της ΤΝ τόσο κατά τη συνολική ακαδημαϊκή πορεία τους όσο κι αργότερα ως πολίτες και επαγγελματίες.

Η εκπαιδευτική διαδικασία και η μάθηση εξελίσσεται μεταξύ δύο μερών, εκείνο των εκπαιδευτικών και εκείνο των μαθητών/τριών. Από την πλευρά των εκπαιδευτικών, από την έρευνα αποδεικνύεται ότι οι ίδιοι δεν θεωρούν ότι είναι κατάλληλα προετοιμασμένοι να καθοδηγήσουν τους/τις μαθητές/τριες τους (Holmes et al., 2021). Επομένως, απαιτείται να ενισχυθεί η επαγγελματική νοοτροπία τους σε θέματα ηθικής αξιοποίησης των συστημάτων ΤΝ (Borenstein & Howard, 2021). Με τον τρόπο αυτό θα είναι σε θέση να λειτουργούν ως παράδειγμα για τους/τις μαθητές/τριες τους τόσο ως χρήστες των συστημάτων αυτών όσο και ως μελλοντικοί/ές δημιουργοί τέτοιων συστημάτων (Borenstein & Howard, 2021). Στο πλαίσιο αυτό η ΕΕ εξέδωσε τις *Δεοντολογικές Κατευθυντήριες Γραμμές σχετικά με τη Χρήση Τεχνητής Νοημοσύνη (ΤΝ) και δεδομένων στη Διδασκαλία και τη Μάθηση για Εκπαιδευτικούς* (2022) στις οποίες αναγνωρίζεται ότι ο ρόλος των εκπαιδευτικών είναι σημαντικός. Για την υποβοήθησή τους σε μία κριτική προσέγγιση των συστημάτων ΤΝ καλούνται οι εκπαιδευτικοί να θέτουν μια σειρά από ερωτήματα σχετικά με τις βασικές απαιτήσεις για μια αξιόπιστη ΤΝ:

- **Ανθρώπινη παρέμβαση και εποπτεία**. Π.χ. ποιος είναι ο ρόλος του εκπαιδευτικού και κατά πόσο επηρεάζεται από το σύστημα ΤΝ; Ποιες οι δυνατότητες του εκπαιδευτικού να παρεμβαίνει; Πώς περιορίζεται η υπέρμετρη εμπιστοσύνη στο σύστημα ΤΝ;
- **Διαφάνεια**. Π.χ. ποιες μέθοδοι και ποια χαρακτηριστικά της ΤΝ χρησιμοποιούνται; Πώς λειτουργούν οι συγκεκριμένοι αλγόριθμοι αξιολόγησης και εξατομίκευσης; Πόσο αξιόπιστες είναι οι αξιολογήσεις του συστήματος;
- **Πολυμορφία, απαγόρευση των διακρίσεων και δικαιοσύνη**. Π.χ. έχουν όλοι/ες πρόσβαση στα συστήματα ΤΝ; Είναι η διεπαφή κατάλληλη; Αποφεύγονται οι διακρίσεις προς τους χρήστες; Πώς αντιμετωπίζονται περιπτώσεις μεροληψίας;
- **Κοινωνική και περιβαλλοντική ευημερία**. Π.χ. πώς επηρεάζεται η ευημερία των μαθητών/τριών και των εκπαιδευτικών; Είναι σαφές ότι οι χρήστες διεπιδρούν με ένα σύστημα που δεν διαθέτει συναισθήματα ή ενσυναίσθηση;
- **Ιδιωτική ζωή και διακυβέρνηση των δεδομένων**. Π.χ. ανωνυμοποιούνται τα ευαίσθητα προσωπικά δεδομένα; Ποιος έχει πρόσβαση στα δεδομένα και πώς ελέγχεται αυτό; Τα εκπαιδευτικά δεδομένα χρησιμοποιούνται μόνο για τον σκοπό για τον οποίο συλλέχθηκαν;
- **Τεχνική στιβαρότητα και ασφάλεια**. Π.χ. αποκλείονται οι παραβιάσεις των δεδομένων; Ελέγχεται επαρκώς και διαρκώς το σύστημα ΤΝ για το κατά πόσο επιτυγχάνει τους στόχους του; Συλλέγονται και αποθηκεύονται μόνο τα αναγκαία δεδομένα;
- **Λογοδοσία**. Π.χ. ποιος είναι υπεύθυνος για την παρακολούθηση των αποτελεσμάτων που παράγει το σύστημα ΤΝ; Ποιος έχει την ευθύνη για την τελική απόφαση για την προμήθεια και εγκατάσταση του συστήματος;

Τέλος, σχετικά με τον ρόλο και την ευθύνη των εκπαιδευτικών είναι αναγκαίο να αναπτυχθούν προγράμματα επιμόρφωσης. Μπορεί να προσφέρεται μια πληθώρα προγραμμάτων σύντομης επιμόρφωσης σε θέματα ΤΝ προς εκπαιδευτικούς (π.χ. ΕΚΠΑ, Πανεπιστήμιο Πελοποννήσου, seminars.etwinning.gr), όμως τα περισσότερα από αυτά είναι επί πληρωμή και δεν είναι σαφές κατά πόσο αναπτύσσουν επαρκώς τα ηθικά ζητήματα που συνδέονται με τη χρήση συστημάτων ΤΝ. Χρειάζεται να οργανωθεί ένα μαζικό πρόγραμμα ευαισθητοποίησης από κρατικούς φορείς με εστίαση κυρίως στα ηθικά ζητήματα.

Από την άλλη πλευρά, για τη διαμόρφωση της νοοτροπίας των μαθητών/τριών είναι αναγκαίο να αναπτυχθούν δραστηριότητες που να στοχεύουν στην εξοικείωσή τους με τον ηθικό σχεδιασμό των αλγόριθμων, τη συλλογή και αξιοποίηση των δεδομένων με ηθικό τρόπο, και στη διδασκαλία με ηθικό περιεχόμενο σε ποικίλες περιπτώσεις και διαθεματικά. Το επιδιωκόμενο αποτέλεσμα είναι να καλλιεργηθεί η κριτική σκέψη και ηθικά αιτιολογημένη λήψη αποφάσεων (Borenstein & Howard, 2021) και η καλλιέργεια ηθικών αξιών που να συνδέονται με την ηθική χρήση της ΤΝ (Gavriilidou, 2024). Επειδή τα δεοντολογικά κείμενα αναφέρονται γενικόλογα σε ηθικές αρχές, ενώ τα συστήματα ΤΝ είναι σύνθετα, χρήσιμο θα ήταν οι μαθητές/τριες να εξοικειώνονται σταδιακά και τμηματικά με τα ηθικά θέματα ενός τέτοιου συστήματος, όπως της τεχνολογίας, των μηχανών, των υπολογιστών, της πληροφορίας και των δεδομένων (Hagendorff, 2020). Επίσης, η ηθική εκπαίδευση των μαθητών/τριών είναι απαραίτητο να συνδυάζει τη δεοντολογική ηθική, όπως εκφράζεται μέσα από τα δεοντολογικά και νομικά κείμενα, αλλά και να επιδιώκει την καλλιέργεια των ιδιαίτερων στοιχείων στον χαρακτήρα και στις προδιαθέσεις στη συμπεριφορά του καθενός και καθεμίας από αυτούς/ές, όπως η ειλικρίνεια, η δικαιοσύνη, το κουράγιο, η ενσυναίσθηση, η μεγαλοθυμία κ.λπ., ώστε να μεταβληθούν οι στάσεις τους, να ενισχυθεί η υπευθυνότητά τους και η διάθεσή τους να αποφεύγουν ανήθικες δράσεις (Hagendorff, 2020). Τέλος, μέσω της διασποράς της ηθικής ευθύνης προς το άτομο απαιτείται να καλλιεργηθεί η αίσθηση της ατομικής ευθύνης για την επίτευξη του κοινού οφέλους, όπως πρεσβεύει ο ωφελιμισμός.

Σε πρακτικό επίπεδο, χρήσιμο είναι να αναπτυχθούν ανοικτής πρόσβασης πόροι σχετικά με την ΤΝ και την ηθική, ώστε να διευκολυνθούν και να καθοδηγηθούν οι εκπαιδευτικοί στο έργο τους, και οι πόροι αυτοί είναι αναγκαίο να είναι προσαρμοσμένοι στο γνωστικό και αναπτυξιακό επίπεδο των μαθητών/τριών. Χαρακτηριστικό παράδειγμα είναι το project "AI for Oceans" του οργανισμού code.org στο οποίο χρησιμοποιείται ένα μοντέλο μάθησης μηχανών. Μέσω των δραστηριοτήτων οι μαθητές/τριες μαθαίνουν βιωματικά σχετικά με την ΤΝ, τους αλγόριθμους, τη μάθηση μηχανών και τις προκαταλήψεις και προβληματίζονται για την ακρίβεια των συστημάτων ΤΝ, πώς γίνεται η εκπαίδευσή τους, ποια είναι τα όρια τους και για τους κινδύνους που αναφύονται, όταν οι βάσεις δεδομένων βάσει των οποίων γίνεται η εκπαίδευση εμπεριέχουν προκαταλήψεις. Επίσης, το MIT Media Lab προσφέρει ένα πρόγραμμα σπουδών ανοικτής πρόσβασης με τον τίτλο "AI and Ethics Curriculum" το οποίο απευθύνεται σε μαθητές/τριες της μέσης εκπαίδευσης. Μέσω των δραστηριοτήτων οι μαθητές/τριες μαθαίνουν σε συνεργατικό πλαίσιο για τα συστατικά ενός συστήματος ΤΝ (αλγόριθμοι, βάσεις δεδομένων κ.λπ.) και προβληματίζονται για πιθανές προκαταλήψεις στους αλγόριθμους, τους ποικίλους ενδιαφερόμενους για την ΤΝ και τα ιδιαίτερα κίνητρα, στόχους και αξίες τους (Akgun & Greenhow, 2022).

ΣΥΜΠΕΡΑΣΜΑΤΑ

Η ΤΝ υπάρχει παντού γύρω μας και αναπόφευκτα χρησιμοποιείται στην εκπαίδευση. Τα οφέλη που προσφέρει είναι σημαντικά υποβοηθώντας τους/τις μαθητές/τριες στη διδασκαλία και στη μάθηση, τους εκπαιδευτικούς στην προετοιμασία και την αξιολόγηση των μαθητών/τριών, τη διοίκηση στη διαχείριση των πόρων, και τους γονείς και κηδεμόνες σε θέματα προόδου των παιδιών τους. Η χρήση όμως των συστημάτων ΤΝ δεν είναι απαλλαγμένη από κινδύνους, όπως η μεροληψία, οι προκαταλήψεις, ο αποκλεισμός ευάλωτων ατόμων και κοινωνικών ομάδων, η διεύρυνση του ψηφιακού χάσματος. Για την αντιμετώπιση αυτών βάση μπορεί να αποτελέσει η Ηθική και κυρίως τρεις σχολές, η δεοντολογική ηθική, ο ωφελιμισμός και η ηθική των αρετών. Τα κείμενα δεοντολογίας και οι νόμοι που έχουν συνταχθεί αντλούν από τους χώρους της Ηθικής και της ακαδημαϊκής έρευνας, προσπαθώντας να θέσουν ένα πλαίσιο για την έρευνα, την ανάπτυξη και τη λειτουργία των συστημάτων ΤΝ, χωρίς όμως να ανακόψουν την ανάπτυξή τους, και επιδιώκοντας το γενικό καλό. Για την ανάπτυξη με ηθικό τρόπο των συστημάτων ΤΝ και την ηθική χρήση τους είναι σημαντικός ο ρόλος της εκπαίδευσης. Απαιτείται, λοιπόν, από τη μία μεριά να ενισχυθεί η επίγνωση των εκπαιδευτικών σχετικά με τους κινδύνους από τη χρήση των συστημάτων ΤΝ και η κριτική ικανότητά τους σχετικά με την υιοθέτηση και χρήση τους κατά τη διδασκαλία, και από την άλλη μεριά να διαμορφωθούν εκείνα τα χαρακτηριστικά στους/στις μαθητές/τριες που θα τους κάνουν να χρησιμοποιούν με ηθικό τρόπο της ΤΝ ως πολίτες και να συμμετέχουν με ηθικό τρόπο στη χρήση και την ανάπτυξή τους.

ΘΠ7: Ψηφιακή πολιτειότητα (Digital Citizenship)

ΕΝΕΡΓΟΣ ΠΟΛΙΤΕΙΟΤΗΤΑ ΚΑΙ ΨΗΦΙΑΚΟΣ ΚΟΣΜΟΣ Ο ΡΟΛΟΣ ΤΗΣ ΕΚΠΑΙΔΕΥΣΗΣ ΣΤΗ ΔΙΑΜΟΡΦΩΣΗ ΕΝΕΡΓΩΝ ΜΑΘΗΤΩΝ-ΠΟΛΙΤΩΝ ΣΤΟΝ ΨΗΦΙΑΚΟ ΔΗΜΟΣΙΟ ΧΩΡΟ

Δημακοπούλου Φωτεινή

ΠΕΡΙΛΗΨΗ

Η παρούσα μελέτη εξετάζει την έννοια της ενεργού πολιτειότητας στο σύγχρονο ψηφιακό κόσμο, εστιάζοντας στον καθοριστικό ρόλο της εκπαίδευσης στη διαμόρφωση ενεργών, υπεύθυνων και κριτικά σκεπτόμενων μαθητών-πολιτών. Μέσα από θεωρητική και εννοιολογική ανάλυση, διερευνώνται οι μετασχηματισμοί της ιδιότητας του πολίτη υπό το πρίσμα της ψηφιοποίησης, της παγκοσμιοποίησης και της πολυπολιτισμικότητας, καθώς και η ανάδυση της ψηφιακής πολιτειότητας ως βασικής διάστασης της σύγχρονης δημοκρατικής συμμετοχής. Ιδιαίτερη έμφαση δίνεται στη σύνδεση της ψηφιακής πολιτειότητας με την ψηφιακή νοημοσύνη, η οποία περιλαμβάνει γνωστικές, κοινωνικές, συναισθηματικές και ηθικές δεξιότητες απαραίτητες για την ασφαλή και υπεύθυνη συμμετοχή στον ψηφιακό δημόσιο χώρο. Η μελέτη δείχνει ότι η εκπαίδευση οφείλει να υπερβεί την απλή καλλιέργεια τεχνικών δεξιοτήτων και να υιοθετήσει μια ολιστική προσέγγιση, που ενισχύει την κριτική σκέψη, την ψηφιακή ηθική και την ενεργό συμμετοχή. Συμπερασματικά, η εκπαίδευση για την ψηφιακή πολιτειότητα αποτελεί βασική προϋπόθεση για την ενδυνάμωση της δημοκρατίας και την οικοδόμηση μιας συμπεριληπτικής και υπεύθυνης ψηφιακής κοινωνίας.

Λέξεις-κλειδιά: ενεργός πολιτειότητα, ψηφιακός πολίτης, ψηφιακή νοημοσύνη εκπαίδευση ψηφιακού πολίτη.

ΕΙΣΑΓΩΓΗ

Στον 21ο αιώνα, η κοινωνία βασίζεται όλο και περισσότερο στη γνώση, την πληροφορία και τις παγκόσμιες διασυνδέσεις, γεγονός που μεταμορφώνει την έννοια της ιδιότητας του πολίτη. Οι ΤΠΕ έχουν διεισδύσει σε κάθε πτυχή της ζωής – από την επικοινωνία και την κοινωνική αλληλεπίδραση έως την ενημέρωση, την εκπαίδευση και την εργασία – δημιουργώντας ένα νέο κοινωνικό πλαίσιο με κύριο χαρακτηριστικό τη συνεχή ροή πληροφοριών (Panagiotakopoulos, 2020). Για να προσαρμοστεί και να ανταπεξέλθει σε αυτό το δυναμικό και απαιτητικό περιβάλλον, ο σύγχρονος πολίτης πρέπει να αναπτύξει ψηφιακές δεξιότητες, να συμμετέχει ενεργά στη δημιουργία, διαχείριση και αξιοποίηση της πληροφορίας και να λαμβάνει υπόψη τις ηθικές και πολιτισμικές διαστάσεις των τεχνολογιών (Marinaki, 2015).

Η ΙΔΙΟΤΗΤΑ ΤΟΥ ΠΟΛΙΤΗ: ΕΝΝΟΙΟΛΟΓΙΚΗ ΑΠΟΣΑΦΗΝΙΣΗ

Η ιδιότητα του πολίτη ή πολιτειότητα, (citizenship), είναι μια έννοια που διαθέτει πολλές σημασίες. Είναι μια έννοια πολυσήμαντη και δύσκολη να προσδιοριστεί. Συνδέεται με τη συγκρότηση δύο παραδόσεων: την *πολιτική-δημοκρατική* με άξονα την «πόλη», την πολιτική συμμετοχή και τη δημοκρατία («δήμος», democracy) και τη *φιλελεύθερη-κοσμοπολίτικη*, με άξονες τον «κόσμο», το φιλελευθερισμό (liberalism) και τον κοσμοπολιτισμό (cosmopolitanism) (Delanty,2007). Η ιδιότητα του πολίτη, ως μια από τις πιο επίμαχες έννοιες της δυτικής πολιτικής φιλοσοφίας, είναι μια έννοια με μεταβαλλόμενο περιεχόμενο διότι απηχεί τις κοινωνικές σχέσεις που συνθέτουν κάθε κοινωνία και τη δυναμική συνύπαρξη πολλαπλών λόγων περί ιδιότητας του πολίτη, ειδικά στις φιλελεύθερες δημοκρατίες (Balias, 2008). Επομένως θα μπορούσαμε να πούμε ότι υπάρχουν τόσοι τύποι πολιτών όσοι και τύποι κρατών (Canivez, 2000).

Αναλυτικότερα, η έννοια του «πολίτη», γεννήθηκε στην αρχαία Ελλάδα στο πλαίσιο της *«πόλεως»*. Σύμφωνα με τον Αριστοτέλη, ο πολίτης, «*δι' απλώς ουδέν των άλλων ορίζεται ή τω μετέχειν κρίσεως και αρχής*» (Μάραντος & Οικονόμου, 2004). Στον αντίποδα της αριστοτελικής παράδοσης η νεωτερική-φιλελεύθερη πολιτική παράδοση θέτει στο επίκεντρο τις ελευθερίες και τα δικαιώματα του ατόμου, ενώ στην κοινωνία της παγκοσμιοποίησης η ιδιότητα του πολίτη αποκτά μια οικουμενική διάσταση. Στο πλαίσιο μιας κοινωνίας με υπερεθνικά χαρακτηριστικά, η έννοια του πολίτη συνδέεται με νέες έννοιες όπως είναι η *μετα-εθνική πολιτειότητα* (post-national citizenship), η *ευρωπαϊκή διακυβέρνηση*, (european governance), η *παγκόσμια κοινωνία των πολιτών*, (global civil society) και ο *κοσμοπολιτισμός* (cosmopolitanism) (Beck,2000·Habermas,2001·Featherstone, 2002).

Τις τελευταίες δεκαετίες το ενδιαφέρον των επιστημόνων στράφηκε έντονα προς τη μελέτη της έννοιας του πολίτη, ενισχύθηκε ο προβληματισμός αναφορικά με την ερμηνεία της, τη νοηματοδότηση του όρου «ενεργός πολίτης», τη συσχέτισή της με τον αποτελεσματικό και δημοκρατικό πολίτη, τη σχέση της με την κοινωνία των πολιτών και τις επιταγές της πολυπολιτισμικής συμβίωσης (Karakatsani, 2005·Balias, 2008).Σε πολλές περιπτώσεις παρατηρείται μια στροφή στο κλασσικό ορισμό του Marsall (1949, όπ. αναφ. στο Marsall & Bottomore,1995), ο οποίος αναφέρει:

Η ιδιότητα του πολίτη είναι μια κοινωνική θέση που απονέμεται σε όλους, όσοι είναι πλήρη μέλη μιας κοινότητας. Όλοι όσοι την κατέχουν είναι ίσοι ως προς τα δικαιώματα και τις υποχρεώσεις, με τις οποίες έχει εμπλουτιστεί αυτή η θέση. Δεν υπάρχει καθολική αρχή που να καθορίζει ποια θα είναι αυτά τα δικαιώματα και οι υποχρεώσεις (σελ.62).

Ο Marshall κάνει λόγο για την «εκ συμμετοχής ιδιότητα του πολίτη» και προτείνει τη διάκριση της ιδιότητας του πολίτη σε τρία συστατικά στοιχεία: α) το ατομικό στοιχείο (δικαιώματα απαραίτητα για την ελευθερία του ατόμου – προσωπική ελευθερία, ελευθερία έκφρασης, σκέψης, πίστης κ.λπ.), β) το πολιτικό στοιχείο (δικαίωμα συμμετοχής στην άσκηση της πολιτικής δύναμης) και γ) το κοινωνικό στοιχείο (όλο το φάσμα δικαιωμάτων της ζωής ενός πολιτισμένου όντος σύμφωνα με το επίπεδο ζωής που γίνεται αποδεκτό στη συγκεκριμένη κοινωνία). Οι διατυπώσεις του Marshall παρά τα χρόνια που έχουν περάσει, αποτελούν σημείο αναφοράς και συνεχίζουν να επηρεάζουν τις κοινωνιολογικές μελέτες πολλών χωρών.

Ο Oldfield (1990) προσδίδει στην ιδιότητα του πολίτη δύο μορφές: τη νομική και την πρακτική. Η πρώτη περιλαμβάνει τα δικαιώματα του πολίτη ως μέλους μιας κοινωνίας, που του επιτρέπουν να συμμετέχει στα κοινά (να είναι κανείς πολίτης) και η δεύτερη αναφέρεται στη λειτουργία του κάθε μέλους μίας δημοκρατικής κοινωνίας, δηλαδή να ενεργεί κανείς ως πολίτης.

Κατά τον Weil (όπ. αναφ. στο Canivez, 2000) αυτό που καθορίζει τη δημοκρατία είναι το κράτος, στο οποίο κάθε πολίτης θεωρείται «*δυνάμει κυβερνών»* και όλοι μπορούν να διεκδικήσουν μια υπεύθυνη πολιτική θέση. Αυτό σημειώνει ότι η ελευθερία και η πολιτική ισότητα δεν ενυπάρχουν μόνο στην καθολική ψηφοφορία, αλλά ουσιαστικά και στο ότι κανένας πολίτης δεν αποκλείεται, εκ των προτέρων, από την άσκηση κυβερνητικών λειτουργημάτων. ΄Οψεις και πλευρές μιας «εναλλακτικής ιδιότητας του πολίτη», χωρίς κλειστή ταυτότητα, με έντονο το κριτήριο της πολιτικής συμμετοχής και με τα χαρακτηριστικά του νομαδικού υποκειμένου, ήδη τίθεται στη δημόσια σφαίρα (Braidotti, 2004).

Γι' αυτό λοιπόν, το ζητούμενο σήμερα διεθνώς είναι η εκπαίδευση για μια δημοκρατική ιδιότητα του πολίτη, για έναν πολίτη με δημοκρατικές αρχές και πεποιθήσεις. Στο σχετικό κείμενο της Ευρωπαϊκής Επιτροπής με τίτλο «Education and active citizenship in the European Union» εισάγεται μια διευρυμένη έννοια της ταυτότητας και της ιδιότητας του πολίτη, η οποία συμπεριλαμβάνει τις ακόλουθες διαστάσεις: α) τη *νομική διάσταση,* η οποία περιέχει ένα δίκτυο πολιτειακών, κοινωνικών και πολιτικών δικαιωμάτων, β) τη *συναισθηματική διάσταση*, η οποία συνδέεται με την προαγωγή της κοινωνικής ένταξης και συνοχής καθώς και με θέματα ταυτότητας και αξιών, γ) τη *γνωστική διάσταση*, η οποία συνδέεται με θέματα πληροφόρησης και γνώσης και δ) την *πρακτική διάσταση*, η οποία αφορά στη δραστηριοποίηση και τη συμμετοχή του πολίτη στα κοινά.

Οι κυρίαρχες αυτές αντιλήψεις για την ιδιότητα του πολίτη δεν καλύπτουν όμως τις σύγχρονες ανάγκες. Η ιδιότητα του πολίτη στην κυρίαρχη εννοιολόγησή της, και παρά τον οικουμενικό φαινομενικά χαρακτήρα της, καθόλου δε συμβιβάζεται με την διαφορετικότητα και την πολυμορφία, την ανάπτυξης των νέων τεχνολογιών και τον ψηφιακό κόσμο. Εξάλλου όπως υποστηρίζει η Αβδελά (Avdela, 1998),οι διαδικασίες μέσα από τις οποίες συγκροτήθηκε το περιεχόμενο της ιδιότητας του πολίτη παρήγαγαν αποκλεισμούς και προσέδωσαν στην έννοια μια ψευδή οικουμενικότητα.

Αναγνωρίζοντας τους περιορισμούς των κύριων παραδόσεων για την ιδιότητα του πολίτη που προαναφέρθηκαν, υπογραμμίζουμε πως μια συνθετική προσέγγιση της έννοιας που θα περιέχει στοιχεία των κύριων ιστορικών παραδόσεων είναι αναγκαία. Θα πρέπει, λοιπόν, να προβληματιστούμε ως προς το τι σημαίνει να είναι κανείς πολίτης, σε μια εποχή που χαρακτηρίζεται ως εποχή της μετανεωτερικότητας, της πολυπολιτισμικότητας, της ψηφιοποίησης, της παγκοσμιοποίησης. Με αυτά τα δεδομένα ο πολίτης στον 21ο αι. θα πρέπει να έχει υιοθετήσει τις αρχές της κοινωνικής δικαιοσύνης, της κοινωνικής συνοχής, της συνεργασίας, με δεδομένο ότι η κοινωνία διακρίνεται για την πολιτιστική ποικιλία της και να διαθέτει ένα κριτικό, δημιουργικό, αυτόνομο και συστηματικό τρόπο σκέψης. Ο πολίτης σήμερα θα πρέπει να διακρίνεται για συνεργατικό πνεύμα, δυνατότητα ευελιξίας, αυτόνομη σκέψη, κρίση και δράση. Το βάρος της έννοιας μετατοπίζεται στα νόμιμα δικαιώματα, στην έννοια της κοινωνικής διαδικασίας, και αναδύεται και η έννοια του κοσμοπολίτη, που χαρακτηρίζεται από κινητικότητα, εκκοσμίκευση, αποδοχή της υβριδικότητας και ανεκτικότητα (Isin,2000) .

Η ιδιότητα έτσι του πολίτη προκύπτει σαν μία δυναμική έννοια στο κέντρο της οποίας βρίσκεται η ιδέα της ανθρώπινης εμπρόθετης δράσης, έτσι όπως διατυπώνεται από την Lister (1999), εννοιολόγηση την οποία υιοθετούμε και στην παρούσα μελέτη. Μια τέτοια προσέγγιση της έννοιας του πολίτη είναι ιδιαίτερα σημαντική γιατί συνενώνει την πολιτική συμμετοχή με την ευρεία έννοια, την απόλαυση των αναγκαίων δικαιωμάτων για εμπρόθετη δράση, την πραγματοποίηση του πλήρους δυναμικού της νομικής κατάστασης του ατόμου, την δραστηριοποίηση σε όλους τους τομείς της κοινότητας στην οποία ζει, την πορεία αυτό-πραγμάτωσης και αυτό-ανάπτυξης του ατόμου. Ο πολίτης με αυτή την έννοια είναι αυτόνομο δρων υποκείμενο ενδυναμωμένο, πολυδύναμο, πολυδιάστατο και πολυεπίπεδο. Από αυτή την οπτική γωνία, η νέα εμπνευσμένη πολιτειότητα δυνητικά προάγει τον ουσιαστικό «εκδημοκρατισμό της δημοκρατίας» (Giddens, όπ. αναφ. στο Tsekeris & Katrivesis,, 2007-2008), τη λογική της δικαιωματικής συμμετοχής όλων στις κοινωνικοπολιτικές διαδικασίες (βάσει της οικουμενικής ανθρώπινης ιδιότητας) και την εικόνα του «ενδυναμωμένου» (empowered) και «πολυδύναμου» (modular) πολίτη, ο οποίος κινείται ταυτόχρονα στο ιδιωτικό και στο δημόσιο, στο τοπικό και στο παγκόσμιο, στο ψηφιακό και φυσικό κόσμο (Tsekeris & Katrivesis, 2007-2008).

Λαμβάνοντας υπόψη ότι το Διαδίκτυο ως «ψηφιακός δημόσιος χώρος», ενισχύει την πρόσβαση στην πληροφορία και διευκολύνει τη διαμόρφωση κοινών απόψεων, συμβάλλοντας στην ενεργή πολιτειότητα και την ενδυνάμωση του πολίτη (Papacharissi, 2010; Mossberger, Tolbert & McNeal, 2008) γίνεται αντιληπτό ότι η ψηφιακή συμμετοχή, υπό την έννοια της ψηφιακής πολιτειότητας, αποτελεί κρίσιμο παράγοντα για την ενίσχυση της δημοκρατίας, καθώς παρέχει στους χρήστες εργαλεία για την άσκηση των δικαιωμάτων τους και την κοινωνική συνοχή (Isin & Ruppert, 2020· Ribble, 2011). Ωστόσο, η πραγματική δυναμική του Διαδικτύου ως δημόσιου χώρου προϋποθέτει ουσιαστική άσκηση πολιτειότητας, καλλιέργεια της ψηφιακής νοημοσύνης και εκπαίδευση που προάγει τη συμπερίληψη όλων των πολιτών.

ΨΗΦΙΑΚΗ ΠΟΛΙΤΕΙΟΤΗΤΑ: ΕΝΝΟΙΟΛΟΓΙΚΗ ΑΠΟΣΑΦΗΝΙΣΗ

Οι Hobbs και Jensen (2009, όπως αναφέρει η Μαρινάκη, 2015), ορίζουν την ψηφιακή πολιτειότητα ως «τις δεξιότητες και τις γνώσεις εκείνες οι οποίες κρίνονται απαραίτητες προκειμένου το άτομο να μπορεί να λειτουργεί αποτελεσματικά σε ένα ολοένα και πιο απαιτητικό περιβάλλον κοινωνικής δικτύωσης (social media environment), εντός του οποίου ο διαχωρισμός [….] της δημόσιας από την ιδιωτική σφαίρα παραμένει αδιόρατος, αναδεικνύοντας νέες προκλήσεις σε ήθη (ethical challenges) και ταυτόχρονα ένα (διαφορετικό) πλέγμα ευκαιριών» στο σύνολο του (ηλικιακού) πληθυσμού που βρίσκεται σε άμεση και καθημερινή επαφή με τις νέες τεχνολογίες. Η Collier (2009) αλλά και ο Ribble (2012), ορίζουν την ψηφιακή πολιτειότητα ως «κριτική σκέψη και ηθική επιλογή για το περιεχόμενο και τον

αντίκτυπο στον ίδιο τον εαυτό, τους άλλους και την κοινότητα του τι ο καθένας βλέπει, λέει και παράγει μέσω της χρήσης των συσκευών και των τεχνολογιών». Οι Ribble, Baily και Ross (2004) ορίζουν τη σύγχρονη εκδοχή της ιδιότητας του πολίτη ως πρακτική ως συνεπή και υπεύθυνη συμπεριφορά σε συνάρτηση με τη χρήση της τεχνολογίας, στα πλαίσια του σύγχρονου, παγκοσμιοποιημένου, δικτυωμένου κοινωνικού και πολιτικού συγκείμενου, ως μια συμπεριφορική τυπολογία που σχετίζεται με την «ενεργό χρήση της τεχνολογίας».

Διεξάγεται έτσι το συμπέρασμα ότι η ψηφιακή πολιτειότητα ορίζεται ως η ηθική, δεοντολογική και υπεύθυνη χρήση της τεχνολογίας για να διασφαλιστεί η ασφάλεια του ατόμου όταν συνεργάζεται σε μια όλο και περισσότερο ψηφιακή, δικτυωμένη και παγκόσμια κοινωνία (Ribble, 2009). Περιλαμβάνει την υπεύθυνη χρήση των τεχνολογιών, την ψηφιακή διακυβέρνηση, την προστασία των δεδομένων και την ενεργό συμμετοχή στην ηλεκτρονική κοινωνία (Mossberger et al., 2008).

Σύμφωνα με τη διεθνή βιβλιογραφία , στηρίζεται σε εννέα τομείς/πρότυπα συμπεριφοράς (Σχήμα 1). Συγκεκριμένα:

Ψηφιακή Πρόσβαση (Digital Access): αφορά τη δίκαιη και ισότιμη πρόσβαση στα ψηφιακά μέσα και τεχνολογίες, χωρίς κοινωνικό ή οικονομικό αποκλεισμό (Ribble, 2015). Σύμφωνα με την UNESCO (2018), το ψηφιακό χάσμα (digital divide) παραμένει κρίσιμο ζήτημα, ιδιαίτερα σε αναπτυσσόμενες χώρες. Η έρευνα του OECD (2020) υπογραμμίζει ότι η έλλειψη πρόσβασης σε υψηλής ταχύτητας διαδίκτυο περιορίζει τις εκπαιδευτικές και οικονομικές ευκαιρίες.

Ψηφιακό εμπόριο (Digital Commerce): αναφέρεται στην ασφαλή και ηθική συμμετοχή στην ηλεκτρονική αγορά και πώληση αγαθών (Ribble & Bailey, 2007). To Global E-commerce Report (2023) εκτιμά ότι το 24% του παγκόσμιου εμπορίου πραγματοποιείται ηλεκτρονικά. Μελέτες (Eurostat, 2022) καταγράφουν αυξημένα κινδύνους (π.χ. απάτες, κλοπή δεδομένων), ιδιαίτερα σε απροστάτευτους καταναλωτές.

Ψηφιακές Επικοινωνίες (Digital Communication): περιλαμβάνει τις ηθικές και αποτελεσματικές πρακτικές επικοινωνίας μέσω email, κοινωνικών δικτύων και άλλων ψηφιακών μέσων (Ohler, 2010).

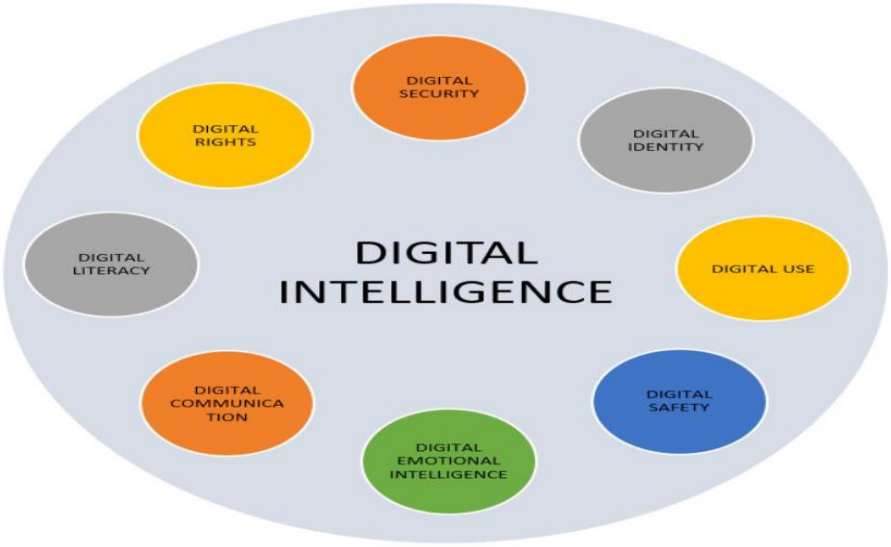
Ψηφιακός Εγγραμματισμός (*DigitalLiteracy*): η ικανότητα κριτικής αξιολόγησης και δημιουργικού χειρισμού ψηφιακού περιεχομένου (Gilster, 1997). Είναι η ικανότητα **εύρεσης, αξιολόγησης και χρήσης** ψηφιακών πληροφοριών με κριτική σκέψη (Hobbs, 2017).

Ψηφιακή Δεοντολογία (*DigitalEtiquette*): η έννοια της **Ψηφιακής Δεοντολογίας (Digital Citizenship)** αναφέρεται στον **ηθικό, υπεύθυνο και ασφαλή χρήση των ψηφιακών τεχνολογιών** και καλύπτει πολυδιάστατες πτυχές της διαδικτυακής συμπεριφοράς.

Ψηφιακό Δίκαιο (*DigitalLaw)*: περιλαμβάνει τις **νομικές υποχρεώσεις** και τις συνέπειες της παράνομης ψηφιακής συμπεριφοράς (π.χ. πειρατεία, χάκερ) (Solove, 2021).

Ψηφιακή Ασφάλεια (*DigitalSecurity*): αφορά την **προστασία των δεδομένων, των συσκευών και της ταυτότητας** από κλοπές, ιούς και άλλες απειλές (Schneier, 2020).

Ψηφιακή υγεία και ευεξία (*DigitalHealth&Wellness):* αναφέρεται στην **ισορροπημένη χρήση** της τεχνολογίας για την αποφυγή ψυχολογικών και σωματικών βλαβών (Twenge, 2018).



Ψηφιακά Δικαιώματα και Υποχρεώσεις (*DigitalRights&Responsibilities):* περιλαμβάνει τα **δικαιώματα (π.χ. ιδιωτικότητα, έκφραση)** και τις **υποχρεώσεις (π.χ. σεβασμός, πληρωμή για υπηρεσίες)** των ψηφιακών πολιτών (Bennett, 2018).

ΨΗΦΙΑΚΗ ΝΟΗΜΟΣΥΝΗ

Η έννοια της ψηφιακής πολιτειότητας συνδέεται στενά με την ψηφιακή νοημοσύνη (digital intelligence), καθώς αμφότερες προϋποθέτουν την ανάπτυξη σύνθετων γνωστικών, κοινωνικών και ηθικών δεξιοτήτων για την υπεύθυνη και ασφαλή συμμετοχή στο ψηφιακό περιβάλλον. Η ψηφιακή νοημοσύνη ορίζεται ως η ικανότητα ενός ατόμου να χρησιμοποιεί την τεχνολογία με τρόπο ηθικό, συναισθηματικά ώριμο και κοινωνικά υπεύθυνο (Park, 2019), ενώ η ψηφιακή πολιτειότητα εμπεριέχει την καλλιέργεια αξιών και στάσεων που προάγουν τον ενεργό και συνειδητό ρόλο του πολίτη στον ψηφιακό δημόσιο χώρο (Ribble, 2011). Οι δύο έννοιες συγκλίνουν ως προς την καλλιέργεια της ενσυναίσθησης, της κριτικής σκέψης και της ψηφιακής ηθικής, αποτελώντας αναπόσπαστα στοιχεία της εκπαιδευτικής

διαδικασίας που στοχεύει στην ενδυνάμωση των πολιτών της ψηφιακής εποχής (UNESCO, 2021). Η ενοποιημένη προσέγγιση αυτών των εννοιών καθίσταται απαραίτητη για την οικοδόμηση ενός πολιτισμού ψηφιακής υπευθυνότητας και κοινωνικής συνοχής.

Σχήμα 1.
Ψηφιακή νομημοσύνη. Πηγή: YuhyunPark, 2016

Σύμφωνα με τον ορισμό της Alena Plháková (2003**)**, η νοημοσύνη μπορεί να θεωρηθεί ως το ατομικό επίπεδο και η ποιότητα των πνευματικών λειτουργιών, το οποίο εκδηλώνεται μέσω της ικανότητας επίλυσης προβλημάτων. Αυτή η έννοια δεν είναι στατική, αλλά εξελίσσεται συνεχώς υπό την επίδραση εσωτερικών και εξωτερικών παραγόντων, κάτι που έχει σημαντικές επιπτώσεις στην παιδαγωγική πρακτική.

Η Yuhyun Park (2016) εισάγει τον όρο ψηφιακή νοημοσύνη (DQ – Digital Intelligence Quotient), ορίζοντάς την ως το σύνολο των κοινωνικών, συναισθηματικών και γνωστικών ικανοτήτων που επιτρέπουν στα άτομα να προσαρμόζονται και να ανταποκρίνονται αποτελεσματικά στις απαιτήσεις της ψηφιακής εποχής. Αυτή η ικανότητα διακρίνεται σε οκτώ βασικές διαστάσεις, οι οποίες αλληλεπιδρούν και ενισχύουν η μία την άλλη. Ειδικότερα:

i. Ψηφιακή Ταυτότητα: η ικανότητα διαμόρφωσης και διαχείρισης μιας συνεπούς και υπεύθυνης ηλεκτρονικής παρουσίας, με επίγνωση των επιπτώσεων που μπορεί να έχει η διαδικτυακή συμπεριφορά στη μακροπρόθεσμη εικόνα του ατόμου.
ii. Ψηφιακή Χρήση: η ικανότητα χρήσης τεχνολογικών εργαλείων με τρόπο ισορροπημένο, διασφαλίζοντας ότι η ψηφιακή δραστηριότητα δεν επηρεάζει αρνητικά τη σωματική, ψυχική και κοινωνική ευεξία.
iii. **Ψηφιακή Ασφάλεια: η** ικανότητα αναγνώρισης και αντιμετώπισης διαδικτυακών κινδύνων, όπως η ψηφιακή παρενόχληση, η έκθεση σε βίαιο ή προσβλητικό περιεχόμενο και η προστασία από αυτά.
iv. **Ψηφιακή Προστασία: η** ικανότητα αντιμετώπισης απειλών του κυβερνοχώρου (π.χ. hacking, απάτες, κακόβουλο λογισμικό) μέσω της υιοθέτησης αποτελεσματικών μεθόδων ασφαλείας και της προστασίας των προσωπικών δεδομένων.
v. **Ψηφιακή Συναισθηματική Νοημοσύνη: η** ικανότητα κατανόησης και διαχείρισης των συναισθημάτων στη ψηφιακή αλληλεπίδραση, καθώς και η ανάπτυξη ενσυναίσθησης και θετικών σχέσεων στο διαδικτυακό περιβάλλον.
vi. **Ψηφιακή Επικοινωνία: η** ικανότητα αποτελεσματικής επικοινωνίας και συνεργασίας μέσω ψηφιακών πλατφορμών, με σεβασμό στις διαφορετικές απόψεις και πολιτισμικές διαφορές.
vii. **Ψηφιακή Παιδεία: η** ικανότητα κριτικής ανάλυσης, δημιουργίας και διαχείρισης ψηφιακού περιεχομένου, καθώς και η ανάπτυξη υπολογιστικής σκέψης (computational thinking) για την επίλυση πολύπλοκων προβλημάτων.
viii. **Ψηφιακά Δικαιώματα: η** γνώση και η υπεράσπιση των δικαιωμάτων του ψηφιακού πολίτη, όπως ο σεβασμός της ιδιωτικότητας, η πνευματική ιδιοκτησία, η ελευθερία έκφρασης και η προστασία από το διαδικτυακό μίσος.

Η ψηφιακή νοημοσύνη (digital intelligence) αποτελεί κρίσιμο θεμέλιο για την εκπαίδευση στον 21ο αιώνα, καθώς εφοδιάζει τους μαθητές με το σύνολο των γνωστικών, τεχνολογικών, συναισθηματικών και ηθικών δεξιοτήτων που απαιτούνται για την ασφαλή, υπεύθυνη και δημιουργική συμμετοχή στον ψηφιακό κόσμο (Park, 2019). Η

ενσωμάτωση της ψηφιακής νοημοσύνης στα εκπαιδευτικά προγράμματα δεν περιορίζεται στη διδασκαλία ψηφιακών εργαλείων, αλλά επεκτείνεται στην καλλιέργεια στάσεων όπως ο ψηφιακός αυτοέλεγχος, η διαχείριση της ψηφιακής ταυτότητας, η ανθεκτικότητα σε κινδύνους και η ψηφιακή ενσυναίσθηση (DQ Institute, 2020). Μέσω της εκπαίδευσης, η ψηφιακή νοημοσύνη μπορεί να λειτουργήσει ως βασικός μηχανισμός κοινωνικοποίησης των μαθητών σε ένα παγκοσμιοποιημένο και τεχνολογικά διαμεσολαβημένο περιβάλλον (UNESCO, 2021), ενισχύοντας τη δια βίου μάθηση, την πολιτειακή ενδυνάμωση και την κοινωνική ένταξη.

ΨΗΦΙΑΚΗ ΠΟΛΙΤΕΙΟΤΗΤΑ ΚΑΙ ΕΚΠΑΙΔΕΥΣΗ: ΜΙΑ ΟΛΙΣΤΙΚΗ ΠΡΟΣΕΓΓΙΣΗ

Κατά την ανάλυση των εννέα διαστάσεων της ψηφιακής πολιτειότητας σε συνάρτηση με τις απαιτούμενες ψηφιακές δεξιότητες που θεωρούνται αναγκαίες για την προσωπική ολοκλήρωση και την κοινωνικο-επαγγελματική εξέλιξη του σύγχρονου ατόμου, αναδεικνύεται ο καθοριστικός ρόλος της στην εκπαιδευτική διαδικασία. Η τεχνολογία δεν λειτουργεί μόνο ως αντικείμενο γνωστικού πεδίου, αλλά και ως εργαλείο διδασκαλίας και μέσο πρόσβασης στη γνώση (Ribble, 2011). Η επίδραση των Τεχνολογιών Πληροφορίας και Επικοινωνίας (ΤΠΕ) στην κοινωνική ζωή των νέων χρήζει ιδιαίτερης κριτικής προσέγγισης, ιδίως όταν εξετάζονται οι κοινωνικές, οικονομικές και πολιτισμικές παράμετροι της ψηφιακής αλληλεπίδρασης (Ananiadou & Claro, 2009:11). Οι επιπτώσεις αυτών των παραμέτρων καταδεικνύουν την ανάγκη για την καλλιέργεια σύνθετων, ευέλικτων και συνεχώς ανανεούμενων δεξιοτήτων, ικανών να ανταποκρίνονται στις απαιτήσεις της διαρκώς μεταβαλλόμενης ψηφιακής πραγματικότητας.

Επιπλέον η ψηφιοποίηση της πολιτικής συμμετοχής δεν αποτελεί απλώς ένα «σύγχρονο» φαινόμενο των δυτικών δημοκρατιών, αλλά μια παγκόσμια πραγματικότητα που επηρεάζεται από πολιτισμικούς, τεχνολογικούς, οικονομικούς και κοινωνικούς παράγοντες (Işıklı, 2014). Η ψηφιακή ιδιότητα του πολίτη δεν περιορίζεται σε τεχνικές δεξιότητες, αλλά απαιτεί κριτική συνείδηση των δικαιωμάτων, των κινδύνων και των ηθικών ορίων του διαδικτυακού χώρου. Ένας καταρτισμένος ψηφιακός πολίτης γνωρίζει τους περιορισμούς πρόσβασης και τους κανόνες δημοσίευσης (π.χ. απαγόρευση παιδικής πορνογραφίας, hacking, hate speech), τις νομικές και ηθικές επιπτώσεις παραβιάσεων (εθνική ασφάλεια, προσωπικά δεδομένα, πνευματική ιδιοκτησία) και τις ψηφιακές πρακτικές, από τη δημιουργία ιστολογίων έως τη συμμετοχή σε διαδικτυακές κοινότητες και τη διασφάλιση της ασφάλειας των δεδομένων του (Işıklı, 2014). Αυτές οι δεξιότητες που απαιτούνται δεν είναι στατικές· εξελίσσονται παράλληλα με τις τεχνολογικές και κοινωνικές αλλαγές. Και η εκπαίδευση αποτελεί τον πυρήνα αυτής της διαδικασίας, καθώς συνδέει την τεχνολογική γνώση με την αξιοποίησή της για δημοκρατικούς σκοπούς (Ribble, 2011). Μόνο έτσι μπορεί να διαμορφωθεί μια ενεργή, ενημερωμένη και ηθική ψηφιακή κοινωνία, ικανή να αντιμετωπίσει τις προκλήσεις του 21ου αιώνα.

ΣΥΜΠΕΡΑΣΜΑ

Η ψηφιακή πολιτειότητα εμφανίζεται ως δυναμική διαδικασία που απαιτεί συνεχή προσαρμογή. Σε έναν κόσμο όπου η τεχνολογία επηρεάζει όλες τις πτυχές της ανθρώπινης δραστηριότητας, η ανάπτυξη ενός ολοκληρωμένου εκπαιδευτικού μοντέλου που συνδυάζει τεχνικές δεξιότητες, κριτική σκέψη και ηθική ευαισθητοποίηση αποτελεί απαραίτητη προϋπόθεση για τη δημιουργία ενός δίκαιου, συμμετοχικού και ασφαλούς ψηφιακού μέλλοντος.

Η ικανότητα ενός πολίτη να αξιοποιεί τα ψηφιακά εργαλεία για πολιτική συμμετοχή δεν εξαρτάται αποκλειστικά από τεχνικές δεξιότητες. Η ουσία της ψηφιακής πολιτειότητας έγκειται στη θέληση του ατόμου να ενεργοποιηθεί πολιτικά, χρησιμοποιώντας κάθε δυνατότητα – συμπεριλαμβανομένου του διαδικτύου – για να διαμορφώσει τη σύγχρονη έκφραση της πολιτικής του συμμετοχής. Επιπλέον, η ηθική πλευρά της ψηφιακής δραστηριότητας, όπως ο σεβασμός της ιδιωτικότητας και των δικαιωμάτων των άλλων, συνδέεται άμεσα με την ψηφιακή παιδεία (Yuhyun Park, 2016).

ΠΕΡΙΛΗΨΗ

Η εκπαίδευση των μαθητών που αντιμετωπίζουν προβλήματα όρασης αποτελεί έναν περίπλοκο και δυναμικά εξελισσόμενο τομέα, όπου απαιτούνται εξειδικευμένες προσεγγίσεις για να εξασφαλιστεί η αποτελεσματική μάθηση, η ένταξη και η ενδυνάμωση. Οι προσπάθειες για την ενσωμάτωση των μαθητών με οπτική αναπηρία στα κανονικά εκπαιδευτικά περιβάλλοντα έχουν αποκτήσει δυναμικό ώθησης. Η έρευνα υπογραμμίζει τη σημασία της προσβασιμότητας τόσο στο φυσικό όσο και στο ψηφιακό περιβάλλον. Η πολυτροπικότητα στη μάθηση αναφέρεται στο γεγονός ότι οι μαθητές επεξεργάζονται τη γνώση μέσα από διαφορετικά αισθητηριακά κανάλια. Στην περίπτωση των μαθητών με οπτική αναπηρία, το ακουστικό κανάλι αποκτά πρωταγωνιστικό ρόλο, καθώς λειτουργεί ως κύριο μέσο πρόσληψης και οργάνωσης της πληροφορίας. Επιπλέον, σύμφωνα με τον κονστρουκτιβισμό, η μάθηση δεν είναι μια παθητική διαδικασία αλλά ένα ενεργό χτίσιμο γνώσεων μέσα από αλληλεπίδραση με το περιβάλλον. Τα ψηφιακά εργαλεία ήχου δίνουν τη δυνατότητα στους μαθητές με οπτική αναπηρία να αλληλεπιδρούν με το εκπαιδευτικό υλικό, να διερευνούν έννοιες και να κατασκευάζουν τη γνώση μέσα από την ακουστική και αισθητηριακή εμπειρία. Η αξιοποίηση των ψηφιακών τεχνολογιών στη διδασκαλία μαθητών με οπτική αναπηρία έχει σημαντική συμβολή στη βελτίωση της πρόσβασής τους στη γνώση. Τα εργαλεία που βασίζονται στον ήχο, επιτρέπουν την κατανόηση μαθηματικών και άλλων επιστημονικών εννοιών μέσω ακουστικών πληροφοριών. Τα λογισμικά μετατροπής κειμένου σε ομιλία (TTS), οι ηχητικές ετικέτες και οι διαδραστικές εφαρμογές με ηχητική καθοδήγηση ενισχύουν την αυτονομία των μαθητών, ενώ τα ηχητικά διαγράμματα και οι περιγραφικές αφηγήσεις διευκολύνουν την πρόσληψη σύνθετων πληροφοριών. Επιπλέον, οι τεχνολογίες αφής σε συνδυασμό με ηχητική ανάδραση παρέχουν πολυαισθητηριακή υποστήριξη, διευκολύνοντας τη μαθησιακή διαδικασία. Η χρήση αυτών των εργαλείων προάγει τη συμπεριληπτική εκπαίδευση, επιτρέποντας την ενεργό συμμετοχή των μαθητών με οπτική αναπηρία στην τάξη και ενισχύοντας τη μαθησιακή τους εμπειρία.

Στην παρούσα εργασία, εξετάζονται σύγχρονα ηχητικά εργαλεία που ενισχύουν τη μαθησιακή διαδικασία, με έμφαση στη διδασκαλία μαθηματικών και επιστημονικών εννοιών. Παρουσιάζονται εργαλεία που κυκλοφορούν και γίνεται ιδιαιτερη αναφορά σε αυτά που μπορούν να έχουν οι μαθητές αλλά και οι εκπαιδευτικοί δωρεάν. Για την πρακτική διερεύνηση της αποτελεσματικότητας αυτών των εργαλείων πραγματοποιήθηκε και παρουσιάζεται μια μελέτη περίπτωσης. Ο μαθητής της Γ γυμνασίου Φ.Δ. με μερική απώλεια όρασης συμμετείχε σε ένα πρόγραμμα ενισχυμένης μαθηματικής διδασκαλίας με τη χρήση ψηφιακών εργαλείων. Η εκπαιδευτική προσέγγιση περιλαμβάνει τη χρήση του λογισμικού NVDA για την ανάγνωση μαθηματικών συμβόλων, Desmos για την ηχητική ανατροφοδότηση για γραφήματα συναρτήσεων, διαδραστικών εφαρμογών αφής για την κατανόηση γεωμετρικών σχημάτων και την ενσωμάτωση ηχητικών περιγραφών σε διαδραστικά μαθησιακά περιβάλλοντα. Τα αποτελέσματα καταδεικνύουν τη βελτίωση της κατανόησης και της συμμετοχής του μαθητή, υπογραμμίζοντας τη σημασία της ενσωμάτωσης τεχνολογιών προσαρμοσμένης μάθησης.

Λέξεις – κλειδιά: ειδική αγωγή, ηχητικά ψηφιακά μέσα, μελέτη περίπτωσης, οπτική αναπηρία

ΕΙΣΑΓΩΓΗ

Η πρόσβαση στην εκπαίδευση αποτελεί θεμελιώδες ανθρώπινο δικαίωμα και βασική προϋπόθεση για την κοινωνική ένταξη και την προσωπική ανάπτυξη όλων των μαθητών. Στο πλαίσιο της συμπεριληπτικής εκπαίδευσης, η διασφάλιση ισότιμων μαθησιακών ευκαιριών για μαθητές με αναπηρία δεν περιορίζεται μόνο στη φυσική παρουσία στο σχολικό περιβάλλον, αλλά επεκτείνεται στη δυνατότητα ουσιαστικής πρόσβασης στο εκπαιδευτικό περιεχόμενο, στη συμμετοχή και στην ενεργή οικοδόμηση της γνώσης. Για τους μαθητές με οπτική αναπηρία, τα εμπόδια πρόσβασης είναι συχνά εντονότερα, καθώς μεγάλο μέρος της σχολικής πληροφορίας βασίζεται στην οπτική αναπαράσταση (Hersh & Johnson, 2008).

Ιδιαίτερα στη διδασκαλία των μαθηματικών, η κυριαρχία οπτικών στοιχείων, όπως σύμβολα, γραφήματα, γεωμετρικά σχήματα και πίνακες, μπορεί να περιορίσει σημαντικά την κατανόηση και την ενεργό συμμετοχή των μαθητών με οπτική αναπηρία. Η απουσία προσβάσιμων εναλλακτικών αναπαραστάσεων συχνά οδηγεί σε γνωστικά κενά, μειωμένη αυτονομία και χαμηλή αυτοεκτίμηση. Για τον λόγο αυτό, η ανάγκη για διαφοροποιημένες διδακτικές προσεγγίσεις και αξιοποίηση κατάλληλων τεχνολογικών εργαλείων καθίσταται κρίσιμη, ώστε να διασφαλίζεται η ισότιμη συμμετοχή όλων των μαθητών στη μαθησιακή διαδικασία (Sapp, 2009).

Η αξιοποίηση ψηφιακών τεχνολογιών και ειδικότερα εργαλείων που ενσωματώνουν αρχές καθολικού σχεδιασμού μπορεί να συμβάλει ουσιαστικά στη βελτίωση της προσβασιμότητας του εκπαιδευτικού περιεχομένου. Οι προσεγγίσεις του Universal Design for Learning (UDL) και του Universal Design of Instruction τονίζουν τη σημασία της παροχής πολλαπλών τρόπων παρουσίασης της πληροφορίας, έκφρασης και εμπλοκής, ώστε να ανταποκρίνονται στις διαφορετικές μαθησιακές ανάγκες των μαθητών (Al-Azawei et al., 2016). Στο πλαίσιο αυτό, τα ηχητικά ψηφιακά εργαλεία αποκτούν ιδιαίτερη παιδαγωγική αξία για τους μαθητές με οπτική αναπηρία, καθώς μετατρέπουν την πληροφορία σε προσβάσιμη ακουστική μορφή και ενισχύουν τη λειτουργική ανεξαρτησία.

Παράλληλα, η τεχνολογία δεν λειτουργεί απλώς ως τεχνικό βοήθημα, αλλά ως μέσο ενδυνάμωσης της μαθησιακής εμπειρίας, όταν ενσωματώνεται σε ένα παιδαγωγικά σχεδιασμένο πλαίσιο. Η αποτελεσματική χρήση προσβάσιμων ψηφιακών εργαλείων προϋποθέτει σαφείς διδακτικούς στόχους, κατάλληλη καθοδήγηση και προσαρμογή στις ανάγκες του μαθητή, ώστε να ενισχύεται η ενεργή συμμετοχή και η κατανόηση των εννοιών. Η διεθνής βιβλιογραφία επισημαίνει ότι η συστηματική αξιοποίηση βοηθητικής τεχνολογίας μπορεί να βελτιώσει όχι μόνο τις μαθησιακές επιδόσεις, αλλά και την αυτοπεποίθηση και την αυτονόμηση των μαθητών με οπτική αναπηρία (Hersh & Johnson, 2008).

ΣΤΟΧΟΣ ΚΑΙ ΕΡΕΥΝΗΤΙΚΑ ΕΡΩΤΗΜΑΤΑ ΤΗΣ ΕΡΓΑΣΙΑΣ

Στόχος της παρούσας εργασίας είναι η διερεύνηση και η ανάλυση ψηφιακών εργαλείων με ηχητική ανατροφοδότηση που μπορούν να υποστηρίξουν τη διδασκαλία των μαθηματικών σε μαθητές με οπτική αναπηρία. Η εργασία εστιάζει σε εργαλεία που συμβάλλουν στην προσβασιμότητα του μαθησιακού περιεχομένου και ευθυγραμμίζονται με αρχές καθολικού σχεδιασμού, ώστε να προάγεται η ισότιμη συμμετοχή και η ενεργή εμπλοκή των μαθητών στη μαθησιακή διαδικασία (Al-Azawei et al., 2016).

Παράλληλα, επιδιώκεται να αναδειχθεί η παιδαγωγική αξία της βοηθητικής τεχνολογίας ως μέσου ενδυνάμωσης, αυτονομίας και βελτίωσης της μαθησιακής εμπειρίας, ειδικά σε γνωστικά αντικείμενα υψηλών απαιτήσεων όπως τα μαθηματικά (Hersh & Johnson, 2008). Ιδιαίτερη έμφαση δίνεται στις προϋποθέσεις παιδαγωγικής αξιοποίησης των εργαλείων αυτών, ώστε να εντάσσονται λειτουργικά στη διδασκαλία και να μην εφαρμόζονται αποσπασματικά ή περιστασιακά.

Ακόμα, παρουσιάζεται μια μελέτη περίπτωσης από τη Δευτεροβάθμια Εκπαίδευση, η οποία εστιάζει στην ένταξη τέτοιων εργαλείων στο πλαίσιο ενός εξατομικευμένου μαθησιακού προγράμματος με επίκεντρο τη γεωμετρία και τη χωρική αναγνώριση. Μέσα από αυτήν τη μελέτη, αναδεικνύονται τόσο οι δυνατότητες των ψηφιακών ηχητικών μέσων όσο και οι πρακτικές προκλήσεις που προκύπτουν κατά την εφαρμογή τους στην καθημερινή διδακτική πράξη.

Η εργασία επιδιώκει να συμβάλει στην ενίσχυση της προσβασιμότητας και της παιδαγωγικής αποτελεσματικότητας στην εκπαίδευση μαθητών με οπτική αναπηρία, προσφέροντας χρήσιμα παραδείγματα και προτάσεις σε εκπαιδευτικούς, ειδικούς παιδαγωγούς και δημιουργούς εκπαιδευτικού λογισμικού.

ΘΕΩΡΗΤΙΚΟ ΠΛΑΙΣΙΟ

Η διδασκαλία των μαθηματικών σε μαθητές με οπτική αναπηρία αποτελεί ένα σύνθετο παιδαγωγικό πεδίο, καθώς το μάθημα βασίζεται σε μεγάλο βαθμό σε οπτικές αναπαραστάσεις και συμβολικές μορφές πληροφορίας. Έννοιες όπως τα γραφήματα συναρτήσεων, οι γεωμετρικές σχέσεις, οι πίνακες δεδομένων, καθώς και η ίδια η συμβολική γραφή των μαθηματικών, συχνά παρουσιάζονται με τρόπο που προϋποθέτει οπτική πρόσβαση. Αυτό έχει ως αποτέλεσμα οι μαθητές με οπτική αναπηρία να αντιμετωπίζουν δυσκολίες όχι μόνο στην κατανόηση, αλλά και στην οργάνωση της σκέψης τους κατά την επίλυση προβλημάτων, καθώς χρειάζονται εναλλακτικούς τρόπους ανάγνωσης και επεξεργασίας του μαθηματικού περιεχομένου (Shoaib et al., 2023). Επομένως, η διδασκαλία απαιτεί προσαρμογές τόσο στο περιεχόμενο όσο και στη διαδικασία, με αξιοποίηση προσβάσιμων εργαλείων και μεθόδων που επιτρέπουν στον μαθητή να αλληλεπιδρά ενεργά με τις έννοιες, χωρίς να αποκλείεται λόγω της απουσίας οπτικής πληροφορίας (Maćkowski et al., 2023).

Η πολυτροπικότητα στη μάθηση αναφέρεται στην αξιοποίηση πολλαπλών τρόπων πρόσληψης και επεξεργασίας της πληροφορίας, όπως ο ήχος, η αφή, η κίνηση και η γλώσσα, σε συνδυασμό με τις δυνατότητες της τεχνολογίας. Για τους μαθητές με οπτική αναπηρία, η πολυτροπική προσέγγιση δεν αποτελεί απλώς μία ενίσχυση της διδασκαλίας, αλλά προϋπόθεση ισότιμης πρόσβασης, καθώς μεταφέρει το μαθησιακό περιεχόμενο από το αποκλειστικά οπτικό πεδίο σε εναλλακτικές μορφές που μπορούν να γίνουν λειτουργικές και κατανοητές (Shoaib et al., 2023).

Ειδικότερα στα μαθηματικά, η μετατροπή της πληροφορίας σε ακουστικές ή απτικές μορφές (π.χ. περιγραφή, ηχητική ανατροφοδότηση, δομημένη πλοήγηση συμβόλων) μπορεί να διευκολύνει τον μαθητή να σχηματίσει νοητικές αναπαραστάσεις, να οργανώσει σχέσεις και να αναγνωρίσει μοτίβα. Η προσβασιμότητα, επομένως, δεν αφορά μόνο την ανάγνωση του υλικού, αλλά και την ουσιαστική δυνατότητα κατανόησης, διερεύνησης και επεξεργασίας των μαθηματικών εννοιών με τρόπους ισότιμους ως προς τη γνωστική απαίτηση (Maćkowski et al., 2023).

Η ενεργητική μάθηση προϋποθέτει ότι ο μαθητής δεν λειτουργεί ως παθητικός δέκτης, αλλά εμπλέκεται στη διερεύνηση, στη δοκιμή, στον έλεγχο και στην οικοδόμηση της γνώσης. Στην περίπτωση των μαθητών με οπτική αναπηρία, η ενεργητική εμπλοκή αποκτά ιδιαίτερη σημασία, διότι η κατανόηση των μαθηματικών εννοιών δεν μπορεί να στηριχθεί σε παρατήρηση σχημάτων ή γραφημάτων, αλλά απαιτεί εναλλακτικές εμπειρίες αλληλεπίδρασης με το περιεχόμενο. Η βιβλιογραφία αναδεικνύει ότι οι τεχνολογικές λύσεις μπορούν να λειτουργήσουν ως κανάλια δράσης, επιτρέποντας στον μαθητή να εξερευνά έννοιες μέσω ακουστικής ή απτικής ανατροφοδότησης και να ελέγχει τη σκέψη του μέσα από συνεχή αλληλεπίδραση (Shoaib et al., 2023).

Η δυνατότητα χειρισμού μαθηματικών αντικειμένων, η άμεση ανατροφοδότηση και η επαναληπτική διερεύνηση ενισχύουν τη διαδικασία κατανόησης και συμβάλλουν στη δημιουργία σταθερότερων γνωστικών δομών. Επιπλέον, τέτοιες πρακτικές ενισχύουν την αυτονομία του μαθητή, καθώς μειώνουν την πλήρη εξάρτηση από τη διαμεσολάβηση του εκπαιδευτικού και επιτρέπουν μεγαλύτερο βαθμό ανεξάρτητης μαθησιακής δράσης (Maćkowski et al., 2023).

Η τεχνολογία στην ειδική αγωγή μπορεί να λειτουργήσει ως παράγοντας ένταξης και ενδυνάμωσης, όταν αξιοποιείται όχι ως υποκατάστατο, αλλά ως εργαλείο που ανοίγει νέους δρόμους πρόσβασης στη γνώση. Στην εκπαίδευση μαθητών με οπτική αναπηρία, οι βοηθητικές τεχνολογίες και τα ψηφιακά εργαλεία προσβασιμότητας μπορούν να ενισχύσουν τη συμμετοχή στην τάξη, να διευκολύνουν την κατανόηση του περιεχομένου και να υποστηρίξουν την ισότιμη εμπλοκή σε μαθησιακές δραστηριότητες που διαφορετικά θα ήταν δυσπρόσιτες (Shoaib et al., 2023).

Ταυτόχρονα, η ένταξη της τεχνολογίας προϋποθέτει παιδαγωγική οργάνωση και κατάλληλη προσαρμογή στις ανάγκες του μαθητή και στο πλαίσιο της τάξης. Μπορεί να αποτελέσει ισχυρό μέσο συμπερίληψης, εφόσον συνδυαστεί με στοχευμένη διδακτική παρέμβαση και συνεχή υποστήριξη, ώστε να ενισχύει όχι μόνο την πρόσβαση αλλά και την ουσιαστική μαθησιακή πρόοδο (Maćkowski et al., 2023).

ΜΕΘΟΔΟΛΟΓΙΑ

Η παρούσα εργασία υιοθετεί μια περιγραφική και εφαρμοσμένη προσέγγιση, με στόχο την ανάδειξη του ρόλου των ψηφιακών εργαλείων με ηχητική ανατροφοδότηση στη διδασκαλία μαθηματικών για μαθητές με οπτική αναπηρία. Συγκεκριμένα, η μεθοδολογία βασίζεται σε δύο συμπληρωματικούς άξονες: (α) την παρουσίαση και ανάλυση επιλεγμένων ψηφιακών εργαλείων προσβασιμότητας και (β) την εφαρμογή τους σε μια σύντομη μελέτη περίπτωσης, προκειμένου να διερευνηθεί πρακτικά η λειτουργικότητά τους και η παιδαγωγική τους αξία στο πλαίσιο της υποστηρικτικής διδασκαλίας. Η επιλογή αυτής της μεθοδολογικής κατεύθυνσης κρίνεται κατάλληλη, καθώς η διεθνής βιβλιογραφία υπογραμμίζει ότι οι τεχνολογίες υποστήριξης για μαθητές με οπτική αναπηρία χρειάζονται αξιολόγηση όχι

μόνο ως προς τα τεχνικά χαρακτηριστικά τους, αλλά κυρίως ως προς την εκπαιδευτική τους αξιοποίηση σε πραγματικές συνθήκες μάθησης (Shoaib et al., 2023).

ΕΡΓΑΛΕΙΑ ΠΟΥ ΠΑΡΟΥΣΙΑΖΟΝΤΑΙ

Η επιλογή των εργαλείων έγινε βάσει κριτηρίων όπως η προσβασιμότητα, η παιδαγωγική καταλληλότητα και η δυνατότητα χρήσης τους από μαθητές Δευτεροβάθμιας Εκπαίδευσης. Ο διαχωρισμός τους γίνεται σε δύο κύριες κατηγορίες.

- Λογισμικά Ανάγνωσης και Πλοήγησης (Screen Readers & Visual Assistance Apps): Εργαλεία που διευκολύνουν την πλοήγηση στο ψηφιακό περιβάλλον, την πρόσβαση σε κείμενα και την εκτέλεση βασικών εντολών με ηχητική ανατροφοδότηση.

- Ειδικά Εργαλεία Μαθηματικής Ηχητικής Αναπαράστασης (Sonification Tools): Λογισμικά που μετατρέπουν μαθηματικές πληροφορίες και δεδομένα (π.χ. γραφήματα, σχήματα) σε ηχητικά μοτίβα και περιγραφές.

Α. Λογισμικά Ανάγνωσης και Πλοήγησης:
- NonVisual Desktop Access (NVDA)
- TalkBack (Android)
- Seeing AI
- Be My Eyes

Β. Ειδικά Εργαλεία Μαθηματικής Ηχητικής Αναπαράστασης (Sonification):
- Desmos Audio Graphing Calculator
- MathMelody
- SAS Graphics Accelerator
- Sonification Sandbox
- Audio Geometry (Geoboard Simulation)

Η αξιολόγηση των εργαλείων βασίζεται στα εξής βασικά κριτήρια:
- Προσβασιμότητα
- Συμβατότητα με μαθησιακά περιβάλλοντα
- Παιδαγωγική αξία
- Αυτονομία του μαθητή

ΛΟΓΙΣΜΙΚΑ ΑΝΑΓΝΩΣΗΣ ΚΑΙ ΠΛΟΗΓΗΣΗΣ

1. NonVisual Desktop Access (NVDA)
Ανοικτού κώδικα πρόγραμμα ανάγνωσης οθόνης για Windows με υποστήριξη ελληνικής γλώσσας.
Ιστοσελίδα: https://www.nvaccess.org/

2. TalkBack (Android)
Ενσωματωμένη λύση για κινητά Android, διευκολύνει την προσβασιμότητα με φωνητικές οδηγίες και απτική πλοήγηση.
Ιστοσελίδα: https://support.google.com/accessibility/android/answer/6283677

3. Seeing AI
Εφαρμογή της Microsoft για αναγνώριση κειμένων, ανθρώπων και αντικειμένων μέσω κάμερας κινητού.
Ιστοσελίδα: https://www.microsoft.com/en-us/ai/seeing-ai

4. Be My Eyes
Πλατφόρμα που συνδέει χρήστες με προβλήματα όρασης με εθελοντές για υποστήριξη σε πραγματικό χρόνο.
Ιστοσελίδα: https://www.bemyeyes.com/

ΕΙΔΙΚΑ ΕΡΓΑΛΕΙΑ ΜΑΘΗΜΑΤΙΚΗΣ ΗΧΗΤΙΚΗΣ ΑΝΑΠΑΡΑΣΤΑΣΗΣ

1. Desmos Audio Graphing Calculator
Παρέχει ηχητική καθοδήγηση σε μαθηματικά γραφήματα και δυναμικές απεικονίσεις μέσω πληκτρολογίου.
Ιστοσελίδα: https://www.desmos.com/accessibility

2. MathMelody
Χρησιμοποιεί μουσικά μοτίβα για τη διδασκαλία μαθηματικών εννοιών σε μαθητές με προβλήματα όρασης.
Ιστοσελίδα: https://mathmelody.net/

3. SAS Graphics Accelerator
Επιτρέπει την ηχητική εξερεύνηση στατιστικών γραφημάτων και πολυδιάστατων δεδομένων.
Ιστοσελίδα: https://www.sas.com/en_us/software/graphics-accelerator.html

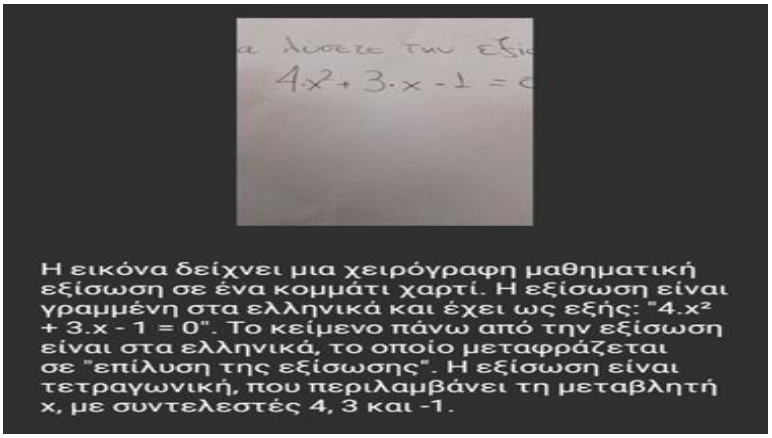
4. Sonification Sandbox
Διαδραστικό εργαλείο που μετατρέπει συναρτήσεις σε ήχο, επιτρέποντας την πειραματική ακρόαση μαθηματικών μεταβολών.
Ιστοσελίδα: https://ccom.ucsd.edu/sonification-sandbox.html

5. Audio Geometry (Geoboard Simulation)
Προσομοιώνει γεωμετρικές δομές με χρήση ήχου και απτικής ανάδρασης, υποστηρίζοντας τη χωρική αντίληψη.
Ιστοσελίδα: https://inclusiveeducation.ca/resources/audio-geometry

ΣΥΓΚΡΙΤΙΚΟΣ ΠΙΝΑΚΑΣ ΕΡΓΑΛΕΙΩΝ

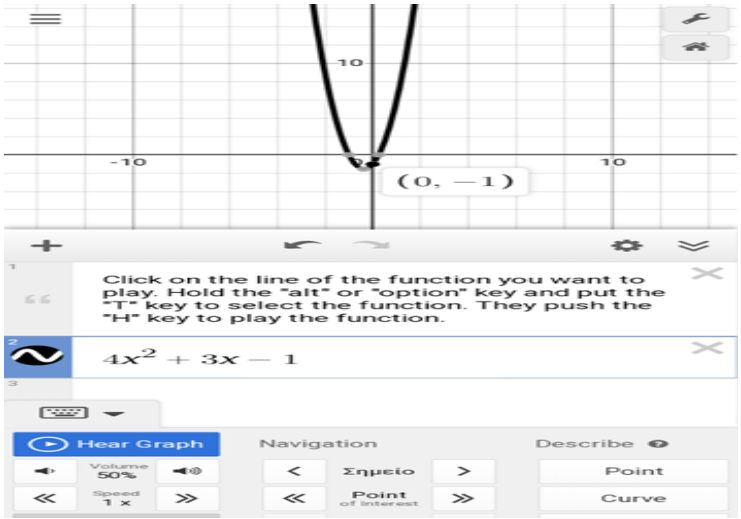
Ο παρακάτω πίνακας (Πίνακας 1) περιλαμβάνει όλα τα εργαλεία που παρουσιάστηκαν στις προηγούμενες ενότητες, με σύγκριση ως προς τη χρήση, την προσβασιμότητα, το κόστος και τη γενική τους εκπαιδευτική αξιολόγηση:

Πίνακας 1
Σύγκριση Εργαλείων



Εργαλείο	Χρήση στη Μελέτη/Πράξη	Δυνατότητα Προσβασιμότητας	Κόστος	Σχολιασμός
NVDA	Πλοήγηση σε υπολογιστή	Υψηλή	Δωρεάν (χωρίς επί πληρωμή έκδοση)	Ιδανικό για περιβάλλον Windows
TalkBack	Πλοήγηση σε Android	Υψηλή	Δωρεάν (χωρίς επί πληρωμή έκδοση)	Απαραίτητο για κινητές συσκευές
Seeing AI	Υποστήριξη & αναγνώριση	Άμεση	Δωρεάν (χωρίς επί πληρωμή έκδοση)	Συνοδευτική εφαρμογή αναγνώρισης
Be My Eyes	Υποστήριξη από εθελοντές	Υψηλή (ανθρώπινη παροχή)	Δωρεάν (χωρίς επί πληρωμή έκδοση)	Χρήσιμη για απλές καθημερινές χρήσεις
Desmos Audio Graphing Calc.	Ανίχνευση γραφημάτων	Υψηλή	Δωρεάν (χωρίς επί πληρωμή έκδοση)	Ακρίβεια σε συναρτήσεις
MathMelody	Εισαγωγή σε αριθμούς	Πολύ εύκολο	Δωρεάν (χωρίς επί πληρωμή έκδοση)	Κατάλληλο για αρχάριους
SAS Graphics Accelerator	Ανάλυση γραφημάτων	Πολυτροπική (ήχος + κείμενο)	Δωρεάν (χωρίς επί πληρωμή έκδοση)	Πολύτιμο σε στατιστικές έννοιες
Sonification Sandbox	Εξερεύνηση μαθηματικών δομών	Τεχνικό, ευέλικτο	Δωρεάν	Ιδανικό για πειραματισμό και ανάλυση
Audio Geometry	Ηχητική γεωμετρία	Υψηλή	Δωρεάν (χωρίς επί πληρωμή έκδοση)	Ενισχύει τη χωρική κατανόηση

ΜΕΛΕΤΗ ΠΕΡΙΠΤΩΣΗΣ ΜΑΘΗΤΗ ΜΕ ΟΠΤΙΚΗ ΑΝΑΠΗΡΙΑ

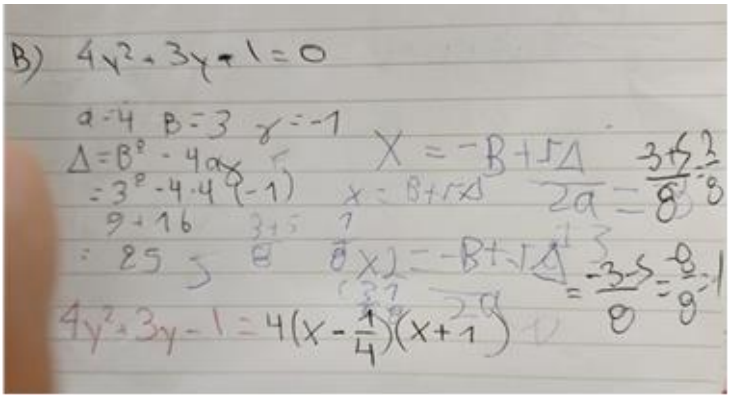


Ο μαθητής Δ.Φ. είναι αγόρι που φοιτά στη Γ' Γυμνασίου σε Γυμνάσιο στην επαρχία. Είναι αλβανικής καταγωγής και διαμένει με την οικογένειά του σε ένα μικρότερο χωριό της περιοχής, με περιορισμένο πληθυσμό. Οι γονείς του δεν εμπλέκονται ιδιαίτερα στις σχολικές δραστηριότητες, όμως ο μαθητής είναι πλήρως αποδεκτός από τους συμμαθητές του.

Έχει σοβαρού βαθμού οπτική αναπηρία, με διάγνωση VOD 1/20sc και VOS 1/20sc, καθώς και κολοβώματα στην ίριδα, στον κρυσταλλοειδή φακό και στον χοριοαμφιβληστροειδή και των δύο οφθαλμών. Βρίσκεται σε υποστήριξη παράλληλης στήριξης τα τελευταία δύο σχολικά έτη.

Εικόνα 1
Ανάγνωση με Seeing AI

Εικόνα 2
Ανάγνωση με Desmos Audio Graphing Calculator



Κατά τη φετινή σχολική χρονιά, η πρόοδος του μαθητή ήταν εντυπωσιακή, με τη συμβολή των δύο εκπαιδευτικών παράλληλης στήριξης. Ο μαθητής προσπαθεί με επιμονή, μελετά με δυσκολία και συγκέντρωση, και αναπτύσσει προσωπικές στρατηγικές γραφής που του επιτρέπουν να γίνεται κατανοητός. Κατά τη φετινή σχολική χρονιά, η πρόοδος του μαθητή υπήρξε ιδιαίτερα εντυπωσιακή, γεγονός που αποδίδεται σε μεγάλο βαθμό στη συστηματική υποστήριξη και συνεργασία των δύο εκπαιδευτικών παράλληλης στήριξης. Παρότι ο μαθητής αντιμετωπίζει σημαντικές δυσκολίες στη μελέτη, κυρίως λόγω της αυξημένης γνωστικής προσπάθειας που απαιτείται για τη συγκέντρωση και την επεξεργασία της πληροφορίας χωρίς οπτική πρόσβαση, επιδεικνύει σταθερά επιμονή, θετική στάση και διάθεση για βελτίωση. Με την πάροδο του χρόνου, ανέπτυξε προσωπικές στρατηγικές γραφής και καταγραφής, οι οποίες του επιτρέπουν να οργανώνει τα βήματα της σκέψης του και να γίνεται κατανοητός τόσο από τους εκπαιδευτικούς όσο και

από το περιβάλλον της τάξης. Η εξέλιξη αυτή δεν αφορά μόνο την επίδοση, αλλά και την ενίσχυση της αυτονομίας και της αυτοπεποίθησής του ως μαθητή.

Στο πλαίσιο της διδασκαλίας της δευτεροβάθμιας εξίσωσης, παρατηρήθηκε αρχικά ότι ο μαθητής δυσκολευόταν σε βασικά σημεία της διαδικασίας. Συγκεκριμένα, αδυνατούσε να εντοπίσει με ακρίβεια τους συντελεστές α, β, γ μέσα από την αλγεβρική μορφή της εξίσωσης, ενώ παράλληλα δεν μπορούσε να κατανοήσει με σαφήνεια τον τρόπο υπολογισμού της διακρίνουσας Δ και τη σημασία της για την ύπαρξη και το πλήθος των ριζών. Επιπλέον, του ήταν εξαιρετικά δύσκολο να αποκτήσει μια "γεωμετρική" ή γραφική αντίληψη της έννοιας, δηλαδή να συνδέσει τη δευτεροβάθμια εξίσωση με την παραβολή και τη θέση της ως προς τους άξονες. Το συμβατικό διδακτικό υλικό (έντυπες ασκήσεις, πίνακας, τυπικές εξηγήσεις) δεν μπορούσε να του προσφέρει επαρκή στήριξη, καθώς βασιζόταν κυρίως σε οπτικές αναπαραστάσεις και σε γρήγορη αναγνώριση συμβόλων, κάτι που για τον μαθητή λειτουργούσε ως εμπόδιο.

Για τον λόγο αυτό, η παρέμβαση σχεδιάστηκε με στόχο να υποστηρίξει βήμα-βήμα τόσο την προσβασιμότητα όσο και την ουσιαστική κατανόηση, μετατρέποντας την εκφώνηση και τη γραφική αναπαράσταση σε μορφές που ο μαθητής μπορούσε να επεξεργαστεί λειτουργικά. Στο πρώτο στάδιο αξιοποιήθηκε η εφαρμογή Seeing AI, ώστε ο μαθητής να αποκτήσει άμεση πρόσβαση στην έντυπη εκφώνηση της εξίσωσης. Με χρήση του κινητού του τηλεφώνου, σάρωσε το φύλλο εργασίας και άκουσε φωνητικά το μαθηματικό περιεχόμενο. Η διαδικασία αυτή δεν λειτούργησε απλώς ως ανάγνωση, αλλά ως κρίσιμο βήμα για να μπορέσει ο μαθητής να εντοπίσει σωστά τα δεδομένα της άσκησης. Με τη βοήθεια του εκπαιδευτικού, κατέγραψε με ακρίβεια τους αριθμητικούς συντελεστές και διδάχθηκε συστηματικά να τους αναγνωρίζει ώστε να αποκτήσει σταδιακά σταθερό τρόπο οργάνωσης της εξίσωσης. Σε αυτό το στάδιο δόθηκε ιδιαίτερη έμφαση στην κατανόηση της δομής της εξίσωσης, ώστε ο μαθητής να μην απομνημονεύει μηχανικά, αλλά να αναγνωρίζει κάθε στοιχείο στη σωστή θέση.

Εικόνα 3.
Αλγεβρική Επίλυση

Στο δεύτερο στάδιο, χρησιμοποιήθηκε το Desmos Audio Graphing Calculator, το οποίο αποτέλεσε το βασικό εργαλείο για την ανάπτυξη της γραφικής και εννοιολογικής κατανόησης. Ο μαθητής εισήγαγε την εξίσωση στο περιβάλλον της εφαρμογής και στη συνέχεια εξερεύνησε την ηχητική αναπαράσταση της γραφικής παράστασης. Μέσα από τις ακουστικές πληροφορίες που δίνει το εργαλείο (περιγραφή της καμπύλης, εντοπισμός σημείων, μεταβολές), ο μαθητής μπόρεσε να αντιληφθεί βασικά χαρακτηριστικά της παραβολής: το άνοιγμά της, τη γενική μορφή της καμπύλης, καθώς και τη σχέση της με τους άξονες. Ιδιαίτερα σημαντικό ήταν ότι μπόρεσε να συνδέσει τα σημεία τομής με τον άξονα xxx με την έννοια των ριζών, δηλαδή να καταλάβει ότι όταν η παραβολή "ακουμπά" ή "κόβει" τον άξονα, τότε η εξίσωση έχει λύσεις. Η εμπειρία αυτή ενεργοποίησε τη φαντασία του, κέντρισε το ενδιαφέρον του και τον βοήθησε ουσιαστικά να "δει" τη συνάρτηση με βάση τον ήχο, κάτι που μέχρι τότε δεν ήταν εφικτό μέσω της συμβατικής διδασκαλίας.

Η συνολική παρέμβαση οργανώθηκε με παιδαγωγική συνέπεια και περιλάμβανε συγκεκριμένα βήματα υποστήριξης:

- Καθοδήγηση βήμα-βήμα από τον εκπαιδευτικό παράλληλης στήριξης, με σαφή διάσπαση της διαδικασίας σε μικρά, διαχειρίσιμα στάδια.
- Επαναλαμβανόμενη ακρόαση του ηχητικού γραφήματος και επεξήγηση των στοιχείων που προκύπτουν από αυτό, ώστε ο μαθητής να σταθεροποιήσει την κατανόηση της μορφής της παραβολής.

- Συζήτηση με ερωτήσεις ενεργοποίησης, όπως: «Τι σημαίνει όταν η παραβολή δεν τέμνει τον άξονα;», «Πότε περιμένουμε δύο ρίζες;», «Πώς σχετίζεται η διακρίνουσα με αυτό που ακούμε;», με σκοπό να ενισχυθεί η σύνδεση μεταξύ αλγεβρικής και γραφικής σκέψης.
- Μεταφορά της εμπειρίας σε αλγεβρική επίλυση στο χαρτί, ώστε ο μαθητής να εφαρμόσει τα συμπεράσματα της ακουστικής διερεύνησης σε τυπικές διαδικασίες (υπολογισμός Δ, εύρεση ριζών), οργανώνοντας τη λύση του με σαφή βήματα.

ΣΥΖΗΤΗΣΗ

Η συνεργασία με τον μαθητή καθ' όλη τη διάρκεια της εκπαιδευτικής παρέμβασης υπήρξε ιδιαίτερα θετική και παραγωγική. Από τις πρώτες κιόλας διδακτικές συναντήσεις παρατηρήθηκε ότι ο μαθητής ανταποκρινόταν με συνέπεια στις οδηγίες, διατηρούσε θετική στάση απέναντι στη μαθησιακή διαδικασία και επιδίωκε να ολοκληρώσει τις δραστηριότητες, ακόμη και όταν απαιτούνταν αυξημένη προσπάθεια. Η συνολική του συμπεριφορά μέσα στο μάθημα έδειξε διάθεση συνεργασίας, αποδοχή της υποστήριξης και προθυμία να δοκιμάσει νέους τρόπους προσέγγισης του μαθηματικού περιεχομένου.

Κατά τη χρήση των εργαλείων προσβασιμότητας και ηχητικής αναπαράστασης παρατηρήθηκε εμφανής αύξηση της κινητοποίησης και της ενεργούς συμμετοχής του. Ο μαθητής έδειχνε πιο συγκεντρωμένος, διατηρούσε μεγαλύτερη διάρκεια προσοχής και συμμετείχε ουσιαστικά στη διαδικασία διερεύνησης, καθώς η τεχνολογία μετέτρεπε ένα δυσπρόσιτο μαθηματικό αντικείμενο σε εμπειρία που μπορούσε να κατανοήσει και να χειριστεί. Η δυνατότητα να προσεγγίσει τη δευτεροβάθμια εξίσωση μέσω ακουστικής αναπαράστασης φαίνεται ότι λειτούργησε ενισχυτικά για την αυτοεικόνα του ως μαθητή, καθώς κάθε επιτυχής αναγνώριση δεδομένων και κάθε σωστή ερμηνεία του ηχητικού γραφήματος ενδυνάμωνε την αυτοπεποίθησή του και του έδινε αίσθηση ελέγχου της μαθησιακής διαδικασίας.

Ιδιαίτερα σημαντικό στοιχείο αποτέλεσε το γεγονός ότι η μετάβαση από την ηχητική αναπαράσταση στην αλγεβρική λύση πραγματοποιήθηκε με ομαλό τρόπο και με σαφή δείγματα εσωτερίκευσης των βασικών εννοιών. Ο μαθητής δεν περιορίστηκε στο να «ακούει» τη γραφική μορφή της συνάρτησης, αλλά κατάφερε να μεταφέρει την εμπειρία αυτή σε οργανωμένη μαθηματική σκέψη, εντοπίζοντας με μεγαλύτερη ακρίβεια τους συντελεστές, κατανοώντας τη σχέση της διακρίνουσας με τον αριθμό των ριζών και εφαρμόζοντας σταδιακά τα βήματα της επίλυσης στο χαρτί. Η εξέλιξη αυτή δείχνει ότι τα εργαλεία δεν λειτούργησαν απλώς ως τεχνική διευκόλυνση, αλλά ως ουσιαστική υποστήριξη της κατανόησης και της μαθησιακής οικοδόμησης.

Παράλληλα, ο μαθητής φάνηκε να απολαμβάνει τη διαδικασία. Δήλωσε ρητά ότι «του άρεσε» να δουλεύει με αυτά τα εργαλεία και εξέφρασε ενδιαφέρον να τα αξιοποιήσει και σε άλλα κεφάλαια, γεγονός που αποτελεί ένδειξη εσωτερικού κινήτρου και θετικής σύνδεσης με τη μαθησιακή εμπειρία. Σε αντίθεση με άλλες διδακτικές στιγμές, κατά τη διάρκεια της παρέμβασης η στάση του ήταν πιο ενεργή και συμμετοχική: ζητούσε διευκρινίσεις, διατύπωνε ερωτήσεις, επιχειρούσε να προβλέψει αποτελέσματα και προσπαθούσε να εξηγήσει με δικά του λόγια όσα κατανοούσε. Αυτό δείχνει ότι το μαθησιακό περιβάλλον έγινε πιο "ανοιχτό" και προσβάσιμο για εκείνον, επιτρέποντάς του να λειτουργεί όχι μόνο ως εκτελεστής οδηγιών αλλά ως μαθητής που διερευνά και οικοδομεί νόημα.

Συνολικά, η απόδοσή του στο συγκεκριμένο γνωστικό αντικείμενο βελτιώθηκε σημαντικά, τόσο ως προς τη σωστή εφαρμογή της διαδικασίας όσο και ως προς τη γενικότερη κατανόηση της έννοιας. Το μάθημα απέκτησε για τον ίδιο προσωπικό νόημα, καθώς ένιωσε ότι μπορεί να συμμετέχει ισότιμα και να κατανοήσει κάτι που προηγουμένως του φαινόταν δυσπρόσιτο. Η εμπειρία αυτή τον ώθησε σε μεγαλύτερη εμπλοκή με το μαθηματικό περιεχόμενο και ενίσχυσε τη διάθεσή του να προσπαθήσει περισσότερο, γεγονός που αποτελεί σημαντικό παιδαγωγικό κέρδος, ιδιαίτερα στο πλαίσιο της συμπεριληπτικής εκπαίδευσης και της παράλληλης στήριξης. Συνοπτικά τα σχόλια του μαθητή ήταν:

«Στην αρχή δεν καταλάβαινα τι σημαίνουν οι αριθμοί. Όταν το άκουσα στο Desmos, κατάλαβα πού ακουμπάει η γραμμή και τι κάνει η εξίσωση. Μετά ήταν πιο εύκολο να τη λύσω μόνος μου.»

«Μου άρεσε να ακούω τα γραφήματα. Ήταν σαν να τα βλέπω με τον ήχο. Δεν είχα κάνει ποτέ κάτι τέτοιο στα μαθηματικά.»

«Θέλω να χρησιμοποιώ ξανά αυτά τα προγράμματα και σε άλλα μαθήματα.»

«Δεν ήξερα ότι μπορώ να μάθω μαθηματικά χωρίς να βλέπω καθαρά.»

«Θέλω να μου δείξετε κι άλλα τέτοια. Τα μαθηματικά είναι δύσκολα αλλά έτσι γίνονται σαν παιχνίδι.».

Τα παραπάνω αποδεικνύουν πως τα προσβάσιμα εργαλεία δεν λειτουργούν απλώς ως τεχνικά βοηθήματα, αλλά ως μέσα ενίσχυσης της αυτονομίας και της ενεργητικής μάθησης. και προσβάσιμης διδασκαλίας μέσω κατάλληλων τεχνολογικών εργαλείων, τα οποία μπορούν να προσαρμοστούν στις ανάγκες των μαθητών με οπτική αναπηρία.

ΠΕΡΙΟΡΙΣΜΟΙ ΚΑΙ ΜΕΛΛΟΝΤΙΚΕΣ ΚΑΤΕΥΘΥΝΣΕΙΣ

Παρά την επιτυχία της παρέμβασης, καταγράφηκαν ορισμένοι περιορισμοί που είναι σημαντικό να ληφθούν υπόψη. Αρχικά, υπάρχουν τεχνολογικοί περιορισμοί, καθώς η χρήση εργαλείων όπως το Desmos και το Seeing AI απαιτεί πρόσβαση σε κινητές συσκευές και σταθερή σύνδεση στο διαδίκτυο, κάτι που δεν είναι δεδομένο σε όλα τα σχολεία, ιδιαίτερα στην ύπαιθρο. Επιπλέον, η αποτελεσματικότητα της παρέμβασης βασίστηκε σε μεγάλο βαθμό στην ψηφιακή επάρκεια και την προσωπική πρωτοβουλία των εκπαιδευτικών, γεγονός που δυσκολεύει τη γενίκευση όταν δεν υπάρχει οργανωμένη επιμόρφωση. Τέλος, η εφαρμογή τέτοιων εργαλείων απαιτεί περισσότερο χρόνο προετοιμασίας και εξατομικευμένης διδασκαλίας, κάτι που δεν εντάσσεται πάντα εύκολα στο τυπικό ωρολόγιο πρόγραμμα.

Ως μελλοντικές κατευθύνσεις προτείνεται η ανάπτυξη οργανωμένου εκπαιδευτικού υλικού και οδηγιών χρήσης προσαρμοσμένων στο ελληνικό πλαίσιο, καθώς και η συστηματική επιμόρφωση εκπαιδευτικών σε προσβάσιμες τεχνολογίες. Παράλληλα, είναι χρήσιμη η συνεργασία με πανεπιστήμια και φορείς για αξιολόγηση της αποτελεσματικότητας σε μεγαλύτερη κλίμακα. Τέλος, προτείνονται πιλοτικές εφαρμογές της ηχητικής και πολυτροπικής προσέγγισης και σε άλλες μαθηματικές έννοιες, όπως η στατιστική και η γεωμετρία.

ΕΠΙΛΟΓΟΣ

Η παρούσα έρευνα ανέδειξε τη σημασία των πολυτροπικών και ηχητικών εργαλείων στη μαθησιακή διαδικασία για μαθητές με οπτικη αναπηρία. Η στοχευμένη εκπαιδευτική παρέμβαση δεν βελτίωσε μόνο τις επιδόσεις του μαθητή, αλλά ενίσχυσε την αυτοεκτίμηση, το ενδιαφέρον και τη συμμετοχή του.

Ιδιαίτερα σημαντική ήταν και η παρουσίαση των εργαλείων προσβασιμότητας και ηχητικής αναπαράστασης, η οποία ανέδειξε τη λειτουργικότητα, τη διδακτική αξιοποίηση και την προσβασιμότητά τους. Η χρήση και αξιολόγηση των λογισμικών ενίσχυσε την ερευνητική τεκμηρίωση της παρέμβασης και προσέφερε εναλλακτικές προτάσεις ένταξης στην καθημερινή εκπαιδευτική πράξη.

Η ενσωμάτωση προσβάσιμων τεχνολογιών, όταν συνοδεύεται από κατάλληλη παιδαγωγική καθοδήγηση, μπορεί να αποτελέσει ισχυρό όχημα για την ισότιμη συμμετοχή όλων των μαθητών στα μαθηματικά. Το ζητούμενο πλέον είναι η θεσμική και οργανωμένη στήριξη τέτοιων παρεμβάσεων, ώστε να περάσουμε από τη μεμονωμένη προσπάθεια στην καθολική συμπερίληψη. και ηχητικών εργαλείων στη μαθησιακή διαδικασία για μαθητές με προβλήματα όρασης. Η στοχευμένη εκπαιδευτική παρέμβαση δεν βελτίωσε μόνο τις επιδόσεις του μαθητή, αλλά ενίσχυσε την αυτοεκτίμηση, το ενδιαφέρον και τη συμμετοχή του.

Η ενσωμάτωση προσβάσιμων τεχνολογιών, όταν συνοδεύεται από κατάλληλη παιδαγωγική καθοδήγηση, μπορεί να αποτελέσει ισχυρό όχημα για την ισότιμη συμμετοχή όλων των μαθητών στα μαθηματικά. Το ζητούμενο πλέον είναι η θεσμική και οργανωμένη στήριξη τέτοιων παρεμβάσεων, ώστε να περάσουμε από τη μεμονωμένη προσπάθεια στην καθολική συμπερίληψη.

ΠΕΡΙΛΗΨΗ

Στην ελληνική εκπαιδευτική πραγματικότητα, η μετάβαση στο νέο υπόδειγμα του σχολείου για όλους/ες τους/τις μαθητές/τριες, συχνά, εμφανίζεται να παρεμποδίζεται από ζητήματα ορολογίας. Ως κεντρικό σημείο εστίασης των εμποδίων αυτών καταγράφεται η αδιαφοροποίητη απόδοση στην ελληνική γλώσσα του όρου «inclusion». Ο όρος «inclusion», ο οποίος αποτελεί κεντρική έννοια του νέου υποδείγματος, στην ελληνική βιβλιογραφία αποδίδεται αδιαφοροποίητα με όρους όπως: ενσωμάτωση, ένταξη, συμπερίληψη, συνεκπαίδευση, κ.τ.ό., συνθήκη που καθιστά δυσχερή την επικοινωνία για σχετικά ζητήματα και, συχνά, οδηγεί σε αδιέξοδο τους/τις επαγγελματίες και τους/τις ερευνητές/τριες του πεδίου. Συνεκτιμώντας τις ραγδαίες εξελίξεις που σχετίζονται με τη δυνατότητα πρόσβασης στο διαδίκτυο μέσω σταθερών/κινητών συσκευών και την εμφάνιση και εξάπλωση της Τεχνητής Νοημοσύνης (ΤΝ) στην κοινωνία, την εργασία και την εκπαίδευση, η εκπαιδευτική κοινότητα επιδεικνύει αυξημένο ενδιαφέρον για τις Τεχνολογίες Πληροφορίας και Επικοινωνιών (ΤΠΕ) στο σχολικό/διδακτικό πλαίσιο. Λαμβάνοντας υπόψη: (α) τη συστηματική κατάταξη της χώρας μας κάτω από τον διεθνή μέσο όρο των χωρών που συμμετέχουν στο Πρόγραμμα Διεθνούς Αξιολόγησης Μαθητών (PISA), (β) το ψηφιακό χάσμα και (γ) την τάση ενίσχυσης της αξιοποίησης των πληροφοριών, των υπηρεσιών, της ψυχαγωγίας και της κοινωνικής αλληλεπίδρασης που προσφέρουν οι ΤΠΕ και η ΤΝ, εξετάζονται τα αναγκαία προαπαιτούμενα υλοποίησης του υλικού και του ψηφιακού σχεδιασμού στο σχολείο για όλους/ες τους/τις μαθητές/τριες, με έμφαση στη νοηματοδότηση του όρου «inclusion». Τα αποτελέσματα της βιβλιογραφικής μας έρευνας παρουσιάζονται συνθετικά και σχολιάζονται κριτικά. Η εργασία ολοκληρώνεται με συζήτηση και σχετικές προτάσεις. Η διασάφηση της πολυσημίας του όρου «inclusion» προτείνεται να πραγματοποιείται μέσα από μια προσέγγιση τεσσάρων επιπέδων/σταδίων, τα οποία προσδιορίζουν ολιστικά και περιγράφουν αναλυτικά το σχολείο για όλους/ες τους/τις μαθητές/τριες, τόσο στην υλική όσο και στην υποστηριζόμενη ψηφιακά εκδοχή του. Στην πορεία προς το 2030, η νέα πραγματικότητα καθιστά επείγουσα την προτεραιοποίηση της μετάβασης προς την εκπαίδευση για όλους/ες τους/τις μαθητές/τριες, με τη διασφάλιση επαρκών εγγυήσεων/πόρων, προκειμένου… κανείς/καμία μαθητής/τρια να μην αφεθεί πίσω. Μέσα από την προσπάθεια σχεδίασης και υλοποίησης του νέου υποδείγματος, διεκδικούνται εγγυήσεις ενσωμάτωσης στις κατευθυντήριες γραμμές των εθνικών προγραμμάτων σπουδών και στα προγράμματα κατάρτισης εκπαιδευτικών, νέων θεσμών εκπαίδευσης όπως ο θεσμός του Center for Applied Special Technology (CAST) των ΗΠΑ, οι οποίοι με κεντρική σχεδίαση και πειραματική υλοποίηση, θα έχουν τη δυνατότητα να υποστηρίζουν τη μετάβαση προς το νέο υπόδειγμα με επιλογές εύλογης χρήσης της τεχνολογίας, διαμορφωτικής/τελικής αξιολόγησης των αναγκαίων υπηρεσιών και, απαραιτήτως, αναστοχασμού προς βελτίωση του νέου αναθεωρημένου υποδείγματος.

Λέξεις – κλειδιά: Ειδική/Ενταξιακή Εκπαίδευση, inclusion, Τεχνολογίες Πληροφορίας και Επικοινωνιών, Ψηφιακό χάσμα, Τεχνητή Νοημοσύνη, CAST, PISA.

ΕΙΣΑΓΩΓΗ

Από συγκροτήσεως της νεώτερης ειδικής αγωγής και εκπαίδευσης στο ελληνικό υπόδειγμα, με τον Νόμο 1143/1981, η σχεδίαση της εκπαιδευτικής πολιτικής βασίζεται σε κατευθύνσεις που επηρεάζονται από το Βρετανικό, κατά κύριο λόγο, υπόδειγμα, όπως τροποποιήθηκε μετά την επιδρασιακή έκθεση της επιτροπής Warnock (The Warnock Report, 1978). Το 1994 στη Σαλαμάνκα της Ισπανίας σύνεδροι από ολόκληρο τον κόσμο διατύπωσαν τις βασικές αρχές για τη σχεδίαση και σταδιακή υλοποίηση ενός νέου οράματος για τα σχολεία της υφηλίου (UNESCO, 1994). Η αποσπασματική, αστήρικτη και αυθαίρετη, τις περισσότερες φορές, μεταφορά μικρού μόνο μέρους των κατευθύνσεων και η ανεπιτυχής προσπάθεια προσαρμογής και μεταφοράς της ορολογίας και των καλών πρακτικών στο περιβάλλον κουλτούρας του ελληνικού υποδείγματος, δημιούργησε και συνεχίζει να δημιουργεί εστίες αναποτελεσματικότητας (Imellou, 2022α· Charoupias, 2024· Imellou & Charoupias, 2025). Οι εστίες αυτές επηρεάζουν τις κατά διαστήματα αξιολογήσεις του ελληνικού εκπαιδευτικού συστήματος που «…βρίσκεται σταθερά στην τρίτη και τελευταία ομάδα χωρών, με επιδόσεις κάτω από τον μέσο όρο του Οργανισμού Οικονομικής Συνεργασίας και Ανάπτυξης (ΟΟΣΑ) στα μαθηματικά, την κατανόηση κειμένου και τις θετικές επιστήμες» (Lakasas, 2023). Στην αναποτελεσματικότητα συνεισφέρει και η αδυναμία του ελληνικού υποδείγματος να βρει και να προσαρμόσει αρμονικά προς την ενεργή κουλτούρα όρους και έννοιες που επηρεάζουν καθοριστικά την κατανόηση της πραγματικότητας, τη διαπίστωση των υστερήσεων και την επιτυχή υιοθέτηση των θετικών στοιχείων άλλων υποδειγμάτων και, κατά προτίμηση, εκείνων που κρίνονται συμβατά με την εντόπια κουλτούρα, τη βελτιώνουν ή/και την αναβαθμίζουν. Σύμφωνα με τον Βιώσιμο Στόχο Ανάπτυξης 4 (ΒΣΑ4), κάθε κράτος-μέλος της UNESCO, μεταξύ των οποίων και η Ελλάδα, δεσμεύεται να διασφαλίσει, μέχρι το 2030, «inclusive και ισότιμη (equitable) ποιοτική εκπαίδευση» για όλους/ες τους/τις μαθητές/τριες, συμπεριλαμβανομένων των μαθητών/τριών με αναπηρία ή/και ειδικές εκπαιδευτικές ανάγκες (α/εεα) (UNESCO, 2016).

Στην Ελλάδα, όπως και σε άλλες χώρες, παρατηρείται ένα σημαντικό ψηφιακό χάσμα (Giavrimis, 2023). Σε επίπεδο τεχνολογίας, τα πιο ευάλωτα μέλη της κοινωνίας -τα άτομα με α/εεα, οι μετανάστες και τα άτομα με περιορισμένη εκπαίδευση- συχνά αποκλείονται από την πρόσβαση στις διευκολύνσεις ή/και τις βελτιώσεις της (Hartnett, 2022). Οι σύγχρονες τεχνολογίες Τεχνητής Νοημοσύνης στην Εκπαίδευση (ΤΝΕ) υπόσχονται να παρέχουν νέα είδη/επίπεδα επιστημονικής ακρίβειας στην ανάλυση της εκπαιδευτικής δραστηριότητας, δηλαδή βαθύτερη και περισσότερο λεπτομερή κατανόηση του πώς «συμβαίνει» η μάθηση για κάθε μαθητή/τρια. Υπόσχονται, ακόμα, ευρεία, ολιστική και καθολική εκπαίδευση για όλους/ες (Knox, Wang & Gallagher, 2019). Η βελτίωση της ψηφιακής υποστήριξης θέτει, ωστόσο, σειρά βασικών προτεραιοτήτων. Αυτές οι προτεραιότητες στοχεύουν στη δημιουργία ενός δημοκρατικού, δίκαιου και τεχνολογικά προηγμένου εκπαιδευτικού περιβάλλοντος που καλύπτει τις διαφορετικές ανάγκες όλων των μαθητών/τριών, συμπεριλαμβανομένων των μαθητών/τριών με α/εεα, των προσφύγων και εκείνων που προέρχονται από περιθωριοποιημένα περιβάλλοντα.

Ο όρος «inclusion» χρησιμοποιείται ευρέως σε διάφορους τομείς, όπως η εκπαίδευση, η κοινωνική πολιτική και οι επιχειρήσεις. Ωστόσο, η μεταφορά των ιδιαιτεροτήτων του όρου σε άλλες κουλτούρες, με εννοιολογική σαφήνεια, εμφανίζεται περίπλοκη, λόγω των διαφορών στα πρότυπα που επικρατούν, τις αξίες και την ιδιαιτερότητα των εκπαιδευτικών συστημάτων. Οι διαφορετικές κουλτούρες αναμένεται να παράγουν και διαφορετικές αντιλήψεις για την αναπηρία, τις ειδικές εκπαιδευτικές ανάγκες, τη διαφορετικότητα και την αλληλοαποδοχή. Λέξεις και φράσεις που χρησιμοποιούνται για την περιγραφή και τη διευκρίνιση της έννοιας «inclusion» ενδέχεται να μην έχουν άμεσο ισοδύναμο σε άλλες γλώσσες, οδηγώντας, ενδεχομένως, σε παρεξηγήσεις ή απώλεια των νοηματικών αποχρώσεων (Sun, 2025). Σύμφωνα με τον Wittgenstein, «η γενική έννοια της σημασίας των λέξεων περιβάλλει τη λειτουργία της γλώσσας με μια αχλύ, που κάνει αδύνατη την καθαρή θέα. Η καταχνιά διαλύεται όταν μελετάμε τα φαινόμενα της γλώσσας στους πρωτόγονους τρόπους χρήσης της, όπου μπορούμε να δούμε καθαρά τον σκοπό και τη λειτουργία των λέξεων» (Wittgenstein, 1977: 27).

ΤΟ ΣΧΟΛΕΙΟ ΓΙΑ ΟΛΟΥΣ: ΔΕΔΟΜΕΝΑ ΚΑΙ ΖΗΤΟΥΜΕΝΑ

Στην ελληνική εκπαιδευτική πραγματικότητα, η μετάβαση στο νέο υπόδειγμα του «σχολείου για όλους», συχνά, παρεμποδίζεται από ζητήματα ορολογίας. Ο Αντισθένης τονίζει τη σημασία της ορθής επιλογής και χρήσης ονομάτων και όρων, κάτι που ισχύει ιδιαίτερα στους τομείς της έρευνας και της εκπαίδευσης (Prince, 2015: 543· Mamarasulova, 2024). Για να διαπιστώσουμε το εύρος και το βάθος της επιρροής που μπορεί να έχει η επιλογή ορολογίας, την προσεγγίζουμε πολυεπίπεδα: ως κατανόηση/ερμηνεία, ως μεθοδολογία, ως διάδοση/πρακτική εφαρμογή της γνώσης και ως εκπαιδευτική πολιτική/λήψη αποφάσεων. Σε επίπεδο κατανόησης/ερμηνείας, οι όροι προσδιορίζουν το πλαίσιο και τα όρια της έρευνας και της διδασκαλίας (Greene & Dolnicar, 2024· Adeleke-Adeoye & Adong, 2023). Σε επίπεδο μεθοδολογίας, η κατάλληλη ορολογία μπορεί να επηρεάσει την επιλογή των μεθόδων/εργαλείων που χρησιμοποιούνται, ενώ κατά την ανάλυση δεδομένων, η χρήση σαφών και κατανοητών όρων διευκολύνει την κατηγοριοποίηση και την ερμηνεία των αποτελεσμάτων (Gernsbacher & Hargreaves, 2019· Trombley & Cottenie, 2019). Σε επίπεδο

διάδοσης/πρακτικής εφαρμογής της γνώσης, η χρήση κατανοητής ορολογίας διευκολύνει την επικοινωνία και τη διάδοση της γνώσης μεταξύ ερευνητών/τριών, εκπαιδευτικών και του ευρύτερου κοινού (Colquhoun, Leeman & Michie, 2014). Στην εκπαιδευτική πρακτική, η χρήση κατάλληλων όρων μπορεί να οδηγήσει σε πιο αποτελεσματικές προσεγγίσεις της διεργασίας διδασκαλίας-μάθησης και περισσότερο αποτελεσματικές παρεμβάσεις (Hiebert, Gallimore & Stigler, 2002). Τέλος, σε επίπεδο εκπαιδευτικής πολιτικής, η κατάλληλη ορολογία διαθέτει δυναμική καθοδήγησης στη λήψη αποφάσεων που σχετίζονται με τη διαμόρφωση πολιτικών, την υλοποίηση προγραμμάτων, την κατανομή πόρων και την ανάπτυξη στρατηγικών εκπαιδευτικής παρέμβασης (Popham, 2008).

Ο όρος «inclusion», ο οποίος αποτελεί κεντρική έννοια του νέου υποδείγματος, στην ελληνική βιβλιογραφία, συχνά αποδίδεται αδιαφοροποίητα, με όρους όπως: ενσωμάτωση, ένταξη, συμπερίληψη, συνεκπαίδευση, κ.τ.ό. (Charoupias, 1997: 58· Imellou, 2017: 47), συνθήκη η οποία καθιστά δυσχερή την επικοινωνία για σχετικά ζητήματα και, συχνά, οδηγεί τους/τις επαγγελματίες και τους/τις ερευνητές/τριες του υποπεδίου της ειδικής εκπαίδευσης σε αδιέξοδο. Στη διεθνή βιβλιογραφία/αρθρογραφία διαπιστώνεται ευρεία χρήση του όρου «inclusion», με νοηματοδοτήσεις της έννοιας οι οποίες ποικίλλουν. Σύμφωνα με την UNESCO, ο όρος «inclusion» αντιστοιχεί σε τρόπο ανταπόκρισης στη διαφορετικότητα των μαθητών/τριών, ενώ η ίδια η έννοια προσεγγίζεται δυναμικά περισσότερο ως ευκαιρία για εμπλουτισμό της μάθησης και λιγότερο ως θεώρηση των ατομικών διαφορών με την έννοια του προβλήματος (UNESCO, 2009). Οι Ainscow, Booth και Dyson ξεπερνούν το επίπεδο της απλής τοποθέτησης των μαθητών/τριών με α/εεα σε τάξεις γενικού σχολείου, δηλώνοντας ότι η έννοια «inclusion» αφορά περισσότερο την κατάργηση των πρακτικών διαχωρισμού και, ταυτόχρονα, την ανάδειξη της συμμετοχής ως βασικού της συστατικού. Οι συγγραφείς υποστηρίζουν τη δημιουργία περιβάλλοντος μάθησης, όπου οι μαθητές/τριες με α/εεα ενεργά συμμετέχουν στην κουλτούρα, τα προγράμματα σπουδών και τις κοινότητες των σχολείων τους (Ainscow, Booth, & Dyson, 2006). Η Lorella Terzi σε εργασία της διερευνά την έννοια «inclusion» από την άποψη της δικαιοσύνης και της ισότητας. Η Terzi τονίζει τη σημασία της δημιουργίας αισθημάτων ανήκειν και κοινότητας για όλους/ες τους/τις μαθητές/τριες (Terzi, 2008). Στο έργο τους «Index for Inclusion», οι Booth και Ainscow προωθούν μια διαδικασία σχολικής ανάπτυξης που εστιάζει στην αύξηση της συμμετοχής, στην άρση των εμποδίων στη μάθηση και στη μείωση του αποκλεισμού (Booth & Ainscow, 2011). Η Lani Florian συζητά για την «inclusive» παιδαγωγική και για την ανάγκη αντιμετώπισης των εμποδίων στη μάθηση, ενώ ταυτόχρονα δίνει έμφαση στη συμμετοχή όλων των μαθητών/τριών (Florian, 2014). Σύμφωνα με τον Roger Slee, η έννοια «inclusion» δεν αφορά μια στατική κατάσταση, αλλά μια συνεχή διαδικασία σχολικού μετασχηματισμού, η οποία συμπεριλαμβάνει αλλαγές στην κουλτούρα, τις πολιτικές και τις πρακτικές, για την καλύτερη κάλυψη των αναγκών όλων των μαθητών/τριών. Σύμφωνα με τον ερευνητή, η έννοια «inclusion» αφορά τη διασφάλιση και την εγγύηση του δικαιώματος όλων των παιδιών στην πρόσβαση, την παρουσία, τη συμμετοχή και την επιτυχία στο σχολείο της γειτονιάς τους. Ο Slee ασκεί κριτική στις πρακτικές διαχωρισμού, επικρίνει την ενέργεια της απλής τοποθέτησης των μαθητών/τριών με α/εεα σε συνηθισμένες τάξεις, χωρίς την εκ των προτέρων και συστημική αντιμετώπιση των εμποδίων, και υποστηρίζει σταθερά τη δημιουργία σχολικών κοινοτήτων χωρίς διαχωρισμούς, οι οποίες προάγουν την κοινωνική δικαιοσύνη (Slee, 2011· 2018). Ο Peter Westwood στην εργασία του προωθεί την έννοια «inclusion» ως μια συνεχή διαδικασία και υποδεικνύει πρακτικές που βασίζονται σε ενδείξεις (evidence-based) για την υποστήριξη διαφορετικών μαθητών/τριών, υπογραμμίζοντας τη σημασία των ακαδημαϊκών αποτελεσμάτων σε «inclusive» περιβάλλοντα μάθησης (Westwood, 2017). Τέλος, σύμφωνα με τους Göransson και Nilholm, οι ορισμοί του όρου «inclusion», όπως αυτοί καταγράφονται στην αγγλόφωνη βιβλιογραφία, διαμορφώνουν μια τυπολογία τεσσάρων επιπέδων: (α) ορισμοί τοποθέτησης των μαθητών/τριών με α/εεα σε τάξεις γενικού σχολείου, (β) ορισμοί εξειδικευμένης εξατομίκευσης και ανταπόκρισης στις κοινωνικές και ακαδημαϊκές ανάγκες των μαθητών/τριών με α/εεα, (γ) ορισμοί γενικής εξατομίκευσης και ανταπόκρισης στις κοινωνικές και ακαδημαϊκές ανάγκες όλων των μαθητών/τριών και (δ) ορισμοί κοινότητας και δημιουργία κοινοτήτων με συγκεκριμένα χαρακτηριστικά (Göransson & Nilholm, 2014· Nilholm & Göransson, 2017).

ΥΛΙΚΗ/ΨΗΦΙΑΚΗ ΣΧΕΔΙΑΣΗ ΤΟΥ ΣΧΟΛΕΙΟΥ ΓΙΑ ΟΛΟΥΣ

Οι αποδόσεις του όρου «inclusion» εντάσσονται στην ελληνική γλώσσα ως μετάφραση και για τον λόγο αυτό είναι σημαντικό να αφομοιωθούν «... σαν τις γνήσιες ελληνικές λέξεις, έτσι που κανείς μας να μην τις αισθάνεται σαν ξένες», για να αποφευχθούν έτσι φαινόμενα που παράγουν ασυμμόρφωτες λέξεις, οι οποίες «...με τις ξενικές συντάξεις (...) λειτουργούν παράλληλα και αδιάκριτα μαζί με τις γνήσιες ελληνικές, δίνοντας την εικόνα μιας γλώσσας κρεολής» (Tompaidis, 1998: 12 & 29). Σε μια προσπάθεια αξιοποίησης των προτάσεων των μελετητών του πεδίου και των προτεινόμενων στρατηγικών για την αποτελεσματική μεταφορά των διαφορετικών νοηματοδοτήσεων, προτείνουμε τέσσερα επίπεδα/στάδια νοηματοδότησης της έννοιας «inclusion». Κατανέμουμε την έννοια «inclusion» των μαθητών/τριών με α/εεα, στους οποίους/ες εστιάζουμε, κατά κύριο λόγο, σε τέσσερα επίπεδα/στάδια: (α) ένταξη, (β) συμπερίληψη και κοινωνική αλληλεπίδραση (γ) ισότιμη συνεκπαίδευση/εκπαίδευση και (δ) κοινότητες μάθησης και πρακτικής. Τα τέσσερα επίπεδα/στάδια συνυπάρχουν στην εκπαιδευτική καθημερινότητα, στο σύνολο της ελληνικής επικράτειας, και αντιστοιχούν σε υπαρκτές εφαρμογές και σε πραγματικές συνθήκες περιβαλλόντων μάθησης σχολικών τάξεων ή/και σχολείων. Σε επίπεδο πρακτικής, το κάθε επίπεδο/στάδιο, εκτός του πρώτου, προϋποθέτει όλα τα προηγούμενα.

(α) *Ένταξη μαθητών/τριών με α/εεα*. Στο 1ο επίπεδο/στάδιο προτείνεται η εστίαση στη μετάβαση, προκειμένου να υπάρξει φυσική παρουσία των μαθητών/τριών με α/εεα σε σχολικά περιβάλλοντα γενικής εκπαίδευσης. Ο όρος «*ένταξη*» υποδηλώνει τοποθέτηση, ενώ πρόδρομος του όρου «ένταξη», με ευρεία χρήση, ήταν ο όρος «ενσωμάτωση» (integration). Σύμφωνα με το λεξικό του Τριανταφυλλίδη, «ένταξη [éndaksi] είναι η ενέργεια ή το αποτέλεσμα του εντάσσω· τοποθέτηση (κατά σειρά, τάξη κτλ.) μέσα σε συγκροτημένο σύνολο, κατηγορία κτλ.· (πρβ. κατάταξη)» (Triantafyllidis, 1998). Μπορούμε, ωστόσο, να μιλάμε για «ένταξη» για τους/τις μαθητές/τριες που ήδη βρίσκονται στον σχολικό θεσμό; Αν και το σύνολο των μαθητών/τριών, σύμφωνα με τα διαθέσιμα στοιχεία, βρίσκεται εντός του σχολικού θεσμού, ένας περιορισμένος αριθμός μαθητών/τριών, συνεχίζει να παραμένει στο σπίτι, σε νοσηλευτικά ιδρύματα και σε άσυλα (World Bank Group, 2025). Ενώ η «ένταξη» αποτελεί προαπαιτούμενο και απαραίτητο σημείο εκκίνησης κάθε παρέμβασης, όλοι/ες οι ερευνητές/τριες εστιάζονται, στις εργασίες τους, πέρα από την απλή τοποθέτηση των μαθητών/τριών στον σχολικό θεσμό. Απλή τοποθέτηση στον σχολικό θεσμό, χωρίς συστημική και εκ των προτέρων αντιμετώπιση των εμποδίων/πρακτικών διαχωρισμού, δεν ισοδυναμεί με «inclusion» (Ainscow, Booth & Dyson, 2006· Slee, 2018).

(β) *Συμπερίληψη και κοινωνική αλληλεπίδραση μαθητών/τριών με α/εεα*. Στο 2ο επίπεδο/στάδιο δίνεται έμφαση στην ενεργό συμμετοχή των μαθητών/τριών με α/εεα σε κοινωνικές και μαθησιακές δραστηριότητες. Ο όρος «*συμπερίληψη*» υποδηλώνει τόσο απλή τοποθέτηση, όσο και οργανωμένη και ενεργά υποστηριζόμενη κοινωνική αλληλεπίδραση, η οποία επιτρέπει στους/στις μαθητές/τριες με α/εεα να συγχρωτίζονται με τους/τις συνομηλίκους τους, βοηθά στην ανάπτυξη κοινωνικών δεξιοτήτων και ενισχύει το αίσθημα του ανήκειν. Σύμφωνα με το Ελληνικό wiktionary, «συμπερίληψη < συμπεριλαμβάνω + -ψη < ελληνιστική κοινή συμπεριλαμβάνω <σύν + περί + αρχαία ελληνική λαμβάνω, η ενέργεια του ρήματος συμπεριλαμβάνω (ειδικότερα, νεολογισμός): η ενεργή και συνειδητή διαδικασία ενσωμάτωσης όλων των ατόμων στο κοινωνικό σύνολο, με σεβασμό στις διαφορετικές ταυτότητες και ιδιαιτερότητές τους, εξαλείφοντας κάθε μορφή αποκλεισμού ή διάκρισης (Wiktionary, χ.χ.). Σε ορισμένες περιπτώσεις «συμπερίληψης», οι σχολικοί θεσμοί αναλαμβάνουν την ευθύνη, ώστε οι μαθητές/τριες ‘σε ανάγκη’ να απολαμβάνουν υπηρεσίες που τους επιτρέπουν την απλή παραμονή τους στο σχολικό περιβάλλον, χωρίς εγγυήσεις διασφάλισης της διαθεσιμότητας και της διάρκειας και χωρίς μετρήσιμα στοιχεία της αποτελεσματικότητας των υπηρεσιών. Οι μαθητές/τριες, στις συγκεκριμένες περιπτώσεις, παραμένουν στον χώρο της τάξης και του σχολείου και πραγματοποιούν από κοινού ορισμένες δραστηριότητες. Σπάνια, υλοποιούνται συστηματικά προγράμματα ενίσχυσης της κοινωνικής αλληλεπίδρασης των συγκεκριμένων μαθητών/τριών με τους/τις συμμαθητές/τριες τους (Pettigrew & Tropp, 2006). Επίσης, μη συστηματικές είναι και οι προσπάθειες παροχής στοιχειωδών υπηρεσιών εκπαίδευσης. Ακόμα και στις περιπτώσεις που οι μαθητές/τριες, ενδεχομένως, δέχονται εξειδικευμένες υπηρεσίες, όπως εκείνες του Τμήματος Ένταξης, οι υπηρεσίες παραμένουν, ως επί το πλείστον, διαχωριστικές ή αφορούν τη μη συστηματική προσπάθεια κοινωνικής αλληλεπίδρασης (Rea, McLaughlin & Walther-Thomas, 2002). Η «συμπερίληψη», επικοινωνιακά, συγκροτεί μια έννοια εννοιολογικά ουδέτερη, δεν παραπέμπει σε συστηματική, ενεργή και σκόπιμη δράση, προκειμένου ο/η κάθε μαθητής/τρια να υποστηριχθεί επαρκώς από εξειδικευμένο προσωπικό, ώστε να επωφεληθεί τόσο κοινωνικά όσο και εκπαιδευτικά από την παρουσία του/της στον χώρο της τάξης και του σχολείου γενικότερα. Η «συμπερίληψη», ωστόσο, δεν είναι απαραίτητα μια επαρκώς ικανοποιητική συνθήκη. Η άκριτη και άνευ όρων συμμόρφωση με την πεποίθηση πως ο εσωτερικός διαχωρισμός ή η απομάκρυνση από το σχολείο της γειτονιάς ορισμένων μαθητών/τριών με χαρακτηριστικά νευροποικιλότητας δεν μπορεί να είναι αποδεκτή, επειδή οδηγεί σε καινοφανείς διακρίσεις μεταξύ διαφορετικών τύπων μαθητών/τριών, και είναι καιρός να αναπλαισιωθεί. Ωστόσο, είναι εξίσου αναγκαίο να αναγνωριστεί πως η εγκατάλειψη, στην πράξη, της επάρκειας/καταλληλότητας του περιβάλλοντος μάθησης, των Προγραμμάτων Σπουδών και της εμπειρογνωμοσύνης των εκπαιδευτικών εγείρουν σημαντικά ερωτήματα, τα οποία σχετίζονται με την καταλληλότητα και την ποιότητα των υπηρεσιών εκπαίδευσης στα σχολεία. Η ιδιαιτερότητα με την οποία οι εκπαιδευτικοί, τα σχολεία ως οργανισμοί και η ηγεσία εντός αυτών, ανταποκρίνονται στους/στις μαθητές/τριες με α/εεα αντικατοπτρίζεται στην κουλτούρα του σχολείου. Η κουλτούρα του σχολείου επηρεάζεται καθοριστικά από πολιτικές/πρακτικές αναγνώρισης της διαφοράς, επιλεξιμότητας ως προς το δικαίωμα σε υπηρεσίες, συνέπειας στην έγκαιρη και αποτελεσματική διασφάλιση υπηρεσιών/μέσων/εργαλείων, συνέπειας παροχών κατά τις μεταβάσεις από βαθμίδα σε βαθμίδα ή/και αποκλεισμού από αυτές. Η απλή παρουσία και η ενδεχομενικότητα της παροχής των υπηρεσιών εκπαίδευσης δεν μπορούν να διασφαλίσουν την καταλληλότητα και την ποιότητα των υπηρεσιών για τους/τις μαθητές/τριες με α/εεα (Ainscow, Booth & Dyson, 2006· Booth & Ainscow, 2011· Florian, 2014).

(γ) *Ισότιμη συνεκπαίδευση/εκπαίδευση μαθητών/τριών με α/εεα*. Στο 3ο επίπεδο/στάδιο η εστίαση βρίσκεται στην επίτευξη ακαδημαϊκών αποτελεσμάτων για τους/τις μαθητές/τριες με α/εεα. Ο όρος «συνεκπαίδευση» υποδηλώνει τη διαδικασία εκπαίδευσης διαφορετικών ομάδων μαθητών/τριών στο ίδιο εκπαιδευτικό περιβάλλον, ανεξάρτητα από τις ατομικές τους διαφορές. Η «συνεκπαίδευση» και η «ισότιμη συνεκπαίδευση» είναι δύο εκπαιδευτικές προσεγγίσεις, οι οποίες αφορούν τη διδασκαλία μαθητών/τριών με και χωρίς α/εεα στην ίδια τάξη, αλλά έχουν κάποιες διαφορές ως προς τους σκοπούς, τους στόχους και την εφαρμογή αυτών στην πράξη. Ο όρος «*συνεκπαίδευση*» αναφέρεται στην παροχή ίσων ευκαιριών μάθησης σε όλους/ες τους/τις μαθητές/τριες, ανεξαρτήτως των αναγκών ή/και των δυνατοτήτων τους.

Στόχος είναι να εξασφαλιστεί ότι όλοι/ες οι μαθητές/τριες έχουν πρόσβαση στα ίδια εκπαιδευτικά εργαλεία, υλικά και πόρους και ότι το περιεχόμενο διδάσκεται με τρόπο που είναι προσιτός και κατανοητός για όλους/ες, χωρίς ωστόσο να λαμβάνονται προληπτικά μέτρα γι' αυτό. Σε επίπεδο επαγγελματιών, η «συνεκπαίδευση» αναφέρεται στη συνεργασία δύο εκπαιδευτικών -ενός εκπαιδευτικού ειδικής αγωγής και εκπαίδευσης/ορθοπαιδαγωγού και ενός εκπαιδευτικού γενικής εκπαίδευσης- για τη διδασκαλία από κοινού των μαθητών/τριών με και χωρίς α/εεα στην ίδια τάξη (Wikipedia, χ.χ.). Οι δύο εκπαιδευτικοί συνεργάζονται ενδεχομένως προς παροχή υποστηρικτικών και διαφοροποιημένων μαθημάτων, αλλά οι ρόλοι τους μπορεί να είναι ασύμμετροι, με τον/την εκπαιδευτικό γενικής εκπαίδευσης να έχει τον κύριο ρόλο στη διδασκαλία και τον/την εκπαιδευτικό ειδικής αγωγής και εκπαίδευσης να παρέχει πρόσθετη υποστήριξη, αποκλειστικά σχεδόν σε εκ των προτέρων προσδιορισμένους μαθητές/τριες. Με λίγα λόγια, στη «συνεκπαίδευση», όπως λειτουργεί σε παρόντα χρόνο, προτείνεται η «ένταξη» των μαθητών/τριών με α/εεα στη γενική εκπαίδευση και η παροχή της υποστήριξης που χρειάζονται, ώστε να συμμετέχουν και να επιτυγχάνουν, χωρίς τον απαραίτητο προκαταρκτικό σχεδιασμό και χωρίς προσεκτική ανάλυση της κατάστασης σε επίπεδο τάξης. Η «συνεκπαίδευση» αναφέρεται στην παρουσία και μόνο των μαθητών/τριών στην τάξη και την ασυντόνιστη ή ευκαιριακά συντονιζόμενη συνδιδασκαλία από περισσότερους/ες του/της ενός/μίας εκπαιδευτικούς, ανάλογα με τις εμφανιζόμενες ανάγκες. Η «συνεκπαίδευση» διαπιστώνεται πως πραγματοποιείται, από την εφαρμογή του Νόμου 2817/2000 και μετά, σε εκατοντάδες τάξεις σε όλη την ελληνική επικράτεια. Η «*ισότιμη συνεκπαίδευση*» συγκροτεί μια επαρκώς μελετημένη και εξελιγμένη μορφή «συνεκπαίδευσης», όπου οι δύο εκπαιδευτικοί μοιράζονται ισότιμα τις ευθύνες της διδασκαλίας και αναλαμβάνουν ρόλο ισότιμο στη σχεδίαση, υλοποίηση και διαμορφωτική και τελική αξιολόγηση της διεργασίας διδασκαλίας-μάθησης (Charoupias, 1997: 58; Charoupias, 2004; Imellou, 2011). Η συνέργειά τους αφορά το σύνολο των προκαταρκτικών ενεργειών, τις λειτουργίες στην τάξη και τη διαχείριση της σχέσης με τη διοίκηση του σχολείου και με τις οικογένειες των μαθητών/τριών (UNESCO, 2009· Westwood, 2017). Στον οδηγό της UNESCO με τίτλο «A Guide for Ensuring Inclusion and Equity in Education», ενσωματώνονται οι όροι «inclusion» and «equity» (ισοτιμία), ενώ παρέχεται ένα πλαίσιο για την αξιολόγηση και τη βελτίωση των πολιτικών, στο οποίο διασφαλίζεται ότι κάθε μαθητής/τρια έχει εξίσου σημασία (UNESCO, 2017). Για την κατάλληλη και αποτελεσματική λειτουργία της «ισότιμης συνεκπαίδευσης» στο σχολείο για όλους/ες, είναι αναγκαίο να διασφαλιστεί πως η συνέχεια των εκπαιδευτικών υπηρεσιών λειτουργεί αποτελεσματικά. Το συνεχές των υπηρεσιών αναφέρεται σε μια σειρά από ενέργειες υποστήριξης και υπηρεσίες, οι οποίες διασφαλίζουν σε κάθε μαθητή/τρια με α/εεα πρόσβαση στο πρόγραμμα σπουδών και πλήρη και ολοκληρωμένη συμμετοχή στις σχολικές δραστηριότητες, χωρίς την ανάγκη προσφυγής σε διαχωρισμένα πλαίσια (American Federation of Teachers, 2020). Στην ίδια λογική με την «ισότιμη συνεκπαίδευση», η «*ισότιμη εκπαίδευση*» αποτελεί συνειδητή και προγραμματισμένη διαφοροποίηση της πρώτης. Αναφέρεται σε περιπτώσεις σκόπιμα διαχωρισμένων σχολικών μονάδων, στις οποίες προβλέπεται να φοιτούν μαθητές/τριες με σύνθετες και σοβαρές α/εεα και ιδιαιτερότητες υγείας/διαβίωσης. Οι μαθητές/τριες με σοβαρές ή σύνθετες α/εεα έχουν ανάγκη από εξειδικευμένες παρεμβάσεις, οι οποίες είναι δύσκολο να διασφαλιστούν σε πλαίσια γενικής εκπαίδευσης. Στις περιπτώσεις αυτές, ο τόπος παροχής των υπηρεσιών εκπαίδευσης διαφοροποιείται, προς διασφάλιση της παροχής εξειδικευμένων υποστηρικτικών βοηθημάτων μετακίνησης, επικοινωνίας και υποστήριξης της διεργασίας διδασκαλίας-μάθησης (Edyburn, 2000). Στις συγκεκριμένες σχολικές μονάδες λειτουργούν εξειδικευμένα προγράμματα, τα οποία υλοποιούνται από εξαιρετικά εξειδικευμένο και έμπειρο προσωπικό. Στο πλαίσιο της «ισότιμης εκπαίδευσης», είναι επιθυμητό, επίσης, να υλοποιούνται προσεκτικά σχεδιασμένα προγράμματα «ανάστροφης ισότιμης εκπαίδευσης», στα οποία οι μαθητές/τριες των γενικών σχολείων επισκέπτονται προγραμματισμένα τις διαχωρισμένες σχολικές μονάδες και πραγματοποιούν επιλεγμένο μέρος του ετήσιου εκπαιδευτικού και κοινωνικού προγραμματισμού τους (Schoger, 2006· Connor, 2014).

(δ) *Κοινότητες Μάθησης και Πρακτικής (ΚΜΠ) για μαθητές/τριες με α/εεα*. Στο 4ο επίπεδο/στάδιο η έμφαση τοποθετείται στη δημιουργία σχολικών κοινοτήτων χωρίς διαχωρισμούς, οι οποίες προάγουν την κοινωνική δικαιοσύνη για όλους/ες τους/τις μαθητές/τριες, συμπεριλαμβανομένων των μαθητών/τριών με α/εεα (Ainscow, Booth & Dyson, 2006· Terzi, 2008· Slee, 2018). Οι *ΚΜΠ* είναι ομάδες συλλογικά εργαζόμενων εκπαιδευτικών, οι οποίες από κοινού προσπαθούν να βελτιώσουν τις διδακτικές πρακτικές τους, προκειμένου να αναβαθμίσουν τα μαθησιακά αποτελέσματα των μαθητών/τριών τους. Στα βασικά χαρακτηριστικά των ΚΜΠ συμπεριλαμβάνονται: η κουλτούρα συλλογικής εργασίας, η μαθητοκεντρική εστίαση, η συνεχιζόμενη μάθηση, η λήψη αποφάσεων βάσει ενδείξεων και το υποστηρικτικό περιβάλλον. Ως προς την κουλτούρα συλλογικής εργασίας, οι εκπαιδευτικοί μοιράζονται ιδέες, στρατηγικές και πόρους για να βελτιώσουν τις μαθησιακές εμπειρίες των μαθητών/τριών τους. Ως προς τη μαθητοκεντρική εστίαση, πρωταρχικός συλλογικός στόχος είναι η βελτίωση των μαθησιακών αποτελεσμάτων των μαθητών/τριών και η δέσμευση πως κάθε συλλογική απόφαση βασίζεται στη συνεπή υλοποίηση του πρωταρχικού συλλογικού στόχου. Ως προς τη συνεχιζόμενη μάθηση, έμφαση δίνεται στη συνεχή επαγγελματική ανάπτυξη και στην αποφυγή περιορισμένου πρακτικού ενδιαφέροντος εκπαιδευτικών συνεδριών. Ως προς τη λήψη αποφάσεων βάσει ενδείξεων, οι εκπαιδευτικοί χρησιμοποιούν τα διαθέσιμα δεδομένα για να εντοπίσουν τομείς προς βελτίωση και να παρακολουθήσουν την πρόοδο των μαθητών/τριών. Τέλος, ως προς το υποστηρικτικό περιβάλλον, έμφαση δίνεται στην εμπιστοσύνη, την αμοιβαία ενθάρρυνση και την εποικοδομητική ανατροφοδότηση μεταξύ των μελών (Vescio, Ross & Adams, 2008).

Η νέα διεθνής πραγματικότητα επιβάλλει την υλοποίηση ενός νέου προτάγματος σταδιακής μετακίνησης προς την υλοποίηση του σχολείου για όλους, με τη διασφάλιση επαρκών εγγυήσεων, ώστε… να μην αφεθεί κανείς/καμία μαθητής/τρια πίσω (UNESCO, 2016). Μέσα από την πραγμάτωση του νέου προτάγματος, διεκδικούνται εγγυήσεις διασφάλισης της συγκρότησης και λειτουργίας θεσμών, οι οποίοι με κεντρική σχεδίαση και πειραματική υλοποίηση, θα είναι σε θέση να υποστηρίξουν την εγκαθίδρυση και διεύρυνση μιας επιλογής ψηφιοποίησης και εύλογης χρήσης των τεχνολογιών (Charoupias, 2023), της διαμορφωτικής/τελικής αξιολόγησης των υπηρεσιών που παρέχονται και, απαραιτήτως, του αναστοχασμού προς βελτίωση του νέου εμπλουτισμένου υποδείγματος. Για τη βελτίωση της τεχνολογικής υποδομής των σχολείων, προτείνεται η διασφάλιση πρόσβασης σε σύγχρονους υπολογιστές/tablets, η προμήθεια αναβαθμισμένου λογισμικού, η παροχή διαδικτύου υψηλής ταχύτητας και η αξιόπιστη συνδεσιμότητα. Επιζητείται εκτενής αναθεώρηση του υποδείγματος εκπαίδευσης, το οποίο να βασίζεται σε ένα κατάλληλο και αποτελεσματικό περιβάλλον μάθησης, με λειτουργική χρήση χειραπτικών (Kamii, 2000) και άλλων γνωσιακών βοηθημάτων (Pressley & Woloshyn, 1995), το οποίο να είναι ψηφιακά υποστηριζόμενο (Jonassen, 2000). Το νέο υπόδειγμα αναμένεται να χρησιμοποιεί τις ΚΜΠ, προκειμένου να οργανώσει ένα σχολείο ισορροπημένα αυτόνομο, επαρκώς χρηματοδοτούμενο, αυτοαξιολογούμενο και εξελισσόμενο μέσω του αναστοχασμού των επαγγελματιών του και των υποστηρικτικών του θεσμών (Leithwood, Louis, Anderson, & Wahlstrom, 2004· DuFour, DuFour, Eaker, & Many, 2010).

Στο προτεινόμενο υπόδειγμα εκπαίδευσης προσεγγίζουμε την αναλογική/ψηφιακή τάξη ως τον θεμέλιο λίθο, ως ένα δομημένο περιβάλλον που σχεδιάζεται με στόχο την άρση κάθε εμποδίου συμμετοχής/μάθησης των μαθητών/τριών. Πρόκειται για τη δημιουργία ενός περιβάλλοντος μάθησης, όπου τόσο τα παραδοσιακά, πρακτικά/αναλογικά εργαλεία όσο και οι σύγχρονες ψηφιακές τεχνολογίες ενσωματώνονται σκόπιμα για την υποστήριξη διαφορετικών μαθητών/τριών (Mayer, 2009). Στο πλαίσιο αυτό, η ΤΝΕ γίνεται ένα διαδραστικό μέσο που απαιτεί από τους/τις μαθητές/τριες τη συμμετοχή, την κριτική σκέψη και την εφαρμογή. Μέσω της ΤΝΕ, η μάθηση σχεδιάζεται να μην είναι πλέον μια μονόδρομη διαδικασία μετάδοσης, αλλά μια διμερής αλληλεπίδραση, όπου ο/η μαθητής/τρια είναι ο/η πρωταγωνιστής/τρια (Woolf, Lane & Gordon, 2018). Η ΤΝΕ δύναται να ενεργεί ως δάσκαλος σε καθεστώς εξατομίκευσης, ως δημιουργικός συνεργάτης, ως βοηθός έρευνας ή ως μια αμμοδόχος (sandbox) ανάπτυξης δεξιοτήτων για τον/τη μαθητή/τρια (Dawson & Siemens, 2014· Jovanovic, Gasevic, Dawson, Pardo & Mirriahi, 2017). Η ΤΝΕ, με ψηφιακά εργαλεία όπως το ChatGPT, συγκροτεί πλέον ένα ισχυρό, νοήμον γλωσσικό μοντέλο, με το οποίο αλληλεπιδρούν άμεσα οι μαθητές/τριες, προκειμένου να αυξήσουν τις δυνατότητές τους και να επιταχύνουν τη μάθησή τους μέσω: (α) εξατομικευμένης πρακτικής, (β) βρόχων ανατροφοδότησης, (γ) γνωστικών σκαλωσιών, (δ) δημιουργικής εξερεύνησης και (ε) ανάπτυξης δεξιοτήτων (Aleven, 2018· Long & Magerko, 2020). Αν και η ΤΝΕ μπορεί να συνεισφέρει στην επίτευξη του ΒΣΑ4 για τους/τις μαθητές/τριες με α/εεα, είναι σημαντικό, τόσο σε επίπεδο εκπαιδευτικής πολιτικής όσο και σε επίπεδο εκπαιδευτικής πρακτικής, να συνυπολογίζονται σχετικοί προβληματισμοί σε θέματα χρήσης της τεχνολογίας (Charoupias, 2023), αλλά και φιλοσοφίας της εκπαίδευσης για τα άτομα με α/εεα (Imellou, 2022β). Εντός της αναλογικής/ψηφιακής τάξης, η τεχνολογία γενικά, αλλά και η ΤΝΕ ειδικότερα αναμένεται να στοχεύουν στην απόδοση εκπαιδευτικής δικαιοσύνης (Imellou, 2024), στη δεοντολογική και ηθική πρόταξη της ισότιμης συνεκπαίδευσης/εκπαίδευσης και να συγκροτούν μια διαθέσιμη λύση οικονομική, προσιτή, προσεκτικά βαθμονομημένη και ευαίσθητη στη μαθητική νευροποικιλότητα. Μέσα από την προσπάθεια υλικής/ψηφιακής σχεδίασης/υλοποίησης του νέου υποδείγματος, διεκδικούνται εγγυήσεις ενσωμάτωσης θεσμών εκπαίδευσης, όπως ο θεσμός του Center for Applied Special Technology (CAST) των ΗΠΑ, οι οποίοι με κεντρική σχεδίαση και πειραματική υλοποίηση έχουν τη δυνατότητα να υποστηρίζουν τη μετάβαση προς το νέο υπόδειγμα με επιλογές Καθολικού Σχεδιασμού για Μάθηση (ΚΣΜ) (Universal Design for Learning-UDL), εύλογης χρήσης της τεχνολογίας, διαμορφωτικής/τελικής αξιολόγησης των υπηρεσιών και, απαραιτήτως, αναστοχασμού προς βελτίωση του νέου αναθεωρημένου υποδείγματος. Ο ΚΣΜ είναι μια προληπτική προσέγγιση στον σχεδιασμό και τη διδασκαλία του προγράμματος σπουδών, η οποία στοχεύει να κάνει τη μάθηση προσβάσιμη σε όλους/ες από την αρχή, διεκδικώντας ταυτόχρονα κατάλληλα προσαρμοσμένο φυσικό χώρο μάθησης. Οι τρεις αρχές του ΚΣΜ είναι κεντρικές στην υλική/ψηφιακή σχεδίαση και υλοποίηση του νέου υποδείγματος, διασφαλίζοντας πολλαπλά μέσα εμπλοκής, αναπαράστασης και δράσης/έκφρασης (Meyer, Rose, & Gordon, 2014;· Imellou, 2016). Ο ρόλος της τεχνολογίας στο πλαίσιο του ΚΣΜ είναι εργαλειακός, ενσωματωμένος στο ευρύτερο εκπαιδευτικό οικοσύστημα, με στόχο τη βελτίωση της προσβασιμότητας, της εμπλοκής και της εξατομίκευσης για όλους/ες τους/τις μαθητές/τριες.

ΣΥΖΗΤΗΣΗ-ΣΥΜΠΕΡΑΣΜΑΤΑ

Η μετάβαση από την ιδέα στη συνεπή πρακτική εφαρμογή των τεσσάρων επιπέδων/σταδίων της έννοιας «inclusion». Η προτεινόμενη προσέγγιση των τεσσάρων επιπέδων/σταδίων είναι κεντρική στην επίλυση του εντοπισμένου «αδιεξόδου» επικοινωνίας των ενεργών παραγόντων του ελληνικού εκπαιδευτικού συστήματος. Ο πολυεπίπεδος ορισμός της έννοιας «inclusion», αν κατανοηθεί, εφαρμοστεί και διαδοθεί με συνέπεια, θα επιτρέψει τη σαφήνεια και ενάργεια στην επικοινωνία μεταξύ των ενεργών παραγόντων, ενώ η αποκατάσταση της επικοινωνίας θα επιτρέψει τη μετάβαση σε παραγωγικά μοντέλα συνεργασίας και επαγγελματικής ανάπτυξης (π.χ. εντός των ΚΜΠ). Τα

διαθέσιμα μέσα πολιτικής θα μπορούν να αξιοποιηθούν, στη συνέχεια, από τους ενεργούς παράγοντες, προκειμένου να διασφαλιστεί ότι η γνώση για τα τέσσερα προτεινόμενα επίπεδα/στάδια δεν θα περιοριστεί στην επιφανειακή αναφορά των όρων, αλλά θα επεκταθεί σε εσωτερικευμένη/αξιόπιστη γνώση με χρήση στην καθημερινή πρακτική και στον δημόσιο/ιδιωτικό λόγο. Το νέο υπόδειγμα, βασισμένο σε σαφή ορολογία και στην υπεύθυνη ψηφιακή πολιτειότητα, θα μπορεί να διασφαλίζει ότι η ΤΝΕ εξυπηρετεί τους στόχους της έννοιας «inclusion» σε κάθε επίπεδο/στάδιο και όχι το αντίστροφο. Ο προσδιορισμός, ωστόσο, του βέλτιστου 'μείγματος', το οποίο μεγιστοποιεί την απόκτηση/διατήρηση δεξιοτήτων και εγγυάται ότι η ΤΝΕ συμπληρώνει και δεν υποκαθιστά άλλες πολύτιμες μεθόδους μάθησης, θα χρειαστεί προσεκτικό σχεδιασμό, πειραματική εφαρμογή, διαμορφωτική/τελική αξιολόγηση και αναστοχασμό.

Ο προτεινόμενος θεσμός τύπου CAST μπορεί να λειτουργήσει ως κινητήριος μοχλός σαφήνειας και συστημικής εφαρμογής των όρων. Ο θεσμός τύπου CAST είναι ένας ισχυρός μηχανισμός προληπτικής προετοιμασίας του εκπαιδευτικού συστήματος. Δύναται να διαδραματίσει μοναδικό ρόλο στην άμεση αντιμετώπιση του ζητήματος της ορολογίας και στη διασφάλιση της συστηματικής εφαρμογής των στοιχείων του νέου υποδείγματος. Με τον κεντρικό σχεδιασμό και την πειραματική εφαρμογή, μπορεί να συνεισφέρει συγκεκριμένα και καταλυτικά στην υιοθέτηση και στη συνεπή εφαρμογή των τεσσάρων επιπέδων/σταδίων της έννοιας «inclusion». Με ερευνητικές πρωτοβουλίες και στρατηγικές διάδοσης, η παρούσα πρόταση μπορεί να αξιοποιηθεί στην ενσωμάτωση αυτής της κατανόησης στα εθνικά προγράμματα σπουδών, στην κατάρτιση των εκπαιδευτικών και στην ανάπτυξη του καθολικού ψηφιακού/υλικού σχεδιασμού για μάθηση. Επιπλέον, η εκλογίκευση του όλου συστήματος μπορεί να λειτουργήσει θετικά στην αντιμετώπιση των διαχρονικά εγκατεστημένων στο πεδίο ζητημάτων/προκλήσεων, όπως η σταθερότητα χρηματοδότησης, η πολιτική ανεξαρτησία, η ένταξη σε υπάρχουσες εκπαιδευτικές δομές, κ.λπ. Ο θεσμός τύπου CAST μπορεί να προωθήσει και να εγγυηθεί την εξασφάλιση επαρκών εγγυήσεων/πόρων για τον υλικό και ψηφιακό σχεδιασμό, διασφαλίζοντας τη γεφύρωση του χάσματος από τη φιλοδοξία στην πραγματικότητα. Με την δημιουργία ενός πλαισίου υποστήριξης, ασφάλειας, συστηματικής διανομής των απαραίτητων οικονομικών και ανθρωπίνων πόρων και παροχής σχετικής μόχλευσης, ο θεσμός τύπου CAST μπορεί να διασφαλίσει προσβασιμότητα για όλους/ες στα ελληνικά σχολεία, ενώ η πραγματικότητα της τάξης και του σχολείου μπορεί να συνδεθεί με τον προκαταρκτικό σχεδιασμό, τον πειραματικό έλεγχο και την αποτίμηση των μεταρρυθμίσεων (OECD, 2015). Στηρίζοντας τις ΚΜΠ, ο θεσμός τύπου CAST μπορεί να διασφαλίσει την αειφορία στις καινοτόμες πρακτικές και την προώθηση της εμπειρογνωμοσύνης των επαγγελματιών εντός της σχολικής κοινότητας, με τις ελάχιστα δυνατές μετακινήσεις. Ουσιαστικά, το προτεινόμενο μοντέλο δράσης δημιουργεί έναν δυναμικό βρόχο ανατροφοδότησης: ο θεσμός τύπου CAST παρέχει τις θεμελιώδεις γνώσεις και τα εργαλεία. Οι ΚΜΠ προσαρμόζουν και εφαρμόζουν τις γνώσεις και τα εργαλεία, δημιουργώντας πρακτικές και τελειοποιώντας την τεχνογνωσία. Οι πρακτικές μπορούν, στη συνέχεια, να ανατροφοδοτήσουν τον κεντρικό σχεδιασμό για περαιτέρω ανάπτυξη (Desimone, 2009). Πρόκειται για μια εξαιρετικά αποτελεσματική, βιώσιμη και ενδυναμωτική προσέγγιση της εκπαιδευτικής μεταρρύθμισης, ιδιαίτερα ζωτικής σημασίας για τη σύνθετη πορεία μετάβασης προς το «σχολείο για όλους» στην Ελλάδα. Η νέα προοπτική αναγνωρίζει το αυξανόμενο ενδιαφέρον για τις ΤΠΕ, αλλά δεν παραβλέπει το ψηφιακό χάσμα. Η συζήτηση για το νέο υπόδειγμα αναμένεται να συνδέσει ρητά τον τρόπο με τον οποίο η ξεκάθαρη κατανόηση της έννοιας «inclusion» ενημερώνει άμεσα και βελτιστοποιεί την ηθική και δίκαιη ενσωμάτωση της ΤΝΕ και των ΤΠΕ για όλους/ες τους/τις μαθητές/τριες, ανάλογα με τις ανάγκες τους (European Commission, 2019). Θετική πολιτική προς αυτή την κατεύθυνση θεωρούμε τα έργα «Υποστήριξη της Ψηφιακής Εκπαίδευσης στην Ελλάδα» και «Ελλάδα 2.0» του Εθνικού Σχεδίου Ανάκαμψης και Ανθεκτικότητας, τα οποία χρηματοδοτούνται από την Ευρωπαϊκή Ένωση και στοχεύουν στη βελτίωση της τεχνολογικής υποδομής στα ελληνικά σχολεία, το πρώτο, και στη συγκρότηση ενός κεντρικού «Εργαστηρίου Καινοτομίας» στο Ινστιτούτο Τεχνολογίας Υπολογιστών και Εκδόσεων (ΙΤΥΕ) με δεκατρία περιφερειακά «Κέντρα Καινοτομίας», σύμφωνα με τον Νόμο 5094/2024, το δεύτερο (European Schoolnet, 2021· European Union, 2025).

Θεωρούμε πως η εκπαίδευση και η ενταξιακή ειδική εκπαίδευση, ειδικότερα, ως χαρακτηριστικό στρυφνό πρόβλημα (Imellou & Charoupias, 2025), θα μπορούσε να ξεκινήσει ανάστροφη αναγεννητική πορεία απομάκρυνσης από τη «σκοτεινή ζώνη» των χωρών του ΟΟΣΑ με τις χαμηλότερες επιδόσεις. Συνεκτιμώντας τις κατευθύνσεις της διεθνούς έρευνας, επιλέγουμε κεντρικές μεταρρυθμίσεις που αν εφαρμοστούν συνεκτικά και με μακροπρόθεσμο όραμα, έχουν τη δύναμη να μετασχηματίσουν την ελληνική εκπαίδευση από ένα, συχνά, άκαμπτο και ανεπαρκώς υποστηρικτικό σύστημα, σε ένα δυναμικό, ισότιμα συνεκπαιδευτικό και προσαρμοστικό περιβάλλον μάθησης, που ανταποκρίνεται στις ανάγκες του 21ου αιώνα. Οι κεντρικές επιλογές που συγκροτούν τους πυλώνες για ένα εκπαιδευτικό σύστημα που θα είναι πραγματικά καθολικά σχεδιασμένο είναι: (α) η επένδυση στους/στις εκπαιδευτικούς με ολιστική αναμόρφωση της αρχικής εκπαίδευσης και της επαγγελματικής τους ανάπτυξης, με επίκεντρο την ισότιμη συνεκπαίδευση, τις ΚΜΠ και τις σύγχρονες παιδαγωγικές, (β) η δέσμευση στη θεσμοθέτηση εθνικού συστήματος αξιολόγησης και λογοδοσίας, με έμφαση στην ποιότητα της εκπαίδευσης και την υποστήριξη όλων των μαθητών/τριών και (γ) η αξιοποίηση της τεχνολογίας με στρατηγική ενσωμάτωση της ΤΝΕ και του ΚΣΜ για προσβασιμότητα και εξατομίκευση (OECD, 2013).

ΠΕΡΙΛΗΨΗ

Η παρούσα εργασία εξετάζει τη Συμπεριληπτική Εκπαίδευση μαθητών με Διαταραχή Αυτιστικού Φάσματος (ΔΑΦ) μέσω της αξιοποίησης ψηφιακών μέσων, με βασικό άξονα το εκπαιδευτικό πρόγραμμα TEACCH. Στόχος είναι η διερεύνηση των προκλήσεων που αντιμετωπίζουν οι μαθητές με ΔΑΦ στο εκπαιδευτικό σύστημα και η αξιολόγηση της συμβολής των ψηφιακών εργαλείων στη βελτίωση της μαθησιακής τους εμπειρίας.

Η μεθοδολογία που ακολουθήθηκε βασίστηκε στη βιβλιογραφική ανασκόπηση και στη συλλογή ποιοτικών δεδομένων μέσω συζητήσεων με ειδικούς στον τομέα της εκπαίδευσης ατόμων με ΔΑΦ. Εξετάστηκαν οι θεμελιώδεις δυσκολίες των μαθητών, η δομή και η εφαρμογή του προγράμματος TEACCH, καθώς και η συμβολή των ψηφιακών τεχνολογιών στη διδασκαλία.

Τα αποτελέσματα της έρευνας αναδεικνύουν ότι η χρήση δομημένων εκπαιδευτικών προσεγγίσεων, όπως το TEACCH, σε συνδυασμό με ψηφιακά εργαλεία, διευκολύνει τη μαθησιακή διαδικασία και ενισχύει την κοινωνική ένταξη των μαθητών με ΔΑΦ. Συγκεκριμένα, η εφαρμογή αυτών των μεθόδων στη διδασκαλία της Ρομποτικής και των Φυσικών Επιστημών δείχνει ότι η οπτικοποίηση και η σαφής δομή των δραστηριοτήτων συμβάλλουν στη βελτίωση της κατανόησης και της αυτονομίας των μαθητών.

Η έρευνα υπογραμμίζει τη σημασία των δομημένων προσεγγίσεων στην εκπαίδευση μαθητών με ΔΑΦ, καθώς διευκολύνουν την επικοινωνία, την κοινωνική αλληλεπίδραση και τη συμπεριφορά τους. Η τεχνολογία συμβάλλει στην εξατομικευμένη μάθηση και την κοινωνική ένταξη, με τους εκπαιδευτικούς να παίζουν καθοριστικό ρόλο στην εφαρμογή προγραμμάτων όπως το TEACCH και τα ψηφιακά εργαλεία.

Στις Φυσικές Επιστήμες, οι μαθητές με ΔΑΦ επωφελούνται από σαφείς, οπτικοποιημένες οδηγίες σε πειράματα και εργαστηριακές ασκήσεις, ενώ στη Ρομποτική, η χρήση οπτικών διαγραμμάτων διευκολύνει τη συναρμολόγηση και τον προγραμματισμό. Η συνέπεια στη χρήση οπτικών εργαλείων στις δύο θεματικές ενότητες ενισχύει τη μαθησιακή εμπειρία και διευκολύνει τη γενίκευση της γνώσης.

Συμπερασματικά, η ενσωμάτωση του προγράμματος TEACCH με τις δυνατότητες που παρέχουν τα ψηφιακά μέσα αποτελεί μια αποτελεσματική προσέγγιση για την ενίσχυση της εκπαιδευτικής εμπειρίας των μαθητών με ΔΑΦ. Η τεχνολογία επιτρέπει την εξατομίκευση της διδασκαλίας, προάγει τη συνεργασία των εμπλεκόμενων φορέων (εκπαιδευτικών, γονέων, ειδικών) και διευκολύνει τη μετάβαση των μαθητών σε διαφορετικά γνωστικά αντικείμενα. Μάλιστα, δίνεται η δυνατότητα στα παιδιά με ΔΑΦ να συμμετέχουν ενεργά και να κατανοούν πολύπλοκες έννοιες μέσα από μια δομημένη ψηφιακή ή δια ζώσης προσέγγιση, ενώ παράλληλα το πρόγραμμα TEACCH συμπληρώνεται και εμπλουτίζεται εντός της τάξης, και επεκτείνεται στη συνολική καθημερινή ζωή του παιδιού μέσω του EarlyBird και Cygnet.

Λέξεις –κλειδιά: Διαταραχή Αυτιστικού Φάσματος, Συμπεριληπτική Εκπαίδευση, Ψηφιακά Μέσα, TEACCH, EarlyBird, Ολιστική Προσέγγιση

ΚΛΙΝΙΚΟ ΠΡΟΦΙΛ ΤΩΝ ΑΤΟΜΩΝ ΜΕ «ΔΙΑΤΑΡΑΧΗ ΑΥΤΙΣΤΙΚΟΥ ΦΑΣΜΑΤΟΣ» (ΔΑΦ)

Η Διαταραχή Αυτιστικού Φάσματος χαρακτηρίζεται από σοβαρά ελλείμματα σε διάφορους τομείς της ανάπτυξης του ατόμου ταυτόχρονα. Τα σοβαρά ελλείμματα παρουσιάζονται κυρίως στις κοινωνικές αλληλεπιδράσεις και στις δεξιότητες επικοινωνίας και χαρακτηρίζονται από στερεοτυπικές μορφές συμπεριφοράς, ενδιαφερόντων και δραστηριοτήτων (Kakouros & Maniadaki, 2002).

Η Διαταραχή Αυτιστικού Φάσματος εμφανίζεται νωρίς στη ζωή ενός ατόμου και επηρεάζει τον τρόπο με τον οποίο το άτομο αντιλαμβάνεται τον κόσμο, τον εαυτό του, την καθημερινότητα. Επιπλέον χαρακτηριστικά που συμπληρώνουν το κλινικό προφίλ ενός παιδιού με Διαταραχή Αυτιστικού Φάσματος είναι η στερεοτυπική συμπεριφορά, η ιδιόρρυθμη σχέση που μπορεί να εμφανίζει ως προς τα αντικείμενά του, η εκδήλωση άγχους και οι ακραίες εκδηλώσεις δραστηριότητας, η απουσία μιμητικής ικανότητας και ικανότητας παραληρηματικών ιδεών/ψευδαισθήσεων (Happe, 2003).

Η Happe (1998) αναφερόμενη στην «τριάδα» των ανεπαρκειών του αυτισμού, υπογραμμίζει πως «τα προβλήματα την κοινωνικοποίησης, της επικοινωνίας και της δημιουργικής φαντασίας είναι επαρκή και αναγκαία για να ταιριάζουν αρκετά με την συμπεριφορά που βρέθηκε να είναι ειδική και καθολική στον αυτισμό». Πιο συγκεκριμένα, κάποια από τα χαρακτηριστικά του μαθητή που μελετάμε σε τούτη την εργασία, είναι κοινά με χαρακτηριστικά συμπεριφοράς παιδιών με αυτισμό όπως περιγράφονται από τον Kanner (1943) στο Στασινός (Stasinos, 2013): «Σοβαρή κοινωνική απομόνωση, άτυπη γλώσσα, εμμονή για την διατήρηση της ομοιότητας, επαναληπτική και στερεοτυπική συμπροφορά, έλλειμμα φαντασίας, δημιουργικότητας και χιούμορ, σοβαρά ξεσπάσματα συμπεριφοράς, (σπάνιες) μεμονωμένες ικανότητες, νοητική υστέρηση και συσχετιζόμενα χαρακτηριστικά.»

Στα πλαίσια της επικοινωνίας το παιδί με αυτισμό μοιάζει να είναι κλεισμένο στον εαυτό του και τις περισσότερες φορές να μην ενδιαφέρεται για τα άτομα που υπάρχουνε γύρω του. Μένει παντελώς αποκομμένο από τα ερεθίσματα του περιβάλλοντός του και δεν εμφανίζει κάποιου είδους συναισθηματικό δέσιμο ούτε με τους γονείς του αλλά ούτε με τους γύρω του (Stasinos, 2013).

Αναφορικά με την δημιουργική φαντασία η Κοιλίαρη (Koiliari, 2009) παρατηρεί ένα «ιδιόρρυθμο και ασυνήθιστο» παιχνίδι με τα αντικείμενα, χαρακτηριζόμενο από εμμονές σε τμήματα των παιχνιδιών (π.χ. κοιτούν τις ρόδες αυτοκινήτων ή το πλυντήριο που γυρίζει) ή απλή παράταξή τους βάσει κριτηρίου (είδος, μέγεθος, χρώμα, κ.λ.π.), ενώ απουσιάζει το συμβολικό παιχνίδι.

Τέλος, η κοινωνικοποίηση των παιδιών με αυτισμό παρουσιάζει πολλά χαρακτηριστικά προβλήματα. Συγκεκριμένα, παρατηρούνται σοβαρά ελλείμματα κοινωνικής αλληλεπίδρασης, ενώ η βλεμματική επαφή φανερώνει άτομα με σοβαρή κοινωνική απομόνωση στην συμπεριφορά τους. Πολλές φορές είναι απομονωμένα σε κάποιο σημείο του χώρου και απασχολούνταν με μικροαντικείμενα για μεγάλο χρονικό διάστημα.

ΕΚΠΑΙΔΕΥΤΙΚΕΣ ΠΡΟΣΕΓΓΙΣΕΙΣ- ΠΡΟΓΡΑΜΜΑ TEACCH

Υπάρχει μια πληθώρα επιστημονικά τεκμηριωμένων θεραπευτικών προσεγγίσεων για την Διαταραχή Αυτιστικού Φάσματος. Μια σωστά οργανωμένη θεραπευτική παρέμβαση με προσεκτική καταγραφή του κλινικού προφίλ του παιδιού από την διεπιστημονική ομάδα, φέρει βελτίωση σε αρκετούς τομείς του παιδιού με αυτισμό (Stasinos, 2013). Τα προγράμματα παρέμβασης για άτομα με Διαταραχή Αυτιστικού Φάσματος αφορούν την εκπαίδευση ενός παιδιού ή ενήλικα σε συνδυασμό ή ξεχωριστά από την ιατρική θεραπευτική αντιμετώπιση λοιπών δυσλειτουργιών. Συμπληρωματικά, σε αρκετές περιπτώσεις, συνδυάζονται με υποστήριξη και εκπαίδευση της οικογένειας. Παρακάτω, θα αναφέρουμε, ενδεικτικά και επιγραμματικά μερικά από αυτά τα προγράμματα.

Υπάρχουν, λοιπόν, γενικά εκπαιδευτικά προγράμματα, όπως το Πρόγραμμα EarlyBird ή το Πρόγραμμα TEACCH. Πιο συγκεκριμένα το πρόγραμμα EarlyBird της NationalAutistic Society (NAS) της Μεγάλης Βρετανίας για την εκπαίδευση γονέων παιδιών προσχολικής ηλικίας με διαταραχές του αυτιστικού φάσματος. Το πρόγραμμα βοηθά τους γονείς να κατανοήσουν τον αυτισμό του παιδιού τους, να δομήσουν την αλληλεπίδραση μαζί του, να χρησιμοποιήσουν στρατηγικές επίλυσης προβλημάτων και έτσι να επανακτήσουν τον έλεγχο (Noesi, 2011). Ενώ το Πρόγραμμα TEACCH (μεταφράζεται "Θεραπεία και Εκπαίδευση Παιδιών με Αυτισμό και Διαταραχές Επικοινωνίας") αποτελεί ένα πρόγραμμα εναλλακτικής εκπαίδευσης, για παιδιά με διαταραχές του αυτιστικού φάσματος, που ενσωματώνει παρεμβάσεις σε περιβάλλον, ημερήσιο πρόγραμμα και αντικείμενο εργασίας, και επικοινωνία (Noesi, 2006). Ειδικότερα, σχεδιάζεται ένα εξατομικευμένο πρόγραμμα αντιμετώπισης των δυσκολιών του παιδιού με συμβουλές

που δίνονται στους γονείς για το χειρισμό του παιδιού στις διαφορές καταστάσεις του σπιτιού. Μάλιστα, το πρόγραμμα, εφαρμόζεται στο ειδικό ή γενικό σχολείο, με δυνατότητα προσαρμογής του (Stasinos, 2013). Εδώ για το Πρόγραμμα TEACCH, πρέπει να αναφέρουμε και πως, σύμφωνα με τον Νότα (Notas, 2013) «παρόλη τη διαδεδομένη χρήση στην εκπαίδευση παιδιών με αυτισμό στη Μ. Βρετανία και αλλού, υπάρχει μικρή αξιολογική έρευνα για τα αποτελέσματα του TEACCH. Οι περισσότερες μελέτες που αναφέρονται δεν έχουν επαρκείς ελέγχους κι έτσι τα θετικά αποτελέσματα που βρέθηκαν δε μπορούν να αποδοθούν αποκλειστικά στην επίδραση του προγράμματος. Αυτό σημαίνει ότι τα θετικά αποτελέσματα μπορεί να οφείλονται στην γονική εμπλοκή ή στην ένταση της εκπαιδευτικής παρέμβασης παρά στο TEACCH. Δεδομένου του υψηλού προφίλ αυτής της προσέγγισης στη Μ. Βρετανία, είναι σημαντικό να διεξαχθούν καλύτερες μεθοδολογικά μελέτες για να καθορίσουν την αποτελεσματικότητά της έναντι άλλων προσεγγίσεων». Αναφορικά με το Πρόγραμμα TEACCH ο Schopler (1997) στο Stasinos (2013) αποβλέπει σε μια συνεκτική παιδαγωγική μεταχείριση του εν λόγω παιδιού.

Η εμπλοκή των γονέων σε όλη την διαδικασία του εκπαιδευτικού και θεραπευτικού προγράμματος είναι καθοριστικής σημασίας για την αποτελεσματική διεξαγωγή του προγράμματος και την ικανοποιητική προσέγγιση των διδακτικών και εκπαιδευτικών στόχων. Οι γονείς, οφείλουν να έχουν αποδεχτεί το παιδί, να το στηρίζουν και να συμπαραστέκονται, επιδιώκοντας να ξεπερνούν τις οπουδήποτε δυσκολίες που προκύπτουν μέσα στην καθημερινότητά τους. Διότι, όπως σημειώνει η Σταύρου (Stavrou, 2011) «Ακόμη και στην περίπτωση σημαντικής νοητικής καθυστέρησης, η καθαρή αντίληψη και αποδοχή του γεγονότος από τον γονιό μπορεί να βοηθήσει σημαντικά στην εξέλιξη του παιδιού. Ήδη από την βρεφική ηλικία τα βρέφη αντιλαμβάνονται τις διαθέσεις των γονιών, ιδιαίτερα της μητέρας. Και ως την εφηβεία, τα παιδιά προσπαθούν να ικανοποιούν αυτές τις επιθυμίες. Η αντίληψη της διαφορετικότητας του παιδιού, ως αυτόνομου ατόμου με τα δικά του χαρακτηριστικά, είναι δύσκολη και προαπαιτεί την ψυχική ωριμότητα του γονιού (παρ. 10 & 11)».

Παράλληλα με τα γενικά εκπαιδευτικά προγράμματα, όπως αυτά που προαναφέραμε (TEACCH), υπάρχουν και άλλου είδους προγράμματα, που στοχεύουν στην αισθητηριακή αντίληψη, την αισθησιοκινητικότητα, την παρέμβαση μέσω της τέχνης (όπως χοροθεραπεία ή κινητική θεραπεία, μουσικοθεραπεία κ.α). Επίσης, έχουν αναπτυχτεί και έχουν εφαρμοστεί με θετικά θεραπευτικά αποτελέσματα σε άτομα με Διαταραχή Αυτιστικού Φάσματος προγράμματα παρέμβασης μέσω παιχνιδιού, ανάπτυξης κοινωνικών σχέσεων, θεραπεία μέσω σωματικής επαφής (δεσμού), αλλά και προγράμματα παρέμβασης μέσω επαφής με ζώα (σκύλους, άλογα, δελφίνια κ.α.).

Σπάνια, η χορήγησης ψυχοφαρμάκων αξιοποιείται ως θεραπευτική προσέγγιση για τη θεραπεία της Διαταραχή Αυτιστικού Φάσματος. Όπως αναφέρει ο Στασινός (Stasinos, 2013) «Σπάνια σε περιπτώσεις χορηγούνται ψυχοφάρμακα για την ελάττωση των επιπέδων σεροτονίνης. Μια τέτοια φαρμακευτική αγωγή συστήνεται μόνο σε ορισμένες περίπτωσης για την αντιμετώπιση σοβαρών διαταραχών συμπεριφοράς του παιδιού, όπως επιθετικότητα, αυτοτραυματισμού σε στιγμές κρίσης και έντονες ψυχικές εξάρσεις» (σελ 155).

ΓΕΝΙΚΟΙ ΚΑΙ ΕΙΔΙΚΟΙ ΣΤΟΧΟΙ ΕΚΠΑΙΔΕΥΤΙΚΗΣ ΠΑΡΕΜΒΑΣΗΣ

Στην περίπτωση μαθητή με Διαταραχή Αυτιστικού Φάσματος η θεραπευτική και εκπαιδευτική παρέμβαση που θα ακολουθήσουμε προϋποθέτει αφενός το σχεδιασμό και αφετέρου την διαμόρφωση ενός κατάλληλου περιβάλλοντος, που θα απευθύνεται σε μαθητή με Διαταραχή Αυτιστικού Φάσματος. Επίσης οι δραστηριότητες που θα λαμβάνουν χώρα, θα πρέπει να είναι κατάλληλα δομημένες για αν φέρουν το καλύτερο δυνατόν αποτέλεσμα. Η ύπαρξης γενικών και ειδικών στόχων παρέμβασης στο εκπαιδευτικό ή θεραπευτικό πλαίσιο είναι κεντρικής σημασίας, όπως θα τους αναπτύξουμε παρακάτω.

Επίσης η θεραπευτική και εκπαιδευτική παρέμβαση πρέπει να συνεισφέρει στα στοιχεία που αναφέρουμε παρακάτω, σύμφωνα πάντα με όσα αναφέραμε ή αναλύσαμε έως τώρα, λαμβάνοντας σοβαρά υπόψη τους γενικούς και ειδικούς στόχους παρέμβασης στο σχολικό πλαίσιο. Αναφορικά λοιπόν με τους ειδικούς και γενικούς στόχους η παρέμβαση πρέπει να:

- Δίνει έμφαση στις γνωστικές και κοινωνικές δεξιότητες του παιδιού.
- Δίνει έμφαση στην επικοινωνία και την κοινωνική αλληλεπίδραση του παιδιού με άλλα παιδιά, με την τάξη του, με άλλες τάξεις, με τους δασκάλους, με γονείς, με άλλα παιδιά με Διαταραχή Αυτιστικού Φάσματος.
- Να διδάσκει ή/και να αξιοποιεί αποδεκτά κοινωνικά πρότυπα / μοντέλα συμπεριφοράς που μπορεί να υιοθετήσει το παιδί.
- Να διδάξει κοινωνικές και καθημερινές δεξιότητες, έτσι ώστε το παιδί να μπορέσει να κοινωνικοποιηθεί και να αυτονομηθεί ως άτομο.

Η ΕΚΠΑΙΔΕΥΤΙΚΗ ΡΟΜΠΟΤΙΚΗ ΩΣ ΕΡΓΑΛΕΙΟ ΥΠΟΣΤΗΡΙΞΗΣ ΠΑΙΔΙΩΝ ΜΕ ΑΥΤΙΣΜΟ

Η Διαταραχή του Αυτιστικού Φάσματος (ΔΑΦ) επηρεάζει σημαντικά την καθημερινή ζωή και τη μάθηση πολλών παιδιών παγκοσμίως. Στο πλαίσιο της ειδικής αγωγής, η τεχνολογία έχει αποδειχθεί πολύτιμη, προσφέροντας καινοτόμες λύσεις υποστήριξης. Ένα από τα πιο επιτυχημένα προγράμματα είναι το TEACCH, το οποίο στηρίζεται στη δομημένη μάθηση. Η ένταξη της εκπαιδευτικής ρομποτικής και του οπτικού προγραμματισμού σε αυτό το πλαίσιο μπορεί να ενισχύσει ουσιαστικά τη μαθησιακή διαδικασία.

Ο οπτικός προγραμματισμός, μέσω εργαλείων όπως το Scratch και το LegoWeDo, δίνει τη δυνατότητα στα παιδιά να προγραμματίζουν χρησιμοποιώντας εικόνες και σύμβολα αντί για γραμμές κώδικα. Τα παιδιά με αυτισμό, που συνήθως ανταποκρίνονται θετικά σε οπτικά και προβλέψιμα ερεθίσματα, ευνοούνται από αυτή την προσέγγιση, η οποία ενισχύει την κατανόηση και την αυτονομία τους.

Το LegoWeDo αποτελεί ένα ιδιαίτερα προσβάσιμο εργαλείο ρομποτικής, με εφαρμογές ειδικά σχεδιασμένες για παιδιά με αυτισμό. Προάγει τη δημιουργική σκέψη, τη μαθηματική κατανόηση και τη δεξιότητα επίλυσης προβλημάτων. Μέσα από διαδραστικές δραστηριότητες, τα παιδιά έχουν την ευκαιρία να αναπτύξουν κοινωνικές δεξιότητες και να βελτιώσουν την επικοινωνία τους, καθώς και να μεταφέρουν όσα μαθαίνουν σε καθημερινές καταστάσεις.

Μία από τις βασικές δραστηριότητες που υλοποιήθηκαν είχε τίτλο *«Φιλία και Κοινωνικές Δεξιότητες»*. Σκοπός της ήταν η ενίσχυση της επικοινωνίας και της συνεργασίας. Τα παιδιά κατασκεύασαν και προγραμμάτισαν ρομπότ σε μικρές ομάδες, συμμετέχοντας σε σενάρια κοινωνικής αλληλεπίδρασης, όπως το «Ρομποτικό Ταχυδρόμο» ή το «Συναισθηματικό Ρομπότ», όπου το ρομπότ ανταποκρινόταν σε εκφράσεις και συναισθήματα.

Τα μαθησιακά αποτελέσματα της παρέμβασης ήταν ενθαρρυντικά. Πρώτον, παρατηρήθηκε αξιοσημείωτη πρόοδος στις μαθηματικές και λογικές δεξιότητες. Τα παιδιά ανέπτυξαν κατανόηση εννοιών όπως η ακολουθία, η αιτιότητα και η χρονική σειρά ενεργειών. Δεύτερον, υπήρξε αισθητή βελτίωση στην κοινωνική αλληλεπίδραση. Οι μαθητές συνεργάστηκαν, αντάλλαξαν ιδέες και ανέπτυξαν σχέσεις εμπιστοσύνης μέσα από τη συλλογική προσπάθεια.

Επιπλέον, η δραστηριότητα συνέβαλε στην ανάπτυξη συναισθηματικών δεξιοτήτων. Τα παιδιά εξασκήθηκαν στην αναγνώριση και έκφραση συναισθημάτων, καθώς το ρομπότ λειτουργούσε ως ουδέτερος και ασφαλής δέκτης της έκφρασης τους. Παράλληλα, βελτιώθηκε η κατανόηση βασικών εννοιών προγραμματισμού και τεχνολογίας, δίνοντας στα παιδιά τα πρώτα τους εφόδια στον τομέα της πληροφορικής.

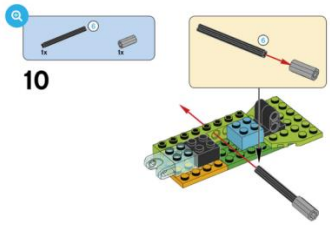
Τέλος, σημειώθηκε αύξηση στην αυτοεκτίμηση και την αυτοπεποίθηση των παιδιών. Η δυνατότητα να κατασκευάσουν και να δουν το ρομπότ τους να «ζωντανεύει» ενίσχυσε την αίσθηση επιτυχίας και ενθάρρυνε τη συμμετοχή τους σε νέες προκλήσεις.

Συμπερασματικά, η εκπαιδευτική ρομποτική, και ειδικότερα το LEGO WeDo, αποδείχθηκε αποτελεσματικό εργαλείο ενίσχυσης της μάθησης και της κοινωνικής ανάπτυξης σε παιδιά με αυτισμό. Η συνδυαστική χρήση τεχνολογίας, παιχνιδιού και συνεργασίας προσφέρει ένα ασφαλές, δομημένο και ταυτόχρονα δημιουργικό περιβάλλον, μέσα στο οποίο τα παιδιά μπορούν να αναπτύξουν τις δεξιότητές τους και να εκφράσουν τον εαυτό τους με τρόπους που συχνά δεν είναι δυνατοί με τις παραδοσιακές μεθόδους διδασκαλίας.

ΚΑΡΤΕΣ ΟΔΗΓΙΩΝΓΙΑ ΤΗΝ ΕΚΠΑΙΔΕΥΤΙΚΗ ΡΟΜΠΟΤΙΚΗ

Κάρτα 1: Συναρμολόγηση του Ρομπότ "Ο Βοηθός"

Βήματα:



1. Βγάλε όλα τα κομμάτια από το κουτί και τοποθέτησέ τα μπροστά σου.

Εικόνα 14
Προετοιμασία για τη δραστηριότητα:
Ταξινόμηση των εξαρτημάτων LEGO WeDo από το κουτί για την έναρξη της κατασκευής

2. Χρησιμοποίησε τις εικόνες για να συνδέσεις τα τουβλάκια και να δημιουργήσεις τη βάση του ρομπότ.

Εικόνα 15
Βήμα συναρμολόγησης:
Χρήση οπτικών οδηγιών για τη σύνδεση των τουβλάκια και τη δημιουργία της βάσης του ρομπότ

3. Πρόσθεσε τους αισθητήρες (π.χ. κλίσης ή απόστασης) σύμφωνα με το σχέδιο.

Εικόνα 16
Σύνδεση των αισθητήρων στη σωστή θέση πάνω στο Hub του ρομπότ

Εικόνα 17
Σύνδεση του μοτέρ στη σωστή θέση πάνω στο Hub του ρομπότ

4. Σύνδεσε το μοτέρ στη σωστή θέση.

5. ☑ Βεβαιώσου ότι το ρομπότ είναι έτοιμο για προγραμματισμό!

Εικόνα 18
Το ρομπότ ολοκληρωμένο και έτοιμο για τη διαδικασία του προγραμματισμού

Κάρτα 2: Προγραμματισμός Κίνησης του Ρομπότ

Βήματα:

1. Άνοιξε την εφαρμογή LEGO WeDo 2.0 στο τάμπλετ ή στον υπολογιστή.

Εικόνα 19
Άνοιγμα της εφαρμογής
LEGO WeDo 2.0 στο tablet για την έναρξη του οπτικού προγραμματισμού

2. Σύρε το εικονίδιο της πράσινης σημαίας για να ξεκινήσεις το πρόγραμμα.

Εικόνα 20
Δημιουργία κώδικα με χρήση οπτικών συμβόλων

Εικόνα 21
Δημιουργία κώδικα με χρήση οπτικών συμβόλων

3. Πρόσθεσε το μπλοκ "Προχώρα μπροστά για 5 δευτερόλεπτα".

4. Πρόσθεσε ένα μπλοκ "Περίμενε 2 δευτερόλεπτα".

Εικόνα 22
Δημιουργία κώδικα με χρήση οπτικών συμβόλων

Εικόνα 23
Δημιουργία κώδικα με χρήση οπτικών συμβόλων

5. Πρόσθεσε το μπλοκ "Στρίψε αριστερά".

6. Πάτησε το πράσινο κουμπί για να δοκιμάσεις την κίνηση του ρομπότ.

Εικόνα 24
Δημιουργία κώδικα με χρήση οπτικών συμβόλων

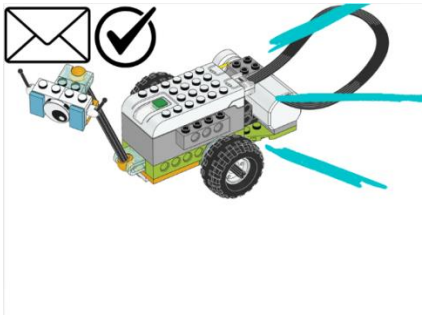
Κάρτα 3: Το Συναισθηματικό Ρομπότ

Βήματα:
1. Πρόσθεσε το μπλοκ "Όταν πατηθεί το κουμπί".
2. Σύνδεσε ένα μπλοκ "Παίξε ήχο χαράς".
3. Αν το παιδί πει "ευχαριστώ", το ρομπότ θα παίξει έναν χαρούμενο ήχο.
4. Αν το παιδί πει "γεια σου", το ρομπότ θα αναβοσβήσει με μπλε φως.
5. Δοκίμασε διαφορετικές εντολές και δες τις αντιδράσεις του ρομπότ!

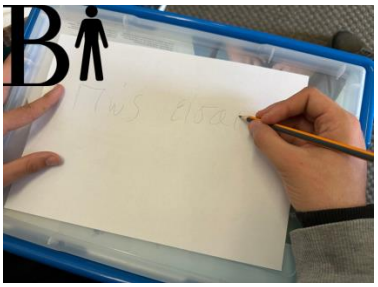
Κάρτα 4: Συνεργασία με Φίλο – "Ο Ρομποτικός Ταχυδρόμος"

Βήματα:
1. Το παιδί Α γράφει ένα μήνυμα σε μια κάρτα (π.χ. "Καλημέρα!").

Εικόνα 25
Ο Μαθητής Α γράφει ένα μήνυμα σε χαρτί



Εικόνα 26
Ο Μαθητής Β προγραμματίζει το ρομπότ μέσω του tablet για να μεταφέρει το μήνυμα στον συμμαθητή του



2. 🤖 Το παιδί Β προγραμματίζει το ρομπότ να μεταφέρει την κάρτα σε έναν συμμαθητή.

3. 🚚 Το ρομπότ κινείται και παραδίδει το μήνυμα.

Εικόνα 27
Το ρομπότ εκτελεί την εντολή και κινείται για να παραδώσει το μήνυμα, επιβεβαιώνοντας την επιτυχή συνεργασία

Εικόνα 28.
Ο παραλήπτης του μηνύματος απαντά γραπτώς, συνεχίζοντας τον κύκλο επικοινωνίας.

4. 💌 Ο συμμαθητής απαντάει με ένα νέο μήνυμα και η διαδικασία επαναλαμβάνεται.

Σενάριο 1: Ο Ρομποτικός Ταχυδρόμος
Στόχος: Ενίσχυση επικοινωνίας και συνεργασίας.
Τα παιδιά προγραμματίζουν το ρομπότ να παραδώσει ένα θετικό μήνυμα (π.χ. «Καλημέρα!») σε έναν συμμαθητή. Μέσω εικόνων και απλών εντολών (κίνησης, σταματήματος), μαθαίνουν τη σημασία της θετικής επικοινωνίας. Παρακολουθούν την πορεία του ρομπότ, συζητούν το αποτέλεσμα και εκφράζουν το συναίσθημά τους για το μήνυμα. Η δραστηριότητα ολοκληρώνεται με εικόνες φιλικής αλληλεπίδρασης.

Σενάριο 2: Οδηγός Συνεργασίας
Στόχος: Καλλιέργεια λεκτικής επικοινωνίας και ομαδικότητας.
Δύο παιδιά συνεργάζονται: το ένα δίνει προφορικές οδηγίες (π.χ. «στρίψε αριστερά»), το άλλο τις μεταφράζει σε εντολές στην εφαρμογή. Το ρομπότ καλείται να φτάσει σε έναν προορισμό και να παραδώσει ένα αντικείμενο. Μέσα από εικόνες και καθαρές φράσεις, τα παιδιά εξασκούνται στην ακρίβεια, στον συντονισμό και στην ενσυναίσθηση.

Σενάριο 3: Το Συναισθηματικό Ρομπότ
Στόχος: Ανάπτυξη συναισθηματικής νοημοσύνης.
Το ρομπότ προγραμματίζεται να αντιδρά σε εκφράσεις όπως «ευχαριστώ» ή «συγγνώμη», δείχνοντας συναισθήματα (χαμόγελο, ήχο, φως). Τα παιδιά βλέπουν σχετικές εικόνες, παρατηρούν τις αντιδράσεις και εξασκούνται στην έκφραση θετικών συναισθημάτων. Η δραστηριότητα ενισχύει τη συναισθηματική αναγνώριση και την επικοινωνία.

ΠΑΡΑΔΕΙΓΜΑ ΕΦΑΡΜΟΓΗΣ: ΠΕΙΡΑΜΑ ΧΗΜΕΙΑΣ ΜΕ ΧΡΗΣΗ ΨΗΦΙΑΚΩΝ ΜΕΣΩΝ ΚΑΙ ΤΟΥ ΠΡΟΓΡΑΜΜΑΤΟΣ TEACCH ΓΙΑ ΜΑΘΗΤΕΣ ΜΕ ΔΑΦ

Στο πλαίσιο της εργασίας μας με θέμα «Συμπεριληπτική Εκπαίδευση με Ψηφιακά Μέσα για Μαθητές με ΔΑΦ», σχεδιάσαμε και υλοποιήσαμε μια δραστηριότητα διδασκαλίας του μαθήματος της Χημείας, εστιασμένη στις ανάγκες

μαθητών με Διαταραχή Αυτιστικού Φάσματος. Η εκπαιδευτική παρέμβαση βασίστηκε στο Πρόγραμμα **TEACCH (Treatment and Education of Autistic and related Communication-handicapped Children)**, το οποίο αποτελεί ένα ευρέως εφαρμοζόμενο και επιστημονικά τεκμηριωμένο πλαίσιο υποστήριξης μαθητών με ΔΑΦ.

Ο σχεδιασμός της παρέμβασης στηρίχθηκε σε τρεις βασικές αρχές του TEACCH:

- **Δομημένο μαθησιακό περιβάλλον** με σαφή αρχή, μέση και τέλος,
- **Οπτική υποστήριξη** μέσω καρτελών και ψηφιακού υλικού,
- **Αυτονομία και προβλεψιμότητα**, ώστε οι μαθητές να γνωρίζουν κάθε στιγμή τι αναμένεται από αυτούς.

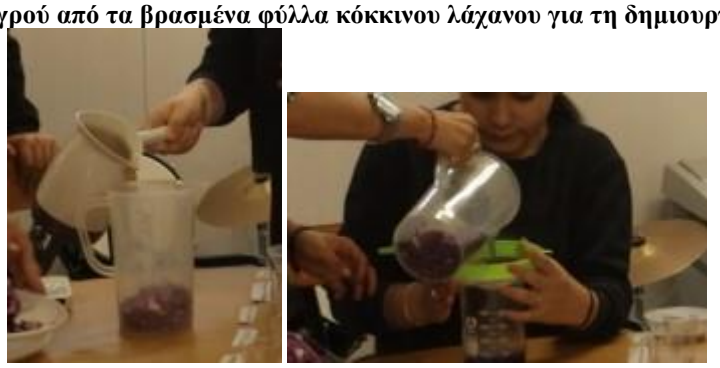
ΣΤΟΧΟΣ ΚΑΙ ΠΕΡΙΓΡΑΦΗ ΤΗΣ ΔΡΑΣΤΗΡΙΟΤΗΤΑΣ

Η εκπαιδευτική δραστηριότητα σχεδιάστηκε γύρω από ένα απλό αλλά εντυπωσιακό πείραμα Χημείας: **τη δημιουργία φυσικού δείκτη pH από κόκκινο λάχανο** και την παρατήρηση της αλλαγής χρώματος του δείκτη ανάλογα με την οξύτητα ή τη βασικότητα των υγρών. Η επιλογή του θέματος έγινε με βάση τη δυνατότητα **οπτικής κατανόησης των εννοιών**, την απλότητα των υλικών και την ευκολία χειρισμού.

Για την υποστήριξη των μαθητών κατά τη διάρκεια της δραστηριότητας δημιουργήθηκαν δύο παράλληλα εργαλεία:

1. Ένα **διαδραστικό ψηφιακό παιχνίδι** που αναπαριστά τα βήματα του πειράματος σε απλή, κατανοητή μορφή, μέσω της πλατφόρμας **e-me**: https://content.e-me.edu.gr/wp-admin/admin-ajax.php?action=h5p_embed&id=1478637
2. Μια σειρά **έντυπων καρτελών**, οι οποίες οπτικοποιούν κάθε στάδιο της διαδικασίας και παρέχουν σαφείς, βήμα-βήμα οδηγίες.

ΑΝΑΛΥΤΙΚΗ ΠΑΡΟΥΣΙΑΣΗ ΚΑΡΤΕΛΩΝ – ΣΤΑΔΙΑ ΠΕΙΡΑΜΑΤΟΣ



Η δραστηριότητα οργανώθηκε σε εννέα διακριτές φάσεις:

1. **Καρτέλα 1 – Κανόνες Ασφαλείας**
   Ορίζονται οι βασικοί κανόνες που πρέπει να τηρούν οι μαθητές: «Δεν αγγίζουμε τα υγρά», «Δεν τα μυρίζουμε», «Φοράμε γάντια και ποδιά», «Ακολουθούμε τις οδηγίες του εκπαιδευτικού».
2. **Καρτέλα 2 – Τι θα κάνουμε;**
   Περιγράφεται ο σκοπός του πειράματος: να φτιάξουμε έναν φυσικό δείκτη από λάχανο και να δούμε πώς αυτός αλλάζει χρώμα ανάλογα με το pH.

3–5. **Παρασκευή του δείκτη (σε τρία στάδια)**

3. Κόβουμε το κόκκινο λάχανο σε μικρά κομμάτια.
4. Το τοποθετούμε σε ζεστό νερό.
5. Φιλτράρουμε το μπλε υγρό – ο δείκτης είναι πλέον έτοιμος προς χρήση.

Εικόνα 29
Διαδικασία φιλτραρίσματος:
Διαχωρισμός του μωβ υγρού από τα βρασμένα φύλλα κόκκινου λάχανου για τη δημιουργία του φυσικού δείκτη

6. **Καρτέλα 6 – Τοποθέτηση των υγρών**

Οι μαθητές οργανώνουν τα δοκιμαστικά υγρά σε σειρά στα ποτηράκια.

Εικόνα 30
Προετοιμασία δειγμάτων:
Τοποθέτηση των υγρών σε σειρά πριν την προσθήκη του δείκτη

7. **Καρτέλα 7 – Πείραμα**

Προσθέτουν τον δείκτη στα υγρά και παρατηρούν πώς αλλάζει το χρώμα ανάλογα με τη σύσταση του κάθε διαλύματος.

Εικόνα 31.
Εκτέλεση πειράματος:
Προσθήκη του δείκτη λάχανου στα διαφανή ποτήρια για τον έλεγχο της οξύτητας των διαλυμάτων

8. **Καρτέλα 8 – Χρώματα και pH**

Μετρούν το pH με πεχαμετρικό χαρτί και αντιστοιχούν τα χρώματα με την κατηγορία:

- Κόκκινο = Όξινο,
- Πράσινο = Βασικό,
- Μπλε = Ουδέτερο.

9. **Καρτέλα 9 – Τι Μάθαμε;**

Γίνεται ανακεφαλαίωση της εμπειρίας: κατανοούν ότι το pH επηρεάζει το χρώμα του δείκτη και μαθαίνουν βασικές επιστημονικές έννοιες μέσα από βιωματικό πείραμα.

ΕΚΠΑΙΔΕΥΤΙΚΑ ΟΦΕΛΗ ΚΑΙ ΠΑΡΑΤΗΡΗΣΕΙΣ

Η εφαρμογή αυτής της δραστηριότητας σε μαθητές με ΔΑΦ είχε εξαιρετικά θετικά αποτελέσματα. Οι μαθητές παρουσίασαν:

- Αυξημένη **συγκέντρωση και προσοχή**, λόγω της σαφούς δομής και της συνέπειας των βημάτων,
- **Ενίσχυση της κατανόησης** μέσω της οπτικοποίησης και της επανάληψης,
- **Αυτονομία**, καθώς οι καρτέλες και το ψηφιακό υλικό παρείχαν ξεκάθαρους οδηγούς για κάθε βήμα,
- **Ενεργή συμμετοχή**, γεγονός που ενίσχυσε το ενδιαφέρον τους για το μάθημα και καλλιέργησε θετική στάση απέναντι στις φυσικές επιστήμες.

Επιπλέον, η αξιοποίηση των **ψηφιακών μέσων**, ειδικά του διαδραστικού παιχνιδιού, διευκόλυνε τη διαφοροποίηση της διδασκαλίας και την παροχή κινήτρων σε μαθητές που συχνά δυσκολεύονται να εμπλακούν με τα παραδοσιακά μέσα.

ΠΕΡΙΛΗΨΗ

Η συμπεριληπτική ψηφιακή εκπαίδευση αποτελεί βασικό άξονα των σύγχρονων εκπαιδευτικών πρακτικών, καθώς στοχεύει στη διασφάλιση ισότιμης πρόσβασης στη γνώση για όλους, ανεξαρτήτως κοινωνικών ή γεωγραφικών περιορισμών (Ainscow, 2020). Στο πλαίσιο αυτό, η αξιοποίηση ψηφιακών μέσων για τη διδασκαλία σε ευάλωτες κοινωνικές ομάδες, όπως οι έγκλειστοι σε Σωφρονιστικά Καταστήματα, λαμβάνει ιδιαίτερη σημασία. Το ερευνητικό πρόγραμμα "*Museum Tours for Inmates -the ancient Greek encounters*" (*MuTourIn*), για την υλοποίηση του οποίου έχει ληφθεί Υποτροφία από το Κέντρο Ελληνικών Σπουδών του Πανεπιστημίου του Harvard, αποτέλεσε μια καινοτόμο πρωτοβουλία που αξιοποίησε την πολιτιστική κληρονομιά και την ψηφιακή τεχνολογία για την εκπαίδευση και την κοινωνική ενσωμάτωση των εγκλείστων.

Το *MuTourIn* αποτελεί συνέχεια και εξέλιξη του επιτυχημένου προγράμματος «*Μουσειακοί Ψίθυροι στο Πανοπτικόν*», το οποίο αξιοποίησε ψηφιακές πλατφόρμες για την παροχή ψηφιακών ξεναγήσεων σε μουσεία από όλο τον κόσμο. Το νέο αυτό εγχείρημα, εστίασε στη διασύνδεση της αρχαίας ελληνικής πολιτιστικής κληρονομιάς με την εκπαίδευση των εγκλείστων. Μέσα από τον συνδυασμό ψηφιακών ξεναγήσεων και διαδραστικών συζητήσεων, το MuTourIn επιδίωξε να προάγει τη γνωστική ανάπτυξη, την πολιτισμική κατανόηση και την ενίσχυση δεξιοτήτων του 21ου αιώνα, όπως η κριτική σκέψη και η επικοινωνία (Kidd, 2019). Η πρωτοβουλία αυτή ανέδειξε τον ρόλο της ψηφιακής πολιτιστικής κληρονομιάς ως εργαλείου εκπαίδευσης και κοινωνικής ενσωμάτωσης, γεφυρώνοντας το χάσμα ανάμεσα στους έγκλειστους και τον ευρύτερο πολιτιστικό και ακαδημαϊκό χώρο και βελτίωσε την πρόσβαση στην εκπαίδευση, ενισχύοντας δεξιότητες όπως η συνεργασία και η πολιτισμική κατανόηση. Ακολούθως, η ενσωμάτωση της πολιτιστικής κληρονομιάς στην εκπαίδευση των εγκλείστων προσέφερε πολλαπλά οφέλη, καθώς ενίσχυσε τη δια βίου μάθηση και δημιούργησε γέφυρες επικοινωνίας μεταξύ των μουσείων και των Σχολείων Δεύτερης Ευκαιρίας των Σωφρονιστικών Καταστημάτων (Lupo et al., 2023). Παρόλο που σχετικές έρευνες υπογραμμίζουν τη θετική επίδραση της τέχνης και της εκπαίδευσης στη διαδικασία κοινωνικής επανένταξης, η σύνδεση μουσείων, κλασικών σπουδών και σωφρονιστικών περιβαλλόντων παραμένει ένας σχετικά ανεξερεύνητος τομέας (McGregor, 2020).

Οι προκλήσεις που προέκυψαν αφορούν στην τεχνολογική υποδομή, τις παιδαγωγικές προσεγγίσεις και την ανάγκη θεσμικής υποστήριξης για τη βιώσιμη ανάπτυξη τέτοιων πρωτοβουλιών. Ωστόσο, το *MuTourIn* μέσω των ποιοτικών δεδομένων που εξήχθησαν από συνεντεύξεις εγκλείστων σε 7 από τα 12 Σχολεία -τα οποία η ερευνήτρια επισκέφθηκε δια ζώσης, ενώ στην τελευταία ξενάγηση διασυνδέθηκαν και τα 12 σχολεία- που λειτουργούν σε Σωφρονιστικά Καταστήματα στη χώρα μας και παρακολούθησαν τις εν λόγω μουσειακές ψηφιακές ξεναγήσεις, παρέχει πολύτιμα δεδομένα που μπορούν να αξιοποιηθούν για τη διαμόρφωση βιώσιμων στρατηγικών, συνδυάζοντας την ψηφιακή πολιτιστική κληρονομιά με την κοινωνική ένταξη.

Συνοψίζοντας, η χρήση ψηφιακών ξεναγήσεων και η αξιοποίηση της πολιτιστικής κληρονομιάς ως εκπαιδευτικού εργαλείου διαμορφώνουν νέες προοπτικές για τη συμπεριληπτική εκπαίδευση. Το *MuTourIn* απέδειξε πως η τεχνολογία μπορεί να λειτουργήσει ως γέφυρα ανάμεσα σε διαφορετικές κοινωνικές ομάδες, προωθώντας την εκπαίδευση και τον κοινωνικό μετασχηματισμό μέσα από την αλληλεπίδραση με τον πολιτισμό.

Λέξεις – κλειδιά: Συμπεριληπτική εκπαίδευση, πολιτιστική κληρονομιά, μουσειακές ψηφιακές ξεναγήσεις, Σωφρονιστικά Καταστήματα

ΕΙΣΑΓΩΓΗ

Η εκπαιδευτική διαδικασία εντός των Σωφρονιστικών Ιδρυμάτων συχνά υπονομεύεται από κοινωνικούς αποκλεισμούς, θεσμικές αδυναμίες και περιορισμένους παιδαγωγικούς πόρους (McGregor, 2020). Παρόλο που η εκπαίδευση στις φυλακές αναγνωρίζεται ως βασικός παράγοντας επανένταξης και προσωπικής ενδυνάμωσης (Lupo et al., 2023), η πρόσβαση σε ποιοτικά πολιτιστικά και εκπαιδευτικά προγράμματα παραμένει ανεπαρκής. Το πρόγραμμα *MuTourIn* επιχείρησε να αντιμετωπίσει αυτές τις προκλήσεις, αξιοποιώντας την πολιτιστική κληρονομιά και την ψηφιακή τεχνολογία για να εμπλουτίσει την εκπαιδευτική εμπειρία των εγκλείστων.

Η συγκεκριμένη δράση βασίστηκε στην αρχή ότι η πολιτιστική μάθηση μπορεί να λειτουργήσει ως εργαλείο αυτογνωσίας, κοινωνικής συνείδησης και διαλόγου (Kidd, 2019). Η παρουσίαση αυτής της καινοτόμου πρακτικής εντάσσεται σε ένα ευρύτερο πλαίσιο συμπεριληπτικής και διαπολιτισμικής εκπαίδευσης που προάγει την κοινωνική δικαιοσύνη, την ενσυναίσθηση και τον αναστοχασμό (Ainscow, 2020).

ΘΕΩΡΗΤΙΚΟ ΠΛΑΙΣΙΟ

Η θεωρητική προσέγγιση του προγράμματος *MuTourIn* άντλησε στοιχεία από το συγκερασμό πεδίων όπως η κριτική μουσειολογία, η συμπεριληπτική εκπαίδευση ενηλίκων, η σωφρονιστική παιδαγωγική και η θεωρία της μετασχηματιστικής μάθησης. Βασικό υπόβαθρο αποτέλεσε η έννοια της συμπερίληψης, η οποία δεν αφορά μόνο την πρόσβαση στην εκπαίδευση, αλλά την ουσιαστική συμμετοχή όλων των ατόμων σε ένα εκπαιδευτικό περιβάλλον που προάγει την αξιοπρέπεια και τη διαφορετικότητα (Ainscow, 2020).

Παράλληλα, η θεωρία της μετασχηματιστικής μάθησης του Mezirow (1991) αναγνωρίζει τη δυνατότητα των ενηλίκων να αναστοχαστούν πάνω στις εμπειρίες τους και να αναδομήσουν τις απόψεις τους για τον κόσμο, γεγονός που βρίσκει ιδιαίτερο έρεισμα στο σωφρονιστικό πλαίσιο. Σημαντική είναι και η συμβολή της κριτικής παιδαγωγικής του Freire (1970), η οποία αντιμετωπίζει την εκπαίδευση ως πράξη ελευθερίας και κοινωνικού μετασχηματισμού.

Από τη σκοπιά της μουσειολογίας, η έννοια του εξουσιοδοτημένου λόγου για την κληρονομιά (Authorized Heritage Discourse), ως βασική θεωρητική συνεισφορά στις Κριτικές Σπουδές για την Πολιτιστική Κληρονομιά και με κύριο εισηγητή τον Laurajane Smith (ιδίως στο έργο της *Uses of Heritage*, 2006), περιγράφει ένα ηγεμονικό και θεσμοποιημένο είδος λόγου γύρω από την κληρονομιά, που επικυρώνεται από κρατικούς, επιστημονικούς ή θεσμικούς φορείς και καθορίζει τι θεωρείται «κληρονομιά», ποιος τη διαχειρίζεται, και ποιος έχει δικαίωμα να μιλήσει για αυτήν. Συνεπώς, εδώ αμφισβητείται, δίνοντας έμφαση στην επανανοηματοδότηση της πολιτιστικής εμπειρίας από ομάδες που βρίσκονται στο περιθώριο της επίσημης αφήγησης (Smith, 2006).

Το πρόγραμμα ενσωμάτωσε επίσης στοιχεία από τη διαλογική μουσειακή παιδαγωγική, που βασίζεται στην ενεργό συμμετοχή και τη δημιουργία νοήματος από τον ίδιο τον επισκέπτη (Waterton and Smith, 2010), αφού μετατοπίζει το επίκεντρο της μουσειακής εμπειρίας από την παθητική πρόσληψη πληροφοριών στην ενεργό δημιουργία νοήματος από τον ίδιο τον ξεναγούμενο. Στο πλαίσιο αυτό, ο επισκέπτης δεν θεωρείται παθητικός δέκτης ενός αυθεντικού και εξουσιοδοτημένου λόγου για την κληρονομιά, αλλά συνδιαμορφωτής της ερμηνείας, εμπλεκόμενος σε μια διαδικασία προσωπικής, κοινωνικής και πολιτισμικής νοηματοδότησης (Waterton and Smith, 2010).

Το μουσείο κατ' επέκταση αντιμετωπίζεται ως χώρος διαλόγου και συμπερίληψης, όπου διαφορετικές φωνές, εμπειρίες και αφηγήσεις μπορούν να συνυπάρξουν και να αλληλεπιδράσουν. Αυτή η προσέγγιση συνάδει με τις αρχές της κριτικής παιδαγωγικής, της πολιτισμικής δημοκρατίας και των συμμετοχικών πρακτικών στην πολιτιστική κληρονομιά.

Συνολικά, το θεωρητικό πλαίσιο του MuTourIn ευθυγραμμίστηκε με τις αρχές της εκπαιδευτικής δικαιοσύνης και της πολιτισμικά προσανατολισμένης μάθησης, προτείνοντας ένα εναλλακτικό, ανθρώπινο πρότυπο εκπαίδευσης σε περιβάλλον εγκλεισμού.

ΠΛΑΙΣΙΟ ΕΡΕΥΝΑΣ

Η παρούσα παρουσίαση βασίστηκε σε μεταδιδακτορική έρευνα με αντικείμενο τη διασύνδεση των μουσείων με τη Σωφρονιστική Εκπαίδευση, διερευνώντας τη συμβολή της πολιτιστικής εμπειρίας στην ενδυνάμωση και εκπαιδευτική κινητοποίηση των εγκλείστων. Η έρευνα, με τίτλο «*Μουσειακή Σωφρονιστική Εκπαίδευση: η εκπαιδευτική αξία και η σημαντικότητα της δημιουργίας μουσειακών δράσεων και μουσειακών χώρων εντός Καταστημάτων Κράτησης, σε συνδυασμό με τα Σχολεία Δεύτερης Ευκαιρίας*», επιχείρησε να αναδείξει τη σημασία της εισαγωγής της πολιτιστικής μάθησης στο σωφρονιστικό περιβάλλον.

Εστίασε στην αναγκαιότητα δημιουργίας μουσειακών δράσεων και πολιτιστικών χώρων με σαφή εκπαιδευτικό και επανενταξιακό προσανατολισμό εντός των Καταστημάτων Κράτησης, με σκοπό την υποστήριξη των μαθητών των Σχολείων Δεύτερης Ευκαιρίας. Κεντρικό θεμέλιο της έρευνας αποτέλεσε το όραμα ενός σχολείου εντός του σωφρονιστικού πλαισίου, το οποίο μετασχηματίζει δημιουργικά την πολιτιστική κληρονομιά σε παιδαγωγικό εργαλείο, προάγοντας την εκπαιδευτική εμπειρία, ενδυναμώνοντας την προσωπική ανάπτυξη και διευρύνοντας τις κοινωνικές προοπτικές των εκπαιδευομένων.

ΜΕΘΟΔΟΛΟΓΙΚΗ ΠΡΟΣΕΓΓΙΣΗ

Η μεθοδολογική προσέγγιση της παρούσας έρευνας εντάσσεται στο πλαίσιο της ποιοτικής ερμηνευτικής ερευνητικής παράδοσης, η οποία δίνει έμφαση στις προσωπικές εμπειρίες, τις αφηγήσεις και τα νοήματα που αποδίδουν οι συμμετέχοντες στις κοινωνικές τους πρακτικές (Creswell and Poth, 2018). Η μελέτη βασίστηκε σε συμμετοχική παρατήρηση, ημι-δομημένες συνεντεύξεις και ανάλυση περιεχομένου, επιδιώκοντας τη σε βάθος κατανόηση των βιωμάτων και των στάσεων των εγκλείστων αναφορικά με την πολιτιστική μάθηση.

Η έρευνα υλοποιήθηκε δια ζώσης σε εφτά Σχολεία Δεύτερης Ευκαιρίας, στα οποία παρακολούθησε και η ίδια η ερευνήτρια τις ψηφιακές ξεναγήσεις και ακολούθως πραγματοποιήθηκαν και οι συνεντεύξεις, εντός Καταστημάτων Κράτησης στην Ελλάδα -ενώ τα υπόλοιπα τηλε- συνδέθηκαν στην τελευταία ξενάγηση- με τη συμμετοχή περισσότερων από 300 εκπαιδευομένων διαφορετικής ηλικίας, εθνικότητας και μορφωτικού επιπέδου. Οι ψηφιακές ξεναγήσεις συνδυάστηκαν με βιωματικές παιδαγωγικές προσεγγίσεις (Kolb, 1984) και διαλογικές συζητήσεις στο πνεύμα της παιδαγωγικής του Freire (1970), με στόχο την ενεργό συμμετοχή, την ενίσχυση της αυτοέκφρασης και την καλλιέργεια κριτικής σκέψης των συμμετεχόντων.

Τέλος, η επιλογή συμμετοχικών και μη-ιεραρχικών μεθόδων συντάσσεται με τις αρχές της κριτικής εκπαιδευτικής έρευνας (Kokkos, 2020), όπου ο εκπαιδευόμενος λειτουργεί ως συμμέτοχος της γνώσης και όχι ως παθητικός δέκτης. Η ερευνητική διαδικασία εμπεριείχε στοιχεία ενδυνάμωσης και ενσυναίσθησης, αποφεύγοντας την αναπαραγωγή της εξουσιαστικής σχέσης μεταξύ ερευνητή και υποκειμένου.

ΣΥΜΠΕΡΙΛΗΠΤΙΚΗ ΕΚΠΑΙΔΕΥΣΗ: ΜΑΘΗΣΗ ΧΩΡΙΣ ΑΠΟΚΛΕΙΣΜΟΥΣ

Η Συμπεριληπτική Εκπαίδευση ορίζεται ως μια ανοικτή και διαρκής διαδικασία βελτίωσης του σχολικού κλίματος, των διαπροσωπικών σχέσεων και της ποιότητας της μάθησης, με στόχο όλα τα πρόσωπα να απολαμβάνουν με αξιοπρέπεια, ισότητα και δημοκρατία το δικαίωμα στην εκπαίδευση. Ο όρος συνδέεται στενά -και συχνά ταυτίζεται- με τις έννοιες του «*Σχολείου για Όλους*», του «*Δημοκρατικού Σχολείου*» και του «*Καθολικού Σχεδιασμού της Μάθησης*» (Institute of Educational Policy (IEP), 2024). Πρόκειται για ένα παιδαγωγικό όραμα που επιδιώκει τη δημιουργία ενός εκπαιδευτικού περιβάλλοντος χωρίς αποκλεισμούς, όπου η διαφορετικότητα αναγνωρίζεται ως πλούτος και κανείς δεν μένει πίσω.

Σύμφωνα με την Ευρωπαϊκή Επιτροπή, ως κοινωνικά ευάλωτες ομάδες ορίζονται τα άτομα ή οι ομάδες που διατρέχουν αυξημένο κίνδυνο φτώχειας και κοινωνικού αποκλεισμού. Οι παράγοντες που ενισχύουν τον αποκλεισμό περιλαμβάνουν την ανεργία, το χαμηλό εισόδημα, την ανεπαρκή πρόσβαση σε βασικές υπηρεσίες, καθώς και τις διακρίσεις που συνδέονται με χαρακτηριστικά όπως η ηλικία, το φύλο, η εθνικότητα ή η αναπηρία. Η έννοια της ευαλωτότητας δεν περιορίζεται σε μία στατική κατηγορία, αλλά αντικατοπτρίζει τη δυναμική σχέση μεταξύ κοινωνικών συνθηκών και ατομικών χαρακτηριστικών που περιορίζουν τη δυνατότητα πλήρους συμμετοχής στην κοινωνική και εκπαιδευτική ζωή (European Commission, 2020).

Στο πλαίσιο της σωφρονιστικής πολιτικής, η αναγνώριση και προστασία των δικαιωμάτων των κρατουμένων αποτελεί θεμελιώδη προϋπόθεση για την ομαλή λειτουργία των καταστημάτων κράτησης. Το «*Αλφαβητάρι του Κρατούμενου*», έκδοση της Γενικής Γραμματείας Αντεγκληματικής Πολιτικής του Υπουργείου Δικαιοσύνης, λειτουργεί ως εκπαιδευτικό και ενημερωτικό εργαλείο για τα δικαιώματα και τις υποχρεώσεις των έγκλειστων πολιτών. Όπως χαρακτηριστικά αναφέρεται, «η φυλακή αποτελεί έναν χώρο κοινής συμβίωσης, όπου η καθημερινότητα ρυθμίζεται από ένα πλέγμα δικαιωμάτων και κανόνων». Ανάμεσα σε αυτά τα δικαιώματα ξεχωρίζει το δικαίωμα στην εκπαίδευση, το οποίο κατοχυρώνεται νομικά και συνιστά βασικό μέσο προσωπικής ανάπτυξης, κοινωνικής ένταξης και μελλοντικής επανένταξης (Ministry of Justice, 2021). Η εκπαιδευτική διάσταση της φυλάκισης δεν αποτελεί προνόμιο, αλλά αναφαίρετο δικαίωμα που ενισχύει την αξιοπρέπεια και την ανθρώπινη υπόσταση κάθε έγκλειστου, ανεξαρτήτως αδικήματος ή ποινικής κατάστασης (Costelloe, 2022).

ΥΛΟΠΟΙΗΣΗ ΚΑΙ ΣΤΟΧΟΙ ΤΟΥ ΠΡΟΓΡΑΜΜΑΤΟΣ

Το πρόγραμμα *MuTourIn*, το οποίο υλοποιήθηκε με την υποστήριξη του Center for Hellenic Studies του Πανεπιστημίου Harvard (2024–2025), συνιστά φυσική συνέχεια του επιτυχημένου πιλοτικού εγχειρήματος «*Μουσειακοί Ψίθυροι στο Πανοπτικόν*». Με στόχο την παροχή ισότιμης πρόσβασης στον πολιτισμό για έγκλειστα άτομα, αξιοποίησε ψηφιακά εργαλεία για την πραγματοποίηση διαδραστικών ξεναγήσεων σε μουσεία διεθνούς εμβέλειας, ενισχύοντας τη συμμετοχική πολιτιστική εμπειρία. Στο πρόσφατο στάδιο υλοποίησης, το *MuTourIn* επικεντρώθηκε στην αξιοποίηση της αρχαίας ελληνικής πολιτιστικής κληρονομιάς ως πεδίου γνωστικής και αξιακής ενδυνάμωσης για τους εκπαιδευόμενους των Σχολείων Δεύτερης Ευκαιρίας εντός Καταστημάτων Κράτησης. Μέσω ψηφιακών ξεναγήσεων, και βιωματικού διαλόγου, επιδίωξε την καλλιέργεια δεξιοτήτων του 21ου αιώνα, όπως η κριτική σκέψη και η επικοινωνία, ενισχύοντας την πολιτισμική αυτογνωσία και τη δυνατότητα κοινωνικής επανένταξης (UNESCO, 2021).

Επί παραδείγματι, η πρώτη ψηφιακή ξενάγηση στο πλαίσιο του προγράμματος *MuTourIn* πραγματοποιήθηκε από το Αρχαιολογικό Μουσείο Κέρκυρας, εγκαινιάζοντας έναν κύκλο εξ αποστάσεως επαφής των εκπαιδευομένων με την αρχαία ελληνική πολιτιστική κληρονομιά. Το εισαγωγικό κείμενο που συνόδευε κάθε περιήγηση, μέσω του οποίου ενημερώνονταν λίγες ημέρες πριν για το περιεχόμενο της τηλε- ξενάγησης οι συμμετέχοντες και προετοίμαζαν ενδεχόμενες ερωτήσεις, υπογράμμιζε τον διαχρονικό ρόλο του ελληνικού πολιτισμού στη διαμόρφωση αξιών και ιδεών που παραμένουν επίκαιρες: ελευθερία, σκέψη, αισθητική, δημοκρατία και φιλοσοφία. Η επιλεγμένη, αντιστοίχως, πρώτη περιήγηση, με έμφαση στο παλαιότερο σωζόμενο λίθινο αέτωμα της ελληνικής αρχαιότητας (παράσταση της Γοργούς), ανέδειξε την παιδαγωγική διάσταση της μουσειακής εμπειρίας, η οποία λειτούργησε ως ερέθισμα για γνωστική εμπλοκή, πολιτισμική αναγνώριση και αισθητική συγκίνηση (Hooper-Greenhill, 2000). Η δομημένη παρουσίαση από τον έμπειρο ξεναγό μας, ενίσχυσε την προσβασιμότητα και την ουσιαστική αλληλεπίδραση των εκπαιδευομένων με το ψηφιακό υλικό, στο πλαίσιο μιας συμμετοχικής, συμπεριληπτικής μουσειακής αγωγής.

Κατά τη διάρκεια του προγράμματος *MuTourIn*, πραγματοποιήθηκαν ποικίλες ψηφιακές ξεναγήσεις, ενισχύοντας την πολιτισμική πρόσβαση εκπαιδευομένων σε Σχολεία Δεύτερης Ευκαιρίας (ΣΔΕ) ανά την Ελλάδα. Οι ξεναγήσεις αυτές περιλάμβαναν σημαντικά μουσεία, όπως το Αρχαιολογικό Μουσείο Κέρκυρας, το Μουσείο της Νικόπολης Πρέβεζας, το Μουσείο Ιστορίας των Ολυμπιακών Αγώνων στην Αρχαία Ολυμπία, το Αρχαιολογικό Μουσείο Άρτας και το Μουσείο Μπενάκη. Οι δράσεις πραγματοποιήθηκαν χάρη στη αφιλοκερδή συμβολή εξειδικευμένων αρχαιολόγων και διπλωματούχων ξεναγών, οι οποίοι διαμόρφωσαν ένα προσιτό, παιδαγωγικά πλούσιο περιβάλλον για τους έγκλειστους-εκπαιδευομένους. Η ευρεία γεωγραφική κάλυψη (από Κέρκυρα και Πάτρα έως Δομοκό και Σέρρες) ανέδειξε τη δυνατότητα της τεχνολογίας να γεφυρώνει αποστάσεις και να δημιουργεί ισότιμες ευκαιρίες πρόσβασης στην πολιτιστική κληρονομιά για κοινωνικά ευάλωτες ομάδες (UNESCO, 2021).

Οι στόχοι του προγράμματος *MuTourIn* ανέδειξαν μια πολυεπίπεδη προσέγγιση στην πολιτισμική εκπαίδευση εντός των σωφρονιστικών ιδρυμάτων. Αφετηρία αποτέλεσε η σύνδεση των φυλακών με τις κλασικές σπουδές, ώστε να ενισχυθεί η κατανόηση του τρόπου με τον οποίο η αρχαία ελληνική σκέψη εξακολουθεί ακόμη και σήμερα να επηρεάζει τη σύγχρονη κοινωνία. Παράλληλα, επιδιώχθηκε ο εξανθρωπισμός των φυλακών μέσω της προώθησης της αυτογνωσίας και της αυτοανάπτυξης των εγκλείστων με εργαλείο τον αρχαίο ελληνικό πολιτισμό. Η εκπαίδευση και η έναρξη πολιτιστικών διαλόγων συνιστούσαν βασικό άξονα, ενώ ιδιαίτερη έμφαση δόθηκε στην καλλιέργεια προσωπικής ανάπτυξης, ενσυναίσθησης και κοινωνικής ένταξης. Το πρόγραμμα φιλοδόξησε να γεφυρώσει το χάσμα ανάμεσα στον ακαδημαϊκό χώρο, τα μουσεία και τις φυλακές, αναδεικνύοντας την ανάγκη θεσμικών παρεμβάσεων και τροποποιήσεων στις πολιτικές που αφορούν τη συμμετοχή των εγκλείστων στην πολιτιστική ζωή (Falk and Dierking, 2013· European Court of Human Rights, 2020).

ΠΡΟΚΛΗΣΕΙΣ ΤΟΥ ΠΡΟΓΡΑΜΜΑΤΟΣ

Η υλοποίηση και η βιωσιμότητα ενός καινοτόμου εκπαιδευτικού προγράμματος, όπως το *MuTourIn*, απαιτεί την υπέρβαση σημαντικών προκλήσεων σε τρία βασικά επίπεδα: τεχνολογική υποδομή, παιδαγωγική προσαρμογή και θεσμική υποστήριξη. Αρχικά, οι τεχνολογικές υποδομές στα σωφρονιστικά καταστήματα παραμένουν ελλιπείς, καθιστώντας δύσκολη την αξιοποίηση των ψηφιακών εργαλείων, γεγονός που έχει επισημανθεί και σε σχετικές έρευνες (UNESCO, 2021).

Επιπλέον, η παιδαγωγική προσέγγιση οφείλει να λαμβάνει υπόψη το ιδιαίτερο κοινωνικο-πολιτισμικό περιβάλλον της φυλακής, προσαρμόζοντας τη διδακτική μεθοδολογία σε συνθήκες περιορισμού και ψυχολογικής επιβάρυνσης (Costelloe and Warner, 2014). Τέλος, απαραίτητη είναι η θεσμική αναγνώριση και υποστήριξη των πρωτοβουλιών αυτών από την πολιτεία, ώστε να διασφαλίζεται η συνέχειά τους και να εντάσσονται οργανικά στο πλαίσιο της δια βίου μάθησης (European Commission, 2020).

ΚΟΙΝΩΝΙΚΗ ΕΝΤΑΞΗ ΚΑΙ ΜΑΘΗΣΗ

Το *MuTourIn* υπηρέτησε τους στόχους της κοινωνικής ένταξης μέσω της δια βίου μάθησης, αξιοποιώντας την πολιτιστική κληρονομιά ως εργαλείο ενδυνάμωσης. Η επαφή των εγκλείστων με την αρχαία ελληνική πολιτισμική παράδοση δεν αποτέλεσε μόνο μορφωτική εμπειρία, αλλά και πράξη αποκατάστασης της αξιοπρέπειας και του δικαιώματος στη μάθηση (Eaton and Gamage, 2011). Τα μουσεία και τα Σχολεία Δεύτερης Ευκαιρίας λειτούργησαν ως γέφυρες επικοινωνίας, δημιουργώντας χώρους διαλόγου και στοχασμού. Στο πλαίσιο αυτό, η πολιτιστική εκπαίδευση συνέβαλλε και συμβάλλει εν γένει ενεργά στην προετοιμασία για την επανένταξη, ενισχύοντας δεξιότητες, αυτοεκτίμηση και κοινωνικό ρόλο (Kirk, 2019).

ΑΠΟΤΕΛΕΣΜΑΤΑ ΤΗΣ ΕΡΕΥΝΑΣ

Τα αποτελέσματα της έρευνας καταδεικνύουν ότι η ψηφιακή πρόσβαση στην πολιτιστική κληρονομιά μπορεί να λειτουργήσει ως καταλύτης ενδυνάμωσης και αυτοπραγμάτωσης για άτομα σε συνθήκες εγκλεισμού. Μέσα από το πρόγραμμα *MuTourIn*, οι συμμετέχοντες απέκτησαν τη δυνατότητα να επαναπροσδιορίσουν τη σχέση τους με τον πολιτισμό, ενισχύοντας την αίσθηση του ανήκειν, την αυτοεκτίμηση και την προοπτική του προσωπικού μετασχηματισμού (Kidd, 2019· Watkins and Mortimore, 2022).

Η εκπαιδευτική εμπειρία δεν περιορίστηκε στη γνωστική διάσταση, αλλά άγγιξε συναισθηματικές και υπαρξιακές πτυχές των συμμετεχόντων, ενισχύοντας την κοινωνική ταυτότητα και την ηθική ανασυγκρότηση (Mezirow, 1991· McGregor, 2020). Οι ψηφιακές ξεναγήσεις αποτέλεσαν όχι μόνο μέσο απόδρασης από τη ρουτίνα του εγκλεισμού, αλλά και πεδίο νοηματοδότησης, όπου οι εκπαιδευόμενοι είχαν τη δυνατότητα να αρθρώσουν προσωπικές ερμηνείες και να συμμετάσχουν σε έναν πολιτισμικό διάλογο.

Η ερευνητική πρωτοβουλία *MuTourIn* επιβεβαιώνει ότι η συμπεριληπτική πολιτιστική εκπαίδευση, όταν αξιοποιεί τεχνολογικά μέσα και συμμετοχικές μεθόδους, μπορεί να λειτουργήσει ως ισχυρό εργαλείο κοινωνικής επανένταξης και ως θεμέλιο για τη δια βίου μάθηση και την ενεργό πολιτειότητα (Ainscow, 2020· Freire, 1970).

ΘΠ9: Αειφόρο ψηφιακό σχολείο

ΤΟ ΑΕΙΦΟΡΟ ΨΗΦΙΑΚΟ ΣΧΟΛΕΙΟ: ΕΝΑ ΜΟΝΤΕΛΟ ΕΚΠΑΙΔΕΥΣΗΣ ΓΙΑ ΤΟΝ 21Ο ΑΙΩΝΑ

Γούναρη Νεκταρία
Φιλόλογος 1ο ΓΕΛ Σαλαμίνας, ΕΛ.Ε.ΕΤ.Π.Ε,Α.
ngounari@yahoo.gr

ΠΕΡΙΛΗΨΗ

Η ψηφιοποίηση της εκπαίδευσης και η ανάγκη για αειφορία αποτελούν δύο κρίσιμους πυλώνες για την ανάπτυξη ενός σύγχρονου εκπαιδευτικού μοντέλου. Το παρόν άρθρο προτείνει το μοντέλο του «Αειφόρου Ψηφιακού Σχολείου», το οποίο συνδυάζει την τεχνολογία με αρχές αειφορίας για την προώθηση μιας ολιστικής, συμπεριληπτικής και περιβαλλοντικά υπεύθυνης εκπαίδευσης. Μέσα από τη θεωρητική ανάλυση και την παρουσίαση πρακτικών εφαρμογών, το άρθρο διερευνά πώς η ενσωμάτωση ψηφιακών εργαλείων, η εκπαίδευση για την κλιματική αλλαγή και η συμμετοχική μάθηση μπορούν να δημιουργήσουν ένα βιώσιμο εκπαιδευτικό περιβάλλον για τον 21ο αιώνα.

Λέξεις – κλειδιά: Αειφορία, ψηφιακή εκπαίδευση, αειφόρο σχολείο, τεχνολογία στην εκπαίδευση, 21ος αιώνας.

ΕΙΣΑΓΩΓΗ

Η εκπαίδευση του 21ου αιώνα καλείται να ανταποκριθεί σε πολλαπλές προκλήσεις: την ταχεία τεχνολογική εξέλιξη, την κλιματική κρίση και την ανάγκη για συμπεριληπτική και ισότιμη πρόσβαση στη μάθηση (UNESCO, 2017). Το «Αειφόρο Ψηφιακό Σχολείο» προκύπτει ως απάντηση σε αυτές τις προκλήσεις, συνδυάζοντας την ψηφιακή καινοτομία με τις αρχές της αειφορίας. Στόχος του είναι η δημιουργία ενός εκπαιδευτικού πλαισίου που όχι μόνο αξιοποιεί την τεχνολογία για τη βελτίωση της μαθησιακής εμπειρίας, αλλά και προάγει την περιβαλλοντική ευαισθητοποίηση και τη βιώσιμη ανάπτυξη (Sterling, 2001).

Το παρόν άρθρο εξετάζει το θεωρητικό υπόβαθρο του μοντέλου, τις βασικές του διαστάσεις και τις πρακτικές εφαρμογές του, ενώ προτείνει στρατηγικές για την υλοποίησή του σε σχολεία παγκοσμίως. Η ανάλυση βασίζεται σε διεθνή βιβλιογραφία και μελέτες περιπτώσεων, με έμφαση στην Ελλάδα.

ΘΕΩΡΗΤΙΚΌ ΠΛΑΊΣΙΟ

Η ανάπτυξη του μοντέλου του Αειφόρου Ψηφιακού Σχολείου βασίζεται σε δύο θεμελιώδεις πυλώνες: την εκπαίδευση για την αειφορία (Education for Sustainable Development - ESD) και την ψηφιακή εκπαίδευση. Οι δύο αυτοί πυλώνες, αν και φαινομενικά ανεξάρτητοι, διασταυρώνονται στη δημιουργία ενός ολιστικού εκπαιδευτικού πλαισίου που ανταποκρίνεται στις προκλήσεις του 21ου αιώνα, όπως η κλιματική κρίση, η τεχνολογική πρόοδος και η κοινωνική ανισότητα. Η ενότητα αυτή αναλύει τις θεωρητικές βάσεις του μοντέλου, διερευνώντας την έννοια της αειφορίας στην εκπαίδευση, τον ρόλο της ψηφιακής τεχνολογίας και τις διασυνδέσεις τους.

Η Έννοια της Αειφορίας στην Εκπαίδευση

Η εκπαίδευση για την αειφορία (ESD) αποτελεί μια διεθνώς αναγνωρισμένη προσέγγιση που προωθεί την κατανόηση και την εφαρμογή των αρχών της βιώσιμης ανάπτυξης στο εκπαιδευτικό σύστημα (UNESCO, 2014). Σύμφωνα με τον Sterling (2001), η αειφορία στην εκπαίδευση δεν περιορίζεται στην περιβαλλοντική ευαισθητοποίηση, αλλά περιλαμβάνει τρεις διαστάσεις: την περιβαλλοντική, την κοινωνική και την οικονομική. Αυτή η ολιστική προσέγγιση στοχεύει στη δημιουργία πολιτών ικανών να λαμβάνουν τεκμηριωμένες αποφάσεις για την αντιμετώπιση παγκόσμιων προκλήσεων, όπως η κλιματική αλλαγή, η φτώχεια και η ανισότητα.

Η UNESCO (2017) υπογραμμίζει ότι η ESD προάγει δεξιότητες του 21ου αιώνα, όπως η κριτική σκέψη, η επίλυση προβλημάτων, η συνεργασία και η διαπολιτισμική κατανόηση. Αυτές οι δεξιότητες είναι απαραίτητες για την προετοιμασία των μαθητών να ανταποκριθούν σε ένα διαρκώς μεταβαλλόμενο παγκόσμιο περιβάλλον. Για παράδειγμα, η διδασκαλία της κλιματικής αλλαγής μέσω διεπιστημονικών προσεγγίσεων (π.χ. συνδυασμός επιστήμης, γεωγραφίας και κοινωνικών επιστημών) επιτρέπει στους μαθητές να κατανοούν την πολυπλοκότητα του προβλήματος και να προτείνουν βιώσιμες λύσεις (Nolet, 2009).

Επιπλέον, η ESD δεν εστιάζει μόνο στο περιεχόμενο της διδασκαλίας, αλλά και στη μεθοδολογία. Ο Tilbury (2011) υποστηρίζει ότι οι συμμετοχικές και μαθητοκεντρικές μέθοδοι, όπως η μάθηση μέσω έργων (project-based learning) και η διερευνητική μάθηση (inquiry-based learning), ενισχύουν την ενεργό εμπλοκή των μαθητών και καλλιεργούν τη δέσμευσή τους για την αειφορία. Στο πλαίσιο του Αειφόρου Ψηφιακού Σχολείου, αυτές οι μέθοδοι ενισχύονται μέσω της τεχνολογίας, η οποία επιτρέπει τη δημιουργία διαδραστικών και συνεργατικών μαθησιακών εμπειριών.

Μια κρίσιμη πτυχή της ESD είναι η ενσωμάτωση της τοπικής διάστασης. Όπως επισημαίνει ο Wals (2012), η εκπαίδευση για την αειφορία πρέπει να προσαρμόζεται στις τοπικές περιβαλλοντικές, κοινωνικές και πολιτισμικές συνθήκες. Στην Ελλάδα, για παράδειγμα, η ESD μπορεί να επικεντρωθεί σε ζητήματα όπως η διαχείριση των υδάτινων πόρων, η προστασία της βιοποικιλότητας της Μεσογείου και η προώθηση της κυκλικής οικονομίας, τα οποία είναι ιδιαίτερα σχετικά με το εθνικό πλαίσιο (Koutsouris, 2018).

Ψηφιακή Εκπαίδευση και Τεχνολογία

Η ψηφιακή εκπαίδευση έχει αναδειχθεί ως ένας από τους βασικούς πυλώνες της εκπαιδευτικής μεταρρύθμισης στον 21ο αιώνα. Σύμφωνα με τον Selwyn (2016), η εισαγωγή ψηφιακών τεχνολογιών στα σχολεία έχει μετασχηματίσει τη διδασκαλία και τη μάθηση, προσφέροντας δυνατότητες για εξατομικευμένη εκπαίδευση, παγκόσμια συνδεσιμότητα και πρόσβαση σε τεράστιο όγκο πληροφοριών. Εργαλεία όπως οι διαδραστικοί πίνακες, οι πλατφόρμες ηλεκτρονικής μάθησης (π.χ. Moodle, Google Classroom) και οι εφαρμογές επαυξημένης πραγματικότητας (AR) έχουν διευρύνει τις δυνατότητες των εκπαιδευτικών να προσαρμόσουν το περιεχόμενο στις ανάγκες των μαθητών.

Ωστόσο, η ψηφιακή εκπαίδευση δεν είναι απαλλαγμένη από προκλήσεις. Ο Berkhout και η Hertin (2004) επισημαίνουν ότι η μαζική χρήση τεχνολογίας οδηγεί σε περιβαλλοντικές επιπτώσεις, όπως η αυξημένη κατανάλωση ενέργειας, η παραγωγή ηλεκτρονικών αποβλήτων και η εξάντληση φυσικών πόρων για την κατασκευή συσκευών. Επιπλέον, το ψηφιακό χάσμα (digital divide) παραμένει σημαντικό εμπόδιο, καθώς οι μαθητές από μειονεκτούσες κοινωνικοοικονομικές ομάδες ή απομακρυσμένες περιοχές συχνά στερούνται πρόσβασης σε τεχνολογία υψηλής ποιότητας (Warschauer, 2003). Το Αειφόρο Ψηφιακό Σχολείο αντιμετωπίζει αυτές τις προκλήσεις προτείνοντας τη χρήση «πράσινων» τεχνολογιών, όπως συσκευές χαμηλής κατανάλωσης ενέργειας, λογισμικά ανοιχτού κώδικα και συστήματα ανακύκλωσης ηλεκτρονικών αποβλήτων.

Η θεωρία του συνδετισμού (connectivism), όπως την εισήγαγε ο Siemens (2005), αποτελεί κρίσιμη θεωρητική βάση για την ψηφιακή εκπαίδευση στο πλαίσιο του Αειφόρου Ψηφιακού Σχολείου. Ο συνδετισμός υποστηρίζει ότι η μάθηση στον ψηφιακό κόσμο βασίζεται στη δημιουργία δικτύων γνώσης μέσω της τεχνολογίας. Οι μαθητές δεν μαθαίνουν μόνο από παραδοσιακές πηγές, αλλά και μέσα από τη συνεργασία και την ανταλλαγή πληροφοριών σε ψηφιακές πλατφόρμες. Για παράδειγμα, η χρήση διαδικτυακών φόρουμ ή κοινωνικών μέσων μπορεί να διευκολύνει τη συζήτηση για την κλιματική αλλαγή, επιτρέποντας στους μαθητές να συνδεθούν με συνομηλίκους από άλλες χώρες και να ανταλλάξουν ιδέες για βιώσιμες πρακτικές.

Διασύνδεση Αειφορίας και Ψηφιακής Εκπαίδευσης

Η διασύνδεση της αειφορίας και της ψηφιακής εκπαίδευσης αποτελεί τον πυρήνα του προτεινόμενου μοντέλου. Η τεχνολογία μπορεί να λειτουργήσει ως καταλύτης για την προώθηση της ESD, προσφέροντας εργαλεία για τη διδασκαλία περιβαλλοντικών θεμάτων και την ευαισθητοποίηση των μαθητών. Για παράδειγμα, οι προσομοιώσεις κλιματικών μοντέλων επιτρέπουν στους μαθητές να κατανοήσουν τις επιπτώσεις της υπερθέρμανσης του πλανήτη, ενώ οι εφαρμογές Internet of Things (IoT) μπορούν να χρησιμοποιηθούν για την παρακολούθηση της κατανάλωσης ενέργειας σε σχολικούς κήπους ή κτίρια (Koutsouris, 2018).

Παράλληλα, η αειφορία μπορεί να καθοδηγήσει την ψηφιακή εκπαίδευση προς πιο υπεύθυνες πρακτικές. Όπως υποστηρίζει ο Rattle (2010), η υιοθέτηση πράσινων τεχνολογιών, όπως ηλιακά πάνελ για την τροφοδοσία σχολικών υπολογιστών ή η χρήση ανακυκλώσιμων υλικών για την κατασκευή συσκευών, μπορεί να μειώσει το περιβαλλοντικό αποτύπωμα της ψηφιακής εκπαίδευσης. Επιπλέον, η εκπαίδευση των μαθητών για την υπεύθυνη χρήση της τεχνολογίας, όπως η αποφυγή υπερκατανάλωσης δεδομένων ή η σωστή διαχείριση ηλεκτρονικών αποβλήτων, αποτελεί κρίσιμη πτυχή του μοντέλου.

Η διασύνδεση αυτή υποστηρίζεται και από τη θεωρία της οικολογικής μάθησης (ecological learning), όπως την περιγράφει ο Orr (1992). Σύμφωνα με τον Orr, η εκπαίδευση πρέπει να καλλιεργεί μια βαθύτερη κατανόηση της αλληλεξάρτησης μεταξύ ανθρώπων, τεχνολογίας και φυσικού περιβάλλοντος. Το Αειφόρο Ψηφιακό Σχολείο ενσωματώνει αυτή τη φιλοσοφία, χρησιμοποιώντας την τεχνολογία όχι μόνο ως εργαλείο μάθησης, αλλά και ως μέσο για την καλλιέργεια περιβαλλοντικής συνείδησης και υπευθυνότητας.

Κριτική Προσέγγιση και Μελλοντικές Κατευθύνσεις

Παρά τα πλεονεκτήματα της διασύνδεσης αειφορίας και ψηφιακής εκπαίδευσης, υπάρχουν και περιορισμοί. Η υπερβολική εξάρτηση από την τεχνολογία μπορεί να οδηγήσει σε αποξένωση από το φυσικό περιβάλλον, ενώ η έλλειψη κατάλληλης επιμόρφωσης των εκπαιδευτικών μπορεί να περιορίσει την αποτελεσματικότητα των ψηφιακών εργαλείων (Selwyn, 2016). Επιπλέον, η ESD απαιτεί μακροπρόθεσμη δέσμευση και πολιτική υποστήριξη, κάτι που συχνά απουσιάζει σε εθνικά εκπαιδευτικά συστήματα με περιορισμένους πόρους (Wals, 2012).

Για να ξεπεραστούν αυτά τα εμπόδια, το Αειφόρο Ψηφιακό Σχολείο προτείνει μια ισορροπημένη προσέγγιση που συνδυάζει την τεχνολογία με βιωματικές δραστηριότητες, όπως η κηπουρική ή οι επισκέψεις σε φυσικούς χώρους, και επενδύει στην επαγγελματική ανάπτυξη των εκπαιδευτικών. Μελλοντικές έρευνες θα μπορούσαν να επικεντρωθούν στην ανάπτυξη μεθόδων αξιολόγησης της αποτελεσματικότητας αυτού του μοντέλου, καθώς και στη διερεύνηση του τρόπου με τον οποίο οι τοπικές πολιτισμικές αξίες μπορούν να ενσωματωθούν στην ψηφιακή εκπαίδευση για την αειφορία.

ΤΟ ΜΟΝΤΕΛΟ ΤΟΥ ΑΕΙΦΟΡΟΥ ΨΗΦΙΑΚΟΥ ΣΧΟΛΕΙΟΥ

Το μοντέλο του Αειφόρου Ψηφιακού Σχολείου αποτελεί μια ολοκληρωμένη προσέγγιση που συνδυάζει τις αρχές της αειφορίας με την ψηφιακή τεχνολογία, με στόχο τη δημιουργία ενός εκπαιδευτικού πλαισίου που προάγει την

περιβαλλοντική ευαισθητοποίηση, την κοινωνική δικαιοσύνη και την καινοτόμο μάθηση. Το μοντέλο βασίζεται σε τρεις βασικούς πυλώνες: (1) την ψηφιακή υποδομή και την πράσινη τεχνολογία, (2) τη διδακτική της αειφορίας και (3) τη συμμετοχική μάθηση. Αυτοί οι πυλώνες λειτουργούν συνεργιστικά για να εξασφαλίσουν ότι το σχολείο όχι μόνο ανταποκρίνεται στις σύγχρονες εκπαιδευτικές ανάγκες, αλλά και συμβάλλει στη δημιουργία ενός βιώσιμου μέλλοντος (Sterling, 2001). Η ενότητα αυτή αναλύει λεπτομερώς κάθε πυλώνα, παρουσιάζει πρακτικές εφαρμογές και διερευνά στρατηγικές υλοποίησης, με έμφαση στο ελληνικό εκπαιδευτικό σύστημα και διεθνή παραδείγματα.

Ψηφιακή Υποδομή και Πράσινη Τεχνολογία

Ο πρώτος πυλώνας του μοντέλου επικεντρώνεται στη δημιουργία μιας ψηφιακής υποδομής που είναι ταυτόχρονα αποδοτική και περιβαλλοντικά υπεύθυνη. Η ψηφιακή εκπαίδευση απαιτεί τη χρήση συσκευών όπως υπολογιστές, ταμπλέτες και διαδραστικούς πίνακες, καθώς και πρόσβαση σε διαδικτυακές πλατφόρμες. Ωστόσο, η μαζική χρήση τεχνολογίας μπορεί να επιφέρει σημαντικές περιβαλλοντικές επιπτώσεις, όπως η αυξημένη κατανάλωση ενέργειας και η παραγωγή ηλεκτρονικών αποβλήτων (Berkhout & Hertin, 2004). Για την αντιμετώπιση αυτών των προκλήσεων, το Αειφόρο Ψηφιακό Σχολείο προτείνει τη χρήση πράσινων τεχνολογιών, όπως:

- Ενεργειακά αποδοτικές συσκευές: Επιλογή συσκευών με πιστοποιήσεις ενεργειακής απόδοσης, όπως το Energy Star, για τη μείωση της κατανάλωσης ηλεκτρικής ενέργειας (Rattle, 2010).
- Ανανεώσιμες πηγές ενέργειας: Εγκατάσταση φωτοβολταϊκών πάνελ ή μικρών ανεμογεννητριών στα σχολεία για την τροφοδοσία των ψηφιακών υποδομών, όπως εφαρμόζεται σε σχολεία της Δανίας (European Commission, 2021).
- Λογισμικά ανοιχτού κώδικα: Χρήση δωρεάν και ελαφρών λογισμικών, όπως το Linux ή το Moodle, που μειώνουν την εξάρτηση από ενεργοβόρες εμπορικές πλατφόρμες (Wheeler, 2015).
- Προγράμματα ανακύκλωσης: Δημιουργία σταθμών ανακύκλωσης ηλεκτρονικών αποβλήτων στα σχολεία, με τη συμμετοχή των μαθητών, για την προώθηση της κυκλικής οικονομίας (Koutsouris, 2018).

Στην Ελλάδα, όπου η ψηφιακή υποδομή στα σχολεία παραμένει περιορισμένη σε πολλές περιοχές, η υλοποίηση αυτού του πυλώνα απαιτεί συνεργασία με τοπικές αρχές και ευρωπαϊκά προγράμματα χρηματοδότησης, όπως το Ταμείο Ανάκαμψης και Ανθεκτικότητας (European Commission, 2021). Για παράδειγμα, η εγκατάσταση ηλιακών πάνελ σε σχολεία απομακρυσμένων νησιών, όπως η Τήλος, που ήδη λειτουργεί ως «πράσινο νησί», θα μπορούσε να αποτελέσει πρότυπο για την εφαρμογή του μοντέλου.

Διδακτική Αειφορία

Ο δεύτερος πυλώνας του μοντέλου επικεντρώνεται στην ενσωμάτωση της αειφορίας στο πρόγραμμα σπουδών, με στόχο την καλλιέργεια περιβαλλοντικής συνείδησης και δεξιοτήτων για βιώσιμες πρακτικές. Η διδακτική της αειφορίας βασίζεται στις αρχές της Εκπαίδευσης για την Αειφορία (ESD), όπως ορίζονται από την UNESCO (2014), και περιλαμβάνει τη διδασκαλία θεμάτων όπως η κλιματική αλλαγή, η βιοποικιλότητα, η διαχείριση αποβλήτων και η κοινωνική δικαιοσύνη. Η χρήση ψηφιακών εργαλείων ενισχύει τη διδακτική διαδικασία, καθιστώντας τη πιο διαδραστική και ελκυστική.

Οι βασικές στρατηγικές περιλαμβάνουν:

- Διεπιστημονικές προσεγγίσεις: Η κλιματική αλλαγή, για παράδειγμα, μπορεί να διδαχθεί μέσω συνδυασμού μαθημάτων φυσικών επιστημών, γεωγραφίας και κοινωνικών επιστημών, με τη χρήση ψηφιακών προσομοιώσεων που δείχνουν τις επιπτώσεις της υπερθέρμανσης του πλανήτη (Nolet, 2009).
- Βιωματική μάθηση: Δημιουργία σχολικών κήπων ή προγραμμάτων ανακύκλωσης, με τη χρήση αισθητήρων Internet of Things (IoT) για την παρακολούθηση περιβαλλοντικών δεδομένων, όπως η υγρασία του εδάφους ή η ποιότητα του αέρα (Koutsouris, 2018).
- Ψηφιακό υλικό για την αειφορία: Χρήση διαδραστικών εφαρμογών, όπως το “Climate Kids” της NASA ή το “Eco-Schools Digital Toolkit”, για τη διδασκαλία περιβαλλοντικών θεμάτων με τρόπο προσιτό στους μαθητές (Hellenic Society for the Protection of Nature, 2020).

Στο ελληνικό πλαίσιο, η διδακτική της αειφορίας μπορεί να ενσωματωθεί μέσω προγραμμάτων όπως το «Οικολογικά Σχολεία» (Eco-Schools), που ήδη εφαρμόζεται σε πολλά σχολεία της χώρας. Για παράδειγμα, σχολεία στη Θεσσαλονίκη έχουν δημιουργήσει ψηφιακές πλατφόρμες όπου οι μαθητές καταγράφουν τις δράσεις τους για την ανακύκλωση και την εξοικονόμηση ενέργειας, ενισχύοντας τη συμμετοχή και την ευαισθητοποίηση της σχολικής κοινότητας (Hellenic Society for the Protection of Nature, 2020). Επιπλέον, η ενσωμάτωση θεμάτων όπως η προστασία της Μεσογείου ή η διαχείριση των υδάτινων πόρων στο πρόγραμμα σπουδών μπορεί να συνδεθεί με το τοπικό περιβάλλον, καθιστώντας τη μάθηση πιο σχετική και ελκυστική για τους μαθητές.

Συμμετοχική Μάθηση

Ο τρίτος πυλώνας του μοντέλου εστιάζει στη συμμετοχική μάθηση, η οποία βασίζεται στη θεωρία του συνδετισμού (connectivism) του Siemens (2005). Σύμφωνα με αυτή τη θεωρία, η μάθηση στον ψηφιακό κόσμο βασίζεται στη δημιουργία δικτύων γνώσης μέσω της συνεργασίας και της ανταλλαγής πληροφοριών. Η συμμετοχική μάθηση στο Αειφόρο Ψηφιακό Σχολείο προάγει την ενεργό εμπλοκή των μαθητών, των εκπαιδευτικών και της ευρύτερης κοινότητας, χρησιμοποιώντας ψηφιακές πλατφόρμες για τη διευκόλυνση της συνεργασίας.

Οι βασικές πρακτικές περιλαμβάνουν:

- Διαδικτυακά συνεργατικά έργα: Οι μαθητές μπορούν να συμμετέχουν σε διεθνή προγράμματα, όπως το "eTwinning", όπου συνεργάζονται με συνομηλίκους από άλλες χώρες για τη δημιουργία έργων με θέμα την αειφορία, όπως η μείωση του πλαστικού ή η εξοικονόμηση νερού (European Commission, 2021).
- Ψηφιακά φόρουμ και κοινωνικά δίκτυα: Χρήση πλατφορμών όπως το Edmodo ή ειδικών ομάδων στα κοινωνικά μέσα για τη συζήτηση περιβαλλοντικών ζητημάτων και την ανταλλαγή βέλτιστων πρακτικών μεταξύ μαθητών και εκπαιδευτικών.
- Εικονικές ανταλλαγές και τηλεδιασκέψεις: Οι μαθητές μπορούν να συνδεθούν με σχολεία σε άλλες χώρες μέσω τηλεδιασκέψεων για να συζητήσουν λύσεις για την κλιματική αλλαγή, μειώνοντας το περιβαλλοντικό αποτύπωμα που θα προέκυπτε από φυσικές μετακινήσεις (Lehtonen et al., 2018).

Στην Ελλάδα, η συμμετοχική μάθηση μπορεί να ενισχυθεί μέσω της αξιοποίησης υπαρχουσών πλατφορμών, όπως το Πανελλήνιο Σχολικό Δίκτυο, για τη δημιουργία διαδικτυακών κοινοτήτων μάθησης. Για παράδειγμα, ένα σχολείο στην Κρήτη θα μπορούσε να συνεργαστεί με ένα σχολείο στη Σουηδία για τη δημιουργία ενός κοινού ψηφιακού έργου με θέμα τη διαχείριση των παράκτιων οικοσυστημάτων, χρησιμοποιώντας εργαλεία όπως το Zoom ή το Microsoft Teams.

Πρακτικές Εφαρμογές και Παραδείγματα

Για να καταδειχθεί η εφαρμοσιμότητα του μοντέλου, παρουσιάζονται παρακάτω συγκεκριμένες πρακτικές εφαρμογές:

- Ψηφιακές πλατφόρμες για την αειφορία: Σχολεία μπορούν να χρησιμοποιούν πλατφόρμες όπως το Moodle για τη δημιουργία μαθημάτων με θέματα όπως η ανακύκλωση ή η εξοικονόμηση ενέργειας. Για παράδειγμα, το πρόγραμμα "Eco-Schools Digital Toolkit" παρέχει διαδραστικά εργαλεία για την παρακολούθηση της κατανάλωσης ενέργειας στα σχολεία (Hellenic Society for the Protection of Nature, 2020).
- Σχολικοί κήποι με τεχνολογία IoT: Σχολεία στη Γερμανία χρησιμοποιούν αισθητήρες IoT για την παρακολούθηση της υγρασίας και της θερμοκρασίας σε σχολικούς κήπους, διδάσκοντας στους μαθητές τη σημασία της βιώσιμης γεωργίας (Koutsouris, 2018). Παρόμοια προγράμματα θα μπορούσαν να εφαρμοστούν σε ελληνικά σχολεία, ιδιαίτερα σε αγροτικές περιοχές.
- Εικονικές περιηγήσεις και επαυξημένη πραγματικότητα (AR): Εφαρμογές AR, όπως το Google Expeditions, επιτρέπουν στους μαθητές να εξερευνούν οικοσυστήματα όπως ο Αμαζόνιος ή η Μεσόγειος, συνδέοντας τη θεωρητική γνώση με βιωματικές εμπειρίες.
- Διαγωνισμοί και hackathons: Οργάνωση διαδικτυακών διαγωνισμών όπου οι μαθητές προτείνουν λύσεις για περιβαλλοντικά προβλήματα, όπως η μείωση των πλαστικών απορριμμάτων, χρησιμοποιώντας εργαλεία κωδικοποίησης ή σχεδιασμού (Lehtonen et al., 2018).

Στρατηγικές Υλοποίησης

Η επιτυχής εφαρμογή του μοντέλου απαιτεί συντονισμένες ενέργειες σε πολλαπλά επίπεδα:

- Επιμόρφωση εκπαιδευτικών: Οι εκπαιδευτικοί πρέπει να εκπαιδευτούν στη χρήση ψηφιακών εργαλείων και στη διδακτική της αειφορίας, μέσω προγραμμάτων επαγγελματικής ανάπτυξης (Darling-Hammond et al., 2017).
- Συνεργασία με την κοινότητα: Η συμμετοχή γονέων, τοπικών αρχών και περιβαλλοντικών οργανώσεων ενισχύει την υλοποίηση του μοντέλου. Για παράδειγμα, συνεργασίες με οργανισμούς όπως η WWF Ελλάς μπορούν να υποστηρίξουν τη δημιουργία σχολικών κήπων ή προγραμμάτων ανακύκλωσης.
- Χρηματοδότηση: Η αξιοποίηση ευρωπαϊκών προγραμμάτων, όπως το Erasmus+ ή το Horizon Europe, μπορεί να καλύψει το κόστος εγκατάστασης πράσινων τεχνολογιών και ψηφιακών υποδομών (European Commission, 2021).

Κριτική Ανάλυση και Προκλήσεις

Παρά τα πλεονεκτήματα του μοντέλου, η υλοποίησή του αντιμετωπίζει προκλήσεις, όπως το υψηλό αρχικό κόστος εγκατάστασης πράσινων τεχνολογιών, η έλλειψη ψηφιακών δεξιοτήτων στους εκπαιδευτικούς και το ψηφιακό χάσμα σε απομακρυσμένες περιοχές (Warschauer, 2003). Για την αντιμετώπιση αυτών των προκλήσεων, προτείνονται:

- Πιλοτικά προγράμματα: Ξεκινώντας από μικρής κλίμακας εφαρμογές σε επιλεγμένα σχολεία, π.χ. στην Αττική ή τη Θεσσαλονίκη, για τη δοκιμή του μοντέλου πριν την ευρύτερη εφαρμογή.
- Ενίσχυση της ψηφιακής ισότητας: Διάθεση δωρεάν συσκευών και πρόσβασης στο διαδίκτυο σε μαθητές από μειονεκτούσες ομάδες.
- Δημιουργία εθνικών κατευθυντήριων γραμμών: Το Υπουργείο Παιδείας θα μπορούσε να αναπτύξει έναν οδηγό για την εφαρμογή του Αειφόρου Ψηφιακού Σχολείου, με βάση διεθνή πρότυπα.

ΜΕΛΕΤΕΣ ΠΕΡΙΠΤΩΣΕΩΝ

Οι μελέτες περιπτώσεων αποτελούν κρίσιμο εργαλείο για την κατανόηση της πρακτικής εφαρμογής του μοντέλου του Αειφόρου Ψηφιακού Σχολείου, καθώς παρέχουν συγκεκριμένα παραδείγματα υλοποίησης και αποκαλύπτουν τόσο τα οφέλη όσο και τις προκλήσεις του. Η ενότητα αυτή παρουσιάζει τέσσερις μελέτες περιπτώσεων: δύο διεθνείς (το πρόγραμμα Eco-Schools και το πρόγραμμα Climate.now στη Φινλανδία) και δύο ελληνικές (ένα υπαρκτό παράδειγμα από το πρόγραμμα Eco-Schools στην Ελλάδα και ένα υποθετικό σενάριο εφαρμογής σε ένα ελληνικό νησιωτικό σχολείο). Κάθε μελέτη αναλύει τον τρόπο με τον οποίο το μοντέλο ενσωματώνει την ψηφιακή τεχνολογία και την αειφορία, ενώ αξιολογεί την αποτελεσματικότητα και τις δυνατότητες κλιμάκωσης.

Το Πρόγραμμα Eco-Schools: Μια Διεθνής Πρωτοβουλία

Το πρόγραμμα Eco-Schools, που υλοποιείται από το Ίδρυμα για την Περιβαλλοντική Εκπαίδευση (Foundation for Environmental Education - FEE), αποτελεί μια από τις πιο επιτυχημένες πρωτοβουλίες για την προώθηση της εκπαίδευσης για την αειφορία σε παγκόσμιο επίπεδο, με συμμετοχή από περισσότερες από 50 χώρες και πάνω από 50.000 σχολεία (Hellenic Society for the Protection of Nature, 2020). Το πρόγραμμα ενσωματώνει αρχές της αειφορίας, όπως η εξοικονόμηση ενέργειας, η διαχείριση αποβλήτων και η προστασία της βιοποικιλότητας, μέσω ενός επταβάθμιου μεθοδολογικού πλαισίου που περιλαμβάνει τη δημιουργία σχολικών επιτροπών, την αξιολόγηση περιβαλλοντικών επιπτώσεων και την ανάπτυξη δράσεων.

Στο πλαίσιο του Αειφόρου Ψηφιακού Σχολείου, το πρόγραμμα Eco-Schools έχει προσαρμοστεί για να ενσωματώνει ψηφιακά εργαλεία. Για παράδειγμα, σχολεία στη Δανία χρησιμοποιούν το "Eco-Schools Digital Toolkit", μια διαδικτυακή πλατφόρμα που επιτρέπει στους μαθητές να παρακολουθούν την κατανάλωση ενέργειας και νερού του σχολείου τους μέσω αισθητήρων IoT και εφαρμογών ανάλυσης δεδομένων (Koutsouris, 2018). Οι μαθητές καταγράφουν δεδομένα, όπως η κατανάλωση ηλεκτρικής ενέργειας από φωτισμό ή υπολογιστές, και προτείνουν μέτρα εξοικονόμησης, όπως η μετάβαση σε λαμπτήρες LED ή η χρήση χρονοδιακοπτών. Επιπλέον, η πλατφόρμα περιλαμβάνει διαδραστικά μαθήματα για την κλιματική αλλαγή και την κυκλική οικονομία, τα οποία συνδυάζουν βίντεο, κουίζ και προσομοιώσεις.

Η επιτυχία του προγράμματος αποδίδεται στη συμμετοχική του φύση, καθώς οι μαθητές αναλαμβάνουν ενεργό ρόλο στη λήψη αποφάσεων. Ωστόσο, προκλήσεις όπως η έλλειψη ψηφιακής υποδομής σε σχολεία χαμηλού εισοδήματος και η ανάγκη για συνεχή εκπαίδευση των εκπαιδευτικών περιορίζουν την κλιμάκωση του προγράμματος (Wals, 2012). Στην Ελλάδα, το πρόγραμμα Eco-Schools εφαρμόζεται από την Ελληνική Εταιρεία Προστασίας της Φύσης και μπορεί να αποτελέσει βάση για την ευρύτερη υιοθέτηση του μοντέλου του Αειφόρου Ψηφιακού Σχολείου.

Το Πρόγραμμα Climate.now στη Φινλανδία

Η Φινλανδία, γνωστή για το πρωτοποριακό εκπαιδευτικό της σύστημα, αποτελεί παράδειγμα εφαρμογής ψηφιακών τεχνολογιών για την προώθηση της αειφορίας. Το πρόγραμμα "Climate.now", που αναπτύχθηκε από το Πανεπιστήμιο του Ελσίνκι, είναι μια διαδικτυακή πλατφόρμα που παρέχει διδακτικό υλικό για την κλιματική αλλαγή, προσαρμοσμένο σε μαθητές δευτεροβάθμιας εκπαίδευσης (Lehtonen et al., 2018). Η πλατφόρμα περιλαμβάνει διαδραστικά εργαλεία, όπως προσομοιώσεις κλιματικών μοντέλων, βίντεο με ειδικούς και φόρουμ συζήτησης, που επιτρέπουν στους μαθητές να εξερευνήσουν τις αιτίες και τις συνέπειες της κλιματικής αλλαγής.

Στο πλαίσιο του Αειφόρου Ψηφιακού Σχολείου, το Climate.now ενσωματώνει τον πυλώνα της διδακτικής της αειφορίας και της συμμετοχικής μάθησης. Για παράδειγμα, οι μαθητές καλούνται να αναλύσουν δεδομένα από κλιματικά μοντέλα και να προτείνουν λύσεις για τη μείωση του ανθρακικού αποτυπώματος του σχολείου τους, όπως η χρήση ανανεώσιμων πηγών ενέργειας ή η προώθηση της ποδηλασίας. Επιπλέον, η πλατφόρμα ενθαρρύνει τη συνεργασία μέσω διαδικτυακών ομάδων, όπου μαθητές από διαφορετικά σχολεία ανταλλάσσουν ιδέες και παρουσιάζουν τα αποτελέσματα των έργων τους.

Η επιτυχία του προγράμματος στη Φινλανδία οφείλεται στην υψηλή ψηφιακή υποδομή και την κουλτούρα συνεργασίας στο εκπαιδευτικό σύστημα. Ωστόσο, η εφαρμογή του σε χώρες με λιγότερο ανεπτυγμένες υποδομές, όπως

η Ελλάδα, απαιτεί προσαρμογές, όπως η παροχή δωρεάν πρόσβασης σε διαδικτυακές πλατφόρμες και η επιμόρφωση των εκπαιδευτικών στη χρήση ψηφιακών εργαλείων (Darling-Hammond et al., 2017). Το Climate.now αποτελεί πρότυπο για την ανάπτυξη παρόμοιων πλατφορμών σε εθνικό επίπεδο, με δυνατότητα προσαρμογής σε τοπικά περιβαλλοντικά ζητήματα, όπως η διάβρωση των ακτών στην Ελλάδα.

Εφαρμογή του Eco-Schools στην Ελλάδα: Το Παράδειγμα του 1ου Γυμνασίου Χαλανδρίου

Στην Ελλάδα, το πρόγραμμα Eco-Schools έχει εφαρμοστεί με επιτυχία σε πολλά σχολεία, με χαρακτηριστικό παράδειγμα το 1ο Γυμνάσιο Χαλανδρίου στην Αττική. Το σχολείο αυτό έχει λάβει τη διάκριση της «Πράσινης Σημαίας» για τις δράσεις του στην αειφορία, οι οποίες περιλαμβάνουν τη δημιουργία ενός σχολικού κήπου, την εγκατάσταση συστημάτων ανακύκλωσης και την ευαισθητοποίηση της σχολικής κοινότητας για την εξοικονόμηση ενέργειας (Hellenic Society for the Protection of Nature, 2020).

Στο πλαίσιο του Αειφόρου Ψηφιακού Σχολείου, το 1ο Γυμνάσιο Χαλανδρίου έχει ενσωματώσει ψηφιακά εργαλεία για την ενίσχυση των δράσεών του. Οι μαθητές χρησιμοποιούν μια διαδικτυακή πλατφόρμα για να καταγράφουν την κατανάλωση ενέργειας και νερού του σχολείου, ενώ συμμετέχουν σε διαδραστικά μαθήματα για την κλιματική αλλαγή μέσω του Moodle. Επιπλέον, το σχολείο συνεργάζεται με άλλα σχολεία μέσω του προγράμματος eTwinning, ανταλλάσσοντας ιδέες για τη μείωση των πλαστικών απορριμμάτων και την προστασία της τοπικής βιοποικιλότητας.

Η περίπτωση του 1ου Γυμνασίου Χαλανδρίου καταδεικνύει τη δυνατότητα εφαρμογής του μοντέλου σε αστικά σχολεία με περιορισμένους πόρους. Ωστόσο, προκλήσεις όπως η έλλειψη χρηματοδότησης για την εγκατάσταση προηγμένων ψηφιακών εργαλείων και η περιορισμένη επιμόρφωση των εκπαιδευτικών απαιτούν συντονισμένες προσπάθειες από το Υπουργείο Παιδείας και τοπικές αρχές. Η επιτυχία του σχολείου μπορεί να αποτελέσει πρότυπο για άλλα αστικά σχολεία στην Ελλάδα, ιδιαίτερα σε περιοχές με υψηλή περιβαλλοντική ευαισθητοποίηση.

Υποθετικό Σενάριο: Εφαρμογή σε Νησιωτικό Σχολείο της Τήλου

Για να διερευνηθεί η δυνατότητα εφαρμογής του μοντέλου σε διαφορετικά περιβάλλοντα, παρουσιάζεται ένα υποθετικό σενάριο υλοποίησης του Αειφόρου Ψηφιακού Σχολείου στο Γυμνάσιο της Τήλου, ενός μικρού νησιού που έχει αναδειχθεί ως πρότυπο αειφορίας λόγω της χρήσης ανανεώσιμων πηγών ενέργειας. Το σχολείο θα μπορούσε να υιοθετήσει το μοντέλο μέσω των εξής δράσεων:

- Ψηφιακή Υποδομή: Εγκατάσταση ηλιακών πάνελ για την τροφοδοσία υπολογιστών και διαδραστικών πινάκων, αξιοποιώντας την υπάρχουσα υποδομή του νησιού ως «πράσινο νησί» (European Commission, 2021). Χρήση λογισμικών ανοιχτού κώδικα, όπως το Moodle, για τη μείωση του κόστους.
- Διδακτική Αειφορίας: Ενσωμάτωση μαθημάτων για την προστασία της Μεσογείου και τη διαχείριση των υδάτινων πόρων, με τη χρήση εφαρμογών επαυξημένης πραγματικότητας που επιτρέπουν στους μαθητές να εξερευνούν το θαλάσσιο οικοσύστημα της Τήλου.
- Συμμετοχική Μάθηση: Δημιουργία ενός διαδικτυακού έργου μέσω του eTwinning, όπου οι μαθητές της Τήλου συνεργάζονται με μαθητές από τη Μάλτα για την ανάπτυξη στρατηγικών προστασίας των παράκτιων περιοχών. Οι μαθητές χρησιμοποιούν τηλεδιασκέψεις και διαδικτυακά φόρουμ για την ανταλλαγή ιδεών.

Το υποθετικό αυτό σενάριο καταδεικνύει τη δυνατότητα προσαρμογής του μοντέλου σε νησιωτικά σχολεία με περιορισμένους πόρους. Η επιτυχία του εξαρτάται από τη χρηματοδότηση μέσω ευρωπαϊκών προγραμμάτων, όπως το Erasmus+, και τη συνεργασία με τοπικούς φορείς, όπως ο Δήμος Τήλου. Προκλήσεις, όπως η περιορισμένη πρόσβαση στο διαδίκτυο σε απομακρυσμένες περιοχές, μπορούν να αντιμετωπιστούν με την εγκατάσταση δορυφορικού διαδικτύου ή την παροχή κινητών hotspot.

Κριτική Αξιολόγηση των Μελετών Περιπτώσεων

Οι παραπάνω μελέτες περιπτώσεων καταδεικνύουν τη δυνατότητα εφαρμογής του μοντέλου του Αειφόρου Ψηφιακού Σχολείου σε διαφορετικά περιβάλλοντα, από ανεπτυγμένα εκπαιδευτικά συστήματα, όπως της Φινλανδίας, μέχρι μικρά νησιωτικά σχολεία στην Ελλάδα. Τα κύρια οφέλη περιλαμβάνουν την ενίσχυση της περιβαλλοντικής ευαισθητοποίησης, την ανάπτυξη ψηφιακών δεξιοτήτων και την προώθηση της συνεργασίας μεταξύ μαθητών και κοινοτήτων. Ωστόσο, οι προκλήσεις παραμένουν σημαντικές:

- Οικονομικοί περιορισμοί: Η εγκατάσταση πράσινων τεχνολογιών και ψηφιακών υποδομών απαιτεί αρχική επένδυση, η οποία μπορεί να είναι απαγορευτική για σχολεία σε χώρες με περιορισμένους πόρους (Warschauer, 2003).

- Εκπαίδευση εκπαιδευτικών: Η επιτυχία των προγραμμάτων εξαρτάται από την ικανότητα των εκπαιδευτικών να χρησιμοποιούν ψηφιακά εργαλεία και να ενσωματώνουν την αειφορία στη διδασκαλία τους (Darling-Hammond et al., 2017).
- Πολιτισμικές διαφορές: Η προσαρμογή του μοντέλου σε τοπικά περιβάλλοντα απαιτεί ευαισθησία στις πολιτισμικές και περιβαλλοντικές ιδιαιτερότητες κάθε περιοχής (Wals, 2012).

Για την αντιμετώπιση αυτών των προκλήσεων, προτείνεται η δημιουργία πιλοτικών προγραμμάτων σε επιλεγμένα σχολεία, η αξιοποίηση ευρωπαϊκών κονδυλίων και η ανάπτυξη εθνικών κατευθυντήριων γραμμών για την εφαρμογή του μοντέλου. Οι μελέτες περιπτώσεων καταδεικνύουν ότι, με την κατάλληλη υποστήριξη, το Αειφόρο Ψηφιακό Σχολείο μπορεί να αποτελέσει πρότυπο για τη μελλοντική εκπαίδευση.

ΠΡΟΚΛΗΣΕΙΣ ΚΑΙ ΛΥΣΕΙΣ

Η υλοποίηση του μοντέλου του Αειφόρου Ψηφιακού Σχολείου, αν και πολλά υποσχόμενη, αντιμετωπίζει πολλαπλές προκλήσεις που σχετίζονται με την τεχνολογική υποδομή, την οικονομική βιωσιμότητα, την εκπαίδευση των εκπαιδευτικών και την κοινωνική ισότητα. Οι προκλήσεις αυτές είναι ιδιαίτερα έντονες σε χώρες όπως η Ελλάδα, όπου οι περιορισμοί στους πόρους και η άνιση πρόσβαση στην τεχνολογία περιπλέκουν την εφαρμογή καινοτόμων εκπαιδευτικών μοντέλων. Η ενότητα αυτή αναλύει τις κύριες προκλήσεις, αξιολογεί τις επιπτώσεις τους και προτείνει συγκεκριμένες λύσεις, βασισμένες σε διεθνή παραδείγματα και το ελληνικό πλαίσιο, για την επιτυχή υλοποίηση του μοντέλου.

Οικονομικοί Περιορισμοί

Πρόκληση: Η εγκατάσταση πράσινων τεχνολογιών, όπως φωτοβολταϊκά πάνελ, συσκευές χαμηλής κατανάλωσης ενέργειας και συστήματα ανακύκλωσης ηλεκτρονικών αποβλήτων, απαιτεί σημαντική αρχική επένδυση. Στην Ελλάδα, όπου τα σχολεία συχνά λειτουργούν με περιορισμένους προϋπολογισμούς, η χρηματοδότηση τέτοιων υποδομών αποτελεί μείζον εμπόδιο (Warschauer, 2003). Επιπλέον, η συντήρηση και η αναβάθμιση των ψηφιακών συστημάτων προσθέτει μακροπρόθεσμο κόστος, το οποίο μπορεί να επιβαρύνει τις τοπικές αρχές ή τα σχολεία. Προτεινόμενες λύσεις θα μπορούσαν να είναι οι παρακάτω:

- Αξιοποίηση ευρωπαϊκών κονδυλίων: Προγράμματα όπως το Horizon Europe και το Ταμείο Ανάκαμψης και Ανθεκτικότητας παρέχουν χρηματοδότηση για έργα που συνδυάζουν την αειφορία και την ψηφιακή καινοτομία (European Commission, 2021). Για παράδειγμα, το πρόγραμμα LIFE της ΕΕ έχει υποστηρίξει την εγκατάσταση ηλιακών πάνελ σε σχολεία της Πορτογαλίας, ένα μοντέλο που θα μπορούσε να εφαρμοστεί στην Ελλάδα.
- Συμπράξεις δημόσιου-ιδιωτικού τομέα: Συνεργασίες με ιδιωτικές εταιρείες τεχνολογίας, όπως εταιρείες που ειδικεύονται σε ανανεώσιμες πηγές ενέργειας ή λογισμικά ανοιχτού κώδικα, μπορούν να μειώσουν το κόστος. Στην Ελλάδα, εταιρείες όπως η ΔΕΗ θα μπορούσαν να συνεργαστούν με σχολεία για την παροχή φωτοβολταϊκών συστημάτων σε προνομιακές τιμές.
- Πιλοτικά προγράμματα: Η εφαρμογή του μοντέλου σε μικρή κλίμακα, π.χ. σε 10-15 σχολεία σε αστικές και νησιωτικές περιοχές, μπορεί να μειώσει το αρχικό κόστος και να επιτρέψει την αξιολόγηση της αποτελεσματικότητας πριν την ευρύτερη κλιμάκωση.
- Χρήση λογισμικών ανοιχτού κώδικα: Η υιοθέτηση δωρεάν λογισμικών, όπως το Moodle ή το Linux, μειώνει το κόστος σε σχέση με εμπορικές πλατφόρμες, όπως αποδεικνύεται από την επιτυχή χρήση τέτοιων εργαλείων σε σχολεία της Ινδίας (Wheeler, 2015).

Έλλειψη Εκπαίδευσης Εκπαιδευτικών

Πρόκληση: Η επιτυχία του Αειφόρου Ψηφιακού Σχολείου εξαρτάται από την ικανότητα των εκπαιδευτικών να χρησιμοποιούν ψηφιακά εργαλεία και να ενσωματώνουν την αειφορία στη διδασκαλία τους. Ωστόσο, πολλοί εκπαιδευτικοί, ιδιαίτερα σε χώρες όπως η Ελλάδα, στερούνται επαρκούς επιμόρφωσης σε ψηφιακές δεξιότητες και μεθόδους διδακτικής της αειφορίας (Darling-Hammond et al., 2017). Αυτό περιορίζει την αποτελεσματικότητα των ψηφιακών πλατφορμών και την ικανότητα των εκπαιδευτικών να εμπνεύσουν τους μαθητές για περιβαλλοντικά και κοινωνικά ζητήματα. Η δεδομένη κατάσταση θα μπορούσε να αντιμετωπιστεί με:

- Προγράμματα επαγγελματικής ανάπτυξης: Η οργάνωση τακτικών σεμιναρίων επιμόρφωσης, τόσο δια ζώσης όσο και διαδικτυακά, μπορεί να ενισχύσει τις δεξιότητες των εκπαιδευτικών. Για παράδειγμα, το πρόγραμμα Erasmus+ προσφέρει ευκαιρίες για επιμόρφωση σε θέματα όπως η χρήση ψηφιακών εργαλείων και η διδασκαλία της αειφορίας (European Commission, 2021).

- Διαδικτυακά μαθήματα και κοινότητες πρακτικής: Η δημιουργία διαδικτυακών κοινοτήτων, όπως μέσω του Πανελληνίου Σχολικού Δικτύου, μπορεί να διευκολύνει την ανταλλαγή βέλτιστων πρακτικών μεταξύ

εκπαιδευτικών. Παρόμοιες πρωτοβουλίες, όπως το "TeachSDGs" στις ΗΠΑ, έχουν αποδειχθεί αποτελεσματικές (Nolet, 2009).

- Συνεργασία με πανεπιστήμια: Ελληνικά πανεπιστήμια, όπως το Εθνικό και Καποδιστριακό Πανεπιστήμιο Αθηνών, μπορούν να αναπτύξουν προγράμματα επιμόρφωσης για εκπαιδευτικούς, εστιάζοντας στη διασύνδεση της αειφορίας και της ψηφιακής εκπαίδευσης.
- Μικροπιστοποιήσεις (micro-credentials): Η παροχή μικροπιστοποιήσεων για την ολοκλήρωση μαθημάτων σε ψηφιακά εργαλεία ή διδακτική της αειφορίας μπορεί να ενθαρρύνει τους εκπαιδευτικούς να συμμετάσχουν, όπως εφαρμόζεται σε χώρες όπως η Φινλανδία (Lehtonen et al., 2018).

Ψηφιακό Χάσμα και Κοινωνική Ανισότητα

Πρόκληση: Το ψηφιακό χάσμα, δηλαδή η άνιση πρόσβαση σε τεχνολογία και διαδίκτυο, αποτελεί σημαντικό εμπόδιο για την εφαρμογή του μοντέλου, ιδιαίτερα σε απομακρυσμένες ή οικονομικά μειονεκτούσες περιοχές της Ελλάδας, όπως τα μικρά νησιά ή οι αγροτικές περιοχές της Ηπείρου (Warschauer, 2003). Οι μαθητές από χαμηλού εισοδήματος οικογένειες συχνά δεν διαθέτουν προσωπικές συσκευές ή αξιόπιστη σύνδεση στο διαδίκτυο, γεγονός που περιορίζει τη συμμετοχή τους σε ψηφιακές δραστηριότητες και επιδεινώνει τις εκπαιδευτικές ανισότητες. Προκειμένου να επιλυθεί το παραπάνω πρόβλημα, προτείνονται τα εξής:

- Παροχή δωρεάν συσκευών και διαδικτύου: Η διανομή ταμπλετών ή ανακαινισμένων υπολογιστών σε μαθητές από ευάλωτες ομάδες, όπως εφαρμόζεται σε προγράμματα της Πορτογαλίας, μπορεί να μειώσει το ψηφιακό χάσμα. Στην Ελλάδα, το Υπουργείο Παιδείας θα μπορούσε να συνεργαστεί με οργανισμούς όπως η UNICEF για την υλοποίηση τέτοιων πρωτοβουλιών.
- Επέκταση της διαδικτυακής πρόσβασης: Η εγκατάσταση δορυφορικού διαδικτύου ή κινητών hotspot σε απομακρυσμένες περιοχές, όπως τα νησιά του Αιγαίου, μπορεί να εξασφαλίσει καθολική πρόσβαση. Το πρόγραμμα WiFi4EU της ΕΕ αποτελεί παράδειγμα επιτυχούς επέκτασης του διαδικτύου σε απομακρυσμένες κοινότητες (European Commission, 2021).
- Κέντρα ψηφιακής μάθησης: Η δημιουργία κοινοτικών κέντρων με δωρεάν πρόσβαση σε υπολογιστές και διαδίκτυο, όπως εφαρμόζεται στην Ινδία, μπορεί να υποστηρίξει μαθητές που δεν έχουν πρόσβαση στο σπίτι τους (Wheeler, 2015).
- Ενίσχυση της ψηφιακής παιδείας: Προγράμματα εκπαίδευσης για γονείς και μαθητές σχετικά με τη χρήση ψηφιακών εργαλείων μπορούν να ενισχύσουν τη συμμετοχή, μειώνοντας την ψηφιακή ανισότητα.

Περιβαλλοντικές Επιπτώσεις της Τεχνολογίας

Πρόκληση: Η μαζική χρήση ψηφιακών τεχνολογιών, όπως υπολογιστές, διακομιστές και συσκευές IoT, συνεπάγεται περιβαλλοντικές επιπτώσεις, όπως η αυξημένη κατανάλωση ενέργειας και η παραγωγή ηλεκτρονικών αποβλήτων (Berkhout & Hertin, 2004). Αυτό το παράδοξο, όπου η τεχνολογία που χρησιμοποιείται για την προώθηση της αειφορίας μπορεί να επιβαρύνει το περιβάλλον, αποτελεί σημαντικό εμπόδιο για το μοντέλο. Για τον λόγο αυτόν προτείνονται τα εξής:

- Χρήση πράσινων τεχνολογιών: Η υιοθέτηση συσκευών χαμηλής κατανάλωσης ενέργειας και η τροφοδοσία σχολικών υποδομών με ανανεώσιμες πηγές ενέργειας, όπως ηλιακή ή αιολική, μπορούν να μειώσουν το περιβαλλοντικό αποτύπωμα. Η Τήλος, για παράδειγμα, έχει ήδη εφαρμόσει τέτοιες τεχνολογίες σε κοινοτικό επίπεδο, οι οποίες θα μπορούσαν να επεκταθούν στα σχολεία (European Commission, 2021).
- Προγράμματα ανακύκλωσης ηλεκτρονικών αποβλήτων: Η δημιουργία σταθμών ανακύκλωσης στα σχολεία, με τη συμμετοχή μαθητών, μπορεί να προωθήσει την κυκλική οικονομία. Παρόμοια προγράμματα έχουν εφαρμοστεί με επιτυχία στη Γερμανία (Koutsouris, 2018).
- Εκπαίδευση για υπεύθυνη χρήση τεχνολογίας: Η διδασκαλία μαθημάτων για την περιβαλλοντική επίδραση της τεχνολογίας, όπως η σημασία της μείωσης της κατανάλωσης δεδομένων ή της σωστής απόρριψης συσκευών, μπορεί να ενισχύσει την περιβαλλοντική συνείδηση (Rattle, 2010).
- Σχεδιασμός ενεργειακά αποδοτικών πλατφορμών: Η ανάπτυξη ψηφιακών πλατφορμών με χαμηλές ενεργειακές απαιτήσεις, όπως το Moodle, μπορεί να μειώσει την κατανάλωση ενέργειας από τη χρήση διακομιστών.

Πολιτισμικές και Κοινωνικές Προκλήσεις

Πρόκληση: Η εφαρμογή του μοντέλου απαιτεί προσαρμογή στις τοπικές πολιτισμικές και κοινωνικές συνθήκες, κάτι που μπορεί να είναι δύσκολο σε περιοχές με χαμηλή περιβαλλοντική ευαισθητοποίηση ή αντίσταση στην υιοθέτηση νέων τεχνολογιών. Στην Ελλάδα, για παράδειγμα, η παραδοσιακή προσέγγιση στη διδασκαλία και η περιορισμένη εμπλοκή της κοινότητας σε περιβαλλοντικά ζητήματα μπορεί να περιορίσουν την αποδοχή του μοντέλου (Wals, 2012). Αυτό θα μπορούσε να αντιμετωπιστεί με:

- Ευαισθητοποίηση της κοινότητας: Η οργάνωση εκδηλώσεων, όπως ημερίδες ή εργαστήρια, για γονείς και τοπικούς φορείς μπορεί να ενισχύσει την αποδοχή του μοντέλου. Στην Κρήτη, για παράδειγμα, σχολεία έχουν συνεργαστεί με περιβαλλοντικές οργανώσεις, όπως η WWF Ελλάς, για την προώθηση προγραμμάτων αειφορίας.
- Προσαρμογή στο τοπικό πλαίσιο: Η ενσωμάτωση τοπικών περιβαλλοντικών ζητημάτων, όπως η προστασία της Μεσογείου ή η διαχείριση των υδάτινων πόρων, μπορεί να κάνει το μοντέλο πιο σχετικό και ελκυστικό για την τοπική κοινότητα (Koutsouris, 2018).
- Συμμετοχή μαθητών στη λήψη αποφάσεων: Η δημιουργία μαθητικών επιτροπών, όπως στο πρόγραμμα Eco-Schools, μπορεί να ενισχύσει τη δέσμευση των μαθητών και να προωθήσει την αποδοχή του μοντέλου από την ευρύτερη κοινότητα (Hellenic Society for the Protection of Nature, 2020).

Κριτική Αξιολόγηση και Μελλοντικές Κατευθύνσεις

Οι προκλήσεις που παρουσιάστηκαν υπογραμμίζουν την πολυπλοκότητα της υλοποίησης του Αειφόρου Ψηφιακού Σχολείου, ιδιαίτερα σε περιβάλλοντα με περιορισμένους πόρους. Ωστόσο, οι προτεινόμενες λύσεις, όπως η αξιοποίηση ευρωπαϊκών κονδυλίων, η επιμόρφωση των εκπαιδευτικών και η προσαρμογή στο τοπικό πλαίσιο, μπορούν να εξασφαλίσουν την επιτυχία του μοντέλου. Η Ελλάδα, με τη συμμετοχή της σε διεθνή προγράμματα όπως το Eco-Schools και την πρόσβαση σε ευρωπαϊκή χρηματοδότηση, έχει τη δυνατότητα να γίνει πρότυπο για την εφαρμογή του μοντέλου σε περιφερειακό επίπεδο.

Μελλοντικές κατευθύνσεις περιλαμβάνουν τη διεξαγωγή ποσοτικών ερευνών για την αξιολόγηση των περιβαλλοντικών και εκπαιδευτικών οφελών του μοντέλου, καθώς και την ανάπτυξη εθνικών κατευθυντήριων γραμμών από το Υπουργείο Παιδείας. Επιπλέον, η συνεργασία με διεθνείς οργανισμούς, όπως η UNESCO, μπορεί να ενισχύσει την κλιμάκωση του μοντέλου σε παγκόσμιο επίπεδο.

ΣΥΜΠΕΡΑΣΜΑΤΑ ΚΑΙ ΜΕΛΛΟΝΤΙΚΕΣ ΚΑΤΕΥΘΥΝΣΕΙΣ

Το μοντέλο του Αειφόρου Ψηφιακού Σχολείου αποτελεί μια καινοτόμο και ολιστική προσέγγιση που συνδυάζει την ψηφιακή τεχνολογία με τις αρχές της αειφορίας για να ανταποκριθεί στις πολυδιάστατες προκλήσεις της εκπαίδευσης του 21ου αιώνα. Μέσα από την ανάλυση του θεωρητικού πλαισίου, των πυλώνων του μοντέλου, των μελετών περιπτώσεων και των προκλήσεων, το άρθρο κατέδειξε τη δυνατότητα του μοντέλου να προάγει την περιβαλλοντική ευαισθητοποίηση, να ενισχύσει τις ψηφιακές δεξιότητες και να καλλιεργήσει τη συνεργασία μεταξύ μαθητών, εκπαιδευτικών και κοινότητας. Η ενότητα αυτή συνοψίζει τα κύρια συμπεράσματα, αξιολογεί κριτικά την εφαρμοσιμότητα του μοντέλου και προτείνει μελλοντικές κατευθύνσεις για την έρευνα, την υλοποίηση και την κλιμάκωσή του τόσο στο ελληνικό πλαίσιο όσο και τη διεθνή προοπτική.

Συμπεράσματα

Το Αειφόρο Ψηφιακό Σχολείο βασίζεται σε τρεις πυλώνες: την ψηφιακή υποδομή και την πράσινη τεχνολογία, τη διδακτική της αειφορίας και τη συμμετοχική μάθηση. Αυτοί οι πυλώνες, όπως αναλύθηκαν στις προηγούμενες ενότητες, δημιουργούν ένα συνεκτικό πλαίσιο που ενσωματώνει την τεχνολογία ως εργαλείο για την προώθηση της Εκπαίδευσης για την Αειφορία (ESD) και την ενίσχυση της μαθησιακής εμπειρίας (UNESCO, 2014). Η χρήση πράσινων τεχνολογιών, όπως φωτοβολταϊκά πάνελ και λογισμικά ανοιχτού κώδικα, μειώνει το περιβαλλοντικό αποτύπωμα της ψηφιακής εκπαίδευσης, ενώ η διδακτική της αειφορίας καλλιεργεί δεξιότητες όπως η κριτική σκέψη και η επίλυση προβλημάτων (Sterling, 2001). Παράλληλα, η συμμετοχική μάθηση, βασισμένη στη θεωρία του συνδετισμού (Siemens, 2005), ενθαρρύνει τη συνεργασία και την ανταλλαγή γνώσεων μέσω ψηφιακών πλατφορμών.

Οι μελέτες περιπτώσεων, όπως το πρόγραμμα Eco-Schools, το Climate.now στη Φινλανδία και η περίπτωση του 1ου Γυμνασίου Χαλανδρίου, καταδεικνύουν την πρακτική εφαρμοσιμότητα του μοντέλου σε διαφορετικά περιβάλλοντα. Αυτά τα παραδείγματα υπογραμμίζουν ότι η επιτυχία του μοντέλου εξαρτάται από τη συνεργασία μεταξύ εκπαιδευτικών, μαθητών, τοπικών αρχών και διεθνών οργανισμών, καθώς και από την προσαρμογή στις τοπικές συνθήκες (Wals, 2012). Στην Ελλάδα, το μοντέλο μπορεί να αξιοποιήσει υπάρχουσες πρωτοβουλίες, όπως το πρόγραμμα Eco-Schools, και να επεκταθεί σε νησιωτικές ή αγροτικές περιοχές, όπως η Τήλος, με τη χρήση ευρωπαϊκών κονδυλίων (European Commission, 2021).

Παρά τα πλεονεκτήματα, το μοντέλο αντιμετωπίζει προκλήσεις, όπως το υψηλό αρχικό κόστος, η έλλειψη ψηφιακών δεξιοτήτων στους εκπαιδευτικούς, το ψηφιακό χάσμα και οι περιβαλλοντικές επιπτώσεις της τεχνολογίας. Οι προτεινόμενες λύσεις, όπως η αξιοποίηση ευρωπαϊκών προγραμμάτων, η επιμόρφωση των εκπαιδευτικών και η προώθηση της ψηφιακής ισότητας, μπορούν να αντιμετωπίσουν αυτά τα εμπόδια και να εξασφαλίσουν τη βιωσιμότητα

του μοντέλου (Darling-Hammond et al., 2017; Warschauer, 2003). Συνολικά, το Αειφόρο Ψηφιακό Σχολείο προσφέρει ένα οραματικό πλαίσιο που προετοιμάζει τους μαθητές να γίνουν ενεργοί πολίτες σε έναν κόσμο που αντιμετωπίζει κλιματικές και κοινωνικές προκλήσεις.

Κριτική Αξιολόγηση

Η κριτική αξιολόγηση του μοντέλου αποκαλύπτει τόσο τις δυνατότητές του όσο και τους περιορισμούς του. Από τη θετική πλευρά, το μοντέλο ανταποκρίνεται στις σύγχρονες εκπαιδευτικές ανάγκες, ενσωματώνοντας δεξιότητες του 21ου αιώνα, όπως η ψηφιακή εγγραμματοσύνη, η συνεργασία και η περιβαλλοντική συνείδηση (UNESCO, 2017). Η ευελιξία του επιτρέπει την προσαρμογή σε διαφορετικά εκπαιδευτικά συστήματα και πολιτισμικά περιβάλλοντα, όπως καταδεικνύεται από τις μελέτες περιπτώσεων στη Φινλανδία και την Ελλάδα. Επιπλέον, η χρήση πράσινων τεχνολογιών και η έμφαση στη συμμετοχική μάθηση το καθιστούν σύμφωνο με τους Στόχους Βιώσιμης Ανάπτυξης (SDGs) του ΟΗΕ, ιδιαίτερα τον Στόχο 4 (Ποιοτική Εκπαίδευση) και τον Στόχο 13 (Δράση για το Κλίμα).

Ωστόσο, η εφαρμογή του μοντέλου αντιμετωπίζει σημαντικούς περιορισμούς. Η εξάρτηση από την τεχνολογία μπορεί να οδηγήσει σε αποξένωση από το φυσικό περιβάλλον, αν δεν συνοδεύεται από βιωματικές δραστηριότητες, όπως η κηπουρική ή οι επισκέψεις σε φυσικούς χώρους (Selwyn, 2016). Επιπλέον, η επιτυχία του μοντέλου εξαρτάται από τη δέσμευση των πολιτικών φορέων και την επαρκή χρηματοδότηση, κάτι που μπορεί να είναι δύσκολο σε χώρες με οικονομικούς περιορισμούς, όπως η Ελλάδα (Wals, 2012). Τέλος, η έλλειψη ποσοτικών δεδομένων για την αποτελεσματικότητα του μοντέλου σε μακροπρόθεσμη βάση περιορίζει την ικανότητα αξιολόγησης των εκπαιδευτικών και περιβαλλοντικών του οφελών.

Μελλοντικές Κατευθυνσεις

Για την περαιτέρω ανάπτυξη και κλιμάκωση του Αειφόρου Ψηφιακού Σχολείου, προτείνονται οι ακόλουθες μελλοντικές κατευθύνσεις, οι οποίες χωρίζονται σε τρεις βασικούς άξονες: έρευνα, υλοποίηση και πολιτική υποστήριξη.

Ερευνητικές Κατευθύνσεις

Η έρευνα αποτελεί κρίσιμο στοιχείο για την τεκμηρίωση της αποτελεσματικότητας του μοντέλου και την ενίσχυση της αξιοπιστίας του. Οι προτεινόμενες ερευνητικές κατευθύνσεις περιλαμβάνουν:

- Ποσοτικοποίηση των οφελών: Διεξαγωγή μακροχρόνιων μελετών για τη μέτρηση των περιβαλλοντικών και εκπαιδευτικών οφελών του μοντέλου, όπως η μείωση του ανθρακικού αποτυπώματος των σχολείων ή η βελτίωση της μαθησιακής απόδοσης. Τέτοιες μελέτες μπορούν να βασιστούν σε μετρήσεις κατανάλωσης ενέργειας ή στατιστικά στοιχεία για τη συμμετοχή των μαθητών (Koutsouris, 2018).
- Συγκριτική ανάλυση: Διερεύνηση της εφαρμογής του μοντέλου σε διαφορετικά εκπαιδευτικά συστήματα, π.χ. συγκρίνοντας την Ελλάδα με τη Φινλανδία ή τη Σιγκαπούρη, για την ανάδειξη βέλτιστων πρακτικών και την προσαρμογή σε διαφορετικά πολιτισμικά περιβάλλοντα (Lehtonen et al., 2018).
- Ανάπτυξη εργαλείων αξιολόγησης: Δημιουργία πλαισίων αξιολόγησης για τη μέτρηση της αποτελεσματικότητας της διδακτικής της αειφορίας και της συμμετοχικής μάθησης, όπως κλίμακες για την περιβαλλοντική ευαισθητοποίηση ή την ψηφιακή εγγραμματοσύνη των μαθητών (Nolet, 2009).
- Μελέτη μακροπρόθεσμων επιπτώσεων: Εξέταση του τρόπου με τον οποίο το μοντέλο επηρεάζει τη συμπεριφορά των μαθητών ως ενήλικες, π.χ. την υιοθέτηση βιώσιμων πρακτικών στην καθημερινότητά τους ή τη συμμετοχή τους σε περιβαλλοντικές πρωτοβουλίες.

Στρατηγικές Υλοποίησης

Η επιτυχής υλοποίηση του μοντέλου απαιτεί πρακτικές στρατηγικές που μπορούν να εφαρμοστούν σε εθνικό και διεθνές επίπεδο:

- Πιλοτικά προγράμματα στην Ελλάδα: Η εφαρμογή του μοντέλου σε επιλεγμένα σχολεία, όπως σε αστικά κέντρα (π.χ. Αθήνα, Θεσσαλονίκη) και νησιωτικές περιοχές (π.χ. Κρήτη, Τήλος), μπορεί να λειτουργήσει ως δοκιμαστικό στάδιο για την αξιολόγηση και τη βελτιστοποίηση του μοντέλου. Το Υπουργείο Παιδείας θα μπορούσε να συνεργαστεί με την Ελληνική Εταιρεία Προστασίας της Φύσης για την υποστήριξη αυτών των προγραμμάτων (Hellenic Society for the Protection of Nature, 2020).

- Ενίσχυση της ψηφιακής υποδομής: Η επέκταση της πρόσβασης στο διαδίκτυο σε απομακρυσμένες περιοχές μέσω προγραμμάτων όπως το WiFi4EU και η παροχή δωρεάν συσκευών σε μαθητές από ευάλωτες ομάδες μπορούν να μειώσουν το ψηφιακό χάσμα (European Commission, 2021).

- Ενσωμάτωση στο εθνικό πρόγραμμα σπουδών: Η αειφορία και η ψηφιακή εκπαίδευση θα μπορούσαν να ενσωματωθούν στο ελληνικό πρόγραμμα σπουδών μέσω διεπιστημονικών μαθημάτων, όπως προτείνεται από τη UNESCO (2014). Για παράδειγμα, η διδασκαλία της κλιματικής αλλαγής μπορεί να ενταχθεί στα μαθήματα της Γεωγραφίας, της Βιολογίας και της Κοινωνικής Εκπαίδευσης.
- Δημιουργία κοινοτήτων πρακτικής: Η ανάπτυξη διαδικτυακών κοινοτήτων για εκπαιδευτικούς, μέσω πλατφορμών όπως το Πανελλήνιο Σχολικό Δίκτυο, μπορεί να διευκολύνει την ανταλλαγή ιδεών και την υποστήριξη της υλοποίησης (Siemens, 2005).

ΕΚΠΑΙΔΕΥΣΗ ΚΑΙ ΕΠΙΧΕΙΡΗΜΑΤΙΚΟΤΗΤΑ ΣΤΗΝ ΕΠΟΧΗ ΤΗΣ ΨΗΦΙΑΚΗΣ ΔΙΑΚΥΒΕΡΝΗΣΗΣ

Δρ Κλεοπάτρα Ν. Βασιλείου

ΠΕΡΙΛΗΨΗ

Οι τεχνολογικές εξελίξεις στο πεδίο της επιχειρηματικότητας είναι ραγδαίες ως αποτέλεσμα του ψηφιακού μετασχηματισμού της οικονομίας. Οι σύγχρονες σχολικές μονάδες καλούνται να αναπροσαρμόσουν τις διδακτικές και εν γένει εκπαιδευτικές στρατηγικές τους στα πλαίσια λειτουργίας του αειφόρου σχολείου. Επιπρόσθετα το επιχειρείν αποτελεί ουσιώδη και απαραίτητη δεξιότητα για τους αυριανούς πολίτες και ωφελεί τόσο την προσωπική τους όσο και την επαγγελματική τους εξέλιξη. Η εκπαίδευση σε θέματα επιχειρηματικότητας παίζει καίριο ρόλο στην ανταγωνιστικότητα μιας χώρας και στη διαρκή ανάπτυξη της οικονομίας και της ανταγωνιστικότητας της. Η προώθηση της επιχειρηματικότητας στην εκπαίδευση ενθαρρύνει και καθοδηγεί τους μαθητές/τριες στο να αναπτύξουν επιχειρηματικό πνεύμα και να διαμορφώνουν καινοτόμες λύσεις. Η βασική ιδέα είναι η κατανόηση βασικών οικονομικών εννοιών από πλευράς των μαθητών/τριών όπως για παράδειγμα η διαχείριση χρημάτων που εντάσσεται στα πλαίσια του οικονομικού εγγραματισμού και επιχειρηματικότητας και η απόκτηση δεξιοτήτων για την δημιουργία της δικής τους ψηφιακής επιχείρησης. Η φιλοσοφία ενός οργανισμού μάθησης όπως και το σχολείο είναι να μαθαίνουμε πώς να μαθαίνουμε. Οι μαθητές/τριες εκπαιδεύονται να εργάζονται σε ομάδες, να καταθέτουν ιδέες και προτάσεις με βάση τα ενδιαφέροντα τους και να συλλαμβάνουν επιχειρηματικές ιδέες τις οποίες μέσω της συνεργασίας και της ομαδοσυνεργατικότητας μέσω χάραξης και προσομοίωσης ενός απλού και πρότυπου επιχειρηματικού σχεδίου που θα οδηγήσει στην υλοποίηση της αρχικής τους ιδέας με την χρήση σύγχρονων καινοτόμων ψηφιακών εργαλείων. Σκοπός της παρούσας έρευνας είναι η βιβλιογραφική ανασκόπηση και η δευτερογενή ανάλυση δεδομένων, βιβλιογραφίας, μέσω της επεξεργασίας υφιστάμενων ερευνών και στατιστικών που σχετίζονται με τις εξελίξεις της εφαρμογής της επιχειρηματικότητας στην εκπαίδευση στα πλαίσια της ψηφιακής διακυβέρνησης και η καταγραφή καλών πρακτικών στην θεματική Δημιουργώ και Καινοτομώ-Δημιουργική σκέψη και πρωτοβουλία, στον τομέα της επιχειρηματικότητας, τόσο σε εγχώριο όσο και σε Διεθνές επίπεδο. Το ερευνητικό κείμενο αποσκοπεί στην ανάδειξη των προκλήσεων που προκύπτουν για τα σχολεία στην εποχή της ψηφιακής διακυβέρνησης στον τομέα της επιχειρηματικότητας και της εφαρμογής της ενεργούς πολιτειότητας μέσα από δράσεις ενίσχυσης της σε συνδυασμό με τα εργαστήρια δεξιοτήτων.

Λέξεις-κλειδιά: επιχειρηματικότητα, εκπαίδευση, δημιουργική σκέψη, ψηφιακά περιβάλλοντα

ΕΙΣΑΓΩΓΗ

Η επιχειρηματικότητα διαδραματίζει αναμφίβολα σημαντικό ρόλο στην ανάπτυξη και ενίσχυση της ανταγωνιστικότητα της κοινωνίας μέσω της ανάληψης πρωτοβουλιών. Το συγκριτικό πλεονέκτημα μπορεί να μετατραπεί σε ανταγωνιστικό μέσα από την ορθή ανάληψη επιχειρηματικών δράσεων στο πλαίσιο ενός ολοκληρωμένου πλέγματος πολιτικών και κινήτρων από πλευράς της πολιτείας (Martin 2006).

Στο κείμενο «European Commission» (2018, σ. 13), η επιχειρηματική ικανότητα ορίζεται ως ακολούθως: Η επιχειρηματική ικανότητα αναφέρεται στη δυνατότητα να ενεργεί κανείς σε ευκαιρίες και ιδέες και να τις μετατρέπει σε αξίες για τους άλλους. Η ικανότητα αυτή θεμελιώνεται στη δημιουργικότητα, στην κριτική σκέψη και την επίλυση προβλημάτων, αναλαμβάνοντας πρωτοβουλίες με επιμονή και δυνατότητα συνεργασίας για τον σχεδιασμό και τη διαχείριση έργων που έχουν πολιτιστική, κοινωνική ή οικονομική αξία.

Κρίνεται αναγκαίο για όλες τις χώρες που επιδιώκουν να ενισχύσουν την ανταγωνιστικότητα, τη μεγέθυνση και την δημιουργία θέσεων εργασίας να δώσουν μεγάλη έμφαση στην επιχειρηματικότητα και στην καινοτομία (Ε.Ε., 2002). Η εκπαίδευση κατέχει σημαντική θέση στην εκπλήρωση των προαναφερθέντων στόχων μιας και είναι η μόνη που δύναται να καλλιεργήσει την εκάστοτε επιχειρηματική κουλτούρα στις κοινωνίες και να παρέχει, ειδικότερα σε ό,τι αφορά τη νέα γενιά, όλα τα απαραίτητα προσόντα, ικανότητες και δεξιότητες που απαιτούνται στην σύγχρονη αγορά εργασίας. Εξάλλου, η πλήθος εμπειρικών ερευνών έχουν αποδείξει ότι η η επιχειρηματικότητα μπορεί να διδαχθεί ή τουλάχιστον να ενθαρρυνθεί στα πλαίσια μιας οργανωμένης επιχειρηματικής εκπαίδευσης (Kuratko, 2003).

Η εκπαίδευση στην επιχειρηματικότητα αποστασιοποιείται πλέον και από τη συμπεριφορά καθαυτή (ίδρυση επιχειρήσεων) και αφορά στον συνολικό νεανικό πληθυσμό, στις ικανότητές του και στη μετέπειτα επαγγελματική του ζωή σε διάφορα εργασιακά περιβάλλοντα. Συσχετίζεται δε με το πρόσφατο πλαίσιο των «δεξιοτήτων ζωής», LifeComp, της Ευρωπαϊκής Επιτροπής (Sala et al., 2020) και την ευζωία, όπως και με το πρόσφατο πλαίσιο επίσης των «δεξιοτήτων αειφορίας» (GreenComp, Bianchi, Pisiotis & Giraldez, 2022).

Η στρατηγική «Ευρώπη 2020» έχοντας ως κύριο άξονα μελέτης τις προτάσεις του «Entrepreneurship 2020 Action Plan» καθιστά σαφές ότι η εκπαίδευση στην επιχειρηματικότητα είναι απαραίτητη για μια ολοκληρωμένη στρατηγική ευρωπαϊκής ανάπτυξης, όπου οι διάφορες «συμπληρωματικές» πολιτικές ενίσχυσης της επιχειρηματικότητας (για νεοφυείς και μικρομεσαίες επιχειρήσεις) θα πρέπει να συμβαδίζουν με τη βασική πολιτική της Ευρωπαϊκής Επιτροπής για την εκπαίδευση. Τα παραδοσιακά συστήματα δευτεροβάθμιας εκπαίδευσης είναι προσανατολισμένα στην παροχή κυρίως μαθημάτων γενικής παιδείας και στην εξειδίκευση σε ορισμένους τομείς αλλά σε καμία περίπτωση στην προετοιμασία νέων επιχειρηματιών. Βέβαια στις περισσότερες ευρωπαϊκές χώρες, το Λύκειο διαθέτει τις εξής δύο δυνατότητες: την παροχή γνώσεων γενικής παιδείας για εισαγωγή στην τριτοβάθμια εκπαίδευση και επαγγελματικής-τεχνικής παιδείας για ενσωμάτωση στην αγορά εργασίας ή περαιτέρω σπουδές (Παντίδης-Πασσιάς, 2003). Στην τριτοβάθμια εκπαίδευση το τοπίο είναι σαφώς διαφορετικό στις περισσότερες χώρες εφόσον η επιχειρηματική εκπαίδευση κερδίζει ολοένα και περισσότερο έδαφος σε παγκόσμιο επίπεδο (Kuratko, 2005) αν και βέβαια η επιχειρηματική-οικονομική εκπαίδευση εντάχθηκε στα αναλυτικά προγράμματα σπουδών της ανώτερης εκπαίδευσης το 1947 στο Πανεπιστήμιο του Χαρβαρντ (Katz, 2003).

Η καινοτομία διαδραματίζει τον δικό της ρόλο στην ανάδειξη της επιχειρηματικότητας. Ο όρος «καινοτομία» είναι κάπως ασαφής και διφορούμενος : στην τρέχουσα γλώσσα σημαίνει τόσο μια διαδικασία όσο και το αποτέλεσμά της. Σύμφωνα με τον ορισμό της καινοτομίας που προτείνει ο ΟΟΣΑ, πρόκειται για την μετατροπή μιας ιδέας σε εμπορεύσιμο προϊόν ή υπηρεσία, λειτουργική μέθοδο παραγωγής ή διανομής – νέα ή βελτιωμένη- ή ακόμα σε νέα μέθοδο παροχής κοινωνικής υπηρεσίας. Με τον τρόπο αυτόν ο όρος αναφέρεται στην διαδικασία. Επιπροσθέτως, όταν με τη λέξη «καινοτομία» υποδηλώνεται ένα νέο ή βελτιωμένο προϊόν, εξοπλισμός, η υπηρεσία που διαχέεται επιτυχώς στην αγορά, η έμφαση δίνεται στο αποτέλεσμα της διαδικασίας (εγχειρίδιο Frascati). Επομένως, η επανασύνδεση της επιχειρηματικότητας με την καινοτομία, η οποία υιοθετεί χαρακτηριστικά από το ευρύτερο πεδίο της δημιουργικότητας, δικαιολογεί την αναδιατύπωση της έννοιας του επιχειρείν το 2000 (Shane & Venkataraman, 2000), συμπεριλαμβάνοντας τόσο τα στοιχεία του οικονομικού περιβάλλοντος όσο και τα ατομικά χαρακτηριστικά των επιχειρηματιών (βλ. ενδ. Rauch & Frese, 2007)

Στην εκπαιδευτική διαδικασία όμως η έννοια περιλαμβάνει πρωτίστως τις διαδικασίες και τις τεχνικές που συμβάλλουν στην αποτελεσματικότερη διδασκαλία της επιχειρηματικότητας αλλά και στην καλλιέργεια δεξιοτήτων και ικανοτήτων (soft skills) που κρίνονται ως απαραίτητα εφόδια για την ανάπτυξη του επιχειρείν (OECD, 2009b). Επιπροσθέτως, το 2016, η Ευρωπαϊκή Επιτροπή δημοσίευσε το πλαίσιο της επιχειρηματικότητας ως ικανότητας (entrepreneurial competence), το οποίο είναι γνωστό με το αντίστοιχο ακρωνύμιο EntreComp72 (Bacigalupo et al., 2016).

Το EntreComp στοχεύει να εξηγήσει, από εκπαιδευτική σκοπιά, το αντικείμενο της εκπαίδευσης στην επιχειρηματικότητα, που είναι η ικανότητα στο επιχειρείν, και τις μαθησιακές προσδοκίες για τους εκπαιδευομένους από πλευράς τόσο των εκπαιδευτικών, όσο και των εκπαιδευτικών οργανισμών

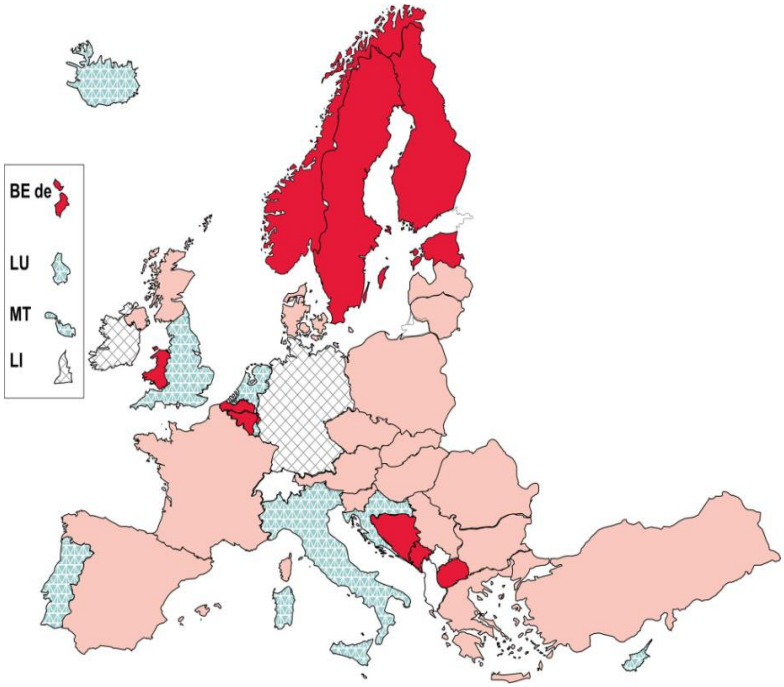
Η ΕΛΛΗΝΙΚΗ ΠΡΑΓΜΑΤΙΚΟΤΗΤΑ ΣΤΗΝ ΕΚΠΑΙΔΕΥΣΗ

Στην Πρωτοβάθμια εκπαίδευση υπήρχαν σκέψεις και ιδέες πριν την εφαρμογή και ανάπτυξη των εργαστηρίων δεξιοτήτων αλλά σε αρκετά πρώιμο στάδιο, ειδικά σε ό,τι αφορά την εξέλιξη στην χώρα μας, με αποτέλεσμα να παραμείνει ατελέσφορη η όλη διαδικασία και προσέγγιση. Το Λύκειο στην σύγχρονη ελληνική πραγματικότητα βρίσκεται σε μια δυναμική διαδικασία αλλαγής που δεν έχει ολοκληρωθεί ακόμα με επιτυχία. Το Νέο Τεχνολογικό Λύκειο σαν θεσμός προς υλοποίηση, πάγωσε τις όποιες διαδικασίες του πριν καν ακόμα ξεκινήσει η διαδικασία εφαρμογής του. Το Ενιαίο Λύκειο έχει σαφώς σαν κύριο στόχο την παροχή μαθημάτων γενικής παιδείας και προετοιμασίας για την ένταξη των αποφοίτων του στην τριτοβάθμια εκπαίδευση. Το Επαγγελματικό Λύκειο παρέχει εξειδίκευση και επαγγελματική εκπαίδευση, προετοιμάζοντας τους αποφοίτους του για να ενταχθούν ομαλά στην αγορά εργασίας, εφοδιασμένοι με τα κατάλληλα προσόντα, γνώσεις και δεξιότητες που απαιτούνται για να ανταποκριθούν στις απαιτήσεις και ανάγκες της αγοράς εργασίας. Στο Ενιαίο Λύκειο τα οικονομικά μαθήματα εντάχθηκαν το 1999 στα πλαίσια μιας γενικότερης τάσης και ευρωπαϊκής διάστασης που επιδιώχθηκε στην ελληνική Δευτεροβάθμια εκπαίδευση με βάση το ψήφισμα του Συμβουλίου της Ευρώπης για μια «Ευρωπαϊκή διάσταση στην εκπαίδευση».

Στην Τριτοβάθμια εκπαίδευση την τελευταία σχεδόν δεκαετία πραγματοποιείται μια συστηματική προσπάθεια από τα ελληνικά πανεπιστημιακά ιδρύματα για αναπροσαρμογή του προγράμματος σπουδών τους με παράλληλη ένταξη δομών, δράσεων και μαθημάτων προσανατολισμένες στο επιχειρείν, κυρίως από οικονομικές σχολές και όχι μόνο. Καινοτόμες δράσεις διδασκαλίας και δομές αναπτύσσονται και δραστηριοποιούνται τα τελευταία χρόνια με απώτερο στόχο την ομαλή μετάβαση των νέων στην αγορά εργασίας και την ενίσχυση του επιχειρηματικού κλίματος.

Η επιχειρηματικότητα στην Πρωτοβάθμια εκπαίδευση με βάση τα εργαστήρια δεξιοτήτων εστιάζει επίσης στην παροχή όλων των απαραίτητων εργαλείων, δεξιοτήτων και ικανοτήτων στους φοιτητές του πανεπιστημίου, οι οποίοι ως μελλοντικοί εκπαιδευτικοί θα έχουν την ευθύνη να καλλιεργήσουν την ιδέα της επιχειρηματικότητας στους μαθητές του δημοτικού σχολείου. Στόχος των εργαστηρίων δεξιοτήτων είναι η ανάδειξη του ρόλου της καινοτομίας στην εκπαιδευτική διαδικασία, στην διδασκαλία του μαθήματος της επιχειρηματικότητας μέσω καινοτόμων διδακτικών μεθόδων (μοντέλα προσομοίωσης και επιχειρηματικά παιχνίδια, μελέτες περιπτώσεων, εικονικές επιχειρήσεις, έρευνες αγοράς, επιχειρηματικά σχέδια), τόσο σε επίπεδο σχολείου όσο και σε ακαδημαϊκό επίπεδο. Η συμβολή της επιχειρηματικότητας στη διαμόρφωση επιχειρηματικών δεξιοτήτων και προσόντων μαθητών και φοιτητών έχει ως αποτέλεσμα την ενδυνάμωση της επιχειρηματικής εκπαίδευσης, της ενίσχυσης της ανταγωνιστικότητας και την διάχυση του αποτελέσματος στην τοπική κοινωνία, καθώς δημιουργεί προστιθέμενη αξία για το κοινωνικό σύνολο, τη σύνδεση της εκπαίδευσης, ειδικότερα της Τριτοβάθμιας, με την καινοτομία και την ανταγωνιστικότητα στην αγορά εργασίας. Ο ρόλος των τεχνολογικών πάρκων, των ΜΚΕ, των θερμοκοιτίδων και των business clusters στην διάχυση και εφαρμογή της καινοτομίας στο επιχειρείν είναι άξιος αναφοράς σε όλο το πλαίσιο ανάπτυξης.

ΚΑΛΕΣ ΠΡΑΚΤΙΚΕΣ ΓΙΑ ΤΟ ΕΠΙΧΕΙΡΕΙΝ ΣΤΗΝ ΕΚΠΑΙΔΕΥΣΗ:



Το παράδειγμα της Ουαλίας

Το 2014/15, 29 από τις 38 χώρες/περιφέρειες που συμμετείχαν στην έρευνα για το Επιχειρείν, έχουν είτε ειδικές είτε ευρύτερες στρατηγικές που περιλαμβάνουν ειδικές συνδέσεις με την Εκπαίδευση στο Επιχειρείν. Πέρα από τις 11 χώρες/περιφέρειες που διαθέτουν ειδική στρατηγική, υπάρχουν 18 με μια ευρύτερη στρατηγική που σχετίζεται με την Εκπαίδευση στο Επιχειρείν. Συναφείς εθνικές στρατηγικές δεν υπάρχουν σε εννέα χώρες/περιφέρειες [Κροατία, Ιταλία, Κύπρος, Λουξεμβούργο, Κάτω Χώρες, Μάλτα, Πορτογαλία, Ηνωμένο Βασίλειο (Αγγλία) και Ισλανδία]. Η Κύπρος δεν έχει καμία υφιστάμενη στρατηγική, αλλά έχει μια ειδική στρατηγική για την ανάπτυξη, ενώ η Σλοβενία έχει ήδη μια ευρύτερη στρατηγική που συνδέεται με την Εκπαίδευση στο Επιχειρείν και επί του παρόντος αναπτύσσει μια ειδική στρατηγική (Ευριδίκη, 2016). Οι έρευνες δείχνουν ότι η εκπαίδευση στην επιχειρηματικότητα στην Ευρώπη ακολούθησε ανάλογη πορεία διάδοσης με αυτήν των ΗΠΑ μετά τη δεκαετία του 2000. Αντίθετα όμως με την πρώτη, στην Ευρώπη ακολουθούνται σε μεγάλο βαθμό οι οδηγίες της Ευρωπαϊκής Επιτροπής. Στο Ηνωμένο Βασίλειο, η εκπαίδευση αυτή διαδόθηκε μαζικά στα τριτοβάθμια ιδρύματα και ίσως νωρίτερα από την υπόλοιπη Ευρώπη, (NCEE, https://ncee.org.uk/).

Ιδιαίτερη έμφαση πρέπει να δοθεί και να αποτελέσει καλή πρακτική προς υιοθέτηση η στρατηγική του Ηνωμένου Βασιλείου (Ουαλία) που συνδέει επίσης το έργο αυτό με την πολιτική για την αποτελεσματικότητα του σχολείου και την επαγγελματική σταδιοδρομία. Η Ουαλία έχει δώσει έμφαση στην ενσωμάτωση της επιχειρηματικότητας στην εκπαίδευση, με στόχο την ανάπτυξη δεξιοτήτων και στάσεων που προωθούν την καινοτομία και την επιχειρηματική δράση στους μαθητές. Αυτό περιλαμβάνει την εισαγωγή προγραμμάτων επιχειρηματικότητας σε όλα τα επίπεδα

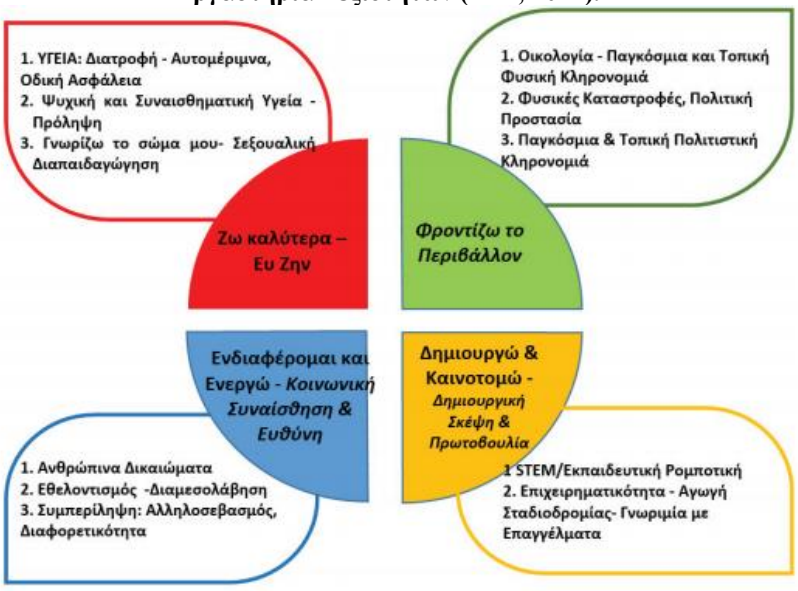
εκπαίδευσης, την ενθάρρυνση της συνεργασίας μεταξύ εκπαιδευτικών ιδρυμάτων και επιχειρήσεων, και την παροχή ευκαιριών για πρακτική εμπειρία και ανάπτυξη δεξιοτήτων. Πράγματι, η Ουαλία περιλαμβάνει λεπτομερή χάρτη της πολιτικής που υποδεικνύει πώς η στρατηγική της Εκπαίδευσης στο Επιχειρείν είναι μια γέφυρα μεταξύ του κόσμου της εκπαίδευσης, της νεολαίας, της απασχόλησης, της ένταξης και των πολιτικών ανταγωνιστικότητας. Στον παρακάτω πίνακα παρουσιάζονται στοιχεία για την υιοθέτηση της επιχειρηματικής εκπαίδευσης μέσω χρωματικών χαρτών ανά χώρα, με δεδομένα που συνδυάζουν ψηφιακή, πράσινη και ανθεκτική στρατηγική σε ευρωπαϊκό επίπεδο. (NCEE, https://ncee.org.uk/).

Εικόνα 1
Κατάταξη της επιχειρηματικής εκπαίδευσης στην Ευρώπη (EISMEA, 2021)

Η Περίπτωση των Εργαστηρίων Δεξιοτήτων στο Δημοτικό Σχολείο

Η εισαγωγή των Εργαστηρίων Δεξιοτήτων στο ελληνικό εκπαιδευτικό σύστημα αποτελεί μια από τις πλέον πρόσφατες καινοτομίες του Ινστιτούτου Εκπαιδευτικής Πολιτικής (Ι.Ε.Π.), στο πλαίσιο της προσπάθειας ενίσχυσης της ολιστικής ανάπτυξης των μαθητών και της ευθυγράμμισης της εκπαίδευσης με τις απαιτήσεις της κοινωνίας της γνώσης και της ψηφιακής διακυβέρνησης. Από το σχολικό έτος 2022-2023, τα Εργαστήρια Δεξιοτήτων ενσωματώθηκαν οργανικά στο εβδομαδιαίο ωρολόγιο πρόγραμμα των δημοτικών σχολείων, προωθώντας ένα μοντέλο μάθησης βασισμένο στην ενεργητική συμμετοχή, την καινοτομία και την ανάπτυξη βασικών κοινωνικών και γνωστικών δεξιοτήτων (ΙΕΠ, 2022). Ένας από τους βασικούς θεματικούς άξονες των Εργαστηρίων είναι το πεδίο «Δημιουργώ και Καινοτομώ – Δημιουργική Σκέψη και Πρωτοβουλία», το οποίο περιλαμβάνει την ενότητα «Επιχειρηματικότητα – Αγωγή Σταδιοδρομίας – Γνωριμία με τα Επαγγέλματα». Ο εν λόγω άξονας επιδιώκει να ενισχύσει στους μαθητές δεξιότητες όπως η ανάληψη πρωτοβουλίας, ο σχεδιασμός δράσεων, η ικανότητα λήψης αποφάσεων, η συνεργασία και η υπευθυνότητα, καθώς και η καλλιέργεια της δημιουργικής σκέψης ως θεμελίου της καινοτομίας (ΙΕΠ, 2023).

Η προσέγγιση της επιχειρηματικότητας στο δημοτικό σχολείο δεν ταυτίζεται με την οικονομική εκπαίδευση με τη στενή έννοια, αλλά προσανατολίζεται προς την ανάπτυξη της επιχειρηματικής σκέψης, της προσαρμοστικότητας και της επίλυσης προβλημάτων. Μέσα από οργανωμένες διδακτικές πρακτικές, οι μαθητές συμμετέχουν σε ομαδοσυνεργατικά σενάρια μάθησης, αναλαμβάνουν ρόλους και σχεδιάζουν μικρής κλίμακας σχέδια δράσης (projects) που έχουν αρχή, μέση και τέλος. Παραδείγματα τέτοιων δραστηριοτήτων περιλαμβάνουν τη δημιουργία εικονικών προϊόντων ή υπηρεσιών, τη μελέτη επαγγελμάτων της τοπικής κοινότητας, καθώς και δράσεις με κοινωνικό προσανατολισμό (elearning.iep.edu.gr, 2023). Η παιδαγωγική μεθοδολογία που προτείνεται από το ΙΕΠ βασίζεται σε αρχές της βιωματικής μάθησης, της διαφοροποιημένης διδασκαλίας και της ενσωμάτωσης ψηφιακών εργαλείων, ενώ ιδιαίτερη έμφαση δίνεται στον αναστοχασμό και στην ενεργή εμπλοκή των μαθητών. Τα Εργαστήρια Δεξιοτήτων, ως καινοτόμος θεσμός, υποστηρίζονται από ψηφιακή πλατφόρμα (https://elearning.iep.edu.gr), η οποία περιέχει εγκεκριμένα εκπαιδευτικά σενάρια, προτεινόμενα φύλλα εργασίας και υποστηρικτικό υλικό για εκπαιδευτικούς.



Παράλληλα με την εφαρμογή των εργαστηρίων, από το 2022 υλοποιήθηκαν επτά διαδοχικές επιμορφωτικές περίοδοι για τους εκπαιδευτικούς, μέσω εξ αποστάσεως σύγχρονης και ασύγχρονης μάθησης. Η συμμετοχή υπήρξε μαζική, με πάνω από 87.000 εκπαιδευτικούς να έχουν εγγραφεί και περισσότεροι από 71.000 να έχουν ολοκληρώσει επιτυχώς το πρόγραμμα έως τις αρχές του 2023 (Υπουργείο Παιδείας, 2023). Η επιμόρφωση εστίασε τόσο στις θεωρητικές διαστάσεις των δεξιοτήτων του 21ου αιώνα όσο και σε πρακτικές εφαρμογές στο σχολικό περιβάλλον.

Ωστόσο, η εκπαιδευτική κοινότητα έχει εκφράσει προβληματισμούς σχετικά με την εφαρμογή των Εργαστηρίων. Σύμφωνα με μεταπτυχιακή έρευνα της Πραδάκη (Pradaki, 2022), οι εκπαιδευτικοί αποδέχονται τη σημασία του νέου θεσμού, ωστόσο επισημαίνουν την ανάγκη για περισσότερο ευέλικτο και εξατομικευμένο υλικό, ενώ υπογραμμίζουν τον αυξημένο διοικητικό και διδακτικό φόρτο που προκαλεί η προετοιμασία των εργαστηρίων. Παράλληλα, διαπιστώνεται άνιση κατανομή των ψηφιακών και παιδαγωγικών πόρων μεταξύ των σχολικών μονάδων, γεγονός που δημιουργεί προβλήματα στην ομοιόμορφη εφαρμογή του θεσμού.

Κριτική ανάλυση του υλικού του ΙΕΠ από πανεπιστημιακές μελέτες έχει αναδείξει την ανάγκη ευρύτερης παιδαγωγικής ευελιξίας και ελευθερίας στη διαμόρφωση του διδακτικού πλαισίου. Ο Καραγιάννης (Karagiannis, 2023) επισημαίνει ότι η επιχειρηματικότητα δεν μπορεί να περιορίζεται σε προκαθορισμένες δραστηριότητες, αλλά απαιτεί ανοιχτό, δημιουργικό και παιγνιώδες περιβάλλον μάθησης που ανταποκρίνεται στις ανάγκες των ίδιων των μαθητών και του τοπικού κοινωνικού πλαισίου.

Συνοψίζοντας, τα Εργαστήρια Δεξιοτήτων συνιστούν μια σύγχρονη εκπαιδευτική πρωτοβουλία με στόχο τη συστηματική ανάπτυξη κρίσιμων δεξιοτήτων και την εισαγωγή της επιχειρηματικής λογικής στην πρωτοβάθμια εκπαίδευση. Παρά τις προκλήσεις που αφορούν την εφαρμογή τους, η εμπειρία έως τώρα δείχνει ότι οι μαθητές αποκτούν δεξιότητες αυτόνομης δράσης, καινοτομίας και συνεργασίας. Η σύνδεση των εργαστηρίων με τις απαιτήσεις της ψηφιακής διακυβέρνησης ενισχύει τη σημασία τους στο πλαίσιο της διαρκώς μεταβαλλόμενης κοινωνικής και οικονομικής πραγματικότητας. Η συνέχιση του θεσμού, σε συνδυασμό με ουσιαστική ανατροφοδότηση και συνεχή επιμόρφωση των εκπαιδευτικών, αποτελεί κρίσιμο παράγοντα για τη βιωσιμότητα και την αποτελεσματικότητά του. Στην παρακάτω εικόνα εμπεριέχεται ο διαχωρισμός σε τέσσερις θεματικούς άξονες —**Ζω καλύτερα – Ευ Ζην**, **Φροντίζω το Περιβάλλον**, **Ενδιαφέρομαι και Ενεργώ**, **Δημιουργώ & Καινοτομώ**— και αποτυπώνονται οι επίσημοι θεματικοί κύκλοι των Εργαστηρίων Δεξιοτήτων του Ινστιτούτου Εκπαιδευτικής Πολιτικής (ΙΕΠ). Το σχήμα απεικονίζει τους τέσσερις κύριους άξονες και τις αντίστοιχες υποενότητες για κάθε θεματική ενότητα, όπως αναφέρονται στην επίσημη υλοποίηση των Εργαστηρίων Δεξιοτήτων (Ινστιτούτο Εκπαιδευτικής Πολιτικής). Ανήκει σε επίσημο υλικό του ΙΕΠ, το οποίο παρουσιάζει κατάλογο και περιγραφή των τεσσάρων κύριων θεματικών ενοτήτων των Εργαστηρίων Δεξιοτήτων (Ζω καλύτερα – Ευ Ζην, Φροντίζω το Περιβάλλον, Ενδιαφέρομαι και Ενεργώ, Δημιουργώ & Καινοτομώ) (Ινστιτούτο Εκπαιδευτικής Πολιτικής, ojs.lib.uom.gr).

Βιωσιμότητα και Εκπαίδευση-Συμπεράσματα

Η έννοια της βιωσιμότητας στην επιχειρηματικότητα, όταν προσεγγίζεται μέσα από το εκπαιδευτικό πρίσμα, αποκτά σύνθετη παιδαγωγική, κοινωνική και τεχνολογική διάσταση. Η εκπαιδευτική επιχειρηματικότητα δεν αφορά απλώς στην ανάπτυξη οικονομικών δεξιοτήτων, αλλά συνδέεται με την καλλιέργεια αξιών, στάσεων και νοοτροπιών που διαμορφώνουν υπεύθυνους, καινοτόμους και κοινωνικά συνειδητοποιημένους πολίτες. Η βιωσιμότητα, με βάση τον τριπλό πυλώνα περιβάλλοντος, κοινωνίας και διακυβέρνησης (ESG), ενσωματώνεται στην εκπαίδευση με στόχο τη δημιουργία ενός νέου μοντέλου μάθησης που συνδέει τη δημιουργικότητα, την κοινωνική ευθύνη και τη χρήση της τεχνολογίας για το κοινό καλό.

Η ψηφιακή διακυβέρνηση λειτουργεί ως επιταχυντής αυτής της διαδικασίας. Η ανάπτυξη ολοκληρωμένων ψηφιακών υποδομών και η διασύνδεση των δημόσιων υπηρεσιών με την εκπαιδευτική κοινότητα επιτρέπουν την υλοποίηση και διάχυση δράσεων επιχειρηματικού χαρακτήρα, με τρόπο διαφανή, ασφαλή και προσβάσιμο. Το παράδειγμα της Ελλάδας, μέσω της στρατηγικής «Ψηφιακή Βίβλος 2021–2025», αποτυπώνει την πρόθεση μετασχηματισμού του δημόσιου τομέα σε διαλειτουργικό και καινοτόμο σύστημα που ενισχύει τη συμμετοχική κουλτούρα (Υπουργείο Ψηφιακής Διακυβέρνησης, 2022).

Σε αυτό το πλαίσιο, η βιώσιμη επιχειρηματικότητα στην εκπαίδευση δεν αναφέρεται μόνο στη διατήρηση ενός εγχειρήματος στο χρόνο, αλλά και στην ικανότητα του σχολείου να προσαρμόζεται, να ενσωματώνει σύγχρονα ψηφιακά εργαλεία, να ευαισθητοποιεί περιβαλλοντικά και να δημιουργεί κοινωνικό κεφάλαιο. Έρευνες δείχνουν ότι η ενίσχυση της ψηφιακής ωριμότητας στις σχολικές μονάδες συνδέεται με υψηλότερα επίπεδα συνεργασίας, καινοτομίας και συμμετοχής σε κοινοτικές δράσεις με αναπτυξιακό πρόσημο (Iosifidis, 2023). Ειδικά στο πλαίσιο της πρωτοβάθμιας και δευτεροβάθμιας εκπαίδευσης, η διασύνδεση της μαθησιακής εμπειρίας με έννοιες όπως η κοινωνική επιχειρηματικότητα, η κυκλική οικονομία και η περιβαλλοντική καινοτομία διευρύνει τη νοηματοδότηση της επιχειρηματικής δράσης, απομακρύνοντάς την από τη στενή εμπορική λογική.

Η επιτυχής και βιώσιμη ενσωμάτωση της επιχειρηματικότητας στην εκπαίδευση απαιτεί συγκεκριμένες προϋποθέσεις: επιμορφωμένο και ενδυναμωμένο εκπαιδευτικό προσωπικό, ανοιχτή παιδαγωγική κουλτούρα, ψηφιακά υποστηριζόμενο περιβάλλον μάθησης και θεσμική αναγνώριση της δημιουργικής πρωτοβουλίας. Ο ρόλος του κράτους, μέσω της ψηφιακής διακυβέρνησης, είναι κρίσιμος στην παροχή εργαλείων, κινήτρων και δομών για την ενίσχυση αυτών των προϋποθέσεων. Η ενσωμάτωση εργαλείων συμμετοχικού σχεδιασμού, ανοιχτών δεδομένων και διαλειτουργικών εκπαιδευτικών πλατφορμών ενισχύει την εκπαιδευτική καινοτομία και επιτρέπει στους μαθητές να ασκηθούν σε ρεαλιστικά περιβάλλοντα λήψης αποφάσεων (OECD, 2023).

Η βιωσιμότητα στην εκπαιδευτική επιχειρηματικότητα προϋποθέτει επίσης τη διαρκή ανατροφοδότηση και αξιολόγηση. Σύμφωνα με σύγχρονες προσεγγίσεις, η επιχειρηματικότητα δεν είναι μόνο περιεχόμενο μάθησης αλλά και μέθοδος, ένα "πλαίσιο σκέψης" που ενδυναμώνει τη μαθησιακή αυτονομία, την καινοτομία και τη συνεργατική πρακτική (Kirkwood et al., 2022). Έτσι, η εκπαιδευτική επιχειρηματικότητα μπορεί να συμβάλει ουσιαστικά στην κοινωνική συνοχή, την οικολογική συνείδηση και την οικονομική αυτονομία, όταν εντάσσεται σε ένα ψηφιακά ενισχυμένο και παιδαγωγικά ευέλικτο περιβάλλον.

Συνοψίζοντας, η βιωσιμότητα της επιχειρηματικότητας στην εκπαίδευση δεν είναι αποτέλεσμα στατικής εφαρμογής ενός προγράμματος, αλλά προϊόν διαρκούς εξέλιξης, διαλόγου και προσαρμογής. Η ψηφιακή διακυβέρνηση, με τα εργαλεία και τις πολιτικές που προσφέρει, μπορεί να λειτουργήσει καταλυτικά στη διαμόρφωση ενός εκπαιδευτικού οικοσυστήματος που προάγει την υπευθυνότητα, την καινοτομία και τη συμμετοχική μάθηση. Μέσα σε αυτό το πλαίσιο, η εκπαιδευτική επιχειρηματικότητα αποκτά βιώσιμο χαρακτήρα, ως πράξη διαρκούς ενδυνάμωσης της σχολικής κοινότητας και κοινωνικής εμπλοκής των νέων πολιτών του ψηφιακού κόσμου.

Επομένως, η επιχειρηματικότητα μπορεί να ενσωματωθεί στη βιωσιμότητα μέσω της ανάπτυξης "υπεύθυνων επιχειρηματικών δεξιοτήτων" που εστιάζουν όχι μόνο στη δημιουργία οικονομικής αξίας, αλλά και στην επίλυση κοινωνικών και περιβαλλοντικών προβλημάτων, εντός ενός παιδαγωγικού πλαισίου που καλλιεργεί την καινοτομία, την κοινωνική συνείδηση και την περιβαλλοντική ευαισθησία.

Αυτό μπορεί να υλοποιηθεί:

- -με την ένταξη της κοινωνικής και περιβαλλοντικής επιχειρηματικότητας στα σχολικά προγράμματα,
- -με τη χρήση σεναρίων μάθησης που αφορούν στην επίλυση προβλήματος, όπως για παράδειγμα πώς να μειώσουμε τα απορρίμματα στο σχολείο μέσω μιας "μαθητικής startup",
- -και με την αξιοποίηση ψηφιακών εργαλείων για την παρακολούθηση του κοινωνικού και περιβαλλοντικού αντίκτυπου των δράσεων των μαθητών.

Συνεπώς, η επιχειρηματικότητα δύναται να λειτουργήσει ως μέσο και όχι ως σκοπός: ως όχημα για να αναπτύξουν οι μαθητές δεξιότητες που είναι απαραίτητες για έναν κόσμο που αλλάζει, με κριτήριο όχι μόνο την αποδοτικότητα, αλλά και τη βιωσιμότητα.

Η ΠΡΑΣΙΝΗ, ΨΗΦΙΑΚΗ ΓΕΙΤΟΝΙΑ ΤΟΥ ΝΗΠΙΑΓΩΓΕΙΟΥ

Τσιγγερλιώτη Άννα
Νηπιαγωγός
Med στη «Διδακτική των Μαθηματικών» του Πανεπιστημίου Δυτικής Μακεδονίας
33ο Νηπιαγωγείο Ευόσμου
e-mail: atsiggerlioti@gmail.com

ΠΕΡΙΛΗΨΗ

Η παρούσα εργασία αφορά την συμμετοχή του 33ου Νηπιαγωγείου Ευόσμου στο Εκπαιδευτικό Πρόγραμμα ηλεκτρονικής μάθησης «Πράσινες γειτονιές» το οποίο υλοποιήθηκε από τη Διεύθυνση Πρωτοβάθμιας Εκπαίδευσης Δυτικής Θεσσαλονίκης, δια της Υπευθύνου Περιβαλλοντικής Εκπαίδευσης σε συνεργασία με το NOUS, Ινστιτούτο Ψηφιακής Μάθησης και Επικοινωνίας. Σκοπός του εκπαιδευτικού προγράμματος είναι η ευαισθητοποίηση των μαθητών/τριών σε θέματα που αφορούν στην ανάγκη διατήρησης και προστασίας του πράσινου στο άμεσο περιβάλλον τους, τη γειτονιά τους και η ανάπτυξη της συμμετοχής σε ενέργειες, που αποσκοπούν στη βελτίωση του περιβάλλοντος και την αναβάθμιση της ποιότητας ζωής τους. Παρουσιάζονται τα βήματα που ακολουθήθηκαν για την υλοποίηση του προγράμματος αξιοποιώντας ψηφιακά εργαλεία όπως το Google earth και το Google Lens, για την δημιουργία ενός ψηφιακού συνεργατικού χάρτη όπου απεικονίζεται από τους μαθητές/τριες η γειτονιά του σχολείου όπως θα ήθελαν να είναι αναφορικά με το πράσινο. Οι μαθητές/τριες μέσω της διερευνητικής μάθησης και της συμμετοχής σε παιγνιώδες δραστηριότητες ενθαρρύνονται να αναπτύξουν πρωτοβουλία, υπευθυνότητα και δράση για το περιβάλλον του σχολείου. Έχοντας συλλέξει τεκμήρια από την μελέτη στο πεδίο, τα παιδιά ευαισθητοποιούνται και λαμβάνουν αποφάσεις για τις ευρύτερες συνθήκες στην γειτονιά τους.

Δίνεται έμφαση στις δυνατότητες που μπορεί να παρέχει το ψηφιακό μέσο για τον εμπλουτισμό της μαθησιακής εμπειρίας, της επικοινωνίας μεταξύ των μαθητών/τριών ενώ παράλληλα διατυπώνεται η ανάγκη για μια κριτική τοποθέτηση απέναντι στα χαρακτηριστικά της αξιοποίησής του. Τα παιδιά εξοικειώνονται με την χρήση ψηφιακών εργαλείων και μέσων, επικοινωνούν τις ιδέες του με άλλα σχολεία και μοιράζονται πραγματικές εμπειρίες. Παράλληλα προάγεται η μαθησιακή εμπειρία και υποστηρίζεται η ολόπλευρη ανάπτυξη των παιδιών καθώς παρέχονται ευκαιρίες ώστε να αναπτύξουν ψηφιακές δεξιότητες και στάσεις για την χρήση της τεχνολογίας.

Το πρόγραμμα υλοποιήθηκε στο πλαίσιο μετασχηματισμού του νηπιαγωγείου σε αειφόρο σχολείο, υιοθετώντας μια ολιστική προσέγγιση σε πρακτικές σύμφωνες με τις αξίες της αειφορίας σε παιδαγωγικό, κοινωνικό και περιβαλλοντικό πεδίο.

Λέξεις – κλειδιά: ψηφιακός χάρτης, αειφόρο σχολείο, νηπιαγωγείο

ΕΙΣΑΓΩΓΗ

Η σύγχρονη προσχολική εκπαίδευση βιώνει μια σημαντική μεταβολή με την ενσωμάτωση των Νέων Τεχνολογιών και των ΤΠΕ (Τεχνολογίες Πληροφορίας και Επικοινωνίας), οι οποίες λειτουργούν ως εργαλεία για τη διεύρυνση των μαθησιακών εμπειριών και την ανάπτυξη δεξιοτήτων του 21ου αιώνα καθώς ενισχύουν τη δημιουργικότητα και την αυτονομία του παιδιού. (Prensky, 2001; Papert, 2020). Οι ΤΠΕ δεν περιορίζονται στην απλή παρουσίαση πληροφοριών· αντίθετα, παρέχουν εφαρμογές που ενσωματώνουν στρατηγικές όπως ανατροφοδότηση και διαφοροποιημένη διδασκαλία και ενισχύουν τη διερευνητική μάθηση, τη δημιουργικότητα, την ανάπτυξη ψηφιακού γραμματισμού και την συνεργασία μεταξύ των παιδιών (Papadakis & Kalogiannakis, 2019). Στο πλαίσιο αυτό, η προσχολική ηλικία αναδεικνύεται ως κρίσιμη περίοδος, κατά την οποία η αξιοποίηση ψηφιακών εργαλείων μπορεί να συμβάλλει στη διαμόρφωση θετικών στάσεων απέναντι στη μάθηση και το περιβάλλον, ενώ παράλληλα ενισχύει την κοινωνικο-συναισθηματική και γνωστική ανάπτυξη των παιδιών.

Σύμφωνα με τον Piaget (1972), η γνωστική ανάπτυξη των παιδιών πραγματοποιείται μέσα από συγκεκριμένα στάδια και μηχανισμούς ανάπτυξης τονίζοντας την ανάγκη για κατάλληλα σχεδιασμένα μαθησιακά περιβάλλοντα που σέβονται το αναπτυξιακό στάδιο κάθε παιδιού, επομένως η τεχνολογία, όταν χρησιμοποιείται σωστά, μπορεί να ενισχύσει τη μάθηση, τη λογική σκέψη και τη δημιουργικότητα των παιδιών, ενώ η υπερβολική χρήση της μπορεί να περιορίσει την κοινωνική αλληλεπίδραση και τη σωματική δραστηριότητα. Η θεωρία του Vygotsky (1978) τονίζει τη σημασία της κοινωνικής αλληλεπίδρασης και της καθοδήγησης από ενήλικες και πιο ικανούς συνομηλίκους στη ζώνη επικείμενης ανάπτυξης (ZEA) για την μάθηση και την ανάπτυξη δεξιοτήτων. Σύμφωνα λοιπόν με την θεωρία του η τεχνολογία μπορεί να λειτουργήσει ως κοινωνικό και παιδαγωγικό εργαλείο που ενισχύει τη μάθηση μέσα από καθοδήγηση και συνεργασία. Μέσω διαδραστικών εφαρμογών, πλατφορμών μάθησης και συνεργατικών ψηφιακών δραστηριοτήτων, τα παιδιά μπορούν να αποκτήσουν δεξιότητες που διαφορετικά θα ήταν δύσκολο να αναπτύξουν μόνα τους, ενώ η σωστή χρήση της τεχνολογίας ενισχύει την κοινωνική αλληλεπίδραση και τη γνωστική ανάπτυξη. Η προσέγγιση του Dewey (1986) για τη βιωματική μάθηση αναδεικνύει τη σημασία της εμπλοκής των παιδιών σε αυθεντικές δραστηριότητες που συνδέονται με την καθημερινή ζωή και όπως ο ίδιος προτείνει, η τεχνολογία μπορεί να υποστηρίξει τη μάθηση μέσω εμπειρίας, παρέχοντας διαδραστικά εργαλεία και πλατφόρμες που ενισχύουν την ενεργή συμμετοχή, τη συνεργασία και την εφαρμογή της γνώσης στην πράξη

Σε αυτό το πλαίσιο, οι νέες τεχνολογίες περιλαμβάνοντας εργαλεία όπως ψηφιακούς χάρτες, Google Earth, και εφαρμογές όπως το Google Lens, τα οποία χρησιμοποιήθηκαν στο πρόγραμμα, επιτρέπουν στα νήπια να διερευνούν το φυσικό και κοινωνικό περιβάλλον της γειτονιάς τους και να αναζητούν σχετικές πληροφορίες. Οι πρακτικές αυτές προάγουν την περιβαλλοντική ευαισθησία, ενισχύουν την βιώσιμη εκπαίδευση και την πρόσβαση σε περιβαλλοντικές πληροφορίες και προάγουν την κοινωνική υπευθυνότητα, σύμφωνα με τις αρχές της Εκπαίδευσης για την Αειφόρο Ανάπτυξη (ESD) (UNESCO, 2017; Sterling, 2010).

Η μαθηματική εκπαίδευση στην προσχολική ηλικία αποτελεί επίσης σημαντικό πεδίο στην διαδικασία ανάπτυξης των παιδιών καθώς τα νήπια μέσα από δραστηριότητες προσέγγισης των εννοιών του χώρου "*βοηθιούνται να βελτιώσουν την χωρική τους αντίληψη, να εισαχθούν στην αριθμητική και γεωμετρική σκέψη, να αναπτύξουν την έννοια της κανονικότητας και να βελτιώσουν την σημειωτική τους δραστηριότητα."* (Tzekaki, 2010). Η ενσωμάτωση ψηφιακών εργαλείων στις δραστηριότητες αυτές δίνει στα παιδιά τη δυνατότητα να παρατηρούν, να καταγράφουν και να αναλύουν δεδομένα με δημιουργικό και διαδραστικό τρόπο. Παράλληλα να κατανοούν, να αναπαριστούν και να επεξεργάζονται θέσεις και διαδρομές, και να εξοικειωθούν με τους χάρτες χρησιμοποιώντας λεκτικές περιγραφές ή σχεδιάζοντας καταστάσεις από μνήμης

Διεθνείς έρευνες αναδεικνύουν τη χρήση των ψηφιακών μέσων στην προσχολική εκπαίδευση καθώς φαίνεται να ενισχύει σημαντικά την ενεργό συμμετοχή και την ανάπτυξη των κοινωνικών δεξιοτήτων Τα ευρήματα της μελέτης των (Marsh et al, 2018) δείχνουν ότι οι ψηφιακές εφαρμογές μπορούν να υποστηρίξουν το παιχνίδι και τη δημιουργικότητα των παιδιών προσχολικής ηλικίας, αρκεί να είναι κατάλληλα σχεδιασμένες και να ενθαρρύνουν την ελεύθερη εξερεύνηση. Ειδικότερα, οι «ανοιχτού τύπου» εφαρμογές επιτρέπουν φαντασία και πειραματισμό ενισχύουν τη δημιουργικότητα, ενώ οι πιο «κλειστού τύπου» καθώς προσφέρουν καθοδηγούμενη μάθηση. Παρόμοια η μελέτη των Kontovourki και Tafa (2019) υπογραμμίζει ότι η χρήση ψηφιακής αφήγησης (collaborative storytelling) ενθαρρύνει τα παιδιά να συμμετέχουν ενεργά στη δημιουργία ιστοριών, ενώ παράλληλα προάγει την επικοινωνία, τη συνεργασία και την αλληλοϋποστήριξη μεταξύ τους.

Η παρούσα εργασία επικεντρώνεται στην αξιοποίηση ψηφιακών εργαλείων στην προσχολική εκπαίδευση, με ιδιαίτερη έμφαση στον ρόλο τους στο πλαίσιο του αειφόρου σχολείου και συγκεκριμένα μέσα από την υλοποίηση του προγράμματος «Πράσινες Γειτονιές». Το πρόγραμμα αυτό, σε συνεργασία με την Υπεύθυνη Περιβαλλοντικής

Εκπαίδευσης Δυτικής Θεσσαλονίκης και το Ινστιτούτο Ψηφιακής Μάθησης και Επικοινωνίας NOUS, στοχεύει στην ανάπτυξη δεξιοτήτων που προάγουν τη βιωματική μάθηση, την κριτική σκέψη, τη συνεργασία και την περιβαλλοντική ευαισθησία των νηπίων. Μέσα από τη δημιουργία ψηφιακών χαρτών, τη χαρτογράφηση της γειτονιάς και τη χρήση εργαλείων επιστημονικής παρατήρησης, τα νήπια έχουν τη δυνατότητα να κατανοήσουν έννοιες όπως η συλλογική δράση, η υπευθυνότητα και η αειφορία.

Η προσέγγιση του Sterling (2010) για την αειφόρο εκπαίδευση δίνει έμφαση στη μετασχηματιστική μάθηση, όπου η αλλαγή του τρόπου σκέψης των μαθητώ/τριών οδηγεί σε ενεργούς και υπεύθυνους πολίτες. Αυτό συνδέεται με τη θεωρία της μάθησης μέσω εμπειρίας του Kolb (2014), η οποία υπογραμμίζει ότι η γνώση οικοδομείται μέσα από βιωματικές εμπειρίες, τον αναστοχασμό και την εφαρμογή. Παράλληλα, οι Voogt και Roblin (2012) αναδεικνύουν τις δεξιότητες του 21ου αιώνα (κριτική σκέψη, συνεργασία, δημιουργικότητα, ψηφιακός γραμματισμός), οι οποίες ευθυγραμμίζονται με τις αρχές της αειφορικής εκπαίδευσης και απαιτούν παιδαγωγικές πρακτικές που προωθούν συμμετοχή, συνεργασία και υπευθυνότητα. Η σύνθεση αυτών των προσεγγίσεων δείχνει ότι η αειφόρος εκπαίδευση δεν είναι απλώς γνωστική διαδικασία, αλλά βιωματική και κοινωνικά προσανατολισμένη μάθηση, απαραίτητη για την καλλιέργεια των δεξιοτήτων που απαιτεί η σύγχρονη εποχή.

Η εισαγωγή των νέων τεχνολογιών στο πλαίσιο του αειφόρου σχολείου δεν περιορίζεται μόνο στη γνωστική διάσταση. Η έννοια του αειφόρου σχολείου αναδεικνύει την ανάγκη για μια ολοκληρωμένη προσέγγιση που συνδυάζει παιδαγωγικές πρακτικές, περιβαλλοντική ευαισθησία, κοινωνική συμμετοχή και την καλλιέργεια αξιών υπευθυνότητας και συνεργασίας (Sterling, 2010; UNESCO, 2017) και όπως υποστηρίζουν οι Siraj-Blatchford, Smith, και Samuelsson, (2010) η εκπαίδευση για την αειφορία πρέπει να ξεκινά από την προσχολική ηλικία, μέσα από εμπειρίες που καλλιεργούν υπευθυνότητα, συνεργασία και φροντίδα για το περιβάλλον. Μέσα από τη χρήση ψηφιακών εργαλείων, τα νήπια έχουν την ευκαιρία να συνδεθούν με το περιβάλλον της γειτονιάς τους, να παρατηρήσουν, να καταγράψουν δεδομένα και να προτείνουν παρεμβάσεις για τη βελτίωση του φυσικού περιβάλλοντος, ενισχύοντας έτσι την ενεργό συμμετοχή τους στην κοινότητα. Άλλωστε, η Εκπαίδευση για την Αειφορία στην προσχολική ηλικία αποτελεί κρίσιμο πεδίο για τη διαμόρφωση οικολογικής συνείδησης και βιώσιμων στάσεων ζωής. Σύμφωνα μάλιστα με τη βιβλιογραφική επισκόπηση των Hedefalk, Almqvist και Östman (2015), η πρώιμη παιδική ηλικία είναι η καταλληλότερη περίοδος για την καλλιέργεια αξιών και συμπεριφορών που συνδέονται με την αειφόρο ανάπτυξη, ενώ η έρευνα παρέχει αποδείξεις για τα θετικά αποτελέσματα των κατάλληλα σχεδιασμένων εκπαιδευτικών προγραμμάτων. Ομοίως, η σύγχρονη μελέτη των Ärlemalm-Hagsér και Elliott (2017) παρουσιάζει πρακτικές εφαρμογές και καινοτόμες προσεγγίσεις, συνδέοντας τη θεωρία με την καθημερινή εκπαιδευτική πράξη σε διαφορετικά προσχολικά πλαίσια και αναδεικνύει τη σημασία της βιωματικής μάθησης για την ενίσχυση της περιβαλλοντικής συνείδησης.

Συνολικά, η εισαγωγή αυτή θέτει το θεωρητικό πλαίσιο για την αξιοποίηση των ΤΠΕ στην προσχολική εκπαίδευση, συνδέοντας τη γνωστική, κοινωνικο-συναισθηματική και δημιουργική διάσταση της μάθησης με τις αρχές της βιωματικής και διερευνητικής μάθησης, της μαθηματικής εκπαίδευσης και της αειφορίας. Στο επόμενο τμήμα της εργασίας θα αναλυθεί ο σκοπός του προγράμματος «Πράσινες Γειτονιές», τα επιδιωκόμενα μαθησιακά αποτελέσματα και οι δεξιότητες που προάγονται μέσω της ενσωμάτωσης ψηφιακών εργαλείων.

ΣΚΟΠΟΣ ΤΟΥ ΠΡΟΓΡΑΜΜΑΤΟΣ

Το πρόγραμμα «Πράσινες Γειτονιές» έχει ως βασικό στόχο την ενίσχυση της μαθησιακής εμπειρίας των νηπίων μέσα από τη βιωματική, διερευνητική και συνεργατική μάθηση, αξιοποιώντας ψηφιακά εργαλεία και προσεγγίσεις που συνδέονται με την Εκπαίδευση για την Αειφόρο Ανάπτυξη (ESD). Επίσης στοχεύει να ενσωματώσει τις αξίες της αειφορίας, της ενεργού συμμετοχής και της κοινωνικής υπευθυνότητας, όπως περιγράφεται στην Διευρυμένη Έκδοση του Προγράμματος Σπουδών (Ministry of Education, Research and Religious Affairs, 2024).

Συγκεκριμένα, το πρόγραμμα επιδιώκει:

1. Ενίσχυση δεξιοτήτων ψηφιακού γραμματισμού και κριτικής σκέψης: Τα νήπια χρησιμοποιούν ψηφιακά εργαλεία όπως Google Earth και Google Lens (εφαρμογές χαρτογράφησης, αναζήτησης, επεξεργασίας και παρουσίαση πληροφοριών). Μέσα από αυτές τις δραστηριότητες, τα παιδιά αναπτύσσουν ικανότητες ανάλυσης και επίλυσης προβλημάτων, συμβαδίζοντας με τις κατευθυντήριες γραμμές της UNESCO για την ESD, οι οποίες προάγουν την ανάπτυξη δεξιοτήτων όπως η κριτική σκέψη και η επίλυση προβλημάτων (UNESCO, 2017).

2. Καλλιέργεια οικολογικής συνείδησης και περιβαλλοντικής ευαισθησίας: Μέσα από δραστηριότητες παρατήρησης, χαρτογράφησης και σχεδιασμού παρεμβάσεων στο φυσικό περιβάλλον της γειτονιάς, τα παιδιά αναγνωρίζουν τις συνέπειες των ανθρώπινων δράσεων και μαθαίνουν να σέβονται τη φύση. Οι δραστηριότητες αυτές

συνδέονται άμεσα με τη βιωματική μάθηση (Dewey, 1986) και τονίζουν τη σημασία της ενεργού συμμετοχής των παιδιών σε δράσεις που προάγουν την αειφορία.

3. Ανάπτυξη συνεργατικών και κοινωνικών δεξιοτήτων: Οι ομαδικές δραστηριότητες ενισχύουν τη συνεργασία, την επικοινωνία και την υπευθυνότητα, προάγοντας την κοινωνική αλληλεπίδραση και την εμπλοκή σε συλλογικές αποφάσεις. Η προσέγγιση αυτή εναρμονίζεται με τις θεωρίες του Vygotsky (1978) για τη σημασία της κοινωνικής αλληλεπίδρασης στη μάθηση και της Ζώνης Επικείμενης Ανάπτυξης.

4. Εισαγωγή μαθηματικών και χωροταξικών εννοιών μέσω ψηφιακής χαρτογράφησης: Η δημιουργία ψηφιακών χαρτών και η χρήση εργαλείων όπως το Google Earth επιτρέπουν στα νήπια να αναπτύξουν δεξιότητες προσανατολισμού, να ακολουθήσουν διαδρομές, που θα τα βοηθήσουν στην κατανόηση του χάρτη (Tzekaki, 2010). Η μαθηματική αυτή δράση βελτιώνει την αναπαραστατική ικανότητα καθώς η ανάγνωση και η δημιουργία χάρτη αποτελούν μια σύνθετη και απαιτητική διαδικασία.

5. Σύνδεση με πραγματικά προβλήματα και την κοινότητα: Η ενεργός συμμετοχή σε τοπικά περιβαλλοντικά ζητήματα, όπως ο σχεδιασμός παρεμβάσεων για τη βελτίωση της γειτονιάς, επιτρέπει στα νήπια να συνδέσουν τη σχολική μάθηση με τον πραγματικό κόσμο. Οι δραστηριότητες αυτές ενισχύουν την αίσθηση συλλογικής δράσης και κοινωνικής υπευθυνότητας, όπως υποστηρίζεται και από διεθνείς έρευνες που δείχνουν ότι η εμπλοκή σε αυθεντικά προβλήματα βελτιώνει την ενεργή συμμετοχή και τη βιωματική μάθηση (Marsh et al., 2018; Papadakis & Kalogiannakis, 2019; Kontovourki & Tafa, 2019).

Στο πλαίσιο της θεωρίας του Kolb (2014), το πρόγραμμα «Πράσινες γειτονιές» επισημαίνει την σημασία της παρατήρηση, της εμπειρίας, της αναστοχαστικής σκέψης και της ενεργούς συμμετοχής των παιδιών στο περιβάλλον τους. Οι ψηφιακές εφαρμογές λειτουργούν ως εργαλεία υποστήριξης αυτής της διαδικασίας, δίνοντας τη δυνατότητα στα παιδιά να καταγράψουν, να αναπαραστήσουν και να αναλύσουν τα δεδομένα της εμπειρίας τους, ενισχύοντας την περιέργεια και την αυτενέργεια των παιδιών.

Ένα επιπλέον στοιχείο του σκοπού του προγράμματος είναι η διασύνδεση των ΤΠΕ με την αειφορία. Οι ΤΠΕ επιτρέπουν στα νήπια να παρακολουθούν και να αναλύουν περιβαλλοντικά δεδομένα, να κατανοούν τις επιπτώσεις των ανθρώπινων δραστηριοτήτων και να προτείνουν λύσεις για τη βελτίωση του φυσικού χώρου, προωθώντας την οικολογική συνείδηση και τη συμμετοχικότητα (UNESCO, 2017; Sterling, 2010). Με τον τρόπο αυτό, η χρήση ψηφιακών εργαλείων δεν περιορίζεται στην τεχνολογική διάσταση, αλλά ενσωματώνεται στην ολιστική παιδαγωγική προσέγγιση του αειφόρου σχολείου.
